10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

**FAM MED 927 – RURAL AND COMMUNITY CLINICAL ELECTIVE IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of Family Medicine in the rural community, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning.

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

### **FAM MED 930 – URBAN AND COMMUNITY CLINICAL ELECTIVE IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of Family Medicine in a urban community, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning.

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

### **FAM MED 931 – ADDICTIVE DISORDERS MANAGEMENT IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of Family Medicine approaches to Addictive Disorders, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning.

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

**FAM MED 933 – SPORTS MEDICINE ELECTIVE IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of Sport Medicine in Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning.

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

**FAM MED 935 – INPATIENT ELECTIVE IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of Family Medicine in an inpatient setting, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 4 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective inpatient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop inpatient and clinically relevant questions to advance learning.

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

14. Recognize limitations and seek assistance as appropriate.

**FAM MED 937 – FAMILY MEDICINE UW HOSPITAL SUB-INTERNSHIP**

1-6 credits.

Introduction to the principles of Family Medicine, emphasizing continuing and comprehensive care. Share ongoing responsibility for the patient in both health maintenance and illness. Emphasis upon commitment to the person and understanding the problems in the total context of the patient's life.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**FAM MED 938 – HOSPICE & PALLIATIVE CARE ELECTIVE IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of hospice and palliative care as it relates to Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis will be placed on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning.

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

**FAM MED 940 – COMMUNITY BASED CARE OF THE ELDERLY**

2-4 credits.

Training in transitions of care, the capabilities of nursing homes, the importance of interdisciplinary teams and the regulatory requirements and workings of the health care system. Interdisciplinary geriatric teaching service that includes experiences in a nursing home and the community. Didactic lectures are followed by bedside rounds, where geriatric topics are applied. Introduction to the principles of Family Medicine, emphasizing continuing and comprehensive care. Share ongoing responsibility for the patient in both health maintenance and illness. Emphasis upon commitment to the person and understanding the problems in the total context of the patient's life.

**Requisites:** MED SC-M 810, 811, 812, and 813**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2018**FAM MED 941 – INTEGRATIVE HEALTH ELECTIVE IN FAMILY MEDICINE**

2-4 credits.

In-depth exposure to the principles of Integrative Health as it relates to Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning.

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

**FAM MED 943 – INFECTIOUS DISEASE SURVEILLANCE**

2 credits.

Basics of infectious disease, including the microbiologic, virology, and parasitology of human disease, the immune response to infection, pathologic changes related to infectious disease, and the pharmacology of anti-infectious agents. Understanding antimicrobial stewardship, importance of prevention, including vaccination, and an understanding of infectious disease surveillance on local, regional, national, and global systems. Appreciation of emerging infectious threats, threats from climate change on microbiota, and the epidemiology of an emerging infection.

**Requisites:** MED SC-M 810, 811, 812, and 813, and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Identify and describe immunologic response to infectious diseases.

Audience: Graduate

2. Apply and adapt the pharmacology of antimicrobial, antiviral and antiparasitic therapies.

Audience: Graduate

3. Demonstrate knowledge of the microbiology, virology, and parasitology of significant human diseases.

Audience: Graduate

4. Identify and describe the pathologic response to infectious disease in the human host.

Audience: Graduate

5. Delineate the return on investment in preventative interventions to infectious diseases and understand the surveillance pathways and processes at all levels of reporting from local health departments to the World Health Organization.

Audience: Graduate

6. Explain the surveillance pathways and processes at all levels of reporting from local health departments to the World Health Organization

Audience: Graduate

7. Identify the health effects of climate disruption on food-borne, water-borne, and other infectious disease threats.

Audience: Graduate

8. Research the epidemiology of various infectious diseases, including their distribution, prevalence, incidence, and determinants.

Audience: Graduate

9. Explain emerging infectious threats including threats from climate change.

Audience: Graduate

**FAM MED 944 – OFFICE-BASED PROCEDURES IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to principles of office-based procedures in Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Develop self-awareness as student physician, recognition of patient attitudes, and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care. Share ongoing responsibility for the patient in evaluation, diagnosis, procedure and follow-up. Small office procedures may include; vein treatments, skin lesion removal, prolotherapy, perineural injection therapy, no-scalpel vasectomy, thread carpal tunnel release, liposuction, hemorrhoid treatments, and frenotomy for tongue tie.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Demonstrate the appropriate use of patient education.

Audience: Graduate

2. Demonstrate understanding of informed consent process.

Audience: Graduate

3. Share ongoing responsibility for the patient evaluation, diagnosis, procedure and follow-up.

Audience: Graduate

4. Demonstrate skill in addressing problems in the broader context of the patient's life.

Audience: Graduate

5. Use proper procedural techniques for office-based surgical procedures common to Family Medicine.

Audience: Graduate

6. Perform minor procedures with supervision.

Audience: Graduate

7. Develop self-awareness as student physician, and ability to recognize patient attitudes and use interactions as a therapeutic tool.

Audience: Graduate

8. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

9. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

10. Review, interpret and present current literature to support patient's planned procedure.

Audience: Graduate

11. Develop procedural and surgical relevant questions to advance learning.

Audience: Graduate

12. Communicate effectively with patients, family, physicians and non-physician team members.

# FARM AND INDUSTRY SHORT COURSE (FISC)

## FISC 20 – INTRODUCTION TO PLANT SCIENCE

2 credits.

Students will learn about growing crops and plants, the basics of plant growth, how plants have diversified based on environmental locations, classifications of plants, and general plant nutrition.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

## FISC 21 – AGRICULTURAL SALES

2 credits.

Students will learn the basic steps to the sales process in order to prepare for a career in agricultural sales and related sales applications found in daily life; develop sales-related skills, such as negotiation skills, body language, and time management skills; and reflect on and develop personal strengths and abilities that will enhance agricultural sales presentations and customer relationships.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

## FISC 23 – SAFE AND EFFECTIVE USES OF PESTICIDES IN AGRONOMIC CROPS

1 credit.

Students will learn about the multiple aspects of pesticides (herbicides, insecticides, and diseases) use in WI agronomic crops through learning about the patterns, application methods, resistance, regulation, and safe application. Emphasis will be placed on how to utilize existing resources to use pesticides safely, legally, and effectively while minimizing environmental impacts.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

## FISC 49 – AGRICULTURAL WEATHER AND CLIMATE

1 credit.

Introduces the concepts of weather and climate, and discusses the importance of weather and climate for agricultural production. Covers the methods of collecting, accessing, and using weather information for agricultural management and planning. In addition, covers the underlying physical principles associated with anthropogenic climate change.

**Requisites:** Declared in the Farm Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Articulate the differences between weather and climate

Audience: Undergraduate

2. Identify weather data important for agricultural production and how to best obtain those data

Audience: Undergraduate

3. Use weather and environmental data to plan agricultural management activities

Audience: Undergraduate

4. Explore how agriculture contributes to greenhouse gas emissions and climate change

Audience: Undergraduate

**FISC 50 – THE BUSINESS OF AGRICULTURE**

1 credit.

Examines the five areas of risk management of an agricultural business: production risk, human risk, financial risk, market risk, and institutional risk. Discusses the internal and external contexts affecting the management of an agricultural business. Investigates the changing structures of agriculture, creating a unique landscape for today's agricultural businesses. Students are encouraged throughout the course to reflect on and discuss examples from their own experiences, and think critically about how these factors may impact their strategy for managing a business.

**Requisites:** Declared in the Farm Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Articulate the five areas of risk management and how they affect an agricultural business.

Audience: Undergraduate

2. Identify internal and external contexts impacting your agricultural business.

Audience: Undergraduate

3. Develop your skills in business relationship management.

Audience: Undergraduate

4. Explore management strategies to maintain a competitive and smart agricultural business.

Audience: Undergraduate

5. Consider tools to manage risk through diversification, marketing strategies, and distinguishing your business from the competition.

Audience: Undergraduate

**FISC 51 – BUSINESS PRINCIPLES OF AGRICULTURAL MANAGEMENT**

1 credit.

An introduction to the working of a market economy and decision-making concepts; the role of prices and preferences in making production and consumption decisions; U.S. agricultural system and various economic policies that may be employed by government; Taxation, regulation, trade, and employment policies.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**FISC 52 – AGRICULTURAL SAFETY AND HEALTH**

1 credit.

Causes and prevention of common farm injuries and illnesses; control of hazards; types of fatal and non-fatal injuries; tractor and machinery-related injuries and operating practices; hazards to children; animal-related injuries; confined spaces; respiratory hazards; chemical exposure; personal protective equipment; OSHA, DOL, and EPA worker-related regulations; causes and prevention of injuries including inspections and hazard control, and safety management strategies and activities.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**FISC 53 – AGRICULTURE HUMAN RESOURCES MANAGEMENT**

1 credit.

Understanding roles of manager, leader, and communicator; developing a human resource management philosophy; finding and retaining employees; legal considerations.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**FISC 54 – AGRIBUSINESS COMMUNICATIONS**

2 credits.

Introduction to interpersonal communication skills for use in a variety of agribusiness settings. Topics include verbal, non-verbal, and written communication methods; negotiation skills; promotion techniques; and the application of these in agribusiness.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**FISC 55 – FARM AND INDUSTRY SHORT COURSE FIRST-YEAR SEMINAR**

1 credit.

Provides first-year Farm Industry Short Course students with an academic orientation to the FISC program. Topics include current agricultural- and consumer-related issues (e.g., food systems, agriculture advocacy, climate change, etc.), academic and career development, and an introduction to the academic resources and opportunities of the college and university.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**FISC 56 – AGRICULTURE, FOOD SYSTEMS, AND RURAL DEVELOPMENT**

1 credit.

Students will study how national economic and social policies affect farmers and rural residents. Topics include rural economic trends and issues; rural development policies; state and local taxes; local land use planning; farm financial stress and government intervention; farmer-natural resource use conflicts; and the impacts of international trade agreements and export policies.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**FISC 57 – INTRODUCTION TO SOILS**

2 credits.

Soil formation; important physical and chemical properties; soil moisture; introduction to soil fertility; soil mapping and classification.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**FISC 58 – FORAGE CROPS**

2 credits.

Identification and characteristics of forage legumes and grasses; management and culture of legumes, grasses and grass-legume mixtures; weed, insect, and forage disease control; hay and haymaking; legume, grass, and corn silage; forage varieties and their uses; forage quality and its importance in feeding livestock; pasture types and improvement; forage production trends.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**FISC 59 – FOOD SAFETY**

1 credit.

Covers basic principals of food safety including safeguarding our food supply and preventing food-born illnesses from farm to market.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**FISC 61 – DAIRY HERD HEALTH**

1 credit.

In this course, students will learn the basic veterinary medical terminology and goals of a veterinarian as it pertains to the dairy cow and dairy young stock. Students will understand how to prevent herd health problems and will begin to recognize signs when they arise. Students will also be able to discuss health problems with the herd veterinarian. Specific topics will include: cattle disease problems; how the animal body works; digestive disorders, noninfectious diseases, principles of infection and sanitation; state regulations against disease.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**FISC 63 – DAIRY HERD MANAGEMENT**

2 credits.

In this comprehensive course, students will learn how to care for their herd to increase production and profits. Use of business, feeding, and herd management tools in dairy farm operation will be covered in depth. Case studies of individual farms used for analysis and planning. Specific topics covered will include: cattle movement and behavior, calf care, heifer care, nutrition, reproduction, fresh cows and diseases, parlor management, milk harvest, mammary anatomy, mastitis and milk quality control, cattle comfort and housing options, herd culling decisions, and interacting with the consumer.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**FISC 71 – PASTURE MANAGEMENT**

1 credit.

This course covers pasture establishment, pasture improvement and pasture plant growth. Students will also learn about the in-depth topics of pasture layouts, fencing and water systems, animal behavior on pastures, general pasture utilization and animal nutrient needs on pasture, including supplemental feeding.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**FISC 72 – PASTURE BASED DAIRY/LIVESTOCK - BUSINESS START-UP AND MARKETING**

1 credit.

Students will learn production and management strategies emphasizing pasture-based dairy or livestock farm start-up. Students will begin a business plan in this introductory course as the first of the two-course series. There will be one full-day required field trip. This course is held in conjunction with, and serves as the core of, the Wisconsin School for Beginning Dairy and Livestock Farmers (WSBDF).

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**FISC 73 – PASTURE BASED DAIRY/LIVESTOCK - MANAGING THE BUSINESS**

1 credit.

Course covers grass-fed production and marketing, risk management (specifically of pasture-based farms), pasture soil nutrient management, grazing and natural resource management, and ecological restoration through livestock. Students will present their business plans to a panel of lenders. Students will be required to attend four evening Business Plan Writing Workshops. This is the final course in the two-course series of the Wisconsin School for Beginning Dairy/Livestock Farmers (WSBDF) program.

**Requisites:** FISC 72

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**FISC 75 – SPECIAL TOPICS IN FISC**

1-3 credits.

Specialized subject matter of current interest to FISC students.

**Requisites:** Declared in Foundations of Farm Management certificate program

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**FISC 101 – MEAT ANIMAL PRODUCTION I**

2 credits.

In this course, students will be focusing on the ruminant livestock production systems. Students will evaluate and design the implementation of foundational principles in beef cattle, sheep and goat production. Through the connecting of production system to market costs and revenues, students will gain an in-depth understanding of meat animal livestock production. Students will have hands-on experiences in beef cattle, sheep and goat management.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**FISC 104 – GRAIN CROPS PRODUCTION & MANAGEMENT**

2 credits.

This course covers corn, soybeans, and small grains (wheat). Current production recommendations related to hybrid and variety selection, seedbed preparation, pest control, fertility management, harvest, storage, marketing, and crop ecology will be discussed. Students will be encouraged to explore resources and develop confidence to find solutions on the farm.

**Requisites:** Declared in Foundations of Farm Management or Crops & Soils Management certificate program

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**FISC 105 – DAIRY CATTLE SELECTION AND EVALUATION**

2 credits.

In this course, students will learn the basics of genetic selection programs and the effectiveness of appropriate selection strategies specific to the dairy farm. Genomic testing research and advanced reproductive techniques will be discussed and students will learn about the correct application of these techniques on their farm. Basic anatomy of a dairy cow and linear scoring systems. After establishing dairy cow conformation and functionality and appraisal systems, students will evaluate cattle using type scorecards to improve the appearance, performance and longevity of dairy cattle. Following the understanding of the factors that impact the value of cattle, students will also learn how to apply corrective mating programs to improve perceived defects or nonexistent features in their herd(s).

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**FISC 110 – LIVESTOCK HOUSING**

2 credits.

This covers planning of dairy, beef and swine, livestock housing for proper environmental control, manure and feed handling, and labor and capital efficiency. Topics include building materials, heat loss, silo sizing, cost estimating, computer aided design, and ventilation and manure storage. Students will develop a plan for their own farmstead. This course is useful for those who plan to construct livestock buildings within the next 5-15 years, including those who want to work in the farm building trade.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**FISC 114 – RUMINANT NUTRITION**

2 credits.

Students will learn practical nutrition for lactating dairy cows, dairy heifers, and dairy beef. This course covers digestion and nutrient metabolism, milk synthesis and ration formulation guidelines and stresses importance of quality forage in the feeding program. Students will learn the basic anatomy and physiology of the digestive system of ruminant animals and how feeding and management are geared toward optimizing rumen function. This course will introduce the basic concepts of nutrition and how feeds provide nutrients and basic skills necessary for feeding dairy cattle. Students will learn how to assess animal performance and adequacy of the feeding program through evaluating intake, body condition, and transition cow health and learn how to feed and manage growing ruminants.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**FISC 115 – AGRIBUSINESS FEASIBILITY PLANNING**

1 credit.

Accounting, budgeting and communication skills are necessary to develop and evaluate farm business plans. Students are introduced to computerized farm accounting and will develop skills with modern electronic spreadsheets and FINPACK while developing a case farm feasibility assignment.

**Requisites:** FISC 51

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**FISC 119 – INTRODUCTION TO TURFGRASS MANAGEMENT**

2 credits.

Use and management of turfgrass landscapes in urban and suburban environments, including home lawns, golf courses, and sports fields. Focus is on creating sustainable and attractive turfgrass landscapes through proper species selection, use of slow-release or organic fertilizer practices, and minimizing the use of pesticides and supplemental irrigation.

**Requisites:** Declared in the Farm Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Describe how turf is used in urban and suburban communities.

Audience: Undergraduate

2. Identify the positive environmental impacts of using turfgrass.

Audience: Undergraduate

3. Identify the negative environmental impacts of using turfgrass.

Audience: Undergraduate

4. List common turf species used in Wisconsin and discuss the attributes of each.

Audience: Undergraduate

5. Identify the three major pest groups in turfgrass and describe sustainable management strategies for each.

Audience: Undergraduate

6. Identify positive and negative attributes of artificial turf.

Audience: Undergraduate

**FISC 120 – MEAT ANIMAL EVALUATION & MARKETING**

2 credits.

This course demonstrates how meat animals within a species differ in value, grade and yield. This course will also cover price determination and marketing systems for each species. The students will receive hands-on experience in evaluating, slaughtering, and cutting beef and pork. Lamb processing and manufacturing of processed meat items will be demonstrated.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**FISC 121 – AGRICULTURAL COMMODITIES MARKETING**

2 credits.

This course focuses on the farm and its marketing environment and provides an overview of the economics of grain and milk markets. The course concentrates on developing skills for effective grain and dairy marketing analysis and strategies. It examines forward contracting, hedging on futures markets, delayed pricing and options trading. It will also examine farm policies and the impact on farms. Students will gain an understanding and appreciation of the commodity and futures markets, major trends and causes of trends in dairy and grain industries, market factors that influence farm commodities, risk tools and cooperatives.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**FISC 122 – TURFGRASS NUTRIENT MANAGEMENT**

2 credits.

Nutrient requirements of turfgrasses; nature of turfgrass response to fertilization; soil and tissue testing methodology and interpretation; writing effective nutrient management plans.

**Requisites:** FISC 20 and 119

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Carry out common calculations necessary for a career in turfgrass management

Audience: Undergraduate

2. Develop a detailed fertility plan for a turf area of your choice based on principles of turfgrass nutrition and soil science

Audience: Undergraduate

3. Interpret a variety of soil test reports

Audience: Undergraduate

4. Integrate your knowledge of fertility, irrigation management, water quality, and the environment to develop a nutrient management plan for a golf course

Audience: Undergraduate

**FISC 123 – TURFGRASS INTEGRATED PEST MANAGEMENT**

2 credits.

Using tools to effectively manage the most common weed, insect, and disease pests seen on turfgrass in the Midwest; including proper identification of each pest, the biology of each pest, and cultural and chemical control strategies for each pest.

**Requisites:** FISC 119**Repeatable for Credit:** No**Last Taught:** Fall 2021**Learning Outcomes:** 1. Describe methods for reducing non-target effects of turfgrass pesticide applications

Audience: Undergraduate

2. Demonstrate effective calibration and application of both liquid and dry formulated pesticides

Audience: Undergraduate

3. Identify the most common weed pests of Wisconsin turfgrass, describe their biology, and list effective cultural and chemical weed control strategies

Audience: Undergraduate

4. Identify the most common insect pests of Wisconsin turfgrass, describe their biology, and list effective cultural and chemical insect control strategies

Audience: Undergraduate

5. Identify the most common disease pests of Wisconsin turfgrass, describe their biology, and list effective cultural and chemical disease control strategies

Audience: Undergraduate

**FISC 124 – TURFGRASS IRRIGATION AND DRAINAGE**

1 credit.

Water and irrigation requirements of turfgrasses; irrigation budgeting and scheduling; water conservation strategies; soil water flow and drainage; evaluation of irrigation water quality.

**Requisites:** FISC 119**Repeatable for Credit:** No**Last Taught:** Fall 2021**Learning Outcomes:** 1. Carry out common calculations necessary for creating a water budget for turfgrass areas

Audience: Undergraduate

2. Develop a detailed, site-specific water conservation plan for a turfgrass area based on principles of turfgrass management and soil science

Audience: Undergraduate

3. Interpret a variety of water test reports, and develop a management plan for dealing with poor quality water

Audience: Undergraduate

4. Make decisions about root zone construction for turfgrass areas, including drainage options to achieve agronomic goals while minimizing water use

Audience: Undergraduate

**FISC 133 – SOIL AND CROP NUTRIENT MANAGEMENT**

2 credits.

Students will understand how to sample and analyze soil to determine nutrient composition and deficiencies, apply knowledge of crop needs to develop nutrient management plans for various crops across a spectrum of Wisconsin soil types, and understand how other properties of soil, including drainage and erosion, can impact nutrient levels and crop productivity.

**Requisites:** FISC 57**Repeatable for Credit:** No**Last Taught:** Spring 2020**FISC 134 – REPRODUCTION OF FARM ANIMALS**

2 credits.

Students will learn the basic comparative physiology of reproduction of farm animals and apply those physiological principles to understand successful heat detection, artificial insemination, estrous synchronization, embryo transfer, pregnancy diagnosis, and improvement of reproductive efficiency through good reproductive management.

**Requisites:** Declared in the Farm & Industry Short Course program**Repeatable for Credit:** No**Last Taught:** Spring 2022

**FISC 136 – AGRICULTURAL BUSINESS LAW**

1 credit.

This course will provide a basic overview of some of the areas of the law that may impact the farm or agribusiness, and assist students in identifying practices and activities that may impact their legal liability. Students will become acquainted with basic legal terms and concepts, understand basic techniques of legal analysis, be able to identify legal issues and be better equipped to explain issues to attorneys.

**Requisites:** Declared in the Farm & Industry Short Course program

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**FISC 140 – FARM MACHINERY**

2 credits.

Principles of operation, construction, maintenance, and management of machines for the production of agricultural crops. Laboratory sessions include working with machine components and actual field machines. Previous experience with farm machinery is not required.

**Requisites:** Declared in Foundations of Farm Management or Farm and Equipment Operations certificate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**FISC 142 – IDENTIFICATION AND MANAGEMENT OF AGRONOMIC PESTS**

3 credits.

Introduces students to principles in Integrated Pest Management with an emphasis on pest biology and management in agronomic settings.

**Requisites:** Declared in Crops and Soils Management or Diversified Ag Operations certificate program

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**FISC 143 – FARM POWER**

2 credits.

Principles of operation, construction, maintenance, and management of agricultural tractors and engine power systems. Covers two- and four-stroke diesel and spark-ignition engines, lubrication, cooling, fuel systems, power measurement, electrical systems, and transmissions. Labs focus on understanding the tractor and engine but do not include tractor or engine overhauls. Course assumes no previous experience with tractors or engines.

**Requisites:** Declared in Foundations of Farm Management or Farm and Equipment Operations certificate program

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**FISC 145 – PRECISION AGRICULTURAL TECHNOLOGIES**

2 credits.

Precision agriculture can aid in reducing inputs for crop production. Course provides an overview of precision agriculture technologies and will cover Global Positioning Systems, Geographic Information Systems, variable rate technology, section/flow control, soil and yield mapping, and guidance systems. Economics of the different technologies will be discussed. Previous experience with precision agriculture systems is not required.

**Requisites:** Declared in Foundations of Farm Management or Farm and Equipment Operations certificate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

## FINANCE, INVESTMENT AND BANKING (FINANCE)

**FINANCE 200 – FINANCE INDUSTRY FUNDAMENTALS**

1 credit.

Comprehensive introduction to the finance industry ecosystem, examining a variety of industry sectors, or "Pathways," within the finance world, providing a nuanced exploration of both macro and micro-level dynamics. Explores the inner workings of firms in each sector, topical events, and latest developments. Deep dive into roles and responsibilities, in preparation for diverse career opportunities.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Obtain a basic understanding of the UW finance industry ecosystem

Audience: Undergraduate

2. Develop a detailed knowledge of the seven finance industry pathways  
Audience: Undergraduate

3. Recognize the distinction between corporate finance, the buy-side, and the sell-side finance industry sectors  
Audience: Undergraduate

4. Explain the interactions between individuals, corporations, the sell-side, and the buy-side  
Audience: Undergraduate

5. Identify the career pathways available within the finance industry  
Audience: Undergraduate

6. Identify the WSB resources available to assist in pathway career exploration, exposure, and preparation (including experiential and extra/co-curricular opportunities, and internal academic and advising resources)  
Audience: Undergraduate

**FINANCE 205 – FINANCIAL MODELING IN EXCEL**

1 credit.

A technical skills course in which you will learn how to construct an error-free, well-structured and user-friendly integrated three-statement company model. Constructing a financial model in Excel is a key skill for success as a financial analyst.

**Requisites:** ACCT I S 100 or 300

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Navigate and utilize the Excel interface, including optimal settings for financial modeling

Audience: Undergraduate

2. Utilize Excel keyboard shortcuts most common to financial modeling

Audience: Undergraduate

3. Understand and utilize best practices to build a financial model that is error-free, well-structured and user-friendly

Audience: Undergraduate

4. Understand and utilize best practices related to error prevention while modeling

Audience: Undergraduate

5. Construct an integrated income statement, balance sheet and cash flow statement

Audience: Undergraduate

6. Incorporate circular references via interest expense and interest income, and manage them with a "circuit breaker"

Audience: Undergraduate

7. Construct a three-statement integrated financial model with a cash sweep and waterfall debt schedule

Audience: Undergraduate

8. Build a model from scratch using corporate historical financial statements as a starting point

Audience: Undergraduate

9. Understand various approaches to developing a top-line forecast

Audience: Undergraduate

10. Apply error checking and correction techniques to completed model to ensure accuracy

Audience: Undergraduate

**FINANCE/ECON 300 – INTRODUCTION TO FINANCE**

3 credits.

Concepts and techniques in corporate finance and investments. Topics include the financial environment, securities markets, financial markets, financial statements and analysis, working capital management, capital budgeting, cost of capital, dividend policy, asset valuation, investments, decision-making under uncertainty, mergers, options, and futures.

**Requisites:** (ECON 101, 111 or A A E 101) and (ACCT I S 100 or 300 or concurrent enrollment) and (GEN BUS 206, 306, ECON 310, MATH 331, STAT/MATH 309, 431, STAT 224, 301, 302, 311, 324, 371 or PSYCH 210 or concur enrollment) or declared undergrad Bus Exchange Program

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply discounted cash flow analysis in various contexts and determine the appropriate discount rate for these calculations.

Audience: Undergraduate

2. Calculate and interpret the effect of leverage on firms' cost of debt, cost of equity, and a company's cost of capital under different assumptions.

Audience: Undergraduate

3. Characterize an efficient market and explain the implications of market efficiency for investors and corporations.

Audience: Undergraduate

4. Characterize different types of securities (including stocks, bonds, and derivatives) and identify the key features of each.

Audience: Undergraduate

5. Compute present and future values under different compounding assumptions.

Audience: Undergraduate

6. Demonstrate a command of the Capital Asset Pricing Model, including its strengths and weaknesses and its use in computing expected returns.

Audience: Undergraduate

7. Demonstrate the power of diversification and the risk-return tradeoff quantitatively.

Audience: Undergraduate

8. Solve capital budgeting problems using appropriate decision rules, taking into account the strengths and weaknesses of the available approaches.

Audience: Undergraduate

**FINANCE 305 – FINANCIAL MARKETS, INSTITUTIONS AND ECONOMIC ACTIVITY**

3 credits.

An analysis of the U.S. financial system, its responsiveness to and impact on economic activity and policy, its procedures for assessing and pricing risks on various financial instruments, and its role in the allocation of funds to different sectors in the economy.

**Requisites:** (ECON/FINANCE 300 or concurrent enrollment), or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the sources and uses of funds for the main financial institutions in the U.S.

Audience: Undergraduate

2. Explain how deposit money is created in the banking system.

Audience: Undergraduate

3. Summarize how government budget deficits affect the money supply.

Audience: Undergraduate

4. Classify the various instruments the Federal Reserve uses to influence interest rates and the money supply.

Audience: Undergraduate

5. Understand how monetary and fiscal policies can affect the economy.

Audience: Undergraduate

6. Explain how monetary policy can affect the aggregate supply schedule in the economy.

Audience: Undergraduate

7. Infer how financing decisions of firms change over the business cycle.

Audience: Undergraduate

8. Interpret how Basle 3 and the Dodd-Frank affect the business model of financial institutions.

Audience: Undergraduate

9. Conclude how the Consumer Financial Protection Bureau affects the business model of financial institutions.

Audience: Undergraduate

**FINANCE 310 – DATA ANALYTICS FOR FINANCE**

3 credits.

With a hands-on approach, covers advanced analytics methods for forecasting, predicting, reporting, and analyzing. Relies on Python as its primary coding language. Begins with a review of coding fundamentals and progressively delves into increasingly realistic and complex finance applications.

**Requisites:** ECON/FINANCE 300

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Understand the fundamentals of programming and how those fundamentals are implemented in Python

Audience: Undergraduate

2. Download, organize, and manipulate data to prepare them for Finance applications

Audience: Undergraduate

3. Visualize and organize Financial Data for the purpose of creating effective presentations

Audience: Undergraduate

4. Apply these programming skills in the context of standard financial applications such as asset pricing model estimation, Monte Carlo simulations for capital budgeting purposes, portfolio optimization, and financial analysis and forecasting

Audience: Undergraduate

**FINANCE/ECON 320 – INVESTMENT THEORY**

3 credits.

Structure and functioning of securities markets; principles of portfolio construction; models of the tradeoff between risk and expected return.

**Requisites:** FINANCE/ECON 300, (MATH 213 or 222) and (GEN BUS 307, 317, 656, ACT SCI 654, 655, ECON 400, 410, STAT/MATH 310, STAT 312, or 333 or concurrent enrollment) or declared in undergraduate Business Exchange program

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Solve real-world investment problems

Audience: Undergraduate

2. Formulate the trade-off between risk and return

Audience: Undergraduate

3. Describe the distribution of returns on broad asset classes

Audience: Undergraduate

4. Identify investors' risk preferences

Audience: Undergraduate

5. Use portfolio optimization techniques to develop an asset allocation for an investor

Audience: Undergraduate

6. Examine factor models of returns

Audience: Undergraduate

7. Compare different equilibrium security pricing models

Audience: Undergraduate

8. Debate market efficiency

Audience: Undergraduate

**FINANCE 325 – CORPORATION FINANCE**

3 credits.

Development of the theory, method and analytical techniques of financial management. Techniques of capital budgeting; valuation of projects and firms; theory of capital structure; dividend policy; cost of capital; mergers and acquisitions.

**Requisites:** FINANCE/ECON 300, ACCT I S 301, (MATH 213 or 222) and (GEN BUS 307, 317, ACT SCI 654, ECON 400, 410, STAT/MATH 310, STAT 312, 333 or concurrent enrollment), or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Set a capital budget

Audience: Undergraduate

2. Evaluate projects with discount cash flow valuation

Audience: Undergraduate

3. Compute the appropriate cost of capital

Audience: Undergraduate

4. Value whole firms with discount cash flow valuation

Audience: Undergraduate

5. Identify factors that determine an optimal capital structure of a firm and how debt impacts financial decisions

Audience: Undergraduate

6. Explain the basics of mergers and acquisitions

Audience: Undergraduate

**FINANCE 330 – DERIVATIVE SECURITIES**

3 credits.

Pricing and uses of the most common derivatives including options, forward contracts, futures contracts, and swaps.

**Requisites:** FINANCE/ECON 300, (MATH 213 or 222), and (GEN BUS 307, 317, 656, ACT SCI 654, 655, ECON 400, 410, STAT/ MATH 310, STAT 312, 333 or concurrent enrollment), or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the differences between various derivative contracts including forwards, futures, options, swaps and credit derivatives.

Audience: Undergraduate

2. Derive the no-arbitrage forward/futures prices.

Audience: Undergraduate

3. Demonstrate the technical skills of applying various option pricing methods.

Audience: Undergraduate

4. Implement various derivative trading strategies to generate profit.

Audience: Undergraduate

5. Use derivatives to hedge financial and business risks.

Audience: Undergraduate

**FINANCE 340 – FIXED INCOME SECURITIES**

3 credits.

Analysis of fixed income, bond markets. Introduce tools for evaluating bonds and making decisions about trading and hedging portfolios of fixed income securities. Focus on government bonds and derivative securities. Consider basic ways to price bonds using techniques that are well established on Wall St. Introduces basic trading strategies based on exploiting mis-priced securities. Strategize ways to measure and minimize risk. Other topics include repo financing, mortgage markets, and basic issues involving default risk of corporate bonds.

**Requisites:** FINANCE 305, 325, 330, and ECON/FINANCE 320

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the mathematics of fixed income markets.

Audience: Undergraduate

2. Utilize appropriate tools and techniques, including various measures of duration and convexity, to make decisions about trading and hedging portfolios of fixed income securities.

Audience: Undergraduate

3. Explain the structure and uses of fixed income derivative instruments, including options, forwards and swaps.

Audience: Undergraduate

**FINANCE 365 – CONTEMPORARY TOPICS**

1-3 credits.

Exploration of subject areas possibly to be introduced into the business curriculum.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**FINANCE 399 – READING AND RESEARCH-FINANCE**

1-6 credits.

Individual work suited to the needs of undergraduate students may be arranged with faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**FINANCE 410 – BANK MANAGEMENT**

3 credits.

Management of depository financial intermediaries with primary emphasis on commercial banks. Topics include bank regulation, liquidity and reserve position management, loan pricing and analysis, investment portfolio problems and overall asset liability management.

**Requisites:** (FINANCE 305, 325, 330, and ECON/FINANCE 320) or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how bank operations and strategy are impacted by regulatory constraints, competition, and many risks inherent in banking.

Audience: Undergraduate

2. Identify the major components of a bank balance sheet and income statement.

Audience: Undergraduate

3. Analyze bank performance using industry standard bank profitability and capital planning models and the bank regulator CAMELS methodology.

Audience: Undergraduate

4. Manage interest risk in banks.

Audience: Undergraduate

5. Articulate the basics of both commercial and consumer lending including customer profitability analysis.

Audience: Undergraduate

**FINANCE 420 – INVESTMENT BANKING AND CAPITAL MARKETS**

3 credits.

Broad overview of investment banking. Topics covered include valuation, cash flow, initial public offerings, leveraged buyouts, acquisitions, and related corporate governance issues.

**Requisites:** (FINANCE 305, 325, 330, and ECON/FINANCE 320) or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Locate relevant information in financial statements and the footnotes to financial statements and acquisitions, initial public offerings and investment banking

Audience: Undergraduate

2. Utilize appropriate financial tools and databases (e.g., Excel, Capital IQ, Bloomberg) to access and effectively present financial information

Audience: Undergraduate

3. Demonstrate the fluency required to understand conceptually how valuation methodologies work and how changes in assumptions impact valuation

Audience: Undergraduate

4. Build and interpret financial models utilizing the fundamental valuation techniques that investment bankers use including discounted cash flow analysis, comparable companies, precedent transactions and leveraged buyout analysis

Audience: Undergraduate

5. Demonstrate an understanding of capital markets transactions where securities are issued to investors

Audience: Undergraduate

**FINANCE/INTL BUS 445 – MULTINATIONAL BUSINESS FINANCE**

3 credits.

Application of financial theory to the operations of multinational firms; survey of the international financial environment; determinants of international portfolio and direct investment capital flows; management of foreign exchange position and hedging strategies; evaluation of foreign investment projects (multinational capital budgeting); international financial structure decisions; multinational credit institutions and capital markets; taxation of international business.

**Requisites:** (FINANCE 305, 325, 330, and ECON/FINANCE 320), or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the knowledge and technical skills needed to be the treasurer of an international firm

Audience: Undergraduate

2. Apply methods to measure, manage and analyze the effects posed by exchange rate risk to the income statement and balance sheet of a firm

Audience: Undergraduate

3. Evaluate foreign investment decisions

Audience: Undergraduate

4. Articulate the choices and challenges faced by managers when sourcing funds in the global capital markets, and in making complex foreign investment decisions

Audience: Undergraduate

**FINANCE 457 – ENTREPRENEURIAL FINANCE**

3 credits.

Discusses the tools helpful for financing new ventures, with emphasis on their applications. The course also helps students understand the institutional setting that has an impact on the financing conditions of new ventures.

**Requisites:** FINANCE/ECON 300, ACCT I S 301, and (MATH 213 or 222)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**FINANCE/ECON 503 – MARKETS WITH FRICTIONS**

3 credits.

Search theory provides framework for understanding markets and is used to study questions in monetary, public, financial economics. Develop theoretical tools used to introduce frictions in formal models and address the role of frictions in several applied scenarios.

**Requisites:** (FINANCE 305, 325, 330, and ECON/FINANCE 320), (ECON 301, 302, 311, or 312), or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine new issues related to frictional markets by looking at old issues in new ways.

Audience: Both Grad & Undergrad

2. Demonstrate economic reasoning about the economy at a micro and macro level by applying the foundations of mainstream economics.

Audience: Both Grad & Undergrad

3. Explain credit market rationing and its impact on markets for housing, small business loans and other investments.

Audience: Both Grad & Undergrad

4. Articulate the contributing factors of bubbles and crashes in asset prices.

Audience: Both Grad & Undergrad

5. Articulate the role of money and banking in the inter-temporal allocation of resources.

Audience: Both Grad & Undergrad

6. Articulate your perspectives on fundamental questions like: Why we use money? What is a bank? How do organizations (like firms or families) form?

Audience: Both Grad & Undergrad

7. Construct and analyze the three generations of money search models and apply this framework appropriately to real-world economic and financial issues.

Audience: Graduate

**FINANCE 535 – APPLIED EQUITY MARKETS RESEARCH 1**

3 credits.

A capstone experience focused on investments, research, sales and trading which is designed to provide the opportunity to learn and perform many of the practical skills necessary to research, analyze and pitch equity securities as long investments and/or short sales. Application required.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Assess business models so as to understand the future performance and intrinsic value of a particular business

Audience: Undergraduate

2. Develop a framework to assess business quality and how it might change over time

Audience: Undergraduate

3. Identify key drivers of an industry and company

Audience: Undergraduate

4. Analyze the financial information that comes to market from the companies as a means to extrapolate future information

Audience: Undergraduate

5. Develop a view (a preliminary investment thesis) utilizing a methodology to develop forecasts and projected financial model for a company

Audience: Undergraduate

6. Write a short investment thesis and recommendation for a company's stock

Audience: Undergraduate

**FINANCE 536 – APPLIED EQUITY MARKETS RESEARCH 2**

3 credits.

A second capstone experience involving self-directed research and analysis in the areas of investments, research, sales and trading designed to provide the opportunity to apply concepts learned in FINANCE 535. FINANCE 535

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Analyze two specific companies and their business models to estimate likely future performance and intrinsic value.

Audience: Undergraduate

2. Describe the competitive dynamics in the related industries

Audience: Undergraduate

3. Explain how key drivers affect a company's financials

Audience: Undergraduate

4. Conduct field research to assess the business models and validate key drivers

Audience: Undergraduate

5. Create a survey to views (preliminary investment theses) with evidence from field research

Audience: Undergraduate

6. Create a pitch report for each stock summarizing conclusions with supporting analysis

Audience: Undergraduate

7. Develop presentation techniques through in-class stock pitch presentations

Audience: Undergraduate

**FINANCE 601 – STRATEGIC PLANNING FOR ESTATES AND BUSINESS TRANSITIONS**

3 credits.

Introduces and broadens understanding of the intricacies surrounding wealth preservation, intergenerational wealth transfer, and trust financial services. Delves into the legal, tax, and financial aspects of estate planning, business succession strategies, and efficient wealth transfer techniques. Explore cutting-edge approaches for mitigating tax liabilities, navigating complex family dynamics, and structuring customized solutions for diverse client needs while highlighting career opportunities within the trust financial services industry and preparing for a range of professional paths. Gain the expertise needed to effectively advise clients and guide them through the process of safeguarding and transferring their wealth, ensuring a lasting financial legacy.

**Requisites:** (FINANCE 305, 325, 330, and ECON/FINANCE 320) or FINANCE 700, or declared in the Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply Estate Planning terminology, planning process, strategies and illustrate tax and non-tax outcomes.

Audience: Both Grad & Undergrad

2. Procure and analyze select qualitative and quantitative data to prioritize goals, articulate current plan weaknesses and formulate alternative options.

Audience: Both Grad & Undergrad

3. Demonstrate how various Trust arrangements might maximize the benefits or improve the efficiency of an estate plan.

Audience: Both Grad & Undergrad

4. Collaborate with other professionals, on the development of an Estate Plan by experiencing the Multi-Disciplinary Team Approach to Estate Planning.

Audience: Both Grad & Undergrad

5. Apply the CFP Board Financial Planning Practice Standards and Code of Ethics to the practice of Estate Planning.

Audience: Both Grad & Undergrad

6. Describe the various methods, benefits and tax treatment of disposing a closely-held business during life and at death.

Audience: Graduate

**FINANCE 602 – WEALTH MANAGEMENT & FINANCIAL PLANNING**

3 credits.

Capstone bridging prior academic coursework with professional practice and standards. Employ skills and tools needed to acquire the relevant information and develop a comprehensive financial plan for a client. Provides a complete review of the financial planning CFP Board topics, including ethics and principles of communication and counseling.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate a comprehensive understanding of the content found within the Financial Planning curriculum and effectively apply and integrate this information in the formulation of a financial plan.

Audience: Both Grad & Undergrad

2. Effectively communicate the financial plan, both orally and in writing, including information based on research, peer, colleague or simulated client interaction and/or results emanating from synthesis of material.

Audience: Both Grad & Undergrad

3. Collect all necessary and relevant qualitative and quantitative information required to develop a financial plan.

Audience: Both Grad & Undergrad

4. Analyze personal financial situations, evaluating clients' objectives, needs, and values to develop an appropriate strategy within the financial plan.

Audience: Both Grad & Undergrad

5. Demonstrate logic and reasoning to identify the strengths and weaknesses of various approaches to a specific problem.

Audience: Both Grad & Undergrad

6. Evaluate the impact of economic, political, and regulatory issues with regard to the financial plan.

Audience: Graduate

7. Apply the CFP Board Financial Planning Practice Standards to the financial planning process (including applying the regulations and ethical behavior that governs the relationship between the planner and the client).

Audience: Both Grad & Undergrad

**FINANCE 610 – BANK SIMULATION AND STRATEGY**

3 credits.

Covers advanced asset-liability, hedging, tax minimization, merger/acquisitions and economic value added strategies for depository financial institutions. Students practice these strategies by managing their own bank in a computer simulation model, merging with or acquiring other student's banks using MA software, and by playing a foreign exchange trading simulation.

**Requisites:** FINANCE 410

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**FINANCE 635 – BUSINESS VALUATION**

3 credits.

Theory and practice of business valuation: using financial statements, modeling cash flows, present value, using multiples.

**Requisites:** (FINANCE 305, 325, 330, and ECON/FINANCE 320) or FINANCE 700, or declared in the Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate a fundamental knowledge of the terminology, foundational concepts and tools necessary to value companies

Audience: Both Grad & Undergrad

2. Demonstrate the ability to forecast and use appropriate financial statements to determine the value of companies

Audience: Both Grad & Undergrad

3. Utilize financial data sources for valuation

Audience: Both Grad & Undergrad

4. Build valuation models using spreadsheets

Audience: Both Grad & Undergrad

5. Articulate the differences as well as the common elements among the various valuation models

Audience: Both Grad & Undergrad

6. Apply common valuation methods

Audience: Both Grad & Undergrad

7. Incorporate environmental, social, and governance (ESG) into company valuation

Audience: Graduate

## **FINANCE 640 – INTRODUCTION TO CREDIT ANALYSIS & TRADING**

3 credits.

Thorough grounding in credit instruments. Topics include loans, bonds, credit default swaps, and trading strategies.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Forecast a company's financial capital structure, liquidity and credit metrics, which will indicate whether the credit profile will improve or deteriorate.

Audience: Both Grad & Undergrad

2. Identify the qualitative and quantitative factors that go into evaluating a company's current and future credit profile and assigning credit ratings.

Audience: Both Grad & Undergrad

3. Develop a Bloomberg Launchpad to monitor news and markets and use Bloomberg to evaluate relative value of bonds, loans and credit default swaps.

Audience: Both Grad & Undergrad

4. Explain the similarities and differences in evaluating industrials, financial institutions, municipals and developed and emerging market sovereign debt.

Audience: Both Grad & Undergrad

5. Read and evaluate corporate credit documentation including bank credit agreements and bond prospectuses.

Audience: Both Grad & Undergrad

6. Describe the hierarchy of decisions and different strategies for managing fixed income portfolios and how to evaluate performance vs a benchmark.

Audience: Both Grad & Undergrad

7. Prepare comparable (comps) sheet analysis for financial and sovereign issuers and identify trading opportunities.

Audience: Graduate

## **FINANCE 645 – INTRODUCTION TO APPLIED SECURITY ANALYSIS**

3 credits.

Focuses on industry analysis and security selection, with particular emphasis on identification of value drivers and on communicating the idea to a portfolio manager.

**Requisites:** Declared in Finance, Investment and Banking: Applied Security Analysis, MBA or Finance, Investment and Banking: M.S.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply an analytical framework to a security selection process, including identifying and forecasting key drivers of company performance.

Audience: Both Grad & Undergrad

2. Produce a three-statement financial model with relevant ratios and forward-looking forecasts.

Audience: Both Grad & Undergrad

3. Apply absolute and relative valuation approaches to companies to assist with making investment decisions.

Audience: Both Grad & Undergrad

4. Articulate how analysts conduct field research, including sources frequently used in researching companies, management teams and industries.

Audience: Both Grad & Undergrad

5. Formulate an investment thesis statement and persuasively communicate the recommendation to others.

Audience: Both Grad & Undergrad

6. Establish a network of contacts and relationships in the investment community through the interview process and by participating in alumni and industry events.

Audience: Graduate

## FINANCE 646 – INTRODUCTION TO APPLIED PORTFOLIO MANAGEMENT

3 credits.

Focuses on portfolio management, including development and implementation of the decision making process.

**Requisites:** FINANCE 645

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Produce an economic forecast to be used in developing equity and fixed income market return forecasts and in managing individual equity and fixed income portfolios.

Audience: Both Grad & Undergrad

2. Recommend a tactical asset allocation utilizing equity and fixed income return and risk forecasts.

Audience: Both Grad & Undergrad

3. Develop methodology for allocating assets between the equity and fixed income alternatives that maximizes expected return subject to risk within specified guidelines.

Audience: Both Grad & Undergrad

4. Create an investment philosophy and related portfolio decision making process for its implementation.

Audience: Both Grad & Undergrad

5. Develop a process to identify and critique new investment opportunities.

Audience: Both Grad & Undergrad

6. Monitor and control the risk of an investment portfolio.

Audience: Both Grad & Undergrad

7. Enhance existing network of contacts and relationships in the investment community for job placement, and industry events.

Audience: Graduate

## FINANCE 650 – MERGERS AND ACQUISITIONS

2-3 credits.

Study of the market for corporate control including mergers and tender offers. Motives for business combinations; impacts on security holders, managers, labor, economic efficiency; federal and state laws; offensive and defensive strategies.

**Requisites:** (FINANCE 305, 325, 330, and ECON/FINANCE 320), (FINANCE 700 and 635), or (FINANCE 700 and 725)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the motives for acquisition and how to value an acquisition target both independently and as part of the integrated firm.

Audience: Both Grad & Undergrad

2. Utilize financial statements to calculate earnings, leverage, and cash flow projections resulting from an acquisition or leveraged buyout

Audience: Both Grad & Undergrad

3. Demonstrate a basic understanding of the legal framework underlying the merger transaction, including negotiation, announcement, antitakeover defenses, the fiduciary duties of the board of directors and management, and antitrust regulation

Audience: Both Grad & Undergrad

4. Explain the mechanics of takeover defense strategies, their use and misuse by incumbent management, and the concept of managerial entrenchment

Audience: Both Grad & Undergrad

5. Parse the details of a merger from the disclosed agreement and to understand the incentives of the various parties involved, including target and acquirer management and the facilitating investment bank

Audience: Both Grad & Undergrad

6. Develop a broad theoretical framework that connects the theories of capital structure, managerial entrenchment, corporate governance and diversification to the decision to merge and the financing of the transaction.

Audience: Graduate

**FINANCE 700 – INTRODUCTION TO FINANCIAL MANAGEMENT**

2-3 credits.

Introduction to financial management of firms and investment decision making; both theory and practice are emphasized. Topics covered include the financial environment and securities markets, financial statements and analysis, working capital management and capital budgeting, cost of capital, dividend policy, asset valuation, investments, decision making under uncertainty and selected topics such as mergers, options, futures.

**Requisites:** Declared in a Master of Business Administration degree program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. compute present values, future values, and returns under different compounding assumptions

Audience: Graduate

2. apply discounted cash flow analysis in a variety of contexts and determine the appropriate discount rate for these calculations

Audience: Graduate

3. outline the key considerations in potentially complex capital budgeting problems and employ appropriate decision rules to evaluate projects

Audience: Graduate

4. explain verbally and demonstrate quantitatively the power of diversification and the risk-return tradeoff

Audience: Graduate

5. characterize an efficient market and explain the implications of market efficiency for investors and corporations

Audience: Graduate

6. engage in the study of finance topics with classmates from a variety of personal, professional, and educational backgrounds so as to understand themselves better and how they can positively contribute to both their own and others' success

Audience: Graduate

**FINANCE 720 – INVESTMENT THEORY AND PRACTICE**

3 credits.

Development of the theory, instruments, techniques and practice of modern investment management. Topics include asset pricing and valuation under certainty and uncertainty, portfolio management, determination of interest rates, immunization strategies and derivative securities.

**Requisites:** (FINANCE 700 and GEN BUS 704), declared in graduate Business Exchange program, or Financial Economics MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Formulate the trade-off between risk and return for real-world investment problems

Audience: Graduate

2. Describe the distribution of returns on broad asset classes

Audience: Graduate

3. Use portfolio optimization techniques to develop an asset allocation for an investor

Audience: Graduate

4. Examine factor models of returns

Audience: Graduate

5. Compare different equilibrium security pricing models

Audience: Graduate

6. Debate market efficiency

Audience: Graduate

7. Compute bond prices and relate them to term structure theory

Audience: Graduate

8. Apply interest rate risk management to solve real-world problems

Audience: Graduate

**FINANCE 725 – CORPORATION FINANCE THEORY AND PRACTICE**

2-3 credits.

Theory and practice of financial management of firms. Techniques of capital budgeting under certainty and uncertainty; valuation of projects and firms; theory of capital structure; dividend policy; cost of capital; mergers and acquisitions.

**Requisites:** FINANCE 700**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Explain why, when and how companies raise debt and equity and decide on the mix of both sources of finance.

Audience: Graduate

2. Recognize the effect of agency costs – adverse selection and moral hazard – on the capital structure of the firm.

Audience: Graduate

3. Explain how firms choose to structure hybrid securities to reduce market frictions.

Audience: Graduate

4. Differentiate how firms manage risks both internally as well as with derivative contracts.

Audience: Graduate

5. Summarize the different ways firms return money to investors and the logic behind different payout policies.

Audience: Graduate

**FINANCE 730 – DERIVATIVE SECURITIES - THEORY AND PRACTICE**

3 credits.

Covers the pricing and uses of the most common derivative contracts including options, forward contracts, futures contracts, and exchange-traded funds (ETFs). Also emphasizes a practical understanding of trading and management of portfolios of these contracts, and makes use of an online trading platform. Mathematical and statistical analyses are used throughout.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Compare and contrast the risk and theoretical valuation of derivative securities in competitive markets.

Audience: Graduate

2. Execute “real” trades through Interactive Brokers to connect the theories of hedging and trading derivatives to real-life applications.

Audience: Graduate

3. Summarize research that identifies derivative trading strategies.

Audience: Graduate

**FINANCE 740 – ANALYSIS OF FIXED INCOME SECURITIES**

3 credits.

Detailed coverage of fixed income securities and their derivatives; asset backed/mortgage backed securities; pricing and portfolio strategies; term structures models and other analytical tools.

**Requisites:** (FINANCE 700 and GEN BUS 704) or declared in graduate Business Exchange program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Utilize and be comfortable with the mathematics of fixed income markets.

Audience: Graduate

2. Utilize appropriate tools and techniques, including various measures of duration and convexity, to make decisions about trading and hedging portfolios of fixed income securities.

Audience: Graduate

3. Explain the structure and uses of fixed income derivative instruments, including options, forwards, and swaps.

Audience: Graduate

**FINANCE/INTL BUS 745 – MULTINATIONAL BUSINESS FINANCE**

2-3 credits.

Theory of business finance as applied to the operations of multinational firms; financial analysis and control of foreign investment decisions; working capital management; multinational credit institutions and capital markets; special accounting problems and trends in international monetary affairs.

**Requisites:** FINANCE 700**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate the knowledge and skills needed as a senior financial officer of an international firm.

Audience: Graduate

2. Understand how the international economic and financial environment and the exchange rates affect financial decisions by firms.

Audience: Graduate

3. Apply the methods used to measure, manage and analyze the effects posed by exchange rate uncertainty to the income statement and balance sheet of a firm.

Audience: Graduate

4. Articulate the choices and challenges faced by managers when sourcing funds in the global capital markets, and in making complex foreign investment decisions

Audience: Graduate

**FINANCE 757 – ENTREPRENEURIAL FINANCE**

2-3 credits.

About a half of all new businesses fail in the first five years. Learn about the tools, state-of-the-art valuation methods, and practical knowledge that are needed to make appropriate financing decisions in such highly uncertain environments.

**Requisites:** (FINANCE 700 and GEN BUS 704) or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the different valuation methods, financing alternatives and the ways in which strategic choices interact with valuation and fundraising

Audience: Graduate

2. Integrate the critical roles and processes of the venture capital (VC) industry, the financial instruments they typically use and details of VC contracts

Audience: Graduate

3. Use the necessary theoretical and practical tools to contextualize which valuation method and assumptions are most appropriate in different circumstances

Audience: Graduate

**FINANCE 760 – CURRENT TOPICS AND APPLIED LEARNING IN FINANCE**

1 credit.

Examination and reflection of finance career pathways and current finance skills, applications and practices. Career development techniques and tools, communication and professional skills.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Expand professional network and reflect on interactions with industry professionals

Audience: Graduate

2. Articulate various career pathways and roles within finance

Audience: Graduate

3. Demonstrate developed professional skills, both written and verbal

Audience: Graduate

**FINANCE 765 – CONTEMPORARY TOPICS**

1-4 credits.

Exploration of advanced subject areas possibly to be introduced into the business curriculum.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**FINANCE 799 – READING AND RESEARCH-FINANCE**

1-6 credits.

Individual work suited to the needs of graduate students may be arranged both during regular sessions and the intersession periods.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**FINANCE 830 – ADVANCED DERIVATIVE SECURITIES**

3 credits.

Introduces continuous-time financial models essential for the advanced analysis of derivative securities. Discuss the fundamental mathematical concepts and tools from continuous-time stochastic processes including Brownian motion, Poisson processes, stochastic calculus, and change of measure. This provides a framework for analyzing derivative securities including their pricing, hedging, and risk management. In particular, covers the Black-Scholes and stochastic volatility models for equity options; basic term-structure modeling for interest rate derivatives; and reduced-form credit-risk models. Emphasis is put on applications and economic interpretation rather than mathematical rigor.

**Requisites:** Declared in Financial Economics MS**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Build models for pricing and risk-managing equity, interest rate, and credit derivatives.

Audience: Graduate

2. Explain the relationship between martingales and stochastic discount factors.

Audience: Graduate

3. Apply the rules of stochastic calculus to derive valuation equations for contingent claims relying on the concepts of no-arbitrage and replication.

Audience: Graduate

4. Price derivatives using analytical methods, including log-normal and exponential-affine models.

Audience: Graduate

5. Price derivatives using numerical methods, including Monte Carlo simulations and numerical solutions to dynamic valuation equations.

Audience: Graduate

**FINANCE 835 – APPLIED SECURITY ANALYSIS AND INVESTMENT MANAGEMENT I**

5 credits.

The management of an actual portfolio of investments. Engage in security analysis, develop a portfolio policy, and participate in field research such as trips to interview the management of potential portfolio acquisitions.

**Requisites:** Declared in Finance, Investment and Banking: Applied Security Analysis graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**FINANCE 836 – APPLIED SECURITY ANALYSIS AND INVESTMENT MANAGEMENT II**

4 credits.

Continuation of Finance 835.

**Requisites:** FINANCE 835**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**FINANCE 850 – APPLIED CORPORATE FINANCE I**

4 credits.

Advanced corporate finance course that provides graduate students practical experience by working on consulting projects. Students work on applied projects in the areas of capital budgeting, capital structure and cash distribution policies. Emphasis on application of theoretical corporate finance concepts.

**Requisites:** Declared in Finance, Investment and Banking: Corporate Finance and Investment Banking graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**FINANCE 920 – THEORY OF FINANCE**

3 credits.

Intensive review of modern theories of corporate finance and investments.

**Requisites:** Declared in Business PHD**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**FINANCE 970 – SEMINAR- INVESTMENTS (PH.D.)**

3 credits.

Intensive study and critical examination of recent empirical and theoretical literature investments.

**Requisites:** Declared in Business PHD**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**FINANCE 971 – SEMINAR-CORPORATE FINANCE (PH.D.)**

1-3 credits.

Intensive study and critical examination of recent empirical and theoretical literature in corporate finance.

**Requisites:** Declared in Business or Economics PhD programs

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the theoretical body of work that comprises corporate finance, including its fundamental theorems

Audience: Graduate

2. Examine the big open questions in theoretical research in corporate finance

Audience: Graduate

3. Apply the quantitative methods used in corporate finance research

Audience: Graduate

4. Utilize statistical software and financial databases to perform econometric analyses commonly used in academic corporate finance research.

Audience: Graduate

5. Use standard reduced-form and structural approaches to address problems of endogeneity in answering questions of causality.

Audience: Graduate

6. Identify, describe, and produce questions at the frontier of research in academic corporate finance.

Audience: Graduate

**FINANCE 972 – TOPICS SEMINAR-FINANCE PHD**

3 credits.

Special topics of current or emerging interest in financial economics.

**Requisites:** Declared in Business PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**FINANCE 973 – SEMINAR-WORKSHOP IN FINANCE**

2 credits.

Seminar primarily devoted to the generation of original research in the field of finance for the PhD dissertation and subsequent publication in the academic literature.

**Requisites:** Declared in Business PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze others' research critically, as well as their own

Audience: Graduate

2. Communicate research findings accurately and effectively

Audience: Graduate

3. Access current top-tier research in Finance

Audience: Graduate

**FINANCE 974 – ADVANCED TOPICS SEMINAR-FINANCE PHD**

3 credits.

Discuss topics of current and emerging interests in financial economics; analyze open questions and new methodologies that are being applied to address these questions. Build on knowledge in financial economics and further previous exposure to both continuous-time and discrete-time dynamic models. Topics will evolve over time as new papers will be added and addressed.

**Requisites:** Declared in Business or Economics PhD programs

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Evaluate frontier research papers in financial economics.

Audience: Graduate

2. Formulate a new research question based on surveyed literature.

Audience: Graduate

3. Effectively present research findings in an academic setting.

Audience: Graduate

**FINANCE 990 – FINANCE INDEPENDENT RESEARCH PHD THESIS**

1-12 credits.

Individual work to complete dissertation requirement of Ph.D. program.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### FINANCE 999 – READING AND RESEARCH-FINANCE PHD

1-6 credits.

Individual work suited to the needs of Ph.D. students may be arranged both during regular sessions and during the intersession periods.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## FOLKLORE PROGRAM (FOLKLORE)

### FOLKLORE 100 – INTRODUCTION TO FOLKLORE

3 credits.

Surveys folklore in the United States and around the world, with a comparative emphasis on ways in which individuals and groups use beliefs, songs, stories, sayings, dances, festivals, and artifacts to address issues of identity, authenticity, and authority, in complex societies.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### FOLKLORE/AFROAMER/AMER IND/ASIAN AM/CHICLA 102 – INTRODUCTION TO COMPARATIVE US ETHNIC AND AMERICAN INDIAN STUDIES

3 credits.

Introduction to comparative ethnic studies, examining race, ethnicity, and indigeneity within the United States. Includes perspectives from African American, American Indian, Asian American, and Chican@ and Latin@ studies.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the multicultural history of the United States of America and the essential role of Indigenous, African, Asian and Chicane/x & Latinx/e peoples in the American story.

Audience: Undergraduate

2. Identify the creation, development and legacies of race-based discrimination in the United States.

Audience: Undergraduate

3. Explain the role of race in the creation of value systems in American society.

Audience: Undergraduate

4. Explore the heterogeneity and complexity within persistently marginalized groups as well as their relations to each other.

Audience: Undergraduate

5. Reflect on their learning experience so that they may develop as well-rounded, informed, and educated members of society who can effectively and successfully participate in a multicultural society.

Audience: Undergraduate

### FOLKLORE/MUSIC 103 – INTRODUCTION TO MUSIC CULTURES OF THE WORLD

3 credits.

An introductory ethnomusicology course providing a variety of ways to approach musics typically not covered in music history courses. Active engagement with these musics within their larger world contexts.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage with various musics on students' own terms

Audience: Undergraduate

2. Speak and write clearly about what is heard.

Audience: Undergraduate

3. Recognize and contextualize the several genres of music that represent each cultural area selected for study in the course

Audience: Undergraduate

4. Think rigorously about how positionality, including your own, affects listening and knowledge practices

Audience: Undergraduate

5. Have learned something about yourself -- strengths, weaknesses, biases, desires, tendencies, curiosities

Audience: Undergraduate

### FOLKLORE/RELIG ST 104 – SACRED PLACES AND JOURNEYS

3 credits.

An introduction to the study of religion through the lens of sacred places and journeys, including pilgrimage.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Apply key theories in the study of religion to varied religious phenomena in research and essay writing

Audience: Undergraduate

2. Articulate the influence of positionality in the study of religion

Audience: Undergraduate

3. Articulate how places become perceived, constructed and used as sites of sacrality in different religious, spiritual and secular contexts

Audience: Undergraduate

4. Articulate the complex ways that migration and politics affect the perception and use of sacred sites

Audience: Undergraduate

5. Discuss religious matters in a respectful but detached (non-proselytizing) manner

Audience: Undergraduate

### FOLKLORE/GNS 200 – FOLKLORE OF CENTRAL, EASTERN AND NORTHERN EUROPE

3 credits.

Folklore of Central, Eastern and Northern Europe and among emigrants from these regions in North America. A survey of genres of folklore, history of research, and modes of interpretation, past and present.

**Requisites:** None

**Course Designation:** Gen Ed – Communication Part B

Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recognize and understand key concepts important to the study of folklore as related to the cultures of people in and from the countries of Central, Eastern and Northern Europe.

Audience: Undergraduate

2. Articulate and apply methods folklorists use to document, describe, and discuss culture.

Audience: Undergraduate

3. Produce folkloristic products in the form of essays, oral presentations, and digital products.

Audience: Undergraduate

**FOLKLORE/AFRICAN 210 – THE AFRICAN STORYTELLER**

3 credits.

The oral tradition and the written word; the composition of stories, relationship between performer and audience, and transmission of tradition in various African societies.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**FOLKLORE/ANTHRO/INTL ST/LINGUIS 211 – GLOBAL LANGUAGE ISSUES**

3 credits.

Focuses on language and its culture, example topics include: extinction and revival, language and nationhood, how widely and deeply languages differ, language and worldview, writing systems and literacy, language discrimination and inequality.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Identify ways that geographic, social, and political events, movements, and trends shape the sociolinguistic context of the world's languages

Audience: Undergraduate

2. Demonstrate an understanding of subfields of global sociolinguistic inquiry, including language contact, variation, change, and death; language revitalization; the intersections of language, race, and ethnicity; the intersections of language and gender, and sexuality

Audience: Undergraduate

3. Critically evaluate specific examples of language use in a variety of linguistic and cultural contexts

Audience: Undergraduate

4. Design and conduct a sociocultural linguistic research project, including: identify a research question; collect appropriate resources and data; conduct data analysis and interpretation; draw conclusions, and summarize results

Audience: Undergraduate

**FOLKLORE 215 – ELEMENTARY TOPICS IN FOLKLORE**

1-3 credits.

Exploration of various topics in the study of folklore, folklife, myth, foodways, or music.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**Learning Outcomes:** 1. Demonstrate an understanding of general themes and concepts in the folklore topic being covered.

Audience: Undergraduate

2. Articulate the ways folklore affects and is affected by the society in which it functions.

Audience: Undergraduate

3. Communicate effectively through written essays, oral presentations and discussion.

Audience: Undergraduate

**FOLKLORE 220 – THE FOLK TALE**

3 credits.

Types of heroes, social functions, and tellers; tales from four cultures.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**FOLKLORE 225 – HORROR AS EXPRESSIONS OF NATIONAL ANGST**

3 credits.

Explore horror as cultural phenomenon and how it represents various forms of cultural/national angst.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Recognize, describe and analyze cultural phenomena; specifically horror narrative and the communities that watch them, and put it into context

Audience: Undergraduate

2. Communicate effectively through written essays, oral presentations and discussion

Audience: Undergraduate

3. Analyze the connections between horror narrative and the wider workings of culture

Audience: Undergraduate

**FOLKLORE 230 – INTRODUCTION TO AMERICAN FOLKLORE**

3 credits.

Folklore of ethnic, regional, religious, and occupational cultures, emphasizing how diverse peoples (African Americans, American Indians, Appalachians, Chicanos, Germans, Irish, Jews, Mormons, miners, service workers, etc.) use traditional festivals, artifacts, songs and stories to express their experiences within American life.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2019**FOLKLORE/MEDIEVAL/SCAND ST 235 – THE WORLD OF SAGAS**

3 credits.

The Icelandic sagas viewed in their social, cultural, and literary contexts. An introduction to one of the greatest bodies of vernacular literature of the early Middle Ages.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize, describe and analyze shifting geographic, cultural, and ethnic/racial factors in the Northern European region during the Viking Age, and put it into context  
Audience: Undergraduate

2. Identify and distinguish between different types of sources used in the study of the Nordic region during the Viking Age  
Audience: Undergraduate

3. Demonstrate a general understanding of major scholarly approaches, concepts and current research findings concerning the Nordic region during the Viking Age  
Audience: Undergraduate

4. Synthesize information, engage in discussion and research, and argue persuasively about key topics in the Nordic region during the Viking Age  
Audience: Undergraduate

5. Analyze the connections between images of the Vikings Age and the wider workings of modern culture  
Audience: Undergraduate

6. Guide, mentor and support peers to achieve excellence in practice of the discipline  
Audience: Undergraduate

7. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view  
Audience: Undergraduate

**FOLKLORE 315 – INTERMEDIATE TOPICS IN FOLKLORE**

1-3 credits.

Exploration of various topics in the study of folklore, folklife, myth, foodways, or music.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Synthesize the written and material information to demonstrate an understanding of the knowledge from the course

Audience: Undergraduate

2. Communicate effectively through written essays, oral presentations and discussion.

Audience: Undergraduate

3. Recognize, describe, and analyze cultural concepts, putting them into context.

Audience: Undergraduate

**FOLKLORE 317 – THE IRISH TRADITION**

3 credits.

Survey of Irish folklore and folklife, including narrative, music, dance, customs, material culture, and foodways, in both Ireland and beyond.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and characterize major genres of folklore and folklife in the lives of Irish people inside and outside Ireland, past and present.

Audience: Undergraduate

2. Apply folkloristic scholarship to specific ethnographic field data or archival materials through preparation of interpretative essays and other products.

Audience: Undergraduate

3. Recognize and articulate the ways in which Irish history reflects or illustrates wider processes of colonization, disenfranchisement, migration, nation-building, and cultural diversity at work in other parts of the world today.

Audience: Undergraduate

4. Engage with contemporary scholarship on Irish folklore and gain skills in academic research on the topic.

Audience: Graduate

**FOLKLORE/AFROAMER/ASIAN AM/DANCE 319 – AFRO ASIAN IMPROV: FROM HIP HOP TO MARTIAL ARTS FUSION**

3 credits.

An Afro Asian perspective provides a lens through which intersections between Asian American and African American dance and martial arts are studied and practiced. Asian American and African American movement genres provide tools to explore dance fusion, choreography, and improvisation, to create dances informed by African American and Asian American legacies of struggle, innovation and transformation, while cognizant of historical forces of oppression and racism. Building connections through respectful communication with others are learned through dance practice, discussion and writing about concepts learned through readings, videos, and guest artist visits. Engagement with dance as a cultural vehicle for creative problem-solving and risk-taking occurs through guided class or smaller group activities.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate perspectives on the diversity of the human condition through critical and interpretive skills to analyze the past, present, and future of human movement in a complex world

Audience: Undergraduate

2. Prepare for participation in a multicultural society through developing a consciousness of self and other and building empathy towards others' perspective, thinking critically and questioning assumptions of certain valued or devalued histories, and analyzing how these differences have promulgated disparities in contemporary American society

Audience: Undergraduate

3. Demonstrate skills in writing and speaking about dance in its historical, contemporary and cultural contexts

Audience: Undergraduate

4. Articulate Afro Asian perspectives on the intersections of Asian American and African American cultural, social and historical knowledge, and communicate important ideas through dance and story-telling performance

Audience: Undergraduate

5. Practice Asian American and African American foundational movement toolboxes as a basis for improvisation and dance choreography supported by concepts of theater and culturally-based learning traditions

Audience: Undergraduate

6. Engage in imagination-led and creative problem-solving movement activities

Audience: Undergraduate

7. Build connections with others through class practice, discussions, working groups within and outside of class

Audience: Undergraduate

8. Use the skills you learn to lead a calmer, more focused, responsible and productive life

Audience: Undergraduate

**FOLKLORE 320 – FOLKLORE OF WISCONSIN**

3 credits.

Introduction to folk cultural groups and folklore forms of Wisconsin.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**FOLKLORE/RELIG ST 326 – THE SUPERNATURAL IN THE MODERN WORLD**

3 credits.

Explores evidence of belief in the supernatural in the modern world as it appears in the context of folk religion, folk medicine, legends, folk drama, ritual and custom, and media accounts and presentations. Surveys scholarly approaches to the topic. Course not available to students with credits for Folklore 415 before Fall 2023.

**Requisites:** Satisfied Communications A requirement or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize and explore different types of supernatural narratives, practices, and beliefs from around the world and throughout history.

Audience: Undergraduate

2. Analyze the roles that supernatural narratives, practices, and beliefs play in human societies, and in the lives of individuals.

Audience: Undergraduate

3. Analyze “the supernatural” in relationship to historical memories, cultural anxieties, folk traditions, spiritual beliefs, physiological sensations, political conflicts, environmental disasters, and existential imperatives.

Audience: Undergraduate

4. Engage with the course themes via analytical and creative written responses, experiential learning experiments, and the active documentation of folklore.

Audience: Undergraduate

**FOLKLORE/LITTRANS 327 – VAMPIRES**

3 credits.

Explores the development of the vampire legend in folklore, rumor, literature, cinema, television, and popular culture and in relation to topics such as colonization, race, gender, sexuality, and class.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the evolving characteristics of vampire traditions from early nineteenth-century European folklore through European and American literature, film, and other media.

Audience: Undergraduate

2. Describe the interplay between folklore and authored cultural works over time, with examples drawn from the circulation of vampire concepts between informal and authored products.

Audience: Undergraduate

3. Interpret representations of the vampire in relation to historical and cultural situations, with particular reference to colonization, race, gender, sexuality, and class.

Audience: Undergraduate

**FOLKLORE/MEDIEVAL/RELIG ST/SCAND ST 342 – NORDIC MYTHOLOGY**

3 credits.

Mythology, literature, ritual, traditions, medieval folklore, and religion from Nordic areas and Scandinavia.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize, describe and analyze cultural phenomena, specifically pre-Christian Nordic Religion, and put it into context.

Audience: Undergraduate

2. Demonstrate an understanding of the major theories, approaches, concepts and current research findings concerning medieval Nordic mythology and religion.

Audience: Undergraduate

3. Synthesize the written and material information and use insight and creativity to demonstrate an understanding of the knowledge base from the field.

Audience: Undergraduate

4. Communicate effectively through written essays, oral presentations and discussion.

Audience: Undergraduate

5. Retrieve, analyze, and interpret the professional and lay literature providing information to both professionals and public.

Audience: Undergraduate

6. Guide, mentor and support peers to achieve excellence in practice of the discipline.

Audience: Undergraduate

7. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view

Audience: Undergraduate

**FOLKLORE/LITTRANS/MEDIEVAL/SCAND ST 345 – THE NORDIC STORYTELLER**

3 credits.

Exploring the oral nature and performance traditions of folklore, ethnography, tales and ballads, literature and culture from Nordic areas and Scandinavia.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize, describe and analyze cultural phenomena, specifically Nordic Narrative, and put it into context.

Audience: Undergraduate

2. Demonstrate an understanding of the major theories, approaches, concepts and current research findings concerning Nordic Narrative and folklore studies.

Audience: Undergraduate

3. Synthesize the written and material information and use insight and creativity to demonstrate an understanding of the knowledge base from the field.

Audience: Undergraduate

4. Communicate effectively through written essays, oral presentations and discussion.

Audience: Undergraduate

5. Retrieve, analyze, and interpret the professional and lay literature providing information to both professionals and public.

Audience: Undergraduate

6. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view.

Audience: Undergraduate

**FOLKLORE/LITTRANS 347 – IN TRANSLATION: KALEVALA AND FINNISH FOLK-LORE**

3-4 credits.

A look at the Kalevala, the Finnish creation myth and national epic of Finland, and how it affected Finnish national identity and the eventual Finnish independence from Russia.

**Requisites:** Junior standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**FOLKLORE/RELIG ST 352 – SHAMANISM**

3 credits.

Survey of shamanism as a religious tradition and sociocultural force in Siberian, Asian, and Native American societies. Exploration of shamanic rituals, roles, cosmology. Cultural and political uses of shamanism in traditional and modern contexts.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2022**FOLKLORE 399 – DIRECTED STUDY IN FOLKLORE FOR UNDERGRADUATES**

1-3 credits.

Directed study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2020**FOLKLORE 415 – ADVANCED TOPICS IN FOLKLORE**

1-3 credits.

Exploration of various topics in the study of folklore, folklife, myth, foodways, or music.

**Requisites:** Junior standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**Learning Outcomes:** 1. Communicate effectively through written essays, oral presentations and discussion.

Audience: Undergraduate

2. Demonstrate advanced knowledge of the methods and practices of the folklore field and practices.

Audience: Undergraduate

3. Produce writing that applies concepts learned in the course to analyze knowledge discussed in the course and articulate theories in a critical setting.

Audience: Undergraduate

**FOLKLORE/GEN&WS 428 – GENDER AND EXPRESSIVE CULTURE**

3 credits.

Examines the relationship between dominant images of gender representation as they emerge in expressive culture in various societies.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2019**FOLKLORE 430 – TOPICS IN AMERICAN FOLKLORE: ETHNIC STUDIES**

3-6 credits.

Topics in historical or contemporary folklore and folklife pertaining to persistently marginalized racial or ethnic groups in the United States.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**FOLKLORE/AMER IND/ANTHRO/GEN&WS 437 – AMERICAN INDIAN WOMEN**

3 credits.

Examines and interprets the roles of American Indian women in traditional societies, and in contemporary North America.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**FOLKLORE 439 – FOODWAYS**

3 credits.

Explores artistic, social, sensory, and spiritual expressions through food that convey personal, group, and place-based identities, ethnicity, gender, and class in work and play. Reviews range of food writing and scholarly perspectives including culinary historical, structural-functional, and performance.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**FOLKLORE/SCAND ST 440 – SCANDINAVIAN AMERICAN FOLKLORE**

3 credits.

Examines the verbal, musical, customary, and material folklore of Scandinavian Americans, with emphasis on the upper Midwest.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**FOLKLORE/SCAND ST 443 – SAMI CULTURE, YESTERDAY AND TODAY**

4 credits.

Interdisciplinary study of Sami (Lapp) people of Scandinavia past and present. Indigenous modes of expression and worldview, contemporary cultural and political activism. Extensive discussion of connections to Native American and Inuit experiences; rise of U.S. and other indigenous peoples' movements.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**FOLKLORE/SLAVIC 444 – SLAVIC AND EAST EUROPEAN FOLKLORE**

3 credits.

Oral traditional literature of Eastern Europe: ritual and lyric poetry, epic, and folktale.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**FOLKLORE/MEDIEVAL/SCAND ST 446 – CELTIC-SCANDINAVIAN CULTURAL INTERRELATIONS**

3 credits.

Examination of shared traditions and historical connections between the North and Northwest of Europe. Readings of medieval and pre-modern Scandinavian, Scottish, Welsh and Irish sagas, histories, tales. Discussion of the role of folklore in modern Celtic and Scandinavian societies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**FOLKLORE 460 – FOLK EPICS**

3 credits.

Oral nature, structure, performance traditions, and epic ideology, from various world areas.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**FOLKLORE/LIS 490 – FIELD METHODS AND THE PUBLIC PRESENTATION OF FOLKLORE**

3 credits.

Combines a fieldwork practicum with scrutiny of the cultural, political, and ethical dimensions underlying the documentation and public presentation of folklore through festivals, exhibitions, publications, audio-visual productions, and digital archival collections.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand how to employ folkloristic fieldwork, archival methodologies, and community engagement in documenting and presenting local communities.

Audience: Both Grad & Undergrad

2. Explain key concepts of folklore studies in the context of wider public humanistic research.

Audience: Both Grad & Undergrad

3. Create a final project demonstrating critical thinking, civic knowledge, and collaboration with coordinating communities.

Audience: Both Grad & Undergrad

4. Understand how to coordinate effectively with community organizations to undertake multidisciplinary arts and humanities grant-funded project planning with public programming goals such as festivals, exhibitions, publications, audio-visual productions, and digital archival collections.

Audience: Graduate

**FOLKLORE 491 – PRACTICUM IN PUBLIC FOLKLORE**

1-3 credits.

Work as an intern with a public agency or a private non-profit organization involved in public folklore projects.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**FOLKLORE/MUSIC 515 – PROSEMINAR IN ETHNOMUSICOLOGY**

3 credits.

Introduction to ethnomusicology, including historical survey of major works in the field, classification of musical instruments, measurement of tuning systems and concepts of scale, mode and rhythm in non-Western music.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**FOLKLORE/MUSIC 516 – ETHNOGRAPHIC METHODS FOR MUSIC AND SOUND**

3 credits.

Focuses on the tools (material, methodological, and ethical) for doing ethnographic fieldwork in musical contexts.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate familiarity with a body of (ethno)musicological and anthropological literature on ethnographic methods.

Audience: Graduate

2. Decipher and explicate difficult texts with increased confidence.

Audience: Graduate

3. Design and carry out ethnographic research projects.

Audience: Graduate

4. Demonstrate an awareness of power dynamics and your own position as researcher.

Audience: Graduate

5. Facilitate discussions effectively.

Audience: Graduate

6. Track key terms across (ethno)musicological and anthropological literature, describing how ethnographers' relationships with these have changed over time.

Audience: Graduate

**FOLKLORE/COM ARTS 522 – DIGITAL STORYTELLING FOR SOCIAL MEDIA**

3 credits.

Explore everyday communication in social media. Learn digital recording technologies for documenting everyday communication and the use of digital content in social media.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Evaluate the reasons we value everyday artistic and expressive communication

Audience: Both Grad & Undergrad

2. Analyze the affordances of different social media platforms

Audience: Both Grad & Undergrad

3. Evaluate the formal elements best suited to the affordances of different media platforms

Audience: Both Grad & Undergrad

4. Apply that understanding in the design and production of digital text, photo, sound, and video communications that document everyday artistic and expressive communication

Audience: Both Grad & Undergrad

5. Analyze ethical implications of documenting human behavior

Audience: Both Grad & Undergrad

6. Apply scholarly theories on digital media to digital platforms and digital platform content

Audience: Graduate

**FOLKLORE 530 – TOPICS IN FOLKLORE**

1-3 credits.

Topics in Folklore in various cultures and time periods.

**Requisites:** Junior standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**FOLKLORE 540 – LOCAL CULTURE AND IDENTITY IN THE UPPER MIDWEST**

3 credits.

Addresses different aspects of community life and culture in the Upper Midwest; topics include ethnic groups, religious life, cultural landscapes, oral narrative, music, and material culture.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**FOLKLORE 699 – INDEPENDENT STUDY IN FOLKLORE (GRADUATE)**

1-3 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**FOLKLORE/MUSIC 915 – SEMINAR IN ETHNOMUSICOLOGY**

3 credits.

Topics in ethnomusicology within a cross-cultural framework; melodic typology, scale and tuning systems, mode, rhythm, ornamentation, improvisation techniques, oral and written traditions of composition, notation systems, and function of music society.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**FOOD SCIENCE (FOOD SCI)****FOOD SCI 120 – SCIENCE OF FOOD**

3 credits.

Relationship between food, additives, processing and health. How foods are processed. Current food controversies.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the basic scientific concepts regarding food composition, processing, additives, regulations, and safety

Audience: Undergraduate

2. Explain how the functionality of food can influence food processing and quality

Audience: Undergraduate

3. Identify and analyze current issues and their implications for food processing additional learning objectives provided for each module

Audience: Undergraduate

### **FOOD SCI 140 – THE CHOCOLATE EXPERIENCE: SCIENCE, SOCIETY, AND SUSTAINABILITY**

3 credits.

Learn about the history of cocoa and chocolate production, the cultivation of cocoa and processing of cocoa beans to the production of chocolate from cocoa beans. Other topics covered include nutrition and health aspects of cocoa and chocolate consumption and socioeconomic and sustainability issues in cocoa production.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explore the history of cocoa and chocolate, and worldwide cultivation practices.

Audience: Undergraduate

2. Describe the cocoa production process, including microbiological and biochemical aspects of cocoa fermentation.

Audience: Undergraduate

3. Outline and analyze the production of chocolate from the cleaning of cocoa beans to final chocolate products (from bean to bar).

Audience: Undergraduate

4. Examine the nutritional and health impact of chocolate consumption.

Audience: Undergraduate

5. Scrutinize and critique the socioeconomic impact of cocoa and chocolate production in fair trade, international politics, social justice, and sustainability.

Audience: Undergraduate

### **FOOD SCI 150 – FERMENTED FOOD AND BEVERAGES: SCIENCE, ART AND HEALTH**

3 credits.

Explores the science behind fermented food and beverages, popularized by brewing, winemaking and breadmaking at home and in retail. Introduces the scientific principles that underlie food and beverage processing through fermentation. Covers how basic sciences such as chemistry, biochemistry and microbiology influence the process and desired outcomes when fermenting vegetables, milk, fruit, and grains.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define fermentations in the context of foods and beverages

Audience: Undergraduate

2. Identify and apply basic principles of chemistry, processing and microbiology to the manufacturing of fermented foods and beverages.

Audience: Undergraduate

3. Identify and describe the human health implications resulting from the consumption of fermented foods and beverages.

Audience: Undergraduate

4. Describe the social, economic, and environmental dimensions of agricultural inputs and production of fermented food and beverages and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of producing fermented foods and beverages

Audience: Undergraduate

**FOOD SCI 180 – SUSTAINABLE FOOD SECURITY: HEALTH FOR OUR COMMUNITIES**

3 credits.

Explores diet-related diseases in the United States and their disproportionate effect on Black Indigenous and People of Color (BIPOC) and other underserved or vulnerable populations. Integrates the principles of food science, nutrition, and public health to understand food systems, food disparities, and health disparities. Examines emerging solutions to improve health outcomes in the United States through more just, inclusive, and sustainable food systems.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Explain the food system framework and its relationship to food (in)security, nutrition (in)security, and health  
Audience: Undergraduate2. Examine food waste and food safety and their relationship to food (in)security  
Audience: Undergraduate3. Discuss the intricate relationship between food (in)security, nutrition (in)security, food bioactive compounds, and chronic diseases  
Audience: Undergraduate4. Examine the biological, social, and environmental determinants of health, health systems, and the interactions between them  
Audience: Undergraduate5. Compare the association between food, nutrition, and health literacies, and health outcomes  
Audience: Undergraduate6. Interpret how the past has affected present-day circumstances regarding race and racial inequities in diet-related diseases in the U.S.  
Audience: Undergraduate7. Describe different cultural perspectives on food, nutrition, and health and the relationship between these perspectives and your own views and practices  
Audience: Undergraduate8. Reflect on how to engage in effective, respectful dialogue around food, health, and sustainability concepts in our multicultural society  
Audience: Undergraduate**FOOD SCI 201 – DISCOVERING FOOD SCIENCE**

1 credit.

Provides a brief introduction to the different areas of study and career opportunities within the food industry.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe the depth and scope of food science as a profession

Audience: Undergraduate

2. Explain and discuss career options for food science graduates  
Audience: Undergraduate3. Recommend personal initiatives that will enhance career success  
Audience: Undergraduate4. Relate courses in food science curricula to job responsibilities of food scientist  
Audience: Undergraduate**FOOD SCI 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work for honors students under direct guidance of a faculty member in an area encompassing Food Science. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor**Course Designation:** Honors - Honors Only Courses (H)**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills  
Audience: Undergraduate2. Apply the scientific method and engage in constructive problem solving  
Audience: Undergraduate3. Demonstrate application of research skills and methodologies  
Audience: Undergraduate4. Effectively communicate findings  
Audience: Undergraduate

**FOOD SCI 299 – INDEPENDENT STUDY**

1-3 credits.

Research work for students under direct guidance of a faculty member in an area encompassing Food Science. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies

Audience: Undergraduate

4. Effectively communicate findings

Audience: Undergraduate

**FOOD SCI 301 – INTRODUCTION TO THE SCIENCE AND TECHNOLOGY OF FOOD**

3 credits.

Introduction to the science and the technology of food manufacture.

Covers the basic chemical, physical and microbiological properties of food and manipulation of these properties in the manufacture of food products.

**Requisites:** (MATH 112, 114 or 217) and (CHEM 103, 109 or 115) and (ZOOLOGY/BIOLOGY 101, 102, BOTANY/BIOLOGY 130, or ZOOLOGY/BIOLOGY/BOTANY 151) or (BSE 349 or concurrent enrollment)

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply core knowledge in chemistry, physics, mathematics and biology to the understanding of food systems including quantitative problem-solving skills

Audience: Undergraduate

2. Identify the chemical composition of the main components in foods and describe how the composition influences functionality and material properties

Audience: Undergraduate

3. Explain relationships of mass-balance in food processing and be able to do simple mass-balance calculations

Audience: Undergraduate

4. Apply the basic principles of microbiology in relation to food safety and food processing/preservation

Audience: Undergraduate

5. Outline key technical information/terminology related to food science

Audience: Undergraduate

6. Describe the way in which food handling and processing operations impact food composition and human health

Audience: Undergraduate

7. Discuss regulations and market forces that govern our food supply

Audience: Undergraduate

8. Outline emerging trends in food production, processing, and handling

Audience: Undergraduate

**FOOD SCI/AN SCI 305 – INTRODUCTION TO MEAT SCIENCE AND TECHNOLOGY**

4 credits.

Application of biological, technological, and economical principles to muscle and related tissue utilized for food.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 152 or ZOOLOGY/BIOLOGY 101 and 102) and (CHEM 103, 109, or 115) or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss the nutritional value of fresh and processed meats in addition to addressing diet/health issues and food safety of these products

Audience: Both Grad & Undergrad

2. Describe the processes associated with animal harvest and explain the differences among different livestock species

Audience: Both Grad & Undergrad

3. Demonstrate where carcass fabrication cuts are made to produce the major carcass primal cuts and the ability to separate out and identify major muscles of economic importance

Audience: Both Grad & Undergrad

4. Describe how the biochemical properties of meat proteins relate to muscle function

Audience: Both Grad & Undergrad

5. Explain of the chemical and physical properties of fresh meat and how these properties can be evaluated and analyzed

Audience: Both Grad & Undergrad

6. Collect carcass data and determine USDA quality and yield grades

Audience: Both Grad & Undergrad

7. Calculate the appropriate amounts of non-meat ingredients and explain the applicable manufacturing procedures to produce various types of processed meats including whole muscle products and finely comminuted sausages

Audience: Both Grad & Undergrad

8. Explain how an understanding of muscle microstructure ultrastructure, and changes in postmortem biochemistry can be used to predict ultimate meat quality characteristics

Audience: Graduate

**FOOD SCI/AN SCI 321 – FOOD LAWS AND REGULATIONS**

1 credit.

Food laws and regulations, regulatory and commercial grading standards used in the food industry.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify major food laws, their authoritative departments and enforcement agencies (regulatory framework)

Audience: Undergraduate

2. Identify, examine and analyze the implications of laws and regulations required for the manufacture and sale of food products

Audience: Undergraduate

3. Discuss current topics of importance to the food industry that have the potential to generate new or refine existing regulations on food laws and regulations that apply to specific segments of the food industry

Audience: Undergraduate

4. Find pertinent information on food laws and regulations that apply to specific segments of the food industry

Audience: Undergraduate

**FOOD SCI/MICROBIO 324 – FOOD MICROBIOLOGY LABORATORY**

2 credits.

Lab exercises dealing with food preservation, spoilage, and food poisoning. Isolation, identification and quantification of specific microbes occurring in foods, and food fermentations by bacteria and yeast.

**Requisites:** (MICROBIO 102 or MICROBIO 304) and FOOD SCI/MICROBIO 325 or concurrent enrollment

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Utilize laboratory techniques to identify microorganisms in food.

Audience: Undergraduate

2. Describe the principles involving food preservation via fermentation processes.

Audience: Undergraduate

3. Demonstrate understanding of the role and significance of microbial inactivation, adaptation, and environmental factors (i.e., water activity, pH, temperature) on growth and response of microorganisms in various environments.

Audience: Undergraduate

4. Identify the conditions, including sanitation practices, under which important pathogens and spoilage microorganisms are commonly inactivated, killed, or made harmless in foods.

Audience: Undergraduate

**FOOD SCI/MICROBIO 325 – FOOD MICROBIOLOGY**

3 credits.

Principles of food preservation, epidemiology of foodborne illness, agents of foodborne illness, food fermentations and biotechnology.

**Requisites:** MICROBIO 101, 303, or M M & I 301 or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and summarize the impacts of intrinsic and extrinsic factors on microorganisms.

Audience: Undergraduate

2. Calculate and apply thermal processing parameters to reductions in microbial numbers.

Audience: Undergraduate

3. Apply Hazard Analysis Critical Control Point (HACCP) concepts and principles to food production processes.

Audience: Undergraduate

4. Demonstrate knowledge of foodborne microbial pathogens.

Audience: Undergraduate

5. Describe methods and principles of sampling and testing food for microorganisms.

Audience: Undergraduate

6. Compare and contrast the principles, practices, and pathways of food fermentations.

Audience: Undergraduate

7. Analyze and use microbiological data sets.

Audience: Undergraduate

8. Evaluate the benefits and hazards of modern food production, organic foods, and genetically-engineered foods.

Audience: Undergraduate

**FOOD SCI 330 – DAIRY PRODUCTS EVALUATION**

1 credit.

Introduction to sensory analysis of dairy and dairy-alternative products. Individual skill building to evaluate products such as vanilla ice cream, cheddar cheese, cottage cheese, yogurt, milk, and butter by providing mentored sensory training.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recall key vocabulary terms and facts relevant to introductory sensory science, dairy product evaluation, and the US dairy industry

Audience: Undergraduate

2. Evaluate, compare and rank products depending on multiple quality characteristics

Audience: Undergraduate

3. Compare similar nondairy products

Audience: Undergraduate

4. Communicate results of product analysis and evaluation in a professional setting

Audience: Undergraduate

**FOOD SCI 375 – SPECIAL TOPICS**

1-3 credits.

Subjects of current interest to undergraduates.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain concepts relating to a special topic outlined in the title

Audience: Undergraduate

**FOOD SCI 378 – PRECISION FERMENTATION FOR SUSTAINABLE FOODS AND PRODUCTS**

2 credits.

Introduction to principles of precision fermentation, genetic tools used to manipulate the organisms involved in precision fermentation, food and non-food applications of precision fermentation. Topics such as: sustainable manufacturing of alternative proteins, food colorants, artificial sweeteners, amino acids, vitamins, flavoring and blending agents in alternative protein formulations, fatty acids, non-food chemicals of industrial importance, and sustainable feedstocks. Comparison of precision fermentation to traditional fermentations including whiskey, rum and bourbon.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the concept of precision fermentation.  
Audience: Undergraduate

2. List and explain examples of precision fermentation.  
Audience: Undergraduate

3. Outline and analyze the tools used to manipulate the microorganisms used in precision fermentation.  
Audience: Undergraduate

4. Describe the processes deployed to produce foods and non-food products derived by precision fermentation.  
Audience: Undergraduate

5. Outline the sustainability aspects of precision fermentation and the feedstocks used.  
Audience: Undergraduate

6. Compare and contrast traditional and precision fermentations.  
Audience: Undergraduate

**FOOD SCI 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in the Food Science department and a internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply concepts learned in coursework to authentic professional situations  
Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry  
Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations  
Audience: Undergraduate

**FOOD SCI 400 – STUDY ABROAD IN FOOD SCIENCE**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**FOOD SCI 410 – FOOD CHEMISTRY**

3 credits.

Nature and chemical behavior of food constituents including proteins, lipids, carbohydrates, water, and enzymes.

**Requisites:** FOOD SCI 301, CHEM 343, and (BIOCHEM 501 or concurrent enrollment)**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Clarify the physical and chemical principles of water, proteins, carbohydrates, and lipids in foods  
Audience: Undergraduate

2. Use the principles of food chemistry to describe and alter the behavior of foods  
Audience: Undergraduate

3. Hypothesize how chemical reactivity affects food properties  
Audience: Undergraduate

**FOOD SCI 412 – FOOD ANALYSIS**

4 credits.

Application of quantitative techniques to the determination of composition and quality of food products.

**Requisites:** (STAT 301 or 371) and FOOD SCI 410

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Choose appropriate analytical techniques to determine the composition of foods

Audience: Undergraduate

2. Clarify the underlying principles of food analytical methods

Audience: Undergraduate

3. Integrate basic statistical methods into experimental data analysis

Audience: Undergraduate

4. Assemble effective written and oral communications regarding composition of food

Audience: Undergraduate

**FOOD SCI 432 – PRINCIPLES OF FOOD PRESERVATION**

3 credits.

Fundamentals of food preservation methods: post-harvest, thermal processing, refrigeration and freezing, control of water activity, chemical preservation, nonthermal methods and control of food packaging.

**Requisites:** MICROBIO/FOOD SCI 325, FOOD SCI 410, and 440

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Clarify the mechanisms of food spoilage and how to inhibit them

Audience: Undergraduate

2. Predict how food quality is affected throughout product lifecycle

Audience: Undergraduate

3. Differentiate preservation methods appropriate for foods, including "natural" foods

Audience: Undergraduate

4. Critique relevant scientific literature to explain food preservation principles

Audience: Undergraduate

5. Assemble effective written and oral communications regarding food preservation

Audience: Undergraduate

**FOOD SCI 437 – FOOD SERVICE OPERATIONS**

4 credits.

Fundamentals, principles, and practices of the United States Food Systems, Food Service, and Food Service Management. Introduction to the food service industry as applied in diverse settings, including but not limited to schools, hospitals and restaurants.

**Requisites:** FOOD SCI 301 and declared in Nutritional Sciences BS or BS-Nutrition and Dietetics

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Assess the impact of a public policy position on the nutrition and dietetics profession

Audience: Undergraduate

2. Explain the process involved in delivering quality food and nutrition services

Audience: Undergraduate

3. Apply management theories to the development of programs or services

Audience: Undergraduate

4. Evaluate a budget/financial management plan and interpret financial data

Audience: Undergraduate

5. Apply principles of human resource management to different situations

Audience: Undergraduate

6. Apply safety and sanitation principles related to food, personnel and consumers

Audience: Undergraduate

**FOOD SCI 440 – PRINCIPLES OF FOOD ENGINEERING**

3 credits.

Application of engineering principles in the analysis of food process operations: properties of gases and vapors, psychrometrics, material and energy balances, fluid flow, heat transfer, microwave heating, mass transfer, packaging film permeability, dehydration.

**Requisites:** FOOD SCI 301, (MATH 217 or 221), and (PHYSICS 103, 201, or 207)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply the conservation equations (mass, energy, momentum) to food processes including those with reactions and unsteady state operation

Audience: Undergraduate

2. Apply the transport equations (mass, energy, and momentum, including food rheology) to food processes

Audience: Undergraduate

3. Apply concepts of thermodynamics to food systems: 1st law, 2nd law, gas laws, and psychrometrics

Audience: Undergraduate

4. Explain the theoretical basis for rheology and use rheological approaches to solve problems in food processing and product quality evaluation

Audience: Undergraduate

**FOOD SCI/AN SCI/DY SCI/SOIL SCI 472 – ANIMAL AGRICULTURE AND GLOBAL SUSTAINABLE DEVELOPMENT**

1 credit.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; food security, the role of women in agriculture, and the role of dairy products in a healthy diet.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply sustainability principles and/or framework to addressing the challenge of feeding an increasing world population sustainably.

Audience: Undergraduate

2. Define and characterize sustainability, sustainable agriculture and Sustainable Development

Audience: Undergraduate

3. Analyze the contributions of animal agriculture to the Sustainable Development Goals both in developing and developed countries.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of diverse animal agricultural systems both in developing and developed countries.

Audience: Undergraduate

5. Evaluate the role of livestock in communities where poverty, hunger and marginalization are embedded as a way of life.

Audience: Undergraduate

6. Critically evaluate the causes of –and ways to break– the chains of hunger and poverty among the poorest of the poor.

Audience: Undergraduate

### **FOOD SCI/AN SCI/DY SCI/SOIL SCI 473 – INTERNATIONAL FIELD STUDY IN ANIMAL AGRICULTURE AND SUSTAINABLE DEVELOPMENT**

2 credits.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; and the role of women in agriculture and the role of dairy products in a healthy diet.

**Requisites:** DY SCI/AN SCI/FOOD SCI/SOIL SCI 472

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Improve communication and interpersonal skills associated with participating in team-based intercultural experiences

Audience: Undergraduate

2. Be better prepared for professional success in an interconnected world by navigating unfamiliar cultural norms and societal differences

Audience: Undergraduate

3. Reflect on US-centric personal and cultural values while building an appreciation and respect for the Latin America culture.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of alleviating poverty and malnutrition in Mexico

Audience: Undergraduate

5. Apply sustainability principles and/or framework to addressing the challenge of fostering prosperity in marginalized indigenous communities

Audience: Undergraduate

6. Analyze both from their own disciplinary lens and from an interdisciplinary lens the contributions of dairy farming to the Sustainable Development Goals

Audience: Undergraduate

7. Evaluate the sustainability of subsistence, market-oriented, and industrial-scale farming systems

Audience: Undergraduate

### **FOOD SCI 511 – CHEMISTRY AND TECHNOLOGY OF DAIRY PRODUCTS**

3 credits.

Chemistry of milk components (i.e. protein, lipids, carbohydrate, salts, enzymes) with an emphasis on chemical and physical changes that occur during the manufacture of a range of milk products (i.e. ice cream, butter, cheese). Dairy technology and microbiological quality.

**Requisites:** FOOD SCI 410

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the composition of milk and identify the approximate content, individual types present and main features of the main components

Audience: Undergraduate

2. Integrate their knowledge of food chemistry, physical properties and microbiology to understand the processing of dairy products

Audience: Undergraduate

3. Use knowledge of the chemistry of dairy components (proteins, fats, lactose, salts) to evaluate the impact of processing conditions (e.g. heat, pH) on milk and dairy products

Audience: Undergraduate

4. Describe the contribution of dairy foods to the diet including milk constituents with possible physiological roles

Audience: Undergraduate

5. Explain how dairy products (such as fluid milk, yogurt, butter, powder, cheese) are made and the key functions of the processing steps involved

Audience: Undergraduate

### FOOD SCI 514 – INTEGRATED FOOD FUNCTIONALITY

4 credits.

Molecular basis of food functional properties; impact of ingredients and processing on functional properties (texture, flavor, nutrition and structure); design of new or reformulating foods to meet specific quality expectations.

**Requisites:** FOOD SCI 602

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the chemical and physical basis for interactions taking place between food components and how these influence the properties of food structures

Audience: Undergraduate

2. Relate the quality of foods to the chemical composition, processing and potential for changes or reactions to occur during storage (includes physical, chemical, biochemical, and microbial reactions/changes)

Audience: Undergraduate

3. Select food ingredients that give specific functional benefits for use in product development, product reformulation, or problem-solving situations

Audience: Undergraduate

4. Apply sensory and rheological methods of evaluation in analysis of foods (e.g., Quality Control), product development, or reformulation of existing products

Audience: Undergraduate

5. Design and perform a shelf-life test (including normal storage conditions and accelerated tests) and be able to apply statistical approaches to determine acceptable shelf-life of products made with different ingredients/processing conditions/storage situations

Audience: Undergraduate

6. Assemble effective written and oral communications regarding food structure and functionality

Audience: Undergraduate

### FOOD SCI/AN SCI 515 – COMMERCIAL MEAT PROCESSING

2 credits.

Principles and procedures in the commercial manufacture of processed meat products; sausage manufacturing, curing, smoking, freezing and packaging.

**Requisites:** AN SCI/FOOD SCI 305, FOOD SCI 410, or graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize the various chemical and physical properties of meat and non-meat ingredients used to manufacture processed meats

Audience: Both Grad & Undergrad

2. Formulate various processed meats in compliance with governmental regulations

Audience: Both Grad & Undergrad

3. Identify basic meat processing principles

Audience: Both Grad & Undergrad

4. Demonstrate the ability to determine if a thermal processing procedure will produce a safe product

Audience: Graduate

5. Recognize how various types of meat processing equipment operate

Audience: Both Grad & Undergrad

6. Summarize proper cleaning and sanitation procedures

Audience: Both Grad & Undergrad

**FOOD SCI 532 – INTEGRATED FOOD MANUFACTURING**

4 credits.

Procedures used to process and preserve foods on a commercial basis, with emphasis on concentration, dehydration and fractionation process, plant sanitation/GMP, statistical process control, and environmental impacts..

**Requisites:** FOOD SCI 432 or (BSE 461 or concurrent enrollment)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the unit operations of food processing technologies (concentration, dehydration, extrusion, etc.) and various ancillary food equipment (pumps, heat exchangers, etc.), including performing engineering calculations as appropriate

Audience: Undergraduate

2. Apply the key elements of food quality assurance, including analyzing and, writing and implementing Hazard Analysis and Critical Control Points plans in a food processing situation (includes prerequisite programs like Good Manufacturing Practice and Sanitation Standard Operating Procedure)

Audience: Undergraduate

3. Set up and maintain a process control chart, design an effective sampling plan for a food processing/distribution environment, and effectively evaluate whether a process is in control

Audience: Undergraduate

4. Identify weaknesses (and solutions) in existing Sanitation Standard Operating Procedure plans and design defensible new plans for cleaning and sanitation protocols in food processing operation, analyze existing plans and design new plans for cleaning and sanitation protocols in food processing operations

Audience: Undergraduate

5. Explain the effects of processing operations on shelf stability and be able to calculate shelf life of foods based on kinetics of microbial, chemical and physical changes during storage

Audience: Undergraduate

6. Explain the main steps in water and waste treatment as important to food processing operations

Audience: Undergraduate

7. Apply basic concepts of reaction engineering and reaction kinetics to food processing systems

Audience: Undergraduate

**FOOD SCI 535 – CONFECTIONERY SCIENCE AND TECHNOLOGY**

3 credits.

Through a combination of on-line lectures, classroom activities, evaluation of commercial samples and discovery-based labs, the science and technology of confections from hard candy to chocolate will be covered.

**Requisites:** FOOD SCI 410 and FOOD SCI 432

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe processing methods for confectionery production

Audience: Undergraduate

2. Describe the typical ingredients used in confections

Audience: Undergraduate

3. Explain how ingredients and processing conditions interact to create quality confections with adequate shelf stability

Audience: Undergraduate

4. Apply scientific principles to confectionery production and storage

Audience: Undergraduate

5. Explain effects of processing and storage conditions on shelf life of confections

Audience: Undergraduate

6. Analyze, diagnose, and propose solutions for problems in production and shelf life of confections based on the appropriate scientific principles

Audience: Undergraduate

7. Communicate scientific results clearly and concisely

Audience: Undergraduate

**FOOD SCI 550 – FERMENTED FOODS AND BEVERAGES**

2 credits.

Chemistry, microbiology, and technology of foods and beverages in which fermentations are important (e.g. cheese, bread, pickles, beer). Fermentation techniques in developing new foods and food additives. Instrumentation and mechanization of food fermentations.

**Requisites:** FOOD SCI 150**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify important biochemical pathways in the production of fermented foods and beverages

Audience: Undergraduate

2. Identify factors contributing to sensory qualities of fermented foods and beverages

Audience: Undergraduate

3. Evaluate the importance of chemical constituents for fermentation substrates and ingredients in fermentation

Audience: Undergraduate

4. Explain how starting ingredients are processed and how processing impacts fermentation and the final product

Audience: Undergraduate

5. Describe the production process of fermented vegetables, cheese, beer and wine

Audience: Undergraduate

6. Demonstrate knowledge about microbial species, biochemical pathways, and fermentation factors in the production of fermented foods and beverages by reviewing current research

Audience: Undergraduate

7. Discuss and explain how a wide variety of fermented foods and beverages are produced from a few basic ingredients

Audience: Undergraduate

**FOOD SCI 551 – FOOD FERMENTATION LABORATORY**

1 credit.

Offers the opportunity to learn to produce fermented beverages and dairy products in laboratory and scalable production facilities. Designed to introduce the chemical and physical basis for development of specific characteristics associated with individual styles of products as well as analytical methods to qualify those characteristics. Enrollment limited to students 21 years of age or older

**Requisites:** FOOD SCI 550 or concurrent enrollment**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Utilize laboratory tools to evaluate chemical constituents of fermented foods and beverages

Audience: Undergraduate

2. Apply knowledge of yeast and bacteria fermentations to the production of foods and beverages

Audience: Undergraduate

3. Communicate research results and knowledge of fermented foods to a scientific audience

Audience: Undergraduate

**FOOD SCI 602 – SENIOR PROJECT**

2 credits.

Part one of senior capstone requirement. Working as teams, students conduct research around a problem pertinent to the food industry. Weekly discussions plus laboratory. Data collection and analysis and report writing are critical components of this course.

**Requisites:** FOOD SCI 412 and 432**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Define a hypothesis or project objective(s); identify appropriate testing and analysis methodology, generate or collect original data, critically analyze results, provide a thorough explanation of results and a clear and concise research paper

Audience: Undergraduate

2. Communicate project work in written format

Audience: Undergraduate

3. Provide effective feedback of project progress

Audience: Undergraduate

4. Conduct independent projects with guidance

Audience: Undergraduate

**FOOD SCI 603 – SENIOR SEMINAR**

1 credit.

Part two of senior capstone requirement. Students will present data gathered and analyzed as part of the senior project.

**Requisites:** FOOD SCI 602

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate project work in oral and written format

Audience: Undergraduate

2. Communicate project results effectively

Audience: Undergraduate

3. Provide effective assessment of project results

Audience: Undergraduate

**FOOD SCI 611 – CHEMISTRY AND TECHNOLOGY OF DAIRY PRODUCTS**

3 credits.

Chemistry of milk components (i.e. protein, lipids, carbohydrate, salts, enzymes) with an emphasis on chemical and physical changes that occur during the manufacture of a range of milk products (i.e. ice cream, butter, cheese). Dairy technology and microbiological quality.

**Requisites:** FOOD SCI 410 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the composition of milk and identify the approx. content, individual types present and main features of the main components

Audience: Both Grad & Undergrad

2. Integrate knowledge of food chemistry, physical properties, and microbiology to describe the processing of dairy products

Audience: Both Grad & Undergrad

3. Use knowledge of the chemistry of dairy components (proteins, fats, lactose, salts) to evaluate the impact of processing conditions (e.g. heat, pH) on milk and dairy products

Audience: Both Grad & Undergrad

4. Describe the contribution of dairy foods to the diet including milk constituents with possible physiological roles

Audience: Both Grad & Undergrad

5. Explain how dairy products (such as fluid milk, yogurt, butter, powder, cheese) are made and the key functions of the processing steps involved

Audience: Both Grad & Undergrad

6. Discuss hot topics related to dairy foods

Audience: Graduate

7. Evaluate the scientific status of dairy's role or contribution to nutrition, sustainability, and functionality with reference to current scientific literature on these topics

Audience: Graduate

### **FOOD SCI 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2013

**Learning Outcomes:** 1. Review and analyze scientific literature

Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question

Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research

Audience: Undergraduate

### **FOOD SCI 682 – SENIOR HONORS THESIS**

2-4 credits.

Second semester of individual study for majors completing theses for Honors degrees as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2014

**Learning Outcomes:** 1. Review and analyze scientific literature

Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question

Audience: Undergraduate

3. Write a thesis based on original research

Audience: Undergraduate

### **FOOD SCI 699 – SPECIAL PROBLEMS**

1-3 credits.

Individual advanced work in an area of Food Science under the direct guidance of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies

Audience: Undergraduate

4. Effectively communicate findings

Audience: Undergraduate

**FOOD SCI/AN SCI 710 – CHEMISTRY OF THE FOOD LIPIDS**

2 credits.

Chemical constitution, structures, reactions, stereochemistry of fats, phospholipids, related compounds; methods of isolation, characterization; synthesis; relation of structure to physical properties.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Write a clear and concise research paper

Audience: Graduate

2. Improve oral communication by presenting major points of the research paper

Audience: Graduate

3. Utilize software to illustrate a protein containing a bound lipid at atomic resolution.

Audience: Graduate

4. Explain lipid functions in relation to varying environmental conditions and electron transfer reactions

Audience: Graduate

5. Develop a detailed understanding of lipid analysis, lipid synthesis as well as digestion and transport of dietary lipids in different vertebrates.

Audience: Graduate

6. Derive the likely volatiles to be generated during storage of any unsaturated fatty acid using the beta-scission of a linoleic acid hydroperoxide as a template

Audience: Graduate

7. Determine if a given reaction is thermodynamically favorable based on standard one-electron reduction potentials and concentrations of reactants (oxidized/reduced couples)

Audience: Graduate

**FOOD SCI/AN SCI 711 – FOOD BIOCHEMISTRY**

3 credits.

Explores methods for interrogating structure-function relationships, molecular profiles, and microstructure of foods. Provides hands-on experience using computational approaches to model protein-small molecule interactions, analysis of small molecules using high-resolution MS, and protein composition and morphology with fluorescence spectroscopy and microscopy. Knowledge of food chemistry or organic chemistry (such as FOOD SCI 410, CHEM 341, 343, or 345) required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically evaluate recent literature in the field of food chemistry

Audience: Graduate

2. Illustrate the interactions between food molecules (lipids, protein, carbohydrates, bioactive) at atomic resolution using software.

Audience: Graduate

3. Analyze and differentiate the molecular composition of a food or ingredient using HPLC-MS/MS data; fluorescence spectroscopy; and microscopy

Audience: Graduate

4. Propose and analyze how reactions and physical changes affect food microstructure and composition

Audience: Graduate

**FOOD SCI 725 – ADVANCED FOOD MICROBIOLOGY**

3 credits.

Principles and problems covering fundamental concepts in Food Microbiology; application of concepts in fermentation, pathogenesis, and gut health; development and control of a sustainable and safe food and fiber system.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Analyze common mechanisms of foodborne microbial pathogenesis and immune responses to foodborne infections  
Audience: Graduate

2. Critically evaluate treatment, control, and detection strategies for foodborne pathogens  
Audience: Graduate

3. Evaluate primary research articles, identify problems related to the experimental approach, (interpretation of) data and/or discussion, and develop solutions to the identified problems  
Audience: Graduate

4. Describe emerging trends, drivers and impacts of sustainable food systems  
Audience: Graduate

5. Explain the process of fermentation and probiotic mechanism of action  
Audience: Graduate

**FOOD SCI 799 – PRACTICUM IN FOOD SCIENCE TEACHING**

1-3 credits.

Teaching experience for PhD candidates.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Explain current manufacturing practices through experiential learning  
Audience: Graduate

**FOOD SCI 875 – SPECIAL TOPICS**

1-3 credits.

New graduate and courses of current interest.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Explain concepts relating to a special advanced topic outlined in the title  
Audience: Graduate

**FOOD SCI 900 – SEMINAR ADVANCED**

1 credit.

Research literature and current departmental research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and summarize key aspects of scientific rigor and reproducibility, including determination of sample size, statistical significance, measures of outliers, and experimental replicates  
Audience: Graduate

2. Describe the features of high-quality presentations and best practices in scientific data/information interpretation  
Audience: Graduate

3. Apply and demonstrate best practices in the effective presentation of complex data/information to diverse scientific audience  
Audience: Graduate

**FOOD SCI 990 – RESEARCH**

1-12 credits.

Full lab and literature review of a problem in food science. Leads to preparation of thesis and publication.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Devise an engaging overview of a research area  
Audience: Graduate

2. Explain background, methods, results, and a discussion of experimental data  
Audience: Graduate

3. Design charts/tables that effectively communicate data  
Audience: Graduate

4. Assess peers on the effectiveness of a scientific presentation  
Audience: Graduate

5. Generate goals to improve presentation skills  
Audience: Graduate

# FOREST AND WILDLIFE ECOLOGY (F&W ECOL)

## F&W ECOL 1 – COOPERATIVE EDUCATION/CO-OP IN FOREST & WILDLIFE ECOLOGY

1 credit.

Full-time off-campus work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career. Students receive credit only for the term in which they are actively enrolled and working. The same work experience may not count towards credit in F&W ECOL 399.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

## F&W ECOL/ENVIR ST 100 – FORESTS OF THE WORLD

3 credits.

Ecology and conservation of a wide range of forests, from tropical rain and dry forests, boreal forests, to temperate forests, outside of the USA. The main threats to forests, and different strategies to solve conservation and sustainable management issues in international forestry. Trade-offs in forest conservation and management, resulting from different values that people place on forests, issues in equity and equality in access to forest resources. The role of forests in climate change and extinction of species.

**Requisites:** None

**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify relevant stakeholders in forest landscapes across the world

Audience: Undergraduate

2. Give examples of conservation threats to forests in countries other than the USA and relevant solutions

Audience: Undergraduate

3. Communicate about evidence on forest conservation and threats rigorously, correctly, and under different formats

Audience: Undergraduate

4. Demonstrate, on specific examples, how trade-offs in forest conservation originate and work

Audience: Undergraduate

5. Explain the role of forests in solutions to climate change and species extinctions

Audience: Undergraduate

## F&W ECOL 101 – ORIENTATION TO WILDLIFE ECOLOGY

1 credit.

Introduction to Wildlife Ecology and the profession of wildlife management/conservation. Emphasis on preparing for a successful career.

**Requisites:** Declared in Wildlife Ecology

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## F&W ECOL 110 – LIVING WITH WILDLIFE - ANIMALS, HABITATS, AND HUMAN INTERACTIONS

3 credits.

A general survey of wildlife and wildlife conservation. Basic characteristics and management of wildlife populations and habitats. Human perceptions and interactions with wildlife. Current issues in wildlife management and conservation.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## F&W ECOL/C&E SOC/SOC 248 – ENVIRONMENT, NATURAL RESOURCES, AND SOCIETY

3 credits.

Introduces the concerns and principles of sociology through examination of human interaction with the natural environment. Places environmental issues such as resource depletion, population growth, food production, environmental regulation, and sustainability in national and global perspectives.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**F&W ECOL/BOTANY 250 – FORESTS AND HUMANS: FROM THE MIDWEST TO MADAGASCAR**

2 credits.

Provides an overview of the geography, ecology, and economic importance of the world's forest biomes. Learn how climate influences vegetation and, in-turn, how forests impact global climate. Meet scientists working to understand the astounding biodiversity and ecological complexity of forest ecosystems, and how these ecosystems support human life. Discuss the threats to forest ecosystems around the world, and hear from the people trying to protect them. Emphasizes the forest resources and services upon which humans depend, and how we can maintain these resources into the future. Analyze the idea of "sustainability" when it comes to forest management, hear alternative viewpoints about what this word means, and discuss potential trade-offs and conflicts. Look at the many real-world programs in place at the global, national, and local level to sustainably manage forests.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2020**F&W ECOL 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area of Forest and Wildlife Ecology. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor**Course Designation:** Honors – Honors Only Courses (H)**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2001**F&W ECOL 299 – INDEPENDENT STUDY**

1-3 credits.

Research work for students under direct guidance of a faculty member in an area of Forest and Wildlife Ecology. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**F&W ECOL 300 – FOREST MEASUREMENTS**

4 credits.

Field measurements of trees and forests. Basic concepts of statistics and sampling as applied to forestry. Use of aerial photographs, GIS, and satellite imagery.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate basic competency in the use of forest measurement equipment and technology#

Audience: Undergraduate

2. Calculate individual tree and stand parameters

Audience: Undergraduate

3. Estimate timber volume

Audience: Undergraduate

4. Apply basic statistics in forestry#

Audience: Undergraduate

5. Produce a simple forest inventory using a variety of sampling techniques

Audience: Undergraduate

6. Communicate the results of data collected in written form

Audience: Undergraduate

**F&W ECOL 305 – FOREST OPERATIONS**

2 credits.

Introduction to forestry operations in the implementation of forest plans, including site preparation, stand establishment, and harvesting systems. Analysis of costs and productivity, including system balance, marketing, timber procurement, and contractual services.

**Requisites:** F&W ECOL 300 or 410**Repeatable for Credit:** No**Last Taught:** Spring 2025

**F&W ECOL 306 – TERRESTRIAL VERTEBRATES: LIFE HISTORY AND ECOLOGY**

4 credits.

Life history, ecology, distribution, and taxonomy of reptiles, amphibians, birds, and mammals. Birds will receive less emphasis. Primary focus is on Wisconsin species, including conservation threats, but covers all major North American families, and surveys major groups of the world. Designed as a foundation for detailed study of vertebrates or to satisfy the need for a scientific introduction to Wisconsin vertebrates.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), (BIOCORE 381 and 382), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**F&W ECOL 318 – PRINCIPLES OF WILDLIFE ECOLOGY**

3 credits.

Major environmental factors affecting wildlife; structure and behavior of wildlife populations; regional wildlife communities and their conservation.

**Requisites:** Declared in Wildlife Ecology

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL/ZOOLOGY 335 – HUMAN/ANIMAL RELATIONSHIPS: BIOLOGICAL AND PHILOSOPHICAL ISSUES**

3 credits.

An interdisciplinary approach to our complex and often contradictory relationships with non-human animals, including information about the nature, needs and behavior of human and non-human animals in relation to our personal and professional interactions with them.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**F&W ECOL/ENVIR ST/ZOOLOGY 360 – EXTINCTION OF SPECIES**

3 credits.

A comprehensive treatment of the ecology, causes, and consequences of species extinction. Ecology and problems of individual species, habitat alteration and degradation, socio-economic pressures and conservation techniques and strategies.

**Requisites:** Sophomore standing and ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), BIOLOGY/BOTANY 130, or (BIOCORE 381 and 382)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**F&W ECOL/ENVIR ST/G L E/GEOG/GEOSCI/LAND ARC 371 – INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING**

3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.

**Requisites:** (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**F&W ECOL 375 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest to undergraduate students.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**F&W ECOL 379 – PRINCIPLES OF WILDLIFE MANAGEMENT**

3 credits.

Ways of conserving desired numbers of animals for the overall best interests of society, be they aesthetic, ecological, economic, commercial or recreational; includes management of endangered species, exploited species, wildlife communities in nature reserves, and wildlife pests.

**Requisites:** F&W ECOL 318 or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**F&W ECOL 390 – LEARNING TO ACTION: PROFESSIONAL DEVELOPMENT**

1 credit.

Preparation for natural resources professions and the job market after graduation. Development of professional skills including communication, ethical decision-making, and conflict resolution. Experience in job searching, editing resumes, and interviewing for jobs.

**Requisites:** Declared in Forest Science

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Reflect on your internship experience, what you learned, and how it informs your professional future

Audience: Undergraduate

2. Understand opportunities and challenges in forestry and natural resources professions

Audience: Undergraduate

3. Improve your ability to find, apply, and interview for a job

Audience: Undergraduate

4. Improve your facilitation, communication, and conflict resolution skills

Audience: Undergraduate

5. Consider and articulate your desired long-term contributions to natural resources and society

Audience: Undergraduate

**F&W ECOL 395 – DATA AND GIS TOOLS FOR ECOLOGY**

3 credits.

Quantitative tools applicable to the investigation of ecological problems, including but not limited to, statistics, Geographic Information Systems (GIS), Remote Sensing, and spatial analysis. Overview of commonly used quantitative techniques in ecological sciences with an emphasis on GIS and spatial analysis. Introduces spatial tools and practical applications using ecological/environmental data sets.

**Requisites:** MATH 113, 114, 171, placement into MATH 221, or graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe ecological datasets spatially and statistically using data storage and Geographic Information Systems (GIS) tools

Audience: Undergraduate

2. Acquire and map spatially explicit ecological data using GIS tools

Audience: Undergraduate

3. Identify patterns in complex ecological data sets

Audience: Undergraduate

4. Conduct common statistical analysis of digitized ecological data (such as: description, correlation, univariate regression, and hypothesis testing)

Audience: Undergraduate

5. Critically evaluate the results of statistical analyses, including validation, of ecological datasets

Audience: Undergraduate

**F&W ECOL 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Forest and Wildlife Ecology and an internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**F&W ECOL 400 – STUDY ABROAD IN FOREST AND WILDLIFE ECOLOGY**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Current enrollment in a UW-Madison study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**F&W ECOL 401 – PHYSIOLOGICAL ANIMAL ECOLOGY**

3 credits.

Physiological adaptation and function in wild animals, primarily birds, mammals, reptiles, amphibians. Focus on interactions between animals and their environment, and relationships between animal physiology and the ecology and dynamics of populations.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), (BIOCORE 381 and 382), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**F&W ECOL/BOTANY 402 – DENDROLOGY: WOODY PLANT IDENTIFICATION AND ECOLOGY**

3 credits.

Identification, ecological characteristics, ranges, adaptations to environment, and uses of evergreen and deciduous woody plants, with emphasis on species native to Wisconsin; lab and field work.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify all native Wisconsin trees, some common shrubs and vines, and a few important woody exotics by common and scientific name, in summer or winter condition.

Audience: Both Grad & Undergrad

2. Demonstrate a basic understanding of wood structure and use a key to identify blocks of wood.

Audience: Both Grad & Undergrad

3. Recognize the characteristic tree taxa of some of the world's major forest types and some interesting examples of the diversity of trees and their adaptations to their environments.

Audience: Both Grad & Undergrad

4. Compare the morphology, life history, and ecology of woody species to their distribution and habits.

Audience: Both Grad & Undergrad

5. Understand how humans affect the composition, structure and economic value of tree communities and apply this information to questions about management of woody vegetation under changing conditions.

Audience: Both Grad & Undergrad

6. Compare at least two methods for learning to identify a plant species using evidence from your experience in this course.

Audience: Both Grad & Undergrad

7. Construct new materials to teach woody plant ID or tree management issues to a particular target audience.

Audience: Graduate

8. Survey current scientific literature on a particular topic relevant to management of woody vegetation under changing conditions, and summarize current knowledge and knowledge gaps. Recommend next steps in research to improve management.

Audience: Graduate

**F&W ECOL 410 – PRINCIPLES OF SILVICULTURE**

3 credits.

Ecologically-based forest management principles for sustainable timber production, maintenance or restoration of biological diversity, and maintenance of aesthetic quality and site productivity. Includes coverage of even-aged and uneven-aged management, reforestation principles, and ecological restoration techniques.

**Requisites:** ZOOLOGY/BOTANY/F&W ECOL 460, F&W ECOL 550, declared in Forest Science or Wildlife Ecology, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**F&W ECOL 411 – PRACTICES OF SILVICULTURE**

1 credit.

Utilization of ecologically-based forest management practices for sustainable timber production, maintenance or restoration of biological diversity, and maintenance of aesthetic quality and site productivity. Includes coverage of even-aged and uneven-aged management, reforestation principles, and ecological restoration techniques.

**Requisites:** F&W ECOL 410 or concurrent enrollment

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**F&W ECOL 420 – REGULATED TRAPPING IN WILDLIFE MANAGEMENT AND CONSERVATION**

1 credit.

Training and professional skill development for future natural resources professionals. Introduction to the importance of regulated trapping as a technique used in research, wildlife damage management, wildlife reintroduction, disease management, fur/food acquisition, etc.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify the important biological and ecological aspects of furbearers

Audience: Undergraduate

2. Discuss furbearer management related laws and regulations, research, population modeling, and furbearer diseases

Audience: Undergraduate

3. Explain how regulated trapping is used by State, Federal and Tribal agencies to manage wildlife and their habitats

Audience: Undergraduate

4. Describe the many benefits of regulated trapping to society

Audience: Undergraduate

5. Identify terminology and workings of several types of traps, sets, and trapping equipment used to legally harvest furbearers and to avoid non-target species

Audience: Undergraduate

6. Summarize the goals of the Best Management Practices for Trapping Program (BMPs)

Audience: Undergraduate

7. Demonstrate proper fur handling and processing and knowledge of related terminology

Audience: Undergraduate

8. Communicate effectively about regulated trapping

Audience: Undergraduate

**F&W ECOL 424 – WILDLIFE ECOLOGY SUMMER FIELD PRACTICUM**

2 credits.

Practicum emphasizing research and habitat management techniques through individual and group field work, tours, demonstrations and lectures.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

### **F&W ECOL/A A E 430 – DECISION METHODS FOR NATURAL RESOURCE MANAGERS**

3 credits.

Applications of quantitative methods, including optimization and simulation, to the management of natural resources, especially forests.

**Requisites:** MATH 112, 114, or 171 or placement into MATH 211 or 221. Not open to students with credit for A A E 652 prior to Fall 2025.

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Quantify the timber and non-timber values of forest resources

Audience: Undergraduate

2. Describe and apply financial decision criteria to evaluate forest investments

Audience: Undergraduate

3. Explain how optimal rotation ages are determined and what factors affect this calculation

Audience: Undergraduate

4. Create harvest scheduling models and apply them to diverse landowner objectives

Audience: Undergraduate

5. Apply knowledge of mathematical models and financial theory to determine optimal rotation age for a given species and communicate findings in written and verbal formats

Audience: Undergraduate

### **F&W ECOL 448 – DISTURBANCE ECOLOGY**

3 credits.

An introduction to fire, wind, flooding, disease, insects and other disturbance regimes that serve as primary drivers of the structure and function of terrestrial ecosystems. Discusses how these disturbances interact, using case studies and data that highlight the role of disturbance in different ecosystems (e.g. grasslands, forests, tundra) with a focus on the ecosystem services they provide. Discusses and critiques management strategies used to mitigate biotic and abiotic disturbances, gaining critical insights from the literature as well as personal perspectives and experiences.

**Requisites:** BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify what characteristics are necessary to refer to an event as a disturbance and clearly define ways in which disturbances are categorized

Audience: Undergraduate

2. Determine and discuss mechanisms underlying different disturbance regimes in the context of ecological theory and observations

Audience: Undergraduate

3. Interpret, critique, and appropriately cite primary scientific literature in the field of disturbance ecology and extract critical information from figures and graphs

Audience: Undergraduate

4. Analyze and interpret data collected at various scales that relate to the causes and consequences of various disturbance regimes and identify the limitations and advantages of each data type

Audience: Undergraduate

5. Describe (through examples and case studies) how different disturbances interact with each other using appropriate terminology and definitions and evaluate context-dependent consequences for ecosystem function

Audience: Undergraduate

6. Evaluate how disturbance risk is assessed in various systems and determine approaches that are most amenable to intervention based on costs, benefits, and feasibility

Audience: Undergraduate

**F&W ECOL 449 – DISTURBANCE ECOLOGY LAB (I): HERBIVORES AND FIRE**

1 credit.

Explores natural and anthropogenic disturbances occurring in forest ecosystems through hands on learning experiences. Emphasis on the role of herbivores and fire with examination of management strategies. Applies basic ecological laboratory and field techniques to understanding disturbances that change the physical environment and disrupt ecosystem structure.

**Requisites:** BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss the importance of disturbance for ecosystem processes (e.g., nutrient cycling, biodiversity, soil development, etc.)

Audience: Undergraduate

2. Describe the effect of herbivores and fire on local forest habitats.

Audience: Undergraduate

3. Identify native and non-native members of local forest ecosystems and explain how they respond to herbivory and fire.

Audience: Undergraduate

4. Explain how population and community dynamics of plants are influenced by disturbance, stress, and species interactions.

Audience: Undergraduate

5. Formulate novel hypotheses related to declining forest understory biodiversity, design experimental protocols to falsify those hypotheses, and communicate research proposals in oral and written forms to a scientific audience.

Audience: Undergraduate

6. Apply basic ecological laboratory and field techniques to understanding ecological principles.

Audience: Undergraduate

**F&W ECOL 450 – DISTURBANCE ECOLOGY LAB (II): FOREST PATHOGENS**

1 credit.

Explores natural and anthropogenic disturbances occurring in forest ecosystems through hands on learning experiences. Focuses on the causes of impoverished forests and the role and management of pathogens. Applies basic ecological laboratory and field techniques to understanding disturbances that change the physical environment and disrupt ecosystem structure.

**Requisites:** BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss the importance of disturbance for ecosystem processes (e.g., nutrient cycling, biodiversity, soil development, etc.)

Audience: Undergraduate

2. Describe the problems associated with and causes of depauperate understories in the Deciduous Forest Biome.

Audience: Undergraduate

3. Describe the role of pathogens (including fungi, bacteria, and viruses) in forest disturbance.

Audience: Undergraduate

4. Explain how population and community dynamics of plants are influenced by disturbance, stress, and species interactions.

Audience: Undergraduate

5. Test novel hypotheses related to declining forest understory biodiversity, implement experimental protocols to falsify those hypotheses, graph/analyze/interpret results, and communicate these results in oral and written forms to a scientific audience.

Audience: Undergraduate

6. Apply basic ecological laboratory and field techniques to understanding ecological principles.

Audience: Undergraduate

**F&W ECOL/SOIL SCI 451 – ENVIRONMENTAL BIOGEOCHEMISTRY**

3 credits.

Explores long and short-term cycles of carbon, nitrogen, phosphorus, sulfur, and metals as well as water and energy cycles between water, the atmosphere, terrestrial vegetation, and soils. Emphasizes the linkage between terrestrial vegetation and soils across global biomes for managed and unmanaged ecosystems. Investigates biogeochemical processes through their biochemical constituents, conceptual models and exploration of isotopic and chemical data. Provides a practical understanding of the interactions between components and fluxes of terrestrial ecosystems and how data is developed and employed.

**Requisites:** CHEM 104, 109, 116, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe global biogeochemical cycles of C, N, P, K, S, Fe, energy, and water and their importance

Audience: Both Grad & Undergrad

2. Explain the importance of human perturbations to and management of biogeochemical cycles

Audience: Both Grad & Undergrad

3. Describe key methods used to study biogeochemistry and explain their limitations

Audience: Both Grad & Undergrad

4. Predict which biogeochemical reactions would be likely across different environments and conditions

Audience: Both Grad & Undergrad

5. Discuss and critically evaluate scientific papers in biogeochemistry at a graduate level

Audience: Graduate

6. Discuss and critically evaluate scientific papers in biogeochemistry at an advanced undergraduate level

Audience: Undergraduate

7. Characterize elemental cycling within a system of interest, comparing and contrasting different elements

Audience: Graduate

8. Characterize elemental cycling within a system of interest

Audience: Undergraduate

**F&W ECOL/BOTANY 455 – THE VEGETATION OF WISCONSIN**

4 credits.

Ecology of Wisconsin plant communities: floristic composition, community structure; relationship to history, climate, soil, and geology; response to human perturbation.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL 458 – ENVIRONMENTAL DATA SCIENCE**

3 credits.

Introduces fundamental machine learning techniques for numerical modeling and data analysis and modern computer programming tools used to analyze, prepare, and visualize data from common formats of datasets in the field of Earth and environmental sciences. Emphasizes opportunities to consider real-world applications for concepts in environmental data science.

**Requisites:** STAT 240, 301, 324, 371, or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate introductory skills in using collaboration technology (e.g. Jupyter Notebooks) to write, edit, and run programs in a scientific programming language (e.g. Python)

Audience: Both Grad & Undergrad

2. Recognize, read, write and use common environmental dataset formats

Audience: Both Grad & Undergrad

3. Use a scientific programming language (e.g. Python) to read and process environmental data

Audience: Both Grad & Undergrad

4. Produce visualizations of environmental data, including basic scientific charts, statistics, and maps

Audience: Both Grad & Undergrad

5. Understand fundamentals of modern machine learning algorithms and gain experience of practical use of them

Audience: Both Grad & Undergrad

6. Solve real-world data science problems individually and in teams

Audience: Both Grad & Undergrad

7. Identify the frontiers in real-world environmental science challenges and how data science can help

Audience: Both Grad & Undergrad

8. Identify a problem in environmental science that may be solved or better understood through data science, provide a basic visualization or analysis of a data set associated with that problem, and communicate findings effectively

Audience: Undergraduate

9. Develop in-depth spatial and/temporal analyses using advanced data science tools (such as machine learning) and visual datasets related to your own research or anticipated area of research that meet the standards of scientific journals, critically evaluate your findings, and situate them within the larger context of current research literature

Audience: Graduate

**F&W ECOL/BOTANY/ZOOLOGY 460 – GENERAL ECOLOGY**

4 credits.

Ecology of individual organisms, populations, communities, ecosystems, landscapes, and the biosphere. The interaction of organisms with each other and their physical environment. These relationships are studied, often in quantitative terms, in both field and laboratory settings.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and ZOOLOGY/BIOLOGY/BOTANY 152, (ZOOLOGY/BIOLOGY 101 and 102), BIOCORE 381, or BOTANY/BIOLOGY 130, or graduate/professional standing

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**F&W ECOL/ENVIR ST 515 – NATURAL RESOURCES POLICY**

3 credits.

Examine natural resources policy and law in the United States relating to forests, wildlife, and other natural resources. Investigates the policy-making process and the role of science, values, property, economics, and justice in the development of federal and state resources policy. Practice professional written and oral communication and ethical engagement in resources policy and administration.

**Requisites:** Satisfied Communications A requirement or graduate/professional standing

**Course Designation:** Gen Ed - Communication Part B

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **F&W ECOL/BOTANY/ENVIR ST/ZOOLOGY 516 – CONSERVATION BIOLOGY**

3 credits.

Investigate the science behind the protection of nature and preservation of biodiversity by focusing on both the biological and socioeconomic factors that underlie the challenges to and the impacts of conservation efforts. Explore the theory, research, and application of biological conservation from an interdisciplinary, international, solutions-focused perspective. Learn about the many threats to Earth's biodiversity but also examine in-depth and apply approaches to overcome them.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Gen Ed – Quantitative Reasoning Part B  
Breadth – Biological Sci. Counts toward the Natural Sci req  
Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S  
Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Distinguish conservation biology from other scientific disciplines and describe its over-arching principles.

Audience: Both Grad & Undergrad

2. Articulate many reasons why the conservation of biological diversity (at many levels) is important.

Audience: Both Grad & Undergrad

3. Quantify biodiversity at the individual, population, and species level by applying various commonly used models and indices.

Audience: Both Grad & Undergrad

4. Explain orally and in writing the principal threats to biodiversity, to both scientific and layperson audiences (habitat loss and fragmentation; industrial agriculture; climate change; overexploitation; invasive species; pollution) and the specific biological effects of these threats.

Audience: Both Grad & Undergrad

5. Outline strategies to implement at the personal, local, and global scales for solving the biodiversity crisis.

Audience: Both Grad & Undergrad

6. Critically analyze, apply, and communicate recommendations for changing personal behaviors to mitigate the biodiversity and climate crises.

Audience: Both Grad & Undergrad

7. Assess the strengths and weaknesses of various conservation strategies or policy approaches.

Audience: Both Grad & Undergrad

8. Synthesize multiple investigations of conservation strategies to assess tradeoffs and synergies among them.

Audience: Graduate

9. Make science-based recommendations for the appropriate conservation approach or strategy for a given situation.

Audience: Graduate

10. Manipulate quantitative data using multi-step arguments to evaluate, interpret, and express solutions to problems in biodiversity estimation, population monitoring, and genetics in the context of conservation.

Audience: Both Grad & Undergrad

### **F&W ECOL/AN SCI/ZOOLOGY 520 – ORNITHOLOGY**

3 credits.

Introduction to bird biology, ecology, and behavior. Topics include the evolutionary origin of birds and flight, anatomy and physiology, functional morphology, migration, communication, reproductive strategies, ecological adaptations and roles, and biogeographical patterns.

**Requisites:** ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **F&W ECOL/AN SCI/ZOOLOGY 521 – BIRDS OF SOUTHERN WISCONSIN**

3 credits.

Outdoor and indoor labs/lectures emphasizing identification of southern Wisconsin birds by sight and vocalization. Two required Saturday field trips in Southern Wisconsin.

**Requisites:** ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**F&W ECOL/A A E/ECON 531 – NATURAL RESOURCE ECONOMICS**

3 credits.

Economic concepts and tools relating to management and use of natural resources, including pricing principles, cost-benefit analysis, equity, externalities, economic rent, renewable and nonrenewable resources, and resource policy issues.

**Requisites:** ECON 301 or 311 or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Employ appropriate concepts in order to correctly define the economic benefits accrued from different natural resources.

Audience: Both Grad & Undergrad

2. Apply appropriate methodologies and tools to demonstrate the conditions under which the benefits are likely to be captured or dissipated by real world actors.

Audience: Both Grad & Undergrad

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of maintaining healthy supplies of forests, biodiversity, fish and wildlife, and freshwater.

Audience: Both Grad & Undergrad

4. Analyze the causes of and solutions for the sustainability challenges of maintaining healthy supplies of forests, biodiversity, fish and wildlife, and freshwater.

Audience: Both Grad & Undergrad

5. Apply academic principles of natural resource economics to a real-world policy problem.

Audience: Graduate

**F&W ECOL/SURG SCI 548 – DISEASES OF WILDLIFE**

3 credits.

Provides an overview of the issues involved across a wide range of wildlife diseases, presented within the context of ecosystem health or "one health". Content will be on the biological, epidemiological, clinical, public health and, in some cases, sociopolitical ramifications of wildlife diseases. Covers a wide variety of wildlife diseases caused by bacteria, viruses, parasites, prions, and environmental contaminants. Consequences associated with environmental changes on the manifestation of wildlife diseases will also be discussed. This range of diseases will be presented in order to familiarize the many facets involved in disease management, from animal and human health issues, to ecological and environmental considerations, to the role of society in contributing to, and managing, these diseases.

**Requisites:** BOTANY/BIOLOGY 130, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain how an infection differs from disease.

Audience: Undergraduate

2. Recognize different groups of infectious microorganisms: viruses, bacteria, fungi, parasites, prions, etc.

Audience: Undergraduate

3. Define and describe ecosystem health or one health.

Audience: Undergraduate

4. Define the terms zoonosis, zoonoses, and zoonotic.

Audience: Undergraduate

5. Evaluate how anthropogenic influences exacerbate transmission of zoonotic diseases.

Audience: Undergraduate

6. Describe and explain the epidemiological concepts related to each wildlife disease presented in this course.

Audience: Undergraduate

7. Recognize diseases that are specific to animal groups or humans, or are nonspecific, having the potential to infect many different species.

Audience: Undergraduate

**F&W ECOL 550 – FOREST ECOLOGY**

3 credits.

Introduction to major abiotic and biotic factors that influence forest ecosystem composition, structure, and function. Reviews important processes that influence structure and function of forest ecosystems. Uses basic ecosystem concepts to elucidate influence of anthropogenic (including forest management) and natural disturbances on forest ecosystem structure and function.

**Requisites:** BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL 551 – FOREST ECOLOGY LAB**

1 credit.

Review concepts presented in F&W ECOL 550 by exposing the key concepts and processes discussed that can best be seen in the field or illustrated with the use of ecosystem models.

**Requisites:** F&W ECOL 550 or concurrent enrollment, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL 561 – WILDLIFE MANAGEMENT TECHNIQUES**

3 credits.

Preparation of collections, analyses of food habits, sex and age determinations, censuses, trapping and banding, planting food and cover, research techniques.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL/LAND ARC/ZOOLOGY 565 – PRINCIPLES OF LANDSCAPE ECOLOGY**

2 credits.

Emphasizes the importance of spatial patterns at broad scales. Concepts and applications are covered.

**Requisites:** (ZOOLOGY/BOTANY/F&W ECOL 460 or F&W ECOL 550) and (STAT 301, 371, or F&W ECOL/STAT 571), or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**F&W ECOL/STAT 571 – STATISTICAL METHODS FOR BIOSCIENCE I**

4 credits.

Descriptive statistics, distributions, one- and two-sample normal inference, power, one-way ANOVA, simple linear regression, categorical data, non-parametric methods; underlying assumptions and diagnostic work.

**Requisites:** Graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL/STAT 572 – STATISTICAL METHODS FOR BIOSCIENCE II**

4 credits.

Polynomial regression, multiple regression, two-way ANOVA with and without interaction, split-plot design, subsampling, analysis of covariance, elementary sampling, introduction to bioassay.

**Requisites:** STAT/F&W ECOL 571

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**F&W ECOL 577 – COMPLEXITY AND CONSERVATION OF WHITE-TAILED DEER**

3 credits.

Solve problems that arise in the conservation and management of wildlife populations requires that managers understand and evaluate human cultural, economic, and political issues in addition to ecological issues. Use case studies to understand the interdisciplinary nature of wildlife management while gaining practical hands-on experiences.

**Requisites:** Declared in Wildlife Ecology and Junior Standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL 590 – INTEGRATED RESOURCE MANAGEMENT**

3 credits.

Resource management planning in state and federal land management agencies. Apply principles by working in teams to develop a management plan for a real property by inventorying resources; developing management objectives and alternatives; and analyzing their ecological, social and institutional implications.

**Requisites:** Declared in Forest Science, Junior Standing, and F&W ECOL 658

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL 599 – WILDLIFE RESEARCH CAPSTONE**

3 credits.

Synthesize concepts in wildlife ecology and prepare for a wildlife research career. Develop a professional-quality research proposal for an extended project, carry out a pilot ecological field study, and design and implement a social survey questionnaire.

**Requisites:** F&W ECOL 561

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**F&W ECOL 655 – ANIMAL POPULATION DYNAMICS**

3 credits.

Fluctuations of animal populations: techniques of study, documentation, controls.

**Requisites:** (F&W ECOL 318 or ZOOLOGY/BOTANY/F&W ECOL 460) and (MATH 112, 114, 171 or placement into MATH 221), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply field specific vocabulary and foundational theories of population dynamics to describe current understandings of how animal populations behave and interact

Audience: Both Grad & Undergrad

2. Assess how existing theories, models, and field data are understood and applied in wildlife conservation

Audience: Both Grad & Undergrad

3. Analyze population dynamics using species-specific examples that would be relevant to a professional wildlife biologist using data and conceptual models

Audience: Both Grad & Undergrad

4. Synthesize, evaluate, and formulate a position on current scholarly research in a focused area of population dynamics

Audience: Graduate

5. Demonstrate oral communication skills including identification and explanation of relevant content, clear organization, and effective delivery

Audience: Graduate

**F&W ECOL 658 – FOREST RESOURCES PRACTICUM**

3 credits.

Field training and experience; exposure to forestry operations, equipment, procedures, and management problems.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**F&W ECOL/ZOOLOGY 660 – CLIMATE CHANGE ECOLOGY**

3 credits.

The evidence that the Earth's climate is changing at unprecedented rates is now overwhelming. Environmental tipping points are being crossed and many species are adapting or failing to adapt. Climate change poses a significant problem for conserving and managing wildlife and their habitats. Climate change, its ecological impacts, and the principle of climate change adaptation in natural resources conservation will be discussed.

**Requisites:** BOTANY/BIOLOGY/ZOOLOGY 152, (BIOLOGY/ZOOLOGY 101 and 102), BIOCORE 381, or BIOLOGY/BOTANY 130, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. explain historic and future trends in climate change within an ecological context.

Audience: Both Grad & Undergrad

2. identify the eco-evolutionary impacts of climate change on biological communities (including changes in phenology and ranges, community dynamics, and altered trophic interactions).

Audience: Both Grad & Undergrad

3. develop a climate change vulnerability assessment for a given species or community.

Audience: Both Grad & Undergrad

4. analyze and incorporate climate and biological data in vulnerability assessments.

Audience: Graduate

**F&W ECOL/BOTANY/ZOOLOGY 672 – HISTORICAL ECOLOGY**

2 credits.

Study the importance of past events for current ecosystems. Emphasizes concepts and applications.

**Requisites:** Senior standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**F&W ECOL 675 – PROFESSIONAL DEVELOPMENT IN FOREST & WILDLIFE ECOLOGY**

1 credit.

Provides opportunities for additional training in professional development skills relevant to careers in natural resources.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**F&W ECOL 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for undergraduate students in an Honors program completing a thesis in the area of Forest and Wildlife Ecology, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**F&W ECOL 682 – SENIOR HONORS THESIS**

2-4 credits.

Second semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Forest and Wildlife Ecology, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**F&W ECOL 691 – SENIOR THESIS**

2-4 credits.

Independent research for Honors students completing a thesis in the areas of Forest Science or Wildlife Ecology, under the guidance of a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL 692 – SENIOR THESIS**

2-4 credits.

Independent research for Honors students completing a thesis in the areas of Forest Science or Wildlife Ecology, under the guidance of a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**F&W ECOL 699 – SPECIAL PROBLEMS**

1-4 credits.

Individual advanced work in an area of Forest and Wildlife Ecology under the direct guidance of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**F&W ECOL/ENTOM 711 – MULTIVARIATE ANALYSIS OF ECOLOGICAL AND COMMUNITY DATA**

2 credits.

Examines common methods of multivariate data analysis in ecology and environmental science. Covers methods for the analysis of complex, multidimensional datasets that are collected in the study of plant, invertebrate, fish, and bird communities. Addresses the concurrent analysis of the environmental factors that may drive community distributions. Provides the basis for predictive modeling of distributions across landscapes. General methods covered include ordination (PCA, DCA, NMDS, CCA), clustering (or classification), and other comparative analyses of data matrices (ANOSIM, Mantel tests). Includes an applied, "hands-on" approach on how to use these tools, and the circumstances under which their uses are either appropriate or inappropriate.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**F&W ECOL 799 – PRACTICUM IN FORESTRY AND WILDLIFE ECOLOGY/TEACHING**

1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**F&W ECOL/BOTANY/ENTOM/ZOOLOGY 821 – FOUNDATIONS OF ECOLOGY**

2 credits.

Foundational ideas in the field of ecology. Discussion topics trace the development of ecology as a discipline, and the roots of modern ecological thought, as well as the research approaches in ecology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and describe key debates in the history of ecology and ongoing controversies in the field.

Audience: Graduate

2. Differentiate ecological processes and how they sustain ecological systems.

Audience: Graduate

3. Moderate and participate in discussions about the significance of important ecological concepts.

Audience: Graduate

4. Summarize, interpret, and synthesize conceptual theories of ecology orally and in writing.

Audience: Graduate

5. Evaluate peer work and provide constructive, professional feedback.

Audience: Graduate

**F&W ECOL 850 – DEMOGRAPHIC METHODS IN WILDLIFE CONSERVATION**

3 credits.

Explores the application of demographic methods in the conservation and management of animal populations. Techniques explored include maximum likelihood and Bayesian estimation, count-based models, mark-recapture models, occupancy models, matrix models, and sensitivity analyses. Emphasizes application of these models in conservation decision making.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Estimate model parameters using maximum likelihood and Bayesian procedures

Audience: Graduate

2. Construct, implement, and interpret output from deterministic and stochastic matrix models of population growth

Audience: Graduate

3. Estimate and model ecological drivers of mortality and survival rates in wildlife populations using mark-recapture modeling methods

Audience: Graduate

4. Estimate and model ecological drivers of site occupancy rates for wildlife populations using occupancy modeling methods

Audience: Graduate

5. Evaluate model limitations, model assumptions, and the effects of violations of assumptions on inference

Audience: Graduate

6. Interpret population model output and apply results to conservation decision making in the face of uncertainty

Audience: Graduate

**F&W ECOL 875 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest to graduate students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**F&W ECOL/BOTANY/ZOOLOGY 879 – ADVANCED LANDSCAPE ECOLOGY**

3 credits.

Emphasizes spatial patterning (its development and importance for ecological processes) and often focuses on large regions. Learn concepts, methods, and applications of landscape ecology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**F&W ECOL/AGROECOL/ATM OCN/BOTANY/ENTOM/ENVIR ST/ GEOG/ZOOLOGY 953 – INTRODUCTION TO ECOLOGY RESEARCH AT UW-MADISON**

1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison

Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison

Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology

Audience: Graduate

4. Develop appropriate expectations for advisors and advisees

Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics

Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science

Audience: Graduate

**F&W ECOL/DS/URB R PL 955 – PRACTICAL RESEARCH DESIGN AND METHODS OF EMPIRICAL INQUIRY**

3 credits.

Provides a practical introduction to basic concepts of research question formulation, research designs and alternative methods of inquiry, implications for internal validity of the research and generalizability of the findings, operational definitions and measurement validity, reliability, utility and precision.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**F&W ECOL/ATM OCN/BOTANY/ENVIR ST/GEOG/GEOSCI/ZOOLOGY 980 – EARTH SYSTEM SCIENCE SEMINAR**

1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**F&W ECOL 990 – RESEARCH AND THESIS**

1-12 credits.

Independent research in preparation of a graduate thesis under supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**F&W ECOL 999 – ADVANCED INDEPENDENT STUDY**

1-3 credits.

Independent graduate study under supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**FRENCH (FRENCH AND ITALIAN) (FRENCH)****FRENCH 101 – FIRST SEMESTER FRENCH**

4 credits.

Oral practice and conversation, grammar, reading, vocabulary building, and study of French and Francophone cultures.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**FRENCH 102 – SECOND SEMESTER FRENCH**

4 credits.

Oral practice and conversation, grammar, reading, vocabulary building, and study of French and Francophone cultures.

**Requisites:** FRENCH 101 or placement into FRENCH 102

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**FRENCH 105 – ACCELERATED INTRODUCTORY FRENCH**

4 credits.

Accelerated development of communicative literacy skills in French and exploration of the contemporary French-speaking world, equivalent to the completion of both FRENCH 101 and FRENCH 102.

**Requisites:** Not open to students with credit for FRENCH 102

**Course Designation:** Frgn Lang – 2nd semester language course

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Communicate in French both orally and in writing to share ideas, ask questions, and answer questions about personal identity, daily life, likes and dislikes, travel, fashion, housing, and university and work life.

Audience: Undergraduate

2. Demonstrate understanding of the main idea and some details of texts in French including short articles, surveys, interviews, songs, and other video texts related to personal identity, daily life, likes and dislikes, travel, fashion, housing, and university and work life.

Audience: Undergraduate

3. Compose brief informal written texts in French about course topics listed above and formally in three writing projects.

Audience: Undergraduate

4. Describe and narrate ideas in French about course topics listed above in an interview and a short digital recording.

Audience: Undergraduate

5. Demonstrate understanding of lexico-grammatical structures in French for communicating in the present, past, and near future about information relevant to course topics listed above.

Audience: Undergraduate

6. Demonstrate understanding of cultural products, practices, and perspectives related to course topics listed above.

Audience: Undergraduate

7. Reflect on differences between one's own culture and the cultural products, practices, and perspectives of the French-speaking world.

Audience: Undergraduate

**FRENCH 203 – THIRD SEMESTER FRENCH**

4 credits.

Oral practice and conversation, grammar review, reading, vocabulary expansion, creative writing and study of French and Francophone cultures.

**Requisites:** FRENCH 102 or placement into FRENCH 203

**Course Designation:** Frgn Lang – 3rd semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**FRENCH 204 – FOURTH SEMESTER FRENCH**

4 credits.

Advanced oral practice and conversation, grammar review, reading, vocabulary expansion, creative writing and study of French and Francophone cultures.

**Requisites:** FRENCH 203 or placement into FRENCH 204

**Course Designation:** Frgn Lang – 4th semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**FRENCH 211 – FRENCH LITERARY AND INTERDISCIPLINARY STUDIES**

3–4 credits.

An introductory, interdisciplinary area of French studies with a focus on French literary texts in English translation.

**Requisites:** None

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key writers, filmmakers and/or artists who are associated with the given course topic.

Audience: Undergraduate

2. Discuss several key literary, cinematic and artistic trends associated with the given course topic.

Audience: Undergraduate

3. Apply basic concepts of literary and film analysis to perform close readings of texts and film related to the given course topic.

Audience: Undergraduate

4. Demonstrate how contemporary social, cultural, and artistic practices associated with the given course topic have been influenced by historical events.

Audience: Undergraduate

5. Analyze literary texts, films and artistic works in relation to specific course topic-related themes or issues.

Audience: Undergraduate

6. Create a presentation or other creative project synthesizing knowledge about the given course topic.

Audience: Undergraduate

**FRENCH/AFRICAN 216 – MODERN AND CONTEMPORARY FRANCOPHONE TOPICS**

3 credits.

Modern and contemporary topics in the African francophone world, which includes both the African continent and the African diaspora. Taught in English.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions**Learning Outcomes:** 1. Recognize canonical authors (writers and directors), historical forms, genres, and structures, in Africa and its diasporas.

Audience: Undergraduate

2. Develop a level of proficiency in the different “ways of knowing” Africa and the diaspora through cinema and/or literature.

Audience: Undergraduate

3. Discuss visual and literary texts from various theoretical and critical perspectives, formulate ideas and make connections between visual/cultural concepts and themes.

Audience: Undergraduate

**FRENCH 228 – INTERMEDIATE LANGUAGE AND CULTURE**

3–4 credits.

Enhance writing and speaking proficiency through cultural readings on France and the francophone world. Review of grammar and focus on more complex grammatical structures.

**Requisites:** FRENCH 204 or placement into FRENCH 228**Course Designation:** Frgn Lang – 5th + semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**FRENCH 248 – ETHNIC STUDIES IN THE FRENCH/FRANCOPHONE WORLD(S)**

3 credits.

An introduction to French colonialism in the New World and its effects on African-American, Afro-Creole, Native American, Franco-American, Cajun, and Caribbean diasporan communities in the U.S. through literature, history, and culture.

**Requisites:** None**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2019**FRENCH 271 – LITERATURE, COMICS, AND FILM IN FRENCH**

3–4 credits.

An introduction to reading and analyzing literary works, comics, and film, with special emphasis on the development of writing skills in French.

**Requisites:** FRENCH 228**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Frgn Lang – 5th + semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Master a selected set of terminology (in French) and tools of close reading pertaining to the three genres of literature (poetry, prose, and theater), comics/graphic novels, and films

Audience: Undergraduate

2. Produce nuanced written analyses of literary texts, comics, and films, in order to reveal their deeper significance

Audience: Undergraduate

3. Present original ideas about a work in front of the class with a solid command of spoken French

Audience: Undergraduate

4. Demonstrate an understanding of the social stakes of texts from different periods of the history of France and Francophone nations

Audience: Undergraduate

5. Better understand different (French and Francophone) cultural perspectives and reflect upon your own

Audience: Undergraduate

6. Improve ability to formulate and express your own ideas in French, both in speaking and in writing

Audience: Undergraduate

### FRENCH/GEN&WS 285 – REBELLIOUS WOMEN FROM THE GLOBAL SOUTH

3-4 credits.

Explores how women from different francophone regions (with a specific focus on North and Sub-Saharan Africa and the Middle East) gain agency through literature, movies, comics, and songs, contesting different forms of domination, exclusion, and injustice, based on gender, race, class, and religion.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify key women writers, filmmakers, and/or artists associated with the course topic.

Audience: Undergraduate

2. Be familiar with the socio-historical contexts in which these women thrive.

Audience: Undergraduate

3. Learn how to closely read and critically analyze literary texts, films and artistic works.

Audience: Undergraduate

4. Demonstrate improvement in oral and writing skills.

Audience: Undergraduate

5. Show awareness of variances in culture, ethnicity, class, sexuality, and religion inherent in all societies.

Audience: Undergraduate

### FRENCH 288 – DOCTORS WITHOUT BORDERS (MÉDECINS SANS FRONTIÈRES)

3 credits.

An overview of the global humanitarian NGO, Doctors without Borders (or Médecins sans Frontières MSF) including its history, mission, organization, and the cultural, political, and ethical challenges it faces. Explores issues of global health, social justice, and humanitarian action. Features distinguished global practitioners with first-hand experience in health crisis situations.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Learn about the history, vision, mission, and impact of Doctors without Borders (MSF) in a range of health and humanitarian crises over time and world regions. Become knowledgeable about the ethical, political, cultural, economic, and professional dilemmas associated with a global health and humanitarian organization in crisis situations across different world regions.

Audience: Undergraduate

2. Develop critical thinking and interdisciplinary views while reading a variety of texts and documents, and analyze sociological, historical, or cultural phenomena with rigor and depth.

Audience: Undergraduate

3. Become knowledgeable about the role of writing - in essay, fiction, or reporting - as a feature of witnessing ("témoignage") in health and humanitarian crises.

Audience: Undergraduate

4. Be challenged to see and capture the world through the eyes of other cultures in order to enhance intercultural knowledge and develop a critical perspective to positively contribute to health and humanitarian action, globally and locally.

Audience: Undergraduate

5. Learn to conduct comparative analysis of health and humanitarian organizations and engage critically with staff, stakeholders and partners of health and humanitarian NGOs as organizations and in the field.

Audience: Undergraduate

### FRENCH 298 – DIRECTED STUDY

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2006

### **FRENCH 299 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### **FRENCH 301 – PRACTICAL FRENCH CONVERSATION**

1 credit.

Enhances speaking in an informal, conversational atmosphere at the French House. Taught in French.

**Requisites:** FRENCH 203 or placement into FRENCH 204

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

### **FRENCH 302 – PRACTICAL FRENCH CONVERSATION**

1 credit.

Further enhances speaking in an informal, conversational atmosphere at the French House. Taught in French.

**Requisites:** FRENCH 203 or placement into FRENCH 204

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

### **FRENCH 311 – ADVANCED COMPOSITION AND SPEAKING**

3 credits.

Learn to write essays on a variety of topics, using different registers of French, and work to correct pronunciation and improve conversation skills. Taught in French.

**Requisites:** FRENCH 228

**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop confidence and accuracy in articulating, debating, and defending ideas in advanced ways in French.

Audience: Undergraduate

2. Grow more familiar with various written genres such as narrative and persuasive writing and how one constructs a text in a particular genre.

Audience: Undergraduate

3. Learn information about today's French-speaking world and the current cultural practices and perspectives.

Audience: Undergraduate

4. Work on the continued development of skills in understanding culture.

Audience: Undergraduate

5. Develop the ability to make cross-cultural comparisons.

Audience: Undergraduate

**FRENCH 312 – ADVANCED WRITING WORKSHOP**

3 credits.

Develop writing and oral expression at an advanced level through writing and discussion of internet journalism, translation, or creative genres. Taught in French.

**Requisites:** FRENCH 228**Course Designation:** Frgn Lang - 5th + semester language course Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain experience in presentational writing in French in a variety of genres  
Audience: Undergraduate

2. Demonstrate understanding of the relationships between form and content in French texts, i.e., how certain linguistic and stylistic techniques are used to make meaning in particular genres  
Audience: Undergraduate

3. Develop interpersonal speaking abilities in French (e.g., giving constructive criticism, complimenting, seeking additional details, hypothesizing, making descriptions, comparing)  
Audience: Undergraduate

4. Refine your presentational speaking abilities in French, e.g., pronunciation, intonation, and other aspects of engaging delivery of oral texts  
Audience: Undergraduate

5. Be an active participant in a writing community  
Audience: Undergraduate

6. Gain awareness of the language-learning process and your own identity as a developing language learner through goal setting and self-reflection  
Audience: Undergraduate

**FRENCH/INTL BUS 313 – PROFESSIONAL COMMUNICATION AND CULTURE IN THE FRANCOPHONE WORLD**

3 credits.

Study and analysis of the culture and sociology of professional environments in the French and Francophone worlds, including government, international organizations, NGO's and business. Students develop communication skills through interactive teaching methods in multimedia labs.

**Requisites:** FRENCH 228 or 311**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**FRENCH/INTL BUS 314 – CONTEMPORARY ISSUES IN BUSINESS, GOVERNMENT AND NGOS**

3 credits.

Cultural study of contemporary Francophone Africa, focusing on issues in government, organizations and enterprise. Exploration of cultural and professional relations between Francophone Africa and France, the European Union, and the United States.

**Requisites:** FRENCH 228, 311, or INTL BUS/FRENCH 313**Course Designation:** Frgn Lang - 5th + semester language course Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand current events in French-speaking Africa.  
Audience: Undergraduate

2. Recognize the ways in which those phenomena are understood, discussed and represented in other major Francophone regions (like Quebec, Mali, Morocco, France, and other regions), as well as in the United States.  
Audience: Undergraduate

3. Conceptualize and apply transferrable skills acquired in a liberal arts education to French-related international business and non-profit careers.  
Audience: Undergraduate

4. Apply the fundamentals of intercultural communication with a personal profile and "pitch," in both English and French, to network more effectively.  
Audience: Undergraduate

Audience: Undergraduate

5. Enhance oral and written communication skills, in both languages, applicable to networking and job-seeking situations.  
Audience: Undergraduate

**FRENCH 316 – STUDY ABROAD: ADVANCED FRENCH LANGUAGE**

2-6 credits.

Used as a study abroad equivalent for advanced-level French language courses. Enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions

**FRENCH 321 – MEDIEVAL AND EARLY MODERN FRENCH LITERATURE**

3 credits.

Introduction to important literary works from the medieval era to the French Revolution. Taught in French.

**Requisites:** FRENCH 271

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key French writers and texts from the Middle Ages to the 18th century.

Audience: Undergraduate

2. Discuss literary trends and schools of thought associated with this time period.

Audience: Undergraduate

3. Apply concepts of literary analysis to perform close readings of texts.

Audience: Undergraduate

4. Demonstrate understanding of French culture and its evolution from the Middle Ages to the 18th century.

Audience: Undergraduate

5. Express complex ideas/analysis in French both verbally and in writing.

Audience: Undergraduate

**FRENCH 322 – MODERN FRENCH AND FRANCOPHONE LITERATURE**

3 credits.

Introduction to important literary works of modernity (from the French Revolution to the twenty-first century). Taught in French.

**Requisites:** FRENCH 271

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key writers, filmmakers, and/or artists who are associated with French modernity.

Audience: Undergraduate

2. Discuss several key literary, cinematic, and artistic trends associated with French modernity.

Audience: Undergraduate

3. Apply concepts of literary and film analysis to perform close readings of texts and films.

Audience: Undergraduate

4. Demonstrate how French social, cultural, and artistic associated practice has been influenced by historical events.

Audience: Undergraduate

5. Analyze literary texts, films and artistic works in relation to specific France-related themes or issues.

Audience: Undergraduate

**FRENCH 325 – VISUAL CULTURE IN FRENCH/FRANCOPHONE STUDIES**

3 credits.

Aspects of French culture as manifested in painting, photography, film or other visual media in relation to literature. Taught in French.

**Requisites:** FRENCH 271

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **FRENCH 345 – FRENCH FASHION AND LITERATURE FROM THE MIDDLE AGES TO TODAY**

3 credits.

Study of French literary texts embedded in their cultural contexts, with a focus on clothing and fashion. Chart the emergence and representation of sartorial taste in France through analysis and discussion of selected texts and other media that feature clothing as a reflection of aesthetic and social values. Rather than evidence for material and economic history, literature and the visual arts will be ways to touch on issues such as the evolution of the notion of human physical beauty, of taste, of gender differences and roles, of social status and stratification in different historical contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key writers, filmmakers, and/or artists who are associated with the material and historical periods covered in the course.

Audience: Undergraduate

2. Develop critical thinking and interdisciplinary views while reading a variety of texts and documents, and analyze sociological, historical, and cultural phenomena.

Audience: Undergraduate

3. Apply concepts of literary and film analysis to perform close readings of texts and films.

Audience: Undergraduate

4. Demonstrate how contemporary social, cultural, and artistic practice associated with fashion in France has been influenced by historical events.

Audience: Undergraduate

### **FRENCH 347 – MEDIEVAL AND EARLY MODERN CULTURE**

3 credits.

An introduction to the political, social, intellectual, artistic and literary development of French culture, from its origins to the French Revolution (1789). Taught in French.

**Requisites:** FRENCH 311, 312, 321, 322, or 325

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and understand major thinkers, ideas, and events from the middle ages to the French Revolution and how they have shaped French culture.

Audience: Undergraduate

2. Better understand the subtle differences between French and American culture.

Audience: Undergraduate

3. Improve your oral and written comprehension in French, as well as your capacities to express yourself in that language.

Audience: Undergraduate

4. Learn to research historical reasons underlying the particularities of French culture.

Audience: Undergraduate

### **FRENCH 348 – MODERNITY STUDIES**

3 credits.

An introduction to political, social, intellectual, artistic and literary developments in French and Francophone culture, within the time period from the French Revolution to the current era. Taught in French.

**Requisites:** FRENCH 271

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **FRENCH 350 – APPLIED FRENCH LANGUAGE STUDIES**

1-3 credits.

Selected applied language topics pertaining to teaching French as a second language. Taught in French.

**Requisites:** FRENCH 271 or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**FRENCH 361 – STUDY ABROAD: FRENCH/FRANCOPHONE LITERATURE**

2-3 credits.

Used as a study abroad equivalent for French/Francophone literature courses. Enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**FRENCH 362 – STUDY ABROAD: FRENCH/FRANCOPHONE CIVILIZATION**

2-3 credits.

Used as a study abroad equivalent for French/Francophone civilization courses. Enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**FRENCH 391 – FRENCH FOR READING KNOWLEDGE**

3 credits.

Intensive grammar and reading for those with little or no experience in French. Readings from appropriate texts in the humanities, sciences, social sciences.

**Requisites:** Sophomore standing**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

3. Improve interpretative skills.

Audience: Undergraduate

**FRENCH 590 – INTRODUCTION TO PHONETICS**

3 credits.

Study of French sounds, phonetic transcription, practice in pronunciation. Taught in French.

**Requisites:** FRENCH 228 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Learn the International Phonetic Alphabet (IPA) and use it for phonetic transcription.

Audience: Both Grad & Undergrad

2. Familiarize yourself with basic notions of phonetics and French phonology.

Audience: Both Grad & Undergrad

3. Improve and perfect your pronunciation of Modern Standard French. The emphasis will be put on the pronunciation of vowels and consonants, and on intonation patterns, rhythm, and liaisons.

Audience: Both Grad & Undergrad

4. Prepare for instruction by designing a phonetics lesson which will be taught to classmates and/or in the student's own TA section.

Audience: Graduate

5. Complete additional and/or longer audio recording and assignments as preparation for their own instructional needs.

Audience: Graduate

**FRENCH 615 – ADVANCED GRAMMAR**

3 credits.

French grammar and style, with a special focus on various critical and professional applications. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

### **FRENCH 616 – SOCIAL RESPONSIBILITY IN CONTEMPORARY FRENCH-LANGUAGE PROFESSIONAL WRITING**

3 credits.

Investigates discourses of social responsibility in the French-speaking professional world and across sectors, in the fields of international development, marketing, management, and administration. By studying how concepts of socially responsible practice are represented in business and professional writing in France, Quebec and Francophone Africa, consider how trends in one's own concentration areas relate to those of classmates and future colleagues. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### **FRENCH 617 – CONTEMPORARY SKILL SET LITERATURE IN FRENCH**

3 credits.

Examines how contemporary business and professional writing in French portrays professional skill sets for readers in Francophone Europe and North America, and to a lesser extent in Francophone Africa, particularly in the fields of international education, international development, marketing, management, and administration. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **FRENCH 618 – CAREER STRATEGIES FOR THE FRENCH-SPEAKING WORLD**

2 credits.

Study published contemporary French-language writing on career strategies for emerging professionals and professionals in transition in Europe, Africa and North America. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **FRENCH 623 – ORAL COMMUNICATION**

3 credits.

Professional communication for advanced speakers of French, with a particular focus on intercultural analysis, nonverbal communication, and public speaking. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2021

### **FRENCH 630 – THE AGE OF REASON**

3 credits.

Advanced study of 18th-century French literature and culture, in relation to a chosen topic. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### **FRENCH 631 – 17TH-CENTURY FRENCH LITERATURE**

3 credits.

Literary and philosophical trends of the Age of Enlightenment with special emphasis on Montesquieu, Voltaire, Diderot, and Rousseau. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### **FRENCH 639 – 17TH-CENTURY LITERATURE**

3 credits.

Advanced study of important literary works of the 17th century. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### **FRENCH 642 – CULTURE AND SOCIETIES**

3 credits.

Survey of major socio-political, cultural, and economic developments in the major French-speaking regions of the world, with a focus on Europe, Africa and Canada. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**FRENCH 647 – THE 20TH-CENTURY FRENCH NOVEL**

3 credits.

Advanced study of important literary works of the 20th century. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**FRENCH 665 – INTRODUCTION TO FRANCOPHONE STUDIES**

3 credits.

Study of literary texts from diverse Francophone cultures (Africa, the Caribbean, Quebec) and the cultural and political dynamics between these texts and these cultures. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**FRENCH 672 – TOPICS IN LITERATURE AND CULTURE**

3 credits.

Explores a specific topic in the history of French and/or Francophone literature and culture; includes analysis and interpretation of texts and/or film in their historical contexts. May be focused on one, or cut across different literary periods. Applies diverse interpretative methodologies to a coherent body of material. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explore a historically grounded question pertaining to a specific chronological timeframe of French and/or Francophone literature and culture

Audience: Graduate

2. Design and complete a short research project in the field of French and/or Francophone literature and culture

Audience: Graduate

3. Analyze literary texts within their historical and cultural contexts

Audience: Graduate

4. Write scholarly reviews of published scholarship in the field

Audience: Graduate

5. Perfect strategies for successfully delivering a research paper before an academic audience

Audience: Graduate

**FRENCH 681 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

**FRENCH 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2017

**FRENCH 691 – THESIS**

2 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 1996

**FRENCH 692 – THESIS**

2 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 1997

**FRENCH 698 – DIRECTED STUDY**

1-6 credits.

Advanced independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2018

**FRENCH 699 – DIRECTED STUDY**

1-6 credits.

Advanced independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**FRENCH/MEDIEVAL 704 – LA LITTERATURE FRANCAISE DU XIV ET DU XV SIECLE**

3 credits.

Study of important literary works of the 14th and 15th centuries. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**FRENCH 750 – RESEARCH LABORATORY I: INTRODUCTION TO GRADUATE RESEARCH**

3 credits.

An introduction to graduate studies in French that provides the necessary skills for success. Includes exploration of structure and expectations of graduate programs, the basics of scholarly research, reflection upon research interests and possible individual scholarly identities, and academic conferences. Taught in French.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the different kinds of research tasks and projects you will have to carry out as a graduate student in our program.

Audience: Graduate

2. Distinguish and effectively locate the different kinds of scholarly resources in your field.

Audience: Graduate

3. Describe the different research fields of department faculty and begin to develop your own.

Audience: Graduate

4. Execute strategies for successfully delivering a research paper before an academic audience.

Audience: Graduate

5. Implement strategies for creating a professional research/teaching portfolio and CV.

Audience: Graduate

**FRENCH 752 – RESEARCH LABORATORY II: PRODUCING PROFESSIONAL RESEARCH**

3 credits.

Provides the necessary skills for success in the PhD program. Includes exploration of structure and expectations, as well as of the professional skills needed to succeed in the profession after graduation. Taught in French.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**Learning Outcomes:** 1. Identify the different kinds of research tasks and projects you will have to carry out as a professional in your field.

Audience: Graduate

2. Implement strategies for developing relevant and meaningful research questions.

Audience: Graduate

3. Distinguish the current state of scholarship on a given topic in your field.

Audience: Graduate

4. Develop an original scholarly contribution to a topic in your field.

Audience: Graduate

5. Design an effective teaching activity using content from your research.

Audience: Graduate

**FRENCH 793 – PROFESSIONAL FRENCH MASTERS PROGRAM INTERNSHIP**

2-3 credits.

Professional internship abroad, in a French-speaking business or organization, in the student's professional field.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2021**FRENCH 799 – INDEPENDENT STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2024**FRENCH/GERMAN/HISTORY/POLI SCI/SOC 804 – INTERDISCIPLINARY WESTERN EUROPEAN AREA STUDIES SEMINAR**

3 credits.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**FRENCH 820 – COLLEGE TEACHING OF FRENCH**

3 credits.

Introduction to teaching collegiate world languages with an emphasis on communicative and literacy-based pedagogical strategies.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**FRENCH/ITALIAN 821 – ISSUES IN METHODS OF TEACHING FRENCH AND ITALIAN**

1-3 credits.

Intended for instructors of elementary- and intermediate-level collegiate instructors of Italian; key concepts of communicative, literacy-oriented language teaching and related techniques for classroom instruction of Italian.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**FRENCH 825 – GRAMMAR AND STYLE**

3 credits.

Grammatical review and stylistic practice. Taught in French.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2021**FRENCH 901 – SEMINAR-MATERIALS AND METHODS OF RESEARCH**

1-3 credits.

Dissertation writing practicum.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**FRENCH 947 – SEMINAR: LITERATURE QUESTIONS**

3 credits.

Study of literature and culture organized thematically or by time period.  
Taught in French.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**FRENCH 948 – SEMINAR: LITERATURE QUESTIONS**

3 credits.

Study of literature and culture organized thematically or by time period.  
Taught in French.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**FRENCH 951 – SEMINAR ON 19TH CENTURY FRENCH POETRY**

3 credits.

Study of 19th-century poetry. Taught in French.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2019**FRENCH 990 – INDIVIDUAL RESEARCH**

1-12 credits.

Mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

## GENDER AND WOMENS STUDIES (GEN&WS)

**GEN&WS 100 – OPEN HOUSE GENDER LEARNING COMMUNITY SEMINAR**

1 credit.

This seminar is for residents of Open House Gender Learning Community. It addresses various topics of interest to this community.

**Requisites:** Member of Open House Gender Learning Community.**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**GEN&WS 101 – GENDER, WOMEN, AND CULTURAL REPRESENTATION**

3 credits.

A humanities-oriented analysis of cultural representations of women and men within the social and historical contexts of race, class, gender and sexuality; engages with a range of traditions and modes of representation including literature, mass media and popular culture.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEN&WS 102 – GENDER, WOMEN, AND SOCIETY IN GLOBAL PERSPECTIVE**

3 credits.

Global, interdisciplinary, social science-oriented analysis of gender, race, class and sexuality in relationship to social institutions and movements for social change. Focus on gender and women in institutions such as education, the economy, the family, law, media, medicine, and politics.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**GEN&WS 103 – GENDER, WOMEN, BODIES, AND HEALTH**

3 credits.

Examines both physiological and social processes relating to gender and health across the lifespan among cisgender, transgender, and non-binary individuals. Examples of topics include hormonal processes, reproductive anatomy physiology, sexuality, sexual pleasure, chronic illness, depression, and sexual violence. A primary course objective is for students to connect information about their bodies and personal health to larger social and political contexts. In particular, considers how health and health disparities are shaped by multiple kind of social inequalities, particularly inequalities based on gender.

**Requisites:** None**Course Designation:** Breadth – Natural Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and describe physiological processes and phenomena relating to health (for example, menstruation, menopause) and ill health (for example, cancer, maternal mortality).

Audience: Undergraduate

2. Recognize that bodies are located in a social context that influences health and illness.

Audience: Undergraduate

3. Understand and analyze the dramatic interplay between physiological processes and social processes.

Audience: Undergraduate

4. Contextualize health within the social and cultural influences on people's lives.

Audience: Undergraduate

5. Evaluate how multiple kinds of social inequalities (e.g., race, ethnicity, social class, sexual identity, gender identity) shape health and health disparities.

Audience: Undergraduate

6. Become more active patients and better-educated healthcare consumers.

Audience: Undergraduate

**GEN&WS 104 – GENDER, SEXUALITY, AND GLOBAL HEALTH**

3 credits.

Provides an introductory overview to critical global health studies, linking past trends to current research and health inequalities. Examines current trajectories in disaster relief and public health interventions through a gendered lens, with a solid grounding in the historical context. Explores social, demographic, political, economic, and ecological determinants of global health, and the ways that these factors interconnect with biomedicine to create and affect health outcomes, both within and across countries. Uses an intersectional approach to analyze how public health policies prioritize whose lives represent "save-able" or "salvageable" ones in the public, political, and corporate eye.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key current gendered and sexual health concerns around the globe.

Audience: Undergraduate

2. Critically analyze the intellectual history of the global health field, tracing its origins from colonial medicine through to the current day using the lens of gender and sexuality.

Audience: Undergraduate

3. Appraise the ways that colonialism, scientific racism, misogyny, and other forms of structural exclusion shape the global health field and its objects/methods of study

Audience: Undergraduate

4. Question the neutrality of quantitative global health metrics, and understand indicators as a contested form of knowledge production.

Audience: Undergraduate

5. Develop analytical thinking and improve written and spoken communication skills.

Audience: Undergraduate

6. Engage empathic connections, intellectual exploration, and ethical actions in the face of gendered health inequalities.

Audience: Undergraduate

### GEN&WS 105 – INTERSECTIONAL APPROACHES TO DISABILITY STUDIES

3 credits.

Analysis of disability as an identity, culture, community, and political concern. Brief introduction to disability studies and intersectionality. Examines historical, political, artistic and cultural representations of disability as it intersects with gender, sexuality, race, class and other systems of oppression. Engage with a variety of academic, literary, visual and other cultural representations by and about disabled people.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the history and current state of disability studies

Audience: Undergraduate

2. Explain intersectionality and the impacts of intersectional identity on disabled people

Audience: Undergraduate

3. Demonstrate the wide-ranging impact of disability studies research and apply this scholarship to history, politics, and everyday life

Audience: Undergraduate

### GEN&WS/HISTORY 134 – WOMEN AND GENDER IN WORLD HISTORY

3-4 credits.

A global (comparative and transnational) survey of women and gender from the ancient world to the modern period. Introduces students to key issues in the history of women and gender, including the historical construction of identities, roles, symbols, and power relationships.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### GEN&WS/ENGL 144 – WOMEN'S WRITING

3 credits.

An introduction to literature in English written by women in various periods and places; specific topics will vary.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### GEN&WS/ED POL 160 – GENDER, SEXUALITY, AND EDUCATION POLICY

3 credits.

Explores how gender, sexuality, and gender identity are conceptualized, practiced, protected, and policed in K-12 schools and in out-of-school contexts in the United States and globally. Examines how gender, sexuality, and gender identity intersect with race, class, language, nationality, and religion to shape the experiences of school-age children and youth.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain how gender, sexuality, and gender identity, as separate and intersected identities, have become situated as normal, natural, and static concepts, and the role that schooling plays in those processes

Audience: Undergraduate

2. Identify and summarize how students are racialized and gendered within educational settings and by educational policies and practices, and how class, religion, language, national status, and other factors intersect with gender, sexuality, and gender identity to shape different educational outcomes and experiences for students

Audience: Undergraduate

3. Analyze the effects of an intersectional approach to understanding gender, sexuality, and gender identity within students' educational experiences, in the US and globally

Audience: Undergraduate

### GEN&WS/SOC 200 – INTRODUCTION TO LESBIAN, GAY, BISEXUAL, TRANSGENDER AND QUEER+ STUDIES

3-4 credits.

A multidisciplinary introduction to lesbian, gay, bisexual, transgender, and queer+ (LGBTQ+) studies, including theories of identity formation, different societal interaction with LGBTQ+ communities, LGBTQ+ cultures in history, and contemporary legal and political issues. Course materials explore the intersections between LGBTQ+ identities and other socially marginalized identities, including (but not limited to) those based on race, ethnicity, religion and disability.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### GEN&WS/RELIG ST 202 – QUEERING RELIGION

3 credits.

Explore the intersections of religiosity and queerness, including the role of religion in the lives of LGBTQ+ individuals and communities, the role of queerness and LGBTQ inclusion in various religious traditions, and what queerness can add to the study of religion (and vice versa).

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze oral and written materials about religion, queerness, and transness.

Audience: Undergraduate

2. Compare diverse systems of value and belief.

Audience: Undergraduate

3. Interpret the interrelationships and impact of religious worldviews and communities.

Audience: Undergraduate

4. Understand core concepts and debates in queer and trans studies of religion.

Audience: Undergraduate

5. Connect scholarship to the institutions that shape everyday life.

Audience: Undergraduate

### GEN&WS/LITTRANS 205 – WOMEN IN RUSSIAN LITERATURE IN TRANSLATION

3-4 credits.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### GEN&WS/AFROAMER 221 – INTRODUCTION TO BLACK WOMEN'S STUDIES

3 credits.

This course will provide students with an overview of the field of Black women's studies.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### GEN&WS/AFROAMER 222 – INTRODUCTION TO BLACK WOMEN WRITERS

3 credits.

An introduction to the writings of Afro-American women from the nineteenth to the twentieth century. Fiction, autobiography, non-fiction prose, and poetry will be read and discussed.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### GEN&WS 240 – FEMINIST APPROACH TO RESEARCH AND WRITING

3 credits.

Experience the excitement and rewards of doing research in the field of Gender and Women's Studies via substantial instruction in the four modes of literacy (that is, speaking, reading, writing, and listening). Through engagement with primary sources, you will ask and define research questions, find and analyze evidence, assess and discuss scholarly interpretations of same sources, build a bibliography, and try out making an argument. Upon successful completion of this course, you will be prepared to undertake substantial research and writing in more advanced courses.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed - Communication Part B

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop scholarly questions through engagement with different kinds of sources and posing questions to prompt productive group discussion.

Audience: Undergraduate

2. Learn the logic of notes, bibliographies, libraries, and archives, and how to consult them to identify and locate source materials. Further, students will take full advantage of the range of library resources including interlibrary loan.

Audience: Undergraduate

3. Determine the perspective, credibility, and utility of source materials. Distinguish between primary and secondary material for a particular topic. Identify the perspective or authorial stance of a source. Summarize an argument presented in a text. Distinguish between the content of a source and its meaning in relation to a particular question.

Audience: Undergraduate

4. Develop and present an argument. Use sources appropriately to create, modify, and support tentative conclusions and new questions.

Audience: Undergraduate

5. Make an argument. Identify the parts of an argument and how to support it convincingly.

Audience: Undergraduate

6. Communicate ideas and research findings effectively through formal and informal written and oral presentations.

Audience: Undergraduate

### GEN&WS/CHICLA/HISTORY 245 – CHICANA AND LATINA HISTORY

3 credits.

Introduces the cultural, economic, social, and political history of Chicanas and Latinas in the U.S. and focuses on four major themes: contact between different ethnic/racial groups; ideas of nation and nationalism; constructions of identity; and struggles for social justice.

**Requisites:** None

**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Critically analyze the presence or absence of Chicanas and Latinas in US history.

Audience: Undergraduate

2. Use methods and vocabularies of history to analyze primary and secondary sources.

Audience: Undergraduate

3. Consider the relevance of Chicana and Latina history to present-day issues.

Audience: Undergraduate

4. Write and revise research aimed at an audience beyond the classroom.

Audience: Undergraduate

### GEN&WS/ENGL 248 – WOMEN IN ETHNIC AMERICAN LITERATURE

3 credits.

American literature by and about women, written by authors from ethnic groups.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### GEN&WS/AFROAMER 267 – ARTISTIC/CULTURAL IMAGES OF BLACK WOMEN

3 credits.

Cultural images by and about Black women; feminine creativity in the arts within their historical, cultural, social, and political contexts.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**GEN&WS/LITTRANS 270 – GERMAN WOMEN WRITERS IN TRANSLATION**

3 credits.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**GEN&WS/FRENCH 285 – REBELLIOUS WOMEN FROM THE GLOBAL SOUTH**

3-4 credits.

Explores how women from different francophone regions (with a specific focus on North and Sub-Saharan Africa and the Middle East) gain agency through literature, movies, comics, and songs, contesting different forms of domination, exclusion, and injustice, based on gender, race, class, and religion.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Identify key women writers, filmmakers, and/or artists associated with the course topic.

Audience: Undergraduate

2. Be familiar with the socio-historical contexts in which these women thrive.

Audience: Undergraduate

3. Learn how to closely read and critically analyze literary texts, films and artistic works.

Audience: Undergraduate

4. Demonstrate improvement in oral and writing skills.

Audience: Undergraduate

5. Show awareness of variances in culture, ethnicity, class, sexuality, and religion inherent in all societies.

Audience: Undergraduate

**GEN&WS 299 – DIRECTED STUDY**

1-3 credits.

For highly qualified and motivated students.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2020**GEN&WS/RELIG ST 305 – WOMEN, GENDER AND RELIGION**

3 credits.

Explores themes significant to the impact of religion on women and women on religion, historically and today, across a diverse range of contexts.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**GEN&WS/CHICLA/GEOG 308 – LATINX FEMINISMS: WOMEN'S LIVES, WORK, AND ACTIVISM**

3 credits.

An examination of Latinx women's lives, experiences, and activism through the lens of testimonio, life histories, and feminist writings rooted in social justice movements and critical pedagogies.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Identify and describe key theoretical concepts and frameworks used in interdisciplinary studies of Latinas/xs and other women of color in the U.S.

Audience: Undergraduate

2. Explain the historical origins of Chicanx and Latinx feminisms and their relationship with social justice movements.

Audience: Undergraduate

3. Critically analyze the works of leading Latinx feminist scholars and theorists, who have written on issues of race, ethnicity, gender, LGBTQ identities, labor, color, citizenship status, and generation.

Audience: Undergraduate

4. Explore different writing genres and methodologies used in the study of women's lives, experiences, and activism.

Audience: Undergraduate

5. Apply the framework of testimonio to complete a digital storytelling project, examining a key theme or issue in women's lives.

Audience: Undergraduate

**GEN&WS 310 – SPECIAL TOPICS IN GENDER, WOMEN AND THE HUMANITIES**

1-3 credits.

Investigation of some specific topic in gender and women's studies related to gender, women and the humanities.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2018

**GEN&WS/COM ARTS 316 – GENDER AND COMMUNICATION**

3 credits.

Effective communication requires awareness of how gender influences communication and our capacity to build lasting and meaningful relationships. Learn about theories and concepts to understand how gender influences our interpersonal, professional, and social lives. Topics include terms and concepts relevant to the study of how we communicate about gender, sex and sexuality, including identity, language and nonverbal behavior, socialization, close personal relationships, education, work, violence, media and social movements.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Employ the definitions and theoretical explanations of gender and communication

Audience: Undergraduate

2. Examine how gender intersects with our personal identity

Audience: Undergraduate

3. Raise self-awareness concerning our communication behaviors within a gendered context

Audience: Undergraduate

4. Foster an open mind so that we may fully comprehend the complex social constructs that influence gender and communication

Audience: Undergraduate

5. Critically evaluate the impact gender has as a tool of power

Audience: Undergraduate

6. Create a safe space for online discussion and learning

Audience: Undergraduate

**GEN&WS 319 – STUDY ABROAD SPECIAL TOPIC: GENDER, WOMEN AND THE HUMANITIES**

3-4 credits.

Provides a gender and women's studies course equivalency for humanities courses taken in UW-Madison study abroad programs that do not equate exactly to an existing gender and women's studies course.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**GEN&WS 320 – SPECIAL TOPICS IN GENDER, WOMEN AND SOCIETY**

1-3 credits.

Investigation of some specific topic in gender and women's studies related to gender, women and society.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**GEN&WS/ASIAN AM 321 – ASIAN AMERICAN FEMINIST & QUEER CULTURAL PRODUCTIONS**

3 credits.

Examines the different ways feminist and queer Asian Americans have used cultural production to speak up about issues of race, class, gender, sexuality, identity, diaspora, nation, justice, art, and activism. Asian American feminist and queer critiques can bring to light the ways that structures of domination uphold and further perpetuate Asian American marginalization within the U.S. Examines Asian American racialized, gendered, and sexualized images and stereotypes, as well as the daily lives and experiences of Asian American women and queer folks. Engages with scholarly articles, novels, memoirs, documentaries, and narrative films authored by and/or focusing on feminist and queer Asian Americans. Explores how systemic ideologies are reflected, challenged, and deconstructed in Asian American feminist and queer cultural productions.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Explain the historical, political, social, and cultural implications of Asian American feminist and queer cultural productions and formations as they relate to larger social issues.

Audience: Undergraduate

2. Recognize how critical race theory, feminist theory, and queer theory can help with deconstructing taken-for-granted assumptions about race, class, gender, sexuality, identity, injustice, art, and activism.

Audience: Undergraduate

3. Articulate how feminist and queer politics have changed the terrains of Asian American identities and culture.

Audience: Undergraduate

4. Explain how historical forces such as war, colonialism, and immigration policies have shaped contemporary Asian American experiences of sexuality and gender.

Audience: Undergraduate

5. Foster self-awareness and empathy toward the experiences of Asian Americans of all gender and sexual identities.

Audience: Undergraduate

**GEN&WS/PSYCH 322 – SEXUAL & RELATIONSHIP VIOLENCE RESEARCH & ACTIVISM**

3 credits.

Examine sexual and relationship violence and how they intersect with various aspects of identity (race, gender, sexual orientation, disability, poverty, etc.) in the general community as well as within particular populations (college, military, incarcerated) with a heavy focus on college populations (some of the applied parts of the course will focus here). Learn about power and oppression, as well as ways that both research and practice in these arenas have been marginalized and underfunded. Additional focus on community and campus responses to sexual and relationship violence through a series of speakers as well as about anti-violence activism through course activities and group projects.

**Requisites:** Junior standing and 3 credits in PSYCH or GEN&WS**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand the prevalence of sexual and relationship violence, whom it impacts, how it can affect survivors, and service seeking options for survivors.

Audience: Undergraduate

2. Understand the role of identity and intersectional identities in the experience and impact of violence as well as service seeking.

Audience: Undergraduate

3. Understand the role of alcohol and other drugs in sexual and relationship violence and their intersections with personal and social identities.

Audience: Undergraduate

4. Understand the history and practice of advocacy.

Audience: Undergraduate

5. Apply knowledge in determining the medical, mental health, legal, and other options for survivors

Audience: Undergraduate

6. Analyze and apply fourth-wave feminism to anti-violence activism.

Audience: Undergraduate

### **GEN&WS/AFROAMER 323 – GENDER, RACE AND CLASS: WOMEN IN U.S. HISTORY**

3 credits.

Historical interplay of racism and sexism in the lives of Black and White women of different class backgrounds in the United States.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2017

**Learning Outcomes:** 1. Explain the relationship between gender, race, and class in the United States.

Audience: Both Grad & Undergrad

2. Appreciate the multitude of contributions made by women of African descent in the social, political, cultural, and economic development of the United States of America.

Audience: Both Grad & Undergrad

3. Identify how certain histories have been valued and devalued, and how these differences have promulgated disparities in contemporary American society.

Audience: Both Grad & Undergrad

4. Critique canonical US history and its impact on gender and race relations in the US, developing a healthy skepticism of knowledge claims.

Audience: Both Grad & Undergrad

5. Use primary sources and secondary peer-reviewed sources in written assignments to connect course topics to the lived experiences of African Americans.

Audience: Both Grad & Undergrad

6. Communicate with others in a way that displays an understanding of racial inequities in the US.

Audience: Undergraduate

7. Understand and apply the primary theories and methods employed by historians of African American history.

Audience: Graduate

### **GEN&WS/AFROAMER 324 – BLACK WOMEN IN AMERICA: RECONSTRUCTION TO THE PRESENT**

3 credits.

Explores African American women's experience from waning days of slavery to present. Topics include slavery, emancipation, reconstruction, segregation, migration, urban and rural poverty, civil rights, nationalism, feminism and sexual politics.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2017

**Learning Outcomes:** 1. Explain the implications of being Black and female in the United States since the Reconstruction era.

Audience: Both Grad & Undergrad

2. Appreciate the multitude of contributions made by women of African descent in the social, political, cultural, and economic development of the United States of America.

Audience: Both Grad & Undergrad

3. Describe how certain histories have been valued and devalued, and how these differences have promulgated racial disparities in contemporary American society.

Audience: Both Grad & Undergrad

4. Critique canonical US history and its impact on gender and race relations in the US, developing a healthy skepticism of knowledge claims.

Audience: Both Grad & Undergrad

5. Use primary sources and secondary peer-reviewed sources in written assignments to connect course topics to the lived experiences of African Americans.

Audience: Both Grad & Undergrad

6. Communicate with others in a way that displays an understanding of racial inequities in the US.

Audience: Undergraduate

7. Understand and apply the primary theories and methods employed by historians of African American history.

Audience: Graduate

**GEN&WS/AFROAMER 326 – RACE AND GENDER IN POST-WORLD WAR II U.S. SOCIETY**

3 credits.

Assesses how race and gender (as well as socio-economic status, age, sexuality, region, etc.) shaped the experiences and options of African Americans, especially women, in U.S. society from WW II to the present.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**GEN&WS 329 – STUDY ABROAD SPECIAL TOPIC: GENDER, WOMEN IN SOCIETY**

3-4 credits.

Provides a gender and women's studies course equivalency for social science courses taken in UW-Madison study abroad programs that do not equate exactly to an existing gender and women's studies course.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**GEN&WS 330 – TOPICS IN GENDER/CLASS/RACE/ETHNICITY (HUMANITIES)**

3 credits.

Topics in the feminist study of inequality and difference based on class, gender and race/ethnicity, with a humanities emphasis.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**GEN&WS 331 – TOPICS IN GENDER/CLASS/RACE/ETHNICITY (SOCIAL SCIENCES)**

3 credits.

Topics in the feminist study of inequality and difference based on class, gender and race/ethnicity, with a social science emphasis.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**GEN&WS/CHICLA 332 – LATINAS: SELF IDENTITY AND SOCIAL CHANGE**

3 credits.

Explores the multiracial and multicultural reality of Latina societies by becoming familiar with the history and cultures of Chicana, Cuban-American, and Puerto Rican women. Interdisciplinary readings in law, journalism, public policy, history, and self-reflective literature.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**GEN&WS/AFROAMER 333 – BLACK FEMINISMS**

3 credits.

Uses an interdisciplinary framework to interrogate core assumptions, arguments, and silences in past and present black feminist thought.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **GEN&WS/CHICLA 334 – FEMINIST SOCIAL MOVEMENTS ACROSS THE AMERICAS**

3 credits.

Explores feminist activism in the United States, Canada, the Caribbean, and Latin America. Feminist activism, broadly construed, will be explored through ethnography, interviews, documentaries, public facing scholarship, among other forms of intellectual production. Applies transdisciplinary perspectives to consider work from a range of academic fields and topics to understand the major political, economic, and social issues framing feminist social movements across the Americas.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify and recognize key themes and issues of feminist social movements across the Americas

Audience: Both Grad & Undergrad

2. Increase awareness of the histories of various social movements across the Americas and their impact in the present

Audience: Both Grad & Undergrad

3. Understand and analyze transnational connections among feminist social movements

Audience: Both Grad & Undergrad

4. Identify and critically analyze the theoretical frameworks that undergird feminist activist scholarship across the Americas

Audience: Both Grad & Undergrad

5. Engage more deeply with course materials with stronger written and analytical skills

Audience: Graduate

6. Develop critical thinking skills to identify and question the impact of power dynamics and institutionalized oppression on feminist social movements in the U.S and across the Americas.

Audience: Both Grad & Undergrad

### **GEN&WS 340 – TOPICS IN LGBTQ SEXUALITY**

3 credits.

Topics in feminist study of LGBTQ sexualities, considering race, nationality, and time.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **GEN&WS 342 – TRANSGENDER STUDIES**

3-4 credits.

Teaches students fluency with basic terms, concepts, and methodologies within the interdisciplinary field of Transgender Studies. Content includes transnational and cultural considerations; contemporary transgender issues in medicine, law, and education; cultural production, art and activism; transgender, feminist, and queer theories.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### **GEN&WS 343 – QUEER BODIES**

3 credits.

Centralizes the intersection of LGBTQ identities and dis/ability through various queer bodies which are also inflected by race, class, geographical and national locations. Approaches may include critical theory about queer bodies and personal narratives. Students will learn a variety of ways to think critically and creatively about the politics of bodily experience, including how those politics have shaped their own embodied lives.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEN&WS 344 – BI/PAN/ASEXUALITY: COMMUNITY & REPRESENTATION**

3 credits.

Explore the experiences, needs, and goals of bisexual/biromantic, pansexual/panromantic, and asexual/aromantic (BPA) people, as well as their interactions with the mainstream lesbian gay community. Consider outcome disparities, community coalition building, and media representation. Explore how multiple marginalization within BPA communities may complicate analysis of members' experiences.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Learn about specific outcome disparities for BPA people as compared to both heterosexual and LG people. Pose potential explanations for these disparities with particular attention to the concepts of social support and minority stress.

Audience: Undergraduate

2. Build on existing understanding of identity categories to better understand the social context in which BPA people come to self-identify and form communities, with particular attention to how BPA identities may be shaped by and challenge existing norms and structures.

Audience: Undergraduate

3. Consider how BPA people and communities intersect and form coalitions with other identity categories and communities such as trans folks, new religious groups, kink, and disability communities, and explore how these groups may fit into existing structures or work towards social change.

Audience: Undergraduate

4. Analyze media representations of and by BPA people, consider their consequences for BPA individuals and communities, and engage with transformative works that explore alternative understandings of BPA identity.

Audience: Undergraduate

5. Throughout the course, recognize how sexual and romantic identity intersects with other identities such as gender, trans or cis status, race, ability, age, economic class, etc. and explore how a person's experiences are shaped by their identities and group memberships, with particular attention to which subgroups may experience disproportionately positive or negative outcomes.

Audience: Undergraduate

**GEN&WS 345 – NARRATING QUEER LIVES**

3 credits.

Asks how LGBTI+ identity informs life experiences. Explores how LGBTI+ life experiences differ over time. Demonstrates the diversity of queer life stories. Examines the intersections of queer identity and other identity categories. Analyzes how religion, disability, race and class influence queer lives. Considers how and why queer memoirs share particular tropes. Investigates and employs oral history as a tool of preserving LGBTI+ life histories.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discover and analyze the variety of queer (LGBTQ) experiences in the United States

Audience: Undergraduate

2. Discover how trends in queer experience have changed over time

Audience: Undergraduate

3. Analyze tropes of queer autobiography

Audience: Undergraduate

4. Develop oral history techniques

Audience: Undergraduate

5. Practice effective and respectful oral communication skills

Audience: Undergraduate

**GEN&WS/HISTORY 346 – TRANS/GENDER IN HISTORICAL PERSPECTIVE**

3-4 credits.

Focuses on sex/gender crossing and variation in historical contexts including Japan, South Africa, Europe, the African diaspora, and North America. Considers perspectives of people who themselves passed, crossed, transitioned, transed, or otherwise exceeded their culture's definitions of normative sex/gender. Alongside, consider the ways that dominant social institutions reinforced norms, recognized, tolerated, punished and/or celebrated gender variation. Examine popular culture, medical and legal perspectives, memoir, queer and trans theory, and social movement treatises.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

### GEN&WS/C&E SOC/SOC 347 – GENDER AND SEXUALITY IN RURAL PLACES

3 credits.

A sociological examination of the influence of rurality and place on gender and sexual performances, norms, and identities in rural geographies.

**Requisites:** GEN&WS 101, 102, 103, C&E SOC/SOC 140, 210, 211, or SOC 181

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the role of social organization and social change in shaping equities and disparities in environment, health, and community.

Audience: Undergraduate

2. Describe how rurality and place influence gender norms and performance in private and public spheres.

Audience: Undergraduate

3. Critique ideas related to gender, sexuality, and rurality, including anti-urbanism, metronormativity, the rural idyll, natural/unnatural, and visibility politics.

Audience: Undergraduate

4. Assess how discourses and ideas about gender and sexuality influence dominant and minority groups.

Audience: Undergraduate

### GEN&WS/ENGL 350 – SPECIAL TOPICS IN GENDER & LITERATURE

3 credits.

Investigation of some specific topic in gender and women's studies related to gender and literature. Topic differs each semester.

**Requisites:** GEN&WS 101, 102, 103, or SOC/GEN&WS 200

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### GEN&WS/CLASSICS 351 – WOMEN AND GENDER IN THE CLASSICAL WORLD

3-4 credits.

Constructions of gender and sexuality in the classical world through art, literature and archaeology.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate knowledge of constructions of gender and sexuality in the classical world and their relevance for the contemporary world.

Audience: Undergraduate

### GEN&WS/HISTORY 353 – WOMEN AND GENDER IN THE U.S. TO 1870

3-4 credits.

An advanced and comparative study of the roles of gender, class, and race in American history and historiography. Themes include women as agents of social change and as builders of community.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

### GEN&WS/HISTORY 354 – WOMEN AND GENDER IN THE U.S. SINCE 1870

3-4 credits.

See 520.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**GEN&WS/ENGL 359 – VISIONARY AND SPECULATIVE FICTION: SOCIAL JUSTICE APPROACHES**

3 credits.

Explores the genre of visionary fiction – speculative fiction written for social justice purposes – as a means to create, build and maintain new worlds. Examines the political potential of literature and multiple examples of visionary fiction.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Understand the social and political potential of literature to impart knowledge about gender, sexuality, race, and other intersectional social issues

Audience: Undergraduate

2. Develop interdisciplinary techniques to blend research with creative expression

Audience: Undergraduate

3. Develop critical thinking and creative writing skills

Audience: Undergraduate

**GEN&WS/CLASSICS 361 – SEX AND POWER IN GREECE AND ROME**

3 credits.

Sex as a source of domination and liberation in Ancient Greek and Roman literature and modern European and North American theory and practice, including questions of sexual orientation, gender identity, violence, and self-realization.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Apply critical concepts relating to gender and sexuality to contemporary phenomena.

Audience: Undergraduate

**GEN&WS/AFROAMER 367 – ART AND VISUAL CULTURE: WOMEN OF THE AFRICAN DIASPORA AND AFRICA**

3 credits.

Art and visual culture by/or pertaining to women throughout the African Diaspora and Africa. Though the focus is on 10th century art by black women, it will go into visual culture (art objects, photographs, images, dress, culturally-coded representation) concerning black women historically.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEN&WS 370 – TOPICS IN GENDER AND DISABILITY**

3 credits.

Examines the social, cultural, political, and symbolic constructions of the intersecting categories of gender and disability.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**GEN&WS 374 – DISABILITY, GENDER AND SEXUALITY**

3 credits.

Explores gender identity and sexuality among disabled people using historical and theoretical articles to discuss and analyze films, memoirs, and poetry by people with disabilities. Provides a brief introduction to disability studies and intersectionality before delving into academic discussions and artistic representations of the intersections of disability, gender, and sexuality.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Increase knowledge of disability identity and disability studies

Audience: Undergraduate

2. Develop and hone critical thinking and communication skills

Audience: Undergraduate

3. Increase knowledge of intersectionality and intersectional approaches to reading and writing

Audience: Undergraduate

**GEN&WS/HISTORY 392 – WOMEN AND GENDER IN MODERN EUROPE**

3-4 credits.

An examination of the cultural role of gender and the social, economic, and political activities of women in modern Europe from the 18th to the late 20th centuries.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**GEN&WS/ENGL 401 – RACE, SEX, AND TEXTS (HOW TO DO THINGS WITH WRITING)**

3 credits.

Uses writing in many forms and genres to help students explore how race, gender, and sexuality intersect with language and inform textual experiences. From marriage licenses, passports, and don't ask, don't tell policies to literacy requirements and gag rules, written texts have played major roles in enforcing expectations about race and sex in the United States. At the same time, anti-slavery petitions, letters to the editor, wheat-pasted posters, and hashtag activism all also harness the power of writing to challenge and revise those expectations. In light of that active textual production and negotiation, this class traces public debates and daily experiences where people write or talk about race and sex in order to make a difference. Ultimately, the class takes on the power of words to break bones and heal wounds. Through reading and writing informed by scholarship in writing studies and rhetoric, students in this class will examine historical and contemporary interconnections among race, sexuality, gender, and texts in the United States, developing analytical tools for understanding how language works on and in their world.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEN&WS/LEGAL ST/SOC 406 – LAW, SEXUALITY, & SOCIETY**

3-4 credits.

Examines the legal and social development and implications of laws governing sexual behavior, human reproduction, media, privacy, and topics related to sexuality, sex and gender. Includes historical analyses of laws connected to present day regulations of sexuality, demonstrating the origins of many of the world's most frequently debated civil rights issues. Chief focus on the United States legal system, with some content including examinations of institutions around the world. Investigates taken-for-granted knowledge and assumptions about sexuality and look at legal, cultural and social constructions of sex in society. Covers intersectional social implications, including race, (dis)ability, class, etc. Topics include: obscenity, pornography, sex work, sexual surrogacy, birth control, abortion, sex education, sexual violence, sex offenders, sexual citizenship rights, trans and intersex legal topics.

**Requisites:** GEN&WS 101, 102, 103 or SOC/LEGAL ST 131

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss social theory about law and human behavior, particularly human sexuality

Audience: Undergraduate

2. Explain historical roots of modern sexuality-related laws and legal systems worldwide

Audience: Undergraduate

3. Analyze topics related to sexuality and society; constructing arguments based on academic, peer-reviewed research

Audience: Undergraduate

4. Examine sociolegal governance over a wide variety of sexual behaviors and gender/sex topics in a critical, thorough, and thoughtful manner

Audience: Undergraduate

5. Comprehend and apply legal history, precedent, and course concepts to specific sociolegal cases concerning sexuality

Audience: Undergraduate

**GEN&WS 410 – SPECIAL TOPICS IN GENDER AND VISUAL CULTURE**

3 credits.

Explores topics in gender and visual culture, including artistic practice, political and creative expression, and cultural phenomena. Course topic changes; may be repeated with a different topic.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define and use visual culture frameworks to further understanding of gender.

Audience: Undergraduate

2. Engage in critical discourse on the concepts, themes and strategies key to the production of visual culture as it relates to gender.

Audience: Undergraduate

3. Define and use visual culture frameworks to advance understanding and analysis of gender.

Audience: Graduate

4. Complicate critical discourse on the concepts, themes and strategies key to the production of visual culture as it relates to gender.

Audience: Graduate

**GEN&WS 412 – CONTEMPORARY QUEER ART AND VISUAL CULTURE**

3 credits.

Queer art and visual culture are defined not only through their subject matter but also by the methods through which they appropriate and subvert conventional visual practices. Such tactics may include a work's means of production, its formal properties, and the conditions of its reception. The political imperatives of a queer or queered position, linked to the intersections of race, class, sex and gender will shape thematic investigations of practices related to activism, documentation, abstraction, mining the archive, craft, camp, and drag, among others. Case studies will be drawn from film, performance, comics, video games, and fine art. Projects will engage text- and studio-based research in an interdisciplinary push to integrate theory and practice. No prior art or design experience required.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Engage in critical discourse on the concepts, themes and strategies key to queer art and visual culture.

Audience: Both Grad & Undergrad

2. Demonstrate a working knowledge of influential practitioners and texts in the field.

Audience: Both Grad & Undergrad

3. Analyze and apply text- and studio-based practices to generate projects that respond to or participate in a dialogue on queer theory.

Audience: Both Grad & Undergrad

4. Synthesize course content with your individual academic research and thesis interests.

Audience: Graduate

**GEN&WS/THEATRE 415 – INTRODUCTION TO CONTEMPORARY FEMINIST THEATRE AND CRITICISM**

3 credits.

Introduction to the history, literature and theory of feminist theatre and of feminist criticism of mainstream theatre in the United States from 1960 to the present.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### GEN&WS/COM ARTS 418 – GENDER, SEXUALITY, AND THE MEDIA

3 credits.

Examines images of gender and sexuality in the media, with a focus on contemporary media in the U.S. Using theories from cultural studies, film and media studies, gender studies, and communication explore different processes and practices of gender and sexuality. Look at the way that gender and sexuality are constructed through social, cultural, and economic forces, and the way that these identities intersect with other social identities such as race, ethnicity, and class. Consider the way that media impact our understanding of feminism and post-feminism, violence, celebrity, consumer culture, subcultures and activism.

**Requisites:** GEN&WS 101, 102, 103, SOC/GEN&WS 200, COM ARTS 250 or graduate/professional standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the way that systems of oppression such as patriarchy and heteronormativity are manifested in today's society and media cultures

Audience: Both Grad & Undergrad

2. Analyze and interrogate the meaning of contemporary representations of sexuality and gender in the media

Audience: Both Grad & Undergrad

3. Conduct intersectional analyses of the way that different categories of identity such as gender, sexuality, race, class, and ability come together in the media

Audience: Both Grad & Undergrad

4. Articulate their own perspective on how empowerment and liberation are connected to media practices and cultures of production and consumption

Audience: Both Grad & Undergrad

5. Create and participate in creating a respectful environment for having informed discussions about power, identity, representation, and difference with peers

Audience: Both Grad & Undergrad

6. Demonstrate advanced analysis of gender and sexuality in media based on rigorous engagement with media studies scholarship

Audience: Graduate

### GEN&WS 420 – WOMEN IN CROSS-SOCIETAL PERSPECTIVE

3 credits.

An interdisciplinary examination of the position of women in a variety of social contexts; an analysis of the society--specific and universal social forces that determine the position of women; an investigation of the change in women's status and role worldwide and an inquiry into the causes of this change.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### GEN&WS/LEGAL ST 422 – WOMEN AND THE LAW

3 credits.

Legal system, laws, and proposed legislation that have specific impact on the lives of women. Topics investigated in both the social and legal contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate an understanding of feminist legal theories and methodologies and apply them to real-world cases and historical legal scenarios.

Audience: Both Grad & Undergrad

2. Examine historical roots of modern gendered/sexed legal systems in the United States and worldwide.

Audience: Both Grad & Undergrad

3. Identify key court cases related to gender and civil rights; summarize the major holdings of those cases.

Audience: Both Grad & Undergrad

4. Investigate and research original projects about sex and society, construct research arguments, and plan legal/policy brief proposals.

Audience: Both Grad & Undergrad

5. Analyze sociolegal governance trends/patterns in the U.S. and internationally over a wide variety of sex/gender topics, including family rights, economic and financial rights, employment, voting, politics, sexuality, sport, education, abortion, birth control, and health.

Audience: Both Grad & Undergrad

6. Effectively present legal arguments in oral form, using the "Before the Courts" style, and in written form, using the style of law review articles.

Audience: Graduate

**GEN&WS 423 – THE FEMALE BODY IN THE WORLD: GENDER AND CONTEMPORARY BODY POLITICS IN CROSS CULTURAL PERSPECTIVE**

3 credits.

Explores the social, cultural, and political construction of the female/feminine body. Considers specifically the bodies of women and girls, transgender women, non-binary people that embody the feminine, female masculinities, and bodies that identify and are identified as female, as bodies that have historically and traditionally been sites of political contention, of societal meaning making, of cultural symbolism, and active resistance. Seeks to challenge what we think we know about bodies, challenging tacit knowledge and investigating how normative discourses of the female/feminine body are formed across cultures, around the world. Considers the impacts of phenomena such as globalization, neoliberalism, "global" feminism, imperialism, capitalism, and human rights movements on cultural conceptions of health, ability, beauty, representation, and the "value" of female/feminine bodies.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically analyze and provide concrete examples of how bodies are socially constructed, and how the female/feminine body in particular is a site of political and cultural meaning making, contention, and resistance

Audience: Both Grad &amp; Undergrad

2. Articulate various theoretical frameworks (feminist theories, colorism, queer theory, disability studies, fat studies, etc.) as they relate to gender, embodiment, and the body, and use them in application of concrete ideas

Audience: Both Grad &amp; Undergrad

3. Think, observe, and write critically and analytically and engage thoughtfully in analytic (rather than simply opinionated!) discussions

Audience: Both Grad &amp; Undergrad

4. Understand and engage in the process of conducting a literature review and complete a clear, well organized, and thoughtful academic paper that explores a particular area of interest/scholarship

Audience: Graduate

5. Connect course content with your individual academic research and thesis interests.

Audience: Graduate

**GEN&WS/LEGAL ST/SOC 425 – CRIME, GENDER AND JUSTICE**

3 credits.

Focuses on the intersection between gender, crime and justice from a cross-cultural perspective. The gendered nature of the criminal justice system, female experiences of crime, prosecution and incarceration as well as the extent to which women are victims, offenders, and participants in the criminal justice system will be explored. Special emphasis will be placed on the theoretical implications of offending behavior and the intersection of gender with sexuality, race, ethnicity and class. The goal of this course is to provide a foundation for critically assessing the often controversial issues surrounding race, gender, crime, and criminal justice in society.

**Requisites:** SOC/LEGAL ST 131, GEN&WS 101, 102, 103 or graduate/professional standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze the U.S. criminal justice system, including incarceration, sentencing, and policing, through the lens of gender studies

Audience: Undergraduate

2. Identify and describe criminological theories, specifically those focused on gender, race, class, and feminist academic thought

Audience: Undergraduate

3. Explore inequalities amongst gender groups and various other social intersections (race, class, ability, sexuality, age, parenthood, etc).

Audience: Undergraduate

4. Investigate topics related to gender and justice by conducting thorough literature reviews and preparing policy briefs with recommendations for legal change.

Audience: Undergraduate

5. Examine and discuss real-world experiences in criminal justice systems, both in the U.S. and abroad.

Audience: Undergraduate

**GEN&WS/FOLKLORE 428 – GENDER AND EXPRESSIVE CULTURE**

3 credits.

Examines the relationship between dominant images of gender representation as they emerge in expressive culture in various societies.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2019

**GEN&WS/POLI SCI 429 – GENDER AND POLITICS IN COMPARATIVE PERSPECTIVE**

3-4 credits.

Examines the gendered nature of political institutions around the world, including implications of women's exclusions from public life in a global context; the obstacles to women's greater participation; how women have gained greater voice in political leadership in some countries; and the differences women make in the political arena. Not open to students with credit for POLI SCI 643 prior to fall 2017

**Requisites:** Sophomore standing; not open to special students

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**GEN&WS/POLI SCI 435 – POLITICS OF GENDER AND WOMEN'S RIGHTS IN THE MIDDLE EAST**

3 credits.

Explores the intertwined relationship between gender and politics in contemporary Middle East and North Africa. Situates the region's historical, socio-political, and cultural context that have particularly contributed to shaping the current discourse on gender in the Arab World. Explores - both theoretically and empirically - the role of Arab women in influencing the political processes across the Middle East. Examines real-world examples of Middle Eastern women from different parts of the region who have succeeded to challenge the status quo and push for genuine change.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a concrete understanding of the history and politics of the Middle East and North Africa (MENA) and the ways they shape gender power relations across the region.

Audience: Both Grad & Undergrad

2. Apply comparative politics frameworks and feminist theories toward understanding patterns of female political participation and better understand current events and complexities of the region's politics and governance structures.

Audience: Both Grad & Undergrad

3. Sharpen critical and analytical skills through exposure to different, even contradictory, points of views and contemporary debates relating to the role of women in shaping MENA's politics post-Arab uprisings.

Audience: Both Grad & Undergrad

4. Develop and present ideas and arguments to audience with diverse interests and backgrounds.

Audience: Both Grad & Undergrad

5. Apply pertinent theoretical and empirical evidence necessary to make critical and analytical arguments about gender and politics in comparative perspective.

Audience: Graduate

### **GEN&WS/AMER IND/ANTHRO/FOLKLORE 437 – AMERICAN INDIAN WOMEN**

3 credits.

Examines and interprets the roles of American Indian women in traditional societies, and in contemporary North America.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **GEN&WS/LITTRANS/SCAND ST 438 – SEXUAL POLITICS IN SCANDINAVIA**

3 credits.

Read and discuss works by Scandinavian writers of the nineteenth and twentieth century reflecting sexual politics and the roles of women in literature. Course taught in English.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and understand the categories depicting sexual politics and the position of women in Scandinavia as portrayed through various works of literature

Audience: Undergraduate

2. Analyze and discuss the important features characterizing sexual politics and the position of women in Scandinavia as portrayed through various works of literature

Audience: Undergraduate

3. Compose and produce writing that applies the concepts introduced to describe, analyze, and differentiate sexual politics and the position of women as portrayed through various works of literature about Scandinavian women.

Audience: Undergraduate

### **GEN&WS 441 – CONTEMPORARY FEMINIST THEORIES**

3 credits.

Contemporary theoretical positions and debates about feminisms in the humanities and social sciences.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **GEN&WS/ANTHRO 443 – ANTHROPOLOGY BY WOMEN**

3 credits.

Contributions of women anthropologists to feminist and anthropological theories and research methods. Field research and gender. Current debates in women's studies and anthropology in light of recent research on women and gender in cross-cultural perspective.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **GEN&WS 444 – FROM PAST FEMINISMS TO POSTFEMINISM: FEMINISMS FOR THE 21ST CENTURY**

3 credits.

Explores feminist theories from a broad array of disciplines and perspectives. Beginning with early feminist writings, to the significance of the Second Wave, examines consciousness raising, political pamphlets, personal manifestos, and the feminist ideology of the "personal is political." Explores work from Black feminist thought, queer theory, theory from disability studies, fat studies, ecofeminism, and transnational and global feminisms. Identifies and addresses crucial areas of contestation that punctuate the dynamic relationships among texts from past and present-the arrivals, departures, and returns-in feminist theory. Listens to voices that align and voices that dissent. Engages with the work of writers and thinkers from the past and bringing these ideas to our current cultural configurations and conceptualizations of feminism(s) and feminist movement(s).

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Summarize and synthesize the work of feminist theorists and other theorists (queer and crip theory, fat studies, critical race theory, etc.) from the mid-20th century to the present day.

Audience: Undergraduate

2. Critically analyze feminist theory in conjunction with cultural and social events and draw connections among how feminist theory ideas align and how they differ from each other.

Audience: Undergraduate

3. Critically appreciate and constructively critique texts, theoretical frameworks, ideas, and praxis (the gap between text and world).

Audience: Undergraduate

4. Articulate your own ideas about what you think feminism for the 21st century can or should look like/sound like/feel like in conjunction with historical and contemporary feminist theories and frameworks.

Audience: Undergraduate

5. Build awareness and understanding of feminist principles, values, and epistemologies (knowledge development) and how these translate to praxis and feminist calls to action.

Audience: Undergraduate

6. Engage in the process of social science data collection, through interviews, oral history, textual and/or content analysis

Audience: Undergraduate

7. Conduct a literature review and seek out contemporary social science research using a feminist theory and research lens

Audience: Undergraduate

### **GEN&WS 445 – THE BODY IN THEORY**

3 credits.

Explores a broad range of contemporary theories concerned with bodies and power. Intersections with gender, race, class, dis / ability, sexuality and nation.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### **GEN&WS 446 – QUEER OF COLOR CRITIQUE**

3 credits.

An examination of the emergent theoretical field of queer of color critique, a mode of analysis grounded in the struggles and world-making of LGBTQ people of color. Activists, artists, and theorists have mobilized queer of color critique to interrogate the intersections of race, gender, sexuality, class, nation, and diaspora as a response to the inherent whiteness of mainstream queer theory and persistent heterosexism in ethnic studies. Examines the development of queer of color critique (primarily in the United States) through both academic and activist domains; consider what queer theory has to say about empire, citizenship, prisons, welfare, neoliberalism, and terrorism; and articulate the role of queer of color analysis in a vision for racial, gender, sexual, and economic justice.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEN&WS 449 – SPECIAL TOPICS IN FEMINIST THEORY**

3 credits.

Investigation of specific theorists, themes, problems, or eras in feminist social and cultural theory. Course topic differs each semester. Course may be repeated with different topics.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define and use feminist theoretical frameworks to analyze historical and contemporary understanding of gender.

Audience: Both Grad & Undergrad

2. Develop writing and analytical skills needed to think critically about theory and practice.

Audience: Both Grad & Undergrad

3. Use feminist theory to help develop graduate level research, including but not limited to thesis and dissertation research.

Audience: Graduate

**GEN&WS/PORTUG 450 – BRAZILLIAN WOMEN WRITERS**

3 credits.

A survey of representative writing by contemporary Brazilian women writers in relation to representations of nationality, race, class, ethnicity, gender and sexualities.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEN&WS/PORTUG 460 – CARMEN MIRANDA**

3 credits.

Examines the work, representation and interpretation of Carmen Miranda from her early days as a radio star in Brazil to a film actress and entertainer in Hollywood in the 1940s and 50s.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEN&WS/ASIAN AM/ENGL 463 – RACE AND SEXUALITY IN AMERICAN LITERATURE**

3 credits.

Explores the intersection between race and sexuality in American literature with an emphasis on sex/gender difference, feminism, transgenderism, and nationalism. Focuses on the nature of literature as advocacy, with an emphasis on Asian-American issues.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEN&WS/ASIAN AM/ENGL 464 – ASIAN AMERICAN WOMEN WRITERS**

3 credits.

Major texts by Asian American women writers.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEN&WS/POLI SCI 469 – WOMEN AND POLITICS**

3-4 credits.

Changing political roles, status, attitudes, and behaviors of women in contemporary society and of the political implications of changing female/male relationships.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Introduce students to concepts of sex, gender and sexuality and how they have been fundamental to the shape and function of political institutions, laws, and policies.

Audience: Undergraduate

2. Understand how women have participated in politics despite severe legal and political restrictions.

Audience: Undergraduate

3. Understand how social policies and institutional rules inhibit women's influence and participation.

Audience: Undergraduate

4. Explore how the media cover female candidates.

Audience: Undergraduate

5. Examine what barriers inhibit female candidates from running for office.

Audience: Undergraduate

**GEN&WS 472 – FOOD FOR THOUGHT: AN INTERSECTIONAL APPROACH**

3 credits.

Approaches human relationships with food from micro to macro levels. Considers personal and interpersonal relationships with food, examining the social, cultural, and political meanings of food at various intersections of identity (gender, race, class, ability, age, etc.), and within different institutions such as family, education, and religion. Asks questions about personal/individual responsibility in relation to food, and the role of communities, municipalities, governments, and global entities in determining what people eat and how. Explores the gendered, raced, and classed politics of food systems; questions of sovereignty, sustainability, access, regulation, dissemination, and policy making. Examines the cultural, ecological, and economic implications of the ways food is perceived, produced, and consumed across cultures.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Create a foundation of knowledge to support further academic work and civic engagement in food sovereignty/food justice movements

Audience: Both Grad & Undergrad

2. Define food justice and explore where and how it connects to ourselves and our communities

Audience: Both Grad & Undergrad

3. Identify the different actors in food politics and the varying/conflicting ideas and intentions around food production, distribution, and access as it relates to equity

Audience: Both Grad & Undergrad

4. Report on current food justice issues by analyzing the obstacles that create them

Audience: Both Grad & Undergrad

5. Research and describe local, regional, and global social movements and policies around food politics and food justice

Audience: Both Grad & Undergrad

6. Articulate various theoretical frameworks as they relate to food, identity politics, and intersectionality and use them in application of concrete ideas

Audience: Both Grad & Undergrad

7. Think, observe, and write critically and analytically and engage thoughtfully in analytic (rather than simply opinionated!) discussions

Audience: Both Grad & Undergrad

8. Apply pertinent theoretical and empirical evidence necessary to make critical and analytical arguments about gender and food politics through an intersectional lens

Audience: Graduate

9. Articulate key issue areas of food justice and relate these issue areas to your area of disciplinary graduate level research

Audience: Graduate

**GEN&WS/GEOG 504 – FEMINIST GEOGRAPHY: THEORETICAL APPROACHES**

3 credits.

Provides an opening to some of the key debates and practices in feminist (political) geography. Feminist geography focuses on questions of power, difference, embodiment, and social change. How are feminist geographies in conversation with or part of other fields of inquiry, such as critical ethnic studies and Indigenous studies, which also focus on questions of difference, epistemologies of knowledge, and social transformation and/or decolonization? That is, what are the relationships of feminist geographic inquiry to liberatory projects of ending racism, capitalism, settler colonialism, and heteropatriarchy. Explore how feminist theories and approaches in geography transformed prevailing political geographic questions and concerns, such as power, politics, territory, boundaries, sovereignty, and violence. What do feminist principles and debates over feminist politics and methods bring to (political) geography?

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe the major trajectories of feminist perspectives in (political) geography.

Audience: Both Grad &amp; Undergrad

2. Gain the ability to discuss some of the relationships between feminist geography and broader feminist inquiry and politics.

Audience: Both Grad &amp; Undergrad

3. Gain the ability to develop feminist questions for research and/or action relevant to your project.

Audience: Both Grad &amp; Undergrad

4. Explain the relevance of feminist theory, methods, and/or practice to your project.

Audience: Both Grad &amp; Undergrad

5. Explore how issues of difference and positionality inform your project and study of geography.

Audience: Both Grad &amp; Undergrad

6. Articulate key debates over feminist (geographic) theory for your field and directions these debates suggest for your thesis or dissertation research.

Audience: Graduate

**GEN&WS/GEOG 514 – FEMINIST GEOGRAPHY: METHODOLOGICAL APPROACHES**

3 credits.

An introduction to foundational approaches to feminist qualitative research in human geography. Research is not separate from a social world that historically has been and continues to be shaped by (settler) colonial, racialized, gendered, sexualized, and class-inflected relations of power (among others). Research practices and "findings" have been and continue to be used to inform and rationalize relations of oppression, exploitation, and violence. For feminist researchers, then, questions of power, difference, and social change are central to how we design and conduct research. Engages in political-ethical discussions about the positionality and responsibilities of ourselves as researchers, and how our knowledge production can reproduce and challenge prevailing relations of power.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Discuss the interplay between epistemology and methodology.

Audience: Undergraduate

2. Explain clearly how their epistemological positions inform their methodological decisions.

Audience: Graduate

3. Discuss the political dynamics shaping knowledge production, and how feminist, decolonial, and anti-racist projects have reshaped these dynamics.

Audience: Both Grad &amp; Undergrad

4. Discuss the historical constructions of 'the field,' and how feminist critiques and research practices challenge expectations regarding field work experiences.

Audience: Both Grad &amp; Undergrad

5. Discuss how feminist research ethics extend researchers' ethical obligations of beneficence, respect for research subjects, and justice (Belmont Report).

Audience: Both Grad &amp; Undergrad

6. Evaluate the virtues, dilemmas, and limitations of common qualitative methods.

Audience: Both Grad &amp; Undergrad

7. Develop a compelling rationalization for research questions and methodologies (design) for your qualitative project.

Audience: Undergraduate

8. Articulate how feminist principles influence your research questions and methodologies.

Audience: Graduate

9. Explain how social positionality shapes the research process, and develop a practice of self-reflexivity.

Audience: Both Grad &amp; Undergrad

**GEN&WS/HISTORY 519 – SEXUALITY, MODERNITY AND SOCIAL CHANGE**

3 credits.

A history of sexuality approach to a period of major social, economic, and political change in US history, 1880-1930; medical, legal, and popular discourses shaping urbanization, reform, nationalism and colonialism.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**GEN&WS/PSYCH 522 – PSYCHOLOGY OF WOMEN AND GENDER**

3 credits.

Examination of theories and research on the psychology of women and gender. Explores topics such as sex bias in psychological research; psychological aspects of female sexuality and reproduction; gender-based violence; female achievement and power; lifestyle choices of women; women and mental health; and psychological research with transgender individuals.

**Requisites:** Sophomore standing, a course in PSYCH and (GEN&WS 102 or 103) or graduate/professional standing

**Course Designation:** Breadth – Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**GEN&WS 523 – FRAMING FATNESS: GENDER, SIZE, CONSTRUCTING HEALTH**

3 credits.

Explores various aspects of identity politics and body politics such as gender, race, ethnicity, sexuality, ability, and citizenship status as they relate to and intersect with body size and constructions of fatness. Situates how fatness has been conceptualized over time, the formation of the gendered body ideals, and the proliferation of obesity rhetoric. Investigates how fat individuals experience the social world, in particular related to arenas such as the American health care system, and other societal institutions such as education, social welfare, immigration, and media. Interrogates how the "obesity epidemic" came to be, how it is framed in the United States, and how it intersects with other systems like big pharma, the food industry, beauty industry, globalization, neoliberalism, and consumerism. Deploys a critical approach in understanding fatness and body size as dimensions of difference that inform experiences of privilege and oppression.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Critically analyze and provide concrete examples of how fatness has been socially constructed in various institutions such as healthcare, medicine, beauty, and media, and how the meanings of fatness have changed over time and across identities (gender, race, class, sexuality, ability, etc.)

Audience: Both Grad & Undergrad

2. Articulate various theoretical frameworks (fat studies, feminist theories, disability studies, queer theory, etc.) as they relate to fatness, embodiment, gender, and discrimination, and use them in application of concrete ideas

Audience: Both Grad & Undergrad

3. Think, observe, and write critically and analytically and engage thoughtfully in analytic (rather than simply opinionated!) discussions

Audience: Both Grad & Undergrad

4. Understand and engage in the process of conducting a literature review and complete a clear, well organized, and thoughtful academic paper or presentation that explores a particular area of scholarship related to fat embodiment

Audience: Undergraduate

5. Conduct a literature review and complete a clear, well organized, and thoughtful academic paper or presentation around their graduate research, at the intersection of their own disciplinary areas of interest and the course content

Audience: Graduate

**GEN&WS 524 – RACE, GENDER, HEALTH, AND MEDICINE**

3 credits.

Uses race and gender theoretical frameworks to understand peoples' experiences with health and medicine. Conceptualizes race and gender as social categories and applies these frameworks to how people experience health, wellness, and disease. Examines how healthcare and medicine are structured according to racialized and gendered frameworks. Surveys a wide range of issues including reproductive health, body size, mental health, COVID, among other topics. Uses an intersectional approach to analyzing key debates in scholarship on health and medicine.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Understand how the concepts "race" and "gender" are socially constructed and explore what this means for our understandings of health and disease

Audience: Undergraduate

2. Identify and describe how race and gender shape health outcomes and structures disparities

Audience: Undergraduate

3. Identify and describe how race and gender structure health institutions (e.g. hospitals, medical school, etc.)

Audience: Undergraduate

4. Demonstrate understanding and engagement with course material and produce thoughtful and compelling arguments in assigned work

Audience: Undergraduate

**GEN&WS 525 – GENDER AND GLOBAL HEALTH IN CRITICAL PERSPECTIVE**

3 credits.

Examines the contemporary global health project in historical and cultural context, highlighting some of the greatest sources of tension and struggle. Using a feminist lens and focusing on gender as key analytic category, explores the ways that the distribution of global wealth and power impacts health and well-being around the world. Explores social, demographic, political and economic determinants of global health, and the ways that these factors interconnect with biomedicine to create and affect health outcomes, both within and across countries. Drawing on critical theories, situates the study and practice of global health in an intersectional framework.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Critically analyze the intellectual history of the global health field, tracing its origins from colonial medicine through to the current day using a gendered lens

Audience: Both Grad & Undergrad

2. Appraise the ways that colonialism, scientific racism, misogyny, and other forms of structural exclusion shape the global health field and its objects/methods of study

Audience: Both Grad & Undergrad

3. Question the neutrality of quantitative global health metrics, and understand indicators as a contested form of knowledge production.

Audience: Both Grad & Undergrad

4. Describe several current global health issues related to gender in-depth, as well as their contexts

Audience: Both Grad & Undergrad

5. Synthesize information from multiple sources and present it both in oral and written formats.

Audience: Both Grad & Undergrad

6. Perform original global health research that integrates feminist theories with empirical public health approaches.

Audience: Graduate

7. Conduct advanced analysis of global health policies and programs using a critical lens.

Audience: Graduate

### GEN&WS 527 – THE ENVIRONMENT OF THE WOMB: EPIGENETICS AND PARENT/CHILD HEALTH

3 credits.

Concentrating social and ecological environments as well as that of the body, focuses on the toxic effects of late industrialism, epigenetics and maternal/fetal health as well as destabilizing ideas about "normal" reproduction. Examine how the possibilities for expanding the scope from maternal/fetal health to "parent/child" health – where kinship is not strictly about biologic belonging or coming "straight from the womb," but also about love and a safe home or chosen family. Undergirding our analysis is an "eco-social" approach, guided by questions of what constitutes "health," access to living a healthy life – in a body and on a planet that feels safe to inhabit.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Increase knowledge of epigenetics and maternal/fetal as well as parent/child health.

Audience: Both Grad & Undergrad

2. Develop analytical thinking and improve written and spoken communication skills

Audience: Both Grad & Undergrad

3. Engage critical connections and construct ethical actions in the face of climate change, environmental racism, medical justice and planetary health

Audience: Both Grad & Undergrad

4. Demonstrate writing and analytical skills through a deeper engagement with the material and enriching their chosen field of study

Audience: Graduate

### GEN&WS 528 – SEXUALITY AND SCIENCE

3 credits.

Explores scientific approaches to studying sexuality. Examines current biological and neuroscientific research about sexuality, as well as feminist scholarship on these topics and critical responses to this research. Topics cover the intersections between biology (e.g., hormones, anatomy, neural activity, psychophysiology, evolution, etc.), sexuality (e.g., desire, dysfunction, arousal, bisexuality, orgasm, same-sex sexuality, pleasure, etc.), and feminist/critical scholarship about this research (e.g., feminist science studies, queer theory, feminist psychology, medicalization, etc.).

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Natural Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe current biological, social, and feminist science research on sexuality, the research methods currently used to study sexuality, and the problematics of doing this research

Audience: Both Grad & Undergrad

2. Critically evaluate research on sexuality and science

Audience: Both Grad & Undergrad

3. Describe feminist science principles and how they can shape scientific methods and interpretations of data

Audience: Both Grad & Undergrad

4. Present scientific material on sexuality in concise, accessible ways

Audience: Both Grad & Undergrad

5. Identify primary scientific sources and summarize and interpret evidence from these sources

Audience: Both Grad & Undergrad

6. Support an argument about a sexuality topic in writing using scientific evidence from primary sources

Audience: Both Grad & Undergrad

7. Critically evaluate the impact of sexuality science on society

Audience: Both Grad & Undergrad

8. Use scientific theorizing about sexuality to help develop graduate level research including but not limited to thesis and dissertation research

Audience: Graduate

9. Formulate a novel or advanced argument about a sexuality topic in writing using scientific evidence from primary sources

Audience: Graduate

**GEN&WS 529 – THE SCIENCE AND POLITICS OF REPRODUCTIVE HEALTH**

3 credits.

Explores the contemporary science and politics of reproductive health in North America. Taught from a reproductive justice (RJ) perspective, a framework for analysis and action developed by Black women health organizers and scholars. Examines several aspects and applications of the reproductive justice framework itself; RJ approaches to pregnancy and birth; RJ as a diagnosis and refusal of eugenics; and RJ and abortion. Engages with case studies, scholarship, and theory from a variety of literatures relevant to public health: epidemiology, feminist and queer theory, critical race studies, gender/sexuality studies, activist and policy analyses, and historical and contemporary primary sources. Explores a variety of experiences and meanings of reproductive health and illness, as well as the relationships between health/disease and racism, poverty, sexism, hetero- and cis- normativity, colonization, incarceration, and environmental degradation.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Define and use a reproductive justice framework to analyze the power relations, historical factors, and current material realities that produce states of reproductive health and disease.

Audience: Both Grad &amp; Undergrad

2. Understand how histories and ongoing realities of eugenics, racial, sexual, gender, economic, and colonial domination and resistance impact reproductive health

Audience: Both Grad &amp; Undergrad

3. Understand historical and contemporary research in the fields of public health, epidemiology, medicine, and health policy, reading appreciatively as well as critically

Audience: Both Grad &amp; Undergrad

4. Assess public health policies and programs aimed at improving reproductive health from a reproductive justice perspective

Audience: Both Grad &amp; Undergrad

5. Carry out an independent analysis of a contemporary problem related to reproductive health, survey existing public health, medical, and social science literature, and produce a research project

Audience: Graduate

**GEN&WS 530 – BIOLOGY AND GENDER**

3 credits.

Examines the theories and methodologies of the relevant research areas in biology and animal behavior that underlie biological determinist theories of gender and gender differences, and explores alternative approaches, theoretical constructs and interpretations.

**Requisites:** Junior standing or GEN&WS 103**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2021**GEN&WS/HIST SCI/MED HIST 531 – WOMEN AND HEALTH IN AMERICAN HISTORY**

3 credits.

Women as patients and as health professionals in America from the colonial period to the present.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**GEN&WS/HIST SCI/MED HIST 532 – THE HISTORY OF THE (AMERICAN) BODY**

3 credits.

This course demonstrates that human bodies have social and cultural histories. It will highlight the social values placed on different bodies, the changing social expectations bodies create, and the role of science and medicine in creating the cultural meanings of bodies.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**GEN&WS 533 – SPECIAL TOPICS IN GENDER AND BIOLOGY**

3 credits.

Examination in depth of specific topics in the area of gender and biology. Critical feminist reading of scientific literature and exploration of relevant biomedical issues in social and cultural contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Recognize how gender and biology may affect each other.

Audience: Both Grad & Undergrad

2. Recognize how gender and biology may impact health.

Audience: Both Grad & Undergrad

3. Communicate basic biological concepts.

Audience: Graduate

**GEN&WS 534 – GENDER, SEXUALITY, AND REPRODUCTION: PUBLIC HEALTH PERSPECTIVES**

3 credits.

Explores several theoretical lenses, disciplinary approaches, and substantive topical areas relating to reproductive and sexual health. Begin by investigating the development of "sexual health" as a phenomenon in public health research, policy, and programs looking back to feminist responses to population control policies of the 1970s. Covers substantive topical areas in the field (e.g., adolescent sexual development, contraception, and AIDS).

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**GEN&WS/INTL ST 535 – WOMEN'S GLOBAL HEALTH AND HUMAN RIGHTS**

3 credits.

A human rights approach to global women's health to provide an overview of health issues within the context of a woman's life cycle. It will pay special attention to the socio-cultural and economic factors that play a role in determining women's access to quality basic health care.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**GEN&WS 536 – QUEERING SEXUALITY EDUCATION**

3 credits.

Situates sexual health education in historical and contemporary context by tracing its discursive production and envisioning a queering of both content and practice. An examination of what might it mean to queer sex education and what would a queer sex education look like. Utilizing theoretical interventions from critical education studies, queer theory, and trans/gender studies, this course.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEN&WS/HIST SCI 537 – CHILDBIRTH IN THE UNITED STATES**

3 credits.

Using a reproductive justice framework, analyze contexts, experiences, practices, ideologies, and historiographies of childbirth in the United States from roughly the 17th century to the present, with the heaviest emphasis on the 20th and 21st century. Examines the ways that colonization, genocide, enslavement, racism, capitalism, heterosexism, patriarchy, and ableism have shaped all of these aspects of childbirth. Inquire how key movements and groups resisting some of these forms of oppression have had the power to reshape birth, as well as locating in birth a source of transformational power.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEN&WS 538 – SPECIAL TOPICS IN LGBTQ+ HEALTH**

3 credits.

Examination in depth of specific topics in the area of LGBTQ+ health. Critical reading of evidence-based literature and exploration of relevant health and biomedical LGBTQ+ issues in biological, social, economic and cultural contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and interpret unique health challenges faced by LGBTQ+ communities.

Audience: Undergraduate

2. Understand and interpret heteronormative assumptions in health and science research, and how those assumptions shape LGBTQ+ health experience and outcomes.

Audience: Undergraduate

3. Read, analyze, and critique evidence-based literature.

Audience: Undergraduate

4. Situate health concepts within larger social structures.

Audience: Undergraduate

**GEN&WS 539 – SPECIAL TOPICS IN GENDER AND HEALTH**

3 credits.

Examination in depth of specific topics in the area of gender and health. Exploration of relevant health issues in social, economic, and cultural contexts, including public health and policy, and how they relate to gender, race, sexuality, disability, and class.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize how gender and health are impacted by social, economic, and/or political influences.

Audience: Both Grad & Undergrad

2. Apply gender and health frameworks to research and writing.

Audience: Graduate

**GEN&WS 546 – FEMINIST THEORIES AND MASCULINITIES**

3 credits.

Explores central assumptions, questions, and debates regarding the relationship between feminist theory, pro-feminist theory, and the practice and performance of multiple masculinities. Explores feminist-informed definitions of and debates about masculinity including whether masculinity is primarily a gender-role and/or a form of sexual expression. Further, key tensions related to men's status, or their lack thereof, as subjects of feminist theory will be examined. Examine the practice and performance of specific masculinities including but not limited to African American masculinities, trans masculinities, and faith-informed masculinities.

**Requisites:** GEN&WS/AFROAMER 333, GEN&WS 441, 445, 446, 449, or 547; or graduate/professional standing

**Course Designation:** Breadth - Either Humanities or Social Science  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Develop the writing and analytical skills necessary to think critically about masculinities in theory and practice

Audience: Both Grad & Undergrad

2. Determine how feminist theorizing about masculinity shapes and is shaped by other hierarchies of power including race and sexuality

Audience: Both Grad & Undergrad

3. Use feminist theorizing about masculinity to help develop graduate level research including but not limited to thesis and dissertation research

Audience: Graduate

**GEN&WS 547 – THEORIZING INTERSECTIONALITY**

3 credits.

Critically examines important issues, questions, and debates regarding intersectionality or the notion that race, gender, and sexuality, and other terrains of difference gain meaning from each other. Materials include texts, films, and other multimedia resources drawn from an array of disciplines including sociology, critical race theory, history, political theory, and cultural studies.

**Requisites:** GEN&WS/AFROAMER 333, 441, 445, 446, 449, 546 or graduate/professional standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEN&WS/PHILOS 556 – TOPICS IN FEMINISM AND PHILOSOPHY**

3 credits.

Topics from historical and contemporary feminist thought; attention to one or more feminist philosophers, historical movements, philosophical frameworks, or sets of philosophically related issues.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Think critically about arguments.

Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.

Audience: Undergraduate

3. Communicate precisely and concisely in both writing and speech.

Audience: Undergraduate

4. Express familiarity with central concepts in feminist philosophy.

Audience: Undergraduate

**GEN&WS/ED POL 560 – GENDER AND EDUCATION**

3 credits.

Examines the relationship between gender and education and explores notions of gender as socially constructed categories and identities. Identify the ways schools (re)produce and mediate gender identities and explore the experiences of students. Draws on critical and feminist perspectives to analyze the ways gender intersects with understandings of identity performance and expression such as masculinity and femininity, as well as at the intersection of race, ethnicity, class, and sexuality in schooling processes.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the role schools and education play in enhancing or reproducing gender inequality

Audience: Both Grad & Undergrad

2. Explain theories on the social construction of gender and sexuality

Audience: Both Grad & Undergrad

3. Describe and reflect on the history of the gender equity movement in education

Audience: Both Grad & Undergrad

4. Read, discuss, and write about research on students with diverse gender and sexual identities

Audience: Both Grad & Undergrad

5. Develop analytical skills necessary to think about intersectional identities how they are tied to students' experiences in education

Audience: Both Grad & Undergrad

6. Explain and analyze pedagogical approaches and school policies' effects on learners of diverse gender and sexual identities

Audience: Both Grad & Undergrad

7. Analyze the role that educational research, policies and practices play in causing, ameliorating, or exacerbating gender inequities

Audience: Both Grad & Undergrad

8. Build the skills necessary to apply these concepts and approaches to our own final research project on a gender related topic

Audience: Both Grad & Undergrad

9. Read and evaluate scholarly research in the fields of education, sociology, feminist studies, anthropology, etc

Audience: Graduate

**GEN&WS/AFROAMER 624 – AFRICAN AMERICAN WOMEN'S ACTIVISM (19TH & 20TH CENTURIES)**

3 credits.

Examines Black women's struggles for racial justices; reconsiders conventional notions of leadership, politics and protest. Topics include abolitionism, anti-lynching campaigns, woman suffrage, labor movement, club movement, cultural expressions, civil rights protest, Black feminism/ womanism, poverty and welfare rights, environmental racism, etc.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2022**GEN&WS/AFROAMER 625 – GENDER, RACE AND THE CIVIL RIGHTS MOVEMENT**

3 credits.

This course focuses on the emerging field of gender studies in the scholarship on the post-World War II civil rights movement in the United States.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**GEN&WS 640 – CAPSTONE SEMINAR IN GENDER AND WOMEN'S STUDIES**

3 credits.

This capstone synthesizing seminar for Gender and Women's Studies majors focuses on the major contributions of gender and women's studies scholarship, requires students to hone their interdisciplinary skills, and apply their feminist theory knowledge. It is expected that students have completed more than 50% of their GENWS coursework before enrolling. Process for enrollment permission will be shared by GWS advisor.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEN&WS 642 – ADVANCED SEMINAR IN LGBT STUDIES (LGBT STUDIES CAPSTONE)**

3 credits.

Capstone for LGBTQ+ Studies certificate; culminates certificate work through advanced interdisciplinary readings, analysis and discussion in LGBTQ+ Studies and completion of a research project. It is expected that students have completed more than 50% of their LGBTQ+ Studies coursework before enrolling. Process for enrollment permission will be shared by LGBTQ+ Studies advisor.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**GEN&WS 660 – INTERNSHIP IN GENDER AND WOMEN'S STUDIES**

3 credits.

Opportunities for learning and working in organizations in ways that connect coursework in gender and women's studies to specific and applied issues in community settings. Permission to enroll is granted from the instructor after an application process is completed the semester before the course is taught.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Apply knowledge of gender and women's studies to practical and professional experiences outside of the classroom.

Audience: Undergraduate

2. Develop a professional feminist network.

Audience: Undergraduate

3. Engage in feminist social change and social justice.

Audience: Undergraduate

4. Gain discipline specific, professional experiences and skills to further personal and professional goals.

Audience: Undergraduate

5. Further understanding of gender &amp; women's studies application in professional settings and career development.

Audience: Undergraduate

**GEN&WS/AFROAMER 677 – CRITICAL AND THEORETICAL PERSPECTIVES IN BLACK WOMEN'S WRITINGS**

3 credits.

Analyses and interpretations of literary works by black women writers through historical, philosophical, political, feminist, and other contemporary critical methods.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**GEN&WS 681 – SENIOR HONORS THESIS I**

3 credits.

Research and preparation for completing the senior honors capstone experience carried out under the supervision of an advisor in the women's studies program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEN&WS 682 – SENIOR HONORS THESIS II**

3 credits.

Completion of the senior honors capstone project begun in Gender and Women's Studies 681 carried out under the supervision of an advisor in the women's studies program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEN&WS 691 – SENIOR THESIS I**

2-3 credits.

Research and preparation for the writing of a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEN&WS 692 – SENIOR THESIS II**

2-3 credits.

Senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEN&WS 699 – DIRECTED STUDY**

1-6 credits.

Graded on lettered basis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEN&WS 720 – SPECIAL TOPICS IN GENDER AND WOMEN'S STUDIES**

1-3 credits.

Advanced level investigation of some specific topic in gender and women's studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEN&WS/ENGL 737 – FEMINIST THEORY AND CRITICISM**

3 credits.

Feminist theory, with an emphasis on literary and cultural theory and criticism in English.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEN&WS/CURRIC 760 – SEX/GENDER-RELATED ISSUES IN CURRICULUM AND INSTRUCTION**

3 credits.

A poststructural feminist analysis of educational discourse and practice; examines selected sex/gender issues in curriculum and instruction; explores some implications for classroom teaching of the complex interrelationships between sex/gender, race, social class, sexuality, and ability/disability.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEN&WS 790 – RESEARCH & THESIS: MASTER'S AND PROFESSIONAL LEVEL**

1-6 credits.

Research and thesis writing for students at the Master's and professional level.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

**GEN&WS 799 – INDEPENDENT RESEARCH AT THE MASTER'S AND PROFESSIONAL LEVEL**

1-3 credits.

Independent research for master's or professional level graduate students.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**GEN&WS 800 – RESEARCH METHODS IN GENDER & WOMEN'S STUDIES**

3 credits.

Explores feminist approaches to methods in the social sciences, humanities, and health sciences, such as ethnography, interviews, statistics, focus groups, surveys, archival research, discourse analysis, and visual analysis. Applies transdisciplinary perspectives to consider work from a range of academic fields and topics in order to critique issues of epistemology, methodology, methods, interpretation, and writing.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe feminist conversations about epistemology (the study of knowledge – what it is, how we know); methodologies (how we go about producing new knowledges); methods (the actual tools we use to collect and analyze data) and the relationship between them.

Audience: Graduate

2. Identify historical and contemporary debates and tensions in conceptualizing, conducting, analyzing, and disseminating feminist research.

Audience: Graduate

3. Analyze research methods strategies and techniques through a feminist lens.

Audience: Graduate

4. Apply feminist methodologies to your own research projects and interests.

Audience: Graduate

**GEN&WS/ED POL/PUB AFFR 805 – GENDER ISSUES IN INTERNATIONAL EDUCATIONAL POLICY**

3 credits.

Exploration and analysis of recent debates related to gender issues in international educational policy, including the intersection of education and demographic processes, the play of history and culture, and the social construction of gender.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEN&WS 810 – GENDER AND WOMEN'S STUDIES: THE EMERGENCE AND TRANSFORMATION OF A FIELD**

3 credits.

Provides an overview of the field of gender and women's studies. Surveys the origin of the field and traces its major transformations. Explores and analyzes historical and contemporary debates that have shaped and continue to shape the field. Interrogates the mission of gender and women's studies. Examines the processes and products of academic professionalization. Investigates the value of graduate training in gender and women's studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and analyze major shifts in the history of Gender and Women's Studies

Audience: Graduate

2. Develop and demonstrate a point of view about the animating controversies within Gender and Women's Studies

Audience: Graduate

3. Research and summarize changes in Gender and Women's Studies scholarship

Audience: Graduate

4. Develop and deploy critical reading skills

Audience: Graduate

5. Develop and apply critical writing skills

Audience: Graduate

**GEN&WS/JOURN 828 – GENDER AND SEXUALITY IN MASS COMMUNICATION**

3 credits.

A scholarly theory overview on gender and sexuality in communication studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how cultural theorists have defined "gender," "sexuality," and "intersectionality."

Audience: Graduate

2. Analyze how gender and sexuality are represented in the mass media.

Audience: Graduate

3. Explain how gender and sexuality are relevant to media production, media consumption (media audiences), and media activism.

Audience: Graduate

4. Describe how gender and sexuality inform the creation of media publics.

Audience: Graduate

**GEN&WS 830 – CONTEMPORARY THEORIZING IN GENDER AND WOMEN'S STUDIES**

3 credits.

Examines assumptions and debates in contemporary theorizing about gender and women including what constitutes "good" gender and women studies' theorizing, how to recognize gender-based oppression when we see it, how gender, race, sexuality, and other hierarchies of power intersect, as well as the merits of transnational theorizing about gender and women. Explores whether gender and women's studies' theorizing is a form of activism, how to teach theory in gender and women's studies' classrooms, the value of cultivating distinct gender and women studies' methods, and other dimensions of putting gender and women's studies' theorizing into practice.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Interrogate contemporary debates regarding the causes and effects of gender-based experiences and oppression.

Audience: Graduate

2. Explore how race, class, and other intersecting hierarchies of power inform these causes and effects.

Audience: Graduate

3. Consider whether theorizing about gender and women is not only a scholarly enterprise but also as a professional, activist, and personal one.

Audience: Graduate

4. Build the skills and background that enable us to apply these theoretical frameworks and approaches to our own intellectual projects.

Audience: Graduate

**GEN&WS 840 – PEDAGOGY IN GENDER AND WOMEN'S STUDIES**

3 credits.

Provides an introduction to feminist pedagogy in Gender and Women's Studies, Focuses upon: (1) the historical importance of an explicit feminist pedagogy in the foundation of GWS, (2) the development of feminist pedagogical theory and (3) a hands-on experience with developing feminist pedagogical materials, classroom strategies and a teaching portfolio. Considers the ways that feminist pedagogical approaches reconsider and challenge aspects of traditional pedagogical practices and training. Engages the development of feminist pedagogical thought and interrogates the different intellectual traditions that have shaped debates and issues within feminist politics and practices.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Understand and apply a variety of pedagogical approaches to Gender and Women's Studies teaching practice and curriculum design.

Audience: Graduate

2. Design a teaching portfolio suited to their particular interests and knowledge.

Audience: Graduate

**GEN&WS 860 – PROSEMINAR IN GENDER AND WOMEN'S STUDIES**

1 credit.

Provides an orientation to basic features of scholarly life as well as some professional options outside of academia, and become acquainted with our faculty and their research. Explores issues both broad (e.g., professional development) and specific (e.g., obtaining research grants) that are important to those building professional careers with a Gender and Women's Studies Ph.D.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Foster ethical and professional conduct.

Audience: Graduate

2. Learn about a range of careers in academia and outside academia.

Audience: Graduate

3. Acquire an understanding of how to become a successful professional in the field of gender and women's studies through engaging one another, the faculty in the department, and outside speakers, as well as through readings and critical reflection through writing.

Audience: Graduate

**GEN&WS 880 – PROSEMINAR: GRADUATE STUDY IN GENDER AND WOMEN'S STUDIES**

3 credits.

Introduces new graduate students to the breadth of scholarship in Gender and Women's Studies. It also develops particular skills (critical reading, critical writing and basic research) important to graduate level scholarship.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**GEN&WS/C&E SOC/SOC 904 – SOCIOLOGICAL PERSPECTIVES ON GENDER**

3 credits.

Advanced topics in the analysis of gender relations in society.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**GEN&WS/ANTHRO 920 – ANTHROPOLOGY OF GENDER**

3 credits.

Theoretical and ethnographic approaches to the anthropology of gender, focusing on current works. Topics include sexual inequality, research methods, gender and history, gender and ethnographic writing, cultural constructions of masculinity, sexuality, and gender studies and anthropological theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**GEN&WS 925 – SEMINAR: TOPICS IN GENDER AND GLOBAL PERSPECTIVES/ISSUES**

3 credits.

Research seminar on gender and global issues.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Analyze topics on gender and global issues from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.

Audience: Graduate

2. Synthesize course content with your individual academic research and thesis interests.

Audience: Graduate

**GEN&WS 930 – SEMINAR: TOPICS IN FEMINIST THEORY**

3 credits.

Research seminar on feminist theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Analyze and apply feminist theory from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.

Audience: Graduate

2. Synthesize course content with your individual academic research and thesis interests.

Audience: Graduate

**GEN&WS/PSYCH 932 – PSYCHOLOGY OF WOMEN AND GENDER**

3 credits.

Examines research and theory in psychology of women and gender. Topics include feminist approaches to research methods, psychological gender differences and similarities, women of color, mental health and feminist therapy, rape, sexual harassment, transgender issues and research, and public policy issues.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2023**Learning Outcomes:** 1. Understand psychological research and theories on women and gender, at a level of proficiency to be qualified to teach an undergraduate course on the psychology of women and gender, and/or begin to conduct psychological research on gender, and/or conduct more gender-sensitive therapy.

Audience: Graduate

2. Apply feminist approaches and critiques in psychology.

Audience: Graduate

3. Understand the enormous diversity among women and trans folks along dimensions of ethnicity, social class, and sexual orientation.

Audience: Graduate

**GEN&WS/POLI SCI 933 – FEMINIST POLITICAL THEORY**

3 credits.

Focuses on how specific schools of feminist thought redefine the political, spanning historical and contemporary feminist political theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2021**GEN&WS/HISTORY 938 – HISTORY OF SEXUALITY**

3 credits.

Using sexuality as a category of historical analysis, examines historiographical, methodological, and theoretical contributions to understanding all aspects of the past.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2023**GEN&WS 950 – SEMINAR: TOPICS IN GENDER AND WOMEN'S STUDIES**

3 credits.

Research seminar on specific topics in gender and women's studies.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**GEN&WS 970 – SEMINAR: TOPICS IN GENDER AND DISABILITY**

3 credits.

Research seminar on gender and disability.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Analyze gender and disability studies research from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.

Audience: Graduate

2. Synthesize course content with your individual academic research and thesis interests.

Audience: Graduate

**GEN&WS 990 – RESEARCH & THESIS**

1-6 credits.

Independent research and writing to complete dissertation requirement

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**GEN&WS 999 – INDEPENDENT RESEARCH**

1-3 credits.

Directed study projects for graduate students as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

# GENERAL BUSINESS (GEN BUS)

## GEN BUS 106 – FOUNDATIONAL SKILLS FOR BUSINESS ANALYSIS

1 credit.

Build fundamental skills and processes to develop a strong foundation in business analysis utilizing Excel. Learn the fundamentals of data construction, manipulation, summarization, analysis and presentation.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply fundamental skills in structuring business information.

Audience: Undergraduate

2. Organize, search and analyze business data.

Audience: Undergraduate

3. Apply advanced skills in data summarization and analysis.

Audience: Undergraduate

4. Visualize and present information.

Audience: Undergraduate

5. Apply introductory programming skills.

Audience: Undergraduate

6. Explain recent developments in 'data informed' business problem solving.

Audience: Undergraduate

## GEN BUS 110 – PERSONAL AND PROFESSIONAL FOUNDATIONS IN BUSINESS

1 credit.

An introduction for new business students covering academic exploration and planning, career development, self-assessment for personal development, leadership, and diversity and inclusion.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate a basic ability to self-assess and reflect on their personality, identities, strengths, values, and personal ethics.

Audience: Undergraduate

2. Explain the importance of continuous self-assessment as a method for improving approaches to work and interactions with others.

Audience: Undergraduate

3. Demonstrate the foundational understanding of leadership development as related to business now and in the future.

Audience: Undergraduate

4. Demonstrate the foundational understanding of career development as related to business.

Audience: Undergraduate

5. Explain the importance of leading ethically, inclusively, and authentically in individual and group settings.

Audience: Undergraduate

## GEN BUS 112 – EXPLORING BUSINESS

1 credit.

Develop student success strategies, engage with a community of peers, professionals, faculty and staff, and explore the breadth of professional opportunities available to launch an inspiring and meaningful career.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically reflect on improving study skills, career planning, and ethical perspectives to promote success in business.

Audience: Undergraduate

2. Demonstrate professional communications skills in written and spoken formats in individual and group settings.

Audience: Undergraduate

3. Identify business sectors, industries, and WSB majors that align with your desired future goals.

Audience: Undergraduate

**GEN BUS 206 – BEGINNING DATA ANALYSIS FOR BUSINESS**

3 credits.

Learn basic business statistical skills to comprehend business reports, and to calculate statistical findings from business data using Excel. Understand simple probability calculations and how to apply probability to specific business uncertainties. Build capability to use simple statistical models and tests to estimate business variables of interest, and learn about predictive relationships between variables. Become comfortable using Excel for data manipulation, data analytics, and data visualization. Apply statistical analysis to address business issues.

**Requisites:** MATH 112 and (GEN BUS 106 or concurrent enrollment)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain important statistics commonly used in business

Audience: Undergraduate

2. Apply basic probability concepts and models to uncertainty in business contexts

Audience: Undergraduate

3. Use data to estimate unknown business variables, test hypotheses, and learn with simple regression

Audience: Undergraduate

4. Use Excel to analyze data, create visualizations, and answer business questions

Audience: Undergraduate

5. Create a basic business proposal using statistics and data analytics

Audience: Undergraduate

**GEN BUS 207 – INTERMEDIATE DATA ANALYSIS FOR BUSINESS**

3 credits.

Enables you to understand and apply useful approaches to analyzing and presenting data to support business decision making. Emphasis on applications of predictive and prescriptive analytics. Predictive approaches use historical data to infer relationships and forecast future outcomes. Prescriptive methods formulate decision models to identify choices that are optimal with respect to a desired, measurable outcome. Provides experience integrating diverse data sources, modelling uncertainty, and visualizing key insights.

**Requisites:** GEN BUS 206

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and communicate with data in business environments

Audience: Undergraduate

2. Implement and interpret output from common statistical methodologies

Audience: Undergraduate

3. Integrate data from multiple data sources

Audience: Undergraduate

4. Create compelling data visualizations

Audience: Undergraduate

5. Solve and interpret basic optimization and simulation models

Audience: Undergraduate

6. Integrate models of uncertainty into business decision-making

Audience: Undergraduate

**GEN BUS/DS 240 – HUMAN-CENTERED DESIGN AND BUSINESS**

2 credits.

Design thinking is an iterative problem-solving process geared toward producing innovative solutions for complex and persistent problems in various fields and organizations. Its process, culture, and value system from both design and business point of views will be covered: Empathetic understanding of the end users, problem definition rooted in systems thinking, ideation with a strong emphasis on creativity, visualization and prototyping, testing rooted in a set of research methods, and finally, the importance of iteration in bringing about innovative solutions. The path from project to market will also be explored, with an understanding of how one might balance desirability, feasibility and viability.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate the ability to understand and gain empathy into human (customer/consumer/user) experience of product, services and systems through systematic inquiries.

Audience: Undergraduate

2. Exhibit the ability to be creative, collaborative, and divergent thinkers who can generate and visually communicate multiple ideas.

Audience: Undergraduate

3. Demonstrate ability to iterate proposed solutions toward innovation.

Audience: Undergraduate

4. Explore questions around cultural and intellectual exchange between business and design such as "What can business learn from design, and vice versa?", or "How might the incorporation of design thinking help human-centered business to grow and flourish?"

Audience: Undergraduate

5. Illuminate and expand on existing touch points between design thinking and "business thinking", including, but not limited to, marketing/new product design and development, entrepreneurship and venture creation, operations and new process design

Audience: Undergraduate

**GEN BUS 250 – SUSTAINABLE CAPITALISM**

2 credits.

Examination of how firms, government, and civil society interplay in free market capitalism to bring about not only prosperity and economic freedom but also economic inequality, environmental degradation, and a weakening of institutions. Application of this knowledge to how capitalism can be reimagined for free market economies and business to foster prosperous societies and planetary health.

**Requisites:** ECON 101 or declared in undergraduate Business Exchange program**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how the interplay between firms, governments, and market systems shape economic, societal and environmental outcomes, as well as tradeoffs within.

Audience: Undergraduate

2. Explain varieties of capitalism across nations and compare with United States capitalism over time.

Audience: Undergraduate

3. Analyze the role of business, governments, and civil society in managing free markets to balance the wellbeing of firms with the wellbeing of society and the natural environment.

Audience: Undergraduate

**GEN BUS 301 – BUSINESS LAW**

3 credits.

History of legal development, contracts, agency, sale of goods, insurance.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize the legal implications of transactions and events that impact the business environment.

Audience: Undergraduate

2. Describe the American legal system and how the American court system works.

Audience: Undergraduate

3. Apply the technical legal rules covered in the course regarding negligence, intellectual property, contract law, agency law, and employment law.

Audience: Undergraduate

4. Analyze and assess risks and opportunities inherent in business transactions and in everyday life.

Audience: Undergraduate

**GEN BUS 306 – BUSINESS ANALYTICS I**

3 credits.

Development of quantitative intuition through practical applications and use of analysis tools. Specifically, emphasis will be on how to manage, summarize, explore, and visualize databases. The essentials of probability will be introduced and applied to decision problems where there is uncertainty. Emphasis on hypothesis testing and regression analysis and include an introduction to simulation methods. Throughout, attention will be paid to effective communication of data analysis. The use of business cases will connect the course material to both real world settings and recent advances in data analysis, including big data and data mining.

**Requisites:** (GEN BUS 106 or concurrent enrollment) and (MATH 211, 217, or 221), or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop “statistical literacy,” meaning that you can interpret statistics frequently used in current events, industry reports, and so on

Audience: Undergraduate

2. Distinguish between descriptive and inferential statistics, and apply skills such as data summarization, hypothesis testing, and regression analysis, using Excel

Audience: Undergraduate

3. Apply the core concepts of probability to decision-making under uncertainty, including an introduction to simulation

Audience: Undergraduate

4. Synthesize your knowledge with quantitative business cases

Audience: Undergraduate

5. Create effective communication of data analyses in written, visual, and/or oral formats

Audience: Undergraduate

**GEN BUS 307 – BUSINESS ANALYTICS II**

3 credits.

Emphasis on hands-on experience with many commonly used analytic methodologies using the modeling and optimization tools available on almost every professional desktop. The focus is predictive and prescriptive analytics. Predictive approaches use historical data to infer causal relationships and forecast future outcomes from a given action. Prescriptive methods take this a step further, helping managers formulate decision models that identify optimal actions given a set of circumstances.

**Requisites:** GEN BUS 106 and 306, or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain the principles of different regression techniques for different forms of data

Audience: Undergraduate

2. Discriminate between types of explanatory variables and ways to incorporate these variables in a statistical model

Audience: Undergraduate

3. Implement and interpret output from the most common statistical methodologies

Audience: Undergraduate

4. Recognize the structure of relational databases

Audience: Undergraduate

5. Construct basic optimization and simulation models

Audience: Undergraduate

6. Understand the collection, management, reasoning, and communication with data in corporate and other environments

Audience: Undergraduate

### GEN BUS 308 – CLOUD BASED BUSINESS ANALYTICS

2 credits.

Apply statistics and data literacy to business problems using the most popular analytics tools and technologies, many of which are in the cloud.

**Requisites:** GEN BUS 307, 317, ECON 400, 410, or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Build and share dashboards using data visualization tools.

Audience: Undergraduate

2. Utilize SQL to query cloud databases.

Audience: Undergraduate

3. Build and deploy a predictive model in the cloud.

Audience: Undergraduate

4. Analyze big data in a cloud environment.

Audience: Undergraduate

### GEN BUS 310 – FUNDAMENTALS OF ACCOUNTING AND FINANCE FOR NON-BUSINESS MAJORS

3 credits.

Part of a two course sequence introducing non-business students to basic concepts, practices and analytical methods that are part of the market enterprise system. This course is a basic overview on: accounting, finance, and business law.

**Requisites:** Sophomore standing or declared in the Business Exchange program

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate the application of fundamental business terminology and concepts in the disciplines of economics, business law, finance, and accounting to effectively communicate with professionals across a given business organization

Audience: Undergraduate

2. Explain the various reasoning businesses use to make decisions and the impact those decisions have on the firm and society

Audience: Undergraduate

3. Reflect on their assumptions and predispositions regarding the role of business in society

Audience: Undergraduate

4. Apply the common business processes and tools to develop professional, academic, and personal futures.

Audience: Undergraduate

### GEN BUS 311 – FUNDAMENTALS OF MANAGEMENT AND MARKETING FOR NON-BUSINESS MAJORS

3 credits.

High-level introduction to concepts and practices in business. Overview of management, marketing, strategy, entrepreneurship, ethics, supply chain, and international business.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Summarize the business environment including core functions, participants, and the external forces that influence business activities such as globalization, diversity, business ethics, and corporate social responsibility

Audience: Undergraduate

2. Evaluate different types of business formations and create a business plan

Audience: Undergraduate

3. Describe and apply the role of marketing in business

Audience: Undergraduate

4. Analyze business strategies and management decisions in order to evaluate their impact on business performance

Audience: Undergraduate

### GEN BUS 317 – MATHEMATICAL FOUNDATIONS OF BUSINESS ANALYTICS

3 credits.

Statistical inference and analyses based on models will be introduced and applied in a business context using a calculus-based focus. Topics covered include point estimation, confidence intervals, hypothesis testing, regression models, and time series models. Various methods for fitting a model to data will be explored, and uncertainty about parameter estimates will be quantified so decision makers have information about the quality of the estimates. Regression and time series models are commonly used in business analytics applications and will be used to analyze business data and make inferences and predictions.

**Requisites:** MATH 331, STAT/MATH 309, or 431

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply discrete and continuous probability distributions to data encountered in business applications and evaluate the quality of parameter estimates.

Audience: Undergraduate

2. Explain the basics of modeling using both regression and time series approaches.

Audience: Undergraduate

3. Recognize the assumptions and limitations of the methods utilized in this course to aid businesses in making decisions under uncertainty.

Audience: Undergraduate

4. Interpret statistical information for someone with a non/less technical background.

Audience: Undergraduate

5. Analyze business data and construct models using appropriate statistical software.

Audience: Undergraduate

6. Communicate and present the results of an analysis.

Audience: Undergraduate

### GEN BUS/INTL BUS 320 – INTERCULTURAL COMMUNICATION IN BUSINESS

3 credits.

Develops awareness and knowledge of cultural influences on business. Focuses on various attitudes toward work, time, material possession, business, and the relationship of these attitudes to different social, religious, philosophical, and educational backgrounds of business people from cultures around the world.

**Requisites:** Sophomore standing or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### GEN BUS 360 – WORKPLACE WRITING AND COMMUNICATION

3 credits.

Develop and practice workplace communication skills: writing, speaking, and listening. A theoretical foundation provides a method of deep audience analysis; apply that analysis when producing a variety of written genres and when preparing content for formal presentations. Research communication and information sources specific to future careers. Strengthen information literacy by developing professional research skills and analyzing sources. Revise written work through a workshop process that requires giving, receiving, and implementing feedback.

**Requisites:** Satisfied Communications A requirement; no concurrent enrollment with GEN BUS 110 or 120

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate active listening skills

Audience: Undergraduate

2. Develop a writing process that includes drafting, incorporating feedback, and self-evaluation to create effective documents in various genres

Audience: Undergraduate

3. Analyze audiences with attention to differences in backgrounds, values, viewpoints, and experiences in order to tailor communication to a variety of workplace audiences, genres, and situations

Audience: Undergraduate

4. Employ appropriate style and discipline-specific conventions in writing and speaking

Audience: Undergraduate

5. Identify and locate resources specific to the students' industry/discipline using the library system and internet

Audience: Undergraduate

6. Analyze information sources and communication skills that professionals use

Audience: Undergraduate

7. Evaluate sources for credibility and relevance; use evidence recognized as credible by the students' industry/discipline and cite it appropriately

Audience: Undergraduate

8. Provide constructive feedback on peers' work-in-progress and presentations

Audience: Undergraduate

9. Incorporate feedback and self-evaluation to improve presentations

Audience: Undergraduate

10. Demonstrate effective visual design strategies in documents and slide-decks

Audience: Undergraduate

**GEN BUS 365 – CONTEMPORARY TOPICS**

1-3 credits.

A course for the exploration of subject areas possibly to be introduced into the business curriculum.

**Requisites:** Sophomore standing or declared in undergraduate Business Exchange program

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEN BUS 370 – CASE INTERVIEW ANALYSIS**

1 credit.

Provides a fundamental understanding of how to prepare for a case interview, analyze problems based on limited information, consider alternatives to develop a solution and present the solution effectively.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Effectively implement a systematic approach to analyzing case problems.

Audience: Undergraduate

2. Identify types of case problems and match them with frameworks and analytical tools designed to inform those problems and structure recommended solutions.

Audience: Undergraduate

3. Apply relevant analytical tools to identify missing information needed to understand problems.

Audience: Undergraduate

4. Formulate probing questions to bring out critical facts and assumptions about problem contexts.

Audience: Undergraduate

5. Integrate available facts and data into the relevant analytical tools and frameworks to diagnose problems holistically.

Audience: Undergraduate

6. Concisely communicate the analysis of case problems along with actionable recommendations to address the situations.

Audience: Undergraduate

**GEN BUS 399 – READING AND RESEARCH-BUSINESS RESEARCH**

1-6 credits.

Individual work suited to the needs of undergraduate students may be arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**GEN BUS 400 – INTEGRATED STRATEGIC LEADERSHIP**

3 credits.

Capstone integrating the curriculum through the application of business strategy to business problems in cross-functional teams. Develops and refines key skills introduced in core courses, including professional communications, inclusive leadership, and quantitative analysis.

**Requisites:** GEN BUS 360 and (M H R 300, OTM 300, FINANCE/ ECON 300, and MARKETNG 300, or concurrent enrollment)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Make effective business decisions that integrate data driven analysis and input from diverse team members from cross functional disciplines.

Audience: Undergraduate

2. Develop and apply inclusive leadership skills in a team setting to facilitate a sense of belonging among team members.

Audience: Undergraduate

3. Perform an external analysis of a firm's environment (industry, rivals, & broader environment), and an internal analysis of a firm's resources (capabilities, tangible, and intangible assets, etc.) to identify productive courses of action.

Audience: Undergraduate

4. Perform an analysis of alternative strategic positions in an industry, distinguishing between cost and differentiation strategies, with implications for building competitive advantage.

Audience: Undergraduate

5. Effectively communicate solutions to complex problems through application of the frameworks, methods and tools, learned in WSB core classes.

Audience: Undergraduate

**GEN BUS 450 – PROFESSIONAL EXPERIENCE IN BUSINESS**

1 credit.

Internship which allows students to augment their business education and gain professional experience in their major through related work experience. Intended for undergraduates in the School of Business. Not available with firms who participate in the ACCT I S 600 internship. See listing on Accounting Dept. website.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Complete projects and/or tasks that build upon knowledge and skills learned in the classroom.

Audience: Undergraduate

2. Acquire specific knowledge and skills that are relevant to the career pathway or industry.

Audience: Undergraduate

3. Apply knowledge gained through career experience to test and clarify career interests and goals.

Audience: Undergraduate

**GEN BUS 451 – PROFESSIONAL EXPERIENCE IN BUSINESS-EXTENDED INTERNSHIP**

1 credit.

Only allowed for six to eight month internships which will allow students to augment their business education and gain professional experience in their major area. Students receive one credit and will remain a full-time student. Intended for undergraduates in the School of Business

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Complete projects and/or tasks that build upon knowledge and skills learned in the classroom.

Audience: Undergraduate

2. Acquire specific knowledge and skills that are relevant to the career pathway or industry.

Audience: Undergraduate

3. Apply knowledge gained through career experience to test and clarify career interests and goals.

Audience: Undergraduate

**GEN BUS 656 – FOUNDATIONS OF STATISTICAL LEARNING FOR BUSINESS ANALYTICS**

2-3 credits.

An introduction to predictive modeling for business applications beginning with some of the foundations. Leads to development of linear regression and classification models, and discussion of building models for prediction. Topics include selection, regularization, and the bias-variance tradeoff.

**Requisites:** GEN BUS 307, 317 704, 705, 881, ECON 400, 410, STAT/ MATH 310, STAT 333, 340, or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Build (generalized) linear regression models for the purpose of prediction in business contexts, choosing from a variety of statistical learning techniques.

Audience: Undergraduate

2. Select predictive algorithms and features for machine learning models in business settings, taking into account the fundamental bias-variance tradeoff.

Audience: Undergraduate

3. Evaluate prediction accuracy of models for regression and classification problems for business applications.

Audience: Undergraduate

4. Communicate the advantages and disadvantages of different prediction approaches, and justify and explain their choices in the context of business problems.

Audience: Undergraduate

5. Interpret the prediction outcomes of a given model in a business context, and communicate the results to non-expert audiences.

Audience: Undergraduate

**GEN BUS 657 – MACHINE LEARNING AND ARTIFICIAL INTELLIGENCE MODELS FOR BUSINESS ANALYTICS**

2 credits.

An introduction to machine learning models for business applications. Builds on the predictive modeling basics by developing general algorithmic prediction models for supervised machine learning. Covers additive models, CARTs, bagging/boosting, deep learning approaches, and AI models. Discussion of unsupervised learning techniques, including clustering and anomaly detection.

**Requisites:** GEN BUS 656 or concurrent enrollment

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Build machine learning models for the purpose of prediction in business contexts, choosing from a variety of approaches.

Audience: Both Grad & Undergrad

2. Tune models to optimize predictive performance in business settings.

Audience: Both Grad & Undergrad

3. Evaluate and compare prediction accuracy of regression and classification models in business settings.

Audience: Both Grad & Undergrad

4. Decompose and demystify machine learning models that underpin AI-driven business solutions.

Audience: Both Grad & Undergrad

5. Identify more advanced literature on machine learning for business applications and be able to develop skills in self-study.

Audience: Graduate

**GEN BUS/R M I 701 – MANAGING LEGAL RISKS**

3 credits.

Legal implications for business managers of selected areas of the law including negligence, contract, intellectual property, officer/director liability, financing the business enterprise, and employment and trade regulation; introduction to the legal process, including alternative dispute resolution systems.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**GEN BUS 704 – DATA TO DECISIONS**

2-3 credits.

Exploration of statistical inference and data analytics tools. Review of relevant foundations of statistics, machine learning and probability theory. Emphasis on applying the resulting concepts to canonical business examples, using both Excel and R.

**Requisites:** Declared in an MBA program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Read, clean, create new datasets

Audience: Graduate

2. Describe the resulting data by computing and interpreting summary statistics, and via visualization tools

Audience: Graduate

3. Describe uncertainty and risk using the language of probability theory

Audience: Graduate

4. Perform hypothesis tests common in business applications

Audience: Graduate

5. Perform Monte Carlo simulations

Audience: Graduate

6. Estimate cross-sectional and time-series models for forecasting purposes and select among competing models via cross-validation

Audience: Graduate

7. Apply machine learning methods in the context of simple examples

Audience: Graduate

## GEN BUS 705 – STATISTICS AND PROGRAMMING FOR BUSINESS ANALYTICS

3 credits.

A compact primer in statistics and an introduction to programming as a foundation for data-driven business analyses. The first part covers elementary concepts such as random variables, probability distributions, estimation, and ordinary least-squares regression. In the second part, the course exposes students to Python and R programming, including numerical and statistical packages that are relevant for practical applications in business.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Derive measures related to the characteristics of probability functions such as moments, mean, variance, median, mode, and percentiles.

Audience: Graduate

2. Carry out an ordinary least-squares (OLS) regression and interpret the parameter estimates as well as predictions.

Audience: Graduate

3. Prepare, compile, and run basic computer programs in a variety of programming languages including C/C++, Java, Python, R, Stata, and VBA.

Audience: Graduate

4. Implement algorithms for business analytics problems in a structured fashion in Python and R.

Audience: Graduate

5. Pick suitable numerical functions from available packages, including quadrature (numerical integration), numerical solution of non-linear equations, optimization, and random-number generation, and use the functionality for business analyses.

Audience: Graduate

6. Run a Monte Carlo simulation using R and Python.

Audience: Graduate

## GEN BUS 710 – ETHICS, INTEGRITY AND SOCIETY

1 credit.

This class is designed to prepare students for dealing with ethical challenges in the world outside academia. Focus is on the role of personal values in all types of decision making, from personal to professional.

**Requisites:** Declared in an MBA program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Assess and explain your personal ethical principles and values.

Audience: Graduate

2. Analyze ethical dilemmas using philosophical theories and frameworks.

Audience: Graduate

3. Effectively communicate and persuasively advocate for the ethicalness of a proposed decision or action.

Audience: Graduate

## GEN BUS 713 – ROLE OF BUSINESS IN SOCIETY

2 credits.

Explores and implements the critical thinking, communication, and managerial skills necessary for developing ethical organizations.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a deeper understanding of ethical dilemmas at work and your personal ethical beliefs.

Audience: Graduate

2. Use a systematic ethics decision-making framework to arrive at moral conclusions.

Audience: Graduate

3. Explain why firms should be ethical.

Audience: Graduate

4. Describe best practices for enhancing an organization's ethical performance.

Audience: Graduate

5. Benchmark and assess your organization's ethical performance.

Audience: Graduate

**GEN BUS 714 – CORPORATE GOVERNANCE AND BOARD MEMBERSHIP**

2-3 credits.

Explore the roles and responsibilities of Management and Directors in protecting the interests of Shareholders and other Stakeholders. Topics include: the history of Corporate Governance, Board of Directors responsibilities, Corporate Governance nuances outside of the U.S., and current trends in Corporate Governance. Analyze how an entity's Corporate Governance environment can either prevent or permit failures and have a direct impact on the success of an organization.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the roles management, shareholders and directors have in impacting the Corporate Governance environment.

Audience: Graduate

2. Articulate the responsibilities of a Board of Directors and its Committees as well as what makes for effective members.

Audience: Graduate

3. Evaluate the root cause of Corporate Governance breakdowns and apply this learning to new situations and environments.

Audience: Graduate

4. Compare public vs. private company Corporate Governance environments including the major influences on international Corporate Governance environments.

Audience: Graduate

5. Reflect on the current and future practices in Corporate Governance including those that address global environmental and social issues.

Audience: Graduate

**GEN BUS 720 – DATA VISUALIZATION FOR BUSINESS ANALYTICS**

1-2 credits.

Introduce students to principles of data visualization and provide hands-on experience using data visualization tools and techniques for business applications. Develop proficiency in current visualization software tools, and leverage these tools for data exploration, insight into decision-making, and data presentation. Recommended for students to have general computing skills and familiarity with MS Word, MS Excel and MS PowerPoint; introductory-level exposure to coding in any language; some R experience; basic statistical literacy, equivalent to at least one semester of statistics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the information contained in data sets and make simple data corrections/transformations to prepare data for visualization tools

Audience: Graduate

2. Explore data sets visually to recognize patterns and relationships that provide insights and recommendations into business problems

Audience: Graduate

3. Identify design principles and best practices that make good visualizations effective and recognize challenges present in making data understandable across a range of audiences

Audience: Graduate

4. Construct effective static and interactive data visualizations for business decision-making and critique/improve existing ones

Audience: Graduate

5. Efficiently and persuasively communicate data insights through presentations, dashboards, and reports

Audience: Graduate

6. Explain history and current landscape of data visualization tools and their relative strengths and weaknesses

Audience: Graduate

7. Proficiently use Tableau visualization software

Audience: Graduate

8. Improve data presentation and visualizations in Excel and PowerPoint

Audience: Graduate

9. Make basic visualizations in R

Audience: Graduate

**GEN BUS 725 – CONSULTING PRACTICUM**

1 credit.

Solve critical business challenges. Drawing on and integrating the MBA core curriculum, conduct an in-depth analysis and make recommendations on a strategic problem posed by the sponsor company.

**Requisites:** GEN BUS 704, ACCT I S 700, FINANCE 700, M H R 706, MARKETNG 700, and OTM 700

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze a specific real-world organizational challenge and apply strategic thinking and decision-making skills to develop an effective and integrative business solution to that challenge.  
Audience: Graduate

2. Apply creative and critical thinking to address ambiguity and uncertainty in the project.  
Audience: Graduate

3. Communicate effectively with the client.  
Audience: Graduate

4. Lead and function effectively in teams.  
Audience: Graduate

5. Reflect on personal and professional development as business leaders for a global business environment.  
Audience: Graduate

**GEN BUS 730 – PRESCRIPTIVE MODELING AND OPTIMIZATION FOR BUSINESS ANALYTICS**

2-3 credits.

Introduction to fundamentals of prescriptive analytics with emphasis on business applications. Modeling and mathematical optimization using Excel and Python. Designing, building, testing, and analyzing models, including sensitivity and risk analysis. Developing and solving optimization models, including linear, integer, and nonlinear problems. Course includes some principles of model-building and fundamentals of optimization theory but emphasizes practical application, hands-on learning, and problem-driven exercises.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify appropriate modeling, analysis, and optimization methodologies when faced with a concrete problem.  
Audience: Graduate

2. Leverage spreadsheet software (e.g., Excel) and programming languages (e.g., Python) for modeling and optimization.  
Audience: Graduate

3. Classify optimization problems (e.g., linear, integer, nonlinear) and explain the challenges of solving different problem types.  
Audience: Graduate

4. Recognize classic optimization problems (e.g., knapsack, network, traveling salesman) and recall how to formulate them.  
Audience: Graduate

5. Discuss fundamental optimization theoretical concepts and their practical implications.  
Audience: Graduate

### **GEN BUS 732 – ECONOMICS FOR MANAGERS**

2-3 credits.

Develops and applies economic principles to examine the effect of firm, industry, domestic and global market conditions on both day-to-day managerial decision-making and long-term strategic planning.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate the proper use of costs and benefits in decision making (e.g., concepts of marginal, average, sunk, short-run, long-run, nominal, real, opportunity costs)

Audience: Graduate

2. Use the supply and demand framework to evaluate a range of economic events and activities, such as prices, interest rates and exchange rates, and at the levels of the firm, industry, domestic, and global market

Audience: Graduate

3. Apply economic principles to analyze decisions (e.g., pricing strategies, consumption, protectionism, regulations) when decision makers (e.g., firms, government) have market power

Audience: Graduate

4. Apply the notion of equilibrium from game theory to study settings with multiple decision makers

Audience: Graduate

### **GEN BUS 740 – EXPERIMENTS AND CAUSAL METHODS FOR BUSINESS INSIGHTS**

2-3 credits.

Provides an introduction to experimental and causal methods for driving business insights. Topics include: (1) Review and distinction of correlation vs. causation; (2) design and analysis of randomized-controlled experiments; and (3) identification of "natural experiments" in business data and corresponding empirical strategies.

**Requisites:** (GEN BUS 704 or 705) and (GEN BUS 720 or concurrent enrollment); or GEN BUS 881

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify statements and analytical reports that use correlational evidence to infer causal relationships.

Audience: Graduate

2. Articulate why correlation may not equate to causation due to factors such as selection bias.

Audience: Graduate

3. Explain the value of randomization for establishing causal effects through experiments.

Audience: Graduate

4. Demonstrate skills to develop a randomized experiment and analyze the results.

Audience: Graduate

5. Identify potential "natural experiments" that allow for causal analysis from existing data in business environments and be able to implement analytic approaches to analyzing data in these situations.

Audience: Graduate

**GEN BUS 745 – ROBOTIC PROCESS AUTOMATION**

1-2 credits.

Explore the fundamentals of Robotic Process Automation, including common use cases and popular tools. Provides an opportunity to automate a variety of processes using this technology.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Communicate the fundamentals and common use cases for robotic process automation (RPA).

Audience: Graduate

2. Automate various business processes using RPA tools and best practices.

Audience: Graduate

3. Complete an RPA project that involves identifying automation opportunities and implementing solutions.

Audience: Graduate

**GEN BUS 746 – ADVANCED SQL & DATA WAREHOUSING**

2 credits.

Provides an opportunity to construct advanced SQL statements (including joins, common table expressions, window functions, etc.) and build cloud data warehouses in a variety of software vendor platforms.

**Requisites:** (GEN BUS 760 and 780), (GEN BUS 882 and 883), or member of Graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Construct advanced SQL statements – including joins, common table expressions, window functions, etc.

Audience: Graduate

2. Build cloud data warehouses in various software vendor platforms.

Audience: Graduate

3. Automate steps in a data pipeline within a cloud environment.

Audience: Graduate

4. Present self-designed technical solutions to address business problems.

Audience: Graduate

**GEN BUS 750 – PROFESSIONAL EXPERIENCE IN BUSINESS**

1 credit.

Internship which allows students to augment their business education and gain professional experience in their major through related work experience.

**Requisites:** Declared in an MBA program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Evaluate and apply an internship experience by illustrating the projects and responsibilities completed, key learnings, and conclusions from the work.

Audience: Graduate

2. Demonstrate successes, barriers, and learning opportunities through detailed examples, including future recommendation for subsequent students.

Audience: Graduate

**GEN BUS 760 – DATA TECHNOLOGY FOR BUSINESS ANALYTICS**

2-3 credits.

Focuses on various technologies needed to perform data analytics. Techniques of extracting structured and unstructured data from databases, applications, or social networks. Transform and combine data with other relevant information and load into targeted systems. How to use programming languages to collect data from the web and leverage libraries for other, more, advanced data analysis.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Extract data from both structured or unstructured databases

Audience: Graduate

2. Transform and combine data with other relevant information and load into targeted systems such as data warehouses, data marts or analytical applications

Audience: Graduate

3. Use Python to execute simple web scraping, mine data from social networks, and use the libraries for advanced data analysis beyond simple descriptive analytics

Audience: Graduate

4. Implement Online Analytical Processing (OLAP) and create multi-dimension data cubes

Audience: Graduate

5. Execute social mining techniques and create valuable information from text-mining for decision-making

Audience: Graduate

6. Discuss current landscape in data warehousing, big data, and other emerging topics

Audience: Graduate

**GEN BUS 765 – CONTEMPORARY TOPICS**

1-4 credits.

Exploration of advanced subject areas possibly to be introduced into the business curriculum.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2024**GEN BUS/ECON/STAT 775 – BAYESIAN STATISTICS**

3 credits.

Introduces the theory, methods, and computational procedures needed to perform advanced Bayesian data analyses. Predictive and decision-theoretic motivations including subjective probability, risk, admissibility, and exchangeability; highlights key components of Bayesian analysis (i.e., prior, likelihood, posterior, and predictive distributions) within standard parametric models and advanced hierarchical and multilevel models; demonstrates the iterative process of model specification, implementation, criticism, and revision with applied case studies; implements computational techniques (e.g., Markov chain Monte Carlo, variational inference) in modern probabilistic programming languages.

**Requisites:** STAT 609, 610, 611, STAT/MATH 709, ECON 709, POLI SCI 818, or COMP SCI/E C E 761**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Justify the use of probability for coherent uncertainty quantification

Audience: Graduate

2. Explain how Bayesian updating occurs in conjugate models and hierarchical models

Audience: Graduate

3. Compare and contrast the conceptual and practical benefits and challenges of different posterior approximation strategies like MCMC and variational inference

Audience: Graduate

4. Implement posterior approximation algorithms in modern statistical and probabilistic programming languages such as R or Stan

Audience: Graduate

5. Specify, fit, criticize, and revise Bayesian models in practice

Audience: Graduate

**GEN BUS 777 – CONSULTING SKILLS BOOTCAMP**

1 credit.

An introduction to consulting tools and models.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the SCQ framework to a business problem in a case format

Audience: Graduate

2. Develop a presentation using the answer-first principle and storyboarding techniques

Audience: Graduate

3. Prepare and deliver a persuasive presentation

Audience: Graduate

4. Reflect on your own progress and learning during the module and practice sharing constructive feedback

Audience: Graduate

**GEN BUS 780 – CLOUD TECHNOLOGY FOR BUSINESS ANALYTICS**

1 credit.

Provides an overview of cloud services that support business analytics. Load and analyze data, build and deploy machine learning models, and develop data pipelines through hands-on, in-class activities working in cloud environments.

**Requisites:** Graduate/professional standing or member of graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain, at a foundational level, the cloud landscape for business analytics – i.e. vendors, services, and costs.

Audience: Graduate

2. Demonstrate how to load and connect to data in the cloud for a variety of analytics.

Audience: Graduate

3. Setup and manage a cloud data warehouse.

Audience: Graduate

4. Build and deploy machine learning models in the cloud.

Audience: Graduate

5. Develop and test a data pipeline in the cloud.

Audience: Graduate

6. Analyze big data in a cloud environment.

Audience: Graduate

**GEN BUS/ACCT I S/E P D 781 – FINANCIAL AND BUSINESS ACUMEN**

1 credit.

This course is designed with a keen awareness for the needs of the non-financial student or professional. For this class, no previous financial training is required. The intent is to equip you with the essential concepts used to develop financial literacy. Content will cover basic financial terms and reports, analytical tools to help interpret financial data and using financial data in budgets and forecasts.

**Requisites:** Graduate/professional standing. Not open to students declared in an MBA program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply the language and foundational tools of finance to analyze how a company's economic activity is reflected in its financial reports

Audience: Graduate

2. Perform high-level financial statement analysis to identify important information from financial reports

Audience: Graduate

3. Apply basic financial concepts of valuation, capital budgeting, and financial decision making

Audience: Graduate

**GEN BUS/E P D/MARKETNG 782 – MARKETING FOR NON-MARKETING PROFESSIONALS**

1 credit.

An overview of marketing's role within an organization, the key elements of a marketing plan, and how the plan is implemented. Students will learn about buyer demographic, psychographic and purchasing decision behavior. A thorough understanding of the customer enables students to develop a coordinated marketing mix (product, price promotion and place) that will satisfy the customer better than the competition and at the required margin. Students will leave the course understanding the degree to which all company functions must be coordinated and focused on the customer. This course will not apply toward fulfilling the MBA degree requirements.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Explain how the marketing function impacts an organization's business operations

Audience: Graduate

2. Identify and use marketing terminology and concept

Audience: Graduate

3. Use both demographic and psychographic information to segment markets and select a target market

Audience: Graduate

4. Research and create a basic marketing plan that aligns customer expectations with organizational marketing activities and the organization's resources

Audience: Graduate

5. Coordinate consistency between product, price, promotion, and place (distribution)

Audience: Graduate

6. Relate and utilize the product life cycle concept to product and service offerings

Audience: Graduate

**GEN BUS/E P D/M H R 783 – LEADING TEAMS**

1 credit.

Students will gain the knowledge and skills to continuously enhance their own team performance and productivity as well as the teams they are involved with. They will also be in a much better position to lead teams effectively.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe team dynamics, roles, and expectations that influence a STEM team's performance

Audience: Graduate

2. Identify and effectively deploy specific team member strengths relevant for technical projects

Audience: Graduate

3. Plan, lead, and facilitate productive team meetings

Audience: Graduate

4. Identify and manage team conflict more effectively and constructively

Audience: Graduate

5. Assess and improve their current STEM team leadership methods and practices

Audience: Graduate

### **GEN BUS/E P D/OTM 784 – PROJECT MANAGEMENT ESSENTIALS**

1 credit.

Techniques that will help to plan, execute, and deliver projects with desired scope on time and on budget. Learn to document clear project objectives and goals, accurately estimate project time and costs, schedule and allocate time-critical resources, and establish feedback systems for optimal project control.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2023

**Learning Outcomes:** 1. Plan and manage successful engineering projects using appropriate methods, tools, and techniques  
Audience: Graduate

2. Estimate project costs, resources, and schedules  
Audience: Graduate

3. Immediately apply project management principles regarding the five major project stages: initiate, plan, execute, control, and close  
Audience: Graduate

4. Apply or customize the project management framework to engineering organizational needs  
Audience: Graduate

5. Assess and improve the current project management system  
Audience: Graduate

### **GEN BUS/E P D/M H R 785 – EFFECTIVE NEGOTIATION STRATEGIES**

1 credit.

Improves students' negotiating skills, doing so by providing a theoretical underpinning that will help them to understand the sources of effective and ineffective approaches to negotiations.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe game theory and distinguish between distributive and integrative bargaining, recognizing appropriate tactics  
Audience: Graduate

2. Identify bargaining styles, set goals, improve relationships, and leverage interests effectively  
Audience: Graduate

3. Analyze ethical issues in negotiations and create mutual gain through value creation  
Audience: Graduate

4. Demonstrate thorough preparation for negotiations, use individual and team techniques, and evaluate post-negotiation strengths and areas for improvement  
Audience: Graduate

**GEN BUS 790 – CONSULTING PROJECT CAPSTONE**

1-3 credits.

Provides an opportunity to bring together all material learned throughout the program and synthesize it through an applied consulting project. Explore and apply concepts to a future career through: identifying and understanding the business challenge, applying analytic methods to discover insight(s) to answer the business challenge, developing recommendations based on the findings, and communicating those findings and recommendation(s).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and explain the business challenge being examined.

Audience: Graduate

2. Successfully engage in a team and "client" project.

Audience: Graduate

3. Apply analytic methods to discover insights to answer the business challenge.

Audience: Graduate

4. Create recommendations based on the analysis findings.

Audience: Graduate

5. Successfully present those findings and recommendations to an audience of business professionals.

Audience: Graduate

**GEN BUS 791 – EMBA CONSULTING PRACTICUM I**

1 credit.

Provides an opportunity to bring together all of the material learned throughout the program and synthesize it through an applied consulting project. Allows exploration and application of concepts to a future career through identifying and understanding the business challenge and applying research and analysis to discover insight(s).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Articulate the business challenge being examined and establish a work plan for addressing that business challenge.

Audience: Graduate

2. Conduct, compile and synthesize research relevant to the business challenge.

Audience: Graduate

3. Work with a team to complete tasks and reflect on your own progress and learning as part of that team.

Audience: Graduate

**GEN BUS 792 – EMBA CONSULTING PRACTICUM II**

1 credit.

Provides an opportunity to bring together all the material learned throughout the program and synthesize it through an applied consulting project. Allows exploration and application of concepts to a future career through developing recommendations based on the research and findings from the first course and communicating those findings and recommendation(s).

**Requisites:** GEN BUS 791

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Determine recommendations for action that will positively impact the sponsor organization.

Audience: Graduate

2. Practice sharing and receiving feedback to improve outcomes.

Audience: Graduate

3. Present findings and recommendations to the sponsor organization.

Audience: Graduate

4. Work with a team to complete tasks and reflect on your own progress and learning as part of that team.

Audience: Graduate

**GEN BUS 799 – READING AND RESEARCH-BUSINESS RESEARCH**

1-6 credits.

Individual work suited to the needs of graduate students may be arranged both during regular sessions and during the intersession periods.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

### GEN BUS 840 – CURRENT TOPICS IN BUSINESS ANALYTICS AND ARTIFICIAL INTELLIGENCE

1 credit.

Covers emerging and current topics in the industry through applied learning experiences – case studies, industry meetings, and exercises or workshops.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explore how organizations utilize analytics and artificial intelligence through interactions with industry professionals  
Audience: Graduate

2. Articulate insights from interactions with industry professionals  
Audience: Graduate

3. Articulate business recommendations based on in-class activities and analysis  
Audience: Graduate

4. Demonstrate professional written and verbal communication skills  
Audience: Graduate

5. Articulate current career aspirations  
Audience: Graduate

### GEN BUS 881 – BUSINESS STATISTICS USING PYTHON

2 credits.

A compact primer in statistics as a foundation for data-driven business analysis. A selection of concepts include probability, estimation, inference, correlation, and regression.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Calculate descriptive statistics and generate basic visualizations using Python.  
Audience: Graduate

2. Explain and apply principles and rules of probability.  
Audience: Graduate

3. Utilize inferential statistics and communicate the uncertainty in statistical estimates.  
Audience: Graduate

4. Perform regression analysis, and distinguish between correlation and causation.  
Audience: Graduate

### GEN BUS 882 – SQL FUNDAMENTALS

2 credits.

Construct a wide variety of SQL statements; such as joins, common table expressions, window functions, etc. Basics of query optimization and data modeling.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Construct a variety of SQL statements.  
Audience: Graduate

2. Query and prepare data in response to business questions.  
Audience: Graduate

3. Design a database to meet a business need and technical requirements.  
Audience: Graduate

### GEN BUS 883 – DATA VISUALIZATION & CLOUD TECHNOLOGIES

2 credits.

Provides experience in data visualization and cloud technologies to support business analytics. Create and share compelling data visualizations to enhance decision making. Use cloud technologies to build scalable data warehouses, analyze big data, and develop and deploy machine learning models.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program. Not open to students with credit for GEN BUS 720 or 780.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Create compelling data visualizations and dashboards.  
Audience: Graduate

2. Explain the cloud landscape for business analytics – i.e. vendors, services, and costs.  
Audience: Graduate

3. Setup and manage a cloud data warehouse.  
Audience: Graduate

4. Build and deploy a machine learning model in the cloud.  
Audience: Graduate

5. Analyze big data in a cloud environment.  
Audience: Graduate

**GEN BUS 884 – APPLIED ANALYTICS - CASE STUDIES**

2 credits.

Project-based applications of statistics, programming, data visualization, and database management.

**Requisites:** GEN BUS 881, 882, and 883

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop and communicate analytics solutions to business challenges and opportunities.

Audience: Graduate

2. Build a predictive model using the Python programming language.

Audience: Graduate

3. Create an executive dashboard to support business decision making.

Audience: Graduate

4. Use SQL to query a database in response to business questions.

Audience: Graduate

**GEN BUS 885 – PYTHON FUNDAMENTALS**

2 credits.

Explore the fundamentals of the Python programming language - such as data structures, functions, loops, and control flow - and utilize Python for data wrangling and analysis.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate the fundamentals of the Python programming language.

Audience: Graduate

2. Apply programming best practices; such as readability, simplicity, and reusability.

Audience: Graduate

3. Utilize Python for data manipulation and analysis

Audience: Graduate

**GEN BUS 891 – TEXT MINING AND GENERATION FOR BUSINESS ANALYTICS**

2 credits.

An introduction to text mining and generation for business applications.

Includes an overview of text data and approaches for making text data useful for descriptive and predictive analytics. Also, includes key applications of natural language processing, such as chatbots and recommender systems.

**Requisites:** GEN BUS 657 (or GEN BUS 888 prior to Fall 2025) and GEN BUS 883

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Retrieve, assemble, and clean text data for use in analytics applications.

Audience: Graduate

2. Use text representation approaches, including bag of words, for visualizing text data.

Audience: Graduate

3. Build classification and regression models using features created from text data.

Audience: Graduate

4. Explain and experiment with text generation using artificial intelligence (AI).

Audience: Graduate

### **GEN BUS 893 – ANALYTICS CONSULTING PROJECT MANAGEMENT**

2 credits.

Lays the foundation for understanding how to engage with external and internal clients and manage a business analytics consulting project. Covers consulting tools and models, as well as traditional and agile project management tools and concepts.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply a Situation-Complication-Question (SCQ) framework to a business problem

Audience: Graduate

2. Use answer-first principles and storyboarding techniques

Audience: Graduate

3. Scope a project and understand customer needs

Audience: Graduate

4. Manage time and resources in a project

Audience: Graduate

5. Differentiate between traditional and agile project management approaches

Audience: Graduate

### **GEN BUS 894 – PITFALLS, ETHICS, COMMUNICATION, AND LEADERSHIP IN BUSINESS ANALYTICS**

2 credits.

Focus on applications, highlighting key practical issues in analytics projects. Discussion of pitfalls with regards to analytics applications, ethical aspects of analytics applications, as well as talent management and leadership in the context of analytics.

**Requisites:** GEN BUS 657 (or GEN BUS 888 prior to Fall 2025) and GEN BUS 883

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize potential warning signs of predictive models failing or overpromising.

Audience: Graduate

2. Engage with ethical issues concerning analytics applications regarding autonomy, beneficence, and fairness.

Audience: Graduate

3. Audit algorithms/predictions for potential biases.

Audience: Graduate

4. Make strategic choices among analytics projects, including effective management of human resources.

Audience: Graduate

### **GEN BUS 895 – MASTERS CAPSTONE IN BUSINESS ANALYTICS**

2 credits.

Complete a team project as a capstone to graduate studies in business analytics. Use analytics and project management to develop a solution to a provided business case.

**Requisites:** GEN BUS 884 and 893

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop and communicate an analytics solution to a business challenge or opportunity.

Audience: Graduate

2. Apply principles of project management to a business analytics project.

Audience: Graduate

3. Reflect on a team-based analytics project and identify lessons learned.

Audience: Graduate

**GEN BUS 933 – BEGINNING A RESEARCH CAREER IN BUSINESS**

1 credit.

Required of incoming students in the Wisconsin School of Business PhD program. Students are often overwhelmed and do not absorb material when offered all at once before they begin their regular courses. This format offers fundamental content about conducting research and academic life that is not specific to a given department in the business school, but will help to frame and motivate other studies. This format gives students more time to absorb the content at a point when they can better see how it applies to them.

**Requisites:** Declared in Business PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize what is required to be a successful academic including tenure process, networking, preparation for the job market.

Audience: Graduate

2. Recognize how to chart a path through PhD program requirements.

Audience: Graduate

3. Describe the basics of how research is conducted including generating ideas, framing a contribution, responding to reviewer.

Audience: Graduate

4. Access critical research resources including time, data, and critical feedback.

Audience: Graduate

5. Demonstrate motivation to conduct publishable and impactful research.

Audience: Graduate

6. Develop social ties within and beyond the school to serve as a career springboard.

Audience: Graduate

**GEN BUS 999 – READING AND RESEARCH-BUSINESS RESEARCH PHD**

1-6 credits.

Individual work suited to the needs of Ph.D. students may be arranged.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2001

**GENETIC COUNSELOR STUDIES (GENECSLR)****GENECSLR 713 – INTRODUCTORY PRACTICUM IN GENETIC COUNSELING**

3 credits.

Provides opportunities to develop skills in interviewing, data collection, case management and counseling through didactic work and observational and experiential clinical activities. Activities include clinic observation according to a structured format, and fieldwork participation.

**Requisites:** Declared in Master of Genetic Counselor Studies

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles.

Audience: Graduate

2. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.

Audience: Graduate

3. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.

Audience: Graduate

4. Identify, assess, order, facilitate, and integrate genetic/genomic testing options in genetic counseling practice (including molecular and non-molecular testing that directly impacts assessment of inherited risk).

Audience: Graduate

5. Assess individuals' and their relatives' probability of conditions with a genetic component or carrier status based on their pedigree, test result(s), and other pertinent information.

Audience: Graduate

6. Demonstrate the skills necessary to successfully manage a genetic counseling case.

Audience: Graduate

7. Critically assess genetic/genomic, medical and social science literature and information.

Audience: Graduate

8. Establish a mutually agreed upon genetic counseling agenda with the client.

Audience: Graduate

9. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.

Audience: Graduate

10. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.

Audience: Graduate

11. Promote client-centered, informed, non-coercive and value-based decision-making

Audience: Graduate

12. Demonstrate how to adapt genetic counseling skills for varied service

### GENECSLR 714 – INTRODUCTORY PRACTICUM IN GENETIC COUNSELING

3 credits.

Provides additional opportunities to develop and improve skills in interviewing, data collection, case management and counseling. Develop skills through didactic work and observational and experiential clinical activities. Activities include clinic observation according to a structured format, and fieldwork participation.

**Requisites:** GENECSLR 713

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles.

Audience: Graduate

2. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.

Audience: Graduate

3. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.

Audience: Graduate

4. Identify, assess, order, facilitate, and integrate genetic/genomic testing options in genetic counseling practice (including molecular and non-molecular testing that directly impacts assessment of inherited risk).

Audience: Graduate

5. Assess individuals' and their relatives' probability of conditions with a genetic component or carrier status based on their pedigree, test result(s), and other pertinent information.

Audience: Graduate

6. Demonstrate the skills necessary to successfully manage a genetic counseling case.

Audience: Graduate

7. Critically assess genetic/genomic, medical and social science literature and information.

Audience: Graduate

8. Establish a mutually agreed upon genetic counseling agenda with the client.

Audience: Graduate

9. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.

Audience: Graduate

10. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.

Audience: Graduate

11. Promote client-centered, informed, noncoercive and value-based decision-making.

Audience: Graduate

12. Demonstrate understanding of how to adapt genetic counseling skills for varied service delivery models.

Audience: Graduate

13. Apply genetic counseling skills in a culturally responsive and respectful

### GENECSLR 721 – INTRODUCTION TO CLINICAL GENETICS

2 credits.

Integrative introduction to the mechanisms of clinical genetic disease at the molecular, individual and population level.

**Requisites:** Declared in Master of Genetic Counselor Studies

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain mechanisms of genetic disease and how they result in genetic disorders using clinical examples.

Audience: Graduate

2. Assess available genetic testing and screening technologies; identify the most appropriate method to detect various etiologies of genetic disease.

Audience: Graduate

3. Calculate and assess risk for a patient, family members and population.

Audience: Graduate

4. Identify the benefits and limitations of a molecular diagnosis and result.

Audience: Graduate

5. Relate the mechanisms of gene therapies and/or treatments to the mechanisms of the genetic disorder(s) it addresses.

Audience: Graduate

6. Apply and adapt course information for use in a clinical setting, appreciating the familial and psychosocial implications of genetic disorders.

Audience: Graduate

**GENECSLR 724 – CANCER GENETICS RISK ASSESSMENT AND COUNSELING**

2 credits.

Provides a background in cancer genetics from a medical, biological, and clinical perspective. Includes: general principles and topics in oncology; familial cancers and cancer syndromes; and management, counseling, social, ethical, and legal issues.

**Requisites:** GENECSLR 721

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize family histories suggestive of sporadic, multifactorial, and hereditary cancer

Audience: Graduate

2. Demonstrate knowledge of all major inherited cancer susceptibility syndromes and genes, both moderate risk and high risk

Audience: Graduate

3. Demonstrate the ability to assess cancer risk based on personal and family history

Audience: Graduate

4. Identify individuals and families meeting guidelines for cancer susceptibility gene testing

Audience: Graduate

5. Interpret cancer genetic test results in the context of a patient's personal and/or family history

Audience: Graduate

**GENECSLR 731 – ADVANCED CLINICAL GENETICS CONCEPTS**

3 credits.

An advanced course covering clinical genetic concepts including phenotype, genetic mechanisms, approach to diagnosis (medical, clinical and genetic testing protocols), and natural history (including management approaches).

**Requisites:** GENECSLR 721

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss/explain the history and basic principles of clinical genetics including evolution of clinical genetics and history of eugenics, comparison of normal and abnormal patterns of growth, and patterns and mechanism of inheritance (Mendelian and non-Mendelian)

Audience: Graduate

2. Describe the phenotype, genetic mechanisms, approach to diagnosis (medical, clinical and genetic testing protocols), and natural history (including management approaches) for genetic disorders.

Audience: Graduate

3. Teach clinical genetic concepts to peers including, writing learning objectives and assessment questions.

Audience: Graduate

### GENECSLR 737 – CONTEMPORARY PROFESSIONAL ISSUES IN GENETICS COUNSELING

1 credit.

A series of selected basic issues and topics that are core curricular requirements specific to genetics counseling.

**Requisites:** Declared in Master of Genetic Counselor Studies

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 4 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles

Audience: Graduate

2. Integrate knowledge of psychological aspects of conditions with a genetic component to promote client well-being

Audience: Graduate

3. Critically assess genetic/genomic, medical and social science literature and information

Audience: Graduate

4. Promote client-centered, informed, non-coercive and value-based decision-making

Audience: Graduate

5. Adapt genetic counseling skills for varied service delivery models

Audience: Graduate

6. Apply genetic counseling skills in a culturally responsive and respectful manner to all clients

Audience: Graduate

7. Effectively give a presentation on genetics, genomics and genetic counseling issues.

Audience: Graduate

8. Act in accordance with the ethical, legal and philosophical principles and values of the genetic counseling profession and the policies of one's institution or organization

Audience: Graduate

9. Demonstrate understanding of the research process

Audience: Graduate

10. Advocate for individuals, families, communities and the genetic counseling profession

Audience: Graduate

11. Demonstrate a self-reflective, evidence-based and current approach to genetic counseling practice.

Audience: Graduate

### GENECSLR 739 – RESEARCH STRATEGIES AND ANALYSIS IN CLINICAL GENETICS

1 credit.

Introduction to a variety of tools and resources commonly used in clinical genetics. Learn to critique these resources and start thinking about developing their own research projects. Emphasizes developing oral presentation skills through a variety of student presentations.

**Requisites:** Declared in Master of Genetic Counselor Studies

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and critique a variety of sources of information applicable to clinical genetics/genetic counseling.

Audience: Graduate

2. Demonstrate understanding of the research process.

Audience: Graduate

3. Develop oral communication skills allowing for communication of complex information to a variety of audiences.

Audience: Graduate

4. Apply content in a meaningful way to you and your practice as a genetic counselor.

Audience: Graduate

5. Develop a foundation and skills for lifelong learning.

Audience: Graduate

**GENECSLR 740 – LABORATORY GENETICS AND GENOMICS FOR THE GENETIC COUNSELOR**

2 credits.

Introduction to clinical laboratory genetics with a particular focus on the relevance of human cytogenetics and molecular genetics to the practice of medical genetics. Covers the fundamental principles of human cytogenetic and molecular genetics including human chromosome structure, function, cytogenetic and molecular nomenclature, and current clinical laboratory testing methods relevant to medical genetic professionals. Apply cytogenetic and molecular genetic understanding to clinical scenarios to help diagnosis and manage individuals with genetic disease.

**Requisites:** GENECSLR 721**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Distinguish between different types of genomic variants, both molecular and cytogenetic.

Audience: Graduate

2. Compare and contrast currently available genomic testing methods and their ability to detect genetic variation.

Audience: Graduate

3. Illustrate how different genomic variants can lead to human disease.

Audience: Graduate

4. Construct appropriate testing strategies for a variety of clinical scenarios.

Audience: Graduate

5. Analyze genetic test results and interpret their clinical significance.

Audience: Graduate

**GENECSLR 741 – INTRODUCTION TO GENETIC COUNSELING**

1 credit.

Emphasis will be on the tasks necessary to complete a genetic counseling session including, contracting/goal setting, history gathering, education, psychosocial assessment and support, clinical documentation and session management.

**Requisites:** Declared in Master of Genetic Counselor Studies**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.

Audience: Graduate

2. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.

Audience: Graduate

3. Demonstrate the skills necessary to successfully manage a genetic counseling case.

Audience: Graduate

4. Establish a mutually agreed upon genetic counseling agenda with the client.

Audience: Graduate

5. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.

Audience: Graduate

6. Apply genetic counseling skills in a culturally responsive and respectful manner to all clients.

Audience: Graduate

7. Educate clients about a wide range of genetics and genomics information based on their needs, their characteristics, and the circumstances of the encounter.

Audience: Graduate

8. Write concise and understandable clinical and scientific information for audiences of varying educational backgrounds.

Audience: Graduate

9. Demonstrate a self-reflective, evidenced-based, and current approach to genetic counseling practice.

Audience: Graduate

**GENECSLR 742 – CLINICAL EMBRYOLOGY AND PRENATAL GENETICS**

1 credit.

Review human development (normal and abnormal) and the influence of genetic disorders and teratogens, common indications for prenatal genetic counseling as well as available prenatal diagnosis and screening techniques. Prepares the genetic counseling student for the prenatal clinical practicum.

**Requisites:** GENECSLR 721

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe normal human embryological and fetal development.

Audience: Graduate

2. Describe the relationship between genetic disease and teratogens with abnormal embryologic and fetal development.

Audience: Graduate

3. Compare benefits and risks of available testing and screening strategies used to assess for birth defects and genetic disease.

Audience: Graduate

4. Discuss factors that influence patients' perception about information related to their child/baby/pregnancy presented during prenatal genetic counseling.

Audience: Graduate

5. Identify appropriate patient-centered prenatal resources about genetic diseases, birth defects and teratogens.

Audience: Graduate

**GENECSLR 743 – ADVANCED INTERVIEWING AND COUNSELING FOR THE GC I**

1 credit.

Advanced topics in clinical communication skills for the genetic counselor. Emphasis on different counseling strategies and approaches including counselor self-reference, facilitating family communication, shared decision-making, crisis counseling and, applying techniques from select counseling models to GC practice (e.g., cognitive behavioral therapy, solution-focused therapy).

**Requisites:** GENECSLR 741

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.

Audience: Graduate

2. Promote client-centered, informed, non-coercive and value-based decision-making.

Audience: Graduate

3. Adapt genetic counseling skills for varied service delivery models.

Audience: Graduate

4. Apply genetic counseling skills in a culturally responsive and respectful manner

Audience: Graduate

5. Effectively give a presentation on genetic counseling issues.

Audience: Graduate

**GENECSLR 744 – APPLICATIONS OF BIOCHEMICAL GENETICS FOR GENETIC COUNSELORS**

2 credits.

Comprehensive overview of clinical biochemical genetics through a systematic review of classic and rare inborn errors of metabolism (IEM). Psychosocial issues are discussed as related to care of patients, and their families, with metabolic disorders.

**Requisites:** Declared in Master of Genetic Counselor Studies

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop a framework for understanding the natural history, disease mechanism, inheritance, testing sequence and therapies for specific biochemical genetic diseases.

Audience: Graduate

2. Explain newborn screening, including the historical perspective, testing methodologies used and ethical considerations.

Audience: Graduate

3. Describe the role of the genetic counselor as part of a multidisciplinary Biochemical Genetics Clinic

Audience: Graduate

**GENECSLR 745 – SEMINAR IN MEDICAL GENETIC COUNSELING RESEARCH**

1 credit.

Practice qualitative and quantitative research methods in genetic counseling. Develop research question, prepare research proposal including internal review board application.

**Requisites:** GENECSLR 739

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe qualitative and quantitative research methods used in genetic counseling

Audience: Graduate

2. Explain the ARROW IRB proposal process

Audience: Graduate

3. Identify research questions relevant to the discipline of genetic counseling

Audience: Graduate

**GENECSLR 748 – SPECIAL TOPICS IN GENETIC COUNSELING**

1 credit.

Advanced topics in the discipline of genetic counseling. Emphasis will be on advanced practice topics including setting boundaries, delivering life altering news, developing a socially responsible practice, moving from a novice to master counselor, and the job search.

**Requisites:** GENECSLR 743

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify how the genetic counselor's personal cultural characteristics and biases may impact encounters and use this knowledge to maintain effective client-focused services.

Audience: Graduate

2. Recognize the potential tension between the values of clients, families, communities and the genetic counseling profession.

Audience: Graduate

3. Demonstrate knowledge of psychological defenses, family dynamics, family systems theory, coping models, the grief process, and reactions to illness.

Audience: Graduate

4. Maintain professional boundaries by ensuring directive statements, self-disclosure, and self-involving responses are in the best interest of the client. Recognize and respond to client-counselor relationship dynamics, such as transference and countertransference, which may affect the genetic counseling interaction.

Audience: Graduate

### GENECSLR 813 – ADVANCED PRACTICUM IN GENETICS COUNSELING

4-5 credits.

Advanced practicum experience for second year genetic counseling students, consisting of participatory fieldwork experiences in a diversity of clinic specialties and service delivery methods.

**Requisites:** GENECSLR 714

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles.

Audience: Graduate

2. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.

Audience: Graduate

3. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.

Audience: Graduate

4. Identify, assess, order, facilitate, and integrate genetic/genomic testing options in genetic counseling practice.

Audience: Graduate

5. Assess individuals and their relatives probability of conditions with a genetic component or carrier status based on their pedigree, test result(s), and other pertinent information.

Audience: Graduate

6. Demonstrate the skills necessary to successfully manage a genetic counseling case.

Audience: Graduate

7. Critically assess genetic/genomic, medical and social science literature and information.

Audience: Graduate

8. Establish a mutually agreed upon genetic counseling agenda with the client.

Audience: Graduate

9. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.

Audience: Graduate

10. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.

Audience: Graduate

11. Promote client-centered, informed, non-coercive and value-based decision-making.

Audience: Graduate

12. Adapt genetic counseling skills for varied service delivery models.

Audience: Graduate

13. Apply genetic counseling skills in a culturally responsive and respectful manner to all clients.

Audience: Graduate

14. Effectively educate clients about a wide range of genetics and

### GENECSLR 814 – ADVANCED PRACTICUM IN GENETICS COUNSELING

4-5 credits.

Advanced practicum experience consisting of participatory fieldwork experiences in a diversity of clinic specialties and service delivery methods.

**Requisites:** GENECSLR 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles.

Audience: Graduate

2. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.

Audience: Graduate

3. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.

Audience: Graduate

4. Identify, assess, order, facilitate, and integrate genetic/genomic testing options in genetic counseling practice (including molecular and non-molecular testing that directly impacts assessment of inherited risk).

Audience: Graduate

5. Assess individuals' and their relatives' probability of conditions with a genetic component or carrier status based on their pedigree, test result(s), and other pertinent information.

Audience: Graduate

6. Demonstrate the skills necessary to successfully manage a genetic counseling case.

Audience: Graduate

7. Critically assess genetic/genomic, medical and social science literature and information.

Audience: Graduate

8. Establish a mutually agreed upon genetic counseling agenda with the client.

Audience: Graduate

9. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.

Audience: Graduate

10. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.

Audience: Graduate

11. Promote client-centered, informed, noncoercive and value-based decision-making.

Audience: Graduate

12. Demonstrate how to adapt genetic counseling skills for varied service delivery models.

Audience: Graduate

13. Apply genetic counseling skills in a culturally responsive and respectful manner to all clients.

Audience: Graduate

**GENECSLR 990 – RESEARCH IN GENETIC COUNSELING**

1-8 credits.

Research and/or scholarly work (e.g. quality improvement, clinical case reports) supervised by faculty and/or staff member with appropriate content expertise and/or experience in research mentorship.

**Requisites:** GENECSLR 739 and 745

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct research projects using a variety of approaches under the guidance of the primary mentor

Audience: Graduate

2. Think critically and independently to address research challenges

Audience: Graduate

3. Exhibit and foster professional and ethical conduct in research

Audience: Graduate

4. Collaborate with other investigators

Audience: Graduate

**GENETICS (GENETICS)****GENETICS 133 – GENETICS IN THE NEWS**

3 credits.

The science of genetics is at the heart of many issues facing our society, and as such, genetics is often in the news. Explores the underlying genetics and methodologies to gain a deeper understanding of the science behind the headlines so that we can make more informed decisions as citizens, and you can be part of a movement to help educate those around you.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the methodologies used in genetics to gain a deeper understanding of the science behind the headlines

Audience: Undergraduate

2. Apply foundational scientific knowledge to be informed, versed and up-to-date on current genetic topics

Audience: Undergraduate

3. Critically evaluate genetics in the news for credibility, validity, and merit

Audience: Undergraduate

4. Discuss how genetics is relevant to our everyday lives

Audience: Undergraduate

5. Discuss ethical concerns related to genetics and the applications of biotechnology

Audience: Undergraduate

6. Describe how genes influence inherited traits and how genetic variation leads to specific diseases

Audience: Undergraduate

**GENETICS 155 – FRESHMAN SEMINAR IN GENETICS**

1 credit.

Introduction to the discipline of genetics, to the UW Laboratory of Genetics, to some of the research projects the faculty are pursuing, to resources available at UW-Madison, and to the career options open to an individual with a genetics undergraduate degree.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Discuss the broader role genetics plays in shaping societal issues and future career paths.

Audience: Undergraduate

2. Demonstrate team-work, interpersonal and problem-solving skills to address societal, ethical and scientific issues related to genetics, and communicate their findings through written, oral and multi-media reports.

Audience: Undergraduate

3. Discover academic, campus and community resources that assist in their transition to the university and increase their chance of success as an undergraduate.

Audience: Undergraduate

4. Engage in meaningful genetics-related dialogue that addresses inclusivity, diversity and identity in science.

Audience: Undergraduate

5. Understand how experiential and classroom learning can help them integrate, synthesize and apply knowledge that explores big questions and big ideas in genetics.

Audience: Undergraduate

**GENETICS 234 – GENOMES AND SOCIETY**

3 credits.

The sequencing of genomes has transformed our understanding of the evolution of species and human history, our approaches to improve health and medicine, as well as how we tackle global environmental challenges. Explore the many ways in which the sequencing of genomes is revolutionizing our world, and dive into DNA from viral to human genomes. Understand how genomes are expressed, the impact on phenotype, as well as how it can change over time and in different conditions, are processes that are essential for life and the evolution of species.

**Requisites:** GENETICS 133**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe ways in which the sequencing of diverse genomes including viral, bacterial, fungal, plant and animal species has impacted our understanding of the origins of life and evolution of species

Audience: Undergraduate

2. Describe how gene expression can change, and why this is essential for life

Audience: Undergraduate

3. Discuss the applications of genomic sequencing on the development of biotechnological advances and their impacts on society

Audience: Undergraduate

4. Discuss ethical concerns related to genetics and the applications of biotechnology

Audience: Undergraduate

5. Apply foundational scientific knowledge to be informed, versed and up to date on current genetic topics

Audience: Undergraduate

6. Engage in meaningful genetics-related dialogue about the global nature of genetics and genomics at the ethical, societal, legal, and scientific levels

Audience: Undergraduate

**GENETICS 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area encompassing Genetics. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor**Course Designation:** Honors – Honors Only Courses (H)**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2010

**GENETICS 299 – INDEPENDENT STUDY**

1-3 credits.

Research work for students under direct guidance of a faculty member in an area encompassing Genetics. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GENETICS 335 – GENOMES IN A MODERN WORLD**

3 credits.

The ability to sequence genomes rapidly has transformed our understanding of the evolution of species and human history, our approaches to improve health and medicine, as well as how we tackle global environmental challenges, and increasingly impacts our modern world. Explore the interdisciplinary connections between genetics- and genomics-based research and important current questions related to ethics, history, and public policy.

**Requisites:** GENETICS 234

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Apply basic knowledge of current genetics and genomics-based research to address important questions related to ethics, history, social science, and/or public policy

Audience: Undergraduate

2. Communicate an interdisciplinary perspective on a topic related to genomes and society effectively to multiple audiences

Audience: Undergraduate

3. Critically evaluate primary literature to identify and explore societal connections to the sequencing of genomes.

Audience: Undergraduate

4. Identify and use credible information resources to aid in the development of an interdisciplinary project

Audience: Undergraduate

5. Collaborate effectively in teams to address problems related to genetics and genomics

Audience: Undergraduate

**GENETICS 375 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest to undergraduate students.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GENETICS 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Genetics and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Workplace – Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**GENETICS 400 – STUDY ABROAD IN GENETICS**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**GENETICS 466 – PRINCIPLES OF GENETICS**

3 credits.

Genetics in eukaryotes and prokaryotes. Includes transmission genetics, molecular genetics, evolutionary genetics, genetic engineering, and societal issues associated with genetics. Illustrative material includes bacteria, plants, insects, and vertebrates.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151 or BIOCORE 381 or BOTANY/BIOLOGY 130 or ZOOLOGY/BIOLOGY 101 and 102) and (CHEM 104 or CHEM 109 or CHEM 115). Not eligible to enroll if credit earned for GENETICS 467 or 468

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recall basic genetics terminology

Audience: Undergraduate

2. Understand central concepts in genetics

Audience: Undergraduate

3. Use concepts to solve qualitative and quantitative problems

Audience: Undergraduate

4. Interpret data from experiments

Audience: Undergraduate

5. Apply knowledge of experimental genetics to research problems

Audience: Undergraduate

**GENETICS 467 – GENERAL GENETICS 1**

3 credits.

Genetics of eukaryotes and prokaryotes. Includes transmission genetics, probability and hypothesis testing, genetic mapping, molecular genetics, gene expression, and genetic engineering. Illustrative material includes viruses, bacteria, plants, fungi, insects, and humans.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102, or ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or BOTANY/BIOLOGY 130) and (CHEM 104, 109, or 115). Not open to students with credit for GENETICS 466.

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Employ Mendel's laws of inheritance and rules of probability to predict the outcome of genetic crosses

Audience: Undergraduate

2. Demonstrate how genes are mapped along chromosomes based on an understanding of meiosis and recombination

Audience: Undergraduate

3. Describe the power and limitations of genetic explanations for trait variation

Audience: Undergraduate

4. Highlight milestones in the history of genetics

Audience: Undergraduate

5. Recall core principles that govern the structure and function of DNA, RNA, and protein

Audience: Undergraduate

6. Explain how molecules and molecular processes carry out accurate information flow from DNA to RNA to protein in bacteria and eukaryotes

Audience: Undergraduate

7. Describe mechanisms that control expression of selected genes in cells

Audience: Undergraduate

8. Solve problems by applying techniques for quantifying the expression, interaction, and cellular localization of DNA, RNAs, and proteins

Audience: Undergraduate

**GENETICS 468 – GENERAL GENETICS 2**

3 credits.

Genetic analysis, population genetics, evolution and quantitative genetics. Includes mutant screens, pathway analysis, mosaic analysis, reverse genetics, genomics, Hardy-Weinberg linkage equilibrium, inbreeding, genetic drift, natural selection, population structure, inheritance of complex traits, domestication and human evolution.

**Requisites:** GENETICS 467

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the molecular mechanisms that contribute to expression regulation in bacteria and eukaryotes.

Audience: Undergraduate

2. Apply the tools of forward genetics, reverse genetics and mosaic analysis to investigate the regulatory networks that control growth, development and responses to the environment.

Audience: Undergraduate

3. Explain the genetic and molecular basis of immunity.

Audience: Undergraduate

4. Discuss the molecular mechanisms that contribute to somatic mutations and the progression to cancer.

Audience: Undergraduate

5. Calculate genetic parameters in populations using the tools of population genetics.

Audience: Undergraduate

6. Analyze the inheritance of complex traits using quantitative genetic analyses.

Audience: Undergraduate

7. Apply the methods of evolutionary genetics to predict how genes and genomes evolve in the long-term.

Audience: Undergraduate

**GENETICS 470 – BASIC CYTOLOGY AND LABORATORY PROCEDURES**

1 credit.

A comprehensive review of cellular biology, the study of optical methods with emphasis on the light microscope and the various techniques used in preparation and staining of specimens for cytologic and histologic study.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Relate cell and tissue structures to their functions in the context of human health and disease

Audience: Undergraduate

2. Explain how the morphologic findings of injury or inflammation relate to its causes and consequences

Audience: Undergraduate

3. Illustrate how cell cycle regulation and growth factor signaling contribute to inflammation, wound healing, injury, neoplasia, and cancer therapy

Audience: Undergraduate

4. Apply principles of fixation and staining to best practices in the laboratory

Audience: Undergraduate

5. Recommend appropriate ancillary studies based on specimen type, fixation, and other pre-analytic factors

Audience: Undergraduate

**GENETICS 471 – ADVANCED LABORATORY PROCEDURES**

1 credit.

Preparation of non-gynecologic cytologic specimens using several different instrument methodologies. Application of universal precautions and safety in the handling of unknown biologic hazards. Introduction to histologic preparatory techniques and special staining methods.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Demonstrate competence in cytopreparatory techniques.

Audience: Undergraduate

2. Recognize and correct pre-analytical, analytical, and post-analytical errors.

Audience: Undergraduate

3. Recommend best practices for specimen collection, transport, and processing for the relevant ancillary studies performed on cytology specimens.

Audience: Undergraduate

**GENETICS 520 – NEUROGENETICS**

3 credits.

The genetic basis of nervous system development, structure, function, and dysfunction. Will emphasize both current research findings on the genetic basis of specific neurological disorders, as well as genetic methodologies and experimental approaches used in neurobiological research.

**Requisites:** GENETICS 466, 467, BIOCORE 587, ZOOLOGY/PSYCH 523, or PSYCH 454

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and summarize key concepts that underlie the genetic basis of nervous system development and function.

Audience: Undergraduate

2. Explain specific examples of how genetic variation/mutation can alter cellular and molecular pathways to impact nervous system development and function, behavior, as well as cause neurological disorders and diseases.

Audience: Undergraduate

3. Analyze and interpret primary data, discuss how this data supports current neurogenetic hypotheses, and formulate research questions that build on this data and address remaining uncertainties.

Audience: Undergraduate

4. Summarize experimental genetic and genomic techniques employed in neurogenetic research that utilize various model organisms, as well as humans.

Audience: Undergraduate

## GENETICS/BIOLOGY 522 – COMMUNICATING EVOLUTIONARY BIOLOGY

2-3 credits.

Exposure to diverse topics in contemporary evolutionary biology and development of critical thinking and communication skills. Most weeks guest lecturers present their own primary research on a specialized topic in evolutionary biology. Seminars include perspectives from genetics, ecology, geoscience, zoology, botany, microbiology, systematics, molecular biology, and integrative research. Some weeks feature special topics and discussions on pedagogical, legal, outreach, or other issues in evolutionary biology. Includes thinking critically about methodology, experimental design and interpretation, and how conclusions are reached in evolutionary biology by reading primary and secondary literature, attending seminars, discussing topics with speakers and other students, and preparing a written report. The 3-credit version of the course delves deeper into communication of evolutionary biology to researchers, undergraduates, K-12 students, and the general public.

**Requisites:** GENETICS 466, 468, ZOOLOGY/ANTHRO/BOTANY 410, or BIOCORE 381, or concurrent enrollment

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the ability to critically read and comprehend primary scientific literature from diverse areas of evolutionary biology.

Audience: Undergraduate

2. Comprehend and critically evaluate oral research presentations in the field of evolutionary biology.

Audience: Undergraduate

3. Participate effectively in discussions of scientific research in the field of evolutionary biology.

Audience: Undergraduate

4. Write a clear and concise review of a selected topic in evolutionary biology and a critique of a research seminar in that area.

Audience: Undergraduate

5. Synthesize and apply knowledge from other didactic courses and personal experiences in discussions of scientific research.

Audience: Undergraduate

## GENETICS 525 – EPIGENETICS

3 credits.

Introductory course in epigenetics – the layer of chemical information that sits on top of the genome – that switch genes 'on' or 'off'. Will introduce how the epigenome, in collaboration with the genome, controls versatile biological processes and cell fates. Will also cover the latest advances of how humans can control their own epigenetic destiny by lifestyle, diet, and other environmental factors.

**Requisites:** GENETICS 466 or 467

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Recognize and summarize the difference between genetics and epigenetics.

Audience: Both Grad & Undergrad

2. Apply the basic knowledge of epigenetic mechanism and illustrate how their misregulations cause abnormal development and diseases.

Audience: Both Grad & Undergrad

3. Critically review and discuss epigenetic literature.

Audience: Both Grad & Undergrad

4. Design epigenetic experiments and interpret the results of those experiments.

Audience: Both Grad & Undergrad

5. Demonstrate the ability to clearly communicate epigenetic research in both oral and written formats

Audience: Graduate

**GENETICS 527 – DEVELOPMENTAL GENETICS FOR CONSERVATION AND REGENERATION**

3 credits.

Human-induced factors such as changes in land use and global climate are causing rapid worldwide biodiversity loss. Can modern molecular genetics contribute to species preservation? In this course, we will first explore the challenges and potential of molecular genetic methods based on biobanking, gene editing and nuclear transfer for animal biodiversity preservation. Topics covered will include: i) maternal factors and early animal development, ii) interspecies somatic cell nuclear transfer (isSCNT) and oocyte-mediated reprogramming in animal cloning, iii) developmental, phylogenetic and ecological considerations for biobanking, iv) gene editing and synthetic biology as potential tools to recapture biodiversity. Use knowledge in animal population status, developmental genetics and phylogeny to address real-life problems involving the conservation of threatened animal populations.

**Requisites:** GENETICS 466, 467, or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a greater knowledge of global threats to animal populations

Audience: Undergraduate

2. Learn principles of animal development at the egg-to-embryo transition, the use of oocytes for reprogramming, cloning and xenograft production, and the effects of phylogenetic relatedness on these processes

Audience: Undergraduate

3. Learn developmental basis and consequences of inbreeding, breeding in captivity and domestication

Audience: Undergraduate

4. Understand basic concepts in germ cell induction and manipulation

Audience: Undergraduate

5. Learn about assessing and banking genetic diversity towards animal species preservation

Audience: Undergraduate

**GENETICS 528 – BANKING ANIMAL BIODIVERSITY: INTERNATIONAL FIELD STUDY IN COSTA RICA**

1 credit.

Study abroad course that provides an on-site educational experience where we use developmental genetics concepts to guide projects of biobanking and oocyte-mediated cloning, as a potential last-defense resort for the preservation of living species under risk of extinction. It will provide hands-on experience in current research and activities in biodiversity areas, including visits to biodiversity-rich ecosystems, on site seminars and demonstrations, biodiversity preservation activities, as well as exposure to local culture and social needs.

**Requisites:** GENETICS 466, 467, BIOCORE 381, or ZOOLOGY 470

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Exposure to biodiversity-rich areas and their challenges due to fragmentation, climate change and invasive species.

Audience: Undergraduate

2. Assessment of scientific methods applicable to biodiversity preservation including ecosystem preservation, restoration, and species reintroduction.

Audience: Undergraduate

3. Team-based assessment of regional animal phylogenetic biodiversity as related to bio-banking approaches.

Audience: Undergraduate

4. Achieve a better understanding of local cultural and socioeconomic needs on their own and in the context of balancing ecosystem preservation activities.

Audience: Undergraduate

**GENETICS 545 – GENETICS LABORATORY**

2 credits.

Gain practical experience in classical and molecular genetic laboratory techniques using plants, animals, and fungi. Topics include complementation and linkage analysis, gene mapping, library screening, yeast and bacterial transformation, restriction analysis, PCR, sequencing, and Southern blot analysis.

**Requisites:** GENETICS 466 or 467

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand central concepts in genetics.

Audience: Undergraduate

2. Use concepts to solve problems.

Audience: Undergraduate

3. Interpret data from experiments.

Audience: Undergraduate

4. Apply genetics knowledge to problems.

Audience: Undergraduate

5. Communicate effectively both written and orally.

Audience: Undergraduate

**GENETICS 548 – THE GENOMIC REVOLUTION**

3 credits.

Profound advances are now possible thanks to genomic data and analysis. Introduces the structure, function, and evolution of genomes. It also outlines the realized and prospective benefits of genomic technology for human health, agriculture, and conservation.

**Requisites:** GENETICS 466, 468, or BIOCORE 587

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Use scientific literature to learn about new developments in genomic research.

Audience: Undergraduate

2. Examine methods for generating and analyzing genomic data.

Audience: Undergraduate

3. Investigate basic and applied questions being addressed by genomic research.

Audience: Undergraduate

4. Describe the organization, function, and evolution of genomes.

Audience: Undergraduate

5. Appraise the impact of genomic science on health, agriculture, and conservation.

Audience: Undergraduate

**GENETICS 564 – GENOMICS AND PROTEOMICS**

3 credits.

The basic principles of genomics, proteomics and bioinformatics will be taught through a semester-long project of the students choosing. Creative problem solving in science skills will be learned through a variety of active-learning techniques that include: reading of primary literature, group presentations, peer review, bioinformatic lab exercises, science communication skills (writing visualization), and creating a website. Emphasis will be placed upon how to effectively communicate science (written, oral and written). Topics include: genomic sequencing, phylogeny, domain analysis, transcriptomics, CRISPR screens, chemical genomics, quantitative proteomics and protein networks. Capstone course.

**Requisites:** GENETICS 466, 468, or BIOCORE 587. Not open to graduate students

**Course Designation:** Gen Ed – Communication Part B

Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain confidence in modern genomic and proteomic experimental methods used to ask fundamental biological questions and how to become creative problem solvers.

Audience: Undergraduate

2. Learn how to mine bioinformatic databases to obtain information about a gene/protein associated with a human disease assembled on a website built by the student.

Audience: Undergraduate

3. Learn how to apply what you learned, by writing and visualizing three specific aims of a grant with goals to address the gap in knowledge about the disease and gene of your choosing.

Audience: Undergraduate

4. Effectively communicate scientific research by applying unique visual, verbal, and oral techniques facilitated by the instructor called "Slide Evolution".

Audience: Undergraduate

5. To learn how working in diverse teams (social and intellectual) makes you a more innovative problem solver.

Audience: Undergraduate

**GENETICS/MD GENET 565 – HUMAN GENETICS**

3 credits.

Principles, problems, and methods of modern human genetics. Focuses on how researchers discover the genetics of diseases and how those discoveries are used to improve clinical practice. Surveys aspects of (i) the molecular function of the human genome, (ii) the basic principles of human genetics including statistical genetics, quantitative genetics, and genomic variation in human populations, (iii) the genetics of rare disorders and common diseases, and genomic analysis approaches, including genome-wide association studies and sequencing, and (iv) how genetics are used in medicine and discussions covering ethical considerations of human genomic data.

**Requisites:** GENETICS 466, 468, BIOCORE 587, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Predict and describe how different classes of genetic variants, as defined by (a) mutation mechanism, (b) variant size, (c) population frequency, and (d) location in the genome, could affect molecular and cellular functions and risk for disease

Audience: Both Grad & Undergrad

2. Design experimental approaches to investigate the mechanisms of human genetic disorders

Audience: Both Grad & Undergrad

3. Explain and give examples of genetic inheritance patterns and the contribution of inherited factors to disease risk

Audience: Both Grad & Undergrad

4. Describe the design, strengths, and weaknesses of the various approaches for identifying genes or loci associated with a human disease or trait (e.g. linkage mapping, genetic association, sequencing), and interpret results from these studies

Audience: Both Grad & Undergrad

5. Explain how genetic information is used in the practice of medicine for diagnosis or to guide treatment and the limitations of current clinical diagnostic or treatment tools

Audience: Both Grad & Undergrad

6. Apply human genetics concepts to critically analyze published scientific studies and to describe experimental approaches that can be performed to address shortcomings and/or extend the findings of published work

Audience: Graduate

**GENETICS 566 – ADVANCED GENETICS**

3 credits.

Principles of classical and modern genetic analysis taught through readings in the scientific literature and group projects. Capstone course.

**Requisites:** Declared in Genetics undergraduate program and GENETICS 466, 468, or BIOCORE 587

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically evaluate primary literature in the field of genetics and genomics.

Audience: Undergraduate

2. Explore and utilize information resources available to aid in the advancement of future professional careers.

Audience: Undergraduate

3. Formulate research questions about the genetic control of biological processes and design experiments to answer these questions using appropriate genetic and genomic tools.

Audience: Undergraduate

4. Demonstrate teamwork, interpersonal and problem-solving skills to address societal, ethical, professional, and scientific issues related to genetics and genomics.

Audience: Undergraduate

5. Communicate scientific findings effectively to multiple audiences.

Audience: Undergraduate

**GENETICS 567 – COMPANION RESEARCH SEMINAR**

1 credit.

Student-led discussions on scientific, societal, and professional topics relevant to Senior research and selected original research presentations.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Interpret primary literature data in genetics and related fields

Audience: Undergraduate

2. Communicate accompanying senior laboratory research

Audience: Undergraduate

3. Develop skills in science communication at multiple levels of detail

Audience: Undergraduate

4. Critically discuss interrelated aspects of science and society

Audience: Undergraduate

5. Explore careers related to genetics and genomics

Audience: Undergraduate

**GENETICS 568 – THE CENTRAL NERVOUS SYSTEM**

1 credit.

Anatomy, physiology, histology and pathology of the central nervous system and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen preparation. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Integrate each patient's history, clinical, and radiologic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

2. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of diseases involving the central nervous system.

Audience: Undergraduate

3. Integrate cytomorphologic and clinical knowledge of the central nervous system into existing knowledge of other organ systems.

Audience: Undergraduate

4. Value the impact of cytologic diagnosis of central nervous system specimens from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 569 – THE BREAST**

1 credit.

Anatomy, histology, physiology and pathology of the breast and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of the didactic information with the microscopic cell patterns to provide a diagnosis.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Integrate each patient's history, clinical, and radiologic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

2. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of diseases involving the breast.

Audience: Undergraduate

3. Integrate cytomorphologic and clinical knowledge of the breast into existing knowledge of other organ systems.

Audience: Undergraduate

4. Value the impact of cytologic diagnosis of breast specimens from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 570 – THE FEMALE REPRODUCTIVE SYSTEM**

8 credits.

Anatomy, histology, physiology, and pathology of the female reproductive tract and the corresponding cellular manifestations which provide diagnostic information. Cellular changes due to therapy and specimen collection. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate a basic knowledge of the anatomy, histology and endocrinology of the female reproductive tract as well as the anus and rectum in both men and women.

Audience: Undergraduate

2. Recognize cellular degenerative, reactive and reparative changes and identify all clinically relevant organisms associated with the female reproductive tract as well as the anus and rectum in both men and women.

Audience: Undergraduate

3. Apply criteria and use the Bethesda reporting system to make the appropriate interpretation of cellular changes seen microscopically.

Audience: Undergraduate

4. Correlate each patient's history and clinical findings with the microscopic findings on their uterine cervical/vaginal specimens and know the proper follow-up recommendation for their diagnosis.

Audience: Undergraduate

5. Recommend appropriate ancillary studies and integrate the results with the cytologic diagnosis.

Audience: Undergraduate

**GENETICS 571 – CLINICAL PRACTICE I**

1 credit.

Clinical practicum to develop diagnostic expertise involving the microscopic examination of routine gynecologic specimens (Pap smears). Observe the signout of abnormal cytologic specimens by cytopathologist staff.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate professional and ethical responsibility as part of a patient-centered healthcare team.

Audience: Undergraduate

2. Demonstrate a basic knowledge of the CLIA 88 regulation on GYN cytology.

Audience: Undergraduate

3. Demonstrate a basic troubleshooting skill encountered during clinical practice.

Audience: Undergraduate

4. Apply criteria and use the Bethesda reporting system to make the appropriate interpretation of cellular changes seen microscopically.

Audience: Undergraduate

5. Correlate each patient's history and clinical findings with the microscopic findings on their uterine cervical/vaginal specimens and know the proper follow-up recommendation for their diagnosis.

Audience: Undergraduate

6. Value the impact of cytologic diagnosis of cervical/vaginal and anorectal specimens from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 572 – THE RESPIRATORY SYSTEM**

3 credits.

Anatomy, histology, physiology and pathology of the respiratory tract and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Integrate each patient's history, clinical, and radiologic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

2. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of diseases involving the respiratory system.

Audience: Undergraduate

3. Integrate cytomorphologic and clinical knowledge of the respiratory system into existing knowledge of other organ systems.

Audience: Undergraduate

4. Value the impact of cytologic diagnosis of respiratory tract specimens from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 573 – THE GENITOURINARY SYSTEM**

2 credits.

Anatomy, physiology, histology and pathology of the urinary tract and male reproductive systems and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of didactic information with microscopic cell patterns to provide a diagnosis.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Integrate each patient's history, clinical, and radiologic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

2. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of diseases involving the genitourinary system.

Audience: Undergraduate

3. Integrate cytomorphologic and clinical knowledge of the genitourinary system into existing knowledge of other organ systems.

Audience: Undergraduate

4. Value the impact of cytologic diagnosis of genitourinary system specimens from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 574 – THE GASTROINTESTINAL SYSTEM**

3 credits.

Anatomy, histology, physiology and pathology of the gastrointestinal system and the corresponding cellular manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Integrate each patient's history, clinical, radiologic, and endoscopic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

2. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of diseases involving the gastrointestinal tract.

Audience: Undergraduate

3. Integrate cytomorphologic and clinical knowledge of the gastrointestinal tract into existing knowledge of other organ systems.

Audience: Undergraduate

4. Value the impact of cytologic diagnosis of gastrointestinal specimens from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 575 – MISCELLANEOUS SYSTEMS**

3 credits.

Anatomy, histology, physiology and pathology of skin, thyroid, lymph nodes and other sites and the corresponding cellular manifestations which provide diagnostic information. Emphasis on specimen collection by fine needle aspiration. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Integrate each patient's history, clinical, and radiologic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

2. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of diseases involving skin, thyroid, lymph nodes, and other sites.

Audience: Undergraduate

3. Integrate cytomorphologic and clinical knowledge of skin, thyroid, lymph nodes, and other sites into existing knowledge of other organ systems.

Audience: Undergraduate

4. Value the impact of cytologic diagnosis of specimens from skin, thyroid, lymph nodes, and other sites from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 576 – EFFUSIONS**

2 credits.

Anatomy, physiology, histology and pathology of the body cavities. Cytologic manifestations which provide diagnostic information. Cell changes related to specimen processing. Correlation of the didactic information with the microscopic cellular patterns to provide a diagnosis.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Integrate each patient's history, clinical, and radiologic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

2. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of diseases involving effusions.

Audience: Undergraduate

3. Integrate cytomorphologic and clinical knowledge of effusions into existing knowledge of other organ systems.

Audience: Undergraduate

4. Value the impact of cytologic diagnosis of effusion specimens from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 577 – APPLIED CYTOLOGY I**

1 credit.

Written and practical application of the comprehensive body of knowledge to all aspects of preparation, evaluation, correlation and diagnosis of cytologic specimens.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Integrate each patient's history, clinical, and radiologic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

2. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of diseases involving all organ systems.

Audience: Undergraduate

3. Integrate cytomorphologic and clinical knowledge of all organ systems.

Audience: Undergraduate

4. Value the impact of cytologic diagnosis from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 578 – APPLIED CYTOLOGY II**

1 credit.

Written and practical application of the advanced comprehensive body of knowledge to all aspects of preparation, evaluation, correlation and diagnosis of cytologic specimens. Practice in nationally offered cytologic examinations.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Integrate each patient's history, clinical, and radiologic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

2. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of diseases involving all organ systems.

Audience: Undergraduate

3. Integrate cytomorphologic and clinical knowledge of all organ systems.

Audience: Undergraduate

4. Value the impact of cytologic diagnosis from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 588 – IMMUNOGENETICS**

3 credits.

Explores the interaction between genetics and the immune system.

Examines the genetic mechanisms that drive the immunological and clinical differences observed between individuals when confronted with the same environment of immunological insults, such as COVID-19, influenza, allergies and cancer. Stresses clinical and research perspectives and their societal implications.

**Requisites:** GENETICS 466, 467 or BIOCORE 383

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the genetic mechanisms underlying interindividual immune response differences to the same immunological challenge

Audience: Undergraduate

2. Critically evaluate major research advances in the primary literature and place them within the historical context of other major immunogenetic discoveries

Audience: Undergraduate

3. Predict the downstream effects of manipulating variables that are involved in molecular pathways or currently being used in immunogenetic based research and clinical practices

Audience: Undergraduate

4. Effectively communicate difficult immunogenetics topics regarding interindividual immune response differences

Audience: Undergraduate

**GENETICS 605 – CLINICAL CASES IN MEDICAL GENETICS**

3 credits.

The use of genetics in medicine has experienced significant growth over the past 50 years, identifying risk genes, and devising diagnostic tests and therapies based on this knowledge for specific clinical disorders such as cystic fibrosis, achondroplasia, and Retts syndrome. MDs and biomedical scientists from UW Hospital and Clinics, the School of Medicine and Public Health, and other UW units will present lectures in this field followed by question-answers sessions. Other class sessions will be devoted to student presentations and open discussion of research literature.

**Requisites:** GENETICS 466, 467 or BIOCORE 383

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Design experiments to discover the genes and defects within genes that cause diseases in humans

Audience: Undergraduate

2. Understand how model organisms are used to investigate the molecular mechanisms for genetic disorders

Audience: Undergraduate

3. Design and interpret diagnostic DNA-based tests for the detection of allelic variants that cause disease

Audience: Undergraduate

4. Know the diverse physiological-developmental mechanisms that underlie a broad spectrum of diseases

Audience: Undergraduate

5. Devise strategies to develop therapies to treat or cure disease and understand the limits therapeutic interventions

Audience: Undergraduate

6. Develop a report on (1) the design of a diagnostic test for a genetic disorder, (2) the molecular biological pathways affected by the genetic disorder, and (3) application of the understanding of the disorder to develop a therapy or management regime

Audience: Graduate

**GENETICS/BIOCHEM/MICROBIO 612 – PROKARYOTIC MOLECULAR BIOLOGY**

3 credits.

Molecular basis of bacterial physiology and genetics with emphasis on molecular mechanisms; topics include nucleic acid-protein interactions, transcription, translation, replication, recombination, regulation of gene expression.

**Requisites:** (BIOCHEM 501 or 507) and (MICROBIO 470, GENETICS 466 or 468) or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Access and evaluate original research literature.

Audience: Undergraduate

2. Demonstrate problem solving practices.

Audience: Undergraduate

3. Identify enzyme mechanisms responsible for transcription, translation, gene regulation, and replication in bacteria.

Audience: Graduate

4. Compare the structural bases for the mechanisms.

Audience: Graduate

5. Evaluate the experiments that led to our understanding of these mechanisms.

Audience: Graduate

6. Deconstruct how these enzymes respond to nutritional and environmental signals in cells.

Audience: Graduate

7. Outline the evolutionary basis and selection pressure for these mechanisms in vivo.

Audience: Graduate

**GENETICS/PLANTSCI 615 – GENETIC MAPPING**

3 credits.

Computing-intensive preparation for genetic mapping research, including linkage analysis and QTL mapping in designed crosses; linkage disequilibrium and association analysis (GWAS).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compare the principles and applicability of linkage vs association mapping

Audience: Graduate

2. Describe how population and model parameters affect statistical power

Audience: Graduate

3. Construct genetic linkage maps and discover QTL in designed crosses

Audience: Graduate

4. Conduct genome-wide association analyses and interpret the results

Audience: Graduate

**GENETICS/BIOCHEM/MD GENET 620 – EUKARYOTIC MOLECULAR BIOLOGY**

3 credits.

Focuses on the basic molecular mechanisms that regulate DNA, RNA, and protein metabolism in eukaryotic organisms.

**Requisites:** BIOCHEM 501, 508 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recall core principles that govern the structure and function of DNA, RNA, and protein.

Audience: Both Grad & Undergrad

2. Describe techniques for quantifying the expression, interaction, and cellular localization of specific molecules and for determining their necessity and sufficiency in molecular processes.

Audience: Both Grad & Undergrad

3. Explain how molecular processes that control the synthesis, decay, interactions, localization, folding, and modification of molecules are silenced, initiated, maintained, and terminated.

Audience: Both Grad & Undergrad

4. Describe how information is transferred between molecules to alter cellular activity in response to developmental and environmental signals.

Audience: Both Grad & Undergrad

5. Critique and weigh the credibility of existing molecular data.

Audience: Both Grad & Undergrad

6. Develop and draw hypotheses that use existing data to account for as yet unexplained molecular processes in eukaryotic organisms.

Audience: Both Grad & Undergrad

7. Design discovery/observation, loss-of-function, and gain-of-function experiments to test molecular hypotheses.

Audience: Both Grad & Undergrad

8. Implement problem solving strategies in thesis research project.

Audience: Graduate

**GENETICS/ENTOM/ZOOLOGY 624 – MOLECULAR ECOLOGY**

3 credits.

Basic principles of molecular ecology. Lecture topics include population genetics, molecular phylogenetics, rates and patterns of evolution, genome evolution, and molecular ecology.

**Requisites:** GENETICS 466, 467, BIOCORE 383, or graduate student standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe common molecular genetic techniques.

Audience: Both Grad & Undergrad

2. Demonstrate knowledge about the significance of genetic diversity in species biology.

Audience: Both Grad & Undergrad

3. Differentiate how ecological and evolutionary processes shape genetic variation.

Audience: Both Grad & Undergrad

4. Analyze genetic data and communicate the results.

Audience: Both Grad & Undergrad

5. Evaluate whether genetic data are appropriate for answering scientific questions.

Audience: Both Grad & Undergrad

6. Summarize and critique the primary literature in the field of Molecular Ecology.

Audience: Graduate

**GENETICS/CHEM 626 – GENOMIC SCIENCE**

2 credits.

Brings cutting-edge topics in the genomic sciences into the reach of those in chemistry, biology, engineering, computer science statistics fields. Enables biologically-oriented students to deal with advances in analytical science so that they may incorporate new genomic science concepts into their own scientific repertoires.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GENETICS 627 – ANIMAL DEVELOPMENTAL GENETICS**

3 credits.

Advanced genetics course focusing on genetic mechanisms of animal embryonic development, with particular emphasis on central molecular circuitries that control development and genetic analytical tools used to reveal them. Address topics including maternal and epigenetic inheritance, the egg-to-embryo transition, pattern formation, organogenesis, coordination of cellular and molecular mechanisms, and animal models of human congenital disorders.

**Requisites:** GENETICS 466, 468, or BIOCORE 587

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate concepts in genetics in the identification and function of genes involved in development and cell differentiation.

Audience: Undergraduate

2. Understand developmental cascades and morphogenetic processes involved in patterning and diversification of the animal tissue plan.

Audience: Undergraduate

3. Apply developmental genetic principles towards the understanding of syndromes in animals, including humans.

Audience: Undergraduate

4. Learn principles underlying the divergence of body types during evolution.

Audience: Undergraduate

## GENETICS/BIOCHEM 631 – PLANT GENETICS AND DEVELOPMENT

3 credits.

Covers the basic concepts of genetics and genomics as applied to plants and their development, including discussions on breeding systems (modes of reproduction, sex determination, self incompatibility and crossing barriers), linkage analysis, genome structure and function (structure, function and evolution of nuclear and organellar chromosomes; haploidy and polyploidy; expression regulation and epigenetics), along with a description of current methodologies used in the analysis of these processes within the context of plant development. The objective is to instigate a broader knowledge and understanding of the principles and methodologies used in plant genetics and their applications in investigations of the molecular mechanisms that modulate plant development.

**Requisites:** GENETICS 466, 468, BIOCORE 587, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the plant life cycles and key concepts in plant development

Audience: Both Grad & Undergrad

2. Explore and compare experimental approaches to study breeding systems, recombination, and modes of trait segregation in plants, including quantitative traits

Audience: Both Grad & Undergrad

3. Explain genetic, epigenetic and genomic approaches to study plant growth, development and responses to the environment

Audience: Both Grad & Undergrad

4. Analyze and interpret data in plant genetics and development

Audience: Both Grad & Undergrad

5. Critically evaluate papers from the primary literature

Audience: Both Grad & Undergrad

6. Compare and contrast published experimental data that address specific biological questions in plants, use the corresponding information to develop novel hypotheses, and design experiments that test these hypotheses.

Audience: Graduate

## GENETICS 633 – POPULATION GENETICS

3 credits.

Preparation for initiating research in the population genetics field. Explore how genetic variation is influenced by mutation and recombination, population size changes and migration, and natural selection for or against new mutations.

**Requisites:** ZOOLOGY/ANTHRO/BOTANY 410, ZOOLOGY 415, GENETICS 466, 468, BIOCORE 381, or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe methods of measuring and summarizing DNA variation.

Audience: Both Grad & Undergrad

2. Examine fundamental population genetic models and their predictions.

Audience: Both Grad & Undergrad

3. Develop intuition for the impact of evolutionary processes on genetic variation.

Audience: Both Grad & Undergrad

4. Identify and understand modern methods of population genetic data analysis.

Audience: Both Grad & Undergrad

5. Evaluate ongoing controversies and unsolved problems in population genetics.

Audience: Both Grad & Undergrad

6. Assess the relevance and utility of course content to own research.

Audience: Graduate

**GENETICS/MD GENET/POP HLTH 636 – PUBLIC HEALTH GENOMICS**

1 credit.

Provides an introduction to public health genomics through a review of fundamental principles of genetics, the use of genetic information in clinical and research settings, and its implications for disease management and prevention, and health promotion. Explores policies that guide public health and discusses current ethical, legal, and social implications of these policies.

**Requisites:** (Junior standing and ZOOLOGY/BIOLOGY/BOTANY 151) or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss the impact of genetics on clinical care and public health practice

Audience: Both Grad & Undergrad

2. Critically discuss genetic/genomic policies and the relevant ethical, legal, and social implications (ELSI) of these policies

Audience: Both Grad & Undergrad

3. Read, summarize, critique, and relate current news articles to key concepts in public health genomics

Audience: Graduate

**GENETICS/BOTANY/M M & I/PL PATH 655 – BIOLOGY AND GENETICS OF FUNGI**

3 credits.

Fungal genetics, genomics, and physiology using plant pathogenic fungi and the genetic models *Aspergillus nidulans* and *Neurospora crassa* as model systems to explore the current knowledge of fungal genetics and plant/fungal interactions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a basic understanding of fungal biology and genetics

Audience: Graduate

2. Analyze current research topics in fungal genetics/biology

Audience: Graduate

3. Identify members of the fungal research community

Audience: Graduate

4. Write and critique research grants

Audience: Graduate

5. Critique and discuss peer reviewed manuscripts

Audience: Graduate

6. Develop and deliver oral presentations (research paper and own research)

Audience: Graduate

7. Improve communication skills (oral and written)

Audience: Graduate

**GENETICS/MD GENET 662 – CANCER GENETICS**

3 credits.

Focuses on the genetic basis by which cancer manifests. Provides a comprehensive overview of how cancer is generated as a result of abnormalities at the DNA level, paying special attention to oncogenes, tumor suppressors, DNA mutations, DNA repair mechanisms, chromosomal instability, and tumor heterogeneity. Stresses the role of the immune system in combating cancer, the phenomenon of cancer resistance, anti-tumor strategies, and epigenetic influences on tumorigenesis. Highlights connections between course material and clinical relevance.

**Requisites:** GENETICS 466, 467 or BIOCORE 383

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe major research advances in cancer genetics

Audience: Undergraduate

2. Discuss the promises and challenges that await the field of cancer genetics.

Audience: Undergraduate

3. Apply your understanding of cancer genetics to generate research questions and improve hypothetical patient care

Audience: Undergraduate

4. Critically evaluate primary literature regarding cancer genetics

Audience: Undergraduate

5. Organize and deliver a scientific presentation to your peers

Audience: Undergraduate

**GENETICS 670 – SEMINAR IN CLINICAL CYTOGENETICS**

1 credit.

Overview of the basic features of chromosome structure and behavior including karyotyping clinical correlates of numerical and structural chromosome aberrations, sex chromosome abnormalities, breakage syndromes and the chromosomal changes associated with the development of cancer.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Recommend cytogenetic and molecular studies on cytology specimens when appropriate.

Audience: Undergraduate

2. Demonstrate appropriate specimen triage and preparation for cytogenetic specimens.

Audience: Undergraduate

3. Recognize the role of chromosomal and other genetic abnormalities in human disease.

Audience: Undergraduate

4. Interpret cytogenetic nomenclature appropriately.

Audience: Undergraduate

**GENETICS 671 – ADVANCED CLINICAL PRACTICE**

8 credits.

Clinical practicum to develop diagnostic expertise of cytologic specimens. Examine challenging cases with emphasis on diagnostic pitfalls. Observe patient clinics related to cytologic specimen collection. Participate at clinical experiences in fine needle aspiration, histology, and a private cytology laboratory.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Demonstrate professional and ethical responsibility as part of a patient-centered healthcare team.

Audience: Undergraduate

2. Demonstrate basic troubleshooting of common problems encountered during clinical practice.

Audience: Undergraduate

3. Integrate each patient's history, clinical, and radiologic findings with microscopic findings to make an accurate diagnosis using standard diagnostic criteria.

Audience: Undergraduate

4. Recommend and interpret ancillary tests appropriately in the context of the molecular basis of disease.

Audience: Undergraduate

5. Integrate cytomorphologic and clinical knowledge of all organ systems.

Audience: Undergraduate

6. Value the impact of cytologic diagnosis of cytology specimens from a patient and public health perspective.

Audience: Undergraduate

**GENETICS 672 – SEMINAR IN LABORATORY OPERATIONS AND QUALITY CONTROL**

1 credit.

Review the fundamentals of basic administrative functions and regulatory requirements including planning, organizing, supervising and controlling business management, record keeping, data processing and laboratory safety. Quality assurance procedures necessary for obtaining, processing, diagnosing and reporting cytologic specimens.

**Requisites:** Declared in Cytotechnology

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Recognize regulations and accreditations requirements for the cytology laboratory.

Audience: Undergraduate

2. Relate laboratory administrative and workflow functions to the quality of patient care.

Audience: Undergraduate

3. Demonstrate appropriate laboratory safety procedures.

Audience: Undergraduate

4. Compare supervisory and business management practices in different laboratory settings.

Audience: Undergraduate

5. Identify best practices in quality assurance and quality control.

Audience: Undergraduate

**GENETICS 673 – SEMINAR IN CLINICAL CYTOLOGY**

1 credit.

Preparation of a case study or clinical topic of choice by each student to present to a peer professional group of cytology staff and medical faculty. Preparation of a referenced scientific term paper or participation in an approved research or class project pertaining to clinical cytology.

**Requisites:** Declared in Cytotechnology**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Demonstrate significant expertise in a focused area of cytology with clinical and/or public health implications.

Audience: Undergraduate

2. Communicate cytology-relevant knowledge in this focused area with others.

Audience: Undergraduate

3. Identify authoritative sources of cytology information.

Audience: Undergraduate

4. Integrate information from a variety of authoritative sources to support a thesis.

Audience: Undergraduate

5. Produce scientific publication-quality written work.

Audience: Undergraduate

**GENETICS/MD GENET 677 – ADVANCED TOPICS IN GENETICS**

1-3 credits.

Contents vary; consideration of subjects not included in the curriculum.

**Requisites:** Graduate/professional standing, GENETICS 466, 468, or BIOCORE 383**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in genetics and genomics.

Audience: Both Grad &amp; Undergrad

2. Apply knowledge of experimental genetics and genomics to related research projects.

Audience: Graduate

**GENETICS 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Honors - Honors Only Courses (H)**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**GENETICS 682 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Honors - Honors Only Courses (H)**Repeatable for Credit:** No**Last Taught:** Spring 2025**GENETICS 695 – ADVANCING TO BIOLOGICAL SCIENCES PHD STUDY**

1 credit.

Explore the biological science PhD student experience, from the initial stages of consideration through applications and interviews, to graduate student life and career opportunities. Reflect on personal goals and the nature of graduate study to confirm that a research-focused PhD is right for you. Consider whether to apply this year or later on, in light of admissions expectations and personal readiness. Identify research areas, PhD programs, and prospective advisors of interest. Improve application materials, strengthen interview skills, and consider individual priorities for selecting a program.

**Requisites:** Senior standing**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Appraise the individual appropriateness and optimal timing of PhD study in light of personal goals and preparedness

Audience: Undergraduate

2. Identify research areas, graduate prospects, and prospective mentors of interest

Audience: Undergraduate

3. Recognize the admissions processes and priorities typically followed by graduate programs

Audience: Undergraduate

4. Develop, evaluate, and refine PhD application materials

Audience: Undergraduate

5. Communicate research interests, motivation, personal strengths, and career goals with faculty and peers

Audience: Undergraduate

**GENETICS 699 – SPECIAL PROBLEMS**

1-3 credits.

Individual advanced work in an area of Genetics under the direct guidance of a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

**GENETICS 701 – ADVANCED GENETICS**

3 credits.

First semester of professional level training in genetic mechanisms and analysis as applied to genetic transmission, gene expression, forward and reverse genetics, molecular genetics, genomics, developmental genetics, and epigenetics.

**Requisites:** Declared in Genetics doctoral program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GENETICS 702 – ADVANCED GENETICS II**

3 credits.

Second of semester of professional level training in genetic mechanisms and analysis as applied to genetic transmission, gene expression, forward and reverse genetics, molecular genetics, genomics, developmental genetics, and epigenetics.

**Requisites:** GENETICS 701

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GENETICS/MD GENET 707 – GENETICS OF DEVELOPMENT**

3 credits.

A research-level analysis of the current status of the investigation of processes controlling differential gene activity and cellular behavior. The major emphasis is genetic. In successive years, the focus moves from the gene to the cell to the organism.

**Requisites:** Declared in Genetics graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically evaluate papers, form meaningful questions based on the material, and engage scientists in conversations about their work.

Audience: Graduate

2. Improve oral presentations and scientific writing (grants, review articles).

Audience: Graduate

3. Expand scientific literacy.

Audience: Graduate

**GENETICS/MD GENET 708 – METHODS AND LOGIC IN GENETIC ANALYSIS**

3 credits.

Contemporary issues in genetic, developmental, cell, and molecular biology are addressed in a discussion format. Invited speakers give research lectures and reading material is taken from the primary literature. The discussion focuses on evaluating genetic approaches to biological problems.

**Requisites:** Declared in Genetics graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Critically evaluate papers, form meaningful questions based on the material, and engage scientists in conversations about their work.

Audience: Graduate

2. Improve oral presentations and scientific writing (grants, review articles).

Audience: Graduate

3. Expand scientific literacy.

Audience: Graduate

**GENETICS/CRB 710 – DEVELOPMENTAL GENETICS**

3 credits.

Covers a broad range of topics in animal development, with an emphasis on molecular mechanisms. Focuses on common themes, with the goal of understanding and analyzing current research in developmental biology and genetics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Ability to critically evaluate published scientific work (journal reviews).

Audience: Graduate

2. Ability to communicate critical evaluations professionally and articulately (lecturer and TA feedback at each session).

Audience: Graduate

3. Develop deep knowledge of developmental biology, use of genetic model organisms, stem cell biology and regenerative medicine (didactic portion of course).

Audience: Graduate

4. Improved presentation skills (each student has a scheduled presentation four times during the semester in addition to ad hoc participation).

Audience: Graduate

5. Skills in providing feedback to peers (through student evaluations peer presentations each class period).

Audience: Graduate

**GENETICS 808 – FROM GENES TO GRANTS: WRITING WINNING RESEARCH PROPOSALS IN GENETICS**

2 credits.

Introduction to professional scientific writing in the field of genetics. Develop skills and expertise in scientific writing with a special emphasis on preparing grant and fellowship research proposals in genetics and genomics.

**Requisites:** GENETICS 701 and 702

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Complete a two-page research proposal in the "3 Aims" format and a three-page personal/professional statement on a forward-thinking project in genetics.

Audience: Graduate

2. Differentiate among common genetics research proposal structures, including the "3 Aims" approach, the NIH F31 style used by the Genetics training program for its preliminary examinations, other standard styles for federal grants and fellowships relevant to genetics (e.g., NIH, NSF, USDA, DOE), and familiarity with alternative or highly specialized proposal styles (e.g., HHMI Gilliam Fellowships).

Audience: Graduate

3. Identify key principles in scientific writing, such as supporting claims with evidence, including appropriate literature citations, balancing clarity with complexity, and when to establish boundaries between evidence ("results") and argument ("discussion").

Audience: Graduate

4. Demonstrate professional skills in peer review, editing, and mentorship, including how to provide critical feedback effectively and without negativity, and how to maintain social and cultural sensitivity during peer review.

Audience: Graduate

5. Recognize how to effectively use both written and visual communication in genetics.

Audience: Graduate

**GENETICS/BOTANY/ENTOM/ZOOLOGY 820 – FOUNDATIONS OF EVOLUTION**

2 credits.

Explore some of the most important themes and debates that have permeated evolutionary biology over the last 50 years. Read key papers related to each controversial topic, debate the pros and cons of competing viewpoints, and reflect on the relevance of the issue to contemporary evolutionary biology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GENETICS/BIOCHEM/BOTANY 840 – REGULATORY MECHANISMS IN PLANT DEVELOPMENT**

3 credits.

Molecular mechanisms whereby endogenous and environmental regulatory factors control development; emphasis on stimulus perception and primary events in the signal chain leading to modulated gene expression and cellular development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**GENETICS/AN SCI/POP HLTH 849 – GENOMIC EPIDEMIOLOGY**

2 credits.

An introduction to genomic epidemiology, including a general overview of genetics and Mendelian and complex inheritance, as well as various elements of study design, such as participant ascertainment; phenotype definition; biologic sample selection; genotyping, sequencing, and quality control; measurement of covariates; and choice of analytic methods. Briefly covers original study designs; focuses on current study designs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Evaluate and discuss genetic/genomic epidemiological literature.

Audience: Graduate

2. Design simple genetic/genomic epidemiological studies.

Audience: Graduate

3. Identify and apply appropriate tests of association between genetic variants and both qualitative and quantitative outcomes using either unrelated individuals or families.

Audience: Graduate

4. Summarize and interpret the results of genetic/genomic tests of association.

Audience: Graduate

**GENETICS 875 – SPECIAL TOPICS**

1-4 credits.

Special topics of current interest to graduate students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**GENETICS 885 – ADVANCED GENOMIC AND PROTEOMIC ANALYSIS**

3 credits.

With the availability of genome sequences and high-throughput techniques, organismal physiology can now be examined on a global scale by monitoring the behavior of all genes or proteins in a single experiment. This course will present modern techniques in genomics and proteomics, with particular focus on analyzing the data generated by these techniques. Course material will cover genomic sequencing, comparative sequence analysis, phylogeny construction and phylogenomics, transcription factor motif discovery, DNA microarray analysis, techniques in mass spectrometry, proteomic screening methods, and protein-interaction network analysis. In addition to lecture time, the course includes computer lab where students get hands-on experience analyzing genomic and proteomic datasets. Students should have coursework in general statistics and intermediate or advanced genetics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GENETICS/B M E/B M I/BIOCHEM/CBE/COMP SCI 915 – COMPUTATION AND INFORMATICS IN BIOLOGY AND MEDICINE**

1 credit.

Participants and outside speakers will discuss current research in computation and informatics in biology and medicine. This seminar is required of all CIBM program trainees.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss how methods from computer science, statistics, information science and engineering are applied to problems in biology, medicine and population health

Audience: Graduate

2. Recognize and be able to define applications in translational bioinformatics, clinical informatics and public health informatics

Audience: Graduate

**GENETICS/AN SCI/DY SCI 951 – SEMINAR IN ANIMAL BREEDING**

0-1 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**GENETICS 990 – RESEARCH**

1-12 credits.

Independent laboratory research in preparation of a graduate thesis under supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**GENETICS 993 – SEMINAR IN GENETICS**

0-1 credits.

Various aspects of genetics: Drosophila, maize, immunogenetics, developmental genetics, or other special topics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

## GEOGRAPHY (GEOG)

**GEOG 101 – INTRODUCTION TO HUMAN GEOGRAPHY**

4 credits.

Human geographers explore socio-spatial relations, processes and representations of the world in which we live. Engages economic, political, urban, socio-cultural and environmental geographic perspectives to investigate patterns and processes that have come to be associated with 'globalization'.

**Requisites:** Not open to students with credit for GEOG 104

**Course Designation:** Gen Ed - Communication Part B  
Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOG 104 – INTRODUCTION TO HUMAN GEOGRAPHY**

3 credits.

Human geographers explore socio-spatial relations, processes and representations of the world in which we live. Engages economic, political, urban, socio-cultural and environmental geographic perspectives to investigate patterns and processes that have come to be associated with 'globalization'.

**Requisites:** Not open to students with credit for GEOG 101

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**GEOG/ENVIR ST 120 – INTRODUCTION TO THE EARTH SYSTEM**

3 credits.

Introduction to how the Earth system works and what makes Earth livable. Gain appreciation for how the atmosphere, oceans, life, and earth's surface interact to shape our local, regional and global landscapes.

**Requisites:** Not open to students with credit for ENVIR ST/GEOG 127

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOG/ENVIR ST 127 – PHYSICAL SYSTEMS OF THE ENVIRONMENT**

4 credits.

An introduction to natural environmental systems, emphasizing the interconnections between the systems of the solid earth (minerals, rocks, soils), the hydrosphere (water in all its forms), the biosphere, and the atmosphere. Emphasizes connections between basic concepts and specific environmental issues through hands-on case studies, lab projects, and field trips to collect samples and observations for lab projects.

**Requisites:** Not open to students with credit for ENVIR ST/GEOG 120

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe at a basic level the most important processes of the Earth system, including formation and weathering of rocks and minerals, soil development and erosion, atmospheric circulation, and the global cycles of water and carbon.

Audience: Undergraduate

2. Apply concepts from this course to understand environmental issues such as global climate change and the sustainability of agriculture, and natural hazards such as earthquakes and floods, and make informed contributions to public debate and decision-making on how to address these issues and hazards.

Audience: Undergraduate

3. Identify important research methods, through case studies and labs, that are the basis of modern Earth system science.

Audience: Undergraduate

**GEOG/ENVIR ST 139 – GLOBAL ENVIRONMENTAL ISSUES**

3 credits.

Explores the global and local nature of environmental problems, including issues of climate change, food, energy, globalization, deforestation, biodiversity loss, resource access, environmental justice, and population. Considers how we should analyze and act on environmental problems as we confront the apparently daunting scale of such issues. What appear to be single global environmental issues are actually composed of many smaller, context-specific, and place-dependent problems or conflicts. Through an interdisciplinary and geographic perspective, these issues can be understood and addressed at the scale of our lived lives.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the scientific basis of climate change, population growth, desertification, deforestation, water quality and quantity impairments, and the environmental challenges of agriculture and energy production.

Audience: Undergraduate

2. Critically assess the causal factors and drivers associated with global environmental issues.

Audience: Undergraduate

3. Explain the political context in which environmental issues are framed as global problems.

Audience: Undergraduate

4. Identify potential solutions to global environmental issues, and obstacles to their implementation.

Audience: Undergraduate

5. Describe your own relationship to global environmental issues and how global environmental issues manifest locally.

Audience: Undergraduate

**GEOG 170 – OUR DIGITAL GLOBE: AN OVERVIEW OF GISCIENCE AND ITS TECHNOLOGY**

3 credits.

Introduction to the collection, representation and use of geospatial data. Introduction to geospatial technologies like GPS, Google Earth, satellite imagery, and GIS, and provides a critical understanding of the strengths and limitations of spatial representations (e.g., maps, images).

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**GEOG 175 – TOPICS IN GEOGRAPHY**

3 credits.

Explores emerging topics in human geography (e.g., economic geography, urban geography, political geography) and people-environment geography (e.g., political ecology, environmental history).

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain foundational concepts in human geography and people-environment geography.

Audience: Undergraduate

2. Identify social scientific theories and methods and apply them to geographical issues.

Audience: Undergraduate

3. Connect pressing social and ecological issues to human and people-environment geographical theory and methods.

Audience: Undergraduate

**GEOG 198 – DIRECTED STUDY**

1-2 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2013**GEOG 199 – DIRECTED STUDY**

1-2 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2004

### **GEOG/ENVIR ST/SOIL SCI 230 – SOIL: ECOSYSTEM AND RESOURCE**

3 credits.

Soils are fundamental to ecosystem science. A systems approach is used to investigate how soils look and function. Topics investigated include soil structure, biology, water, fertility, and taxonomy as well as the human impact on the soil environment.

**Requisites:** Not open to students with credit for SOIL SCI 301

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the significance of soil and its properties

Audience: Undergraduate

2. Identify and describe key components of soil solids and pores

Audience: Undergraduate

3. Explain and predict the interaction of water with soil

Audience: Undergraduate

4. Interpret basic nomenclature used in soil science

Audience: Undergraduate

5. Analyze that causes and solutions for sustainability of soil resources

Audience: Undergraduate

6. Quantify the interaction of clay surfaces with a soil solution

Audience: Undergraduate

7. Describe the role of soils in many different ecosystems

Audience: Undergraduate

8. Link soil orders with biomes and describe soil's edaphic character

Audience: Undergraduate

9. Analyze sustainability issues using a systems-based approach

Audience: Undergraduate

### **GEOG/ART HIST/ENVIR ST/HISTORY/LAND ARC 239 – MAKING THE AMERICAN LANDSCAPE**

3-4 credits.

Traces the history and evolution of the American cultural landscape from precolonial times to present. Explores how class, ethnic, and racial inequality have shaped the appearance of the American landscape over time, and how that landscape in turn has affected relationships between people and groups through the present day. Examines extraordinary things (civic structures (like our State Capitol), National Parks, War Memorials) and more ordinary kinds of places (mining towns, cotton plantations, sites of recreation and leisure, and suburban tract housing) to stimulate critical thinking about how these places have served people and groups unequally and disproportionately over time and across space. Considers complex meanings of American spaces and places to different people and groups, stimulating empathy and encouraging participation in a multicultural society.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and interpret the American landscape as a richly layered historical document mediated by complex relationships between people and groups

Audience: Undergraduate

2. Explain how the American cultural landscape has affected present day circumstances regarding ethnicity and race as well as racial and ethnic inequalities

Audience: Undergraduate

3. Articulate ways in which historical change manifest in buildings, enclosed spaces, and other elements of the American landscape reveal racial, ethnic, class and gender dynamics between and among people and groups over time

Audience: Undergraduate

4. Enlist forms of historical evidence – maps (current and historic), photographs (aerial and otherwise), historical newspapers, census records, deeds and land records – to interpret landscapes and landscape change

Audience: Undergraduate

5. Explain the American landscape as a product of competing interests, which will demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others

Audience: Undergraduate

**GEOG/ASIAN/HISTORY/POLI SCI/SOC 244 – INTRODUCTION TO SOUTHEAST ASIA: VIETNAM TO THE PHILIPPINES**

4 credits.

As an introduction to Southeast Asia, covers the ethnic, cultural, religious, and political histories of the region from the classical states period to the present, with an emphasis on colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century, including an exposure to region's contemporary literature. Not open to students who completed LCA 244 prior to Fall 2019.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Examine the ethnic, cultural, religious, and political histories of Southeast Asia from the classical states period to the present.

Audience: Undergraduate

2. Analyze colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century in Southeast Asia.

Audience: Undergraduate

3. Explore contemporary literature in Southeast Asia.

Audience: Undergraduate

**GEOG/HISTORY/POLI SCI/SLAVIC 253 – RUSSIA: AN INTERDISCIPLINARY SURVEY**

4 credits.

Comprehensive interdisciplinary survey of Russian civilization from its beginnings through the present day.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOG/HISTORY/POLI SCI/SLAVIC 254 – EASTERN EUROPE: AN INTERDISCIPLINARY SURVEY**

4 credits.

Comprehensive interdisciplinary survey of East European culture, society, politics, and literature from its beginnings to the present day.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**GEOG/AFROAMER/ANTHRO/C&E SOC/HISTORY/LACIS/ POLI SCI/SOC/SPANISH 260 – LATIN AMERICA: AN INTRODUCTION**

3–4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Analyze Latin American culture and society from an interdisciplinary perspective.

Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.

Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.

Audience: Undergraduate

**GEOG/AFRICAN/AFROAMER/ANTHRO/HISTORY/POLI SCI/ SOC 277 – AFRICA: AN INTRODUCTORY SURVEY**

4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Analyze African society and culture from a multidisciplinary perspective.

Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.

Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.

Audience: Undergraduate

**GEOG 300 – WEIRD GEOGRAPHIES**

3 credits.

An opportunity to re-imagine human geography. The history of geography is particularly violent and exclusive. It is well known that systems of colonialist exploitation, theft, kidnapping, and murder were facilitated in part by the work of modern cartographers and "explorers." The discipline that we have today is a product of these earlier colonial epistemologies and ideologies. The science that emerged from these fields - geography - institutionalizes and reproduces many the ideas and viewpoints of their modern practitioners. Creates a space to re-imagine and re-invent what the field of human geography might be. Interrogates the colonial history of geography as a social science and practice. Explores several ways of thinking about space and social life that might not fit cleanly into the discipline at large.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science  
Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe many of the key debates, concepts, objects, and problems in geography.

Audience: Undergraduate

2. Read and research critical scholarship.

Audience: Undergraduate

3. Critically analyze several theoretical, practical, and scientific perspectives on space and place.

Audience: Undergraduate

4. Identify effective strategies for developing and conducting interdisciplinary research.

Audience: Undergraduate

5. Recall approaches to researching sociospatial topics.

Audience: Undergraduate

6. Identify the basics of writing and editing academic theoretical research.

Audience: Undergraduate

7. Develop curriculum that considers geography in a new light.

Audience: Undergraduate

**GEOG 301 – REVOLUTIONS AND SOCIAL CHANGE**

3 credits.

An introduction to the spatial dimensions of social movements, social struggles, and radical social change. Provides a range of critical and theoretical perspectives for reading and interpreting space as a tool of social transformation. Explores a variety of historical examples from the nineteenth century to the present.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify the key debates in Social and Radical Geography.

Audience: Both Grad &amp; Undergrad

2. Demonstrate the basics of social movements, including their strategies, tactics, and spatialities.

Audience: Both Grad &amp; Undergrad

3. Summarize the key issues in the recent history of social struggles.

Audience: Both Grad &amp; Undergrad

4. Explain approaches to researching social struggles via academic and popular sources.

Audience: Undergraduate

5. Demonstrate the basics of creating academic scholarship on social struggles in a geographic context.

Audience: Undergraduate

6. Produce academic scholarship on social struggles in a geographic context.

Audience: Graduate

7. Use radical pedagogy for guiding classroom discussions.

Audience: Graduate

8. Develop a personalized set of approaches to mediating challenging geographical and theoretical concepts for a broad range of learners.

Audience: Graduate

**GEOG 302 – ECONOMIC GEOGRAPHY: LOCATIONAL BEHAVIOR**

4 credits.

Classic location theory with modern extensions. Examination of theoretical statements and selected empirical examples. Principles of economic regionalization and network analysis with emphasis on spatial implications of the economic development process.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOG/URB R PL 305 – INTRODUCTION TO THE CITY**

3-4 credits.

Investigates urbanization as a general process, as well as the resulting contemporary physical, social, cultural and political- economic forms of cities. Emphasis will be placed on the history and current forms of spatial and social segregation of cities by race, class, ethnicity, and gender. The myriad ways that cities have addressed the tensions emerging from this history of spatial and social segregation will be highlighted. Further, emphasis will be placed on understanding the experiences of those most-affected by historical and continuing segregation.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies

requirement

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**GEOG 307 – INTERNATIONAL MIGRATION, HEALTH, AND HUMAN RIGHTS**

3 credits.

Provides an introduction to health and human mobility in a global context. Mobility is part of the human condition and international law enshrines freedom of movement, yet nation-states reserve the right to exclude. Examines the development of laws and institutions governing people on the move; how these solidify or reshape existing global, racial-ethnic, class, and gender hierarchies; and how they contribute to individual and population-level health.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**GEOG/CHICLA/GEN&WS 308 – LATINX FEMINISMS: WOMEN'S LIVES, WORK, AND ACTIVISM**

3 credits.

An examination of Latinx women's lives, experiences, and activism through the lens of testimonio, life histories, and feminist writings rooted in social justice movements and critical pedagogies.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Identify and describe key theoretical concepts and frameworks used in interdisciplinary studies of Latinas/xs and other women of color in the U.S.

Audience: Undergraduate

2. Explain the historical origins of Chicanx and Latinx feminisms and their relationship with social justice movements.

Audience: Undergraduate

3. Critically analyze the works of leading Latinx feminist scholars and theorists, who have written on issues of race, ethnicity, gender, LGBTQ identities, labor, color, citizenship status, and generation.

Audience: Undergraduate

4. Explore different writing genres and methodologies used in the study of women's lives, experiences, and activism.

Audience: Undergraduate

5. Apply the framework of testimonio to complete a digital storytelling project, examining a key theme or issue in women's lives.

Audience: Undergraduate

**GEOG/ENVIR ST 309 – PEOPLE, LAND AND FOOD: COMPARATIVE STUDY OF AGRICULTURE SYSTEMS**

3 credits.

Introduction to how and why humans have transformed natural landscapes around the world, including tropical deforestation. Exploration of different agricultural systems, and topics such as food security, land scarcity, bioenergy and the impacts of food production on the environment.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

### **GEOG/INTL ST 311 – THE GLOBAL GAME: SOCCER, POLITICS, AND IDENTITY**

3-4 credits.

Soccer (or football) is played in almost every part of the world. Soccer will be used as a lens through which to think critically about a range of issues within our own societies and around the world. This includes examining the relationship between European imperialism and the globalization of soccer in the early 20th century; thinking about who gets to play (and who gets paid) across different contexts; and analyzing how soccer is both globally networked and intensely local in its passions and rivalries. Draws from a range of perspectives on soccer, from those who consider it to be an opium for the masses to those who see it as a vehicle for positive social change, in order to illuminate some of the big questions facing the world today.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify and describe the ways that soccer shapes societies and vice-versa.

Audience: Undergraduate

2. Demonstrate an understanding of different theoretical approaches to studying soccer.

Audience: Undergraduate

3. Analyze sites in which soccer can be a vehicle for contesting political and cultural injustices.

Audience: Undergraduate

4. Apply course insights to broader debates about globalization, identities, and inequalities.

Audience: Undergraduate

### **GEOG/INTL ST 315 – UNIVERSAL BASIC INCOME: THE POLITICS BEHIND A GLOBAL MOVEMENT**

3 credits.

Should all individuals in society receive a regular transfer of cash from the state without any strings attached? If that question had been posed fifteen years ago, it would likely have been dismissed as unrealistic, undesirable, or just plain crazy. In recent years, however, the idea of introducing a universal basic income [UBI] has gained a lot of traction around the world. Growing inequalities, financial crises, fears about jobs being automated, and the COVID-19 pandemic have all helped to put UBI on the political map. But where did the idea come from? How is it traveling to different parts of the world? And on what grounds do different advocates justify their claims? Address these questions and more by exploring the history, philosophy, and political economy of UBI from a range of perspectives. Ongoing UBI experiments from different parts of the world will also be examined.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Describe the histories and philosophies that have shaped UBI claims.

Audience: Undergraduate

2. Differentiate UBI from other forms of social assistance.

Audience: Undergraduate

3. Compare and contrast different schools of thought regarding UBI.

Audience: Undergraduate

4. Evaluate evidence from recent and ongoing UBI experiments.

Audience: Undergraduate

5. Produce your own arguments about UBI.

Audience: Undergraduate

### **GEOG 318 – INTRODUCTION TO GEOPOLITICS**

3 credits.

Introduction to the contemporary study of geopolitics, featuring the main concepts and research themes encountered in this field. Examine the formation of geopolitical images of the world, where these images come from, and how they have shaped our thinking and politics over time.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**GEOG/GEOSCI 320 – GEOMORPHOLOGY**

3 credits.

Principles and analysis of geomorphic processes and resulting land forms.

**Requisites:** GEOSCI/ENVIR ST 106, GEOSCI 100, 109, 204, ENVIR ST/ GEOG 120, 127 or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOG/ATM OCN/ENVIR ST 322 – POLAR REGIONS AND THEIR IMPORTANCE IN THE GLOBAL ENVIRONMENT**

3 credits.

Reviews the past, present, and future of the Arctic and Antarctic regions.

Covers the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and future state of the Arctic and Antarctica as projected by earth system models. Also explores the role of the polar regions in the earth's system and associated global climatic feedbacks.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and the future state of the Arctic and Antarctic Regions.

Audience: Both Grad & Undergrad

2. Explain the major theories and concepts of the Arctic and Antarctic regions.

Audience: Both Grad & Undergrad

3. Identify how interactions occur between the major components of each polar region and their influence on global processes and climate.

Audience: Both Grad & Undergrad

4. Recognize the need for multi-disciplinary research to further our understanding of the polar regions and their role in the global system.

Audience: Both Grad & Undergrad

5. Integrate thesis or dissertation research directly or indirectly with polar processes research, thereby gaining better insight into Arctic and Antarctic regions.

Audience: Graduate

**GEOG/ATM OCN/ENVIR ST 332 – GLOBAL WARMING: SCIENCE AND IMPACTS**

3 credits.

Offers a fundamental understanding of how and why global warming is happening and what to expect in the future. Investigate and discuss the evidence for change, the science that explains these observations, predicted impacts on humans and ecosystems, and the societal debate over proposed solutions.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOG/ENVIR ST 333 – GREEN URBANISM**

3 credits.

Over half of the world's population now lives in urban areas, with an expected increase of 2.5 billion people in the next 30 years. As urbanization (broadly defined as the conversion of previously undeveloped lands into urbanized uses) continues and intensifies, we are faced with a number of environmental issues, for instance, fragmentation and destruction of habitats, and decreased air and water quality. Explore how urbanization impacts ecological processes and resulting environmental outcomes, strategies for "designing with nature," and behavioral, planning, and policy responses to urban environmental problems.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe ecological processes as they relate to urbanization

Audience: Undergraduate

2. Describe the social, economic, and environmental dimensions of sustainable communities and identify potential trade-offs and interrelationships among these dimensions

Audience: Undergraduate

3. Analyze the causes of and solutions for the sustainability challenge of sustainable cities and communities

Audience: Undergraduate

4. Analyze local plans for sustainability strategies

Audience: Undergraduate

5. Identify strategies that cities can employ in preparing for the effects of the changing climate

Audience: Undergraduate

### **GEOG/ATM OCN/ENVIR ST/GEOSCI 335 – CLIMATIC ENVIRONMENTS OF THE PAST**

3 credits.

Climate change at timescales from the last several million years to the last 100 years, with emphasis on more recent timescales. Examines how climate variability arises from interplay between external forcings, feedbacks within the earth system, and (more recently) human activity.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the major climatic events and trends during the Quaternary, spanning timescales from the last 50,000,000 years to the last 100 years.

Audience: Undergraduate

2. Identify the physical processes controlling the behavior of the earth system and its components (atmosphere, oceans, cryosphere, biosphere, etc.).

Audience: Undergraduate

3. Discuss how climatic variability results from a combination of external forcings and internal dynamics within the earth system.

Audience: Undergraduate

4. Recognize how paleoclimatologists collect, date, and analyze a staggering variety of paleoclimatic records, including ocean and lake sediment cores, ice cores, tree rings, corals, and speleothems.

Audience: Undergraduate

5. Analyze and critically evaluate climate experiments that are simulated by earth system models.

Audience: Undergraduate

6. Think and write critically, with particular attention to critically reading the scientific literature and critically employing the climate proxies and models used by paleoclimatologists.

Audience: Undergraduate

### **GEOG/ENVIR ST 337 – NATURE, POWER AND SOCIETY**

3 credits.

Explores the links between nature, power and society in today's world. Considers the complex relationships between humans and the earth's resources, including food, energy, physical materials, water, biota, and landscapes. Examines issues linked to population and scarcity, resource tenure, green consumerism, political economy, environmental ethics, risks and hazards, political ecology, and environmental justice.

**Requisites:** Sophomore standing. Not open to students with credit for ENVIR ST 112

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **GEOG/BOTANY 338 – ENVIRONMENTAL BIOGEOGRAPHY**

3 credits.

Explores how physical and biological factors affect the distribution of terrestrial biomes, ecosystem types, and biodiversity, as well as the role of disturbance and recent human activities on differences in past and modern day species distributions.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **GEOG/ENVIR ST 339 – ENVIRONMENTAL CONSERVATION**

4 credits.

Examines major environmental conservation approaches in the U.S. and developing countries and how they are influenced by sociopolitical factors, cultural values and scientific understandings of nature. Historical and contemporary cases are explored with emphasis on biodiversity and climate change issues.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **GEOG 340 – WORLD REGIONS IN GLOBAL CONTEXT**

3 credits.

Survey of development and change within each of the world's regions (e.g., Africa, Southeast Asia). Attention devoted to environment and society; history, economy, and demographic change; culture and politics; future challenges; key actors.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **GEOG 342 – GEOGRAPHY OF WISCONSIN**

3 credits.

Overview of the physical and human geography of Wisconsin, with an emphasis on the physical, historical, and cultural processes that shaped the Badger State.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **GEOG 344 – CHANGING LANDSCAPES OF THE AMERICAN WEST**

3 credits.

Environmental change in the landscapes of the American West, in the recent past, present, and future, from the physical science background to human-environment interactions.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Social Science or Natural Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Explain at a basic level the distinctive landforms and other features of major regions of the American West.

Audience: Both Grad & Undergrad

2. Describe at a basic level current scientific perspectives on the mechanisms and causes of recent and future changes in vegetation, fire regimes, and hydrology of the American West.

Audience: Both Grad & Undergrad

3. Use and critically evaluate key information resources to characterize the environments of the recent past and change since then, from first-hand accounts by Native peoples of the West to General Land Office records and historical or modern images.

Audience: Both Grad & Undergrad

4. Critically evaluate news reporting and advocacy of popular media on environmental change in the American West.

Audience: Both Grad & Undergrad

5. Critically analyze debates on the environmental impacts of major land uses in the American West, such as irrigated agriculture, outdoor recreation, forest products production, and livestock grazing, taking into account the economic, cultural, and political interests and perspectives of the various sides in each debate.

Audience: Both Grad & Undergrad

6. Develop an in-depth understanding of recent scientific research or public advocacy/activism on one specific aspect of environmental change in the American West.

Audience: Graduate

7. Present explanations of issues of environmental change at the level of an intermediate undergraduate class.

Audience: Graduate

### **GEOG/AMER IND/ENVIR ST 345 – CARING FOR NATURE IN NATIVE NORTH AMERICA**

3 credits.

Surveys the concepts, practices, and issues associated with caring for nature in American Indian communities.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Interpret the diverse arrangements for tribal sovereignty, indigenous landtenure, and claims to natural resources and the environment.

Audience: Undergraduate

2. Illustrate natural resource and environmental issues important to both American Indians and Wisconsin Indians.

Audience: Undergraduate

3. Identify similarities and differences between indigenous knowledge systems and Western Science.

Audience: Undergraduate

4. Discuss the marked cultural and natural diversity across native North America.

Audience: Undergraduate

5. Recall the many different conceptions of place, nature, and development in native North America.

Audience: Undergraduate

6. Describe the diversity of American Indian experiences and their varied responses to assorted histories of exclusion and marginalization.

Audience: Undergraduate

7. Demonstrate an awareness of history's impact on the present.

Audience: Undergraduate

### **GEOG 355 – AFRICA, SOUTH OF THE SAHARA**

3 credits.

Physical and human distributions and interrelationships, with emphasis on the spatial processes and patterns of modernization.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**GEOG 358 – HUMAN GEOGRAPHY OF SOUTHEAST ASIA**

3 credits.

Introduction to the human geography and history of Southeast Asia, including important political and theoretical issues and policies and positionings of relevance for understanding the spatiality of the region, including the ways that ethnicity and indigeneity are playing out in Southeast Asia and among Southeast Asians in the United States.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2020**GEOG 359 – AUSTRALIA: ENVIRONMENT AND SOCIETY**

3 credits.

An introduction to the human and environmental geography of Australia, including Australian geology, ecology, society, and culture. Topics include analysis of current events in Australia and current resource management problems using Google Earth and other tools. Australia is a settler country, the scene of indigenous genocide, a former English colony, a mythical unknown, a biophysical puzzle, home to a startling diversity of life, a cradle of modern democracy, and a powerful industrial economy with a rich resource base. It thus serves in many ways as a mirror for the US - even matching the US roughly in size, if not in population. The two countries share many elements of a common history and biogeography and yet the human and environmental geographies of the two countries have traced very different paths into the modern world.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**GEOG 365 – GEOGRAPHICAL TRADITIONS AND PRACTICES**

3 credits.

An introduction to the breadth and practice of Geography. Introduces geographic perspectives, theories, themes, and research design. Covers the history of the discipline, applied quantitative and qualitative methodologies used in geographic research, and a selection of subfields within the discipline.

**Requisites:** Declared in Geography or Cartography and Geographic Information Systems undergraduate programs**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Identify and describe careers that are relevant to geographers

Audience: Undergraduate

2. Identify learning and research resources available through the Department of Geography

Audience: Undergraduate

3. Describe and apply key definitions, methods, data sets, and theories commonly used in Geography

Audience: Undergraduate

**GEOG 370 – INTRODUCTION TO CARTOGRAPHY**

4 credits.

A broad introduction to cartography emphasizing the theory and practice of map-making. Topics include the basics in mapping (e.g., scale, spatial reference systems, projections), data acquisition, key techniques for thematic mapping, and principles of cartographic abstraction and design.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**GEOG/ENVIR ST/F&W ECOL/G L E/GEOSCI/LAND ARC 371 – INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING**

3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.

**Requisites:** (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**GEOG/CIV ENGR/ENVIR ST 377 – AN INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS**

4 credits.

Design, implementation and use of automated procedures for storage, analysis and display of spatial information. Covers data bases, information manipulation and display techniques, software systems and management issues. Case studies.

**Requisites:** Sophomore standing, member of Engineering Guest Students, or declared in Capstone Certificate in GIS Fundamentals

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**GEOG 378 – INTRODUCTION TO GEOCOMPUTING**

4 credits.

Introduction to scripting for Geographic Information Science. Geoprocessing with open-source GIS utilities. Python scripting with ArcGIS and open-source libraries.

**Requisites:** CIV ENGR/ENVIR ST/GEOG 377 or concurrent enrollment, or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOG 379 – GEOSPATIAL TECHNOLOGIES: DRONES, SENSORS, AND APPLICATIONS**

3 credits.

Introduction to state-of-the-art technologies that capture properties of the landscape, which is critical to better characterize and understand environmental properties and change. Develop skills in geospatial systems applicable to a variety of research and industry fields. Includes an overview of unmanned aerial systems (drones), light detection and ranging (LiDAR), high-grade Differential GPS (DGPS), Global Navigation Satellite Systems (GNSS), virtual reality, optical sensors, geocaching, and geotagging.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify Unmanned Aerial Systems hardware, safety, regulations, mission planning, and applications for the sciences.

Audience: Both Grad & Undergrad

2. Develop skills in the area of structure-from-motion 3D point cloud model development and visualization.

Audience: Both Grad & Undergrad

3. Identify and use high-grade differential Geographic Positioning Systems and Global Navigation Satellite Systems.

Audience: Both Grad & Undergrad

4. Develop proficiency in LiDAR technologies from satellite, airborne, Unmanned Aerial Systems, and terrestrial, including LiDAR data collection, visualization, and processing.

Audience: Both Grad & Undergrad

5. Use remote sensing instruments, such as multispectral and hyperspectral sensors and thermal cameras.

Audience: Both Grad & Undergrad

6. Become familiar with Virtual reality, augmented reality, geocaching and geotagging.

Audience: Both Grad & Undergrad

7. Apply geospatial technology data collection and processing to research.

Audience: Graduate

**GEOG 399 – INDEPENDENT STUDY**

1-3 credits.

Study under direct guidance of a faculty member. Appropriate for initial exploration of an area of scholarship in Geography through laboratory, field, or literary study.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**GEOG/AMER IND 410 – CRITICAL INDIGENOUS ECOLOGICAL KNOWLEDGES**

3 credits.

Critical Indigenous Ecological Knowledges are a set of diverse understandings, responsibilities, and laws held by distinct groups of Indigenous peoples that are enacted in multiple ways across socio-political and geographical contexts. These knowledges intersect with Indigenous political sovereignties and longstanding, complex, and nuanced relationships to the more-than-human world. Learn multiple entry points to exploring and examining these knowledge sets in the context of what's for now called the U.S. and Canada to think critically about the politics of Nature, environmentalism, race, indigeneity, and colonialism both historically and in the contemporary moment. Reflect upon how critical Indigenous knowledges about ecology, environment, and government have been erased, co-opted, criminalized, and also continually practiced, reimagined, and revitalized in multiple spheres through a range of interdisciplinary, critical, and cutting-edge Native scholarships and writings.

**Requisites:** Junior standing

**Course Designation:** Breadth - Either Humanities or Social Science  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Gain understandings of the diversity of Ecological Thought among Native peoples across the U.S. and Canada.

Audience: Both Grad & Undergrad

2. Gain understanding of the intersections between Critical Indigenous Ecological Knowledges and Indigenous Sovereignty.

Audience: Both Grad & Undergrad

3. Identify forces of colonialism that have negatively shaped access to and continuation of Ecological Knowledges in Native communities both historically and in ongoing forms.

Audience: Both Grad & Undergrad

4. Identify and gain understanding of the ongoing practices of Indigenous Ecological Knowledges that have persisted against colonialism.

Audience: Both Grad & Undergrad

5. Identify and gain understanding of practices of revitalization that Native peoples practice to reestablish and reimagine relationships with their knowledges, languages, and lands

Audience: Both Grad & Undergrad

6. Engage and demonstrate knowledge with the latest and most cutting edge literature in the discipline of Native American and Indigenous Studies.

Audience: Graduate

7. Gain an ability to analyze and synthesize the political, philosophical, and analytical import of Native American and Indigenous Studies, especially in the context relating to Critical Indigenous Ecological Knowledges.

Audience: Graduate

**GEOG/GEOSCI 420 – GLACIAL AND PLEISTOCENE GEOLOGY**

3 credits.

Principles, characteristics and work of glaciers; events of the Pleistocene. Field trip.

**Requisites:** GEOSCI/ENVIR ST 106, GEOSCI 100, 109, ENVIR ST/ GEOG 120, 127, or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOG/C&E SOC/ENVIR ST 434 – PEOPLE, WILDLIFE AND LANDSCAPES**

3 credits.

Explores the relationship between humans and wildlife amid diverse landscapes, both historic and contemporary, tropical and temperate. Investigates how humans shape wild animal populations by modifying physical environments, and by hunting, domesticating and introducing species.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**GEOG/ENVIR ST 439 – US ENVIRONMENTAL POLICY AND REGULATION**

3–4 credits.

Covers a broad cross-section of American environmental policy by focusing on specific statutes and policy arenas. Surveys the basic elements of American environmental policy and regulation with a particular focus on the specific people, sites and scales at which environmental decision-making happens through primary-source case material. Maintains a dual focus on (a) the legal and regulatory aspects of environmental regulation and (b) the specific geographic and social features of actual cases in which regulations and policy are used. Understanding environmental outcomes in a complex society depends on observing both the structure of regulations and the geographic and social context in which such regulations emerge.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOG/ENVIR ST/HISTORY 460 – AMERICAN ENVIRONMENTAL HISTORY**

4 credits.

Survey of interactions among people and natural environments from before European colonization to present. Equal attention to problems of ecological change, human ideas, and uses of nature and history of conservation and environmental public policy.

**Requisites:** Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**GEOG 475 – TOPICS IN GEOGRAPHY**

1–4 credits.

Explores emerging topics in Geography.

**Requisites:** Sophomore standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**GEOG 500 – QUALITATIVE STRATEGIES IN GEOGRAPHY**

3 credits.

Surveys qualitative research and methods in geography, including the human subjects review process, research ethics, preparing for fieldwork, participant observation, interviewing, focus groups, filmic experiences, archival research, participatory action research, analyzing field materials and writing styles in qualitative research.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**GEOG 501 – SPACE AND PLACE: A GEOGRAPHY OF EXPERIENCE**

3 credits.

Explore the concepts of space and place from the perspective of learning and everyday experience. Examines how space and place emerge out of fundamental human needs, experiences, and ways of thinking.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**GEOG/URB R PL 503 – RESEARCHING THE CITY: QUALITATIVE STRATEGIES**

3 credits.

Explores, and applies, qualitative methods in the field of urban geography. An introduction to debates around the analysis and interpretation of qualitative data is provided, grounded in concrete urban research. Participation in a three-day field course is required.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2020**GEOG/GEN&WS 504 – FEMINIST GEOGRAPHY: THEORETICAL APPROACHES**

3 credits.

Provides an opening to some of the key debates and practices in feminist (political) geography. Feminist geography focuses on questions of power, difference, embodiment, and social change. How are feminist geographies in conversation with or part of other fields of inquiry, such as critical ethnic studies and Indigenous studies, which also focus on questions of difference, epistemologies of knowledge, and social transformation and/or decolonization? That is, what are the relationships of feminist geographic inquiry to liberatory projects of ending racism, capitalism, settler colonialism, and heteropatriarchy. Explore how feminist theories and approaches in geography transformed prevailing political geographic questions and concerns, such as power, politics, territory, boundaries, sovereignty, and violence. What do feminist principles and debates over feminist politics and methods bring to (political) geography?

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe the major trajectories of feminist perspectives in (political) geography.

Audience: Both Grad &amp; Undergrad

2. Gain the ability to discuss some of the relationships between feminist geography and broader feminist inquiry and politics.

Audience: Both Grad &amp; Undergrad

3. Gain the ability to develop feminist questions for research and/or action relevant to your project.

Audience: Both Grad &amp; Undergrad

4. Explain the relevance of feminist theory, methods, and/or practice to your project.

Audience: Both Grad &amp; Undergrad

5. Explore how issues of difference and positionality inform your project and study of geography.

Audience: Both Grad &amp; Undergrad

6. Articulate key debates over feminist (geographic) theory for your field and directions these debates suggest for your thesis or dissertation research.

Audience: Graduate

## **GEOG/URB R PL 505 – URBAN SPATIAL PATTERNS AND THEORIES**

3 credits.

Various urban empirical regularities and theories which explain them.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

## **GEOG 507 – WASTE GEOGRAPHIES: POLITICS, PEOPLE, AND INFRASTRUCTURES**

3 credits.

Explores waste as discarded material, a polluting and threatening substance that must be managed, and as a political object. Waste's distribution across space and among groups of people, as well as the reasons for the effects of that distribution, will be examined using geographic perspectives. Who has the ability to avoid or remove themselves from waste? Who must live and work with it? The concept of infrastructure as a set of material things (roads, trucks, boats); laws and regulations; labor relations; and economies of disposal and consumption determining waste flows unites disparate topics and case studies across the semester. Concepts of and social movements for environmental justice are recurring themes.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Define waste as a political object and contrast this definition to popular, technical, and/or managerial definitions.

Audience: Both Grad & Undergrad

2. Apply new social-science definitions of infrastructure to waste geographies.

Audience: Both Grad & Undergrad

3. Appraise their own role(s) in various waste geographies and describe waste's ubiquity.

Audience: Both Grad & Undergrad

4. Explain the factors that produce uneven waste geographies, including the roles class, gender, and race play in personal and professional proximity to and distance from wastes of all kinds.

Audience: Both Grad & Undergrad

5. Make connections between, on the one hand, how problems having to do with waste are defined and, on the other hand, proposed solutions to 'the waste problem'.

Audience: Both Grad & Undergrad

6. Apply the lessons garnered from waste geographies to their research and disciplinary specialties.

Audience: Graduate

7. Synthesize major course concepts to frame novel and innovative research questions about waste geographies.

Audience: Graduate

8. Communicate complex conceptual arguments clearly and relate them to case studies.

Audience: Graduate

9. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of waste and waste management.

Audience: Both Grad & Undergrad

10. Describe the social, economic, and environmental dimensions of recycling and other waste reduction/management strategies and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Both Grad & Undergrad

**GEOG 510 – ECONOMIC GEOGRAPHY**

4 credits.

Theoretical aspects of spatial economic distributions and locational analysis.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOG 511 – CRITICAL SOCIAL THEORY**

3 credits.

An introduction to many key movements and thinkers within Critical Social Theory. Explores the changing histories and presents of the field through a range of primary works from philosophy, critical theory, and geography – paying particular attention to the points where social theory intersects with problems of space and place. Covers classic problems in social theory ranging from theories of the political-economic constitution of the social (Marxism) and its extensions into the culture (the Frankfurt School) to a range of mid- to late-twentieth-century epistemological interventions framed around questions of difference and identity. Recent contestations and reformulations that have surfaced across ontological, decolonial, non-human, algorithmic, and other reimaginings and extensions of the social are examined.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Describe the history of and key perspectives in Critical Social Theory.

Audience: Undergraduate

2. Read and research theoretical scholarship.

Audience: Undergraduate

3. Identify effective strategies for developing and conducting theory-driven research.

Audience: Undergraduate

4. Explain approaches to researching socio-spatial topics.

Audience: Undergraduate

5. Write and edit academic theoretical research.

Audience: Undergraduate

6. Describe the nuances of the key debates in Critical Social Theory.

Audience: Graduate

7. Identify the key issues in recent socio-spatial theory and the implications for, refractions through, and/or reactions by broader contemporary intellectual movements.

Audience: Graduate

8. Design and complete theoretical/critical scholarship.

Audience: Graduate

9. Guide classroom discussions.

Audience: Graduate

10. Develop a personalized set of approaches to mediating challenging geographical, critical and theoretical concepts for a broad range of learners.

Audience: Graduate

**GEOG 513 – QUEER GEOGRAPHIES**

3 credits.

Explores several key events, sites, thinkers, and texts that contribute to the social, personal, and intellectual landscapes of Queer Geographies. An invitation to survey and reflect on queer critical strategies that sample, record, and remix constellations of relationships between theory, space, sexuality, gender, and identity. It foregrounds modes of queer spacing and placemaking in academic and popular works devoted to queer lives, studies, sexualities, narratives, publics and privates, joys and griefs, art, theory, and beyond. Offers a range of strategies for reading, interpreting, and developing nuanced scholarly interventions and theories. Question and reimagine normative notions of the personal, the social, and the socio-spatial.

**Requisites:** Junior standing**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe the history of and key perspectives and debates in Queer Studies and Queer Theory.

Audience: Both Grad &amp; Undergrad

2. Read and research theoretical scholarship.

Audience: Undergraduate

3. Describe strategies for developing and conducting theory-driven research.

Audience: Undergraduate

4. Identify approaches to researching socio-spatial topics.

Audience: Undergraduate

5. Compose and edit academic theoretical/critical scholarship.

Audience: Both Grad &amp; Undergrad

6. Recall the key issues in recent socio-spatial theory and the implications for, refractions through, and/or reactions by broader contemporary intellectual movements.

Audience: Graduate

7. Identify pedagogical strategies for guiding classroom discussions.

Audience: Graduate

8. Develop a personalized set of approaches to mediating challenging geographical, critical, and theoretical concepts for a broad range of learners.

Audience: Graduate

**GEOG/GEN&WS 514 – FEMINIST GEOGRAPHY: METHODOLOGICAL APPROACHES**

3 credits.

An introduction to foundational approaches to feminist qualitative research in human geography. Research is not separate from a social world that historically has been and continues to be shaped by (settler) colonial, racialized, gendered, sexualized, and class-inflected relations of power (among others). Research practices and "findings" have been and continue to be used to inform and rationalize relations of oppression, exploitation, and violence. For feminist researchers, then, questions of power, difference, and social change are central to how we design and conduct research. Engages in political-ethical discussions about the positionality and responsibilities of ourselves as researchers, and how our knowledge production can reproduce and challenge prevailing relations of power.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Discuss the interplay between epistemology and methodology.

Audience: Undergraduate

2. Explain clearly how their epistemological positions inform their methodological decisions.

Audience: Graduate

3. Discuss the political dynamics shaping knowledge production, and how feminist, decolonial, and anti-racist projects have reshaped these dynamics.

Audience: Both Grad &amp; Undergrad

4. Discuss the historical constructions of 'the field,' and how feminist critiques and research practices challenge expectations regarding field work experiences.

Audience: Both Grad &amp; Undergrad

5. Discuss how feminist research ethics extend researchers' ethical obligations of beneficence, respect for research subjects, and justice (Belmont Report).

Audience: Both Grad &amp; Undergrad

6. Evaluate the virtues, dilemmas, and limitations of common qualitative methods.

Audience: Both Grad &amp; Undergrad

7. Develop a compelling rationalization for research questions and methodologies (design) for your qualitative project.

Audience: Undergraduate

8. Articulate how feminist principles influence your research questions and methodologies.

Audience: Graduate

9. Explain how social positionality shapes the research process, and develop a practice of self-reflexivity.

Audience: Both Grad &amp; Undergrad

**GEOG 515 – TRANS AUTOTHEORIES**

3 credits.

Offers an in-depth examination of trans lives, selves, and ways of knowing. Focuses on the trans "I" as it appears in autobiography, memoir, theory, performance, visual arts, music, spacing, place making, zines, and vlogs. These works ask how styles of self-making ("auto") might lead to new and changing conceptions of trans lives, worlds, and social formations ("theory"). The trans artists and writers explored fashion selves into prisms to fracture, negotiate, meditate upon, think, and re/present the encounters, becomings, transitions, and enframings that constitute trans existence. This "auto-theoretical" strategy reimagines genre, style, space, and media to create launching points for new trans aesthetics, theories, joys, and struggles. The polyphonic voices of these trans selves, taken together, bring a trans "we" into view, creating a discursive trans space made material.

**Requisites:** Junior standing**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Explain the history of and critical perspectives in Trans Studies/Theory.

Audience: Undergraduate

2. Read and research theoretical scholarship.

Audience: Undergraduate

3. Identify practical strategies for developing and conducting theory-driven research.

Audience: Undergraduate

4. Describe approaches to researching socio-spatial topics.

Audience: Undergraduate

5. Demonstrate the basics of writing and editing academic theoretical research.

Audience: Undergraduate

6. Recall the key debates in Trans Studies/Theory.

Audience: Graduate

7. Identify critical issues in recent socio-spatial theory and the implications for, refractions through, and/or reactions by broader contemporary intellectual movements.

Audience: Graduate

8. Design and complete theoretical, critical scholarship.

Audience: Graduate

9. Describe pedagogical strategies for guiding classroom discussions.

Audience: Graduate

10. Develop personalized set of approaches to mediating challenging geographical, critical, and theoretical concepts for a broad range of learners.

Audience: Graduate

**GEOG 518 – POWER, PLACE, IDENTITY**

3 credits.

Advanced political geography course that explores reconceptualizations of power, place, and identity, as well as the interactive forces at work that continually reshape place-making and the inter-related processes of identification and differentiation.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**GEOG 523 – ADVANCED PALEOECOLOGY: SPECIES RESPONSES TO PAST ENVIRONMENTAL CHANGE**

3 credits.

Geographic and temporal responses of plant species and terrestrial ecosystems to the major environmental changes of the last 1,000,000 to 1,000 years, particularly glacial-interglacial changes in climate, carbon dioxide, and the end-Pleistocene extinctions of large animals. Key concepts include novel and no-analog ecosystems, abrupt climate and ecological change, and megaherbivore-vegetation interactions. This time period is of direct interest to global change ecologists and biogeographers studying species responses to 21st-century climate change. Hands-on practice emphasizes multivariate data analysis and quantitative paleoecological inference.

**Requisites:** Junior standing**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2022**Learning Outcomes:** 1. Critically evaluate the primary literature.

Audience: Both Grad &amp; Undergrad

2. Describe the fundamental processes governing species responses to past and present climate change.

Audience: Both Grad &amp; Undergrad

3. Obtain and analyze paleoecological data using multivariate methods.

Audience: Both Grad &amp; Undergrad

4. Critically analyze the readings in light of prior knowledge gained in other advanced courses.

Audience: Graduate

5. Conduct new analyses by applying these methods to new data and questions.

Audience: Graduate

**GEOG/SOIL SCI 525 – SOIL GEOMORPHOLOGY**

3 credits.

Soil development as related to landscape throughout the Quaternary; focusing on the relationship of soils to climate and vegetation, landscape evolution, and time; principles of soil stratigraphy; case histories of soil geomorphic studies; field trips. Students should have completed one course in geomorphology to feel comfortable with the course content.

**Requisites:** SOIL SCI 325 or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**GEOG/SOIL SCI 526 – HUMAN TRANSFORMATIONS OF EARTH SURFACE PROCESSES**

3 credits.

Takes an earth systems approach to explore the role of human societies in shaping earth surface processes from local to global scales. We address how alterations to our landscapes and waterways affect biological, physical and chemical interactions among our biosphere, geosphere, hydrosphere and atmosphere. We discuss methods used to distinguish the "human impact" from background variability.

**Requisites:** Junior standing or ENVIR ST/GEOG 120

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOG/ENVIR ST/LAND ARC/URB R PL 532 – APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN PLANNING**

3 credits.

Explores planning-related Geographic Information System (GIS) data, applications, analytical tools, and implementation issues.

**Requisites:** GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify how planning agencies use GIS.

Audience: Both Grad & Undergrad

2. Explain the nature, characteristics, and possible ways of analyzing spatial data in a planning context.

Audience: Both Grad & Undergrad

3. Communicate geospatial data and analyses effectively.

Audience: Both Grad & Undergrad

4. Obtain and analyze geospatial data using a range of spatial analysis tools for a number of planning practices.

Audience: Both Grad & Undergrad

5. Conduct site-selection and land-suitability analysis.

Audience: Both Grad & Undergrad

6. Identify ethical issues surrounding access to and use of geospatial data.

Audience: Both Grad & Undergrad

7. Analyze and provide written feedback on undergraduate student presentations.

Audience: Graduate

8. Produce a memo on land-suitability analysis.

Audience: Graduate

### **GEOG/ENVIR ST 534 – ENVIRONMENTAL GOVERNANCE: MARKETS, STATES AND NATURE**

3 credits.

Covers real-world questions of how the environment is managed and governed through state policy, economics, and social institutions. Includes strategies within and outside of the formal institutions of government, and extends the discussion to the commodification of nature and the use of science to understand and govern the environment. Also includes case studies of environmental governance in water, carbon, species, and urban sustainability.

**Requisites:** Sophomore standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **GEOG/ENVIR ST 537 – CULTURE AND ENVIRONMENT**

4 credits.

Geographic approaches to culture-nature relationships, including human perception of, use of, and adaptation to the physical environment, with emphasis on traditional subsistence systems; selected topics from contemporary and historical sources.

**Requisites:** GEOG 359, ENVIR ST/GEOG 337, 339, 439, AMER IND/ ENVIR ST/GEOG 345, or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **GEOG 538 – THE HUMID TROPICS: ECOLOGY, SUBSISTENCE, AND DEVELOPMENT**

4 credits.

Description and analysis of humid-tropical ecosystems, with emphasis on the relationships, production potential, and human modification of biotic resources.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **GEOG/ENVIR ST 557 – DEVELOPMENT AND ENVIRONMENT IN SOUTHEAST ASIA**

3 credits.

Examines the political, socio-cultural, economic and ecological aspects of contemporary development and human-environment relations in mainland Southeast Asia, applying a critical and theoretically informed perspective, and focusing largely on rural issues.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **GEOG 560 – ADVANCED QUANTITATIVE METHODS**

3 credits.

Selected topics in the analysis of spatial distributions with emphasis on multivariate techniques.

**Requisites:** Junior standing or GEOG 360

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### **GEOG 565 – COLLOQUIUM FOR UNDERGRADUATE MAJORS**

3 credits.

Orientation to geography as a scholarly discipline; its development, objectives, essential concepts, methods of investigation, institutions, opportunities, problems, and trends.

**Requisites:** Declared in Geography or Cartography and Geographic Information Systems undergraduate programs

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **GEOG 566 – HISTORY OF GEOGRAPHIC THOUGHT**

3 credits.

An analysis of the development and significance of basic geographic concepts and theories. Major emphasis on concepts of place, spatial relations, landscape, and human-environment relations.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**GEOG 572 – GRAPHIC DESIGN IN CARTOGRAPHY**

3-4 credits.

Study of the map as a graphic communication, the technical and perceptual aspects of its organization, symbolic coding, color and lettering.

**Requisites:** GEOG 370 or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**GEOG 573 – ADVANCED GEOCOMPUTING AND GEOSPATIAL BIG DATA ANALYTICS**

4 credits.

Geospatial big data is an extension of big data with an emphasis on the geospatial component. It is used to describe large volumes of georeferenced data about various aspects of the environment and society captured by millions of environmental and human sensors. An introduction to the theory, techniques, and analytical methods for geospatial big data. Methods for storing, processing, analyzing, and visualizing various types of geospatial big data using advanced Python programming will be introduced. Designed for students who have programming experience and want to reinforce their programming skills and learn AI and machine learning methods for solving geospatial big data problems.

**Requisites:** GEOG 378, COMP SCI 220, or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize the fundamental concepts of geospatial big data.

Audience: Both Grad & Undergrad

2. Describe how to develop computational models and analytical methods for geospatial big data.

Audience: Both Grad & Undergrad

3. Identify the challenges in storing, managing, processing, analyzing, visualizing, and verifying the quality of data.

Audience: Both Grad & Undergrad

4. Recall the major high-performance platforms for big data processing.

Audience: Both Grad & Undergrad

5. Use Python programming for (spatiotemporal) data analysis and machine-learning tasks.

Audience: Both Grad & Undergrad

6. Collaborate in teams and complete tasks under time pressure.

Audience: Both Grad & Undergrad

7. Lead efforts on teamwork and geospatial problem solving skill development.

Audience: Graduate

8. Demonstrate higher-order synthesis and spatial analysis skills in spatial data science.

Audience: Graduate

### **GEOG 574 – GEOSPATIAL DATABASE DESIGN AND DEVELOPMENT**

4 credits.

Introduces the basic concepts, techniques and methodologies for designing and implementing a spatial database to prepare for professional work as a GIS designer, analyst, specialist or researcher. Design conceptual spatial database models and implement them within specific spatial data management systems (DBMS). Covers basic SQL database language and the latest developments in database systems (e.g. NoSQL database) for managing and mining spatial big data such as social media datasets and GPS trajectories.

**Requisites:** GEOG 170, GEOG 370, ENVIR ST/CIV ENGR/GEOG 377 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **GEOG 575 – INTERACTIVE CARTOGRAPHY & GEOVISUALIZATION**

4 credits.

Examines emerging topics related to the design of user interfaces for manipulating maps, focusing on new cartographic challenges in Interactive Cartography, Geographic Visualization, and Geovisual Analytics and drawing upon relevant insight in Human-Computer Interaction, Information Visualization, and Usability Engineering.

**Requisites:** GEOG 370, 378, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **GEOG 576 – GEOSPATIAL WEB AND MOBILE PROGRAMMING**

4 credits.

Covers the programming concepts and skills for understanding construction and implementation of high quality spatial web portal and mobile Apps to support geospatial data access, analysis, sharing, and synthesis over the internet. Builds on basic programming experience.

**Requisites:** (GEOG 170, GEOG 370, or CIV ENGR/ENVIR ST/GEOG 377) and (GEOG 378, COMP SCI 300, COMP SCI 369, or COMP SCI 400), or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **GEOG 578 – GIS APPLICATIONS**

4 credits.

Application and use of GIS techniques in physical and human geography. Includes an introduction to a generic framework of GIS applications, case studies, and student projects. Cases range from urban and regional geography, to marketing geography, and to physical and environmental geography.

**Requisites:** GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **GEOG 579 – GIS AND SPATIAL ANALYSIS**

4 credits.

Principles and algorithms for spatial analysis in geographic information systems. A theoretical and practical examination of analytical methods used in GIS, including point, line and polygon processing, interpolation, smoothing, spatial overlay and query, network analysis, terrain analysis, and classification.

**Requisites:** GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **GEOG 602 – INTERNSHIP**

1-2 credits.

Individual course of study for those completing an internship.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2019

### **GEOG 675 – SPECIAL TOPICS IN GEOGRAPHY**

3 credits.

Explores emerging topics in human and people-environment geography.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**GEOG 676 – SPECIAL TOPICS IN GEOGRAPHY**

3 credits.

Explores emerging topics in physical geography.

**Requisites:** Junior standing**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2019**GEOG 681 – SENIOR HONORS THESIS**

2-3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Fall 2024**GEOG 682 – SENIOR HONORS THESIS**

2-3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOG 691 – SENIOR THESIS**

2-3 credits.

Individual mentored study for seniors completing theses as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2021**GEOG 692 – SENIOR THESIS**

2-3 credits.

Individual mentored study for seniors completing theses as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2022**GEOG 698 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2016**GEOG 699 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**GEOG 765 – GEOGRAPHICAL INQUIRY AND ANALYSIS: AN INTRODUCTION**

1 credit.

Geographic perspectives and analyses: history of the discipline, issues and research frontiers, interests and perspectives of Madison faculty, structure of graduate study in the department, research facilities and opportunities.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**GEOG 766 – GEOGRAPHICAL INQUIRY AND ANALYSIS: TECHNIQUES**

1-3 credits.

Engaging in geographic research: analysis of successful proposals and published papers and books; different approaches to geographic research; writing of proposals for students' own research.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOG 777 – CAPSTONE IN GIS DEVELOPMENT**

4 credits.

Covers practical and challenging cases in GIS which require programming and other GIS development skills (such as geospatial algorithm development and implementation). Cases cover the wide spectrum of GIS development projects in the GIS professions ranging from GIS data management, advanced spatial analysis, spatial database development and web/mobile programming, to cartography/geovisualization. Focuses on integration of skills from other courses into a GIS development project.

**Requisites:** GEOG 378, 572, 574, 575, 576, 579 and graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025

**GEOG 778 – PRACTICUM IN GIS DEVELOPMENT**

4 credits.

Develop the ability to conceive and manage a real-world GIS development project, and to design a plan for solving the project.

**Requisites:** GEOG 378, 572, 574, 575, 576, 579 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**GEOG 799 – INDEPENDENT READING**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**GEOG 900 – SEMINAR IN GEOGRAPHY**

1-3 credits.

Surveys recent and classic works in geography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

**GEOG 901 – SEMINAR IN CULTURAL GEOGRAPHY**

2-3 credits.

Surveys recent and classic works in cultural and human geography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**GEOG 918 – SEMINAR IN POLITICAL GEOGRAPHY**

2-3 credits.

Surveys recent and classic works in political geography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEOG 920 – SEMINAR IN PHYSICAL GEOGRAPHY**

1-3 credits.

Surveys recent and classic works in physical geography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**GEOG 930 – SEMINAR IN PEOPLE-ENVIRONMENT GEOGRAPHY**

2-3 credits.

Surveys recent and classic works in people-environment geography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEOG/AGROECOL/ATM OCN/BOTANY/ENTOM/ENVIR ST/  
F&W ECOL/ZOOLOGY 953 – INTRODUCTION TO ECOLOGY  
RESEARCH AT UW-MADISON**

1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison  
Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison  
Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology  
Audience: Graduate

4. Develop appropriate expectations for advisors and advisees  
Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics  
Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science  
Audience: Graduate

**GEOG 970 – SEMINAR IN GEOGRAPHIC INFORMATION SCIENCE**

1-3 credits.

Surveys recent and classic works in cartography and geographic information science.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEOG/ATM OCN/BOTANY/ENVIR ST/F&W ECOL/GEOSCI/  
ZOOLOGY 980 – EARTH SYSTEM SCIENCE SEMINAR**

1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**GEOG/AAE/ANTHRO/C&E SOC/HISTORY/LACIS/POLI SCI/  
PORTUG/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR  
IN THE LATIN-AMERICAN AREA**

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**GEOG/AFRICAN/ANTHRO/ECON/HISTORY/POLI SCI 983 –  
INTERDEPARTMENTAL SEMINAR IN AFRICAN STUDIES TOPICS**

3 credits.

Interdisciplinary inquiry in African societies and cultures.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop in-depth knowledge in a sub-field of specialization within African studies

Audience: Graduate

2. Acquire and demonstrate understanding of major theories, approaches, concepts, currently informing African studies

Audience: Graduate

3. Understand your process of learning and possess the capacity to intentionally seek, evaluate, and learn from information, and to recognize and reduce bias in thinking.

Audience: Graduate

4. Gain firm knowledge of existing research in African studies

Audience: Graduate

5. Develop and improve speaking, readings, listening, and writing skills

Audience: Graduate

6. Write and speak across disciplinary boundaries

Audience: Graduate

7. Analyze texts from various theoretical and critical perspectives

Audience: Graduate

**GEOG 990 – RESEARCH AND THESIS**

1-9 credits.

Individual mentored study for completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**GEOG 999 – INDEPENDENT WORK**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

# GEOLOGICAL ENGINEERING (GLE)

## GLE 1 – COOPERATIVE EDUCATION PROGRAM

1 credit.

Work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career in industry.

**Requisites:** Sophomore standing

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Undergraduate

## GLE 171 – INTRODUCTION TO GEOLOGICAL ENGINEERING

1 credit.

Comprehensive introduction to engineering applications of earth sciences.

Exploitation and management of geologic resources; mitigation of geologic hazards such as landslides and earthquakes; abatement of environmental problems such as land and water pollution; design of surface and underground excavations; principal methods of geological engineering.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

## GLE/CIV ENGR 291 – PROBLEM SOLVING USING COMPUTER TOOLS

4 credits.

Introduction to engineering computations with emphasis on computer tools and computer based measurement, data collection, and processing. Tools will include computer aided design, spreadsheets, other engineering computation tools, and hardware and software for laboratory and spatial measurements.

**Requisites:** MATH 222 or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use spreadsheet software to perform fundamental civil, environmental, and geological engineering calculations, analyze datasets using logical filters, and interpret numeric data meant to represent time and text values

Audience: Undergraduate

2. Use computer programming as a tool to streamline engineering data analysis tasks, create visualizations, obtain numerical approximations, and retrieve data from local and remote (web-based) data sources

Audience: Undergraduate

3. Use automatic levels, total stations, and aerial photography to conduct land surveying operations and collect the type of geospatial data required for creating drawings that support engineering design

Audience: Undergraduate

4. Explain how measuring devices (data acquisition systems and sensors) work, use measuring devices to record/monitor the physical properties of a system, and use sensor readings as the foundation to control devices in the physical world

Audience: Undergraduate

**G L E/CIV ENGR 330 – SOIL MECHANICS**

3 credits.

Basic principles of soil mechanics and fundamentals of application in engineering practice; soil composition and texture; classification; permeability and seepage; consolidation; settlement; shear strength; lateral earth pressures and retaining structures, shallow and deep foundations, slope stability; subsurface exploration; laboratory characterization of physical and engineering properties of soils.

**Requisites:** E M A 303 or M E 306, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the physicochemical characteristics of soils and their importance to the engineering behavior of soils.

Audience: Both Grad & Undergrad

2. Define the factors which control the physical, mechanical and hydraulic behavior of soils.

Audience: Both Grad & Undergrad

3. Run the laboratory tests used for the determination of physicochemical properties of soils, the engineering classification of soils, hydraulic properties, and the stiffness and shear strength properties.

Audience: Both Grad & Undergrad

4. Perform analyses in each area described in the course and understand the limitations to these analyses.

Audience: Both Grad & Undergrad

5. List basic problems in Soil Mechanics design and describe how these problems are tackled.

Audience: Both Grad & Undergrad

6. Experimentally assess the interaction of multiple parameters controlling the physical, mechanical and hydraulic behavior of soils; perform more advanced 2D or 3D analyses in one area described in the course and understand the limitations of these analyses; or summarize the state of the art in one research or engineering-applied area described in the course.

Audience: Graduate

**G L E/GEOSCI 350 – INTRODUCTION TO GEOPHYSICS: THE DYNAMIC EARTH**

3 credits.

Methods of geophysics applied to earth structure and plate tectonics. Principles of seismology, gravity, geodesy, magnetism and heat flow.

**Requisites:** MATH 217, 221, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**G L E/GEOSCI 360 – PRINCIPLES OF MINERALOGY**

3 credits.

Minerals, their physical and chemical properties, crystallography, and geologic significance.

**Requisites:** (GEOSCI 100 or ENVIR ST/GEOSCI 106) and (CHEM 103, 109, 115, or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**G L E/GEOSCI 370 – ELEMENTARY PETROLOGY**

3 credits.

Igneous and metamorphic rocks, studied in hand sample and thin section.

**Requisites:** G L E/GEOSCI 360, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**G L E/ENVIR ST/F&W ECOL/GEOG/GEOSCI/LAND ARC 371 – INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING**

3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.

**Requisites:** (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**G L E 401 – SPECIAL TOPICS IN GEOLOGICAL ENGINEERING**

1-3 credits.

Various topics in the field of geological engineering.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

**G L E/CIV ENGR 421 – ENVIRONMENTAL SUSTAINABILITY ENGINEERING**

3 credits.

Uses the three paradigms of sustainability (environmental, social, and economic) for strategic environmental initiatives in an engineering setting. Proactive environmental management opportunities, including practices of pollution prevention, industrial ecology, and design for the environment. A systems approach to manufacturing, examining the life cycle of products, incorporating total cost accounting, extended producer responsibility, and design for end-of-life.

**Requisites:** (MATH 217 or 221) and (CHEM 104 or 109), or graduate/professional standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate why sustainability is important and relevant within the practice of engineering

Audience: Both Grad & Undergrad

2. Apply sustainability tools such as industrial ecology, life cycle assessment, economic assessment, material flow analysis, and criticality to inform engineering decisions

Audience: Both Grad & Undergrad

3. Analyze sustainability issues and/or practices using a systems-based approach

Audience: Both Grad & Undergrad

4. Describe the social, economic, and environmental dimensions of engineering and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course

Audience: Both Grad & Undergrad

5. Identify and critique recent peer reviewed sustainability literature

Audience: Graduate

**G L E/CIV ENGR 430 – INTRODUCTION TO SLOPE STABILITY AND EARTH RETENTION**

1 credit.

Introduction to theory and approaches commonly used in geotechnical engineering practice for design and analysis of slopes and earth retaining structures.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Calculate the factor of safety of natural or engineered slopes

Audience: Both Grad & Undergrad

2. Design simple earth retaining structures

Audience: Both Grad & Undergrad

3. Perform additional design strategies to design complex slope or retaining structures

Audience: Graduate

4. Lead a team of undergraduate students for the final design project exercise

Audience: Graduate

**G L E/GEOSCI 431 – SEDIMENTARY & STRATIGRAPHY LAB**

1 credit.

Covers Sedimentology and Stratigraphy; emphasizes qualitative and quantitative description and interpretation of sediments and sedimentary deposits.

**Requisites:** GEOSCI 204 or G L E/GEOSCI 360, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **G L E/CIV ENGR 432 – INTRODUCTION TO SHALLOW AND DEEP FOUNDATION SYSTEMS**

1 credit.

Introduction to theory and approaches commonly used in geotechnical engineering practice for design and analysis of slopes and earth retaining structures.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply methods and requirements of a subsurface investigation program

Audience: Both Grad & Undergrad

2. Collect sufficient information to design basic shallow or deep foundation systems

Audience: Both Grad & Undergrad

3. Fulfill the design criteria for different structures and facilities

Audience: Both Grad & Undergrad

4. Design shallow and deep foundation structures

Audience: Both Grad & Undergrad

5. Perform additional design strategies to design the foundation of a soil retaining structure

Audience: Graduate

### **G L E/CIV ENGR 434 – INTRODUCTION TO UNDERGROUND OPENINGS ENGINEERING**

1 credit.

Subsurface stress; rock failure criteria; openings in competent rock; openings in layered rocks; plastic behavior around openings in weak rock; stereographic projections and stereonet; block theory; rock bolts; stabilization methods and design.

**Requisites:** CIV ENGR/G L E 330, GEOSCI/CIV ENGR/G L E/ M S & E 474 or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Predict stress concentrations around underground openings

Audience: Both Grad & Undergrad

2. Identify weak points around underground openings in conjunction with the rock mass type information

Audience: Both Grad & Undergrad

3. Design openings to minimize hazard

Audience: Both Grad & Undergrad

4. Design reinforcement strategies

Audience: Both Grad & Undergrad

5. Perform advanced design strategies

Audience: Graduate

### **G L E/CIV ENGR/ENVIR ST/GEOSCI 444 – PRACTICAL APPLICATIONS OF GPS SURVEYING**

2 credits.

Global positioning system surveying for field applications. Signals. Coordinate systems. Datums. Cartographic projections. Satellite orbits. Choosing hardware. Strategies for data collection and analysis. Assessing uncertainty. Geocoding satellite images. Integrating data with Geographic Information Systems. Emerging technologies.

**Requisites:** MATH 211, 217, 221, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**G L E/GEOSCI 455 – STRUCTURAL GEOLOGY**

4 credits.

Principles of rock deformation, structures in layered rocks, structural analysis, intrusive structures. Lab: three-dimensional problems involving structural concepts; field trip.

**Requisites:** GEOSCI 202, 204, and (G L E/GEOSCI 370 or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**G L E/CIV ENGR/GEOSCI/M S & E 474 – ROCK MECHANICS**

3 credits.

Classification of rock masses, stress and strain in rock, linear and non-linear behavior of rock, failure mechanisms, state of stress in rock masses, lab testing, geological and engineering applications.

**Requisites:** E M A 201, PHYSICS 201, 207, or 247, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Measure basic index properties for rock mass classification

Audience: Both Grad & Undergrad

2. Describe stress and strain in continuums

Audience: Both Grad & Undergrad

3. Describe the factors which control the mechanical behavior of rocks

Audience: Both Grad & Undergrad

4. Apply basic concepts of rock mechanics and rock physics to analyze basic geomechanical engineering problems

Audience: Both Grad & Undergrad

5. Prepare rock samples for mechanical testing, conduct experiment, and analyze experimental data to obtain rock strength properties

Audience: Both Grad & Undergrad

6. Describe analytically time-dependent rock behaviors

Audience: Graduate

**G L E 479 – GEOLOGICAL ENGINEERING DESIGN**

4 credits.

A practical problem in an area of geological engineering (such as development of a geologic resource or design of a structure in soil and/or rock) is selected, and then the principles and processes of design and analysis are applied to the solution of the problem.

**Requisites:** Senior standing, declared in Geological Engineering BS, and CIV ENGR/G L E 530, 532, 535, 635, 735, GEOSCI/G L E 629, CIV ENGR 414, 427, 514, or (CIV ENGR/G L E 430, 432, and 434)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate and apply the knowledge gained in prior coursework into a simulated real-world design environment

Audience: Undergraduate

2. Use open-ended problem-solving skills

Audience: Undergraduate

3. Work effectively in a multidisciplinary team environment

Audience: Undergraduate

4. Use oral and written communication skills to articulate proposed and completed work

Audience: Undergraduate

5. Explain basic concepts in management, business, and public policy

Audience: Undergraduate

6. Explain the importance of professional licensure

Audience: Undergraduate

7. Identify common failure mechanisms of a component, process, or system and their causes and prevention

Audience: Undergraduate

**G L E 489 – HONORS IN RESEARCH**

1-3 credits.

Undergraduate honors research projects supervised by faculty members.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**G L E/CIV ENGR 511 – MIXING AND TRANSPORT IN THE ENVIRONMENT**

3 credits.

Application of fluid mechanics to understand the mixing and transport of contaminants, pollutants, and other solutes in the environment. Introduction to chemical and biochemical transformation processes as well as boundary interactions at the air-water and sediment-water interfaces. Transport phenomena: diffusive processes, advective processes, turbulent diffusion, and shear flow dispersion. Introduction to both analytical and computational solutions with applications to mixing and transport in rivers, lakes, the atmosphere, and coastal waters.

**Requisites:** (CIV ENGR/G L E 291, COMP SCI 220, or E C E 203) and (CIV ENGR 310 or M E 363), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Recall the principles of conservation of mass, advective mass flux and Fick's law for diffusive mass flux

Audience: Both Grad & Undergrad

2. Apply the fundamental solution to the diffusion equation and use the principle of superposition to construct new solutions

Audience: Both Grad & Undergrad

3. Calculate the diffusivity given data of concentration distribution over time, and conversely, calculate the concentration distribution over time given the diffusivity

Audience: Both Grad & Undergrad

4. Calculate new solutions to advection-diffusion equation by modifying known solutions to include first-order reactions

Audience: Both Grad & Undergrad

5. Explain the differences between molecular diffusion, turbulent diffusion and shear flow dispersion

Audience: Both Grad & Undergrad

6. Apply models of mass transfer at boundaries to compute interfacial mass exchange between air-water and sediment-water interfaces

Audience: Both Grad & Undergrad

7. Evaluate the importance of mixing and transport processes in environmental processes and assess the utility of different types of solutions.

Audience: Graduate

**G L E/CIV ENGR 520 – REACTIVE PROCESSES FOR SUSTAINABLE ENERGY AND RESOURCE PRODUCTION**

3 credits.

Key scientific concepts related to fossil and renewable energy resources. Apply the fundamentals of thermodynamics and chemical kinetics at solid interfaces to better understand the science behind using fossil and renewable energy resources. Evaluate the impacts of existing and emerging energy technologies on the environment.

**Requisites:** Senior standing, (MATH 211, 217, or 221), (CHEM 103, 104, or 109), and CIV ENGR 320, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify major issues pertaining to energy and environmental science and engineering, and evaluate the sustainability of technologies grounded in the science of material and energy balances and reaction kinetics

Audience: Both Grad & Undergrad

2. Derive and solve mathematical expressions to describe energy and material transformations

Audience: Both Grad & Undergrad

3. Critically evaluate and present their analysis and synthesis of literature in this area of energy and environment

Audience: Both Grad & Undergrad

4. Evaluate and propose novel technological solutions grounded in the fundamentals of thermodynamics of kinetics

Audience: Graduate

5. Analyze and defend emerging technologies in the area of energy and environment

Audience: Graduate

**G L E/CIV ENGR 530 – SEEPAGE AND SLOPES**

3 credits.

Practical aspects of seepage effects and ground water flow. Stability of natural and man-made slopes under various loading conditions. Design and construction of earth dams and embankments. Flow net and its use; wells; filters; total and effective stress methods of slope analysis; selection of pertinent soil parameters.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Characterize and classify slope failure

Audience: Both Grad & Undergrad

2. Identify stability risk factors in generalized slope design

Audience: Both Grad & Undergrad

3. Apply soil and rock mechanics and strength principles in the context of slope stability investigation and design

Audience: Both Grad & Undergrad

4. Determine strength parameters of soil materials under saturated and unsaturated conditions

Audience: Both Grad & Undergrad

5. Understand pore fluid pressure in underground environments and its effect on manmade structures integrated within the soil as well as the failure potential of differing geometries

Audience: Both Grad & Undergrad

6. Design slope remedial plans for earth structures subjected to varying physical properties, overburden and pore pressures, and restrictive geometries

Audience: Both Grad & Undergrad

7. Act as leaders of the small groups they have been assigned for the mini design project

Audience: Graduate

**G L E/CIV ENGR 532 – FOUNDATIONS**

3 credits.

Shallow and deep foundations. Analysis and design of footings, mats, piers and piles, and related fill and excavation operations. Consolidation settlement, time rate of settlement, stress distribution, elastic (immediate) settlement, load bearing capacity; methods to reduce settlements and increase shear strength; the selection of a foundation system.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Provide examples of when and where to consider shallow foundation systems in lieu of deep foundation systems and where stone columns or rammed aggregate piers are appropriate

Audience: Both Grad & Undergrad

2. Scope and Prepare a Foundation Investigation, including the equipment and standards used for subsurface exploration and the advantages/disadvantages therein

Audience: Both Grad & Undergrad

3. Calculate Allowable Bearing Pressure using (a) presumptive values, (b) the bearing capacity equation and (c) in situ approaches

Audience: Both Grad & Undergrad

4. Design a safe spread foundation system where structural capacity exceeds demand

Audience: Both Grad & Undergrad

5. Design a drilled shaft and a driven pile for axial loading considering vertical loading and a settlement estimate

Audience: Both Grad & Undergrad

6. Prepare a bid sheet, plan set, and set of specifications for a successful foundation design

Audience: Both Grad & Undergrad

7. Use soil moduli in the application of a laterally loaded deep-foundation system using an appropriate software program with a hand-calculated backcheck

Audience: Graduate

**G L E/CIV ENGR 534 – NONDESTRUCTIVE EVALUATION**

3 credits.

Practical aspects of nondestructive evaluation (NDE) techniques for identifying physical properties and damage within civil and geologic materials and structures. Data analyses and data science for wave propagation, arrival picking, distributed fiber optic sensing, and visualization tools such as augmented/mixed/virtual reality.

**Requisites:** E M A 201, PHYSICS 201, 207, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe multiple nondestructive evaluation (NDE) testing methods and their applications

Audience: Both Grad & Undergrad

2. Characterize flaws within Civil and Geological Engineering materials

Audience: Both Grad & Undergrad

3. Determine source locations of flaws or damage within a structure based on NDE data

Audience: Both Grad & Undergrad

4. Characterize both active and passive elastic wave observations in rock

Audience: Both Grad & Undergrad

5. Apply seismological principles to observed acoustic emissions for determining source locations of microcracks and infer the mechanism of failure

Audience: Both Grad & Undergrad

6. Analyze fiber optic distributed acoustic sensing (DAS) to find earthquake events within timeseries data

Audience: Both Grad & Undergrad

7. Apply artificial intelligence techniques to analyze fiber optic sensing data

Audience: Graduate

**G L E/CIV ENGR 535 – WIND ENERGY BALANCE-OF-PLANT DESIGN**

3 credits.

Wind Energy Development and Balance-of-Plant Design. Up-front coverage includes the science and mechanics of wind energy including turbine basics, wind resource assessment, energy production, and economic return. Balance-of-plant design aspects include site layout and micro-siting, foundation systems, collector systems and interconnection, site civil and electrical infrastructure, and structural tower analysis. Development includes environmental due diligence and permitting, stakeholder engagement, energy policy and markets, and levelized cost of energy (LCOE).

**Requisites:** PHYSICS 201, 207, 247, E M A 201, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Provide the necessary steps to evaluate the wind resource at a prospective site by characterizing and correlating (vertically and horizontally) the wind speed distribution functions

Audience: Both Grad & Undergrad

2. Translate (forward and backward) wind power: kinetic to mechanical to electrical and select appropriate wind turbine given site wind resource and turbine power curve

Audience: Both Grad & Undergrad

3. Demonstrate knowledge of the mechanics and principles of the tower load document, shallow and deep foundation designs, transportation logistics, geotechnical investigation and reporting, thermal resistivity and collection system design, and interconnection

Audience: Both Grad & Undergrad

4. Develop civil balance-of-plant engineering calculation design bases for access roads, stormwater control, turbine foundations, and crane pads and electrical balance-of-plant engineering calculation design bases for the collection system, grounding, substation design, and interconnection

Audience: Both Grad & Undergrad

5. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Both Grad & Undergrad

6. Describe the social, economic, and environmental dimensions of wind energy and identify potential tradeoffs and interrelationships among these dimensions at an intermediate level.

Audience: Both Grad & Undergrad

7. Prepare an economic Pro Forma for a successful distributed wind project and calculate Levelized Cost of Energy (LCOE) and environmental Life Cycle Assessments (LCAs) of green-house gasses, water use, and CO<sub>2</sub> per kW h.

Audience: Graduate

**G L E/GEOSCI 537 – QUANTITATIVE METHODS FOR GEOSCIENCE**

3 credits.

MATLAB is a powerful, high-level programming language and integrated development environment (IDE) that is used across a broad variety of scientific disciplines for tasks including data visualization, modeling, and application development. Focus on the active use of MATLAB for developing practical programming and data analysis skills that can be applied across a range of geoscience- relevant problems. Applications will include: data visualization and publishable figure development; automation of data processing; statistical and time-series analysis; image processing and mapping; and optimization. Additional topics may be guided by student interest.

**Requisites:** MATH 222, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**G L E/GEOSCI 594 – INTRODUCTION TO APPLIED GEOPHYSICS**

3 credits.

Survey of applied geophysics, including seismic refraction, seismic reflection, electrical resistivity, gravity, and magnetics methods. Basic physics of each method and modeling techniques and field procedures.

**Requisites:** MATH 222 and (PHYSICS 202, 208, 248, or E M A 202), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**G L E/GEOSCI 595 – FIELD METHODS IN APPLIED AND ENGINEERING GEOPHYSICS**

1 credit.

The application of geophysical field methods for delineating near-surface features and/or structures as applied to engineering, environmental and exploration problems.

**Requisites:** GEOSCI/G L E 594 or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**G L E/GEOSCI 596 – GEOMECHANICS**

3 credits.

Observation, description, and prediction of deformation of geomechanical systems at depth, and the forces (stress) causing those deformations, relevant for petroleum/geothermal reservoirs and studies of earthquake mechanics. Emphasis on computational exercises using datasets from the petroleum industry and earthquake catalogues, as well as prediction of ground deformation.

**Requisites:** GEOSCI/CIV ENGR/G L E/M S & E 474, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Conduct a borehole geomechanical analysis

Audience: Both Grad & Undergrad

2. Design casing plans for drilling

Audience: Both Grad & Undergrad

3. Use borehole data and earthquake focal mechanisms to gain information about in-situ stress and strain

Audience: Both Grad & Undergrad

4. Describe modern challenges in developing subsurface energy resources

Audience: Both Grad & Undergrad

5. Use modern software to find crustal deformation models that match observed ground deformation

Audience: Graduate

**G L E/CIV ENGR 612 – ECOHYDROLOGY**

3 credits.

Mutual interactions between the hydrologic cycle and ecosystems, including hydrologic mechanisms that underlie ecological patterns and processes, movement of water and energy through the soil-plant-atmosphere continuum, application and development of models for simulating ecohydrologic processes, and case studies on ecohydrologic function and ecosystem services of varied environments.

**Requisites:** CIV ENGR 311, GEOSCI/G L E 627, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify, describe, and quantify ecohydrologic processes

Audience: Both Grad & Undergrad

2. Build and use models for simulating hydrologic processes, ecologic structure and vegetation composition

Audience: Both Grad & Undergrad

3. Work effectively and collaborate in groups to communicate ecohydrologic concepts

Audience: Both Grad & Undergrad

4. Critically evaluate the ecohydrologic literature

Audience: Graduate

**G L E/GEOSCI 627 – HYDROGEOLOGY**

3-4 credits.

Mathematical treatment of the physical principles governing the flow of groundwater; emphasis on well hydraulics and flow system analysis.

**Requisites:** (GEOSCI 100, 109, 110, ATM OCN/GEOSCI 105, 140, ENVIR ST/GEOSCI 106, or ASTRON/GEOSCI 160) and (MATH 217 or 221), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**G L E/GEOSCI 629 – CONTAMINANT HYDROGEOLOGY**

3 credits.

Physical and chemical processes governing the transport of solutes in groundwater; application of hydrogeologic and geochemical theory and practice to the protection of aquifers from contamination.

**Requisites:** G L E/GEOSCI 627 and MATH 222, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**G L E/CIV ENGR 635 – REMEDIATION GEOTECHNICS**

3 credits.

Geotechnical practice for remediation of sites containing contaminated soil and groundwater is discussed. Topics include non-invasive and invasive subsurface exploration techniques, methods to monitor for the presence of contaminants in the saturated and unsaturated zones, and geotechnically-oriented remedial action technologies.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**G L E 699 – INDEPENDENT STUDY**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**G L E/GEOSCI 724 – GROUNDWATER FLOW MODELING**

3 credits.

An introduction to the principles of modeling groundwater flow systems, with emphasis on regional flow system analysis. Conceptual understanding of governing equations, and the use of finite difference techniques to solve such equations are stressed. Develop codes and become introduced to packaged models, including those developed by the U. S. Geological Survey. Knowledge of hydrogeology [such as G L E/GEOSCI 627 or 629] required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**G L E/CIV ENGR 730 – ENGINEERING PROPERTIES OF SOILS**

3 credits.

Determination and interpretation of soil properties for engineering purposes; physio-chemical properties of soil-water systems, permeability and capillarity, compression characteristics of soils, measurement of soil properties in the triaxial test, properties of frozen soils and permafrost.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Describe the physicochemical characteristics of soils and their importance to the engineering behavior of soils

Audience: Graduate

2. Define the factors which control the hydraulic and mechanical behavior of soils

Audience: Graduate

3. Evaluate how engineering classification of soils capture fundamental responses

Audience: Graduate

4. Run and interpret laboratory tests used to characterize how physical and chemical properties of particles affect the behavior of soil masses, including hydraulic properties and the stiffness and shear strength properties

Audience: Graduate

5. Explain models that describe the behavior and properties of soils

Audience: Graduate

**G L E/CIV ENGR 732 – UNSATURATED SOIL GEOENGINEERING**

3 credits.

Engineering principles of unsaturated soils as they apply to geotechnical and geoenvironmental systems. Effect of soil water suction and stress on hydraulic conductivity, shear strength, and compressibility of soils in the context of geoengineering problems of flow and stability. Knowledge of Soil Mechanics [such as CIV ENGR/G L E 330] is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define properties of unsaturated soils

Audience: Graduate

2. Use principles of interfacial physics, hydrology, and soil mechanics to interpret unsaturated soil behavior

Audience: Graduate

3. Use results from measurement methods to characterize unsaturated soil properties

Audience: Graduate

**G L E/CIV ENGR 733 – PHYSICOCHEMICAL BASIS OF SOIL BEHAVIOR**

3 credits.

Applications of physiochemical, mineralogical and environmental considerations to the engineering behavior of soils. Soil composition, formation, fabric, pore fluid chemistry and interaction of phases. The particulate nature of soils and the fabric-engineering property (volume change, strength, deformation and conduction) relationships. Knowledge of Soil Mechanics [such as CIV ENGR/G L E 330] is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Characterize properties of soils that consist partly or wholly of clay

Audience: Graduate

2. Define the composition and fabric of natural soils, their surface and pore-fluid chemistry, and the physical and chemical factors that govern fine-grained soil behavior

Audience: Graduate

**G L E/GEOSCI 747 – TECTONOPHYSICS**

3 credits.

Elasticity and flexure of the earth's lithosphere, heat conduction, mantle convection, earthquake mechanisms, rock rheology, and fluid migration in the earth's crust; integration of geophysical observations, laboratory experiments, and theoretical models.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Demonstrate an understanding of the Scientific Theory of Plate Tectonics by writing, solving, illustrating, and exemplifying Euler's formula for rigid tectonic plates moving on a sphere.

Audience: Graduate

2. Demonstrate an understanding of the earthquake deformation cycle in time and space by sketching a map over ~100 km and a time series over ~1000 years.

Audience: Graduate

3. Demonstrate an understanding of the physical principles of crustal deformation by writing, applying, and solving the differential equations governing motion under the constitutive relations for rigid, elastic, and Maxwell visco-elastic rheologies.

Audience: Graduate

4. Demonstrate an understanding of quantitative reasoning for testing geophysical hypotheses by comparing two competing models with appropriate statistical tests.

Audience: Graduate

5. Visualize plate motions on a 3-dimensional sphere by writing, debugging, and writing computer applications.

Audience: Graduate

6. Analyze geophysical data and interpret them by implementing simple models in the Matlab computer language.

Audience: Graduate

**G L E/GEOSCI 757 – ADVANCED ROCK MECHANICS**

3 credits.

Experimental rock mechanics, rock mechanics apparatus design, static and dynamic rock friction, rate and state friction, crack phenomena and rock fracture mechanics, earthquake energy budget, elastic/viscoelastic/plastic behavior of rocks, engineering and geological applications. Knowledge of introductory rock mechanics [such as M S E/GEOSCI/CIV ENGR/G L E/ M S & E 474] required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Analyze technical construction of rock mechanics apparatuses

Audience: Graduate

2. Design and fabricate load cells and displacement sensors

Audience: Graduate

3. Measure dynamic rock frictional properties for fault instability analysis

Audience: Graduate

**G L E 790 – MASTER'S RESEARCH OR THESIS**

1-9 credits.

Under faculty supervision.

**Requisites:** Declared in Geological Engineering MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**G L E 801 – SPECIAL TOPICS IN GEOLOGICAL ENGINEERING**

1-3 credits.

Topics vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**G L E 890 – PRE-DISSERTATOR'S RESEARCH**

1-9 credits.

Under faculty supervision.

**Requisites:** Declared in Geological Engineering PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**G L E 900 – SEMINAR**

1 credit.

Topics vary.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**G L E 990 – RESEARCH AND THESIS**

1-9 credits.

Under faculty supervision.

**Requisites:** Declared in Geological Engineering PHD**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**G L E 999 – INDEPENDENT WORK**

1-3 credits.

Under faculty supervision.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2023

## GEOSCIENCE (GEOSCI)

**GEOSCI 100 – INTRODUCTORY GEOLOGY: HOW THE EARTH WORKS**

3 credits.

Geologic processes; structure and history of the earth; earthquakes, volcanos, glaciers, groundwater, minerals, rocks, deserts, fossils; topographic and geologic maps; climate change on geologic and human time scales.

**Requisites:** Not open to students with credit for GEOSCI/ENVIR ST 106**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOSCI/ATM OCN/ENVIR ST 102 – CLIMATE AND CLIMATE CHANGE**

3 credits.

Describes the basic climate principles governing the climate system. It describes the climate and climate variability at present, climate evolution in the past, and the projected climate change into the future. The scientific principles underlying the natural and anthropogenic greenhouse effect and climate model forecasts are elucidated.

**Requisites:** None**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**GEOSCI/ATM OCN 105 – SURVEY OF OCEANOGRAPHY**

3-4 credits.

Nature and behavior of ocean water, interaction of oceans and atmosphere, structure of the ocean floor, life in the oceans, our relationship to the marine environment.

**Requisites:** None**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOSCI/ENVIR ST 106 – ENVIRONMENTAL GEOLOGY**

3 credits.

Application of geology to problems resulting from the ever more intense use of the earth and its resources.

**Requisites:** Not open to students with credit for GEOSCI 100**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**GEOSCI 109 – THREE BILLION YEARS BENEATH YOUR FEET: GEOLOGY OF THE NATIONAL PARKS**

3 credits.

Famously called "America's best idea", the National Parks of the US record two-thirds of Earth's history, from the most ancient mountains to active volcanic eruptions. The geologic story of the National Parks is explored in the framework of physiography, tectonics, time, and fundamental geologic processes, highlighting the major parks from Hawaii, to Alaska, to the conterminous US. Provides a view of the geological evolution of the Earth using specific examples.

**Requisites:** None**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**GEOSCI 110 – EVOLUTION AND EXTINCTION**

4 credits.

Contemporary views of the origin and diversification of life and evolutionary processes; crises in the history of life, with emphasis on controversies regarding evolution, mass extinctions, and the co-evolution of Earth and life.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOSCI 115 – SCIENCE BEHIND THE NEWS - THE WORLD AROUND US**

1-2 credits.

Examines the earth and environmental science behind the news with the goal of producing more informed and knowledgeable citizens.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2018**GEOSCI 117 – EX-FILES: LIFE IN THE EARTH'S EXTREME ENVIRONMENT**

2 credits.

Explores the diversity of microbial life forms in modern and ancient geological environments, with a focus on extreme environments of geological origin or relevance. Includes exploration of unusual aspects of microbial life in everyday settings.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**GEOSCI 118 – EYE IN THE SKY: MONITORING THE EARTH BY SATELLITE**

1 credit.

Fundamentals of satellite imagery applied to the earth sciences. Basics of image interpretation. Multitemporal data. Resolution and uncertainty. Existing and emerging technologies. Orbits, wavelengths, and satellites. Socio-economic impact of remotely-sensed data.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOSCI/ATM OCN 140 – NATURAL HAZARDS AND DISASTERS**

3 credits.

An exploration of the science behind natural disasters including earthquakes, tsunamis, volcanic eruptions, landslides, tornadoes, hurricanes, and floods. Why, where, and when do these events occur, and why are some predictable but others are not? Addresses hazard assessment, forecasting, and mitigation to lessen their impact on society.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**GEOSCI/ASTRON 160 – LIFE IN THE UNIVERSE**

2 credits.

An examination of the origin and evolution of life in the universe based on our knowledge of astronomy, biology, and geology. Includes discussions on the search for extraterrestrial life and the history of life in our solar system.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Show how scientific reasoning and the scientific method are used to determine Earth's place within the solar system and the cosmos.

Audience: Undergraduate

2. Connect our current observations of exoplanets with their potential roles in the origin of life elsewhere in the Universe.

Audience: Undergraduate

3. Describe the physical and chemical limits of life on Earth to chart the potential for life on Mars and other worlds.

Audience: Undergraduate

4. Apply the genetic code to interpret the origin and evolution of life on Earth.

Audience: Undergraduate

5. Summarize key geologic events on Earth and Mars; interpret relationships between planetary tectonics and habitability.

Audience: Undergraduate

6. Explain the range of evidence in the rock record for early life on Earth and critique the fidelity of this record.

Audience: Undergraduate

7. Illustrate how quantitative approaches are used to analyze problems in astronomy, biology, and geology.

Audience: Undergraduate

**GEOSCI 198 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2012**GEOSCI 199 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**GEOSCI 202 – INTRODUCTION TO GEOLOGIC STRUCTURES**

4 credits.

Introduction to recognition and mapping of geologic structures in the field. Landforms, folds, faults, tectonics, geologic maps, and field instrumentation.

**Requisites:** GEOSCI 100 or ENVIR ST/GEOSCI 106**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**GEOSCI 204 – GEOLOGIC EVOLUTION OF THE EARTH**

4 credits.

Physical evolution of the earth and its relationship to the development of life through geologic time. Includes field trip.

**Requisites:** GEOSCI 100 or ENVIR ST/GEOSCI 106**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOSCI 304 – GEOBIOLOGY**

3 credits.

An integrative approach to studying the interaction between the atmosphere, hydrosphere, biosphere, and geosphere as they have evolved during earth history. Overarching theme includes ocean-climate system changes, biogeochemical cycles, evolution from microbes to mammals, and critical events in life history.

**Requisites:** GEOSCI 204 or graduate/professional standing**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**GEOSCI/GEOG 320 – GEOMORPHOLOGY**

3 credits.

Principles and analysis of geomorphic processes and resulting land forms.

**Requisites:** GEOSCI/ENVIR ST 106, GEOSCI 100, 109, 204, ENVIR ST/GEOG 120, 127 or graduate/professional standing**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOSCI 331 – GEMS: THE SCIENCE BEHIND THE SPARKLE**

1-2 credits.

Explores the formation, collection, properties, and treatment of many popular gemstones.

**Requisites:** Junior standing**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**GEOSCI/ATM OCN/ENVIR ST/GEOG 335 – CLIMATIC ENVIRONMENTS OF THE PAST**

3 credits.

Climate change at timescales from the last several million years to the last 100 years, with emphasis on more recent timescales. Examines how climate variability arises from interplay between external forcings, feedbacks within the earth system, and (more recently) human activity.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the major climatic events and trends during the Quaternary, spanning timescales from the last 50,000,000 years to the last 100 years.

Audience: Undergraduate

2. Identify the physical processes controlling the behavior of the earth system and its components (atmosphere, oceans, cryosphere, biosphere, etc.).

Audience: Undergraduate

3. Discuss how climatic variability results from a combination of external forcings and internal dynamics within the earth system.

Audience: Undergraduate

4. Recognize how paleoclimatologists collect, date, and analyze a staggering variety of paleoclimatic records, including ocean and lake sediment cores, ice cores, tree rings, corals, and speleothems.

Audience: Undergraduate

5. Analyze and critically evaluate climate experiments that are simulated by earth system models.

Audience: Undergraduate

6. Think and write critically, with particular attention to critically reading the scientific literature and critically employing the climate proxies and models used by paleoclimatologists.

Audience: Undergraduate

**GEOSCI/G L E 350 – INTRODUCTION TO GEOPHYSICS: THE DYNAMIC EARTH**

3 credits.

Methods of geophysics applied to earth structure and plate tectonics.

Principles of seismology, gravity, geodesy, magnetism and heat flow.

**Requisites:** MATH 217, 221, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOSCI/G L E 360 – PRINCIPLES OF MINERALOGY**

3 credits.

Minerals, their physical and chemical properties, crystallography, and geologic significance.

**Requisites:** (GEOSCI 100 or ENVIR ST/GEOSCI 106) and (CHEM 103, 109, 115, or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOSCI/G L E 370 – ELEMENTARY PETROLOGY**

3 credits.

Igneous and metamorphic rocks, studied in hand sample and thin section.

**Requisites:** G L E/GEOSCI 360, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOSCI/ENVIR ST/F&W ECOL/G L E/GEOG/LAND ARC 371 – INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING**

3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.

**Requisites:** (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**GEOSCI 375 – PRINCIPLES OF GEOCHEMISTRY**

3 credits.

Provides a chemical basis for understanding the origin, evolution, distribution and interactions of chemical elements and isotopes between the lithosphere, hydrosphere, biosphere, and atmosphere in geological and environmental processes.

**Requisites:** G L E/GEOSCI 360, (CHEM 109, 104, or 115) and G L E/GEOSCI 370 or concurrent enrollment in G L E/GEOSCI 370, or graduate/professional standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEOSCI 376 – TOPICS IN GEOLOGY**

1-3 credits.

Special topics or discussions of recent research in Geoscience.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**GEOSCI 402 – RESEARCH AND COMMUNICATION IN THE GEOLOGICAL SCIENCES**

3 credits.

Skills and strategies to conduct research in the geological sciences, including collection of data, analysis of the data, generation of models to explain the data, and clear communication of both the research process and results. As part of the research process, find, evaluate, and utilize information in the existing scientific literature. Practice effective scientific communication skills, including writing, oral presentations, and producing effective visualizations.

**Requisites:** Senior standing and declared in Geology and Geophysics**Course Designation:** Gen Ed - Communication Part B

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Learn about how information is produced and disseminated in the geological sciences.

Audience: Undergraduate

2. Effectively and efficiently read the scientific literature for content - a foundation for life-long learning that is key to a successful career.

Audience: Undergraduate

3. Critically evaluate the primary literature including the nature of evidence, the logic of the approach, and appropriateness of the analyses to the addressed problem. This explicitly includes critical reading, logical thinking, quantitative analyses, and the use of evidence.

Audience: Undergraduate

4. Develop skills and strategies needed to find, evaluate, and utilize information in the geological sciences.

Audience: Undergraduate

5. Clearly communicate - both in writing and orally - the results of scientific investigation.

Audience: Undergraduate

6. Effectively use diagrams and graphs to explain scientific data.

Audience: Undergraduate

**GEOSCI/ENVIR ST 411 – ENERGY RESOURCES**

3 credits.

A critical examination of the full spectrum of renewable and nonrenewable energy options, from the unifying perspective of the Earth systems that govern their use. Energy conversion and efficiency, consumption patterns and trends, and environmental consequences of energy production and use.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**GEOSCI/GEOG 420 – GLACIAL AND PLEISTOCENE GEOLOGY**

3 credits.

Principles, characteristics and work of glaciers; events of the Pleistocene. Field trip.

**Requisites:** GEOSCI/ENVIR ST 106, GEOSCI 100, 109, ENVIR ST/GEOG 120, 127, or graduate/professional standing**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOSCI 430 – SEDIMENTOLOGY AND STRATIGRAPHY**

3 credits.

Comprehensive survey of the processes and products of sedimentation, including depositional environments, sedimentary tectonics, sequence stratigraphic principles, and analytical methods.

**Requisites:** GEOSCI 204 and G L E/GEOSCI 370, or graduate/professional standing**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOSCI/G L E 431 – SEDIMENTARY & STRATIGRAPHY LAB**

1 credit.

Covers Sedimentology and Stratigraphy; emphasizes qualitative and quantitative description and interpretation of sediments and sedimentary deposits.

**Requisites:** GEOSCI 204 or G L E/GEOSCI 360, graduate/professional standing, or member of Engineering Guest Students**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**GEOSCI/CIV ENGR/ENVIR ST/G L E 444 – PRACTICAL APPLICATIONS OF GPS SURVEYING**

2 credits.

Global positioning system surveying for field applications. Signals. Coordinate systems. Datums. Cartographic projections. Satellite orbits. Choosing hardware. Strategies for data collection and analysis. Assessing uncertainty. Geocoding satellite images. Integrating data with Geographic Information Systems. Emerging technologies.

**Requisites:** MATH 211, 217, 221, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOSCI/G L E 455 – STRUCTURAL GEOLOGY**

4 credits.

Principles of rock deformation, structures in layered rocks, structural analysis, intrusive structures. Lab: three-dimensional problems involving structural concepts; field trip.

**Requisites:** GEOSCI 202, 204, and (G L E/GEOSCI 370 or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOSCI 456 – GEOLOGIC FIELD METHODS**

2 credits.

Theory and techniques of geologic mapping; field trips.

**Requisites:** G L E/GEOSCI 455 or concurrent enrollment

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**GEOSCI 457 – CONDUCTED FIELD TRIP**

2 credits.

Study of the principles and methods of geologic mapping.

**Requisites:** G L E/GEOSCI 370 or concurrent enrollment

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOSCI 459 – FIELD GEOLOGY**

6 credits.

Detailed geologic mapping and solution of related problems in the field.

**Requisites:** GEOSCI 202, G L E/GEOSCI 370, and 455

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2019

**GEOSCI/CIV ENGR/G L E/M S & E 474 – ROCK MECHANICS**

3 credits.

Classification of rock masses, stress and strain in rock, linear and non-linear behavior of rock, failure mechanisms, state of stress in rock masses, lab testing, geological and engineering applications.

**Requisites:** E M A 201, PHYSICS 201, 207, or 247, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Measure basic index properties for rock mass classification

Audience: Both Grad & Undergrad

2. Describe stress and strain in continuums

Audience: Both Grad & Undergrad

3. Describe the factors which control the mechanical behavior of rocks

Audience: Both Grad & Undergrad

4. Apply basic concepts of rock mechanics and rock physics to analyze basic geomechanical engineering problems

Audience: Both Grad & Undergrad

5. Prepare rock samples for mechanical testing, conduct experiment, and analyze experimental data to obtain rock strength properties

Audience: Both Grad & Undergrad

6. Describe analytically time-dependent rock behaviors

Audience: Graduate

**GEOSCI/HIST SCI 514 – HISTORY OF GEOLOGIC THOUGHT**

3 credits.

Major concepts from earliest to modern times.

**Requisites:** GEOSCI 204 or graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEOSCI 515 – PRINCIPLES OF ECONOMIC GEOLOGY**

4 credits.

Composition, structure, occurrence, origin, and economic investigation of important groups of mineral deposits; problems of mineral deposition.

**Requisites:** GEOSCI 204 and G L E/GEOSCI 370, or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**Learning Outcomes:** 1. Students will be able to identify common ore minerals in a variety of deposit types.

Audience: Undergraduate

2. Students will be able to identify and interpret common alteration types that accompany hydrothermal alteration in mineralized rocks.

Audience: Undergraduate

3. Students will be able to understand and explain the basics of stable and radiogenic isotopic systems and their application to ore deposit research.

Audience: Undergraduate

4. Students will be able to tell the history (formation condition and possible changes / reactions) of a deposit based on associated minerals and textures.

Audience: Undergraduate

5. Students will be able to synthesize research and develop hypotheses with respect to mineral abundances in different geologic environments.

Audience: Graduate

6. Students will be able to conceptualize the 3D distribution of mineral deposits in the crust of the earth.

Audience: Undergraduate

7. Students will be able to recognize the overall role of plate tectonics in the distribution of ore deposits.

Audience: Undergraduate

8. Students will come to recognize the role of the evolution of the Earth's systems over 4.5 Ga in the formation of ore deposits.

Audience: Undergraduate

**GEOSCI/G L E 537 – QUANTITATIVE METHODS FOR GEOSCIENCE**

3 credits.

MATLAB is a powerful, high-level programming language and integrated development environment (IDE) that is used across a broad variety of scientific disciplines for tasks including data visualization, modeling, and application development. Focus on the active use of MATLAB for developing practical programming and data analysis skills that can be applied across a range of geoscience- relevant problems. Applications will include: data visualization and publishable figure development; automation of data processing; statistical and time-series analysis; image processing and mapping; and optimization. Additional topics may be guided by student interest.

**Requisites:** MATH 222, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**GEOSCI/ZOOLOGY 542 – INVERTEBRATE PALEONTOLOGY**

3 credits.

The evolutionary history, morphology, and ecology of fossil invertebrates. Labs emphasize fossil identification and recognition of basic morphological features.

**Requisites:** (GEOSCI 110 or 204), (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing.

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOSCI 551 – PALEOCEANOGRAPHY**

3 credits.

Investigates the history of the Earth's oceans, focusing on the last 65 million years, with discussion of the chemical and physical methods through which oceans are studied and the role of oceans in the climate system.

**Requisites:** GEOSCI 100, 110, ATM OCN/GEOSCI 105, ENVIR ST/GEOSCI 106, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Explain the major climatic and oceanographic events and trends during the Cretaceous through the Cenozoic, spanning timescales from the last 150,000,000 years to the last 1,000 years. For this class emphasis is placed on the global climate and oceanographic systems, with some attention to regional changes.

Audience: Both Grad & Undergrad

2. Explain the physical processes controlling the behavior of the earth system and its related components (atmosphere, oceans, cryosphere, biosphere, etc.), and to articulate how oceanic/climatic variability results from a combination of external forcings and internal dynamics within the earth system.

Audience: Both Grad & Undergrad

3. Understand how paleoceanographers collect, date, and analyze a staggering variety of deep-sea records, as well as other paleoclimate archives as they pertain to oceanic and climate processes including ocean and lake sediment cores, ice cores, and speleothems.

Audience: Both Grad & Undergrad

4. Develop skills in critical thinking and technical writing, with particular attention to critically reading the scientific literature and critically evaluating the climate proxies and model simulations used by paleoceanographers.

Audience: Both Grad & Undergrad

5. Both explain and critically evaluate the data on which the majority of our ocean/climate knowledge of the last 150,000,000 years is based.

Audience: Graduate

6. Both explain and assess the external forcings and internal dynamics within the earth system and across the different earth spheres.

Audience: Graduate

7. Critically evaluate the scientific literature and provide your own perspective on the literature discussion and conclusions.

Audience: Graduate

**GEOSCI 556 – MOUNTAIN BELTS**

3 credits.

Examination of interaction of tectonic plates and the resulting structures.

**Requisites:** G L E/GEOSCI 455 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**GEOSCI 557 – STRUCTURAL PETROLOGY**

3 credits.

Petrographic investigation of rock fabrics and deformation using thin sections. Use of petrographic microscopes and Scanning Electron Microscopes (SEMs).

**Requisites:** G L E/GEOSCI 370 and 455, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**GEOSCI/G L E 594 – INTRODUCTION TO APPLIED GEOPHYSICS**

3 credits.

Survey of applied geophysics, including seismic refraction, seismic reflection, electrical resistivity, gravity, and magnetism methods. Basic physics of each method and modeling techniques and field procedures.

**Requisites:** MATH 222 and (PHYSICS 202, 208, 248, or E M A 202), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOSCI/G L E 595 – FIELD METHODS IN APPLIED AND ENGINEERING GEOPHYSICS**

1 credit.

The application of geophysical field methods for delineating near-surface features and/or structures as applied to engineering, environmental and exploration problems.

**Requisites:** GEOSCI/G L E 594 or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOSCI/G L E 596 – GEOMECHANICS**

3 credits.

Observation, description, and prediction of deformation of geomechanical systems at depth, and the forces (stress) causing those deformations, relevant for petroleum/geothermal reservoirs and studies of earthquake mechanics. Emphasis on computational exercises using datasets from the petroleum industry and earthquake catalogues, as well as prediction of ground deformation.

**Requisites:** GEOSCI/CIV ENGR/G L E/M S & E 474, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Conduct a borehole geomechanical analysis

Audience: Both Grad & Undergrad

2. Design casing plans for drilling

Audience: Both Grad & Undergrad

3. Use borehole data and earthquake focal mechanisms to gain information about in-situ stress and strain

Audience: Both Grad & Undergrad

4. Describe modern challenges in developing subsurface energy resources

Audience: Both Grad & Undergrad

5. Use modern software to find crustal deformation models that match observed ground deformation

Audience: Graduate

**GEOSCI 610 – GEOCHRONOLOGY, TIMESCALES, AND RATES OF GEOLOGIC PROCESSES**

3 credits.

Application of radioisotopic (Ar-Ar, U-Pb, U-Th, U-He) and cosmogenic (He, Ne, Cl, Be, C) dating methods. Status of geologic, astronomic and paleomagnetic timescales, Chronology of flood basalts, impacts, extinctions, glaciations. Constraints on rates of magmatism, mountain uplift, deformation, erosion, sedimentation.

**Requisites:** G L E/GEOSCI 370 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**GEOSCI/G L E 627 – HYDROGEOLOGY**

3-4 credits.

Mathematical treatment of the physical principles governing the flow of groundwater; emphasis on well hydraulics and flow system analysis.

**Requisites:** (GEOSCI 100, 109, 110, ATM OCN/GEOSCI 105, 140, ENVIR ST/GEOSCI 106, or ASTRON/GEOSCI 160) and (MATH 217 or 221), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOSCI/G L E 629 – CONTAMINANT HYDROGEOLOGY**

3 credits.

Physical and chemical processes governing the transport of solutes in groundwater; application of hydrogeologic and geochemical theory and practice to the protection of aquifers from contamination.

**Requisites:** G L E/GEOSCI 627 and MATH 222, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOSCI 681 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOSCI 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOSCI 691 – SENIOR THESIS**

3-4 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOSCI 692 – SENIOR THESIS**

3–4 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GEOSCI 698 – DIRECTED STUDY**

1–6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**GEOSCI 699 – DIRECTED STUDY**

1–6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEOSCI 701 – QUANTITATIVE GEOMORPHOLOGY**

4 credits.

Quantitative study of processes that shape Earth's surface. Use theory and field observations to investigate major components of continental geomorphic systems, including hillslopes, rivers, and glaciers. Understand how the major factors that shape Earth's surface—tectonics, climate, and life—create the landscapes we observe.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of the processes that shape Earth's topography over a range of time scales and spatial scales  
Audience: Graduate

2. Construct conservation of mass and momentum frameworks for topographic evolution  
Audience: Graduate

3. Apply mathematical laws for mass transport that govern topographic evolution  
Audience: Graduate

4. Make field observations that can be used to constrain multiple geomorphic processes  
Audience: Graduate

5. Write scientific reports in the form of a short journal article  
Audience: Graduate

**GEOSCI 720 – GLACIOLOGY**

3 credits.

Addresses the fundamentals of glaciology and glacier landform mechanics: mass balance, ice deformation, basal slip, temperature structure, glacial hydrology, sediment deformation and deposition, and landform building processes. Emphasizes an understanding of the mathematical principles that dictate how glaciers function. Begins with a classical treatment of the mechanics of glaciers and moves onto fundamental advances in the field of glaciology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GEOSCI/G L E 724 – GROUNDWATER FLOW MODELING**

3 credits.

An introduction to the principles of modeling groundwater flow systems, with emphasis on regional flow system analysis. Conceptual understanding of governing equations, and the use of finite difference techniques to solve such equations are stressed. Develop codes and become introduced to packaged models, including those developed by the U. S. Geological Survey. Knowledge of hydrogeology [such as G L E/GEOSCI 627 or 629] required.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**GEOSCI 727 – ADVANCED HYDROGEOLOGY**

1-3 credits.

Advanced topics in Hydrogeology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2016**GEOSCI 729 – FIELD APPLICATIONS IN HYDROGEOLOGY**

2 credits.

Instruction and practice in instrumentation and techniques used in collection and interpretation of data. Includes field work in and around Madison.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2015**GEOSCI 731 – CARBONATE GEOLOGY**

2 credits.

Comprehensive survey of the processes and products of carbonate sedimentation.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**GEOSCI 732 – GEOCHEMISTRY OF SEDIMENTS**

3 credits.

Processes involved in the origin of chemical sediments; shales, carbonates, and evaporites.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2021**GEOSCI/G L E 747 – TECTONOPHYSICS**

3 credits.

Elasticity and flexure of the earth's lithosphere, heat conduction, mantle convection, earthquake mechanisms, rock rheology, and fluid migration in the earth's crust; integration of geophysical observations, laboratory experiments, and theoretical models.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**Learning Outcomes:** 1. Demonstrate an understanding of the Scientific Theory of Plate Tectonics by writing, solving, illustrating, and exemplifying Euler's formula for rigid tectonic plates moving on a sphere.

Audience: Graduate

2. Demonstrate an understanding of the earthquake deformation cycle in time and space by sketching a map over ~100 km and a time series over ~1000 years.

Audience: Graduate

3. Demonstrate an understanding of the physical principles of crustal deformation by writing, applying, and solving the differential equations governing motion under the constitutive relations for rigid, elastic, and Maxwell visco-elastic rheologies.

Audience: Graduate

4. Demonstrate an understanding of quantitative reasoning for testing geophysical hypotheses by comparing two competing models with appropriate statistical tests.

Audience: Graduate

5. Visualize plate motions on a 3-dimensional sphere by writing, debugging, and writing computer applications.

Audience: Graduate

6. Analyze geophysical data and interpret them by implementing simple models in the Matlab computer language.

Audience: Graduate

**GEOSCI/ATM OCN/ENVIR ST/ZOOLOGY 750 – PROBLEMS IN OCEANOGRAPHY**

3 credits.

Introduction to techniques used in the study of the biology, chemistry, geology, and physics of the marine environment.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**GEOSCI 755 – ADVANCED STRUCTURAL GEOLOGY**

3 credits.

Structures in layered, intrusive, and metamorphic rocks; structural analysis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**GEOSCI/G L E 757 – ADVANCED ROCK MECHANICS**

3 credits.

Experimental rock mechanics, rock mechanics apparatus design, static and dynamic rock friction, rate and state friction, crack phenomena and rock fracture mechanics, earthquake energy budget, elastic/viscoelastic/plastic behavior of rocks, engineering and geological applications. Knowledge of introductory rock mechanics [such as M S E/GEOSCI/CIV ENGR/G L E/ M S & E 474] required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Analyze technical construction of rock mechanics apparatuses

Audience: Graduate

2. Design and fabricate load cells and displacement sensors

Audience: Graduate

3. Measure dynamic rock frictional properties for fault instability analysis

Audience: Graduate

**GEOSCI 758 – MECHANICS OF EARTHQUAKES AND FAULTING**

3 credits.

Addresses current topics and controversies on fault mechanics, earthquake physics, and the rock record of seismicity. Emphasizes critical reading and in-depth discussion of recent publications drawn from a variety of disciplines, including geophysical, geological, and geochemical studies and approaches.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEOSCI/ATM OCN 762 – ICE AND CLIMATE DYNAMICS**

3 credits.

Introduction to the role of ice in the climate system. Review main components of the cryosphere (Arctic and Antarctic sea ice, Greenland and Antarctic ice sheets, mountain glaciers, snow cover, and permafrost), with particular focus on recent and future changes as documented in recent publications. Consider different methods to study the cryosphere and its role in the climate system, such as remote sensing and in situ observations, state estimates and reanalyses, with a particular focus on idealized and comprehensive global climate models. Covers fundamental physical concepts as well as unresolved research questions such as the debates surrounding potential instabilities in the climate system and uncertainties in future projections of ice loss, teleconnections, and sea level rise.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Differentiate between the main components of Earth's cryosphere and their respective roles in the climate system.

Audience: Graduate

2. Compare the range of methodologies used to study Earth's cryosphere, including in situ and remote sensing observations, theoretical considerations, and numerical models.

Audience: Graduate

3. Develop idealized models of sea ice, land ice, and snow and their interactions with the climate system.

Audience: Graduate

4. Carry out analysis of output from idealized and comprehensive ice and climate models.

Audience: Graduate

**GEOSCI 765 – CRYSTAL CHEMISTRY**

3 credits.

Principles of crystal chemistry, emphasizing the structure and behavior of rock forming minerals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**GEOSCI 771 – IGNEOUS PETROLOGY**

3 credits.

Classification, characteristics, and petrogenesis of igneous rocks. Representative rock suites studied in lab.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**GEOSCI 777 – ELECTRON MICROPROBE ANALYSIS**

3 credits.

Proper use and functioning of electron probe and SEM, their use in microanalysis (WDS, EDS), range of applications, and limitations.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEOSCI 793 – GEOPHYSICAL INVERSE THEORY**

3 credits.

Application of inverse methods to geophysical measurements of the structure of the earth.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEOSCI 796 – PHYSICS OF THE EARTH II**

3 credits.

Theory and observations of earthquakes, seismic waves and plate tectonics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**GEOSCI 875 – ADVANCED TOPICS IN GEOLOGY**

1-3 credits.

Special topics in Geoscience.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEOSCI/ATM OCN/BOTANY/CIV ENGR/ENVIR ST/ZOOLOGY 911 – LIMNOLOGY AND MARINE SCIENCE SEMINAR**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GEOSCI 920 – SEMINAR IN GLACIAL AND PLEISTOCENE GEOLOGY**

1-3 credits.

An exploration of modern glacial, glaciology, and Pleistocene geology literature. Includes a field trip to explore local glacial geology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**GEOSCI 929 – SEMINAR-HYDROGEOLOGY**

1-2 credits.

Special topics in Hydrogeology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**GEOSCI 970 – SEMINAR-GEOCHEMISTRY**

2 credits.

Exploration of topics in the field of Geochemistry with an emphasis on engagement with recent literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**GEOSCI/ATM OCN/BOTANY/ENVIR ST/F&W ECOL/GEOG/ZOOLOGY 980 – EARTH SYSTEM SCIENCE SEMINAR**

1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**GEOSCI 990 – RESEARCH**

1-12 credits.

Research supervised by individual faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**GEOSCI 999 – ADVANCED INDEPENDENT READING**

1-3 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2017

## GERMAN (GERMAN)

**GERMAN 101 – FIRST SEMESTER GERMAN**

4 credits.

Emphasis on proficiency in German through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**GERMAN 102 – SECOND SEMESTER GERMAN**

4 credits.

Emphasis on proficiency in German through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** GERMAN 101 or placement into GERMAN 102

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 111 – FIRST SEMESTER DUTCH**

4 credits.

Emphasis on proficiency in Dutch through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GERMAN 112 – SECOND SEMESTER DUTCH**

4 credits.

Emphasis on proficiency in Dutch through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** GERMAN 111

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 203 – THIRD SEMESTER GERMAN**

4 credits.

Four-skills approach (speaking, listening, writing, reading) centered around authentic texts, recordings, and images. Grammar review, concerted vocabulary expansion, and intensive practice.

**Requisites:** GERMAN 102 or placement into GERMAN 203

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 204 – FOURTH SEMESTER GERMAN**

4 credits.

Four-skills approach (speaking, listening, writing, reading) centered around authentic texts, recordings, and images. Grammar review, concerted vocabulary expansion, and intensive practice.

**Requisites:** GERMAN 203 or placement into GERMAN 204

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 213 – THIRD SEMESTER DUTCH**

4 credits.

Review of Dutch grammar and continuation of systematic vocabulary development.

**Requisites:** GERMAN 112

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GERMAN 214 – FOURTH SEMESTER DUTCH**

4 credits.

Review of Dutch grammar and continuation of systematic vocabulary development.

**Requisites:** GERMAN 213

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 236 – BASCOM COURSE**

3 credits.

Developing skills in critical reading, logical thinking, use of evidence, and use of library resources. Emphasis on writing in the conventions of specific fields.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed - Communication Part B  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**GERMAN 245 – TOPICS IN DUTCH LIFE AND CULTURE**

3 credits.

Cultural history and traditions of Dutch speaking countries. All readings and lectures in English.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**GERMAN 249 – INTERMEDIATE GERMAN - SPEAKING AND LISTENING**

3 credits.

Drawing mainly on contemporary audio and video materials from German-speaking countries, deepen understanding of German as a spoken language by learning how native speakers vary their use of sound structures, vocabulary, and grammar according to speech situation.

**Requisites:** GERMAN 204 or placement into GERMAN 249, 258, or 262

**Course Designation:** Frgn Lang - 5th + semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 253 – INTRODUCTION TO GERMAN CINEMA**

3 credits.

An English-language survey of German film, one of the most influential national cinemas in the world. Consider important periods and topics such as the Weimar Republic (1918-1933); Nazism (1933-1945); post-war popular cinema; socialist East Germany; New German Cinema; and art house and international favorites of the contemporary period. Analyze how the films represent important cultural and social issues such as gender, sexuality, race/ethnicity, class, nationality, globalization, and migration.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze celebrated ("canonical") films and hidden gems from more than 100 years of German cinema.

Audience: Undergraduate

2. Recognize how history, context, and genre influence filmmaking.

Audience: Undergraduate

3. Compare representations of German culture to your own observations and experiences.

Audience: Undergraduate

4. Identify and interpret representations of gender/sexuality, race/ethnicity, class, and more.

Audience: Undergraduate

**GERMAN 258 – INTERMEDIATE GERMAN-READING**

3 credits.

Develop reading skills by working with literary and cultural texts from 1800 to the present. Emphasizes close reading, textual analysis, historical context, and the use of appropriate reading strategies.

**Requisites:** GERMAN 204 or placement into GERMAN 249, 258, or 262

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frgn Lang - 5th + semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 262 – INTERMEDIATE GERMAN-WRITING**

3 credits.

Individual and collaborative writing as well as teacher- and student-guided writing activities. Writings rely on authentic text models, many with German-specific cultural connotations.

**Requisites:** GERMAN 204 or placement into GERMAN 249, 258, or 262

**Course Designation:** Frgn Lang - 5th + semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 264 – CULTURE IN 20TH CENTURY BERLIN**

3 credits.

In the twentieth century, Berlin functioned as the seat of government and as a showcase for conflicting ideologies during the Cold War, and it now faces the challenge of returning to its function as reunified Germany's capital without ignoring its past. Through it all, Berlin has maintained a reputation as a center for artistic experimentation and a mecca for alternative culture. Examine the various arts and forms of entertainment from the turn of the century through the Weimar Republic, the Third Reich, the Cold War, and the reunification, in an effort to determine how politics, economics, and demographics have come together to shape a unique Berlin culture.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. demonstrate a thorough understanding of the historical conditions that shaped Berlin's unique culture

Audience: Undergraduate

2. demonstrate an awareness of the living circumstances of Berliners throughout the tumultuous changes they experienced in the twentieth century

Audience: Undergraduate

3. recognize the similarities as well as difference between Berlin culture and cultures of other contemporary societies through cultural phenomena that include the arts, media, literature, entertainment, taste, education, gender roles, national identities, and belief systems

Audience: Undergraduate

4. apply oral and written skills in interpreting memoirs and contemporary films (with English translations) in their historical context

Audience: Undergraduate

5. gain an appreciation for Berlin's changing role in the world

Audience: Undergraduate

**GERMAN 266 – TOPICS IN GERMAN AND/OR YIDDISH CULTURE**

3 credits.

Introduction to diverse cultural expressions of German and/or Yiddish speakers worldwide.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2018**GERMAN 267 – YIDDISH SONG AND THE JEWISH EXPERIENCE**

3-4 credits.

Explores Yiddish song as an expression of the modern Jewish experience from Eastern Europe to the US. Covers folk song, popular and art music. Music and readings together provide an analytical framework to examine cultural and historical issues.

**Requisites:** None**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**GERMAN/JEWISH/LITTRANS 269 – YIDDISH LITERATURE AND CULTURE IN EUROPE**

3 credits.

Exploration of European Yiddish fiction, poetry, folklore, and cinema, with a focus on works of the 19th and 20th centuries.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**GERMAN 272 – NAZI CULTURE**

3 credits.

Examines how ideology and new policies influenced cultural life in the Third Reich. Topics include propaganda and entertainment films, music, literature and theater, visual arts and architecture, youth education, and consumer culture specifically in its appeal to women.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**GERMAN/RELIG ST/SOC 273 – GOD & MONEY**

3 credits.

Explores the historical connections between capitalism and religion. Considers if and how religious ideas and practices facilitated the rise of capitalism; asks whether religious institutions have supported the reproduction of social inequalities, unjust labor practices, and exploitative economies; and studies the role played by religious actors in the critique of capitalism. Pays attention to the historical specificity of the capitalist system, its conditions of emergence in the Christian West, and the effects of its globalization on non-Christian traditions. Covers topics including classical social theories of religion and capitalism; contemporary examples of religious practice and capital accumulation; and the relationship between religious movements and social-economic justice.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of debates surrounding the historical and theoretical relationship between religion and capitalism  
Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives on the relationship between religion and capitalism across a range of fields (e.g., philosophy, history, sociology) and contexts (e.g., America, Europe, Middle East, and South Asia)  
Audience: Undergraduate

3. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in a range of media  
Audience: Undergraduate

4. Generate original ideas and texts, experimenting and taking risks, solving problems, and answering textual questions  
Audience: Undergraduate

5. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness  
Audience: Undergraduate

**GERMAN 275 – KAFKA AND THE KAFKAESQUE**

3 credits.

Examines a wide selection of texts by Franz Kafka to approach an understanding of his universe and prepare ourselves to view this universe in comparison with other contemporary authors as well as authors from other cultures and eras (A. Camus, W. G. Sebald, T. Pynchon, H. Mulisch, P. Roth, H. Murakami). Also highlights literature, film, and art works in the tradition of the Kafkaesque.

**Requisites:** Satisfied Communications A requirement**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**GERMAN/LITTRANS 276 – SPECIAL TOPICS IN GERMAN AND WORLD LITERATURE/S**

3 credits.

Exploration of diverse world literary traditions with an emphasis on German and German speaking cultures.

**Requisites:** Satisfied Communications A requirement**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage with world literature as a lens for the human experience  
Audience: Undergraduate

2. Read and discuss literature of German speaking countries and the world in translation  
Audience: Undergraduate

3. Recognize and explain general themes common to different cultures  
Audience: Undergraduate

4. Write about the topics and texts covered in the course  
Audience: Undergraduate

**GERMAN 278 – TOPICS IN GERMAN CULTURE**

3 credits.

Introduction to German-speaking cultures. Topics may include Weimar culture, Nazi culture, Berlin, fin-de-siecle Vienna, minorities, representatives of the Holocaust, Germanic mythology, East Germany, Germans in America. Readings and lectures in English.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

### GERMAN/JEWISH/LITTRANS 279 – YIDDISH LITERATURE AND CULTURE IN AMERICA

3 credits.

Exploration of American Yiddish poetry, fiction, theater, and cinema created by European Jews in the United States.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Prepare students for life and careers in an increasingly multicultural and multilingual US environment

Audience: Undergraduate

2. Develop critical thinking skills through sustained discussion with one's peers and foster a constructive climate in which to engage with questions concerning cultural, racial, religious, and linguistic difference

Audience: Undergraduate

3. Acquire a critical vocabulary to speak about historical and present-day issues concerning migration, ethnic identity, and religious difference

Audience: Undergraduate

4. Engage in reflective writing practices, respond critically to feedback, and assess one's own communicative strengths

Audience: Undergraduate

5. Identify the major themes of American Yiddish literature and culture from the early-twentieth century until today. These themes include: the politics of language use; the negotiation of a minoritized status; regional vs. national American Jewish identity; inter-generational conflict; Jews and the question of race

Audience: Undergraduate

### GERMAN/LITTRANS 280 – FROM GRIMM TO GRYFFINDOR: GERMAN FAIRYTALES (RE)IMAGINED

3 credits.

From Rumpelstiltskin to Rapunzel, the rich fairy-tale tradition of the German-speaking world is filled with familiar themes and subversive morals. With an eye to depictions of gender, gender roles, sexuality, and race, we critically engage with these tales and contextualize them within the social and political landscapes that shaped them.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically engage with German fairytales from different time periods and contextualize them within the social and political landscapes that shaped them

Audience: Undergraduate

2. Explore fairytales through a variety of analytical lenses, including feminist and queer theories, ecocriticism, and psychoanalytic perspectives

Audience: Undergraduate

3. Recognize and analyze the fairytale's transcultural influences in literature, art, music, poetry, and pop culture

Audience: Undergraduate

### **GERMAN 285 – INTERMEDIATE INTENSIVE (HONORS) GERMAN: LANGUAGE, CULTURE, TEXTS**

6 credits.

Intensive introduction to German-language culture and texts of varying length and genre, emphasizing reading, writing, and discussion skills. Equivalent to GERMAN 258 and 262.

**Requisites:** GERMAN 204. Not open to students with credit for GERMAN 258 or 262.

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Frqn Lang – 5th + semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain knowledge of major periods in German culture, literature, and history from 1750 to the present

Audience: Undergraduate

2. Become aware of how German texts responded to contemporary events or issues and, conversely, how those texts have shaped and influenced both past and present-day German culture

Audience: Undergraduate

3. Develop intercultural competence by reflecting on the connections and differences between their native culture and German culture and its objects

Audience: Undergraduate

4. Learn to appreciate the relevance of grammatical accuracy, lexical precision, proper discourse organization, and voice/expressiveness in terms of conveyance of exact intended meaning (including tone, implications, and connotations), aesthetic value, and generally, as a means of sharing experiences across language and cultural boundaries

Audience: Undergraduate

5. Be able to approach a wide variety of textual genres in different ways appropriate to each

Audience: Undergraduate

6. Become attentive to rhetorical and formal strategies in different types of texts and gain the ability and vocabulary to describe and analyze them

Audience: Undergraduate

7. Learn how to write and talk about texts both analytically and creatively

Audience: Undergraduate

8. Improve critical thinking abilities through group discussion and individual assignments asking them to argue for and support positions

Audience: Undergraduate

9. Gain enhanced awareness of reading styles and strategies and how to apply them while reading to develop critical reading skills for different text types

Audience: Undergraduate

10. Improve German language abilities in the areas of writing, reading, listening, and speaking through individual assignments, collaborative work, and class discussions

Audience: Undergraduate

11. Enhance teamwork skills through extensive collaborative work both in and out of class

Audience: Undergraduate

### **GERMAN 298 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

### **GERMAN 299 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **GERMAN 305 – LITERATUR DES 20. UND 21. JAHRHUNDERTS**

3-4 credits.

Overview of new and recent literature in German within its historical and cultural contexts using a variety of genres and cultural artifacts, including fiction, drama, poetry, film, and popular songs.

**Requisites:** (GERMAN 249, 258, and 262) or (GERMAN 249 and 285)

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

### **GERMAN 311 – FIRST SEMESTER DUTCH FOR GRADUATE STUDENTS**

3 credits.

Acquire a minimal communication level of proficiency in Dutch through listening, speaking, reading, and writing.

**Requisites:** Graduate/professional standing

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **GERMAN 312 – SECOND SEMESTER DUTCH FOR GRADUATE STUDENTS**

3 credits.

Acquire a minimal communication level of proficiency in Dutch through listening, speaking, reading, and writing.

**Requisites:** GERMAN 311

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 313 – THIRD SEMESTER DUTCH FOR GRADUATE STUDENTS**

3 credits.

A review of Dutch grammar and vocabulary development. Reading and discussion of newspaper articles and modern short stories.

**Requisites:** GERMAN 312

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**GERMAN 314 – FOURTH SEMESTER DUTCH FOR GRADUATE STUDENTS**

3 credits.

Reading and discussion of texts dealing with the cultural history of the Netherlands and Flanders as well as samples of modern Dutch fiction.

**Requisites:** GERMAN 313

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**GERMAN 325 – TOPICS IN DUTCH LITERATURE**

3 credits.

Study of an author or theme in modern Dutch/Flemish literature, presented by the current Dutch/Flemish writer in residence.

**Requisites:** GERMAN 214

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

**Requisites:** GERMAN 314**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**GERMAN 650 – HISTORY OF THE GERMAN LANGUAGE**

3 credits.

Overview of the history of the German language; basic methodological and bibliographical training necessary for work in German philology/linguistics and the older Germanic languages.

**Requisites:** Senior standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023

**GERMAN/MEDIEVAL 651 – INTRODUCTION TO MIDDLE HIGH GERMAN**

3 credits.

Middle High German grammar and vocabulary with the goals of fluency and accuracy in reading medieval texts. Covers topics in phonology, morphology, syntax, and lexicon.

**Requisites:** (GERMAN 249, 258, and 262), (GERMAN 249 and 285), or graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GERMAN 676 – ADVANCED SEMINAR IN GERMAN STUDIES**

3 credits.

Focuses on a topic in German studies.

**Requisites:** Senior standing and GERMAN 337

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GERMAN 681 – SENIOR HONORS THESIS-FIRST SEMESTER**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**GERMAN 682 – SENIOR HONORS THESIS-SECOND SEMESTER**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**GERMAN 683 – SENIOR HONORS SEMINAR IN GERMAN LITERATURE**

3 credits.

Focuses on a topic in German studies.

**Requisites:** GERMAN 385 and Declared in an Honors program

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**GERMAN 698 – DIRECTED STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**GERMAN 699 – DIRECTED STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**GERMAN 720 – COLLEGE TEACHING OF GERMAN**

1 credit.

Discuss German-language specific instruction. Emphasis on teaching German and developing identity as a language instructor.

**Requisites:** Declared in German MA or PHD

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GERMAN 722 – THEORY OF TEACHING GERMAN**

2 credits.

Theory and methodology of teaching German as a second language.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**GERMAN 723 – PRACTICUM IN TEACHING UNDERGRADUATE LITERATURE**

1-2 credits.

Observation and discussion of undergraduate literature course.  
Consideration of pedagogical issues and limited opportunity for practice teaching.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**GERMAN 724 – PRACTICUM IN TEACHING UNDERGRADUATE LINGUISTICS**

1-2 credits.

Observation and discussion of undergraduate linguistics course.  
Consideration of pedagogical issues and limited opportunity for practice teaching.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**GERMAN 725 – PRACTICUM IN TEACHING UNDERGRADUATE CULTURE**

1-2 credits.

Observation and discussion of undergraduate culture course.  
Consideration of pedagogical issues and limited opportunity for practice teaching.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**GERMAN 727 – TOPICS IN APPLIED LINGUISTICS**

3 credits.

Selected issues in language acquisition and language teaching.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**GERMAN 742 – TOPICS IN GERMAN CULTURAL STUDIES**

3 credits.

Selected topics in German culture.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**GERMAN/MEDIEVAL 755 – OLD GERMANIC LANGUAGES**

3 credits.

Old High German, Old Saxon, and Gothic on a rotating basis.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**GERMAN 758 – TOPICS IN CONTEMPORARY GERMAN**

3 credits.

Topics in contemporary German culture, literature, and linguistics.

1-6 credits.

Advanced study under guidance.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**GERMAN/FRENCH/HISTORY/POLI SCI/SOC 804 – INTERDISCIPLINARY WESTERN EUROPEAN AREA STUDIES SEMINAR**

3 credits.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**GERMAN 947 – SEMINAR IN GERMAN LITERATURE AND CULTURE**

3 credits.

Cultivate a deep knowledge and appreciation of German literature and German intellectual history.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**GERMAN 960 – SEMINAR IN GERMAN LINGUISTICS**

3 credits.

Topic from a core area of linguistics, with integrated discussion of methodological approaches; bibliographical skills; basics of linguistic scholarship.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024

**GERMAN 990 – INDIVIDUAL RESEARCH IN LITERATURE**

1-9 credits.

Independent research and writing under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**GERMAN 991 – INDIVIDUAL RESEARCH LINGUISTICS AND GERMANIC PHILOLOGY**

1-9 credits.

Independent research and writing on the subject of linguistics and philology under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## GERMAN, NORDIC, AND SLAVIC (GNS)

**GNS/JEWISH 105 – FIRST SEMESTER YIDDISH**

4 credits.

Introduction to the Yiddish language through speaking, listening, reading, and writing. Emphasis on communication with attention to cultural and historical context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Read the Yiddish alphabet and write in Yiddish cursive

Audience: Undergraduate

2. Express oneself in Yiddish at the sentence level in written and oral communications

Audience: Undergraduate

3. Read short Yiddish texts in the present, past, and future tenses

Audience: Undergraduate

4. Mobilize a vocabulary of 200+ Yiddish words, including those terms necessary to describe one's family, the life of the student, travel plans, daily life, and different geographic centers of Yiddish cultural production

Audience: Undergraduate

5. Name and describe major figures of twentieth and twenty-first century Yiddish culture

Audience: Undergraduate

**GNS/JEWISH 106 – SECOND SEMESTER YIDDISH**

4 credits.

Introduction to the Yiddish language through speaking, listening, reading, and writing. Emphasis on communication with attention to cultural and historical context.

**Requisites:** GNS/JEWISH 105

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Deploy Yiddish at the multi-sentence level in written and oral communications

Audience: Undergraduate

2. Express opinions about authentic Yiddish texts, including contemporary newspaper articles and poetry selections from the twentieth century

Audience: Undergraduate

3. Mobilize a vocabulary of 400+ Yiddish words, including those terms necessary to describe time, weather, calendrical units, literature (children's books, poetry, and the history of Yiddish publishing)

5. Demonstrate familiarity with various forms of Yiddish cultural expression, such as Yiddish folksong, Yiddish poetry, Yiddish film, and the politics of Yiddishism

Audience: Undergraduate

**GNS/FOLKLORE 200 – FOLKLORE OF CENTRAL, EASTERN AND NORTHERN EUROPE**

3 credits.

Folklore of Central, Eastern and Northern Europe and among emigrants from these regions in North America. A survey of genres of folklore, history of research, and modes of interpretation, past and present.

**Requisites:** None

**Course Designation:** Gen Ed – Communication Part B

Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recognize and understand key concepts important to the study of folklore as related to the cultures of people in and from the countries of Central, Eastern and Northern Europe.

Audience: Undergraduate

2. Articulate and apply methods folklorists use to document, describe, and discuss culture.

Audience: Undergraduate

3. Produce folkloristic products in the form of essays, oral presentations, and digital products.

Audience: Undergraduate

**GNS/ENVIR ST 210 – CULTURES OF SUSTAINABILITY: CENTRAL, EASTERN, AND NORTHERN EUROPE**

3 credits.

Exploration of the ideals and realities of sustainability in Central, Northern and East European contexts. Cultural, historical, environmental and other perspectives on sustainability on a local and global scale.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of culture in Central, Eastern and North (CEN) European by demonstrating a humanistic understanding of sustainability.

Audience: Undergraduate

2. Apply sustainability principles and/or frameworks to addressing the challenge of working respectfully with stakeholders from different cultural, geographic, and political backgrounds to sustain culture in Central, Eastern and North (CEN) European contexts

Audience: Undergraduate

3. Analyze the causes of and solutions for the sustainability challenge of culture in Central, Eastern and North (CEN) European contexts.

Audience: Undergraduate

4. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of culture in Central, Eastern and North (CEN) European contexts using a humanistic approach and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

6. Use sustainability principles for developing personal goals and professional values.

Audience: Undergraduate

**GNS/HISTORY 265 – AN INTRODUCTION TO CENTRAL ASIA: FROM THE SILK ROUTE TO AFGHANISTAN**

3 credits.

Examination of human geography, ethnicity, nomadism and pastoralism, oases cultures, religion and international politics of the silk routes of central Asia. Not open to students with credit for HIST 265 prior to Fall 2018.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GNS 270 – INTRODUCTORY TOPICS IN GNS**

3 credits.

Elementary topics in German, Nordic, and/or Slavic culture, folklore, linguistics, and/or language.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize distinctive features of cultures of Central, Eastern and/or Northern Europe as reflected in specific cultural products

Audience: Undergraduate

2. Analyze cultural products from Central, Eastern, and/or Northern Europe in relation to societal and historical contexts.

Audience: Undergraduate

3. Create academic products that adhere to the norms of scholarly inquiry and communication in the humanistic study of the languages and cultures of Central, Eastern and/or Northern Europe.

Audience: Undergraduate

4. Recognize and discuss the complex ways in which culture is used to include and exclude people within the societies of Central, Eastern, and/or Northern Europe, as elsewhere in the world.

Audience: Undergraduate

**GNS 324 – LITERATURES OF CENTRAL ASIA**

3 credits.

Critical survey of the development of medieval and modern literatures of the peoples of Central Asia from pre-Islamic times to the present with selected readings in English translation. Not open to students with credit for LCA 314 prior to fall 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Recognize and understand the fundamentals of cultural analysis and interpretation of verbal and visual arts. Students will be able to map major intellectual trends in Central Asian Literature and its influence worldwide.

Audience: Both Grad & Undergrad

2. Hone and apply students' analytical skills. The information will be provided via lectures and readings. Students' knowledge on the subject will be tested in exams, while their analytical skills and critical thinking abilities will be further examined through their paper assignments.

Audience: Both Grad & Undergrad

3. Identify the most important literature in major research languages and for utilizing materials in those research languages which they command.

Audience: Graduate

**GNS 331 – FIRST SEMESTER KAZAKH**

4 credits.

Provides an introduction to the Kazakh language, which is a Turkic language spoken by about 11 million people in Kazakhstan, China, Mongolia, Turkey, Uzbekistan, Tajikistan, Turkmenistan, Russia, and Iran. Work within four language skills: listening, reading, writing, and speaking. Learn to communicate in Kazakh in authentic situations. Kazakh will be used as the primary language in classroom instructions, with minimal use of English for explanations of grammar.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and employ Kazakh Language at an intermediate level, mastering elements of grammar essential to effective communication in Kazakh

Audience: Undergraduate

2. Recognize aspects of Kazakh daily life

Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Kazakh

Audience: Undergraduate

**GNS 332 – SECOND SEMESTER KAZAKH**

4 credits.

Building on skills learned in first semester Kazakh, learn to communicate in more extended situations. Information on holidays, traditions and colloquial phrases will be introduced. Pays special attention to reading and writing and to vocabulary expansion.

**Requisites:** GNS 331**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Understand and employ Kazakh language at an elementary level

Audience: Undergraduate

2. Recognize aspects of Kazakh daily life

Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Kazakh

Audience: Undergraduate

**GNS 339 – FIRST SEMESTER TURKISH**

4 credits.

Provides an introduction to the Turkish language, which is spoken by more than 80 million people in Turkey and Europe. Work within four language skills: listening, reading, writing, and speaking. Learn to communicate in Turkish in authentic situations. Turkish will be used as the primary language in classroom instructions, with minimal use of English.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Understand and employ Turkish language at an elementary level

Audience: Undergraduate

2. Recognize aspects of Turkish daily life

Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Turkish

Audience: Undergraduate

**GNS 340 – SECOND SEMESTER TURKISH**

4 credits.

Building on skills learned in first semester Turkish, learn to communicate in more extended situations. Information on holidays, traditions and colloquial phrases will be introduced. Besides everyday Turkish, learn written Turkish such as formal letters, orders and messages. Pays special attention to reading and writing and to vocabulary expansion.

**Requisites:** GNS 339**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand and employ Turkish Language at an elementary level

Audience: Undergraduate

2. Recognize aspects of Turkish daily life

Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Turkish

Audience: Undergraduate

**GNS 351 – FIRST SEMESTER CENTRAL EURASIAN LANGUAGE**

4 credits.

Introductory study of a Central Eurasian study, including introductory grammar to read, write and speak about daily life and interactions in the topic language. Upon completion, student can expect to possess a firm grammatical foundation for further study of oral and written Tajik, Uyghur, or Uzbek.

**Requisites:** Declared in Central Eurasian Studies Summer Institute**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Understand and employ Tajik, Uyghur, or Uzbek Language at an elementary level

Audience: Undergraduate

2. Recognize aspects of Tajik, Uyghur, or Uzbek daily life

Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Tajik, Uyghur, or Uzbek

Audience: Undergraduate

**GNS 352 – SECOND SEMESTER CENTRAL EURASIAN LANGUAGE**

4 credits.

Introductory study of a Central Eurasian study, including introductory grammar to read, write and speak about daily life and interactions in the topic language. Upon completion, student can expect to possess a firm grammatical foundation for further study of oral and written Tajik, Uyghur, or Uzbek.

**Requisites:** Declared in Central Eurasian Studies Summer Institute

**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and employ Tajik, Uyghur, or Uzbek Language at an elementary level

Audience: Undergraduate

2. Recognize aspects of Tajik, Uyghur, or Uzbek daily life

Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Tajik, Uyghur, or Uzbek

Audience: Undergraduate

**GNS 370 – TOPICS IN GNS (INTERMEDIATE)**

3 credits.

Intermediate topics in German, Nordic, and/or Slavic culture, folklore, linguistics, and/or language.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Recognize distinctive features of cultures of Central, Eastern and/or Northern Europe as reflected in specific cultural products.

Audience: Undergraduate

2. Analyze cultural products from Central, Eastern, and/or Northern Europe in relation to societal and historical contexts.

Audience: Undergraduate

3. Create academic products that adhere to the norms of scholarly inquiry and communication in the humanistic study of the languages and cultures of Central, Eastern and/or Northern Europe.

Audience: Undergraduate

4. Recognize and discuss the complex ways in which culture is used to include and exclude people within the societies of Central, Eastern, and/or Northern Europe, as elsewhere in the world.

Audience: Undergraduate

**GNS 375 – PHILOSOPHY, THEORY, CRITICISM**

3 credits.

Selected studies in critical theory, continental philosophy, and/or literary criticism; topics may include German idealism, psychoanalysis, phenomenology, linguistics, Marxism, gender theory, critical race studies, religion, translation, poetics, media, migration studies, etc.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate knowledge of major themes, terms, and interpretive currents in the history of modern/contemporary philosophy, theory, and criticism

Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods in modern philosophical/theoretical writing

Audience: Undergraduate

3. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in modern philosophy, theory, and criticism

Audience: Undergraduate

4. Generate original ideas and texts, experimenting and taking risks, solving problems, and answering questions in a range of texts

Audience: Undergraduate

5. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness

Audience: Undergraduate

**GNS/JEWISH 405 – FIRST SEMESTER YIDDISH FOR GRADUATE STUDENTS**

4 credits.

Introduction to the Yiddish language through speaking, listening, reading, and writing. Emphasis on communication with attention to cultural and historical context. Includes tasks designed to facilitate Yiddish-related research.

**Requisites:** Graduate/professional standing

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Read the Yiddish alphabet and write in Yiddish cursive

Audience: Undergraduate

2. Express oneself in Yiddish at the sentence level in written and oral communications

Audience: Undergraduate

3. Read short Yiddish texts in the present, past, and future tenses

Audience: Undergraduate

4. Mobilize a vocabulary of 200+ Yiddish words, including those terms necessary to describe one's family, the life of the student, travel plans, daily life, and different geographic centers of Yiddish cultural production

Audience: Undergraduate

5. Name and describe major figures of twentieth and twenty-first century Yiddish culture

Audience: Undergraduate

**GNS 429 – INTERMEDIATE SUMMER IMMERSION TURKISH**

8 credits.

Continues the study of the Turkish language with an emphasis on four language skills: listening, reading, writing, and speaking in order to develop proficiency at the intermediate level. Improve communication in Turkish. Instruction will emphasize the language that is relevant to situations that students are likely to encounter if they travel to or live in Turkey. The secondary goal of the course is to improve students' understanding of Turkish society and culture. Students are deeply engaged in Turkish culture through history, literature, art and politics.

**Requisites:** GNS 329 or 340 and declared in Turkish Flagship Language Initiative

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2019

**Learning Outcomes:** 1. Understand and employ Turkish language at an intermediate level, mastering elements of grammar essential to effective communication in Turkish

Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations

Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text

Audience: Undergraduate

**GNS 431 – THIRD SEMESTER KAZAKH**

4 credits.

Continues the study of the Kazakh language with an emphasis on four language skills: listening, reading, writing, and speaking in order to develop proficiency at the intermediate level. The primary goal is to improve communication in Kazakh. Instruction will emphasize the language that is relevant to situations that students are likely to encounter if they travel to or live in Kazakhstan. The secondary goal of the course is to improve students' understanding of Kazakh society and culture.

**Requisites:** GNS 332

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and employ Kazakh language at an intermediate level, mastering elements of grammar essential to effective communication in Kazakh

Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations

Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text

Audience: Undergraduate

**GNS 432 – FOURTH SEMESTER KAZAKH**

4 credits.

Continue to learn more about the Kazakh language through history, literature and art, in order to better understand its cultural codes.

**Requisites:** GNS 431

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and employ Kazakh language at an intermediate level, mastering elements of grammar essential to effective communication in Kazakh

Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations

Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text

Audience: Undergraduate

**GNS 439 – THIRD SEMESTER TURKISH**

4 credits.

Continues the study of the Turkish language, focusing on four language skills--listening, reading, writing, and speaking--in order to develop proficiency at the intermediate level. Improve communication in Turkish. Instruction will emphasize the language that is relevant to situations that students are likely to encounter if they travel to or live in Turkey. The secondary goal of the course is to improve students' understanding of Turkish society and culture.

**Requisites:** GNS 340

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand and employ Turkish language at an intermediate level, mastering elements of grammar essential to effective communication in Turkish

Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations

Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text

Audience: Undergraduate

**GNS 440 – FOURTH SEMESTER TURKISH**

4 credits.

Continues the study of the Turkish language, focusing on four language skills--listening, reading, writing, and speaking--in order to develop proficiency at the intermediate level. In addition to the topics covered in previous semesters, learn more about the language through history, literature and art, in order to better understand its cultural codes.

**Requisites:** GNS 439

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and employ Turkish language at an intermediate level, mastering elements of grammar essential to effective communication in Turkish

Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations

Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text

Audience: Undergraduate

**GNS 451 – THIRD SEMESTER CENTRAL EURASIAN LANGUAGE**

4 credits.

Third semester level language taught in an intensive 8-week summer language program.

**Requisites:** Declared in Central Eurasian Studies Summer Institute

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and employ Tajik, Uyghur, or Uzbek Language at an intermediate level, mastering elements of grammar essential to effective communication in Tajik, Uyghur, or Uzbek

Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations

Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text

Audience: Undergraduate

**GNS 452 – FOURTH SEMESTER CENTRAL EURASIAN LANGUAGE**

4 credits.

Introduces intermediate-level communication skills in Central Eurasian languages in varying settings. Students will learn a wide range of vocabulary, grammar structure and pragmatic usage in situated dialogues. They will improve four language skills (listening, speaking, reading and writing) and pragmatic competence through interactive and meaningful in-class activities and after-class assignments.

**Requisites:** Declared in Central Eurasian Studies Summer Institute

**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Comprehend and employ Tajik, Uyghur, or Uzbek Language at an intermediate level, mastering elements of grammar essential to effective communication in Tajik, Uyghur, or Uzbek  
Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations  
Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text  
Audience: Undergraduate

**GNS 460 – READINGS IN TURKISH: CONTEMPORARY TURKEY THROUGH LITERATURE AND MEDIA**

4 credits.

Improve reading skills in Turkish by also developing and employing analytical skills to comprehend, identify and respond to salient features of the contemporary Turkish society. Acquire skills to comprehend a variety of texts within Turkey's social and political framework. Designed for students participating in the Turkish Overseas Flagship Program.

**Requisites:** GNS 429

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. read within a normal range of speed and with almost complete comprehension a variety of authentic prose material on unfamiliar subjects independent of subject matter knowledge.  
Audience: Undergraduate

2. comprehend a variety of styles and forms pertinent to professional needs.  
Audience: Undergraduate

3. read fluently and accurately all styles and forms of the language pertinent to professional needs.  
Audience: Undergraduate

**GNS 471 – ADVANCED TOPICS IN EAST EUROPEAN AND CENTRAL ASIAN LANGUAGES AND CULTURES**

1-4 credits.

Advanced topics in East European and Central Asian culture, folklore, linguistics, and/or language.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize distinctive features of cultures of Eastern Europe and Central Asia as reflected in specific cultural products.  
Audience: Undergraduate

2. Analyze cultural products from Eastern Europe and Central Asia in relation to societal and historical contexts.  
Audience: Undergraduate

3. Create academic products that adhere to the norms of scholarly inquiry and communication in the humanistic study of the languages and cultures of Eastern Europe and Central Asia.  
Audience: Undergraduate

4. Recognize and discuss the complex ways in which culture is used to include and exclude people within the societies of Eastern Europe and Central Asia, as elsewhere in the world.  
Audience: Undergraduate

**GNS 529 – ADVANCED SUMMER IMMERSION TURKISH**

8 credits.

Continues the study of the Turkish language with an emphasis on four language skills: listening, reading, writing, and speaking in order to develop proficiency at the advanced level. Improve communication in Turkish. Instruction will emphasize the language that is relevant to situations that students are likely to encounter if they travel to or live in Turkey.

The secondary goal of the course is to improve students' understanding of Turkish society and culture. Students are deeply engaged in Turkish culture through history, literature, art and politics.

**Requisites:** GNS 429 or GNS 440 and declared in Turkish Flagship Language Initiative

**Course Designation:** Frgn Lang - 5th + semester language course  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2019

**Learning Outcomes:** 1. Understand and employ Turkish language at an advanced level, possessing the ability to speak and write in modes from colloquial to professional.

Audience: Undergraduate

2. Analyze and interpret texts with sound application of Turkish language and cultural awareness

Audience: Undergraduate

3. Evaluate and explain complex views and issues, using knowledge and perspective grounded in cultural competency

Audience: Undergraduate

**GNS 531 – FIFTH SEMESTER KAZAKH**

3-4 credits.

Enhance speaking, listening, writing and reading skills. Build confidence in speaking about issues related to daily life.

**Requisites:** GNS 432

**Course Designation:** Breadth - Humanities

Frng Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Maintain conversations and discussions on familiar, as well as unfamiliar, concrete topics using connected sentences and probing questions.

Audience: Undergraduate

2. Deliver detailed and organized presentations on familiar as well as unfamiliar concrete topics.

Audience: Undergraduate

3. Understand the underlying message and most supporting details in complex informational and fictional texts.

Audience: Undergraduate

4. Tell stories based on concrete experiences in academic, social, and professional topics of interest.

Audience: Undergraduate

5. Recognize and apply culturally relevant aspects of using the language in familiar and everyday contexts.

Audience: Undergraduate

6. Describe some aspects of Kazakh culture and customs.

Audience: Undergraduate

**GNS 532 – SIXTH SEMESTER KAZAKH**

3–4 credits.

Enhance speaking, listening, writing and reading skills. Build confidence in speaking about issues related to daily life.

**Requisites:** GNS 531

**Course Designation:** Breadth – Humanities

Frng Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Maintain conversations and discussions on familiar, as well as unfamiliar, concrete topics using connected sentences and probing questions.

Audience: Undergraduate

2. Deliver detailed and organized presentations on familiar as well as unfamiliar concrete topics.

Audience: Undergraduate

3. Understand the underlying message and most supporting details in complex informational and fictional texts.

Audience: Undergraduate

4. Tell stories based on concrete experiences in academic, social, and professional topics of interest.

Audience: Undergraduate

5. Recognize and apply culturally relevant aspects of using the language in familiar and everyday contexts.

Audience: Undergraduate

6. Describe some aspects of Kazakh culture and customs.

Audience: Undergraduate

**GNS 539 – FIFTH SEMESTER TURKISH AND AZERI**

3–4 credits.

Continues the study of the Turkish languages combined with Azerbaijani, which is a Turkic language closely related to Turkish. Learn Azerbaijani written in the Latin alphabet and its minor differences from Turkish.

Develop proficiency at the advanced level in listening, speaking, reading and writing in Turkish and in Azerbaijani.

**Requisites:** GNS 440

**Course Designation:** Breadth – Humanities

Frng Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand and employ Turkish language at an advanced level, possessing the ability to speak and write in modes from colloquial to professional.

Audience: Undergraduate

2. Analyze and interpret texts with sound application of Turkish language and cultural awareness

Audience: Undergraduate

3. Evaluate and explain complex views and issues, using knowledge and perspective grounded in cultural competency

Audience: Undergraduate

**GNS 540 – SIXTH SEMESTER TURKISH AND AZERI**

3–4 credits.

A continuation of the study of Turkish language with Azerbaijani. Practice in understanding and employing Turkish at an advanced level, including spoken and written language in colloquial and professional modes. Analysis and interpretation of texts from a grammatical and cultural perspective.

**Requisites:** GNS 539

**Course Designation:** Breadth – Humanities

Frng Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and employ Turkish language at an advanced level, possessing the ability to speak and write in modes from colloquial to professional.

Audience: Undergraduate

2. Analyze and interpret texts with sound application of Turkish language and cultural awareness

Audience: Undergraduate

3. Evaluate and explain complex views and issues, using knowledge and perspective grounded in cultural competency

Audience: Undergraduate

**GNS 551 – FIFTH SEMESTER CENTRAL EURASIAN LANGUAGE**

4 credits.

Introduces advanced-level communication skills in Central Eurasian languages in varying settings. Students will learn a wide range of vocabulary, grammar structure and pragmatic usage in situated dialogues. They will improve four language skills (listening, speaking, reading and writing) and pragmatic competence through interactive and meaningful in-class activities and after-class assignments.

**Requisites:** Declared in Central Eurasian Studies Summer Institute

**Course Designation:** Frgn Lang - 5th + semester language course  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Comprehend and employ Tajik, Uyghur, or Uzbek language at an advanced level, possessing the ability to speak and write in modes from colloquial to professional.

Audience: Undergraduate

2. Analyze and interpret texts with sound application of Tajik, Uyghur, or Uzbek language and cultural awareness

Audience: Undergraduate

3. Evaluate and explain complex views and issues, using knowledge and perspective grounded in cultural competency

Audience: Undergraduate

**GNS 552 – SIXTH SEMESTER CENTRAL EURASIAN LANGUAGE**

4 credits.

Introduces advanced-level communication skills in Central Eurasian languages in varying settings. Students will learn a wide range of vocabulary, grammar structure and pragmatic usage in situated dialogues. They will improve four language skills (listening, speaking, reading and writing) and pragmatic competence through interactive and meaningful in-class activities and after-class assignments.

**Requisites:** Declared in Central Eurasian Studies Summer Institute

**Course Designation:** Frgn Lang - 5th + semester language course  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Comprehend and employ Tajik, Uyghur, or Uzbek language at an advanced level, possessing the ability to speak and write in modes from colloquial to professional.

Audience: Undergraduate

2. Analyze and interpret texts with sound application of Tajik, Uyghur, or Uzbek language and cultural awareness

Audience: Undergraduate

3. Evaluate and explain complex views and issues, using knowledge and perspective grounded in cultural competency

Audience: Undergraduate

**GNS 624 – PROSEMINAR IN CENTRAL ASIAN HISTORY**

3 credits.

Introduction to the historiography of the Golden Horde and the Tatar, Kazak, and Uzbek nations; impact on Russia; Russian colonialism in Central Asia; innovative approaches to social and economic history. Not open to students with credit for LCA 640 prior to Fall 2019

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**GNS 700 – GRADUATE SEMINAR IN PROFESSIONAL DEVELOPMENT**

3 credits.

Promotes the academic and professional development of graduate students in the humanities, in particular in the fields of German, Scandinavian, and Slavic studies. Students create and critique conference presentations, grant proposals, books reviews, CVs, and other important academic documents. The seminar includes visits from faculty in the various programs of German, Nordic, and Slavic.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GREEK (CLASSICS) (GREEK)****GREEK 103 – FIRST SEMESTER ANCIENT GREEK**

4 credits.

An introduction to ancient Greek grammar and the development of basic reading skills.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize, identify, and explain basic forms of the classical Greek language.

Audience: Undergraduate

2. Recognize, identify, and explain basic syntax of the classical Greek language.

Audience: Undergraduate

3. Recognize, identify, and explain basic vocabulary of the classical Greek language.

Audience: Undergraduate

### GREEK 104 – SECOND SEMESTER ANCIENT GREEK

4 credits.

An introduction to ancient Greek grammar and the development of basic reading skills.

**Requisites:** GREEK 103

**Course Designation:** Frgn Lang – 2nd semester language course

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize, identify, and explain all forms of the classical Greek language.

Audience: Undergraduate

2. Recognize, identify, and explain all syntax of the classical Greek language.

Audience: Undergraduate

3. Recognize, identify, and explain all vocabulary of the classical Greek language.

Audience: Undergraduate

### GREEK 303 – FIRST SEMESTER ANCIENT GREEK

4 credits.

An introduction to ancient Greek grammar and the development of basic reading skills.

**Requisites:** Graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Recognize, identify, and explain basic forms of the classical Greek language.

Audience: Graduate

2. Recognize, identify, and explain basic syntax of the classical Greek language.

Audience: Graduate

3. Recognize, identify, and explain basic vocabulary of the classical Greek language.

Audience: Graduate

4. Through intensive study, acquire and demonstrate skills necessary for reading Greek authors.

Audience: Graduate

### GREEK 304 – SECOND SEMESTER ANCIENT GREEK

4 credits.

An introduction to ancient Greek grammar and the development of basic reading skills.

**Requisites:** GREEK 303

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Recognize, identify and explain all forms of the classical Greek language.

Audience: Graduate

2. Recognize, identify, and explain all syntax of the classical Greek language.

Audience: Graduate

3. Recognize, identify, and explain all vocabulary of the classical Greek language.

Audience: Graduate

4. Through intensive study, acquire and demonstrate skills necessary for reading Greek authors.

Audience: Graduate

### GREEK 305 – THIRD SEMESTER ANCIENT GREEK

3 credits.

Selections from Plato's Dialogues, the New Testament, Homer's Iliad, or Herodotus.

**Requisites:** GREEK 104, 304, or graduate/professional standing

**Course Designation:** Frgn Lang – 3rd semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Greek texts.

Audience: Undergraduate

2. Demonstrate accuracy in translation of classical Greek texts.

Audience: Undergraduate

3. Demonstrate basic competency in reading continuous classical Greek texts.

Audience: Undergraduate

**GREEK 306 – FOURTH SEMESTER ANCIENT GREEK**

3 credits.

Selections from Plato's Dialogues, the New Testament, Homer's Iliad, or Herodotus.

**Requisites:** GREEK 305 or graduate/professional standing

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Greek texts.

Audience: Undergraduate

2. Demonstrate accuracy and nuance in translation of classical Greek texts.

Audience: Undergraduate

3. Demonstrate competency in reading continuous classical Greek texts.

Audience: Undergraduate

**GREEK 401 – READINGS IN GREEK LITERATURE**

3 credits.

Selected readings in ancient Greek poetry or prose.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frgn Lang - 5th + semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Greek texts.

Audience: Both Grad & Undergrad

2. Apply competency in reading continuous classical Greek texts.

Audience: Both Grad & Undergrad

3. Demonstrate basic critical reading skills of classical Greek texts.

Audience: Both Grad & Undergrad

4. Demonstrate competency in reading continuous Greek texts related to the student's area of research.

Audience: Graduate

**GREEK 505 – GREEK PROSE COMPOSITION**

3 credits.

The study of Greek grammar and style through composition.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Undergraduate

2. Interpret ancient classical Greek texts.

Audience: Undergraduate

3. Evaluate ancient classical Greek texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

6. Produce accurate grammatical forms in original Greek prose.

Audience: Both Grad & Undergrad

7. Differentiate Greek prose from English prose.

Audience: Both Grad & Undergrad

8. Explain how syntactical concepts tend to be expressed in Greek.

Audience: Both Grad & Undergrad

9. Appreciate (and imitate) the styles of particular prose authors.

Audience: Graduate

### GREEK 510 – HOMER

3 credits.

Extensive reading in both Iliad and Odyssey.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Undergraduate

2. Interpret ancient classical Greek texts.

Audience: Undergraduate

3. Evaluate ancient classical Greek texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

### GREEK 511 – HESIOD

3 credits.

The writings of Hesiod in Greek.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Undergraduate

2. Interpret ancient classical Greek texts.

Audience: Undergraduate

3. Evaluate ancient classical Greek texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

**GREEK 512 – GREEK LYRIC POETS**

3 credits.

The complete corpus of Alcman, Ibycus, Stesichorus, Sappho, Alcaeus, Corinna, Anacreon, Praxilla, and Simonides. Selections from Bacchylides and Pindar.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Undergraduate

2. Interpret ancient classical Greek texts.

Audience: Undergraduate

3. Evaluate ancient classical Greek texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

**GREEK 520 – GREEK COMEDY**

3 credits.

Close reading of several plays with attention to Aristophanes' lyric genius and political opinions.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Undergraduate

2. Interpret ancient classical Greek texts.

Audience: Undergraduate

3. Evaluate ancient classical Greek texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

### GREEK 521 – GREEK TRAGEDY

3 credits.

Close reading of selected plays of Aeschylus, Sophocles or Euripides.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Undergraduate

2. Interpret ancient classical Greek texts.

Audience: Undergraduate

3. Evaluate ancient classical Greek texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

### GREEK 530 – HERODOTUS

3 credits.

Close reading of selections from Herodotus, with a focus on developing skills in reading and interpreting historical texts.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Undergraduate

2. Interpret ancient classical Greek texts.

Audience: Undergraduate

3. Evaluate ancient classical Greek texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

### GREEK 532 – THUCYDIDES

3 credits.

Close reading of selections from Thucydides, with a focus on developing skills in reading and interpreting historical texts.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Interpret ancient classical Greek texts.

Audience: Undergraduate

2. Evaluate ancient classical Greek texts.

Audience: Undergraduate

3. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

4. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

**GREEK 541 – GREEK PHILOSOPHICAL WRITERS**

3 credits.

Featuring close reading in the original language of canonical works for classical Greek philosophy, including but not limited to Plato and Aristotle, develop proficiency in the Greek language of the classical and post-classical periods, emphasizing grammar, style, socio-historical context, and the history of ideas.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Frgn Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Analyze ancient classical Greek texts

Audience: Both Grad & Undergrad

2. Interpret ancient classical Greek texts

Audience: Both Grad & Undergrad

3. Evaluate ancient classical Greek texts.

Audience: Both Grad & Undergrad

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition

Audience: Graduate

**GREEK 551 – ATTIC ORATORS**

3 credits.

Selected speeches from Antiphon to Hypereides, with emphasis upon the contribution of rhetoric to the intellectual life of the fourth century.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Undergraduate

2. Interpret ancient classical Greek texts.

Audience: Undergraduate

3. Evaluate ancient classical Greek texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

### GREEK 560 – HELLENISTIC GREEK

3 credits.

A selection of texts, chiefly religious in content, pagan, Jewish, and Christian.

**Requisites:** GREEK 306 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Undergraduate

2. Interpret ancient classical Greek texts.

Audience: Undergraduate

3. Evaluate ancient classical Greek texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

### GREEK 571 – ADVANCED READINGS IN GREEK LITERATURE

3 credits.

Advanced practice in analyzing, evaluating, and interpreting ancient Greek texts.

**Requisites:** GREEK 401 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze ancient classical Greek texts

Audience: Both Grad & Undergrad

2. Evaluate ancient classical Greek texts.

Audience: Both Grad & Undergrad

3. Interpret ancient classical Greek texts.

Audience: Both Grad & Undergrad

4. Explain and assess the position of the covered texts in relation to the classical and near eastern tradition.

Audience: Both Grad & Undergrad

5. Demonstrate competence in current scholarly approaches to course readings

Audience: Graduate

### GREEK 681 – HONORS THESIS

3 credits.

Individual mentored study for completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

### GREEK 682 – SENIOR HONORS THESIS

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**GREEK 691 – SENIOR THESIS**

3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze, interpret, and evaluate ancient classical Greek texts.

Audience: Undergraduate

2. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

3. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.

Audience: Undergraduate

**GREEK 692 – SENIOR THESIS**

3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**GREEK 699 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze ancient classical Greek texts.

Audience: Both Grad & Undergrad

2. Interpret ancient classical Greek texts.

Audience: Both Grad & Undergrad

3. Evaluate ancient classical Greek texts.

Audience: Both Grad & Undergrad

4. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.

Audience: Both Grad & Undergrad

5. Explain and assess the position of the topic in relation to the classical and near eastern tradition.

Audience: Graduate

**GREEK 890 – INDIVIDUAL RESEARCH THESIS**

1-12 credits.

Individual mentored study for completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**GREEK 910 – SEMINAR-POETRY**

3 credits.

Advanced study in Greek poetry, secondary scholarship, and ancient and modern literary interpretation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**GREEK 930 – SEMINAR-HISTORY**

3 credits.

Advanced study in Greek historiography, secondary scholarship, and ancient and modern literary interpretation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**GREEK 970 – ADVANCED SEMINAR IN GREEK LITERATURE**

3 credits.

Advanced study in ancient Greek language, secondary scholarship, and ancient modern literary interpretation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Analyze ancient classical Greek texts

Audience: Graduate

2. Evaluate ancient classical Greek texts

Audience: Graduate

3. Interpret ancient classical Greek texts

Audience: Graduate

4. Explain and assess the position of the covered texts in relation to the classical and near eastern tradition

Audience: Graduate

5. Demonstrate competence in current scholarly approaches to course readings

Audience: Graduate

# HEBREW-BIBLICAL (HEBR-BIB)

## HEBR-BIB 103 – ELEMENTARY BIBLICAL HEBREW, I

4 credits.

Introduction to the language of the Hebrew Bible (Biblical Hebrew). Serves as basis for later forms of Classical Hebrew.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Recognize, identify, and explain basic forms of the classical Hebrew Bible language.

Audience: Undergraduate

2. Recognize, identify, and explain basic syntax of the classical Hebrew Bible language.

Audience: Undergraduate

3. Recognize, identify, and explain basic vocabulary of the classical Hebrew Bible language.

Audience: Undergraduate

## HEBR-BIB 104 – ELEMENTARY BIBLICAL HEBREW, II

4 credits.

Introduction to the language of the Hebrew Bible (Biblical Hebrew). Serves as basis for later forms of Classical Hebrew.

**Requisites:** HEBR-BIB 103

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Recognize, identify and explain all forms of the classical Hebrew Bible language.

Audience: Undergraduate

2. Recognize, identify, and explain all syntax of the classical Hebrew Bible language.

Audience: Undergraduate

3. Recognize, identify, and explain all vocabulary of the classical Hebrew Bible language.

Audience: Undergraduate

## HEBR-BIB 303 – ELEMENTARY BIBLICAL HEBREW, I

3 credits.

Forms and syntax, reading of Classical Hebrew prose in preparation for research.

**Requisites:** Graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Recognize, identify, and explain basic forms of the classical Hebrew Bible language.

Audience: Undergraduate

2. Recognize, identify, and explain basic syntax of the classical Hebrew Bible language.

Audience: Undergraduate

3. Recognize, identify, and explain basic vocabulary of the classical Hebrew Bible language.

Audience: Undergraduate

## HEBR-BIB 304 – ELEMENTARY BIBLICAL HEBREW, II

3 credits.

Forms and syntax, reading of Classical Hebrew prose in preparation for research.

**Requisites:** HEBR-BIB 303

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Recognize, identify and explain all forms of the classical Hebrew Bible language.

Audience: Undergraduate

2. Recognize, identify, and explain all syntax of the classical Hebrew Bible language.

Audience: Undergraduate

3. Recognize, identify, and explain all vocabulary of the classical Hebrew Bible language.

Audience: Undergraduate

**HEBR-BIB 323 – INTERMEDIATE BIBLICAL HEBREW, I**

4 credits.

Review of grammar, introduction to reading narrative texts in Biblical Hebrew.

**Requisites:** HEBR-BIB 104, 304, or graduate/professional standing

**Course Designation:** Frgn Lang – 3rd semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Hebrew Bible texts.

Audience: Undergraduate

2. Demonstrate accuracy in translation of classical Hebrew Bible texts.

Audience: Undergraduate

3. Demonstrate basic competency in reading continuous classical Hebrew Bible texts.

Audience: Undergraduate

**HEBR-BIB 324 – INTERMEDIATE BIBLICAL HEBREW, II**

4 credits.

Review of grammar, introduction to reading narrative texts in Biblical Hebrew.

**Requisites:** HEBR-BIB 323 or graduate/professional standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Hebrew Bible texts.

Audience: Undergraduate

2. Demonstrate accuracy and nuance in translation of classical Hebrew Bible texts.

Audience: Undergraduate

3. Demonstrate competency in reading continuous classical Hebrew Bible texts.

Audience: Undergraduate

**HEBR-BIB/CLASSICS/JEWISH/LITTRANS/RELIG ST 332 – PROPHETS OF THE BIBLE**

4 credits.

An introduction to the thought, literature, and history of the prophets of ancient Israel (in English).

**Requisites:** RELIG ST/CLASSICS/JEWISH/LITTRANS 227 or

Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Compare ancient Near Eastern prophetic voices to modern prophetic voices.

Audience: Undergraduate

**HEBR-BIB 391 – INTENSIVE ELEMENTARY BIBLICAL HEBREW**

4 credits.

An intensive introduction to the grammar and vocabulary of Classical (Biblical) Hebrew, the language of the Hebrew Bible and Ancient Israel, equivalent to HEBR-BIB 103 and 104. Gain skills in preparation for reading the Hebrew Bible in the original language. Focus on translation of Hebrew text (written grammar and lexicon). Includes aspects of ancient Israelite culture, history, and literature.

**Requisites:** Not open to students with credit for HEBR-BIB 103 or 104.

**Course Designation:** Frgn Lang – 2nd semester language course

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Recognize, identify and explain all forms of the classical Hebrew Bible language.

Audience: Undergraduate

2. Recognize, identify, and explain all syntax of the classical Hebrew Bible language.

Audience: Undergraduate

3. Recognize, identify, and explain all vocabulary of the classical Hebrew Bible language.

Audience: Undergraduate

4. Gain competence in translating simple passages of Classical Hebrew into English and vice versa.

Audience: Undergraduate

5. Learn about ancient Israelite culture, history, and literature.

Audience: Undergraduate

6. Building necessary skills for reading biblical texts in the original Hebrew.

Audience: Undergraduate

**HEBR-BIB/JEWISH 513 – BIBLICAL TEXTS, POETRY**

3 credits.

Critical reading of selected texts from the Minor Prophets and the Writings.

**Requisites:** HEBR-BIB 324

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Analyze classical Hebrew Bible texts.

Audience: Undergraduate

2. Interpret classical Hebrew Bible texts.

Audience: Undergraduate

3. Evaluate classical Hebrew Bible texts.

Audience: Undergraduate

**HEBR-BIB/JEWISH 514 – BIBLICAL TEXTS, POETRY**

3 credits.

Critical reading of selected texts from the Latter Prophets and the Writings.

**Requisites:** HEBR-BIB/JEWISH 513

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Analyze classical Hebrew Bible texts.

Audience: Undergraduate

2. Interpret classical Hebrew Bible texts.

Audience: Undergraduate

3. Evaluate classical Hebrew Bible texts.

Audience: Undergraduate

**HEBR-BIB 700 – ADVANCED NEAR EASTERN LANGUAGES**

3 credits.

Provides graduate-level instruction in languages required for research in the literature, history, and culture of the Ancient Near East. Languages typically offered include Akkadian, Phoenician, Sumerian, Hittite, and Egyptian.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**HEBR-BIB 701 – ARAMAIC I**

3 credits.

Grammar and readings in Biblical Aramaic (Daniel, Ezra).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2018**HEBR-BIB 702 – ARAMAIC II**

3 credits.

Selections from non-biblical Aramaic texts: Inscriptions, Elephantine letters, Ahiqar, Targumim.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**HEBR-BIB 705 – SYRIAC I**

3 credits.

Syriac grammar and reading.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2019**HEBR-BIB 723 – CLASSICAL HEBREW LINGUISTICS: HISTORICAL AND DESCRIPTIVE**

3 credits.

The phonology, morphology and syntax of biblical Hebrew; viewed from historical and descriptive linguistic perspectives.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**HEBR-BIB 799 – INDEPENDENT STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**HEBR-BIB 990 – RESEARCH AND THESIS**

2-9 credits.

Individual study for research and completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**HEBREW-MODERN (HEBR-MOD)****HEBR-MOD 101 – FIRST SEMESTER HEBREW**

4 credits.

Basic communication skills; speaking, reading, writing modern Hebrew; elements of grammar and syntax.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**HEBR-MOD 102 – SECOND SEMESTER HEBREW**

4 credits.

Basic communication skills; speaking, reading, writing modern Hebrew; elements of grammar and syntax.

**Requisites:** HEBR-MOD 101 or placement into HEBR-MOD 102**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HEBR-MOD 201 – THIRD SEMESTER HEBREW**

4 credits.

Readings from modern Hebrew texts, intermediate grammar and syntax, development of oral proficiency, emphasis on class discussions.

**Requisites:** HEBR-MOD 102 or placement into HEBR-MOD 201**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**HEBR-MOD 202 – FOURTH SEMESTER HEBREW**

4 credits.

Readings from modern Hebrew texts, intermediate grammar and syntax, development of oral proficiency, emphasis on class discussions.

**Requisites:** HEBR-MOD 201 or placement into HEBR-MOD 202**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**HEBR-MOD/JEWISH 301 – INTRODUCTION TO HEBREW LITERATURE**

3 credits.

Selected works from different periods and genres. Taught in Hebrew.

**Requisites:** HEBR-MOD 202 or placement into HEBR-MOD/JEWISH 301**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frqn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**HEBR-MOD/JEWISH 302 – INTRODUCTION TO HEBREW LITERATURE**

3 credits.

Selected works from different periods and genres. Taught in Hebrew.

**Requisites:** HEBR-MOD/JEWISH 301 or placement into HEBR-MOD/JEWISH 302**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frqn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HEBR-MOD 310 – FIRST SEMESTER INTENSIVE MODERN HEBREW**

4 credits.

Intensive study of the fundamental structure of Hebrew language, using the four language skills (listening, speaking, reading, and writing) to improve Hebrew proficiency. Grammar, pronunciation and vocabulary are incorporated into the daily activities, with an emphasis on speaking and using the language for communication. The Hebrew alphabet is also introduced.

**Requisites:** Declared in the Middle Eastern and Mediterranean Language Institute (MEDLI)**Course Designation:** Frqn Lang - 1st semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Summer 2023**Learning Outcomes:** 1. Achieve beginner level linguistic proficiency in the four language skills of reading, writing, speaking, and listening

Audience: Undergraduate

2. Use basic language skills for a variety of specific functions and contexts.

Audience: Undergraduate

3. Develop and refine their language study skills.

Audience: Undergraduate

4. Begin to develop their understanding of Israeli culture.

Audience: Undergraduate

**HEBR-MOD 311 – SECOND SEMESTER INTENSIVE MODERN HEBREW**

4 credits.

Intensive study of the fundamental structure of Hebrew language, using the four language skills (listening, speaking, reading, and writing) to improve Hebrew proficiency. Grammar, pronunciation and vocabulary are incorporated into the daily activities, with an emphasis on speaking and using the language for communication. The Hebrew alphabet is also introduced.

**Requisites:** Declared in the Middle Eastern and Mediterranean Language Institute (MEDLI)**Course Designation:** Frqn Lang - 1st semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Summer 2023**Learning Outcomes:** 1. Achieve beginner level linguistic proficiency in the four language skills of reading, writing, speaking, and listening

Audience: Undergraduate

2. Use basic language skills for a variety of specific functions and contexts.

Audience: Undergraduate

3. Develop and refine their language study skills.

Audience: Undergraduate

4. Begin to develop their understanding of Israeli culture.

Audience: Undergraduate

**HEBR-MOD/JEWISH 401 – TOPICS IN MODERN HEBREW / ISRAELI LITERATURE AND CULTURE I**

3 credits.

Readings in Hebrew literature. Taught in Hebrew.

**Requisites:** HEBR-MOD/JEWISH 302 or placement into HEBR-MOD/JEWISH 401**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frqn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**HEBR-MOD/JEWISH 402 – TOPICS IN MODERN HEBREW / ISRAELI LITERATURE AND CULTURE II**

3 credits.

Readings in Hebrew literature. Taught in Hebrew.

**Requisites:** HEBR-MOD/JEWISH 401 or placement into HEBR-MOD/JEWISH 402**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frqn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

# HISTORY (HISTORY)

## HISTORY 100 – HISTORICAL STUDIES: INTRODUCTORY

3 credits.

Introduction to elementary-level historical studies at the research university. Emphasis on interpretation and critical thinking. Topics vary.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand that History is an interpretive account of the human past, one that historians create in the present from surviving evidence.

Audience: Undergraduate

2. Think self-consciously about the various methodologies that historians employ.

Audience: Undergraduate

3. Ask questions of primary sources of various types, including, if appropriate, non-textual sources, and use those sources to craft interpretations of the past in written and oral form.

Audience: Undergraduate

4. Reflect upon how the class materials allow them to better understand themselves, their own societies, and the larger global community, by engaging with multiple and diverse perspectives.

Audience: Undergraduate

## HISTORY 101 – AMER HIST TO THE CIVIL WAR ERA, THE ORIGIN & GROWTH OF THE U S

4 credits.

American political, economic, and social development from the founding of the colonies to the Civil War.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## HISTORY 102 – AMERICAN HISTORY, CIVIL WAR ERA TO THE PRESENT

4 credits.

American political, economic and social development from the Civil War to the present.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## HISTORY/ASIAN 103 – INTRODUCTION TO EAST ASIAN HISTORY: CHINA

3-4 credits.

Survey of major developments in Chinese history from 1500 B.C. to the founding of the Communist state in 1949. Emphasis on patterns and themes; equal time devoted to the classical and traditional period and the modern era.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## HISTORY/ASIAN 104 – INTRODUCTION TO EAST ASIAN HISTORY: JAPAN

3-4 credits.

Survey of major cultural, social, political and economic developments in Japanese history from ancient to recent times.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## HISTORY/AFRICAN 106 – INTRODUCTION TO AFRICAN HISTORY

3-4 credits.

Introductory exploration of a thematic or chronological area of African history. Topics vary by instructor.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate and interpret a wide range of historical evidence in order to make arguments about changes over time in African societies

Audience: Undergraduate

2. Identify multiple methodologies that historians use to study the African past

Audience: Undergraduate

3. Interpret African history from different viewpoints and perspectives

Audience: Undergraduate

**HISTORY/ED POL 107 – THE HISTORY OF THE UNIVERSITY IN THE WEST**

3 credits.

Traces the development of higher education and, specifically, the institution known as the "university," in the United States and Europe since the Middle Ages. Concentrates on the intellectual, political, and social history of higher education, focusing particularly on the history of the "university" as an IDEA, an INSTITUTION, and as a community of PEOPLE, including students and faculty.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate your knowledge and explain—in essays, exams, and online and face-to-face discussions—the significance of key actors, events, themes, and ideas relating to the history of American education.

Audience: Undergraduate

2. Interpret and contextualize a range of primary historical sources.

Audience: Undergraduate

3. Identify and evaluate historical arguments in secondary scholarly works.

Audience: Undergraduate

4. Develop and support your own historical interpretations based on primary and secondary sources.

Audience: Undergraduate

5. Engage in open and respectful dialogue while reflecting upon and acknowledging your own biases.

Audience: Undergraduate

6. Connect your academic work to contemporary public debates, to consider diverse perspectives, and to develop, revise, and support your own ideas about the world.

Audience: Undergraduate

**HISTORY/ASIAN 108 – INTRODUCTION TO EAST ASIAN HISTORY – KOREA**

3–4 credits.

Survey of major cultural, social, political, and intellectual developments in Korea from the 10th century to the 21st century.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**HISTORY 109 – INTRODUCTION TO U.S. HISTORY**

3–4 credits.

Exploration of a thematic or chronological area of United States history from a variety of critical historical perspectives. Topics vary by instructor.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2024**HISTORY/CLASSICS 110 – THE ANCIENT MEDITERRANEAN**

4 credits.

An examination of the evolution of the human community in the Mediterranean Basin, from the beginning of the earliest civilizations in the Near East (3,000 B.C.E.) until the collapse of the Roman Empire in the West (500 C.E.).

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate a holistic view of the Ancient Mediterranean society and culture.

Audience: Undergraduate

**HISTORY 115 – MEDIEVAL EUROPE 410-1500**

4 credits.

From the later Roman Empire to the end of the Middle Ages.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**HISTORY 119 – EUROPE AND THE WORLD, 1400-1815**

4 credits.

Introduces Europe when it entered the global stage economically, politically, socially, and culturally. How Europeans took to the seas and developed new forms of empire. How did this wave of contact, encounter, and conquest affect Europeans, indigenous peoples of the Americas, and Africans? Examine the early global economy and the development of plantation slavery. How did Europeans develop new ways to make sense of their world, its size, its peoples, its flora and fauna? Explore new forms of Christianity, the Jewish diaspora, and the globalization of Christianity. As thinkers debated how rulers should wield political power, monarchs strove to expand their authority and territory, and ordinary people demanded a greater share of political power, provoking revolutions across the Atlantic world. Encounter the lives of women and men from many backgrounds, from peasants to queens, and all kinds of people on the move.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Differentiate between primary and secondary sources

Audience: Undergraduate

2. Explain how historical knowledge is created through the examination of primary sources and the analysis of those materials in secondary sources  
Audience: Undergraduate

3. Analyze primary sources by placing them in their historical contexts  
Audience: Undergraduate

4. Pose a historical question  
Audience: Undergraduate

5. Make a historical argument  
Audience: Undergraduate

6. Analyze visual sources  
Audience: Undergraduate

**HISTORY 120 – EUROPE AND THE MODERN WORLD 1815 TO THE PRESENT**

4 credits.

Political, economic, social, and cultural history of modern Western civilization.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HISTORY 123 – ENGLISH HISTORY: ENGLAND TO 1688**

3-4 credits.

Political, economic, social, and cultural history from earliest historic times.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2018**HISTORY 124 – BRITAIN SINCE 1688**

3-4 credits.

Introduction to the major themes in the history of imperial Britain and the modern world. Themes include (but are not limited to) the changing patterns of life during those centuries, the development of modern identities and notions of the self, the emergence of a modern, commercial civil society, the rise of industrial capitalism, liberalism, the modern state, and imperial and total war.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and explain the major trajectories in British history since the 17th century.

Audience: Undergraduate

2. Explain the various interpretive frameworks that historians have used to analyze or explain cultural, political, and economic transformations in imperial Britain in the past 300 years.  
Audience: Undergraduate

3. Analyze primary sources, both written and visual, in British history and evaluate or critique the ways in which it has been interpreted by others.  
Audience: Undergraduate

4. Produce original historical arguments, in both written and oral communication, and properly mobilize evidence, from both primary and secondary sources, to support those arguments.  
Audience: Undergraduate

5. Apply a critical and historical point of view to the contemporary world.  
Audience: Undergraduate

**HISTORY/ENVIR ST/HIST SCI 125 – GREEN SCREEN: ENVIRONMENTAL PERSPECTIVES THROUGH FILM**

3 credits.

From Teddy Roosevelt's 1909 African safari to the Hollywood blockbuster King Kong, from the world of Walt Disney to The March of the Penguins, cinema has been a powerful force in shaping public and scientific understanding of nature throughout the twentieth and twenty-first century. How can film shed light on changing environmental ideas and beliefs in American thought, politics, and culture? And how can we come to see and appreciate contested issues of race, class, and gender in nature on screen? Explore such questions and come to understand the role of film in helping to define the contours of past, present, and future environmental visions in the United States, and their impact on the real world struggles of people and wildlife throughout the world.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HISTORY/AFRICAN 129 – AFRICA ON THE GLOBAL STAGE**

3–4 credits.

Explores the interplay between Africa and the World from the 19th century to the present, covering subjects such as the slave– trade, repatriation, Africanizing of culture in the Americas and Europe, the spread and revival of world religions, colonialism, global capitalism, the rise of global popular culture such as pop music and video films, environmental concerns and global epidemics.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**HISTORY 130 – AN INTRODUCTION TO WORLD HISTORY**

3–4 credits.

Introduction to major themes in world history. Such themes might include: empire and imperialism, environmental impacts, global trade and globalization, war, migration, gender, race, religion, nationalism, class, and the like.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**HISTORY/HIST SCI/MED HIST 132 – BEES, TREES, GERMS, AND GENES: A HISTORY OF BIOLOGY**

3 credits.

How did today's biology emerge out of the diverse traditions of agriculture and natural history (bees and trees), biomedicine and molecular biology (germs and genes), which stretch back into the eighteenth century? Examines classic texts and "game-changers" in the history of biology, putting them into broader scientific and social contexts to see how these different ways of knowing intertwined, competed, and yielded novel approaches to the study of life that still shape today's life sciences.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**HISTORY 133 – GLOBAL MILITARY HISTORY (5000 BCE – PRESENT)**

3–4 credits.

Introductory examination of the role of war and peace in human history from the earliest forms of organized violence to the 21st century "War on Terror." Rather than center on tactics, key battles, or even particular critical conflicts, instead focuses on how different military cultures and technologies emerged over time across the globe. Explores how organized violence shaped not just the lives of soldiers, but all members of society by examining key pieces of popular culture including poetry, propaganda, music, movies, and social media. Takes a deliberately global approach by examining the connections and commonalities of war across different world regions.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Explain the Impact of Military Technologies: identify major military–technological changes and their impact on societies more generally.

Audience: Undergraduate

2. Recognize Military Cultures: acknowledge the many ways in which war shaped culture outside of the battlefield in the arts, music, and literature.  
Audience: Undergraduate

3. Demonstrate Critical Writing Skills: communicate complex ideas through written evaluations. Specifically, emphasis is placed on improving analytical/argumentative writing skills through a number of written assignments.  
Audience: Undergraduate

4. Show Critical Reading and Communication: demonstrate critical thinking and reading through the analysis of historical primary and secondary sources, discussion, and independent research.  
Audience: Undergraduate

### **HISTORY/GEN&WS 134 – WOMEN AND GENDER IN WORLD HISTORY**

3-4 credits.

A global (comparative and transnational) survey of women and gender from the ancient world to the modern period. Introduces students to key issues in the history of women and gender, including the historical construction of identities, roles, symbols, and power relationships.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **HISTORY 136 – SPORT, RECREATION, & SOCIETY IN THE UNITED STATES**

3-4 credits.

As much as we may try to convince ourselves that sport offers an escape from the "real world," constant news of players' strikes, stadium financing controversies, and the lack of diversity in league management remind us that we cannot separate the games we play and watch from the political, social, and cultural contexts in which they are embedded. Explore how sport has shaped and been shaped by major trends in American social, political, and economic history. The focus is not on player stats or the morning edition of SportsCenter, rather with serious historical arguments and debates about sport's relationship to American capitalism, social movements, and urban development. Readings also provide a diverse set of perspectives on the politics of race, gender, and class in American sport in the twentieth century.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **HISTORY 137 – THE HISTORY OF WAR IN FILM**

3 credits.

Is there such a thing as a genuinely anti-war movie? The acclaimed, late French filmmaker Francois Truffaut thought not, as even the most brutal and honest depictions of war in film cannot help but valorize sacrifice and arouse something primordial in certain members of the audience. Nevertheless, some of the greatest films of all time are regarded as "anti-war classics" and not a few might be labeled "pro-war." Critically examine more than fifteen full movies (and parts of many more) from across this spectrum and from around the world. In addition to testing the "Truffaut Rule," evaluate the movies as both fictionalized secondary sources (conveying knowledge and influencing memory) and as primary sources that shed light on the moment and place in which they were created.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically examine war movies as media for communicating the experience of combat in different historical eras  
Audience: Undergraduate

2. Grasp the unique power of motion pictures to convey "truth" and attitudes about war as understood in context (i.e. place, time, subject, and intermediate interpretation)  
Audience: Undergraduate

3. Evaluate the ways in which war and movies about it have essentialized gender roles and promoted competing ideals of virtue, martial and otherwise  
Audience: Undergraduate

4. Consider war movies as instruments of propaganda and evaluate the relationship between their effectiveness and their accuracy  
Audience: Undergraduate

5. Apply the methods of historical research and writing  
Audience: Undergraduate

**HISTORY 139 – INTRODUCTION TO THE MODERN MIDDLE EAST**

3-4 credits.

Traces the formation of the states and societies that compose the contemporary Middle East. How have global phenomena, including two world wars, the Cold War, women's movements, and modern science, technology, and fossil fuels, affected the politics, culture, and daily lives of Middle Eastern people? What is Islamism, and how should we explain its influence? Why has the United States had such a troubled relationship with this part of the world? Balances a generally thematic approach with several weeks of country-specific studies, including Iran, Saudi Arabia, Egypt, Syria, and Israel and the Palestinian territories.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Identify the origins of the Middle East nation-states

Audience: Undergraduate

2. Compare the larger Middle East nation-states in terms of politics, economy, and society

Audience: Undergraduate

3. Analyze trends in the development of U.S. relations with the Middle East

Audience: Undergraduate

4. Explain the modern Middle East in terms of global processes of change

Audience: Undergraduate

5. Use primary sources to support all of the above

Audience: Undergraduate

**HISTORY 142 – HISTORY OF SOUTH ASIA TO THE PRESENT**

3-4 credits.

Survey of the development of societies within the Indian subcontinent. Equal segments for the ancient, medieval and modern periods.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HISTORY/ED POL 143 – HISTORY OF RACE AND INEQUALITY IN URBAN AMERICA**

3 credits.

Examine the historical relationships between metropolitan change, economic transformation, and the construction of race and how those processes have shaped mass incarceration, educational, housing, and income inequality, and the experiences of racial/ethnic minorities who have been marginalized or discriminated against. Key questions include: What is the historical nature of inequality and opportunity in metropolitan America? What policies and ideas have historically promoted inequality, and how have those policies and ideas shifted over time? How have marginalized people responded to inequality, and what impacts have various modes of resistance had? Lastly, what is "race," how has its meaning changed over time, and how has it historically shaped inequality and opportunity?

**Requisites:** None**Course Designation:** Gen Ed – Communication Part B

Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate their awareness of History's Impact on the Present

Audience: Undergraduate

2. Recognize and Question Assumptions

Audience: Undergraduate

3. Demonstrate their consciousness of Self and Others

Audience: Undergraduate

4. Demonstrate their capacity for Effective Participation in a Multicultural Society

Audience: Undergraduate

5. Identify and discuss the significance of key actors, events, themes, and ideas relating to the history of race and inequality in the metropolitan United States

Audience: Undergraduate

6. Identify and evaluate historical arguments in secondary scholarly works

Audience: Undergraduate

7. Interpret, analyze, and contextualize primary historical sources

Audience: Undergraduate

8. Use library resources in order to locate relevant primary and secondary source materials

Audience: Undergraduate

9. Synthesize information from primary and secondary sources in order to develop and support their own evidence-based historical interpretations

Audience: Undergraduate

**HISTORY 145 – AMERICA AND CHINA, 1776-TODAY**

3-4 credits.

Analyzes the relationship between China and the United States since the birth of the U.S. in 1776, and tracks how the relationship has changed over time. Seeks to offer a broader perspective on the US-China relationship that includes not only diplomacy and war, but also culture, economics, and domestic politics. Contextualize the steady drumbeat of news stories about America and China, and make educated, historically rooted arguments about China, the US, and their complex relationship.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Identify and summarize the larger historical events that have shaped Chinese history since the 18th century as well as those which have shaped China's relationship to the U.S.

Audience: Undergraduate

2. Identify and summarize the major sources of US-China tension in the 1776 to 1899 period, and also for the period from 1899 to the Present.

Audience: Undergraduate

3. Identify the major American and Chinese cultural and political figures who have shaped the American and Chinese relationship.

Audience: Undergraduate

4. Identify and summarize potential future sources of tension or cooperation between the United States and China and how they are connected to historical events.

Audience: Undergraduate

5. Demonstrate knowledge of major movements, trends, or events in the development of world cultures.

Audience: Undergraduate

6. Recognize history as an interpretive account of the human past – one that historians create in the present from surviving evidence.

Audience: Undergraduate

7. Demonstrate how the use of different approaches, methodologies, analytical concepts, or sources can yield differing insights into a historical problem.

Audience: Undergraduate

8. Think critically about and appreciate the complexities of their own societies, cultures, and larger global communities.

Audience: Undergraduate

**HISTORY/INTL ST 146 – A GLOBAL HISTORY OF NOW**

3-4 credits.

An introduction to key historical events, movements, and systems that have shaped our present moment. Examines the relationship between empire-building and anti-colonial movements from the late 18th century to the current day. Focuses on the political, economic, and social/cultural dimensions of major global history themes, such as colonialism, capitalism, and revolution.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a historical understanding of imperialism and decolonization since 1800

Audience: Undergraduate

2. Formulate arguments about change over time, and think critically about how narratives about the past are constructed

Audience: Undergraduate

3. Refine the ability to recognize and question assumptions

Audience: Undergraduate

4. Determine what constitutes reliable and valid evidence

Audience: Undergraduate

5. Interpret, compare, and contrast primary sources

Audience: Undergraduate

6. Improve writing and public speaking skills

Audience: Undergraduate

7. Acquire awareness of history's impact on the present

Audience: Undergraduate

**HISTORY/CHICLA 151 – THE NORTH AMERICAN WEST TO 1850**

3-4 credits.

Explores the history of places that have been called the American West before 1850. We start with Indigenous occupation; continue with European invasion and the creation of two new nations, Mexico and the U.S.; and end with U.S. conquest. We watch Indian lands becoming the object of Spanish, French, and English empires, and then see European incursions giving way to the hopes of new nation-states and newly empowered Indian peoples like Lakotas and Comanches. After studying the trails and trades that brought newcomers west, we reach key converging events: U.S. seizure of the Mexican North, resolution of the Oregon boundary dispute, discovery of western gold, West Coast arrival of Chinese immigrants, and Mormon exodus to the Great Basin. We use economic, environmental, political, cultural, and social analyses, and we attend to the dreams of many westerners: of North American, Latin American, European, African, and Asian origin or descent, and of all genders and class statuses.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the various peoples who occupied the North American West before the 16th century, how they lived in their respective environments and vis-à-vis one another, and how scholars and Native communities themselves have made sense of that occupation  
Audience: Undergraduate

2. Identify and analyze the relationships among the political, social, cultural, economic, and environmental factors that brought Europeans and enslaved Africans to places that came to be called the West from the 16th through the 18th centuries  
Audience: Undergraduate

3. Identify and analyze the political, social, cultural, economic, and environmental factors that gave rise to two new occupying nations in places that came to be called the West in the late 18th and early 19th centuries, as well as increasingly powerful Indigenous peoples  
Audience: Undergraduate

4. Identify and analyze the political, social, cultural, economic, and environmental factors that paved the way for U.S. conquest of various parts of the North American West by the middle of the 19th century  
Audience: Undergraduate

5. Identify and analyze the political, social, cultural, economic, and environmental factors that brought increasing numbers of Americans, Europeans, and Asians to the West by the middle of the 19th century  
Audience: Undergraduate

6. Explain the how the history of places that came to be called the West demonstrates the workings of imperialism and colonialism  
Audience: Undergraduate

7. Identify and analyze the ways in which westerners of various genders navigated their lives; the forces that created hierarchies among and within human communities; and the means by which various westerners either maintained or challenged those hierarchies  
Audience: Undergraduate

8. Explain the significance of the West for the development of the U.S. nation-state and for the fate of those who lived in the West before the U.S. claimed it

**HISTORY/CHICLA 152 – THE UNITED STATES WEST SINCE 1850**

3-4 credits.

Introduction to histories of places that have been called the American West, focusing on the period since 1850. Beginning in the mid nineteenth century, the United States sought to establish power over vast western regions that it claimed on maps but did not in fact control. Moving through the twentieth century to the present day, considers how attention to the American West allows us to reimagine US history more broadly - and how the United States represents just one facet the region's pasts. Learn to think like a historian by analyzing primary sources, evaluating competing narratives, and formulating arguments about the past. Investigate how people, ideas, and infrastructures have transformed a region repeatedly redrawn and consider the ongoing legacies of the past - and the stories we tell about it - in the American West today.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Challenge common myths that distort our understanding of the modern U.S. West  
Audience: Undergraduate

2. Understand how historians make history and why our understandings of the past change over time  
Audience: Undergraduate

3. Use primary sources to ask and answer questions about the modern North American West  
Audience: Undergraduate

4. Evaluate arguments about history and weigh in on existing historical debates  
Audience: Undergraduate

5. Identify how the past has affected present day circumstances regarding race and racial inequalities in the U.S.  
Audience: Undergraduate

**HISTORY/CHICLA 153 – LATINA/LATINO/LATINX HISTORY**

3-4 credits.

Examines the historical, social, and legal experiences of Latinas/Latinos/Latinxs in the US since the mid-1800s with emphasis on Mexican migrations. Latinxs became an important part of the US population through western expansion, conquest, and immigration. We will learn about the 3 main Latinx groups in the US: Mexicans, Puerto Ricans, and Cubans, but will also learn about other Latinx communities. We begin with an examination of conquest by studying the Treaty of Guadalupe Hidalgo that annexed roughly half of former Mexican territory and the Spanish-American War that resulted in the possession of Puerto Rico. Then, we examine the history of Latinx immigration to understand the experiences of Mexicans, Central Americans, South Americans, and people from the Caribbean who have immigrated to the US in search of economic opportunities and political asylum. This course serves as an introduction to the varied experiences of Latinxs in the US in order to understand their unique histories.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop a critical understanding of the diverse experiences of Latinas/Latinos/Latinxs in the U.S. by conducting a close examination of assigned readings through assignments, lectures, presentations, and in-class discussions.

Audience: Undergraduate

2. Build a critical lens of race, ethnicity, gender, sexuality, and class by engaging in analytical essay writing that incorporates the assigned readings and primary research in the archives at the Wisconsin Historical Society.

Audience: Undergraduate

3. Develop sociological tools and perspectives to discuss the experiences of Latinas/Latinos/Latinxs in the U.S. through in-class oral presentations based on the research conducted for the final paper.

Audience: Undergraduate

4. Critically engage in public debates about policies pertaining to Latinas/Latinos/Latinxs in the U.S. and be able to make informed decisions by learning about historical social and legal issues surrounding Latina/Latino/Latinx communities that continue to impact Latinxs today. This, through the assigned readings, original research, and data presented in lectures.

Audience: Undergraduate

**HISTORY 154 – WHO IS AN AMERICAN?**

3-4 credits.

Organized around the title question: Who is an American? Explores how answers to that question have changed over time, focusing on people whose actions and ideas shaped those answers. Rather than an overview of U.S. history, focuses on a variety of topics related to our central theme, moving roughly chronologically from the Revolutionary era to the present. Covers the history of racial ideologies and racial inequities, arguments over citizenship and "American" identity, and the ways that various groups have been included or excluded from the nation.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate how the history of racial ideologies, racial inequities, and racial formations in the United States has evolved in relation to histories of enslavement, conquest and territorial expansion, and immigration.

Audience: Undergraduate

2. Recognize arguments about citizenship and "American" identity as historical, contested, and evolving.

Audience: Undergraduate

3. Understand the ways various groups of Americans have been included in or excluded from the nation, and how groups have mobilized to resist exclusion.

Audience: Undergraduate

4. Investigate the rise, fall, and interaction of civic and ethnic nationalisms in U.S. history.

Audience: Undergraduate

**HISTORY 155 – THE LONG BLACK FREEDOM STRUGGLE FROM THE CIVIL WAR TO THE PRESENT**

3-4 credits.

Explores the generations-long effort by African Americans and allied forces to achieve full citizenship in the U.S. and equitable footholds in American society. Forged in a history of enslavement and in many ways ongoing, this freedom struggle encompasses the history of abolitionism to the struggle for civil rights to the fight for Black Power to the effort to make Black Lives Matter. Introduces the history of African American people in the U.S. from the end of the era of slavery to the present day; explores how that history has been shaped directly by the actions and activism of Black people and their allies; considers how that history intersects with, shapes, and is shaped by other historical moments and movements; provides opportunities to think more actively about issues of belonging, citizenship, difference, and interpersonal and structural power; develops skills in historical analysis and argumentation.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify important events, movements, and people, in African-American history since 1865

Audience: Undergraduate

2. Evaluate and formulate arguments about how racial dynamics in the United States and strategies for achieving racial equality have changed over time

Audience: Undergraduate

3. Determine what constitutes reliable and valid evidence when it comes to the history of inequality and social movements in African American history

Audience: Undergraduate

4. Interpret, compare, and contrast primary sources

Audience: Undergraduate

5. Think critically about how the narratives about the past are constructed and told

Audience: Undergraduate

6. Explain how racial conflict, inequality, and movements against the same in the past have shaped American society in the present

Audience: Undergraduate

7. Discuss their social position relative to history, as well as how other people's pasts and experiences perhaps don't align with their own

Audience: Undergraduate

8. Identify ways to operate in a pluralistic, multicultural society – one in which their own experiences are not the assumed default

Audience: Undergraduate

**HISTORY/ASIAN AM 160 – ASIAN AMERICAN HISTORY: MOVEMENT AND DISLOCATION**

3-4 credits.

Examines the impact of colonialism, war, and capitalism on the movement of Asians to the U.S. Considers how racial, gendered, class, sexual, and national formations within the U.S. structured Asian immigration to North America.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**HISTORY/ASIAN AM 161 – ASIAN AMERICAN HISTORY: SETTLEMENT AND NATIONAL BELONGING**

3-4 credits.

Examines the social, cultural, and political citizenship of Asians in the U.S. with particular emphasis on diaspora, transnationality, and place.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

## **HISTORY 170 – EAST MEETS WEST: MYTH, MEANING, AND MODERNITY**

3-4 credits.

The modern history of the concept "East Meets West" (or its variant "East vs. West"), with an emphasis on its changing meanings and uses from the nineteenth to the twenty-first centuries in East Asia (primarily Japan) and the United States. Analyzing works in the arts, literature, philosophy, political economy, and popular culture, trace how and why this intellectual construction became an important influence in modern history.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize generalizations and stereotypes about "the East," "the West," and "East Meets West" and examine their goals and uses

Audience: Undergraduate

2. Think critically about the historical constructions, changes, complexities, and importance of ideas about "the East," "the West," and "East Meets West" within American and East Asian societies

Audience: Undergraduate

3. Demonstrate knowledge of major movements, trends, or events in the history of "East Meets West"

Audience: Undergraduate

4. Examine how the use of different approaches, methodologies, analytical concepts, or sources can yield differing insights into a historical problem.

Audience: Undergraduate

5. Read and evaluate a variety of materials to determine their origins, perspective, usefulness, and reliability

Audience: Undergraduate

6. Use library resources to find primary and secondary sources in order to develop an informed and original perspective on topics discussed in class

Audience: Undergraduate

7. Participate productively and respectfully in discussion and collaborative tasks

Audience: Undergraduate

## **HISTORY/HIST SCI 171 – HISTORY OF MEDICINE IN FILM**

3-4 credits.

Considers the social and cultural history of 20th and early 21st century American medicine through the depiction of health care practitioners and health care systems in Hollywood movies. View films that featured medicine, doctors, nurses, patients, and hospitals. Using these films as primary sources, seek to place these representations into a broader social and cultural context. Evaluate the extent to which popular understandings of medicine, health, and healing as portrayed in the films corresponded to actual practices of medicine and medical research at the time the films were first screened for mass audiences.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Identify key developments, actors, ideas, and institutions in the broad history of American medicine in the 20th century.

Audience: Undergraduate

2. Speak and write critically about primary and secondary historical sources by examining diverse interpretations of past events and ideas in their historical contexts.

Audience: Undergraduate

3. Ask analytic questions about the ways in which films express both cultural ideals and cultural anxieties about medicine within the constraints of "literary" genres: drama, horror, comedy, romance, tragedy and thriller.

Audience: Undergraduate

4. Understand that, in addition to the deliberate choices of plot-lines, locations and character development, films reveal a great deal about what was taken for granted at the time of each film's production: gender and race relations, physicians' paternalism and patients' autonomy, medical technology and expectations for care and cure; ethical and professional norms for medical research and decision making in patient care.

Audience: Undergraduate

**HISTORY 179 – AFRO-ATLANTIC HISTORIES AND PEOPLES, 1791-PRESENT**

3-4 credits.

The African-descended population of the Americas is around 180 million people. Roughly two-thirds of those live outside of the United States, mostly in Brazil and the Caribbean. Provides an overview of the histories, aspirations, and problems that have most impacted peoples of the African diaspora in the years since the Haitian Revolution. As such, the focus will be thematic rather than chronological. The primary emphasis will be on the history of political, social, and intellectual movements. Topics will include slave resistance, black nationalism, socialism, and anti-colonialism. Learn about figures as varied as Toussaint L'Ouverture, Ida B. Wells, Marcus Garvey, WEB DuBois, Carolina Maria de Jesus, Frantz Fanon, Paul Robeson, and many others. Other topics to be covered include: the meaning of "freedom," the construction of black "masculinities," diasporic religious expressions, art and literature, and race and medicine.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2019**Learning Outcomes:** 1. Articulate how the past has affected present day circumstances regarding race and racial inequalities in the U.S. and in the African diaspora

Audience: Undergraduate

2. Define important questions related to the history of the modern African diaspora and explain their academic and public implications.

Audience: Undergraduate

3. Evaluate the evidentiary and theoretical bases of various historical conversations in the making of the modern African diaspora.

Audience: Undergraduate

4. Recognize, challenge, and avoid false analogies, overgeneralizations, anachronisms, and other logical fallacies.

Audience: Undergraduate

5. Examine the context in which sources were created, search for topical, chronological, and other relationships among them, and assess the sources in light of that knowledge.

Audience: Undergraduate

6. Drawing upon a diversity of primary- and secondary-sources, synthesize the most pertinent evidence to make persuasive arguments and draw innovative conclusions.

Audience: Undergraduate

7. Apply course concepts to your life outside the classroom, demonstrating self-awareness and empathy for people from a range of backgrounds and political perspectives.

Audience: Undergraduate

**HISTORY/AMER IND 190 – INTRODUCTION TO AMERICAN INDIAN HISTORY**

3-4 credits.

A broad survey of American Indian history which centers Indigenous peoples, communities, and nations in the context of U.S. policy and culture that emphasizes decolonial methods and Native ways of knowing the past.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Describe and explain the significance of the historical events, structures, and themes which historians have identified as foundational to the field of American Indian history.

Audience: Undergraduate

2. Deploy interdisciplinary Indigenous studies frameworks, theoretics, and methodologies in the analysis of historical events, structures, and themes to prioritize Indigenous worldviews and perspectives on American Indian history.

Audience: Undergraduate

3. Interpret the continuities and shifts in the lives of various Native peoples, communities, and nations in relation to political, cultural, and material conditions in U.S. history using terminology used within the field of American Indian history to describe processes (such as racialization) and structures (such as settler colonialism).

Audience: Undergraduate

4. Discuss tribal sovereignty and processes of racialization, which impact the historical experiences and contemporary struggles facing Native nations and peoples in the United States.

Audience: Undergraduate

5. Analyze historical sources to curate a collection that draws on both Euro-American and Native ways of knowing the past.

Audience: Undergraduate

**HISTORY 199 – DIRECTED STUDY**

1-3 credits.

Independent study in collaboration with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2018

**HISTORY 200 – HISTORICAL STUDIES**

1-4 credits.

Introduction to historical studies at the research university. Emphasis on interpretation and critical thinking. Topics vary.

**Requisites:** Sophomore standing or 3 credits in HISTORY

**Course Designation:** Breadth – Either Humanities or Social Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HISTORY 201 – THE HISTORIAN'S CRAFT**

3-4 credits.

Conduct original historical research and convey the results to others. Through engagement with archival materials, become historical detectives; practice defining important historical questions, collecting and analyzing evidence, presenting original conclusions, and contributing to ongoing discussions. Confer individually with and receive feedback from instructors to improve skills of historical analysis and communication in both written and spoken formats. May not be repeated for credit.

**Requisites:** Satisfied Communications A requirement. Not open to students with credit for HIST SCI 211

**Course Designation:** Gen Ed – Communication Part B

Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Ask Questions: develop the habit of asking questions, including questions that may generate new directions for historical research.

Audience: Undergraduate

2. Find Sources: learn the logic of footnotes, bibliographies, search engines, libraries, and archives, and consult them to identify and locate source materials.

Audience: Undergraduate

3. Evaluate Sources: determine the perspective, credibility, and utility of source materials.

Audience: Undergraduate

4. Develop and Present an Argument: use sources appropriately to create, modify, and support tentative conclusions and new questions.

Audience: Undergraduate

5. Plan Further Research: draw upon preliminary research to develop a plan for further investigation.

Audience: Undergraduate

6. Communicate Findings Effectively: make formal and informal, written and oral presentations tailored to specific audiences.

Audience: Undergraduate

**HISTORY/RELIG ST 205 – THE MAKING OF THE ISLAMIC WORLD: THE MIDDLE EAST, 500-1500**

3-4 credits.

Development of society and culture in the Middle East and North Africa from the emergence of Islam (7th century) to early modern times.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**HISTORY/RELIG ST 208 – WESTERN INTELLECTUAL AND RELIGIOUS HISTORY TO 1500**

3-4 credits.

Survey of key themes in Western intellectual history and religious thought from ancient Greece through the Renaissance, focusing on relationships among classical, Jewish, and Christian traditions.

**Requisites:** Sophomore standing or 3 credits in HISTORY or RELIG ST

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HISTORY/RELIG ST 209 – WESTERN INTELLECTUAL AND RELIGIOUS HISTORY SINCE 1500**

3-4 credits.

A survey of major trends in Western intellectual history and religious thought in the modern era, a period that saw a new range of competing ideas about the divine, the human condition, justice and the social order, and the quest for meaning. Explores shifts in Christian and Jewish thought as well as secular alternatives to religious outlooks. Topics include the impact of the Reformation, Scientific Revolution, and Enlightenment; radical critiques of religion; existentialism; theological responses to World Wars and the Holocaust; and civil rights and social justice. Sources include films, novels, autobiographies, essays, theological works, and political manifestos.

**Requisites:** Sophomore standing or 3 credits in HISTORY or RELIG ST

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HISTORY/RELIG ST 212 – THE HISTORY OF WESTERN CHRISTIANITY TO 1750**

4 credits.

A survey of Christianity from being a small, persecuted sect in the Roman Empire to becoming the dominant religion of western Europe, penetrating into the lives of Europeans, fissuring into multiple churches, and spreading across the globe. Attention is given to doctrine, ritual, worship, architecture, images, and music.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HISTORY/JEWISH 213 – JEWS AND AMERICAN POP. CULTURE**

3-4 credits.

Explores the interplay between Jews and U. S. popular culture, covering such subjects as early 20th century vaudeville, the "golden age" of Hollywood, rhythm and blues music, television, and stand-up comedy.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HISTORY/JEWISH 219 – THE AMERICAN JEWISH EXPERIENCE: FROM SHTETL TO SUBURB**

4 credits.

Surveys American Jews from the eighteenth century until after WW II, examining political behavior (radicalism, liberalism, and nationalism), class formation, social mobility, culture, inter-ethnic group relations, religion, and problems in community building.

**Requisites:** Sophomore standing or 3 credits in HISTORY or JEWISH**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**HISTORY/JEWISH 220 – INTRODUCTION TO MODERN JEWISH HISTORY**

4 credits.

The history of the Jews in selected parts of the world since the 17th century. Particular attention will be paid to the fact that this is the history of a minority group whose life unfolds in relationship to a larger society.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**HISTORY 221 – EXPLORATIONS IN AMERICAN HISTORY (H)**

3-4 credits.

Topics vary reflecting the interests, expertise, and innovating intention of the instructor.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**HISTORY 223 – EXPLORATIONS IN EUROPEAN HISTORY (H)**

3-4 credits.

Topics vary reflecting the interests, expertise, and innovating intention of the instructor.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**HISTORY 224 – EXPLORATIONS IN EUROPEAN HISTORY (S)**

3 credits.

Topics vary reflecting the interests, expertise, and innovating intention of the instructor.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2018**HISTORY 225 – EXPLORATIONS IN THIRD WORLD HISTORY (H)**

3-4 credits.

Topics vary reflecting the interests, expertise, and innovating intention of the instructor.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2022**HISTORY 227 – EXPLORATIONS IN THE HISTORY OF RACE AND ETHNICITY**

3 credits.

Topics on racial/ethnic minorities in the US in historical perspective; or topics that intersect with race or ethnicity in the US; or comparative historical topics that address how racial/ethnic minorities in the US negotiate exclusion and marginalization.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

### **HISTORY 229 – EXPLORATIONS IN TRANSNATIONAL/COMPARATIVE HISTORY (HUMANITIES)**

3 credits.

Explores topics that involve at least two continents. Topics vary reflecting the interests, expertise, and innovating intention of the instructor.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **HISTORY/LEGAL ST 235 – PRISONS: FROM ANTIQUITY TO SUPERMAX**

3-4 credits.

Examines the development of prisons from the ancient Mediterranean world to the present in the US and Europe. Pays particular attention to the way in which imprisonment has been used against marginalized populations. Examines the development of carceral tactics across a number of registers, including the prison as an ancient political tactic, the economic logic of early modern debtors' prisons, the relationship of prisons and workhouses to forms of capitalism, prisons and colonial expansion, the relationship between mass incarceration and democratic forms of government, as well as the connections between the abolition of slavery and modern carceral practices. Also looks at the legal and constitutional limitations that have been put on imprisonment by the American legal system. Relies on interdisciplinary approaches to the study of prisons, including History, law, literature, and political theory.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and articulate arguments about how social, political, and cultural phenomena shape law and legal systems, and in particular shape practices of imprisonment.

Audience: Undergraduate

2. Analyze and articulate arguments about the impact of imprisonment on social practices and political organization.

Audience: Undergraduate

3. Explain how legal ideas and ideologies have changed over time and have shaped law and legal systems.

Audience: Undergraduate

4. Find, interpret, and utilize resources relevant to law and society.

Audience: Undergraduate

5. Construct clear and persuasive arguments about legal systems and imprisonment.

Audience: Undergraduate

### **HISTORY/ART HIST/ENVIR ST/GEOG/LAND ARC 239 – MAKING THE AMERICAN LANDSCAPE**

3-4 credits.

Traces the history and evolution of the American cultural landscape from precolonial times to present. Explores how class, ethnic, and racial inequality have shaped the appearance of the American landscape over time, and how that landscape in turn has affected relationships between people and groups through the present day. Examines extraordinary things (civic structures (like our State Capitol), National Parks, War Memorials) and more ordinary kinds of places (mining towns, cotton plantations, sites of recreation and leisure, and suburban tract housing) to stimulate critical thinking about how these places have served people and groups unequally and disproportionately over time and across space. Considers complex meanings of American spaces and places to different people and groups, stimulating empathy and encouraging participation in a multicultural society.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and interpret the American landscape as a richly layered historical document mediated by complex relationships between people and groups

Audience: Undergraduate

2. Explain how the American cultural landscape has affected present day circumstances regarding ethnicity and race as well as racial and ethnic inequalities

Audience: Undergraduate

3. Articulate ways in which historical change manifest in buildings, enclosed spaces, and other elements of the American landscape reveal racial, ethnic, class and gender dynamics between and among people and groups over time

Audience: Undergraduate

4. Enlist forms of historical evidence – maps (current and historic), photographs (aerial and otherwise), historical newspapers, census records, deeds and land records – to interpret landscapes and landscape change

Audience: Undergraduate

5. Explain the American landscape as a product of competing interests, which will demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others

Audience: Undergraduate

**HISTORY/INTL ST/LACIS 242 – MODERN LATIN AMERICA**

3-4 credits.

A broad overview of Latin American history in the modern period, since independence but with a primary focus on the twentieth century. Particular emphasis will be placed on the socioeconomic, cultural, and political structures and processes that shaped and continue to influence life in Latin America. Key issues such as colonialism, nationalism, democracy, and revolution will be examined critically in light of broad comparative themes in Latin American and world history. Among the topics to be explored in detail will be the Mexican and Cuban revolutions, populism and dictatorship, socialism and neoliberalism, and drugs and migration.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**Learning Outcomes:** 1. Describe the contours of Latin American history in the period since independence

Audience: Undergraduate

2. Apply and use key concepts relevant to Latin American history, such as imperialism, inequality, populism, socialism, neoliberalism

Audience: Undergraduate

3. Read for a dedicated purpose across different genres and forms of writing

Audience: Undergraduate

4. Apply historical reasoning to understand the origins of present-day issues

Audience: Undergraduate

5. Communicate effectively through presentations, discussion, and written work

Audience: Undergraduate

**HISTORY/LACIS 243 – COLONIAL LATIN AMERICA: INVASION TO INDEPENDENCE**

3-4 credits.

An introductory survey of colonial Latin American history, from the late fifteenth to the early nineteenth century. Examines developments in Spanish and Portuguese America by reading both secondary and primary sources. Beginning with fifteenth-century Europe, the Americas and West Africa, discusses European expansion and invasion, first contacts between the so-called Old and the so-called New Worlds, as well as the role of religion, sexuality, gender, labor and production, trade and exchange, and politics. Each week, a central question will address the topic for that week. Become familiar with and contextualize key processes and events in colonial Latin American history and learn about the nature of colonization. Identify and evaluate historical arguments. Practice interpreting primary sources and building historical arguments about them.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe the contours of Latin American history in the period between invasion and independence

Audience: Undergraduate

2. Apply and use key concepts relevant to colonial Latin American history, such as colonialism, genocide, corporate society, transatlantic slave trade, independence movements

Audience: Undergraduate

3. Read for a dedicated purpose across different genres and forms of writing

Audience: Undergraduate

4. Apply historical reasoning to understand both the epistemology of early modern people and the origins of present-day issues

Audience: Undergraduate

5. Communicate effectively through presentations, discussion, and written work

Audience: Undergraduate

### **HISTORY/ASIAN/GEOG/POLI SCI/SOC 244 – INTRODUCTION TO SOUTHEAST ASIA: VIETNAM TO THE PHILIPPINES**

4 credits.

As an introduction to Southeast Asia, covers the ethnic, cultural, religious, and political histories of the region from the classical states period to the present, with an emphasis on colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century, including an exposure to region's contemporary literature. Not open to students who completed LCA 244 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the ethnic, cultural, religious, and political histories of Southeast Asia from the classical states period to the present.

Audience: Undergraduate

2. Analyze colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century in Southeast Asia.

Audience: Undergraduate

3. Explore contemporary literature in Southeast Asia.

Audience: Undergraduate

### **HISTORY/CHICLA/GEN&WS 245 – CHICANA AND LATINA HISTORY**

3 credits.

Introduces the cultural, economic, social, and political history of Chicanas and Latinas in the U.S. and focuses on four major themes: contact between different ethnic/racial groups; ideas of nation and nationalism; constructions of identity; and struggles for social justice.

**Requisites:** None

**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Critically analyze the presence or absence of Chicanas and Latinas in US history.

Audience: Undergraduate

2. Use methods and vocabularies of history to analyze primary and secondary sources.

Audience: Undergraduate

3. Consider the relevance of Chicana and Latina history to present-day issues.

Audience: Undergraduate

4. Write and revise research aimed at an audience beyond the classroom.

Audience: Undergraduate

### **HISTORY/ASIAN/ASIAN AM 246 – SOUTHEAST ASIAN REFUGEES OF THE "COLD" WAR**

4 credits.

In-depth study of the peoples, conflicts, and wars in Cambodia, Laos, and Vietnam, with emphasis on the Cold War era (1945-1990) and on the resulting migration and resettlement of over one million Hmong, Khmer, Lao, and Vietnamese in the United States. Not open to students with credit for LCA 246 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HISTORY/GEOG/POLI SCI/SLAVIC 253 – RUSSIA: AN INTERDISCIPLINARY SURVEY**

4 credits.

Comprehensive interdisciplinary survey of Russian civilization from its beginnings through the present day.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HISTORY/GEOG/POLI SCI/SLAVIC 254 – EASTERN EUROPE: AN INTERDISCIPLINARY SURVEY**

4 credits.

Comprehensive interdisciplinary survey of East European culture, society, politics, and literature from its beginnings to the present day.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HISTORY/ASIAN/POLI SCI 255 – INTRODUCTION TO EAST ASIAN CIVILIZATIONS**

3–4 credits.

Multidisciplinary and historical perspectives on the East Asian civilizations of China, Japan, Korea, Tibet and Mongolia from prehistory to the present, including developments in philosophy, economy, governance, social structure, kinship, geography, etc.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**HISTORY/C&E SOC/POLI SCI/SOC 259 – FORWARD? THE WISCONSIN IDEA, PAST AND PRESENT**

1–3 credits.

Engage in ongoing reflection and dialogue on the Wisconsin Idea and how it informs the mission of the University of Wisconsin. Consider the Wisconsin Idea as it has developed since its beginnings, with a focus on what it means today and what it can mean in the future.

**Requisites:** Junior or senior standing only

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Listen respectfully to different opinions, respond rationally rather than emotionally, make reasoned arguments.

Audience: Undergraduate

2. Respond to another point of view with research and substantive comments or questions, present and support your own position, and thus engage in a wider conversation.

Audience: Undergraduate

3. Consider a specific question ("What makes an idea a Wisconsin Idea...?") and present a reasoned argument supporting the conclusion. (1-credit students)

Audience: Undergraduate

4. Deeply analyze an argument and respond by applying it to the student's own educational strengths and weaknesses. (3-credit students)

Audience: Undergraduate

5. Use course content to explain a controversial issue and suggest a course of action to address it, stating reasons, and anticipating counterarguments. (3-credit students)

Audience: Undergraduate

**HISTORY/AFROAMER/ANTHRO/C&E SOC/GEORG/LACIS/  
POLI SCI/SOC/SPANISH 260 – LATIN AMERICA: AN  
INTRODUCTION**

3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze Latin American culture and society from an interdisciplinary perspective.

Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.

Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.

Audience: Undergraduate

**HISTORY/LEGAL ST 261 – AMERICAN LEGAL HISTORY TO 1860**

3-4 credits.

Surveys the development of American law down to the U.S. Civil War.

Reviews the English historical background, and examines how law changed in colonial America, culminating in the framing of the U.S. Constitution.

Explores how territorial expansion, democracy, and slavery shaped nineteenth-century American law. Emphasis is on how law interacts with political, social, and cultural change, with a focus on the origins of modern civil and constitutional rights.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze how the social, political, and cultural context of England and colonial America helped to shape early American legal and political systems.

Audience: Undergraduate

2. Analyze how early legal and political systems impacted Americans of all types: men and women; landowners and the poor; settlers and indigenous people; free people, servants, and slaves.

Audience: Undergraduate

3. Assess how and why the Declaration of Independence, the U.S. Constitution, and other founding documents were shaped by traditions of representative government, Common Law, and the political philosophies of republicanism and liberalism.

Audience: Undergraduate

4. Find, interpret, and utilize resources relevant to early American law and society, including colonial charters, slave codes, the Declaration of Independence, the U.S. Constitution, and Supreme Court decisions.

Audience: Undergraduate

5. Analyze legal arguments in historical context, write clearly and persuasively, and construct original arguments.

Audience: Undergraduate

**HISTORY/LEGAL ST 262 – AMERICAN LEGAL HISTORY, 1860 TO THE PRESENT**

3-4 credits.

Surveys the development of American law from the Civil War to the early Twenty-First Century. After a review of the U.S. Constitution and its modification by the Civil War amendments, examine the legal dimensions of such topics as race relations and the Civil Rights movement, the growth of modern business, the New Deal, labor rights, the women's movement, the individual rights revolution of the postwar period, and the contemporary conservative reaction. Emphasis on how law interacts with political, social, and cultural change.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze how social, political, and cultural phenomena, such as the Civil War, industrialization, and the rise of modern mass education and administrative government shaped U.S. law and legal systems.

Audience: Undergraduate

2. Analyze how changes in U.S. legal and political systems impacted Americans, both as individuals of all sexes, races, and classes and as members of families and business and civic organizations.

Audience: Undergraduate

3. Assess how twentieth-century changes in legal ideas and ideologies have affected understandings of the law, the U.S. Constitution, and broader legal and political systems.

Audience: Undergraduate

4. Find, interpret, and utilize resources relevant to law and society, including political speeches, state and federal laws, and decisions of federal courts and of the Supreme Court.

Audience: Undergraduate

5. Analyze legal arguments in historical context, write clearly and persuasively, and construct original arguments.

Audience: Undergraduate

**HISTORY/ANTHRO/ART HIST/DS/LAND ARC 264 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** None**Course Designation:** Breadth – Humanities Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HISTORY/GNS 265 – AN INTRODUCTION TO CENTRAL ASIA: FROM THE SILK ROUTE TO AFGHANISTAN**

3 credits.

Examination of human geography, ethnicity, nomadism and pastoralism, oases cultures, religion and international politics of the silk routes of central Asia. Not open to students with credit for HIST 265 prior to Fall 2018.

**Requisites:** None**Course Designation:** Breadth – Humanities Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

### **HISTORY/CHICLA/LACIS/POLI SCI 268 – THE U.S. & LATIN AMERICA FROM THE COLONIAL ERA TO THE PRESENT: A CRITICAL SURVEY**

3 credits.

A critical examination of US-Latin American relations from the colonial era to the present, tracing the emergence and evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America. Primary attention will be focused on US relations with Mexico, Central America and the Caribbean, but other Latin American countries will figure prominently during certain episodes.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Critically examine US-Latin American relations from the colonial era to the present.

Audience: Undergraduate

2. Examine tracing the evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America.  
Audience: Undergraduate

3. Discuss US relations with Mexico, Central America and the Caribbean.  
Audience: Undergraduate

### **HISTORY 269 – WAR, RACE, AND RELIGION IN EUROPE AND THE UNITED STATES, FROM THE SCRAMBLE FOR AFRICA TO TODAY**

3-4 credits.

Investigates the complex history of European and American violence and war-making through the lens of race and religion. Taking a comparative approach, analyzes several major conflicts of the twentieth century, from World War I to the wars of decolonization, and from the genocide of the Herero peoples to the Armenian Genocide, the Holocaust, and beyond. Key topics include the genealogy of the modern idea of "race" in Europe and the U.S.; the drive towards a world of more homogeneous nation-states after World War I; and the emergence of transnational protest movements opposed to racism, imperialism, antisemitism, and Islamophobia. Drawing on a range of texts, songs, and films, investigates new connections between Europe and the United States. Take an international look at concepts like race and nation, and try to make sense of extreme violence, war-making, and the pre-requisites of peace.

**Requisites:** Sophomore standing or 3 credits in HISTORY

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **HISTORY 270 – EASTERN EUROPE SINCE 1900**

3-4 credits.

Introduces the dramatic history of twentieth-century Eastern Europe, a place where imperialism, Nazism, Communism, genocide, democracy, and capitalism all left their mark. Three interrelated themes--war, revolution, and society--allow us to place Eastern Europe within broader comparative contexts. In addition to exploring significant political, economic, and cultural changes, discover how ordinary people--including workers, peasants, women, and children--experienced attempts to change the region and its people. Throughout, discuss how East Europeans continue to wrestle with the ghosts of their past today.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **HISTORY 271 – HISTORY STUDY ABROAD: EUROPEAN HISTORY**

1-4 credits.

Topics vary reflecting the specializations, expertise, and curricula of study abroad programs. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

### **HISTORY 272 – HISTORY STUDY ABROAD: UNITED STATES HISTORY**

1-4 credits.

Topics vary reflecting the specializations, expertise, and curricula of study abroad programs. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

### **HISTORY 273 – HISTORY STUDY ABROAD: NON-WESTERN HISTORY**

1-4 credits.

Topics vary reflecting the specializations, expertise, and curricula of study abroad programs. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**HISTORY 274 – HISTORY STUDY ABROAD: TRANSNATIONAL/ GLOBAL HISTORY**

1-4 credits.

Topics vary reflecting the specializations, expertise, and curricula of study abroad programs. Enrollment in a UW-Madison resident study abroad program.

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**HISTORY 275 – TOPICS IN LGBT HISTORY**

3 credits.

Topics in the major issues and themes in lesbian, gay, bisexual, and transgender history, considered across race, class, nationality, and time.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**HISTORY/AFRICAN/AFROAMER/ANTHRO/GEOPOL/SCI/ SOC 277 – AFRICA: AN INTRODUCTORY SURVEY**

4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Analyze African society and culture from a multidisciplinary perspective.

Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.

Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.

Audience: Undergraduate

**HISTORY 278 – AFRICANS IN THE AMERICAS, 1492-1808**

3-4 credits.

Topics include demography and structure of the slave trade, but major focus on continuities and transformations of African cultures and social structures in the Americas--ethnicity, religion, kinship, gender, oral tradition, creolization, etc.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2021**HISTORY 283 – INTERMEDIATE HONORS SEMINAR-STUDIES IN HISTORY**

3 credits.

Honors, intermediate-level exploration of selected topics, featuring intensive reading, writing, and small-group discussion. Topics vary reflecting the interests, expertise, and innovating intention of the instructor.

**Requisites:** Declared in an Honors program**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**HISTORY/AFRICAN/AFROAMER/POLI SCI 297 – AFRICAN AND AFRICAN-AMERICAN LINKAGES: AN INTRODUCTION**

4 credits.

Analysis of retention of African elements in African-American oral, written, and material culture. Social, cultural, and political issues regarding race, self-definition, and self-determination in both Africa and North America will be examined.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2018**Learning Outcomes:** 1. Analyze the retention of African elements in African-American oral, written, and material culture.

Audience: Undergraduate

2. Explore social, cultural, and political issues regarding race in both Africa and North America.

Audience: Undergraduate

3. Examine self-determination in both Africa and North America.

Audience: Undergraduate

### **HISTORY 300 – HISTORY AT WORK: PROFESSIONAL SKILLS OF THE MAJOR**

1-2 credits.

Focuses on how a History major applies to the world of work. Explores how history skills relate to the needs of professional employers. Guides in the process of finding and obtaining professional internships. Polishes written and oral communication skills in forms appropriate for professional situations. Learn from the experiences of guest alumni speakers from a variety of fields.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Learn from guest speakers in a variety of fields about how they used their history education as the foundation of a successful career

Audience: Undergraduate

2. Practice basic writing forms and listening styles for a successful job search and early career

Audience: Undergraduate

3. Create a professional resume and cover letter

Audience: Undergraduate

4. Articulate the value of your BA in History in a professional setting.

Audience: Undergraduate

5. Hone your written and oral presentation skills in order to communicate clearly, concisely, and effectively in a professional setting

Audience: Undergraduate

6. Research career fields and organizations in which you might want to work

Audience: Undergraduate

7. Practice explaining, in both speech and writing, how the skills you have learned in the history major can be useful in jobs and careers that you are interested in

Audience: Undergraduate

### **HISTORY 301 – HISTORY AT WORK: HISTORY INTERNSHIP SEMINAR**

1 credit.

Identify and analyze the differences between an internship and a non-professional job, with an eye towards articulating how a History degree and the skills it confers can be valuable in professional settings. Share internship experiences with classmates through short presentations. Discuss any issues or challenges that arose during internship experience. Concurrent enrollment in HISTORY 300 for 2 credits, which includes a discussion section, or previous credit in HISTORY 300 is required.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and articulate the key differences in content and expectations between pre-professional internships and non-professional employment

Audience: Undergraduate

2. Develop and implement strategies for managing workplace challenges, particularly those related to working as part of a team and interacting with diverse populations

Audience: Undergraduate

3. Articulate the relevance and value of the skill set conferred by the history major to professional and pre-professional work environments

Audience: Undergraduate

**HISTORY 302 – HISTORY OF AMERICAN THOUGHT, 1859 TO THE PRESENT**

3-4 credits.

Designed for those who are interested in the role of ideas and culture in modern American history. Examine developments in philosophy, science, political theory, social criticism, and the arts in American life from 1859 to the present. Read the works of a number of influential thinkers and writers, as well as explore a variety of intellectual movements, which shaped the cultural worlds of late 19th- and 20th-century Americans. Themes include: the influence of Darwinism on religion; the impact of industrialization on ideas about American society; the revolt against formalism in philosophy, literature, and the social sciences; early twentieth-century conceptions of race, ethnicity, and gender; the responsibility of the intellectual in times of national and global crisis; post-WWII liberalism and existentialism; the rise of postmodernism in the academy and American popular culture, and the persistent contestations over the meaning and scope of American national identity.

**Requisites:** Sophomore standing or 3 credits in HISTORY or HIST SCI**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and summarize the broad contours of and major issues in American intellectual history

Audience: Undergraduate

2. Identify and illustrate the transnational and transtemporal dimensions of American thought

Audience: Undergraduate

3. Demonstrate the relevance of a historical perspective to contemporary issues

Audience: Undergraduate

4. Judge the context in which sources were created, searching for chronological and other relationships among them, and assessing the sources in light of that knowledge

Audience: Undergraduate

**HISTORY 303 – A HISTORY OF GREEK CIVILIZATION**

3-4 credits.

From the Bronze Age to the Hellenistic Age. Special emphases may vary with each offering.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**HISTORY 306 – THE UNITED STATES SINCE 1945**

3-4 credits.

Political, social, economic, and cultural changes in the U.S. from World War II to the present.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2022**HISTORY 307 – A HISTORY OF ROME**

3-4 credits.

Roman civilization from the monarchy through the collapse of the Roman Empire in the west.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HISTORY/ASIAN/RELIG ST 308 – INTRODUCTION TO BUDDHISM**

3-4 credits.

The basic thought, practices and history of Buddhism, including selflessness and relativity, practices of meditation, merit-making and compassion from both local and translocal perspectives. Includes a discussion of Buddhism as a contemporary, North American religion. Not open to students with credit for E ASIAN or LCA 308 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HISTORY/MEDIEVAL/RELIG ST 309 – THE CRUSADES: CHRISTIANITY AND ISLAM**

3-4 credits.

An examination of the Crusades from both Christian and Islamic perspectives; the historical, social, and religious context and significance of the Crusades for both Christians and Muslims.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**HISTORY/JEWISH 310 – THE HOLOCAUST**

3-4 credits.

References to the Holocaust abound in contemporary political debates and in our popular culture. But most people know very little about the history of the Holocaust, despite the mountains of superb historical scholarship that experts in the field have produced over decades of dedicated research. Utilize correspondence, diaries, or other firsthand accounts of Holocaust victims, together with study of the larger events around them, to reconstruct the experiences of ordinary families swept up in the Nazi genocide.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate in-depth knowledge of the Nazi genocide of European Jewry during WWII, including the events, processes, ideas, organizations, and individuals behind these crimes, and an understanding of how the everyday experiences of Holocaust victims limited their options for survival

Audience: Undergraduate

2. Explain the mechanics of how and why the Nazis and their collaborators were able to carry out a program of persecution and ultimately extermination against the Jewish communities of Europe, leading to the murder of an estimated 6 million Jews

Audience: Undergraduate

3. Identify central arguments in historiographical writing; use primary sources to reconstruct historical events; formulate research questions; develop written arguments that illuminate the lives of Holocaust victims and analyze the key events, policies, or sites of the Nazi genocide; support arguments with appropriate sources; and supply appropriate citations

Audience: Undergraduate

**HISTORY/ASIAN 319 – THE VIETNAM WARS**

3-4 credits.

Explores the prolonged cycle of wars in Vietnam and its neighbors, 1940 to date, with due regard for both local and U.S. perspectives.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HISTORY/AFROAMER 321 – AFRO-AMERICAN HISTORY SINCE 1900**

3-4 credits.

Survey of African American history from 1900 to the present. Topics covered include segregation, the Civil Rights Movement, the political, social and cultural changes of the late 20th century, and the Obama presidency.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HISTORY/AFROAMER 322 – AFRICAN AMERICAN HISTORY TO 1900**

3 credits.

Survey of African American history from its roots in Africa to the end of the 19th century. Topics considered include the slave trade, the political and cultural practices of enslaved communities, forms of resistance, Reconstruction, and systems of segregation.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

**Learning Outcomes:** 1. Recognize the multitude of contributions that people of African descent made to the social, political, and economic development of the United States of America.

Audience: Both Grad & Undergrad

2. Explain the creation, development, and legacies of race-based slavery in the United States.

Audience: Both Grad & Undergrad

3. Describe how race-based discrimination was used to marginalize African Americans socially, politically, and economically, and how Black people fought back against institutional oppression

Audience: Both Grad & Undergrad

4. Use primary sources and secondary peer-reviewed sources to explain and discuss how certain histories have been valued and devalued and how these differences have promulgated disparities in contemporary American society.

Audience: Both Grad & Undergrad

5. Demonstrate critical reading, writing, speaking, and thinking skills, specifically concerning teaching students to harbor healthy skepticism toward knowledge claims.

Audience: Both Grad & Undergrad

6. Contribute as a well-rounded, informed, and educated citizen capable of beginning to address the goals of the Ethnic Studies Requirement, including engendering students' ability to participate in a multicultural society effectively and successfully.

Audience: Undergraduate

7. Apply the primary theories and methods employed by historians of African American history.

Audience: Graduate

**HISTORY/HIST SCI 323 – THE SCIENTIFIC REVOLUTION: FROM COPERNICUS TO NEWTON**

3 credits.

An introduction to the formative period of modern science, including major ideas and events in the physical and life sciences from Copernicus to Newton.

**Requisites:** Junior standing or (graduate/professional standing and concurrent enrollment in HIST SCI 623)

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HISTORY/ENVIR ST 328 – ENVIRONMENTAL HISTORY OF EUROPE**

3 credits.

Explores a new approach to a part of the world with a very old history, but one that is now as 'modern' as any. The changing, complex relations between Europeans and their environments from antiquity to the twenty-first century offer instructive comparison with American and current global environmental concerns. Approaching Mediterranean and Western civilizations from an environmental viewpoint also offers fresh perspective on these enduring cultures.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HISTORY 329 – HISTORY OF AMERICAN CAPITALISM**

4 credits.

Survey of political, social, and economic change in the history of American capitalism from the late colonial period to the near-present.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **HISTORY/INTL ST 330 – GLOBAL HISTORY OF HUMANITARIANISM**

3-4 credits.

What motivates us to try to alleviate the suffering of people in distant parts of the world? Examines the origins of humanitarian ideas and institutions, and how various humanitarian campaigns have been shaped by geopolitical processes, including the abolition of the slave trade, the spread of missionary Christianity, European imperialism, the Cold War, neoliberalism and the emergence of new media forms. Questions include: who has benefited from various humanitarian aid campaigns throughout history? How have various humanitarian campaigns shaped, and been shaped by, patterns of global inequality? Why have some populations, and not others, been deemed worthy of the world's compassion? Explores the worlds, perspectives and visions of humanitarians through a range of primary sources, including diary entries, political propaganda, memoirs, journalistic reportage, photography and documentary film.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HISTORY/INTL ST 332 – EAST ASIA & THE U.S. SINCE 1899**

3-4 credits.

From the Boxer Rebellion, to the dropping of the atomic bombs, to the nuclear stand-off with North Korea, American foreign relations with East Asia during the 20th century were as consequential as they were controversial. Survey the issues and questions that alternately made allies and enemies of these nations: How did the quest for markets influence American policy towards China? How did European imperialism shape Japan's rise? Why did communism seem to offer a more compelling economic and political arrangement to China and North Korea? While squarely rooted in East Asia this course will also explore the questions that united and divided Americans over their nation's foreign policy. Through examining these questions, develop answers and construct their own narrative of the relationship between the United States and East Asia.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and summarize the important features and major periods in the history of US-East Asian Relations

Audience: Both Grad & Undergrad

2. Identify and summarize the major foreign relations objectives of China, Japan, North Korea, South Korea, and the United States during the major historical periods of the 20th century

Audience: Both Grad & Undergrad

3. Explain and evaluate how these societies have viewed each other during periods of conflict and cooperation

Audience: Undergraduate

4. Describe how people-to-people connections have shaped these relationships beyond their governments intentions

Audience: Undergraduate

5. Use historical knowledge to evaluate current trends in the relationships between these states

Audience: Undergraduate

6. Identify and summarize major trends and schools of interpretation in the historiography of US-East Asian relations

Audience: Graduate

7. Become proficient in the form, style, and conventions of an academic book review

Audience: Graduate

**HISTORY/ASIAN 335 – THE KOREAS: KOREAN WAR TO THE 21ST CENTURY**

3-4 credits.

A historical examination of the Korean War and the politics and society of North Korea and South Korea.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**HISTORY 336 – CHINESE ECONOMIC AND BUSINESS HISTORY: FROM SILK TO IPHONES**

3-4 credits.

Utilizes an historical approach to explore the economic and business history of pre-modern and modern China. Topics addressed include: how people thought about property, labor, and value, money and the banking and financial systems, development of domestic and international markets and trade, major industries, the search for resources, agricultural economy, the connection of law and economy, organizations that affected the economy, systemic changes during the Republic and People's Republic, China's participation in international economic institutions, and more.

**Requisites:** Sophomore standing or 3 credits in HISTORY, ECON, or POLI SCI

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**HISTORY/ASIAN 337 – SOCIAL AND INTELLECTUAL HISTORY OF CHINA, 589 AD-1919**

3-4 credits.

The culture of the literati in the T'ang; major trends of Neo-Confucianism during the Sung and Ming; the Confucian response to the West in the nineteenth century; the emergence of the modern Chinese intelligentsia and iconoclasm in the early May Fourth period.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HISTORY 340 – CULTURAL HISTORY OF KOREA**

3-4 credits.

The culture and society of Korea have evolved hand in hand with the country's transformation from the Choson dynasty, a relatively isolated Confucian kingdom built on an agrarian economy, to South Korea and North Korea, two modern, industrialized nation-states in the globalized present. Explores key aspects of Korea's great cultural and social transformation from the 15th century to the 21st century. Delves into recent studies on gender history and on the constructed notion of "national culture." Also analyzes primary sources from different historical periods, as well as cinematic representations of Korea's past and present.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**HISTORY/ASIAN 341 – HISTORY OF MODERN CHINA, 1800-1949**

3-4 credits.

The disintegration of traditional Chinese society under the impact of Western imperialism, the rise of modern Chinese nationalism, and the emergence of modern revolutionary movements and ideologies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**HISTORY/ASIAN 342 – HISTORY OF THE PEOPLES REPUBLIC OF CHINA, 1949 TO THE PRESENT**

3-4 credits.

The social, economic and political transformation of China under Communism; the role of ideology in contemporary Chinese historical development; the nature of that historical development in the comparative perspective of other post-revolutionary histories.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**HISTORY 344 – THE AGE OF THE AMERICAN REVOLUTION, 1763-1789**

3-4 credits.

Structure of American society, Britain and the Colonies; the revolutionary movement for independence; the war for independence; social, political, and constitutional change.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2016

**HISTORY 345 – MILITARY HISTORY OF THE UNITED STATES**

3-4 credits.

The founding and growth of the military establishment, the exercise of the military art, and military policies treated in connection with relevant political, social, and economic factors.

**Requisites:** Sophomore standing. Not open to students with credit for HISTORY 427 or 428.

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HISTORY/GEN&WS 346 – TRANS/GENDER IN HISTORICAL PERSPECTIVE**

3-4 credits.

Focuses on sex/gender crossing and variation in historical contexts including Japan, South Africa, Europe, the African diaspora, and North America. Considers perspectives of people who themselves passed, crossed, transitioned, transed, or otherwise exceeded their culture's definitions of normative sex/gender. Alongside, consider the ways that dominant social institutions reinforced norms, recognized, tolerated, punished and/or celebrated gender variation. Examine popular culture, medical and legal perspectives, memoir, queer and trans theory, and social movement treatises.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**HISTORY/AFROAMER 347 – THE CARIBBEAN AND ITS DIASPORAS**

3-4 credits.

Surveys the history of the Caribbean from the 15th century to the present. Emphasizes the importance of colonialism, commodity-based capitalism, globalization, slavery, and forced labor for the modeling of the region's social, economic, cultural, and political structures. Pay particular attention to the resilient, creative and resourceful ways in which Caribbean people have responded to these adverse conditions. Examine the circumstances that have shaped migrations from the region to the United States and Canada during the 20th and 21st centuries. Study how these diasporic communities have created social spaces in these two countries that have remained closely linked to the Caribbean through economic, political, and filial networks.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify the historical roots of the racial, political, cultural, and social structures of contemporary Caribbean societies and their diasporas

Audience: Undergraduate

2. Recognize the multiple ethnic and cultural origins of Caribbean communities and the impact these communities had in the modeling of Atlantic and global historical developments

Audience: Undergraduate

3. Analyze and synthesize information, provide evidence-based interpretations about the past, and develop arguments regarding the history of Caribbean societies and their global diasporas

Audience: Undergraduate

4. Identify and analyze within their social, cultural, and economic contexts key historical developments in the history of the Caribbean from the fifteenth century to the present

Audience: Both Grad & Undergrad

5. Analyze the role that social and cultural factors—such as gender, religion, ethnicity, and class, among others—had in shaping Caribbean historical developments

Audience: Both Grad & Undergrad

6. Identify and analyze within their social, cultural and economic contexts the history of the idea of race as it relates to the history of the Caribbean

Audience: Both Grad & Undergrad

7. Discern the impact of local and global political and economic developments, in the shaping of ideas about racial, ethnic, social, and cultural hierarchies and public policies in Caribbean nations

Audience: Both Grad & Undergrad

8. Understand the different methodological approaches and research strategies that historians, anthropologists, and other scholars have used to examine the histories of the Caribbean from the sixteenth century to the present

Audience: Graduate

**HISTORY 348 – FRANCE FROM NAPOLEON TO THE GREAT WAR, 1799-1914**

3-4 credits.

Politics, society and culture in nineteenth century France. Emphasis on France's revolutionary heritage and problems of establishing a democratic regime.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**HISTORY 349 – CONTEMPORARY FRANCE, 1914 TO THE PRESENT**

3-4 credits.

Social, political, and cultural history of twentieth century France, especially the Great War, the Popular Front, the Vichy Regime, DeGaulle and the Fifth Republic, Mitterrand's socialist experiment, France's changing role in the world and the European Community.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**HISTORY 350 – THE FIRST WORLD WAR AND THE SHAPING OF TWENTIETH-CENTURY EUROPE**

3-4 credits.

The experience and legacy of the First World War has been linked to nearly every social, cultural, and political transformation that marked the short century that followed: mobilization and the experience of total war transformed the relations between governments and citizens, between men and women, and between social classes. Europeans experienced death on an unprecedented scale and came to terms with new forms of industrialized warfare, from the use of poison gas to modern practices of genocide. Europeans now learned to live with violence, both during as well as after the war, and found new ways to mourn or remember the dead. Using a wide variety of contemporary sources -- memoirs, essays, poems, or cinematic representations -- situates the upheaval of 1914-1918 within the larger framework of twentieth-century European history.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**HISTORY/GEN&WS 353 – WOMEN AND GENDER IN THE U.S. TO 1870**

3-4 credits.

An advanced and comparative study of the roles of gender, class, and race in American history and historiography. Themes include women as agents of social change and as builders of community.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science

**Repeatable for Credit:** No**Last Taught:** Spring 2019**HISTORY/CHICLA/LACIS/POLI SCI 355 – LABOR IN THE AMERICAS: US & MEXICO IN COMPARATIVE & HISTORICAL PERSPECTIVE**

3 credits.

Provides a critical examination of the history of labor and working people in the Americas, from the colonial era to the present. It focuses on the experience of the United States and Mexico, offering a comparative perspective on their distinct but also shared (and increasingly linked) histories. The seminar proceeds chronologically, highlighting major episodes in the evolution of labor systems in the two countries, beginning with the colonial labor systems implemented by the Spanish and British empires following the European conquest of the Western Hemisphere. Among other topics, we will examine the pivotal role of slavery and other forms of forced labor, the impact of the industrial revolution, the emergence and expansion of corporate capitalism and the labor unrest it provoked in the post-civil war U.S., the role of labor in the Mexican Revolution and its aftermath, the impact of the Great Depression and labor incorporation on the post-WWII social and political order of both countries, the breakdown of that order and the move to neo-liberalism in the 1970s and 1980s, and the emergence of an increasingly integrated North American production system and its consequences for labor and working people on both sides of the US-Mexico border.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021

**HISTORY 357 – THE SECOND WORLD WAR**

3-4 credits.

Background and history of World War II. Problems of peacemaking and international organizations; rise of Fascism, National Socialism, and Japanese imperialism; breaking the peace; World War II.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**HISTORY 358 – FRENCH REVOLUTION AND NAPOLEON**

3-4 credits.

Explores the French Revolution and the Age of Napoleon. Why did Revolution break out in one of the most powerful and traditional monarchies of Europe? What were the roots of discontent and the sources of revolutionary ideas? Probes the exciting twists and turns of revolutionary politics and the attempt to spread "liberty equality" into ordinary life, even abolishing slavery in response to massive slave revolt in the French colonies. Asks how the French interacted with a transnational revolutionary movement across Europe, the US, and the Atlantic world. Though focused on a specific revolutionary era, we will also reflect on timeless questions: Why is it so difficult to create democracy? Is violence ever justified to overcome oppression and injustice? Finally, why did this experiment in radical democracy also unleash the Terror and launch Napoleon Bonaparte, the politician and general who built an astonishing European Empire? And how did he pull it off for as long as he did?

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HISTORY 359 – HISTORY OF EUROPE SINCE 1945**

3-4 credits.

Political, cultural, and social history of Europe from the Second World War to the present.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HISTORY/ENGL/RELIG ST 360 – EARLY MEDIEVAL ENGLAND**

3 credits.

Introduction to the peoples and cultures of Early Medieval England (c450-c1100), with primary emphasis on texts written in Old English and Latin. Interdisciplinary approach including history, literature, religion, and material culture. Attention to literary genres ranging from elegy to riddles; the development of Christianity; encounters with Romans, Vikings, and Normans; and other political and social concerns. All readings in translation.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recognize and discuss major forms, techniques, social conditions, values, and genres that have shaped the history of English literature, language, and culture.

Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods related to Early Medieval England.

Audience: Undergraduate

3. Write original, coherent, and compelling arguments about assigned texts and/or objects that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness.

Audience: Undergraduate

**HISTORY/CLASSICS/POLI SCI 362 – ATHENIAN DEMOCRACY**

3 credits.

Explores key issues in the ideology and practice of Athenian democracy. Examines democratic values, institutions, rhetoric, and sociology in order to provide the basic tools to understand democracy in its ancient context. Engages with a variety of source material (literary, archaeological, epigraphic) in order to develop multiple skills of interpretation. Some questions examined include: What are the key features of Athenian democracy, how did it change over time, and how did it differ from modern democracy? How did the Athenians justify and critique this political system? How did they reconcile citizen egalitarianism with social inequalities of wealth, gender, and status? To what extent were women, foreigners, slaves, or the poor included or excluded from politics? Was Athenian democracy a robust political system or a system in crisis?

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand and use appropriately the specific terminology (names, places, concepts) related to Athenian democracy

Audience: Undergraduate

2. Discuss with appropriate methodological awareness conflicting views expressed in modern scholarship

Audience: Undergraduate

3. Analyze problems relating to the reconstruction of historical concepts in the ancient world with reference to relevant source material

Audience: Undergraduate

4. Critically read and engage with complex academic texts (both ancient sources and modern literature)

Audience: Undergraduate

5. Present knowledge, ideas, and analysis orally (in classroom discussion) and in written formats

Audience: Undergraduate

**HISTORY/ASIAN 363 – CHINA AND WORLD WAR II IN ASIA**

3-4 credits.

This course is intended to help students understand World War II from the perspective of Asia. The focus is not only on the American and Japanese roles in the war but also on lesser, often overlooked participants such as China, Korea, and Southeast Asia. The course will focus not only on the diplomatic, political, and military situation of wartime Asia, but also on perceptions and experiences of the war from those most heavily affected by it: those experiencing it on the ground. Understanding this war is critical for helping us understand contemporary Asia. The foundations of the Cold War and the post-Cold War world that we live in today were forged on battlefields in mainland China, Burma, small islands in the Pacific, and in the skies over the archipelago of Japan. In order to provide the background and understand the legacies, this course covers an extended time frame, beginning in the 19th century with the arrival of the West in Asia and continues into the 1950s.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2022

### **HISTORY/INTL ST 366 – FROM FASCISM TO TODAY: SOCIAL MOVEMENTS AND POLITICS IN EUROPE**

3-4 credits.

Investigates how everyday people shaped European history and politics, from World War I through today. Takes a comparative and interdisciplinary approach to analyze a range of major social movements in Europe, thinking in detail about what constitutes a social movement in the first place, and what determines its effectiveness. Key topics include the rise and fall of Fascism; the fate of the Communist and Socialist Left in Europe; the role of youth movements as drivers of change; and the constraints imposed on political organizing by both democratic and authoritarian societies. Drawing on a range of texts, songs, and films, investigates how people power has shaped the European state, and vice-versa, from 1922 through today.

**Requisites:** Sophomore standing or 3 credits in HISTORY

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Refine their ability to read, analyze, and critically engage with primary and secondary sources.

Audience: Undergraduate

2. Craft sophisticated analytical arguments.

Audience: Undergraduate

3. Communicate complex ideas through speech, charitably evaluating opposing viewpoints, and working collaboratively with others.

Audience: Undergraduate

4. Become familiar with the building-blocks of European transnational and international history, and expose students to the study of social movements.

Audience: Graduate

5. Hone hermeneutical skills so as to evaluate and interpret sources more judiciously and charitably.

Audience: Graduate

6. Develop confidence as keen writers, sharp public speakers, and probing analysts of the past and present.

Audience: Graduate

### **HISTORY/ENVIR ST 369 – THINKING THROUGH HISTORY WITH ANIMALS**

3-4 credits.

Explores the history of human relationships with animals around the world with focus on agriculture and hunting, political economic development, human identity, and biological science and conservation.

**Requisites:** Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**HISTORY/INTL ST 375 – THE COLD WAR - FROM WORLD WAR II TO END OF SOVIET EMPIRE**

3-4 credits.

The Cold War was the first event to impact virtually all of humanity and left a lasting legacy that still shapes the current world order. Exploration of its conduct on five continents entails both a diversity of sources (film, fiction, documents, and memoir) and a range of topics (geopolitics, ideology, internationalism, empire, revolution, counterinsurgency, and covert operations). Its half-century history was marked by nuclear-armed stalemate and ideological competition in Europe, cultural politics of repression and generational revolt in America, interplay of anti-colonial nationalism and counterinsurgency in Asia, Africa, and Latin America, and a succession of major wars worldwide in Korea, Vietnam, Angola, and Afghanistan. By adopting an international perspective that carries us beyond the narrow ambit of the Moscow-Washington rivalry, integrate diverse global forces and particular national histories for a fuller understanding of an ever-changing world system.

**Requisites:** Sophomore standing or 3 credits in HISTORY or INTL ST

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Interpret primary sources

Audience: Undergraduate

2. Develop a refined ability to critically analyze secondary sources

Audience: Undergraduate

3. Merge a considered thesis, operational factors, and empirical evidence into a coherent analytical narrative

Audience: Undergraduate

4. Edit their own prose for both grace and clarity

Audience: Both Grad & Undergrad

5. Develop a perspective on how to incorporate primary sources in undergraduate teaching

Audience: Graduate

6. Develop a foundation for teaching their own world history courses, which are a requirement for job placement in a growing number of colleges and universities

Audience: Graduate

7. Develop a resonant sense of the extraordinary carrying capacity of historical narrative

Audience: Graduate

**HISTORY/AMER IND 380 – SOVEREIGNTY AND THE SCHOOLHOUSE**

3 credits.

Introduction to the history of American Indian education. Evaluate the relationship between education and sovereignty through a survey of schools including missions, boarding schools, survival schools, tribal colleges, language nests, charter schools, and more.

**Requisites:** AMER IND 100, HISTORY/AMER IND 190, or graduate/professional standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify important concepts in the history of education and American Indian studies to understand how the past has affected present day circumstances regarding inequalities in education in Indian Country and in the U.S.

Audience: Both Grad & Undergrad

2. Evaluate theories of schooling and sovereignty through the interpretation of primary sources related to American Indian education to practice historical empathy toward the cultural perspectives and worldviews of others.

Audience: Both Grad & Undergrad

3. Craft rigorous historical arguments in the form of an original research paper on the history of an American Indian school, and question cultural assumptions and knowledge claims as they relate to race, ethnicity, and sovereignty in education.

Audience: Both Grad & Undergrad

4. Assess the foundational works in the historiography on schooling in Native lives, communities, and nations as part of the field of contemporary Indigenous Studies.

Audience: Graduate

**HISTORY/GEN&WS 392 – WOMEN AND GENDER IN MODERN EUROPE**

3-4 credits.

An examination of the cultural role of gender and the social, economic, and political activities of women in modern Europe from the 18th to the late 20th centuries.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **HISTORY/AFROAMER 393 – SLAVERY, CIVIL WAR, AND RECONSTRUCTION, 1848-1877**

3-4 credits.

African-American slavery and its impact on mid-19th century social, political, and economic life; the causes, course, and consequences of the Civil War; the rise and fall of postwar Reconstruction and non-racial citizenship; the impact of these histories on contemporary American society.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HISTORY 400 – UNDERGRADUATE HISTORY SYMPOSIUM**

1 credit.

Whatever we do, wherever we go, we are encountering history and reckoning with some consequence radiating out from the past. Designed to awaken us to the myriad ways in which the past is present all around us, and to help cultivate the historian's habits of mind in our everyday experiences. In addition to faculty-led group discussions, centers on intellectual opportunities in Madison such as special lecture series and conversations with UW faculty and outside guests. Themes and topics will vary, depending on the instructor and opportunities for engagement with the wider intellectual community of Madison.

**Requisites:** Declared in the History undergraduate program, Certificate in History, or 6 credits in HISTORY or HIST SCI

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Prepare to get the most out of a lecture by researching the speaker, reading something related to the topic, and thinking about possible approaches.

Audience: Undergraduate

2. Participate comfortably and appropriately in a formal academic lecture setting.

Audience: Undergraduate

3. Reflect critically on a lecture or event.

Audience: Undergraduate

4. Discuss complex points productively and respectfully.

Audience: Undergraduate

5. Recognize contextual influences on the perspectives and actions of scholars and others, including oneself.

Audience: Undergraduate

6. Cultivate a lifetime sense of curiosity and wonder.

Audience: Undergraduate

### **HISTORY 401 – PUBLIC HISTORY WORKSHOP**

3 credits.

Introduction to the practice of public history. Public historians ground their work in rigorous, academic research with the goal of presenting history in a collaborative and publicly focused manner. These projects come in many forms including exhibits, walking tours, podcasts, documentaries, web projects, and place-based interpretation, to name a few. Learn how academic history gets presented to the public, not only by reading about public history, but by doing it.

**Requisites:** HISTORY 201 or 3 credits in HISTORY or HIST SCI

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and understand theoretical and methodological underpinnings of public history  
Audience: Undergraduate

2. Analyze how research gets presented to the public

Audience: Undergraduate

3. Assess the usefulness of various formats in sharing particular histories with different audiences

Audience: Undergraduate

4. Produce public history projects

Audience: Undergraduate

5. Consider factors that affect the production and reception of public history projects

Audience: Undergraduate

6. Collaborate and share authority with members of the public whose stories are being told

Audience: Undergraduate

7. Identify different specialties of public history and recognize the wide array of employment opportunities and roles in the field

Audience: Undergraduate

**HISTORY 403 – IMMIGRATION AND ASSIMILATION IN AMERICAN HISTORY**

3-4 credits.

Survey of immigration to the U.S. from colonial times to the present with analyses of the roles of ethnic and racial groups in economics and politics, the reactions of earlier arrivals to their successors, the extent of assimilation and contemporary ethnic and racial consciousness.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**HISTORY/RELIG ST 409 – CHRISTIANITY IN THE ATLANTIC WORLD, 1500-1800**

3 credits.

Between the late Middle Ages and the era of democratic revolutions Western Christianity saw a series of sweeping changes that altered its global profile and helped form the modern world - examines some of these shifts and their impact. Questions explored include: Why did the Reformations of the 16th century occur and with what effects on people's lives and on early modern societies? What was the relationship between European colonization, the Atlantic slave trade, new theories of race, and the spread of Christianity to the "New World"? How was the Christian religion resisted, received, and reshaped by Native Americans and people of African descent? What sparked movements of reform and renewal - including new Catholic religious orders and the Protestant Evangelical Awakening - and with what consequences for modern Christianity? How did the nature of Christian belief and identity change under the impact of religious conflict, political revolution, and new intellectual movements?

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and explain the significance of key trends, thinkers, and texts in the history of early modern Christianity

Audience: Undergraduate

2. Analyze and evaluate some of the scholarly debates in the field of early modern Christianity

Audience: Undergraduate

3. Interpret complex writings from the past contextually, critically, and empathetically

Audience: Undergraduate

4. Construct strong historical arguments based on evidence and careful reasoning

Audience: Undergraduate

5. Compose clear analytical and argumentative written prose

Audience: Undergraduate

**HISTORY 410 – HISTORY OF GERMANY, 1871 TO THE PRESENT**

3-4 credits.

Political and social development of Central Europe from the establishment of the German Empire to the post-World War II period.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HISTORY/RELIG ST 411 – THE ENLIGHTENMENT AND ITS CRITICS**

3 credits.

European intellectual history in the 17th and 18th centuries, from the Wars of Religion to the French Revolution. Examines the rise of Enlightenment thought in relation to political and religious conflict, revolutions in science and philosophy, and the emergence of the public sphere. Special attention is paid to the Enlightenment's relationship to religion and to contemporary critiques made of Enlightenment thinking, including those of the early Romantic movement.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**HISTORY/ED POL 412 – HISTORY OF AMERICAN EDUCATION**

3 credits.

Examines the history of education in America from the colonization of North America to the present to consider education in its broadest sense – as a process of individual development and cultural transmission. Explores such topics as the rise of common schools in the urban North; the education of Native Americans, immigrants, slaves, and free blacks; the evolution of teacher training (primarily for women); various philosophies of "progressive" school reform; the politics of desegregation, bilingual education, and special education; the articulation between high school and college work; and the evolving federal role in American education.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. demonstrate their knowledge and explain the significance of key actors, events, themes, and ideas relating to the history of American education

Audience: Both Grad &amp; Undergrad

2. interpret and contextualize primary historical sources

Audience: Both Grad &amp; Undergrad

3. identify and evaluate historical arguments in secondary scholarly works

Audience: Both Grad &amp; Undergrad

4. locate, synthesize, and evaluate information from primary and/or secondary sources in order to develop and support their own evidence-based historical interpretations

Audience: Undergraduate

5. locate, synthesize, and evaluate relevant primary historical sources in order to construct evidence-based historical interpretations.

Audience: Graduate

**HISTORY 417 – HISTORY OF RUSSIA**

3-4 credits.

Origins and evolution of the Russian people and state; political, economic, and social history; foreign relations as they affect domestic policy; from the ninth century to 1800.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2021**HISTORY 418 – HISTORY OF RUSSIA**

3-4 credits.

Russian political, economic, and social history from 1800 to 1917; foreign relations as they affect domestic policy.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**HISTORY 419 – HISTORY OF SOVIET RUSSIA**

3-4 credits.

Major political, economic and social developments in Russia since 1917.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**HISTORY 420 – RUSSIAN SOCIAL AND INTELLECTUAL HISTORY**

3-4 credits.

Main currents of Russian social thought in the eighteenth and nineteenth centuries.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2022

**HISTORY/CHICLA/POLI SCI 422 – LATINO HISTORY AND POLITICS**

3 credits.

Students will examine the historical, social, political, economic, and cultural experiences and conditions of Latinos, one of the largest US racial/ethnic minority groups. Course focus is on people who trace their origins to Mexico, the Caribbean, and countries of Latin America.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2015

**Learning Outcomes:** 1. Discuss the complexity of the Latino population and divergent political agendas of various subgroups.

Audience: Undergraduate

2. Develop an understanding of the historical origins of how Latino social/political movements have emerged and changed.

Audience: Undergraduate

3. Evaluate the role of movements and activists in policy reform and social/political change.

Audience: Undergraduate

4. Examine the impact of the Latino vote on contemporary politics.

Audience: Undergraduate

5. Explore contemporary policy issues affecting the Latino population.

Audience: Undergraduate

**HISTORY 424 – THE SOVIET UNION AND THE WORLD, 1917-1991**

3-4 credits.

Surveys Soviet foreign relations from 1917-1991, examining the causes, course, and outcome of the Cold War. Topics include: Soviet-US relations, World War II, the Socialist Bloc, espionage, the space race, Sino-Soviet relations, and Soviet intervention in the 'Third World.'

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**HISTORY/LEGAL ST 426 – THE HISTORY OF PUNISHMENT**

3-4 credits.

Examines punishment across a vast range of historical traditions, examining how wrongdoing and punishment have been figured in law, literature, art and philosophy. Examines ancient, medieval and modern traditions.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**HISTORY 427 – THE AMERICAN MILITARY EXPERIENCE TO 1902**

3-4 credits.

A survey of American military experience from the 16th century through the development of a nascent American "empire" at the turn of the 19th and 20th centuries, examining the influence of warfare on all aspects of American society.

**Requisites:** Sophomore standing. Not open to students with credit for HISTORY 345.

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**HISTORY 428 – THE AMERICAN MILITARY EXPERIENCE SINCE 1899**

3-4 credits.

A survey of American military experience in the 20th and 21st centuries, examining the influence of warfare on all aspects of American society.

**Requisites:** Sophomore standing. Not open to students with credit for HISTORY 345.

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **HISTORY/ENVIR ST/LEGAL ST 430 – LAW AND ENVIRONMENT: HISTORICAL AND CONTEMPORARY PERSPECTIVES**

3 credits.

Explores environmental studies through a focus on law and legal history. Although its main concentration is on U.S. environmental law, the course will begin and end with broader historical and global perspectives.

Topics include a survey of English, European, and early American legal approaches to land use, natural resources, and pollution through World War II as well as an examination of the development and practice of contemporary U.S. environmental law and consideration of the recent emergence of international environmental law.

**Requisites:** Sophomore standing

**Course Designation:** Gen Ed - Communication Part B

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and articulate their own arguments about how social, political, and cultural phenomena shape law and legal systems.

Audience: Both Grad & Undergrad

2. Analyze and articulate their own arguments about the social, political, and cultural impacts of law at the societal and individual levels.

Audience: Both Grad & Undergrad

3. Demonstrate knowledge about how legal ideas and ideologies have changed over time and have shaped law and legal systems.

Audience: Both Grad & Undergrad

4. Demonstrate their abilities to find, interpret, and utilize resources relevant to law and society.

Audience: Both Grad & Undergrad

5. Demonstrate their abilities to analyze information, to write clearly and persuasively, and to construct original arguments.

Audience: Both Grad & Undergrad

6. Analyze the causes of and solutions for the sustainability challenge of the conservation of natural resources, especially insofar as their governance involves and impacts local stakeholders.

Audience: Both Grad & Undergrad

7. Analyze the social, economic, legal, political, and environmental dimensions of the sustainability challenge of regulating and governing biodiversity, clean air and water, and other, larger earth systems (such as climate).

Audience: Both Grad & Undergrad

8. Demonstrate an advanced understanding of the historiography or other scholarly debates that have shaped the study of conservation and environmental law.

Audience: Graduate

### **HISTORY/SCAND ST 431 – HISTORY OF SCANDINAVIA TO 1815**

3 credits.

Political, social, economic, and cultural developments of Scandinavia through the "Viking Age" to the break-up of Sweden-Finland and Denmark-Norway; emphasis on the interplay between social and political forces and institutions and the area's relationship with the rest of Europe.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **HISTORY/SCAND ST 432 – HISTORY OF SCANDINAVIA SINCE 1815**

3 credits.

Political, social, economic, and cultural development: political realignments and rise of nationalism, industrialization and rise of liberalism and socialism, democratization, independence struggles and social conflict, evolution of welfare states, World War II and its aftermath.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the significance of major historical events, figures, processes, and periods in the Nordic region since 1815.

Audience: Both Grad & Undergrad

2. Analyze modern and contemporary Scandinavian culture, politics, and society from an informed historical perspective.

Audience: Both Grad & Undergrad

3. Interpret historical information, engage in discussion and debate, and argue persuasively about significant topics in the Nordic history.

Audience: Both Grad & Undergrad

4. Graduate students will be able to do all of the above with reference to a larger amount of academic scholarship and secondary literature written in both English and the Nordic languages.

Audience: Graduate

### **HISTORY 434 – AMERICAN FOREIGN RELATIONS, 1901 TO THE PRESENT**

3-4 credits.

America's relations with the world, emphasizing the economic, political and ideological elements determining policy.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**HISTORY/CHICLA 435 – COLONY, NATION, AND MINORITY: THE PUERTO RICANS' WORLD**

3 credits.

A historical introduction to the Puerto Rican experience, from island to mainland. Varieties of colonial rule, social institutions, cultural processes, and ethnic and national identity. Migration to the U.S. and social dynamics of stateside communities.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify major trends and debates in the historical studies about Puerto Rico and its global diaspora.

Audience: Both Grad & Undergrad

2. Explain how those who have inhabited the Puerto Rican archipelago have resisted and navigated colonialism.

Audience: Both Grad & Undergrad

3. Compare and contrast Spanish and United States colonialism in Puerto Rico.

Audience: Both Grad & Undergrad

4. Analyze the complex realities of Puerto Rican communities in the archipelago and abroad.

Audience: Both Grad & Undergrad

5. Evaluate colonial violence in present-day Puerto Rico

Audience: Both Grad & Undergrad

6. Analyze the history of Puerto Rico through the lens of three key concepts: la brega, coloniality, and nationhood.

Audience: Both Grad & Undergrad

7. Demonstrate advanced written and analytic skills through engagement with course materials.

Audience: Graduate

**HISTORY 450 – MAKING OF MODERN SOUTH ASIA**

3-4 credits.

Everything you ever hear about South Asia is true. But the exact opposite is also true. Tradition and modernity, development and stagnation, the past and the future all exist simultaneously, at times in harmony and at other times in conflict with one another. Through an exploration of the political, social and economic history of this region from the 18th century to the present day, learn about the making of modern South Asia and attempt to understand this paradox.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HISTORY/ASIAN 454 – SAMURAI: HISTORY AND IMAGE**

3-4 credits.

Japanese warriors, their ideals, and their images from the tenth century to the present.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

**HISTORY/ASIAN 456 – PEARL HARBOR & HIROSHIMA: JAPAN, THE US & THE CRISIS IN ASIA**

3-4 credits.

Events leading to the Pearl Harbor attack, the conduct of World War II in the Pacific, the nature of the wartime Japanese state and effects of the war on Japanese society, the dropping of the atomic bombs, and Japan's decision to surrender. The war as an epoch in Japanese history.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**HISTORY/ASIAN 458 – HISTORY OF SOUTHEAST ASIA SINCE 1800**

3-4 credits.

Effects of the modern Western revolution on the established societies of Southeast Asia through colonial rule and economic and cultural change. Not open to students with credit for LCA 458 prior to Fall 2018.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **HISTORY/LEGAL ST 459 – RULE OF LAW: PHILOSOPHICAL AND HISTORICAL MODELS**

3-4 credits.

From the perspectives of history and political theory, examines the multiple meanings of the idea of the rule of law, and its uses in American history. Explore prominent critiques of the rule of law ideal.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **HISTORY/ENVIR ST/GEORG 460 – AMERICAN ENVIRONMENTAL HISTORY**

4 credits.

Survey of interactions among people and natural environments from before European colonization to present. Equal attention to problems of ecological change, human ideas, and uses of nature and history of conservation and environmental public policy.

**Requisites:** Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **HISTORY/ASIAN 463 – TOPICS IN SOUTH ASIAN HISTORY**

3 credits.

Topics vary related to the History of South Asia, Eurasia, and the Indian Ocean.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

### **HISTORY/ENVIR ST 465 – GLOBAL ENVIRONMENTAL HISTORY**

3-4 credits.

Explores the history of human relationships with the environment on a global scale through analysis of long-term changes, from early civilizations, to the beginnings of global trade, the Industrial Revolution, urbanization, and 20th century technological developments. Offers first-hand historiographical research experience and training in writing for public web audiences.

**Requisites:** Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HISTORY/ECON 466 – THE AMERICAN ECONOMY SINCE 1865**

3-4 credits.

Emergence of the large corporation; growth and instability since the mid-nineteenth century; increasing government participation in the economy; the impact of war, depression, discrimination, and international responsibilities.

**Requisites:** ECON 101 or 111

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **HISTORY/LEGAL ST 476 – MEDIEVAL LAW AND SOCIETY**

3 credits.

Introduction to the central historical developments of law and legal institutions in the European middle ages (400-1500).

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2023

### **HISTORY/LEGAL ST 477 – HISTORY OF FORENSIC SCIENCE**

3 credits.

Examines the diverse paths followed by forensic science (including medical jurisprudence or forensic medicine) in various times and places, focusing on the English-speaking world from the nineteenth century until the present. Explore the many ways that law and science have worked together--or at cross-purposes--to generate and assess evidence at the crime scene, in the lab, in the courtroom, and beyond.

**Requisites:** Sophomore standing and (LEGAL ST/HISTORY 261, SOC/LEGAL ST 131, or POLI SCI/LEGAL ST 217), or graduate/professional standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HISTORY/ED POL 478 – COMPARATIVE HISTORY OF CHILDHOOD AND ADOLESCENCE**

3 credits.

Examines the growth of modern childhood and adolescent sub-cultures, class differences, literary and pictorial representations, legal and demographic developments, and the growth of educational theories and institutions.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Demonstrate their knowledge and explain the significance of key actors, events, themes, and ideas related to the history of childhood and adolescence

Audience: Both Grad & Undergrad

2. Interpret and contextualize primary historical sources

Audience: Both Grad & Undergrad

3. Identify and evaluate information from primary and/or secondary sources in order to develop and locate, synthesize, and evaluate information from primary and/or secondary sources in order to develop and support their own evidence-based historical interpretations

Audience: Undergraduate

4. Locate, synthesize, and evaluate primary historical sources in order to construct evidence-based historical interpretations

Audience: Graduate

**HISTORY 500 – READING SEMINAR IN HISTORY**

3 credits.

Advanced exploration of selected topics, featuring small group discussion and intensive engagement with historical materials. Topics vary.

**Requisites:** HISTORY 201 or junior standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HISTORY/HIST SCI/MED HIST 508 – HEALTH, DISEASE AND HEALING II**

3–4 credits.

Medicine in Europe from the 18th century to mid-20th century, investigating changes in disease and demography, state interest in health care, the medical professions, and both scientific and alternative medical ideas.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recognize the utility of humanistic methods for the study of medicine and public health

Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis

Audience: Undergraduate

3. Understand essential developments in the evolving relationship between medicine and public health in modern societies.

Audience: Undergraduate

**HISTORY/LEGAL ST 510 – LEGAL PLURALISM**

3 credits.

Historical and anthropological perspectives on non-state "law," or systems of rules generated by normative orders that lay beyond the state; case studies include the mafia, Tokyo tuna traders' court, orthodox Jewish diamond merchants, California gold miners' courts, Inuit song dueling.

**Requisites:** Sophomore standing and (LEGAL ST/HISTORY 261, SOC/LEGAL ST 131, or POLI SCI/LEGAL ST 217), or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HISTORY/CURRIC/ED POL/JEWISH 515 – HOLOCAUST: HISTORY, MEMORY AND EDUCATION**

3 credits.

Explores the ways in which Holocaust history, memory and education are mutually entangled, politically charged and morally complex. Using primarily American sites of memory, critically analyze a variety of representations of the Shoah--in literature, films, memoirs, monuments, museums and classrooms.

**Requisites:** Junior standing

**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Examine and question cultural assumptions and knowledge claims about race, ethnicity, and religion

Audience: Both Grad & Undergrad

2. Improve written and oral communication skills by engaging in critical conversations, making presentations, practicing group projects and writing papers

Audience: Both Grad & Undergrad

3. Demonstrate self-awareness and empathy to other worldviews and cultural differences and apply course concepts outside of the classroom by engaging in respectful conversations about race, ethnicity, and religion in our multi-cultural society

Audience: Both Grad & Undergrad

4. Construct and develop a meaningful project around a topic that interests you

Audience: Both Grad & Undergrad

5. Articulate answers to and pose complex questions regarding ethical issues, connecting historical events to present circumstances regarding racial inequalities

Audience: Undergraduate

6. Develop your academic writing by thinking carefully through your ideas and editing your work and your peers'

Audience: Undergraduate

7. Pose and answer complex historical and ethical questions regarding the Holocaust, genocide, their representations and political uses, connecting historical events to present circumstances regarding racial inequalities

Audience: Graduate

8. Develop interpersonal academic skills by editing peers' work

Audience: Graduate

### **HISTORY/CLASSICS/RELIG ST 517 – RELIGIONS OF THE ANCIENT MEDITERRANEAN**

3 credits.

Ancient religions in their political, social and cultural contexts; topics include ritual, literary and artistic representations, religious persecutions, and/or modern approaches to the study of ancient religions. Chronological and geographical focus will vary between Greece, Rome, Judaea and Egypt.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate knowledge of ancient Mediterranean religions.

Audience: Undergraduate

### **HISTORY/JEWISH 518 – ANTI-SEMITISM IN EUROPEAN CULTURE, 1700-1945**

3 credits.

A critical review of major theories of anti-Semitism and a history of modern anti-Semitism.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **HISTORY/GEN&WS 519 – SEXUALITY, MODERNITY AND SOCIAL CHANGE**

3 credits.

A history of sexuality approach to a period of major social, economic, and political change in US history, 1880-1930; medical, legal, and popular discourses shaping urbanization, reform, nationalism and colonialism.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

### **HISTORY/JOURN 560 – HISTORY OF U.S. MEDIA**

4 credits.

Evolution of the mass media in the United States in the context of political, social, and economic change.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and explain important people, themes, events, and technologies that shaped media history.

Audience: Both Grad & Undergrad

2. Identify and explain historical arguments in secondary literature.

Audience: Both Grad & Undergrad

3. Analyze primary sources and know what questions to ask to be able to do that.

Audience: Both Grad & Undergrad

4. Produce original historical knowledge through research in primary and secondary sources.

Audience: Both Grad & Undergrad

5. Produce research suitable for submission to an academic journal or history magazine.

Audience: Graduate

### **HISTORY/HIST SCI/MED HIST 564 – DISEASE, MEDICINE AND PUBLIC HEALTH IN THE HISTORY OF LATIN AMERICA AND THE CARIBBEAN**

3 credits.

Examines the history of illness and medical practice in Latin America and the Caribbean from the colonial era until the present. Using an interdisciplinary set of sources, students will explore the different meanings of disease, body normativity, medical practice, and ideas about public health across different historical circumstances in the region.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Identify and analyze within their social, cultural and economic contexts key historical issues, and their significance, in the history of healing practices and public health in Latin America from the fifteenth century to the present.

Audience: Both Grad & Undergrad

2. Develop an understanding of the mutually shaping interactions between perceptions of health, illness and medical practices and culture and society in different Latin American historical scenarios.

Audience: Both Grad & Undergrad

3. Analyze the role of social factors -- race, gender, ethnicity, class, and sexual orientation, among others -- in shaping cultural realities related to body normativity, health, medical practice, public health and medical education in Latin America.

Audience: Both Grad & Undergrad

4. Analyze and synthesize information, provide evidence-based interpretations about the past, and develop arguments regarding social and cultural differences related to health and body concepts in different Latin American societies.

Audience: Both Grad & Undergrad

5. Identify the role patients, healthcare providers, institutions and the state played in modeling medical practice, ideas about the body, public health policies, and medical education in Latin America.

Audience: Both Grad & Undergrad

6. Discern the impact of international politics, acting through European and American programs of medical research and humanitarianism, in the shaping of ideas about race, medical hierarchies and public health policies in Latin American and Caribbean nations.

Audience: Both Grad & Undergrad

7. Understand the different methodological approaches and research strategies that historians, anthropologists, and other scholars have used to examine the histories of the medicine in Latin America from the sixteenth century to the present.

Audience: Graduate

### **HISTORY/SCAND ST 577 – CONTEMPORARY SCANDINAVIA: POLITICS AND HISTORY**

3-4 credits.

Social, economic, and ideological changes, institutions, and movements and their relationships with the political processes and structures in the Nordic states.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### **HISTORY 600 – ADVANCED SEMINAR IN HISTORY**

3 credits.

Development and application of advanced research skills to a specific historical topic. Intensive writing and small group discussion results in a project demonstrating original or creative analysis of primary and secondary sources.

**Requisites:** HISTORY 201 or HIST SCI 211

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **HISTORY 601 – HISTORICAL PUBLISHING PRACTICUM**

3 credits.

Hands-on instruction and experience in historical publishing. Discussion of the nature of historical research and writing.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the varieties of historical publishing (including print journals, research articles, popular articles, blogs, podcasts, websites) and analyze how they are changing.

Audience: Undergraduate

2. Develop skills in publishing and web software

Audience: Undergraduate

3. Critically evaluate and rank scholarly research articles

Audience: Undergraduate

4. Collaborate with an author on editing their manuscript

Audience: Undergraduate

5. Collaborate with an editorial team through a combination of initiative and cooperative means and make decisions collectively

Audience: Undergraduate

6. Develop writing skills in informal or popular history

Audience: Undergraduate

### **HISTORY 607 – THE AMERICAN IMPACT ABROAD: THE HISTORICAL DIMENSION**

3 credits.

Analysis of diplomatic, economic, cultural, and social interaction of Americans with foreign peoples and nations.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HISTORY/ED POL 612 – HISTORY OF STUDENT ACTIVISM FROM THE POPULAR FRONT TO BLACK LIVES MATTER**

3 credits.

Explore the history of student activism in the United States, with an emphasis on the experiences racial/ethnic minority youths who have been marginalized or discriminated against. What motivated students to become politically active, and what forms did their activism take? How did student activism vary across time and space and from one group of activists to another? Why did some students become activists while others did not? What role did education and educational institutions play in their activism? What impact have student activists had, and what do their histories reveal about the capacity and mechanisms for achieving racial equity in particular and for affecting social, political, and economic change more broadly?

**Requisites:** Junior standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop an awareness of History's Impact on the Present

Audience: Both Grad &amp; Undergrad

2. Develop an ability to Recognize and Question Assumptions

Audience: Both Grad &amp; Undergrad

3. Develop consciousness of Self and Other

Audience: Both Grad &amp; Undergrad

4. Develop capacity for Effective Participation in a Multicultural Society

Audience: Both Grad &amp; Undergrad

5. Identify and discuss the significance of key actors, events, themes, and historiographical debates relating to the history of student activism in the modern United States

Audience: Both Grad &amp; Undergrad

6. Identify and evaluate historical arguments in secondary scholarly works

Audience: Both Grad &amp; Undergrad

7. Interpret and contextualize primary historical sources

Audience: Both Grad &amp; Undergrad

8. Synthesize information from primary and secondary sources in order to develop and support their own evidence-based historical interpretations.

Audience: Both Grad &amp; Undergrad

9. Synthesize information from secondary sources in order to develop and support evidence-based historical interpretations and historiographical analyses.

Audience: Graduate

**HISTORY/ED POL 622 – HISTORY OF RADICAL AND EXPERIMENTAL EDUCATION IN THE US AND UK**

3 credits.

Examines the comparative history of radical and experimental education in the United States and United Kingdom since 1800. It focuses on the social, cultural, and intellectual history of diverse educational experiments, including experiments related to socialism, abolitionism, anarchism, and religious fundamentalism.

**Requisites:** Junior standing**Course Designation:** Breadth - Either Humanities or Social Science Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2020**Learning Outcomes:** 1. Demonstrate understanding of the course content: both the broad themes and specific cases we'll study in the history of radical and experimental education in the US and UK.

Audience: Both Grad &amp; Undergrad

2. Demonstrate the ability to think historically: to determine historical significance; to evaluate evidence; to identify continuity and change; to assess cause and consequence; to demonstrate understanding of contextualization and periodization; to take historical perspectives; and to critically assess the moral dimensions of history.

Audience: Both Grad &amp; Undergrad

3. Identify, analyze, and critique historical arguments (as presented by our authors and classmates).

Audience: Both Grad &amp; Undergrad

4. Develop original historical arguments using primary and secondary sources (in class discussion and in our informal and formal writing assignments).

Audience: Graduate

5. Communicate historical knowledge, interpretations, and arguments clearly in writing, discussion, and oral presentations.

Audience: Both Grad &amp; Undergrad

**HISTORY/AFROAMER 628 – HISTORY OF THE CIVIL RIGHTS MOVEMENT IN THE UNITED STATES**

3 credits.

Civil rights history from 1930-1970. Legal, historical and economic origins of the civil rights movement. Study of the movement's impact on United States culture, politics, and international relations.

**Requisites:** Junior standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024

### **HISTORY/ART HIST/JOURN/L I S 650 – HISTORY OF BOOKS AND PRINT CULTURE IN EUROPE AND NORTH AMERICA**

3 credits.

History of books and print culture in the West from ancient times to the present. Focus on the influence of reading and writing on social, cultural, and intellectual life. Methodologies, theories, and sources for study of book and print culture history.

**Requisites:** Graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HISTORY/ED POL 665 – HISTORY OF THE FEDERAL ROLE IN AMERICAN EDUCATION**

3 credits.

Examines the history of federal aid to education from 1776 to the present, with heavy emphasis on the post-World War II period. Explores the federal role in public education in the Early Republic and during Reconstruction; Traces the evolution of federal policies concerning racial desegregation, compensatory education for low-income students, bilingual education, and special education for the disabled. Critically reflect on the tradition of "local control," policy implementation and evaluation, accountability, block grants, interest groups and lobbies; nationally standardized testing, and the different goals assigned to public schooling in the United States (e.g., social integration/inclusion, individual academic achievement, etc.).

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**Learning Outcomes:** 1. Demonstrate an understanding of diverse historical and qualitative social-science theories, epistemologies, and methodologies related to education research.

Audience: Both Grad & Undergrad

2. Develop a researchable question and design an historical or qualitative social-science research project on some aspect of education policy, past or present.

Audience: Both Grad & Undergrad

3. Gain experience conducting a field-based and/or archival research project and presenting their research in a thesis.

Audience: Both Grad & Undergrad

4. Write clearly and compellingly for diverse audiences about complex topics in educational history and policy.

Audience: Both Grad & Undergrad

5. Understand professional standards for conducting scholarship ethically and responsibly.

Audience: Undergraduate

6. Understand professional standards for conducting scholarship ethically and responsibly and conducting historical research related to their specific research inquiry and project.

Audience: Graduate

**HISTORY/SOC 670 – CAPITALISM, SOCIALISM, AND DEMOCRACY IN AMERICA SINCE 1890**

3-4 credits.

Political institutional arrangements which have emerged since 1890 and how they have influenced social and economic policies implemented since the Second World War. Why the working class has been politically weak in America; policy consequences of this weakness.

**Requisites:** Junior standing and (SOC 181, SOC/C&E SOC 140, 210, 211, HISTORY 102 or 109), or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HISTORY 680 – HONORS THESIS COLLOQUIUM**

2 credits.

Colloquium for honors thesis writers. Students must be concurrently enrolled in HISTORY 681 or 682, or HIST SCI 681 or 682, and be declared in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HISTORY 681 – SENIOR HONORS THESIS**

1-3 credits.

Mentored independent research and thesis writing on an original topic for honors. Students must be concurrently enrolled in HISTORY 680 and be declared in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HISTORY 682 – SENIOR HONORS THESIS**

1-3 credits.

Mentored independent research and thesis writing on an original topic for honors. Requires completion of HISTORY 681. Must be concurrently enrolled in HISTORY 680.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HISTORY 690 – THESIS COLLOQUIUM**

2 credits.

Colloquium for thesis writers. Students must be concurrently enrolled in HISTORY 691 or 692.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HISTORY 691 – SENIOR THESIS**

1-3 credits.

Mentored independent research and writing on an original topic. Students must be concurrently enrolled in HISTORY 690.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HISTORY 692 – SENIOR THESIS**

1-3 credits.

Mentored research and writing on an original topic. Requires completion of HISTORY 691. Must be concurrently enrolled in HISTORY 690.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HISTORY 698 – DIRECTED STUDY**

1-4 credits.

Directed study under the supervision of a faculty member. Graded on a Cr/N basis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HISTORY 699 – DIRECTED STUDY**

1-4 credits.

Directed study under the supervision of a faculty member. Graded on a lettered basis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **HISTORY 700 – PROSEMINAR: TRADITIONAL & EARLY MODERN CHINESE INTELLECTUAL HISTORY**

3 credits.

The major problems of historical interpretations in Chinese intellectual history from the classical period to 1840 on the basis of English translations of primary sources and English-language secondary sources. Topics vary.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **HISTORY 701 – HISTORY IN A GLOBAL PERSPECTIVE**

1 credit.

Introduction to the ways of thinking characteristic of historical study and to the questions and methods that motivate the research fields in which department faculty work. Foundational instruction for PhD and History of Science, Medicine, and Technology PhD taken during the first semester of those programs.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **HISTORY 703 – HISTORY AND THEORY**

3 credits.

Explorations of the role of theory in historical research and writing. Content varies.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### **HISTORY 704 – TOPICS IN CONTEMPORARY HISTORY**

3 credits.

Studies two or more nations or defined regions through a comparison of a single theme or set of themes in their history.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

### **HISTORY 705 – TOPICS IN GLOBAL HISTORY**

3 credits.

Examines the significance of a particular historical phenomenon from the perspective of its importance world-wide.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **HISTORY 706 – TOPICS IN TRANSNATIONAL HISTORY**

3 credits.

Examines the significance of a particular event, phenomenon or question across national borders and in terms of the history of nation-state formation.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

### **HISTORY 707 – PROSEMINAR IN EARLY MODERN EUROPEAN HISTORY, 1500-1789**

3 credits.

Readings and/or research on the social, cultural, and political history of France from the late seventeenth century through the French Revolution.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

### **HISTORY 710 – PROFESSIONAL DEVELOPMENT SEMINAR**

3 credits.

Topics in professional development for historians with an emphasis on building skills that are valuable both inside and outside the academy, such as managing the writing process, teaching college history, or communicating historical research to a broad, nonspecialist audience. Content varies.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **HISTORY/AFROAMER/ED POL 712 – EDUCATION AND THE CIVIL RIGHTS MOVEMENT**

3 credits.

Explores the historical relationship between education and the African American freedom struggle from the early twentieth century to the present. Topics include school segregation, desegregation, and resegregation; high school and college student activism; Black Power; civil rights protest strategies and tactics, and the role of the federal government.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**HISTORY/ED POL 713 – HISTORY OF HIGHER EDUCATION IN EUROPE AND AMERICA**

3 credits.

Development of colleges, universities, and higher learning in Europe and America.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Demonstrate an understanding of diverse historical theories, epistemologies, and methodologies related to education research

Audience: Graduate

2. Develop a researchable question and design an historical research project on some aspect of education policy, past or present

Audience: Graduate

3. Gain experience conducting an archival research project and presenting their research in a thesis

Audience: Graduate

4. Write clearly and compellingly for diverse audiences about complex topics in educational history

Audience: Graduate

5. Apply professional standards for conducting scholarship ethically and responsibly

Audience: Graduate

**HISTORY 725 – SEMINAR IN EAST ASIAN HISTORY**

1-3 credits.

Major problems of historical interpretation in the early modern and recent histories of China, Japan, and Korea. Topics and periods of emphasis vary each year.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HISTORY 730 – PROSEMINAR IN LATIN AMERICAN HISTORY**

1-3 credits.

Historical literature of significant topics in Latin American history. The colonial period, Brazilian history, and Spanish-America in the national period.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**HISTORY/LIS 734 – INTRODUCTION TO ARCHIVES AND RECORDS MANAGEMENT**

3 credits.

An introduction to the archives profession and basic theory and practice of archives and records administration, including the uses of primary sources in research, appraisal, access, and preservation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HISTORY 752 – SEMINAR IN TRANSNATIONAL GENDER HISTORY**

3 credits.

Themes in Gender and Women's History within a transnational context.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**HISTORY 753 – SEMINAR-COMPARATIVE WORLD HISTORY**

1-3 credits.

Topics significant for the histories of Latin America, Africa, Islamic core, South Asia and Southeast Asia. A single topic chosen each semester for a series of comparative essays by seminar members.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**HISTORY 755 – PROSEMINAR IN SOUTHEAST ASIAN HISTORY**

1-3 credits.

Introductory seminar in modern Southeast Asian history; work mostly in English-language sources.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## **HISTORY/ANTHRO/ART HIST/DS/LAND ARC 764 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## **HISTORY 790 – PROSEMINAR: EMPIRE AND COLONIALISM IN SOUTH ASIA**

3 credits.

Designed to develop historiographic command of colonial and postcolonial South Asian history as a teaching and research field. Carefully explores the master narratives or "schools" of historiography of South Asia, and analyzes the erasures as well as the normative theoretical and archival axes around which the sub-field has developed. Topics include pre-colonial modes of representing the past; the social, cultural and economic turns in colonial and nationalist historiography; legal and environmental historiographical methods; South Asia in the world/global South Asia.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Acquire a critical understanding of the major debates and scholarly trends in South Asian history.

Audience: Graduate

2. Master several approaches to historiographic analysis.

Audience: Graduate

3. Develop the scholarly apparatus for comparative and critical study of South Asia by writing historiographical essays.

Audience: Graduate

4. Create an undergraduate survey course in South Asian history and develop the tools to guide undergraduate student research on colonial and postcolonial South Asia.

Audience: Graduate

## **HISTORY 800 – RESEARCH SEMINAR IN HISTORY**

3 credits.

Introduction to the life of a professional historian, to different styles and methods of history. Opportunity to present one's findings in a conference-type setting. Structured to support completion of the research paper requirement for the History MA, regardless of specialty.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

## **HISTORY/CLASSICS 801 – SEMINAR-ANCIENT HISTORY**

1-3 credits.

Special problems in Greek and Roman history.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

## **HISTORY/FRENCH/GERMAN/POLI SCI/SOC 804 – INTERDISCIPLINARY WESTERN EUROPEAN AREA STUDIES SEMINAR**

3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## **HISTORY 805 – SEMINAR-MEDIEVAL HISTORY**

1-3 credits.

Topics in Medieval history.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

## **HISTORY/JOURN 808 – MASS COMMUNICATION HISTORY**

3 credits.

Intensive reading and discussion designed to introduce literature of mass communication.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## **HISTORY 845 – SEMINAR-CENTRAL EUROPEAN HISTORY**

1-3 credits.

Modern German history and the history of Central Europe.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**HISTORY 850 – SMR-HIST OF THE SOVIET UNION & MODERN HIST OF E CENTRAL EUROPE**

1-3 credits.

Development of the Soviet Union since 1917 and the political and diplomatic history of the nations lying between Russia and Germany.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**HISTORY 854 – SEMINAR IN MODERN CHINESE HISTORY**

1-3 credits.

Chinese history in the nineteenth and twentieth centuries, with emphasis on intellectual history and the history of Chinese Communism.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**HISTORY 855 – SEMINAR IN JAPANESE HISTORY**

1-3 credits.

Research seminar in Japanese history. Focus varies each year.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**HISTORY/ASIAN 857 – SEMINAR-HISTORY OF INDIA (SOUTH ASIA)**

1-3 credits.

Emphasis upon handling of research problems. Focus upon methods, resources, intellectual approaches, and changing interpretations.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**HISTORY 861 – SEMINAR-THE HISTORY OF AFRICA**

1-3 credits.

Research studies in aspects of African history with emphasis on field research techniques and interpretation of non-archival data.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**HISTORY 868 – SEMINAR IN MODERN FRENCH HISTORY**

1-3 credits.

Social, political, and cultural history of France, 1800 to the present.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**HISTORY 891 – PROSEMINAR IN MODERN EUROPEAN HISTORY**

1-3 credits.

History of Europe since 1500.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**HISTORY 900 – INTRODUCTION TO HISTORY FOR U.S. HISTORIANS**

3 credits.

A survey of U.S. history by period and field with extensive discussion on how to plan a successful career as a historian. Designed to introduce masters and doctoral graduate students in the United States History field of study to the U.S. history faculty members.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HISTORY 901 – STUDIES IN AMERICAN HISTORY**

1-3 credits.

Reading seminar in American history. Topics and periods of emphasis vary.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **HISTORY/ED POL 903 – HISTORY OF EDUCATION OF MULTICULTURAL AMERICA**

3 credits.

Selected topics, issues and themes concerning the history of education of various groups of people of color in the United States, as well as selected issues, topics and themes focusing on immigration and ethnicity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Identify and discuss the significance of key actors, events, themes, and historiographical debates relating to the history of education in multicultural America

Audience: Graduate

2. Identify, analyze, and evaluate historical arguments in secondary scholarly works

Audience: Graduate

3. Interpret and contextualize primary historical sources

Audience: Graduate

4. Locate synthesize, and evaluate information from secondary sources and/or primary sources in order to develop and support evidence-based historical and historiographical interpretations

Audience: Graduate

### **HISTORY/ED POL 906 – PROSEMINAR ON THE HISTORY OF EDUCATION**

3 credits.

Reading in European or American educational history.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate an understanding of diverse historical theories, epistemologies, and methodologies relevant to historical research.

Audience: Graduate

2. Develop a researchable question and design a project on some aspect of the history of childhood/adolescence.

Audience: Graduate

3. Gain experience using primary and secondary sources in historical research.

Audience: Graduate

4. Write clearly and compellingly for diverse audiences.

Audience: Graduate

5. Demonstrate understanding of professional standards for conducting scholarship ethically and responsibly.

Audience: Graduate

### **HISTORY/ED POL 907 – SEMINAR-HISTORY OF EDUCATION**

1-3 credits.

Studies in European and American educational history.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Identify and discuss the significance of key actors, events, themes, and historiographical debates pertaining to the history of education

Audience: Graduate

2. Identify, analyze, and evaluate historical arguments in secondary scholarly works

Audience: Graduate

3. Interpret and contextualize primary historical sources

Audience: Graduate

4. Locate, synthesize, and evaluate information from primary and secondary sources in order to develop and support evidence-based historical and historiographical interpretations

Audience: Graduate

### **HISTORY 910 – HISTORY OF COLONIAL NORTH AMERICA**

3 credits.

The history of North America from the fifteenth through eighteenth centuries, with the primary focus on Anglo-America.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **HISTORY 936 – THE HISTORY OF WOMEN AND GENDER IN THE U.S., TO 1870**

3 credits.

Surveys key theoretical work and secondary literature on the history of women and gender in the United States to 1870.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **HISTORY/GEN&WS 938 – HISTORY OF SEXUALITY**

3 credits.

Using sexuality as a category of historical analysis, examines historiographical, methodological, and theoretical contributions to understanding all aspects of the past.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **HISTORY 940 – SEMINAR-AMERICAN HISTORY 1900-1945**

3 credits.

Readings and research on United States History, 1900-1945.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HISTORY 943 – RACE & NATIONALISM: COMPARATIVE & THEORETICAL PERSPECTIVES**

3 credits.

Historical intersections of race and nationalisms. Explores questions of the origin of race and nationalisms, the position and status of a variety of nationalisms and anti-colonial nationalisms; and the contemporary debates over postmodernism, postindustrialism, postcolonialism, and multiculturalism.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HISTORY 951 – SEMINAR-INTELLECTUAL HISTORY OF AMERICA**

1-3 credits.

Readings on the intellectual history of the United States/North America.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **HISTORY 952 – SEMINAR IN COMPARATIVE HISTORY**

2-3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HISTORY 958 – SEMINAR-AMERICAN MILITARY HISTORY**

1-3 credits.

Readings on U.S. military history.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **HISTORY/A A E/ANTHRO/C&E SOC/GEOG/LACIS/POLI SCI/PORTUG/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA**

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**HISTORY/AFRICAN/ANTHRO/ECON/GEOG/POLI SCI 983 –  
INTERDEPARTMENTAL SEMINAR IN AFRICAN STUDIES TOPICS**  
3 credits.

Interdisciplinary inquiry in African societies and cultures.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop in-depth knowledge in a sub-field of specialization within African studies

Audience: Graduate

2. Acquire and demonstrate understanding of major theories, approaches, concepts, currently informing African studies

Audience: Graduate

3. Understand your process of learning and possess the capacity to intentionally seek, evaluate, and learn from information, and to recognize and reduce bias in thinking.

Audience: Graduate

4. Gain firm knowledge of existing research in African studies

Audience: Graduate

5. Develop and improve speaking, readings, listening, and writing skills

Audience: Graduate

6. Write and speak across disciplinary boundaries

Audience: Graduate

7. Analyze texts from various theoretical and critical perspectives

Audience: Graduate

**HISTORY 990 – RESEARCH AND THESIS**

1-9 credits.

Independent research and writing of a thesis under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**HISTORY 999 – INDEPENDENT WORK**

1-6 credits.

Directed study under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## HISTORY OF SCIENCE (HIST SCI)

**HIST SCI/ENVIR ST/HISTORY 125 – GREEN SCREEN:  
ENVIRONMENTAL PERSPECTIVES THROUGH FILM**

3 credits.

From Teddy Roosevelt's 1909 African safari to the Hollywood blockbuster King Kong, from the world of Walt Disney to The March of the Penguins, cinema has been a powerful force in shaping public and scientific understanding of nature throughout the twentieth and twenty-first century. How can film shed light on changing environmental ideas and beliefs in American thought, politics, and culture? And how can we come to see and appreciate contested issues of race, class, and gender in nature on screen? Explore such questions and come to understand the role of film in helping to define the contours of past, present, and future environmental visions in the United States, and their impact on the real world struggles of people and wildlife throughout the world.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HIST SCI/HISTORY/MED HIST 132 – BEES, TREES, GERMS, AND  
GENES: A HISTORY OF BIOLOGY**

3 credits.

How did today's biology emerge out of the diverse traditions of agriculture and natural history (bees and trees), biomedicine and molecular biology (germs and genes), which stretch back into the eighteenth century? Examines classic texts and "game-changers" in the history of biology, putting them into broader scientific and social contexts to see how these different ways of knowing intertwined, competed, and yielded novel approaches to the study of life that still shape today's life sciences.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**HIST SCI 133 – BIOLOGY AND SOCIETY, 1950 – TODAY**

3 credits.

From medical advancements to environmental crises and global food shortages, the life sciences are implicated in some of the most pressing social issues of our time. Explores events in the history of biology from the mid-twentieth century to today, and examines how developments in this science have shaped and are shaped by society. Investigates the origins of the institutions, technologies, and styles of practice that characterize contemporary biology, such as the use of mice as "model organisms" for understanding human diseases. Examines biological controversies such as the introduction of genetically modified plants into the food supply. Explores how biological facts and theories have been and continue to be used as a source for understanding ourselves.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Develop an appreciation for the ways in which the institutions, practices, and ways of thinking associated with contemporary biology are specific to a particular place and time, and have changed over time

Audience: Undergraduate

2. Identify and state the significance of key people and events in the recent history of biology

Audience: Undergraduate

3. Understand key theoretical frameworks for describing interactions between biology and society, and be able to apply these frameworks to new empirical cases

Audience: Undergraduate

4. Identify and evaluate the strength of the arguments and evidence used in an academic paper

Audience: Undergraduate

5. Extrapolate complex arguments to new contexts and assess how new information would change the argument

Audience: Undergraduate

**HIST SCI 150 – THE DIGITAL AGE**

3 credits.

An introduction to the history of the computer from the 1940s to the present day, major developments in computer science and technology in their historical contexts, and recent trends in computing and society. We learn about machines, but emphasize the study of people: the institutions, scientists, workers, and social movements that invented, facilitated, and transformed digital technology in the 20th and early 21st century.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify key technological developments, periods, and themes in the history of computing

Audience: Undergraduate

2. Analyze primary cultural and technical sources from the history of technology in the 20th century

Audience: Undergraduate

3. Engage ongoing developments in computer science and digital technology with historical and critical perspective

Audience: Undergraduate

4. Write and speak conscientiously about digital technology's effects in society

Audience: Undergraduate

5. Recognize factors that contribute to technological change

Audience: Undergraduate

### HIST SCI 160 – ENGINEERING INEQUALITY: TECHNOLOGY AND INEQUITY THROUGHOUT HISTORY

3-4 credits.

Offers an introduction to the history of technology centered around the relationship between technology and various forms of social inequality. Addresses: 1) how gendered, racial, and class-based disparities have shaped the history of technology; 2) how forms of engineered inequity have intersected with state-building, colonial projects, environmental degradation, and revolutionary programs; 3) how technology has been implicated in attempts to imagine a more just society. Introduces central themes and concepts in the histories of science, medicine, and especially technology. Examines case-studies that are transnational in scope and move chronologically from the 17th century to the present. Also gives significant attention to histories of technology that originated outside of the U.S. and Europe.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Identify and summarize key concepts in the history of technology

Audience: Undergraduate

2. Utilize historical methods and techniques and apply these to analyze primary sources including print media, visual art, film, web-based content, and technical materials

Audience: Undergraduate

3. Apply concepts from the history of technology to relevant present-day issues in engineering and technology policy

Audience: Undergraduate

4. Produce original arguments that demonstrate critical thinking skills and draw on course concepts, arguments specifically about the role of technology—as a collection of material, social, and political practices—and technological change in the contemporary world

Audience: Undergraduate

### HIST SCI/HISTORY 171 – HISTORY OF MEDICINE IN FILM

3-4 credits.

Considers the social and cultural history of 20th and early 21st century American medicine through the depiction of health care practitioners and health care systems in Hollywood movies. View films that featured medicine, doctors, nurses, patients, and hospitals. Using these films as primary sources, seek to place these representations into a broader social and cultural context. Evaluate the extent to which popular understandings of medicine, health, and healing as portrayed in the films corresponded to actual practices of medicine and medical research at the time the films were first screened for mass audiences.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Identify key developments, actors, ideas, and institutions in the broad history of American medicine in the 20th century.

Audience: Undergraduate

2. Speak and write critically about primary and secondary historical sources by examining diverse interpretations of past events and ideas in their historical contexts.

Audience: Undergraduate

3. Ask analytic questions about the ways in which films express both cultural ideals and cultural anxieties about medicine within the constraints of "literary" genres: drama, horror, comedy, romance, tragedy and thriller.

Audience: Undergraduate

4. Understand that, in addition to the deliberate choices of plot-lines, locations and character development, films reveal a great deal about what was taken for granted at the time of each film's production: gender and race relations, physicians' paternalism and patients' autonomy, medical technology and expectations for care and cure; ethical and professional norms for medical research and decision making in patient care.

Audience: Undergraduate

### HIST SCI 201 – THE ORIGINS OF SCIENTIFIC THOUGHT

3 credits.

Emergence of scientific method and scientific modes of thought out of ancient philosophical and religious traditions; the impact of ancient science on medieval Christendom; the origins and development of the Copernican-Newtonian world view.

**Requisites:** Not open to students with credit for ILS 201 or HIST SCI/HISTORY 323

**Course Designation:** Breadth – Humanities Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HIST SCI 202 – THE MAKING OF MODERN SCIENCE**

3 credits.

Major trends and developments in the sciences from the 17th century to the early 20th century. Emphasis on those with broad cultural and social implications.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HIST SCI/ASTRON 206 – HISTORY OF ASTRONOMY AND COSMOLOGY**

3 credits.

The development of astronomical knowledge and cosmological views from the earliest times to the present, viewed in their social, philosophical, and technological contexts.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Discuss the history of modern astronomy, with an emphasis on tracing how our current conception of the universe has developed.

Audience: Undergraduate

2. Describe the ancient background to western European astronomy, the role of astronomy in the scientific revolution of the 16th and 17th centuries, the development of modern astrophysics, and Wisconsin's contributions to modern astronomy.

Audience: Undergraduate

3. Engage actively and critically with primary historical sources, including Galileo's *Siderius Nuncius*, through reading, writing, discussion, and examination of rare books.

Audience: Undergraduate

4. Evaluate historical subjects and works in their own contexts while also appreciating their significance for our own world view.

Audience: Undergraduate

5. Demonstrate some familiarity with astronomical instruments, observatories, and technologies through actual use, visits, and class demonstrations.

Audience: Undergraduate

**HIST SCI 211 – THE HISTORIAN'S CRAFT: SCIENCE, MEDICINE, AND TECHNOLOGY**

3-4 credits.

Conduct original historical research in the fields of history of science, medicine, or technology and convey the results to others. Become historical detectives through engagement with archival materials and disciplinary methodologies in the histories of science, medicine and technology; practice defining important historical questions, collecting and analyzing evidence, presenting original conclusions, and contributing to ongoing discussions. Confer individually with and receive feedback from instructors to improve skills of historical analysis and communication in written and other formats. May not be repeated for credit.

**Requisites:** Satisfied Communications A requirement. Not open to students with credit for HISTORY 201

**Course Designation:** Gen Ed – Communication Part B

Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Ask Questions: develop the habit of asking questions, including questions that may generate new directions for historical research.

Audience: Undergraduate

2. Find Sources: learn the logic of footnotes, bibliographies, search engines, libraries, and archives, and consult them to identify and locate source materials.

Audience: Undergraduate

3. Evaluate Sources: determine the perspective, credibility, and utility of source materials.

Audience: Undergraduate

4. Develop and Present an Argument: use sources appropriately to create, modify, and support tentative conclusions and new questions.

Audience: Undergraduate

5. Plan Further Research: draw upon preliminary research to develop a plan for further investigation.

Audience: Undergraduate

6. Communicate Findings Effectively: make formal and informal, written and oral presentations tailored to specific audiences.

Audience: Undergraduate

### **HIST SCI/MED HIST 212 – BODIES, DISEASES, AND HEALERS: AN INTRODUCTION TO THE HISTORY OF MEDICINE**

3 credits.

A survey of different conceptions of how the body as a site of sickness has been understood from Antiquity to contemporary medicine. Includes consideration of the origins and evolution of public health, the changing social role of healers, and the emergence of the modern "standardized" body in health and illness.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **HIST SCI/ENVIR ST 213 – GLOBAL ENVIRONMENTAL HEALTH: AN INTERDISCIPLINARY INTRODUCTION**

3 credits.

Provides an introduction to the intersections of health and environment on a global scale. Exposes students to a range of problems in global environmental health, including climate change, disease ecology, and the globalization of disease.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the utility of humanistic methods for the study of global environmental health

Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis

Audience: Undergraduate

3. Understand essential developments in the evolving relationship between the environment and public health on a global scale.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of global health issues in developing and industrialized countries

Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of climate change, agriculture, and the built environment and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

### **HIST SCI 218 – HISTORY OF TWENTIETH CENTURY AMERICAN MEDICINE**

3 credits.

Introduction to the development of the modern American medical care system.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the social, cultural, and political factors that have shaped the health care system and health institutions in 20th century America.

Audience: Undergraduate

2. Analyze the changing interactions of patients, physicians, nurses, and other health care personnel over the last century.

Audience: Undergraduate

3. Describe how the experience of illness was transformed in the 20th century, and the changing role of technologies, pharmaceuticals, and medical research.

Audience: Undergraduate

4. Understand the ways in which assumptions about race, gender, and socio-economic factors affect the experience of illness and health outcomes over the long twentieth century.

Audience: Undergraduate

### **HIST SCI 222 – TECHNOLOGY AND SOCIAL CHANGE IN HISTORY** 3 credits.

Topics in the history of technology. Themes include the social basis of technical change, the impact of technology on everyday life, and ethical issues in technology in the last four centuries.

**Requisites:** Sophomore standing or 3 credits in HISTORY or HIST SCI

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Identify and summarize key concepts in the history of technology

Audience: Undergraduate

2. Utilize historical methods and techniques and apply these to analyze primary sources including print media, visual art, film, web-based content, and technical materials

Audience: Undergraduate

3. Apply concepts from the history of technology to relevant present-day issues in engineering and technology policy

Audience: Undergraduate

4. Produce original arguments that demonstrate critical thinking skills and draw on course concepts, arguments specifically about the role of technology—as a collection of material, social, and political practices—and technological change in the contemporary world

Audience: Undergraduate

### **HIST SCI 250 – SPECIAL TOPICS IN HISTORY OF SCIENCE (INTRODUCTORY)** 3 credits.

Special topics in the history of science, medicine, and technology.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

### **HIST SCI/AFROAMER 275 – SCIENCE, MEDICINE, AND RACE: A HISTORY** 3-4 credits.

Surveys the medical and scientific constructions of categories of race, placing the development of racial theories in a broad social and political context. Pays particular attention to the importance of racial science in slavery and colonialism.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and analyze within their social, cultural and economic contexts key historical issues, and their significance, in the history of the idea of race as it relates to scientific and medical developments.

Audience: Undergraduate

2. Develop an understanding of the mutually shaping interactions between ideas about race and perceptions of social hierarchy, health, illness and medical and anthropological categories.

Audience: Undergraduate

3. Analyze the role of social factors like gender and class, among others, in shaping cultural realities related to race and body normativity.

Audience: Undergraduate

4. Identify the role that scientists, physicians, patients, healthcare providers, scientific institutions and the state play in modeling, ideas about race.

Audience: Undergraduate

5. Discern the impact of programs of global science as they intersect with international politics in the shaping of ideas about human rights, ethnicity, and race.

Audience: Undergraduate

### **HIST SCI 280 – HONORS SEMINAR: STUDIES IN SCIENCE, TECHNOLOGY, MEDICINE** 3 credits.

Intensive exploration of issues in the history of science. Emphasis on developing critical thinking about science through formal and informal writing.

**Requisites:** Satisfied Communications A requirement and declared in an Honors program

**Course Designation:** Gen Ed - Communication Part B

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **HIST SCI 286 – HONORS SEMINAR: STUDIES IN SCIENCE, TECHNOLOGY, MEDICINE**

3 credits.

Intensive exploration of issues in the history of science. Emphasis on developing critical thinking about science through discussion of readings and written exercises.

**Requisites:** Declared in an Honors program

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

### **HIST SCI/AGROECOL 301 – (HORTI)CULTURAL ROOTS: HUMAN HISTORIES OF PLANTS AND SCIENCE**

4 credits.

Dig into the history of plant sciences to understand why plants and humans have the relationships they do today. Focus on the experiences of Indigenous Americans and People of Color to understand the roots of inequities in horticulture, agriculture, and other plant sciences. Practice skills as a translator of science and history through engagement with scientific publications, library resources, and archival materials. Define important societal questions, collect and analyze evidence, present original conclusions, and contribute to ongoing discussions about the relationship of people and plants.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed - Communication Part B

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Compare and contrast plant-human systems in multiple historical contexts with an emphasis on the impact of racism

Audience: Undergraduate

2. Produce written and spoken work that incorporates critical reading, logical thinking, and use of evidence that is appropriate to the plant sciences

Audience: Undergraduate

3. Recognize ethnic, racial, and religious minorities' historical and ongoing marginalization in horticulture, agriculture, botany, and other plant-related disciplines

Audience: Undergraduate

4. Effectively participate in a multicultural society through written and spoken contributions to ongoing discussions

Audience: Undergraduate

5. Translate current research into a written and spoken format that is relevant and understandable to a public audience and scholars in other disciplines

Audience: Undergraduate

6. Apply core library resources to research and communication about human-plant systems

Audience: Undergraduate

**HIST SCI/ECON 305 – DEVELOPMENT OF ECONOMIC THOUGHT**

3–4 credits.

Development of economic thought from the middle ages to the present; emphasis on major schools of thought including Classical, Marxian, Neo-Classical, and Keynesian schools.

**Requisites:** (ECON 101 and 102) or (ECON 102 and A A E 101 or 215 prior to Fall 2024) or ECON 111

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**HIST SCI/HISTORY 323 – THE SCIENTIFIC REVOLUTION: FROM COPERNICUS TO NEWTON**

3 credits.

An introduction to the formative period of modern science, including major ideas and events in the physical and life sciences from Copernicus to Newton.

**Requisites:** Junior standing or (graduate/professional standing and concurrent enrollment in HIST SCI 623)

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HIST SCI/MED HIST/RELIG ST 331 – SCIENCE, MEDICINE AND RELIGION**

3 credits.

Introduction to the study of religion, science, and medicine. Focus on how religion, science, and medicine have shaped practices of knowledge production and meaning making with respect to human life, by considering theories of human history and racial progress; how logics of contagion structure human relationships and communal boundaries; the variety of ways of understanding and caring for bodies; and the place of humans within broader ecologies.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. read and interpret critically primary and secondary source texts about religion, science, and medicine

Audience: Both Grad & Undergrad

2. access and utilize a variety of resources and methods for critical inquiry and research in religious studies, history of science and medicine, and science and religion

Audience: Both Grad & Undergrad

3. categorize, analyze, and compare core concepts in religious studies, the history of science and medicine, and science and religion, such as the conflict thesis; knowledge production; creation/evolution; eugenics; race; gender; embodiment; care; health/healing; capitalism; and progress narratives

Audience: Both Grad & Undergrad

4. identify, evaluate, and interpret the interrelationships and impact of religious and scientific worldviews as related to health, bodies and communities

Audience: Both Grad & Undergrad

5. perform textual analysis, primary source research and synthesis of scholarly ideas, in persuasive writing, oral communication, active listening, and with critical empathy

Audience: Both Grad & Undergrad

6. create conversations about complex topics that seek academic excellence, honesty, and integrity

Audience: Both Grad & Undergrad

7. engage with the academic literature on religion, science, and medicine that is pertinent to the student's specific research area and apply it to facilitate original primary source analysis

Audience: Graduate

**HIST SCI 343 – THE DARWINIAN REVOLUTION**

3 credits.

Scientific, social, religious and related dimensions of the evolution hypothesis from predarwinian speculation and Darwin's own work to later support, criticism and continuing investigation. Coverage reaches into the twentieth century.

**Requisites:** Junior standing**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2020**HIST SCI 350 – SPECIAL TOPICS IN THE HISTORY OF SCIENCE**

2-3 credits.

Readings/discussion of varying topics in History of Science, Medicine, and Technology.

**Requisites:** Sophomore standing or 3 credits in HIST SCI**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**HIST SCI 360 – HEALTH INEQUALITIES IN THE LONG 20TH CENTURY**

3 credits.

Analyze historical factors impacting healthcare cost, access, and services with focus on social determinants of health in the United States across the long 20th century. Evaluate current state of the field through literature reviews and conversations with guest lecturers. Apply historical analysis in consideration of current disparities in health resources. Produce original research project and policy proposal at intersection of public health, medical history, and health law and policy.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Analyze changing concepts, measurements, and markers of health across time and place.

Audience: Undergraduate

2. Understand contemporary challenges in addressing healthcare disparities drawing upon historical context and the development of research norms and practices in the field.

Audience: Undergraduate

3. Articulate informed, well-researched arguments, and situate within the context of the field.

Audience: Undergraduate

4. Conduct and present original research, analyze and synthesize findings to others.

Audience: Undergraduate

**HIST SCI/S&A PHM 401 – HISTORY OF PHARMACY**

2 credits.

Pharmaceutical field, from antiquity to modern medical care; professional; structuring in principal countries of the West.

**Requisites:** Junior standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Outline the key theoretical issues in the history of medicine and pharmacy

Audience: Undergraduate

2. Explain the relationship, using models of change, between medicines, pharmacy practice, and society

Audience: Undergraduate

3. Assess critically the historiographies of the history of medicine and pharmacy

Audience: Undergraduate

4. Evaluate the reputations of pharmacy practices, organizations, and key actors

Audience: Undergraduate

5. Communicate effectively conclusions regarding the history of medicines and pharmacy

Audience: Undergraduate

6. Apply historical understandings to contemporary issues regarding pharmacy, drug regulation, and political conflicts

Audience: Undergraduate

**HIST SCI 404 – A HISTORY OF DISEASE**

3–4 credits.

What is disease? Who decides? What are the consequences of labeling a behavior a disease? Can disease be a tool of liberation? Can disease be an instrument of oppression? How do race, class, and gender affect our understandings of and experiences with illness? How have diseases shaped American history? Illustrates the various ways disease operates in America and examines the role of disease on at least four levels--political, social, cultural, and personal--to demonstrate that diseases are not merely bodily afflictions; they are also participants in the body politic. Each disease covered is chosen to illustrate a different point about the social and cultural lives of disease in the history of the United States. Though diseases are covered in a chronological fashion, this coverage is not meant as a narrative history of disease.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recognize how diseases and responses to diseases have shaped elements of American society and analyze the claim that disease is socially constructed

Audience: Undergraduate

2. Discover and analyze how politics and diseases have intersected in American history

Audience: Undergraduate

3. Describe and analyze how patients have shaped the medical responses, personal reactions and social meanings of disease

Audience: Undergraduate

4. Recognize and describe how race, class, and gender have influenced the experience, meaning, and understanding of disease

Audience: Undergraduate

5. Develop research skills to perform primary source historical research and analyze primary sources to develop a historical argument

Audience: Undergraduate

6. Recognize and describe general trends in the history and the historiography of disease

Audience: Graduate

7. Write a book review suitable for publication in historical journals

Audience: Graduate

8. Identify and analyze historical arguments in historical monographs

Audience: Graduate

9. Sharpen historical research skills and deepen analysis of primary sources in the service of an argument

Audience: Graduate

**HIST SCI/MATH 473 – HISTORY OF MATHEMATICS**

3 credits.

An historical survey of the main lines of mathematical development.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Either Humanities or Natural Science  
Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recall and state the formal definitions of the mathematical objects and their properties used in various mathematical topics throughout history (e.g., content from number theory, analysis, algebra, etc.).

Audience: Undergraduate

2. Use such definitions to argue that a mathematical object does or does not have the condition of being a particular type or having a particular property in the context of these topics.

Audience: Undergraduate

3. Recall and state the standard theorems from these topics, and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Undergraduate

4. Prove or disprove statements related to the above definitions, properties, and theorems using techniques of mathematical argument (direct methods, indirect methods, constructing examples and counterexamples, induction, etc.).

Audience: Undergraduate

5. Convey arguments in oral and written forms using English and appropriate mathematical terminology, notation, and grammar.

Audience: Undergraduate

6. Explain mathematical ideas and describe their historical contexts.

Audience: Undergraduate

### **HIST SCI/HISTORY/MED HIST 508 – HEALTH, DISEASE AND HEALING II**

3-4 credits.

Medicine in Europe from the 18th century to mid-20th century, investigating changes in disease and demography, state interest in health care, the medical professions, and both scientific and alternative medical ideas.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recognize the utility of humanistic methods for the study of medicine and public health

Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis

Audience: Undergraduate

3. Understand essential developments in the evolving relationship between medicine and public health in modern societies.

Audience: Undergraduate

### **HIST SCI/MED HIST 509 – THE DEVELOPMENT OF PUBLIC HEALTH IN AMERICA**

3 credits.

Health problems in the U.S. from the colonial period to the twentieth century; efforts made toward their solutions.

**Requisites:** Junior standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify major historical trends in the history of public health in the United States.

Audience: Undergraduate

2. Understand the tensions between individual rights and population health as they have played out in the past.

Audience: Undergraduate

3. Analyze the social, political, and cultural factors that have influenced societal responses to epidemics and pandemics in American history.

Audience: Undergraduate

4. Develop critical thinking skills by engaging with both primary sources and secondary texts to understand how historians have written the history of public health.

Audience: Undergraduate

5. Evaluate the ways in which understanding the past history of public health can shape policy making in the present.

Audience: Undergraduate

### **HIST SCI/GEOSCI 514 – HISTORY OF GEOLOGIC THOUGHT**

3 credits.

Major concepts from earliest to modern times.

**Requisites:** GEOSCI 204 or graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HIST SCI/AFROAMER/MED HIST 523 – RACE, AMERICAN MEDICINE AND PUBLIC HEALTH**

3 credits.

Provides historical perspectives on current dilemmas facing black patients and health care professionals.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key developments, actors, ideas, and institutions in the broad history of race, medicine and public health in America between 1700 and 2000.

Audience: Both Grad & Undergrad

2. Analyze and write critically about primary and secondary historical sources by examining diverse interpretations of past events and ideas in their historical contexts.

Audience: Both Grad & Undergrad

3. Evaluate the ways in which ideas about race and assumptions about the meaning of racial difference influenced the care patients of color received and how they experienced their illnesses and injuries.

Audience: Both Grad & Undergrad

4. Understand how conceptions of race profoundly influenced the medical and nursing professions, as well as medical institutions (dispensaries, hospitals, and blood donation centers).

Audience: Both Grad & Undergrad

5. Evaluate the different methodological approaches historians have used to analyze the multiple histories of race, medicine, and public health in the United States in the last two centuries.

Audience: Graduate

**HIST SCI/ENGL/MED HIST 525 – HEALTH AND THE HUMANITIES**

3 credits.

Explores how a humanistic perspective can broaden our understanding of health and medicine. Specifically, we will examine the role of language and culture in the creation and circulation of biomedical knowledge; our lived experiences with illness (physical and mental); the intricate intersections of race, gender, sexuality, disability and medicine; the political dimensions of diagnosis, disease, and epidemics, and the role that fiction, creative non-fiction, comics, and film play in shaping our experiences with health and medicine as health care providers and as patients. The course does not assume any background in science or medicine. One of our recurrent topics, in fact, will be to consider how non-experts interact with medicine and its technical vocabularies. Although the primary objective of the course is to understand the cultural, social, and political dimensions of health and medicine, a secondary objective is for students to become more savvy patients and, for the few students who might emerge on the other side of the stethoscope one day, more well rounded health care professionals.

**Requisites:** Declared in the Health and the Humanities certificate

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**HIST SCI/GEN&WS/MED HIST 531 – WOMEN AND HEALTH IN AMERICAN HISTORY**

3 credits.

Women as patients and as health professionals in America from the colonial period to the present.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**HIST SCI/GEN&WS/MED HIST 532 – THE HISTORY OF THE (AMERICAN) BODY**

3 credits.

This course demonstrates that human bodies have social and cultural histories. It will highlight the social values placed on different bodies, the changing social expectations bodies create, and the role of science and medicine in creating the cultural meanings of bodies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**HIST SCI/GEN&WS 537 – CHILDBIRTH IN THE UNITED STATES**

3 credits.

Using a reproductive justice framework, analyze contexts, experiences, practices, ideologies, and historiographies of childbirth in the United States from roughly the 17th century to the present, with the heaviest emphasis on the 20th and 21st century. Examines the ways that colonization, genocide, enslavement, racism, capitalism, heterosexism, patriarchy, and ableism have shaped all of these aspects of childbirth. Inquire how key movements and groups resisting some of these forms of oppression have had the power to reshape birth, as well as locating in birth a source of transformational power.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**HIST SCI/MED HIST/POP HLTH 553 – INTERNATIONAL HEALTH AND GLOBAL SOCIETY**

3 credits.

Major problems in international health from 1750 to the present. Focus on disease epidemiology and ecology; political economy of health; migration; quarantine; race, ethnicity, and health care; international health research; cross-cultural healing; mental and maternal health; growth of international health organizations.

**Requisites:** Junior standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2021**Learning Outcomes:** 1. Recognize the utility of humanistic methods for the study of modern international health

Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis

Audience: Undergraduate

3. Understand essential developments in the evolving relationship between global history, politics, and public health on a global scale.

Audience: Undergraduate

**HIST SCI 555 – UNDERGRADUATE SEMINAR IN HISTORY OF SCIENCE**

3 credits.

Advanced research in History of Science.

**Requisites:** HISTORY 201 or 3 Credits in HIST SCI**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2021**HIST SCI/HISTORY/MED HIST 564 – DISEASE, MEDICINE AND PUBLIC HEALTH IN THE HISTORY OF LATIN AMERICA AND THE CARIBBEAN**

3 credits.

Examines the history of illness and medical practice in Latin America and the Caribbean from the colonial era until the present. Using an interdisciplinary set of sources, students will explore the different meanings of disease, body normativity, medical practice, and ideas about public health across different historical circumstances in the region.

**Requisites:** Junior standing**Course Designation:** Breadth – Either Humanities or Social Science  
Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2019**Learning Outcomes:** 1. Identify and analyze within their social, cultural and economic contexts key historical issues, and their significance, in the history of healing practices and public health in Latin America from the fifteenth century to the present.

Audience: Both Grad &amp; Undergrad

2. Develop an understanding of the mutually shaping interactions between perceptions of health, illness and medical practices and culture and society in different Latin American historical scenarios.

Audience: Both Grad &amp; Undergrad

3. Analyze the role of social factors -- race, gender, ethnicity, class, and sexual orientation, among others -- in shaping cultural realities related to body normativity, health, medical practice, public health and medical education in Latin America.

Audience: Both Grad &amp; Undergrad

4. Analyze and synthesize information, provide evidence-based interpretations about the past, and develop arguments regarding social and cultural differences related to health and body concepts in different Latin American societies.

Audience: Both Grad &amp; Undergrad

5. Identify the role patients, healthcare providers, institutions and the state played in modeling medical practice, ideas about the body, public health policies, and medical education in Latin America.

Audience: Both Grad &amp; Undergrad

6. Discern the impact of international politics, acting through European and American programs of medical research and humanitarianism, in the shaping of ideas about race, medical hierarchies and public health policies in Latin American and Caribbean nations.

Audience: Both Grad &amp; Undergrad

7. Understand the different methodological approaches and research strategies that historians, anthropologists, and other scholars have used to examine the histories of the medicine in Latin America from the sixteenth century to the present.

Audience: Graduate

**HIST SCI/ENGL/MED HIST 599 – DIRECTED STUDY IN HEALTH AND THE HUMANITIES**

1 credit.

Offers students enrolled in the Health and the Humanities certificate an opportunity to conduct independent research under the guidance of a faculty member. It allows students who have enrolled in or completed a Health and the Humanities Capstone an opportunity to go into greater depth on a topic covered in the capstone course. In consultation with a faculty member, students will design a project that builds on lessons learned or work completed as part of their capstone experience.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2020**Learning Outcomes:** 1. Design scholarly research questions based on their knowledge of the existing literature

Audience: Undergraduate

2. Conduct original primary research by identifying, accessing, and interpreting appropriate sources

Audience: Undergraduate

3. Effectively convey the results of their research through writing or other creative media

Audience: Undergraduate

4. Work independently and manage a large project through to completion

Audience: Undergraduate

**HIST SCI 623 – STUDIES IN EARLY MODERN SCIENCE**

1 credit.

Advanced readings in primary and secondary literature of the history of the 16th-17th century European science, with emphasis on current historiographic issues.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**HIST SCI 681 – SENIOR HONORS THESIS**

3 credits.

Honors thesis on topics in History of Science, Medicine, and Technology.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**HIST SCI 682 – SENIOR HONORS THESIS**

3 credits.

Honors thesis on topics in History of Science, Medicine, and Technology. Continuation of HIST SCI 681.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**HIST SCI 691 – SENIOR THESIS**

3 credits.

Senior thesis on topics in History of Science, Medicine, and Technology.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2007**HIST SCI 692 – SENIOR THESIS**

3 credits.

Senior thesis on topics in History of Science, Medicine, and Technology. Continuation of HIST SCI 691.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2008**HIST SCI 698 – DIRECTED STUDY**

1-3 credits.

Directed study under the supervision of a faculty member on topics in History of Science, Medicine, and Technology. Graded on a Cr/N basis.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**HIST SCI 699 – DIRECTED STUDY**

1-3 credits.

Directed study under the supervision of a faculty member on topics in History of Science, Medicine, and Technology. Graded on a lettered basis.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2017

**HIST SCI 720 – PROSEMINAR: HISTORIOGRAPHY AND METHODS**  
3 credits.

Philosophies, methods, and sources in the history of science, and their relations to the current state of scholarship.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HIST SCI 903 – SEMINAR: MEDIEVAL, RENAISSANCE, AND 17TH CENTURY SCIENCE**  
3 credits.

Readings and/or research on the history of medieval, Renaissance, and/or 17th-century science. Topics vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HIST SCI 907 – SEMINAR: HISTORY OF TECHNOLOGY**  
3 credits.

Research and readings on a topic of current interest in history of technology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**HIST SCI 909 – HISTORY OF BIOLOGY AND MEDICINE**  
3 credits.

Readings and/or research on the history of biology and medicine. Topics vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**HIST SCI 911 – SEMINAR-EIGHTEENTH CENTURY SCIENCE**  
3 credits.

Readings and/or research on the history of science in the 18th century. Topics vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HIST SCI/MED HIST 919 – GRADUATE STUDIES IN MEDICAL HISTORY**  
3 credits.

Analyzes the scientific and social aspects of the development of modern medicine and public health in Europe and America.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in Medical History

Audience: Graduate

**HIST SCI 921 – SEMINAR-SPECIAL TOPICS**  
3 credits.

Readings and/or research on the history of science, medicine, and technology. Topics vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HIST SCI 990 – RESEARCH AND THESIS**  
1-3 credits.

Independent research and writing of a thesis under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**HIST SCI 999 – INDEPENDENT WORK**  
1-3 credits.

Directed study under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

# HUMAN DEVELOPMENT AND FAMILY STUDIES (HDFS)

## HDFS 174 – INTRODUCTION INTO CULTURAL DIVERSITY OF FAMILIES

3 credits.

An introduction to racially and culturally diverse families with application to personal life. Focuses on structural factors impacting all families, such as demographic, economic, and historic trends, which illuminate the similarities and distinctions among and within racial and ethnic groups.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate understanding of diversity of family structures, roles, and relationships.

Audience: Undergraduate

2. Demonstrate understanding of concepts (race, ethnicity, minority, etc.) essential to the discourse on family diversity.

Audience: Undergraduate

3. Identify historical and current social experiences and relate those to family dynamics of diverse cultural groups.

Audience: Undergraduate

4. Communicate differences between stereotyping and generalizations about culturally diverse families, while also acknowledging within-group diversity.

Audience: Undergraduate

5. Reflect upon your own family, and broaden your exposure to other kinds of family experiences.

Audience: Undergraduate

## HDFS 253 – HUMAN DEVELOPMENT & FAMILY STUDIES LEADERSHIP SYMPOSIUM

1 credit.

Provides detailed examination of careers in Human Ecology and the fields of human development and family studies (HDFS). High level leaders working in a variety of professions related to the HDFS major will present as guest speakers (e.g., counseling, school psychology, family life education, early childhood education, child life, social work, health care, occupational therapy).

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## HDFS 262 – DEVELOPMENT OF THE YOUNG CHILD

3 credits.

A basic foundation for understanding development from conception through middle childhood. Theoretical foundations, research findings, and practical applications.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe physical, cognitive, and social development from conception through middle childhood.

Audience: Undergraduate

2. Recognize the ways in which biological processes lead to similarities and differences in physical, cognitive, and social development.

Audience: Undergraduate

3. Identify the ways in which environmental factors lead to similarities and differences in physical, cognitive, and social development.

Audience: Undergraduate

4. Explain how child development research is conducted

Audience: Undergraduate

5. Apply developmental science to improve the lives of children.

Audience: Undergraduate

**HDFS 263 – DEVELOPMENT FROM ADOLESCENCE TO OLD AGE**

3 credits.

A basic foundation for understanding development from adolescence through old age. Theoretical foundations, research findings, and practical applications.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe change in physical, cognitive, and socioemotional development from adolescence through old age  
Audience: Undergraduate

2. Gain knowledge of individual differences in developmental change across the lifespan  
Audience: Undergraduate

3. Identify biological, psychological, and social mechanisms related to developmental change  
Audience: Undergraduate

4. Discuss how biological, psychological, and social mechanisms interact in a dynamic and reciprocal fashion to shape develop across the lifespan  
Audience: Undergraduate

5. Identify policy and intervention pathways for promoting optimal health and well-being from adolescence through old age  
Audience: Undergraduate

**HDFS 299 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2006

**HDFS 345 – ECOLOGY OF CHILD HEALTH AND WELL-BEING**

3 credits.

The physical and mental health and well-being of infants and children are strongly influenced by child- and family-facing service professionals from across a variety of professions. Through a socioecological and multidisciplinary lens, examines both conceptual models and real-world applications ranging along a continuum from individual-level clinical interventions to systems-level public health approaches of influencing infant and child physical and mental health and well-being.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss childhood as a function of the social, economic, political, historical, artistic, and scientific environments and systems children exist in and around.  
Audience: Undergraduate

2. Apply the concepts of Relational Health and infant and child mental health in the context of practice, projects, and policy.  
Audience: Undergraduate

3. Apply theoretical and research findings to real-world clinical settings through the context of child- and family-facing service professions.  
Audience: Undergraduate

4. Evaluate how the flourishing and thriving of children is affected through individual-level interactions, programs, and policies and gain basic skills in advocating for children's health and well-being.  
Audience: Undergraduate

5. Develop criteria for high-quality, everyday shared activities and what these bring to relational health, cognitive development, and educational success, and incorporate such criteria into service delivery models.  
Audience: Undergraduate

**HDFS 425 – RESEARCH METHODS IN HUMAN DEVELOPMENT AND FAMILY STUDIES**

3 credits.

Basics of research design used in studying family studies and individual development over the life course. Quantitative and qualitative research designs, participatory action research, and evaluation research, how research informs intervention and prevention programs.

**Requisites:** HDFS 262, ED PSYCH 320, PSYCH 460, or HDFS 263

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HDFS 462 – INFANT/TODDLER DEVELOPMENT & GROUP CARE**  
3 credits.

Developmental milestones from conception up to 36 months of age. Exploration of child care, including access and quality of care, as major influences on the development of young children and families in the US. Observation of infant development in real-time and evaluation of child care program quality.

**Requisites:** HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, or PSYCH 460

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and recognize the major milestones of infant development in each of the following domains: physical, motor, social-emotional, cognitive, and language and objectively observe infant development in "real time."

Audience: Undergraduate

2. Illustrate the cultural influences on the ways families choose to care for infants and toddlers and describe the major philosophical approaches to group care.

Audience: Undergraduate

3. Identify factors that influence the disproportionately high infant and maternal mortality rates in the U.S. based on demographic factors such as race, ethnicity, socioeconomic status, and region.

Audience: Undergraduate

4. Identify the main components of high-quality infant care programs and articulate how high-quality infant/toddler care has the potential to positively affect the developmental outcomes of children, the lives of families, and society overall.

Audience: Undergraduate

5. Use an observational rating scale to measure the quality of an infant/toddler group care setting and critique the rating scale based on knowledge of factors that have been shown to promote optimal developmental outcomes in young children.

Audience: Undergraduate

6. Identify ecological influences that affect the availability of affordable, high quality infant care for families in the U.S.

Audience: Undergraduate

7. Recognize the benefits of inclusive practice for infants and toddlers with disabilities, special needs, challenging behavior, or mental health challenges in the group care setting and identify supports needed by the field to successfully employ these inclusive practices.

Audience: Undergraduate

**HDFS 464 – PLAY-DEVELOPMENT AND ROLE ACROSS THE LIFESPAN**  
3 credits.

The role and function of play (and playfulness) in promoting development across the lifespan.

**Requisites:** HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, or PSYCH 460

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HDFS/CNSR SCI 465 – FAMILIES & POVERTY**  
3 credits.

Introduction to research at the intersection of family and poverty studies. Learn how family behaviors vary by socioeconomic status; how romantic relationships, childbearing, and childrearing may be implicated in poverty; what the consequences of poverty are for family functioning and children; and about the role of policy in influencing families and poverty.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Ability to consider and evaluate how children, adults, and families affect and are affected by policies, media, or other social institutions.

Audience: Undergraduate

2. Demonstrate applied professional skills by practicing working effectively with others.

Audience: Undergraduate

3. Demonstrate professional speaking skills through giving an oral presentation.

Audience: Undergraduate

4. Demonstrate scientific reasoning/critical thinking skills through engaging in critical evaluation of research articles, websites, programs, or policies.

Audience: Undergraduate

5. Knowledge of family and community diversity.

Audience: Undergraduate

**HDFS 469 – FAMILY AND COMMUNITY INFLUENCES ON THE YOUNG CHILD**  
3 credits.

Interaction of child in socialization settings, especially the family; socialization processes in the social system of child-family-community.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HDFS 471 – PARENT - CHILD RELATIONS**

3 credits.

Parents' interaction with their children, programs for parents, and parents' interactions with other institutions.

**Requisites:** HDFS 262, ED PSYCH 320, PSYCH 460, or HDFS 263

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HDFS 474 – RACIAL ETHNIC FAMILIES IN THE U.S.**

3 credits.

Examines the diversity of family life and human development across and within racial ethnic groups in the United States as shaped by race, ethnicity, culture, biculturalism, and the social contexts of history, economics, immigration, and socio-political conditions.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HDFS 501 – SPECIAL TOPICS**

1-3 credits.

Specialized subject matter of current interest.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HDFS 516 – STRESS AND RESILIENCE IN FAMILIES ACROSS THE LIFESPAN**

3 credits.

Examines family stress and resilience across the life cycle from psychological, sociological, and biosocial perspectives. Explores research relating to normative and non-normative family stress and resiliency factors. Topics include parenting, poverty, violence, work-family balance, aging, health and wellness and others.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically evaluate internal family processes, including parenting and parent-child relations, couples and family relationships across generations and family health and well-being (e.g., mental health, substance abuse, wellness, child maltreatment)  
Audience: Undergraduate

2. Apply various theories, models, and perspectives on family stress and resilience across the lifespan to their understanding of families in stress and crisis  
Audience: Undergraduate

3. Apply research and application of these models to specific contemporary topics relevant to individual and family functioning, including risk and resiliency processes  
Audience: Undergraduate

4. Evaluate current issues and areas of investigation in the field of family stress and resilience and their application to 'real world' challenges  
Audience: Undergraduate

**HDFS 517 – COUPLE RELATIONSHIPS**

3 credits.

Romantic relationships are universally desired, and individuals around the globe agree about what successful intimacy entails: we all want to be loved, supported, and cared for by partners we hold in high esteem. Nevertheless, intimate relationships can be difficult to form and maintain. Explore a range of theoretical perspectives and methodologies to understand how it is that intimate relationships develop, thrive, or deteriorate over time. Connect intimate relationship science to real life experiences.

**Requisites:** Sophomore standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HDFS 535 – A FAMILY PERSPECTIVE IN POLICYMAKING**

3 credits.

Explore the relationship between family functioning and public/private policies at the local, state and federal levels; analyze the consequences of issues, policies or programs on family well-being; and, examine roles for professionals in influencing policy development.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**HDFS 592 – RESEARCH EXPERIENCE IN HUMAN DEVELOPMENT AND FAMILY STUDIES**

1-3 credits.

Research experience under the supervision of a faculty member in Human Development and Family Studies.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HDFS 601 – INTERNSHIP**

1-8 credits.

A supervised internship providing hands-on training in a professional experience in human development and family studies related fields.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **HDFS/COM ARTS/JOURN 616 – MASS MEDIA AND YOUTH**

3 credits.

Children's and adolescents' use of mass media and mass media effects on them. Particular attention is given to changes in comprehension and other cognitive activities that give insights into media use and effects.

**Requisites:** JOURN 202, COM ARTS 325, HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, PSYCH 460, LSC 251, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how children and youth process media  
Audience: Undergraduate

2. Compare/contrast the impact of different types of media content on development  
Audience: Undergraduate

3. Explain how individual differences moderate the impact of media on development  
Audience: Undergraduate

4. Describe moderating effects of the context in which media use occurs  
Audience: Undergraduate

5. Read, interpret, evaluate, and discuss social scientific reports of findings in this area  
Audience: Undergraduate

6. Synthesize and interpret research in this area for a lay audience  
Audience: Undergraduate

7. Explain with nuance how children and youth process media  
Audience: Graduate

8. Compare/contrast the impact of different types and formats of media content on development, with reference to key developmental milestones  
Audience: Graduate

9. Explain how individual differences and social contexts moderate the impact of media uses and interpretations on development  
Audience: Graduate

10. Synthesize and interpret research in this area and identify a research gap for future work  
Audience: Graduate

### **HDFS 650 – PARENT EDUCATION AND SUPPORT PROGRAMS**

3 credits.

The purposes, contexts, and implementation of parenting support and education programs are studied. Some sections may include a service learning component.

**Requisites:** HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, or PSYCH 460

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HDFS 662 – ADVANCED STUDY OF THE YOUNG CHILD**

3 credits.

Research literature and current theories; topics of individual interest.

**Requisites:** HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, or PSYCH 460

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### **HDFS 663 – DEVELOPMENTAL AND FAMILY ASSESSMENT**

3 credits.

Introduction to the process of family-focused developmental assessment with infants and young children, including family interviewing, taking developmental histories, observing children, and developmental screening.

**Requisites:** HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, PSYCH 460, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **HDFS 664 – PROSEMINAR: HUMAN DEVELOPMENT AND FAMILY STUDIES**

1-3 credits.

Survey and introduction to children and families.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **HDFS 680 – SENIOR HONORS THESIS**

2-4 credits.

Individual study in honors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### **HDFS 690 – SENIOR THESIS**

2 credits.

Individual study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**HDFS 699 – INDEPENDENT STUDY**

1-6 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**HDFS/ED PSYCH 725 – THEORY AND ISSUES IN HUMAN DEVELOPMENT**

3 credits.

This course covers both classic and contemporary theories, providing students with a firm grounding in the theoretical perspectives that have shaped and are shaping understandings of human development across the life-span. The course explores the historical roots of contemporary perspectives and examines the development of theoretical conceptualizations both within and across theoretical perspectives.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**HDFS/COUN PSY/ED PSYCH 726 – ETHNIC AND RACIAL DIVERSITY IN SOCIAL DEVELOPMENT**

3 credits.

Review of empirical and theoretical research on ethnic/racial diversity in social development across childhood, adolescence and early adulthood with emphasis on implications for counseling and school psychology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**HDFS 761 – CHILDHOOD AND THE FAMILY: PRENATAL THROUGH PRE-ADOLESCENCE**

3 credits.

Research and theories about development from the prenatal period to middle childhood, emphasizing a relational approach and contemporary research (both content and methods). Explores diversity in early development in the US and internationally.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe change in physical, cognitive, and psychosocial development from conception through middle childhood, particularly in the family context.

Audience: Graduate

2. Identify biological, psychological, and social mechanisms related to developmental change.

Audience: Graduate

3. Discuss how biological, psychological, and social mechanisms interact in a dynamic and reciprocal fashion to shape early human development.

Audience: Graduate

4. Think critically about human development research, including how research methods, content, findings, and theories impact understanding of early human development and relate to contexts.

Audience: Graduate

5. Apply knowledge of early human development to identify policy and intervention pathways for promoting optimal health and well-being from conception through middle childhood.

Audience: Graduate

**HDFS 763 – AGING AND THE FAMILY: ADOLESCENCE THROUGH LATER LIFE**

3 credits.

Examines physical, cognitive, and socioemotional development from adolescence through late life, emphasizing development in context. Covers developmental theory, research, and applications across life stages, including death and dying, with emphasis on relational approaches. Addresses individual, family, historical, and cultural influences on human development.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Describe change in physical, cognitive, and socioemotional development from adolescence through old age, particularly in the family context

Audience: Graduate

2. Examine individual differences in developmental change across the lifespan

Audience: Graduate

3. Identify biological, psychological, and social mechanisms related to developmental change

Audience: Graduate

4. Discuss how biological, psychological, and social mechanisms interact in a dynamic and reciprocal fashion to shape development across the lifespan

Audience: Graduate

5. Identify policy and intervention pathways for promoting optimal health and well-being from adolescence through old age

Audience: Graduate

**HDFS 765 – FAMILIES & POVERTY**

3 credits.

Introduction to research on families and poverty. Learn how family behaviors vary by socioeconomic status; how romantic relationships, childbearing, and childrearing may be implicated in poverty; what the consequences of poverty are for family functioning and children; and about the role of policy in influencing families and poverty.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**HDFS 766 – CURRENT TOPICS IN HUMAN DEVELOPMENT AND FAMILY STUDIES**

1-3 credits.

Specialized subject matter of current interests. Literature, research, and current trends, with implications for teaching, parent education, and other professions.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**HDFS 818 – ATTACHMENT THEORY AND RELATIONSHIPS ACROSS THE LIFESPAN**

3 credits.

Examines parent-child and intimate relationships using attachment theory and research (and critiques of this approach), focusing on relationships formed in infancy and across the lifespan.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2020**HDFS 865 – FAMILY THEORY I (SURVEY)**

3 credits.

A survey of the current theories and models used in family research and theory development. Focuses on structure-functional, interactional, developmental, systems, and exchange theory in relation to family research and application.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**HDFS 869 – ADVANCED SEMINAR IN FAMILY STRESS AND COPING**

3 credits.

Emphasis on theoretical explanations of family stress from various levels of analysis--individual, social network, family, community, and larger social context. Considers sources of stress and how families experience, respond to, cope with, and resolve stress.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

## **HDFS 872 – BRIDGING THE GAP BETWEEN RESEARCH AND ACTION**

3 credits.

Addresses the critical skills and methods needed to gather and apply research-based knowledge and theory to human development and family studies. Strategies for conducting research relevant to social policy, programs, and the general public will be discussed as well as techniques for communicating research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## **HDFS/ED PSYCH/NURSING/SOC WORK 880 – PREVENTION SCIENCE**

3 credits.

Theoretical, empirical and practical foundation for prevention science as it relates to the prevention of human social problems. Research and evaluation methods, program design strategies, best practices and policy as they relate to the field of prevention are also examined.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## **HDFS/ED PSYCH/NURSING/SOC WORK 881 – CAPSTONE SEMINAR IN PREVENTION SCIENCE**

1 credit.

An opportunity to meet with prevention professionals and scholars from across campus and the community to explore current and emerging issues of prevention research and professional practice. Students must complete HDFS/ED PSYCH/NURSING/SOC WORK 880 before taking this course.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

## **HDFS 990 – RESEARCH AND THESIS**

1-12 credits.

Individual study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## **HDFS 999 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

# **HUMAN ONCOLOGY (H ONCOL)**

## **H ONCOL/MED PHYS 410 – RADIOBIOLOGY**

2-3 credits.

Effects of ionizing radiations of living cells and organisms, including physical, chemical, and physiological bases of radiation cytotoxicity, mutagenicity, and carcinogenesis; lecture and lab.

**Requisites:** Graduate/professional standing or (PHYSICS 202 or 208 and ZOOLOGY/BIOLOGY/BOTANY 152 or 153)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Gain an understanding of the physical, chemical and molecular basis of the action of radiation on biological systems

Audience: Both Grad & Undergrad

2. Describe the radiobiological principles forming the basis for the use of radiation as a cancer therapy

Audience: Both Grad & Undergrad

3. Understand the potential deleterious short and longer-term effects of radiation on normal tissues and organs and on the whole body

Audience: Both Grad & Undergrad

4. Describe how chemotherapy and molecularly targeted agent can alter response of biological systems to radiation.

Audience: Both Grad & Undergrad

5. Understand the principles of radiation protection

Audience: Graduate

**H ONCOL/B M E/MED PHYS/PHYSICS 501 – RADIATION PHYSICS AND DOSIMETRY**

3 credits.

Interactions and energy deposition by ionizing radiation in matter; concepts, quantities and units in radiological physics; principles and methods of radiation dosimetry.

**Requisites:** (PHYSICS 323, 449 and MATH 320) or graduate/professional standing or declared in Medical Physics VISP

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use the physics of microscopic structures of nucleus, nuclear decay, electronic structure of atoms to calculate nuclear decay lifespan and solid state energy band structure

Audience: Both Grad & Undergrad

2. Calculate the radiation power spectrum for an accelerating charge particle under different physical conditions

Audience: Both Grad & Undergrad

3. Calculate cross-sections for the following interaction processes between photons and matter: Rayleigh scattering, photoelectric effect, Compton scattering, and pair production

Audience: Both Grad & Undergrad

4. Calculate the scattering cross-section of Coulomb scattering and energy transfer cross-section in collisions processes and radiative energy loss processes

Audience: Both Grad & Undergrad

5. Calculate radiation dose for both external photon beams, neutron beams, and charged particle beams

Audience: Both Grad & Undergrad

6. Identify open research topics in radiation imaging, radiation therapy, and radiation protection fields

Audience: Graduate

**H ONCOL 681 – SENIOR HONORS THESIS IN HUMAN ONCOLOGY 1**

3-4 credits.

Independent research in the area of human oncology including biology, medical physics, or clinical oncology. A written thesis is required in the final semester.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**H ONCOL 682 – SENIOR HONORS THESIS IN HUMAN ONCOLOGY 2**

3-4 credits.

Independent research in the area of human oncology including biology, medical physics, or clinical oncology. A written thesis is required in the final semester.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**H ONCOL 691 – SENIOR THESIS IN HUMAN ONCOLOGY 1**

3-4 credits.

Independent research in the area of human oncology including biology, medical physics, or clinical oncology. A written thesis is required in the final semester.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**H ONCOL 692 – SENIOR THESIS IN HUMAN ONCOLOGY 2**

3-4 credits.

Independent research in the area of human oncology including biology, medical physics, or clinical oncology. A written thesis is required in the final semester.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**H ONCOL 699 – INDEPENDENT STUDY IN HUMAN CANCER BIOLOGY**

1-3 credits.

Tutorial lab/library research and study. Opportunity for learning in depth without a thesis requirement.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **H ONCOL 750 – MULTI-DISCIPLINARY PATIENT-ORIENTED RESEARCH PRESENTATION SKILLS SEMINAR**

1 credit.

Learn to value the contributions of oral presentations in developing your career, in convincing audiences of the results of your research, or gaining approval of your proposed research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand components of high quality oral presentations and commonly made mistakes

Audience: Graduate

2. Provide constructive feedback to presenters

Audience: Graduate

3. Apply consistent format for oral presentations

Audience: Graduate

### **H ONCOL 910 – INDEPENDENT READING AND RESEARCH FOR FOURTH YEAR MEDICAL STUDENTS**

2-8 credits.

Independent research under the direct supervision of Human Oncology faculty. Each student's research project is individualized to meet student research goals within context of faculty research needs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research

Audience: Graduate

2. Conduct a thorough literature review of the specific research question

Audience: Graduate

3. Select and apply statistical methodologies appropriate for the proposed analyses

Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review

Audience: Graduate

### **H ONCOL 911 – TUMOR IMMUNOLOGY AND CANCER IMMUNOTHERAPY**

2 credits.

Gain a greater understanding of the basic and translational science that is fueling the ongoing immuno-oncology revolution in cancer care. Explore the tumor-immune microenvironment and modern approaches to cancer immunotherapy. Evaluate pertinent primary literature in this arena and exposure to the technological resources (e.g. flow cytometry, clinical pathology, cell therapeutics infrastructure) that are critical to implementing immunotherapies in the clinic. Tumor board attendance will highlight the clinical reasoning and toxicity management in the clinical use of immunotherapies for cancer treatment.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of innate and adaptive immune interactions with tumors

Audience: Graduate

2. Apply understanding of immunology to understand immunotherapeutic approaches in cancer

Audience: Graduate

3. Compare and contrast therapeutic mechanisms of diverse immunotherapies

Audience: Graduate

4. Demonstrate knowledge of the patterns and rates of response to immunotherapies among distinct cancers

Audience: Graduate

5. Demonstrate understanding of immunotherapy toxicities and approaches to treating these

Audience: Graduate

6. Apply and adapt understanding of tumor immunology and current immunotherapies to devise a proposal for next generation approach to cancer immunotherapy

Audience: Graduate

**H ONCOL 912 – CHALLENGES IN ONCOLOGY: APPLICATION OF MODERN BIOLOGY AND TECHNOLOGY TO CLINICAL CANCER CARE**

2 credits.

Radiation therapy has been used in treatment of cancer and other diseases for over 100 years. Gain a comprehensive overview of how modern technology allows us to precisely target the tumor while maintaining the function of normal tissues (i.e. the physics and biology underlying the use of radiation therapy). Develop a strong foundational knowledge of basic oncology principles, begin to understand the biology and physics underlying radiation oncology treatments, interpret dose/volume histograms and normal-tissue complication probabilities, understand the role of modern imaging in the workup, treatment, and follow-up of cancer patients, and be able to discuss the major financial issues associated with various treatment modalities. It is anticipated that students will incorporate these concepts, knowledge, experiences, and evidence in their future clinical practice.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of fundamental principles of oncology  
Audience: Graduate

2. Demonstrate understanding of how physics and biology shape modern radiation oncology  
Audience: Graduate

3. Perform treatment simulations, target identification, normal tissues using four-dimensional imaging studies  
Audience: Graduate

**H ONCOL 922 – RADIATION ONCOLOGY**

2-4 credits.

Oncology-focused topics including staging, prognosis, and treatment approaches to different cancers. Different radiation modalities, treatment machines, and treatment planning. Opportunity to see patients in clinic and observe procedures (brachytherapy), under direct supervision by residents and attending physicians.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Prepare for consults.

Audience: Graduate

2. Improve skills in physical examination.

Audience: Graduate

3. Make a concise, yet thorough presentation to the attending, including your own assessment and plan

Audience: Graduate

4. Describe the staging of neoplastic diseases.

Audience: Graduate

5. Practice decision-making involved in the work-up and treatment planning of oncologic patients.

Audience: Graduate

6. Describe the uses of different types of ionizing radiation in cancer treatment.

Audience: Graduate

7. Demonstrate understanding of the use of radiation toward sparing normal tissues.

Audience: Graduate

8. Observe and participate as allowed in procedures.

Audience: Graduate

**H ONCOL 990 – RESEARCH IN HUMAN CANCER BIOLOGY**

1-12 credits.

Graduate thesis research.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

# INDUSTRIAL AND SYSTEMS ENGINEERING (I SY E)

## ISY E 1 – COOPERATIVE EDUCATION PROGRAM

1 credit.

Work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career in industry.

**Requisites:** Sophomore standing

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work  
Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise  
Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information  
Audience: Undergraduate

## ISY E 191 – THE PRACTICE OF INDUSTRIAL ENGINEERING

2 credits.

An introduction to industrial engineering subject matter areas, problem types, and design/analysis approaches, techniques, and methodologies. Special emphasis on formulation and design alternatives for problem solving.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define and explain common industrial engineering terminology

Audience: Undergraduate

2. Give examples of career opportunities in industrial engineering

Audience: Undergraduate

3. List the focus areas in industrial engineering and give a brief explanation of how each area uses industrial engineering principles

Audience: Undergraduate

4. Give examples of problems in each area of industrial engineering

Audience: Undergraduate

5. Identify professional and academic development resources available to industrial engineering students

Audience: Undergraduate

6. Investigate an open-ended industrial engineering problem and think critically about how to solve it

Audience: Undergraduate

7. Analyze small datasets using Microsoft Excel

Audience: Undergraduate

**I SY E 210 – INTRODUCTION TO INDUSTRIAL STATISTICS**

3 credits.

Introduction to basic probability and statistical tools and methods from an industrial application perspective. Random variables and probability distributions; descriptive statistics; point estimates. Perform hypothesis testing, construct confidence intervals, and understand design of experiments in the context of motivating case studies. Regression and correlation analysis. Focus on applying statistical methods and tools to solve engineering problems. Use of Microsoft Excel to interpret and analyze data.

**Requisites:** (MATH 211, 217, or 221) or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate the importance of statistics in engineering applications  
Audience: Undergraduate

2. Summarize and describe data using descriptive statistics and graphical methods  
Audience: Undergraduate

3. Perform basic statistical analysis on datasets  
Audience: Undergraduate

4. Design simple experiments with data for the purpose of statistical analysis  
Audience: Undergraduate

5. Use Excel to describe, analyze, graph, and interpret data  
Audience: Undergraduate

6. Apply linear and multiple regression techniques  
Audience: Undergraduate

7. Apply experiment and analysis techniques to areas of engineering such as Statistical Process Control  
Audience: Undergraduate

8. Apply basic probability concepts such as random variables, independence, and probability distributions  
Audience: Undergraduate

**I SY E 312 – DATA MANAGEMENT AND ANALYSIS FOR INDUSTRIAL ENGINEERS**

3 credits.

Fundamentals of data management and analysis. Formulating and solving real industrial engineering problems with appropriate data managing and modeling strategies. Fundamental industrial database management strategies, data preprocessing, visualization and modeling techniques; industrial database management and analysis techniques using leading programming software (MySQL and R).

**Requisites:** (I SY E 210, E C E 331, MATH/STAT 309, STAT 311, or 324) or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of fundamental industrial database management strategies  
Audience: Undergraduate

2. Apply data preprocessing, visualization, and modeling techniques  
Audience: Undergraduate

3. Apply industrial database management techniques using structured query language (SQL)  
Audience: Undergraduate

4. Use leading programming software to perform data regression analysis  
Audience: Undergraduate

5. Create and solve a real-life industrial data analytics problem, and present results effectively to audience  
Audience: Undergraduate

**I SY E 313 – ENGINEERING ECONOMIC ANALYSIS**

3 credits.

Financial accounting principles and cost systems, interpretation and use of accounting reports and supplemental information for engineering economic analyses, consideration of cost-volume-profit analyses, use of discounted cash flow techniques, flexible budgeting, transfer pricing, and capital budgeting.

**Requisites:** (MATH 217, 221, or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply discounted cash-flow analysis to evaluate proposed capital investments  
Audience: Undergraduate

2. Recognize, formulate, and analyze cash-flow models  
Audience: Undergraduate

3. Explain model results to managers and other non-specialist decision makers  
Audience: Undergraduate

**ISY E 315 – PRODUCTION PLANNING AND CONTROL**

3 credits.

Techniques and applications of control concepts in the design of inventory, production, quality, and project-planning systems; use of the computer as a component in such systems.

**Requisites:** (ISY E 210, E C E 331, MATH/STAT 309, STAT 311, 324, 371, MATH/STAT 431, 531, or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and apply fundamental principles and methodologies relevant to planning, design, operation, and control of production planning and control systems

Audience: Undergraduate

2. Describe and explain how organizational strategy drives operations management approaches and supply chain decisions

Audience: Undergraduate

3. Develop a portfolio of analytical tools and skills related to production planning and control and operations management

Audience: Undergraduate

4. Recognize situations in production system environments that suggest the use of appropriate quantitative methods to assist in decision-making

Audience: Undergraduate

5. Apply skills and tools to reduce waste and to increase productivity and quality in manufacturing and service organizations

Audience: Undergraduate

**ISY E 320 – SIMULATION AND PROBABILISTIC MODELING**

3 credits.

Analysis of stochastic systems using both analytic methods and computer simulation. Empirical and theoretical models of arrival and service processes. State spaces and state transition probabilities. Simulation of queuing and manufacturing systems. Continuous time Markov analysis of manufacturing systems. Simulation project management, testing and emerging trends.

**Requisites:** (MATH/STAT 309, STAT 311, MATH/STAT 431, 531 or concurrent enrollment) and (ISY E 210, E C E 331, STAT/MATH 310, STAT 312, 324, 371, or concurrent enrollment) and (MATH 320, 340, or concurrent enrollment), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply knowledge of math, science, and engineering principles to model real stochastic systems

Audience: Undergraduate

2. Identify, formulate, and solve problems using appropriate data analytic and simulation approaches

Audience: Undergraduate

3. Understand and apply probabilistic modeling techniques such as Markov Chains and queueing theory to study stochastic systems

Audience: Undergraduate

4. Apply statistical methods to analyze stochastic behaviors of the systems

Audience: Undergraduate

5. Apply simulation software to model the process and evaluate performance measures of the systems

Audience: Undergraduate

**I SY E 321 – SIMULATION MODELING LABORATORY**

1 credit.

Computer exercises involving generation and analysis of random variables, spreadsheet models of queuing systems, use of simulation software packages. Project.

**Requisites:** Concurrent enrollment in I SY E 320

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply knowledge of math, science, and engineering principles to model real stochastic systems

Audience: Undergraduate

2. Identify, formulate, and solve problems using appropriate data analytic and simulation approaches

Audience: Undergraduate

3. Understand and apply probabilistic modeling techniques such as Markov Chains and queueing theory to study stochastic systems

Audience: Undergraduate

4. Apply statistical methods to analyze stochastic behaviors of the systems

Audience: Undergraduate

5. Apply simulation software to model the process and evaluate performance measures of the systems

Audience: Undergraduate

**I SY E 323 – OPERATIONS RESEARCH-DETERMINISTIC MODELING**

3 credits.

Basic techniques for modeling and optimizing deterministic systems with emphasis on linear programming. Computer solution of optimization problems. Applications to production, logistics, and service systems.

**Requisites:** MATH 222 and (MATH 340, 341 or 375), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Write an algebraic formulation of an optimization model that captures the main decision elements of practical problems

Audience: Undergraduate

2. Use an algebraic modeling language to solve an optimization model

Audience: Undergraduate

3. Model logical constraints using binary decision variables

Audience: Undergraduate

4. Understand the basic ideas behind algorithms for solving linear programming and discrete optimization problems

Audience: Undergraduate

**I SY E 348 – INTRODUCTION TO HUMAN FACTORS ENGINEERING LABORATORY**

1 credit.

Hands on experience applying concepts discussed in I SY E/PSYCH 349. Complete a small three-part design project. Learn how to measure light, sound, anthropometric, and psychophysiological data, and then apply these measurements to product and workplace design challenges.

**Requisites:** Declared in Industrial Engineering and concurrent enrollment in I SY E/PSYCH 349, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the strengths and limits of human perceptual, cognitive and physical abilities and their implications for system design

Audience: Undergraduate

2. Describe human factors tools, techniques and methods commonly used to design and improve system performance

Audience: Undergraduate

3. Evaluate and recommend work and task designs based on human factors and ergonomic principle

Audience: Undergraduate

4. Define the ethical application of human factors in designing products and processes

Audience: Undergraduate

**ISY E/PSYCH 349 – INTRODUCTION TO HUMAN FACTORS**

3 credits.

Conveys the importance of considering human capabilities and limits in system design and operation. This includes understanding human characteristics from the cognitive, physical, and psychosocial perspectives. Implications of these characteristics are explored through understanding the needs of people, designing to support these needs, and evaluating systems to ensure they serve the intended purpose. Case studies are used to identify the human role in accidents and to identify design improvements. Application domains include consumer product design, human-computer interaction, workplace safety, and complex systems such as healthcare delivery.

**Requisites:** (I SY E 210, E C E 331, MATH/STAT 309, 431, STAT 311, 324, 371, MATH 531, PSYCH 210, or C&E SOC/SOC 360, or concurrent registration), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the strengths and limits of human perceptual, cognitive and physical abilities and their implications for system design

Audience: Undergraduate

2. Describe human factors tools, techniques and methods commonly used to design and improve system performance

Audience: Undergraduate

3. Evaluate and recommend work and task designs based on human factors and ergonomic principles

Audience: Undergraduate

4. Define the ethical application of human factors in designing products and processes

Audience: Undergraduate

**ISY E 350 – INDUSTRIAL ENGINEERING DESIGN I**

3 credits.

Introduction to the tools needed for advanced design courses through experiential learning and hands-on opportunities to conduct experiments, take relevant measurements, analyze real-world data, design systems, and to make and test prototypes of designs.

**Requisites:** Declared in Industrial Engineering, (COMP SCI 200, 220, 300, 301, 302, or placement into COMP SCI 300), (I SY E 210, MATH/STAT 309, 431, MATH 531, STAT 311 or 324) and I SY E 315

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply basic industrial engineering design methods

Audience: Undergraduate

2. Use appropriate industrial and systems engineering design tools for establishing solutions to open-ended problems

Audience: Undergraduate

3. Select the appropriate methods to utilize in order to collect real-world data

Audience: Undergraduate

4. Observe and collect data relevant to an industrial engineering problem

Audience: Undergraduate

**ISY E 389 – HONORS IN RESEARCH**

1-3 credits.

Undergraduate honors research projects supervised by faculty members.

**Requisites:** Declared in Industrial Engineering Honors in Research

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2013

**Learning Outcomes:** 1. Conduct and report on independent industrial engineering research

Audience: Undergraduate

2. Independently develop industrial engineering research questions

Audience: Undergraduate

3. Appropriately utilize online and library resources

Audience: Undergraduate

**I SY E 412 – FUNDAMENTALS OF INDUSTRIAL DATA ANALYTICS**

3 credits.

Provides an understanding of the fundamentals of using data analytics to make data-driven decisions. Emphasizes applying techniques to industrial engineering problems. Focuses on formulating and solving real industrial problems with the appropriate modeling strategies and analytics principles for better decision making.

**Requisites:** (I SY E 210, E C E 331, STAT 311, 324, MATH/STAT 309, 431, or MATH 531), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply fundamental knowledge of industrial data analytics concepts, problems, and techniques

Audience: Undergraduate

2. Integrate data analytics techniques with industrial and systems engineering domain knowledge to appropriately formulate problem statements and facilitate decision making

Audience: Undergraduate

3. Implement software programming skills to perform data analysis

Audience: Undergraduate

4. Apply industrial data analytics methods and tools to solve real-world industrial engineering problems

Audience: Undergraduate

**I SY E 415 – INTRODUCTION TO MANUFACTURING SYSTEMS, DESIGN AND ANALYSIS**

3 credits.

Introduction to the technologies, processes and systems of modern discrete part manufacturing. Emphasis on development of an understanding of the behavior of integrated systems.

**Requisites:** I SY E 315, member of Engineering Guest Students, or graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Distinguish advantages and disadvantages for a range of manufacturing processes

Audience: Undergraduate

2. Select an appropriate manufacturing process when given information such as part design, material, and production quantity

Audience: Undergraduate

3. Use terminology that relates to manufacturing systems design and analysis

Audience: Undergraduate

4. Examine manufacturing system performance by applying analytical techniques such as line balancing, manufacturing system benchmarking, inventory models, and queuing formulas

Audience: Undergraduate

5. Utilize computer-aided design and manufacturing software to display part geometry and create toolpaths for a CNC program

Audience: Undergraduate

**ISY E 417 – HEALTH SYSTEMS ENGINEERING**

3 credits.

Introduction to the application of industrial engineering methods to the analysis and improvement of health care delivery. Exploration of common problems of decision making and control in health care. Examination of social, regulatory and economic factors unique to health care.

**Requisites:** I SY E 320 and 349, graduate/professional standing, or member of Engineering Guest Students, or declared in Clinical and Community Outcomes Capstone Certificate

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and explain the purpose of the various components that make-up many health systems including public health agencies (e.g., CDC), hospital systems, emergency medical services (e.g., 9-1-1), healthcare providers, and health insurance  
Audience: Undergraduate

2. Identify problems within health systems that may be amenable to industrial engineering tools  
Audience: Undergraduate

3. Apply industrial systems engineering concepts and tools (e.g., regression, queueing theory, simulation, cost-benefit analysis, and machine learning) to specific problems in healthcare  
Audience: Undergraduate

**ISY E/COMP SCI/MATH 425 – INTRODUCTION TO COMBINATORIAL OPTIMIZATION**

3 credits.

Focuses on optimization problems over discrete structures, such as shortest paths, spanning trees, flows, matchings, and the traveling salesman problem. We will investigate structural properties of these problems, and we will study both exact methods for their solution, and approximation algorithms.

**Requisites:** (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and use the structural properties of combinatorial optimization problems  
Audience: Undergraduate

2. Apply algorithms for the solution -exact or approximate- of a combinatorial optimization problem  
Audience: Undergraduate

3. Explain why the algorithms studied are correct and understand their running time  
Audience: Undergraduate

**ISY E 445 – ENGINEERING SUPPLY CHAIN MANAGEMENT FOR LOGISTICS**

3 credits.

Concepts from optimization, stochastics, and statistics to model different problems in the context of logistics decision making. Application of engineering design principles in combination with mathematical modeling techniques to solve problems in supply chain design, planning, execution, and transportation.

**Requisites:** (I SY E 210, MATH/STAT 310, STAT 312, 324, or 340) and (I SY E 323 or I SY E/COMP SCI/E C E 524), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain common supply chain management terminology and concepts used in industry settings  
Audience: Undergraduate

2. Evaluate supply chain strategies and policies based on the two key drivers of supply chains: cost efficiency and responsiveness  
Audience: Undergraduate

3. Apply mathematical modeling of inventory management, transportation, and network design problems to real world settings  
Audience: Undergraduate

4. Design holistic supply chain strategies drawing from multiple mathematical models to successfully meet business goals  
Audience: Undergraduate

## **I SY E 450 – INDUSTRIAL ENGINEERING DESIGN II**

3 credits.

Team-based project experience to address a real-world design challenge posed by an external organization. Collaboration with the project client to design a new system or process, or redesign an existing one, by integrating and applying appropriate Industrial and Systems Engineering knowledge, methodologies and tools for problem definition and analysis; idea generation; solution development, evaluation and justification; and implementation planning and impact assessment.

**Requisites:** Senior standing only, I SY E 313, 320, 323, 350, and PSYCH/ I SY E 349

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Employ design thinking, and engage the client in the creative process for problem space exploration and idea generation  
Audience: Undergraduate

2. Utilize a structured modeling, analysis and decision-making framework to design a new system or process, or re-design an existing one  
Audience: Undergraduate

3. Choose, synthesize and effectively utilize appropriate ISyE methods, concepts, engineering standards, and modeling and analysis tools in all facets of the project lifecycle  
Audience: Undergraduate

4. Adjust and be flexible with design strategy and adapt it suitably to address unanticipated issues during project execution  
Audience: Undergraduate

5. Hone skills in teamwork, oral and written communication, and project management  
Audience: Undergraduate

## **I SY E 468 – INTRODUCTION TO INDUSTRIAL ENGINEERING RESEARCH**

1 credit.

An introduction to the practice of conducting research in industrial engineering, literature reviews, identifying gaps in existing work, writing a research proposal.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct a literature review  
Audience: Undergraduate

2. Identify gaps in existing research  
Audience: Undergraduate

3. Describe characteristics of a good research question  
Audience: Undergraduate

4. Write a proposal to address an open research question  
Audience: Undergraduate

5. Describe some current active research areas in industrial engineering  
Audience: Undergraduate

### **ISY E 478 – RESEARCH AND BEYOND IN INDUSTRIAL ENGINEERING**

1 credit.

An introduction of skills required for successful research in graduate school. Preparing for graduate thesis writing, applying for graduate school, presenting research in a variety of ways. How to foster mental health and work-life balance.

**Requisites:** I SY E 468

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Prepare materials for graduate program applications, such as a personal statement

Audience: Undergraduate

2. List key elements of research ethics and common pitfalls in different types of research

Audience: Undergraduate

3. Make a poster summarizing completed and/or in-progress work

Audience: Undergraduate

4. Give a technical presentation summarizing completed and/or in-progress work

Audience: Undergraduate

5. Critique technical research presentations

Audience: Undergraduate

6. List strategies for maintaining healthy work-life balance in graduate school

Audience: Undergraduate

### **ISY E 489 – HONORS IN RESEARCH**

1-3 credits.

Undergraduate honors research projects supervised by faculty members.

**Requisites:** Declared in Industrial Engineering Honors in Research

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Conduct and report on independent industrial engineering research

Audience: Undergraduate

2. Independently develop industrial engineering research questions

Audience: Undergraduate

3. Appropriately utilize online and library resources

Audience: Undergraduate

### **ISY E/M E 510 – FACILITIES PLANNING**

3 credits.

Introduction to plant location theory and analysis of models of plant location; models for determining plant size and time phasing; line balancing models; techniques for investigating conveyor and other material handling problems; and models of plant layout.

**Requisites:** I SY E 315, (I SY E 323 or E C E/COMP SCI/I SY E 524) and I SY E/PSYCH 349, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify, formulate, and solve facilities layout problems by applying principles of engineering and mathematics

Audience: Both Grad & Undergrad

2. Apply engineering design to produce facilities design solutions that meet specified needs with consideration of productivity, safety, and economic factors

Audience: Both Grad & Undergrad

3. Utilize computer software to study and illustrate the operation of a manufacturing system

Audience: Both Grad & Undergrad

4. Collaborate with a team to develop solutions to engineering problems and communicate findings effectively

Audience: Both Grad & Undergrad

5. Demonstrate ability to lead a facilities planning project integrating quantitative techniques and management tools

Audience: Graduate

**I SY E/M E 512 – INSPECTION, QUALITY CONTROL AND RELIABILITY**

3 credits.

Inspection data for quality control; sampling plans for acceptance inspection; charts for process control. Introduction to reliability models and acceptance testing.

**Requisites:** (STAT/MATH 309, STAT 311, 224, 324, or STAT/MATH 431), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply statistical process control analysis for measuring and controlling quality  
Audience: Undergraduate

2. Recognize, formulate, and analyze univariate continuous and discrete control charts  
Audience: Undergraduate

3. Use Minitab to perform basic statistical process control analysis  
Audience: Undergraduate

4. Communicate the results of the statistical process control analysis to management and other non-specialist users of engineering analyses  
Audience: Undergraduate

5. Recognize, formulate, and analyze advanced continuous control charts  
Audience: Graduate

6. Perform process capability and measurement system capability analysis  
Audience: Graduate

**I SY E 515 – ENGINEERING MANAGEMENT OF CONTINUOUS PROCESS IMPROVEMENT**

3 credits.

Addresses the role of the industrial engineer as a "manager" of continuous improvement in design and production processes. Provides modern tools and techniques for planning and managing team projects, integrating the concepts of total quality, data based decision making, and resource management.

**Requisites:** Senior standing and INTEREGR 397 (formerly E P D 397) or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe and explain the nature of and tools for change management and continual process improvement  
Audience: Both Grad & Undergrad

2. Experience the role of the industrial and systems engineer as a "manager" of continual process improvement  
Audience: Both Grad & Undergrad

3. Work effectively on a team-based experiential project focused on process design, analysis, and resource management and integrating the concepts of continual improvement, customer focus, and teamwork  
Audience: Both Grad & Undergrad

4. Implement technical skills and processes, often with a non-technical workforce  
Audience: Both Grad & Undergrad

5. Apply problem solving and management/planning tools for effectively defining problems, feasible alternative solutions, and measurable goals in a "real world" environment  
Audience: Both Grad & Undergrad

6. Identify the impact of organizational and cultural influences on the planning and implementation of change  
Audience: Both Grad & Undergrad

7. Demonstrate ability to lead an industry-based team project integrating contemporary change management frameworks and considering organizational culture  
Audience: Graduate

**ISY E 516 – INTRODUCTION TO DECISION ANALYSIS**

3 credits.

Overview of modeling techniques and methods used in decision analysis, including multiattribute utility models, decision trees, and Bayesian models. Psychological components of decision making are discussed. Elicitation techniques for model building are emphasized. Practical applications through real world model building are described and conducted.

**Requisites:** (STAT/MATH 309, STAT 311, or STAT/MATH 431), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize the types of problems that decision analysis can and cannot solve

Audience: Both Grad & Undergrad

2. Structure decision problems by identifying the relevant values, objectives, attributes, decisions, uncertainties, consequences, and trade-offs

Audience: Both Grad & Undergrad

3. Represent aspects of a decision problem graphically or mathematically

Audience: Both Grad & Undergrad

4. Determine the optimal decision, using mathematical techniques as appropriate

Audience: Both Grad & Undergrad

5. Identify which parameters have the most impact on the result

Audience: Both Grad & Undergrad

6. Explain the results of a decision analysis to managers and other non-specialists

Audience: Both Grad & Undergrad

7. Articulate mathematical foundations of decision problems

Audience: Graduate

**ISY E 517 – DECISION MAKING IN HEALTH CARE**

3 credits.

Introduction to the use of decision sciences in health-care. Conceptual understanding of medical decision making and its tools including decision trees, sensitivity analysis, Markov (decision) processes, and Monte Carlo simulations with examples from the current medical literature.

**Requisites:** (STAT/MATH 309, STAT 311, or STAT/MATH 431) and (I SY E 323 or E C E/COMP SCI/I SY E 524), or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain how decision sciences are used in the health-care industry

Audience: Both Grad & Undergrad

2. Describe concepts related to medical decision making and cost-effectiveness analysis

Audience: Both Grad & Undergrad

3. Apply technical skills in decision analysis including the creation and evaluation of decision trees, the use of sensitivity analysis, and the use of Markov processes and Monte Carlo simulation

Audience: Both Grad & Undergrad

4. Incorporate specific patient preferences into medical decision models through the use of utility analysis

Audience: Both Grad & Undergrad

5. Identify and apply an advanced decision analytical modeling framework to solve medical decision making problems

Audience: Graduate

**ISY E/COMP SCI/DS 518 – WEARABLE TECHNOLOGY**

3 credits.

Gives students hands-on experience in building wearable computing platforms. Designed for students who have a background in textiles and apparel design, computer science, engineering or media arts. By the completion of the course students will have fundamental knowledge of electronic circuitry, programming, and "maker skills".

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**I SY E 520 – QUALITY ASSURANCE SYSTEMS**

3 credits.

Introduces engineers to applications of total quality concepts and tools to develop, implement, and maintain an effective quality assurance system in a manufacturing or service organization. Emphasis is on documentation development, team-based improvement strategies, and international quality standards.

**Requisites:** Junior standing and I SY E 315, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe and apply the basic elements of quality and environmental management systems, including the requirements and certification process of international standards such as ISO 9001 and ISO 14001 and industry-specific applications of these standards

Audience: Both Grad & Undergrad

2. Apply concepts and tools in the development, implementation, and maintenance of effective quality and environmental management systems in manufacturing and service organizations, including various approaches for management system documentation structure

Audience: Both Grad & Undergrad

3. Describe and explain strategic and competitive considerations in management system implementation and maintenance, including risk-based thinking and continual improvement

Audience: Both Grad & Undergrad

4. Develop and apply auditing techniques and skills

Audience: Both Grad & Undergrad

5. Demonstrate ability to synthesize and apply requirements for quality and environmental management considering organizational strategy, culture and constraints

Audience: Graduate

**I SY E 521 – MACHINE LEARNING IN ACTION FOR INDUSTRIAL ENGINEERS**

3 credits.

Principles, algorithms, and industrial engineering applications of machine learning. Predictive analytics, with a focus on combining data and models to improve decision-making. Methods include: statistics, linear regression, logistic regression, regularization, over-fitting, clustering, classification and regression trees, boosting, bagging, deep learning, and neural networks. Applications areas include: healthcare, transportation, and the public sector.

**Requisites:** (COMP SCI 200, 220, or place into COMP SCI 300), (I SY E 323 or I SY E/COMP SCI/E C E 524), and (I SY E 210, STAT 311, 324, STAT/MATH 309, or 431), grad/prof standing, member of Engr Guest Stdnts, or declared in Capstone Cert in AI for Engr Data Analytics

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify problems amenable to machine learning and the techniques required to solve those problems (regression vs. classification, regularization, bagging vs. boosting, etc.)

Audience: Both Grad & Undergrad

2. Apply appropriate analytical models to solve problems and improve decision-making using Python

Audience: Both Grad & Undergrad

3. Effectively communicate findings through both oral and written formats

Audience: Both Grad & Undergrad

4. Demonstrate an understanding of how industrial engineering techniques (e.g., optimization) are used to train machine learning models

Audience: Graduate

**ISY E/COMP SCI/E C E 524 – INTRODUCTION TO OPTIMIZATION**

3 credits.

Introduction to mathematical optimization from a modeling and solution perspective. Formulation of applications as discrete and continuous optimization problems and equilibrium models. Survey and appropriate usage of basic algorithms, data and software tools, including modeling languages and subroutine libraries.

**Requisites:** (COMP SCI 200, 220, 300, 301, 302, 310, or placement into COMP SCI 300) and (MATH 320, 340, 341, or 375) or graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Engage in topics about "optimization in practice".

Audience: Undergraduate

2. Use and analyze the results of state of the art optimization software.

Audience: Undergraduate

3. Use the GAMS modeling system and Jupyter notebooks (in conjunction with elementary Python) or Julia and JUMP.

Audience: Undergraduate

4. Design good models for realistic applications in engineering and the sciences.

Audience: Undergraduate

5. Develop a "commercial strength" application of optimization technology.

Audience: Undergraduate

**ISY E/COMP SCI/MATH/STAT 525 – LINEAR OPTIMIZATION**

3 credits.

Introduces optimization problems whose constraints are expressed by linear inequalities. Develops geometric and algebraic insights into the structure of the problem, with an emphasis on formal proofs. Presents the theory behind the simplex method, the main algorithm used to solve linear optimization problems. Explores duality theory and theorems of the alternatives.

**Requisites:** MATH 320, 340, 341, 375, or 443 or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use linear programming to formulate real world decision problems.

Audience: Both Grad & Undergrad

2. Apply algorithms to solve linear programming problems and demonstrate their correctness.

Audience: Both Grad & Undergrad

3. Combine different proving techniques explored in class in an original way to show new results.

Audience: Graduate

**I SY E/COMP SCI 526 – ADVANCED LINEAR PROGRAMMING**

3 credits.

Review of linear programming. Polynomial time methods for linear programming. Quadratic programs and linear complementarity problems and related solution techniques. Solution sets and their continuity properties. Error bounds for linear inequalities and programs. Parallel algorithms for linear and quadratic programs.

**Requisites:** STAT/COMP SCI/I SY E/MATH 525 and (COMP SCI 200, 220, 300, 301, 302, 310, or placement into COMP SCI 300) or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Use the theory of linear programming to prove general duality results

Audience: Undergraduate

2. Apply the concept of complementarity

Audience: Undergraduate

3. Analyze and develop algorithms for solving optimization and equilibrium problems

Audience: Undergraduate

4. Apply decomposition methods and other advanced algorithms for the solution of optimization and equilibrium problems

Audience: Undergraduate

5. Understand economic concepts and how they relate to optimization and equilibria

Audience: Undergraduate

6. Extend theory of linear programming into the framework of conic programming

Audience: Undergraduate

**I SY E/PSYCH 549 – HUMAN FACTORS ENGINEERING**

3 credits.

Analysis and design of man-machine systems using human performance models and data. Emphasis on systems involving communication and control. Projects using digital and analog computer simulation techniques for system design.

**Requisites:** I SY E/PSYCH 349, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the topics involved in cognitive human factors and design implications of these concepts

Audience: Both Grad & Undergrad

2. Describe the interactions between human operators and system components including the environment, technology, and organizations

Audience: Both Grad & Undergrad

3. Discuss different human factors perspectives regarding human error and limitations of human performance, especially as these relate to memory, decision-making, action selection, and workload and stress

Audience: Both Grad & Undergrad

4. Identify barriers and limitations to memory and how these must be accounted for in design of systems and displays

Audience: Both Grad & Undergrad

5. Articulate the role of simulation and modeling in system design involving human operators

Audience: Both Grad & Undergrad

6. Use cognitive engineering analysis methods to complete a detailed analysis of a real incident or accident including outlining each layer and component of system failure and proposing possible redesign solutions

Audience: Graduate

### **ISY E 552 – HUMAN FACTORS ENGINEERING DESIGN AND EVALUATION**

3 credits.

Evaluation, analysis, and design recommendations for improving human performance and productivity in applied settings. Collection of instrument-based and user survey data. Emphasis on ergonomics, human factors and sociotechnical systems engineering approaches and problems. Design project required.

**Requisites:** I SY E/PSYCH 349 and INTEREGR 397 (formerly E P D 397) or concurrent enrollment or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Apply observation and interview skills to understand customer needs and system interactions

Audience: Both Grad & Undergrad

2. Translate observation and interview data into models of customer requirements and system constraints

Audience: Both Grad & Undergrad

3. Communicate model content to the customer and to marketing, engineering, management, and other members of the design team

Audience: Both Grad & Undergrad

4. Translate work models into aesthetically appealing and functional design concepts and prototypes

Audience: Both Grad & Undergrad

5. Evaluate and iterate prototype designs into a system that satisfies customer requirements

Audience: Both Grad & Undergrad

6. Design a user study to resolve a design issue, such as the choice of opt-in or opt-out default

Audience: Graduate

### **ISY E 555 – HUMAN PERFORMANCE AND ACCIDENT CAUSATION**

3 credits.

A systems view of accident causation, with emphasis on the human performance limitations important in industrial and other accidents. Models of causation, data collection systems, economic evaluation, and safety programs. Small group projects.

**Requisites:** I SY E/PSYCH 349, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the rules and regulations governing accident investigations in different industries including transportation and healthcare

Audience: Both Grad & Undergrad

2. Describe the standard process for conducting an accident investigation

Audience: Both Grad & Undergrad

3. Describe basic accident investigation tools, methods and techniques

Audience: Both Grad & Undergrad

4. Discuss different human factors perspectives regarding the underlying causes of errors and accidents

Audience: Both Grad & Undergrad

5. Identify different approaches for redesigning systems to improve safety

Audience: Both Grad & Undergrad

6. Utilize accident investigation methods and tools to analyze a major accident to determine causes and corrective actions

Audience: Graduate

**I SY E 557 – HUMAN FACTORS ENGINEERING FOR HEALTHCARE SYSTEMS**

3 credits.

Introduction to the application of Human Factors Engineering theory and methods to the analysis and improvement of healthcare delivery systems.

**Requisites:** PSYCH/I SY E 349, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Explain Human Factors Engineering theories and methods as they pertain to the evaluation and design of healthcare sociotechnical systems

Audience: Both Grad & Undergrad

2. Select and critically evaluate the utility of key Human Factors Engineering concepts and tools for assessing and modeling healthcare delivery challenges in sociotechnical systems

Audience: Both Grad & Undergrad

3. Identify the impact of changes to the healthcare sociotechnical system at the individual and organizational level

Audience: Both Grad & Undergrad

4. Apply a Human Factors Engineering-based sociotechnical system approach to evaluate and design interaction between users and information technologies

Audience: Both Grad & Undergrad

5. Demonstrate the use of Human Factors Engineering techniques in solving healthcare delivery problems within the organizational, social, and physical contexts in information system design

Audience: Both Grad & Undergrad

6. Demonstrate ability to independently evaluate Human Factors Engineering research in healthcare

Audience: Graduate

**I SY E 562 – HUMAN FACTORS OF DATA SCIENCE AND MACHINE LEARNING**

3 credits.

An examination of the "human side" of data science. Issues of bias, fairness, trust, and understandability. Unique characteristics of behavioral data, such as representative sampling, human adaptation, and grouped data. Practical skills in behavioral data analytics with a focus on important conceptual, design, and ethical issues specific to behavioral data.

Survey of machine learning techniques including supervised learning, unsupervised learning, reinforcement learning, deep learning, and text analysis. Methods are contextualized through engineering case studies.

**Requisites:** (I SY E 210, E C E 331, MATH/STAT 310, STAT 312, or 340), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Consider human values and behavior in developing and using machine learning models

Audience: Both Grad & Undergrad

2. Apply a human-centered design process to data and algorithm-intensive products

Audience: Both Grad & Undergrad

3. Describe the basic elements of machine learning and their limits

Audience: Both Grad & Undergrad

4. Analyze a case study of machine learning deployed by a company and discuss strengths and limits of the deployment using the concepts of the course.

Audience: Graduate

### ISY E/B M E 564 – OCCUPATIONAL ERGONOMICS AND BIOMECHANICS

3 credits.

Introduces engineers how to design manufacturing and industrial operations in which people play a significant role, so that human capabilities are maximized, physical stress is minimized, and workload is optimized. Examples and topics emphasize industrial applications.

**Requisites:** PSYCH/I SY E 349 or B M E 315, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate jobs, equipment, tools, products, and environments, in which people play a significant role, for health and safety hazards and the risk of injuries and illnesses

Audience: Both Grad & Undergrad

2. Devise how to reduce or eliminate physical stresses and the risk of injuries and illnesses in jobs, equipment, tools, products, and environments

Audience: Both Grad & Undergrad

3. Design jobs, workspaces and products for a diverse work population, to accommodate the variability of human dimensions strength, endurance, and physical capacity to do work

Audience: Both Grad & Undergrad

4. Design jobs equipment, tools, products, and environments so that human capabilities are maximized, physical stress is minimized, and workload is optimized

Audience: Both Grad & Undergrad

5. Identify fundamental physiological principles and biomechanical theories that are germane to the evaluation, design and reduction or elimination of stresses and strain in jobs, equipment, tools, products, and environments

Audience: Graduate

### ISY E/E C E 570 – ETHICS OF DATA FOR ENGINEERS

3 credits.

Introduction to ethical issues in data engineering and principled solutions. Algorithmic fairness (individual fairness, group fairness, counterfactual fairness), differential privacy and its applications, and robustness.

**Requisites:** (I SY E 521, 562, M E/COMP SCI/E C E 532, or 539) and (E C E 331, MATH/STAT 309, STAT 311, MATH 331, or STAT/MATH 431), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the importance of ethical data science/engineering

Audience: Both Grad & Undergrad

2. Identify challenges of trustworthy data use in engineering such as fairness, privacy, and robustness

Audience: Both Grad & Undergrad

3. Apply the definitions of trustworthy data engineering to real-world datasets

Audience: Both Grad & Undergrad

4. Analyze the data analysis pipelines and evaluate the trustworthiness of their outcomes

Audience: Both Grad & Undergrad

5. Create proper data analysis pipelines with ethical considerations

Audience: Both Grad & Undergrad

6. Implement cutting-edge techniques to enhance the fairness, privacy, and robustness of data analysis processes

Audience: Graduate

7. Conduct independent research on emerging challenges in ethical data engineering

Audience: Graduate

**ISY E/N E 574 – METHODS FOR PROBABILISTIC RISK ANALYSIS OF NUCLEAR POWER PLANTS**

3 credits.

Methods for risk and reliability analysis of engineered systems, particularly as applied in the nuclear power industry. Fault trees and event trees, Bayesian data analysis, probabilistic risk management. Some familiarity with nuclear plant safety systems is helpful, but not required.

**Requisites:** (STAT/MATH 309, STAT 311, 224, 324, or STAT/MATH 431), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Correctly apply methods of fault tree, event-tree, data, and uncertainty analysis to evaluate potential risks of engineering systems

Audience: Both Grad & Undergrad

2. Recognize, formulate, and analyze risks of engineered systems

Audience: Both Grad & Undergrad

3. Explain the results of risk analysis to managers and other non-specialist decision-makers

Audience: Graduate

**ISY E 575 – INTRODUCTION TO QUALITY ENGINEERING**

3 credits.

Introduction to statistically based quality improvement methods useful in industrial settings; observational methods and design of experiments; experimentation to discover influential factors and to analyze sources of variation; robust products.

**Requisites:** (ISY E 210, MATH/STAT 310, STAT 312 or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Design experiments for various phases of engineering work, including new product design and development, process development, manufacturing process improvement, and health systems design and improvement

Audience: Both Grad & Undergrad

2. Analyze the results of experiments conducted at different phases of engineering work

Audience: Both Grad & Undergrad

3. Apply data analysis skills in statistical methodologies, graphical displays, and visual and inferential interpretations

Audience: Both Grad & Undergrad

4. Work effectively in an experiential project focused on applying appropriate statistical tools and techniques

Audience: Both Grad & Undergrad

5. Explain the eight phases of Six Sigma and apply these steps to a wide range of actual situations

Audience: Both Grad & Undergrad

6. Demonstrate ability to synthesize applications of statistical methodologies via analysis of current literature and case studies

Audience: Graduate

**ISY E 601 – SPECIAL TOPICS IN INDUSTRIAL ENGINEERING**

1-3 credits.

In various areas. Sample topics: "Simulation" and "Systems Design".

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**ISY E 602 – SPECIAL TOPICS IN HUMAN FACTORS**

3 credits.

Various special topics in human factors engineering. Course topic may vary from semester to semester. Different versions of this course may be offered in same semester.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in human factors engineering

Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in human factors engineering, using appropriate tools, processes, and/or software  
Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in human factors engineering

Audience: Graduate

**ISY E 603 – SPECIAL TOPICS IN ENGINEERING ANALYTICS AND OPERATIONS RESEARCH**

1-3 credits.

Various special topics in engineering analytics and operations research, such as machine learning, data management and analysis, optimization, etc.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in engineering analytics and operations research

Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in engineering analytics and operations research, using appropriate tools, processes, and/or software  
Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in engineering analytics and operations research

Audience: Graduate

**ISY E 604 – SPECIAL TOPICS IN MANUFACTURING AND SUPPLY CHAIN MANAGEMENT**

1-3 credits.

Various special topics in manufacturing systems and supply chain management, such as digital manufacturing technologies, Internet of Things (IoT), supply chain, etc.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in manufacturing and supply chain management

Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in manufacturing and supply chain management, using appropriate tools, processes, and/or software  
Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in manufacturing and supply chain management

Audience: Graduate

**ISY E 605 – COMPUTER INTEGRATED MANUFACTURING**

3 credits.

An introduction to computer-integrated design and manufacturing with a focus on manufacturing process planning. Emphasis on concurrent engineering principles, manufacturing process engineering, computer-aided process planning, NC programming, and CAM integration. Course provides experience with CAM software and NC machines.

**Requisites:** ISY E 315, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify and formulate manufacturing process and system level problems by applying principles of engineering and mathematics

Audience: Both Grad & Undergrad

2. Design the geometry of a mechanical component and develop computer code needed to fabricate the component  
Audience: Both Grad & Undergrad

3. Apply principles of engineering and mathematics to solve process- and system-level problems such as setting process parameters and evaluating the system performance

Audience: Both Grad & Undergrad

4. Demonstrate ability to combine different modeling and analysis methods explored in the class for manufacturing processes and systems to achieve strategies for performance improvement

Audience: Graduate

### **I SY E 606 – SPECIAL TOPICS IN HEALTHCARE SYSTEMS ENGINEERING**

1-3 credits.

Various special topics in healthcare systems engineering, such as human factors in healthcare settings, operations research applied to healthcare, etc.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in healthcare systems engineering

Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in healthcare systems engineering, using appropriate tools, processes, and/or software

Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in healthcare systems engineering

Audience: Graduate

### **I SY E/PHARMACY 608 – SAFETY AND QUALITY IN THE MEDICATION USE SYSTEM**

3 credits.

Addresses the problems of medication errors and quality in health care, problem resolutions, methods of assessment, and intervention implementation and quality management.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize types, sources, and contributors to error within the medication use system.

Audience: Undergraduate

2. Explain the influence of work systems and human factors on the development of safe processes for improving safety within the medication use system.

Audience: Undergraduate

3. Apply tools for identifying, analyzing, and anticipating errors within the medication use system (e.g., error reporting systems, root cause analysis, failure modes and effects analysis) and use these to develop safer processes.

Audience: Undergraduate

4. Describe characteristics of healthcare settings that contribute to improved quality and how pharmacists can influence the characteristics.

Audience: Undergraduate

5. Explain how quality indicators are developed, measured, and monitored in the US healthcare system.

Audience: Undergraduate

6. Describe and apply economic evaluation and pharmacoeconomic principles to evaluate pharmacy programs and drug products.

Audience: Undergraduate

### ISY E 612 – INFORMATION SENSING AND ANALYSIS FOR MANUFACTURING PROCESSES

3 credits.

Focuses on the sensing and multivariate data modeling and analysis techniques for monitoring, diagnosis, and quality improvement of manufacturing processes. The techniques introduced can find wide applications in health care, financial engineering, service industry applications, human factors, etc.

**Requisites:** I SY E/M E 512, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform data analysis and propose quality improvement plans

Audience: Both Grad & Undergrad

2. Develop, implement, and interpret advanced control charts for monitoring continuous and discrete quality characteristics and multivariate systems

Audience: Both Grad & Undergrad

3. Implement appropriate data reduction and data processing methods in statistical process control

Audience: Both Grad & Undergrad

4. Apply methods and tools to a real problem-solving experience via a course project

Audience: Graduate

### ISY E 615 – PRODUCTION SYSTEMS CONTROL

3 credits.

An intermediate to advanced course stressing the application of recent operations research techniques to production planning, scheduling and inventory control.

**Requisites:** I SY E 315, 320, and 323 and (STAT/MATH 310, STAT 312 or STAT/MATH 431), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply knowledge of math, science, and engineering principles to solve manufacturing, service, business, or societal operations problems

Audience: Both Grad & Undergrad

2. Identify, formulate, and solve manufacturing and service operations problems using appropriate data and analytics approaches

Audience: Both Grad & Undergrad

3. Identify opportunities and apply engineering solutions for system productivity and quality improvement

Audience: Both Grad & Undergrad

4. Apply the techniques, skills, and tools for engineering practice, such as modeling, design, simulation, and management

Audience: Both Grad & Undergrad

5. Apply advanced skills and tools for analysis, control and optimization of manufacturing and service systems operations

Audience: Graduate

### **I SY E 618 – QUALITY ENGINEERING AND QUALITY MANAGEMENT**

3 credits.

Strategic quality planning, change management, problem identification and solving, process improvement, and performance evaluation. Business and decision-making skills related to quality systems and process improvement.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Work effectively on a team-based experiential project focused on process design, analysis, and resource management and integrating the concepts of continual improvement, customer focus, and teamwork

Audience: Graduate

2. Apply problem solving and management/planning tools for effectively defining problems, feasible alternative solutions, and measurable goals in a real-world environment

Audience: Graduate

3. Demonstrate ability to lead an industry-based team project integrating contemporary change management frameworks and considering organizational culture

Audience: Graduate

4. Apply the basics of Factorial Design of Experiments (DOE) as a statistical tool for continuous process improvement

Audience: Graduate

### **I SY E 620 – SIMULATION MODELING AND ANALYSIS**

3 credits.

Introduction to simulation modeling and analysis techniques with application to production, logistics, service, and other systems. Emphasis on model building, application of basic statistical data analysis, and the use of simulation for design, evaluation, and improvement of such systems.

Introduction to available software. Case studies.

**Requisites:** (COMP SCI 200, 220, 300, 301, 302, or placement into COMP SCI 300) and (STAT 224, 312, 324, or STAT/MATH 310), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Identify the major capabilities and limitations of discrete-event simulation for modeling types of systems that industrial engineers commonly encounter

Audience: Both Grad & Undergrad

2. Model and run discrete-event simulation in practical situations

Audience: Both Grad & Undergrad

3. Identify the main assumptions underlying simulation models, and what can happen when these assumptions do not hold

Audience: Both Grad & Undergrad

4. Apply the results of the modeling process to management and other non-specialist users of engineering analyses

Audience: Both Grad & Undergrad

5. Apply experimental design or data analytics for systems comparison and output analysis of the simulation models

Audience: Both Grad & Undergrad

6. Apply simulation input/output techniques to model complicated stochastic systems such as manufacturing production systems and health care systems

Audience: Graduate

**ISY E 624 – STOCHASTIC MODELING TECHNIQUES**

3 credits.

Techniques for modeling systems in which uncertainty is an essential factor. Emphasizes why, how and when techniques can or cannot be applied, rather than their mathematical derivation. Case studies and/or examples from such areas as logistics, production, and service industries.

**Requisites:** (STAT/MATH 309, 311, or STAT/MATH 431) and (MATH 320, 340, 341, or 375), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and interpret basic concepts of probability, including random variables, and conditional probability, expectation, and variance

Audience: Both Grad & Undergrad

2. Analyze probability models such as the Markov chains, the exponential distribution, Poisson processes, and queuing models

Audience: Both Grad & Undergrad

3. Identify, formulate, and develop solution techniques for problems that can be modeled by stochastic models in various domains (engineering, computer science, supply chains, healthcare systems, operations research)

Audience: Both Grad & Undergrad

4. Recognize how and when to apply each type of probability model

Audience: Both Grad & Undergrad

5. Formulate mathematical formulations and apply proof techniques

Audience: Graduate

**ISY E 625 – LOGISTICS SYSTEMS DESIGN**

3 credits.

Practical methods for the planning, design and evaluation of complex logistics and distribution systems. Modeling techniques and solution approaches that reduce cumbersome details of logistics systems into models with a manageable number of parameters and decision variables.

It shows how the solutions to these models are interpreted into optimal rules that guide the operation, design or planning process. Practical methods for the planning, design and evaluation of complex logistics and distribution systems. Modeling techniques and solution approaches that reduce cumbersome details of logistics systems into models with a manageable number of parameters and decision variables. It shows how the solutions to these models are interpreted into optimal rules that guide the operation, design or planning process. Builds on knowledge of introductory programming such as Python, Matlab, or R.

**Requisites:** (ISY E 323 or E C E/COMP SCI/ISY E 524) and (ISY E 210, E C E 331, MATH/STAT 310, STAT 312, 324, or 340), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify decision problems for typical logistics systems

Audience: Both Grad & Undergrad

2. Establish optimization models for typical logistics systems

Audience: Both Grad & Undergrad

3. Use multiple methods to solve logistics system models

Audience: Both Grad & Undergrad

4. Explain the insights of solutions and apply them in realistic situations

Audience: Graduate

**I SY E/MATH/OTM/STAT 632 – INTRODUCTION TO STOCHASTIC PROCESSES**

3 credits.

Topics include discrete-time Markov chains, Poisson point processes, continuous-time Markov chains, and renewal processes. Applications to queueing, branching, and other models in science, engineering and business.

**Requisites:** (STAT/MATH 431, 309, STAT 311 or MATH 531) and (MATH 320, 340, 341, 375, 421 or 531) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recall and state the formal definitions of the mathematical objects and their properties for stochastic processes (e.g., discrete space Markov chains, Poisson processes, renewal processes, branching processes, etc.).

Audience: Both Grad & Undergrad

2. Use such definitions to argue that a mathematical object does or does not have the condition of being a particular type or having a particular property (e.g., irreducibility, aperiodicity, recurrence, transience, the Markov property, etc.).

Audience: Both Grad & Undergrad

3. Recall and state the standard theorems of stochastic processes. (e.g., laws of large numbers for Markov chains, existence of limiting/stationary distributions, law of large numbers for renewal processes, etc.) and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Both Grad & Undergrad

4. Construct mathematical arguments related to the above definitions, properties, and theorems, including the construction of examples and counterexamples.

Audience: Both Grad & Undergrad

5. Convey arguments in oral and written forms using English and appropriate mathematical terminology, notation and grammar.

Audience: Both Grad & Undergrad

6. Model simple real life situations by means of discrete-space stochastic processes and calculate probabilities associated with those processes.

Audience: Both Grad & Undergrad

7. Identify applications of course content in current areas of research.

Audience: Graduate

**I SY E/M E 641 – DESIGN AND ANALYSIS OF MANUFACTURING SYSTEMS**

3 credits.

Covers a broad range of techniques and tools relevant to the design, analysis, development, implementation, operation and control of modern manufacturing systems. Case studies assignments using industry data will be used to elaborate the practical applications of the theoretical concepts.

**Requisites:** I SY E 315, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify suitable analysis techniques to investigate processes related to manufacturing, planning, engineering or office operations within a manufacturing firm

Audience: Both Grad & Undergrad

2. Perform analysis to describe, predict and analyze behavior of a manufacturing system to meet desired managerial and economic objectives for a real-world or realistic manufacturing systems improvement project/case study

Audience: Both Grad & Undergrad

3. Develop recommendations that will improve manufacturing system performance (e.g. reduce flow time, increase throughput)

Audience: Both Grad & Undergrad

4. Collaborate effectively in teams to develop solutions to engineering problems and communicate findings effectively

Audience: Both Grad & Undergrad

5. Reflect on personal strengths and weaknesses with respect to team leadership and project management

Audience: Graduate

### ISY E/M E 643 – PERFORMANCE ANALYSIS OF MANUFACTURING SYSTEMS

3 credits.

Examines the state of the art in the use of stochastic network theory to develop performance models of modern manufacturing systems.

**Requisites:** (ISY E 624 or STAT/ISY E/MATH/OTM 632) and (COMP SCI 200, 220, 300, 301, 302, 400, or placement into COMP SCI 300), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Model a variety of manufacturing problems as stochastic models using Markov Chain and Process theory

Audience: Both Grad & Undergrad

2. Identify the basic assumptions underlying stochastic models and understand what can happen when these assumptions do not hold

Audience: Both Grad & Undergrad

3. Apply queueing theory to model manufacturing systems

Audience: Both Grad & Undergrad

4. Apply the line balancing method for assembly systems design

Audience: Both Grad & Undergrad

5. Perform cost analysis for manufacturing systems

Audience: Both Grad & Undergrad

6. Apply the analytical approaches of performance analysis for manufacturing systems to real industry cases

Audience: Both Grad & Undergrad

7. Apply advanced Markov process method to solve complicated performance evaluation problems encountered in manufacturing production systems

Audience: Graduate

### ISY E 645 – ENGINEERING MODELS FOR SUPPLY CHAINS

3 credits.

Provides an overview of engineering fundamentals behind supply chains.

Topics covered will include modeling and design of multi-stage production distribution systems, multi-echelon inventory models, theory of supply chain contracts, value of flexibility and information sharing in supply chains.

**Requisites:** ISY E 323 and ISY E 415, or graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Apply multiple forecasting methods for customer demand

Audience: Undergraduate

2. Identify and apply multiple inventory management models

Audience: Undergraduate

3. Identify the limitation of models and tune them for realistic cases

Audience: Undergraduate

4. Create and present reports for realistic inventory management policy

Audience: Undergraduate

5. Demonstrate ability to lead a team project to optimize realistic supply chain decisions with analytical tools and numerical simulation

Audience: Undergraduate

**I SY E 649 – INTERACTIVE DATA ANALYTICS**

3 credits.

A cognitive engineering approach to human-computer interaction and data visualization in particular. Includes a four-part description of effective visualization: design intent, data and application domain, representation and interface features, and human limits and capabilities. The philosophical perspective, scientific basis, and practical tools for effective data visualization and visual analytics. Data processing and how to create static graphs as well as web-based interactive visualizations using the statistical language R.

**Requisites:** I SY E/PSYCH 349 and (I SY E 210, E C E 331, MATH/STAT 310, STAT 312, 324, or 340), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No  
**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Approach visualization as a design process, using the critical response process and paper prototypes

Audience: Both Grad & Undergrad

2. Design visualizations for different audiences and different purposes

Audience: Both Grad & Undergrad

3. Use the concepts of abstraction and aggregation to translate raw data into meaningful information

Audience: Both Grad & Undergrad

4. Use the flexibility of the grammar of graphics to craft graphs for effective communication

Audience: Both Grad & Undergrad

5. Develop replicable data analyses and visualizations with R and RShiny

Audience: Both Grad & Undergrad

6. Create specialized data analytic visualizations such as time series decompositions and ROC curves

Audience: Graduate

**I SY E/PSYCH 653 – ORGANIZATION AND JOB DESIGN**

3 credits.

Design of productive organizations and people's roles within them. Issues including boundary location, organizational decision levels, autonomous work groups, implementation and diffusion. Roles of the union. Case studies.

**Requisites:** I SY E/PSYCH 349, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Apply the work system model

Audience: Both Grad & Undergrad

2. Apply a variety of models and theories of job and organization design to answer questions such as, "What makes for a good job?" and "What makes for a bad job?"

Audience: Both Grad & Undergrad

3. Apply interview and survey methods for analyzing jobs

Audience: Both Grad & Undergrad

4. Identify approaches to implement job redesign

Audience: Both Grad & Undergrad

5. Identify societal trends related to job design

Audience: Both Grad & Undergrad

6. Identify similarities and differences between various models and theories of job and organization design

Audience: Graduate

**ISY E/B M E 662 – DESIGN AND HUMAN DISABILITY AND AGING**

3 credits.

Design of products for persons with physical, sensory or cognitive impairments is covered as well as the design of standard mass market products. Interdisciplinary teams explore specific disabilities, then design a standard mass market product in competition with each other.

**Requisites:** Junior standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the access and usability issues that users with physical, sensory, or cognitive impairments due to age or permanent or temporary disability might experience when interacting with everyday products and environmental designs

Audience: Both Grad & Undergrad

2. Apply human factors principles of universal design to describe redesign solutions for common products and environmental designs to improve accessibility for all users

Audience: Both Grad & Undergrad

3. Identify barriers to access for users based on specific disabilities

Audience: Both Grad & Undergrad

4. Articulate common misconceptions and biases related to users with disabilities and use various data sources to discuss the reality of designing for users with disabilities or impairments

Audience: Both Grad & Undergrad

5. Identify usability issues for mass-market products and environmental designs using universal design and basic access principles

Audience: Both Grad & Undergrad

6. Propose methods for improving accessibility and usability using universal design and basic access principles

Audience: Both Grad & Undergrad

7. Articulate how social, institutional, and organizational structures and insufficiently designed systems and environments disadvantage various user groups, with special focus on aging and disabled users

Audience: Graduate

**ISY E 699 – ADVANCED INDEPENDENT STUDY**

1-5 credits.

Under faculty supervision.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct and report on graduate-level industrial engineering research

Audience: Graduate

2. Independently develop industrial engineering research questions

Audience: Graduate

3. Appropriately utilize online and library resources

Audience: Graduate

**ISY E 702 – GRADUATE COOPERATIVE EDUCATION PROGRAM**

1-2 credits.

Work experience that combines classroom theory with practical knowledge of operations to provide students with a background on which to develop and enhance a professional career. The work experience is tailored for MS students from within the U.S. as well as eligible international students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Graduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Graduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Graduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Graduate

**I SY E/POP HLTH 703 – QUALITY OF HEALTH CARE: EVALUATION AND ASSURANCE**

1-3 credits.

Implementation, oversight, and management of quality-oriented activities in health care settings. Overview of current and historical activities, approaches, and issues confronting health care related to quality assessment, assurance, and improvement.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Understand and communicate the conceptualization and measurement of quality of healthcare and patient safety.

Audience: Graduate

2. Illustrate basic concepts and methods in quality improvement as applied to current issues in healthcare.

Audience: Graduate

3. Demonstrate an understanding of the diverse perspectives that can be used to address quality and safety issues in different healthcare organizations.

Audience: Graduate

**I SY E/C&E SOC/N E/SOC 708 – SOCIETAL RISK MANAGEMENT OF TECHNOLOGICAL HAZARDS**

3 credits.

Issues involved in decision-making regarding technological risks and risk management in areas such as nuclear power, hazardous waste disposal, and pollution control. Risk perception and cognitive biases; risk analysis and decision analysis; political issues in risk management; regulatory mechanisms; and risk communication. Selected case studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**I SY E/COMP SCI 719 – STOCHASTIC PROGRAMMING**

3 credits.

Stochastic programming is concerned with decision making in the presence of uncertainty, where the eventual outcome depends on a future random event. Topics include modeling uncertainty in optimization problems, risk measures, stochastic programming algorithms, approximation and sampling methods, and applications. Students are strongly encouraged to have knowledge of linear programming (e.g., MATH/COMP SCI/I SY E/STAT 525) and probability and statistics (e.g., MATH/STAT 431). Knowledge of integer optimization (MATH/COMP SCI/I SY E 728) is helpful, but not required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Learn the terms, basic capabilities, and limitations of stochastic programming models

Audience: Graduate

2. Formulate stochastic programming models

Audience: Graduate

3. Implement the algorithms used to solve stochastic programming problems

Audience: Graduate

4. Learn principles of decomposition algorithms for solving large-scale optimization problems

Audience: Graduate

**I SY E/INFO SYS 722 – COMPUTER-BASED DATA MANAGEMENT**

3 credits.

Use, control and administration of centralized and distributed data bases. Topics include the definition, design, creation, revision, interrogation, update, security and integrity of data bases.

**Requisites:** Graduate/professional standing and INFO SYS 371

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### ISY E/COMP SCI 723 – DYNAMIC PROGRAMMING AND ASSOCIATED TOPICS

3 credits.

General and special techniques of dynamic programming developed by means of examples. Shortest-path algorithms. Deterministic equipment replacement models. Resource allocation problem. Traveling-salesman problem. Knapsack problem. Analysis of inventory systems. General stochastic formulations. Markovian decision processes. Students are strongly encouraged to have knowledge of mathematical optimization (e.g., COMP SCI/ISY E/MATH/STAT 525, ISY E 623, COMP SCI/ISY E/MATH/STAT 726), knowledge of analysis (e.g., MATH/STAT 431 or 521) and programming ability (e.g., COMP SCI 200 or 301)

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify basic components, such as the state space, of a dynamic program

Audience: Graduate

2. Formulate and solve dynamic programs under different performance criteria such as finite horizon discounted reward/cost criteria

Audience: Graduate

3. Apply dynamic programming tools and concepts in `traditional' industrial engineering applications such as supply chain, manufacturing, and healthcare

Audience: Graduate

### ISY E/COMP SCI/MATH/STAT 726 – NONLINEAR OPTIMIZATION I

3 credits.

Theory and algorithms for nonlinear optimization, focusing on unconstrained optimization. Line-search and trust-region methods; quasi-Newton methods; conjugate-gradient and limited-memory methods for large-scale problems; derivative-free optimization; algorithms for least-squares problems and nonlinear equations; gradient projection algorithms for bound-constrained problems; and simple penalty methods for nonlinearly constrained optimization. Students are strongly encouraged to have knowledge of linear algebra and familiarity with basic mathematical analysis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ISY E/COMP SCI 727 – CONVEX ANALYSIS

3 credits.

Convex sets in finite-dimensional spaces: relative interiors, separation, set operations. Convex functions: conjugacy, subdifferentials and directional derivations, functional operations, Fenchel-Rockafellar duality. Applications to operations research and related areas. Students taking this course are strongly encouraged to have had a course in basic analysis (e.g. MATH 521) and a course in linear algebra (e.g., MATH 340).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ISY E/COMP SCI/MATH 728 – INTEGER OPTIMIZATION

3 credits.

Introduces optimization problems over integers, and surveys the theory behind the algorithms used in state-of-the-art methods for solving such problems. Special attention is given to the polyhedral formulations of these problems, and to their algebraic and geometric properties.

Applicability of Integer Optimization is highlighted with applications in combinatorial optimization. Key topics include: formulations, relaxations, polyhedral theory, cutting planes, decomposition, enumeration. Students are strongly encouraged to have knowledge of Linear Programming (e.g., MATH/COMP SCI/ISY E/STAT 525), including algorithms, duality and polyhedral theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and explain the basics of polyhedral theory, which consists in the study of systems of linear inequalities both from an algebraic and a geometric point of view

Audience: Graduate

2. Define perfect formulations and identify what properties are desirable in an integer programming formulation of a problem

Audience: Graduate

3. Explain how valid inequalities can be used as cutting planes to strengthen integer programming formulations

Audience: Graduate

**I SY E/M H R 729 – BEHAVIORAL ANALYSIS OF MANAGEMENT DECISION MAKING**

3 credits.

Examination of behavioral science literature dealing with the processes by which individuals, small groups and organizations make decisions. Understanding decision-making behavior in order to improve managerial performance; modeling decision-making processes for systems design and theory building purposes. Knowledge of statistics strongly encouraged such as STAT 301.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**I SY E/COMP SCI/MATH 730 – NONLINEAR OPTIMIZATION II**

3 credits.

Theory and algorithms for nonlinearly constrained optimization. Relevant geometric concepts, including tangent and normal cones, theorems of the alternative, and separation results. Constraint qualifications. Geometric and algebraic expression of first-order optimality conditions. Second-order optimality conditions. Duality. Nonlinear programming algorithms: merit functions and filters; interior-point, augmented Lagrangian, and sequential quadratic programming algorithms.

**Requisites:** STAT/COMP SCI/I SY E/MATH 726

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**I SY E 790 – MASTER'S RESEARCH AND THESIS**

1-9 credits.

Directed Master's-level research projects as arranged with instructor.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate an ability to formulate, analyze, and independently solve advanced industrial engineering problems  
Audience: Graduate

2. Communicate research results in writing and/or technical presentations  
Audience: Graduate

**I SY E 823 – SPECIAL TOPICS IN OPERATIONS RESEARCH**

1-3 credits.

Subjects vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Apply advanced operations research tools to solve a variety of industrial engineering problems  
Audience: Graduate

2. Analyze rigorously the methods used in operations research  
Audience: Graduate

**I SY E/PSYCH 854 – SPECIAL TOPICS IN ORGANIZATION DESIGN**

1-3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Apply advanced organizational design tools to solve a variety of industrial engineering problems  
Audience: Graduate

2. Analyze rigorously the methods used in organizational design  
Audience: Graduate

**I SY E/PSYCH 859 – SPECIAL TOPICS IN HUMAN FACTORS ENGINEERING**

1-3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ISY E/POP HLTH 875 – COST EFFECTIVENESS ANALYSIS IN HEALTH AND HEALTHCARE

3 credits.

Basic ideas and tools of cost effectiveness analysis as applied in evaluating medical technologies. Addresses special problems and methods in assessing diagnostic technologies, including ROC analysis, and in measuring health for technology assessment. Uses "classical" and current journal literature.

**Requisites:** SOC/POP HLTH 797 and POP HLTH/B M I 552

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply basic concepts of economic analysis to the assessment of medical technologies and healthcare interventions more broadly

Audience: Graduate

2. Examine health outcomes on a range from objective measures of physical systems to subjective preference-based measures of health utility and describe the benefits and limitations of using quality-adjusted life years (QALYs) as a health outcome measure

Audience: Graduate

3. Explain why we seek to obtain estimates of the "opportunity cost" of using health care resources, describe the process of "costing" in economic assessments of medical technologies and identify useful sources of information for obtaining cost information (and their limitations)

Audience: Graduate

4. Describe how primary data from randomized controlled trials and observational studies can be designed to assess medical technologies and explain the advantages and disadvantages of different designs in terms of their internal and external validity and decision-relevance

Audience: Graduate

5. Describe how evidence from secondary data can be integrated using meta-analysis and decision-analytic modeling methods to assess medical technologies and demonstrate basic ability to design and execute simple decision tree and Markov models for cost-effectiveness analysis

Audience: Graduate

### ISY E 890 – PRE-DISSERTATOR'S RESEARCH

1-9 credits.

Directed PhD-level research projects as arranged with faculty advisor.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate an ability to formulate, analyze, and independently solve advanced industrial engineering problems

Audience: Graduate

2. Communicate research results in writing and/or technical presentations

Audience: Graduate

### ISY E 961 – GRADUATE SEMINAR IN INDUSTRIAL ENGINEERING

1-3 credits.

Topics vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe modern challenges in industrial engineering

Audience: Graduate

### ISY E 990 – RESEARCH AND THESIS

1-6 credits.

Directed PhD-level research projects as arranged with faculty advisor.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate an ability to formulate, analyze, and independently solve advanced industrial engineering problems

Audience: Graduate

2. Communicate research results in writing and/or technical presentations

Audience: Graduate

### ISY E 999 – ADVANCED INDEPENDENT STUDY

1-6 credits.

Under faculty supervision.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Conduct and report on graduate-level industrial engineering research

Audience: Graduate

2. Independently develop industrial engineering research questions

Audience: Graduate

3. Appropriately utilize online and library resources

Audience: Graduate

# INFORMATION SYSTEMS (INFO SYS)

## INFO SYS 322 – INTRODUCTION TO DATABASES

3 credits.

Introduction to database management systems with a focus on relational databases. Covers designing, creating, populating, managing, and retrieving data from databases. SQL will be used with a focus on querying for business applications and intelligence, data retrieval for summary reports, and data visualization. Offers a brief introduction to non-relational databases for business applications.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement data modeling and relationships in relational database management systems.

Audience: Undergraduate

2. Use Create, Read, Update and Delete (CRUD) operations in SQL-like databases.

Audience: Undergraduate

3. Query, create reports and use data visualization for business intelligence.

Audience: Undergraduate

4. Identify how professionals use and interact with databases in the workplace.

Audience: Undergraduate

## INFO SYS 352 – DIGITAL STRATEGY

3 credits.

Focus on the economic and technical concepts behind emerging information systems. Industry cases covering platforms, online markets, artificial intelligence, and business analytics. Caters to interests in technology consulting.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize emerging technologies in information systems and their underlying economic concepts.

Audience: Undergraduate

2. Analyze industry examples of corporate strategies to best adopt, implement, maintain and grow investments in digitization.

Audience: Undergraduate

3. Communicate the technical, social, and economic implications of digital technology investment effectively.

Audience: Undergraduate

4. Identify and evaluate reliable information and data sources for advances in digital technologies.

Audience: Undergraduate

## INFO SYS 365 – CONTEMPORARY TOPICS

1-3 credits.

Exploration of subject areas possibly to be introduced into the business curriculum.

**Requisites:** Sophomore standing or declared in undergraduate Business Exchange program

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

## INFO SYS 371 – TECHNOLOGY OF COMPUTER-BASED BUSINESS SYSTEMS

3 credits.

Focus is on developing applications and business information systems on the web using a variety of programming languages and tools. Emphasis on deployment as well as design concepts.

**Requisites:** COMP SCI 301 or 220

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate principles of professional quality web page development and deployment.

Audience: Undergraduate

2. Apply mechanisms of web page development including front end presentation, access control for an application back-end, and the management of information exchange.

Audience: Undergraduate

3. Articulate how to use computer technologies to link business data and decision needs to web-based system design.

Audience: Undergraduate

**INFO SYS 423 – DIGITAL PLATFORM ANALYTICS**

3 credits.

An introduction to data analysis procedures covering topics including: data collection, pre-processing, analysis, and presentation. Content covers important data analysis concepts, such as structured and unstructured data. Learn about supervised, unsupervised learning methods and advanced analytics topics, such as text mining, recommendation systems, and algorithm bias.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize and apply fundamental data analysis procedures, including data collection, pre-processing, analysis, and presentation.

Audience: Undergraduate

2. Analyze structured and unstructured data in a variety of contexts.

Audience: Undergraduate

3. Develop supervised and unsupervised data mining skills, including linear regression, logistics regression, decision tree, KNN, K-means, and simple text mining techniques.

Audience: Undergraduate

4. Evaluate data analysis frontiers, including recommendation systems, data ethics, privacy, and algorithm bias.

Audience: Undergraduate

**INFO SYS 424 – SYSTEMS ANALYSIS AND DESIGN**

3 credits.

Applied principles and techniques of information systems development including requirements identification and analysis, process and data modeling, team communication and collaboration, and system testing.

**Requisites:** INFO SYS 322 (422 prior to Fall 2023) and INFO SYS 371**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate how to manage data, model information, and apply appropriate information technology to create effective business solutions

Audience: Undergraduate

2. Demonstrate how to use computer technologies to analyze business problems and processes

Audience: Undergraduate

3. Describe the Systems Development Life Cycle (SDLC) as a comprehensive project management framework for the analysis, design, and implementation of computer-based solutions

Audience: Undergraduate

4. Design and implement computer-based information systems which support business operations, decision-making, and planning

Audience: Undergraduate

5. Develop proficiency in project management and communication skills for the management of information systems

Audience: Undergraduate

**INFO SYS/ISY E 722 – COMPUTER-BASED DATA MANAGEMENT**

3 credits.

Use, control and administration of centralized and distributed data bases. Topics include the definition, design, creation, revision, interrogation, update, security and integrity of data bases.

**Requisites:** Graduate/professional standing and INFO SYS 371

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2020

**INFO SYS 723 – TEXT ANALYTICS AND BUSINESS APPLICATION**

3 credits.

An introduction to text mining and natural language processing for business applications. Provides an overview of text data and steps to make it usable and approaches for making text data useful in descriptive and predictive analytics applications. Topics include representation approaches, topic modeling, and an overview of key applications of natural language processing, such as chatbots and recommender systems.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Retrieve, assemble, and clean text data for use in analytics applications.

Audience: Graduate

2. Utilize text representation approaches, including the bag of words and Term Frequency - Inverse Document Frequency (TF-IDF), for visualizing text data.

Audience: Graduate

3. Build classification and regression models using features created from text data.

Audience: Graduate

4. Utilize Latent Dirichlet Application (LDA) for topic modeling in the context of a business application.

Audience: Graduate

**INFO SYS 765 – CONTEMPORARY TOPICS**

1-3 credits.

Exploration of subject areas possibly to be introduced into the business curriculum.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## INTEGRATED ARTS (INTEGRAT)

**INTEGRAT 110 – THE STUDIO SEMINAR: MAPPING YOUR CREATIVE PRACTICE**

1 credit.

Residents of The Studio: Creative Arts Community engage in an interdisciplinary hands-on approach to the creative arts and gain familiarity with the wide variety of arts disciplines on campus.

**Requisites:** Member of The Studio: Creative Arts Community

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**INTEGRAT 112 – THE STUDIO PRESENTS**

1 credit.

The residents of The Studio: Creative Arts Community engage in an interdisciplinary, hands-on experience of creative arts and professional practice, including developing and showing their original work in the local community.

**Requisites:** Member of The Studio: Creative Arts Community

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**INTEGRAT 310 – INTERDISCIPLINARY ARTIST IN RESIDENCE STUDIO**

1-3 credits.

Guest artists will offer interdisciplinary studio courses on topics appropriate to their specializations. See [go.wisc.edu/artsresidency](http://go.wisc.edu/artsresidency) for information on specific residencies.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**INTEGRAT 312 – INTERDISCIPLINARY ARTIST IN RESIDENCE LECTURE**

1-3 credits.

Guest artists will offer interdisciplinary courses on topics appropriate to their specializations. see [go.wisc.edu/artsresidency](http://go.wisc.edu/artsresidency) for information on specific residencies. Requisites vary according to topic

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**INTEGRAT 330 – SPECIAL TOPICS IN INTEGRATED ARTS**

1-3 credits.

Specialized subject matter in the areas of interdisciplinary or integrated arts. Requisite varies according to topic.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**INTEGRAT 610 – INTERDISCIPLINARY ARTIST IN RESIDENCE STUDIO**

1-3 credits.

Guest artists will offer interdisciplinary studio courses on topics appropriate to their specializations. See [go.wisc.edu/artsresidency](http://go.wisc.edu/artsresidency) for information on specific residencies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

## INTEGART 612 – INTERDISCIPLINARY ARTIST IN RESIDENCE LECTURE

1-3 credits.

Guest artists will offer interdisciplinary lecture courses on topics appropriate to their specializations. See [go.wisc.edu/artsresidency](http://go.wisc.edu/artsresidency) for information on specific residencies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

## INTEGART/M H R 632 – INTRODUCTION TO ARTS ENTREPRENEURSHIP

3 credits.

An overview and foundation in preparation for developing, launching, or advancing innovative projects in arts, culture, design, and humanities. Learn the unique contexts and challenges of creative careers. Develop creative project goals while gaining an understanding of the nature and structure of arts entrepreneurship in a variety of sectors - for-profit, nonprofit, government, and hybrid.

**Requisites:** Sophomore standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize and equitable entrepreneurship opportunities in arts and cultural expression through projects, partnerships, initiatives, and organizations.

Audience: Both Grad & Undergrad

2. Assess challenges and opportunities in the arts and cultural sector and develop them into project business plans.

Audience: Both Grad & Undergrad

3. Analyze case studies that lead to the discovery, acquisition, and alignment of key resources necessary for a concept's success (time, money, space, equipment, talent.)

Audience: Graduate

4. Communicate and present a clear and compelling project plan which includes narrative, budget, marketing plan, fund development plan, and the accompanying strategies in written and spoken form.

Audience: Both Grad & Undergrad

5. Evaluate a project's outcomes in ways that consider equity, inclusivity, and diversity as a measure of current and future success.

Audience: Both Grad & Undergrad

6. Illustrate acquired skills and learning by creating a web-based professional portfolio with work samples.

Audience: Both Grad & Undergrad

## INTEGART/M H R 636 – ENTREPRENEURSHIP IN ARTS & CULTURAL ORGANIZATIONS

3 credits.

Become familiar with basic entrepreneurship principles and value proposition design techniques in social entrepreneurship settings with attention to the perspective of arts and cultural organizations. Content includes business model development, customer-driven innovation, lean startup practices, organizational capacity for entrepreneurial action, team performance, the structure of alliances and partnerships and funding mechanisms in the sector.

**Requisites:** Junior standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe the key elements of a value proposition canvas

Audience: Both Grad & Undergrad

2. Articulate the role of mission statements in social-purpose organizations, implications of entity choices, and sources of funding for nonprofit and related organizations in the arts and cultural space

Audience: Both Grad & Undergrad

3. Identify and analyze business models used in the creative economy across nonprofit and social-purpose organizations

Audience: Both Grad & Undergrad

4. Define the design thinking problem-solving approach and outline key elements of the process

Audience: Both Grad & Undergrad

5. Apply appropriate research methods (ethnographic versus market research) and invoke related tools (literature reviews, observational note-taking, etc.) to help test hypothesis in the development of new products/services for arts and cultural organizations

Audience: Both Grad & Undergrad

6. Analyze arguments about the role of entrepreneurial action and funding for arts and cultural organizations in the context of other disciplinary approaches in the visual and performing arts, design, and related fields

Audience: Graduate

7. Design a value proposition canvas for an entrepreneurial cultural/creative organization in the Madison community that will inform product/service development for a distinct customer segment.

Audience: Both Grad & Undergrad

8. Rapidly test emergent ideas in the field with (potential) customers using a design thinking approach that includes creation of "prototypes" (storyboards, role play, 3D printed objects, etc.) and interpretation of results

Audience: Both Grad & Undergrad

9. Make connections between the world of ideas and concepts with day-to-day issues and concerns in cultural/creative organizations. Where possible, encourage/highlight/expose new connection points (e.g., "I never thought of it that way...")

Audience: Both Grad & Undergrad

10. Develop teamwork, written and oral communication skills

Audience: Both Grad & Undergrad

# INTEGRATED LIBERAL STUDIES (ILS)

## ILS 110 – FIRST-YEAR TOPICS SEMINAR IN INTEGRATED LIBERAL STUDIES

3 credits.

A first-year seminar that explores how people make meaning across times, cultures, media, and disciplines.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and explain how people make meaning across times, cultures, media, and disciplines at an elementary level

Audience: Undergraduate

2. Critically analyze diverse approaches to how people make meaning in past and present at an elementary level.

Audience: Undergraduate

3. Begin to recognize and synthesize diverse types of knowledge and disciplinary approaches to how people make meaning.

Audience: Undergraduate

## ILS/ENVIR ST 126 – PRINCIPLES OF ENVIRONMENTAL SCIENCE

4 credits.

Relates principles of environmental science to our daily activities, with an eye to sustainability, conservation, and systems thinking. Introduces science as a process of inquiry and discovery rather than just a pre-established set of facts. Topics relate to energy, water, and land use, and include food, electric power, materials, buildings, transportation, and waste.

**Requisites:** None

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply foundational principles of Environmental Science to practices such as sustainability, conservation, and systems thinking

Audience: Undergraduate

2. Practice science as a process of inquiry and discovery, using the UW-Madison campus as a living laboratory

Audience: Undergraduate

3. Connect campus systems to wider environmental issues relating to energy, water, land use, and waste

Audience: Undergraduate

4. Analyze sustainability issues and practices using a systems-based approach

Audience: Undergraduate

5. Explain the social, economic, and environmental dimensions of the sustainability challenges of operating a large public research institution

Audience: Undergraduate

**ILS 153 – WAYS OF KNOWING IN THE SCIENCES**

4 credits.

Introduces science as a process of inquiry and discovery, not as a pre-established set of facts. Emphasizes hands-on learning in both laboratory and lecture environments with small group work and interactive discussion.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and explain how scientists make sense of the natural world.

Audience: Undergraduate

2. Identify and evaluate the use of evidence-based arguments in science, including quantitative, spatial, and statistical thinking.

Audience: Undergraduate

3. Critically analyze what science is and what it is not.

Audience: Undergraduate

4. Demonstrate the ability to recognize sloppy, or fake, science on the basis of logical reasoning.

Audience: Undergraduate

5. Distinguish between scientific ways of knowing and other ways of knowing.

Audience: Undergraduate

6. Explain how science interacts with economics, social norms, culture, politics, and religion, all of which affects both the trajectories and public perceptions of scientific inquiry.

Audience: Undergraduate

7. Recognize the role of, and need for, scientific knowledge in human flourishing.

Audience: Undergraduate

**ILS 198 – DIRECTED STUDY**

1-3 credits.

Individual mentored study with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2009**ILS 199 – DIRECTED STUDY**

1-3 credits.

Individual mentored study with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2015**ILS 200 – CRITICAL THINKING AND EXPRESSION**

3 credits.

Explores the three modes of argument and expression: verbal, visual, numerical. Engages in critical thinking about how these modes are structured and used. Practice in, and interpretation of, the three modes.

**Requisites:** Satisfied Communications A requirement**Course Designation:** Gen Ed – Communication Part B

Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and explain how people think critically and analytically across times, cultures, media, and disciplines.

Audience: Undergraduate

2. Critically analyze diverse approaches to how people communicate in written and oral modes.

Audience: Undergraduate

3. Apply critical and analytical thinking to written and oral modes of communication.

Audience: Undergraduate

4. Recognize and evaluate diverse types of critical thought across many different modes of expression, including written, oral, artistic, and mass media.

Audience: Undergraduate

**ILS 201 – WESTERN CULTURE: SCIENCE, TECHNOLOGY, PHILOSOPHY I**

3 credits.

Western science and technology in the making. Major developments viewed in philosophical and social context, from antiquity to 17th century.

**Requisites:** Not open to students with credit for HIST SCI 201.

**Course Designation:** Breadth – Natural Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and explain critical developments in how the natural world has been analyzed and understood across premodern and early modern times and cultures.

Audience: Undergraduate

2. Identify and explain how science and its history have served a wide range of purposes in the premodern and early modern periods.

Audience: Undergraduate

3. Recognize and evaluate how premodern and early modern science has been deeply shaped by its historical, social, cultural, intellectual, and material contexts.

Audience: Undergraduate

4. Interpret and evaluate historical sources to construct persuasive arguments concerning science and its history in the premodern and early modern periods.

Audience: Undergraduate

**ILS 202 – WESTERN CULTURE: SCIENCE, TECHNOLOGY, PHILOSOPHY II**

3 credits.

Western science and technology in the making. Major developments viewed in philosophical and social context from the 17th to early twentieth century.

**Requisites:** Not open to students with credit for HIST SCI 202 or 404

**Course Designation:** Breadth – Natural Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and explain critical developments in how the natural world has been analyzed and understood in early modern and modern periods and cultures.

Audience: Undergraduate

2. Identify and explain how science and its history have served a wide range of purposes in early modern and modern periods.

Audience: Undergraduate

3. Recognize and evaluate how early modern and modern science has been deeply shaped by its historical, social, cultural, intellectual, and material contexts.

Audience: Undergraduate

4. Interpret and evaluate historical sources to construct persuasive arguments concerning science and its history in the early modern and modern periods.

Audience: Undergraduate

**ILS 203 – WESTERN CULTURE: LITERATURE AND THE ARTS I**

3 credits.

The development of literature and the arts in the ancient and medieval world, including Akhenaton's Egypt, Homer's Troy, Euripides' Athens, Virgil's Rome, and Dante's Florence. Literature and art in the context of society and ideas.

**Requisites:** None

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate an understanding of major cultures, events, art, and literature within the ancient and premodern history of the Mediterranean world and the Near East.

Audience: Undergraduate

2. Demonstrate skills in critical reading, thinking, and communication about literature, art, and culture.

Audience: Undergraduate

3. Evaluate and critique the historical conditions that shape your own worldview through the humanistic study of ancient and premodern cultures.

Audience: Undergraduate

4. Demonstrate critical acumen, cultural sensitivity, empathy, curiosity, and intellectual grounding through the study of ancient and premodern art, literature, and culture..

Audience: Undergraduate

**ILS 204 – WESTERN CULTURE: LITERATURE AND THE ARTS II**

3-4 credits.

The development of literature and the arts from the Renaissance to the modern period, including such figures as Shakespeare and Michelangelo through T.S. Eliot and Picasso. Literature and art in the context of society and ideas.

**Requisites:** None

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and evaluate early modern and modern art and literature in relation to the cultures that produced them.

Audience: Undergraduate

2. Demonstrate an understanding of historical and contemporary interpretations of early modern and modern art and literature.

Audience: Undergraduate

3. Demonstrate an understanding of the way that culture shapes the form, content, interpretation, and reception of art and literature.

Audience: Undergraduate

4. Critically evaluate both the contributions and shortcomings of "Western" culture and its history.

Audience: Undergraduate

5. Analyze, evaluate, and integrate multi-disciplinary approaches to human endeavor.

Audience: Undergraduate

**ILS 205 – WESTERN CULTURE: POLITICAL, ECONOMIC, AND SOCIAL THOUGHT I**

3 credits.

The development of Western political, economic and social thought, from its origins in classic Greece and the Judaeo-Christian tradition, through Rome and the Medieval period, to the Renaissance and Reformation.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and explain critical developments in the history of western social, economic, and political thought from antiquity through the Middle Ages.

Audience: Undergraduate

2. Interpret and evaluate ideas and arguments from western social, economic, and political thought from antiquity through the Middle Ages.

Audience: Undergraduate

3. Recognize and evaluate how ancient and medieval social, economic, and political thought interacted with its historical context.

Audience: Undergraduate

**ILS 206 – WESTERN CULTURE: POLITICAL, ECONOMIC, AND SOCIAL THOUGHT II**

3 credits.

The development of Western political, economic and social thought from the Reformation to the present day: the origins, logic and evolution of liberalism, Marxism, and organic conservatism as the principal systems of thought of the modern age.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify and explain critical developments in the history of western social, economic, and political thought from the Renaissance through the 19th or 20th centuries.

Audience: Undergraduate

2. Interpret and evaluate ideas and arguments from western social, economic, and political thought from the Renaissance through the 19th or 20th centuries.

Audience: Undergraduate

3. Recognize and evaluate how Renaissance and modern, economic, and political thought interacted with its historical context.

Audience: Undergraduate

**ILS/RELIG ST 234 – GENRES OF WESTERN RELIGIOUS WRITING**

3 credits.

Explores literary forms through which religions originating in western culture convey ideas. Focuses on Jewish, Christian, Muslim and related religious texts.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed – Communication Part B

Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and explain significant genres of religious writing.

Audience: Undergraduate

2. Identify ways in which written religious expressions are employed and deployed across various contexts and themes, such as pluralism, authority, race, identity, and violence.

Audience: Undergraduate

3. Demonstrate proficiency in close reading, interpretation, and written and oral analysis

Audience: Undergraduate

4. Demonstrate proficiency in categorizing, analyzing, and comparing diverse systems of value and belief in a variety of contexts.

Audience: Undergraduate

**ILS 253 – LITERATURE AND SOCIETY**

3 credits.

Representative episodes in the interaction of literature and society, organized either around a set of social institutions and their literary connections or around a set of literary forms and their social connections.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Analyze literary works from an interdisciplinary perspective with an emphasis on their interaction with society, including social institutions.

Audience: Undergraduate

2. Identify and explain historical and cultural developments in the interrelationship between literature and society.

Audience: Undergraduate

3. Demonstrate an understanding of how literature and society interact.

Audience: Undergraduate

4. Critically assess literary representations of society and its institutions.

Audience: Undergraduate

**ILS 254 – LITERATURE AND SCIENCE**

3 credits.

Examination of the interactions between science, technology, and literature.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze literary and dramatic works from an interdisciplinary perspective with an emphasis on the role and place of the scientific content therein.

Audience: Undergraduate

2. Identify and explain developments in the history of science and their relationship to and place in literary and dramatic works.

Audience: Undergraduate

3. Demonstrate an understanding of how literature, art, and science interact.

Audience: Undergraduate

4. Critique literary and dramatic representations of scientific issues.

Audience: Undergraduate

5. Formulate creative responses to scientific ideas and their representation in dramatic and literary works.

Audience: Undergraduate

**ILS/ENVIR ST 255 – INTRODUCTION TO SUSTAINABILITY SCIENCE**

4 credits.

Explore the foundations of sustainability using the UW-Madison campus as a living laboratory. Ground your feet on the UW-Madison campus and ask questions about the energy we use, the food we eat, the air we breathe, the land we occupy, the goods we purchase, and the waste we create. A blend of environmental sciences and studies. Use principles of chemistry, physics, and biology to understand the dynamics of our human and earth systems, but also explore societal issues like public health and social justice, all through the context of sustainability and the UW-Madison campus community.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify drivers of climate change and describe effects both locally and globally

Audience: Undergraduate

2. Explain sustainability as depicted in models of the Triple Bottom Line

Audience: Undergraduate

3. Explain the sustainability challenges of operating a large public research institution, making connections from local to national and global contexts

Audience: Undergraduate

4. Analyze top-down versus bottom-up approaches to addressing sustainability issues on our campus and in the wider world

Audience: Undergraduate

5. Describe the intersection of sustainability goals with issues relating to communities of color and First Nations communities, particularly in Dane County and Wisconsin

Audience: Undergraduate

6. Value the human and natural capital necessary to sustain our life support systems on this planet

Audience: Undergraduate

### ILS 275 – SPECIAL TOPICS IN INTEGRATED LIBERAL STUDIES

3 credits.

Interdisciplinary themes and issues from the Integrated Liberal Studies (ILS) program.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Identify and explain how people make meaning across times, cultures, media, and disciplines at an intermediate level.

Audience: Undergraduate

2. Critically analyze diverse approaches to how people make meaning in past and present at an intermediate level.

Audience: Undergraduate

3. Recognize and synthesize diverse types of knowledge and disciplinary approaches to how people make meaning at an intermediate level.

Audience: Undergraduate

### ILS 298 – DIRECTED STUDY

1-3 credits.

Individual mentored study with a faculty member, at the intermediate level.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

### ILS 299 – DIRECTED STUDY

1-3 credits.

Individual mentored study with a faculty member, at the intermediate level.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### ILS/ITALIAN 350 – ROME: LUST FOR GLORY

3-4 credits.

Examines the development of Rome, "the Eternal City," and its continuing presence as both a metaphoric and physical focal point of Italian artistic and cultural sensibilities. Outline the development of Rome's authoritative or "mythical" status in literature, art, architecture and film, beginning in the Augustan era and arriving to today, focusing on significant moments in the creation and expansion of the actual city and its cultural influence in the late-Middle Ages, the Renaissance, the era of the Risorgimento (Unification of Italy), and the rise of Fascism. Develop ability to think critically about how the diverse material productions of writers (historians, playwrights, poets), painters, sculptors, architects, philosophical thinkers, and later filmmakers of the periods covered reflect one another and reflect the ideas and ideologies of their age.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of Roman society and culture in both Antiquity, the Pre-Modern, and Modern Eras.

Audience: Undergraduate

2. Examine, analyze, and interpret texts in translation and material culture.

Audience: Undergraduate

3. Critique Roman society and culture throughout the periods under review and compare them to other societies and cultures and to each other.

Audience: Undergraduate

### ILS/ITALIAN/LITTRANS/POLI SCI 365 – MACHIAVELLI AND HIS WORLD

3 credits.

Introduces students to the major works of Machiavelli through the close reading of his writings in cultural and historical contexts. Discussion and targeted writing assignments will aim at cultivating in students 1) a broad understanding of Machiavelli's principal intellectual attitudes, 2) a deeper understanding of his literary sensibility, and 3) the ability to articulate controversies and complexities surrounding his thought.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop a broad understanding of Machiavelli's principal intellectual attitudes.

Audience: Undergraduate

2. Cultivate a deep understanding of Machiavelli's literary sensibility.

Audience: Undergraduate

3. Articulate controversies and complexities surrounding Machiavelli's political thought.

Audience: Undergraduate

### ILS/LACIS 367 – THE LITERATURE OF MIGRATION AND THE MIGRANT EXPERIENCE IN THE AMERICAS

3 credits.

Explores literature to understand representations and experiences of migration within the United States, and in the Americas more broadly, over time and across cultures. Focusing on literature and employing historical and psychoanalytic interpretive approaches, critically analyze artistic and literary representations of the migrant experience. Topics include: the relationships between literature, art, and migration; the role of migrants in constructing the United States; the role of art and literature in the empowerment of marginalized groups. Analyze literary texts in their contexts using tools of literary analysis and express ideas about literary texts and art from a critical perspective.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate literature in its relationship to migration by means of various communicative, deliberative, and persuasive argumentation.

Audience: Undergraduate

2. Identify in literature historical patterns of migration within the US and the Americas and their importance to understand current national culture and tensions.

Audience: Undergraduate

3. Understand through literature concepts and theories and apply them to the interpretation of literature across cultures.

Audience: Undergraduate

4. Recognize, analyze, and evaluate in literature the intersections between culture and other socially meaningful categories, such as race, class, gender, identity, ethnicity, disability, and sexuality as they are represented within literature .

Audience: Undergraduate

### ILS 369 – MAGICAL REALISM AND POSTMODERNITY

3 credits.

Examines the concept of magical realism and its cultural implications. Provides a critical framework for evaluating literature, art and movies and engaging in basic research, particularly when it comes to narrative analysis. Pays particular attention to the Latin-American boom, a time of big writers and big literature that presses the limits between fiction and reality, modernity and postmodernity.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify the role of history in Latin American cultures and demonstrate its importance for understanding those cultures.

Audience: Undergraduate

2. Demonstrate awareness of the ways in which Latin American culture is found in various geographic settings.

Audience: Undergraduate

3. Recognize, analyze, and evaluate the intersections between culture and other socially meaningful categories, such as race, class, gender identity, ethnicity, disability, and sexuality as they appear within literary and artistic practices.

Audience: Undergraduate

4. Evaluate literature, art, and movies connected to “Magical Realism” by means of various communicative, deliberative, and persuasive modes.

Audience: Undergraduate

5. Demonstrate an understanding of the historical moment that we inhabit and the way in which some Latin American artists analyze it and express it.

Audience: Undergraduate

6. Identify, explain, and critically analyze the making of meaning in “Magical Realism.”

Audience: Undergraduate

### ILS 371 – INTERDISCIPLINARY STUDIES IN THE ARTS AND LITERATURE

3-4 credits.

Selected interdisciplinary topics in literature and art with emphasis on social, historical and political contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and explain how people make social, cultural, historical, and political meaning in literature and art.

Audience: Undergraduate

2. Critically analyze diverse approaches to how people make social, cultural, historical, and political meaning through literature and art.

Audience: Undergraduate

3. Recognize and synthesize diverse types of knowledge and disciplinary approaches to how people make social, cultural, historical, and political meaning in literature and art.

Audience: Undergraduate

### ILS 372 – INTERDISCIPLINARY STUDIES IN THE SOCIAL SCIENCES

3 credits.

Interdisciplinary analysis of selected topics in the social sciences.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify and explain how people make social, cultural, historical, and political meaning in the social sciences.

Audience: Undergraduate

2. Critically analyze diverse approaches to how people make social, cultural, historical, and political meaning in the social sciences.

Audience: Undergraduate

3. Recognize and synthesize diverse types of knowledge and disciplinary approaches to how people make social, cultural, historical, and political meaning in the social sciences.

Audience: Undergraduate

**ILS 373 – INTERDISCIPLINARY STUDIES IN THE HUMANITIES**

3-4 credits.

Interdisciplinary analysis of selected topics in the humanities.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and explain how people make social, cultural, historical, and political meaning in the humanities.

Audience: Undergraduate

2. Critically analyze diverse approaches to how people make social, cultural, historical, and political meaning through the humanities.

Audience: Undergraduate

3. Recognize and synthesize diverse types of knowledge and disciplinary approaches to how people make social, cultural, historical, and political meaning in literature and art.

Audience: Undergraduate

**ILS 400 – CAPSTONE INTEGRATION SEMINAR**

3 credits.

Capstone experience seminar for Integrated Liberal Studies (ILS) students.

**Requisites:** Junior standing and declared in Certificate in Integrated Liberal Studies**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Recognize and synthesize arguments, concepts, and approaches to how people make meaning in light of humanistic and social scientific inquiry.

Audience: Undergraduate

2. Formulate new questions about and integrate new approaches to how people make meaning in light of humanistic and social scientific inquiry.

Audience: Undergraduate

3. Analyze arguments, concepts, and approaches to how people make meaning in light of humanistic and social scientific inquiry.

Audience: Undergraduate

4. Articulate and assess the value of a liberal education in light of humanistic and social scientific arguments, concepts, and approaches.

Audience: Undergraduate

**ILS/JEWISH/SOC 423 – MODERN JEWISH THOUGHT**

3 credits.

How do Jews fit into the modern world? While the "Jewish Question" initially referred to debates about Jewish emancipation (the struggle for equal citizenship and social integration that started with the French Revolution), it later served to describe modern Jewish political and social thought about the identity, place, and role of the Jews in the modern world. Beginning in the late 19th century, as cultural assimilation, economic impoverishment in eastern Europe, and rising antisemitism sowed doubts about the viability of emancipation and traditionalism alike, Jewish thinkers proposed new answers to the Jewish question. Learn about some of the major answers they debated, including revolutionary universalistic utopias (socialism and Communism), various forms of Jewish nationalism, hyphenated identities, cultural pluralism, and cosmopolitanism. Work to contextualize these ideas historically while also considering whether and how they remain relevant to the present.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Engage with major figures, ideas, and debates in the social and political thought of Jews about the "Jewish Question" from the late 19th century until the mid-20th century

Audience: Undergraduate

2. Understand these ideas in relation to the historical contexts in which they were produced

Audience: Undergraduate

3. Enter into a dialogue with past thinkers, critically assessing whether and how their ideas may remain relevant to the changed circumstances of the present

Audience: Undergraduate

### **ILS/POLI SCI 463 – DECEPTION AND POLITICS**

3-4 credits.

Deception and truth telling as matters of fundamental political concern. Writers ranging from Plato to John Rawls have grappled with the problem of deception and truth-telling in politics. Flattery, hypocrisy, lying as a matter of state, lying as a matter of policy: philosophical explorations of these and related phenomena are the central focus.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explore deception – and truth telling – as matters of fundamental political concern.

Audience: Undergraduate

2. Examine flattery, hypocrisy, lying as a matter of state, and lying as a matter of policy: philosophical explorations of these and related phenomena are at the center of this course.

Audience: Undergraduate

3. Explore writers ranging from Plato to John Rawls and how they have grappled with the problem of deception and truth-telling in politics.

Audience: Undergraduate

### **ILS 490 – RESEARCH IN INTEGRATED LIBERAL STUDIES**

2-3 credits.

Provides opportunities to pursue advanced research in integrated liberal studies.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

### **ILS 681 – UNDERGRADUATE HONORS THESIS**

3 credits.

Individual study for juniors or seniors completing theses for honors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

### **ILS 682 – UNDERGRADUATE HONORS THESIS**

3 credits.

Individual study for juniors or seniors completing theses for honors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

### **ILS 691 – UNDERGRADUATE THESIS**

3 credits.

Individual study for juniors or seniors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2008

### **ILS 692 – UNDERGRADUATE THESIS**

3 credits.

Individual study for juniors or seniors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2009

# INTEGRATED SCIENCE (INTEGSCI)

## INTEGSCI 100 – EXPLORING BIOLOGY

2 credits.

A first-year course focused on the core concepts in biology (evolution; transformation of energy and matter; information exchange and storage; structure and function; systems biology), professions in biology, and the foundational skills and knowledge needed for successful academic and post-graduate careers in biology.

**Requisites:** First year students or first year transfer students only

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and describe the five core concepts of biology (Evolution (E), Pathways and Transformations of Energy and Matter (PTM), Information Flow, Exchange, and Storage (IFES), Structure and Function (SF), and Systems (S)).

Audience: Undergraduate

2. Apply the biology core concepts from molecular to ecological scales.

Audience: Undergraduate

3. Gain skills in scientific thinking, including asking questions, interpreting data, evaluating claims, communicating science, and reading scientific literature.

Audience: Undergraduate

4. Appreciate the importance of diversity and inclusion in science, including how a diversity of individuals promotes a richer understanding of science and makes scientific research more equitable.

Audience: Undergraduate

5. Identify how biologists contribute to society and how the people of WI are impacted by biology.

Audience: Undergraduate

6. Explore the breadth of careers related to biology.

Audience: Undergraduate

7. Become familiar with campus resources and opportunities to help you thrive as a STEM student at UW-Madison.

Audience: Undergraduate

## INTEGSCI 110 – BIOHOUSE SEMINAR: BIOLOGY FOR THE 21ST CENTURY

1 credit.

Focused on developing skills in cooperative learning with peers and visiting scientists; integrating information across disciplines; communicating science; careers in biology; and, illustrating how biology can help solve society's pressing issues.

**Requisites:** Member of BioHouse Residential Learning Community

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the breadth of biology and describe where biology can be studied at UW-Madison.

Audience: Undergraduate

2. Describe how biology impacts your life and how it can improve society.

Audience: Undergraduate

3. Describe the meaning and importance of integration across disciplines and scales in biology.

Audience: Undergraduate

4. Understand the importance of effectively communicating scientific information to non-scientists.

Audience: Undergraduate

5. Identify your current interest(s) in biology and how you can get involved as an undergraduate.

Audience: Undergraduate

**INTEGSCI 140 – EXPLORING SERVICE IN STEM**

1 credit.

A discussion-based seminar introducing first-year STEM students to the world of public service from the perspective of both the university and its community partners. Classroom activities and direct campus and off-campus experiences are included. Service opportunities include STEM outreach, sustainability, and public health. Involves approximately 1 hour per week of public service.

**Requisites:** First Year Students only

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop awareness of and access to service opportunities within STEM

Audience: Undergraduate

2. Develop awareness of the relationship between the university and the community

Audience: Undergraduate

3. Develop reflective approaches to public service and community engagement.

Audience: Undergraduate

4. Explore the interactions of STEM, scientists and engineers, and society

Audience: Undergraduate

5. Recognize and honor diversity and cultural context

Audience: Undergraduate

**INTEGSCI 150 – EXPLORING RESEARCH IN STEM**

1 credit.

Offers an overview of the research process and opportunities to build skills in reading scientific literature. Understand different approaches to science and to be flexible in thinking about gathering evidence or solving problems. Supports articulation of research interests, identifying potential research mentors, and writing professional emails to secure research opportunities. Explore STEM careers and pathways that can come from engaging in research.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Read scientific literature efficiently and understand what information can be found in each section of a primary research article.

Audience: Undergraduate

2. Identify your personal research interests and find faculty members whose research interests align with yours.

Audience: Undergraduate

3. Write professional emails to potential research mentors.

Audience: Undergraduate

4. Identify disparities between majority and minority group participation in STEM careers and articulate strategies to reduce the disparities.

Audience: Undergraduate

5. Explore STEM careers and learn about the pathways to pursue those careers.

Audience: Undergraduate

**INTEGSCI 230 – EXPLORING PEER LEADERSHIP IN STEM**

2 credits.

Provides current and potential peer leaders the opportunity to reflect on and think critically about their personal goals, identities, and experiences that inform their development as a peer leader. Increase awareness and develop practical skills to promote inclusion and success for students with diverse identities, and learn how to connect students with campus and community resources.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe relevance of personal identities to experiences in higher education and STEM

Audience: Undergraduate

2. Identify strategies to promote inclusion for students with diverse identities, including identities that are underrepresented in STEM and higher education

Audience: Undergraduate

3. Develop peer leadership skills and relate them to the UW-Madison Leadership Framework

Audience: Undergraduate

4. Connect students with campus and community resources to support their success

Audience: Undergraduate

5. Apply knowledge and skills to be able to effectively lead your peers in various STEM contexts on campus

Audience: Undergraduate

6. Reflect on personal goals, strengths, experiences, and identities to inform your ongoing development as a student leader

Audience: Undergraduate

**INTEGSCI 240 – SERVICE WITH YOUTH IN STEM**

2 credits.

Teaches students about community engagement experiences, focusing on building community partnerships, understanding organizational missions and community needs, assessment of informal science outreach experiences, and issues related to scientific literacy and access to science.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop leadership skills & recognize their application to multiple contexts.

Audience: Undergraduate

2. Develop competencies to work in an after-school setting with children and adult staff from a variety of cultures and backgrounds.

Audience: Undergraduate

3. Effectively facilitate the scientific thought process in a way that is age/developmentally appropriate.

Audience: Undergraduate

4. Develop and understand personal scientific identity.

Audience: Undergraduate

5. Connect community experience to personal perspectives through reflection.

Audience: Undergraduate

**INTEGSCI 260 – ENTERING RESEARCH PART 1**

1 credit.

Seminar course for sophomore or transfer students to begin independent research in science, technology, engineering or mathematics. Taken concurrently with 1-3 research credits with faculty member. Supports independent research experience.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explore the roles, responsibilities, and relationships that make for a successful research experience.

Audience: Undergraduate

2. Define an independent research project with your mentor.

Audience: Undergraduate

3. Create a poster presentation to communicate research project findings.

Audience: Undergraduate

4. Develop your science communication skills through reading, writing, and presenting research.

Audience: Undergraduate

5. Engage in a community of undergraduate researchers at UW-Madison.

Audience: Undergraduate

6. Discuss importance of equity and inclusion in research contexts.

Audience: Undergraduate

**INTEGSCI 299 – INDEPENDENT STUDY**

1-3 credits.

Provides academic credit for research, library, and/or laboratory work under direct guidance of a faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**INTEGSCI 320 – INTERNSHIP**

1-3 credits.

Provides academic credit for skill development in authentic contexts in science education including service, peer mentoring, and leadership. See class notes for additional information.

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**INTEGSCI 330 – PRACTICUM IN STEM PEER LEADERSHIP**

1-2 credits.

Application of leadership, mentoring, and communication skills. Includes engagement in leadership experience to support STEM student success as well as activities to enhance participants' leadership development.

**Requisites:** INTEGSCI 230**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Apply and refine leadership and mentorship skills to effectively support their STEM peers on campus#

Audience: Undergraduate

2. Apply strategies to promote inclusion for all students, including students with identities that are underrepresented in STEM and higher education#

Audience: Undergraduate

3. Assess student needs and connect students with campus and community resources to support their success and belonging#

Audience: Undergraduate

4. Describe how peer leader knowledge and skills relate to the UW-Madison Leadership Framework and to personal goals#

Audience: Undergraduate

5. Reflect on the significance of peer leadership and their personal development as a leader#

Audience: Undergraduate

**INTEGSCI 340 – SERVICE WITH YOUTH IN STEM II**

2 credits.

Applies communication skills and social awareness issues in ways that enable students to work with increasing levels of independence in building and maintaining community relationships compared to INTEGSCI 240. Includes a lab section applied to lecture experiences to prepare for work with children in elementary after-school science clubs and to focus on different styles of communication. The multi-disciplinary focus of the after-school lessons develops connections between students' field of study and others within STEM. In the service learning component, students apply academic knowledge through science education and outreach experiences in a community-focused and culturally sensitive way. Students work with underrepresented students in the Madison metropolitan area in elementary after-school science clubs, and are expected to critically reflect on the ties between their academic and community partnerships, and differences between campus and community culture.

**Requisites:** INTEGSCI 240**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. communicate and collaborate with adult after-school staff members from a variety of cultures and backgrounds.

Audience: Undergraduate

2. independently design informal educational science experiences for youth.

Audience: Undergraduate

3. assess appropriate strategies for designing developmentally appropriate science lessons.

Audience: Undergraduate

4. describe the importance of communication and distinctions between informal and technical communication.

Audience: Undergraduate

5. critically reflect on experiences in the community and connect these experiences broadly to service learning, scientific literacy, and cultural context.

Audience: Undergraduate

**INTEGSCI 341 – SERVICE WITH YOUTH IN STEM PRACTICUM**

1 credit.

Apply communication, cultural competency, and leadership skills to work with community partners in a service learning practicum. Work with underrepresented students in the Madison metropolitan area in elementary after-school science clubs, and critically reflect on the ties between their academic and community partnerships, and differences between campus and community culture. Work with different community partners than they did in previous Service with Youth in STEM courses. This practicum combines the service experience with an in-class component to prepare to provide opportunities to critically reflect upon the ties between academic preparation and community partnerships, and on their experiences in varied community settings.

**Requisites:** INTEGSCI 340**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Encourage interaction between scientists and community members from a variety ages and backgrounds

Audience: Undergraduate

2. Experience working with community organizations that have different missions and serve different populations than students' previous participation in community relationships

Audience: Undergraduate

3. Continue to develop mutually beneficial relationships between the University and the community

Audience: Undergraduate

4. Deepen their understanding of diverse social factors that impact youth development, participation, and education

Audience: Undergraduate

5. Critically reflect on experiences in the community and connect these experiences broadly to service learning, cultural context, and similarities and differences in working with different community groups

Audience: Undergraduate

**INTEGSCI 375 – SPECIAL TOPICS IN INTEGRATED SCIENCE**

1-3 credits.

This course examines various special topics in science or science education. See class notes for additional information. Requisites vary by topic

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**INTEGSCI 605 – SCIENTIFIC TEACHING FOR TAS**

1 credit.

The goal of this course is to arm Teaching Assistants with survival skills in scientific teaching through theory, practice, and learning community. We will work together to learn the core themes of scientific teaching (active learning, assessment, and diversity) and apply them, in real time, to the courses in which the TAs are concurrently teaching. This course is open to graduate students only.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Explain the core ideas of Scientific Teaching (active learning, assessment, and diversity) and how they benefit instructors and students.

Audience: Graduate

2. Develop community with colleagues around interest and shared experience in teaching.

Audience: Graduate

3. Reflect on TA role and how TAs support student learning and success.

Audience: Graduate

4. Apply evidence-based and inclusive instructional practices in teaching.

Audience: Graduate

**INTEGSCI 640 – PUBLIC SERVICE IN STEM**

1 credit.

Discusses the fundamentals of public service and civic engagement in the STEM (science, technology, engineering, and math) disciplines grounded in evidence-based knowledge and research. Provides an overview of the core pathways of public service, the knowledge required to effectively initiate and cultivate community partnerships, and the skills necessary to reflect upon personal experiences with community engagement activities. Fosters understanding of the broader impacts in STEM fields and prepares students to begin specializing in a specific pathway and develop relationships with a community partner.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop knowledge, skills, and values that support their engagement with the community from a scholarly perspective.

Audience: Graduate

2. Develop an ethical and sustainable approach to building community relationships.

Audience: Graduate

3. Build reflective process and metacognitive skills into community engagement practices to inform personal development.

Audience: Graduate

4. Develop community as a cohort around shared interest and experience in community engagement.

Audience: Graduate

5. Identify and critique ways that STEM and society interact in diverse contexts.

Audience: Graduate

6. Develop a personal approach to creating a culturally responsive, inclusive environment in campus and community spaces.

Audience: Graduate

**INTEGSCI 650 – COLLEGE SCIENCE TEACHING**

1-2 credits.

Fundamental principles for teaching college-level science courses, with an emphasis on research-based and inclusive approaches. Learn core themes of scientific teaching (active learning, assessment, and diversity) and connect them to practical strategies for designing and implementing courses in their discipline in the future. Develop competence and confidence as college science teachers.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the core ideas of Scientific Teaching (active learning, assessment, and diversity) and how they benefit instructors and students.

Audience: Graduate

2. Design and implement instructional units for college courses based on Scientific Teaching principles.

Audience: Graduate

3. Find and utilize resources to support teaching and learning.

Audience: Graduate

4. Apply reflective practice and metacognitive skills to inform personal teaching development.

Audience: Graduate

5. Develop community with colleagues around interest and shared experience in teaching.

Audience: Graduate

**INTEGSCI 660 – RESEARCH MENTOR TRAINING PRACTICUM**

1 credit.

Practicum course for graduate, post-doctoral or senior undergraduate students to be taken concurrently while mentoring an undergraduate engaged in an independent research experience.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explore multiple strategies for effective mentoring with case studies, discussions, and readings.

Audience: Undergraduate

2. Compare mentor and mentee goals, and craft a statement of your mentoring philosophy.

Audience: Undergraduate

3. Explore time-management strategies, and discuss relevant issues as they come up.

Audience: Undergraduate

4. Collaborate and problem-solve with a group of peers.

Audience: Undergraduate

**INTEGSCI 675 – SPECIAL TOPICS**

1-3 credits.

This course examines various special topics in science or science education. See Class Notes for additional information.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**INTEGSCI 699 – INDEPENDENT STUDY**

1-3 credits.

Provides academic credit for advanced research, library, and/or laboratory work under direct guidance of a faculty member. Students are responsible for arranging the work and credits with the supervising faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**INTEGSCI 740 – COMMUNITY RELATIONSHIPS AND MATERIALS DEVELOPMENT IN STEM PUBLIC SERVICE**

1 credit.

Provides opportunities for practical application of public service knowledge. Discusses development of a workplan for long-term projects, provides strategies to initiate community partnerships, and fosters development of materials for use in a community-based practicum. Includes time to work intensively on acquiring pathway-specific knowledge and skills and opportunities to practice, problem-solve, and support cohort members within and across public service pathways.

**Requisites:** INTEGSCI 640

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply their knowledge of approaches to community partnerships to the development of personal and organizational relationships

Audience: Graduate

2. Develop pathway-specific materials in collaboration with peers and community partners that appropriately engage stakeholders in STEM, are inclusive, and grounded in evidence

Audience: Graduate

3. Develop pathway-specific knowledge, skills, and attitudes

Audience: Graduate

**INTEGSCI 750 – INSTRUCTIONAL MATERIALS DESIGN FOR COLLEGE SCIENCE TEACHING**

1 credit.

Designed to provide a practical application of pedagogical knowledge through the development of instructional materials for use in a university science education context. The process will be based around cohorts of participants working together to identify learning objectives, and create evidence-based assessments and learning experiences to target those objectives. This course is required for Scientific Teaching Fellows Program participants.

**Requisites:** INTEGSCI 650**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**INTEGSCI 840 – MENTORED PRACTICUM IN STEM PUBLIC SERVICE**

1 credit.

Develops community-engagement in STEM (science, technology, engineering, and math) through a mentored public service experience. Provides opportunities to refine and implement skills necessary to work with a community partner to implement and evaluate a project that is mutually beneficial in process and product. Places emphasis on professional development within a selected pathway (direct service, community engaged teaching, policy and governance, or social entrepreneurship/corporate social responsibility). Includes time to meet within specialized pathways and as a full cohort throughout the implementation of the practicum experience.

**Requisites:** INTEGSCI 740**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Conduct an effective public service practicum in their public service pathway of specialization

Audience: Graduate

2. Develop and exhibit a sense of professional identity as a community engagement professional

Audience: Graduate

3. Strengthen civic leadership and advocacy skills

Audience: Graduate

4. Reflect on the practicum experience and use this experience to inform future community engagement

Audience: Graduate

**INTEGSCI 850 – MENTORED PRACTICUM IN COLLEGE SCIENCE TEACHING**

1 credit.

Continues the development of graduate student's skills in teaching and learning college science courses by providing a mentored, independent teaching experience. Participants will have the opportunity to see how theories of learning and teaching play out in real instructional settings by implementing instructional activities and then evaluating the outcomes of those activities on the basis of student artifacts. A particular emphasis will be placed on participants creating an inclusive learning environment for teaching diverse student populations. The course also provides participants with frameworks for teaching and managing their own courses, should they pursue academic positions after graduate school. This course is required for Scientific Teaching Fellows Program participants.

**Requisites:** INTEGSCI 750**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

## INTERDISCIPLINARY COURSES (C A L S) (INTER-AG)

**INTER-AG 1 – COOPERATIVE EDUCATION PROGRAM**

1 credit.

Full-time work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career.

**Requisites:** Consent of instructor**Course Designation:** Workplace - Workplace Experience Course**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Apply classroom knowledge to authentic work experiences

Audience: Undergraduate

**INTER-AG 117 – GREENHOUSE ROOTS SEMINAR**

1 credit.

Challenges Greenhouse residents to think deeply about themselves and their place in the social and biophysical communities of which they are a part. Reflect on the meaning(s) of "sustainability" and consider how lifestyle and career choices impact other people and the environment. Discover the deep history of sustainability in Wisconsin and learn more about current sustainability initiatives on the UW-Madison campus and in the greater Madison Area. Introduces resources, skills, and knowledge that support a successful transition to college.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss the concept of sustainability in the context of complex interactions among humans and between humans and the non-human world from a variety of perspectives

Audience: Undergraduate

2. Describe the attributes of a healthy, mutually beneficial relationship with the place they live in and the members of their community

Audience: Undergraduate

3. Assess, articulate, and acknowledge personal skills, abilities, and growth areas in the pursuit of sustainability

Audience: Undergraduate

4. Integrate intellectual concepts and values-based knowledge to formulate a personalized approach to sustainability

Audience: Undergraduate

5. Identify UW-Madison programs, resources, and services that will support their academic studies and co-curricular involvement

Audience: Undergraduate

**INTER-AG 140 – CALS QUICKSTART: FOUNDATIONS**

1 credit.

Gain exposure to the College of Agricultural and Life Sciences (CALS) and UW-Madison, including resources and opportunities available as well as the foundational skills necessary for a successful transition to campus. Modules focus on your personal, academic, and professional development. Reflect on your goals and engage with peers to develop a roadmap for your own Wisconsin Experience.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate your strengths and reflect on how they manifest across different aspects of your academic, personal, and professional experience

Audience: Undergraduate

2. Understand core campus values and the purpose of a liberal education and relate these concepts to real-life examples

Audience: Undergraduate

3. Gain a baseline understanding of social identity and ways to expand your perspective/develop empathy for identities outside your own

Audience: Undergraduate

4. Explore the CALS Priority Themes and understand how many academic and career pathways can converge around a singular theme

Audience: Undergraduate

5. Develop strategies to anticipate and successfully navigate any college transition-related challenges you may face

Audience: Undergraduate

6. Apply knowledge of campus resources and opportunities to set attainable goals for your first-year and beyond

Audience: Undergraduate

**INTER-AG 141 – QUICKSTART: CONNECT2CAMPUS**

1 credit.

Gain first-hand exposure to the variety academic, co-curricular and professional opportunities available to you in the College of Agricultural and Life Sciences (CALS) and broader UW-Madison campus. Through workshops and dialogue, consider how you will positively contribute to the campus community. Connect with fellow students, faculty, staff, alumni, and industry leaders, and translate these experiences into actionable plans to reach your academic and career goals.

**Requisites:** INTER-AG 140**Repeatable for Credit:** No**Last Taught:** Summer 2019**Learning Outcomes:** 1. Draw connections between the CALS priority themes and research happening in the College, state, and the world.

Audience: Undergraduate

2. Take actionable steps toward creating a more inclusive campus community.

Audience: Undergraduate

3. Understand the facets of personal wellness, strategies to maintain and improve your own wellness, and approaches to help support your peers' wellness.

Audience: Undergraduate

4. Utilize core academic planning tools including DARS, Course Guide, and Degree Planner, as well as implement learning and time management strategies that will support you in your college transition.

Audience: Undergraduate

5. Articulate core skills and traits employers seek, as well as strategies to develop in these areas.

Audience: Undergraduate

6. Develop an initial network of fellow students, faculty, and staff that will be part of your campus experience, as well as the confidence to continue to expand and grow these relationships .

Audience: Undergraduate

**INTER-AG 155 – ISSUES IN AGRICULTURE, ENVIRONMENT, AND LIFE SCIENCES**

1 credit.

Explore important issues in the application of science that cut across all majors in the College of Agricultural and Life Sciences, and that are critical for society in coming decades. Develop academic skills and explore majors and careers.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**INTER-AG 175 – WISE SEMINAR**

1 credit.

Women in Science and Engineering (WISE) learning community seminar, with speakers drawn from all fields of math, science, and engineering on campus. Learn about research on campus and discuss the impact of research on daily life.

**Requisites:** Member of Women in Science & Engineering (WISE) Residential Learning Community**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Spring 2025**INTER-AG/INTER-LS 250 – UNDERGRADUATE RESEARCH EXPERIENCE**

1-3 credits.

Participation in research or creative endeavor led by faculty or instructional staff. May include participation in research discussion groups, critiques of readings, and preparation of written or oral reports.

**Requisites:** Member of Undergraduate Research Scholars Program**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**INTER-AG 288 – INTRODUCTORY CALS HONORS SEMINAR**

1 credit.

Learn the basics of being a researcher: the scientific community (papers, etiquette, grants), ethics, career options, using the scientific literature, and preparation of research proposals.

**Requisites:** Declared in a College of Agricultural and Life Sciences (CALS) Honors program**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**INTER-AG 321 – STUDY ABROAD PRE-DEPARTURE SEMINAR**

1 credit.

Explores topics and issues related to a specific theme and region or country of the world, ensuring a foundation of knowledge and understanding for the hands-on experiences as part of an instructor-led study abroad program.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain cultural theories, stumbling blocks to intercultural communication, and demonstrate new knowledge and attitudes to successfully complete a study abroad experience.

Audience: Undergraduate

2. Describe your home and host culture, people, and places.

Audience: Undergraduate

3. Prepare for living, traveling, and studying in a new environment.

Audience: Undergraduate

4. Demonstrate an understanding of culture shock and reflect on ways of managing the effects.

Audience: Undergraduate

5. Explain successful practices to remain healthy and ensure safety while abroad.

Audience: Undergraduate

**INTER-AG 340 – CAREER AND LEADERSHIP DEVELOPMENT FOR INTERNS**

1 credit.

Career development process including: the job search, resume and cover letter writing, networking, inclusive workplaces, and conflict resolution. Synthesize internship experience and peers' internship experiences within the larger context of personal and professional goals, strengths, and values.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Synthesize and reflect on internship experience, as well as relate that experience to peers, in an effort to better understand new areas of work, and potential career interests

Audience: Undergraduate

2. Articulate personal and professional goals based on the internship experience.

Audience: Undergraduate

3. Relate the role of interests, skills, strengths, values, and experiences to the career decision-making process.

Audience: Undergraduate

4. Create and tailor professional writing related to the job search process.

Audience: Undergraduate

**INTER-AG 375 – SPECIAL TOPICS**

1-4 credits.

Topics of current interest to undergraduates.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2019

**INTER-AG 388 – CALS HONORS - FUNDAMENTALS OF RESEARCH SEMINAR**

1 credit.

Introduction and exploration of the fundamentals of research: scientific process, utilization of scientific literature, and preparation of research proposals. Provides an environment external to the student's research experience that will help them grow as researchers.

**Requisites:** INTER-AG 288

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the scientific method and formulate research questions effectively.

Audience: Undergraduate

2. Effectively read and objectively critique a published scientific article.

Audience: Undergraduate

3. Develop and write a research proposal.

Audience: Undergraduate

**INTER-AG 397 – INTERNATIONAL INTERNSHIP OR RESEARCH IN THE SCIENCES**

1-6 credits.

Provides an area equivalency for science internship or research taken on UW-Madison approved study abroad programs. Current enrollment in a UW-Madison study abroad program.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Apply concepts learned in coursework to authentic professional/research situations

Audience: Undergraduate

2. Identify and reflect on how concepts learned in coursework apply to specific research or internship settings and situations

Audience: Undergraduate

**INTER-AG/NUTR SCI 421 – GLOBAL HEALTH FIELD EXPERIENCE**

1-4 credits.

Specialized educational experiences that address a broad range of global health topics through interdisciplinary approaches to health and include participation in applied public health activities or service learning projects with communities and partner organizations.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Collaborate and communicate effectively with diverse colleagues and local partners.

Audience: Undergraduate

2. Respectfully engage with different cultures or populations.

Audience: Undergraduate

3. Articulate the importance of interdisciplinary approaches to global health and/or sustainable development.

Audience: Undergraduate

4. Demonstrate knowledge on a specific global health issue, community, and location.

Audience: Undergraduate

**INTER-AG 488 – HONORS RESEARCH SEMINAR**

1 credit.

Development and evaluation of undergraduate research proposals, discussion of best practices for gaining admission to graduate programs and identifying effective mentors, exploration of career opportunities for research in the public and private sectors, and interaction with seniors who have successfully completed the CALS Honors in Research program.

**Requisites:** INTER-AG 388**Course Designation:** Honors - Honors Only Courses (H)**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop a competitive research proposal and convey its scientific merit and broader impact to scientific reviewers and funding agencies

Audience: Undergraduate

2. Find strong graduate programs and identify effective faculty mentors, such that they can develop as young scientists and realize their career goals

Audience: Undergraduate

3. Overcome the fear of failure and avoid common pitfalls, such that they can achieve professional success and work-life balance in their future endeavors

Audience: Undergraduate

4. Evaluate the pros and cons of various types of research careers, including academic institutions, federal laboratories, corporate research and development settings, and startup companies

Audience: Undergraduate

5. Develop an outline for the senior honors thesis, including research plan and timeline

Audience: Undergraduate

**INTER-AG 681 – SENIOR HONORS THESIS**

2-4 credits.

First semester of individual study for undergraduate students in a CALS Honors program completing a thesis, as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Honors - Honors Only Courses (H)**Repeatable for Credit:** No**Last Taught:** Spring 2025**INTER-AG 682 – SENIOR HONORS THESIS**

2-4 credits.

Second semester of individual study for undergraduate students in a CALS Honors program completing a thesis, as arranged with a faculty member. INTER-AG 681

**Requisites:** Consent of instructor**Course Designation:** Honors - Honors Only Courses (H)**Repeatable for Credit:** No**Last Taught:** Spring 2025

# INTERDISCIPLINARY COURSES (ENGINEERING) (INTEREGR)

## INTEREGR 130 – INTRODUCTION TO MECHANICS AND APPLICATIONS IN ENGINEERING

1 credit.

Introduction to mechanics and applications in engineering, including introduction to free body diagrams, spatial awareness, and how to use vectors in engineering applications.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Correctly use basic mathematics concepts that are applied to introductory mechanics and connect math to conceptual physical understanding

Audience: Undergraduate

2. Practice 3D spatial awareness/reasoning

Audience: Undergraduate

3. Apply problem-solving strategies to physical problems, including evaluating engineering problem solving approaches.

Audience: Undergraduate

4. Demonstrate group problem solving skills through assessment of peers' ideas and work, discussion of alternate approaches, and explanation of solutions

Audience: Undergraduate

5. Effectively communicate problem solving processes and results through writing and diagrams.

Audience: Undergraduate

## INTEREGR 140 – SUCCESS IN ENGINEERING ACADEMICS

1 credit.

Learn and practice evidence-based strategies for success as an engineering student. Topics include study skills, time management, career exploration, academic writing, academic reading comprehension, motivation and self-directed learning.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Practice evidence based learning strategies (such as elaboration, recall, spaced practice)

Audience: Undergraduate

2. Develop and implement time-management techniques

Audience: Undergraduate

3. Practice problem solving strategies

Audience: Undergraduate

4. Identify the tools for being a successful engineering student

Audience: Undergraduate

## INTEREGR 150 – DIRECTED STUDIES IN ENGINEERING FOUNDATION COURSES

0 credits.

Directed study through College of Engineering Supplementary Instruction program. Group discussion and problem-solving coaching to enhance understanding of physics and its applications to engineering.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**INTEREGR 170 – DESIGN PRACTICUM**

3 credits.

Introduction to design via the invention, fabrication and testing of a device that solves a problem proposed by a real world client. Information retrieval techniques, specification writing, methods for enhancing creativity, analysis techniques, scheduling, selection methodologies, cost estimating, sustainability in design, shop safety, engineering ethics, opportunities for engineering students (ie, study abroad, internships, co-ops), major exploration, fabrication equipment and techniques, and oral and written communication.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Learn the fundamentals of the engineering design process and then apply them in a laboratory setting by working on a novel, client-based, hands-on engineering challenge.

Audience: Undergraduate

2. Develop individual learning and cooperative teamwork skills through conduct of independent research and collaborative problem solving in a team setting.

Audience: Undergraduate

3. Promote diversity and inclusiveness through exercises designed to create multicultural awareness of, and respect for, individual differences in experience, learning style, and academic interests.

Audience: Undergraduate

4. Effect professional development through team-building activities, practice in personal and professional communication, leadership, project management, and engineering ethics.

Audience: Undergraduate

5. Utilize academic research, creativity, innovation, fabrication, testing, and design iteration to develop effective decision-making and problem-solving skills.

Audience: Undergraduate

6. Practice effective technical communication skills through maintaining a design notebook, giving oral presentations, and writing a technical report.

Audience: Undergraduate

7. Participate in COE shop training to obtain the basic skills required for prototype fabrication and as a prerequisite for more advanced training in subsequent design courses.

Audience: Undergraduate

8. Develop professional teaching and leadership skills in junior and senior engineering student assistants through peer-mentoring and training activities during the course.

Audience: Undergraduate

9. Define engineering and learn the fundamentals of the engineering design process

Audience: Undergraduate

10. Major exploration and self reflection

Audience: Undergraduate

11. Learn pertinent information to maximize success as an engineering student

Audience: Undergraduate

**INTEREGR 275 – TECHNICAL PRESENTATIONS**

2 credits.

Principles and theory of effective oral technical presentations. Provides a framework for applying the principles in professional settings common to the engineering profession. Preparation, delivery, and evaluation of oral presentation on technical subjects, analysis of professional "real-world" technical presentations, survey of presentation technology, self-analysis including listening and non-verbal skills, and practice of group discussion and interview skills.

**Requisites:** Sophomore standing**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Present technical concepts and information to a general audience without oversimplifying or losing technical complexity  
Audience: Undergraduate

2. Deliver a compelling technical presentation

Audience: Undergraduate

3. Develop a compelling argument about a unique research question

Audience: Undergraduate

4. Conduct relevant and credible research to enhance presentation value

Audience: Undergraduate

5. Design well-organized, informative, clear, engaging visuals that enhance but do not dominate the presentation

Audience: Undergraduate

6. Anticipate or identify audience expectations and concerns and to address them appropriately in your presentation

Audience: Undergraduate

7. Work in teams to prepare and practice discussing cases in engineering ethics

Audience: Undergraduate

### INTEREGR 303 – APPLIED LEADERSHIP COMPETENCIES IN ENGINEERING

3 credits.

Introduction to basic leadership theories and perspectives; application of said theories to real-life experiences (both engineering and otherwise) through reflections, course discussion, readings, and experiential education in their local communities. Social Change Model of Leadership Development and Servant Leadership theory, viewed through an Applied Critical Leadership Theory lens.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the leadership role that engineering professionals play in service to a breadth of social, political, environmental, economic, and global issues

Audience: Undergraduate

2. Apply and reflect on the “Seven C’s” of the Social Change Model through engaging as servant leaders in a stewardship service project

Audience: Undergraduate

3. Apply teamwork and leadership skills necessary to embrace individual differences and help groups collaborate on shared aims and values

Audience: Undergraduate

4. Identify and describe one’s own individual strengths, and be able to identify and honor the strengths in others

Audience: Undergraduate

5. Communicate comfortably and professionally with peers, practicing engineers, and adult professionals

Audience: Undergraduate

6. Reflect upon and understand one’s own responsibility to strive for self-awareness, empathy, authenticity, vulnerability, and curiosity when working on leadership skill attainment

Audience: Undergraduate

7. Utilize a critical race perspective to address leadership challenges found in personal and professional experiences to achieve change in response to power, domination, access, and achievement imbalances

Audience: Undergraduate

### INTEREGR 397 – ENGINEERING COMMUNICATION

3 credits.

Communication for engineering, science, and technology; theory and practice in planning, preparing, and critiquing reports, proposals, and workplace correspondence; persuasive argumentation, ethical decision-making strategies, multidisciplinary communication skills, research strategies, collaborative work; oral presentations.

**Requisites:** Satisfied Communications A requirement and junior or senior standing only

**Course Designation:** Gen Ed – Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify a focused technical project, then research, organize, draft, apply feedback, develop, and revise technical writing and presentations for a multidisciplinary, professional audience

Audience: Undergraduate

2. Retrieve, identify, and analyze credible research that can help develop and inform a technical problem

Audience: Undergraduate

3. Identify and describe contexts for engineering projects that address relevant social, ethical, environmental, economic, and political impacts

Audience: Undergraduate

4. Apply moral theories and professional codes to effectively analyze problems in engineering ethics and arrive at defensible actions

Audience: Undergraduate

5. Contribute to a team through creating a collaborative and inclusive environment, establishing goals, planning tasks, and meeting objectives

Audience: Undergraduate

### INTEREGR 413 – CURRENT ISSUES IN INTERNATIONAL ENGINEERING

1 credit.

Provides a comparative examination and analysis of global trends and regional variations for engineering concepts, standards and practices. Using organizational case studies, the course will describe and analyze multi-national engineering operations and summarize best practices and caveats.

**Requisites:** Declared in International Engineering Certificate

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**INTEREGR 477 – TOOLS FOR PROTOTYPING AND MANUFACTURING**

1-3 credits.

Tools for prototyping and manufacturing physical objects along with some of the underlying theory for how the tools work. Tools include 3D printers, 3D scanners, thermoformers, CNC routers, welders, wood saws, mills, lathes, laser cutters, waterjets, machine tools, general electronics, microcontrollers and Virtual Reality.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Implement prototyping as a design methodology that incorporates making, critical reflection, and iteration.

Audience: Both Grad &amp; Undergrad

2. Use rapid prototyping and machining equipment and techniques safely.

Audience: Both Grad &amp; Undergrad

3. Employ a set of prototyping techniques and approaches for concept development.

Audience: Both Grad &amp; Undergrad

4. Work independently and collaboratively to generate a portfolio of hands-on projects using the various tools.

Audience: Both Grad &amp; Undergrad

5. Apply engineering principles and equipment theory to troubleshoot while operating equipment.

Audience: Both Grad &amp; Undergrad

6. Describe the current roles of the rapid prototyping and machining techniques in industry and research.

Audience: Graduate

**INTEREGR 601 – TOPICS IN INTERDISCIPLINARY ENGINEERING**

1-3 credits.

Interdisciplinary topics of special interest to undergrad and grad students in engineering.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**INTEREGR 941 – COLLABORATIVE CAPSTONE II**

3 credits.

Explore chosen opportunity area through prototyping, user testing, and iteration. Creation of final, high resolution design, with communication and launch plan for startup, product or service. Practice behaviors of design thinking - ethics, critique, and storytelling.

**Requisites:** INTER-HE 940**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Apply an iterative design thinking process on an interdisciplinary team.

Audience: Graduate

2. Generate creative ideas through structured brainstorming sessions.

Audience: Graduate

3. Develop and fabricate rapid prototypes using a wide range of techniques (physical, digital, etc.) to bring their ideas into reality as quickly as possible and obtain feedback.

Audience: Graduate

4. Deliver a clear, thoughtful design with evidence showing it is desirable, feasible, and viable.

Audience: Graduate

5. Communicate effectively, both visually and orally.

Audience: Graduate

6. Demonstrate constructive collaboration behaviors— creative critique, balancing independent work with group work, and knowing when to get an outside opinion.

Audience: Graduate

**INTERDISCIPLINARY COURSES (L & S) (INTER-LS)****INTER-LS 101 – FIRST-YEAR SEMINAR IN THE BIOLOGICAL SCIENCES**

3 credits.

Interdisciplinary topics in the biological sciences for first-year students.

**Requisites:** None**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023

**INTER-LS 102 – FIRST-YEAR SEMINAR IN THE HUMANITIES**

3 credits.

Interdisciplinary topics in the humanities for first-year students.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**INTER-LS 103 – FIRST-YEAR SEMINAR IN LITERATURE**

3 credits.

Interdisciplinary topics in literature for first-year students.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2022**INTER-LS 106 – FIRST-YEAR SEMINAR IN THE SOCIAL SCIENCES**

3 credits.

Interdisciplinary topics in the social sciences for first-year students.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**INTER-LS 107 – FIRST-YEAR SEMINAR IN THE SOCIAL SCIENCES AND NATURAL SCIENCES**

3 credits.

Interdisciplinary topics in the social and natural sciences for first-year students.

**Requisites:** None**Course Designation:** Breadth - Either Social Science or Natural Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**INTER-LS 110 – FIRST-YEAR SEMINAR IN THE HUMANITIES AND SOCIAL SCIENCES**

3 credits.

Interdisciplinary topics in the humanities and social sciences for first-year students.

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2018**INTER-LS 121 – APPROACHES TO CRITICAL THINKING AND WRITING**

3 credits.

Focus on learning to argue and express one's ideas. Learn how to construct a thesis that convinces through evidence. The arts provide an inevitable jumping-off point for critical judgments.

**Requisites:** Member of Summer Collegiate Experience (SCEP)**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2019**INTER-LS 130 – CRC FIRST-YEAR SEMINAR: FOUNDATIONS OF A LIBERAL ARTS EDUCATION**

1 credit.

Explores multiple dimensions of a liberal arts education and its value in today's world. Introduces University resources and promotes community building inside the residence hall and across campus. Engage directly with faculty from diverse fields on campus and with others in the Chadbourne Residence Hall.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Formulate an individual understanding of the liberal arts.

Audience: Undergraduate

2. Explore, analyze, and evaluate conceptions of the liberal arts.

Audience: Undergraduate

3. Participate in reasoned, well-organized, and sustained discussions.

Audience: Undergraduate

4. Understand problems and issues in their social, cultural, and historical contexts.

Audience: Undergraduate

5. Engage in personal and cultural self-criticism and problem solving.

Audience: Undergraduate

6. Design and create a project that demonstrates depth of knowledge and mastery of a research topic.

Audience: Undergraduate

**INTER-LS 139 – BELONG, EXPLORE, BECOME: DISCOVERING YOUR UW PATHS**

1 credit.

Examine self, community, and the liberal arts education while progressing through a major exploration framework – critically engage with the concepts of belonging and transitions, and explore questions of identity, community, and connectedness; explore UW schools/colleges, departments, majors, opportunities and resources; make connections between coursework and lived experiences outside of class to strengthen strategic exploration. Using readings, discussions, in-class activities, and out-of-class assignments, proceed through a framework with the goal of developing knowledge, confidence, and tools to navigate the University's opportunities and resources.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and summarize the core elements of belongingness.

Audience: Undergraduate

2. Analyze and critique in a scholarly manner material related to college student transitions.

Audience: Undergraduate

3. Identify and meaningfully engage in learning opportunities that explore interests.

Audience: Undergraduate

4. Employ reflective practices to appraise own skills and monitor self-defined goals.

Audience: Undergraduate

5. Design and create a project that demonstrates depth of knowledge and mastery of strategic exploration.

Audience: Undergraduate

6. Examine and meaningfully engage with component parts of a liberal arts education.

Audience: Undergraduate

**INTER-LS 144 – SUCCESS IN YOUR MATH COURSE**

1 credit.

Introduction to research-based best practices for success in college-level math courses. Practical application in the areas of study skills, goal setting, time management, and notetaking; hands-on practice with problem-solving strategies.

**Requisites:** Concurrent enrollment in MATH 96 or 112**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Define and set SMART (Specific, Measurable, Attainable, Realistic, and Timely) Goals.

Audience: Undergraduate

2. Analyze feedback provided on math assessments accurately.

Audience: Undergraduate

3. Describe and use effective study skill strategies for college-level math courses.

Audience: Undergraduate

4. Articulate and practice the philosophy underlying Growth Mindset.

Audience: Undergraduate

5. Demonstrate effective notetaking strategies and concept map construction.

Audience: Undergraduate

6. Apply problem solving strategies to relevant content questions.

Audience: Undergraduate

**INTER-LS 145 – HOW TO SUCCEED IN COLLEGE**

1 credit.

Introduction to current research on learning and guides how to apply that knowledge in your academic experience and course work. Covers research and its practical application in the areas of study skills, time management, academic writing, motivation, and self-direction. Promotes strong foundational skills to succeed at a higher education institution.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Articulate and practice self-regulated learning

Audience: Undergraduate

2. Interpret rubrics, assignments, and feedback accurately

Audience: Undergraduate

3. Describe and use effective strategies for college-level knowledge acquisition

Audience: Undergraduate

4. Articulate and practice introductory college-level skills used in writing academic papers and reports

Audience: Undergraduate

5. Identify necessary steps to undertake long-term projects, and develop actionable plans to ensure that projects are completed on time and accurately

Audience: Undergraduate

**INTER-LS 158 – SPARK SEMINAR**

1 credit.

Introduction to community-engaged research. Connects to UW-Madison partnerships and programs sparked by a commitment to addressing specific community needs. Examines how research programs are designed, with an emphasis on programs that build on team diversity and interdisciplinarity to bring the Wisconsin Idea to life. Engages with current research projects to learn how campus innovations and collaborative problem-solving benefit community partners.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions**Learning Outcomes:** 1. Explain the concept of interdisciplinarity and describe the potential benefits of this approach.

Audience: Undergraduate

2. Exemplify interdisciplinary thinking by recognizing and comparing varying characteristics of evidence, research methods, and research outcomes at the university level.

Audience: Undergraduate

3. Identify key components of community-engaged research.

Audience: Undergraduate

4. Explain ethical considerations of community-engaged research at institutions like the University of Wisconsin-Madison.

Audience: Undergraduate

5. Evaluate the transition from high school to university life through personal and cultural analysis, reflection, and problem-solving.

Audience: Undergraduate

**INTER-LS 210 – L&S CAREER DEVELOPMENT: TAKING INITIATIVE**

1 credit.

Interdisciplinary course in career development that connects the liberal arts and sciences degree to academic and career preparation, practical job skills, goal-setting, critical thinking and reflection. Designed for second year students, but open to all students.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**INTER-LS 215 – COMMUNICATING ABOUT CAREERS**

3 credits.

Explores the meaning and value of a liberal arts and sciences education for careers in the global, technological, and multicultural workplace of the 21st century. Through a series of individual and collaborative research and communication assignments, learn to critically analyze the career and education implications of a diverse and digital workplace, and to critically reflect on strengths and values to prepare to connect college work with lifelong career success. Practice academic skills of analyzing scholarly articles, constructing written essays, presenting formal speeches, and crafting digital presentations, as well as career skills of building resumes, writing cover letters, using social networking tools, and interviewing.

**Requisites:** Satisfied Communications A requirement**Course Designation:** Gen Ed - Communication Part B  
Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand, evaluate, and communicate arguments about the nature of work in contemporary global, digital, and multicultural society, with respect to a specific target career community.  
Audience: Undergraduate

2. Develop and communicate a compelling personal career narrative about your path through a liberal arts and sciences education, with respect to a specific target career community.  
Audience: Undergraduate

**INTER-LS/INTER-AG 250 – UNDERGRADUATE RESEARCH EXPERIENCE**

1-3 credits.

Participation in research or creative endeavor led by faculty or instructional staff. May include participation in research discussion groups, critiques of readings, and preparation of written or oral reports.

**Requisites:** Member of Undergraduate Research Scholars Program**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**INTER-LS 257 – BRADLEY PEER MENTOR COURSE**

2 credits.

Provides training and support for Peer Mentors of the Bradley Learning Community. Helps improve leadership and facilitation skills for Peer Mentors, whose primary service obligations include co-facilitating a section of the Bradley Roundtable seminar and arranging programming for the Bradley Learning Community. Introduces new techniques for working with small groups. Special attention will be paid to the research on the developmental and academic needs of first-year college students. Encourages students to develop their professional skills. Serves as an opportunity for guided reflection, as part of the community-based learning model.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop leadership skills and initiative.

Audience: Undergraduate

2. Improve oral communication skills through reasoned, well-organized and sustained discussions of important issues or questions, including the ability to explain and evaluate different or opposing perspectives evenhandedly and dispassionately.  
Audience: Undergraduate

3. Examine questions and make decisions with consideration for the cultural perspectives and worldviews of others and self-critical appreciation of cultural and personal values.  
Audience: Undergraduate

4. Make connections among diverse subject areas and modes of thinking.  
Audience: Undergraduate

5. Apply the major areas of knowledge to the solution of individual and community problems.  
Audience: Undergraduate

6. Improve group facilitation skills.  
Audience: Undergraduate

7. Study and understand the developmental needs of first-year college students.  
Audience: Undergraduate

8. Understand civic responsibility and the impact of their community engagement upon themselves and the residents.  
Audience: Undergraduate

**INTER-LS 260 – INTERNSHIP IN THE LIBERAL ARTS AND SCIENCES**

1 credit.

Earn academic credit connected to your work experience with outside internships, regardless of your major. Using online tools, collaboratively analyze and discuss internships with respect to the goals of a liberal arts and sciences education.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, for 3 number of completions**Last Taught:** Summer 2025**INTER-LS 300 – TOPICS IN TEACHING AND LEARNING IN THE LETTERS, ARTS, AND SCIENCES**

3 credits.

Reflect on principles of liberal education, and apply those principles to your own learning experiences.

**Requisites:** Sophomore standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2020**Learning Outcomes:** 1. Understand and apply principles of liberal education to the student's own learning experience

Audience: Undergraduate

2. Demonstrate the ability to reflect upon and communicate with others about a liberal education.

Audience: Undergraduate

**INTER-LS 301 – METHODS IN THE APPLIED SOCIAL SCIENCES**

3 credits.

Gain a broad understanding of the diverse areas of social science research from various disciplinary perspectives, through a series of lectures, readings, and essay assignments. Includes problem definition, evidence gathering, data analysis, and results presentation.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Identify and explain diverse methods of social science research from various disciplinary perspectives

Audience: Undergraduate

2. Examine and describe how social scientists gather evidence, analyze data and present results

Audience: Undergraduate

**INTER-LS 302 – PROBLEMS IN THE APPLIED SOCIAL SCIENCES**

3 credits.

Gain an in-depth understanding of one particular application area of social science research through a series of lectures, readings, and essay assignments. Includes problem definition, evidence gathering, data analysis, and results presentation.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Spring 2024**Learning Outcomes:** 1. Outline one particular application area of social science research -- a contemporary issue or problem -- from a focused set of disciplinary perspectives

Audience: Undergraduate

2. Describe and define a social issue or problem

Audience: Undergraduate

3. Examine how social scientists gather evidence and analyze data and present results

Audience: Undergraduate

**INTER-LS 315 – PARADIGMS AND PROCESS IN ACADEMIC INQUIRY**

2 credits.

Designed specifically for the research fellow, provides a structure for thinking about research that avoids reducing research to a single mode of thought and practice, and is thus inclusive of the range of approaches to research reflected in INTER-LS/INTER-AG 250. Will address specific topics that relate to the day-to-day activities of doing research, and addresses issues of what does it mean to think like a researcher, to act like a researcher, to talk like a researcher?

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**INTER-LS 601 – APPLIED SOCIAL SCIENCES PROBLEM PROPOSAL**

3 credits.

Select a particular application area of social science research -- a contemporary issue or problem area related to one's own career or community experiences and goals-- through a series of readings, group discussions, research activities, and writing assignments. Design a research review project that will summarize and analyze the most promising social science research paths to a solution of this issue or problem. Key steps include: problem definition, literature review, and thesis development.

**Requisites:** INTER-LS 301 and 302**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Gain an in-depth understanding of the applied research review process in the social sciences

Audience: Undergraduate

2. Define a contemporary problem area in the social sciences

Audience: Undergraduate

3. Conduct a literature review of recent and relevant social science research

Audience: Undergraduate

4. Develop a thesis about the potential trajectory and impact of that research

Audience: Undergraduate

**INTER-LS 602 – APPLIED SOCIAL SCIENCES PROBLEM ANALYSIS**

3 credits.

Build on previous work in a particular application area of social science research -- a contemporary issue or problem area related to one's own career or community experiences and goals -- through a series of readings, group discussions, research activities, and writing assignments. Complete a research review project that will summarize and analyze the most promising social science research paths to a solution of this issue or problem. Key steps include: organization of findings, equity/diversity analysis, and final narrative presentation.

**Requisites:** INTER-LS 601**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe the applied research review process

Audience: Undergraduate

2. Gather and organize recent research findings around a contemporary problem area

Audience: Undergraduate

3. Evaluate that research with respect to equity and diversity issues

Audience: Undergraduate

4. Assemble a narrative about the potential trajectory and impact of that research

Audience: Undergraduate

**INTER-LS 700 – PUBLIC HUMANITIES: THEORIES, METHODS, CASES**

3 credits.

Introduction to a range of methods, theories, and cases that represent the emerging field of the public humanities. Explore the range of opportunities that exist outside of academia. Focus on the limits, audiences, and outcomes of research in the humanities, including the possibility of translational research.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2020

## INTERDISCIPLINARY COURSES (SOHE) (INTER- HE)

### INTER-HE 201 – BELONGING, PURPOSE AND THE ECOLOGY OF HUMAN HAPPINESS: ECOYOU

3 credits.

This course explores the art and science of purposeful living by integrating academic knowledge with issues real and relevant to students' lives including: identity and belonging; happiness, purpose and meaning; self-awareness and self-presentation; romantic, peer and family relationships; material culture, consumer behavior and financial well-being; and connections to community, culture, and society. From the microbes that inhabit our guts to political revolutions sparked by a tweet, human lives are embedded in an ecology of complex, interdependent systems. Using the lens of Human Ecology, you will address "big questions" like: How am I connected to others and to larger systems? What brings happiness and works for the "greater good" in human lives? An overarching goal of the course is to help you understand yourself as embedded in the web of ever-evolving interconnected networks, an "EcoYou." Human Ecology is a systems approach to studying and understanding relationships between humans and their everyday environments; it is a civic and socially conscious orientation that is committed to understanding and improving the quality of human lives. Human Ecology is inherently interdisciplinary drawing on research, theories and methods from diverse fields such as sociology, psychology, anthropology, economics, public health, biology, and art and design.

**Requisites:** None

**Course Designation:** Breadth - Social Science  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### INTER-HE 202 – SOHE CAREER & LEADERSHIP DEVELOPMENT

1 credit.

Provides an introduction to leadership development, career development, and career readiness competencies.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### INTER-HE 301 – SPECIAL TOPICS IN HUMAN ECOLOGY

1-3 credits.

Specialized subject matter of current interest.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### INTER-HE 601 – INTERNSHIP

3 credits.

Develop career-readiness skills while applying academic knowledge in a workplace setting.

**Requisites:** INTER-HE 202 and junior standing

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, for 2 number of completions

**Learning Outcomes:** 1. Develop relationships with co-workers and supervisors working as a team member through varied experiences while improving interpersonal relationships

Audience: Undergraduate

2. Enhance knowledge of the industry's systems and procedures, including adapting to changing market trends and technology

Audience: Undergraduate

3. Reinforce educational and career goals while preparing for transition from student to a professional in the workplace

Audience: Undergraduate

4. Explore career opportunities within a company/organization and industry through real-world situations

Audience: Undergraduate

5. Develop professional competencies in written and oral communication

Audience: Undergraduate

### INTER-HE/ELPA 770 – COMMUNITY, OPPORTUNITY, AND JUSTICE

3 credits.

Critical examination of school-community engagement and collaboration. Examines theory and practice of mutually beneficial collaboration in diverse education settings, including leadership issues in collaborative settings, and facilitators and inhibitors to effective collaboration.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**INTER-HE 792 – THEORIES AND PERSPECTIVES IN HUMAN ECOLOGY**

1-2 credits.

Explore the multidisciplinary theories and perspectives that inform ecological thinking and the lens of the School of Human Ecology. Gain a clear understanding of the human ecological perspective, as it presents in SoHE; the benefits and challenges of applying this lens to research, policy, and outreach; and how your work fits within the larger human ecological perspective. Furthermore, develop skills and discover resources supporting cross-disciplinary communication and collaboration.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Define "human ecology" in a way that is personally significant and contextualizes your work

Audience: Graduate

2. Describe several cross-cutting perspectives that link definitions of human ecology across fields and disciplines (content areas)

Audience: Graduate

3. Integrate perspectives into a human ecological framework relevant to your work and professional goals

Audience: Graduate

4. Employ a human ecological perspective in framing questions and critically evaluating issues

Audience: Graduate

5. Evaluate the benefits and challenges of approaching your work with a human ecological lens

Audience: Graduate

6. Articulate your emerging identity as a human ecologist

Audience: Graduate

**INTER-HE 793 – RESEARCH METHODS**

3 credits.

Basic techniques: questionnaires, interviews, behavioral observation, sampling, experimental designs and data analysis using computer. Learn to write a research proposal with literature review.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**INTER-HE 801 – SPECIAL TOPICS IN HUMAN ECOLOGY**

1-3 credits.

Special Topics in Human Ecology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**INTER-HE 815 – PROFESSIONAL SKILLS FOR COMMUNITY LEADERS AND PRACTITIONERS**

1 credit.

Special topics related to applied work and professional skill development in Human Ecology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**INTER-HE 940 – COLLABORATIVE CAPSTONE I**

3 credits.

Begin the collaborative design thinking process by exploring current state, empathizing with users, and defining opportunity areas for design. Specifically - find and frame a challenge, break it down to get started, conduct ethnographic and inspiration research, synthesize research findings into themes, insights and opportunities, visualize opportunities with frameworks and concepts, and compile evidence for desirability, feasibility and viability. Practice behaviors of design thinking - ethics, critique, and storytelling.

**Requisites:** Declared in the MS Design + Innovation**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Apply an iterative design thinking process on an interdisciplinary team.

Audience: Graduate

2. Frame a challenge at an appropriate level for design exploration.

Audience: Graduate

3. Empathize with a broad range of stakeholders to understand needs through the ethnographic method.

Audience: Graduate

4. Synthesize raw learnings into opportunities for design.

Audience: Graduate

5. Communicate effectively, both visually and orally.

Audience: Graduate

6. Demonstrate constructive collaboration behaviors— creative critique, balancing independent work with group work, and knowing when to get an outside opinion.

Audience: Graduate

**INTER-HE 980 – CAPSTONE SEMINAR**

1-3 credits.

Facilitates and supports completion of a capstone project. Gain feedback from peers and the instructor; set goals and provides structure for timely and successful project completion; covers skills and knowledge to support students in the next stage of their careers, after graduate school.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Articulate key issues in using and communicating about research in applied settings.

Audience: Graduate

2. Plan and carry out a capstone project demonstrating their substantive knowledge and analytic skills in the human ecology field.

Audience: Graduate

3. Communicate the results of their capstone project to both academic and non-academic audiences.

Audience: Graduate

## INTERNATIONAL ACADEMIC PROGRAMS – STUDY ABROAD (STDYABRD)

**STDYABRD 100 – TOPICS IN BIOLOGICAL SCIENCE**

1-6 credits.

Biological science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 106 – TOPICS IN HUMANITIES**

1-6 credits.

Humanities course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 116 – TOPICS IN LITERATURE**

1-6 credits.

Literature course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 125 – TOPICS IN NATURAL SCIENCE**

1-6 credits.

Natural science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth - Natural Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 130 – TOPICS IN PHYSICAL SCIENCE**

1-6 credits.

Physical science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 136 – TOPICS IN SOCIAL SCIENCE**

1-6 credits.

Social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 145 – TOPICS IN SOCIAL AND NATURAL SCIENCE**

1-6 credits.

Social/natural science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth - Either Social Science or Natural Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions

**STDYABRD 150 – TOPICS IN HUMANITIES AND NATURAL SCIENCE**

1-6 credits.

Humanities/natural science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Natural Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 155 – TOPICS IN BIOLOGICAL AND SOCIAL SCIENCE**

1-6 credits.

Biological/social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Biological Science or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 161 – TOPICS IN HUMANITIES AND SOCIAL SCIENCE**

1-6 credits.

Humanities/social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 170 – INTERDIVISIONAL TOPICS**

1-6 credits.

Course taken on a UW-Madison resident study abroad program for which there is no departmental or breadth equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 176 – INTERDIVISIONAL TOPICS**

1-6 credits.

Course taken on a UW-Madison resident study abroad program for which there is no departmental or breadth equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 190 – FIRST SEMESTER FOREIGN LANGUAGE**

3-6 credits.

Foreign language course taken on a Madison resident study abroad program in a language not taught at UW-Madison. Current enrollment in a UW-Madison study abroad program and prior approval by IAP in consultation with a related foreign language department.

**Requisites:** None**Course Designation:** Frgn Lang – 1st semester language course Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Perform elementary everyday communicative functions in the target language orally and in writing, at the first-semester level.

Audience: Undergraduate

2. Recognize the relationship between culture and language use

Audience: Undergraduate

3. Identify common traits and distinctive features of the target culture

Audience: Undergraduate

**STDYABRD 195 – SECOND SEMESTER FOREIGN LANGUAGE**

3-6 credits.

Foreign language course taken on a Madison resident study abroad program in a language not taught at UW-Madison. Does not award retrocredit. Current enrollment in a UW-Madison study abroad program and prior approval by IAP in consultation with a related foreign language department. Enrollment in this course presumes students have completed a first-semester course in the language or placed directly into the course.

**Requisites:** None**Course Designation:** Frgn Lang – 2nd semester language course Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2013**Learning Outcomes:** 1. Perform elementary everyday communicative functions in the target language orally and in writing, at the second-semester level.

Audience: Undergraduate

2. Recognize the relationship between culture and language use.

Audience: Undergraduate

3. Identify common traits and distinctive features of the target culture

Audience: Undergraduate

**STDYABRD 290 – THIRD SEMESTER FOREIGN LANGUAGE**

3-6 credits.

Foreign language course taken on a Madison resident study abroad program in a language not taught at UW-Madison. Does not award retrocredit. Current enrollment in a UW-Madison study abroad program and prior approval by IAP in consultation with a related foreign language department. Enrollment in this course presumes students have completed a second-semester course in the language or placed directly into the course.

**Requisites:** None**Course Designation:** Frgn Lang – 3rd semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Perform intermediate everyday communicative functions in the target language orally and in writing, at the third-semester level.

Audience: Undergraduate

2. Recognize the relationship between culture and language use.

Audience: Undergraduate

3. Identify common traits and distinctive features of the target culture

Audience: Undergraduate

**STDYABRD 295 – FOURTH SEMESTER FOREIGN LANGUAGE**

3-6 credits.

Foreign language course taken on a Madison resident study abroad program in a language not taught at UW-Madison. Does not award retrocredit. Current enrollment in a UW-Madison study abroad program and prior approval by IAP in consultation with a related foreign language department. Enrollment in this course presumes students have completed a third-semester course in the language or placed directly into the course.

**Requisites:** None**Course Designation:** Frgn Lang – 4th semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2013**Learning Outcomes:** 1. Perform intermediate everyday communicative functions in the target language orally and in writing, at the fourth-semester level.

Audience: Undergraduate

2. Recognize the relationship between culture and language use.

Audience: Undergraduate

3. Identify common traits and distinctive features of the target culture

Audience: Undergraduate

**STDYABRD 300 – TOPICS IN BIOLOGICAL SCIENCE**

1-6 credits.

Biological science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2008**STDYABRD 306 – TOPICS IN HUMANITIES**

1-6 credits.

Humanities course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2008**STDYABRD 316 – TOPICS IN LITERATURE**

1-6 credits.

Literature course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 325 – TOPICS IN NATURAL SCIENCE**

1-6 credits.

Natural science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Natural Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions

**STDYABRD 330 – TOPICS IN PHYSICAL SCIENCE**

1-6 credits.

Physical science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 336 – TOPICS IN SOCIAL SCIENCE**

1-6 credits.

Social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 345 – TOPICS IN SOCIAL AND NATURAL SCIENCE**

1-6 credits.

Social/natural science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Social Science or Natural Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 350 – TOPICS IN HUMANITIES AND NATURAL SCIENCE**

1-6 credits.

Humanities/natural science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Natural Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 355 – TOPICS IN BIOLOGICAL AND SOCIAL SCIENCE**

1-6 credits.

Biological/social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 361 – TOPICS IN HUMANITIES AND SOCIAL SCIENCE**

1-6 credits.

Humanities/social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 370 – INTERDIVISIONAL TOPICS**

1-6 credits.

Course taken on a UW-Madison resident study abroad program for which there is no departmental or breadth equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 376 – INTERDIVISIONAL TOPICS**

1-6 credits.

Course taken on a UW-Madison resident study abroad program for which there is no departmental or breadth equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 380 – TOPICS IN BIOLOGICAL SCIENCE**

1-6 credits.

Biological science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program and permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 381 – TOPICS IN HUMANITIES**

1-6 credits.

Humanities course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program and permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**STDYABRD 382 – TOPICS IN LITERATURE**

1-6 credits.

Literature course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program and permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 383 – TOPICS IN NATURAL SCIENCE**

1-6 credits.

Natural science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program and permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 384 – TOPICS IN PHYSICAL SCIENCE**

1-6 credits.

Physical science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program and permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 385 – TOPICS IN SOCIAL SCIENCE**

1-6 credits.

Social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program and permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 386 – TOPICS IN SOCIAL AND NATURAL SCIENCE**

1-6 credits.

Social/natural science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program and permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth - Either Social Science or Natural Science Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 387 – TOPICS IN HUMANITIES AND NATURAL SCIENCE**

1-6 credits.

Humanities/natural science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Enrollment in a UW-Madison resident study abroad program permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Natural Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 388 – TOPICS IN BIOLOGICAL AND SOCIAL SCIENCE**

1-6 credits.

Biological/social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program and permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth - Either Biological Science or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 389 – TOPICS IN HUMANITIES AND SOCIAL SCIENCE**

1-6 credits.

Humanities/social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program and permission of the LS Honors Program

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**STDYABRD 390 – FIFTH SEMESTER FOREIGN LANGUAGE**

3-6 credits.

Foreign language course taken on a Madison resident study abroad program in a language not taught at UW-Madison. Current enrollment in a UW-Madison study abroad program and prior approval by IAP in consultation with a related foreign language department

**Requisites:** None**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 393 – SIXTH SEMESTER FOREIGN LANGUAGE**

3-6 credits.

Foreign language course taken on a Madison resident study abroad program in a language not taught at UW-Madison. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 500 – TOPICS IN BIOLOGICAL SCIENCE**

1-6 credits.

Biological science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 506 – TOPICS IN HUMANITIES**

1-6 credits.

Humanities course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 516 – TOPICS IN LITERATURE**

1-6 credits.

Literature course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 525 – TOPICS IN NATURAL SCIENCE**

1-6 credits.

Natural science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Natural Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 530 – TOPICS IN PHYSICAL SCIENCE**

1-6 credits.

Physical science course taken on UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 536 – TOPICS IN SOCIAL SCIENCE**

1-6 credits.

Social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 545 – TOPICS IN SOCIAL AND NATURAL SCIENCE**

1-6 credits.

Social/natural science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Social Science or Natural Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 550 – TOPICS IN HUMANITIES AND NATURAL SCIENCE**

1-6 credits.

Humanities/natural science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Natural Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions

**STDYABRD 555 – TOPICS IN BIOLOGICAL AND SOCIAL SCIENCE**

1-6 credits.

Biological/social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 561 – TOPICS IN HUMANITIES AND SOCIAL SCIENCE**

1-6 credits.

Humanities/social science course taken on a UW-Madison resident study abroad program for which there is no departmental equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 570 – INTERDIVISIONAL TOPICS**

1-6 credits.

Course taken on a UW-Madison resident study abroad program for which there is no departmental or breadth equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**STDYABRD 576 – INTERDIVISIONAL TOPICS**

1-6 credits.

Course taken on a UW-Madison resident study abroad program for which there is no departmental or breadth equivalent. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions

## INTERNATIONAL BUSINESS (INTL BUS)

**INTL BUS 200 – INTERNATIONAL BUSINESS**

3 credits.

Technology, privatization, deregulation and other government policies, and growth of a mass culture are among the factors that drive global business today. Introduction to the key concepts necessary to understand the functioning of global markets and the inherent issues managers face in planning and executing international business strategies for products, services and investments.

Audience: Undergraduate

2. Understand how globalization is shaping the local economy, and how the local economy in turn impacts globalization.

Audience: Undergraduate

3. Transfer international business theory to professional practice.

Audience: Undergraduate

4. Demonstrate personal and leadership qualities that help achieve success in global enterprise.

Audience: Undergraduate

**INTL BUS 365 – CONTEMPORARY TOPICS**

1-3 credits.

A course for the exploration of subject areas possibly to be introduced into the business curriculum.

**Requisites:** Sophomore standing or declared in undergraduate Business Exchange program

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### INTL BUS 399 – READING AND RESEARCH-INTERNATIONAL BUSINESS

1-6 credits.

Individual work suited to the needs of undergraduate students may be arranged both during regular sessions and the intersession periods.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2012

### INTL BUS/M H R 403 – GLOBAL ISSUES IN MANAGEMENT

3 credits.

Focuses on the strategic management required in global business. Topics include environmental analysis, global strategy, and subsidiary control. The aim of the course is to develop special skills that are required to manage international firms.

**Requisites:** Sophomore standing. Not open to graduate/professional students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the key drivers of globalization and their impact on organizational strategy, structure, and culture in global settings.

Audience: Undergraduate

2. Evaluate the role of cultural differences in facilitating or hindering organizational success and recommend strategies for effective leadership across cultures.

Audience: Undergraduate

3. Apply global human resource and corporate social responsibility practices to improve organizational productivity and sustainability in a global economy.

Audience: Undergraduate

4. Assess country, competitor, market, and consumer data to develop and refine management and marketing plans that allows a company to gain a sizeable market share and achieve strong financial performance for its operations in another country.

Audience: Undergraduate

### INTL BUS/MARKETNG 420 – GLOBAL MARKETING STRATEGY

3 credits.

Structure of foreign trading; commercial facilities available to exporters and importers; application of economic analysis in marketing decisions; contemporary trends in international economy affecting foreign trade policies and practices.

**Requisites:** (MARKETNG 300 and sophomore standing) or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize and analyze the impact of government intervention on trade and investment at national and transnational levels.

Audience: Undergraduate

2. Explain the role of the US in the global economy considering changes in demographics, technology, government intervention, trade, and resource scarcity.

Audience: Undergraduate

3. Identify challenges faced by global marketers due to differences in legal systems, laws, jurisdiction, and enforcement of property rights, including ethical considerations.

Audience: Undergraduate

4. Conduct cultural research to prepare for negotiations with potential suppliers, distributors, and consumers.

Audience: Undergraduate

5. Develop proposals that adapt a firm's international business strategy based on evaluations of how risk, culture, and macro- and national-level economic factors influence foreign national and sub-national environment.

Audience: Undergraduate

**INTL BUS/FINANCE 445 – MULTINATIONAL BUSINESS FINANCE**  
3 credits.

Application of financial theory to the operations of multinational firms; survey of the international financial environment; determinants of international portfolio and direct investment capital flows; management of foreign exchange position and hedging strategies; evaluation of foreign investment projects (multinational capital budgeting); international financial structure decisions; multinational credit institutions and capital markets; taxation of international business.

**Requisites:** (FINANCE 305, 325, 330, and ECON/FINANCE 320), or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the knowledge and technical skills needed to be the treasurer of an international firm

Audience: Undergraduate

2. Apply methods to measure, manage and analyze the effects posed by exchange rate risk to the income statement and balance sheet of a firm

Audience: Undergraduate

3. Evaluate foreign investment decisions

Audience: Undergraduate

4. Articulate the choices and challenges faced by managers when sourcing funds in the global capital markets, and in making complex foreign investment decisions

Audience: Undergraduate

**INTL BUS 450 – STUDY ABROAD IN INTERNATIONAL BUSINESS**  
1 credit.

Engage in activities that aim to translate and integrate the study abroad experience. Build international business and global competencies while connecting with others engaged in an immersion experience.

**Requisites:** Declared in Certificate in International Business

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Build international business and related global competencies through a structured examination of the host country.

Audience: Undergraduate

2. Integrate the study abroad experience into personal and professional career readiness goals.

Audience: Undergraduate

**INTL BUS/A A E/ECON 462 – LATIN AMERICAN ECONOMIC DEVELOPMENT**  
3 credits.

A historico-institutional analysis of development problems in the principal Latin American countries, with attention to differentiation of national growth patterns and alternative development strategies.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate mastery of the language of international development economics

Audience: Undergraduate

2. Develop proficiency in an array of concepts from primary product exports to conditional cash transfers to migration and remittances to corruption and civil conflict.

Audience: Undergraduate

3. Examine how markets and distinct development strategies and processes provide different opportunities and returns for the rich and the poor, urban and rural, latino and indigenous peoples, large and small countries, and so on.

Audience: Undergraduate

4. Explain the strengths and weaknesses of contending theories of economic development.

Audience: Undergraduate

5. Apply contending theories to markets, state policies, social initiatives, and historical experiences in Latin American countries.

Audience: Undergraduate

**INTL BUS/FINANCE 745 – MULTINATIONAL BUSINESS FINANCE**

2-3 credits.

Theory of business finance as applied to the operations of multinational firms; financial analysis and control of foreign investment decisions; working capital management; multinational credit institutions and capital markets; special accounting problems and trends in international monetary affairs.

**Requisites:** FINANCE 700

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the knowledge and skills needed as a senior financial officer of an international firm.

Audience: Graduate

2. Understand how the international economic and financial environment and the exchange rates affect financial decisions by firms.

Audience: Graduate

3. Apply the methods used to measure, manage and analyze the effects posed by exchange rate uncertainty to the income statement and balance sheet of a firm.

Audience: Graduate

4. Articulate the choices and challenges faced by managers when sourcing funds in the global capital markets, and in making complex foreign investment decisions

Audience: Graduate

**INTL BUS 765 – CONTEMPORARY TOPICS**

1-4 credits.

Exploration of advanced subject areas possibly to be introduced into the business curriculum.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**INTL BUS 766 – GLOBAL BUSINESS MANAGEMENT**

2 credits.

Focuses on the acquisition of knowledge and the development of skills over a broad range of issues related to global management. The overall goal is to improve global competence by discussing: why organizations "go global;" global business venture options; the impact of foreign business activities on host countries; how to conduct a "CAGE" analysis; how to identify and mitigate global risks; issues related to CSR and corruption for foreign business activity; the role of labor codes; ways to manage a global work force; the role of "global cadres;" and the roles and management of expatriates. Country/region knowledge explored will encompass Asia, Africa, South America, and Europe.

**Requisites:** Declared in Business: General Management, MBA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Illustrate the CAGE (Culture, Administrative, Global, Economic issues) analysis for global business

Audience: Graduate

2. Summarize the reasons for global strategies and the complexities and challenges involved in developing and implementing them

Audience: Graduate

3. Explain why host countries choose to host foreign business and the costs and benefits associated with doing business with international companies

Audience: Graduate

4. Critically assess potential strategies, benefits and the unique risks of doing business internationally

Audience: Graduate

5. Contrast the management of a global workforce vs a domestic workforce; including staffing and management of international employees

Audience: Graduate

6. Outline the changing nature of global business with regards to managing ethical concerns, questions of corruption, and varying standards of conduct between the organization and host nation

Audience: Graduate

**INTL BUS 767 – GLOBAL LEARNING EXPERIENCE**

2 credits.

Visit host countries to improve global competence by discussing and experiencing key issues for US organizations doing business in the host countries. A key component will be the integration, in a global context, of the knowledge and skills from the MBA coursework in marketing, finance, international business, operations, economics, accounting, strategy, and leadership. The techniques learned and practiced can be used in the future to competently research and understand global business issues for any part of the world.

**Requisites:** Declared in Business: General Management, MBA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Outline and manage legal, political, economic, technological, social and regulatory risks of host countries

Audience: Graduate

2. Profile and evaluate a company doing business in the host countries

Audience: Graduate

3. Apply insights from NGOs, Domestic, Western, multinational corporations doing business in the geographic region to the companies doing business in the host countries

Audience: Graduate

4. Analyze a retail product segment in country 2 and compare that segment to the United States

Audience: Graduate

**INTL BUS 780 – BUSINESS IN THE GLOBAL ECONOMY**

2 credits.

Exploration of the forces, frameworks, and institutions that drive the global economy and the inherent issues managers face in planning and executing international business strategies. Topics include the history of globalization, global market dynamics, political economy, trade policies, cross-cultural management, and strategic decision-making in a global context.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Articulate the politics of trade at the national and supranational level and explain the tools governments use to impact trade and investment flows.

Audience: Graduate

2. Explain how the forces of risk, culture, and macro- and national-level economic factors impact firm strategy when products and services go across national borders.

Audience: Graduate

3. Explain the role of institutions such as the International Monetary Fund (IMF), World Bank, and the World Trade Organization (WTO) in facilitating trade and investment.

Audience: Graduate

4. Describe the fundamentals of foreign currency risk and the international monetary system.

Audience: Graduate

5. Analyze and evaluate the benefits and costs of various foreign entry strategies, including direct foreign investment.

Audience: Graduate

**INTL BUS 799 – READING AND RESEARCH-INTERNATIONAL BUSINESS**

1-6 credits.

Individual work suited to the needs of graduate students may be arranged both during regular sessions and the intersession periods.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2011

# INTERNATIONAL STUDIES (INTL ST)

## INTL ST 101 – INTRODUCTION TO INTERNATIONAL STUDIES

3-4 credits.

Introduces the field of international studies, and performs an interdisciplinary examination of the cultural, political, economic, and social patterns that have defined the modern world.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## INTL ST 110 – INTERNATIONAL LEARNING COMMUNITY GENERAL SEMINAR

1 credit.

Promotes understanding of international and cross-cultural issues and encourages collaborative learning between students, faculty, and staff of the International Learning Community (ILC).

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Make connections across national and cultural borders

Audience: Undergraduate

2. Synthesize knowledge about different times and places to arrive at nuanced views of global issues

Audience: Undergraduate

3. Demonstrate oral communication skills through reasoned, well-organized and sustained discussions of important issues or questions, including the ability to explain and evaluate different or opposing perspectives evenhandedly and dispassionately.

Audience: Undergraduate

## INTL ST/HISTORY 146 – A GLOBAL HISTORY OF NOW

3-4 credits.

An introduction to key historical events, movements, and systems that have shaped our present moment. Examines the relationship between empire-building and anti-colonial movements from the late 18th century to the current day. Focuses on the political, economic, and social/cultural dimensions of major global history themes, such as colonialism, capitalism, and revolution.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a historical understanding of imperialism and decolonization since 1800

Audience: Undergraduate

2. Formulate arguments about change over time, and think critically about how narratives about the past are constructed

Audience: Undergraduate

3. Refine the ability to recognize and question assumptions

Audience: Undergraduate

4. Determine what constitutes reliable and valid evidence

Audience: Undergraduate

5. Interpret, compare, and contrast primary sources

Audience: Undergraduate

6. Improve writing and public speaking skills

Audience: Undergraduate

7. Acquire awareness of history's impact on the present

Audience: Undergraduate

### INTL ST 210 – INTERNATIONAL LEARNING COMMUNITY LANGUAGE SEMINAR

1 credit.

Promotes understanding of international and cross-cultural issues and related vocabulary in the target language and encourages collaborative learning between students, faculty, and staff of the International Learning Community (ILC).

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize and use vocabulary related to course topic.

Audience: Undergraduate

2. Synthesize knowledge about different times and places to arrive at nuanced views of global issues.

Audience: Undergraduate

3. Demonstrate communication skills in the target language through reasoned, well-organized and sustained discussions of important issues or questions, including the ability to explain and evaluate different or opposing perspectives evenhandedly and dispassionately.

Audience: Undergraduate

### INTL ST/ANTHRO/FOLKLORE/LINGUIS 211 – GLOBAL LANGUAGE ISSUES

3 credits.

Focuses on language and its culture, example topics include: extinction and revival, language and nationhood, how widely and deeply languages differ, language and worldview, writing systems and literacy, language discrimination and inequality.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify ways that geographic, social, and political events, movements, and trends shape the sociolinguistic context of the world's languages

Audience: Undergraduate

2. Demonstrate an understanding of subfields of global sociolinguistic inquiry, including language contact, variation, change, and death; language revitalization; the intersections of language, race, and ethnicity; the intersections of language and gender, and sexuality

Audience: Undergraduate

3. Critically evaluate specific examples of language use in a variety of linguistic and cultural contexts

Audience: Undergraduate

4. Design and conduct a sociocultural linguistic research project, including: identify a research question; collect appropriate resources and data; conduct data analysis and interpretation; draw conclusions, and summarize results

Audience: Undergraduate

### INTL ST 212 – WISCHOLARS: WISCONSIN INTERNATIONAL SCHOLARS PROGRAM SEMINAR

1 credit.

Discussion of international events and topics designed specifically for Wisconsin International Scholars (WISc) Program participants, geared toward fostering leadership skills.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**INTL ST/ED POL 220 – HUMAN RIGHTS AND EDUCATION**

3 credits.

Explores questions related to human rights and education, from the individual to the global level; from the abstract to the practical: What does it mean to be human? How do we learn to be human? What rights mark a human being? Do all human have rights? If they have a right to education, do they have a right to a particular kind of education? Can one global education and human rights model best meet the needs of our incredibly diverse global population? Can the global human rights framework improve current educational, national, social, and economic inequities? How so? How does education as a human right relate to human rights education? and who should decide the answers to these questions, and how? Investigates the tensions and boundaries of the human rights framework to reduce social inequality through methodological inquiries in educational case studies, including: educational inequality; victims of the war on drugs; working children's rights; and climate change.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Develop awareness of the diversity of historical, political-economic, social and cultural meanings of 'human,' including the ethical imperatives and the exclusionary practices underlying them.

Audience: Undergraduate

2. Be familiar with global Human Rights frameworks and institutions, and develop a critical appreciation of their potential as well as limitations in particular sociocultural contexts.

Audience: Undergraduate

3. Develop a critical understanding of educational experiences in terms of Human Rights.

Audience: Undergraduate

4. Read and produce academic texts; more specifically: summaries, personal narratives, expository texts, and persuasive papers.

Audience: Undergraduate

**INTL ST/HISTORY/LACIS 242 – MODERN LATIN AMERICA**

3-4 credits.

A broad overview of Latin American history in the modern period, since independence but with a primary focus on the twentieth century. Particular emphasis will be placed on the socioeconomic, cultural, and political structures and processes that shaped and continue to influence life in Latin America. Key issues such as colonialism, nationalism, democracy, and revolution will be examined critically in light of broad comparative themes in Latin American and world history. Among the topics to be explored in detail will be the Mexican and Cuban revolutions, populism and dictatorship, socialism and neoliberalism, and drugs and migration.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**Learning Outcomes:** 1. Describe the contours of Latin American history in the period since independence

Audience: Undergraduate

2. Apply and use key concepts relevant to Latin American history, such as imperialism, inequality, populism, socialism, neoliberalism

Audience: Undergraduate

3. Read for a dedicated purpose across different genres and forms of writing

Audience: Undergraduate

4. Apply historical reasoning to understand the origins of present-day issues

Audience: Undergraduate

5. Communicate effectively through presentations, discussion, and written work

Audience: Undergraduate

**INTL ST 266 – INTRODUCTION TO THE MIDDLE EAST**

3 credits.

An interdisciplinary introduction to the diverse cultures, geography, history, modern states, politics, societies, and economies of the Middle East. A special emphasis placed on Islam as a religion and Muslim peoples.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**INTL ST 275 – LEAD WITH LANGUAGES: PUTTING LANGUAGE SKILLS TO WORK**

1 credit.

Whether you developed your language abilities at home, abroad, or in an educational setting, learn how to leverage your language skills to maximize potential employment opportunities. Develop an understanding of transferable skills unique to language learners and work toward articulating these skills for resume, cover letter, networking, and interviewing exercises. Connect your enthusiasm for learning languages with your personal interests, skills, and abilities to begin exploring career pathways. Learn from peers, alumni, and other guest speakers with language majors and multilingual backgrounds who have succeeded in a variety of careers.

**Requisites:** Sophomore standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop understanding of demand for multilingual talent in a variety of career fields and become familiar with institutions/organizations/companies supporting language and career connections.

Audience: Undergraduate

2. Identify personal strengths and interest areas related to language skills and utilize campus resources, alumni contacts, and informational interviewing to explore career options.

Audience: Undergraduate

3. Learn how to articulate and emphasize language and intercultural skills to improve upon online presence, resume, cover letter, and interviewing opportunities.

Audience: Undergraduate

4. Articulate orally and in writing skills and abilities for self-promotion through direct connection of classroom activity to real world job opportunities.

Audience: Undergraduate

**INTL ST/AFRICAN 302 – ARABIC LITERATURE AND CINEMA**

3 credits.

An introduction to the most significant topics of contemporary Arabic literature and cinema. Discuss the legacy of colonialism, repressive nature of post-independence regimes, discourses on nationalism, religion vs. secularization, gender relations, representation of cultural otherness, and the Arab Springs. Materials will be drawn from a variety of cultural forms including literature, film, music, and performance; and scholarship, exploring the social, cultural, political, and economic contexts in which texts and films are written and exhibited.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns among Arabic language authors and filmmakers of the 20th and 21st centuries, within their social, cultural and political contexts.

Audience: Undergraduate

2. Demonstrate—in writing, discussion, and presentations—an engagement with literary texts and movies with an eye to aesthetic genres, tendencies, and techniques.

Audience: Undergraduate

3. Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.

Audience: Undergraduate

4. Analyze the complex ways culture relates to individual choice, values, ideas, and the human experience across cultures.

Audience: Undergraduate

5. Value people and groups whose traditions and beliefs differ from our own.

Audience: Undergraduate

6. Communicate effectively through essays, oral presentations, and discussion, to share knowledge, wisdom, and values with others.

Audience: Undergraduate

7. Analyze contemporary political and cultural realities globally from multi-disciplinary perspectives.

Audience: Undergraduate

8. Understand the social, political, economic and cultural forces and conditions that have given rise to the unity and diversity of the Arab world.

Audience: Undergraduate

**INTL ST 310 – INTERNATIONAL LEARNING COMMUNITY SEMINAR**  
1-3 credits.

Addresses various international, cross-cultural and language topics of interest to the residents of the International Learning Community.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**INTL ST/GEOG 311 – THE GLOBAL GAME: SOCCER, POLITICS, AND IDENTITY**  
3-4 credits.

Soccer (or football) is played in almost every part of the world. Soccer will be used as a lens through which to think critically about a range of issues within our own societies and around the world. This includes examining the relationship between European imperialism and the globalization of soccer in the early 20th century; thinking about who gets to play (and who gets paid) across different contexts; and analyzing how soccer is both globally networked and intensely local in its passions and rivalries. Draws from a range of perspectives on soccer, from those who consider it to be an opium for the masses to those who see it as a vehicle for positive social change, in order to illuminate some of the big questions facing the world today.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify and describe the ways that soccer shapes societies and vice-versa.

Audience: Undergraduate

2. Demonstrate an understanding of different theoretical approaches to studying soccer.

Audience: Undergraduate

3. Analyze sites in which soccer can be a vehicle for contesting political and cultural injustices.

Audience: Undergraduate

4. Apply course insights to broader debates about globalization, identities, and inequalities.

Audience: Undergraduate

**INTL ST/GEOG 315 – UNIVERSAL BASIC INCOME: THE POLITICS BEHIND A GLOBAL MOVEMENT**  
3 credits.

Should all individuals in society receive a regular transfer of cash from the state without any strings attached? If that question had been posed fifteen years ago, it would likely have been dismissed as unrealistic, undesirable, or just plain crazy. In recent years, however, the idea of introducing a universal basic income [UBI] has gained a lot of traction around the world. Growing inequalities, financial crises, fears about jobs being automated, and the COVID-19 pandemic have all helped to put UBI on the political map. But where did the idea come from? How is it traveling to different parts of the world? And on what grounds do different advocates justify their claims? Address these questions and more by exploring the history, philosophy, and political economy of UBI from a range of perspectives. Ongoing UBI experiments from different parts of the world will also be examined.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Describe the histories and philosophies that have shaped UBI claims.

Audience: Undergraduate

2. Differentiate UBI from other forms of social assistance.

Audience: Undergraduate

3. Compare and contrast different schools of thought regarding UBI.

Audience: Undergraduate

4. Evaluate evidence from recent and ongoing UBI experiments.

Audience: Undergraduate

5. Produce your own arguments about UBI.

Audience: Undergraduate

**INTL ST 320 – CONTEMPORARY ISSUES IN INTERNATIONAL STUDIES**  
1-4 credits.

Addresses various contemporary international, cross-cultural, and interdisciplinary issues.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**INTL ST/POLI SCI 325 – SOCIAL MOVEMENTS AND REVOLUTIONS IN LATIN AMERICA**

3-4 credits.

An introduction to the major empirical and theoretical themes in the study of social movements and politics in Latin America. While it is impossible to cover every theoretical approach or Latin American case during the semester, the course should give students the tools to begin to think critically about where and why people engage in collective action. We will develop and hone these tools through thinking about Latin American cases, paying specific attention to revolutions, social movements, and riots. The course is designed in three parts. It begins by exposing students to the dominant theoretical paradigms in the study of contentious politics as well as some prominent critiques. The course then turns to empirical themes in Latin American revolutions, challenging students to use and question the theoretical tools to which they have already been exposed. The final part of the course looks to social movements in Latin America. Cases will focus on challenges to dictatorships, identity-based movements, and resistance to globalization.

**Requisites:** Sophomore standing and (POLI SCI 120, 140 or INTL ST 101) or (POLI SCI 103 or 106 taken prior to Fall 2017)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**INTL ST/HISTORY 330 – GLOBAL HISTORY OF HUMANITARIANISM**

3-4 credits.

What motivates us to try to alleviate the suffering of people in distant parts of the world? Examines the origins of humanitarian ideas and institutions, and how various humanitarian campaigns have been shaped by geopolitical processes, including the abolition of the slave trade, the spread of missionary Christianity, European imperialism, the Cold War, neoliberalism and the emergence of new media forms. Questions include: who has benefited from various humanitarian aid campaigns throughout history? How have various humanitarian campaigns shaped, and been shaped by, patterns of global inequality? Why have some populations, and not others, been deemed worthy of the world's compassion? Explores the worlds, perspectives and visions of humanitarians through a range of primary sources, including diary entries, political propaganda, memoirs, journalistic reportage, photography and documentary film.

**Requisites:** Sophomore standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**INTL ST/HISTORY 332 – EAST ASIA & THE U.S. SINCE 1899**

3-4 credits.

From the Boxer Rebellion, to the dropping of the atomic bombs, to the nuclear stand-off with North Korea, American foreign relations with East Asia during the 20th century were as consequential as they were controversial. Survey the issues and questions that alternately made allies and enemies of these nations: How did the quest for markets influence American policy towards China? How did European imperialism shape Japan's rise? Why did communism seem to offer a more compelling economic and political arrangement to China and North Korea? While squarely rooted in East Asia this course will also explore the questions that united and divided Americans over their nation's foreign policy. Through examining these questions, develop answers and construct their own narrative of the relationship between the United States and East Asia.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and summarize the important features and major periods in the history of US–East Asian Relations

Audience: Both Grad & Undergrad

2. Identify and summarize the major foreign relations objectives of China, Japan, North Korea, South Korea, and the United States during the major historical periods of the 20th century

Audience: Both Grad & Undergrad

3. Explain and evaluate how these societies have viewed each other during periods of conflict and cooperation

Audience: Undergraduate

4. Describe how people-to-people connections have shaped these relationships beyond their governments intentions

Audience: Undergraduate

5. Use historical knowledge to evaluate current trends in the relationships between these states

Audience: Undergraduate

6. Identify and summarize major trends and schools of interpretation in the historiography of US-East Asian relations

Audience: Graduate

7. Become proficient in the form, style, and conventions of an academic book review

Audience: Graduate

**INTL ST/ED POL 335 – GLOBALIZATION AND EDUCATION**

3 credits.

Discuss the ways education is inextricably linked to global political, economic, and social contexts. Reflect on both scholarly research and popular conceptions of market, society and schools in different geographic and cultural contexts. Approach globalization from a context-sensitive, place-based approach, rather than abstract, predictive method through interdisciplinary analysis. Explore the concept of globalization across disciplinary frameworks including anthropology, geography, and history. Provides critical analysis to understand the challenges facing education in a globalization era, to build stronger commitment to helping address those challenges, and a set of skills for researching and writing about them. Examine the following "problem-spaces": globalization and migration; globalization and race; global testing and assessment; marketization of education; global city development and higher education; youth culture and globalization.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. demonstrate an understanding of the social, cultural, and/or historical contexts of education policy

Audience: Undergraduate

2. examine education policy from multiple theoretical perspectives (e.g., historical, ethical/philosophical, economic/political, etc.)

Audience: Undergraduate

3. analyze education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference

Audience: Undergraduate

4. Recognize and apply principles of socially responsible and ethical research

Audience: Undergraduate

**INTL ST/HISTORY 366 – FROM FASCISM TO TODAY: SOCIAL MOVEMENTS AND POLITICS IN EUROPE**

3-4 credits.

Investigates how everyday people shaped European history and politics, from World War I through today. Takes a comparative and interdisciplinary approach to analyze a range of major social movements in Europe, thinking in detail about what constitutes a social movement in the first place, and what determines its effectiveness. Key topics include the rise and fall of Fascism; the fate of the Communist and Socialist Left in Europe; the role of youth movements as drivers of change; and the constraints imposed on political organizing by both democratic and authoritarian societies. Drawing on a range of texts, songs, and films, investigates how people power has shaped the European state, and vice-versa, from 1922 through today.

**Requisites:** Sophomore standing or 3 credits in HISTORY**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Refine their ability to read, analyze, and critically engage with primary and secondary sources.

Audience: Undergraduate

2. Craft sophisticated analytical arguments.

Audience: Undergraduate

3. Communicate complex ideas through speech, charitably evaluating opposing viewpoints, and working collaboratively with others.

Audience: Undergraduate

4. Become familiar with the building-blocks of European transnational and international history, and expose students to the study of social movements.

Audience: Graduate

5. Hone hermeneutical skills so as to evaluate and interpret sources more judiciously and charitably.

Audience: Graduate

6. Develop confidence as keen writers, sharp public speakers, and probing analysts of the past and present.

Audience: Graduate

**INTL ST/A A E 373 – GLOBALIZATION, POVERTY AND DEVELOPMENT**

3 credits.

Addresses the process of globalization -- trade, international capital flows, labor migration and remittances, and aid -- from the perspective of developing economies and the development process.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 102, or 111

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an informed perspective on economic drivers of globalization over the past 30 years and the links between globalization, economic development and poverty in low-income countries.

Audience: Undergraduate

2. Gain familiarity with ongoing debates concerning economic policy in developing countries and the role of international institutions in influencing those decisions.

Audience: Undergraduate

3. Learn multiple sources of information regarding economic circumstances of poverty-vulnerable countries.

Audience: Undergraduate

4. Use Excel and other computational tools to analyze and interpret large, multi-dimensional datasets.

Audience: Undergraduate

5. Demonstrate competence in writing about economic issues through reflections on topic reading assignments and in academic style in two longer writing assignments.

Audience: Undergraduate

**INTL ST/A A E 374 – THE GROWTH AND DEVELOPMENT OF NATIONS IN THE GLOBAL ECONOMY**

3 credits.

This course explores the roles of markets, states, and civil institutions, using economic theory, computer simulations, and historical experience to better understand the forces that shape the wealth and well-being of nations and people around the world.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 102, or 111

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate the importance of economic growth and globalization in the process of economic development of nations.

Audience: Undergraduate

2. Understand how economic theory and data can help identify and measure factors contributing to economic growth and the effects of globalization.

Audience: Undergraduate

3. Assess the historical and recent evolution of economic growth and globalization over time and across countries.

Audience: Undergraduate

4. Understand the role of policy and its effects on economic growth, globalization, and on the process of economic development.

Audience: Undergraduate

5. Demonstrate basic economic and statistical literacy for evaluating economic growth and globalization.

Audience: Undergraduate

6. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of economic growth and globalization.

Audience: Undergraduate

7. Describe the social, economic, and environmental dimensions of economic growth and globalization and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

### INTL ST/HISTORY 375 – THE COLD WAR - FROM WORLD WAR II TO END OF SOVIET EMPIRE

3-4 credits.

The Cold War was the first event to impact virtually all of humanity and left a lasting legacy that still shapes the current world order. Exploration of its conduct on five continents entails both a diversity of sources (film, fiction, documents, and memoir) and a range of topics (geopolitics, ideology, internationalism, empire, revolution, counterinsurgency, and covert operations). Its half-century history was marked by nuclear-armed stalemate and ideological competition in Europe, cultural politics of repression and generational revolt in America, interplay of anti-colonial nationalism and counterinsurgency in Asia, Africa, and Latin America, and a succession of major wars worldwide in Korea, Vietnam, Angola, and Afghanistan. By adopting an international perspective that carries us beyond the narrow ambit of the Moscow-Washington rivalry, integrate diverse global forces and particular national histories for a fuller understanding of an ever-changing world system.

**Requisites:** Sophomore standing or 3 credits in HISTORY or INTL ST

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Interpret primary sources

Audience: Undergraduate

2. Develop a refined ability to critically analyze secondary sources

Audience: Undergraduate

3. Merge a considered thesis, operational factors, and empirical evidence into a coherent analytical narrative

Audience: Undergraduate

4. Edit their own prose for both grace and clarity

Audience: Both Grad & Undergrad

5. Develop a perspective on how to incorporate primary sources in undergraduate teaching

Audience: Graduate

6. Develop a foundation for teaching their own world history courses, which are a requirement for job placement in a growing number of colleges and universities

Audience: Graduate

7. Develop a resonant sense of the extraordinary carrying capacity of historical narrative

Audience: Graduate

### INTL ST 401 – TOPICS IN GLOBAL SECURITY

3-4 credits.

Contemporary issues in international studies in global security.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### INTL ST 402 – TOPICS IN POLITICS AND POLICY IN THE GLOBAL ECONOMY

3-4 credits.

Contemporary issues in international studies in politics and policy.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### INTL ST 403 – TOPICS IN CULTURE IN THE AGE OF GLOBALIZATION

3-4 credits.

Contemporary issues in international studies in global culture.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **INTL ST 405 – TOPICS IN HUMAN RIGHTS AND HUMANITARIANISM**

3-4 credits.

Contemporary issues in international studies in human rights and humanitarianism.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Summarize contemporary discourse around issues related to human rights and humanitarianism.

Audience: Undergraduate

2. Engage in significant debates pertaining to human rights and humanitarianism.

Audience: Undergraduate

3. Analyze ongoing human rights and humanitarian issues, various kinds of human rights violations, and efforts to uphold human rights.

Audience: Undergraduate

4. Apply situated, contextual knowledge about international human rights to humanitarianism concerns

Audience: Undergraduate

5. Explain the relevance of an interdisciplinary and nuanced approach to human rights and humanitarianism advocacy issues.

Audience: Undergraduate

### **INTL ST/POLI SCI 431 – CONTENTIOUS POLITICS**

3-4 credits.

Social movements, revolutions, and riots continually shape and re-shape the world around us. The course will evaluate and apply dominant theoretical approaches to understanding contention through careful attention to empirical cases throughout the world.

**Requisites:** Sophomore standing and POLI SCI 140 or INTL ST 101 (or POLI SCI 103 taken prior to fall 2017) or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Examine how social movements, revolutions, and riots continually shape and re-shape the world around us.

Audience: Undergraduate

2. Evaluate and apply dominant theoretical approaches to understanding contention in politics.

Audience: Undergraduate

3. Study empirical cases of contentious politics throughout the world.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**INTL ST/POLI SCI 434 – THE POLITICS OF HUMAN RIGHTS**

3-4 credits.

Examines the origins and development of human rights in international politics. The course discusses what human rights are, international human rights movements, the international search for justice after mass crimes, and international humanitarian intervention. Not open to students with credit for POLI SCI 317 prior to fall 2017

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Analyze the meaning of human rights in international politics.

Audience: Undergraduate

2. Examine the origins and development of human rights in international politics.

Audience: Undergraduate

3. Explore international human rights movements.

Audience: Undergraduate

4. Discuss the international search for justice after mass crimes.

Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**INTL ST/POLI SCI 439 – THE COMPARATIVE STUDY OF GENOCIDE**

3-4 credits.

Examines the phenomenon of genocide in the modern world. The class covers the concept of genocide, theories of why genocide occurs, and particular cases in the 20th and 21st centuries. Not open to students with credit for POLI SCI 318 prior to fall 2017

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2021**Learning Outcomes:** 1. Examine genocide in the modern world.

Audience: Undergraduate

2. Study theories of why genocide occurs.

Audience: Undergraduate

3. Examine particular cases in the 20th and 21st centuries.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**INTL ST 501 – STUDY ABROAD TOPICS IN GLOBAL SECURITY**

1-6 credits.

Equivalency for study abroad with topics on global security. Enrollment in a UW-Madison Study Abroad program

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**INTL ST 502 – STUDY ABROAD TOPICS IN POLITICS AND POLICY IN THE GLOBAL ECONOMY**

1-6 credits.

Equivalency for study abroad with topics on global economy. Enrollment in a UW-Madison Study Abroad program

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions

### **INTL ST 503 – STUDY ABROAD TOPICS IN CULTURE IN THE AGE OF GLOBALIZATION**

1-6 credits.

Equivalency for study abroad with topics on global culture. Enrollment in a UW-Madison Study Abroad program

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

### **INTL ST 504 – STUDY ABROAD TOPICS IN GLOBAL ENVIRONMENT**

1-6 credits.

Equivalency for study abroad with topics on global commons. Enrollment in a UW-Madison Study Abroad program

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

### **INTL ST 520 – STUDY ABROAD TOPICS IN INTERNATIONAL STUDIES**

1-6 credits.

Equivalency for study abroad international internships. Enrollment in a UW-Madison Study Abroad program

**Requisites:** None

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

### **INTL ST 523 – INTERNATIONAL INTERNSHIP**

1-3 credits.

Equivalency for study abroad with topics on international studies. Enrollment in a UW-Madison Study Abroad program

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

### **INTL ST/GEN&WS 535 – WOMEN'S GLOBAL HEALTH AND HUMAN RIGHTS**

3 credits.

A human rights approach to global women's health to provide an overview of health issues within the context of a woman's life cycle. It will pay special attention to the socio-cultural and economic factors that play a role in determining women's access to quality basic health care.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Biological Science or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **INTL ST 601 – TOPICS IN GLOBAL SECURITY**

1-4 credits.

Treatment of topics in global security.

**Requisites:** Sophomore standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **INTL ST 602 – TOPICS IN POLITICS AND POLICY IN THE GLOBAL ECONOMY**

1-4 credits.

Treatment of topics in international political economy and policy studies.

**Requisites:** Sophomore standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **INTL ST 603 – TOPICS IN CULTURE IN THE AGE OF GLOBALIZATION**

1-4 credits.

Treatment of topics in culture in the age of globalization.

**Requisites:** Sophomore standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **INTL ST 620 – TOPICS IN INTERNATIONAL STUDIES**

1-4 credits.

Treatment of topics in international studies.

**Requisites:** Sophomore standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **INTL ST 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**INTL ST 682 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**INTL ST 691 – SENIOR THESIS**

3 credits.

Mentored individual research and study for students completing a senior thesis

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**INTL ST 692 – SENIOR THESIS**

3 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**INTL ST 699 – DIRECTED STUDY**

1-4 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**INTL ST 720 – GLOBAL STUDIES SEMINAR**

3 credits.

An interdisciplinary survey of the major approaches to the study of globalization. Become familiarized with key theories, issues, and debates, as well as methodological tools. Topics will include global economy, environment, health, culture, media, development, labor, governance, civil society, science, technology, and geography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

## ITALIAN (FRENCH AND ITALIAN) (ITALIAN)

**ITALIAN 100 – ITALIAN LANGUAGE ABROAD I**

1-4 credits.

First semester Italian language course taken on a study abroad program for which there is no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**ITALIAN 101 – FIRST SEMESTER ITALIAN**

4 credits.

Oral practice and conversation, grammar, reading, vocabulary building, and study of Italian cultures.

**Requisites:** Not open to students with credit for ITALIAN 181

**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ITALIAN 102 – SECOND SEMESTER ITALIAN**

4 credits.

Oral practice and conversation, grammar, reading, vocabulary building, and study of Italian cultures.

**Requisites:** ITALIAN 101 or 181

**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ITALIAN 103 – ITALIAN LANGUAGE ABROAD II**

1-4 credits.

Second semester Italian language course taken on a study abroad program for which there is no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**ITALIAN 150 – RACE, ETHNICITY, AND THE ITALIAN AMERICANS**

3 credits.

What does it mean to be Italian American? Must those who identify as such choose one identity over the other? How are they viewed by society? As Italian, American, or some undefinable other? Explore the history of Italian immigration to the United States and its effects on both the ethnic group and the hosting country, as recounted in literature and film both by those who experienced it firsthand and their descendants. Italians fleeing from racism and poverty in Italy found racial, religious, and cultural discrimination. Working toward "whiteness," Italian Americans traded off their own "Italian-ness" while clinging to aspects of it in the hope to preserve parts of their identity. They forged strong bonds with African American, Jewish, and other marginalized communities, in a relationship of understanding but also of tension and rivalry. Focuses on specific literary texts paired with textbook readings that provide their historical and social background.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Identify and discuss the factors surrounding Italian immigration in the United States of America and how they contributed to the current situation of Italian-Americans.

Audience: Undergraduate

2. Describe literary, historical, cultural concepts and phenomena in their context(s).

Audience: Undergraduate

3. Understand, analyze, and contextualize literary accounts on Italian-American experience.

Audience: Undergraduate

4. Analyze and explain socio-cultural relationships between the Italian Americans and other ethnic and racial groups in the US as they emerge from personal experiences evident in the assigned literary texts.

Audience: Undergraduate

5. Analyze from multiple perspectives a literary or cinematic text, a situation, and a context to be able to understand the main issues of the periods in question.

Audience: Undergraduate

6. Acquire intercultural and historical knowledge and competence and apply it to past and current issues.

Audience: Undergraduate

7. Demonstrate self-awareness and empathy towards others and their cultural and world views.

Audience: Undergraduate

8. Apply the understanding acquired to contexts beyond the classroom.

Audience: Undergraduate

**ITALIAN 200 – ITALIAN LANGUAGE ABROAD III**

1-4 credits.

Third semester Italian language course taken on a study abroad program for which there is no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**ITALIAN 201 – ACCELERATED FIRST YEAR ITALIAN**

4 credits.

Accelerated development of oral, reading and writing skills up to a level equivalent to that of the end of ITALIAN 102. No previous knowledge of Italian is required. Does not award retrocredit.

**Requisites:** Not open to students with credit for ITALIAN 102**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ITALIAN 203 – THIRD SEMESTER ITALIAN**

4 credits.

Conversational practice, review of grammar, viewing and discussion of Italian films, and class reading of short stories.

**Requisites:** ITALIAN 102 or ITALIAN 201**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ITALIAN 204 – FOURTH SEMESTER ITALIAN**

4 credits.

Conversation and writing practice, review of grammar, and class reading of a modern Italian novel.

**Requisites:** ITALIAN 203**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ITALIAN 205 – ACCELERATED INTERMEDIATE ITALIAN**

4 credits.

Accelerated development of Italian oral, reading and writing skills, equivalent to the completion of both ITALIAN 203 and ITALIAN 204.

**Requisites:** ITALIAN 102 or 201. Not open to students with credit for ITALIAN 204

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Discuss and analyze authentic Italian texts, in particular the comedy *Ti ho sposato per allegria*.

Audience: Undergraduate

2. Interpret, discuss, and construct written and audio-visual texts in Italian.

Audience: Undergraduate

3. Interpret authentic Italian texts critically, both orally and in writing.

Audience: Undergraduate

4. Communicate information, hypotheses, and opinions through short written and oral productions in Italian.

Audience: Undergraduate

5. Recognize and restate Italian cultural products and practices.

Audience: Undergraduate

6. Make comparisons between Italian and other cultures while interacting with peers in order to learn and share perspectives.

Audience: Undergraduate

7. Recall Italian vocabulary and practice grammatical structures.

Audience: Undergraduate

**ITALIAN 210 – ITALIAN STUDIES ABROAD IN THE HUMANITIES I**

1-4 credits.

Italian studies course taken on a study abroad program for which there is no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**ITALIAN 230 – MODERN ITALIAN CULTURE**

3 credits.

A survey of Italian history, literature, art, music, politics, and popular culture of the 20th-21st centuries.

**Requisites:** ITALIAN 204 or 205 (or ITALIAN 202 prior to Summer 2025)

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ITALIAN 298 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2005

**ITALIAN 299 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**ITALIAN 301 – ITALIAN FOR READING KNOWLEDGE**

3 credits.

Intensive grammar; readings from appropriate texts in the humanities, sciences and social sciences. For those with language proficiency who wish to acquire a reading knowledge of Italian.

**Requisites:** ITALIAN 204, 205 (or ITALIAN 202 prior to Summer 2025), or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**ITALIAN 310 – ITALIAN STUDIES ABROAD IN THE HUMANITIES II**

1-4 credits.

Italian studies course taken on a study abroad program for which there is no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**ITALIAN 311 – ADVANCED ITALIAN LANGUAGE**

3 credits.

Development of accurate and nuanced capacity for expression in Italian and for understanding the spoken and written language. Also addresses Italian phonetics and phonology to develop accurate pronunciation.

**Requisites:** ITALIAN 204 or 205 (or ITALIAN 202 prior to Summer 2025)

**Course Designation:** Frgn Lang – 5th + semester language course  
Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ITALIAN 312 – WRITING WORKSHOP**

3 credits.

Development of composition skills related to expository and other forms of writing, with focus on grammatical skills, conventions, rhetorical techniques for organizing information, presenting coherent arguments, and appropriateness of language to topic. Substantial work on the development of writing strategies for composing and editing.

**Requisites:** ITALIAN 204 or 205 (or ITALIAN 202 prior to Summer 2025)

**Course Designation:** Frgn Lang – 5th + semester language course  
Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ITALIAN 321 – STUDIES IN ITALIAN LITERATURE AND CULTURE I**

3 credits.

Focuses on masterworks of Italian literature in Medieval and Renaissance Italy, and on the ways in which this period laid a foundation of today's Italian society and culture. Includes historical, social, and cultural contexts of the Medieval and Renaissance periods.

**Requisites:** ITALIAN 204 or 205 (or ITALIAN 202 prior to Summer 2025)

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Learn about and understand major Medieval and Renaissance literary and cultural movements, "schools," authors, texts  
Audience: Undergraduate

2. Demonstrate understanding and ability to analyze literary and non-literary texts in Italian representing a broad spectrum of topics in Italian Medieval and Renaissance culture and history (interpretive communication)  
Audience: Undergraduate

3. Express/convey/articulate ideas effectively in spoken and written Italian to inform, persuade, and narrate for different audiences of listeners, viewers, or readers (presentational communication)  
Audience: Undergraduate

4. Express/convey/articulate ideas effectively in spoken and written Italian to share information, reactions, and opinions related to topics and texts discussed in the course (interpersonal communication);  
Audience: Undergraduate

5. Demonstrate awareness of difference and diversity by comparing and contrasting culturally situated beliefs, behaviors, and norms of the Italian-speaking world with those found in their own culture  
Audience: Undergraduate

6. Critically analyze and describe literary, historical, and cultural concepts and phenomena  
Audience: Undergraduate

7. Analyze from multiple perspectives a text, a situation, a context  
Audience: Undergraduate

8. Actively engage in problem solving  
Audience: Undergraduate

9. Actively engage in effective teamwork  
Audience: Undergraduate

10. Design and construct new content based on skills and information acquired in the course  
Audience: Undergraduate

**ITALIAN 322 – STUDIES IN ITALIAN LITERATURE AND CULTURE II**

3 credits.

Focuses on a variety of genres and media (poetry, drama, novel, short story, cinema, television) and authors, with emphasis on the cultural and historical contexts from 1600 to the present.

**Requisites:** ITALIAN 204 or 205 (or ITALIAN 202 prior to Summer 2025)

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Learn about and understand major Italian modern and postmodern literary and cultural movements, "schools," authors, texts.

Audience: Undergraduate

2. Demonstrate understanding and ability to analyze literary and non-literary texts in Italian representing a broad spectrum of topics in Italian modern and postmodern culture and history (interpretive communication).

Audience: Undergraduate

3. Express/convey/articulate ideas effectively in spoken and written Italian to inform, persuade, and narrate for different audiences of listeners, viewers, or readers (presentational communication)

Audience: Undergraduate

4. Express/convey/articulate ideas effectively in spoken and written Italian to share information, reactions, and opinions related to topics and texts discussed in the course (interpersonal communication)

Audience: Undergraduate

5. Demonstrate awareness of difference and diversity by comparing and contrasting culturally situated beliefs, behaviors, and norms of the Italian-speaking world with those found in their own culture

Audience: Undergraduate

6. Critically analyze and describe literary, historical, and cultural concepts and phenomena

Audience: Undergraduate

7. Analyze from multiple perspectives a text, a situation, a context

Audience: Undergraduate

8. Actively engage in problem solving

Audience: Undergraduate

9. Actively engage in effective teamwork

Audience: Undergraduate

10. Design and construct new content based on skills and information acquired in the course

Audience: Undergraduate

**ITALIAN 340 – STRUCTURES OF ITALIAN**

3 credits.

Examination of Italian phonetics and phonology, morphology and word formation, and syntax, with attention to contrasts with English. Prepares for advanced courses in Italian linguistics.

**Requisites:** ITALIAN 204, 205 (or ITALIAN 202 prior to Summer 2025), or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ITALIAN/ILS 350 – ROME: LUST FOR GLORY**

3-4 credits.

Examines the development of Rome, "the Eternal City," and its continuing presence as both a metaphoric and physical focal point of Italian artistic and cultural sensibilities. Outline the development of Rome's authoritative or "mythical" status in literature, art, architecture and film, beginning in the Augustan era and arriving to today, focusing on significant moments in the creation and expansion of the actual city and its cultural influence in the late-Middle Ages, the Renaissance, the era of the Risorgimento (Unification of Italy), and the rise of Fascism. Develop ability to think critically about how the diverse material productions of writers (historians, playwrights, poets), painters, sculptors, architects, philosophical thinkers, and later filmmakers of the periods covered reflect one another and reflect the ideas and ideologies of their age.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of Roman society and culture in both Antiquity, the Pre-Modern, and Modern Eras.

Audience: Undergraduate

2. Examine, analyze, and interpret texts in translation and material culture.

Audience: Undergraduate

3. Critique Roman society and culture throughout the periods under review and compare them to other societies and cultures and to each other.

Audience: Undergraduate

**ITALIAN/ILS/LITTRANS/POLI SCI 365 – MACHIAVELLI AND HIS WORLD**

3 credits.

Introduces students to the major works of Machiavelli through the close reading of his writings in cultural and historical contexts. Discussion and targeted writing assignments will aim at cultivating in students 1) a broad understanding of Machiavelli's principal intellectual attitudes, 2) a deeper understanding of his literary sensibility, and 3) the ability to articulate controversies and complexities surrounding his thought.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop a broad understanding of Machiavelli's principal intellectual attitudes.

Audience: Undergraduate

2. Cultivate a deep understanding of Machiavelli's literary sensibility.

Audience: Undergraduate

3. Articulate controversies and complexities surrounding Machiavelli's political thought.

Audience: Undergraduate

**ITALIAN 400 – ITALIAN AMERICAN CINEMA AND TV**

3 credits.

General survey of the most significant film and television directors, genres, styles and themes in Italian American Film and Television, from the Early Cinema to the present. Films and TV programs engaging with the Italian American Experience will be studied within the cultural, historical, literary and ethnic contexts of North America.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify the major directors, genres, movements and technological developments that have shaped the history of Italian American cinema and television.

Audience: Both Grad & Undergrad

2. Employ various critical approaches to the historical and aesthetic evolution of Italian American motion pictures within the history of immigration, ethnicity and race in North America.

Audience: Both Grad & Undergrad

3. Appreciate the complex interactions between Italian American film/television culture and that of other ethnic, migrant, and diaspora communities in North America since the early 1900s.

Audience: Both Grad & Undergrad

4. Contextualize Italian American film within cultural, socio-political and industrial developments at the national, European and global levels.

Audience: Both Grad & Undergrad

5. Develop research skills and write persuasively, elegantly, and with precision about the narrative structure, style, and cultural context of Italian films.

Audience: Both Grad & Undergrad

6. Conduct research and engage critically with the historiographical, theoretical, and methodological practices of scholarship in Italian American film studies.

Audience: Graduate

**ITALIAN 420 – TOPICS IN ITALIAN: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison Study Abroad Program which has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

### ITALIAN/FRENCH/PORTUG/SPANISH 429 – INTRODUCTION TO THE ROMANCE LANGUAGES

3 credits.

Introduction to structural similarities and differences apparent in major Romance languages (French, Italian, Portuguese, Spanish) and to their historical developments, with reference to basic linguistic features of each language: phonology, morphology, syntax, and lexicon.

**Requisites:** SPANISH 226, FRENCH 228, ITALIAN 311, or PORTUG 226

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### ITALIAN/MEDIEVAL/RELIG ST 440 – POVERTY, ECOLOGY AND THE ARTS: ST. FRANCIS OF ASSISI

3 credits.

Focuses on literature about Francis of Assisi, from medieval accounts to contemporary literature, and related artistic portrayals of St. Francis as a religious symbol and model for economic, political and environmental justice.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Articulate the significance of Francis of Assisi as a multi-faceted historical, literary and symbolic figure, especially in relation to economic and environmental justice and reform.

Audience: Both Grad & Undergrad

2. Read and assess critically a range of literary genres that employ and depict Francis.

Audience: Both Grad & Undergrad

3. Compare interpretive models of Francis in literature and related artistic media over time and contexts.

Audience: Both Grad & Undergrad

4. Craft cogent written analysis of a literary and religious model such as Francis via selected interdisciplinary methods from religious studies, literary and historical scholarship.

Audience: Both Grad & Undergrad

5. Produce a research paper on a critical aspect of the presentation of Francis in selected works, employing one or more disciplinary approaches covered in the course.

Audience: Graduate

### ITALIAN 450 – SPECIAL TOPICS IN ITALIAN LITERATURE

3 credits.

Focus on different topics across the centuries and the disciplines.

**Requisites:** ITALIAN 321, 322, or graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ITALIAN 452 – SPECIAL TOPICS IN ITALIAN STUDIES: CULTURE, FILM, LANGUAGE

3 credits.

Examination of an aspect of Italian studies: culture, film, language; topic varies.

**Requisites:** One of: (ITALIAN 230, 301, 310, 311, 312, 321, 322, 340, 350, or 365) or graduate/professional standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1.

Audience: Undergraduate

2.

Audience: Graduate

### ITALIAN/COM ARTS 460 – ITALIAN FILM

3 credits.

General survey of Italian cinema and of the relationship between film and the other arts. Consideration of the Italian and European socio-political context and developments in film theory.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify the major directors, genres, movements and technological developments that have shaped the history of Italian cinema

Audience: Both Grad & Undergrad

2. Contextualize Italian film within cultural, socio-political and industrial developments at the national, European and global levels

Audience: Both Grad & Undergrad

3. Identify major theories of film aesthetics impacting the development of Italian cinema

Audience: Both Grad & Undergrad

4. Develop research skills and write persuasively, elegantly, and with precision about the narrative structure, style, and cultural context of Italian films

Audience: Both Grad & Undergrad

5. Conduct research and engage critically with the historiographical, theoretical, and methodological practices of scholarship in Italian film studies.

Audience: Graduate

### ITALIAN 621 – THE 18TH CENTURY

3 credits.

Survey of eighteenth-century Italian literature from 1700-1750

**Requisites:** ITALIAN 321, 322, or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### ITALIAN 622 – THE 18TH CENTURY

3 credits.

Survey of eighteenth-century Italian literature from 1750-1800

**Requisites:** ITALIAN 321, 322, or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ITALIAN 623 – ITALIAN THEATRE

3 credits.

Topics in Italian theatre

**Requisites:** ITALIAN 321, 322, or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### ITALIAN 631 – FEATURES IN ITALIAN LITERATURE

3 credits.

Survey of Italian literature from the Middle Ages to Baroque period. Topics vary. Taught in Italian.

**Requisites:** ITALIAN 321, 322, or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### ITALIAN 632 – FEATURES IN ITALIAN LITERATURE

3 credits.

Survey of Italian literature from Mid-Modernity to the 21st century. Topics vary. Taught in Italian.

**Requisites:** ITALIAN 321, 322, or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### ITALIAN 636 – THE ITALIAN NOVEL

3 credits.

History and trends of the Italian novel between tradition and innovation from early 20th Century to the Present.

**Requisites:** ITALIAN 321, 322, or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### ITALIAN/MEDIEVAL 659 – DANTE'S DIVINA COMMEDIA

3 credits.

Lectures on Dante's life and times, reading Divine Comedy.

**Requisites:** ITALIAN 321, 322, or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**ITALIAN/MEDIEVAL 671 – THE 13TH CENTURY**

3 credits.

Systematic study of the earliest literary texts in Italy; the rise of the love lyric among the Sicilian poets; representative narrative works. The development of the lyric from Guittone d'Arezzo to the poets of the Dolce Stil Nuovo.

**Requisites:** ITALIAN 321, 322, or graduate/professional standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2022**ITALIAN 681 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Fall 2009**ITALIAN 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Fall 2010**ITALIAN 691 – SENIOR THESIS**

2 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**ITALIAN 692 – SENIOR THESIS**

2 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**ITALIAN 698 – DIRECTED STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2018**ITALIAN 699 – DIRECTED STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2019**ITALIAN 730 – TOPICS IN ITALIAN LITERATURE AND CULTURE**

3 credits.

Examination of aspects of Italian literature and culture, including disciplines such as language and cinema. Topic varies.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Fluently discuss the history and main motives of the topic of the course.

Audience: Graduate

2. Reflect on that topic and elaborate appropriate explorations of its relevance in the history of Italian literature, cinema, culture and other arts.

Audience: Graduate

**ITALIAN 731 – FEATURES IN ITALIAN LITERATURE**

3 credits.

In-depth exploration of periods and concepts of Italian literature, from the Middle Ages to Baroque period. Topics vary. Taught in Italian.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ITALIAN 732 – FEATURES IN ITALIAN LITERATURE**

3 credits.

In-depth exploration of periods and concepts of Italian literature, from Mid-Modernity to the 21st century. Topics vary. Taught in Italian.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023

**ITALIAN 741 – THE 17TH CENTURY AND ARCADIA**

3 credits.

Survey of seventeenth-century Italian literature

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**ITALIAN 799 – INDEPENDENT STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ITALIAN/FRENCH 821 – ISSUES IN METHODS OF TEACHING FRENCH AND ITALIAN**

1-3 credits.

Intended for instructors of elementary- and intermediate-level collegiate instructors of Italian; key concepts of communicative, literacy-oriented language teaching and related techniques for classroom instruction of Italian.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**ITALIAN 951 – SEMINAR-STUDIES IN ITALIAN LITERATURE**

3 credits.

Advanced seminar. Topics vary.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ITALIAN 952 – SEMINAR-STUDIES IN ITALIAN LITERATURE**

3 credits.

Advanced seminar. Topics vary.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ITALIAN 990 – INDIVIDUAL RESEARCH**

1-12 credits.

In connection with the doctoral dissertation.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**JEWISH STUDIES (JEWISH)****JEWISH/GNS 105 – FIRST SEMESTER YIDDISH**

4 credits.

Introduction to the Yiddish language through speaking, listening, reading, and writing. Emphasis on communication with attention to cultural and historical context.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Read the Yiddish alphabet and write in Yiddish cursive

Audience: Undergraduate

2. Express oneself in Yiddish at the sentence level in written and oral communications

Audience: Undergraduate

3. Read short Yiddish texts in the present, past, and future tenses

Audience: Undergraduate

4. Mobilize a vocabulary of 200+ Yiddish words, including those terms necessary to describe one's family, the life of the student, travel plans, daily life, and different geographic centers of Yiddish cultural production

Audience: Undergraduate

5. Name and describe major figures of twentieth and twenty-first century Yiddish culture

Audience: Undergraduate

**JEWISH/GNS 106 – SECOND SEMESTER YIDDISH**

4 credits.

Introduction to the Yiddish language through speaking, listening, reading, and writing. Emphasis on communication with attention to cultural and historical context.

**Requisites:** GNS/JEWISH 105

**Course Designation:** Frgn Lang – 2nd semester language course

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Deploy Yiddish at the multi-sentence level in written and oral communications

Audience: Undergraduate

2. Express opinions about authentic Yiddish texts, including contemporary newspaper articles and poetry selections from the twentieth century

Audience: Undergraduate

3. Mobilize a vocabulary of 400+ Yiddish words, including those terms necessary to describe time, weather, calendrical units, literature (children's books, poetry, and the history of Yiddish publishing)

Audience: Undergraduate

4. Be creative with language in past, present, future, imperative, and conditional tenses

Audience: Undergraduate

5. Demonstrate familiarity with various forms of Yiddish cultural expression, such as Yiddish folksong, Yiddish poetry, Yiddish film, and the politics of Yiddishism

Audience: Undergraduate

**JEWISH/LEGAL ST/RELIG ST 203 – JEWISH LAW, BUSINESS, AND ETHICS**

3 credits.

Explores the development of Jewish law from antiquity to modernity, with a focus on legal questions related to business practices and ethics. Consider issues ranging from ethical practices in agriculture to how to run a modern multi billion-dollar kosher industry; from the ethics of Jews celebrating Thanksgiving to regulations governing the preparation, consumption, and sale of coffee.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. articulate the general development and evolution of Jewish law

Audience: Undergraduate

2. apply different strategies that different Jewish communities have used to regulate business and ethical practices

Audience: Undergraduate

3. analyze, in both written and oral form, Jewish legal texts

Audience: Undergraduate

4. apply Jewish legal principles to new material

Audience: Undergraduate

**JEWISH/RELIG ST 211 – INTRODUCTION TO JUDAISM**

4 credits.

General introduction to Judaism covering the biblical, classical rabbinic, medieval, and modern periods.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**JEWISH/HISTORY 213 – JEWS AND AMERICAN POP. CULTURE**

3-4 credits.

Explores the interplay between Jews and U. S. popular culture, covering such subjects as early 20th century vaudeville, the "golden age" of Hollywood, rhythm and blues music, television, and stand-up comedy.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JEWISH/RELIG ST 215 – THE SABBATH**

3 credits.

What is the "Sabbath"? What does it mean "to rest"? Offers a broad, comparative introduction to the history of the Sabbath, from the Bible to the present day. Explore a range of textual sources from the Jewish and Christian traditions. Topics include the major theological, ritual, and cultural practices that have developed around the Sabbath. Analysis places emphasis on literary representations of the Sabbath across genres. Discuss contemporary political iterations of the Sabbath in modern, secular contexts.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate knowledge of major forms, practices, social conditions, values, and themes that have shaped the history of the "Sabbath" in Jewish and Christian traditions, from antiquity to modernity

Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods in religious studies and across disciplinary lines

Audience: Undergraduate

3. Display skills in textual analysis and evaluate a range of formal and structural elements in writing

Audience: Undergraduate

4. Identify and interpret the literary techniques used by Jewish and Christian writers across genres, including relevant stylistic, rhetorical, figurative, and liturgical forms used in the representation of the Sabbath

Audience: Undergraduate

5. Generate original ideas and texts, experimenting and taking risks, solving problems, and answering questions in a range of media

Audience: Undergraduate

6. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness

Audience: Undergraduate

**JEWISH/HISTORY 219 – THE AMERICAN JEWISH EXPERIENCE: FROM SHTETL TO SUBURB**

4 credits.

Surveys American Jews from the eighteenth century until after WW II, examining political behavior (radicalism, liberalism, and nationalism), class formation, social mobility, culture, inter-ethnic group relations, religion, and problems in community building.

**Requisites:** Sophomore standing or 3 credits in HISTORY or JEWISH**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**JEWISH/HISTORY 220 – INTRODUCTION TO MODERN JEWISH HISTORY**

4 credits.

The history of the Jews in selected parts of the world since the 17th century. Particular attention will be paid to the fact that this is the history of a minority group whose life unfolds in relationship to a larger society.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021

**JEWISH 225 – JEWS AND RACE**

3 credits.

Takes a comparative look at the multiple intersections between Jewish history and histories of racism. Covers relevant case studies ranging from the Bible to the present, in order to analyze the long, global trajectory that has shaped issues of race and racial inequality in the United States and beyond. Topics include the so-called "curse of Ham"; the role of "the Jew" in medieval Christian theology; the demonization of Jews and Muslims during the Crusades; the interaction between Jews, European colonialism, and transatlantic slavery; nineteenth-century debates about "Semites"; the racialization of Jews during the Holocaust; the role of race and racism in the development of Zionism and the history of the Palestinian Nakba; debates about Black-Jewish relations in the United States; the question of Jews and whiteness; as well as historical encounters between Jews and Native Americans.

**Requisites:** None**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate knowledge of significant moments at the intersection of Jewish history and the history of racism

Audience: Undergraduate

2. Articulate how the past has affected present day circumstances regarding race and racial inequalities in the U.S. and in a global context  
Audience: Undergraduate

3. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity  
Audience: Undergraduate

4. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others  
Audience: Undergraduate

5. Cultivate skills in textual analysis and evaluate formal and structural elements in a range of media (e.g., essays, academic writing, oratory, visual art, etc)  
Audience: Undergraduate

6. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness  
Audience: Undergraduate

**JEWISH/CLASSICS/LITTRANS/RELIG ST 227 – INTRODUCTION TO BIBLICAL LITERATURE (IN ENGLISH)**

4 credits.

Introduction to the text, development, history, and social context of the Hebrew Bible/Old Testament. Covers the Torah (Pentateuch), Neviim (Former and Latter Prophets), and Ketuvim (Writings), and provides a brief introduction to early Jewish literature (Pseudepigrapha/Apocrypha). Discusses various methods of analysis and theories of composition. Addresses major theological claims made of the text by Jewish and Christian communities. Explores contextualized interpretations in the ancient and modern day.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.  
Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.  
Audience: Undergraduate

4. Articulate a self-critical understanding of one's own approach to the biblical text.  
Audience: Undergraduate

**JEWISH 230 – ELEMENTARY TOPICS IN JEWISH LITERATURE**

3-4 credits.

Elementary topics in Jewish literature.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**JEWISH 231 – ELEMENTARY TOPICS IN JEWISH HISTORY**

3-4 credits.

Elementary topics in Jewish history.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023

**JEWISH 232 – ELEMENTARY TOPICS IN JEWISH PHILOSOPHY AND THE ARTS**

3-4 credits.

Elementary topics in Jewish philosophy and the arts.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**JEWISH 236 – BASCOM COURSE**

3 credits.

Develop skills in critical reading, logical thinking, use of evidence, and use of library resources. Emphasis on writing in the conventions used in Jewish Studies.

**Requisites:** Satisfied Communications A requirement**Course Designation:** Gen Ed - Communication Part B

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**JEWISH/CLASSICS 241 – INTRODUCTION TO BIBLICAL ARCHAEOLOGY**

4 credits.

An overview of archaeology and its relationship to understanding the biblical world.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate a holistic view of Ancient Mediterranean society and culture.

Audience: Undergraduate

**JEWISH/GERMAN/LITTRANS 269 – YIDDISH LITERATURE AND CULTURE IN EUROPE**

3 credits.

Exploration of European Yiddish fiction, poetry, folklore, and cinema, with a focus on works of the 19th and 20th centuries.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**JEWISH/GERMAN/LITTRANS 279 – YIDDISH LITERATURE AND CULTURE IN AMERICA**

3 credits.

Exploration of American Yiddish poetry, fiction, theater, and cinema created by European Jews in the United States.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Prepare students for life and careers in an increasingly multicultural and multilingual US environment

Audience: Undergraduate

2. Develop critical thinking skills through sustained discussion with one's peers and foster a constructive climate in which to engage with questions concerning cultural, racial, religious, and linguistic difference

Audience: Undergraduate

3. Acquire a critical vocabulary to speak about historical and present-day issues concerning migration, ethnic identity, and religious difference

Audience: Undergraduate

4. Engage in reflective writing practices, respond critically to feedback, and assess one's own communicative strengths

Audience: Undergraduate

5. Identify the major themes of American Yiddish literature and culture from the early-twentieth century until today. These themes include: the politics of language use; the negotiation of a minoritized status; regional vs. national American Jewish identity; inter-generational conflict; Jews and the question of race

Audience: Undergraduate

**JEWISH 299 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2008

**JEWISH/HEBR-MOD 301 – INTRODUCTION TO HEBREW LITERATURE**

3 credits.

Selected works from different periods and genres. Taught in Hebrew.

**Requisites:** HEBR-MOD 202 or placement into HEBR-MOD/JEWISH 301

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frqn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JEWISH/HEBR-MOD 302 – INTRODUCTION TO HEBREW LITERATURE**

3 credits.

Selected works from different periods and genres. Taught in Hebrew.

**Requisites:** HEBR-MOD/JEWISH 301 or placement into HEBR-MOD/JEWISH 302

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frqn Lang - 5th + semester language course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JEWISH/HISTORY 310 – THE HOLOCAUST**

3-4 credits.

References to the Holocaust abound in contemporary political debates and in our popular culture. But most people know very little about the history of the Holocaust, despite the mountains of superb historical scholarship that experts in the field have produced over decades of dedicated research. Utilize correspondence, diaries, or other firsthand accounts of Holocaust victims, together with study of the larger events around them, to reconstruct the experiences of ordinary families swept up in the Nazi genocide.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate in-depth knowledge of the Nazi genocide of European Jewry during WWII, including the events, processes, ideas, organizations, and individuals behind these crimes, and an understanding of how the everyday experiences of Holocaust victims limited their options for survival

Audience: Undergraduate

2. Explain the mechanics of how and why the Nazis and their collaborators were able to carry out a program of persecution and ultimately extermination against the Jewish communities of Europe, leading to the murder of an estimated 6 million Jews

Audience: Undergraduate

3. Identify central arguments in historiographical writing; use primary sources to reconstruct historical events; formulate research questions; develop written arguments that illuminate the lives of Holocaust victims and analyze the key events, policies, or sites of the Nazi genocide; support arguments with appropriate sources; and supply appropriate citations

Audience: Undergraduate

**JEWISH/LITTRANS 318 – MODERN JEWISH LITERATURE**

3-4 credits.

Pre-modern Jewish society's breakdown, immigration, the challenges of integration and exclusion, and the establishment of new communities will serve as a backdrop for the analysis and comparison of Jewish literary texts written in Hebrew, Yiddish, German, Russian, and English.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JEWISH/CLASSICS/RELIG ST 323 – THE BIBLE AND FILM: LITERATURE AND MEDIA**

3 credits.

An introduction to the study of the Bible as literature and of biblical reception in the medium of film, from early Hollywood to the present day. Explores the way in which the Bible (including both Hebrew and Greek Testaments), one of the foundational literary corpora of American society, has been interpreted, reinterpreted, and misinterpreted through the medium of film over the past century. We will begin each segment of the course by reading portions of the biblical text that have experienced significant interpretation, in order to understand the literary text that has been received in film. How beholden are filmmakers to the interpretations of communities that view these texts as authoritative, and where are they free to depart from their sources? Is it possible to "translate" biblical narratives into film without losing something in the translation? These questions will focus our study on ways the literature has been interpreted in this new medium.

**Requisites:** Sophomore standing**Course Designation:** Gen Ed - Communication Part B  
Breadth - Literature. Counts toward the Humanities req  
Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Develop understanding of film as a form of biblical reception.

Audience: Undergraduate

5. Hone close reading and film-watching skills so as to be able to read a literary text with deeper attention to detail and sharper interpretive instincts, as well as increase ability to articulate their observations.

Audience: Undergraduate

6. Demonstrate skills in critical reading, logical thinking, and the use of evidence.

Audience: Undergraduate

7. Demonstrate skills in the use of appropriate style and disciplinary conventions in writing and speaking.

Audience: Undergraduate

8. Demonstrate skills in the use of core library resources specific to the ancient Near Eastern world.

Audience: Undergraduate

**JEWISH/LITTRANS/RELIG ST 328 – CLASSICAL RABBINIC LITERATURE IN TRANSLATION**

3-4 credits.

Introduction to the literature of the Classical Rabbinic or Talmudic period of Judaism (2nd to 7th centuries CE). Historical and intellectual background; the interrelation of liturgy, legal and non-legal literature.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2019**JEWISH/CLASSICS/HEBR-BIB/LITTRANS/RELIG ST 332 – PROPHETS OF THE BIBLE**

4 credits.

An introduction to the thought, literature, and history of the prophets of ancient Israel (in English).

**Requisites:** RELIG ST/CLASSICS/JEWISH/LITTRANS 227 or  
Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2019**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Compare ancient Near Eastern prophetic voices to modern prophetic voices.

Audience: Undergraduate

**JEWISH/CLASSICS/RELIG ST 335 – KING DAVID IN HISTORY AND TRADITION**

3 credits.

An exploration of the literary and historical aspects of the text of 1-2 Samuel + 1 Kings 1-2; the history and archaeology of Jerusalem during the tenth century B.C.E.; and the varieties of ways in which the figure of King David has been received in subsequent religious and secular literature, visual art, music, television, and cinema.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate a critical understanding of the reception of David in various media.

Audience: Undergraduate

**JEWISH/RELIG ST 340 – THE AMERICAN JEWISH LIFE OF DNA**

3 credits.

Explores the range of relationships between DNA and American Jewish life. It begins with the "prehistory" of the relationship between Jewishness and genetic science, from Biblical genealogies to early twentieth century racial science. It then turns to America in the second half of the twentieth century, when the discovery of the double helix and the atrocities of Auschwitz reinvigorated and reshaped American Jewish relationships to DNA.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. articulate informed answers to central questions at the intersection of Jewish Studies and Science and Technology Studies

Audience: Undergraduate

2. identify key themes, movements, and people in twentieth century American Jewish Studies and the history of the biological sciences

Audience: Undergraduate

3. analyze a range of sources, including material objects and digital media as well as written texts from religious, ethnic, and scientific communities

Audience: Undergraduate

4. employ an expanded range of religious literacy, including skills for identifying, evaluating, and interpreting the interrelationships and impact of religious and scientific worldviews and communities in the United States via a variety of theoretical ideas and methodologies in the social sciences and humanities

Audience: Undergraduate

5. employ stronger research and writing skills, including textual analysis, primary source analysis, synthesis of scholarly ideas, persuasive writing, oral communication, active listening, and critical empathy

Audience: Undergraduate

6. participate more effectively in creating open, engaging, fun, and collaborative learning environments that seek academic excellence, honesty, and integrity

Audience: Undergraduate

**JEWISH/POLI SCI 341 – ISRAELI POLITICS AND SOCIETY**

3-4 credits.

Examines the issues currently facing Israeli society and the ongoing debates in Israeli politics. Provides historical background and analytical understanding of contemporary Israeli politics. Attention will be paid to political history, institutions, economic development, coalition formation, ethnic politics, and religious-secular divisions as they are manifested in Israeli politics.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Learn about Israeli politics, history, and culture.

Audience: Undergraduate

2. Apply political science concepts and theories to understand Israeli politics and society.

Audience: Undergraduate

3. Understand who the main actors are in Israeli politics.

Audience: Undergraduate

4. Understand the main social and political cleavages in Israel.

Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**JEWISH 350 – WHAT IS JEWISH STUDIES?**

3 credits.

Introduces Jewish studies as an interdisciplinary field and examines Jewish history, culture, and thought through the major questions that guide the field, including: What is Jewish practice? What is a Jewish text? What is diaspora? What is antisemitism? And, who are the Jews? Explores a variety of responses offered by scholars, writers, theologians, and artists. Develop the ability to think transhistorically, bringing together biblical, medieval, modern, and contemporary perspectives. Anchor inquiries into the field of Jewish studies through the completion of a substantial research project.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of the major questions and concerns of modern Jewish studies

Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods

Audience: Undergraduate

3. Develop close reading skills with which to analyze Jewish studies texts; write original, coherent, and compelling arguments that push beyond summary to analysis; engage in reflective writing practices; respond critically to feedback; and assess one's own communicative strengths

Audience: Undergraduate

4. Engage in deep discussion with peers in a respectful and empathetic manner; ask each other constructive questions; and develop a shared vocabulary with which to speak about Jewish studies

Audience: Undergraduate

**JEWISH 356 – JERUSALEM, HOLY CITY OF CONFLICT AND DESIRE**

3 credits.

Jerusalem, the Holy City for Judaism, Christianity, and Islam, has become the center of religious, political, and national contention. Explores the sources of the conflict and its development over the centuries, with the aim of illuminating the complex situation of the region and its implications for the world.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**JEWISH/ENGL 370 – JEWISH HUMOR**

3-4 credits.

What is humor? Why and when do people tell jokes? And what do we make of the fact that a certain form of humor has come to be labeled "Jewish"? Examine the notion of "Jewish humor" by reading a variety of texts (jokes, short stories, films, websites, conceptual art, and cultural kitsch). Begin by considering theoretical explorations of humor and "Jewish humor." Then trace techniques of Jewish humor from eastern Europe to central Europe to North America, paying specific attention to Jewish American humor. Themes to be examined include: in-group vs. out-group humor; humor and ethnicity; performance and "Jewface"; Jewish-Christian difference; humor and the Holocaust; gender and ethnicity; the notion of self-hatred; American popular culture; and the relationship between humor, repetition, and innovation. The general goal is to answer the question: Is there such a thing as "Jewish humor"? (Hint: The answer may be "no.")

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods

Audience: Undergraduate

2. Demonstrate close-reading skills with which to analyze humor and American ethnicity, question assumptions about the popular representation of Jewish identity, and explore how humor manages and mobilizes questions of race, ethnicity, and religion

Audience: Undergraduate

3. Engage in reflective writing practices, respond critically to feedback, and assess one's own communicative strengths

Audience: Undergraduate

4. Engage in deep discussion with peers in a respectful and empathetic manner, ask each other constructive questions, develop a shared vocabulary with which to speak about Jewish humor, and, in doing so, explore preconceived notions about identities "inside" and "outside" students' social circles

Audience: Undergraduate

**JEWISH/HEBR-MOD 401 – TOPICS IN MODERN HEBREW / ISRAELI LITERATURE AND CULTURE I**

3 credits.

Readings in Hebrew literature. Taught in Hebrew.

**Requisites:** HEBR-MOD/JEWISH 302 or placement into HEBR-MOD/JEWISH 401**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frgn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**JEWISH/HEBR-MOD 402 – TOPICS IN MODERN HEBREW / ISRAELI LITERATURE AND CULTURE II**

3 credits.

Readings in Hebrew literature. Taught in Hebrew.

**Requisites:** HEBR-MOD/JEWISH 401 or placement into HEBR-MOD/JEWISH 402**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frgn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**JEWISH/GNS 405 – FIRST SEMESTER YIDDISH FOR GRADUATE STUDENTS**

4 credits.

Introduction to the Yiddish language through speaking, listening, reading, and writing. Emphasis on communication with attention to cultural and historical context. Includes tasks designed to facilitate Yiddish-related research.

**Requisites:** Graduate/professional standing**Repeatable for Credit:** No**Learning Outcomes:** 1. Read the Yiddish alphabet and write in Yiddish cursive

Audience: Undergraduate

2. Express oneself in Yiddish at the sentence level in written and oral communications

Audience: Undergraduate

3. Read short Yiddish texts in the present, past, and future tenses

Audience: Undergraduate

4. Mobilize a vocabulary of 200+ Yiddish words, including those terms necessary to describe one's family, the life of the student, travel plans, daily life, and different geographic centers of Yiddish cultural production

Audience: Undergraduate

5. Name and describe major figures of twentieth and twenty-first century Yiddish culture

Audience: Undergraduate

**JEWISH/ILS/SOC 423 – MODERN JEWISH THOUGHT**

3 credits.

How do Jews fit into the modern world? While the "Jewish Question" initially referred to debates about Jewish emancipation (the struggle for equal citizenship and social integration that started with the French Revolution), it later served to describe modern Jewish political and social thought about the identity, place, and role of the Jews in the modern world. Beginning in the late 19th century, as cultural assimilation, economic impoverishment in eastern Europe, and rising antisemitism sowed doubts about the viability of emancipation and traditionalism alike, Jewish thinkers proposed new answers to the Jewish question. Learn about some of the major answers they debated, including revolutionary universalistic utopias (socialism and Communism), various forms of Jewish nationalism, hyphenated identities, cultural pluralism, and cosmopolitanism. Work to contextualize these ideas historically while also considering whether and how they remain relevant to the present.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage with major figures, ideas, and debates in the social and political thought of Jews about the "Jewish Question" from the late 19th century until the mid-20th century

Audience: Undergraduate

2. Understand these ideas in relation to the historical contexts in which they were produced

Audience: Undergraduate

3. Enter into a dialogue with past thinkers, critically assessing whether and how their ideas may remain relevant to the changed circumstances of the present

Audience: Undergraduate

**JEWISH 430 – INTERMEDIATE TOPICS IN JEWISH LITERATURE**

3-4 credits.

Intermediate topics in Jewish literature.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**JEWISH 431 – INTERMEDIATE TOPICS IN JEWISH HISTORY**

3-4 credits.

Intermediate topics in Jewish history.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2021**JEWISH 432 – INTERMEDIATE TOPICS IN JEWISH PHILOSOPHY AND THE ARTS**

3-4 credits.

Intermediate topics in Jewish philosophy and the arts.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**JEWISH 433 – INTERMEDIATE TOPICS IN JEWISH STUDIES: SOCIAL SCIENCES**

3-4 credits.

Intermediate topics in Jewish Studies drawn from the social sciences.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2021**JEWISH/PHILOS 442 – MORAL PHILOSOPHY AND THE HOLOCAUST**

3 credits.

Selected moral and philosophical issues raised by the Holocaust such as when and whom to rescue; includes issues arising after the annihilation such as forgiveness and reconciliation.

**Requisites:** Sophomore standing or 3 Credits in PHILOS**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021

**JEWISH/AFRICAN/MEDIEVAL/RELIG ST 462 – MUSLIMS AND JEWS**

3 credits.

Explores the historical relationship between Muslims and Jews in a variety of contexts from the seventh century to the present. Surveys literary and cultural exchanges against the background of shifting political and social conditions across the Middle East, Europe, and the United States. Considers also the parallel legacies of anti-Semitism, Orientalism, and Islamophobia. Major themes include comparative religion, secularization, migration, and colonialism, as well as the politics of history and cultural memory. Introduces readings in English translation of medieval and modern texts originally written across languages, and especially in Hebrew and Arabic.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate contextual knowledge of major historical events, figures, social conditions, religious communities, and geographies of Muslim Iberia (al-Andalus) from the eighth to sixteenth centuries

Audience: Undergraduate

2. Situate al-Andalus in relation to wider developments in politics, culture, and religion of the Middle East and North Africa, from the eighth century to the present

Audience: Undergraduate

3. Understand the terms and conditions that have shaped Muslim-Jewish relations from the seventh century until the present, including frameworks of theology, lived religious experience, and Orientalist representation

Audience: Undergraduate

4. Integrate relevant theoretical frameworks, debates, and conversations regarding the distinction between historical writing and cultural memory

Audience: Undergraduate

5. Discern divergent and contradictory representations of the history of al-Andalus in contemporary memory culture

Audience: Undergraduate

6. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in written and visual materials across genres (philosophy, literature, religion, film) as well as in primary and secondary historical sources

Audience: Undergraduate

7. Generate original ideas and texts, through coherent writing and compelling argumentation, by experimenting and taking risks, solving problems, and answering questions in a range of media

Audience: Undergraduate

**JEWISH/GERMAN 510 – GERMAN-JEWISH CULTURE SINCE THE 18TH CENTURY**

3 credits.

Investigates German-Jewish culture since the 18th century, concentrating on toleration, emancipation, acculturation, assimilation, anti-Semitism, and Bildung.

**Requisites:** Junior standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2020**JEWISH/HEBR-BIB 513 – BIBLICAL TEXTS, POETRY**

3 credits.

Critical reading of selected texts from the Minor Prophets and the Writings.

**Requisites:** HEBR-BIB 324**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2021**Learning Outcomes:** 1. Analyze classical Hebrew Bible texts.

Audience: Undergraduate

2. Interpret classical Hebrew Bible texts.

Audience: Undergraduate

3. Evaluate classical Hebrew Bible texts.

Audience: Undergraduate

**JEWISH/HEBR-BIB 514 – BIBLICAL TEXTS, POETRY**

3 credits.

Critical reading of selected texts from the Latter Prophets and the Writings.

**Requisites:** HEBR-BIB/JEWISH 513**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2022**Learning Outcomes:** 1. Analyze classical Hebrew Bible texts.

Audience: Undergraduate

2. Interpret classical Hebrew Bible texts.

Audience: Undergraduate

3. Evaluate classical Hebrew Bible texts.

Audience: Undergraduate

**JEWISH/CURRIC/ED POL/HISTORY 515 – HOLOCAUST: HISTORY, MEMORY AND EDUCATION**

3 credits.

Explores the ways in which Holocaust history, memory and education are mutually entangled, politically charged and morally complex. Using primarily American sites of memory, critically analyze a variety of representations of the Shoah--in literature, films, memoirs, monuments, museums and classrooms.

**Requisites:** Junior standing**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2022**Learning Outcomes:** 1. Examine and question cultural assumptions and knowledge claims about race, ethnicity, and religion

Audience: Both Grad &amp; Undergrad

2. Improve written and oral communication skills by engaging in critical conversations, making presentations, practicing group projects and writing papers

Audience: Both Grad &amp; Undergrad

3. Demonstrate self-awareness and empathy to other worldviews and cultural differences and apply course concepts outside of the classroom by engaging in respectful conversations about race, ethnicity, and religion in our multi-cultural society

Audience: Both Grad &amp; Undergrad

4. Construct and develop a meaningful project around a topic that interests you

Audience: Both Grad &amp; Undergrad

5. Articulate answers to and pose complex questions regarding ethical issues, connecting historical events to present circumstances regarding racial inequalities

Audience: Undergraduate

6. Develop your academic writing by thinking carefully through your ideas and editing your work and your peers'

Audience: Undergraduate

7. Pose and answer complex historical and ethical questions regarding the Holocaust, genocide, their representations and political uses, connecting historical events to present circumstances regarding racial inequalities

Audience: Graduate

8. Develop interpersonal academic skills by editing peers' work

Audience: Graduate

**JEWISH/HISTORY 518 – ANTI-SEMITISM IN EUROPEAN CULTURE, 1700-1945**

3 credits.

A critical review of major theories of anti-Semitism and a history of modern anti-Semitism.

**Requisites:** Junior standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**JEWISH/ENGL 539 – JEWISH LITERATURES IN DIASPORA**

3 credits.

An exploration of Jewish literature in English and in Anglophone contexts.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**JEWISH 630 – ADVANCED TOPICS IN JEWISH LITERATURE**

3-4 credits.

Advanced topics in Jewish literature.

**Requisites:** Junior standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2019**JEWISH 631 – ADVANCED TOPICS IN JEWISH HISTORY**

3-4 credits.

Advanced topics in Jewish history.

**Requisites:** Junior standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**JEWISH 632 – ADVANCED TOPICS IN JEWISH PHILOSOPHY AND THE ARTS**

3-4 credits.

Advanced topics in Jewish philosophy and the arts.

**Requisites:** Junior standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023

**JEWISH 681 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**JEWISH 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**JEWISH 691 – SENIOR THESIS**

3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**JEWISH 692 – SENIOR THESIS**

3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**JEWISH 699 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## JOURNALISM AND MASS COMMUNICATION (JOURN)

**JOURN 150 – INTRODUCTION TO SPORTS COMMUNICATION**

3 credits.

Explore the central activities and concepts related to various communication professions involved in the realm of sports. These activities include sports journalism, sports broadcasting, sports marketing communications, and sports public relations. Consider major social issues that impinge upon these professions including how sports and media intersect with concerns associated with race and gender. Explore strategies to build careers in sports communications and beyond.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and explain the core concepts and principles that are part of the practice of sports journalism, broadcasting, advertising and public relations.

Audience: Undergraduate

2. Recognize the importance of strategic, creative and ethical thinking as applied to context of sports communications.

Audience: Undergraduate

**JOURN 162 – MASS MEDIA IN MULTICULTURAL AMERICA**

3 credits.

An introduction to the roles and functions of print, film, electronic and digital media in multicultural America. International comparisons highlight differences and commonalities in the social and cultural position of mass media in societies with racially and ethnically diverse populations.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **JOURN 163 – GENDER AND SEXUALITY IN MASS COMMUNICATION**

3 credits.

Exploration of the role that gender and sexuality both play in media representation, production, reception, and activism.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Develop an understanding of the different definitions of gender that currently exist.

Audience: Undergraduate

2. Compare the difference between gender and sexuality.

Audience: Undergraduate

3. Describe the way that sexuality is connected to our social and personal identities.

Audience: Undergraduate

4. Examine how the mass media represent gender and sexuality.

Audience: Undergraduate

5. Determine the ways in which gender and sexuality inform the practice of media production.

Audience: Undergraduate

6. Demonstrate how gender and sexuality impact media reception.

Audience: Undergraduate

7. Articulate the way media activism campaigns specifically address issues of gender and sexuality.

Audience: Undergraduate

8. Apply the knowledge gained in the course in order to design a media activism campaign that focuses on gender, sexuality, or both.

Audience: Undergraduate

### **JOURN 175 – MEDIA FLUENCY FOR THE DIGITAL AGE**

3 credits.

An introduction to digital media and how it influences – and is impacted by – society, culture, politics, and the economy. Create on-trend digital media content and critically examine digital mediums, messages, and audiences.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand what it means to be digitally fluent.

Audience: Undergraduate

2. Understand key media fluency terms and know why they are important.

Audience: Undergraduate

3. Critically examine how digital media forms are both consumed and produced in society – and how this affects society, culture, politics, and the economy.

Audience: Undergraduate

4. Apply media fluency knowledge and skills to produce fun and interesting, yet critical and thought-provoking digital media across a variety of forms – including podcasts, video, blogs, Wikipedia content, and other forms of social media.

Audience: Undergraduate

5. Be aware of ethics, policies, and industry standards surrounding content production in the digital space.

Audience: Undergraduate

**JOURN 176 – SPECIAL TOPICS IN MASS COMMUNICATION**

1-3 credits.

Special focus on a specific conceptual issue or topic involving mass communication.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Think critically about their own societies and the larger global community.

Audience: Undergraduate

2. Demonstrate knowledge of one or more methodologies.

Audience: Undergraduate

3. Demonstrate knowledge of one or more theoretical approaches.

Audience: Undergraduate

4. Synthesize and apply social science concepts.

Audience: Undergraduate

5. View issues from multiple perspectives.

Audience: Undergraduate

**JOURN 201 – INTRODUCTION TO MASS COMMUNICATION**

4 credits.

How the mass media are organized and how they function in modern society; their technological basis, economic and political foundations, and social implications.

**Requisites:** Freshman, sophomore, or junior standing only

**Course Designation:** Gen Ed – Communication Part B

Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JOURN 202 – MASS COMMUNICATION PRACTICES**

6 credits.

Build increasingly sophisticated communication skills, including writing, editing, gathering information, working with data, and presenting stories through varying media forms. Develop an appreciation of how different media influence message design by communicators and reception by audiences. Develop a complex toolkit of conceptual and practical skills for media work in journalism, strategic communication, and hybrids. Build writing skills and critical thinking abilities, two elements common to success in any field.

**Requisites:** Declared in a Journalism undergraduate program and JOURN 201 and concurrent enrollment in JOURN 203

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Write clearly, concisely, effectively and efficiently for a variety of media platforms and formats

Audience: Undergraduate

2. Think critically (asking the right questions in interviews, collecting and analyzing information, and assembling ideas)

Audience: Undergraduate

3. Review and synthesize information and develop appropriate messages

Audience: Undergraduate

4. Create professional, ethical work that uses proper grammar and style

Audience: Undergraduate

5. Work well in collaboration with other students and instructors

Audience: Undergraduate

6. Speak and write clearly about current events and trends by integrating knowledge across subject matter arenas and incorporating multiple sources

Audience: Undergraduate

7. Meet deadlines and manage competing demands

Audience: Undergraduate

8. Evaluate how to best present stories in a variety of formats, including audio, video and online, and produce those forms

Audience: Undergraduate

**JOURN 203 – INFORMATION FOR COMMUNICATION**

3 credits.

Develop information skills – information collection, information verification, information analysis, and information presentation (the CVAP approach) – that are used by professionals in journalism and strategic communication. Includes practical techniques that enhance basic skills related to the collection, evaluation, analysis and presentation of information. These skills will provide a foundation for the major and in journalism and mass communication careers.

**Requisites:** Concurrent enrollment in JOURN 202

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop knowledge of the various information sources used by professional journalists and marketing professionals, as well as working knowledge of how to use the most important information sources.

Audience: Undergraduate

2. Cultivate and practice critical skills for evaluating the validity of different forms of information used by journalists and marketing professionals, and to judge its quality and veracity.

Audience: Undergraduate

3. Explore different forms of analyzing and presenting information in forms that are useful to journalists and strategic communication professionals, including data visualization techniques.

Audience: Undergraduate

4. Practice skills and strategies for accomplishing group tasks and engaging in peer learning.

Audience: Undergraduate

**JOURN/COM ARTS/RP & SE 312 – DISABILITY AND THE MEDIA**

3 credits.

Examines the interaction between disability and media in modern society. Explore representations of disability in various forms of mass media, including television and film, social media, advertising, and others. Analyze how these representations affect disabled people directly, including the development of their identities, as well as how they influence disability attitudes and stigma throughout society. Discuss overt and casual ableism within media, as well as how the disability community uses media for activism. Discuss issues of access for disabled people (e.g., assistive technology, captions, audio descriptions), as well as the future of disability representations within media.

**Requisites:** Sophomore standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key concepts and terminology for understanding the intersection of disability and the media, including the medical and social models of disability, definitions and conceptualizations of disability, ableism, stigma, disability justice, disability identity development, and others.

Audience: Undergraduate

2. Identify how disability is represented within various forms of media, and how these representations affect disabled people both directly and indirectly.

Audience: Undergraduate

3. Describe how technology can facilitate access to media for disabled people

Audience: Undergraduate

4. Discuss how the media is and can be utilized in pursuit of disability justice.

Audience: Undergraduate

**JOURN 335 – PRINCIPLES AND PRACTICES OF REPORTING**

4 credits.

Basic reporting for print and electronic media. Bring together technical and conceptual skills by creating a variety of print, audio, and web-based news stories on a current public issue.

**Requisites:** JOURN 202 or graduate/professional standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **JOURN 345 – PRINCIPLES AND PRACTICE OF STRATEGIC COMMUNICATION**

4 credits.

Introduction to strategic communication for students interested in advertising, public relations, health communications, and political campaigns.

**Requisites:** JOURN 202 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the professional and social overview of the field as a single exposure to strategic communication.

Audience: Both Grad & Undergrad

2. Develop a foundation for higher-level courses for those interested in pursuing a career in strategic communication.

Audience: Both Grad & Undergrad

3. Learn content concerning research and account planning, campaign management, creative message development, conventional and digital media buying and planning, as well as public relations, promotions, and event planning.

Audience: Both Grad & Undergrad

4. Learn the fundamentals of the academic study of strategic communication in society, its history, laws and ethics, and the application of these principles to social, health and political campaigns, as well as career trajectories that involve the use of these principles beyond brand marketing.

Audience: Both Grad & Undergrad

5. Demonstrate a higher-order synthesis of concepts related to strategic communications.

Audience: Graduate

6. Develop an of application of these principles to a designated health or political campaign.

Audience: Graduate

### **JOURN 350 – SPORTS MARKETING COMMUNICATIONS**

3 credits.

Explore various activities related to the promotion domain of sports marketing including marketing research, sports branding, image management, advertising promotion, event promotion, sports sponsorships, and public relations. Examine each of these activities, and focus on the marketing communications associated with each of these activities.

**Requisites:** JOURN 150

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the basic concepts and principles that are part of the practice of sports marketing communications.

Audience: Undergraduate

2. Produce a strategically grounded, creatively inspired plan for various activities related to sports marketing.

Audience: Undergraduate

3. Persuasively pitch these activities to an audience.

Audience: Undergraduate

**JOURN/POLI SCI/URB R PL 373 – INTRODUCTION TO SURVEY RESEARCH**

3-4 credits.

Theory and practice of survey research; questionnaire design, sampling, data visualization, statistical analysis.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Formulate and construct logical arguments about political phenomena and evaluate those arguments using survey research

Audience: Undergraduate

2. Explain the theoretical components of survey research

Audience: Undergraduate

3. Interpret survey results in general with a particular focus on political polling

Audience: Undergraduate

4. Design and assess political surveys, including questionnaire design, question wording, survey mode, sample size, nonresponse, survey experiments, standard error, and margin of error

Audience: Undergraduate

5. Demonstrate statistical analysis skills in the context of political surveys including: hypothesis testing, confidence intervals, difference of means tests, data visualization and linear regression

Audience: Undergraduate

6. Recognize ethical issues in survey research

Audience: Undergraduate

7. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**JOURN 401 – IN-DEPTH REPORTING**

4 credits.

Advanced reporting with emphasis on critical evaluation of evidence and on recognizing the complex effects of government actions. Explore and develop community context stories that originate in a range of venues from the courts to the schools.

**Requisites:** JOURN 335 or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**JOURN 405 – CREATIVE NONFICTION**

4 credits.

Creative elements of non-fiction story telling to develop skills necessary for writing across the journalistic spectrum, from newspapers to magazines to books.

**Requisites:** JOURN 335 or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN 411 – MULTIMEDIA DESIGN**

4 credits.

Visual communication and graphic design in multimedia contexts. Build design and production techniques to relay creative messages through print and digital media. Content explores design theory and techniques, as well as the effects and ethics of visual media messages.

**Requisites:** JOURN 335, 345, or graduate/professional standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**JOURN 415 – SCIENCE AND ENVIRONMENTAL JOURNALISM**

4 credits.

Instruction and practice in strategies for communicating science to the public. Emphases include (1) how to explain difficult concepts and processes; (2) skills for telling interesting and artful stories; and (3) strategies for making reasonable judgments about scientific evidence.

**Requisites:** JOURN 335 or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**JOURN 417 – MAGAZINE PUBLISHING**

4 credits.

Integrated, in-depth approach to magazine management, writing, editing and design. Covers the magazine industry from both the editorial and business ends, bringing together journalism and strategic communication students. Includes production of Curb magazine in print, online and mobile formats.

**Requisites:** JOURN 335, 345, or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN 420 – INVESTIGATIVE REPORTING**

4 credits.

Techniques of investigative and long-form enterprise reporting. Includes extensive reporting in the field and a final project.

**Requisites:** JOURN 335 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JOURN 425 – VIDEO JOURNALISM**

4 credits.

Video journalism is widespread, thanks to online news and sources such as YouTube. Create news stories using the techniques of videography, digital editing, writing and producing. Video journalism is unique in its language, requiring engaging material, a fast start, sharp focus, short narrative and natural voices. Focus on capturing stories with strong visuals and ambient sound of the people affected by issues and events.

**Requisites:** JOURN 335 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN 426 – COMMUNITY-BASED REPORTING**

4 credits.

Provides advanced, targeted instruction in reporting that pays close attention to neighborhoods or very small communities (subcommunities), also known as hyperlocal reporting. These small communities can be defined by geographic boundaries or boundaries of shared topical interest. Locate community-based reporting's place in the larger media ecology of mainstream media (newspapers, TV, weekly papers, magazines, independent websites, etc.), and investigate how local journalism's place in changing media ecologies helps (or discourages) people from becoming active citizens in a democracy.

**Requisites:** JOURN 335

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**JOURN 445 – CREATIVE CAMPAIGN MESSAGES**

4 credits.

Introduction to the creative aspects of message development for advertising, public relations, and other strategic communications.

**Requisites:** JOURN 345 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JOURN 447 – STRATEGIC MEDIA PLANNING**

4 credits.

Introduction to media planning for students interested in careers in advertising, public relations, or other forms of strategic communication.

**Requisites:** JOURN 345 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JOURN 449 – ACCOUNT PLANNING AND STRATEGY**

4 credits.

Process of planning, implementing, and analyzing strategic communication campaigns.

**Requisites:** JOURN 345 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN 450 – SPORTS REPORTING AND WRITING**

4 credits.

Core skills and issues of communicating about sports to a mass audience in a changing media landscape, as well as advice and support in starting a sports communication career including access to professionals in the field. Utilizes professional, historical and theoretical perspectives in helping participants gain proficiency in disseminating information about sports-related events and topics for informative and strategic purposes, while developing a sense of the role of sport in contemporary society.

**Requisites:** JOURN 150

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Gain an understanding of best practices particular to sports reporting and communication in a variety of media, including event and feature coverage, interviewing, sourcing, investigative techniques, data utilization and sports marketing/public relations.

Audience: Undergraduate

2. Articulate an understanding of the impact of sport on societal issues and attitudes.

Audience: Undergraduate

3. Apply best practices and theoretical understanding through written, discussion, and experiential exercises.

Audience: Undergraduate

**JOURN 455 – EMERGING MEDIA AND THE NEWS**

4 credits.

Tools and platforms with which to produce professional content for publication. Examples for course topics will include social media, multimedia and other new technologies that professional communicators must master.

**Requisites:** JOURN 335, 345, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**JOURN 456 – LONG FORM VIDEO**

4 credits.

Develop skills needed to conduct professional-level journalism and strategic communication in long-form video. Produce documentary pieces of covering a contemporary topic of local or regional interest and complete other exercises in video analysis, composition and production.

**Requisites:** JOURN 335, 345, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JOURN 457 – STORYTELLING THROUGH SOUND**

4 credits.

Audio storytelling as an art form, with a focus on creating a series of episodic long-form audio storytelling segments. Develop interview and writing skills, as well as field recording and editing techniques. Develop personal style and voice, while learning practical skills necessary to write and produce audio content for over the air or online.

**Requisites:** JOURN 335, 345, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify compelling news that make use of the audio medium.

Audience: Both Grad & Undergrad

2. Illustrate field recording and editing techniques to draw audio rich news narratives.

Audience: Both Grad & Undergrad

3. Apply and integrate interview and writing skills to concisely form stylized narrative arcs.

Audience: Both Grad & Undergrad

4. Rethink and compose message creation to publish work for media outlets.

Audience: Both Grad & Undergrad

5. Demonstrate deeper engagement with the principles underlying the learning outcomes.

Audience: Graduate

6. Analyze and apply select concepts related to subject.

Audience: Graduate

7. Apply specific principles to revise and produce an additional project.

Audience: Graduate

8. Demonstrate characteristics of structure and applications that benefits the message.

Audience: Graduate

**JOURN 463 – DIGITAL MEDIA STRATEGIES**

4 credits.

Provides an overview of digital media from an objective, strategy, and tactical planning perspective within strategic communication media and promotion campaigns.

**Requisites:** Declared in a Journalism undergraduate program and JOURN 345

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN 464 – PUBLIC RELATIONS STRATEGIES**

4 credits.

Provides an overview of public relations from an objective, strategy, and tactical planning perspective within strategic communication campaigns. Investigates one core element of a strategic communications campaign and provides an in-depth study into the topic area of public relations.

**Requisites:** JOURN 345**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**JOURN 465 – SOCIAL MEDIA MARKETING COMMUNICATIONS**

4 credits.

Provides an overview of social media marketing planning and buying from an objective, strategy, and tactical perspective within strategic communication campaigns. Investigate one core element of a strategic communications campaign, and provides an in-depth study into the topic area of digital media.

**Requisites:** Declared in a Journalism undergraduate program and JOURN 345**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Distinguish social media from other strategic communications management and communications functions.

Audience: Undergraduate

2. Integrate social media into a broader strategic communications campaign.

Audience: Undergraduate

3. Strategically analyze social media audiences and influencers.

Audience: Undergraduate

4. Critically evaluate ethics and legalities of social media, and how social media plays a role in both creating and solving public relations crises.

Audience: Undergraduate

**JOURN 475 – SPECIAL TOPICS IN ADVANCED CONCEPTS AND SKILLS**

1-4 credits.

Exploration of a particular set of concepts and skills in more depth. Subject will vary.

**Requisites:** JOURN 335, 345, or graduate/professional standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**JOURN/HISTORY 560 – HISTORY OF U.S. MEDIA**

4 credits.

Evolution of the mass media in the United States in the context of political, social, and economic change.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify and explain important people, themes, events, and technologies that shaped media history.

Audience: Both Grad &amp; Undergrad

2. Identify and explain historical arguments in secondary literature.

Audience: Both Grad &amp; Undergrad

3. Analyze primary sources and know what questions to ask to be able to do that.

Audience: Both Grad &amp; Undergrad

4. Produce original historical knowledge through research in primary and secondary sources.

Audience: Both Grad &amp; Undergrad

5. Produce research suitable for submission to an academic journal or history magazine.

Audience: Graduate

**JOURN 561 – MASS COMMUNICATION AND SOCIETY**

4 credits.

Relationships between mass communications and society; analysis and evaluation of media performance and of suggestions for change.

**Requisites:** Junior standing; not open to special students**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**JOURN 562 – MASS MEDIA AND RACIAL DIVERSITY**

4 credits.

Delves deeply into the concepts and theories related to the subject of mass media and racial diversity. Key concepts such as race, ethnicity, stereotypes, and white privilege are examined and analyzed in the news, advertising, digital media and social media and their intersection with African Americans, Native Americans, Asian Americans, Latinx Americans, and Arab Americans. Different social and cultural roles assumed by mainstream media and alternative media are also explored.

**Requisites:** Junior standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Learning Outcomes:** 1. Differentiate the spectrum of race and race representation within mass and social media.

Audience: Both Grad &amp; Undergrad

2. Use social scientific and critical research methods to identify current challenges faced by media professionals.

Audience: Both Grad &amp; Undergrad

3. Recognize the origins of stereotyping in mass communication.

Audience: Both Grad &amp; Undergrad

4. Appraise various stereotypes across the intersections of oppressive social systems.

Audience: Both Grad &amp; Undergrad

5. Describe how marginalized groups use alternative and social media to tell their own stories.

Audience: Both Grad &amp; Undergrad

6. Critically evaluate ideas from different sources and integrate or contrast race and media communication theories to produce research suitable for submission to an academic journal.

Audience: Graduate

**JOURN 563 – LAW OF MASS COMMUNICATION**

4 credits.

Freedom of speech and press with particular emphasis on major legal issues confronting media practitioners; introduction to such areas of law as censorship, libel, invasion of privacy, access to information, regulation of electronic media and commercial speech.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**JOURN 564 – MEDIA AND THE CONSUMER**

4 credits.

Advertising and other mass media content from the consumer's viewpoint; consumer's need and opportunities for information, and use of opportunities; consumer evaluation of media performance, guidelines for effective use; alternative means for obtaining information; implications of consumer movement.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**JOURN 565 – EFFECTS OF MASS COMMUNICATION**

4 credits.

Use and effects of mass communication for individuals and societies. Examines who is affected, what effects occur and how much, what different media content is involved and what situations make effects more or less likely.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**JOURN 566 – COMMUNICATION AND PUBLIC OPINION**

4 credits.

The role of the mass media of communication in the formation of public opinion. Propaganda goals of government, political, economic, and social groups.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**JOURN 567 – MASS MEDIA AND GLOBAL COMMUNICATION**

4 credits.

Introduces key concepts and issues in mass media and global communication studies. Covers broad trends, key topics, and critical debates in media and communication studies under global contexts and standpoints.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and explain key concepts and urgent issues in mass media and global communication studies.

Audience: Both Grad & Undergrad

2. Acquire different theoretical and methodological approaches to study global communication.

Audience: Both Grad & Undergrad

3. Examine various mechanisms of communication networks, media flows, media industries, and digital platforms across global contexts.

Audience: Both Grad & Undergrad

4. Learn interview skills and produce theoretically informed analysis of media consumption patterns and networks.

Audience: Both Grad & Undergrad

5. Analyze global media phenomena and produce research papers that rigorously engage with key concepts and issues covered in the course.

Audience: Both Grad & Undergrad

6. Recognize and understand critical connections between global changes, local issues, and personal lives.

Audience: Both Grad & Undergrad

7. Critically evaluate ideas from different sources and integrate (or contrast) different global communication theories to produce research suitable for submission to an academic journal.

Audience: Graduate

**JOURN 601 – COLLOQUIUM IN PROFESSIONAL COMMUNICATION CAREERS**

1 credit.

Explores a wide variety of post-undergraduate communication career options available in Journalism. Topics related to job hunting, resume writing, and networking are also covered. Focuses on opportunities and challenges in a wide variety of communication fields, from advertising and public relations to radio, newspapers and TV broadcasting. Guest speakers or panelists will span different sectors (agencies, corporations, nonprofits, higher education, government, etc.).

**Requisites:** Declared in a Journalism undergraduate program

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Expand knowledge about possible communications career paths, across a variety of industry sectors

Audience: Undergraduate

2. Use practical and specific tools to help obtain a 'first job' after graduation

Audience: Undergraduate

3. Network with communications industry experts

Audience: Undergraduate

4. Reflect on possible future career paths and opportunities

Audience: Undergraduate

**JOURN/MARKETNG 605 – DIGITAL BRAND BUILDING**

3 credits.

Provides an overview of the rapidly changing digital landscape and its role and importance in the marketing mix. Explores the digital revolution and its impact on building brands in today's digital first environment. Examines themes of the revolution and their effects on how organizations market their brands and, more broadly, on culture.

**Requisites:** MARKETNG 300, JOURN 201, or declared in the Business Exchange program

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain how the digital marketing landscape has evolved over time, including specific disruptions and revolutions that have made the greatest impact.

Audience: Undergraduate

2. Articulate how brand marketers adapted their strategies to compete in a changing digital ecosystem.

Audience: Undergraduate

3. Develop critical thinking and communication skills that will require analysis and synthesis of class lessons and topics.

Audience: Undergraduate

### **JOURN/COM ARTS/HDFS 616 – MASS MEDIA AND YOUTH**

3 credits.

Children's and adolescents' use of mass media and mass media effects on them. Particular attention is given to changes in comprehension and other cognitive activities that give insights into media use and effects.

**Requisites:** JOURN 202, COM ARTS 325, HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, PSYCH 460, LSC 251, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how children and youth process media  
Audience: Undergraduate

2. Compare/contrast the impact of different types of media content on development  
Audience: Undergraduate

3. Explain how individual differences moderate the impact of media on development  
Audience: Undergraduate

4. Describe moderating effects of the context in which media use occurs  
Audience: Undergraduate

5. Read, interpret, evaluate, and discuss social scientific reports of findings in this area  
Audience: Undergraduate

6. Synthesize and interpret research in this area for a lay audience  
Audience: Undergraduate

7. Explain with nuance how children and youth process media  
Audience: Graduate

8. Compare/contrast the impact of different types and formats of media content on development, with reference to key developmental milestones  
Audience: Graduate

9. Explain how individual differences and social contexts moderate the impact of media uses and interpretations on development  
Audience: Graduate

10. Synthesize and interpret research in this area and identify a research gap for future work  
Audience: Graduate

### **JOURN/COM ARTS/LSC 617 – HEALTH COMMUNICATION IN THE INFORMATION AGE**

3 credits.

Examines the role of communication in health, how the revolution in information technology has affected health communication, and the assumptions about health information and communication that drive current efforts to use technologies.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate their understanding of major theories, approaches, concepts, and current research findings in the area of health communication  
Audience: Both Grad & Undergrad

2. Gain a sense of the methodological issues involved in the construction and evaluation of health communication  
Audience: Both Grad & Undergrad

3. Demonstrate their understanding of the connections between the environment (e.g., physical, social, media), cognition, and behavior  
Audience: Both Grad & Undergrad

4. Communicate effectively through written reports, oral presentations and discussion  
Audience: Both Grad & Undergrad

5. Evaluate ideas from different sources critically  
Audience: Graduate

6. Derive new testable hypotheses by integrating or contrasting different theories  
Audience: Graduate

7. Develop variations on theoretical models or ideas such as contingent conditions or mediating factors  
Audience: Graduate

### **JOURN 618 – MASS COMMUNICATION AND POLITICAL BEHAVIOR**

4 credits.

Interrelationships of news media, political campaigning, and the electorate. Impact of media coverage and persuasive appeals on image and issue voting, political participation and socialization.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN 620 – INTERNATIONAL COMMUNICATION**

4 credits.

Historical, political, economic and cultural trends in global mass communication systems.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JOURN 622 – THE IMPACT OF EMERGING MEDIA**

3 credits.

Provides an introduction to the literature and research on emerging communication technologies (e.g., blogs, social media, massively multiplayer games, mobile devices) and the effects of these technologies on the individual and societal levels. Illuminates the psychological, social, political, industrial, and policy implications of the use of emerging communication technologies. Become equipped with a basic social and scientific understanding of the interplay between technology, individuals, and society, and recurring issues concerning the adoption and usage of new communication technologies. Emphasizes empirical approaches to understanding these relationships, delving into contexts such as journalism, strategic communication, and the place of digital media in politics and society.

**Requisites:** Junior standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN 649 – BRAND STRATEGY IN ADVERTISING & INTEGRATED COMMUNICATIONS**

4 credits.

Provides a comprehensive introduction to classical consumer packaged goods brand management by exploring the intersection of marketing, advertising, and strategy to grow sales profitably over time with winning products and effective campaigns. Illuminates the foundational concepts, frameworks, and tools brand management professionals use to drive awareness, consideration, trial and repeat of their offerings to increase market share and establish long-lasting brand equity with target consumer groups. Engages leadership and positioning principles to cultivate and communicate one's professional and personal brand in any career or life path.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Possess a basic understanding of the consumer packaged goods industry and the core concepts behind the work brand management professionals do to drive profitable sales growth in their product categories.

Audience: Undergraduate

2. Apply key brand and marketing management frameworks, calculations and approaches for handling specific business opportunities and problems.

Audience: Undergraduate

3. Know the project management cycles of short and long term initiatives including new product innovation and strategic campaign development.

Audience: Undergraduate

4. Formulate a complete and compelling strategy recommendation memo for use in future internship and full-time professional job roles (particularly in the advertising, marketing, and brand management fields).

Audience: Undergraduate

5. Present knowledge, analysis and thought leadership to a large audience.

Audience: Undergraduate

6. Recognize how fundamental brand principles can be applied to enhance one's personal-professional "brand."

Audience: Undergraduate

**JOURN/ART HIST/HISTORY/L I S 650 – HISTORY OF BOOKS AND PRINT CULTURE IN EUROPE AND NORTH AMERICA**

3 credits.

History of books and print culture in the West from ancient times to the present. Focus on the influence of reading and writing on social, cultural, and intellectual life. Methodologies, theories, and sources for study of book and print culture history.

**Requisites:** Graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JOURN 651 – COMMUNICATING SPORTS CONTROVERSIES**

3 credits.

Exploration of prominent controversies that pervade the realm of sports and engage the activities of sports communication professionals (such as sports journalists, broadcasters, marketers, and public relations specialists). Discuss the issues involved in these controversies and pay special attention to the way they impinge upon professional practices.

**Requisites:** JOURN 150, 162, 201, or junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Examine the core concepts and principles that are involved in today's most salient sports controversies.

Audience: Undergraduate

2. Explore the perspectives and practices of sports communication professionals with respect to these controversies.

Audience: Undergraduate

**JOURN 657 – UNDERSTANDING RESEARCH DESIGN & STATISTICS IN MASS COMMUNICATION**

4 credits.

Covers fundamental thinking skills necessary for the critical evaluation and presentation of arguments in mass communication, especially those based upon quantitative information. Introduces generic logic and quantitative reasoning concepts through analysis and discussion of specific cases drawn from research reported in the mass media (e.g., health and business news, public opinion polls), research on the media (e.g., the impact of media violence), and research for the media (e.g., audience research). Logical and quantitative reasoning skills will be improved through a variety of "hands on" projects.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain a sense of the methodological issues involved in the construction and design of mass communication research studies, giving them the ability to critically evaluate the various types of reliability and validity.

Audience: Both Grad & Undergrad

2. Understand how to analyze and interpret survey data in mass communication research contexts (e.g., confidence intervals, t-tests, correlations, etc.) using various programs (e.g., Excel, R).

Audience: Both Grad & Undergrad

3. Critically evaluate and summarize information related peer reviewed mass communication research articles.

Audience: Both Grad & Undergrad

4. Communicate effectively through written reports, oral presentations and discussion on topics in mass communication.

Audience: Both Grad & Undergrad

5. Critically evaluate ideas from different sources, integrating (or contrasting) different communication theories, deriving new testable hypotheses, developing variations on theoretical models or other ideas such as contingent conditions or mediating factors important in mass communication research.

Audience: Graduate

**JOURN 658 – COMMUNICATION RESEARCH METHODS**

4 credits.

Survey of methods for investigating mass communication process and effects.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN/ASIAN AM 662 – MASS MEDIA AND MINORITIES**

4 credits.

Representations of minority groups in U.S. news and entertainment mass media. Historical, social, political, economic, and other factors influencing the mass mediated depictions of minorities.

**Requisites:** Junior standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2022**JOURN 664 – SOCIAL NETWORKS IN COMMUNICATION**

3 credits.

Examines key concepts in social network theory and develops and applies them to the field of communication. Attention is paid to the differences between social and online networks, as well as their relationships. Explores major concepts and questions in social network theory and analysis, including the elements that make up a network; network relationships (e.g. homophily, knowing others like ourselves); the construction of whole social networks out of dyads (two people) and triads (three); strong and weak ties; roles and positions; groups, cliques, and clusters; as well as small worlds and communities. Emphasis will be on what these concepts mean and how they work. There will be minimal introduction to technical network analysis and hands-on work.

**Requisites:** Junior standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2019**JOURN 669 – LITERARY ASPECTS OF JOURNALISM**

3 credits.

Critical reading of the best reporting and writing.

**Requisites:** Junior standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**JOURN 675 – TOPICS IN GOVERNMENT AND MASS MEDIA**

3 credits.

Analysis of political and legal relationships between mass communication and government with emphasis on current problems and issues.

**Requisites:** Senior standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**JOURN 676 – SPECIAL TOPICS IN MASS COMMUNICATION**

1-4 credits.

In-depth analysis of a conceptual mass communication issue.

**Requisites:** Junior standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**JOURN/L I S 677 – CONCEPTS AND TOOLS FOR DATA ANALYSIS AND VISUALIZATION**

3 credits.

An introduction to information and data visualization: introduction to major concepts, instruction in specific tools for data analysis and visualization, and application of skills in a final project.

**Requisites:** None**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**JOURN 678 – LEGAL & ETHICAL DIMENSIONS OF EMERGING MEDIA**

3 credits.

Examines the legal and ethical questions surrounding digital media and their effects on society and individuals.

**Requisites:** Junior standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**JOURN 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing Honors in the Major.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2025**JOURN 682 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing Honors in the Major.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**JOURN 691 – SENIOR THESIS**

3 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**JOURN 692 – SENIOR THESIS**

3 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**JOURN 697 – INTERNSHIP**

1-3 credits.

Advanced directed study projects as arranged with a faculty or instructional academic staff member, based on internship experience.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**JOURN 698 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty or instructional academic staff member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2010

**JOURN 699 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty or instructional academic staff member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**JOURN 801 – MASS COMMUNICATION AND THE INDIVIDUAL**

3 credits.

Theory and research on individuals' use of mass communication and effects of mass communication. Topics include choice, selection and functions of mass media use, attention and cognitive processing, information effects, persuasion and emotion/involvement, and social and behavioral effects.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**JOURN 802 – MASS COMMUNICATION AND SOCIETY**

3 credits.

Examines systematic procedures for theory building and comparison of theories of communication processes between mass media and other societal institutions and their relationships with both individuals and micro-social systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN 803 – MASS COMMUNICATION AND CULTURE**

3 credits.

Intensive readings focusing on the critical studies and/or cultural studies traditions in mass communication theory and research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**JOURN/HISTORY 808 – MASS COMMUNICATION HISTORY**

3 credits.

Intensive reading and discussion designed to introduce literature of mass communication.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **JOURN/LSC 811 – CONCEPTUALIZATION AND DESIGN OF MASS COMMUNICATION RESEARCH**

2-3 credits.

Assists students in turning research questions into substantive research designs with understanding of the concepts involved. For most students, the final product will be a well-developed thesis or dissertation proposal.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Explain key principles of social science research, with a focus on how empirical studies relate to, and contribute to social scientific theory creation and development

Audience: Graduate

2. Identify and explain common modes of empirical research in mass communication and science communication scholarship, including their strengths and weaknesses

Audience: Graduate

3. Assess different kinds of social scientific research for strengths/weaknesses related to increasing understanding of mass communication and/or science communication

Audience: Graduate

4. Articulate and/or evaluate research proposals in mass communication and/or science communication

Audience: Graduate

### **JOURN 812 – QUALITATIVE COMMUNICATION RESEARCH METHODS**

3 credits.

Research methodology. Design research, analyze and interpret evidence, and develop a deeper appreciation of research strategies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **JOURN 813 – PRACTICUM IN COMMUNICATION RESEARCH**

3 credits.

Detailed practicum on conducting and publishing empirical research in mass communication.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **JOURN 818 – COMPUTATIONAL APPROACHES TO COMMUNICATION RESEARCH**

3 credits.

Surveys major computational approaches and analytical tools that are promising in advancing communication research and practices in the modern digital information environment.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Gain familiarity with major computational methods currently available to social scientists.

Audience: Graduate

2. Develop a conceptual understanding of the core assumptions, modeling strategies, and programming tools associated with each of the surveyed computational method.

Audience: Graduate

3. Critically assess how computational methods could help describe, predict, and explain communication phenomena and improve Interventions.

Audience: Graduate

4. Examine how computational approaches could triangulate with other research methods to help advance communication theory.

Audience: Graduate

5. Collectively build a shared resource library that includes annotated bibliographies, short response papers, and tutorials & codes for a selected set of R packages popular for computational communication research.

Audience: Graduate

6. Gain experiences with applying computational methods to address research questions of your interest.

Audience: Graduate

### **JOURN 821 – HEALTH COMMUNICATION**

3 credits.

Application and integration of theory in understanding the effects of mass media, with close attention to health communication campaign messages.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **JOURN 822 – GLOBAL COMMUNICATION**

3 credits.

Readings and discussion focussing on global media issues. Topics may include news flow, cultural imperialism, representations, history and political economy, globalization trends, new technologies, mass media and nation building, communication and grassroots politics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **JOURN/ENVIR ST/LSC 823 – SCIENCE AND ENVIRONMENT COMMUNICATION**

3 credits.

Tracks the evolution of mass media coverage of science and the environment. Emphasis on how journalists utilize evidence, the influence of scientific and journalistic norms on stories, and the effects of mass media on science and environment messages to the public.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Describe theoretical perspectives relating to science and environmental communication, including a sampling of recent findings and current theoretical model

Audience: Graduate

2. Combine theory and methods to develop and evaluation science and environmental communication efforts

Audience: Graduate

3. Apply research theories and findings to contemporary problems in environmental and science communication

Audience: Graduate

4. Communicate complex environmental and science concepts with scientific and general audiences in oral and written forms

Audience: Graduate

### **JOURN 824 – RACE, ETHNICITY AND MEDIA**

3 credits.

Examines key theoretical and empirical readings in the area of race/ethnicity and media.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **JOURN/LSC 825 – LAW AND ETHICS OF COMMUNICATION AND MEDIA**

3 credits.

Explores critical questions of media law and ethics within the United States.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Understand the dimensions of legal and ethical philosophies and frameworks as applied to media work.

Audience: Graduate

2. Interpret and critique common elements of media ethics codes and practices.

Audience: Graduate

3. Interpret and critique legal precedents and doctrines

Audience: Graduate

4. Apply philosophy and frameworks to current media concerns and controversies.

Audience: Graduate

5. Rationally defend or critique choices in specific media contexts.

Audience: Graduate

6. Research and write about law and ethics in scholarly or professional publications.

Audience: Graduate

### **JOURN/LSC 826 – JOURNALISM THEORY**

3 credits.

Focus on the content and purposes of journalism, explores cultural values associated with journalism, relationships between journalism and other institutions, and current issues facing journalists at a time when the profession faces many challenges.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JOURN/GEN&WS 828 – GENDER AND SEXUALITY IN MASS COMMUNICATION**

3 credits.

A scholarly theory overview on gender and sexuality in communication studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how cultural theorists have defined "gender," "sexuality," and "intersectionality."

Audience: Graduate

2. Analyze how gender and sexuality are represented in the mass media.

Audience: Graduate

3. Explain how gender and sexuality are relevant to media production, media consumption (media audiences), and media activism.

Audience: Graduate

4. Describe how gender and sexuality inform the creation of media publics.

Audience: Graduate

**JOURN/POLI SCI 829 – POLITICAL COMMUNICATION**

3 credits.

This course examines the role of communication in American politics. Topics covered include the communication of politics (e.g., communication by politics elites, effects of mass media and interpersonal communication on political attitudes) as well as the politics of communications (regulation of political communication, policy issues, etc.).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**JOURN/LSC 833 – TECHNOLOGY AND SOCIETY**

3 credits.

Considers the effects of new communication technologies on everyday life and political mobilization.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**JOURN 835 – NEWS FRAMING AND SOCIAL PROTEST MOVEMENTS**

3 credits.

Addresses the multi-disciplinary theory and research that have contributed to our understanding of both the antecedents and consequences of mediated messages as they impinge upon processes related to social protest. Draws from literature in mass communication, political science, sociology, psychology and other disciplines to examine questions about the role of communication media in the dynamics of social protest.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Master the literature in the areas of framing, framing effects, and news coverage of social movements.

Audience: Graduate

2. Design and execute a research project that contributes to the literature of news framing and social protest.

Audience: Graduate

3. Develop skills in analyzing and presenting their own and others' research.

Audience: Graduate

**JOURN 880 – TOPICS IN MASS COMMUNICATION**

3 credits.

In-depth investigation of a specific topic in mass communication.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**JOURN 901 – COLLOQUIUM IN MASS COMMUNICATION**

1 credit.

Research presentations by mass communication scholars, and is designed to acquaint graduate students with theoretical and methodological approaches to the study of communication.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**JOURN 902 – GRADUATE TEACHING COLLOQUIUM**

1 credit.

Colloquium series in fields related to communication and information studies. Teaching presentations on various theoretical and practical approaches to teaching and learning in the communication and information fields.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**JOURN 903 – PROFESSIONAL MASTER'S COLLOQUIUM**

1 credit.

Expands the toolkit of skills and experiences through direct work with working journalists and communication professionals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain professional lessons about the craft and industry of journalism and media from those who practice it.

Audience: Graduate

2. Apply skills learned using WordPress and other technology to develop pieces for a professional portfolio.

Audience: Graduate

3. Craft an understanding of the ethics and practice of journalism from a practical and theoretical perspective and demonstrate how to apply them in professional situations.

Audience: Graduate

4. Develop relationships with professionals and mentors to further their careers in journalism.

Audience: Graduate

**JOURN 990 – THESIS**

1-9 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**JOURN 999 – INDEPENDENT RESEARCH PROBLEMS**

2-4 credits.

Advanced level mentored reading and research for dissertators.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**KINESIOLOGY (KINES)****KINES 100 – EXERCISE, NUTRITION, AND HEALTH**

2 credits.

Guidelines and assessment methods for fitness and nutrition. Motivation, adherence and stress-reduction techniques discussed. Lecture-demonstration concerning effects of exercise and nutrition on health and well-being.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and explain the scientific principles and concepts of physical activity, nutrition, and positive health behaviors on health outcomes.

Audience: Undergraduate

2. Understand the physiological and psychological benefits of regular physical activity and nutrition.

Audience: Undergraduate

3. Evaluate health and fitness information to differentiate between research-based information and trends.

Audience: Undergraduate

4. Apply course concepts to make informed decisions about personal health and wellness.

Audience: Undergraduate

5. Design and implement personal wellness programs using exercise, dietary, and health behavior guidelines and assessments.

Audience: Undergraduate

**KINES 104 – AQUATICS**

1 credit.

Attainment and maintenance of a high degree of personal efficiency in swimming strokes and proficiency in fundamental aquatic skills, and an understanding of the fundamental physiological, mechanical and kinesiological principles as they relate to aquatic performance.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2018**Learning Outcomes:** 1. Develop the ability to properly sequence skills and ensure safety within the block plan.

Audience: Undergraduate

2. Develop the ability to create lesson plans that include safety and skill components, as well as demonstrate understanding of motor development and motor learning principles.

Audience: Undergraduate

3. Develop understanding of hydrodynamic principles as seen in the block plans, lesson plans and personal swimming skills.

Audience: Undergraduate

4. Demonstrate the ability to assess quality lessons and skills.

Audience: Undergraduate

5. Demonstrate improvement in personal swimming skills through assessments.

Audience: Undergraduate

6. Demonstrate the ability to assess swimming skills

Audience: Undergraduate

**KINES 111 – THRIVE: ENHANCING YOUR WELLNESS ON CAMPUS AND HEALTH FOR LIFE**

3 credits.

Explore personal wellness by examining five dimensions of wellness (physical, emotional, social, intellectual and occupational) to understand how each dimension contributes to overall health, wellbeing, and quality of life. Discover and utilize on-campus resources that support each dimension and build a resource network to proactively support wellness as a college student. Develop and apply practical skills grounded in theory to implement meaningful behavior change to achieve growth across all dimensions. Engage in critical reflection regarding challenges and barriers faced in achieving desired health outcomes and cultivate strategies to overcome these obstacles to support sustainable wellness practices today and across the lifespan. Enhance dimensions of personal wellness as a method to explore the field of health promotion.

**Requisites:** None**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe the dimensions of wellness and their impact on health, wellbeing, and quality of life

Audience: Undergraduate

2. Identify on-campus resources and understand how to use them to support individual wellness

Audience: Undergraduate

3. Demonstrate methods to enhance individual wellness across all dimensions

Audience: Undergraduate

4. Develop and apply skills to make meaningful behavior changes grounded in theory

Audience: Undergraduate

5. Apply strategies to overcome challenges and barriers to achieve desired health outcomes across the dimensions of wellness, during college and beyond

Audience: Undergraduate

**KINES 112 – MAKE IT COUNT: MEASURING PHYSICAL ACTIVITY BEHAVIOR**

3 credits.

Define exercise and physical activity behaviors and how to systematically measure them. Content will encompass the American College of Sports Medicine definition of physical activity and recommendations for exercise across different populations. Students will engage in a service learning opportunity with our adapted fitness program where they will practice measuring and addressing the difficulties in broadly defining physical activity.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Apply their knowledge of science to address global health concerns related to physical activity and sedentary time.

Audience: Undergraduate

2. Quantify a behavior and examine relationships of that quantification with different types of behavioral measurements.

Audience: Undergraduate

3. Use their knowledge of kinesiology to construct a flexible definition of physical activity to include a variety of behaviors.

Audience: Undergraduate

4. Demonstrate an understanding of the importance of physical activity behaviors across gender, ethnicity, and illness.

Audience: Undergraduate

5. Create an assessment plan to quantify a variety of physical activity behaviors.

Audience: Undergraduate

6. Identify challenges to exercise prescription in the field of kinesiology.

Audience: Undergraduate

**KINES 113 – MEDICAL MIRACLES AND BARBIE MAKEOVER SURGERIES: BIOETHICS AND NEW MEDICAL TECHNOLOGIES**

3 credits.

Introduction to the ethical implications and impacts of emerging medical technologies. Will explore the ethical, social, and cultural questions raised by these medical developments in cross cultural settings. While most medical technologies have originated in the so-called developed countries, medical innovations are being increasingly globalized, raising important questions at home and abroad about the distribution of risks and benefits and broader health disparities.

**Requisites:** None**Repeatable for Credit:** No**Learning Outcomes:** 1. Identify ethical, social, and cultural issues raised by emerging global medical technologies

Audience: Undergraduate

2. Apply a social justice or equity approach to understand how the benefits and risks of these technologies might be distributed

Audience: Undergraduate

3. Evaluate key medical technology and its ethical and sociocultural implications

Audience: Undergraduate

**KINES 114 – EXERCISE AS MEDICINE**

3 credits.

Explore the powerful connection between exercise and health, examining how exercise serves as both a preventive and therapeutic tool. Learn about the positive effects of exercise on mental health, sleep, cognitive function, and overall well-being. Participate in diverse physical activities that enhance fitness and contribute to a balanced lifestyle. Collaborate on a physical activity initiative addressing barriers to exercise. Benefit from practical experiences that promote a healthier lifestyle and academic success.

**Requisites:** None**Repeatable for Credit:** No**Learning Outcomes:** 1. Explain the relationship between exercise and physical health, mental health, and cognitive health

Audience: Undergraduate

2. Analyze the impact of exercise on stress, anxiety, sleep quality, and academic performance among college students

Audience: Undergraduate

3. Collaborate with peers to lead a physical activity initiative that identifies and addresses barriers to exercise

Audience: Undergraduate

4. Apply strategies to sustain a physically active lifestyle during academic years and beyond, emphasizing long-term health and success

Audience: Undergraduate

5. Explain the importance of exercise for academic success and health

Audience: Undergraduate

**KINES 115 – PHYSIOLOGY OF HUMAN PERFORMANCE**

3 credits.

Humans are capable of achieving astonishing performances in athletics, in work and in other extraordinary situations. These extraordinary performances often provide important insights into physiological processes and their limits. This course integrates information from biology, chemistry, psychology, mechanics, etc., to understand the factors that determine and limit human performance from the molecular level all the way up to whole body movement. The emphasis in the class is on using case studies to investigate physiological processes underlying movement, exercise, and performance.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop effective strategies for solving problems in science, including some strategies for finding information to help solve the problem.

Audience: Undergraduate

2. Develop an appreciation for the role that limiting factors play in human physiology and an ability to identify limiting factors in a variety of physiological processes

Audience: Undergraduate

3. Have an appreciation for the relationships between a variety of different subjects related to human physiology and understand how an effective approach to understanding human performance requires an integrated approach from a number of disciplines.

Audience: Undergraduate

**KINES 116 – FIRST AID AND BASIC LIFE SUPPORT**

2 credits.

Techniques and procedures to deal effectively with common emergencies. Includes training in airway obstruction, cardiopulmonary resuscitation, automated external defibrillation, injuries, and medical emergencies.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the signs and symptoms of breathing emergencies and cardiac emergencies and demonstrate how to provide care for each.

Audience: Undergraduate

2. Differentiate the signs and symptoms of various soft tissue and musculoskeletal injuries, and demonstrate how to care for them.

Audience: Undergraduate

3. Organize the signs and symptoms of medical emergencies, including sudden illnesses, poisoning, bites and stings, and heat and cold emergencies, and illustrate how to care for them.

Audience: Undergraduate

4. Analyze the causes of and solutions for the sustainability challenge of caring for shock.

Audience: Undergraduate

5. Analyze sustainability issues and practices using a systems-based approach for providing emergency care.

Audience: Undergraduate

### **KINES 119 – INTRODUCTION TO KINESIOLOGY**

2 credits.

Introduces students to the field of kinesiology and the Department of Kinesiology at the University of Wisconsin-Madison. Introductory material about physical activity and health will be provided, and career opportunities in kinesiology will be discussed.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define the broad integrative nature of the field of Kinesiology.

Audience: Undergraduate

2. Identify the nature and demands of professional occupations, the career options available to students graduating from departments of kinesiology, and the qualifications associated with each.

Audience: Undergraduate

3. Explain the importance of physical activity in daily life and the implications of this for the discipline of kinesiology.

Audience: Undergraduate

4. Demonstrate an ability to honestly self-assess personal strengths, interests, values and goals as they relate to career selection.

Audience: Undergraduate

5. Demonstrate a recognition and appreciation for the many careers within the field.

Audience: Undergraduate

6. Examine the questions and problems currently being explored in the field of kinesiology.

Audience: Undergraduate

7. Transfer skills/knowledge to new situations/contexts in a meaningful approach.

Audience: Undergraduate

### **KINES 121 – FOUNDATIONS OF PHYSICAL EDUCATION**

2 credits.

Introduction to physical education teaching, movement education, and an operational understanding of the scientific study of human movement. Lecture and lab.

**Requisites:** Classified as Pre-Physical Education

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the relationship between the major educational philosophies and their application to physical education, and the development of physical education through a historical perspective.

Audience: Undergraduate

2. Explain the goals and objectives of physical education and the characteristics of a quality physical education program, and illustrate the application of standards to physical education instruction.

Audience: Undergraduate

3. Demonstrate movement concepts, locomotor skills, nonlocomotor skills, manipulative skills, and rhythmic activities.

Audience: Undergraduate

4. Analyze the causes of and solutions for the sustainability challenge of addressing social health issues through physical education.

Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenge of teaching an educational movement theme.

Audience: Undergraduate

### **KINES 123 – LIVING WELL: LIFESTYLE REDESIGN AND HEALTH PROMOTION FOR COLLEGE STUDENTS**

2 credits.

Focuses on the application of biological, cultural and social theory and research to lifestyle change. There will be lectures by experts, experiential learning, and the application of course knowledge to student's lives through class assignments and activities. The transition to college requires students to construct a new lifestyle, take on new and greater personal responsibilities while at the same time meet rigorous academic challenges. This transition includes a loss of structured daily schedules, decreased family support for the day to day living, and greater responsibility for their finances and life choices. Students may have difficulty managing their time, exercise less, eat less healthy foods, engage in increased drinking of alcohol, and experience greater stress and depression when adjusting to college life. This life transition provides an opportunity for reexamination and an opportunity to make thoughtful choices about lifestyle.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe research in multiple disciplines including occupational science, family studies, biology, psychology, and sociology that explains how colleges students' participation in daily activities relates to their health and well-being.

Audience: Undergraduate

2. Understand the intricacies of daily routines, and the dynamics of creating life change within everyday routines to create health and occupational balance.

Audience: Undergraduate

### **KINES 125 – ADAPTED FITNESS AND PERSONAL TRAINING**

1 credit.

Fitness class for developing individualized personal goals. Accommodates persons having temporary or permanent disability. Alternative to dropping from other program classes due to injury or other medical reason.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **KINES 127 – INTRODUCTION TO ATHLETIC HEALTHCARE**

2 credits.

Issues and basic concepts of athletic healthcare including health care systems, interprofessional teams, and injuries and conditions common to active populations. Emphasis on the team approach to patient care with exposure to a variety of health science professions.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define athletic healthcare

Audience: Undergraduate

2. Identify components of the health care system commonly used in athletic healthcare.

Audience: Undergraduate

3. Interpret the role of public health in addressing issues in athletic healthcare.

Audience: Undergraduate

4. Demonstrate their knowledge of common injuries and conditions in active populations.

Audience: Undergraduate

5. Differentiate the roles of specific health science professions that make up a comprehensive athletic healthcare team.

Audience: Undergraduate

6. Assess the relationship of policy to practice in athletic healthcare.

Audience: Undergraduate

7. Identify the nature and demands of a variety of athletic healthcare employment settings.

Audience: Undergraduate

### **KINES 140 – SCIENCE AND PRACTICE OF RESISTANCE TRAINING** 2 credits.

Lectures and demonstrations on the principles of resistance training and associated physiological effects designed for practitioners who wish to gain a detailed understanding of the science of resistance training.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Detail scientific rationale behind resistance training program design variables.

Audience: Undergraduate

2. Design a resistance training program.

Audience: Undergraduate

3. Differentiate resistance training programs based on desired training outcomes.

Audience: Undergraduate

4. Evaluate efficacy and safety of resistance training program.

Audience: Undergraduate

### **KINES 145 – CHOOSING TO MOVE: CONSTRUCTING AN ACTIVE LIFESTYLE** 2 credits.

Will promote physical activity at a level to achieve health benefits, particularly in students who currently are insufficiently active (less than 150 minutes each week of moderate intensity physical activity). Students will apply course materials (e.g., behavior change strategies) to their own lives by completing self-analysis of their physical activity levels and then developing a physical activity plan to increase current physical activity levels, as well as a plan to maintain the activity after the course has ended.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Describe the benefits of physical activity and how much physical activity is needed to achieve health benefits.

Audience: Undergraduate

2. Develop a physical activity program at a level to achieve health benefits.

Audience: Undergraduate

3. Understand the challenges of sustaining a physical activity program.

Audience: Undergraduate

4. Develop skills to be able to sustain a physical activity program after the course has ended.

Audience: Undergraduate

### **KINES 150 – FOUNDATIONS OF HEALTH BEHAVIOR AND HEALTH EQUITY** 3 credits.

Provides students with an overview of the personal, interpersonal and broader social factors that contribute to the health and well-being of individuals and populations in the United States. Examinations of contemporary approaches to health education and health behavior interventions including: Foundations of health education and health behavior programs, health indicators, social and structural determinants of health and health disparities, models of health education/health behavior that support interventions for individuals and communities.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the differences between health and wellness.

Audience: Undergraduate

2. Identify the most common health problems observed in the United States.

Audience: Undergraduate

3. Identify the impact of ethnicity and race, education, age, income and geography and disability on physical and mental health.

Audience: Undergraduate

4. Describe intra and interpersonal determinants of health behaviors.

Audience: Undergraduate

5. Describe the cultural, social, economic environmental and policy factors that influence health behaviors.

Audience: Undergraduate

6. Review health education strategies designed to influence individual and public health.

Audience: Undergraduate

7. Evaluate health information to determine accuracy and effectiveness.

Audience: Undergraduate

**KINES 197 – TECHNIQUES IN ATHLETIC TRAINING**

1 credit.

An applied clinical approach to basic skills commonly used in the field of athletic training. Designed for students interested in athletic training, and an appropriate elective for those who plan to teach or coach.

**Requisites:** Classified as Pre-Kinesiology or Pre-Physical Education

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Demonstrate ability to apply various common taping techniques used in the care of active individuals.

Audience: Undergraduate

2. Demonstrate ability to apply superficial modalities.

Audience: Undergraduate

3. Attend various competitions on campus for clinical observation of athletic training professionals in the work setting.

Audience: Undergraduate

4. Demonstrate application of commonly used orthopedic appliances.

Audience: Undergraduate

5. Demonstrate ability to apply commonly used orthopedic pre-cut pads.

Audience: Undergraduate

6. Demonstrate the ability to take a patient history and measure pulse rate and respiration rates and body temperature.

Audience: Undergraduate

7. Demonstrate ability to utilize universal precautions and provide wound care.

Audience: Undergraduate

**KINES 200 – INTRODUCTORY NEUROSCIENCE**

4 credits.

Entry-level course provides a systematic introduction to the mammalian nervous system, with emphasis on the structure and function of the human brain. Topics include the function of nerve cells, sensory systems, control of movement, learning and memory, and diseases of the nervous system.

The foundational knowledge covered in this course serves students interested in health sciences majors, as well as non-science students interested in neuroscience and its relation to human health, wellness, and disease.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2023

**Learning Outcomes:** 1. Describe the basic organization and function of the human nervous system.

Audience: Undergraduate

2. Summarize the neural circuits and mechanisms that govern how we sense, move, feel and think.

Audience: Undergraduate

3. Explain how sensory information is encoded in neural signals used in the generation of motor behavior.

Audience: Undergraduate

4. Explain the nature of information processing important for human motor behavior.

Audience: Undergraduate

5. Discuss how experience modifies brain circuitry.

Audience: Undergraduate

6. Apply the basic knowledge and neuroscientific concepts that are taught in the course to human health, wellness and disease.

Audience: Undergraduate

**KINES 214 – CULTURE AND ENVIRONMENT IN EXERCISE  
PHYSIOLOGY ABROAD**

3 credits.

Examines physiological responses and adaptations to exercise and physical activity, with particular focus on the role that both the physical environment (temperature, altitude, etc.) and the cultural environment (cultural history, norms, etc.) play in these exercise responses. Topics include acute responses to exercise in normal environments and then in extreme environmental conditions (heat and cold, high altitude, and space environments). Consider exercise adaptations in athletes. Examine health consequences of low-levels of physical activity and consider the socio-cultural barriers to health promotion activities among the indigenous Maori in New Zealand, and compare them to at risk populations in United States. Requires completion of ANAT&PHY 235 or 335 and a valid passport that does not expire at least 6 months past the travel dates.

**Requisites:** Consent of instructor**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe the physiological challenges and responses during exercise in the extremes of the physical environment (temperature and altitude extremes)

Audience: Undergraduate

2. Identify the role that "cultural environments" play in our view of the physiological effects of exercise and our view of exercise as a healthy activity

Audience: Undergraduate

3. Recognize benefits and barriers to exercise in New Zealand's native Maori population

Audience: Undergraduate

4. Identify the similarities and differences in extreme health that built environments produce and how culturally responsive physical activity can be used to promote health in indigenous populations

Audience: Undergraduate

**KINES 225 – INTRODUCTION TO PHYSICAL ACTIVITY  
PROGRAMMING FOR DIVERSE ABILITIES**

2 credits.

Focused and rooted on the application of biological, cultural, social, and research-based practices for professional development in promoting physical activity for everyone, especially those with a variety of disabling conditions. Work as individuals or teams to plan and implement specified physical activities for individuals with diverse abilities in a variety of settings, including the adapted fitness gym, recreational and competitive endeavors and the home-based exercise.

**Requisites:** None**Course Designation:** Workplace - Workplace Experience Course**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Develop knowledge of various inherited and acquired disabilities across diverse populations.

Audience: Undergraduate

2. Identify socioecological health disparities and the barriers and facilitators of physical activity for the health and well-being of individuals with disabilities and diverse abilities.

Audience: Undergraduate

3. Demonstrate understanding of the dynamics of creating behavioral change in challenging daily routines for persons with diverse needs by conducting motivational interviewing and other behavioral change techniques used in exercise counseling.

Audience: Undergraduate

4. Program and facilitate exercise and physical activities for persons with diverse abilities to improve their health and wellness, performance of activities of daily living, and participation in leisure, recreational and sports activities, as measured by assessments used in fitness and clinical settings.

Audience: Undergraduate

5. Develop practical skills and knowledge to modify and or adapt activities to minimize the effects of disabling conditions and maximize safety and healthy movement opportunities.

Audience: Undergraduate

6. Learn how to take basic vitals, conduct fitness assessments, measure physical activity and track progress for individuals with disabilities.

Audience: Undergraduate

7. Review evidence-based practices, community resources and current trends in health, fitness and exercise for a client-centered professional development project.

Audience: Undergraduate

8. Develop skills in inter-disciplinary collaboration and teamwork.

Audience: Undergraduate

## **KINES 227 – INTRODUCTION TO CLINICAL ANATOMY OF HUMAN MOVEMENT**

2 credits.

Designed to provide students with a foundational knowledge in musculoskeletal anatomy and anatomical considerations related to human movement and physical activity.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define basic knowledge of the musculoskeletal system (bones, muscles, connective tissue and various articulations).

Audience: Undergraduate

2. Interpret evolutionary influences on our musculoskeletal system.

Audience: Undergraduate

3. Illustrate the relationships between anatomical structure and function.

Audience: Undergraduate

4. Explain how anatomy serves as a cornerstone of knowledge for future study in Kinesiology.

Audience: Undergraduate

5. Identify the anatomical consequence of injury and inactivity.

Audience: Undergraduate

6. Summarize key historical events in the study of human anatomy.

Audience: Undergraduate

## **KINES 250 – SEDENTARY BEHAVIOR IN THE U.S. AND ABROAD**

3 credits.

Examines sedentary behavior, physical activity, physical inactivity, and associations with health outcomes in the United States and across the world. Topics include the determinants and consequences of sedentary behavior in children, adults, and special populations. Research examining psychological outcomes of sedentary behavior and barriers to adopting a physically active lifestyle is covered. Emphasis placed on Portuguese socio-cultural context, economic systems, and healthcare structures contributing to health outcomes. Compares the U.S. and European health models and physical activity guidelines. Design a sedentary behavior intervention informed by theories of behavior change.

**Requisites:** None

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Critically evaluate definitions of sedentary behavior (SB) and physical activity (PA) and how they are measured.

Audience: Undergraduate

2. Identify and define psychological variables that relate to participation (antecedents) in SB and PA and those that are impacted by these behaviors (consequences).

Audience: Undergraduate

3. Communicate National and International recommendations and guidelines for SB and PA.

Audience: Undergraduate

4. Formulate behavior change interventions for sedentary individuals with a consideration of the social determinants of health, cultural influences, and expected changes in health outcomes.

Audience: Undergraduate

5. Demonstrate awareness of variables influenced by sociocultural meanings and histories that are related to global perspectives of SB and PA.

Audience: Undergraduate

6. Synthesize connections between out of the classroom experiences and dialogue with perspectives reflecting cultural beliefs related to health behavior within Portugal.

Audience: Undergraduate

**KINES 260 – INCLUSIVE PHYSICAL ACTIVITY, SPORT & REHABILITATION IN IRELAND**

3 credits.

Focus on applying models, research, and best practices in motor control and motor learning to inclusive physical activity, sports, and rehabilitation for individuals with disabilities. Participate in training seminars and site visits led by content experts in physical activity, sport, and rehabilitation. Explore and participate in sports, recreation, and physical activities through the lens of a tourist/participant with disabilities. Must have sophomore standing and a valid passport.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Operationalize the concepts of culture, cultural humility, and cultural safety in relation to healthcare for individuals with diverse abilities in Ireland, as well as health education for their participation in adapted physical activity

Audience: Undergraduate

2. Identify and compare theoretical models of motor control and models of practice in occupational performance and physical therapy used by allied health professionals and health educators in Ireland and the U.S. to facilitate culturally competent care for individuals with diverse abilities

Audience: Undergraduate

3. Explore evidenced-based practices and interventions used by Irish healthcare providers and researchers to improve motor control and occupational performance in individuals with diverse abilities

Audience: Undergraduate

4. Examine the connection between improved motor control, occupational performance, and accessibility to inclusive and adapted physical activity settings for individuals with diverse abilities

Audience: Undergraduate

5. Describe issues of accessibility to healthcare services and access to physical activity and sports in Ireland as compared to similar services in the U.S.

Audience: Undergraduate

6. Appraise the ways that culture, advocacy, and public policy can be a driving force for occupational and physical activity participation, and how these issues affect climate and environmental justice for individuals with disabilities

Audience: Undergraduate

**KINES 280 – HEALTH COACHING PRINCIPLES AND METHODS**

3 credits.

Provides knowledge/skills needed to assess a client's wellness-related priorities and support them through development of wellness goals and the process of behavior change. Discussion of behavior change models and theories will provide a foundational understanding of health coaching. Covers principles and practice of motivational interviewing. Provides didactic and experiential training in mindfulness. Defines health coaching as a profession through discussion of scope of practice, the business of health coaching, professional conduct, and ethical considerations. Introduces lifestyle medicine through discussion of stress management, nutrition, physical activity, and other lifestyle factors, in addition to chronic disease and comorbid conditions. Uses elements of the American Council on Exercise (ACE) Health Coach University Curriculum.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Demonstrate understanding of ACE Health Coach certification exam requirements and eligibility.

Audience: Undergraduate

2. Describe and apply behavior change models and theories used in the practice of health coaching.

Audience: Undergraduate

3. Apply the core features of motivational interviewing in health coaching practice.

Audience: Undergraduate

4. Describe the health coach's role and scope of practice, the business of health coaching, and ethical commitments and considerations in health coaching.

Audience: Undergraduate

5. Understand and apply mindfulness in the context of health coaching

Audience: Undergraduate

6. Summarize fundamental concepts of lifestyle medicine and chronic disease.

Audience: Undergraduate

7. Apply the principles and methods of health coaching through coaching practice.

Audience: Undergraduate

**KINES 300 – PRACTICUM IN KINESIOLOGY**

1-3 credits.

Supervised experience in a specialized area of physical education.

**Requisites:** Declared in Kinesiology and KINES 314 or 427

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the scientific concepts that are related to the specific practicum focus.

Audience: Undergraduate

2. Demonstrate the ability to apply scientific knowledge to the field setting. Depending upon the setting, this would include demonstrating ways to modify activities and treatments, conducting assessment procedures and screening processes, understanding and implementing research procedures, and designing exercise prescriptions for clients.

Audience: Undergraduate

3. Develop effective personal communication skills with clients and staff.

Audience: Undergraduate

4. Demonstrate professional characteristics, including punctuality, confidentiality, flexibility, cooperation, enthusiasm, and responsibility.

Audience: Undergraduate

5. Reflect on learning experiences of the practicum, through journal submissions and a summary report.

Audience: Undergraduate

**KINES 301 – ADVANCED TECHNIQUES IN ATHLETIC TRAINING**

2 credits.

Provides future athletic training professionals a foundation in advanced athletic training techniques. Sample topics include: injury prevention, emergency care, orthopedic appliance applications, protective equipment, environmental considerations, and computer applications.

**Requisites:** Declared in Athletic Training

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Demonstrate knowledge of emergency care related to sudden cardiac death, head trauma/spinal injuries, exertional heat illness and environmental conditions.

Audience: Undergraduate

2. Document and present emergency action plans for specific assigned venues related to athletic events.

Audience: Undergraduate

3. Create and implement custom padding as well as demonstrate appropriate splinting techniques of various injuries.

Audience: Undergraduate

4. Understand proper athletic equipment fitting and rules related to athletic equipment prior to activity as well as removal of equipment in emergency situations.

Audience: Undergraduate

**KINES 308 – BIOMECHANICS OF PHYSICAL ACTIVITY**

2 credits.

Provides a comprehensive study of biomechanical foundations and principles underlying physical activity. Topics include musculoskeletal determinants of human movement, analysis of sports skills, feedback, and cueing techniques. Includes descriptions and applications of biomechanical concepts related to skillful movement, physical activity, and fitness.

**Requisites:** MATH 112 and Classified as pre-Physical Education or declared in Physical Education

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate and apply fundamental principles from physics and mechanics to human movement.

Audience: Undergraduate

2. Describe and apply biomechanical concepts related to skillful movement, physical activity, and fitness.

Audience: Undergraduate

3. Gain the skills necessary to assess both proper and improper movement strategies and provide teaching cues based on biomechanical principles to facilitate movement mastery.

Audience: Undergraduate

## **KINES 312 – TECHNOLOGY FOR PHYSICAL ACTIVITY AND HEALTH PROFESSIONALS**

2 credits.

Designed to provide students with creative technology strategies in the fields of school wellness education, physical activity, and fitness management. Students will build skills for using widely available technology resources to enhance instruction, assessment, motivation, communication, and advocacy in health and fitness settings. Skill-specific units present experiential assignments that increase learner confidence. Each unit produces print or digital materials for practical professional use with an emphasis on innovation.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of computer basics and terminology.

Audience: Undergraduate

2. Demonstrate knowledge of ethical uses of technology.

Audience: Undergraduate

3. Recognize the importance of, and plan for, professional development.

Audience: Undergraduate

4. Apply the need for technological skills in health and physical activity.

Audience: Undergraduate

5. Apply technological skills to improve performance and learning.

Audience: Undergraduate

6. Acquire knowledge of current technological innovations and tools specific to health and physical activity to enhance wellness.

Audience: Undergraduate

7. Evaluate system specifications relative to value.

Audience: Undergraduate

8. Demonstrate ability to locate and critique information.

Audience: Undergraduate

9. Demonstrate proficiency with software and hardware.

Audience: Undergraduate

10. Demonstrate proficiency in acquiring and working with digital images and video.

Audience: Undergraduate

## **KINES 314 – PHYSIOLOGY OF EXERCISE**

4 credits.

Fundamental knowledge about, and appreciation for, the adaptability of human physiological systems in meeting a range of exercise demands.

**Requisites:** PHYSIOL 335, ANAT&PHY 335, or KINES 235

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the primary muscular, metabolic, cardiovascular, and respiratory adaptations to exercise training.

Audience: Undergraduate

2. Explain the biochemical changes that are caused by muscle contraction and how these change with the repeated muscle contractions.

Audience: Undergraduate

3. Explain the cardiorespiratory response when moving from rest to exercise to maximal exercise.

Audience: Undergraduate

4. Compare different modes of exercise and explain the metabolic and cardiovascular adjustments as well as adaptations in exercise-trained adults.

Audience: Undergraduate

5. Discuss how environmental conditions influence the cardiovascular and metabolic response to exercise.

Audience: Undergraduate

6. Design and conduct an experiment in exercise physiology, analyze the data collected, and discuss the strengths and limitations of the experimental approach.

Audience: Undergraduate

### KINES 315 – ASSESSMENT AND RESEARCH IN PHYSICAL ACTIVITY PEDAGOGY

3 credits.

Topics and laboratory experiences will focus on parameters that are measured in physical activity pedagogy; instruments for measuring physical activity, health related fitness, knowledge, and psychological characteristics; concepts of assessment and research, basic statistical methods; and action research.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and declared in Physical Education

**Course Designation:** Gen Ed – Quantitative Reasoning Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize the concept of assessment and identify the criteria for a good assessment instrument.

Audience: Undergraduate

2. Recall the concept of research, various research designs, and the importance of research in physical education.

Audience: Undergraduate

3. Develop skills in quantitative reasoning, including: manipulate quantitative information to create models, and devise solutions to problems using multi-step arguments using quantitative information, evaluate models and arguments using quantitative information, and express and interpret in context models, solutions and arguments using verbal, numerical, and computational techniques.

Audience: Undergraduate

4. Apply the sustainability principles and/or frameworks to addressing the challenge of producing assessment instruments in the psychomotor, cognitive, and affective domains, focusing on the five national standards.

Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of conducting a research project, including writing methods, analyzing data, discussing results, drawing conclusions, and presenting findings, and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

### KINES 316 – ADAPTED PHYSICAL ACTIVITY

3 credits.

An understanding of foundations, assessment and pedagogy for individuals with disabilities in a variety of physical activity settings. Emphasis on individual differences, life-span, and self-actualization.

**Requisites:** KINES 328, 337, or ANAT&PHY 337

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain educational and civil rights of individuals with disabilities and to help promote a community of learners. To explain the rights and responsibilities of individuals, parents, teachers and other professional staff regarding advocacy and collaboration for individuals with disabilities.

Audience: Undergraduate

2. Demonstrate knowledge about the safety and planning aspects (self-reflection, including developmentally appropriate formal and informal assessment, collaboration of services, strategies and resources, IEP writing, goal and objective formulation, and activity selection) of physical education programming for individuals with disabilities.

Audience: Undergraduate

3. Demonstrate knowledge of the influence of selected diseases, conditions, and disabilities on the learning and performance of physical activities.

Audience: Undergraduate

4. Demonstrate knowledge of a range of individual characteristics regarding communication, language acquisition, critical elements for motor skills, literacy development, and alternative means of communication, as well as collaborate with appropriate resources/services to facilitate communication.

Audience: Undergraduate

5. Demonstrate use of technology, including assistive technology, through the collection of resources that enhance language, literacy, communication, understanding, and learning when working with individuals with disabilities.

Audience: Undergraduate

6. Demonstrate knowledge in lesson planning and instruction to meet the multiple needs and learning styles of individuals with disabilities. This will include adapting activity/equipment, using instructional tasks, cues, and prompts, implementing managerial and instructional routines; identifying signs of learner distress and designing strategies for safe reflective teaching of physical education.

Audience: Undergraduate

7. Apply knowledge of research- or evidence-based strategies, including utilizing universal design principles, for teaching and working effectively and inclusively with all students.

Audience: Undergraduate

8. Apply knowledge of research- or evidence-based strategies for teaching and working effectively and inclusively with students from various social and economic circumstances and students with diverse family and living arrangements (e.g., students who are homeless; students who are in foster care; students with interrupted, limited, or no formal education).

Audience: Undergraduate

9. Identify teacher responsibilities and requirements in working with students with disabilities and other special learning needs, including providing increasingly intensive supports and interventions through response to intervention (RTI) and positive behavioral interventions and supports (PBIS) to support struggling learners and ensure appropriate

### KINES 318 – BIOMECHANICS OF HUMAN MOVEMENT

3 credits.

Analysis of human action through the application of mechanical principles.

**Requisites:** (KINES 328, 329, KINES 337, 338, ANAT&PHY 337, or 338) and (MATH 112 or placement in MATH 113)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify, quantify, and describe mechanical aspects of human activities.

Audience: Undergraduate

2. Determine forces within and external to the human body that are necessary to achieve desired behaviors.

Audience: Undergraduate

3. Determine movements that result from muscle activity and external forces.

Audience: Undergraduate

4. Demonstrate use of instruments to measure forces, muscle activity, and motion.

Audience: Undergraduate

5. Interpret quantitative measurements of force, muscle activity, and motion.

Audience: Undergraduate

6. Evaluate the validity of biomechanical claims related to exercise techniques, exercise devices, and assistive devices.

Audience: Undergraduate

7. Become independent in self-guided continuation of learning and application of biomechanical principles beyond this course.

Audience: Undergraduate

8. Demonstrate awareness of individual behaviors as they impact group dynamics.

Audience: Undergraduate

9. Develop metacognitive skills for problem solving in biomechanics.

Audience: Undergraduate

### KINES 325 – GROUP DEVELOPMENT AND BEHAVIOR MANAGEMENT

3 credits.

Provide students with opportunities and experiences to learn and participate in the development of groups. Provide students with strategies and experiences in the management of behaviors and techniques to maintain a safe and productive teaching environment.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply knowledge related to movement and physical activity techniques and approaches in clinical and applied settings to enhance human health and quality of life.

Audience: Undergraduate

2. Develop appropriate styles of written and oral communication to use both within and outside the scientific community.

Audience: Undergraduate

3. Identify, develop and deliver messages using a variety of communication strategies, methods, and techniques.

Audience: Undergraduate

4. Discuss biases/prejudices and barriers to diversity.

Audience: Undergraduate

5. Understand the perspective of a person from a different cultural background.

Audience: Undergraduate

6. Demonstrate practical skills of working toward becoming a culturally responsive facilitator.

Audience: Undergraduate

7. Address health characteristics of individuals from a different cultural background.

Audience: Undergraduate

8. Analyze relationships among behavioral, environmental, and other factors that influence health and identify and analyze factors that influence health behaviors.

Audience: Undergraduate

9. Assess social, environmental, political, and other factors that may impact health education/promotion.

Audience: Undergraduate

10. Analyze an organization's culture to determine the extent to which it supports health education/promotion and apply principles of cultural competence in selecting and/or designing strategies/interventions.

Audience: Undergraduate

11. Demonstrate leadership, employ conflict resolution techniques, and develop skills in facilitating team development.

Audience: Undergraduate

**KINES 327 – CURRENT TOPICS IN OUTDOOR PURSUITS**

1 credit.

Introduce students to several outdoor activities to enable the teaching of these topics.

**Requisites:** KINES 370

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**KINES 330 – RESEARCH IN KINESIOLOGY**

2 credits.

The research process as applied in kinesiology, including hypothesis development, ethical issues, study design, measurement and statistical concepts, and presentation of results. Includes exposure to current research within the Department of Kinesiology.

**Requisites:** MATH 112 or placement in MATH 113 and (STAT 371, 301, or PSYCH 210)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of the research process and different research methods

Audience: Undergraduate

2. Utilize common research tools and resources

Audience: Undergraduate

3. Retrieve, read, and evaluate primary and secondary sources of information

Audience: Undergraduate

4. Communicate key elements of study design and analysis

Audience: Undergraduate

**KINES 350 – INTRODUCTION TO EXERCISE PSYCHOLOGY**

3 credits.

Emphasis on the psychological foundations of exercise with motivational techniques, perception of effort, personality dynamics, and mental health serving as the focal points.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Discuss historical and current physical activity issues based on various perspectives with a specific emphasis on the psychological and psychobiological perspectives.

Audience: Undergraduate

2. Recall information concerning the historical roots of Sport and Exercise Psychology.

Audience: Undergraduate

3. Explain the relationship between bioscience and psychological concepts as they relate to physical activity and sport.

Audience: Undergraduate

4. Apply basic tools to critically evaluate evidence in general and specific to exercise and sport psychology topics.

Audience: Undergraduate

5. Describe the differences and similarities of Sport and Exercise Psychology.

Audience: Undergraduate

6. Design exercise psychology experiments using the Gold Standard.

Audience: Undergraduate

7. Apply knowledge in an integrated fashion.

Audience: Undergraduate

**KINES 353 – HEALTH AND PHYSICAL EDUCATION IN A MULTICULTURAL SOCIETY**

3 credits.

Explores aspects and perspectives of diversity and culture, the concepts and importance of culturally responsive teaching, health education, and the Act 31 requirement for teacher education students. Perform a cultural self-mapping to become knowledgeable of how cultural background influences personal attitudes and actions, and attend a cross-cultural event to experience life in "another person's shoes." Engage in a multicultural field experience.

**Requisites:** Declared in Physical Education or Health Promotion and Health Equity, junior standing, and Satisfied Communications A requirement

**Course Designation:** Gen Ed – Communication Part B  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define multicultural education, interpret biases/prejudices of teachers, and explain the importance of multicultural assessment.

Audience: Undergraduate

2. Integrate Act 31 content into their teaching.

Audience: Undergraduate

3. Develop advanced communication skills in: critical reading, logical thinking and the use of evidence; the use of appropriate style and disciplinary convention in writing and speaking; the productive use of core library resources specific to the discipline.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of culturally responsive teaching.

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of the impact of one's attitudes and actions, from a cultural perspective, on other individuals.

Audience: Undergraduate

**KINES 355 – SOCIO-CULTURAL ASPECTS OF PHYSICAL ACTIVITY**

3 credits.

An introduction to the philosophy of physical activity/education, history of physical activity/education and sport, and sociology of sport.

**Requisites:** Declared in Kinesiology or Physical Education and Satisfied Communication A requirement

**Course Designation:** Gen Ed – Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize the various philosophies of physical activity/education.

Audience: Undergraduate

2. Differentiate the role of physical activity/education and sport throughout history from ancient times to today.

Audience: Undergraduate

3. Analyze how physical activity is a reflection of society and the culture in which it exists.

Audience: Undergraduate

4. Develop advanced communication skills in critical reading, logical thinking, and the use of evidence; the use of appropriate style and disciplinary conventions in writing and speaking; the productive use of core library resources specific to the discipline.

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge regarding a current issue in physical activity.

Audience: Undergraduate

6. Describe the social, economic, and environmental dimensions of increasing physical activity for children and adolescents and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

**KINES 360 – LIFESPAN MOTOR DEVELOPMENT**

3 credits.

Designed to introduce the student to major concepts and terminology in the field of human motor development. The content includes a description of how movement changes across the lifespan and the factors that influence and/or correlate with the changes. The Mountain of Motor Development model will help organize understanding of human motor development.

**Requisites:** Declared in Kinesiology, Athletic Training or Promoting Activity for Diverse Abilities certificate

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Know and apply terminology and concepts from the field of human motor development through assignments, exams and observations.

Audience: Undergraduate

2. Know and identify how human lifespan motor development changes within each of the four domains of; cognitive, social, physical and motor through assignments, exams, movement experiences and observations.

Audience: Undergraduate

3. Understand and analyze the impact of various factors on human motor development across the lifespan through assignments and exams.

Audience: Undergraduate

4. Appreciate human motor development terminology, concepts and content through application to movement experiences, observations and future life and career settings.

Audience: Undergraduate

5. Synthesize current motor development research and its influence on health and well-being through assignments, exams and final research paper.

Audience: Undergraduate

**KINES 361 – MOTOR LEARNING AND PERFORMANCE**

3 credits.

A basic and up-to-date view of the major processes and mechanisms underlying the performance and learning of motor skills. Principles in motor learning and control are systematically introduced to produce a meaningful conceptual framework.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate the scientific methods used for studying motor performance and learning.

Audience: Undergraduate

2. Describe how the sensory information is used in movement production.

Audience: Undergraduate

3. Describe how cognitive factors such as attention and memory affect skill acquisition and performance.

Audience: Undergraduate

4. Articulate current theories of motor skill performance and acquisition.

Audience: Undergraduate

5. Explain how practice can be structured to optimize motor skill acquisition.

Audience: Undergraduate

6. Demonstrate mastery of the above knowledge in a laboratory setting.

Audience: Undergraduate

### **KINES 362 – ADAPTED PHYSICAL EDUCATION COMMUNITY ENGAGEMENT**

1 credit.

A community-based experience in the Adapted Physical Education. Assist, lead, and teach participants in a physical activity program, community recreation activity, or other events that are specific to individuals with disability. Emphasis placed on the adaptation of physical education and physical activities to the needs of individuals with physical, intellectual, emotional, or sensory disabilities.

**Requisites:** KINES 316

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify Universal Design for Learning through reading, discussion, and reflection as a learning framework at the outset of the course to better support and coach those with diverse abilities.

Audience: Undergraduate

2. Identify activities and plans that will support the activity leader in providing quality physical activities for individuals with diverse abilities

Audience: Undergraduate

3. Implement Universal Design for Learning principles when getting opportunities to work with community-based participants in a in community-based physical activity and/or sport activity setting.

Audience: Undergraduate

4. Engage in a variety of activities with individuals with disabilities in a community-based physical activity and/or sport activity setting.

Audience: Undergraduate

5. Identify ways collaborations occurred with Adapted Physical Education teachers, other professionals and parents throughout the community-based experience.

Audience: Undergraduate

6. Explain and describe weekly experiences, activities, and events in the community-based experience to provide knowledge in teaching, instructing, and coaching individuals with disability.

Audience: Undergraduate

7. Develop a reflective summary of the community-based experience and apply these toward application in the role as a future Adapted Physical Education teacher.

Audience: Undergraduate

### **KINES 363 – MANAGEMENT STRATEGIES IN ADAPTED PHYSICAL EDUCATION**

2 credits.

Provides comprehensive understanding of behavior management strategies for working with diverse populations in schools, including individuals with disabilities. Explore various topics such as preventative strategies, applied behavior analysis principles, behavior management strategies, developing positive behavioral interventions and support (PBIS), and specific approaches for different conditions, including emotional behavioral disabilities, ADHD, autism, and students in crisis. Learn how to assess behaviors and develop effective behavior intervention plans. Incorporates real-life case studies and presentations to enhance practical application.

**Requisites:** KINES 316

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and describe the different types of behavioral approaches when working with children in schools.

Audience: Undergraduate

2. Select and implement the least intensive behavioral intervention consistent with the needs of individuals with exceptionalities in a final case study or using field practicum examples.

Audience: Undergraduate

3. Identify and describe how to assess and create a positive learning environment in schools.

Audience: Undergraduate

4. Plan and create a Behavioral Management Plan during class learning assignments

Audience: Undergraduate

5. Describe how to organize an effective classroom management system for all students, particularly those with exceptional learning needs (e.g., schedules, procedures, routines, signals, physical set-up of room, rules and consequences, monitoring, transitions, etc.).

Audience: Undergraduate

6. Know and describe the types of reinforcement used in behavior management.

Audience: Undergraduate

7. Identify and describe two systems of Behavioral Intervention – Positive Behavioral Support (PBS) and the Response to Intervention: Behavior (RTI:B), which are based on student needs.

Audience: Undergraduate

8. Design a positive behavior intervention plan (BIP) that supports a system for classroom and non-classroom environments that includes a data collection system for evaluating individual student behavior.

Audience: Undergraduate

### **KINES 364 – ASSESSMENT AND PROGRAMMING IN ADAPTED PHYSICAL EDUCATION**

3 credits.

Learn and practice assessment strategies in Adapted Physical Education. Experiences in the gymnasium and pool.

**Requisites:** KINES 315 and 362

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify a developmental approach to teaching individuals with disabilities

Audience: Undergraduate

2. Identify activities and skills used to include individuals with disabilities in physical education based on evaluation and assessment of their needs

Audience: Undergraduate

3. Implement appropriate assessment tools for individuals with disabilities in a classroom and gym activity session

Audience: Undergraduate

4. Analyze appropriate adapted physical education assessments at the end of the course based on knowledge of an individual with a specific disability

Audience: Undergraduate

5. Identify ways the physical education teacher is a part of the collaborative partnership team when considering a student with an IEP by the end of the course

Audience: Undergraduate

6. Synthesize and design the process for providing an appropriate assessment for a student with a disability (case study) by using the most appropriate assessment tool learned in the course while including concepts, terms, and philosophies needed based on the person's condition

Audience: Undergraduate

7. Engage in conference planning/presentations, attending conferences/seminars, or school professional development sessions to gain more experience in programming and instruction for students with a disability

Audience: Undergraduate

### **KINES 365 – PRACTICUM: ADAPTED PHYSICAL EDUCATION**

2 credits.

A practicum experience for individuals who are emphasizing the area of Physical Education/Special Populations. Six hours per week working with individuals who have disabling conditions.

**Requisites:** None

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and explain Adapted Physical Education and concepts relative to teaching, planning, or assessing children with disabilities in writing.

Audience: Undergraduate

2. Participate in active engagement in daily lesson plans by the cooperating teacher and developing lesson plans for teaching at least one lesson.

Audience: Undergraduate

3. Analyze the process of learning practical teaching skills in school-based settings by recognizing instructional strategies, behavior management, and applications the cooperating teacher uses in the classroom with all students but especially those with disabilities.

Audience: Undergraduate

4. Observe in school-based interactions and practical teaching experiences with children with disabilities in Adapted Physical Education/Physical Education classes.

Audience: Undergraduate

5. Reflect on teaching practice through observation of teaching lessons in schools with children.

Audience: Undergraduate

6. Utilize assessment tools to determine skills tasks that student needs modifications/adaptations for students to be successful within an adapted physical education.

Audience: Undergraduate

7. Discuss and develop present levels of performance for developing the final IEP Case Study with the Cooperating Teacher during the lessons throughout the semester.

Audience: Undergraduate

8. Synthesize and design the process for providing an IEP based on assessment data, teacher input, and observations of student in schools that is comprehensive and provides for specific details for future goals and objectives for a particular student

Audience: Undergraduate

**KINES 370 – PLANNING, FACILITATING & ASSESSMENT IN MOVEMENT AND HEALTH PROFESSIONALS**

3 credits.

Builds a repertoire of instructional skills and strategies such as organizing, planning, implementing and assessing developmentally appropriate learning tasks that are aligned with local, state, and national standards to address the diverse needs of participants.

**Requisites:** Declared in Physical Education or Health Promotion and Health Equity

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Design and implement short- and long-term plans that meet program and educational goals, as well as a variety of participants needs.

Audience: Undergraduate

2. Develop a program plan that leads to appropriate and valuable content in movement and health.

Audience: Undergraduate

3. Select and implement instructional strategies based on developmental levels, learning styles, special and diverse learning needs, and safety issues.

Audience: Undergraduate

4. Identify and use appropriate services and resources to meet special and diverse learning needs.

Audience: Undergraduate

5. Use effective demonstrations and explanations to link movement and health concepts to appropriate learning experiences.

Audience: Undergraduate

6. Develop and practice a wide variety of facilitation skills to lead and guide others to increased health and physical activity.

Audience: Undergraduate

7. Select and utilize varied roles in the instructional process based on the content, purpose of instruction, and the needs of participants (model, assessor, monitor and facilitator).

Audience: Undergraduate

8. Use standards to guide instruction and develop assessment plans.

Audience: Undergraduate

9. Evaluate the benefits and disadvantages of a wide variety of assessment tools.

Audience: Undergraduate

10. Demonstrate the ability to connect planning, facilitation, and assessment skills.

Audience: Undergraduate

**KINES 371 – METHODS AND PRACTICUM OF TEACHING PK-12 DANCE AND GYMNASTICS**

3 credits.

Methods of instruction in movement concepts, educational dance and gymnastics. Students will gain practice in planning, teaching, and assessing participants. Students will also observe, practice, and assess the facilitation skills of health and physical activity professionals. In addition, students will apply the concepts presented in KINES 370.

**Requisites:** Declared in Physical Education and KINES 370 or concurrent enrollment

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Demonstrate knowledge of movement concepts and locomotor, manipulative, games, dance, and gymnastics skills.

Audience: Undergraduate

2. Identify the developmental progression of movement concepts and skills.

Audience: Undergraduate

3. Identify, select and/or create learning tasks that are appropriate, inclusive, and engaging.

Audience: Undergraduate

4. Demonstrate an understanding and appropriate use of curriculum models in planning, teaching, and assessing.

Audience: Undergraduate

5. Demonstrate an ability to use appropriate management responses to student behaviors.

Audience: Undergraduate

6. Demonstrate an understanding of quality teaching skills by reviewing videotape and critically analyzing performance.

Audience: Undergraduate

### **KINES 372 – METHODS AND PRACTICUM OF TEACHING PK-5 PHYSICAL EDUCATION**

4 credits.

Address methods of instruction in movement concepts, locomotor and nonlocomotor skills, games, and educational dance and gymnastics. Explores curriculum models such as Developmental Movement, Skills-Theme, and Teaching Personal and Social Responsibility (TPSR). Gain practice in planning, teaching, and assessing teaching skills. Develop teaching competencies (planning, teaching, and assessing) through teaching in a variety of settings. Apply concepts and skills addressed in previous classes.

**Requisites:** Declared in Physical Education

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of movement concepts and locomotor, manipulative, games, dance and gymnastics skills.

Audience: Undergraduate

2. Identify the developmental progression of movement concepts and skills.

Audience: Undergraduate

3. Identify, select and/or create learning tasks that are appropriate, inclusive, and engaging.

Audience: Undergraduate

4. Demonstrate an understanding of quality teaching skills by reviewing videotape and critically analyzing performance.

Audience: Undergraduate

5. Demonstrate an understanding and appropriate use of curriculum models including, skill theme, developmental movement, and TPSR in planning, teaching, and assessing.

Audience: Undergraduate

6. Demonstrate an ability to use appropriate management responses to student behaviors.

Audience: Undergraduate

### **KINES 373 – METHODS AND PRACTICUM OF TEACHING 6-12 PHYSICAL EDUCATION**

4 credits.

Practice in planning and teaching sport concepts and skills. Builds on the planning for learning and instruction foundation. Centered on the Tactical Games, Sport Education, Fitness Education, and Personalized Instruction models and focuses on students developing teaching competencies rather than learning specialized sports skills. Adapt instruction within tactically similar sports.

**Requisites:** KINES 372

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Master sport content, tactical concepts, and sport skills.

Audience: Undergraduate

2. Identify the development skill acquisition process for motor skills.

Audience: Undergraduate

3. Analyze skills by critical phases for use in teaching.

Audience: Undergraduate

4. Effectively organize content for presentation to students.

Audience: Undergraduate

5. Identify, select, and/or create learning activities that are appropriate, inclusive, and engaging.

Audience: Undergraduate

6. Demonstrate their understanding of quality teaching skills by reviewing videotape and analyzing teacher performance.

Audience: Undergraduate

7. Demonstrate an understanding of professional policies and practices related to negligence and liability.

Audience: Undergraduate

**KINES 375 – PRACTICUM IN PHYSICAL EDUCATION**

3 credits.

Provides opportunities for the physical education student to develop competencies in the teaching skills necessary to provide quality Physical Education to children and youth. Students will receive individualized feedback about their performance from the cooperating teacher and the university supervisor. Provide a forum for students to learn from their peers through discussions, sharing their experiences and knowledge gained from their practicum placement.

**Requisites:** KINES 371, 372, and 373

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Understand and demonstrate the pedagogical aspects of teaching physical education to include learning environment, instructional delivery, factors influencing student learning, teacher effectiveness, teaching strategies, content development, teacher and student assessment

Audience: Undergraduate

2. Value student learning as a primary purpose of teaching

Audience: Undergraduate

3. Demonstrate knowledge on teaching as a professional endeavor (reflective teaching, professional development, continuous learning, characteristics of an effective teacher, advocacy)

Audience: Undergraduate

4. Utilize technology to analyze behavior and content development

Audience: Undergraduate

**KINES 387 – THE YOUNG ATHLETE: CONSIDERATIONS FOR EXERCISE, MEDICINE, AND ACTIVITY**

2 credits.

Sports are a great way for children to stay physically active, but adults are changing sports in ways that impact children in negative ways. Focuses on how kids are different than adults in terms of their needs for exercise and physical activity. Topics include physical activity epidemiology, growth, maturation, and sport specialization. Additional focus on common orthopedic injuries in the adolescent and pediatric populations and how injuries in young athletes are treated.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe how sport and physical activity are related. As well as the pros and cons to sport participation.

Audience: Undergraduate

2. Identify common sport-related injuries in children and common treatments for those injuries.

Audience: Undergraduate

3. Identify sport participation recommendations and apply these recommendations to determine appropriate sport participation levels in children.

Audience: Undergraduate

4. Understand the complex interaction between growth, maturation, and sport participation and how this impacts talent development in young athletes.

Audience: Undergraduate

5. Identify key members of the pediatric care team as it relates to athletic healthcare.

Audience: Undergraduate

**KINES 390 – PRINCIPLES OF EXERCISE LEADERSHIP**

2 credits.

Introduction to the design of individual and group exercise programs utilized in fitness leadership roles. Supervised practical experience will be provided in class to assist the development of student leadership skills.

**Requisites:** Declared in Kinesiology

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Know the principles of health and skill related fitness.

Audience: Undergraduate

2. Understand obesity issues and how to adapt exercises for those individuals.

Audience: Undergraduate

3. Manage group fitness activities with individuals who are senior citizens or have special health issues.

Audience: Undergraduate

4. Demonstrate knowledge about the different types of fitness programs that are being offered.

Audience: Undergraduate

5. Set up and teach lessons in group fitness that is appropriate for the age group.

Audience: Undergraduate

6. Demonstrate knowledge on adapting different activities that encompass cardiovascular endurance, muscular strength/endurance, neuromotor, step, yoga and other fitness activities available to the general public.

Audience: Undergraduate

7. Know how to use the various fitness equipment available in a fitness setting.

Audience: Undergraduate

**KINES 399 – INDEPENDENT STUDY**

1-3 credits.

Independent undergraduate study in beginning to intermediate area of study under direct guidance of kinesiology faculty.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**KINES 412 – ORGANIZATION AND ADMINISTRATION OF PHYSICAL EDUCATION**

2 credits.

The presentation of materials and depth study of the organization and administration of a sound program of physical education, the knowledge of which is mandatory for all physical education teachers.

**Requisites:** Declared in Kinesiology or Physical Education

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Learn about different organizational methods as they apply to physical education.

Audience: Undergraduate

2. Demonstrate a knowledge of how to promote physical education.

Audience: Undergraduate

3. Understand safety/liability as it relates to physical education.

Audience: Undergraduate

4. Demonstrate knowledge about financial and purchasing management through a budget process.

Audience: Undergraduate

5. Demonstrate knowledge about the newest materials to use in the design of a new physical education facility/fieldhouse.

Audience: Undergraduate

6. Demonstrate an understanding of Title IX and how it relates to physical education and sport.

Audience: Undergraduate

7. Demonstrate a knowledge of the latest technology used in physical education.

Audience: Undergraduate

**KINES 417 – ADVANCED CLINICAL ASSESSMENT TECHNIQUES IN ATHLETIC TRAINING**

2 credits.

Provides students with knowledge and skills in advanced clinical assessment techniques used in the evaluation of injuries, illnesses, and conditions found in physically active populations.

**Requisites:** KINES 317

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### **KINES 427 – FITNESS TESTING AND EXERCISE PRESCRIPTION**

3 credits.

Fitness assessment and exercise prescription principles are applied to the health-related fitness components through discussion and lab activities.

**Requisites:** ANAT&PHY 335

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the components of a needs analysis and their application to appropriate exercise testing and prescription

Audience: Undergraduate

2. Demonstrate knowledge of performing a fitness testing battery

Audience: Undergraduate

3. Administer, calculate, and interpret scores from various fitness assessments

Audience: Undergraduate

4. Develop exercise programs based upon scores of fitness evaluations

Audience: Undergraduate

### **KINES 450 – CLINICAL FIELD EXPERIENCE IN ATHLETIC TRAINING**

3 credits.

A clinical field placement for students in the athletic training professional preparation program. Clinical placements under the direction of an AT Program Clinical Preceptor are offered in a variety of clinical settings including intercollegiate, secondary school, and private clinical settings.

**Requisites:** Declared in Athletic Training

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

### **KINES/CURRIC 478 – ELEMENTARY SCHOOL PHYSICAL EDUCATION STUDENT TEACHING**

2-8 credits.

Student teaching placement in elementary school setting.

**Requisites:** None

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **KINES 479 – MIDDLE SCHOOL OR HIGH SCHOOL PHYSICAL EDUCATION STUDENT TEACHING**

2-8 credits.

Student teaching placement in secondary school setting.

**Requisites:** None

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **KINES 487 – ATHLETIC HEALTHCARE: CONTEMPORARY PERSPECTIVES**

3 credits.

Discussion of contemporary issues in Athletic Healthcare including acute and chronic medical issues that may affect athletic performance.

**Requisites:** KINES 127

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the pre-participation evaluation process as well as factors that contribute to sudden unexpected cardiac death.

Audience: Undergraduate

2. Recognize illicit drug use among athletic populations, cite drug testing procedures, and identify educational resources related for drug intervention.

Audience: Undergraduate

3. Apply basic physical exam skills.

Audience: Undergraduate

4. Understand common medical issues in athletic populations including concussions, respiratory illness and infectious disease, respiratory illnesses and exercise induced asthma.

Audience: Undergraduate

5. Describe and understand general medications commonly found in athletic environments.

Audience: Undergraduate

### **KINES 501 – THEORY-BASED HEALTH EDUCATION AND HEALTH PROMOTION PROGRAMS**

3 credits.

Provides an overview of the behavioral, social and cultural factors related to individual and population health and health disparities. Social and behavioral science theories and strategies in health promotion/education will be discussed in relation to preventing disease and promoting health. Provides current knowledge and analysis of issues influencing people's health and well-being from a social and behavioral science perspective. Theoretical frameworks that draw on major health behavior theories provide a better understanding of how individuals, families, peers, schools, neighborhoods, and the larger community influence risk and protective factors. Ethical considerations intrinsic to social and behavioral science efforts designed to produce health-related behavior change will be discussed. Promotes intellectual and collaborative learning through course lectures, readings, class discussions, and individual and group work.

**Requisites:** Junior standing and declared in Kinesiology, Health Promotion Health Equity, or Physical Education program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply theories and models within the field of Health Education/Promotion.

Audience: Undergraduate

2. Explain the role of social and behavioral sciences in public health.

Audience: Undergraduate

3. Describe the role of ethical issues in social and behavioral sciences research and practice.

Audience: Undergraduate

4. Evaluate the literature concerning individual and social influences on health behavior.

Audience: Undergraduate

5. Apply the steps to conducting a community needs and asset assessments.

Audience: Undergraduate

6. Research and develop informational materials within the field of Health Education/Promotion.

Audience: Undergraduate

7. Apply the steps and procedures for the planning, implementation, and evaluation of public health interventions, programs, and policies from a social and behavioral sciences perspective.

Audience: Undergraduate

### **KINES 508 – WORKSHOP IN KINESIOLOGY**

1-3 credits.

Designed to explore topics in kinesiology and/or occupational therapy. Topics may change each semester.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **KINES 516 – PHYSICAL ACTIVITY FOR DIVERSE ABILITIES**

3 credits.

Develop knowledge of diverse populations and the ability to promote physical activity and well-being for a lifetime. Apply knowledge of barriers and the use of inclusive techniques to develop meaningful experiences and programs.

**Requisites:** Declared in Promoting Activity for Diverse Abilities Certificate and KINES 225

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop knowledge of the history, legislation and models that have impacted diverse populations.

Audience: Undergraduate

2. Develop knowledge and understanding of diverse populations.

Audience: Undergraduate

3. Understand the barriers that impact physical activity and well-being for diverse populations and the strategies to positively change barriers.

Audience: Undergraduate

4. Understand and apply techniques that result in more inclusive experiences and programs.

Audience: Undergraduate

## KINES 521 – PHYSICAL ACTIVITY AND HEALTH

3 credits.

Research evidence regarding how physical activity and fitness are related to health (e.g., during pregnancy and aging) and disease, especially cardiovascular diseases, obesity, diabetes, osteoporosis, and cancer. Application and communication of knowledge in practical situations.

**Requisites:** Declared in Kinesiology and KINES 314

**Course Designation:** Gen Ed – Communication Part B

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the various measures of physical activity and their use in epidemiology/biomedical research

Audience: Both Grad & Undergrad

2. Explain the various study designs used to assess relationships between physical activity and health, and their strengths and weaknesses

Audience: Both Grad & Undergrad

3. Identify the currently recommended amount of activity for health benefits

Audience: Both Grad & Undergrad

4. Develop an accurate understanding of the relationships between physical activity and health outcomes including cardiovascular and metabolic disorders, obesity, musculoskeletal health, cancers and mental health

Audience: Both Grad & Undergrad

5. Critically evaluate the literature on physical activity and health topics

Audience: Graduate

## KINES 523 – CLINICAL EXERCISE TESTING AND PRESCRIPTION FOR HEALTH PROFESSIONALS

3 credits.

Explore how exercise prevents, manages, and treats chronic health conditions. Develop skills in basic ECG interpretation, understand medications' effect on exercise, and design exercise prescriptions for various chronic diseases including obesity, hypertension, cardiovascular disease, diabetes, cancer, pulmonary disease, skeletal and joint disease, and more. Acquire the expertise to elevate health outcomes and enhance quality of life through exercise.

**Requisites:** ANAT&PHY 235, 335 or 435

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Administer pre-exercise screening and safely conduct exercise testing

Audience: Both Grad & Undergrad

2. Identify commonly used medications for chronic diseases and their effects on exercise

Audience: Both Grad & Undergrad

3. Identify exercise limitations and contraindications to exercise associated with the chronic diseases

Audience: Both Grad & Undergrad

4. Apply concepts of exercise prescription to the development of comprehensive exercise training programs for individuals with chronic diseases

Audience: Both Grad & Undergrad

5. Apply knowledge related to movement and physical activity to a clinical population to enhance human health and quality of life

Audience: Both Grad & Undergrad

6. Demonstrate effective collaboration skills by working collaboratively with peers on group projects and discussion

Audience: Both Grad & Undergrad

7. Critically evaluate current research literature to inform decision-making in clinical exercise programming for individuals with chronic diseases

Audience: Graduate

### **KINES/NUTR SCI 525 – NUTRITION IN PHYSICAL ACTIVITY AND HEALTH**

3 credits.

Provides both scientific knowledge and application of nutrition related to exercise, health, and sports.

**Requisites:** ANAT&PHY 335

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify how nutritional and hydration demands vary by physical activity frequency, intensity, type, and time

Audience: Undergraduate

2. Outline dietary assessment techniques and common dietary strategies for both the healthy population and populations with additional dietary needs

Audience: Undergraduate

3. Apply the potential benefits of nutrient timing strategies to optimize performance and to promote tissue growth, recovery, and repair

Audience: Undergraduate

4. Synthesize and discuss nutrition research related physical activity and health

Audience: Undergraduate

5. Evaluate the safety and efficacy of common nutritional strategies, supplements, and ergogenic aids

Audience: Undergraduate

### **KINES 527 – PRINCIPLES OF STRENGTH AND CONDITIONING**

3 credits.

Present/discuss the scientific basis and current practices of strength and conditioning for athletic performance. Training program design and training methods, for performance enhancement, related to the areas of strength, power, speed, and endurance.

**Requisites:** KINES 427

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of proper exercise selection and technique

Audience: Undergraduate

2. Evaluate the safety and effectiveness of various training methods. modalities, equipment, and environments

Audience: Undergraduate

3. Design strength and conditioning programs intended for improvement in strength, power, speed, and/or endurance

Audience: Undergraduate

4. Convey how contemporary scientific principles and training methodologies are being used to improve athletic performance

Audience: Undergraduate

### **KINES 528 – SEMINAR IN STRENGTH AND CONDITIONING**

1 credit.

Provides scientific knowledge and opportunity to practice the application of strength and conditioning practices.

**Requisites:** KINES 527 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate an awareness and understanding of strength and conditioning research and practices.

Audience: Both Grad & Undergrad

2. Demonstrate an understanding of the basic concepts of strength and conditioning.

Audience: Both Grad & Undergrad

3. Critically evaluate current research and practices related to strength and conditioning, including study/practice design, strength and conditioning guidelines, and implementation of the information.

Audience: Both Grad & Undergrad

4. Provide presentations and lead discussions on journal articles and current practices in the field of strength and conditioning.

Audience: Both Grad & Undergrad

5. Discuss methods of implementing research into practice with clients or patients.

Audience: Graduate

6. Compare research and clinician expertise to determine best practices.

Audience: Graduate

### KINES 531 – NEURAL CONTROL OF MOVEMENT

3 credits.

Intermediate course on neuronal circuits and neurophysiological mechanisms involved in the control of human motor behavior. Including discussion of: 1) sensorimotor integration, 2) interactions between spinal, brainstem, and cerebral cortical levels of control, and 3) how motor control knowledge is created and evaluated.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the basic organization and function of the human sensorimotor system.

Audience: Undergraduate

2. Summarize the neural circuits and mechanisms that govern how we sense, move, feel, and think.

Audience: Undergraduate

3. Explain how sensory information is encoded in neural signals used in the generation of motor behavior.

Audience: Undergraduate

4. Explain the nature of information processing important for human motor behavior.

Audience: Undergraduate

5. Explain how experience modifies neural circuitry.

Audience: Undergraduate

6. Apply the basic knowledge and neuroscientific concepts to human health, wellness and disease.

Audience: Undergraduate

### KINES 540 – DIVERSITY IN HEALTH AND PHYSICAL ACTIVITY SETTINGS

3 credits.

Issues related to promoting equal learning opportunities in the classroom and other community settings, including effective approaches to encouraging collaboration among colleagues, staff, parents, and students who are culturally, ethnically and socio-economically diverse are examined. In addition, effective instructional and coaching methods for an inclusive sport environment, athletic programs, and health professions as they relate to diverse individuals are addressed. Theoretical and practical paradigm of cultural differences are introduced. The focus is on diversity issues as they relate to race, ethnicity, gender, social class, sexuality, and racial considerations, development and ability differences, variations in learning styles and a variety of physical, mental, and emotional disabilities.

**Requisites:** Junior standing

**Course Designation:** Gen Ed – Communication Part B

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Provide an overview of diversity, including a definition of diversity and diversity management, and discuss the various reasons for the emphasis on diversity.

Audience: Both Grad & Undergrad

2. Demonstrate knowledge of prevalent attitudes regarding equity, fairness, and diversity.

Audience: Both Grad & Undergrad

3. Demonstrate knowledge about varying beliefs about health, disease and treatment that influence health care practice in oral presentations and written communication using outlining, drafting and revision.

Audience: Both Grad & Undergrad

4. Address issues of racism, bias, and prejudice and explain how these issues affect the experience of individuals and groups.

Audience: Both Grad & Undergrad

5. Demonstrate culturally sensitive verbal and non-verbal communication skills with respect to age, disability, gender, sexual orientation, socioeconomic status, race, ethnicity, nationality and religion.

Audience: Both Grad & Undergrad

6. Critically evaluate the literature on physical activity and health topics using relevant, reliable, and high-quality research sources.

Audience: Both Grad & Undergrad

7. Demonstrate an understanding of how race, ethnicity, gender, social class, sexuality, and diverse abilities (e.g. physical, cognitive) currently impact opportunities and experiences in physical activities and sports.

Audience: Both Grad & Undergrad

8. Demonstrate an understanding of teaching, coaching, and communication techniques that may enhance your ability to work with diverse populations in order to promote healthy lifestyles.

Audience: Both Grad & Undergrad

9. Demonstrate the ability to make recommendations regarding the design, implementation, and evaluation of curricular and instructional practices that fully includes learners' diverse needs.

Audience: Graduate

10. Demonstrate knowledge of models and theories impacting on equity, fairness, or diversity.

### **KINES 547 – SKILLS FOR HEALTH: METHODS AND PRACTICUM OF TEACHING HEALTH**

3 credits.

Centered on the components (social, emotional, spiritual, environmental, occupational, intellectual, and physical) and skills (influence analysis, interpersonal communication, health-enhancing behaviors, accessing valid information, goal-setting, decision-making and advocacy) of wellness. Gain competence by planning for, learning, and practicing teaching skills in educational settings. Through this approach, highly competent teachers will be developed who can adapt health instruction to a wide variety of audiences and topics.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Comprehend concepts and skills related to health promotion and disease prevention.

Audience: Undergraduate

2. Analyze and organize content for teaching.

Audience: Undergraduate

3. Effectively organize content for presentation to students.

Audience: Undergraduate

4. Identify, select, and/or create learning activities that are appropriate, inclusive and engaging.

Audience: Undergraduate

5. Demonstrate their understanding of quality teaching skills by reviewing videotape and analyzing teacher performance.

Audience: Undergraduate

### **KINES 555 – SPORTS SCIENCE & ATHLETE MONITORING**

3 credits.

In-depth look at how technology is changing the way we assess physical activity, help people return from injury, and increase physical performance. Topics include field-based testing, athlete monitoring, and movement screenings. Exposure to the most popular technologies in the field of human performance. Upper level elective in Kinesiology that builds on concepts acquired in the Kinesiology core curriculum. Offers real-world application of these concepts to students.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the principles behind athletic monitoring and human performance testing.

Audience: Both Grad & Undergrad

2. Implement field-based monitoring systems.

Audience: Both Grad & Undergrad

3. Develop an assessment for the injured athlete and learn about the role monitoring plays in the progression to return-to-sport after injury.

Audience: Both Grad & Undergrad

4. Collect performance data for analysis, interpretation, and visualization.

Audience: Both Grad & Undergrad

5. Create useful tools for dissemination of testing results.

Audience: Both Grad & Undergrad

6. Apply principles behind athletic monitoring to field-based sports.

Audience: Graduate

7. Develop return-to-play protocols and understand how they can mitigate injury risk.

Audience: Graduate

### **KINES 560 – SENIOR RESEARCH WRITING IN KINESIOLOGY**

3 credits.

Develop skills in reading, reporting, and evaluating research in Kinesiology. Discuss and critically analyze peer-reviewed research articles in Kinesiology. Apply knowledge of scientific writing by preparing a scholarly research project such as a scientific literature review, systematic review, senior research thesis, original manuscript, or clinical case report.

**Requisites:** KINES 330 and declared in Kinesiology BS

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Design a scholarly research writing project that will serve as the foundation for an advanced learning experience  
Audience: Undergraduate

2. Apply critical thinking skills to evaluate scientific literature  
Audience: Undergraduate

3. Develop peer review and revision skills through collaborative feedback sessions  
Audience: Undergraduate

4. Compose a written paper that demonstrates knowledge and understanding of research projects  
Audience: Undergraduate

5. Create an oral presentation to effectively communicate research findings and analyses  
Audience: Undergraduate

### **KINES 566 – PROMOTING HEALTH IN THE COMMUNITY**

3 credits.

Introduces theories and application of health promotion and health education, specifically, health education specialties and philosophical foundations. Addresses professional issues relating to the history, philosophy, ethics, practice, settings and competence of health education. Includes a focus on skills and techniques in writing, developing health educational materials, public speaking and group dynamics as they relate to community health promotion and health education programs.

**Requisites:** KINES 370

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. List responsibilities and competencies an entry-level health educator should possess.  
Audience: Undergraduate

2. Define health terminology and identify one's role in the health education/promotion profession.  
Audience: Undergraduate

3. Identify the physical, mental, and social characteristics affecting health in specific populations.  
Audience: Undergraduate

4. Describe the role and importance of networking in the school and community health profession.  
Audience: Undergraduate

5. Demonstrate effective methodologies of teaching health.  
Audience: Undergraduate

6. Create a comfortable, safe environment for educating others about health topics.  
Audience: Undergraduate

7. Write behavioral objectives for any health topic based upon target audience development and need.  
Audience: Undergraduate

8. Incorporate National Health Education standards into health lesson plans.  
Audience: Undergraduate

9. Practice skills planning and assessing their own classroom or community health-related presentations.  
Audience: Undergraduate

10. Assess their own attitudes, beliefs, and values concerning these topics and the possible effects they may have on their professional work educating others.  
Audience: Undergraduate

**KINES 568 – STUDENT TEACHING IN HEALTH EDUCATION**

2 credits.

Provides the opportunity for the student teacher to put theory into practice under the guidance of a licensed teacher and a university supervisor, allowing the gradual induction into the role of a professional teacher. Feedback and assessment are given in terms of growth in the understandings and abilities needed to assume the responsibilities of a beginning teacher. Emphasis is placed on helping the student teacher become a reflective professional. Cooperation among the classroom teacher, university supervisor, and administrators is encouraged.

**Requisites:** KINES 547**Course Designation:** Workplace - Workplace Experience Course**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Observe teachers in their various roles as they work with students, meet with parents, confer with support staff and administrators, and collaborate with colleagues

Audience: Undergraduate

2. Practice various teaching methods (including technology) in relevant curricular areas

Audience: Undergraduate

3. Develop and implement appropriate unit and lesson plans in relevant curricular areas for optimal teaching and learning.

Audience: Undergraduate

4. Develop an awareness of one's preferred teaching style

Audience: Undergraduate

5. Practice various documentation and assessment tools

Audience: Undergraduate

6. Demonstrate classroom management principles that promote responsibility and self-discipline (help students learn conflict negotiation strategies)

Audience: Undergraduate

7. Recognize and understand individual and group needs, especially in terms of inclusive education (multicultural, gender-fair, disability aware)

Audience: Undergraduate

8. Demonstrate professional characteristics, including punctuality, confidentiality, flexibility, cooperation, enthusiasm, and responsibility

Audience: Undergraduate

9. Demonstrate oral and written communication skills at a level at which ideas are conveyed clearly and effectively.

Audience: Undergraduate

10. Teach with full responsibility for a minimum of six weeks

Audience: Undergraduate

11. Practice reflective teaching by communicating weekly with the University Supervisor through dialogue and reflective journaling to describe and ask questions regarding observations and perceptions

Audience: Undergraduate

**KINES 570 – ANATOMICAL FOUNDATIONS IN ATHLETIC TRAINING**

3 credits.

Structure, regions and function of the neurological and musculoskeletal systems are presented with the purpose of providing insight into the anatomical foundations of common injuries and conditions.

**Requisites:** Declared Athletic Training MS**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Locate anatomical structures of the musculoskeletal, articular, nervous, and vascular system.

Audience: Graduate

2. Demonstrate the functional application of these anatomical structures in identifying specific musculoskeletal, articular, nervous, and vascular injuries and conditions.

Audience: Graduate

3. Apply injury classification principles to specific tissues to understand injury severity.

Audience: Graduate

4. Recognize the role of these anatomical structures as they relate to athletic injury mechanism, evaluation, and rehabilitation.

Audience: Graduate

**KINES 571 – EMERGENCY PROCEDURES FOR ATHLETIC TRAINERS**

2 credits.

Provides future athletic training professionals with knowledge and skills to respond to emergency situations common to the athletic training environment. Emphasis on hands-on applications and interprofessional relationships with other emergency care providers and agencies.

**Requisites:** Declared Athletic Training MS**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate proficient skills in CPR and AED use

Audience: Graduate

2. Demonstrate knowledge of emergency care related to sudden cardiac death, head trauma/spinal injuries, exertional heat illness and environmental conditions.

Audience: Graduate

3. Design and create emergency action plans for specific assigned venues related to athletic events.

Audience: Graduate

4. Show proper athletic equipment fitting and describe rules related to athletic equipment prior to activity as well as removal of equipment in emergency situations.

Audience: Graduate

### **KINES 572 – FOUNDATIONAL SKILLS IN ATHLETIC TRAINING**

1 credit.

Introduces foundational skills used by athletic training professionals in the evaluation and prevention of injuries and conditions common to active populations.

**Requisites:** Declared Athletic Training MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate history taking, components of a physical exam, and components of preparticipation exam.

Audience: Graduate

2. Discuss basic injury terminology.

Audience: Graduate

3. Establish standards of basic patient interaction and HIPPA compliance.

Audience: Graduate

4. Create and implement custom padding, demonstrate appropriate splinting and taping techniques, and apply orthopedic appliances for various injuries.

Audience: Graduate

### **KINES 600 – ADVANCED EXERCISE PSYCHOLOGY**

3 credits.

Exercise and performance examined from the standpoint of motivation, personality dynamics, psychophysics, mental health, social psychology, and behavioral medicine.

**Requisites:** Graduate/professional standing or declared in Kinesiology

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate competence in the scientific research process which includes the ability to consume, analyze, interpret, and critically review the scientific literature.

Audience: Undergraduate

2. Develop appropriate styles of written and oral communication to use both within and outside the scientific community.

Audience: Undergraduate

3. Actively develop disciplinary knowledge, logical/critical thinking skills, active listening skills, and awareness of the relevant scientific literature.

Audience: Undergraduate

4. Be able to efficiently search the literature (research and investigation skills) in response to an exercise psychology-related question, and be able to synthesize (critical thinking skills) the research to formulate succinct and evidence-based responses (communication skills).

Audience: Undergraduate

### **KINES 614 – BIOLOGICAL FACTORS INFLUENCING EXERCISE PERFORMANCE**

3 credits.

Explore the physiological, biochemical, and molecular mechanisms of the body's response to both acute and chronic exercise. Examine the body's physiological responses to environmental stressors such as heat, cold, and hypoxia. Gain an in-depth understanding of advanced exercise physiology concepts through the analysis of research publications.

**Requisites:** KINES 314 or graduate/professional standing

**Course Designation:** Gen Ed - Communication Part B

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the body's acute and chronic physiological responses to exercise

Audience: Both Grad & Undergrad

2. Evaluate key concepts of environmental factors affecting exercise performance

Audience: Both Grad & Undergrad

3. Demonstrate advanced information literacy skills within the context of exercise physiology

Audience: Both Grad & Undergrad

4. Compose a comprehensive written evaluation of the scientific literature pertaining to exercise physiology

Audience: Both Grad & Undergrad

5. Develop oral communication skills tailored for effective engagement within the exercise physiology scientific community

Audience: Both Grad & Undergrad

6. Demonstrate practical application of theoretical knowledge in the field of exercise physiology

Audience: Graduate

### KINES 615 – LABORATORY TECHNIQUES IN EXERCISE PHYSIOLOGY

2 credits.

Laboratory procedures and skills commonly used in exercise physiology.

**Requisites:** Declared in Kinesiology, Physical Education, or Athletic Training, and KINES 314 or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Define questions of physiologic relevance and apply methods to test those questions.

Audience: Both Grad & Undergrad

2. Summarize and consistently report on the methods and findings in brief reports.

Audience: Graduate

### KINES 618 – BIOMECHANICS

2-3 credits.

Biomechanics of human movement and skill with emphasis on kinematics and kinetics.

**Requisites:** Declared in Kinesiology, KINES 318 and (KINES 328, 337 or ANAT&PHY 337) or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify, quantify and describe mechanical aspects of human activities.

Audience: Both Grad & Undergrad

2. Determine forces within and external to the human body that are necessary to achieve desired behaviors.

Audience: Both Grad & Undergrad

3. Determine movements and forces that result from muscle activity and external forces.

Audience: Both Grad & Undergrad

4. Use mechanical principles to simulate standing.

Audience: Both Grad & Undergrad

5. Use mechanical simulation of standing to investigate neural control of balance.

Audience: Graduate

### KINES 620 – CLINICAL PRACTICUM IN ATHLETIC TRAINING I

2 credits.

Clinical practicum that provides practical and skills-oriented instruction under the supervision of a skilled clinical preceptor. Provides an opportunity for exposure will be to a large volume and variety of clinical experiences to facilitate learning in authentic clinical settings.

**Requisites:** Declared Athletic Training MS

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply and integrate foundational athletic training skills (e.g. patient history, bracing and taping), in a clinical athletic training setting.

Audience: Graduate

2. Demonstrate relevant interpersonal skills needed in a patient-centered clinical environment.

Audience: Graduate

3. Identify common operational policies (e.g. clinical hours, facility standards, hygiene) and practices (e.g. emergency plans, medical documentation) found in athletic training clinical settings.

Audience: Graduate

4. Demonstrate adherence to appropriate ethical behaviors and professional boundaries.

Audience: Graduate

5. Use documentation techniques to record clinical patient encounters

Audience: Graduate

6. Demonstrate appropriate patient interactions under the direction of a clinical preceptor in the provision of patient care for various conditions (e.g. acute, chronic and emergent).

Audience: Graduate

7. Develop strategies for future patient interactions through observation, preceptor feedback, and written reflection of patient encounters.

Audience: Graduate

## **KINES 621 – CLINICAL PRACTICUM IN ATHLETIC TRAINING II**

3 credits.

Clinical practicum that provides practical and skills-oriented instruction under the supervision of a skilled clinical preceptor. Exposure to a large volume and variety of clinical experiences to facilitate learning in authentic clinical settings.

**Requisites:** KINES 620

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply and integrate foundational athletic training skills (e.g. objective measures, evaluation of range of motion, manual muscle testing and special testing), in a clinical athletic training setting.  
Audience: Graduate

2. Apply interpersonal, clinical exam skills and therapeutic interventions in patient encounters as directed by clinical preceptor for various conditions (e.g. acute, chronic and emergent).  
Audience: Graduate

3. Identify operational policies (e.g. clinical hours, facility standards, hygiene) and practices (e.g. emergency plans, documentation) for your assigned clinical setting.  
Audience: Graduate

4. Apply athletic training skills from previous coursework (e.g. taping, patient history, objective measures) and new skills as acquired in concurrent courses.  
Audience: Graduate

5. Develop strategies for future patient interactions through observation, clinical experience, preceptor feedback, and written reflection of patient encounters.  
Audience: Graduate

6. Interpret information gained from patient encounters and preceptor feedback to develop clinical decision-making skills.  
Audience: Graduate

7. Demonstrate adherence to appropriate ethical behaviors and professional boundaries.  
Audience: Graduate

## **KINES 622 – CLINICAL FIELD EXPERIENCE IN ATHLETIC TRAINING I**

3 credits.

Provides a clinical field experience allowing for practical and skills-oriented instruction under the supervision of a skilled clinical preceptor. Exposure to a large volume and variety of athletic training clinical experiences to facilitate learning in authentic clinical settings. Increased patient interactions concurrent with skill acquisition and Athletic Training program progression.

**Requisites:** KINES 621

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply athletic training skills from previous coursework (e.g. posture, gait, objective measures) and new skills as acquired in concurrent courses.  
Audience: Graduate

2. Apply interpersonal, clinical exam skills, including differential diagnoses, and therapeutic interventions in patient encounters as directed by clinical preceptor for various conditions (e.g. acute, chronic and emergent).  
Audience: Graduate

3. Identify operational policies (e.g. clinical hours, facility standards, hygiene) and practices (e.g. emergency plans, documentation) for your assigned clinical setting.  
Audience: Graduate

4. Demonstrate adherence to appropriate ethical behaviors and professional boundaries.  
Audience: Graduate

5. Develop strategies for future patient interactions through hands-on clinical experience, preceptor feedback, and written reflection of patient encounters.  
Audience: Graduate

6. Interpret information gained from patient encounters and preceptor feedback to practice clinical decision-making skills.  
Audience: Graduate

## **KINES 623 – CLINICAL FIELD EXPERIENCE IN ATHLETIC TRAINING II**

3 credits.

Clinical field experience that provides practical and skills-oriented instruction under the supervision of a skilled clinical preceptor as a precursor to clinical immersion placement. Provides exposure to a large volume and variety of clinical experiences in authentic clinical settings. Increased patient encounters concurrent with skill acquisition.

**Requisites:** KINES 622

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply athletic training skills from previous coursework and new skills as acquired in concurrent courses.

Audience: Graduate

2. Demonstrate adherence to appropriate ethical behaviors and professional boundaries.

Audience: Graduate

3. Interpret information from patient encounters and preceptor feedback to develop clinical decision-making skills.

Audience: Graduate

4. Identify operational policies (e.g. clinical hours, facility standards, hygiene) and practices (e.g. emergency plans, documentation) for your assigned clinical setting.

Audience: Graduate

5. Apply interpersonal, clinical exam skills, and therapeutic interventions in patient encounters as directed by the clinical preceptor for various conditions (e.g., acute, chronic, and emergent).

Audience: Graduate

6. Develop strategies for future patient interactions through observation, clinical experience, preceptor feedback, and written reflection of patient encounters.

Audience: Graduate

## **KINES 624 – ATHLETIC TRAINING PRECEPTORSHIP I**

6 credits.

Provides extensive patient encounters and advanced skills-oriented instruction under the supervision of a skilled clinical preceptor, working towards independent athletic training practice. Immersive experience provides exposure to a large volume and variety of patient encounters in authentic clinical settings. Provides extensive opportunities for supervised autonomy to develop clinical decision-making skills progressing toward independent clinical-decision making.

**Requisites:** KINES 623

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply athletic training skills from all previous coursework (e.g. patient intake, physical examination, differential diagnosis, intervention planning, and execution of treatment plans) and new skills as acquired in concurrent courses.

Audience: Graduate

2. Apply interpersonal, clinical exam skills, including differential diagnoses, and therapeutic interventions in patient encounters as directed by clinical preceptor for various conditions (e.g. acute, chronic and emergent).

Audience: Graduate

3. Identify operational policies (e.g. clinical hours, facility standards, hygiene) and practices (e.g. emergency plans, documentation) for your assigned clinical setting.

Audience: Graduate

4. Demonstrate adherence to appropriate ethical behaviors and professional boundaries.

Audience: Graduate

5. Develop strategies for future patient interactions through hands-on clinical experience, preceptor feedback, and written reflection of patient encounters.

Audience: Graduate

6. Interpret information gained from patient encounters and preceptor feedback to practice clinical decision-making skills in a progressively autonomous fashion.

Audience: Graduate

7. Appraise student documented patient-encounter information to assess specific learner needs in the interest of progressing to autonomous practice.

Audience: Graduate

## **KINES 625 – ATHLETIC TRAINING PRECEPTORSHIP II**

7 credits.

Provides extensive patient encounters and advanced skills-oriented instruction under the supervision of a skilled clinical preceptor, working towards independent athletic training practice. Final immersive clinical experience will provide exposure to a large volume and variety of patient encounters in authentic clinical settings. Provides extensive opportunities for supervised autonomy moving to independent clinical decision-making.

**Requisites:** KINES 624

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply athletic training skills from all previous coursework (e.g. patient intake, physical examination, differential diagnosis, intervention planning, and execution of treatment plans) and new skills as acquired in concurrent courses.

Audience: Graduate

2. Apply interpersonal, clinical exam skills, including differential diagnoses, and therapeutic interventions in patient encounters as directed by clinical preceptor for various conditions (e.g. acute, chronic and emergent).

Audience: Graduate

3. Identify operational policies (e.g. clinical hours, facility standards, hygiene) and practices (e.g. emergency plans, documentation) for assigned clinical setting.

Audience: Graduate

4. Demonstrate adherence to appropriate ethical behaviors and professional boundaries.

Audience: Graduate

5. Develop strategies for future patient interactions through hands-on clinical experience, preceptor feedback, and written reflection of patient encounters.

Audience: Graduate

6. Interpret information gained from patient encounters and preceptor feedback to practice clinical decision-making skills in a progressively autonomous fashion.

Audience: Graduate

7. Appraise student documented patient-encounter information to assess specific learner needs in the interest of progressing to autonomous practice.

Audience: Graduate

## **KINES 650 – FOUNDATIONS OF PROFESSIONAL PRACTICE IN ATHLETIC TRAINING**

1 credit.

Addresses foundational concepts and skills required for contemporary athletic training practice including: an introduction to evidence-based practice, disablement models and patient reported outcomes, team approach to healthcare, legal and ethical considerations, primacy of the patient, effective communication, concepts of professionalism and cultural competence.

**Requisites:** Declared Athletic Training MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the role of evidence based practice in clinical decision in athletic training

Audience: Graduate

2. Demonstrate the role of disablement models and patient reported outcomes in the provision of patient-centered care.

Audience: Graduate

3. Describe legal and ethical concepts that influence athletic training practice.

Audience: Graduate

4. Identify components of professionalism and cultural competence in athletic training.

Audience: Graduate

**KINES 651 – PUBLIC HEALTH, POLICY, AND PRACTICE**

3 credits.

Addresses the intersection of athletic training and public health by exploring population-based approaches to injury prevention and challenges students to explore how population-level problems impact individual health. Introduces and explores specific policies (e.g. concussion, athletic pre-participation, catastrophic injury) that impact the provision of effective patient-centered care and introduces skills required for management of these conditions.

**Requisites:** Declared Athletic Training MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define public health and differentiate public health/population health from personal health.

Audience: Graduate

2. Recognize the goals of public health, to improve health and eliminate health disparities, and how athletic training intersects with these goals.

Audience: Graduate

3. Summarize the methods used to measure the health of populations, find causes, and develop interventions specific to athletic training settings.

Audience: Graduate

4. Appraise specific policies (e.g. concussion, athletic pre-participation, catastrophic injury) that impact the provision of effective patient-centered care.

Audience: Graduate

5. Apply clinical skills required for management of injuries and conditions impacted by policy.

Audience: Graduate

6. Identify agencies, statutes, and standards of care that establish policies that impact athletic training practice.

Audience: Graduate

**KINES 652 – EVALUATION AND THERAPEUTIC INTERVENTIONS I**

4 credits.

Provides evaluation techniques, theory and practice in the use of therapeutic exercise for the rehabilitation of athletic injuries. Provides the appropriate knowledge and skills needed to evaluate and apply therapeutic strategies in the treatment of athletic injuries. Focuses on lower extremity and closed head injuries.

**Requisites:** Declared Athletic Training MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate advanced knowledge and skills in the assessment of injuries in order to apply therapeutic strategies to active populations.

Audience: Graduate

2. Use problem-solving skills to apply therapeutic strategies to common lower extremity and closed head injuries seen in active populations.

Audience: Graduate

3. Apply clinical and physiological knowledge for the implementation of manual therapeutic strategies

Audience: Graduate

4. Demonstrate the skills, knowledge, and clinical abilities to conduct a thorough clinical examination of injuries common to active populations.

Audience: Graduate

5. Demonstrate the skills, knowledge, and physiological framework for the safe use of therapeutic modalities and therapeutic exercise for athletic injury management.

Audience: Graduate

6. Demonstrate the appropriate knowledge and skills in the areas of problem solving, program design, documentation, and a variety of therapeutic interventions needed to treat injuries common to athletes and physically active populations.

Audience: Graduate

**KINES 653 – EVALUATION AND THERAPEUTIC INTERVENTIONS II**  
4 credits.

Provides Athletic Trainers with the knowledge, physical exam skills, and therapeutic interventions to diagnose and address common injuries and conditions. Scientific rationale for appropriate exercise design, implementation, and progression of care are emphasized.

**Requisites:** KINES 652

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement program design and instruct patients in therapeutic exercises  
Audience: Graduate

2. Utilize clinical skills in order to establish differential diagnoses and defend rationale for final diagnosis  
Audience: Graduate

3. Apply clinical and physiological knowledge for the implementation of manual therapeutic strategies  
Audience: Graduate

4. Demonstrate the skills, knowledge, and clinical abilities to conduct a thorough clinical examination of injuries common to active populations  
Audience: Graduate

5. Demonstrate the skills, knowledge, and physiological framework for the safe use of therapeutic modalities and therapeutic exercise for athletic injury management.  
Audience: Graduate

6. Demonstrate the appropriate knowledge and skills in the areas of problem solving, program design, documentation, and a variety of therapeutic interventions needed to treat injuries common to athletes and physically active populations  
Audience: Graduate

**KINES 654 – CLINICAL MEDICINE IN ATHLETIC TRAINING I**  
3 credits.

Examines acute and chronic medical problems encountered by athletic trainers. Includes examination and clinical skills, interventions, and requirements for referral as part of collaborative care. Emphasis on cardiopulmonary, respiratory, gastrointestinal, genitourinary, gynecological, neurological, and systemic issues.

**Requisites:** Declared Athletic Training MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize and appropriately manage common medical conditions, including cardiovascular, pulmonary, respiratory, gastrointestinal, genitourinary, otolaryngological, ophthalmological, dental, and hematological conditions.  
Audience: Graduate

2. Differentiate best practices for appropriate laboratory and diagnostic testing of common medical conditions.  
Audience: Graduate

3. Summarize best practices for evaluating and treating patients across the lifespan and genders.  
Audience: Graduate

4. Establish best practices for the management of patients with chronic medical conditions (e.g., high blood pressure, arthritis, IBD).  
Audience: Graduate

5. Recognize and provide evidence-based health promotion and risk factors/disease prevention guidance as well as patient education and counseling.  
Audience: Graduate

**KINES 655 – CLINICAL MEDICINE IN ATHLETIC TRAINING II**

3 credits.

Examines acute and chronic medical problems encountered by athletic trainers. Includes examination and clinical skills, interventions, and requirements for referral as part of collaborative care. Emphasis on drug testing, illicit drug use, mental and behavioral health, sexual health, dermatology, wound care and closure, diabetes, and infectious disease.

**Requisites:** KINES 654

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the skills, knowledge, and clinical abilities to conduct a thorough clinical examination of illnesses common to active populations.

Audience: Graduate

2. Identify and appropriately manage common medical conditions, including endocrine, dermatological, genitourinary, otolaryngological, psychological, environmental, nutritional and hematological conditions.

Audience: Graduate

3. Recognize and appropriately manage common behavioral health conditions and work with the appropriate mental health providers.

Audience: Graduate

4. Establish best practices for the management of patients with chronic medical conditions (e.g., diabetes).

Audience: Graduate

5. Recognize and provide evidence-based health promotion and risk factors/disease prevention guidance as well as patient education and counseling.

Audience: Graduate

**KINES 656 – SCIENTIFIC INQUIRY IN ATHLETIC TRAINING**

3 credits.

Addresses the role of evidence in supporting Athletic Training practice. Presents the concepts, methods, and strategies related to evidence-based practice and the development of critical reading and scientific writing skills.

**Requisites:** KINES 650

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the importance of evidence and evidence guided practice in athletic training.

Audience: Graduate

2. Use library resources to identify scientific articles about injuries specific to their clinical rotation.

Audience: Graduate

3. Apply the levels of evidence in the literature and how to identify and make clinical recommendations related to common clinical questions.

Audience: Graduate

4. Apply the literature evaluation process learned in this course to determine the level of evidence for common physical medicine interventions.

Audience: Graduate

### **KINES 657 – ROLE TRANSITION AND PROFESSIONAL PRACTICE IN ATHLETIC TRAINING**

1 credit.

Addresses role transition and professional practice issues facing athletic trainers. Emphasis on identifying gaps in skills and expertise, recognizing communication needs, and role socialization skills for future development during final preceptorship placements and entrance into the healthcare workforce. Board of Certification preparation strategies are explored.

**Requisites:** KINES 623

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Appraise issues facing newly credentialed athletic trainers as they transition to professional practice.

Audience: Graduate

2. Discuss strategies for successful socialization to various athletic training employment settings.

Audience: Graduate

3. Identify gaps in professional knowledge, skills, and abilities using preceptorship evaluations, self-assessment examinations, and self-reflection activities.

Audience: Graduate

4. Design an individual professional development plan to address gaps in professional knowledge, skills, and abilities to address in future preceptorship placements.

Audience: Graduate

5. Develop an individualized Board of Certification exam preparation plan.

Audience: Graduate

6. Identify current issues in athletic training for the purpose of professional advocacy and engagement.

Audience: Graduate

### **KINES 658 – SEMINAR IN ATHLETIC TRAINING**

1 credit.

Provides a forum for athletic training students, faculty and staff to present and discuss research and current issues related to the field of athletic training.

**Requisites:** Declared Athletic Training MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explore contemporary issues in the professional practice of athletic training.

Audience: Graduate

2. Assess published athletic training and sports medicine research.

Audience: Graduate

3. Present student led discussion of published research and professional issues in athletic training.

Audience: Graduate

**KINES 670 – ENHANCING PERFORMANCE AND WELLNESS**

1 credit.

Explores concepts related to promoting and implementing specialized programs focused on addressing health and performance in patients. Topics include strength and conditioning, nutrition, and wellness.

**Requisites:** Declared Athletic Training MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and implement performance tests for assessing sport-specific fitness and athleticism to determine: physical status in order to identify athlete readiness to train & compete, performance development, strengths and weaknesses, and effectively interpret results for exercise prescription.

Audience: Graduate

2. Optimize potential objectives of weight loss and weight gain in sport for performance and develop ability to advise athlete's effectively regarding nutrition, hydration, and ergogenic aids.

Audience: Graduate

3. Apply training principles and exercise prescription in primary areas of strength and conditioning in order to optimize individual outcomes of performance, development and injury resistance.

Audience: Graduate

4. Apply sport-specific training (i.e. physiological and neuromechanical) principles to optimize training relative to the athlete's needs during return to play spectrum.

Audience: Graduate

5. Understand the use of ergogenic aids, and the ability to advise athletes regarding their use (positive and negative) in order to create awareness among the athletes.

Audience: Graduate

6. Explain governance over ergogenic aids.

Audience: Graduate

**KINES 671 – DIAGNOSTIC IMAGING IN ATHLETIC TRAINING**

1 credit.

Addresses diagnostic imaging tools used in sports medicine and orthopedics, interpretation of results, and implementation into clinical practice as part of a comprehensive evaluation.

**Requisites:** KINES 652

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify imagining modalities used in the diagnosis of musculoskeletal injuries and conditions.

Audience: Graduate

2. Summarize appropriate imagining selection patterns based on target tissue, clinical practice, and diagnostic accuracy.

Audience: Graduate

3. Explain the safety considerations for patients referred for musculoskeletal imaging including indications and contraindications (e.g. radiographs, magnetic resonance imaging, computer tomography).

Audience: Graduate

4. Assess the role of musculoskeletal imaging in the development of therapeutic protocols and surgical planning.

Audience: Graduate

5. Appraise common clinical prediction rules in determining referral for diagnostic imaging.

Audience: Graduate

6. Examine the use of diagnostic ultrasound by non-radiologist in clinical practice settings

Audience: Graduate

**KINES 672 – PRINCIPLES OF PHARMACOLOGY FOR ATHLETIC TRAINERS**

1 credit.

Pharmacological and toxicological actions and therapeutic use of medications commonly encountered in the practice of athletic training. Includes categories of drugs, use, effects and precautions for common drugs and drug-interactions. Implications for physical activity and legal issues are examined.

**Requisites:** KINES 654

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify the general concepts and differences in the legal regulation of non-prescription, prescription, and classified pharmaceuticals.

Audience: Graduate

2. Define the pharmacological concepts of dissolution, bioavailability, and bioequivalence.

Audience: Graduate

3. Summarize the pharmacodynamic principles of receptor theory, dose-response relationship, placebo effect, potency, and drug interactions as they relate to the mechanism of drug action and therapeutic effectiveness.

Audience: Graduate

4. Describe how common pharmacological agents influence pain and healing and their influence on various therapeutic interventions.

Audience: Graduate

5. Assess the general indications, contraindications, and adverse reactions of prescription and nonprescription medications commonly encountered in the practice of athletic training (e.g. steroidal and nonsteroidal anti-inflammatory medications, analgesics, antibiotics) as identified in the course syllabus.

Audience: Graduate

6. Explain the central role the prescribing provider plays in the selection, prescription, and clinical supervision of the athlete's clinical treatment program.

Audience: Graduate

**KINES 673 – HEALTHCARE INFORMATICS AND QUALITY IMPROVEMENT IN ATHLETIC TRAINING**

1 credit.

Explores the principles of health informatics and quality improvement for applications in contemporary athletic training practice. Content includes ethical use of data, technology, healthcare information management, fundamentals of quality improvement, measuring improvement, cost and value models, and the history of quality improvement in healthcare.

**Requisites:** Declared Athletic Training MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Assess health related data in athletic training and analyze its role in evidence-based practice, revenue models, practice management, and patient outcomes.

Audience: Graduate

2. Compare and contrast the advantages and disadvantages of various clinical information systems used in professional practice.

Audience: Graduate

3. Demonstrate the value of an athletic trainer in a healthcare system through analysis of clinical and administrative data.

Audience: Graduate

4. Apply the principles of quality improvement to address a specific issue in an athletic training health care setting.

Audience: Graduate

5. Create a proposal for the adoption of a health-related technology, application, or system for clinical practice across an organization.

Audience: Graduate

**KINES 674 – CLINICAL SCHOLARSHIP IN ATHLETIC TRAINING**

1 credit.

Develops understanding of the athletic trainer as an evidence-guided clinical scholar. Designed as a companion to an immersive clinical experience that allows examination of the elements of clinical scholarship in the practice of athletic training. Emphasis on understanding how patient-centered care is improved through best practices and the utilization of practice-based research tools.

**Requisites:** KINES 656**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify the unique roles of clinicians and patients in the collection of practice-based information for the purpose of patient-centered care and shared decision-making.

Audience: Graduate

2. Develop appropriate clinical questions that can be best addressed at the point of care using PICO (Patient, Intervention, Comparison, Outcome) style questions.

Audience: Graduate

3. Assess an athletic training clinical environment for the purpose of developing data collection strategies during normal point-of-care encounters to improve best practices.

Audience: Graduate

4. Assess clinical practices that require unlearning strategies in the interest of up-to-date patient-centered care.

Audience: Graduate

5. Understand how participation in practice-based research networks can advance athletic training research and patient care efforts.

Audience: Graduate

6. Appraise point-of-care technology (e.g., electronic medical records) to enhance the collection of practice-based data.

Audience: Graduate

**KINES 690 – INTERNSHIP IN KINESIOLOGY**

1-6 credits.

Provides an experiential learning experience to integrate theoretical concepts learned in the classroom into field experience. Through supervised practical experiences, gain valuable insights into the diverse applications of exercise science in various settings. Assume responsibilities that are consistent with level of professional development and learning experiences.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, for 4 number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate the ability to integrate theoretical knowledge of kinesiology into practical applications within a professional setting.

Audience: Graduate

2. Research and obtain information which can be used as a basis for making choices regarding future career paths, areas of specialization, and/or further study in exercise science.

Audience: Graduate

3. Cultivate effective interpersonal skills and demonstrate an understanding of diverse perspectives.

Audience: Graduate

**KINES 699 – INDEPENDENT STUDY**

1-3 credits.

Independent undergraduate work in advanced area of study under direct guidance of kinesiology faculty.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**KINES 700 – PSYCHOLOGICAL EFFECTS OF EXERCISE**

3 credits.

Consequences of involvement in acute and chronic exercise on selected psychological states such as anxiety, depression, hostility, and self-esteem.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024

**KINES 713 – NEURAL BASIS OF NORMAL AND PATHOLOGICAL MOVEMENT**

3 credits.

In-depth look at anatomic, neurophysiological, behavioral, and clinical aspects of motor control under normal and pathological conditions. Movement disorders include sensory neuropathy, cerebral cortical or brain stem stroke, basal ganglia dysfunction, and cerebellar disease.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**KINES 721 – NEURAL BASIS FOR MOVEMENT**

3 credits.

How the central nervous system organizes skilled human performance. Evolution of neuromuscular mechanisms, subserving skills, and the causes and limitations of movement at high speeds and high levels of force.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**KINES 773 – CARDIORESPIRATORY ADAPTIONS TO ENVIRONMENT AND EXERCISE**

3 credits.

Examination of the effects of acute and chronic exercise and exposure to hypo- and hyperbaric environments on physiological responses; mechanisms underlying these responses.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**KINES 774 – METABOLIC RESPONSES TO EXERCISE AND ENVIRONMENTAL STRESS**

2 credits.

Examination of the metabolic and biochemical responses to acute and chronic exercise and environmental stress. Emphasis placed on the mechanisms underlying these responses.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**KINES 779 – HUMAN MUSCLE FUNCTION IN HEALTH AND DISEASE**

2 credits.

Multidisciplinary seminar on human muscle function in health and disease. The course is geared toward advanced undergraduate and graduate students in kinesiology, physical and occupational therapy, motor control and behavior, neurophysiology resident in neurology and other related allied health professionals.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**KINES 785 – HUMAN OCCUPATION AND HEALTH**

2-3 credits.

Focuses on the nature of human occupation (everyday purposeful activity) and its relationship to well-being and health. Theories of occupation and health are critically examined.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024

**KINES/POP HLTH 791 – PHYSICAL ACTIVITY EPIDEMIOLOGY**

3 credits.

Recommendations for and surveillance of physical activity in the U.S., and associations with health and disease at the population level. Emphasis on measurement techniques, study design and research considerations.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the strengths and weaknesses of epidemiological study designs and critical issues in the analysis of physical activity-related research.

Audience: Graduate

2. Compare and contrast the specific measurement tools used in physical activity surveillance and research and identify the errors associated with these tools.

Audience: Graduate

3. Identify current public health recommendations for physical activity and describe how they have evolved.

Audience: Graduate

4. Describe the contemporary trends in physical activity in the United States and know how they have been measured.

Audience: Graduate

5. Identify the relationships between physical activity and various health conditions/diseases.

Audience: Graduate

6. Review and analyze the epidemiologic evidence for a link between physical activity and a specified outcome of interest (e.g. physical activity and depression), and present a review of the evidence

Audience: Graduate

**KINES 861 – PRINCIPLES OF MOTOR CONTROL AND LEARNING**

3 credits.

Theories and experimental findings in motor control, acquisition and retention of motor behavior. Topics: attention, models of motor control, kinesthesia, learning, information processing, memory, transfer, feedback, age and gender differences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**KINES 862 – ADVANCED RESEARCH ETHICS & RESPONSIBLE CONDUCT OF RESEARCH**

3 credits.

Explore the ethical dilemmas faced by researchers across biomedical and nonbiomedical research and consider how to best support scientific integrity and public trust. Fulfill NIH training requirements for the responsible conduct of research. Identify the regulatory guidelines and ethical frameworks and principles guiding research ethics and responsible research conduct. Develop the skills to make ethically informed decisions in relation to their research and training.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify key U.S. policies and regulations related to the responsible conduct of research (RCR) and explain their significance in adhering to ethical research standards.

Audience: Graduate

2. Describe the historical context behind the need for human subject protection in research and summarize how responsible research conduct guidelines and regulations have evolved.

Audience: Graduate

3. Apply ethical principles to analyze and address challenges related to the protection of human subjects and adherence to RCR standards.

Audience: Graduate

4. Evaluate ethical issues by critically examining dilemmas encountered in human subject protection and RCR practices, using examples from the field of kinesiology and occupational therapy.

Audience: Graduate

5. Evaluate ethical issues in the protection of human subjects and RCR, demonstrating an in-depth understanding within the fields of kinesiology and occupational therapy.

Audience: Graduate

**KINES 885 – SEMINAR IN OCCUPATION AND HEALTH**

1 credit.

Current theoretical and methodological issues and problems within the study of human occupation and health.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### KINES 900 – SEMINAR IN KINESIOLOGY

1 credit.

Provides a forum for students, faculty and staff from the department of kinesiology to present and discuss research and current issues related to the field of kinesiology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### KINES 950 – PROFESSIONAL SKILLS AND RESEARCH IN KINESIOLOGY

3 credits.

Foundational skills to succeed in both academic and applied settings within the field of kinesiology. Search, analyze, and critique scientific literature on exercise and health while developing critical thinking, research methodologies, and evidence-based decision-making. Refine oral and written communication and create professional materials including CV and cover letter for career development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Learning Outcomes:** 1. Understand the methods used to search for, analyze, and critique scientific literature.

Audience: Graduate

2. Develop proficiency in formulating research questions, locating relevant literature, appraising studies, synthesizing findings, and applying conclusions across diverse contexts.

Audience: Graduate

3. Perform thoughtful critiques of your peers' work by providing constructive feedback.

Audience: Graduate

4. Refine oral and written communication skills for presenting information clearly and effectively.

Audience: Graduate

5. Develop professional materials that showcase qualifications for future job opportunities.

Audience: Graduate

### KINES 951 – SEMINAR-BIOMECHANICS

2 credits.

Seminar topics in field of biomechanics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### KINES 953 – HUMAN BIODYNAMICS SEMINAR

1 credit.

Seminar topics in field of human biodynamics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

### KINES/POP HLTH 955 – SEMINAR - PHYSICAL ACTIVITY EPIDEMIOLOGY

1 credit.

Current research developments in physical activity epidemiology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Name and explain the basic concepts of physical activity epidemiology, including study designs, public health guidelines, surveillance, and physical activity measures

Audience: Graduate

2. Critically evaluate current research on physical activity and health topics

Audience: Graduate

3. Prepare a presentation and lead a group in an in-depth discussion of the methods, interpretation, and implications of recent scientific articles

Audience: Graduate

### KINES 961 – SEMINAR IN MOTOR CONTROL AND LEARNING

2 credits.

Seminar topics in field of motor control and learning.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Demonstrate an understanding of the major current and past theories, research findings, methodologies and techniques related to the specific topic for the course

Audience: Graduate

2. Retrieve and examine scientific literature, evaluate evidence for and against hypotheses, and be able to discuss strengths and weaknesses in the existing literature with respect to the specific topic

Audience: Graduate

**KINES 990 – RESEARCH OR THESIS**

1-12 credits.

Independent research and writing for graduate students under the supervision of kinesiology faculty member.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**KINES 991 – RESEARCH IN PHYSICAL ACTIVITY- THEORY AND DESIGN**

3 credits.

Basic principles of scientific inquiry and their application to the study of physical activity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**KINES 999 – INDEPENDENT READING**

1-4 credits.

Directed study projects for graduate students as arranged with kinesiology faculty member.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**LANDSCAPE ARCHITECTURE (LAND ARC)****LAND ARC/AMER IND 106 – EARTH PARTNERSHIP INDIGENOUS ARTS AND SCIENCES**

3 credits.

In collaboration with Tribal partners in Wisconsin, emphasize environmental science rooted in land stewardship and land management aligned with cultural values and Indigenous science processes. Experience the culture and ecology of a place while engaging in ecological restoration and stewardship, reflecting on relationships to the land and as global citizens. The intersection of Indigenous knowledge and Western science helps explain the need for a diversity of perspectives to respond to social and environmental justice in our changing world.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate the importance of legitimizing diverse cultural perspectives and knowledge, and forming equitable relationships in a multicultural society  
Audience: Undergraduate

2. Recognize Indigenous and other cultural groups' contributions to addressing environmental and social justice issues locally, regionally, and globally  
Audience: Undergraduate

3. Comprehend how past traumas of colonization and racism impact communities today along with how inaccurate assumptions impact all peoples  
Audience: Undergraduate

4. Apply an approach to restoration and stewardship that considers diverse perspectives and assets related to equity and inclusion  
Audience: Undergraduate

5. Reflect and deepen one's understanding of the ancestral and contemporary lands of the Ho-Chunk Nation on whose land UW-Madison resides  
Audience: Undergraduate

6. Experience firsthand the resiliency and self-determination of Indigenous communities in Wisconsin.  
Audience: Undergraduate

7. Apply the four guiding principles of respect, responsibility, relationship, and reciprocity with the land community (including human and non-human members) through work in restoration and stewardship.  
Audience: Undergraduate

8. Demonstrate understanding of Earth Partnership's 10 steps for restoration by applying appropriate steps to community-based projects and local Mound restoration efforts.  
Audience: Undergraduate

## LAND ARC 210 – INTRODUCTION TO LANDSCAPE ARCHITECTURE DESIGN STUDIO

4 credits.

Introduction to the techniques and processes used in solving three-dimensional design problems in the urban and natural environment through studio exercises. Understand how design process and design principles create physical and sensory experiences in our everyday lives. Develop fundamental verbal and graphic communication skills used in the professional design world. Gives attention to the basics of design theory and philosophy.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify how humans perceive, utilize and value both interior and exterior spaces

Audience: Undergraduate

2. Complete design processes used by landscape architects to create effective, sustainable, resilient, and human-scaled spaces and places.

Audience: Undergraduate

3. Illustrate spatial manipulations, with an emphasis on the analysis of space, two and three-dimensional ordering principles, designing in context, and basic design theories.

Audience: Undergraduate

4. Apply problem-solving skills and solution-generating activities on basic site design projects.

Audience: Undergraduate

5. Apply verbal, written, and graphic communication skills commonly used by landscape architects.

Audience: Undergraduate

## LAND ARC 211 – SHAPING THE BUILT ENVIRONMENT

3 credits.

Urban, suburban, and rural environments intersect with the natural environment in important yet complex ways. Cultural as well as biophysical systems influence the structure and function of these environments at both local and regional scales. Exploration of these relationships by analyzing built environments and simulating future design and planning scenarios offer a transdisciplinary foundation for subsequent coursework.

**Requisites:** None

**Course Designation:** Breadth - Natural Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the diverse range of cultural, biophysical, and socio-political factors that shape the built environments of North America.

Audience: Undergraduate

2. Understand the principles and theories of how the built environment influences human health, safety, and well-being, as well as community sustainability, resiliency, and quality of life.

Audience: Undergraduate

3. Demonstrate the ability to analyze, interpret, and communicate information portraying community character and sense of place across the urban, suburban, and exurban landscape.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of designing and planning within the built environment.

Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenge of designing and planning within the built environment.

Audience: Undergraduate

### LAND ARC/ART HIST/ENVIR ST/GEOG/HISTORY 239 – MAKING THE AMERICAN LANDSCAPE

3-4 credits.

Traces the history and evolution of the American cultural landscape from precolonial times to present. Explores how class, ethnic, and racial inequality have shaped the appearance of the American landscape over time, and how that landscape in turn has affected relationships between people and groups through the present day. Examines extraordinary things (civic structures (like our State Capitol), National Parks, War Memorials) and more ordinary kinds of places (mining towns, cotton plantations, sites of recreation and leisure, and suburban tract housing) to stimulate critical thinking about how these places have served people and groups unequally and disproportionately over time and across space. Considers complex meanings of American spaces and places to different people and groups, stimulating empathy and encouraging participation in a multicultural society.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and interpret the American landscape as a richly layered historical document mediated by complex relationships between people and groups

Audience: Undergraduate

2. Explain how the American cultural landscape has affected present day circumstances regarding ethnicity and race as well as racial and ethnic inequalities

Audience: Undergraduate

3. Articulate ways in which historical change manifest in buildings, enclosed spaces, and other elements of the American landscape reveal racial, ethnic, class and gender dynamics between and among people and groups over time

Audience: Undergraduate

4. Enlist forms of historical evidence – maps (current and historic), photographs (aerial and otherwise), historical newspapers, census records, deeds and land records – to interpret landscapes and landscape change

Audience: Undergraduate

5. Explain the American landscape as a product of competing interests, which will demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others

Audience: Undergraduate

### LAND ARC 250 – SURVEY OF LANDSCAPE ARCHITECTURE DESIGN

3 credits.

Principles of landscape and environmental design; incorporates elements of landscape planning and management. Provides background to the ideas and personalities shaping landscape architecture in America. Establishes design basics with a focus on the processes used by landscape architects to create meaningful site and context-sensitive designs in the built and natural environment.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain the many facets of Landscape Architecture, and the influence of landscape design on human health, safety, and welfare, and on both cultural and natural ecosystems.

Audience: Undergraduate

2. Identify the basic building blocks of design to understand how and why designed spaces are put together and be able to demonstrate the use of a landscape design process to create more sustainable designs.

Audience: Undergraduate

3. Identify and describe influential people, organizations, and ideas that have influenced the profession in the past and those that are contributing to it today.

Audience: Undergraduate

4. Summarize the profession of landscape architecture and their professional ethics and social and environmental responsibilities.

Audience: Undergraduate

5. Identify and compare the issues affecting our natural and cultural environments, such as climate change, and how landscape architecture addresses these concerns.

Audience: Undergraduate

6. Evaluate and analyze landscapes around us for enjoyment and an improved understanding of spatial awareness.

Audience: Undergraduate

7. Illustrate basic site design concepts and analysis data.

Audience: Undergraduate

### LAND ARC 260 – HISTORY OF LANDSCAPE ARCHITECTURE

3 credits.

A critical and historical analysis of our design of outdoor space.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**LAND ARC 261 – PRINCIPLES OF LANDSCAPE ARCHITECTURE DESIGN AND GRAPHICS**

4 credits.

Basic principles in the design of landscapes to aid in developing individual capacities and approaches to designing. Principles of graphic communication media and development of practical graphic skills.

**Requisites:** Declared in Landscape Architecture BLA

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**LAND ARC/PLANTSCI 263 – WOODY LANDSCAPE PLANT IDENTIFICATION, CULTURE, AND USE**

4 credits.

Field identification, landscape characteristics, uses, environmental requirements, and adaptability of woody ornamental plants; their autumn and winter characteristics. Topics include trees, shrubs, evergreens, vines and woody groundcovers.

**Requisites:** Sophomore standing and (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or BOTANY 100)

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Use basic taxonomic tools needed for plant identification, including classification, vegetative and reproductive morphology, and nomenclature of cultivated plants

Audience: Undergraduate

2. Recognize many woody ornamental trees, shrubs, groundcovers, and vines, both native and exotic, by family, species (genus and specific epithet), variety, cultivar, and sometimes trademark

Audience: Undergraduate

3. Discuss woody landscape plant identification, distribution, ornamental characteristics as well as undesirable features, culture, adaptability, and uses

Audience: Undergraduate

4. Select woody landscape plants for specific purposes and site conditions

Audience: Undergraduate

5. Identify appropriate reference material and guides for identifying woody landscape plants

Audience: Undergraduate

**LAND ARC/ANTHRO/ART HIST/DS/HISTORY 264 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**LAND ARC 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Independent study as arranged with a faculty member for Honors in the Major.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**LAND ARC 299 – INDEPENDENT STUDIES**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### LAND ARC 311 – INTRODUCTION TO DESIGN FRAMEWORKS AND SPATIAL TECHNOLOGIES

2 credits.

Geodesign considers questions and methods necessary to solve large, complicated, and significant design problems across a range of geographic scales. Introduces methods and technologies related to geodesign problems through interactive lessons, discussions, and laboratory exercises.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify key geodesign framework questions, models, and iterations

Audience: Undergraduate

2. Locate, evaluate, and interpret representation model data

Audience: Undergraduate

3. Identify the contributions of the interdisciplinary geodesign team and stakeholders in the geodesign framework

Audience: Undergraduate

4. Develop a functional understanding of the geospatial technologies used within the geodesign process

Audience: Undergraduate

### LAND ARC 321 – ENVIRONMENT AND BEHAVIOR STUDIO - DESIGNING HEALTH PROMOTING ENVIRONMENTS

4 credits.

Design studio with an emphasis on the application of design principles aimed at promoting people's health and wellbeing in the built environment.

**Requisites:** LAND ARC 261 and DS 221

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### LAND ARC 353 – LANDSCAPE ARCHITECTURAL TECHNOLOGY I

3 credits.

Problems dealing with the comprehension and modification of the earth's surface including landform design, preparation of grading plans, earthwork calculations.

**Requisites:** Declared in Landscape Architecture BLA

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### LAND ARC 354 – LANDSCAPE ARCHITECTURAL TECHNOLOGY II

3 credits.

Problems dealing with construction detailing, including roadways, drainage structures, construction materials, cost estimating, specifications and working drawings.

**Requisites:** Declared in Landscape Architecture BLA

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### LAND ARC 360 – EARTH PARTNERSHIP RESTORATION EDUCATION: INDIGENOUS ARTS & SCIENCES

1 credit.

Participate in a one-week community-based, intergenerational Institute focused on ecological restoration and water stewardship rooted in Indigenous knowledge while working with Native Nations in Wisconsin. An emphasis is on environmental science aligned with cultural values and indigenous science processes and address environmental, education and health issues through restoration and stewardship action. Learn culturally accurate and authentic resources about tribal sovereignty, history, and culture and contemporary issues relevant to each community. Through hands-on stewardship action, a greater sense of self and diversity of perspectives related to impacts of climate change and preserving biodiversity will be gained.

**Requisites:** Junior standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate the fundamental importance of legitimizing diverse cultural perspectives, knowledge and relationships with the environment.

Audience: Undergraduate

2. Demonstrate knowledge of WI Native Nations, including history, sovereignty, government structure, treaties and culture.

Audience: Undergraduate

3. Communicate effectively and professionally in our multicultural society informed by place (local culture, history, ecology).

Audience: Undergraduate

4. Articulate an approach to restoration education and stewardship that considers diverse perspectives and assets related educational equity and inclusion.

Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenge for water stewardship and Indigenous cultural practices related to impacts of climate change and preserving biodiversity.

Audience: Undergraduate

6. Analyze sustainability issues and/or practices using a systems-based approach including indigenous ways of knowing.

Audience: Undergraduate

**LAND ARC/ENVIR ST 361 – WETLANDS ECOLOGY**

3 credits.

Types, origins, settings, and structure of wetlands. Physical, biological, and cultural values, uses and assessments. Physical and biological characteristics and dynamics. Protection, management and restoration.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY 153, (BIOCORE 381 and 382), BIOLOGY/BOTANY 130, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**LAND ARC 363 – EARTH PARTNERSHIP: RESTORATION EDUCATION FOR EQUITY AND RESILIENCE**

3 credits.

Ecological restoration education utilizes the power of place to work towards social justice and sustainability. Work with Native Nations and community partners to apply Earth Partnership's 10 Step process. This process includes historical, cultural, ecological, and social justice components. Learn about assets-based, culturally relevant approaches to working with community partners. Interact with guest speakers and partners to experience firsthand different perspectives on environment, cultural priorities, protocols for interaction, and opportunities for relationship building. Work on community-based stewardship projects and reflect upon your epistemological relationship to land and people as global citizens.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate the fundamental importance of legitimizing diverse cultural perspectives, knowledge and relationships with the environment.

Audience: Undergraduate

2. Communicate effectively and professionally with community partners about environmental science and restoration informed by place (local culture, history, ecology).

Audience: Undergraduate

3. Reflect upon and share knowledge about local to global community collaboration, place-based education and the importance of historical socio-cultural perspectives for restoration in the community.

Audience: Undergraduate

4. Use sustainability principles for developing personal goals and professional values to reflect upon and articulate a personal land ethic or personal connection to the land and how it guides your actions.

Audience: Undergraduate

5. Articulate an approach to restoration education and stewardship that considers diverse perspectives and assets related to educational equity and inclusion.

Audience: Undergraduate

6. Apply sustainability principles and/or frameworks to addressing the challenge for water stewardship and Indigenous cultural practices related to impacts of climate change and preserving biodiversity.

Audience: Undergraduate

### LAND ARC 366 – INTRODUCTION TO ARCHITECTURAL AND ENVIRONMENTAL DESIGN

3 credits.

Introduces beginning design students to the interdisciplinary processes used in solving three-dimensional design problems for both exterior and interior spaces. Allows students to understand the integration between architectural design, site design and interior design, and how these design realms create physical and sensory experiences in our everyday lives. Helps students develop fundamental verbal and graphic communication skills used in the professional design world. Questions explored in this course include: How to humans experience their environment? How do we perceive and interact with spaces where we live, work, and play? What makes great interior and exterior spaces? How do designers think to solve creative spatial design problems?

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop an understanding of the design professions of architecture, landscape architecture, and interior design and how they integrate to create holistic environments for living, working, socialization, and recreation.

Audience: Undergraduate

2. Apply the design processes used by designers to create effective, sustainable, resilient, and human-scaled spaces and places.

Audience: Undergraduate

3. Understand how humans experience both interior and exterior spaces through a variety of design encounters.

Audience: Undergraduate

4. Increase awareness of spatial manipulation, with emphases on the analysis of space, two and three-dimensional ordering principles, designing in context, scale, and basic design theories.

Audience: Undergraduate

5. Develop an increased awareness of problem-solving and solution-generating activities, including the establishment of basic design and graphic communication skills that will be further developed in subsequent courses (and during your career as a designer).

Audience: Undergraduate

### LAND ARC/ENVIR ST/F&W ECOL/G L E/GEOG/GEOSCI 371 – INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING

3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.

**Requisites:** (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### LAND ARC 373 – MINDFULNESS IN RESTORATIVE ENVIRONMENTS

3 credits.

Explore the intersection of nature-based mindfulness practices and design of restorative outdoor environments that support health and well-being in public places, including school gardens, botanical gardens, and campus natural areas, with a focus on sensory engagement and sense of belonging. Design and co-design restorative environments and features through a participatory planning process with community partners.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply skills with which to observe, interpret, analyze, and design restorative outdoor environments in public places.

Audience: Undergraduate

2. Apply co-design and participatory planning methods and processes.

Audience: Undergraduate

3. Recognize and comprehend how specific environmental design approaches and features can support well-being of people in outdoor places.

Audience: Undergraduate

4. Recognize and apply concepts and theories of nature-based mindfulness and restorative natural environments.

Audience: Undergraduate

5. Apply principles of community-based engagement and learning for developing personal goals and professional values.

Audience: Undergraduate

6. Use knowledge to build empathy and appreciation for the complexities of one's own and other people's perspectives.

Audience: Undergraduate

### LAND ARC 375 – SPECIAL TOPICS

1-4 credits.

Exploration of special issues or problems in landscape architecture. Topic and faculty vary.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members.

Audience: Undergraduate

2. Understand, apply and evaluate the principles, theories and research findings underlying landscape architecture.

Audience: Undergraduate

3. Integrate social, cultural, ecological and technological dimensions in solving design problems.

Audience: Undergraduate

### LAND ARC 380 – PLANTS FOR ECOLOGICAL DESIGN I

2 credits.

Plants as the basis for ecological landscape design in urban and rural settings in late summer, fall, and early winter and their role in creating beautiful, resilient, and high performing outdoor spaces that enhance human health and well-being and provide a number of global ecosystem services. Study plants in their native and designed habitats to understand the relationships between and among plants and their environment. Identify the aesthetic, structural, functional, and cultural characteristics of key Wisconsin native plants and a variety of non-invasive horticultural species as well as the composition, structure, and functions of forest, wetland, and grassland communities. Express the essence and cultural meaning of plants and plant communities through hand and digital graphics and writing.

**Requisites:** LAND ARC 250, (BOTANY 100, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381 and 382), and sophomore standing, or graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the aesthetic, functional, and cultural characteristics of key native plants of Wisconsin's forests, wetlands and grasslands as well as a variety of horticultural species as they appear in late summer, fall, and early winter. Use them together to create beautiful, resilient and high performing outdoor spaces that enhance human health and well-being and provide global ecosystem services

Audience: Both Grad & Undergrad

2. Match the plant species used in design to the unique environmental conditions of each site so that they enhance and do not detract from beneficial ecosystem services.

Audience: Both Grad & Undergrad

3. Compile a personal plant portfolio consisting of a minimum of 50 woody and herbaceous plants and information on each plant's form, function and ecosystem contributions

Audience: Both Grad & Undergrad

4. Select plants for a landscape design using a process that begins with and is guided by an understanding of the composition, structure, and dynamics of the natural plant communities found in the region

Audience: Both Grad & Undergrad

5. Perform a literature review of current understandings of the ecosystem services provided by specific plants or propose an experiment or monitoring system to measure ecosystem services in the field.

Audience: Graduate

6. Use hand graphics, notes, and mapping and sampling techniques to illustrate the character of individual plants and the composition and structure of plant communities in the field.

Audience: Both Grad & Undergrad

7. Apply sustainability principles and/or frameworks to address the challenges of creating sustainable cities and communities, and prevent the extinction of species

Audience: Both Grad & Undergrad

8. Use sustainability principles for developing personal goals and professional values

Audience: Both Grad & Undergrad

**LAND ARC 381 – PLANTS FOR ECOLOGICAL DESIGN II**

1 credit.

Plants as the basis for ecological landscape design in urban and rural settings. Study plants in their native and designed habitats to understand the relationships between and among plants and their environment in late winter and early spring. Identify the aesthetic, functional, and cultural characteristics of key Wisconsin native plants and plant communities as well as a variety of non-invasive horticultural species. Discuss how to use plants together in settings with environmental conditions to which they are adapted in order to create resilient and high-performing outdoor spaces that enhance human health and well-being and provide a number of global ecosystem services.

**Requisites:** LAND ARC 380 or Graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the abilities of plant species to establish, grow and successfully meet design goals based on ultimate size and shape at various life stages, rate of growth, ecological relationships, and aesthetic characteristics of leaves, bark, flower, fruit, habit, and form in both urban and rural settings.

Audience: Both Grad & Undergrad

2. Select plants for a landscape design using a process that begins with and is guided by an understanding of the composition, structure, and dynamics of the natural plant communities found in the region

Audience: Both Grad & Undergrad

3. Use hand graphics, notes, and mapping and sampling techniques to illustrate the character of individual plants and the composition and structure of plant communities in the field to compile a personal plant portfolio for future reference consisting of a core set of 50 or more plant species in late winter and early spring growing conditions

Audience: Both Grad & Undergrad

4. Perform a literature review of current understandings of the ecosystem services provided by specific plants or propose an experiment or monitoring system to measure services in the field.

Audience: Graduate

5. Apply sustainability principles and/or frameworks to address the challenges of creating sustainable cities and communities, and prevent the extinction of species

Audience: Both Grad & Undergrad

6. Use sustainability principles for developing personal goals and professional values

Audience: Both Grad & Undergrad

**LAND ARC 397 – INTERNSHIP IN LANDSCAPE ARCHITECTURE**

1 credit.

Integrate knowledge and theory learned in the classroom with practical application and skills development in a professional setting. Includes applied experience and making professional connections in the field of landscape architecture. Apply landscape architecture concepts, practice problem solving-skills, explore multidisciplinary approaches, develop team-work and interpersonal skills, access and use information resources, reflect upon or address ethical and professional issues.

**Requisites:** Sophomore standing and declared in Landscape Architecture BLA

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and be able to articulate the day-to-day workings of office culture, including professionalism, ethical office conduct, and proper methods of communication in landscape architecture

Audience: Undergraduate

2. Describe and apply professional relationships with clients and with other business partners (e.g., contractors, product vendors)

Audience: Undergraduate

3. Competently apply landscape architecture concepts in a professional work environment

Audience: Undergraduate

4. Demonstrate ability to apply design theories to solve practical design problems at a variety of scales

Audience: Undergraduate

5. Demonstrate ability to apply design communication skills in a professional setting

Audience: Undergraduate

**LAND ARC 400 – STUDY ABROAD IN LANDSCAPE ARCHITECTURE**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Current enrollment in a UW-Madison study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**LAND ARC 460 – ADVANCED VISUAL COMMUNICATION IN LANDSCAPE ARCHITECTURE**

3 credits.

Focuses on the symbolic and representational computer graphics that are essential elements of design communication in landscape architecture. Reviews the strengths and weaknesses of hand and digital media and the use of both when appropriate. Topics and assignments include advanced hand sketching and graphics, computer graphic techniques, digital photography, advanced digital color theory and rendering, digital image processing, CAD drafting, 2D/3D modeling, image compositing, media formats, and video.

**Requisites:** LAND ARC 261

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**LAND ARC/URB R PL 463 – EVOLUTION OF AMERICAN PLANNING**

3 credits.

The nature and cultural significance of contemporary methods for the systematic formulation of public policies for community, metropolitan, and state development through comprehensive planning. Historic roots, recent trends and new directions in American planning concepts, institutions and professional specializations.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**LAND ARC/CHICLA 475 – LATINO URBANISM: DESIGN AND ENGAGEMENT IN THE AMERICAN CITY**

3 credits.

Urban design in the 21st century American city explores a new understanding of urban placemaking and development. Explores the intersections of culture, place, and design to critically address how the socioeconomic dynamics that underlie demographic shifts in the U.S. are influencing urban change in the American landscape. Focuses on the evolution and ways by which Latinos shape the built environment, both in the public realm and in the home.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the role that design, planning, and public engagement have in addressing the needs of Latino communities in the U.S.

Audience: Undergraduate

2. Evaluate through a historical lens how socio-economic conditions of Latinos influence choices in the contemporary American city

Audience: Undergraduate

3. Use real world examples to demonstrate how diversity and culture can impact regions, governments, and economies for producing a just city

Audience: Undergraduate

4. Understand the concept of justice in the city through both qualitative and quantitative measure

Audience: Undergraduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges as they relate to planning for Latino communities.

Audience: Undergraduate

6. Analyze the causes of and solutions for the sustainability challenge of marginalized population groups.

Audience: Undergraduate

**LAND ARC 511 – GEODESIGN METHODS AND APPLICATIONS**

3 credits.

Explore and apply methods and technologies used in the geodesign framework that emphasize collaboration among the design professions, the natural and social sciences, and community stakeholders. Exercises will focus on scenarios within the built and natural environment.

**Requisites:** LAND ARC 311, GEOG/CIV ENGR/ENVIR ST 377, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Determine and articulate processes and approaches of a geodesign framework

Audience: Both Grad & Undergrad

2. Assemble, analyze, and share information within each geodesign model

Audience: Both Grad & Undergrad

3. Build and deploy tools for data collection and citizen engagement

Audience: Both Grad & Undergrad

4. Create design iterations, evaluations, and impact analyses using geodesign tools

Audience: Both Grad & Undergrad

5. Apply sustainability principles and/or frameworks to address the challenge of adaptation and landscape change within the built and natural environment

Audience: Both Grad & Undergrad

6. Analyze sustainability issues and/or practices using a systems-based approach

Audience: Both Grad & Undergrad

7. Evaluate published literature related to geodesign principles.

Audience: Graduate

**LAND ARC 525 – SOCIAL JUSTICE AND THE URBAN LANDSCAPE**

3 credits.

Examines the cultural, social and political interactions that occur in urban landscapes including parks, plazas, streets and other public open spaces. An examination of past and present landscapes as sites of the struggle for social justice. The focus is on urban landscapes of the United States.

**Requisites:** Junior standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Understand how urban landscapes shape struggles for social justice

Audience: Undergraduate

2. Acquire and apply skills with which to analyze the social dimensions of urban landscapes

Audience: Undergraduate

3. Recognize and understand how specific design features influence social relations

Audience: Undergraduate

4. Describe how landscape design styles and ideologies are constitutive of social relations through time and how these continue to operate in contemporary urban landscapes

Audience: Undergraduate

5. Apply concepts and theories of social justice to analyze urban landscape design in terms of race, ethnicity, immigration status, gender, and socioeconomic status, among others

Audience: Undergraduate

6. Apply visual methodologies to reveal the meaning of design drawings, photographs, art as well as assemblages such as landscapes, websites, news articles, videos among others

Audience: Both Grad & Undergrad

7. Apply discourse theory to the web of landscape representations to explain struggles for social justice

Audience: Graduate

**LAND ARC/ENVIR ST/GEOG/URB R PL 532 – APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN PLANNING**

3 credits.

Explores planning-related Geographic Information System (GIS) data, applications, analytical tools, and implementation issues.

**Requisites:** GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify how planning agencies use GIS.

Audience: Both Grad & Undergrad

2. Explain the nature, characteristics, and possible ways of analyzing spatial data in a planning context.

Audience: Both Grad & Undergrad

3. Communicate geospatial data and analyses effectively.

Audience: Both Grad & Undergrad

4. Obtain and analyze geospatial data using a range of spatial analysis tools for a number of planning practices.

Audience: Both Grad & Undergrad

5. Conduct site-selection and land-suitability analysis.

Audience: Both Grad & Undergrad

6. Identify ethical issues surrounding access to and use of geospatial data.

Audience: Both Grad & Undergrad

7. Analyze and provide written feedback on undergraduate student presentations.

Audience: Graduate

8. Produce a memo on land-suitability analysis.

Audience: Graduate

**LAND ARC 550 – PROFESSIONAL PRACTICE IN LANDSCAPE ARCHITECTURE**

3 credits.

Introduction to operational procedures used in professional offices ranging from private landscape architectural design firms to public agencies.

**Requisites:** Senior standing and declared in Landscape Architecture BLA

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**LAND ARC/CIV ENGR/ENVIR ST 556 – REMOTE SENSING DIGITAL IMAGE PROCESSING**

3 credits.

Techniques of enhancement and quantification of remote sensing imagery. Emphasis on processing and analyzing data gathered by airborne and satellite sensors. Techniques to quantitatively analyze data from photography, electro-optical scanners, satellite systems, and radar and passive microwave systems. Applications to: agriculture and forestry, geology and soils, water quality, and urban and regional planning.

**Requisites:** LAND ARC/ENVIR ST/F&W ECOL/G L E/GEOG/GEOSCI 371, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**LAND ARC 560 – PLANTS AND ECOLOGY IN DESIGN**

4 credits.

Explores the process of plant selection and placement in the landscape. The desired landscape will be ecologically appropriate to the setting, sustainable, functional in response to goals, and aesthetically pleasing. Acquire an awareness and understanding of the physical characteristics of plant materials and a sensitivity to their needs based on past and present. Emphasis on the recognition of the philosophy of planting design as a dynamic and changing spatial art and science, the relationship between environment and plants, application of design composition principles to plant selection and placement, and functional and utilitarian uses of plants; i.e., the opportunities and constraints for plants in the designed landscape.

**Requisites:** Declared in Landscape Architecture BLA and PLANTSCI/LAND ARC 263

**Course Designation:** Breadth – Natural Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**LAND ARC 561 – HOUSING AND URBAN DESIGN**

4 credits.

An application of landscape design principles and problem-solving methods to housing and urban issues with attention to physical site design, land-use controls, and the relationship between housing and associated land uses. The built environment is continuously changing through multiple land development-and redevelopment-decisions. Public policies on housing, transportation, mortgage financing, and taxation, in conjunction with changing demographics and lifestyle preferences, are just some of the factors that influence the evolving structure and function of the built environment. Landscape architects can play important roles--through design, civic engagement, and policy advocacy--in making our cities and suburbs healthier and more sustainable. Studio projects focus on the central city and/or suburbs.

**Requisites:** LAND ARC 321

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**LAND ARC 562 – URBAN DESIGN AND OPEN SPACE SYSTEMS**

4 credits.

With a focus on public open spaces as shared social places, emphasizes the social dimensions and connectedness of urban design and open space systems through perspectives from allied disciplines, such as landscape architecture, architecture, urban planning, real estate development, urban ecology, civil engineering, and the visual arts. Integrates human activity requirements and experiences with physical (or built) and natural site features. Builds upon technical design skills developed in prior studio work, paying close attention to form-giving, place-making, and sustainability at the site and neighborhood scale.

**Requisites:** LAND ARC 321 and 560**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify how land use regulations and other public policies shape the built environment and which, in turn, influence human health, safety, and well-being

Audience: Undergraduate

2. Describe how networks of formal and informal open spaces function in a variety of urban contexts and are planned and designed by interdisciplinary teams

Audience: Undergraduate

3. Describe how individuals and social groups interact in and respond to particular open space settings and land uses

Audience: Undergraduate

4. Illustrate urban design principles and best practices that influence architectural massing and placement in relationship to transportation and open spaces systems

Audience: Undergraduate

5. Demonstrate how open space can function as sustainable social, economic, and environmental infrastructure systems that support human health and well-being

Audience: Undergraduate

**LAND ARC 563 – DESIGNING SUSTAINABLE AND RESILIENT REGIONS**

4 credits.

Exploration of broad scale design issues to develop synthesis and design skills. Uses spatial form and bioregional cultural, ecological and environmental concepts to solve land use and conservation problems. Regional design requires advanced techniques for inventory, analysis, and design to help in understanding complex trends, policy and design impacts, hazard mitigation, design intervention suitability, design guidelines, and systems level design. These techniques help us explore the relationships between regions and sites, especially regional implications of site design decisions and site design impacts on regional characteristics and systems.

**Requisites:** LAND ARC 562**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**LAND ARC/F&W ECOL/ZOOLOGY 565 – PRINCIPLES OF LANDSCAPE ECOLOGY**

2 credits.

Emphasizes the importance of spatial patterns at broad scales. Concepts and applications are covered.

**Requisites:** (ZOOLOGY/BOTANY/F&W ECOL 460 or F&W ECOL 550) and (STAT 301, 371, or F&W ECOL/STAT 571), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2019

## **LAND ARC/ENVIR ST 581 – PRESCRIBED FIRE: ECOLOGY AND IMPLEMENTATION**

3 credits.

Covers the use of live fire in land management and provides a background in fire ecology, fire behavior, fire effects, and the prediction of fire behavior for wetland, prairie and savanna fuels. Instruction includes field training with live fire exercises and the use of fire management equipment. Participate in prescribed burns outside of scheduled class times. Confers certificates of completion that qualify an individual to participate on prescribed fire crews with public and private sector organizations.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand fire ecology, the role that fires play in shaping fire-adapted ecosystems, and the use of prescribed fire for land management.

Audience: Both Grad & Undergrad

2. Qualify for working on any prescribed burn or fire suppression crew located anywhere in the U.S., and become familiar with organizations providing experiences using prescribed fire.

Audience: Both Grad & Undergrad

3. Become familiar with the restoration history, including the role of fire, for the UW Arboretum.

Audience: Both Grad & Undergrad

4. Demonstrate safe and appropriate use of Protective Personal Equipment (PPE) for fire.

Audience: Both Grad & Undergrad

5. Demonstrate proficient knowledge of national standards for participating in prescribed burn or fire suppression crews anywhere in the U.S.

Audience: Both Grad & Undergrad

6. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of fire for land management.

Audience: Both Grad & Undergrad

7. Apply sustainability principles and/or frameworks to addressing the challenge and fundamental concepts related to fire ecology in the Upper Midwest.

Audience: Both Grad & Undergrad

8. Gain enhanced knowledge and skills for fire management leadership.

Audience: Graduate

9. Demonstrate applied knowledge of fire ecology and the effects of fire on plant, fungi or animal communities.

Audience: Graduate

## **LAND ARC 590 – SPECIAL TOPICS**

1-4 credits.

Exploration of special issues or problems in landscape architecture.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2022

**Learning Outcomes:** 1. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members to identify and solve complicated landscape and planning problems.

Audience: Both Grad & Undergrad

2. Understand, analyze, and apply design and planning theories and principles to urban and rural landscapes to benefit human living conditions.

Audience: Both Grad & Undergrad

3. Integrate humanistic, scientific, legal, political, economic, social, ecological, and technological dimensions in solving novel design and planning problems concerning the betterment of rural and urban natural and cultural landscapes.

Audience: Both Grad & Undergrad

4. Demonstrate advanced critical thinking and the ability to explore ideas in depth and synthesize information with a high degree of competence.

Audience: Graduate

5. Demonstrate an advanced understanding of landscape spaces, functions, and dynamics, as well as interactions between people and the built and natural environment.

Audience: Graduate

6. Engage critically with the scholarship and theory of landscape architecture.

Audience: Graduate

**LAND ARC 610 – LANDSCAPE ARCHITECTURE CAPSTONE I**

3 credits.

Develop a comprehensive design and planning proposal that defines a real-world client's needs, program, goals, and objectives from a regional to site scale. Covers project research, site visits, literature review, precedent studies, inventory and analysis mapping, and programmatic development studies.

**Requisites:** LAND ARC 562

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Acquire base materials and data, and prepare a GIS database

Audience: Undergraduate

2. Manage project relationships with clients and other stakeholder groups

Audience: Undergraduate

3. Conduct design and planning critiques of peer projects

Audience: Undergraduate

4. Inventory and analyze relevant aspects of the region, community, and site (historic to present)

Audience: Undergraduate

5. Analyze client goals and develop a list of preliminary program for a framework plan

Audience: Undergraduate

6. Define the project goals, scope, and evaluation criteria

Audience: Undergraduate

7. Produce a critical review of the literature relevant to your research topic

Audience: Undergraduate

8. Produce a critical review of precedent projects relevant to your type of project and program

Audience: Undergraduate

9. Produce an initial community framework plan with programmatic spatial recommendations

Audience: Undergraduate

10. Produce final base materials for community and site scale design and planning

Audience: Undergraduate

11. Present and defend capstone project proposal

Audience: Undergraduate

**LAND ARC 611 – LANDSCAPE ARCHITECTURE CAPSTONE II**

4 credits.

Problems in landscape design, planning, and management of projects from a regional to site scale. Provides an opportunity for synthesis of the knowledge, skills, and approaches learned in previous course work.

**Requisites:** LAND ARC 610

**Course Designation:** Gen Ed - Communication Part B

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate competence and critical judgement in applying intellectual and technical skills necessary for site and landscape-scale design, in particular skills of problem-solving using site inventory/analysis; spatial/temporal analysis; programming; synthesis; oral, written, and visual communication; construction implementation; and post-occupancy evaluation.

Audience: Undergraduate

2. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members to identify and solve complicated landscape design and planning problems.

Audience: Undergraduate

3. Understand, apply, and evaluate the principles, theories, and recent research findings in the discipline of landscape architecture.

Audience: Undergraduate

4. Integrate humanistic, scientific, legal, political, economic, social, ecological, and technological dimensions in solving novel design and planning problems concerning the betterment of rural and urban natural and cultural landscapes.

Audience: Undergraduate

5. Understand, analyze, and apply design and planning theories and principles to urban and rural landscapes to benefit human living conditions.

Audience: Undergraduate

**LAND ARC 621 – DESIGNING HEALTHY COMMUNITIES SEMINAR**

3 credits.

Sustainable community planning and design principles aimed at promoting human health and wellbeing as it relates to the quality of the physical environment. Special topics include access to settings that promote physical activity, social interaction and mental restoration; walk- and bikeability; access healthy food, complete streets, place-making, and biophilic design, active living assessment tools, and architectural sustainability certification systems focusing on the health benefits of good community design.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Think critically about the impact the physical environment has on people and the role environmental designers play in creating healthy places.

Audience: Graduate

2. Identify and summarize relevant literature by noted authors in the field and encourage them to seek further knowledge by exploring research, precedents and best-case scenarios.

Audience: Graduate

3. Demonstrate knowledge about health problems that intersect with the physical environment.

Audience: Graduate

4. Integrate environment-health performance standards and metrics and their functional value in design programming.

Audience: Graduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of active living in the built environment.

Audience: Graduate

6. Apply sustainability principles and/or frameworks to addressing the challenge of health promotion through planning and design of public open space.

Audience: Graduate

**LAND ARC/DS 639 – CULTURE AND BUILT ENVIRONMENT**

3 credits.

Explores cultural values embedded in buildings through understanding physical configurations, social organizations, practiced/symbolic/representational aspects of buildings. Covers a wide range of cultures and the built environments they produce including examples from the Americas, the Middle East, as well as those of the many ethnic minorities in the U.S.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**LAND ARC 668 – RESTORATION ECOLOGY**

3 credits.

Restoration is an approach to the conservation of native species, plant communities, and ecosystems. It is an interdisciplinary global enterprise practiced by private and public sector professionals and dedicated volunteers of all ages. Covers both the theory and practice of restoration ecology and examine the current opportunities, challenges, and controversies that underlie the field. The goal may be to preserve nature, but restoration is a fundamentally human enterprise-it is accomplished for and by people. Therefore we cover information from ecology, sociology, and the humanities.

**Requisites:** BIOCORE 381, ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY/BIOLOGY 102, BIOLOGY/BOTANY 130, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### LAND ARC 677 – CULTURAL RESOURCE PRESERVATION AND LANDSCAPE HISTORY

3 credits.

Provides an introduction to cultural landscape studies as a corollary to cultural conservation in public folklore, environmental planning, natural and cultural resource management, landscape architecture, and the history of landscape architecture. Includes varied concepts of cultural landscape, key historical and cultural landscape research methodologies, and a range of preservation and conservation types involving cultural landscapes, traditional cultural properties, and intangible and tangible cultural heritage. Observe, research, and write about cultural landscapes, gain an understanding of cultural, historical, and natural dynamics of the (built) environment, and become acquainted with aspects of cultural conservation and landscape preservation nationally and internationally.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### LAND ARC 681 – SENIOR HONORS THESIS

2-4 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### LAND ARC 682 – SENIOR HONORS THESIS

2-4 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### LAND ARC 691 – SENIOR THESIS

4 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2001

### LAND ARC 692 – SENIOR THESIS

4 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 1996

### LAND ARC/ENVIR ST/SOIL SCI 695 – APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCES

3 credits.

Modern GIS desktop and web-based workflows, analyses, and visualizations related to natural resource and environmental planning issues and communication. Guest lectures from agency and industry professionals.

**Requisites:** LAND ARC 311, ENVIR ST/CIV ENGR/GEOG 377, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop and apply appropriate geospatial analysis workflows related to the study and conservation of natural resources.

Audience: Both Grad & Undergrad

2. Identify and evaluate sources of primary and secondary geospatial data.

Audience: Both Grad & Undergrad

3. Develop methods for collecting primary geospatial data

Audience: Both Grad & Undergrad

4. Communicate analytical results in visual and graphical forms.

Audience: Both Grad & Undergrad

5. Evaluate literature related to geospatial technologies in environmental science and natural resource issues.

Audience: Graduate

### LAND ARC 699 – SPECIAL PROBLEMS-LANDSCAPE ARCHITECTURE

1-5 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### LAND ARC 710 – THEORIES OF LANDSCAPE CHANGE

2 credits.

Theories of landscape change in the arts and sciences. Contributions of the scientific method and humanistic frameworks to major issues in landscape architecture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**LAND ARC 720 – CRITICAL INQUIRY INTO LANDSCAPE DESIGN EXPRESSION**

2 credits.

Normative design theory as it relates to historical and contemporary aesthetic expression in landscape design. Review of critical theory and meaning associated with a broad landscape architecture typology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**LAND ARC 740 – RESEARCH IN LANDSCAPE ARCHITECTURE**

3 credits.

Overview of research: Logic and language of the process, substantive issues, criticism of research literature, developments of detailed proposals.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**LAND ARC/ANTHRO/ART HIST/DS/HISTORY 764 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**LAND ARC 866 – SEMINAR IN NATURAL PLANT COMMUNITY RESTORATION AND MANAGEMENT**

1 credit.

Presentations on topics related to plant community management and restoration.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**LAND ARC 940 – GRADUATE SEMINAR**

1-2 credits.

Individual research, group discussion and workshop covering selected problems relating to the environment and landscape architecture.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**LAND ARC 990 – RESEARCH**

1-12 credits.

Individual mentored research and study for completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**LAND ARC 999 – INDEPENDENT STUDIES**

1-3 credits.

Opportunity to explore concepts or issues of interest.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**LATIN (CLASSICS) (LATIN)****LATIN 103 – FIRST SEMESTER LATIN**

4 credits.

Forms and syntax, with simple translation.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Recognize, identify, and explain basic forms of the classical Latin language.

Audience: Undergraduate

2. Recognize, identify, and explain basic syntax of the classical Latin language.

Audience: Undergraduate

3. Recognize, identify, and explain basic vocabulary of the classical Latin language.

Audience: Undergraduate

**LATIN 104 – SECOND SEMESTER LATIN**

4 credits.

Forms and syntax, with translation of easy prose.

**Requisites:** LATIN 103

**Course Designation:** Frgn Lang – 2nd semester language course  
Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize, identify, and explain most forms of the classical Latin language.

Audience: Undergraduate

2. Recognize, identify, and explain most syntax of the classical Latin language.

Audience: Undergraduate

3. Recognize, identify, and explain most vocabulary of the classical Latin language.

Audience: Undergraduate

**LATIN 305 – THIRD SEMESTER LATIN**

4 credits.

Brief review of Latin grammar and vocabulary. Extensive reading from several authors.

**Requisites:** LATIN 104, 391, or graduate/professional standing

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize, identify, and explain all forms of the classical Latin language.

Audience: Undergraduate

2. Recognize, identify, and explain all syntax of the classical Latin language.

Audience: Undergraduate

3. Recognize, identify, and explain all vocabulary of the classical Latin language.

Audience: Undergraduate

**LATIN 306 – FOURTH SEMESTER LATIN**

4 credits.

Close literary analysis of the structure, style, and language of several Roman poets and prose writers. A critical rather than a purely historical approach to these authors.

**Requisites:** LATIN 305 or graduate/professional standing

**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Latin texts.

Audience: Undergraduate

2. Demonstrate accuracy in translation of classical Latin texts.

Audience: Undergraduate

3. Demonstrate basic competency in reading continuous classical Latin texts.

Audience: Undergraduate

**LATIN 391 – ELEMENTARY INTENSIVE LATIN**

4 credits.

An intensive introduction to the grammar and vocabulary of Classical Latin, the language of ancient Rome. Complete the equivalent of LATIN 103 104 in a single semester. Gain skills in preparation for reading Latin authors in the original. While focus is primarily on written grammar and translation, also touches on aspects of Roman culture, history and literature.

**Requisites:** Not open to students with credit for LATIN 103 or 104

**Course Designation:** Frgn Lang – 2nd semester language course  
Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize, identify, and explain most forms of the classical Latin language.

Audience: Undergraduate

2. Recognize, identify, and explain most syntax of the classical Latin language.

Audience: Undergraduate

3. Recognize, identify, and explain most vocabulary of the classical Latin language.

Audience: Undergraduate

4. Through intensive study, acquire and demonstrate skills necessary for reading Latin authors.

Audience: Undergraduate

### **LATIN 401 – READINGS IN LATIN LITERATURE**

3 credits.

Writers of the Republic studied in a historical and cultural context.

**Requisites:** LATIN 306 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frqn Lang - 5th + semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Latin texts.

Audience: Both Grad & Undergrad

2. Apply competency in reading continuous classical Latin texts.

Audience: Both Grad & Undergrad

3. Demonstrate basic critical reading skills of classical Latin texts.

Audience: Both Grad & Undergrad

4. Demonstrate competency in reading continuous Latin texts related to the student's area of research.

Audience: Graduate

### **LATIN 505 – ELEMENTARY PROSE COMPOSITION**

3 credits.

Survey of Latin syntax and idioms.

**Requisites:** LATIN 302 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Analyze ancient classical Latin texts.

Audience: Undergraduate

2. Interpret ancient classical Latin texts.

Audience: Undergraduate

3. Evaluate ancient classical Latin texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

### **LATIN 515 – VERGIL**

3 credits.

Through intensive translation and discussion of Vergil's Latin, hone ability to translate, interpret, and discuss Latin poetry.

**Requisites:** LATIN 302 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Analyze ancient classical Latin texts.

Audience: Undergraduate

2. Interpret ancient classical Latin texts.

Audience: Undergraduate

3. Evaluate ancient classical Latin texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

**LATIN 519 – LATIN POETRY**

3 credits.

Latin poetry of the Republic and/or Empire.

**Requisites:** LATIN 302 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze ancient classical Latin texts.

Audience: Undergraduate

2. Interpret ancient classical Latin texts.

Audience: Undergraduate

3. Evaluate ancient classical Latin texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

**LATIN 520 – ROMAN DRAMA**

3 credits.

Plautus, Terence, Seneca, fragmentary remains of Republican drama, and classical and post-classical receptions. Includes discussion of genre, performance, and sociohistorical context

**Requisites:** LATIN 302 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**LATIN 523 – ROMAN SATIRE**

3 credits.

One or a combination of: fragments of Lucilius; Horace; Persius, Juvenal; later satire poets.

**Requisites:** LATIN 302 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Analyze ancient classical Latin texts.

Audience: Undergraduate

2. Interpret ancient classical Latin texts.

Audience: Undergraduate

3. Evaluate ancient classical Latin texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

**LATIN 524 – ROMAN NOVEL**

3 credits.

One or a combination of : Petronius, Cena Trimalchionis, Satyricon; Apuleius, Cupid and Psyche, Metamorphoses; other Roman novels.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **LATIN 539 – LATIN HISTORICAL WRITERS**

3 credits.

One of the following: (a) Cicero, Epistles, (b) Pliny, Epistles, (c) Caesar, (d) Sallust, (e) Livy, (f) post Augustan historians, (g) historians of the late Empire.

**Requisites:** LATIN 302 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Analyze ancient classical Latin texts.

Audience: Undergraduate

2. Interpret ancient classical Latin texts.

Audience: Undergraduate

3. Evaluate ancient classical Latin texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

### **LATIN 549 – LATIN PHILOSOPHICAL WRITERS**

3 credits.

One of the following: (a) Cicero's philosophical works, (b) Seneca, (c) Latin patristic writers.

**Requisites:** LATIN 302 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Analyze ancient classical Latin texts.

Audience: Undergraduate

2. Interpret ancient classical Latin texts.

Audience: Undergraduate

3. Evaluate ancient classical Latin texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

### **LATIN 559 – LATIN ORATORY**

3 credits.

One of the following: (a) Cicero, Orations, (b) Roman rhetoric.

**Requisites:** LATIN 302 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**LATIN/MEDIEVAL 563 – MEDIAEVAL LATIN**

3 credits.

Introduction to chronological, geographical, and generic range of post-classical Latin, including not only the "medieval" period but the late antique, Renaissance, and beyond.

**Requisites:** LATIN 306 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Analyze ancient classical Latin texts.

Audience: Undergraduate

2. Interpret ancient classical Latin texts.

Audience: Undergraduate

3. Evaluate ancient classical Latin texts.

Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.

Audience: Graduate

**LATIN 571 – ADVANCED READINGS IN LATIN LITERATURE**

3 credits.

Advanced practice in analyzing, evaluating, and interpreting ancient Latin texts.

**Requisites:** LATIN 401 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Analyze ancient Latin texts

Audience: Both Grad & Undergrad

2. Evaluate ancient Latin texts

Audience: Both Grad & Undergrad

3. Interpret ancient Latin texts

Audience: Both Grad & Undergrad

4. Explain and assess the position of the covered texts in relation to the classical and near eastern tradition

Audience: Both Grad & Undergrad

5. Demonstrate competence in current scholarly approaches to course readings

Audience: Graduate

**LATIN 681 – HONORS THESIS**

3 credits.

Individual mentored study for students completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Analyze, interpret, and evaluate ancient classical Latin texts.

Audience: Undergraduate

2. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

3. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.

Audience: Undergraduate

### **LATIN 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

### **LATIN 691 – SENIOR THESIS**

3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Analyze, interpret, and evaluate ancient classical Latin texts.

Audience: Undergraduate

2. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.

Audience: Undergraduate

3. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.

Audience: Undergraduate

### **LATIN 692 – SENIOR THESIS**

3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### **LATIN 699 – DIRECTED STUDY**

1-3 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze ancient classical Latin texts.

Audience: Both Grad & Undergrad

2. Interpret ancient classical Latin texts.

Audience: Both Grad & Undergrad

3. Evaluate ancient classical Latin texts.

Audience: Both Grad & Undergrad

4. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.

Audience: Both Grad & Undergrad

5. Explain and assess the position of the topic in relation to the classical and near eastern tradition.

Audience: Graduate

### **LATIN 890 – INDIVIDUAL RESEARCH THESIS**

1-12 credits.

Mentored reading, writing, and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **LATIN 950 – SEMINAR-ORATORY**

3 credits.

Examine topics relevant to the ancient and modern worlds through analysis of Latin texts.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**LATIN 970 – ADVANCED SEMINAR IN LATIN LITERATURE**

3 credits.

Advanced study in ancient Latin language, secondary scholarship, and ancient modern literary interpretation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Analyze ancient classical Latin texts

Audience: Graduate

2. Evaluate ancient classical Latin texts

Audience: Graduate

3. Interpret ancient classical Latin texts

Audience: Graduate

4. Explain and assess the position of the covered texts in relation to the classical and near eastern tradition

Audience: Graduate

5. Demonstrate competence in current scholarly approaches to course readings

Audience: Graduate

## LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES (LACIS)

**LACIS/HISTORY/INTL ST 242 – MODERN LATIN AMERICA**

3-4 credits.

A broad overview of Latin American history in the modern period, since independence but with a primary focus on the twentieth century. Particular emphasis will be placed on the socioeconomic, cultural, and political structures and processes that shaped and continue to influence life in Latin America. Key issues such as colonialism, nationalism, democracy, and revolution will be examined critically in light of broad comparative themes in Latin American and world history. Among the topics to be explored in detail will be the Mexican and Cuban revolutions, populism and dictatorship, socialism and neoliberalism, and drugs and migration.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Describe the contours of Latin American history in the period since independence

Audience: Undergraduate

2. Apply and use key concepts relevant to Latin American history, such as imperialism, inequality, populism, socialism, neoliberalism

Audience: Undergraduate

3. Read for a dedicated purpose across different genres and forms of writing

Audience: Undergraduate

4. Apply historical reasoning to understand the origins of present-day issues

Audience: Undergraduate

5. Communicate effectively through presentations, discussion, and written work

Audience: Undergraduate

**LACIS/HISTORY 243 – COLONIAL LATIN AMERICA: INVASION TO INDEPENDENCE**

3-4 credits.

An introductory survey of colonial Latin American history, from the late fifteenth to the early nineteenth century. Examines developments in Spanish and Portuguese America by reading both secondary and primary sources. Beginning with fifteenth-century Europe, the Americas and West Africa, discusses European expansion and invasion, first contacts between the so-called Old and the so-called New Worlds, as well as the role of religion, sexuality, gender, labor and production, trade and exchange, and politics. Each week, a central question will address the topic for that week. Become familiar with and contextualize key processes and events in colonial Latin American history and learn about the nature of colonization. Identify and evaluate historical arguments. Practice interpreting primary sources and building historical arguments about them.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe the contours of Latin American history in the period between invasion and independence

Audience: Undergraduate

2. Apply and use key concepts relevant to colonial Latin American history, such as colonialism, genocide, corporate society, transatlantic slave trade, independence movements

Audience: Undergraduate

3. Read for a dedicated purpose across different genres and forms of writing

Audience: Undergraduate

4. Apply historical reasoning to understand both the epistemology of early modern people and the origins of present-day issues

Audience: Undergraduate

5. Communicate effectively through presentations, discussion, and written work

Audience: Undergraduate

**LACIS/AFROAMER/ANTHRO/C&E SOC/GEOG/HISTORY/POLI SCI/SOC/SPANISH 260 – LATIN AMERICA: AN INTRODUCTION**

3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Analyze Latin American culture and society from an interdisciplinary perspective.

Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.

Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.

Audience: Undergraduate

**LACIS/CHICLA/HISTORY/POLI SCI 268 – THE U.S. & LATIN AMERICA FROM THE COLONIAL ERA TO THE PRESENT: A CRITICAL SURVEY**

3 credits.

A critical examination of US-Latin American relations from the colonial era to the present, tracing the emergence and evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America. Primary attention will be focused on US relations with Mexico, Central America and the Caribbean, but other Latin American countries will figure prominently during certain episodes.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2020**Learning Outcomes:** 1. Critically examine US-Latin American relations from the colonial era to the present.

Audience: Undergraduate

2. Examine tracing the evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America.

Audience: Undergraduate

3. Discuss US relations with Mexico, Central America and the Caribbean.

Audience: Undergraduate

**LACIS/SPANISH 285 – RACE AND CULTURE IN THE AMERICAS**

3 credits.

Examine how the experiences of marginalized groups in the U.S. are profoundly intertwined with hemispheric historical processes. Review the categories that emerged to conceptualize human difference as European colonizers dispossessed indigenous peoples of their lands and inaugurated the forced migration and enslavement of peoples from Africa. Focus on how race was transformed after the revolutions of independence, exploring key concepts such as the one drop rule, mestizaje, racial democracy, and color-blindness. Explore how race intersects with gender, class, and migration, as well as with slavery, anti-colonial struggles, and US expansionism. Examine common assumptions in comparisons of race relations –e.g., the idea of a more "fluid" understanding of race in Latin American countries, versus the binary models of the U.S.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify different forms in which race and ethnicity have been constructed across the Americas, the ways in which the histories of certain groups have been devalued or overlooked, and the implications for our present.

Audience: Undergraduate

2. Identify different understandings of race and ethnicity –for example, the tension between cultural difference and structural domination– and question assumptions commonly held in political discourse, media, arts, and literature.

Audience: Undergraduate

3. Discuss with one another how race and ethnicity condition experiences of social mobility, justice, and a sense of community, reflecting an increasingly multicultural global environment.

Audience: Undergraduate

4. Recognize social inequalities and intervene in contemporary discussions on racism through an appropriate use of evidence, critical tools, and analysis.

Audience: Undergraduate

5. Identify how different disciplinary frameworks (ethnic studies, Latinx Studies, and critical race theory, etc.) can be used to understand the racialized nature of the major questions of the present, including climate change, public health, surveillance, violence, and mass incarceration.

Audience: Undergraduate

6. Present research in a clear, concise, and engaging manner.

Audience: Undergraduate

7. Produce evidence-based, original arguments through both written and oral assignments.

Audience: Undergraduate

**LACIS/CHICLA/ED POL 342 – EDUCATION ACROSS THE AMERICAS: EMPIRE, CAPITALISM, AND RESISTANCE**

3 credits.

Examines educational inequality across the Americas through the lens of imperialism, different forms of colonialism, and capitalism. By exploring the logics and actions of different education stakeholders, critically examine how educational policy across the hemisphere has a shared history of oppression and contestation.

**Requisites:** ED POL 300**Course Designation:** Gen Ed - Communication Part B  
Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Draw from different sources to evaluate the transnational contexts of education policy and pose relevant questions about hemispheric educational issues

Audience: Undergraduate

2. Use clear understandings of terms such as imperialism, colonialism, capitalism, racism, and transnationalism to explain unequal educational processes

Audience: Undergraduate

3. Formulate and communicate research-based arguments on topics in education policy using academic literature, including primary and secondary sources

Audience: Undergraduate

4. Produce expository and argumentative texts and draw from this work to produce a podcast

Audience: Undergraduate

**LACIS/CHICLA/HISTORY/POLI SCI 355 – LABOR IN THE AMERICAS: US & MEXICO IN COMPARATIVE & HISTORICAL PERSPECTIVE**

3 credits.

Provides a critical examination of the history of labor and working people in the Americas, from the colonial era to the present. It focuses on the experience of the United States and Mexico, offering a comparative perspective on their distinct but also shared (and increasingly linked) histories. The seminar proceeds chronologically, highlighting major episodes in the evolution of labor systems in the two countries, beginning with the colonial labor systems implemented by the Spanish and British empires following the European conquest of the Western Hemisphere. Among other topics, we will examine the pivotal role of slavery and other forms of forced labor, the impact of the industrial revolution, the emergence and expansion of corporate capitalism and the labor unrest it provoked in the post-civil war U.S., the role of labor in the Mexican Revolution and its aftermath, the impact of the Great Depression and labor incorporation on the post-WWII social and political order of both countries, the breakdown of that order and the move to neo-liberalism in the 1970s and 1980s, and the emergence of an increasingly integrated North American production system and its consequences for labor and working people on both sides of the US-Mexico border.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**LACIS/ANTHRO 361 – ELEMENTARY QUECHUA**

4 credits.

Phonology and morphology; concentration on the acquisition of conversational skills; reading of texts of graded difficulty.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**LACIS/ANTHRO 362 – ELEMENTARY QUECHUA**

4 credits.

Continued introduction to phonology and morphology; concentration on the acquisition of conversational skills; reading of texts of graded difficulty.

**Requisites:** LACIS/ANTHRO 361**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**LACIS/ANTHRO 363 – INTERMEDIATE QUECHUA**

4 credits.

Advanced morphology and syntax; advanced conversation and composition; cultural background of Quechua speaking peoples through reading of myths, legends and folktales.

**Requisites:** LACIS/ANTHRO 362**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**LACIS/ANTHRO 364 – ADVANCED QUECHUA**

4 credits.

Continuation of advanced conversation and composition; cultural background of Quechua-speaking peoples through reading of myths, legends, folktales; problems in dialectology.

**Requisites:** LACIS/ANTHRO 363**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

### LACIS/ILS 367 – THE LITERATURE OF MIGRATION AND THE MIGRANT EXPERIENCE IN THE AMERICAS

3 credits.

Explores literature to understand representations and experiences of migration within the United States, and in the Americas more broadly, over time and across cultures. Focusing on literature and employing historical and psychoanalytic interpretive approaches, critically analyze artistic and literary representations of the migrant experience. Topics include: the relationships between literature, art, and migration; the role of migrants in constructing the United States; the role of art and literature in the empowerment of marginalized groups. Analyze literary texts in their contexts using tools of literary analysis and express ideas about literary texts and art from a critical perspective.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate literature in its relationship to migration by means of various communicative, deliberative, and persuasive argumentation.

Audience: Undergraduate

2. Identify in literature historical patterns of migration within the US and the Americas and their importance to understand current national culture and tensions.

Audience: Undergraduate

3. Understand through literature concepts and theories and apply them to the interpretation of literature across cultures.

Audience: Undergraduate

4. Recognize, analyze, and evaluate in literature the intersections between culture and other socially meaningful categories, such as race, class, gender, identity, ethnicity, disability, and sexuality as they are represented within literature .

Audience: Undergraduate

### LACIS/ANTHRO 376 – FIRST SEMESTER YUCATEC MAYA

4 credits.

Introduction to Yucatec Maya language. Focus on acquiring vocabulary and grammar for basic conversational proficiency. Taught through in-class oral and aural exercises, language tapes, and primary texts. Learn about Maya culture, history, folklore, and language politics.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Frqn Lang - 1st semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### LACIS/ANTHRO 377 – SECOND SEMESTER YUCATEC MAYA

4 credits.

Continued introduction to Yucatec Maya language. Focus on acquiring vocabulary and grammar for basic conversational proficiency. Taught through in-class oral and aural exercises, language tapes, and primary texts. Learn about Maya culture, history, folklore, and language politics.

**Requisites:** LACIS/ANTHRO 376

**Course Designation:** Breadth - Humanities

Frqn Lang - 2nd semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### LACIS 440 – TOPICS IN LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES

1-4 credits.

An examination of specific topics related to the Latin American, Caribbean, and Iberian region. Topics vary each semester, but may include specific themes in history, literature, media, political science, sociology, culture, politics, social work, and agriculture.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### LACIS 681 – SENIOR HONORS THESIS

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

### LACIS 682 – SENIOR HONORS THESIS

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2011

### LACIS 698 – DIRECTED STUDY

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**LACIS 699 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**LACIS/A A E/ANTHRO/C&E SOC/GEOG/HISTORY/POLI SCI/  
PORTUG/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR  
IN THE LATIN-AMERICAN AREA**

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

## LAW (LAW)

**LAW 601 – INTRODUCTION TO AMERICAN LAW**

3 credits.

An introduction to the American common law tradition and to the American legal system. Open only to Law LLM students or Visiting International students in the Law LLM Pathway.

**Requisites:** Consent of instructor**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand the overall structure of U.S. law and the U.S. legal system so that they can place other more detailed courses and later experiences with U.S. law in context.

Audience: Undergraduate

2. Gain experience analyzing original U.S. legal decisions

Audience: Undergraduate

3. Understand the basic principles underlying several areas of U.S. law and legal procedure

Audience: Undergraduate

**LAW 602 – LEGAL SOURCES**

3 credits.

Overview of the institutions and entities that create legal documents in the U.S.; how these documents are organized and found in a law library; introduction to common law case analysis. Open only to Law LLM students or Visiting International students in the Law LLM Pathway.

**Requisites:** Consent of instructor**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand the sources of law in the U.S. legal system and how they are organized.

Audience: Undergraduate

2. Understand the structure and relationship between state and federal court systems.

Audience: Undergraduate

3. Understand how to analyze cases and statutes and how to apply them to resolve legal issues.

Audience: Undergraduate

4. Understand how to write a predictive analysis in memorandum format regarding the research and resolution of a legal issue.

Audience: Undergraduate

5. Understand how to use standard research tools to find primary and secondary legal authorities, and how to evaluate the weight of these authorities.

Audience: Undergraduate

6. Understand when and how to cite legal authorities.

Audience: Undergraduate

**LAW/LEGAL ST/SOC 641 – SOCIOLOGY OF LAW**

3-4 credits.

Theory and research on the social origins, processes and effects of law; examination of law-related behavior, legal institutions, law and social structure, and law and social change; linkage to contemporary theoretical and political debates.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**LAW 711 – CONTRACTS**

4 credits.

Creation of promissory liability; interpretation of words and conduct; exchange, reliance or formality as necessary for creation of promissory liability; remedies for breach of contract; unfairness as a reason for avoiding contractual liability.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze fact patterns to determine whether enforceable contracts exist

Audience: Graduate

2. Determine what terms are contained in any contracts and what legal remedies are available in the event of contract breach

Audience: Graduate

3. Read and interpret key sources of contract law

Audience: Graduate

**LAW 714 – CIVIL PROCEDURE**

4 credits.

Development of the modern civil action including pleading, discovery, and the pretrial conference; the trial; motions after verdict and judgment; appeals; state and federal procedures.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate understanding of rules that provide the framework for resolving federal civil disputes during the pretrial period of litigation

Audience: Graduate

2. Build real world competencies through participation in advocacy exercises that reinforce civil procedure rules

Audience: Graduate

3. Improve legal writing through writing assignments that reinforce course material

Audience: Graduate

4. Appreciate the strategic choices one faces as an attorney

Audience: Graduate

5. Prepare for any position that relates to litigation or requires advocacy skills

Audience: Graduate

**LAW 715 – TORTS**

4 credits.

Introduction to torts. Roughly defined as civil wrong, independent of contract. Liability for physical and emotional harms inflicted by intentional misconduct or negligence, or without fault, and development of concepts and techniques in analyzing and solving tort problems.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of some policies underlying Tort law

Audience: Graduate

2. Demonstrate knowledge of how the common law develops

Audience: Graduate

3. Demonstrate knowledge of how common law differs from statutory or regulatory law

Audience: Graduate

4. Demonstrate proficiency in extracting legal rules and rationales from cases and applying those rules to new fact patterns

Audience: Graduate

5. Demonstrate proficiency and good judgment in analyzing and interpreting cases

Audience: Graduate

6. Improve discussion skills, including listening, turn-taking, learning through interaction, orally presenting reasons and drawing conclusions based on reason

Audience: Graduate

**LAW 721 – ADVANCED CONTRACTS**

3-4 credits.

Nature of the obligations assumed by entering a contract; the power of parties to control this obligation; rights of those not a party to a contract.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Build upon and apply the doctrinal elements not covered in introductory contracts course

Audience: Graduate

2. Examine and apply different practice settings for contracts law, including supply chain management, a rising area of contracts practice

Audience: Graduate

3. Develop skills as a legal researcher, through application of a step-wise approach to propose, refine, and edit a legal research paper topic

Audience: Graduate

### **LAW 722 – LEGAL ANALYSIS, ADVOCACY, & WRITING I**

3 credits.

Learn to formulate precise legal issues; analyze complex facts; find relevant law; identify, evaluate, and apply legal rules in creative and nuanced ways; and effectively communicate answers in writing.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Read legal sources critically and accurately to identify relevant information

Audience: Graduate

2. Analyze and synthesize cases and statutes to formulate controlling rules

Audience: Graduate

3. Apply legal rules to a client's facts to predict legal consequences

Audience: Graduate

4. Find relevant legal authority using a variety of research strategies, considering the weight and hierarchy of authorities within the American legal system

Audience: Graduate

5. Write clearly and concisely in different professional contexts

Audience: Graduate

6. Write objective memoranda of law using appropriate format, organization, and citation

Audience: Graduate

### **LAW 723 – LEGAL ANALYSIS, ADVOCACY, & WRITING II**

3 credits.

Learn persuasive legal writing and oral presentation skills and the ethics and strategies of effective written and oral advocacy on behalf of a client. Prepare a trial-level brief and an appellate brief and work on legal correspondence and basic transactional drafting skills. Explore advanced legal research sources and refine research skills with projects in a variety of different subject areas and procedural contexts.

**Requisites:** LAW 722

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Learn and utilize a variety of techniques to write persuasive legal documents

Audience: Graduate

2. Choose and use legal authority appropriately to build a legal argument

Audience: Graduate

3. Write trial-level and appellate briefs using appropriate format, organization, and citations

Audience: Graduate

4. Develop the skills to research complex legal issues efficiently, using an array of sources and strategies

Audience: Graduate

5. Apply basic principles of transactional drafting

Audience: Graduate

6. Present an oral argument on behalf of a client

Audience: Graduate

### **LAW 724 – PROPERTY**

4-5 credits.

Foundation for advanced courses. Personal property and real property (land law); concepts of ownership and transfer of chattels (personal property), such as bailments, liens, pledges and gifts; historical introduction to law of real property precedes detailed study of nature of various ownership interests in land, called estates; landlord-tenant law; some preliminary treatment of land transfer (conveyancing).

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**LAW 725 – INTRODUCTION TO CRIMINAL PROCEDURE**

3 credits.

Various aspects of criminal procedure and criminal justice administration. Constitutional limitations upon criminal justice practices.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**LAW 726 – CRIMINAL LAW AND PROCEDURE**

4 credits.

Problems in defining what conduct should be subject to criminal penalties; the limitations of criminal law as a means for prevention and control of undesirable conduct.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Read and interpret criminal statutes  
Audience: Graduate

2. Demonstrate knowledge of key concepts in criminal law  
Audience: Graduate

3. Apply criminal law rules to criminal law problems  
Audience: Graduate

4. Demonstrate understanding of the social values, beliefs, and policies that motivate criminal law rules  
Audience: Graduate

5. Critically evaluate criminal law rules in light of those values, beliefs, and policies  
Audience: Graduate

**LAW 729 – ASSET MANAGEMENT & FINANCIAL PLANNING FOR LAWYERS**

3 credits.

Become a savvy consumer of financial services and a financially street-smart trust and estate attorney. Master the fundamentals of investing; diving into stocks, bonds, mutual funds, exchange traded funds, hedge funds, private equity, commodities, and venture capital. Gain exposure to key finance, risk, and tax concepts related to investment portfolio structure. Develop a familiarity with the pros and cons of financial products and investments ranging from life insurance to annuities to real estate investment trusts. Explore the financial planning process to answer two questions: How much money do you need? When do you need it? Most importantly, hone your reasoning abilities to navigate your and your clients financially challenging life transitions.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Instill a working knowledge of financial concepts sufficient to astutely weight the benefits and detriments of different financial advisors, financial services, investment portfolios, and financial products  
Audience: Graduate

2. Enhance the ability to reason through challenging life transitions by applying, when appropriate, financial concepts in emotionally charged situations  
Audience: Graduate

3. Grow confidence in sound financial decision making as it relates to the administration of personal and trust assets to achieve goals  
Audience: Graduate

**LAW 730 – FEDERAL LAW AND INDIAN TRIBES**

2-3 credits.

The study of the relationships between Federal, state, and tribal governments, the source and scope of their respective sovereignties, and time.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**LAW 731 – CONSTITUTIONAL LAW**

4 credits.

An introduction to the constitutional law of the United States covering the basic structure of government in the United States, with emphasis on the federal government. Includes the role of the federal courts and the doctrine of judicial review; the rise of federal power, as reflected particularly in shifting definitions of "interstate commerce," the doctrine of separation of powers, with emphasis on current issues of legislative and executive branch authority; and judicial and other limitations on the exercise of authority by the states as well as selected rights protected in the Amendments to the Constitution.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize and apply basic principles of constitutional law.

Audience: Graduate

2. Develop an understanding of the historical context and development of constitutional doctrine in the United States.

Audience: Graduate

3. Identify and apply the different forms of constitutional interpretation applied by the Supreme Court.

Audience: Graduate

4. Articulate key arguments for and against significant constitutional questions.

Audience: Graduate

**LAW 732 – REAL ESTATE TRANSACTIONS I**

3-4 credits.

Basic legal elements of real estate transfer and finance; options, binder contracts, requirements as to writing, rights and duties between vendor and vendee, basic land contract and mortgage law and remedies, and the real estate recording system.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**LAW 734 – TRUSTS AND ESTATES**

2 credits.

Examination of legal and real-world aspects of transmission of property, usually at death. Covers such topics as intestate succession (dying without a will), wills, trusts and will substitutes, limitations on the disposition of assets and the impact of the Marital Property Act, powers of attorney and end-of-life decision making, and basic issues in the taxation of gifts and transfers at death. In addition to legal fundamentals, strong focus on legal practice—i.e., on how the law plays out on the ground.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate thorough understanding of the core elements of the law of intestacy, wills, trusts, and non-probate transfers.

Audience: Graduate

2. Demonstrate thorough understanding of the core elements of law protecting the rights of the surviving spouse, and how these differ in common law and community property states.

Audience: Graduate

3. Demonstrate thorough understanding of the core considerations involved in creating and using advance directives.

Audience: Graduate

4. Demonstrate thorough understanding of the core elements of community property and Wisconsin marital property law, and the ways this area of law affects the analysis of course topics. No prior knowledge of marital property law will be assumed.

Audience: Graduate

5. Demonstrate a very basic understanding of the transfer tax and income tax issues that affect estate planning. No prior knowledge of tax law will be assumed.

Audience: Graduate

6. Demonstrate the ability to recognize the basic ethical and professional issues that emerge in the practice of estate planning, including the ability to recognize the limits of one's expertise.

Audience: Graduate

7. Demonstrate understanding of the real world context in which all course activities take place and the ways in which the activities of ordinary people affect legal planning and outcomes.

Audience: Graduate

**LAW 736 – SECURED TRANSACTIONS**

3 credits.

Focuses on Article 9 of the Uniform Commercial Code, Secured Transactions; with some additional emphasis on Article 6, Bulk Sales; and Article 7, Documents of Title.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**LAW 737 – MARITAL PROPERTY**

1-2 credits.

Develop a strong understanding of Wisconsin Marital Property law and how its principles impact ownership of property. Compare marital property law to common law ownership and review the differences between marital property and division in divorce.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Distinguish between marital/community property ownership systems and common law ownership.

Audience: Graduate

2. Recognize how property is classified under Wisconsin law and explain why classification is important.

Audience: Graduate

3. Distinguish between marital property and division in divorce.

Audience: Graduate

**LAW 738 – ESTATE AND GIFT TAXATION**

1-2 credits.

Introduces basic federal estate and gift tax policy, statutes, and planning concepts relevant to estate and trust planning and administration.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate thorough understanding of the core concepts of the federal transfer tax system.

Audience: Graduate

2. Demonstrate thorough understanding of the core elements of the primary federal transfer tax statutes, how those statutes operate and how they interrelate.

Audience: Graduate

3. Demonstrate a basic understanding of the transfer tax and income tax issues that affect estate and trust planning.

Audience: Graduate

4. Demonstrate understanding of the real world context in which all tax planning activities take place and the ways in which the activities of ordinary people affect legal planning and outcomes.

Audience: Graduate

**LAW 740 – ADVANCED CONSTITUTIONAL LAW**

3-4 credits.

Focuses on rights of citizens against state and federal governments, the nature of due process and equal protection of the law, to include discussions around the right to privacy, freedoms of expression, association, religion, the right bear arms, and protection of civil rights and freedom from invidious discrimination. What is the content of these rights? What methods should judges use to figure out the answer? What role does or should the judiciary have in enforcing those rights?

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explore different theories of constitutional interpretation such as originalism, process theory, and living constitutionalism

Audience: Graduate

2. Engage in debates about the legitimacy of judicial review in a democracy

Audience: Graduate

3. Develop argumentation and debate skills specific to executing a case in court

Audience: Graduate

**LAW 741 – BUSINESS ORGANIZATIONS: PUBLIC CORPORATIONS**

3 credits.

Law of business corporations; problems of control, management, and procurement and maintenance of capital; an introduction to securities regulation.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the fundamental sources of corporate law as well as the doctrinal analysis of major cases, including close reading of major Delaware law cases

Audience: Graduate

2. Identify the economics of corporate transactions and the practical impact of corporate law on business structuring and practice

Audience: Graduate

3. Demonstrate knowledge of the types of basic legal documents used in corporate settings

Audience: Graduate

4. Develop a strong understanding of how corporate law theories impact the shaping of the legal landscape

Audience: Graduate

**LAW 742 – TAXATION I**

3-5 credits.

Federal income taxation; basic rules, theory and policy.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**LAW 743 – NEGOTIATIONS**

2-4 credits.

Examines a range of processes encountered by lawyers, including negotiation of, inter alia, injury claims, criminal charges, family disputes, and commercial disputes, as well as participation of their parties (mediators, judges).

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**LAW 744 – ADMINISTRATIVE LAW**

3 credits.

Role of the administrative process in society; emphasizes common powers and procedures; relationships among the legislative, judicial, executive and administrative agencies in the development of public policy.

**Requisites:** Declared in Law JD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**LAW 745 – LABOR RELATIONS LAW**

3 credits.
