

# TABLE OF CONTENTS

Courses .....	4	Collaborative Nursing Program (CNP) .....	568
Accounting and Information Systems (ACCT I S) .....	8	Communication Arts (COM ARTS) .....	572
Actuarial Science (ACT SCI) .....	22	Communication Sciences and Disorders (CS&D) .....	621
African American Studies (AFROAMER) .....	27	Community and Environmental Sociology (C&E SOC) .....	636
African Cultural Studies (AFRICAN) .....	42	Comparative Biosciences (COMP BIO) .....	648
Agricultural and Applied Economics (A A E) .....	68	Comparative Literature (COMP LIT) .....	654
Agroecology (AGROECOL) .....	100	Computer Sciences (COMP SCI) .....	655
Air Force Aerospace Studies (A F AERO) .....	106	Consumer Science (CNSR SCI) .....	693
American Indian Studies (AMER IND) .....	111	Counseling Psychology (COUN PSY) .....	708
Anatomy & Physiology (ANAT&PHY) .....	127	Curriculum and Instruction (CURRIC) .....	735
Anatomy (ANATOMY) .....	129	Dairy Science (DY SCI) .....	775
Anesthesiology (ANESTHES) .....	130	Dance (DANCE) .....	789
Animal Sciences (AN SCI) .....	134	Dermatology (DERM) .....	814
Anthropology (ANTHRO) .....	159	Design Studies (DS) .....	817
Applied Biotechnology (ABT) .....	175	Economics (ECON) .....	835
Art Department (ART) .....	184	Educational Leadership and Policy Analysis (ELPA) .....	866
Art Education (Department of Art) (ART ED) .....	205	Educational Policy Studies (ED POL) .....	882
Art History (ART HIST) .....	207	Educational Psychology (ED PSYCH) .....	926
Asian American Studies (ASIAN AM) .....	231	Electrical and Computer Engineering (E C E) .....	949
Asian Languages and Cultures (ASIAN) .....	238	Emergency Medicine (EMER MED) .....	1000
Asian Languages and Cultures: Languages (ASIALANG) .....	263	Engineering Mechanics and Aerospace Engineering (E M A) .....	1007
Astronomy (ASTRON) .....	290	Engineering Physics (E P) .....	1025
Atmospheric and Oceanic Sciences (ATM OCN) .....	300	Engineering Professional Development (E P D) .....	1031
Biochemistry (BIOCHEM) .....	314	English (ENGL) .....	1055
Biological Systems Engineering (BSE) .....	332	English as a Second Language (ESL) .....	1086
Biology (BIOLOGY) .....	346	Entomology (ENTOM) .....	1090
Biology Core Curriculum (BIOCORE) .....	348	Environmental Studies - Gaylord Nelson Institute (ENVIR ST) .....	1099
Biomedical Engineering (B M E) .....	351	Family Medicine (FAM MED) .....	1140
Biomedical Sciences and Technologies (BIOMDSCI) .....	378	Farm and Industry Short Course (FISC) .....	1150
Biomolecular Chemistry (BMOLCHEM) .....	385	Finance, Investment and Banking (FINANCE) .....	1156
Biostatistics and Medical Informatics (B M I) .....	388	Folklore Program (FOLKLORE) .....	1172
Botany (BOTANY) .....	403	Food Science (FOOD SCI) .....	1182
Cell and Regenerative Biology (CRB) .....	416	Forest and Wildlife Ecology (F&W ECOL) .....	1199
Chemical and Biological Engineering (CBE) .....	427	French (French and Italian) (FRENCH) .....	1216
Chemistry (CHEM) .....	438	Gender and Womens Studies (GEN&WS) .....	1231
Chicana/o and Latina/o Studies (CHICLA) .....	464	General Business (GEN BUS) .....	1268
Civil and Environmental Engineering (CIV ENGR) .....	488	Genetic Counselor Studies (GENECSLR) .....	1290
Civil Society and Community Studies (CSCS) .....	537	Genetics (GENETICS) .....	1298
Classics (CLASSICS) .....	551	Geography (GEOG) .....	1323
		Geological Engineering (G L E) .....	1349
		Geoscience (GEOSCI) .....	1361
		German (GERMAN) .....	1374

German, Nordic, and Slavic (GNS) .....	1385	Medical Sciences - Medical School (MED SC-M) .....	2014
Greek (Classics) (GREEK) .....	1395	Medical Sciences - Veterinary Medicine (MED SC-V) .....	2022
Hebrew-Biblical (HEBR-BIB) .....	1404	Medicine (MEDICINE) .....	2038
Hebrew-Modern (HEBR-MOD) .....	1407	Medieval Studies (MEDIEVAL) .....	2064
History (HISTORY) .....	1409	Microbiology (MICROBIO) .....	2072
History of Science (HIST SCI) .....	1463	Military Science (MIL SCI) .....	2089
Human Development and Family Studies (HDFS) .....	1478	Molecular and Environmental Toxicology Center (M&ENVTOX) ..	2090
Human Oncology (H ONCOL) .....	1485	Molecular Biology (MOL BIOL) .....	2093
Industrial and Systems Engineering (I SY E) .....	1489	Music (MUSIC) .....	2094
Information Systems (INFO SYS) .....	1520	Music-Performance (MUS PERF) .....	2122
Integrated Arts (INTEGART) .....	1522	Naval Science (NAV SCI) .....	2140
Integrated Liberal Studies (ILS) .....	1524	Neurological Surgery (NEURSURG) .....	2142
Integrated Science (INTEGSCI) .....	1535	Neurology (NEUROL) .....	2144
Interdisciplinary Courses (C A L S) (INTER-AG) .....	1542	Neuroscience (NEURODPT) .....	2146
Interdisciplinary Courses (Engineering) (INTEREGR) .....	1547	Neuroscience Training Program (NTP) .....	2150
Interdisciplinary Courses (L & S) (INTER-LS) .....	1550	Nuclear Engineering (N E) .....	2155
Interdisciplinary Courses (SOHE) (INTER-HE) .....	1557	Nursing (NURSING) .....	2166
International Academic Programs – Study Abroad (STDYABRD) ..	1559	Nutritional Sciences (NUTR SCI) .....	2214
International Business (INTL BUS) .....	1565	Obstetrics and Gynecology (OBS&GYN) .....	2234
International Studies (INTL ST) .....	1571	Occupational Therapy (DEPARTMENT OF KINESIOLOGY) (OCC THER) .....	2242
Italian (French and Italian) (ITALIAN) .....	1583	Oncology (ONCOLOGY) .....	2258
Jewish Studies (JEWISH) .....	1592	Operations and Technology Management (OTM) .....	2263
Journalism and Mass Communication (JOURN) .....	1605	Ophthalmology and Visual Sciences (OPHTHALM) .....	2279
Kinesiology (KINES) .....	1624	Patho-Biological Sciences (PATH-BIO) .....	2281
Landscape Architecture (LAND ARC) .....	1671	Pathology and Laboratory Medicine (PATH) .....	2294
Latin (Classics) (LATIN) .....	1688	Pediatrics (PEDIAT) .....	2307
Latin American, Caribbean, and Iberian Studies (LACIS) .....	1695	Pharmaceutical Sciences (PHM SCI) .....	2318
Law (LAW) .....	1700	Pharmacology (PHMCOL-M) .....	2335
Legal Studies (LEGAL ST) .....	1725	Pharmacy (PHARMACY) .....	2339
Library and Information Studies (L I S) .....	1741	Pharmacy Practice (PHM PRAC) .....	2350
Life Sciences Communication (LSC) .....	1759	Philosophy (PHILOS) .....	2374
Linguistics (LINGUIS) .....	1778	Physical Therapy (PHY THER) .....	2386
Literature in Translation (LITTRANS) .....	1787	Physician Assistant Program (PHY ASST) .....	2392
Management and Human Resources (M H R) .....	1806	Physics (PHYSICS) .....	2396
Marketing (MARKETNG) .....	1832	Physiology (PHYSIOL) .....	2415
Materials Science and Engineering (M S & E) .....	1855	Plant Pathology (PL PATH) .....	2415
Mathematics (MATH) .....	1873	Plant Science (PLANTSCI) .....	2423
Mechanical Engineering (M E) .....	1919	Political Science (POLI SCI) .....	2442
Medical Genetics (MD GENET) .....	1968	Population Health Sciences (POP HLTH) .....	2493
Medical History and Bioethics (MED HIST) .....	1971	Portuguese (Spanish and Portuguese) (PORTUG) .....	2517
Medical Microbiology and Immunology (M M & I) .....	1986	Psychiatry (PSYCHIAT) .....	2520
Medical Physics (MED PHYS) .....	1995		

Psychology (PSYCH) .....	2530
Public Affairs and Public Policy (PUB AFFR) .....	2560
Public Health (PUBLHLTH) .....	2574
Radiology (RADIOL) .....	2585
Real Estate and Urban Land Economics (REAL EST) .....	2590
Rehabilitation Medicine (RHAB MED) .....	2604
Rehabilitation Psychology and Special Education (RP & SE) .....	2605
Religious Studies (RELIG ST) .....	2641
Risk Management and Insurance (R M I) .....	2666
Scandinavian Studies (SCAND ST) .....	2673
Science and Technology Studies (STS) .....	2687
Senior Medical Program (SR MED) .....	2688
Slavic (Slavic Languages) (SLAVIC) .....	2690
Social and Administrative Pharmacy (S&A PHM) .....	2709
Social Work (SOC WORK) .....	2715
Sociology (SOC) .....	2742
Soil Science (SOIL SCI) .....	2771
Spanish (Spanish and Portuguese) (SPANISH) .....	2789
Statistics (STAT) .....	2812
Surgery (SURGERY) .....	2840
Surgical Sciences (SURG SCI) .....	2853
Theatre and Drama (THEATRE) .....	2866
Urban and Regional Planning (URB R PL) .....	2882
Urology (UROLOGY) .....	2896
Zoology (ZOOLOGY) .....	2897
Index .....	2918

# COURSES

Courses listed below, separated by subject, are active as of the fall 2025 term. Courses can be updated three times per year, to coincide with the priority enrollment time period for upcoming terms.

## COURSE DESIGNATIONS

### COURSE DESIGNATIONS

Below you will find a short description of items included in course listings and course bubbles. For further information regarding course designations, consult your advisor or view the Requirements for Undergraduate Study (<https://guide.wisc.edu/undergraduate/#requirementsforundergraduatetext>). The mortarboard symbol (#) appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

**Gen Ed**      **Communication Part A:** a course in communication skills at the college level, developing student abilities in writing and public speaking, for both exposition and argumentation.

**Communication Part B:** a course involving substantial instruction in the four modes of literacy (that is, speaking, reading, writing, and listening), with emphasis on speaking and writing, either in the conventions of specific fields or in more advanced courses in communication.

**Quantitative Reasoning Part A:** a Quantitative Reasoning Part A course is an introductory course in college#level mathematics, computer science, statistics or formal logic that prepares students for more advanced work in a disciplinary context.

**Quantitative Reasoning Part B:** a Quantitative Reasoning Part B course builds on the tools of college#level mathematics, computer science, statistics or formal logic that are acquired by achieving the Quantitative Reasoning Part A learning outcomes. Quantitative Reasoning Part B courses may be offered at any level, provided that the material challenges students to think critically and apply quantitative skills to develop models, interpret data, draw conclusions, and solve problems within a disciplinary or interdisciplinary context.

**Ethnic St**      **Counts toward Ethnic Studies requirement:** a course intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community.

#### Breadth

**Biological Science:** a course concerning the systematic study of the structure, function, growth, origin, evolution, distribution, and taxonomy of living organisms. Courses with this designation may meet Biological Science requirements or the broader Natural Science breadth requirements.

**Humanities:** employing analytical, critical, and interpretive methods, "Arts & Humanities" courses teach a wide array of skills necessary to understand and analyze past, present, and future of the world around us. These courses focus on exploring the human condition, using knowledge to build empathy and appreciation for the complexities of one's own and other people's perspectives.

**Literature:** courses with "literature" designation focus on the reading and interpretation of texts in multiple genres, including fictional and nonfictional prose, poetry, and drama, from a range of cultures, in translation or in their original languages, irrespective of how they are presented. They teach skills of literary analysis while examining the relation between the texts and the cultures, historical periods, and ideas that produced them.

**Natural Science:** a course characterized by the systematic study of the natural and physical world, and with the use of abstraction and logical reasoning. Biological Science and Physical Science courses are subsets of the Natural Science curriculum.

**Physical Science:** a course involving the systematic study of objective information about the physical world, broadly defined, and include areas of study such as Astronomy, Biology, Chemistry, Physics, Materials Science, and Earth Science (atmospheric science, oceanography). Courses with this designation may meet Physical Science requirements or the broader Natural Science breadth requirements.

**Social Science:** a course which relies upon methods of data collection (either qualitative or quantitative), data analysis, or data interpretation that characterize factual, methodological, institutional, and theoretical inquiry into the systematic study of humans/groups and institutions/society.

<b>Level</b>	Elementary: a course associated with predominantly introductory material, are usually open to all students (including first year students).
	Intermediate and Advanced: courses with sensible prerequisites to reflect a gradual mastery of material.
<b>L&amp;S Credit</b>	Counts as Liberal Arts and Science credit in L&S: a course which encourage students in one or more of the three "habits of the mind" of liberal arts education, as specified by the College of Letters and Science.

Honors	<p>Accelerated Honors (!): a course open to both honors and non-honors students. Accelerated Honors courses receive honors credit automatically in recognition of the amount and rigor of material covered in the course, often designed to combine two semesters of material into one semester. The enrollment system will automatically assign honors.</p> <p>Honors Only Courses (H): a course reserved for students declared in an Honors program only, taught by a faculty member who is an expert in the subject-matter of the course. It is designed to challenge students to actively participate; hence, the course content is often shaped by student questions and interests. The enrollment system will automatically assign honors.</p> <p>Honors Optional (%): a course open to both honors and non-honors students. The optional honors component of work is designed to facilitate in-depth, student-driven learning and enrich the student's experience. The student is responsible for formally declaring their intention to complete an honors project when enrolling.</p>
Grad 50%	Counts toward 50% graduate coursework requirement: a course used in the Graduate School's requirement that least 50% of credits applied toward the student's graduate program must be with courses designed for graduate work.
Work	<p>Workplace Experience Course: a course where workplace experience is linked to learning in an academic program. Courses must include intentional learning objectives related to the experience.</p>
Foreign Language	<p>First-semester language course: Course in a language other than English for students with no prior experience in the language. These courses are not retro-credit eligible.</p> <p>Second-semester language course: Course in a language other than English that requires a Level 1 course a requisite. These courses are retro-credit eligible.</p> <p>Third-semester language course: Course in a language other than English that requires a Level 2 course a requisite. These courses are retro-credit eligible.</p> <p>Fourth-semester language course: Course in a language other than English that requires a Level 3 course a requisite. These courses are retro-credit eligible.</p> <p>Fifth-semester and above language course. Course in a language other than English that requires a Level 4 or Level 5 course a requisite. These courses are retro-credit eligible.</p>

who attempts to enroll in a course but lacks the requisite preparation will be prevented from enrolling in the course until the requisite has been met.

It is assumed that courses in progress at the time of enrollment will be completed successfully and thus fulfill a course requisite. Course administrators/departments may check the completion of these courses and may drop enrolled students who failed or dropped a requisite course and notify them accordingly.

There are occasions when a student may have the necessary preparation to be successful in a course, but this preparation is not easily identifiable in their student record. An example would be earned transfer credit that did not equate to a UW-Madison course that meets the spirit of the required course. You may ask the course instructor for permission to enroll in a course for which you do not meet the enforced requisite. Instructor permission will override any restrictions on enrollment the class might have.

## WAYS TO FULFILL REQUISITES:

- UW-Madison Courses (p. 5)
- Testing Scores (p. 6)
- Transfer Equivalencies (p. 6)
- General Education (p. 6)
- Limitations on Enrollment/Audience (p. 6)
- Class Standing (p. 7)
- Consent of Instructor (p. 7)

## UW-MADISON COURSES

Courses identified in requisites list the subject(s) and catalog number (example: MATH 221). If a course is cross-listed, you will meet the requisite regardless of the subject you enrolled, with one exception (see minimum credits in a subject) (p. 6). For example, ZOOLOGY/BIOLOGY 101 is the same course, so requisites recognize both Zoology and Biology as fulfilling the requirement; it does not matter which course you enrolled in.

## Concurrent Enrollment

Concurrent enrollment means being enrolled in a course in the same term as the requisite course. There are three ways these can be written:

1. You may either have completed the requisite course in a prior term or be currently enrolled in it. (example: *Course A, or concurrent enrollment*). Example: PLANTSCI 335
2. You must be enrolled in the listed courses during the same term, every time the courses are offered (example: *Course A requisite: Concurrent enrollment in Course B.; Course B requisite: Concurrent enrollment in Course A*). You will have to enroll in all courses at the same time otherwise you will not meet the requisite. Example: NURSING 726 & NURSING 728
3. One course requires concurrent enrollment but the other course does not. For example, if you enroll in a Course A with a requisite stating "*Concurrent enrollment in Course B*", but Course B does not require you to be enrolled in Course A. In this situation, you must enroll in Course B first, then go back in and enroll in Course A. Example: MUS PERF 201 & MUS PERF 251

## COURSE REQUISITES

## COURSE REQUISITES

Requisites represent the academic preparation required to be successful in a course. They are enforced via the enrollment system, meaning a student

## Minimum Credits in a Subject

Requisites may specify a certain number of credits in any given subject (example: *3 credits in HISTORY*). This means you must have taken at least 3 credits in the HISTORY course array without specifying an individual course. If you take a course cross-listed with HISTORY, but do not enroll in HISTORY, you will not meet the requisite. Example: HISTORY 200

## Grades

In very limited situations, a minimum grade may be included associated with a requisite course (example: *a grade of C in Course A*). If you are a transfer student, you may need individual permission from the instructor to enroll in courses with this type of requisite. Example: NUTR SCI 431

## TESTING SCORES

### Advanced Placement (AP), International Baccalaureate (IB), and the College-Level Examination Program (CLEP)

These exam scores are converted into UW-Madison credit via equivalent courses. They do not display publicly in requisites. Due to the nature of the vast array of subject material there isn't always a direct equivalent (exact match from the exam to a UW-Madison course), thus credit will show up on your record as a transfer equivalent (denoted by SUBJECT X##, example GEN ELCT X12). See the list of exams and their equivalent UW-Madison courses in the Placement and Credit by Exam (<https://guide.wisc.edu/undergraduate/#placementandcreditbyexamtext>) section of Guide.

### UW-System/UW-Madison Placement Exam Scores and Departmental Placement Exams

The UW-System and UW-Madison provide placement exams in English, English as a Second Language (ESL), French, German, Math, Spanish and have direct equivalents to UW-Madison courses. Departments may also provide placement exams in other subject matter where a student may have acquired knowledge, skills, or competencies. Requisites use placement exam scores and use the language "*or placement into [course]*." Find more information about these exams and subsequent placement into UW-Madison courses in the Placement and Credit by Exam (<https://guide.wisc.edu/undergraduate/#placementandcreditbyexamtext>) section of Guide. Example: FRENCH 102

## TRANSFER EQUIVALENCIES

If you are transferring to UW-Madison, their previous coursework will be converted to UW-Madison credit/courses. In most cases, you will see the equivalent UW-Madison course on your transcript, which can be used just like the courses above (p. 5). If there is not a direct equivalent (exact match from your previous institution to a UW-Madison course), you will receive credit in any given subject as a transfer equivalent (denoted by SUBJECT X##, example GEN ELCT X12).

In some situations, you may have acquired subject matter knowledge, but did not complete all the learning outcomes associated with UW-Madison general education attributes or designations. Transfer equivalency courses used in this situation provide a transfer credit equivalent to course content without the general education requirement fulfillment. These are included in requisites behind the scenes.

When requisites include a minimum letter grade, the transfer equivalency grade will factor in the requisite as a 2.000 GPA, regardless your grade from the previous institution.

### List of standard UW-Madison equivalencies without general education attributes/designations

- **BIO SCI X52:** Included in requisites where BIOLOGY/BOTANY/ZOOLOGY 152 is used. This is the transfer equivalency for the bioscience content without fulfilling the Communications B requirement.
- **PSYCH X02:** Include in requisites where PSYCH 225 is used. This is the transfer equivalency without fulfilling the Communications B requirement.

## GENERAL EDUCATION

Some courses utilize the satisfaction of a specific general education requirement as a requisite. These are written as:

- *Satisfied Communications A requirement*
  - Example: COM ARTS 262
- *Satisfied Quantitative Reasoning (QR) A requirement*
  - Example: C&E SOC/SOC 360
- *Satisfied Quantitative Reasoning (QR) B requirement*

To see more about general education requirements, see the Requirements for Undergraduate Degrees (<https://guide.wisc.edu/undergraduate/#requirementsforundergraduatetext>) in Guide.

## LIMITATIONS ON ENROLLMENT/AUDIENCE

Some courses are designed for a specific audience. Requisites limit who can enroll in these courses.

### Significant content overlap

When a course covers a significant portion of another course, a requisite will prevent you from earning credit in courses that are vastly similar. These requisites include statements such as "*Not open to students with credit in [Course A]*", which will prevent you from enrolling in a course where you already have mastered the subject matter. Example: CHEM 327

### Honors

Courses may limit enrollment to students only in honors programs. Requisites for these courses will be written as:

- *Declared in an honors program* (this means any honors in the major, college honors, or honors research) Example: POLI SCI 182
- *Declared in [school or college] honors program* (this means any honors program within a specific school or college) Example: INTER-AG 288
- *Declared in [degree/major/program] honors in the major* (this means to a single, specific honors program)

### Limiting by program

Courses can be designed for specific programs and will have requisites that specify who can enroll. You must be declared in one of these programs to enroll. Requisites will be written as:

- *Declared in [degree/major/program]* Example: KINES 300
- *Declared in [major/program] graduate program* Example: CHEM/BIOCHEM 704

- *Declared in Capstone Certificate in [program]* Example: M E 718
- *Classified as Pre-[degree/major/program name]* Example: CURRIC 319

## CLASS STANDING

Class standing is based on the number of credits you have earned, credits in progress at time of enrollment, and your academic career (undergraduate, graduate, pharmacy, medical, veterinary, law, or special).

Requisites using standing can be written in a variety of ways, depending on the audience. If the requisite is *Sophomore standing*, this includes sophomore, junior, senior, graduate/professional, or special career students. If the requisite is *Sophomore standing only*, only undergraduate students with 24-53 credits may enroll in the course.

### Credits and Class Standing

- 0-23 credits: Freshman
- 24-53 credits: Sophomore
- 54-85 credits: Junior
- 86+ credits: Senior

### Limits based on course catalog number

- Courses numbered 100-299 are open to undergraduates only. Graduate students may enroll, but the credits will not be reflected on their student record.
- Courses numbered 300-699 are open to undergraduate and graduate programs.
- Courses numbered 700 and above are open only to graduate/professional students.

## CONSENT OF INSTRUCTOR

Some courses may only enroll when you have consent of instructor. These courses usually are independent study, directed study, etc. or courses that require auditions, permission the first time, or other unique situations that are subjective. This is written as "Consent of Instructor." Example: DANCE 159

## SYLLABUS

## OVERVIEW

The following statements were created for inclusion in course syllabi. Instructors are strongly encouraged to reference, or include a link to, these statements in their individual course syllabi. This ensures that consistent institutional information is provided to all students.

## SYLLABUS STATEMENTS

### ACADEMIC CALENDAR & RELIGIOUS OBSERVANCES

Academic Calendar & Religious Observances (<https://secfac.wisc.edu/academic-calendar/>)

Establishment of the academic calendar for the University of Wisconsin-Madison falls within the authority of the faculty as set forth in Faculty Policies and Procedures ([https://policy.wisc.edu/library/UW-801/#Pol801\\_1\\_20](https://policy.wisc.edu/library/UW-801/#Pol801_1_20)). Construction of the academic calendar is subject to various rules and laws prescribed by the Board of Regents, the Faculty

Senate, State of Wisconsin and the federal government. For additional dates and deadlines for students, see the Office of the Registrar's pages (<https://registrar.wisc.edu/dates/>). Students are responsible for notifying instructors within the first two weeks of classes about any need for flexibility due to religious observances (<https://policy.wisc.edu/library/UW-880/>).

## ACADEMIC INTEGRITY STATEMENT

By virtue of enrollment, each student agrees to uphold the high academic standards of the University of Wisconsin-Madison; academic misconduct is behavior that negatively impacts the integrity of the institution. Cheating, fabrication, plagiarism, unauthorized collaboration, and helping others commit these previously listed acts are examples of misconduct which may result in disciplinary action. Examples of disciplinary sanctions (<https://conduct.students.wisc.edu/academic-misconduct/>) include, but are not limited to, failure on the assignment/course, written reprimand, disciplinary probation, suspension, or expulsion.

## ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES

The University of Wisconsin-Madison supports the right of all enrolled students to a full and equal educational opportunity. The Americans with Disabilities Act (ADA), Wisconsin State Statute (36.12), and UW-Madison policy (UW-855) (<https://policy.wisc.edu/library/UW-855/>) require the university to provide reasonable accommodations to students with disabilities to access and participate in its academic programs and educational services. Faculty and students share responsibility in the accommodation process. Students are expected to inform faculty of their need for instructional accommodations during the beginning of the semester, or as soon as possible after being approved for accommodations. Faculty will work either directly with the student or in coordination with the McBurney Center to provide reasonable instructional and course-related accommodations. Disability information, including instructional accommodations as part of a student's educational record, is confidential and protected under FERPA. (See: McBurney Disability Resource Center (<https://mcburney.wisc.edu/>))

## COURSE EVALUATIONS

UW-Madison students have the opportunity to evaluate the courses they are enrolled in and their learning experiences through course evaluations. Most instructors use a digital course evaluation tool (<https://kb.wisc.edu/luwmad/81069/>). In most instances, students receive an official email two weeks prior to the end of the semester, notifying them that anonymous course evaluations are available. Student participation is an integral component of course development, and confidential feedback is important. UW-Madison strongly encourages student participation in course evaluations.

## DIVERSITY & INCLUSION STATEMENT

Diversity (<https://diversity.wisc.edu>) is a source of strength, creativity, and innovation for UW-Madison. We value the contributions of each person and respect the profound ways their identity, culture, background, experience, status, abilities, and opinion enrich the university community. We commit ourselves to the pursuit of excellence in teaching, research, outreach, and diversity as inextricably linked goals. The University of Wisconsin-Madison fulfills its public mission by creating a welcoming and inclusive community for people from every background – people who as students, faculty, and staff serve Wisconsin and the world.

## MENTAL HEALTH AND WELL-BEING STATEMENT

Students often experience stressors that can impact both their academic experience and personal well-being. These may include mental health concerns, substance misuse, sexual or relationship violence, family circumstances, campus climate, financial matters, among others.

Students are encouraged to learn about and utilize UW-Madison's mental health services and/or other resources as needed. Visit [uhs.wisc.edu](https://uhs.wisc.edu) or call University Health Services at (608) 265-5600 to learn more.

## PRIVACY OF STUDENT RECORDS & THE USE OF AUDIO RECORDED LECTURES STATEMENT

View more information about FERPA (<https://registrar.wisc.edu/ferpa-facstaff/>).

Lecture materials and recordings for this course are protected intellectual property at UW-Madison. Students in courses may use the materials and recordings for their personal use related to participation in class. Students may also take notes solely for their personal use. If a lecture is not already recorded, students are not authorized to record lectures without permission unless they are considered by the university to be a qualified student with a disability who has an approved accommodation that includes recording. [Regent Policy Document 4-1] Students may not copy or have lecture materials and recordings outside of class, including posting on internet sites or selling to commercial entities, with the exception of sharing copies of personal notes as a notetaker through the McBurney Disability Resource Center. Students are otherwise prohibited from providing or selling their personal notes to anyone else or being paid for taking notes by any person or commercial firm without the instructor's express written permission. Unauthorized use of these copyrighted lecture materials and recordings constitutes copyright infringement and may be addressed under the university's policies, UWS Chapters 14 and 17, governing student academic and non-academic misconduct.

## STUDENTS' RULES, RIGHTS & RESPONSIBILITIES

Rights & Responsibilities (<https://guide.wisc.edu/undergraduate/#rulesrightsandresponsibilitiestext>)

## TEACHING & LEARNING DATA TRANSPARENCY STATEMENT

The privacy and security of faculty, staff and students' personal information is a top priority for UW-Madison. The university carefully reviews and vets all campus-supported digital tools used for teaching and learning, including those that support data empowered educational practices (<https://teachlearn.wisc.edu/deep/>) and proctoring. View the university's full teaching and learning data transparency statement (<https://teachlearn.provost.wisc.edu/teaching-and-learning-data-transparency-statement/>).

# ACCOUNTING AND INFORMATION SYSTEMS (ACCT I S)

## ACCT I S 100 – INTRODUCTORY FINANCIAL ACCOUNTING 3 credits.

Examines generally accepted accounting principles for measurement and reporting of financial information in a balance sheet, income statement, and statement of cash flows; introduction to analysis and interpretation of financial accounting data for decision-making purposes.

**Requisites:** Not open to students with credit for ACCT I S 300

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain the role of financial reporting and accounting reports in making resource allocation decisions.

Audience: Undergraduate

2. Explain general purpose financial statements of a business from the perspective of the users of those statements.

Audience: Undergraduate

3. Articulate the business purposes behind economic transactions and basic accounting concepts to determine appropriate accounting treatments for transactions and business.

Audience: Undergraduate

4. Capture information from economic transactions into accounting systems and fully articulate the impact of those transactions on the business.

Audience: Undergraduate

5. Compile information in the accounting system to create general purpose financial statements.

Audience: Undergraduate

6. Analyze the complexity of real world events and apply judgment with respect to accounting measurements and reporting.

Audience: Undergraduate

**ACCT I S 211 – INTRODUCTORY MANAGERIAL ACCOUNTING**

3 credits.

Managerial accounting concepts relevant for decision-making; use of accounting information for planning, decision-making, and control of business operations in various management and business environments.

**Requisites:** ACCT I S 100, (ACCT I S 300 and declared in the Certificate in Accounting Fundamentals), or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe how managerial accounting principles and tools are critical to the successful design and implementation of an organizational strategy.

Audience: Undergraduate

2. Explain how business decisions can affect the design of performance measurement systems and achievement of the organization's objectives.

Audience: Undergraduate

3. Apply cost and revenue-related concepts to planning, performance evaluation, and decision-making (e.g., product mix, outsourcing, pricing, incentive schemes, and budgeting).

Audience: Undergraduate

4. Recognize ethical issues in business, particularly as applied to the design of performance measurement and incentive schemes within the scope of management accounting.

Audience: Undergraduate

5. Recognize how to successfully apply management accounting tools and concepts to various business disciplines and the increasingly complex business environment.

Audience: Undergraduate

**ACCT I S 300 – ACCOUNTING PRINCIPLES**

3 credits.

Examines both financial and managerial accounting for business decisions. Emphasizes preparation and interpretation of financial statements, analysis of financial information, determination of costs for products and services, and use of accounting information for planning and control of business operations.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement. Not open to students with credit for ACCT I S 100.

**Course Designation:** Gen Ed – Quantitative Reasoning Part B

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply accounting concepts to economic transactions to capture relevant and reliable data for business decisions

Audience: Undergraduate

2. Prepare financial statements of a business based on economic transactions and events

Audience: Undergraduate

3. Apply financial statements to draw inferences about the performance and financial condition of businesses

Audience: Undergraduate

4. Compute costs of products and services for different costing systems

Audience: Undergraduate

5. Prepare strategic budgets for a business along with analysis of budgeting results

Audience: Undergraduate

### ACCT I S 301 – FINANCIAL REPORTING I

3 credits.

Examines current and emerging financial reporting theory and techniques used primarily to measure and disclose assets and determine income. Emphasis on analysis and measurement.

**Requisites:** ACCT I S 100 or (ACCT I S 300 and declared in the Certificate in Accounting Fundamentals)

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate the measurement and valuation methods of the financial statement elements, including fair value concepts.

Audience: Undergraduate

2. Recognize that transactions are triggered by business purposes and that understanding the business purpose is important for the application of the Generally Accepted Accounting Principles (GAAP).

Audience: Undergraduate

3. Identify and analyze fundamental economic events, conduct research, and apply relevant accounting standards to these events.

Audience: Undergraduate

4. Demonstrate proper presentation and reporting of financial statement elements and transactions.

Audience: Undergraduate

5. Demonstrate how financial statements effectively communicate the financial results of an economic entity, including the use of financial statements from the perspective of the users of the financial statements.

Audience: Undergraduate

### ACCT I S 302 – FINANCIAL REPORTING II

3 credits.

Examines current and emerging financial reporting theory and techniques used primarily to measure and disclose financial claims on assets.

**Requisites:** ACCT I S 301 or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain complex financial events and their effect on financial statements, cash flows and accounting based contracts.

Audience: Undergraduate

2. Explain the measurement and valuation concepts of financial statement elements, including complex fair value concepts.

Audience: Undergraduate

3. Recognize and discuss controversial and emerging practices in valuation and the potential economic consequences of these accounting rules.

Audience: Undergraduate

4. Interpret how financial information may impact a company, management decisions or investor decisions.

Audience: Undergraduate

5. Identify and apply appropriate accounting standards to complex economic events.

Audience: Undergraduate

6. Analyze a problem and arrive at a conclusion that integrates all available information and justify their conclusion convincingly to others.

Audience: Undergraduate

7. Develop and demonstrate effective communication and networking skills with their class peers.

Audience: Undergraduate

8. Reflect on how to pursue their future career goals within the accounting profession and how those goals compare with those of their peers.

Audience: Undergraduate

**ACCT I S 310 – COST MANAGEMENT SYSTEMS**

3 credits.

Design of actual and standard cost systems for reporting product costs in job costing, process costing, and activity costing production environments. Overhead allocation methods. Budgeting and profit planning procedures. Techniques for variance analysis and performance evaluation. Behavioral considerations in the design and use of cost accounting information systems.

**Requisites:** ACCT I S 211 or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how financial and nonfinancial information serves numerous purposes in an organization, especially in relation to facilitating and influencing decisions.

Audience: Undergraduate

2. Compare different costing systems to determine what system is best given specific decision-making needs or business situations.

Audience: Undergraduate

3. Explain how managerial accountants contribute to the design and implementation of planning, performance measurement, evaluation, and compensation systems.

Audience: Undergraduate

4. Evaluate the strengths and weaknesses of common analytical tools of accounting when applied to a specific context.

Audience: Undergraduate

**ACCT I S 329 – TAXATION: CONCEPTS FOR BUSINESS AND PERSONAL PLANNING**

3 credits.

An introduction to the U.S. income taxation concepts with emphasis on business and personal planning strategies. Taxes are placed in a framework which considers all costs of doing business. Includes approaches and skills needed to prepare individual, corporate, and partnership income tax returns.

**Requisites:** ACCT I S 100, 300, or LAW 811. Not open to students declared in Business: Accounting BBA program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain the objectives of taxes applicable at the federal level and become familiar with how they are calculated.

Audience: Undergraduate

2. Articulate key concepts in income tax laws and how tax principles are applicable to various business activities and transactions and the differences that apply to individuals and corporations.

Audience: Undergraduate

3. Apply a framework for integrating income tax planning into accounting and business decisions.

Audience: Undergraduate

**ACCT I S 340 – ACCOUNTING INFORMATION SYSTEMS**

3 credits.

Understand, document, and evaluate integrated enterprise systems and critical information tracked in core business processes, applying technology to model, capture, and query data needed, and assess system design and controls.

**Requisites:** ACCT I S 211 and (ACCT I S 301 or concurrent enrollment); or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze businesses using patterned-based core business and accounting processes

Audience: Undergraduate

2. Identify the critical information to be tracked in core business processes

Audience: Undergraduate

3. Understand how integrated enterprise systems capture, manipulate, and disseminate information, specifically applying technology to model, capture, and query data needed by information providers and advisors

Audience: Undergraduate

4. Document, evaluate, and recommend improvements to basic accounting information systems used to control processes and communicate information to be used in financial reporting

Audience: Undergraduate

5. Demonstrate basic agility and adaptability with respect to emerging issues and technologies that impact business, accounting information systems, and their future careers

Audience: Undergraduate

**ACCT I S 399 – READING AND RESEARCH-ACCOUNTING**

1-6 credits.

Individual work suited to the needs of undergraduate students may be arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2015

**ACCT I S 401 – BUSINESS ORGANIZATIONS AND NEGOTIABLE INSTRUMENTS**

3 credits.

Commercial paper, real estate and personal property, partnerships, corporations, bankruptcy.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe business entity types, differentiating key elements of each, and reasons to choose one type.

Audience: Undergraduate

2. Describe the meaning of fiduciary duty and which parties are covered.

Audience: Undergraduate

3. Demonstrate how to form an entity and pick a business name.

Audience: Undergraduate

4. Describe the types, risk and use of Negotiable Instruments.

Audience: Undergraduate

5. Apply the technical legal rules covered in the course, regarding Bankruptcy, Securities Regulation, Accountants' Liability, Environmental Law, Real Property, and Employment Law.

Audience: Undergraduate

**ACCT I S 406 – ACCOUNTING AND ANALYSIS FOR REPORTING ENTITIES**

3 credits.

Theoretical, procedural, and practical issues associated with the preparation of financial statements of alternative reporting entities, including the accounting for mergers and acquisitions, consolidations, foreign operations, and complex financial instruments.

**Requisites:** ACCT I S 302, 702, declared in Business: Accounting and Business Analysis MSB, or the Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain reporting and analysis for the equity method, acquisition method, and intercompany transactions required in for-profit business entities.

Audience: Undergraduate

2. Explain reporting and analysis for non-controlling interests, variable interests, foreign currency translation, and derivatives designed to hedge foreign currency risk required in for-profit business entities.

Audience: Undergraduate

3. Explain reporting and analysis of financial statements required for governmental and not-for-profit entities.

Audience: Undergraduate

4. Analyze complex financial arrangements to support conclusions for proper application of reporting standards.

Audience: Graduate

**ACCT I S 600 – PROFESSIONAL EXPERIENCE IN ACCOUNTING**

1-6 credits.

An opportunity to experience a professional accounting practice first hand and to integrate this experience with the curriculum.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate professional characteristics and skill sets that can be applied beyond the internship.

Audience: Undergraduate

2. Articulate the dynamic nature of the profession and the emerging opportunities available after graduation.

Audience: Undergraduate

3. Develop and grow professional relationships that will extend well beyond the internship.

Audience: Undergraduate

### **ACCT I S 601 – PROFESSIONAL PRACTICE ISSUES IN ACCOUNTING, AUDITING, AND TAXATION**

3 credits.

Study of current accounting and audit issues within a case context. Students will be required to perform computerized research, analyze topical accounting and audit issues, and make case presentations.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply fundamental accounting, auditing, or tax concepts to real client transactions and circumstances

Audience: Undergraduate

2. Develop professional characteristics and skill sets that will allow you to excel after graduation

Audience: Undergraduate

3. Apply critical thinking skills by identifying relevant professional topics, researching those topics and then effectively communicating the results in written memos and oral presentations

Audience: Undergraduate

4. Network with leading practitioners, standard setters, and regulators across the broad nature of the profession

Audience: Undergraduate

5. Address real ethical issues and interact with leading practitioners and/or scholars in analyzing important ethical issues that affect the profession

Audience: Undergraduate

6. Observe the dynamic nature of the profession and broader issues that affect accounting and its role in society

Audience: Undergraduate

### **ACCT I S 603 – FINANCIAL STATEMENT ANALYSIS**

3 credits.

Analysis and interpretation of financial statements, including profitability and ratio analysis, cash flow analysis, accounting-based equity valuation, market impact of accounting choices, earnings quality, earnings management, mergers and acquisitions, intangibles, accounting-based trading strategies, accounting and credit ratings, and international accounting.

**Requisites:** ACCT I S 302 or 702

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain and apply return-on-equity disaggregation, including a breakdown into operating and nonoperating components.

Audience: Both Grad & Undergrad

2. Analyze financial statements and their accompanying notes, including all related components of the annual report filing.

Audience: Both Grad & Undergrad

3. Prepare a set of reformulated financial statements that reflect one's analysis of those statements and any adjustments that are performed.

Audience: Both Grad & Undergrad

4. Forecast financial statements (disaggregated into operating and nonoperating components) for up to ten years into the future and assess the reasonableness of those forecasts.

Audience: Both Grad & Undergrad

5. Determine company valuation using discounted future metrics of operating performance and financial condition based on valuation methods that include discounted cash flows, residual operating income, and market multiples.

Audience: Both Grad & Undergrad

6. Articulate the process of accounting analysis and valuation in practice today, including its strengths and weaknesses and its market dynamics.

Audience: Both Grad & Undergrad

7. Identify major players in accounting and advisory services, including future business opportunities and career paths.

Audience: Graduate

**ACCT I S 620 – FUNDAMENTALS OF TAXATION**

3 credits.

Application of federal tax provisions and administrative rules common to most taxpayers with introductions to rules specific to corporations, pass-through entities, and individuals.

**Requisites:** ACCT I S 301 or concurrent enrollment or declared in undergraduate Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the most relevant types of taxes applicable at the federal level and how each is calculated.

Audience: Undergraduate

2. Explain the key concepts in the federal income tax laws in the US United Staes for individuals.

Audience: Undergraduate

3. Identify how tax principles are applicable to various business activities and transactions and the differences that apply to individuals and businesses.

Audience: Undergraduate

4. Identify and evaluate planning opportunities from a variety of tax areas to which a professional is exposed in the early years of a career.

Audience: Undergraduate

5. Apply a framework for integrating income tax planning into accounting and business decisions.

Audience: Undergraduate

6. Recognize that developing effective tax planning strategies for clients requires effective research skills.

Audience: Undergraduate

7. Apply primary sources of tax authority to evaluate the impact of tax law on a client situation and effectively communicate that analysis to the client.

Audience: Undergraduate

**ACCT I S 621 – CORPORATE AND ADVANCED TAXATION**

3 credits.

Application of federal tax provisions and administrative rules pertaining to corporations and shareholders, including elective provisions for "S" corporations. Emphasis on tax planning and the consequences of corporate and shareholder decisions.

**Requisites:** ACCT I S 620, declared in Business: Accounting and Business Analysis MSB, or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a basic understanding of the Federal Income tax rules of the United States as they apply to the formation, operation, reorganization, and liquidation of corporations.

Audience: Undergraduate

2. Demonstrate an understanding of how the federal income tax laws relate to specific client situations and provide written communication with the client regarding various outcomes and potential tax strategy alternatives.

Audience: Undergraduate

3. Apply a framework for integrating income tax planning into accounting and business transactions as a foundation for structuring tax-efficient business transactions.

Audience: Undergraduate

**ACCT I S 630 – FOUNDATIONS OF AUDITING**

3 credits.

Audit and assurance services are vital to ensuring that organizations, their stakeholders, and the public can rely on organizations' financial information. Focus is on financial statement audits and their role in corporate governance and oversight. Emphasizes the components of the audit process with application to key financial accounting cycles and related internal controls. Also covers the professional role of public accountants and professional standards, norms and ethics.

**Requisites:** ACCT I S 301, 701, or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the components to a high-quality audit process.

Audience: Undergraduate

2. Apply a high-quality audit process to key accounting cycles and related internal controls in a financial statement audit.

Audience: Undergraduate

3. Explain the value of a financial statement audit to a firm's stakeholders and role of auditor independence, skepticism, audit standards, and ethics to delivering that value.

Audience: Undergraduate

4. Implement solutions to audit problems as an effective member of a team while developing your current and future professional network.

Audience: Undergraduate

**ACCT I S 640 – FOUNDATION IN ACCOUNTING ANALYTICS**

3 credits.

Analytics has become an integral part of accounting to support decision making, coordination and control, and compliance with regulations. Being able to identify and pursue relevant questions using data is a critical skill for new hires, as is the ability to successfully communicate one's findings. This pursuit and communication requires a strong facility with a variety of analytics technologies.

**Requisites:** (ACCT I S 340 or concurrent enrollment), (ACCT I S 100 and GEN BUS 307 or 317), (ACCT I S 700 or concurrent enrollment), or declared in the Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify key business questions and the central issues applied in relevant accounting contexts including financial reporting, auditing, tax, and managerial accounting.

Audience: Both Grad & Undergrad

2. Engage authentic accounting technology tools and source data.

Audience: Both Grad & Undergrad

3. Discover relevant variables and patterns in accounting datasets.

Audience: Both Grad & Undergrad

4. Interpret and communicate results.

Audience: Both Grad & Undergrad

5. Reflect on how the skills, knowledge, and inspiration acquired from learning will impact their profession and career.

Audience: Both Grad & Undergrad

6. Synthesize learning to reflect on the power and significance of the emerging field to their professional future.

Audience: Graduate

**ACCT I S 700 – FINANCIAL ACCOUNTING**

2-3 credits.

Measurement and reporting guidelines underlying preparation of general purpose financial statements. Explore current measurement and reporting issues. Analyze and interpret financial statement data for investment, lending, and related decisions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain both the interrelationship and details of the structural components of financial reporting.

Audience: Graduate

2. Apply the recognition and measurement concepts to the preparation of a basic set of financial statements.

Audience: Graduate

3. Demonstrate how companies' financing, investing, and operating decisions affect their financial statements and, consequently, measures used to assess risk.

Audience: Graduate

4. Evaluate the impact of business and macro-economic events on a company's financial statements.

Audience: Graduate

5. Apply accounting data to the creation of a basic set of financial statements and understand how business transactions affect profits and cash flows.

Audience: Graduate

6. Understand that there are recognition and measurement concepts that underlie the preparation of a basic set of financial statements and that financial statements and accounting data is used extensively in business as a common language.

Audience: Graduate

**ACCT I S 701 – FINANCIAL REPORTING I**

3 credits.

Examines current and emerging financial accounting theory and techniques used to measure and report financial information to investors, creditors, and other external users. Emphasizes asset and liability valuations and their relationships to income determination, preparation and interpretation of financial statements, and related disclosure requirements.

**Requisites:** ACCT I S 700

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate the measurement and valuation methods of the financial statement elements, including fair value concepts.

Audience: Graduate

2. Recognize that transactions are triggered by business purposes and that understanding the business purpose is important for the application of the Generally Accepted Accounting Principles (GAAP).

Audience: Graduate

3. Identify and analyze fundamental economic events, conduct research, and apply relevant accounting standards to these events.

Audience: Graduate

4. Demonstrate proper presentation and reporting of financial statement elements and transactions.

Audience: Graduate

5. Demonstrate how financial statements effectively communicate the financial results of an economic entity, including the use of financial statements from the perspective of the users of the financial statements.

Audience: Graduate

6. Apply knowledge of concepts learned in the course to analyze a public company's operating results and accounting policies.

Audience: Graduate

**ACCT I S 702 – FINANCIAL REPORTING II**

3 credits.

Examines current and emerging financial accounting theory and techniques used to measure and report financial information to investors, creditors, and other external users, including dilutive securities, investments, revenue recognition, income tax allocation, pensions, leases and accounting changes.

**Requisites:** ACCT I S 701

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain complex financial events and their effect on financial statements, cash flows and accounting-based contracts.

Audience: Graduate

2. Explain the measurement and valuation concepts of financial statement elements, including complex fair value concepts.

Audience: Graduate

3. Recognize and discuss controversial and emerging practices in valuation and the potential economic consequences of these accounting rules.

Audience: Graduate

4. Interpret how financial information may impact a company, management decisions or investor decisions.

Audience: Graduate

5. Identify and apply appropriate accounting standards to complex economic events.

Audience: Graduate

6. Analyze a problem and arrive at a conclusion that integrates all available information and justify their conclusion convincingly to others.

Audience: Graduate

7. Develop and demonstrate effective communication and networking skills with their class peers.

Audience: Graduate

8. Reflect on how to pursue their future career goals within the accounting profession and how those goals compare with those of their peers.

Audience: Graduate

9. Apply knowledge of complex financial events and concepts learned in the course to analyze a recent Form 10-K filing.

Audience: Graduate

**ACCT I S 710 – MANAGERIAL ACCOUNTING**

2-3 credits.

Interpretation and use of accounting data for management planning, decision making and control. Consideration of cost-volume-profit relationships, relevant costs, variable (direct) costing, activity-based costing, transfer pricing and performance evaluation of segments of the firm.

**Requisites:** ACCT I S 700

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand how managerial accounting principles and tools are critical to the successful design and implementation of an organizational strategy.

Audience: Graduate

2. Explain how behavioral issues can affect the design of performance measurement systems and achievement of the organization's objectives.

Audience: Graduate

3. Integrate strategic financial and nonfinancial performance metrics into an integrated performance measurement framework such as the Balanced Scorecard's four performance measurement perspectives: financial, customer, internal processes, and learning and growth.

Audience: Graduate

4. Appropriately apply cost-related concepts to planning, performance evaluation, and decision making (e.g., product mix, outsourcing, pricing, incentive schemes, and budgeting).

Audience: Graduate

5. Calculate costs based on various cost system design choices, and understand the implications of choices in designing cost management systems for products, services, customers, and other business segments.

Audience: Graduate

6. Evaluate and articulate the opportunities and challenges when balancing environmental and social objectives with financial performance.

Audience: Graduate

7. Recognize ethical issues in business, particularly as applied to the design of performance measurement and incentive schemes within the scope of management accounting.

Audience: Graduate

8. Recognize how to successfully apply management accounting tools and concepts to various business disciplines and the increasingly complex business environment.

Audience: Graduate

**ACCT I S 722 – ANALYSIS OF TAXATION FOR PASS-THROUGH ENTITIES**

3 credits.

Analysis of federal tax provisions and administrative rules regarding pass-through entities, such as partnerships, S-corporations, and limited liability companies; including their application to entity formation and operation, property and ownership basis, distributions, and interest transfers.

**Requisites:** ACCT I S 620 and graduate/professional standing, declared in Business: Accounting and Business Analysis MSB, or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate the ability to read, comprehend, and apply complex regulatory materials.

Audience: Graduate

2. Demonstrate an in-depth knowledge of the structure and principles underlying the federal income taxation of partnerships and limited liability companies.

Audience: Graduate

3. Recognize the tax implications and planning opportunities presented in the formation, operation, and liquidation of partnerships and limited liability companies.

Audience: Graduate

4. Apply a framework for integrating tax planning and structuring business and accounting transactions.

Audience: Graduate

**ACCT I S 724 – TAX RESEARCH, PROCEDURE & ANALYSIS**

3 credits.

Methodologies and tools for tax research; utilization of tax research tools; preparation of investigative reports; professional and interprofessional responsibilities; administrative procedures and techniques.

**Requisites:** Graduate/professional standing and (ACCT I S 620 or LAW 742), declared in Business: Accounting and Business Analysis MSB, or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate how to conduct tax research through exposure to the fundamentals of tax research methods and tools, developing tax research tools, using appropriate tax authorities, research services, and electronic databases.

Audience: Graduate

2. Demonstrate how to conduct and present tax research within a team structure and how to evaluate the role and success of their teams in progressively more complex situations.

Audience: Graduate

3. Describe how tax firms conduct tax practice, advise clients, and research tax laws relevant to the client's situation through exposure to tax professionals.

Audience: Graduate

4. Demonstrate an understanding of the creation and enforcement of the federal income tax laws, including an understanding of how the IRS uses statutes of limitations.

Audience: Graduate

**ACCT I S 725 – ANALYSIS OF INTERNATIONAL TAXATION**

3 credits.

An introduction to international tax issues. Topics covered may include tax treaties, foreign tax credit provisions, Subpart F rules, and taxation of inbound investment and business income.

**Requisites:** (ACCT I S 620, 621, and graduate/professional standing), LAW 742, declared in Business: Accounting and Business Analysis MSB, or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe key concepts inherent in the Federal taxation of both U.S. taxpayers abroad and foreign taxpayers in the United States.

Audience: Graduate

2. Identify potential technical problems that can arise in an international tax setting, including the transfer pricing of related party transactions.

Audience: Graduate

3. Apply federal income tax laws applicable to international transactions to advise clients on how to plan for optimal tax outcomes.

Audience: Graduate

**ACCT I S 730 – ADVANCED AUDITING: ANALYSIS, POLICY, AND JUDGMENT**

3 credits.

Auditors increasingly use analytics to provide assurance over financial and non-financial information. Audit and assurance principles will be viewed through the lens of an analytics mindset. Uses analytics in combination with other audit techniques as a basis for professional judgments. Examines how the contemporary audit environment influences professional judgments. Develops the technical knowledge and skills needed in many professional roles through discussion, case studies, and group projects.

**Requisites:** (Graduate/professional standing, ACCT I S 340, and 630), declared in Business: Accounting and Business Analysis MSB, or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and respond to relevant risks in a variety of complex audit areas

Audience: Graduate

2. Evaluate audit evidence and make well-reasoned and well-justified conclusions

Audience: Graduate

3. Describe and analyze the impact of regulatory activities on audit practice

Audience: Graduate

4. Use appropriate tools to effectively and efficiently complete audit tasks

Audience: Graduate

5. Communicate effectively in writing and in live presentations and discussions

Audience: Graduate

6. Work effectively in a team to complete challenging tasks

Audience: Graduate

**ACCT I S 740 – INFORMATION RISK, CONTROL, & FORENSICS**

3 credits.

Examines the control and security of accounting information systems with an auditing and forensic perspective. Topics covered include: data governance frameworks, risks to information (i.e., data), internal controls related to identified risks, types of assurance services, computer assisted audit tools and techniques (CAATs), fraud, and other related topics.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize risks and control practices related to information technology for the successful design and implementation of integrated audits as well as the performance of organizational strategy.

Audience: Graduate

2. Explain computerized information system concepts including general and application controls and related data governance frameworks.

Audience: Graduate

3. In a variety of contexts, assess information technology risks and risk mitigation strategies to develop internal controls necessary to help mitigate risks.

Audience: Graduate

4. Summarize the purpose of and develop skills related to computer assisted auditing tools (CAATs) that help expedite the determination of internal control effectiveness.

Audience: Graduate

5. Perform common analytical tools of accounting and identify their strengths and weaknesses when applied to a specific context.

Audience: Graduate

6. Interpret the complexities of information technology and related facets (e.g., security, integrity, diffusion, etc.) through interactions with accounting and technology professionals.

Audience: Graduate

**ACCT I S 765 – CONTEMPORARY TOPICS**

1-4 credits.

Exploration of advanced subject areas possibly to be introduced into the business curriculum.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

### ACCT I S 770 – ACCOUNTING THEORY: REPORTING INCENTIVES AND CONSEQUENCES

3 credits.

Review and analysis of theoretical foundations of corporate financial reporting; application of conceptual framework and finance/economic theories to understand development of major accounting standards.

**Requisites:** Graduate/professional standing and (ACCT I S 302 or 702); or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the conceptual frameworks underlying accounting standard setting in the US and internationally.

Audience: Graduate

2. Recognize how political considerations and economic consequences within a market economy affect accounting standard setting.

Audience: Graduate

3. Explain the role of information asymmetry, adverse selection and moral hazard in capital markets in addressing accounting and disclosure issues.

Audience: Graduate

4. Demonstrate how to assess accounting policy decisions in terms of underlying finance and economic theories such as efficient capital markets, decision theory, prospect theory, game theory, and signaling.

Audience: Graduate

5. Recognize how managers' motivations, especially with respect to compensation and other contracts could explain management reactions to proposed accounting policies, as well as practices such as earnings management.

Audience: Graduate

6. Apply the conceptual framework, as well as relevant finance and economic theories and academic research, in a detailed explanation of the development of a major accounting standard.

Audience: Graduate

### ACCT I S 771 – ANALYSIS OF PERFORMANCE MEASUREMENT & CONTROL

3 credits.

Development and analysis of accounting data for managerial planning, control, decision-making, and costing, with a focus on the integration of financial and non-financial information needs for various managerial functions.

**Requisites:** Graduate/professional standing and (ACCT I S 310 or 710), or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate, at an advanced level, the role of management accounting information for making strategic management decisions within an organization.

Audience: Graduate

2. Explain the complexities of applying strategic performance measurement to capture successes of an organizational strategy, and why it is still worth doing.

Audience: Graduate

3. Describe the role of intangible assets in understanding organizational strategy and how these assets provide a competitive advantage.

Audience: Graduate

4. Explain how activity-based costing, activity-based management quality, just-in-time inventory, and sustainability initiatives impact production processes across the organizational value chain.

Audience: Graduate

5. Examine the critical dimensions of Balanced Scorecard Reporting in detail, including non-financial metrics.

Audience: Graduate

6. Develop and present proposed Balanced Scorecards to reflect the execution of a company's strategic initiative.

Audience: Graduate

**ACCT I S 772 – ANALYSIS OF TAXES & BUSINESS DECISIONS**

3 credits.

Readings and cases in taxation; analysis and integration of related tax provisions and taxpayer impact.

**Requisites:** (ACCT I S 620 and graduate/professional standing) or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a basic understanding of the tax environment and tax laws related to each of the topical areas presented.

Audience: Graduate

2. Incorporate a consistent approach to analyzing the tax implications within a variety of business decisions.

Audience: Graduate

3. Identify and evaluate planning opportunities from a variety of tax areas to which a professional is exposed in the early years of a career.

Audience: Graduate

**ACCT I S/E P D/GEN BUS 781 – FINANCIAL AND BUSINESS ACUMEN**

1 credit.

This course is designed with a keen awareness for the needs of the non-financial student or professional. For this class, no previous financial training is required. The intent is to equip you with the essential concepts used to develop financial literacy. Content will cover basic financial terms and reports, analytical tools to help interpret financial data and using financial data in budgets and forecasts.

**Requisites:** Graduate/professional standing. Not open to students declared in an MBA program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply the language and foundational tools of finance to analyze how a company's economic activity is reflected in its financial reports

Audience: Graduate

2. Perform high-level financial statement analysis to identify important information from financial reports

Audience: Graduate

3. Apply basic financial concepts of valuation, capital budgeting, and financial decision making

Audience: Graduate

**ACCT I S 799 – READING AND RESEARCH-ACCOUNTING**

1-6 credits.

Individual work suited to the needs of graduate students may be arranged both during regular sessions and the intersession periods.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2009

**ACCT I S 971 – SEMINAR IN ACCOUNTING RESEARCH**

3 credits.

Provides the tools needed for educated consumption of accounting research. Examines and synthesizes relevant accounting research to identify important research questions. Develops the knowledge and skills needed to conduct accounting research through discussion, presentations, and writing assignments.

**Requisites:** Declared in Business PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss scientific method as it is applied to accounting research.

Audience: Graduate

2. Acquire background in current accounting research and critical analysis.

Audience: Graduate

3. Recognize and apply prevailing practices and expectations in accounting academia with respect to conducting accounting research

Audience: Graduate

**ACCT I S 990 – ACCOUNTING INDEPENDENT RESEARCH PHD THESIS**

1-12 credits.

Individual work to complete dissertation requirement of Ph.D. program.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ACCT I S 999 – READING AND RESEARCH-ACCOUNTING PHD**

1-6 credits.

Individual work suited to the needs of Ph.D. students may be arranged with a faculty member.

**Requisites:** Declared in Business PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

# ACTUARIAL SCIENCE (ACT SCI)

## ACT SCI 300 – PROBABILITY FOR ACTUARIES

1 credit.

Develop a knowledge of fundamental mathematical tools for quantitatively assessing risk. Emphasize the applications of these tools to problems encountered in actuarial science.

**Requisites:** (STAT/MATH 309, MATH 331, STAT 333, 340, or concurrent enrollment), or declared in undergraduate Business Exchange program.

Not open to graduate/professional students.

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Mathematically represent common single variable discrete and continuous probability functions that are relevant in actuarial applications such as Poisson, binomial, negative binomial, and geometric, uniform, exponential, and normal.

Audience: Undergraduate

2. Calculate measures related to the characteristics of single variable probability functions such as moments, mean, variance, median, mode, percentiles, etc., and interpret them in an actuarial context.

Audience: Undergraduate

3. Derive joint, marginal and conditional probabilities and densities from multivariate distributions and calculate covariance and correlation coefficients, and interpret them in an actuarial context.

Audience: Undergraduate

## ACT SCI 301 – ACTUARIAL SCIENCE METHODS II

1 credit.

Develop a knowledge of mathematical tools for quantitatively assessing financial risk. Emphasize the applications to problems encountered in actuarial science.

**Requisites:** (ACT SCI 303 or concurrent enrollment), declared in Capstone Certificate in Actuarial Science, or declared in undergraduate Business Exchange program. Not open to graduate students.

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Illustrate the impact of the time value of money on decisions both in their professional and personal life.

Audience: Undergraduate

2. Compare and contrast the dynamics of key financial instruments including annuities, bonds and loans as well as calculate the price and other significant values of these instruments.

Audience: Undergraduate

3. Demonstrate the importance of immunizing asset and liability portfolios against changes in interest rates and describe methods of immunization.

Audience: Undergraduate

4. Explain the determinants of interest rates.

Audience: Undergraduate

5. Differentiate between the different types of measures of rate of return and return on investment and calculate those rates given a set of cash flow assumptions.

Audience: Undergraduate

6. Calculate the value of interest rate swaps.

Audience: Undergraduate

**ACT SCI 303 – THEORY OF INTEREST**

3 credits.

Time value of money; interest compounded discretely and continuously; accumulated and present value of payments; loans and sinking funds; annuity and bond valuation; interest rate term structure; duration, immunization and interest rate swaps.

**Requisites:** MATH 213, 222, or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and illustrate the impact of the time value of money on decisions both in their professional and personal life.

Audience: Undergraduate

2. Differentiate between the different types of measures of rate of return and return on investment and calculate those rates given a set of cash flow assumptions.

Audience: Undergraduate

3. Compare and contrast the dynamics of key financial instruments including annuities, bonds and loans as well as calculate the price and other significant values of these instruments.

Audience: Undergraduate

4. Demonstrate the importance of immunizing asset and liability portfolios against changes in interest rates and describe methods of immunization.

Audience: Undergraduate

**ACT SCI 365 – CONTEMPORARY TOPICS**

1-3 credits.

Exploration of subject areas possibly to be introduced into the business curriculum.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**ACT SCI 399 – READING AND RESEARCH-ACTUARIAL SCIENCE**

1-3 credits.

Directed study in various areas of actuarial science that provides the opportunity to participate in more in-depth study (intermediate level) under the direct guidance of actuarial science faculty.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, for 4 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Students will be able to communicate basic knowledge of content, analyze related data and apply knowledge in a variety of academic settings.

Audience: Undergraduate

**ACT SCI 640 – ACTUARIAL STATISTICS FOR RISK MODELING**

4 credits.

Introduction to statistical learning theory and methods for analyzing and modeling risks in actuarial applications. Topics include linear and nonlinear models; diagnostics and assessment of predictive models; variable and model selection; and non-supervised learning techniques.

**Requisites:** (GEN BUS 317, ECON 410, STAT/MATH 310, STAT 312, 333, or 340), graduate/professional standing, or declared in Capstone Certificate in Actuarial Science

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate key assumptions pertinent to various statistical methods for risk modeling in insurance.

Audience: Both Grad & Undergrad

2. Evaluate actuarial models for risk analysis using graphical procedures, hypothesis tests, and score-based approaches.

Audience: Both Grad & Undergrad

3. Demonstrate an understanding of the bias-variance trade-off within the actuarial and risk modeling context and its impact on model selection.

Audience: Both Grad & Undergrad

4. Employ resampling techniques for validating models used in risk assessment and management.

Audience: Both Grad & Undergrad

5. Explain and interpret statistical package outputs to risk managers and other stakeholders.

Audience: Both Grad & Undergrad

6. Apply supervised and unsupervised learning methods to address challenges in insurance applications.

Audience: Graduate

### **ACT SCI 650 – FUNDAMENTALS OF LONG-TERM ACTUARIAL MODELING**

3 credits.

Advanced problems in the mathematical theory of life contingencies; force of mortality, laws of mortality; premiums and reserves for insurance and annuities based on a single life.

**Requisites:** ACT SCI 303 and (MATH 331, STAT/MATH 309, 431, STAT 333, or 340), declared in undergraduate Business Exchange program, or Capstone Certificate in Actuarial Science

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the key features of life and annuity insurance.

Audience: Both Grad & Undergrad

2. Apply key concepts concerning parametric and non-parametric mortality models for individual lives.

Audience: Both Grad & Undergrad

3. Estimate parameters for parametric and nonparametric survival models for actuarial applications.

Audience: Both Grad & Undergrad

4. Describe and evaluate present value random variables associated with benefits and expenses for life and annuity insurance

Audience: Both Grad & Undergrad

5. Describe and use the premium and policy value calculation processes for life and annuity insurance

Audience: Both Grad & Undergrad

6. Apply long-term actuarial modeling tools in conjunction with other techniques to address challenges in insurance applications.

Audience: Graduate

### **ACT SCI 651 – ADVANCED LONG-TERM ACTUARIAL MODELING**

3 credits.

Joint life probabilities, annuities and insurances; multiple-decrement theory; pension fund mathematics.

**Requisites:** ACT SCI 650

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop and utilize multiple state models in actuarial applications and calculate premiums and reserves for policies associated with multiple state models.

Audience: Undergraduate

2. Apply special cases of multiple state model in actuarial practice, including the multiple decrement and multiple life models.

Audience: Undergraduate

3. Understand liabilities and required contributions for pension plans and post retirement health plans.

Audience: Undergraduate

4. Evaluate premiums and liabilities for Universal Life insurance policies.

Audience: Undergraduate

5. Apply profit testing methodology to price and evaluate insurance policies.

Audience: Undergraduate

**ACT SCI 652 – FUNDAMENTALS OF SHORT-TERM ACTUARIAL MODELING**

3 credits.

Definition and selection of probability distributions appropriate for insurance data that are heavily tailed and skewed.

**Requisites:** (GEN BUS 317, STAT/MATH 310, STAT 333, 340, or concurrent enrollment), declared in undergraduate Business Exchange program, or Capstone Certificate in Actuarial Science

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the appropriateness of alternative probability models, for both frequency and severity, when applied to short-term insurance loss data.

Audience: Both Grad & Undergrad

2. Evaluate the effects of coverage modifications on severity models and adjust the models to accommodate the coverage change.

Audience: Both Grad & Undergrad

3. Explain the model building process, and estimation, for the analysis of short-term insurance loss data.

Audience: Both Grad & Undergrad

4. Build aggregate loss models that quantify the risks of an insurance system, and utilize these models in applications such as reinsurance.

Audience: Both Grad & Undergrad

5. Interpret the concepts of ratemaking and reserving, and prepare data for short-term insurance ratemaking and reserving analyses.

Audience: Both Grad & Undergrad

6. Apply short-term actuarial modeling tools in conjunction with other techniques to address challenges in insurance applications.

Audience: Graduate

**ACT SCI 653 – ADVANCED SHORT-TERM ACTUARIAL MODELING**

3 credits.

Estimation of parameters of probability distributions appropriate for insurance data that are heavy tailed and skewed; assessment of credibility of data for ratemaking.

**Requisites:** ACT SCI 652 or declared in undergraduate Business Exchange program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Create new severity distributions through techniques including random variable transformation, mixtures, and splicing.

Audience: Undergraduate

2. Apply extreme value distributions to the estimation of tail measures and probabilities in short-term insurance applications.

Audience: Undergraduate

3. Perform model selection using graphical procedures, hypothesis tests, and score-based approaches with a focus on short-term insurance applications.

Audience: Undergraduate

4. Estimate losses for short-term insurance coverages using credibility procedures including greatest accuracy credibility and empirical Bayesian estimation.

Audience: Undergraduate

5. Apply advanced techniques for estimating outstanding claims associated with short-term insurance coverages, and understand the underlying statistical models and assumptions.

Audience: Undergraduate

6. Apply advanced techniques to calculate premiums for short-term insurance coverages, such as calculating risk classification differential changes.

Audience: Undergraduate

**ACT SCI 654 – REGRESSION AND TIME SERIES FOR ACTUARIES**

2-3 credits.

Foundation of multiple regression and time series analysis with focus on business. Introduction to skills needed to become critical consumers of reports that are based on regression and time series analysis.

**Requisites:** (ACT SCI 640, GEN BUS 656, STAT 333, or 340), or declared in undergraduate Business Exchange program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Complete hands-on tutorials and exercises using linear regression and time series models relevant for actuarial practice.

Audience: Undergraduate

2. Utilize statistical software to estimate model parameters for regression models in business applications.

Audience: Undergraduate

3. Explain the importance of checking model assumptions and conducting residual analyses in business applications.

Audience: Undergraduate

4. Explain the impact of choices of explanatory variables and incorporate these variables in the model.

Audience: Undergraduate

5. Integrate regression concepts to other actuarial science courses including loss models, actuarial mathematics, and use of simulation.

Audience: Undergraduate

**ACT SCI 655 – HEALTH ANALYTICS**

3 credits.

Introduction to the broad area of health, integrating how researchers from multiple perspectives have investigated various aspects of health, along with the hands-on practice of learning and using statistical tools to analyze these topics.

**Requisites:** (ACT SCI 640, GEN BUS 656, STAT 333, or 340), or declared in undergraduate Business Exchange program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss an assortment of issues in the health area to gain knowledge of the interaction of health, health care and health insurance.

Audience: Undergraduate

2. Synthesize research in assigned articles and critically discuss health-related peer-reviewed articles in a small, interactive group setting.

Audience: Undergraduate

3. Apply and extend knowledge in statistics and statistical modeling as related to health topics.

Audience: Undergraduate

4. Apply statistical methods to data from the Medical Expenditure Panel Survey (MEPS).

Audience: Undergraduate

5. Develop presentation and writing skills by critically discussing and analyzing a health analytics paper using MEPS data.

Audience: Undergraduate

**ACT SCI 657 – RISK ANALYTICS**

3 credits.

Develop a toolbox for modeling, communicating, and managing risk and uncertainty in business applications. Emphasis on the notation of probabilistic forecasting and introduces a predictive modeling framework that integrate modern machine learning methods with distribution-based regression models. Topics include heavy-tailed regression, count data regression, survival data analysis, feature engineering using neural networks and natural language processing, among others.

**Requisites:** (ACT SCI 640, GEN BUS 656, STAT 333, or 340), or declared in undergraduate Business Exchange program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate the difference between point prediction and probabilistic prediction in a business context.

Audience: Undergraduate

2. Build predictive models for the purpose of probabilistic forecasting in business applications.

Audience: Undergraduate

3. Select appropriate modeling strategy and evaluate performance of the models in a given business context.

Audience: Undergraduate

4. Perform feature engineering to incorporate complex pattern and unstructured data into the predictive model development for business applications.

Audience: Undergraduate

5. Interpret the prediction outcome and communicate results to non-technical business audiences

Audience: Undergraduate

**ACT SCI 765 – CONTEMPORARY TOPICS**

1-3 credits.

Exploration of subject areas possibly to be introduced into the business curriculum.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

## AFRICAN AMERICAN STUDIES (AFROAMER)

**AFROAMER 101 – INTRODUCTION TO AFRICAN AMERICAN STUDIES**

3 credits.

Delve into the origins of African American Studies as an academic discipline and explore its early forms. Examine how African Americans have contributed to the understanding of the African American experience, both historically and in the present day. Analyze current struggles of the Black community for freedom, justice, and humanity.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and critically assess seminal texts in African American thought.

Audience: Undergraduate

2. Recognize the significant contributions that African American people have made to the social, political, and economic development of the United States.

Audience: Undergraduate

3. Identify strengths and weaknesses of various frameworks for addressing antiblackness and achieving racial equity.

Audience: Undergraduate

4. Apply concepts and knowledge from the course to systemic inequities and current events.

Audience: Undergraduate

5. Develop and communicate a position on the necessity of African American Studies.

Audience: Undergraduate

6. Gain an understanding of what elements of African American Studies they would like to develop deeper inquiry and knowledge.

Audience: Undergraduate

7. Reflect on African American Studies in relation to their own lives.

Audience: Undergraduate

**AFROAMER/AMER IND/ASIAN AM/CHICLA/FOLKLORE 102 – INTRODUCTION TO COMPARATIVE US ETHNIC AND AMERICAN INDIAN STUDIES**

3 credits.

Introduction to comparative ethnic studies, examining race, ethnicity, and indigeneity within the United States. Includes perspectives from African American, American Indian, Asian American, and Chican@ and Latin@ studies.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the multicultural history of the United States of America and the essential role of Indigenous, African, Asian and Chicax/e & Latinx/e peoples in the American story.

Audience: Undergraduate

2. Identify the creation, development and legacies of race-based discrimination in the United States.

Audience: Undergraduate

3. Explain the role of race in the creation of value systems in American society.

Audience: Undergraduate

4. Explore the heterogeneity and complexity within persistently marginalized groups as well as their relations to each other.

Audience: Undergraduate

5. Reflect on their learning experience so that they may develop as well-rounded, informed, and educated members of society who can effectively and successfully participate in a multicultural society.

Audience: Undergraduate

**AFROAMER 151 – INTRODUCTION TO CONTEMPORARY AFRO-AMERICAN SOCIETY**

3 credits.

Survey of the characteristics and problems of African Americans in contemporary society.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**AFROAMER 154 – HIP-HOP AND CONTEMPORARY AMERICAN SOCIETY**

3 credits.

The aesthetic and political evolution of hip-hop culture and its relationship to contemporary social issues.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**AFROAMER 155 – THEY: RACE IN AMERICAN LITERATURE**

3 credits.

The evolution of stereotypes. The literary manifestations of the assumptions black and white American writers hold toward members of the opposite race.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**AFROAMER 156 – BLACK MUSIC AND AMERICAN CULTURAL HISTORY**

3 credits.

Examines the interaction between African American musical culture and its historical context, with an emphasis on the period from 1920 to the present.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**AFROAMER 199 – DIRECTED STUDY**

1-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023

### **AFROAMER/AFRICAN 220 – HIPHOP, YOUTH CULTURE, AND POLITICS IN SENEGAL**

3 credits.

Explores how HipHop, a quintessential manifestation of African American culture, is adopted and adapted by African youth to fight for social justice and democracy in their local contexts, while at the same time constructing a diasporic African sensibility and "cultural citizenship" that transcends borders and oceans. Beginning with the history, culture, and politics of HipHop in the U.S., we compare and contrast HipHop's development in Africa with specific attention to Senegal. Explores the youth culture and politics in Senegal and the ongoing process of cross-cultural flows and hybridity.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

### **AFROAMER/GEN&WS 221 – INTRODUCTION TO BLACK WOMEN'S STUDIES**

3 credits.

This course will provide students with an overview of the field of Black women's studies.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **AFROAMER/GEN&WS 222 – INTRODUCTION TO BLACK WOMEN WRITERS**

3 credits.

An introduction to the writings of Afro-American women from the nineteenth to the twentieth century. Fiction, autobiography, non-fiction prose, and poetry will be read and discussed.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **AFROAMER 225 – INTRODUCTION TO AFRICAN AMERICAN DRAMATIC LITERATURE**

3 credits.

Introduction to the history of African American theater and major African American playwrights and actors.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **AFROAMER 227 – MASTERPIECES OF AFRICAN AMERICAN LITERATURE**

3 credits.

Analysis of major works of African American fiction, drama, poetry and autobiography. Attention given to historical, cultural and biographical contexts.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AFROAMER 231 – INTRODUCTION TO AFRICAN AMERICAN HISTORY**

3 credits.

A social history of West Africans and African Americans from the Trans-Atlantic Slave Trade through the modern Civil Rights Movement, paying special attention to the institution of slavery (1619-1865), emancipation and reconstruction (1861-1877), and the long civil rights movement (1877-1968). Major themes include the varied experiences of enslaved peoples, the roles Black people played in maintaining and sustaining North American colonies, and how African Americans helped to create the American Republic. Examine how Black people fought for their freedom and liberty, as well as, the challenges, successes, and shortcomings of the long civil rights movement.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Recognize the multitude of contributions that people of African descent made to the social, political, and economic development of the United States of America.

Audience: Undergraduate

2. Describe how race-based discrimination was used to marginalize African Americans socially, politically, and economically, and how Black people fought back against institutional oppression.

Audience: Undergraduate

3. Explain the creation, development, and legacies of race-based slavery in the United States.

Audience: Undergraduate

4. Use primary sources and secondary peer-reviewed sources to explain and discuss how certain histories have been valued and devalued and how these differences have promulgated disparities in contemporary American society.

Audience: Undergraduate

5. Demonstrate critical reading, writing, speaking, and thinking skills, specifically with respect to teaching students to harbor healthy skepticism toward knowledge claims.

Audience: Undergraduate

6. Contribute as a well-rounded, informed, and educated citizen capable of beginning to address the goals of the Ethnic Studies Requirement. engendering students' ability to participate in a multicultural society effectively and successfully and to specifically, "prepare students for life and careers in an increasingly multicultural U.S. environment, add breadth and depth to the University

Audience: Undergraduate

7. Engender students' ability to participate in a multicultural society effectively and successfully and to specifically, "prepare students for life and careers in an increasingly multicultural U.S. environment, add breadth and depth to the University curriculum, and to improve the campus climate."

Audience: Undergraduate

8. In-class discussions allow us to practice these skills and gain comfort in talking through difficult historical material. Students demonstrate the ability to have conversations with classmates about race and recognize inequities in institutions.

**AFROAMER/AFRICAN 233 – GLOBAL HIPHOP AND SOCIAL JUSTICE**

3 credits.

Critical interrogation of the relationship between HipHop and social justice. What is "HipHop," what is "social justice," what is their relationship, how can HipHop can be an effective force for social justice, and what obstacles mitigate against this potential? Discussions will develop familiarity with important concepts in Black studies and social theory such as race and colonialism, imperialism and hegemony, structure and agency, identity and strategic essentialism. Consider the race/class/gender dimensions of weekly topics, acquire a broader familiarity with HipHop activism, and develop new conceptual tools and critical thinking skills.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**AFROAMER/ART HIST 241 – INTRODUCTION TO AFRICAN ART AND ARCHITECTURE**

3 credits.

Examines the rich heritage of African arts and architecture as they shape and have been shaped by the histories and cultural values (social, political, religious, philosophical, and aesthetic) of African peoples, both past and present, on the continent where humanity began. It includes an historical overview of selected artistic traditions from different parts of the continent from 26,000 BCE to the 21st century and thematic/cultural case studies: artists and aesthetics; textiles, decorative, and personal/body arts; architecture; and individual artists.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**AFROAMER/ART HIST 242 – INTRODUCTION TO AFRO-AMERICAN ART**

3 credits.

Historical survey of African American art. Beginning with the African heritage and concluding with creativity of the 1970's, examine the evolution of African American art. Attention to the aesthetic sensibilities of diverse styles as well as the social significance of Black art within the art arena.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

### **AFROAMER/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/ POLI SCI/SOC/SPANISH 260 – LATIN AMERICA: AN INTRODUCTION**

3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze Latin American culture and society from an interdisciplinary perspective.

Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.

Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.

Audience: Undergraduate

### **AFROAMER 265 – AFRICAN-AMERICAN AUTOBIOGRAPHY**

3 credits.

Autobiographies of major African Americans studied in depth to locate the constants and variables in the Black American experience. Focus on the variety of individual responses to conditions in the United States.

**Requisites:** Sophomore standing; not open to special students

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **AFROAMER/GEN&WS 267 – ARTISTIC/CULTURAL IMAGES OF BLACK WOMEN**

3 credits.

Cultural images by and about Black women; feminine creativity in the arts within their historical, cultural, social, and political contexts.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **AFROAMER 270 – SELECTED TOPICS IN AFRICAN AMERICAN STUDIES**

1-3 credits.

Introduction to a historical and/or contemporary topic concerning the African American experience. Explores key factors of African American experiences that impact current society.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.

Audience: Undergraduate

2. Recognize inequities in personal and institutional contexts.

Audience: Undergraduate

3. Explain the results of academic research in the area of race to various audiences.

Audience: Undergraduate

4. Develop an understanding of the connection between different disciplinary approaches to the study of race.

Audience: Undergraduate

### **AFROAMER 271 – SELECTED TOPICS IN AFRICAN AMERICAN CULTURE**

3 credits.

Introductory level course on specific topics in African American culture.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **AFROAMER 272 – RACE AND AMERICAN POLITICS FROM THE NEW DEAL TO THE NEW RIGHT**

3 credits.

Survey of the decisive role played by race in American politics, 1932-present. Focus on origins and accomplishments of "the Second Reconstruction"; Black Power and white backlash; contemporary racial politics and issues.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AFROAMER/HIST SCI 275 – SCIENCE, MEDICINE, AND RACE: A HISTORY**

3-4 credits.

Surveys the medical and scientific constructions of categories of race, placing the development of racial theories in a broad social and political context. Pays particular attention to the importance of racial science in slavery and colonialism.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and analyze within their social, cultural and economic contexts key historical issues, and their significance, in the history of the idea of race as it relates to scientific and medical developments.

Audience: Undergraduate

2. Develop an understanding of the mutually shaping interactions between ideas about race and perceptions of social hierarchy, health, illness and medical and anthropological categories.

Audience: Undergraduate

3. Analyze the role of social factors like gender and class, among others, in shaping cultural realities related to race and body normativity.

Audience: Undergraduate

4. Identify the role that scientists, physicians, patients, healthcare providers, scientific institutions and the state play in modeling, ideas about race.

Audience: Undergraduate

5. Discern the impact of programs of global science as they intersect with international politics in the shaping of ideas about human rights, ethnicity, and race.

Audience: Undergraduate

**AFROAMER/AFRICAN/ANTHRO/GEOP/HISTORY/POLI SCI/ SOC 277 – AFRICA: AN INTRODUCTORY SURVEY**

4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze African society and culture from a multidisciplinary perspective.

Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.

Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.

Audience: Undergraduate

**AFROAMER/AFRICAN/HISTORY/POLI SCI 297 – AFRICAN AND AFRICAN-AMERICAN LINKAGES: AN INTRODUCTION**

4 credits.

Analysis of retention of African elements in African-American oral, written, and material culture. Social, cultural, and political issues regarding race, self-definition, and self-determination in both Africa and North America will be examined.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2018

**Learning Outcomes:** 1. Analyze the retention of African elements in African-American oral, written, and material culture.

Audience: Undergraduate

2. Explore social, cultural, and political issues regarding race in both Africa and North America.

Audience: Undergraduate

3. Examine self-determination in both Africa and North America.

Audience: Undergraduate

**AFROAMER 302 – UNDERGRADUATE STUDIES IN AFRO-AMERICAN HISTORY**

3 credits.

In-depth treatment of a key theme in black historical studies.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**AFROAMER 303 – BLACKS, FILM, AND SOCIETY**

3 credits.

Study of the interpretations of the African American past conveyed via theatrical films and television; relationship to other images of blacks found throughout the popular culture; relationship to societal trends.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**AFROAMER/DANCE/MUSIC 318 – CULTURAL CROSS CURRENTS: WEST AFRICAN DANCE/MUSIC IN THE AMERICAS**

3 credits.

The influence of traditional West African dance/music heritage in historical, artistic, social contexts in the development of new hybrid forms of music/dance created by cross-pollination of cultures of Africans, Europeans and indigenous peoples in the New World.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**AFROAMER/ASIAN AM/DANCE/FOLKLORE 319 – AFRO ASIAN IMPROV: FROM HIP HOP TO MARTIAL ARTS FUSION**

3 credits.

An Afro Asian perspective provides a lens through which intersections between Asian American and African American dance and martial arts are studied and practiced. Asian American and African American movement genres provide tools to explore dance fusion, choreography, and improvisation, to create dances informed by African American and Asian American legacies of struggle, innovation and transformation, while cognizant of historical forces of oppression and racism. Building connections through respectful communication with others are learned through dance practice, discussion and writing about concepts learned through readings, videos, and guest artist visits. Engagement with dance as a cultural vehicle for creative problem-solving and risk-taking occurs through guided class or smaller group activities.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Articulate perspectives on the diversity of the human condition through critical and interpretive skills to analyze the past, present, and future of human movement in a complex world

Audience: Undergraduate

2. Prepare for participation in a multicultural society through developing a consciousness of self and other and building empathy towards others' perspective, thinking critically and questioning assumptions of certain valued or devalued histories, and analyzing how these differences have promulgated disparities in contemporary American society

Audience: Undergraduate

3. Demonstrate skills in writing and speaking about dance in its historical, contemporary and cultural contexts

Audience: Undergraduate

4. Articulate Afro Asian perspectives on the intersections of Asian American and African American cultural, social and historical knowledge, and communicate important ideas through dance and story-telling performance

Audience: Undergraduate

5. Practice Asian American and African American foundational movement toolboxes as a basis for improvisation and dance choreography supported by concepts of theater and culturally-based learning traditions

Audience: Undergraduate

6. Engage in imagination-led and creative problem-solving movement activities

Audience: Undergraduate

7. Build connections with others through class practice, discussions, working groups within and outside of class

Audience: Undergraduate

8. Use the skills you learn to lead a calmer, more focused, responsible and productive life

Audience: Undergraduate

**AFROAMER/HISTORY 321 – AFRO-AMERICAN HISTORY SINCE 1900**

3-4 credits.

Survey of African American history from 1900 to the present. Topics covered include segregation, the Civil Rights Movement, the political, social and cultural changes of the late 20th century, and the Obama presidency.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AFROAMER/HISTORY 322 – AFRICAN AMERICAN HISTORY TO 1900**

3 credits.

Survey of African American history from its roots in Africa to the end of the 19th century. Topics considered include the slave trade, the political and cultural practices of enslaved communities, forms of resistance, Reconstruction, and systems of segregation.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

**Learning Outcomes:** 1. Recognize the multitude of contributions that people of African descent made to the social, political, and economic development of the United States of America.

Audience: Both Grad & Undergrad

2. Explain the creation, development, and legacies of race-based slavery in the United States.

Audience: Both Grad & Undergrad

3. Describe how race-based discrimination was used to marginalize African Americans socially, politically, and economically, and how Black people fought back against institutional oppression

Audience: Both Grad & Undergrad

4. Use primary sources and secondary peer-reviewed sources to explain and discuss how certain histories have been valued and devalued and how these differences have promulgated disparities in contemporary American society.

Audience: Both Grad & Undergrad

5. Demonstrate critical reading, writing, speaking, and thinking skills, specifically concerning teaching students to harbor healthy skepticism toward knowledge claims.

Audience: Both Grad & Undergrad

6. Contribute as a well-rounded, informed, and educated citizen capable of beginning to address the goals of the Ethnic Studies Requirement, including engendering students' ability to participate in a multicultural society effectively and successfully.

Audience: Undergraduate

7. Apply the primary theories and methods employed by historians of African American history.

Audience: Graduate

### **AFROAMER/GEN&WS 323 – GENDER, RACE AND CLASS: WOMEN IN U.S. HISTORY**

3 credits.

Historical interplay of racism and sexism in the lives of Black and White women of different class backgrounds in the United States.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2017

**Learning Outcomes:** 1. Explain the relationship between gender, race, and class in the United States.

Audience: Both Grad & Undergrad

2. Appreciate the multitude of contributions made by women of African descent in the social, political, cultural, and economic development of the United States of America.

Audience: Both Grad & Undergrad

3. Identify how certain histories have been valued and devalued, and how these differences have promulgated disparities in contemporary American society.

Audience: Both Grad & Undergrad

4. Critique canonical US history and its impact on gender and race relations in the US, developing a healthy skepticism of knowledge claims.

Audience: Both Grad & Undergrad

5. Use primary sources and secondary peer-reviewed sources in written assignments to connect course topics to the lived experiences of African Americans.

Audience: Both Grad & Undergrad

6. Communicate with others in a way that displays an understanding of racial inequities in the US.

Audience: Undergraduate

7. Understand and apply the primary theories and methods employed by historians of African American history.

Audience: Graduate

### **AFROAMER/GEN&WS 324 – BLACK WOMEN IN AMERICA: RECONSTRUCTION TO THE PRESENT**

3 credits.

Explores African American women's experience from waning days of slavery to present. Topics include slavery, emancipation, reconstruction, segregation, migration, urban and rural poverty, civil rights, nationalism, feminism and sexual politics.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2017

**Learning Outcomes:** 1. Explain the implications of being Black and female in the United States since the Reconstruction era.

Audience: Both Grad & Undergrad

2. Appreciate the multitude of contributions made by women of African descent in the social, political, cultural, and economic development of the United States of America.

Audience: Both Grad & Undergrad

3. Describe how certain histories have been valued and devalued, and how these differences have promulgated racial disparities in contemporary American society.

Audience: Both Grad & Undergrad

4. Critique canonical US history and its impact on gender and race relations in the US, developing a healthy skepticism of knowledge claims.

Audience: Both Grad & Undergrad

5. Use primary sources and secondary peer-reviewed sources in written assignments to connect course topics to the lived experiences of African Americans.

Audience: Both Grad & Undergrad

6. Communicate with others in a way that displays an understanding of racial inequities in the US.

Audience: Undergraduate

7. Understand and apply the primary theories and methods employed by historians of African American history.

Audience: Graduate

**AFROAMER/GEN&WS 326 – RACE AND GENDER IN POST-WORLD WAR II U.S. SOCIETY**

3 credits.

Assesses how race and gender (as well as socio-economic status, age, sexuality, region, etc.) shaped the experiences and options of African Americans, especially women, in U.S. society from WW II to the present.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**AFROAMER/GEN&WS 333 – BLACK FEMINISMS**

3 credits.

Uses an interdisciplinary framework to interrogate core assumptions, arguments, and silences in past and present black feminist thought.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**AFROAMER 337 – THE HARLEM RENAISSANCE**

3 credits.

Black literature and culture during the 1920's. Focus on unique Black literary expression of era, historical background, esthetics, polemical essays.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**AFROAMER 338 – THE BLACK ARTS MOVEMENT**

3 credits.

Focuses on the notion of blackness as it is developed in the poetry and drama of key figures of the 1960s Black Arts Movement. Emphasizes the emergence of a critical discourse specific to a "new" black aesthetic.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**AFROAMER/HISTORY 347 – THE CARIBBEAN AND ITS DIASPORAS**

3-4 credits.

Surveys the history of the Caribbean from the 15th century to the present. Emphasizes the importance of colonialism, commodity-based capitalism, globalization, slavery, and forced labor for the modeling of the region's social, economic, cultural, and political structures. Pay particular attention to the resilient, creative and resourceful ways in which Caribbean people have responded to these adverse conditions. Examine the circumstances that have shaped migrations from the region to the United States and Canada during the 20th and 21st centuries. Study how these diasporic communities have created social spaces in these two countries that have remained closely linked to the Caribbean through economic, political, and filial networks.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Identify the historical roots of the racial, political, cultural, and social structures of contemporary Caribbean societies and their diasporas

Audience: Undergraduate

2. Recognize the multiple ethnic and cultural origins of Caribbean communities and the impact these communities had in the modeling of Atlantic and global historical developments

Audience: Undergraduate

3. Analyze and synthesize information, provide evidence-based interpretations about the past, and develop arguments regarding the history of Caribbean societies and their global diasporas

Audience: Undergraduate

4. Identify and analyze within their social, cultural, and economic contexts key historical developments in the history of the Caribbean from the fifteenth century to the present

Audience: Both Grad &amp; Undergrad

5. Analyze the role that social and cultural factors—such as gender, religion, ethnicity, and class, among others—had in shaping Caribbean historical developments

Audience: Both Grad &amp; Undergrad

6. Identify and analyze within their social, cultural and economic contexts the history of the idea of race as it relates to the history of the Caribbean

Audience: Both Grad &amp; Undergrad

7. Discern the impact of local and global political and economic developments, in the shaping of ideas about racial, ethnic, social, and cultural hierarchies and public policies in Caribbean nations

Audience: Both Grad &amp; Undergrad

8. Understand the different methodological approaches and research strategies that historians, anthropologists, and other scholars have used to examine the histories of the Caribbean from the sixteenth century to the present

Audience: Graduate

**AFROAMER/GEN&WS 367 – ART AND VISUAL CULTURE: WOMEN OF THE AFRICAN DIASPORA AND AFRICA**

3 credits.

Art and visual culture by/or pertaining to women throughout the African Diaspora and Africa. Though the focus is on 10th century art by black women, it will go into visual culture (art objects, photographs, images, dress, culturally-coded representation) concerning black women historically.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AFROAMER/HISTORY 393 – SLAVERY, CIVIL WAR, AND RECONSTRUCTION, 1848-1877**

3-4 credits.

African-American slavery and its impact on mid-19th century social, political, and economic life; the causes, course, and consequences of the Civil War; the rise and fall of postwar Reconstruction and non-racial citizenship; the impact of these histories on contemporary American society.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AFROAMER/AFRICAN 413 – CONTEMPORARY AFRICAN AND CARIBBEAN DRAMA**

3-4 credits.

A critical study of the major works.

**Requisites:** Sophomore standing and (AFRICAN 201, 203, 211, 231, or FOLKLORE/AFRICAN 210), or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**AFROAMER/LEGAL ST 435 – CIVIL RIGHTS: POLICING, PRISONS, VOTING, HOUSING, EMPLOYMENT**

3-4 credits.

Exploration of civil rights. Question what it means to discriminate (on the basis of race, sex, national origin, religion, and disability), how we might investigate and detect acts of discrimination, and the legal constraints on governmental efforts to remedy discrimination in employment, housing, and voting. Explore the intersection of government power and civil rights. Examine how the government targets groups during times of national crisis. Consider what constitutes acceptable conditions of incarceration for prisoners. Finally, learn police use-of-force doctrine, and discuss the challenge of protecting both officer and civilian safety.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key historical events that led to the conception and creation of civil rights.

Audience: Both Grad & Undergrad

2. Identify constitutional justifications for the use of federal authority to legislate in the area of civil rights.

Audience: Both Grad & Undergrad

3. Summarize statutes and cases that protect against discrimination in employment, housing, and voting.

Audience: Both Grad & Undergrad

4. Demonstrate an understanding of major civil rights controversies surrounding political detainees, prison inmates, and those subject to police force during street encounters.

Audience: Both Grad & Undergrad

5. Demonstrate an advanced understanding of the historical context, constitutional arguments, and current scholarly debates concerning civil rights law.

Audience: Graduate

**AFROAMER/POLI SCI 519 – AFRICAN AMERICAN POLITICAL THEORY**

3-4 credits.

Explores a range of theories that African Americans have drawn upon to cope with and ameliorate their political circumstances in the United States within the specific parameters of political theory.

**Requisites:** Sophomore standing and (POLI SCI 160 or AFROAMER 151) or (POLI SCI 209 taken prior to fall 2017) or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze how African American thinkers simultaneously reflect and complicate liberal, conservative, nationalist, and materialist political thought.

Audience: Undergraduate

2. Examine how African American thinkers understand sexism in African American political thought and racism in feminist thought.

Audience: Undergraduate

3. Interrogate contemporary debates in African American political theory including, but not limited to, the parameters of effective black leadership.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**AFROAMER/HIST SCI/MED HIST 523 – RACE, AMERICAN MEDICINE AND PUBLIC HEALTH**

3 credits.

Provides historical perspectives on current dilemmas facing black patients and health care professionals.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key developments, actors, ideas, and institutions in the broad history of race, medicine and public health in America between 1700 and 2000.

Audience: Both Grad & Undergrad

2. Analyze and write critically about primary and secondary historical sources by examining diverse interpretations of past events and ideas in their historical contexts.

Audience: Both Grad & Undergrad

3. Evaluate the ways in which ideas about race and assumptions about the meaning of racial difference influenced the care patients of color received and how they experienced their illnesses and injuries.

Audience: Both Grad & Undergrad

4. Understand how conceptions of race profoundly influenced the medical and nursing professions, as well as medical institutions (dispensaries, hospitals, and blood donation centers).

Audience: Both Grad & Undergrad

5. Evaluate the different methodological approaches historians have used to analyze the multiple histories of race, medicine, and public health in the United States in the last two centuries.

Audience: Graduate

**AFROAMER 525 – MAJOR AUTHORS**

3 credits.

Intensive literary criticism of the works of selected authors. Emphasis on fiction, but non-fiction when appropriate. Works of one or two authors.

**Requisites:** Junior standing; not open to special students

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **AFROAMER/ED POL 567 – HISTORY OF AFRICAN AMERICAN EDUCATION**

3 credits.

An examination of the social, economic, political, and cultural issues influencing the education of Black Americans from the early nineteenth century to the 1960s.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **AFROAMER 621 – SLAVERY AND CAPITALISM IN THE UNITED STATES**

3 credits.

Addresses the relationship between slavery and capitalism in the British North American colonies and the United States of America. Drawing on recent scholarship that explores how slavery and capitalism are independent systems, examines how the labor of enslaved people affected the development and growth of wage labor; the impact of the growth and dominance of capitalism as an economic system on the institution of slavery; and the experiences of enslaved people.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the relationship between the institution of race-based slavery and the emergence of modern capitalism in the United States.

Audience: Both Grad & Undergrad

2. Appreciate the multitude of contributions made by people of African descent in the social, political, and economic development of the United States of America.

Audience: Both Grad & Undergrad

3. Understand the creation, development, and legacies of race-based slavery in the United States.

Audience: Both Grad & Undergrad

4. Understand the primary theories and methods employed by historians of race-based slavery

Audience: Graduate

### **AFROAMER/GEN&WS 624 – AFRICAN AMERICAN WOMEN'S ACTIVISM (19TH & 20TH CENTURIES)**

3 credits.

Examines Black women's struggles for racial justices; reconsiders conventional notions of leadership, politics and protest. Topics include abolitionism, anti-lynching campaigns, woman suffrage, labor movement, club movement, cultural expressions, civil rights protest, Black feminism/womanism, poverty and welfare rights, environmental racism, etc.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### **AFROAMER/GEN&WS 625 – GENDER, RACE AND THE CIVIL RIGHTS MOVEMENT**

3 credits.

This course focuses on the emerging field of gender studies in the scholarship on the post-World War II civil rights movement in the United States.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **AFROAMER/HISTORY 628 – HISTORY OF THE CIVIL RIGHTS MOVEMENT IN THE UNITED STATES**

3 credits.

Civil rights history from 1930-1970. Legal, historical and economic origins of the civil rights movement. Study of the movement's impact on United States culture, politics, and international relations.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **AFROAMER 631 – COLLOQUIUM IN AFRO-AMERICAN HISTORY**

3 credits.

Research and discussion of topics in African American History.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**AFROAMER 671 – SELECTED TOPICS IN AFRO-AMERICAN HISTORY**

3 credits.

An intensive analysis of specific historical themes in African Americans' experiences.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**AFROAMER/ENGL 672 – SELECTED TOPICS IN AFRO-AMERICAN LITERATURE**

3 credits.

An intensive analysis of specific themes in the Afro-American experience. Subjects vary with instructor.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**AFROAMER 673 – SELECTED TOPICS IN AFRO-AMERICAN SOCIETY**

3 credits.

An intensive analysis of specific societal themes in African Americans' experiences.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**AFROAMER 675 – SELECTED TOPICS IN AFRO-AMERICAN CULTURE**

3 credits.

An intensive analysis of specific cultural themes in African Americans' experiences.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**AFROAMER/GEN&WS 677 – CRITICAL AND THEORETICAL PERSPECTIVES IN BLACK WOMEN'S WRITINGS**

3 credits.

Analyses and interpretations of literary works by black women writers through historical, philosophical, political, feminist, and other contemporary critical methods.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AFROAMER 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2007

**AFROAMER 682 – SENIOR HONOR THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2008

**AFROAMER 691 – SENIOR THESIS**

2-3 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2010

**AFROAMER 692 – SENIOR THESIS**

2-3 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2010

**AFROAMER 699 – DIRECTED STUDY IN AFRO-AMERICAN STUDIES**

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**AFROAMER/ED POL/HISTORY 712 – EDUCATION AND THE CIVIL RIGHTS MOVEMENT**

3 credits.

Explores the historical relationship between education and the African American freedom struggle from the early twentieth century to the present. Topics include school segregation, desegregation, and resegregation; high school and college student activism; Black Power; civil rights protest strategies and tactics, and the role of the federal government.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2020**AFROAMER 790 – RESEARCH AND THESIS**

1-12 credits.

Mentored individual research and study for students completing a Master's thesis.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**AFROAMER/ART HIST 801 – HISTORIOGRAPHY, THEORY AND METHODS IN VISUAL CULTURE**

3 credits.

Focuses on the knowledge, theories, and methods that are fundamental to the transdisciplinary discipline of Visual Cultures. Develops skills in critical reading, research, analysis, writing, and oral presentation.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Show comprehension of the history, theories, and methods of Visual Culture as a field of study as they are practiced in the field of Visual Cultures.

Audience: Graduate

2. Demonstrate critical ability to work with and develop Visual Culture theories and methods.

Audience: Graduate

3. Develop capacity to conduct original research in Visual Culture.

Audience: Graduate

4. Show ability to work with Visual Culture theories and methods in the analysis and presentation of original research which may take oral, written, and visual forms.

Audience: Graduate

5. Develop the critical analytic, rhetorical, and technical skills necessary to effectively communicate original research in Visual Culture.

Audience: Graduate

**AFROAMER/ART HIST 802 – VISUAL CULTURES: TOPICS IN VISUAL CULTURES**

3 credits.

Content will vary to facilitate in-depth engagement with a particular topic in Visual Culture. Topics will be pursued with analytic attention to gender, sexuality and race.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop ability to work with Visual Culture theories and methods  
Audience: Graduate

2. Develop ability to critique, extend and even revise visual culture theories  
Audience: Graduate

3. Demonstrate a practice-based, working knowledge of visual culture theories and methods in producing original research which may take written or visual form  
Audience: Graduate

4. Develop the critical analytic, rhetorical, and technical skills necessary to effectively communicate original research in Visual Culture.  
Audience: Graduate

**AFROAMER/AFRICAN 813 – CONTEMPORARY AFRICAN AND CARIBBEAN DRAMA**

3 credits.

Historical and critical study of the classics of contemporary African and Caribbean literary drama written in English. Thematic issues include the African encounter with Europe, postcolonial disillusionment and the betrayal of ideals, and also stylistic matters as the relationship(s) between traditional drama and other performance forms, and modern drama written in European languages. Considers theories and critical approaches to understanding the cross-continental drama traditions and their contexts. Examines the long histories of cultural, performance, and theatrical relationships between Africa and the Caribbean and how the relationships have been shaped by race and economics, past and present. Considers and questions conventional claims made by others and your own assumptions; stimulates analytical thinking about identity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**AFRICAN CULTURAL STUDIES (AFRICAN)****AFRICAN 100 – INTRODUCTION TO AFRICAN CULTURAL EXPRESSION**

3 credits.

An introduction to current research in African cultural studies, ranging from various literary genres and uses of discourse; to diverse media including screen media, music, cartoons, and journalism; and to other forms of popular expression like soccer and drama. Through an introduction to these forms, study the diverse methods used by scholars in this field, such as textual analysis, film criticism, ethnomusicology, discourse analysis, and ethnography; and to the cultural diversity of Africa and its diasporic cultures.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AFRICAN/HISTORY 106 – INTRODUCTION TO AFRICAN HISTORY**

3-4 credits.

Introductory exploration of a thematic or chronological area of African history. Topics vary by instructor.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate and interpret a wide range of historical evidence in order to make arguments about changes over time in African societies  
Audience: Undergraduate

2. Identify multiple methodologies that historians use to study the African past  
Audience: Undergraduate

3. Interpret African history from different viewpoints and perspectives  
Audience: Undergraduate

**AFRICAN/HISTORY 129 – AFRICA ON THE GLOBAL STAGE**

3-4 credits.

Explores the interplay between Africa and the World from the 19th century to the present, covering subjects such as the slave- trade, repatriation, Africanizing of culture in the Americas and Europe, the spread and revival of world religions, colonialism, global capitalism, the rise of global popular culture such as pop music and video films, environmental concerns and global epidemics.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**AFRICAN 201 – INTRODUCTION TO AFRICAN LITERATURE**

3 credits.

Survey of African literary traditions and introduction to literary analysis.

**Requisites:** None**Course Designation:** Gen Ed – Communication Part B

Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**AFRICAN 202 – INTRODUCTORY TOPICS IN AFRICAN CULTURAL STUDIES**

3 credits.

Various topics in African cultural studies and African expressive cultures. Topics will include cultural and/or political themes that cut across multiple media and genres, including two or more of the following: literature, film, media, music, performance, language use, etc.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.

Audience: Undergraduate

2. Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.

Audience: Undergraduate

3. Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.

Audience: Undergraduate

4. Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.

Audience: Undergraduate

5. Develop a level of proficiency in the different “ways of knowing” Africa and the diaspora through language, literatures, and cultures.

Audience: Undergraduate

6. Effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.

Audience: Undergraduate

7. Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.

Audience: Undergraduate

**AFRICAN 203 – INTRODUCTORY TOPICS IN AFRICAN LITERATURE**

3 credits.

Introduction to a special topic in African literature, focused on a specific region or genre.

**Requisites:** None

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.

Audience: Undergraduate

2. Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.

Audience: Undergraduate

3. Develop a level of proficiency in the different “ways of knowing” Africa through literatures.

Audience: Undergraduate

4. Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.

Audience: Undergraduate

5. Effectively retrieve and comprehend primary sources in English and secondary sources in literary criticism.

Audience: Undergraduate

6. Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.

Audience: Undergraduate

7. Show knowledge of conventional rhetorical strategies and integrate research by other authors while distinguishing between their own ideas and those of others.

Audience: Undergraduate

8. Discuss literature from various perspectives, formulate ideas and make connections between literary concepts and themes.

Audience: Undergraduate

**AFRICAN 204 – INTRODUCTORY TOPICS IN AFRICAN LANGUAGES**

3 credits.

Special topics related to African languages and/or linguistics at the introductory level. Introduction to the diversity of African languages, superdiverse multilingual African societies, and the relationships between language and other societal issues.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the names of major African language families and important African languages, and important terms for the study of African languages

Audience: Undergraduate

2. Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in the study of African languages

Audience: Undergraduate

3. Develop a level of proficiency in the different “ways of knowing” Africa and the diaspora through languages and cultures.

Audience: Undergraduate

4. Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.

Audience: Undergraduate

5. Effectively retrieve and comprehend primary sources and secondary sources from a range of disciplines.

Audience: Undergraduate

6. Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.

Audience: Undergraduate

7. Discuss linguistic analysis and examples from various theoretical and critical perspectives, formulate ideas and make connections between linguistic and social concepts and themes.

Audience: Undergraduate

### **AFRICAN 206 – INTRODUCTION TO AFRICAN LINGUISTIC PRACTICES**

3 credits.

An introduction to various approaches to studying African languages in societal context from the perspective of experts in sociolinguistics, linguistic ethnography, and language pedagogy. Topics covered will include multilingualism, codeswitching, codemixing, translanguaging, language invention/disinvention, interactional practices, discourse analysis, language and politics, language and identity, language in education, language, gender, and sexuality, language and the media, language choice in literature and film, language and popular culture, translation, and language learning.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Recognize major African languages and where they are spoken, and the relationship between languages and ethnic groups.

Audience: Undergraduate

2. Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African sociolinguistics and linguistic anthropology.

Audience: Undergraduate

3. Develop a level of proficiency in the different “ways of knowing” Africa and the diaspora through languages and cultures.

Audience: Undergraduate

4. Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.

Audience: Undergraduate

5. Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.

Audience: Undergraduate

6. Write and speak across disciplinary boundaries with regard to existing research about African languages.

Audience: Undergraduate

7. Demonstrate command of the terminology of sociolinguistics.

Audience: Undergraduate

### **AFRICAN/FOLKLORE 210 – THE AFRICAN STORYTELLER**

3 credits.

The oral tradition and the written word; the composition of stories, relationship between performer and audience, and transmission of tradition in various African societies.

**Requisites:** None

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **AFRICAN 212 – INTRODUCTION TO AFRICAN POPULAR CULTURE**

3 credits.

Popular culture (such as popular literature, music, television, news media, movies, etc.) will be used to introduce the African continent and its cultures, people, and languages. Explore text from a different regions on the continent, with a focus on differences and similarities across the continent at the level of aesthetics and context.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.

Audience: Undergraduate

2. Develop a level of proficiency in the different “ways of knowing” Africa and the diaspora through language, literatures, and cultures.

Audience: Undergraduate

3. Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.

Audience: Undergraduate

4. Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.

Audience: Undergraduate

5. Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others

Audience: Undergraduate

**AFRICAN/FRENCH 216 – MODERN AND CONTEMPORARY FRANCOPHONE TOPICS**

3 credits.

Modern and contemporary topics in the African francophone world, which includes both the African continent and the African diaspora. Taught in English.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions

**Learning Outcomes:** 1. Recognize canonical authors (writers and directors), historical forms, genres, and structures, in Africa and its diasporas.

Audience: Undergraduate

2. Develop a level of proficiency in the different “ways of knowing” Africa and the diaspora through cinema and/or literature.

Audience: Undergraduate

3. Discuss visual and literary texts from various theoretical and critical perspectives, formulate ideas and make connections between visual/cultural concepts and themes.

Audience: Undergraduate

**AFRICAN/AFROAMER 220 – HIPHOP, YOUTH CULTURE, AND POLITICS IN SENEGAL**

3 credits.

Explores how HipHop, a quintessential manifestation of African American culture, is adopted and adapted by African youth to fight for social justice and democracy in their local contexts, while at the same time constructing a diasporic African sensibility and “cultural citizenship” that transcends borders and oceans. Beginning with the history, culture, and politics of HipHop in the U.S., we compare and contrast HipHop’s development in Africa with specific attention to Senegal. Explores the youth culture and politics in Senegal and the ongoing process of cross-cultural flows and hybridity.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2019**AFRICAN 230 – INTRODUCTION TO YORUBA LIFE AND CULTURE**

3 credits.

Introduction to some aspects of the life and culture of Yoruba-speaking people of West Africa, Cuba, Brazil, and Haiti, including the importance of Yoruba culture in the Americas.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2022**AFRICAN 231 – INTRODUCTION TO ARABIC LITERARY CULTURE**

3 credits.

Overview on Arabic cultural production. Develops a historic and critical understanding of Arabic literary traditions, as well as related musical and visual arts, up to the twenty-first century.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**AFRICAN/AFROAMER 233 – GLOBAL HIPHOP AND SOCIAL JUSTICE**

3 credits.

Critical interrogation of the relationship between HipHop and social justice. What is “HipHop,” what is “social justice,” what is their relationship, how can HipHop can be an effective force for social justice, and what obstacles mitigate against this potential? Discussions will develop familiarity with important concepts in Black studies and social theory such as race and colonialism, imperialism and hegemony, structure and agency, identity and strategic essentialism. Consider the race/class/gender dimensions of weekly topics, acquire a broader familiarity with HipHop activism, and develop new conceptual tools and critical thinking skills.

**Requisites:** None**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**AFRICAN/AFROAMER/ANTHRO/GEORG/HISTORY/POLI SCI/  
SOC 277 – AFRICA: AN INTRODUCTORY SURVEY**

4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze African society and culture from a multidisciplinary perspective.

Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.

Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.

Audience: Undergraduate

**AFRICAN/AFROAMER/HISTORY/POLI SCI 297 – AFRICAN AND  
AFRICAN-AMERICAN LINKAGES: AN INTRODUCTION**

4 credits.

Analysis of retention of African elements in African-American oral, written, and material culture. Social, cultural, and political issues regarding race, self-definition, and self-determination in both Africa and North America will be examined.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**Learning Outcomes:** 1. Analyze the retention of African elements in African-American oral, written, and material culture.

Audience: Undergraduate

2. Explore social, cultural, and political issues regarding race in both Africa and North America.

Audience: Undergraduate

3. Examine self-determination in both Africa and North America.

Audience: Undergraduate

**AFRICAN 300 – AFRICAN LITERATURE IN TRANSLATION**

3 credits.

Introduction to the literature, oral or written, of a coherent cultural area of Africa, for those for whom texts in the original language are not accessible.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**AFRICAN/INTL ST 302 – ARABIC LITERATURE AND CINEMA**

3 credits.

An introduction to the most significant topics of contemporary Arabic literature and cinema. Discuss the legacy of colonialism, repressive nature of post-independence regimes, discourses on nationalism, religion vs. secularization, gender relations, representation of cultural otherness, and the Arab Springs. Materials will be drawn from a variety of cultural forms including literature, film, music, and performance; and scholarship, exploring the social, cultural, political, and economic contexts in which texts and films are written and exhibited.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns among Arabic language authors and filmmakers of the 20th and 21st centuries, within their social, cultural and political contexts.

Audience: Undergraduate

2. Demonstrate—in writing, discussion, and presentations—an engagement with literary texts and movies with an eye to aesthetic genres, tendencies, and techniques.

Audience: Undergraduate

3. Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.

Audience: Undergraduate

4. Analyze the complex ways culture relates to individual choice, values, ideas, and the human experience across cultures.

Audience: Undergraduate

5. Value people and groups whose traditions and beliefs differ from our own.

Audience: Undergraduate

6. Communicate effectively through essays, oral presentations, and discussion, to share knowledge, wisdom, and values with others.

Audience: Undergraduate

7. Analyze contemporary political and cultural realities globally from multi-disciplinary perspectives.

Audience: Undergraduate

8. Understand the social, political, economic and cultural forces and conditions that have given rise to the unity and diversity of the Arab world.

Audience: Undergraduate

**AFRICAN 303 – AFRICAN LITERATURE AND VISUAL CULTURE**

3 credits.

An introduction to literature and visual culture of Africa in various periods and places; specific topics will vary.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**AFRICAN 304 – SOCCER IN AFRICA**

3 credits.

Examines representations of soccer in sub-Saharan Africa. It is meant to make us think about African soccer as a cultural and political practice, while keeping in mind that this is a sport or a game. What does this sport, "the beautiful game" as it is called, the most widely followed and adored game, mean to Africans? What is the role of fans and spectators, alongside readers of literature and viewers of film? How does soccer link Africa to the rest of the world? Briefly cover the history of the game, in the world and in Africa, and its social impact; learn about both magic and racism in African soccer; read novels, discuss paintings, and watch films that represent soccer in meaningful ways and connect it to important issues of the neocolonial world.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand historical, cultural, and theoretical information about the world of soccer, through Africa and as a "way of knowing" Africa.

Audience: Undergraduate

2. Use relevant tools and vocabulary to analyze visual and written texts.

Audience: Undergraduate

3. Demonstrate knowledge about soccer in the African artistic world, as it relates with the rest of the world.

Audience: Undergraduate

4. Demonstrate understanding of major theories, approaches, and concepts (current and classical) in regard to the Global South/Global North division.

Audience: Undergraduate

5. Communicate effectively through essays, oral presentations, and discussions, so one may share knowledge, wisdom, and values with others across social and professional settings.

Audience: Undergraduate

**AFRICAN 321 – FIRST SEMESTER ARABIC**

5 credits.

For beginning learners of Modern Standard Arabic; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**AFRICAN 322 – SECOND SEMESTER ARABIC**

5 credits.

For beginning learners of Modern Standard Arabic; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 321 or 339

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the main idea and some pieces of information on familiar topics from sentences and series of connected sentences within Arabic texts that are spoken and written.

Audience: Undergraduate

2. Participate in spontaneous spoken and written conversations on familiar topics, creating sentences and series of sentences to ask and answer a variety of questions.

Audience: Undergraduate

3. Communicate information, make presentations, and express thoughts about familiar topics, using sentences and series of connected sentences through written and spoken Modern Standard Arabic.

Audience: Undergraduate

4. Interact at a functional level in some familiar contexts using Modern Standard Arabic.

Audience: Undergraduate

**AFRICAN 323 – THIRD SEMESTER ARABIC**

4 credits.

For intermediate learners of Modern Standard Arabic; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 322 or 340

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the main idea and some pieces of information on familiar topics from sentences and series of connected sentences within texts that are spoken, written, or signed.

Audience: Undergraduate

2. Exchange information in conversations on familiar topics and some researched topics, creating sentences and series of sentences and asking a variety of follow-up questions.

Audience: Undergraduate

3. Participate in spontaneous spoken, written, or signed conversations on familiar topics, creating sentences and series of sentences to ask and answer a variety of questions.

Audience: Undergraduate

4. Communicate information, make presentations, and express my thoughts about familiar topics, using sentences and series of connected sentences through spoken, written, or signed language.

Audience: Undergraduate

5. Make comparisons between products and practices to help you understand perspectives in your culture and other cultures.

Audience: Undergraduate

6. Interact at a functional level in some familiar contexts.

Audience: Undergraduate

### AFRICAN 324 – FOURTH SEMESTER ARABIC

4 credits.

For intermediate learners of Modern Standard Arabic. Emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 323 or 341

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the main idea and some pieces of information on familiar topics from sentences and series of connected sentences within texts that are spoken, written or signed.

Audience: Undergraduate

2. Participate in spontaneous spoken, written, or signed conversations on familiar topics.

Audience: Undergraduate

3. Communicate information, make presentations, and express my thoughts about familiar topics, using sentences and series of connected sentences through spoken, written or signed language.

Audience: Undergraduate

### AFRICAN 329 – FIFTH SEMESTER ARABIC

3 credits.

For advanced learners of Modern Standard Arabic; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 324 or 342

**Course Designation:** Frgn Lang - 5th + semester language course  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Handle successfully uncomplicated tasks and social situations requiring an exchange of basic information related to their work, school, recreation, particular interests, and areas of competence.

Audience: Undergraduate

2. Narrate and describe in all major time frames using relatively connected discourse of paragraph length.

Audience: Undergraduate

3. Express personal meaning by combining and recombining known elements and conversational input to produce responses typically consisting of sentences and strings of sentences.

Audience: Undergraduate

4. Read and comprehend a variety of texts appropriate for your proficiency level.

Audience: Undergraduate

5. Write compositions on various topics using different types of writing using both present, future and past tenses.

Audience: Undergraduate

**AFRICAN 330 – SIXTH SEMESTER ARABIC**

3 credits.

For advanced learners of Modern Standard Arabic; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 329 or 343

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the main message and supporting details on a wide variety of familiar and general interest topics across various time frames from complex, organized texts that are spoken, written, or signed.

Audience: Undergraduate

2. Maintain spontaneous spoken, written, or signed conversations and discussions across various time frames on familiar, as well as unfamiliar, concrete topics, using series of connected sentences and probing questions.

Audience: Undergraduate

3. Deliver detailed and organized presentations on familiar as well as unfamiliar concrete topics, in paragraphs and using various time frames through spoken, written, or signed language.

Audience: Undergraduate

4. Explain some diversity among products and practices (of my own and other cultures) and how it relates to perspectives.

Audience: Undergraduate

5. Interact at a competent level in familiar and some unfamiliar contexts.

Audience: Undergraduate

**AFRICAN 331 – FIRST SEMESTER SWAHILI**

5 credits.

For beginning learners of Standard Swahili; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**AFRICAN 332 – SECOND SEMESTER SWAHILI**

5 credits.

For beginning learners of Swahili; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 331

**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the general topic and some basic information in both very familiar and everyday contexts by recognizing practiced or memorized words, phrases, and simple sentences in texts that are spoken or written.

Audience: Undergraduate

2. Communicate in spontaneous spoken or written conversations on both very familiar and everyday topics, using a variety of practiced or memorized words, phrases, simple sentences, and questions.

Audience: Undergraduate

3. Present information on both very familiar and everyday topics using a variety of practiced or memorized words, phrases, and simple sentences through spoken or written language.

Audience: Undergraduate

4. Identify products and practices to help understand perspectives in your own culture and in Swahili cultures.

Audience: Undergraduate

5. Interact at a survival level in some familiar everyday contexts in a Swahili-speaking community.

Audience: Undergraduate

6. Develop a level of proficiency in the different "ways of knowing" Africa and the diaspora through language and cultures.

Audience: Undergraduate

7. Develop or improve speaking, listening, writing, reading skills in Swahili and integrate these skills to communicate effectively.

Audience: Undergraduate

**AFRICAN 333 – THIRD SEMESTER SWAHILI**

4 credits.

Four-skills approach (speaking, listening, writing, reading) centered around authentic texts, recordings, and images. Grammar review, concerted vocabulary expansion, and intensive practice.

**Requisites:** AFRICAN 332

**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**AFRICAN 334 – FOURTH SEMESTER SWAHILI**

4 credits.

Four-skills approach (speaking, listening, writing, reading) centered around authentic texts, recordings, and images. Grammar review, concerted vocabulary expansion, and intensive practice.

**Requisites:** AFRICAN 333

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**AFRICAN 335 – FIRST SEMESTER-A LANGUAGE OF SOUTHERN AFRICA**

5 credits.

For beginning learners of a Southern African language; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**AFRICAN 336 – SECOND SEMESTER-A LANGUAGE OF SOUTHERN AFRICA**

4-5 credits.

For beginning learners of a Southern African language; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 335

**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**AFRICAN 339 – FIRST SEMESTER SUMMER ARABIC**

4 credits.

Emphasis on proficiency through speaking, listening, reading and writing, and on communication in cultural context.

**Requisites:** Declared in Arabic, Persian, and Turkish Language Institute

**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Master the Arabic alphabet and sound system, recognize and pronounce correctly all Arabic sounds and write accurately from dictation.

Audience: Undergraduate

2. Initiate social interactions, ask for basic information, and comprehend basic cultural aspects of social interaction in the Arab world.

Audience: Undergraduate

3. Talk about yourself, your education, and your family with native speakers of Arabic accustomed to interacting with learners.

Audience: Undergraduate

4. Comprehend simple print texts on familiar topics.

Audience: Undergraduate

5. Comprehend simple audio/video texts on familiar topics.

Audience: Undergraduate

6. Compose simple paragraphs about yourself and your family and friends.

Audience: Undergraduate

7. Identify the differences between formal and spoken Arabic, recognize both registers, and use basic expressions in at least one dialect.

Audience: Undergraduate

8. Develop an active vocabulary of about 300 Arabic words.

Audience: Undergraduate

**AFRICAN 340 – SECOND SEMESTER SUMMER ARABIC**

4 credits.

Emphasis on proficiency through speaking, listening, reading and writing, and on communication in cultural context.

**Requisites:** Declared in Arabic, Persian, and Turkish Language Institute and (AFRICAN 339 or 321)

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Improve basic skills of reading, writing, listening and speaking.

Audience: Undergraduate

2. Read with more speed and better comprehension.

Audience: Undergraduate

3. Expand vocabulary repertoire to about 500 words.

Audience: Undergraduate

4. Expand on issues related to the verb system: types, characteristics, conjugations and derivative meanings.

Audience: Undergraduate

5. Expand on repertoire of linguistic idioms.

Audience: Undergraduate

6. Learn idiomatic translations from Arabic to English through lengthier and more complex texts.

Audience: Undergraduate

7. Expand on cultural dimensions of the language through biographies, stories, original literary writings, articles from media texts and other targeted texts.

Audience: Undergraduate

**AFRICAN 341 – THIRD SEMESTER SUMMER ARABIC**

4 credits.

Emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** Declared in Arabic, Persian, and Turkish Language Institute and (AFRICAN 340 or 322)

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Improve essential Arabic language skills in the areas of speaking, writing, reading, and listening.

Audience: Undergraduate

2. Acquire new vocabulary, learn to recognize word roots, and internalize sets of new morphological and syntactical formulas

Audience: Undergraduate

3. Use Arabic expressions and exchange information about self, family, school, work, interests, and immediate needs with confidence and ease, especially in straightforward social situations.

Audience: Undergraduate

4. Broaden cultural knowledge of the Arab world.

Audience: Undergraduate

5. Produce paragraph-length expressions in past, present and future tenses.

Audience: Undergraduate

### AFRICAN 342 – FOURTH SEMESTER SUMMER ARABIC

4 credits.

Emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** Declared in Arabic, Persian, and Turkish Language Institute and (AFRICAN 341 or 323)

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Improve essential Arabic language skills in the areas of speaking, writing, reading, and listening.

Audience: Undergraduate

2. Learn new vocabulary, learn to recognize word roots, and internalize sets of new morphological and syntactical formulas.

Audience: Undergraduate

3. Learn and use of Arabic expressions and exchange information about self, family, school, work, interests, and immediate needs with confidence and ease, especially in straightforward social situations.

Audience: Undergraduate

4. Expand cultural knowledge of the Arab world.

Audience: Undergraduate

### AFRICAN 343 – FIFTH SEMESTER SUMMER ARABIC

4 credits.

Emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** Declared in Arabic, Persian, and Turkish Language Institute and (AFRICAN 342 or 324)

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Increase vocabulary and develop abilities in oral and written expression.

Audience: Undergraduate

2. Identify and summarize the main points and significant details and make appropriate inferences and predictions from a spoken source, such as a broadcast news report or a lecture on an academic or cultural topic related to the Arabic-speaking world.

Audience: Undergraduate

3. Make appropriate inferences and predictions from a written text such as a newspaper/magazine article or contemporary literary excerpt.

Audience: Undergraduate

4. Write cohesive and coherent analytical or persuasive essays in reaction to a text on a personal, academic, cultural or social issue, with control of grammar and syntax.

Audience: Undergraduate

5. Use the language in meaningful ways in real-world situations.

Audience: Undergraduate

6. Specifically focus on developing oral proficiency skills, and practice writing through analysis of literary works.

Audience: Undergraduate

**AFRICAN 344 – SIXTH SEMESTER SUMMER ARABIC**

4 credits.

Emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** Declared in Arabic, Persian, and Turkish Language Institute and (AFRICAN 343 or 329)

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Increase vocabulary and develop abilities in oral and written expression.

Audience: Undergraduate

2. Identify and summarize the main points and significant details and make appropriate inferences and predictions from a spoken source, such as a broadcast news report or a lecture on an academic or cultural topic related to the Arabic-speaking world

Audience: Undergraduate

3. Make appropriate inferences and predictions from a written text such as a newspaper/magazine article or contemporary literary excerpt

Audience: Undergraduate

4. Write cohesive and coherent analytical or persuasive essays in reaction to a text or on a personal, academic, cultural or social issue, with control of grammar and syntax.

Audience: Undergraduate

5. Use the language in meaningful ways in real-world situations.

Audience: Undergraduate

6. Specifically focus on developing oral proficiency skills, and practice writing through analysis of literary works.

Audience: Undergraduate

**AFRICAN 361 – FIRST SEMESTER HAUSA**

5 credits.

For beginning learners of Hausa; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**AFRICAN 362 – SECOND SEMESTER HAUSA**

4-5 credits.

For beginning learners of Hausa; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 361

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**AFRICAN/ASIAN/RELIG ST 370 – ISLAM: RELIGION AND CULTURE**

3-4 credits.

The emergence and development of Islam; schism; theology; asceticism; speculative and popular mysticism; literatures in diverse Islamic languages. Not open to students with credit for LCA 370 prior to Fall 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**AFRICAN 371 – FIRST SEMESTER YORUBA**

5 credits.

For beginning learners of Standard Yoruba; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**AFRICAN 372 – SECOND SEMESTER YORUBA**

5 credits.

For beginning learners of standard Yoruba; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 371

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AFRICAN 373 – THIRD SEMESTER YORUBA**

4 credits.

Advanced grammar and conversational practice. Reading contemporary Yoruba literature and other writings.

**Requisites:** AFRICAN 372

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**AFRICAN 374 – FOURTH SEMESTER YORUBA**

4 credits.

Continue to develop and refine competence and performance in linguistic skills.

**Requisites:** AFRICAN 373

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**AFRICAN 391 – FIRST SEMESTER-A LANGUAGE OF WEST AFRICA**

5 credits.

For beginning learners of a West African language; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the general topic and some basic information in both very familiar and everyday contexts by recognizing practiced or memorized words, phrases, and simple sentences in texts that are spoken or written in a West African language

Audience: Undergraduate

2. Communicate in spontaneous spoken or written conversations on both very familiar and everyday topics, using a variety of practiced or memorized words, phrases, simple sentences, and questions in a West African language

Audience: Undergraduate

3. Present information on both very familiar and everyday topics using a variety of practiced or memorized words, phrases, and simple sentences through speech or writing in a West African language

Audience: Undergraduate

4. Identify products and practices to help understand perspectives in your own culture and in a West African culture.

Audience: Undergraduate

5. Interact at a survival level in some familiar everyday contexts in a community that speaks a West African language

Audience: Undergraduate

6. Develop a level of proficiency in the different "ways of knowing" Africa and the diaspora through language and cultures

Audience: Undergraduate

7. Develop or improve speaking, listening, writing, and reading skills in a West African language and integrate these skills to communicate effectively

Audience: Undergraduate

### **AFRICAN 392 – SECOND SEMESTER-A LANGUAGE OF WEST AFRICA**

4-5 credits.

For beginning learners of a West African language; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 391

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

### **AFRICAN 393 – THIRD SEMESTER-A LANGUAGE OF WEST AFRICA**

4 credits.

For intermediate learners of a West African language. Four-skills approach (speaking, listening, writing, reading) centered around authentic texts, recordings, and images. Grammar review, concerted vocabulary expansion, and intensive practice.

**Requisites:** AFRICAN 392

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **AFRICAN 394 – FOURTH SEMESTER-A LANGUAGE OF WEST AFRICA**

4 credits.

For intermediate learners of a West African language. Four-skills approach (speaking, listening, writing, reading) centered around authentic texts, recordings, and images. Grammar review, concerted vocabulary expansion, and intensive practice.

**Requisites:** AFRICAN 393

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **AFRICAN 399 – DIRECTED STUDY OF AN AFRICAN LANGUAGE**

3 credits.

Directed language study for students experienced in language self instruction. The instructor will continue to consult with the student and monitor progress.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2017

### **AFRICAN 402 – THEORY OF AFRICAN LITERATURE**

3-4 credits.

Approaches to the analysis of African oral narrative performances, heroic poetry, epic, and the genres of written literature: Aesthetic, symbolic, and structural analysis and their interrelationships.

**Requisites:** AFRICAN 201, 203, 211, 231, FOLKLORE/AFRICAN 210, or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

### **AFRICAN 403 – THEORIES OF AFRICAN CULTURAL STUDIES**

3 credits.

A study of culture and cultural production, circulation, consumption, and meaning making in Africa. Discussions foreground material and imaginative cultural forms and practices-their origins, languages, contents, forms, functions, genres, and audiences. Examines the uses to which particular meanings of culture and its forms are put, by whom, and to what purpose, and how meanings are fought over, reshaped, and reconstituted, and under what conditions those are or can be possible. Surveys the entrenched modes of both conceptual and critical apprehension of the cultural forms and practices (from Negritude to postcolonialism and postmodernism), explores their methods of reading, raises the issue of their linkages to sources in Euro-America, and assesses the extent to which the unique concerns of the biography of culture in Africa (expressed by its creators and scholars) have tried to tame and refashion what are now globally shared critical tools of cultural reading.

**Requisites:** Sophomore standing and 3 credits in AFRICAN

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**AFRICAN 405 – TOPICS IN AFRICAN CULTURAL STUDIES**

3 credits.

Examines various mediated cultural forms such as broadcasting, news, performance, music, film, or social media created and used across regions and countries in Africa, addressing issues such as cultural identity, nation building, constraints on expression, access, and reception, and the interaction of global and African cultural forms.

**Requisites:** Sophomore standing and 3 credits in AFRICAN, or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.

Audience: Both Grad & Undergrad

2. Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.

Audience: Both Grad & Undergrad

3. Write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.

Audience: Both Grad & Undergrad

4. Demonstrate command of the terminology and methodology of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.

Audience: Graduate

**AFRICAN 406 – TOPICS IN AFRICAN LITERATURE**

3 credits.

Provides a conceptual focus for the study of various forms of literature from around the African world. Literary forms studied may include novels, drama, poetry, short stories, cinema, and more. Depending on the conceptual focus, texts from a particular region, period, or language may be stressed, or they will coalesce around certain themes, such as modernity, cultural identity, nation building, ideology, globalization, and more.

**Requisites:** Sophomore standing and (AFRICAN 201, 203, 211, 231, or FOLKLORE/AFRICAN 210), or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Make connections between the place and date of a literary publication and its socio-political context

Audience: Both Grad & Undergrad

2. Engage in sophisticated and informed discussions about the language of literary production

Audience: Both Grad & Undergrad

3. Communicate clearly and effectively, both verbally and in writing, about the relationship between literary production and its socio-political context

Audience: Both Grad & Undergrad

4. Critically and creatively engage major scholarly works in the field

Audience: Graduate

5. Conceptualize and execute a focused writing project requiring extensive research

Audience: Graduate

**AFRICAN 407 – TOPICS IN AFRICAN LANGUAGES**

3 credits.

Topics in African languages, especially sociocultural linguistics and critical applied linguistics in Africa.

**Requisites:** Sophomore standing and AFRICAN 204, or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**AFRICAN/RELIG ST 408 – EVERYDAY RELIGION IN AFRICA**

3 credits.

Explore the diverse lived experiences of religion in Africa, examine the role of religion in shaping individual and communal identities, and understand the complex ways in which religion is practiced, experienced, and expressed in various African contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze diverse value and belief systems in various contexts.

Audience: Both Grad & Undergrad

2. Define key terms in religious studies and African studies.

Audience: Both Grad & Undergrad

3. Communicate effectively through close reading, writing, oral presentations, and discussion.

Audience: Both Grad & Undergrad

4. Interpret the interrelationships and impact of religious worldviews and communities in Africa.

Audience: Both Grad & Undergrad

5. Recognize cultural assumptions and knowledge claims as they relate to Africa and religion.

Audience: Both Grad & Undergrad

6. Demonstrate empathy toward the cultural perspectives and worldviews of others.

Audience: Both Grad & Undergrad

7. Utilize the terminology and methodology of cultural studies and religious studies in speech and writing.

Audience: Graduate

8. Construct complex arguments using primary and secondary sources to support arguments about lived religion in Africa.

Audience: Graduate

**AFRICAN 409 – TOPICS IN US AND GLOBAL BLACK MUSIC STUDIES**

3 credits.

Introduces the phenomenon of "musical blackness" as a US-based, transnational cultural form and practice. Explores (topics will vary) how US-based, racially specified black musical forms, together with global forms also identified as "black," were constituted as part of the legacies of European colonial encounter and US imperial expansion; the categories of "traditional" music and popular style took shape and have been experienced as something part and parcel of this historical process. Gives close consideration to genre, style, and performance practice, in order to understand the many ways in which musical sound and social/political ideas are inextricably linked.

**Requisites:** Sophomore standing and 3 credits in AFRICAN, or graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**AFRICAN 412 – CONTEMPORARY AFRICAN FICTION**

3 credits.

A critical study of the major works.

**Requisites:** Sophomore standing and (AFRICAN 201, 203, 211, 231, or FOLKLORE/AFRICAN 210), or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2016

**Learning Outcomes:** 1. Read literature attentively, critically, as well as joyously

Audience: Both Grad & Undergrad

2. describe several examples from the rich archive of contemporary African writing

Audience: Both Grad & Undergrad

3. discover and implement new ideas and craft good questions

Audience: Both Grad & Undergrad

4. convey thoughts about literature in writing that involves discovery, surprises, and emotional resonance

Audience: Both Grad & Undergrad

5. analyze the relationship between contemporary African writing and the history of African literary production

Audience: Graduate

### AFRICAN/AFROAMER 413 – CONTEMPORARY AFRICAN AND CARIBBEAN DRAMA

3-4 credits.

A critical study of the major works.

**Requisites:** Sophomore standing and (AFRICAN 201, 203, 211, 231, or FOLKLORE/AFRICAN 210), or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### AFRICAN/RELIG ST 414 – ISLAM IN AFRICA AND THE DIASPORA

3 credits.

Explore African Muslim communities and Black Muslim communities in the US as an under-examined archive of Islamic authenticity and authority. Involves close readings of ethnographies, fiction, films, and other forms of cultural expression and examination of the practice of Islam and representation of Muslims in Africa and Muslims of African ancestry in the US. Through both primary and secondary sources, explore themes of not just authenticity and authority but also related issues of representation, positionality, difference, otherness, essentialism, and normativity. Ultimately, form a deeper understanding of the diversity and complexity of Islam and Muslims of African ancestry.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary, cultural studies, and religious studies related to Islam and Muslims.

Audience: Both Grad & Undergrad

2. Communicate effectively through close reading, essays, oral presentations, and discussion about Islam and Muslims, to share knowledge, wisdom, and values with others across social and professional settings.

Audience: Both Grad & Undergrad

3. Write and speak across disciplinary boundaries with regard to existing research about Africa, the diaspora, and Islam in the humanities.

Audience: Both Grad & Undergrad

4. Access, appraise, and utilize a variety of resources and methods for research across disciplinary lines

Audience: Both Grad & Undergrad

5. Analyze and compare diverse systems of value and belief in a variety of contexts

Audience: Both Grad & Undergrad

6. Demonstrate global and local religious literacy by identifying, evaluating, and interpreting the interrelationships and impact of religious worldviews and communities in the United States and globally

Audience: Both Grad & Undergrad

7. Articulate how the past has affected present day circumstances regarding race and racial inequalities in the US, Africa, and other African diasporic communities.

Audience: Both Grad & Undergrad

8. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity.

Audience: Both Grad & Undergrad

9. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others.

Audience: Both Grad & Undergrad

10. Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society.

**AFRICAN 435 – FIFTH SEMESTER SWAHILI**

3 credits.

For advanced learners of Standard Swahili; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 334

**Course Designation:** Breadth – Humanities

Frqn Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate the ability to successfully handle uncomplicated tasks and social situations requiring an exchange of basic information related to their work, school, recreation, particular interests, and areas of competence.

Audience: Undergraduate

2. Demonstrate the ability to narrate and describe in all major time frames using relatively connected discourse of paragraph length

Audience: Undergraduate

3. Demonstrate the ability to express personal meaning by combining and recombining known elements and conversational input to produce responses typically consisting of sentences and strings of sentences.

Audience: Undergraduate

4. Read and comprehend a variety of texts appropriate for their proficiency level

Audience: Undergraduate

5. Write compositions on various topics using different types of writing using both present, future and past tenses.

Audience: Undergraduate

**AFRICAN 436 – SIXTH SEMESTER SWAHILI**

3 credits.

For advanced learners of Standard Swahili; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** AFRICAN 435

**Course Designation:** Breadth – Humanities

Frqn Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate ideas, and participate in most informal and some formal conversations in Swahili on topics related to school, home, employment, current events, and matters of public and community interest.

Audience: Undergraduate

2. Narrate and describe in the major time frames of past, present, and future in paragraph-length Swahili discourse with some control of aspect appropriate vocabulary, expressions, and structures

Audience: Undergraduate

3. Defend personal views in Swahili as well as understand the opposing viewpoint

Audience: Undergraduate

4. Read and comprehend a variety of texts in Swahili

Audience: Undergraduate

5. Write compositions in Swahili on various topics using different types of writing including description, narration, using both present and past tenses.

Audience: Undergraduate

**AFRICAN/FRENCH 440 – AFRICAN/FRANCOPHONE FILM**

3 credits.

Overview of cinematic works from francophone Africa and/or other areas of Africa. Teaches analysis and writing about cinema. Explores links between cinema and national or regional politics and ideology. Examines spectatorship in relation to questions of identity formation.

**Requisites:** Sophomore standing and 3 credits in AFRICAN, or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**AFRICAN/COM ARTS/L I S 444 – TECHNOLOGY AND DEVELOPMENT IN AFRICA AND BEYOND**

3 credits.

Surveys the past 20 years of digital technology and communications culture on the African continent, cross-referenced with discourse on technology experiences in other parts of the developing world, through the framework of development studies. Readings include case studies of micro-tech practices as well as political and social use of new media, and government and NGO-led tech interventions. Information Communication Technology for Development (ICT4D) is a key area of focus. Cross-discipline areas include communications and media studies, African, Latin American and International area studies, as well as the social anthropology of technology and science, and design. Think critically about technology use in the context of different tech cultures from around the world. Apply this perspective towards new media solutions to social problems.

**Requisites:** Junior standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Identify canonical authors and texts, historical forms, genres, and structures in African culture studies and information and communication studies. Students will demonstrate their understanding of major theories, approaches, concepts and current and classical research findings.

Audience: Both Grad &amp; Undergrad

2. Understand their own learning processes and possess the capacity to intentionally seek, evaluate and learn from information, and recognize and reduce bias in their thinking.

Audience: Both Grad &amp; Undergrad

3. Communicate effectively through essays, oral presentations and discussion and project based work, so they may share their knowledge, wisdom and values with others across social and professional settings.

Audience: Both Grad &amp; Undergrad

4. Write and speak across disciplinary boundaries with regard to existing research about Africa, the African diaspora and international development.

Audience: Graduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of the historic and contemporary challenges of development-oriented tech projects, and identify areas within ICT which could assist in their sustainability. [Sustainability]

Audience: Both Grad &amp; Undergrad

6. Analyze sustainability issues and/or practices using a systems-based approach of information access and media communications within the sustainability framework with regards to environmental change, public infrastructure for clean water and sanitation, urban growth, education, governance and democracy, and public health. [Sustainability]

Audience: Both Grad &amp; Undergrad

**AFRICAN/PORTUG 451 – LUSOPHONE AFRICAN LITERATURE**

3 credits.

Chronological and thematic survey of major trends, authors, and works of Lusophone Africa since 1936.

**Requisites:** PORTUG 221 and 312**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2022

### AFRICAN/JEWISH/MEDIEVAL/RELIG ST 462 – MUSLIMS AND JEWS

3 credits.

Explores the historical relationship between Muslims and Jews in a variety of contexts from the seventh century to the present. Surveys literary and cultural exchanges against the background of shifting political and social conditions across the Middle East, Europe, and the United States. Considers also the parallel legacies of anti-Semitism, Orientalism, and Islamophobia. Major themes include comparative religion, secularization, migration, and colonialism, as well as the politics of history and cultural memory. Introduces readings in English translation of medieval and modern texts originally written across languages, and especially in Hebrew and Arabic.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate contextual knowledge of major historical events, figures, social conditions, religious communities, and geographies of Muslim Iberia (al-Andalus) from the eighth to sixteenth centuries

Audience: Undergraduate

2. Situate al-Andalus in relation to wider developments in politics, culture, and religion of the Middle East and North Africa, from the eighth century to the present

Audience: Undergraduate

3. Understand the terms and conditions that have shaped Muslim-Jewish relations from the seventh century until the present, including frameworks of theology, lived religious experience, and Orientalist representation

Audience: Undergraduate

4. Integrate relevant theoretical frameworks, debates, and conversations regarding the distinction between historical writing and cultural memory

Audience: Undergraduate

5. Discern divergent and contradictory representations of the history of al-Andalus in contemporary memory culture

Audience: Undergraduate

6. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in written and visual materials across genres (philosophy, literature, religion, film) as well as in primary and secondary historical sources

Audience: Undergraduate

7. Generate original ideas and texts, through coherent writing and compelling argumentation, by experimenting and taking risks, solving problems, and answering questions in a range of media

Audience: Undergraduate

### AFRICAN 605 – ADVANCED TOPICS IN AFRICAN CULTURAL STUDIES

3 credits.

Introduces foundational texts in the study of modern Africa and the social, political, and economic contexts of the continent's cultural production and productivity. Conceptual explorations of interesting issues such as the African encounter with Europe, anticolonialism, race, racialism, and subjectivity, African and European languages and epistemology, transformations in gendered structures, and the environment, and the circulation and consumption of cultural forms and practices. Examines the long histories and theories of cultural production and practices in Africa, the local/global provenance of forms and styles, and the contexts of their local, national, and global circulation and consumption. Promotes critical thinking by putting like and unlike texts together and considering rhetoric and implied meanings, all in the context of Africa's interactive history with the world in the modern era.

**Requisites:** Junior standing and (AFRICAN 402, 403, 405, 406, 407, 409, 412, 413, 440, 453, or 471), or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### AFRICAN 606 – ADVANCED TOPICS IN AFRICAN LITERATURE

3 credits.

A critical and historical study of selected topics in African literary studies.

**Requisites:** Junior standing and (AFRICAN 402, 403, 405, 406, 407, 409, 412, 413, 440, 453, or 471), or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

**AFRICAN 670 – THEORIES AND METHODS OF LEARNING A LESS COMMONLY TAUGHT LANGUAGE**

2 credits.

A theoretical and practical exploration of second language acquisition (SLA) and self-instructional methods. Tests and/or modifies one or more theories/methods by putting these self-instructional methods into practice in order to learn a less commonly taught language (LCTL).

**Requisites:** Concurrent enrollment in AFRICAN 671

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Create an individualized study plan for learning a less commonly taught language (LCTL)

Audience: Graduate

2. Find, evaluate, and create learning materials for a LCTL

Audience: Graduate

3. Train a conversation partner to help you learn a language

Audience: Graduate

4. Use the internet to conduct research and share information with others

Audience: Graduate

5. Use metacognitive strategies to evaluate and improve your learning, compare different learning strategies, and style-shift

Audience: Graduate

6. Explain the characteristics of a good language learner according to SLA theories

Audience: Graduate

7. Discuss and write about the application of SLA theories to language self-instruction

Audience: Graduate

**AFRICAN 671 – MULTILANGUAGE SEMINAR**

4 credits.

Discusses use of self-instructional methods to learn a less commonly taught language (LCTL), gets feedback on individualized syllabi and assessment plans, and presents progress reports orally and in writing. Homework includes continuous self-instruction in the chosen LCTL including reading, writing, oral, and listening skills; work with a conversation partner; and cultural knowledge.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Create an individualized study plan for learning a less commonly taught language (LCTL)

Audience: Graduate

2. Find, evaluate, and create learning materials for a LCTL

Audience: Graduate

3. Train a conversation partner to help you learn a language

Audience: Graduate

4. Use the internet to conduct research and share information with others

Audience: Graduate

5. Assess your achievement of your learning goals

Audience: Graduate

**AFRICAN 672 – INTENSIVE SUMMER MULTILANGUAGE SEMINAR**

8 credits.

A theoretical and practical exploration of second language acquisition (SLA) and self-instructional methods. Test and/or modify one or more theories/methods by putting these self-instructional methods into practice in order to learn a less commonly taught language (LCTL).

**Requisites:** Admitted to Summer Immersion Language Institute (SILI)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Create an individualized study plan for learning a less commonly taught language (LCTL)

Audience: Graduate

2. Explain the characteristics of a good language learner according to SLA theories

Audience: Graduate

3. Discuss and write about the application of SLA theories to language self-instruction

Audience: Graduate

4. Find, evaluate, and create learning materials for a LCTL

Audience: Graduate

5. Train a conversation partner to help you learn a language

Audience: Graduate

6. Use the internet to conduct research and share information with others

Audience: Graduate

7. Use metacognitive strategies to evaluate and improve your learning, compare different learning strategies, and style-shift

Audience: Graduate

8. Assess your achievement of your learning goals

Audience: Graduate

**AFRICAN 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing African Cultural Studies Honors in the Major.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 1991

**AFRICAN 682 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing African Cultural Studies Honors in the Major.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 1989

**AFRICAN 698 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**AFRICAN 699 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**AFRICAN 700 – READING AND WRITING AFRICAN CULTURAL STUDIES**

3 credits.

Covers the norms and expectations that inhere in academic writing as well as the mechanics of producing original scholarship. Designed to develop a full understanding of the craft of marshaling evidence to support an argument in the humanities, particularly African cultural studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**AFRICAN 703 – TOPICS IN TEACHING AFRICAN LANGUAGES**

1 credit.

Theories and teaching methodologies for second language acquisition plus practical classroom techniques for teaching and directing programs in African languages.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**AFRICAN 803 – THEORIES OF AFRICAN CULTURAL STUDIES**

3 credits.

A study of culture and cultural production, circulation, consumption, and meaning making in Africa. Discussions foreground material and imaginative cultural forms and practices—their origins, languages, contents, forms, functions, genres, and audiences. Examines the uses to which particular meanings of culture and its forms are put, by whom, and to what purpose, and how meanings are fought over, reshaped, and reconstituted, and under what conditions those are or can be possible. Surveys the entrenched modes of both conceptual and critical apprehension of the cultural forms and practices (from Negritude to postcolonialism and postmodernism), explores their methods of reading, raises the issue of their linkages to sources in Euro-America, and assesses the extent to which the unique concerns of the biography of culture in Africa (expressed by its creators and scholars) have tried to tame and refashion what are now globally shared critical tools of cultural reading.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**AFRICAN 804 – CRITICAL APPLIED LINGUISTICS WORKING GROUP**

3 credits.

Collaborative exploration and discussion of current research and literature on critical approaches to applied linguistics (CALx), including critical discourse analysis (CDA), mostly in African contexts. Develop a large-scale research project (QP or doctoral dissertation), conduct a review of current research, and present work in progress to receive critical feedback.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, for 10 number of completions**Last Taught:** Spring 2023**Learning Outcomes:** 1. Recognize canonical authors and texts in the field of sociolinguistics, especially Africanist sociolinguistics

Audience: Graduate

2. Develop in-depth knowledge in critical applied linguistics and critical discourse analysis

Audience: Graduate

3. Understand their own learning processes and demonstrate the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.

Audience: Graduate

4. Effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of language-related disciplines.

Audience: Graduate

5. Demonstrate firm knowledge of existing research in their area of specialization and its gaps, while articulating the place of their own research in relation to existing research on related topics.

Audience: Graduate

6. Demonstrate an understanding of professional and ethical responsibility with regard to producing original research and working with human subjects.

Audience: Graduate

7. Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.

Audience: Graduate

8. Show knowledge of conventional rhetorical strategies, while integrating research by other authors and distinguishing between their own ideas and those of others.

Audience: Graduate

9. Write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.

Audience: Graduate

10. Demonstrate the ability to organize a chapter or article-length piece of writing.

Audience: Graduate

11. Demonstrate command of the terminology and methodology of critical applied linguistics, construct complex arguments, and use primary and secondary sources to support arguments.

Audience: Graduate

### **AFRICAN/AFROAMER 813 – CONTEMPORARY AFRICAN AND CARIBBEAN DRAMA**

3 credits.

Historical and critical study of the classics of contemporary African and Caribbean literary drama written in English. Thematic issues include the African encounter with Europe, postcolonial disillusionment and the betrayal of ideals, and also stylistic matters as the relationship(s) between traditional drama and other performance forms, and modern drama written in European languages. Considers theories and critical approaches to understanding the cross-continental drama traditions and their contexts. Examines the long histories of cultural, performance, and theatrical relationships between Africa and the Caribbean and how the relationships have been shaped by race and economics, past and present. Considers and questions conventional claims made by others and your own assumptions; stimulates analytical thinking about identity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

### **AFRICAN 901 – SEMINAR IN MODERN AFRICAN LITERATURE**

3 credits.

Special topics in modern African literature, covering various genres (prose, poetry, drama).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **AFRICAN 905 – SEMINAR IN AFRICAN CULTURAL STUDIES: TOPICS**

3 credits.

Examines various mediated cultural forms such as broadcasting, news, performance, music, film, or social media created and used and across regions and countries in Africa, addressing issues such as cultural identity, nation building, constraints on expression, access, and reception, and the interaction of global and African cultural forms.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **AFRICAN 926 – SEMINAR IN RESEARCH METHODS IN AFRICAN CULTURAL STUDIES**

3 credits.

Field methods, techniques, and analytical approaches. Topics vary but may include ethnography, narrative analysis, critical discourse analysis, and other research methods.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

### **AFRICAN/ANTHRO/ECON/GEOP/HISTORY/POLI SCI 983 – INTERDEPARTMENTAL SEMINAR IN AFRICAN STUDIES TOPICS**

3 credits.

Interdisciplinary inquiry in African societies and cultures.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop in-depth knowledge in a sub-field of specialization within African studies

Audience: Graduate

2. Acquire and demonstrate understanding of major theories, approaches, concepts, currently informing African studies

Audience: Graduate

3. Understand your process of learning and possess the capacity to intentionally seek, evaluate, and learn from information, and to recognize and reduce bias in thinking.

Audience: Graduate

4. Gain firm knowledge of existing research in African studies

Audience: Graduate

5. Develop and improve speaking, readings, listening, and writing skills

Audience: Graduate

6. Write and speak across disciplinary boundaries

Audience: Graduate

7. Analyze texts from various theoretical and critical perspectives

Audience: Graduate

### **AFRICAN 990 – THESIS**

1-9 credits.

Advanced level mentored reading, writing, and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **AFRICAN 999 – INDEPENDENT READING AND RESEARCH**

1-3 credits.

Advanced level mentored reading, writing, and research for dissertators.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

# AGRICULTURAL AND APPLIED ECONOMICS (A A E)

## A A E 101 – INTRODUCTION TO AGRICULTURAL AND APPLIED ECONOMICS

4 credits.

Introduction to economic ways of thinking about a wide range of problems and issues. Topics include consumption, production, prices, markets, finance, trade, pollution, growth, farms, taxes, and development.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed – Quantitative Reasoning Part B

Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate competency in fundamental economic concepts.

Audience: Undergraduate

2. Develop analytical tools necessary to critically analyze applied economic topics including agricultural economics.

Audience: Undergraduate

3. Evaluate a variety of economic issues and relevant policies, such as the challenges facing agriculture and related government interventions.

Audience: Undergraduate

4. Apply concepts to real life examples.

Audience: Undergraduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges related to farming, pollution, and population growth.

Audience: Undergraduate

6. Analyze the causes of and solutions for the sustainability challenge of agricultural and industrial production.

Audience: Undergraduate

## A A E/ENVIR ST 244 – THE ENVIRONMENT AND THE GLOBAL ECONOMY

4 credits.

The "economic way of thinking" about global and regional environmental issues. Topics include climate change, biodiversity preservation, ocean fisheries, environmental impacts of international trade, poverty and the environment, and sustainability.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of economic concepts to think critically about relationships between economic activity and global environmental challenges ranging from climate change to biodiversity loss.

Audience: Undergraduate

2. Use appropriate tools to analyze how governmental policies affect the use and conservation of natural resources.

Audience: Undergraduate

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of balancing healthy global economies with environmental quality.

Audience: Undergraduate

4. Analyze the causes of and solutions for the sustainability challenges of maintaining environmental quality and healthy economies.

Audience: Undergraduate

**A A E 246 – CLIMATE CHANGE ECONOMICS AND POLICY**

3 credits.

Climate change and the role of applied economics in related policy analysis and research. Economics of mitigation, adaptation and geo-engineering; integrated assessment; environmental implications of energy use; climate change impacts on land use. Use of economic analysis and modeling for public policy design.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Understand why climate change arises due to a market failure.

Audience: Undergraduate

2. Evaluate policies for reducing carbon emissions using economic concepts such as marginal costs and total welfare.

Audience: Undergraduate

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of climate change.

Audience: Undergraduate

4. Analyze the causes of and solutions for the sustainability challenge of climate change.

Audience: Undergraduate

**A A E 250 – TRADING FUTURES IN COMMODITY MARKETS**

1 credit.

Introduction to the engaging world of commodity futures trading. Learn to analyze market trends and make informed trading decisions using both fundamental and technical analysis techniques. Hands-on experience with real world platforms. Develop the skills needed to excel in the futures market.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111**Repeatable for Credit:** No**Learning Outcomes:** 1. Apply fundamental and technical analysis skills for trading commodity futures

Audience: Undergraduate

2. Execute mock trades on commodity futures using a popular trading platform.

Audience: Undergraduate

3. Explain the real-world application of trading techniques, including risk management and brokerage practices

Audience: Undergraduate

**A A E 267 – CAREER DEVELOPMENT FOR AAE & ABM MAJORS**

1 credit.

Career and professional development geared toward the field of agricultural and applied economics or agricultural business management. Topics include resumes, cover letters, interviewing skills, internship and job applications, writing, career exploration, and networking. Panelists include faculty, alumni, and employers.

**Requisites:** Sophomore standing and declared in Agricultural and Applied Economics or Agricultural Business Management BS**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Develop professional skills that will lead to success in future endeavors, including preparing a resume, writing a cover letter, building a professional network, finding an internship, having a successful interview, and maximizing the job or internship experience

Audience: Undergraduate

2. Apply principles of the career development process to create short- and long-term personal career goals and implement a plan to evaluate progress toward them

Audience: Undergraduate

3. Use campus resources to help search and apply for internships and jobs

Audience: Undergraduate

4. Create professional relationships with fellow students, department alumni, potential employers, and AAE and ABM faculty and staff

Audience: Undergraduate

**A A E 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work under direct guidance of an AAE faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor. Intended for students in the CALS Honors Program.

**Requisites:** Consent of instructor**Course Designation:** Honors – Honors Only Courses (H)**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Investigate an economic topic in conjunction with other investigators to develop a deep understanding of a research problem.

Audience: Undergraduate

2. Identify a research problem and develop a basic knowledge of the academic literature on this topic.

Audience: Undergraduate

3. Use basic economic theory to frame the problem and state testable hypotheses.

Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.

Audience: Undergraduate

**A A E 299 – INDEPENDENT STUDY**

1-3 credits.

Research work under direct guidance of a faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Investigate an economic topic in conjunction with other investigators to develop a deep understanding of a research problem.

Audience: Undergraduate

2. Identify a research problem and develop a basic knowledge of the academic literature on this topic.

Audience: Undergraduate

3. Use basic economic theory to frame the problem and state testable hypotheses.

Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.

Audience: Undergraduate

**A A E/ECON/REAL EST/URB R PL 306 – THE REAL ESTATE PROCESS**

3 credits.

Introductory overview focused on the key aspects of the real estate process: developing real estate, permitting real estate, buying and selling real estate, understanding the economics of real estate, financing real estate, valuing real estate, leasing real estate, and managing real estate.

**Requisites:** (ECON 101, 111, A A E 101, or 215 prior to Fall 2024) or declared in undergraduate Business Exchange program

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop a working knowledge of the real estate process, including the roles of the various key real estate professionals and the unique challenges associated with the real estate asset class.

Audience: Undergraduate

2. Explain the characteristics, advantages, and disadvantages of the primary commercial real estate property types.

Audience: Undergraduate

3. Discuss the role of debt and equity in a real estate transaction as well as the fundamental terms, conditions, and requirements of commercial real estate financing.

Audience: Undergraduate

4. Navigate the basic regulatory framework governing the real estate process, including land use planning, zoning and the required project approvals.

Audience: Undergraduate

5. Describe the role of leasing in the commercial real estate transaction, including the critical terms and conditions of commercial leases.

Audience: Undergraduate

**A A E 319 – THE INTERNATIONAL AGRICULTURAL ECONOMY**

3 credits.

The nature of trade in agricultural products, trade policies and practices of importing and exporting nations, agricultural policies of major trading blocks, market instability and other primary commodity problems, recent history and current developments in multilateral trade policy.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Apply basic models of international trade to agricultural markets.

Audience: Undergraduate

2. Describe how different domestic policies shape international agricultural trade flows.

Audience: Undergraduate

3. Demonstrate how factors including comparative advantage, market power, and market instability impact international agricultural trade for both small and large countries.

Audience: Undergraduate

4. Summarize the current state of international agricultural trade and its effects on economic, social, and environmental outcomes.

Audience: Undergraduate

**A A E 320 – AGRICULTURAL SYSTEMS MANAGEMENT**

3 credits.

Application of economics to managing agricultural production systems. Topics include optimizing agricultural production, farm financial analysis, tax management, business entities, federal commodity support programs, and the structure and challenges in the US agricultural sector.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply economic principles for optimizing input use in agricultural production.

Audience: Undergraduate

2. Analyze a balance sheet and income statement and common agricultural modifications for depreciation, valuation basis and cash accounting.

Audience: Undergraduate

3. Describe major taxes applying to agricultural operations, commonly used business entities and their tax and legal implications, including transfer of farm assets.

Audience: Undergraduate

4. Define major federal risk management programs that support agriculture and how they function, including crop insurance and commodity support programs.

Audience: Undergraduate

5. Describe Wisconsin agriculture and the US food system, and the justification for income and commodity support programs.

Audience: Undergraduate

**A A E 322 – COMMODITY MARKETS**

4 credits.

Principles and practices in marketing systems for U.S. agricultural commodities. Vertical organization; forward contracts, future markets, agricultural options and price formation. Alternate management at the farm, processor, wholesale and retail levels.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the purpose of and major operations in commodity market institutions.

Audience: Undergraduate

2. Apply economic logic and quantitative techniques to understand price relations in commodity markets.

Audience: Undergraduate

3. Understand spatial and temporal dynamics of futures prices of agricultural commodities.

Audience: Undergraduate

4. Analyze risk management strategies using futures and options.

Audience: Undergraduate

**A A E 323 – COOPERATIVES AND ALTERNATIVE FORMS OF ENTERPRISE OWNERSHIP**

3 credits.

Cooperatives, credit unions, and other alternative forms of enterprise are unique businesses in which users (rather than investors) are the owners. Topics will include why these models emerge, who they serve, how they differ from other forms of enterprise, and the ways in which they can be used to address social, economic, and environmental challenges.

**Requisites:** Sophomore standing and satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate the characteristics of cooperatives, credit unions, and other alternative forms of enterprise and their role in our economy and society.

Audience: Undergraduate

2. Describe the social, economic, and environmental dimensions of enterprise ownership structures and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

3. Discern when a cooperative or alternative form of enterprise ownership is the appropriate response to a social, economic, or environmental challenge.

Audience: Undergraduate

4. Appreciate how ownership structures affect enterprise behavior, strategy, and decision-making.

Audience: Undergraduate

5. Apply knowledge of cooperatives and alternative ownership models to a real world community economic development challenge.

Audience: Undergraduate

6. Use sustainability principles for developing personal goals and professional values.

Audience: Undergraduate

### **A A E 335 – INTRODUCTION TO DATA ANALYSIS USING SPREADSHEETS**

2 credits.

Introduction to data analysis for social scientists using spreadsheets software – with specific applications to economics, business and finance – including data management and manipulation; formulas and calculations; data visualization and presentation using charts and graphics; statistical and visual analysis of economic indicators using tables, functions, graphs and descriptive statistics; and optimization of functions with economic and financial data.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use basic Excel software, download and manipulate economic and financial data, and create basic formulas and functions.

Audience: Undergraduate

2. Create, refine and interpret Excel charts and other graphics with real world economic and financial data, and display and organize data using tables and PivotTables.

Audience: Undergraduate

3. Present, analyze and interpret trends and relationships among and between various economic indicators.

Audience: Undergraduate

4. Use Solver and Goal Seek to numerically find optimal solutions.

Audience: Undergraduate

### **A A E/C&E SOC/SOC 340 – ISSUES IN FOOD SYSTEMS**

3-4 credits.

With primary emphasis on the U.S., the course covers social, economic and biological dimensions of food systems. Using classroom and community experience, the course combines academic approaches with practitioner knowledge. A community project is required.

**Requisites:** SOC/C&E SOC 140, SOC 181, 210, or 211

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **A A E/ECON/ENVIR ST 343 – ENVIRONMENTAL ECONOMICS**

3-4 credits.

Microeconomic principles underlying the use of natural resources such as air, water, forests, fisheries, minerals and energy. These principles are applied in the examination of pollution control, preservation vs. development, deforestation, and other environmental issues.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand why environmental problems occur in a market-based economy.

Audience: Undergraduate

2. Identify market-based environmental policies to address market failures.

Audience: Undergraduate

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of pollution control.

Audience: Undergraduate

4. Apply sustainability principles and/or frameworks to addressing the challenge of optimizing the use of scarce resources over time.

Audience: Undergraduate

**A A E/NUTR SCI 350 – WORLD HUNGER AND MALNUTRITION**

3 credits.

Hunger and poverty in developing countries and the United States. Topics include: nutrition and health, population, food production and availability, and income distribution and employment.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate a basic understanding of the complex links between nutrition and malnutrition.

Audience: Undergraduate

2. Learn and apply the economic tools of supply and demand to solving/analyzing issues including income and population growth, income and population policies, and agricultural supply topics.

Audience: Undergraduate

3. Synthesize knowledge about the economics and nutritional aspects of world hunger to better understand solutions.

Audience: Undergraduate

4. Communicate effectively through written reports and online discussions.

Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenge of addressing issues of population growth, hunger and poverty.

Audience: Undergraduate

6. Describe the social, economic, and environmental dimensions of food, hunger and malnutrition. Identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

**A A E 352 – GLOBAL HEALTH: ECONOMICS, NATURAL SYSTEMS, AND POLICY**

4 credits.

Sustaining global health and well-being depends critically on interactions between human and natural systems at multiple spatial and temporal scales. Economics provides a useful paradigm for understanding these interactions and the pathways through which individual and societal decisions made in the face of scarce resources, and threats to the natural environment, generate health and well-being outcomes. Provides students with an opportunity to use basic economic and social science reasoning to describe global health challenges; understand the causes and consequences of health discrepancies; evaluate health and environmental policies; and appreciate the interconnectedness of planetary health and economic outcomes.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss the multitude of mechanisms through which human interactions with natural systems condition health and well-being outcomes in both developing and developed country contexts.

Audience: Undergraduate

2. Use positive (descriptive) economic reasoning to identify how individual and community decisions made in the face of income, political, policy, cultural, and environmental constraints lead to differential health and well-being outcomes.

Audience: Undergraduate

3. Use normative (prescriptive) economic reasoning to evaluate the efficacy of social, health, and environmental policies affecting human well-being.

Audience: Undergraduate

4. Demonstrate basic knowledge in challenge areas such air and water pollution, climate change and fisheries depletion.

Audience: Undergraduate

### **A A E/PL PATH/PLANTSCI 367 – INTRODUCTION TO ORGANIC AGRICULTURE: PRODUCTION, MARKETS, AND POLICY**

3 credits.

Provides an in-depth understanding of the history of organic agriculture, its production, processing, marketing, and social dimensions, and its impact on environmental, community, and human health.

**Requisites:** ENVIR ST/AGROECOL/C&E SOC/ENTOM 103, AGRONOMY 100, HORT 120, PLANTSCI 110, BOTANY/PL PATH 123, SOC/C&E SOC 222, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the history of current organic systems and how it influences the way that organic farms and industries work.

Audience: Both Grad & Undergrad

2. Explore the biological, ecological, and agricultural underpinnings of organic production systems.

Audience: Both Grad & Undergrad

3. Examine how organic systems, social initiatives, and regulations are developed and how they shape business activities, community development efforts, and human and environmental health outcomes.

Audience: Both Grad & Undergrad

4. Evaluate the benefits and limitations of organic systems, social initiatives, and regulations from environmental, social, economic, and racial justice perspectives.

Audience: Both Grad & Undergrad

5. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Both Grad & Undergrad

6. Describe the social, economic, and environmental dimensions of organic farming and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Both Grad & Undergrad

7. Develop the capacity to evaluate sustainability and resilience outcomes of organic and other agricultural production and processing systems using interdisciplinary methods.

Audience: Graduate

### **A A E/ECON 371 – ENERGY, RESOURCES AND ECONOMICS**

3 credits.

Use microeconomic theory to analyze energy markets. Discuss the economics of oil, gas, and electricity and learn about applications to contemporary issues and policy questions.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use economic tools to describe energy demand

Audience: Undergraduate

2. Apply economic models of competition to energy markets

Audience: Undergraduate

3. Analyze how policies to mitigate climate change affect energy markets

Audience: Undergraduate

4. Analyze the causes of and solutions for the sustainability challenge of climate change

Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of energy policy and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course

Audience: Undergraduate

**A A E/INTL ST 373 – GLOBALIZATION, POVERTY AND DEVELOPMENT**

3 credits.

Addresses the process of globalization -- trade, international capital flows, labor migration and remittances, and aid -- from the perspective of developing economies and the development process.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 102, or 111

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an informed perspective on economic drivers of globalization over the past 30 years and the links between globalization, economic development and poverty in low-income countries.

Audience: Undergraduate

2. Gain familiarity with ongoing debates concerning economic policy in developing countries and the role of international institutions in influencing those decisions.

Audience: Undergraduate

3. Learn multiple sources of information regarding economic circumstances of poverty-vulnerable countries.

Audience: Undergraduate

4. Use Excel and other computational tools to analyze and interpret large, multi-dimensional datasets.

Audience: Undergraduate

5. Demonstrate competence in writing about economic issues through reflections on topic reading assignments and in academic style in two longer writing assignments.

Audience: Undergraduate

**A A E/INTL ST 374 – THE GROWTH AND DEVELOPMENT OF NATIONS IN THE GLOBAL ECONOMY**

3 credits.

This course explores the roles of markets, states, and civil institutions, using economic theory, computer simulations, and historical experience to better understand the forces that shape the wealth and well-being of nations and people around the world.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 102, or 111

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate the importance of economic growth and globalization in the process of economic development of nations.

Audience: Undergraduate

2. Understand how economic theory and data can help identify and measure factors contributing to economic growth and the effects of globalization.

Audience: Undergraduate

3. Assess the historical and recent evolution of economic growth and globalization over time and across countries.

Audience: Undergraduate

4. Understand the role of policy and its effects on economic growth, globalization, and on the process of economic development.

Audience: Undergraduate

5. Demonstrate basic economic and statistical literacy for evaluating economic growth and globalization.

Audience: Undergraduate

6. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of economic growth and globalization.

Audience: Undergraduate

7. Describe the social, economic, and environmental dimensions of economic growth and globalization and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

**A A E 375 – SPECIAL TOPICS**

1-4 credits.

Special topics on contemporary issues relevant to agricultural and applied economics.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Investigate a special topic in conjunction with other investigators to develop an understanding of how economists would approach this topic.

Audience: Undergraduate

2. Understand the basic economic principles involved in the topic.

Audience: Undergraduate

3. Use basic economic theory to frame the problem and state testable hypotheses.

Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.

Audience: Undergraduate

**A A E 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Agricultural and Applied Economics and internship site supervisor. Students are responsible for arranging the work and credits with the AAE faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Perform assigned responsibilities in a professional setting.

Audience: Undergraduate

2. Identify and employ standards of professionalism at work site.

Audience: Undergraduate

3. Articulate through discussion with faculty mentor how concepts learned in applied economics relate to real work situations.

Audience: Undergraduate

4. Synthesize and apply knowledge from the ag & applied economics curriculum and broader coursework to solve problems on the worksite.

Audience: Undergraduate

5. Create and submit a final report to a faculty mentor.

Audience: Undergraduate

**A A E 400 – STUDY ABROAD IN AGRICULTURAL AND APPLIED ECONOMICS**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Current enrollment in a UW-Madison study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**A A E 419 – AGRICULTURAL FINANCE**

3 credits.

Introduction to basic finance concepts. Topics include financial statements, ratio analysis and interpretation, investment analysis, capital budgeting, credit concepts, and capital markets.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Correctly interpret accounting and financial statements

Audience: Undergraduate

2. Explain the time value of money and how this concept relates to interest rates

Audience: Undergraduate

3. Conduct firm-level investment analyses and develop capital budgeting strategies

Audience: Undergraduate

4. Summarize characteristics of agricultural credit and capital markets for both borrowers and lenders

Audience: Undergraduate

5. Construct comprehensive financial analyses of agricultural enterprises, employing advanced quantitative methodologies and techniques that extend beyond basic financial statement interpretation

Audience: Graduate

6. Integrate recent literature in financial analyses to support informed decision-making in management.

Audience: Graduate

**A A E/ECON 421 – ECONOMIC DECISION ANALYSIS**

4 credits.

Managerial oriented, applied presentation of microeconomic theory. Quantitative emphasis with extensive homework use of spreadsheets and written executive summaries of applied economic analyses. Applications on natural resources and agricultural markets.

**Requisites:** STAT 301, 371, ECON 310, SOC/C&E SOC 360, PSYCH 210, or (GEN BUS 306 and 307)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Manipulate, organize, and visualize quantitative economic data using computer software.

Audience: Undergraduate

2. Conduct statistical analyses and estimate basic linear regression models of economic data.

Audience: Undergraduate

3. Correctly report and interpret results from statistical analyses in the context of informing economic decisions.

Audience: Undergraduate

4. Set up and solve linear and non-linear programming problems that inform economic decision-making using computer software.

Audience: Undergraduate

5. Integrate uncertainty into the analysis of economic decisions and articulate how uncertainty influences economic behavior.

Audience: Undergraduate

6. Effectively communicate verbally, visually, and in writing the process and results of economic decision analyses.

Audience: Undergraduate

**A A E 422 – FOOD SYSTEMS AND SUPPLY CHAINS**

3 credits.

Examination of the structure of supply chains for food and agriculture and key business decisions in the the broader context of food systems.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe food supply chain (network) components, processes, objectives, drivers and performance metrics, and the main differences in characteristics and management practices for food and agricultural supply chains compared to supply chains for non-food manufactured products.

Audience: Both Grad & Undergrad

2. Analyze sourcing and purchasing decisions for raw materials or finished goods, use business process analyses for food supply chain improvement and determine appropriate production or service capacity strategic decisions for food supply chains.

Audience: Both Grad & Undergrad

3. Apply basic inventory management decision methods, such as the Economic Order Quantity (EOQ) and Re-Order Point (ROP), decision models for logistics including transportation modes and distribution network configurations, and Sales & Operations Plans (Aggregate Plans) for a food manufacturer.

Audience: Both Grad & Undergrad

4. Describe the metrics and processes that food businesses use to monitor and improve sustainability, in the context of Corporate Social Responsibility.

Audience: Both Grad & Undergrad

5. Define the basic characteristics of a food system and its linkages to food and agricultural supply chains, and use basic systems modeling concepts for the development of qualitative assessment of food systems and understand their use in quantitative models of food systems.

Audience: Both Grad & Undergrad

6. Use systems modeling approaches to assess key food supply chain and food system issues such as the impacts of food supply chains on human nutrition, programs for farmers, agriculture research and development and localization of food systems.

Audience: Both Grad & Undergrad

7. Undertake a review of a subset of relevant literature on a topic or issue related to food supply chains or food systems (with pre-approval of the instructor), and relate the content of that review to the concepts covered in this course.

Audience: Graduate

**A A E/F&W ECOL 430 – DECISION METHODS FOR NATURAL RESOURCE MANAGERS**

3 credits.

Applications of quantitative methods, including optimization and simulation, to the management of natural resources, especially forests.

**Requisites:** MATH 112, 114, or 171 or placement into MATH 211 or 221. Not open to students with credit for A A E 652 prior to Fall 2025.

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Quantify the timber and non-timber values of forest resources

Audience: Undergraduate

2. Describe and apply financial decision criteria to evaluate forest investments

Audience: Undergraduate

3. Explain how optimal rotation ages are determined and what factors affect this calculation

Audience: Undergraduate

4. Create harvest scheduling models and apply them to diverse landowner objectives

Audience: Undergraduate

5. Apply knowledge of mathematical models and financial theory to determine optimal rotation age for a given species and communicate findings in written and verbal formats

Audience: Undergraduate

**A A E/ECON/INTL BUS 462 – LATIN AMERICAN ECONOMIC DEVELOPMENT**

3 credits.

A historico-institutional analysis of development problems in the principal Latin American countries, with attention to differentiation of national growth patterns and alternative development strategies.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate mastery of the language of international development economics

Audience: Undergraduate

2. Develop proficiency in an array of concepts from primary product exports to conditional cash transfers to migration and remittances to corruption and civil conflict.

Audience: Undergraduate

3. Examine how markets and distinct development strategies and processes provide different opportunities and returns for the rich and the poor, urban and rural, latino and indigenous peoples, large and small countries, and so on.

Audience: Undergraduate

4. Explain the strengths and weaknesses of contending theories of economic development.

Audience: Undergraduate

5. Apply contending theories to markets, state policies, social initiatives, and historical experiences in Latin American countries.

Audience: Undergraduate

**A A E/ECON 473 – ECONOMIC GROWTH AND DEVELOPMENT IN SOUTHEAST ASIA**

3 credits.

Evaluates economic development strategies in Southeast Asia and their implications for growth, distribution and environment. Students learn trade and development theory as well as specific knowledge of Southeast Asian economic development.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Demonstrate basic economic and statistical literacy relevant to the study of economic development.

Audience: Both Grad & Undergrad

2. Understand basic models of international trade and economic growth.

Audience: Both Grad & Undergrad

3. Demonstrate a working knowledge of available data on the economies of Southeast Asia.

Audience: Both Grad & Undergrad

4. Identify and analyze problems of economic development in Southeast Asia.

Audience: Undergraduate

5. Identify and analyze problems of economic development in Southeast Asia using formal methods of economic theory and evidence.

Audience: Graduate

**A A E/ECON 474 – ECONOMIC PROBLEMS OF DEVELOPING AREAS**

3 credits.

Analyzes aggregate growth, income distribution and poverty in lower income economies. Uses microeconomics of imperfect labor, capital and insurance markets to explore why some individuals advance economically as their economies grow and others fall behind. Considers implications of aggregate and micro analysis for national and international economic policy.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of current research in development economics to explain cases and identify areas that policy can influence.

Audience: Undergraduate

2. Calculate basic measures of poverty, inequality and economic development.

Audience: Undergraduate

3. Differentiate empirical methods used to analyze poverty and poverty alleviation.

Audience: Undergraduate

4. Use economic models and empirical methods to evaluate development policy.

Audience: Undergraduate

### **A A E/ECON 477 – AGRICULTURAL AND ECONOMIC DEVELOPMENT IN AFRICA**

3 credits.

Composition, organization, and techniques of agricultural production; economic change and development of agriculture, economic policies, special problems of developing African agriculture.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Explain the economic problems of African nations including economic history, different sectors of the economy, economic development, and economic growth.

Audience: Both Grad & Undergrad

2. Use empirical evidence to evaluate an economic argument, including interpreting and explaining economic data.

Audience: Both Grad & Undergrad

3. Apply the tools of economic analysis (both theoretical and empirical tools) to evaluate specific policy proposals, especially as they relate to contemporary issues in African development.

Audience: Graduate

4. Communicate effectively in written and graphical form about issues in African development.

Audience: Both Grad & Undergrad

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of development of African nations.

Audience: Both Grad & Undergrad

6. Analyze the causes of and solutions for the sustainability challenge of generating agricultural and economic development of African countries.

Audience: Both Grad & Undergrad

### **A A E 500 – SENIOR CAPSTONE EXPERIENCE**

3 credits.

Teaches students how to apply economic theory to economic problems, utilize quantitative techniques in economic analyses, and communicate findings and results of economic analyses.

**Requisites:** Senior standing and (declared in Agricultural & Applied Economics, B.S. or Agricultural Business Management, B.S.)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply economic and business theories and tools to real world applied economic and business problems.

Audience: Undergraduate

2. Write a clear report that uses the tools of applied economics and business to answer consultant, business, and/or research questions and communicates clearly the results of analysis and data to a reader.

Audience: Undergraduate

3. Communicate effectively an oral summary of a research or consulting report or a business plan to an audience.

Audience: Undergraduate

4. Work in teams including effective project and time management, communication, and teamwork.

Audience: Undergraduate

**A A E/REAL EST/URB R PL 520 – COMMUNITY ECONOMIC ANALYSIS**

3 credits.

Economic theory (location and growth) applicable to community economic development; the role of private and public sector in local economic development, and techniques for economic analysis of community.

**Requisites:** ECON 301 or 311 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Synthesize an overview of economic theory as applied to small open economies.

Audience: Both Grad & Undergrad

2. Identify the strengths and weaknesses of the community's economy.

Audience: Both Grad & Undergrad

3. Implement alternative processes for affecting change at the community level.

Audience: Both Grad & Undergrad

4. Demonstrate literacy of economic factors affecting change at the local level.

Audience: Both Grad & Undergrad

5. Describe the community within a sustainable systems thinking approach.

Audience: Both Grad & Undergrad

6. Identify appropriate roles for community economic development practitioners in a variety of community settings.

Audience: Graduate

**A A E/ECON 526 – QUANTITATIVE METHODS IN AGRICULTURAL AND APPLIED ECONOMICS**

4 credits.

Use of quantitative methods (mathematics, statistics, and optimization) to analyze problems faced by decision makers in natural resources and agriculture. Extensive homework requiring use of quantitative methods via spreadsheet tools to solve problems from an applied decision context.

**Requisites:** (MATH 211 or 221), ECON 301, and STAT 301, or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Develop an understanding of the use of calibrated economic models to study economic policy and the underlying applied price theory.

Audience: Both Grad & Undergrad

2. Gain expertise in the formulation of numerical economic equilibrium models with application to trade, public finance, climate and energy policy applications.

Audience: Both Grad & Undergrad

3. Describe data sources for sectoral and economy-wide policy applications of calibrated economic equilibrium models.

Audience: Both Grad & Undergrad

4. Use GAMS, Excel and other visualization tools to analyze and interpret large, multi-dimensional datasets and models.

Audience: Both Grad & Undergrad

5. Demonstrate competence in writing about economic issues on the basis of evidence-based analysis of economic policy proposals.

Audience: Both Grad & Undergrad

6. Learn equivalent formulations of partial and general economic equilibrium models in primal, dual and complementarity formats.

Audience: Graduate

**A A E/ECON/F&W ECOL 531 – NATURAL RESOURCE ECONOMICS**

3 credits.

Economic concepts and tools relating to management and use of natural resources, including pricing principles, cost-benefit analysis, equity, externalities, economic rent, renewable and nonrenewable resources, and resource policy issues.

**Requisites:** ECON 301 or 311 or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Employ appropriate concepts in order to correctly define the economic benefits accrued from different natural resources.

Audience: Both Grad & Undergrad

2. Apply appropriate methodologies and tools to demonstrate the conditions under which the benefits are likely to be captured or dissipated by real world actors.

Audience: Both Grad & Undergrad

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of maintaining healthy supplies of forests, biodiversity, fish and wildlife, and freshwater.

Audience: Both Grad & Undergrad

4. Analyze the causes of and solutions for the sustainability challenges of maintaining healthy supplies of forests, biodiversity, fish and wildlife, and freshwater.

Audience: Both Grad & Undergrad

5. Apply academic principles of natural resource economics to a real-world policy problem.

Audience: Graduate

**A A E/M H R 540 – INTELLECTUAL PROPERTY RIGHTS, INNOVATION AND TECHNOLOGY**

3 credits.

Uses economic concepts to illustrate the nature of technological innovation, competition, and economic growth. Topics: economics of the intellectual property protection (IPP); market structure and innovation; interaction between public and private sectors; IPP and anticompetitive policies; globalization.

**Requisites:** Graduate/professional standing and (ECON 301 or 311)

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Describe major issues in economics of intellectual property protection (IPP), technology and innovation.

Audience: Both Grad & Undergrad

2. Employ basic economic analysis of IPP, technology and innovation related policy issues.

Audience: Both Grad & Undergrad

3. Articulate and critique theories and firms' commercial strategies related to IPP, technology and innovation.

Audience: Graduate

4. Communicate clearly economic and policy issues related to IPP, technology and innovation.

Audience: Both Grad & Undergrad

**A A E/CIV ENGR/ENVIR ST/URB R PL 561 – ENERGY MARKETS**

3 credits.

Energy resources are an essential element of the world's business, political, technical and environmental landscape. Analytic tools provided by the discipline of economics expands our understanding of this critical issue. Energy supply markets reviewed include both fossil fuels and renewable resources. Energy demand sectors include residential, commercial, industrial and transportation. Electricity represents an intermediate energy market. The interactions among these markets participants indicate how scarce resources are allocated among competing needs in the world economy.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**A A E 601 – APPLIED ECONOMICS**

3 credits.

Micro- and macroeconomic analysis of consumer behavior, markets, business strategy and government policy. Topics include supply and demand, equilibrium, elasticity, welfare, trade, externalities, market structure, economic growth, unemployment, and inflation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply microeconomic theories to explain consumer behavior and business strategy

Audience: Graduate

2. Explain market equilibrium and price determination

Audience: Graduate

3. Evaluate government policy, such as taxes, regulation, and subsidies

Audience: Graduate

4. Describe the costs and benefits of international trade

Audience: Graduate

5. Discuss fundamental macroeconomic concepts, such as GDP, unemployment, and inflation

Audience: Graduate

6. Critically evaluate economic arguments in media and policy sources

Audience: Graduate

**A A E 625 – AGRIBUSINESS ECONOMICS AND MANAGEMENT**

3 credits.

Includes a sequential study of subject material in agribusiness management and managerial economics related to the management of agricultural businesses. Topics related to agribusiness management in the U.S., including organizational structure, marketing, strategy, financial statements, financing and production planning. Concepts from managerial economics as applied to the agribusiness firm, including production theory, cost analysis, pricing strategies, cost-benefit analysis, investment decisions and competition strategies.

**Requisites:** (ECON 301 or 311) and A A E 335, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate the different organizational and operational structures of contemporary agricultural businesses and the advantages and disadvantages of each.

Audience: Both Grad & Undergrad

2. Identify the role and impact of marketing and human resource management used in decision making within the firm and across the supply chain.

Audience: Both Grad & Undergrad

3. Interpret financial statements and calculate and analyze a variety of important financial ratios used in making managerial decisions.

Audience: Both Grad & Undergrad

4. Examine an agricultural business to determine its strengths, weaknesses, and opportunities for improvement.

Audience: Both Grad & Undergrad

5. Explain the profit function and how to determine areas of profit maximization and cost minimization.

Audience: Graduate

6. Evaluate various pricing and competition strategies.

Audience: Graduate

**A A E 635 – APPLIED MICROECONOMIC THEORY**

3 credits.

Microeconomic theory applied to consumers, producers, markets, and welfare analysis. Emphasis is on the mathematics of duality and optimization methods. Computer applications of the theory. One semester of linear algebra highly recommended.

**Requisites:** MATH 222 and (ECON 301 or 311), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply models of economic problems such as production and consumption allocations and the efficiency consequences.  
Audience: Both Grad & Undergrad

2. Use models for applied economic analysis.

Audience: Both Grad & Undergrad

3. Articulate and critique theories and practices in such analyses.

Audience: Graduate

4. Communicate clearly economic and policy issues related to such analyses.

Audience: Graduate

**A A E 636 – APPLIED ECONOMETRIC ANALYSIS I**

3 credits.

Introduction to the standard linear regression model with an emphasis on application issues. Includes statistical foundation, hypothesis testing, functional form, model selection and procedures for handling violations of model assumption.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the technical aspects of linear regression and statistical inference.

Audience: Graduate

2. Critically evaluate estimates of linear models.

Audience: Graduate

3. Gauge the appropriateness of different model assumptions for different types of applied problems.

Audience: Graduate

**A A E 637 – APPLIED ECONOMETRIC ANALYSIS II**

4 credits.

Focus on extending the standard regression model. Topics include nonlinear regression models, maximum likelihood estimation, panel data, simultaneous equations, linear and nonlinear systems, analysis of discrete choice, limited dependent variables, empirical economic applications and policy analysis.

**Requisites:** A A E 636

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Extend the standard linear regression models to nonlinear regression models, estimate them, and interpret the results.

Audience: Graduate

2. Estimate models beyond ordinary least squares (OLS), to include Maximum Likelihood (MLE), analysis of discrete choice and limited dependent variables.

Audience: Graduate

3. Provide an overview of the latest techniques being developed using panel data and apply these methods in an independent estimation exercise.

Audience: Graduate

4. Select the experimental or quasi-experimental method appropriate for the analysis at hand.

Audience: Graduate

**A A E 641 – FOUNDATIONS OF AGRICULTURAL ECONOMICS**

3 credits.

Overview of the economic performance of agriculture in feeding the growing world population. Examines contemporary economic issues in the food sector, along with research methods used in their analysis. Covers production analysis, risk and uncertainty, food demand, market structure, policy and welfare analysis.

**Requisites:** A A E 635 and 636

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Understand common models used by economists who study agriculture.

Audience: Graduate

2. Describe the importance of institutions (formal and informal) common to food and agricultural industries.

Audience: Graduate

3. Understand contemporary issues related to agricultural economics and linkages between agriculture and the broader economy, including interactions with land, water and soil resources; connections to food, fuel, and fiber industries; role in early development of societies and nation states; rural-urban population flows; and growth and development of modern economies.

Audience: Graduate

4. Analyze policies that are a response to market frictions and distributive conflict among populations.

Audience: Graduate

**A A E 642 – FOUNDATIONS OF DEVELOPMENT ECONOMICS**

3 credits.

An overview of development economics, covering both basic theory and empirical applications. Topics include economic growth, trade, measurement of poverty and inequality, human capital, agricultural household models, technology adoption, migration, credit, savings, insurance, infrastructure, and the environment.

**Requisites:** A A E 635 and 636

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate and critique theories of development economics, including basic closed and open economy macroeconomic models, microeconomic models of individual and household decisions to invest in human capital, agricultural household models, models of credit and insurance markets in developing countries, and a basic understanding of technology adoption decisions.

Audience: Graduate

2. Apply measures of poverty and inequality using household data.

Audience: Graduate

3. Identify and apply empirical approaches used to analyze problems in development, including the use of observational data, both cross-sectional and panel, natural experiments, and intentional experiments.

Audience: Graduate

4. Use economic models and empirical methods to evaluate development policy or issues relevant to developing economies and be able to clearly communicate this analysis orally and in writing.

Audience: Graduate

**A A E 643 – FOUNDATIONS OF ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS**

3 credits.

Survey of historical topics and contemporary research questions in environmental and resource economics. Focus areas include foundational models of human/environment interaction, definition and evaluation of the suite of environmental policy instruments, measuring environmental costs and benefits, and examining natural resource use.

**Requisites:** A A E 635 and 636

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Summarize the breadth of topics that constitute the field of environmental economics.

Audience: Graduate

2. Use the field's historical canon to organize current research topics.

Audience: Graduate

3. Critically read and assess research papers in the field.

Audience: Graduate

4. Identify knowledge gaps in the field.

Audience: Graduate

5. Demonstrate knowledge about significant research in the field by writing a literature summary.

Audience: Graduate

**A A E 670 – MATHEMATICS FOR AGRICULTURAL AND APPLIED ECONOMICS**

3 credits.

The fundamental mathematics and statistics necessary for the study of quantitative methods in agricultural and applied economics (AAE). Topics include the mathematics of optimization and its role in basic welfare theory and consumer demand; linear and matrix algebra and their application in both modeling consumer behavior and the statistical analysis of models; and the fundamentals of statistical analysis relevant to econometric analysis, including probability theory, sampling distributions and statistical inference.

**Requisites:** (ECON 101, 111, A A E 101, or 215 prior to Fall 2024) and (MATH 211, 217, or 221) or graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Solve a constrained optimization problem by applying calculus rules.

Audience: Undergraduate

2. Create and interpret basic data visualizations.

Audience: Undergraduate

3. Articulate the law of large numbers as it pertains to empirical economic analysis.

Audience: Undergraduate

4. Determine statistical significance of parameter estimates & interpret the results.

Audience: Undergraduate

5. Use R for basic calculations and simulations.

Audience: Undergraduate

6. Explain statistical concepts to a general audience.

Audience: Undergraduate

**A A E/ECON/ENVIR ST/URB R PL 671 – ENERGY ECONOMICS**

3 credits.

The method, application, and limitations of traditional economic approaches to the study of energy problems. Topics include microeconomic foundations of energy demand and supply; optimal pricing and allocation of energy resources; energy market structure, conduct, and performance; macro linkages of energy and the economy; and the economics of regulatory and other public policy approaches to the social control of energy.

**Requisites:** Graduate/professional standing or (senior standing and ECON 101, 111, A A E 101, or 215 prior to Fall 2024)

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Understand fundamentals of energy sources and technologies.

Audience: Both Grad & Undergrad

2. Be familiar with microeconomic theory with applications to energy industries and markets.

Audience: Both Grad & Undergrad

3. Build analytical skills in economic analysis and be able to apply the economic thinking to historical and contemporary energy-related issues.

Audience: Graduate

4. Analyze the causes of and solutions for the sustainability challenge of affordable and clean energy.

Audience: Both Grad & Undergrad

5. Apply sustainability principles and/or frameworks to addressing the challenge of affordable and clean energy.

Audience: Both Grad & Undergrad

**A A E 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member. Requires consent of supervising instructor. Enrolled in CALS Honors Program.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2009

**Learning Outcomes:** 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem.

Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses.

Audience: Undergraduate

3. Carry out analysis using data and/or economic models related to the research problem under investigation.

Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.

Audience: Undergraduate

5. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work.

Audience: Undergraduate

**A A E 682 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member. Requires consent of supervising instructor. Continuation of 681. Enrolled in CALS Honors Program.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2010

**Learning Outcomes:** 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem.

Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses.

Audience: Undergraduate

3. Carry out analysis using data and/or economic models related to the research problem under investigation.

Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.

Audience: Undergraduate

5. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work.

Audience: Undergraduate

**A A E 691 – SENIOR THESIS**

2 credits.

Individual study for majors completing theses for AAE degrees as arranged with a faculty member. Requires consent of supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem.

Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses.

Audience: Undergraduate

3. Carry out analysis using data and/or economic models related to the research problem under investigation.

Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.

Audience: Undergraduate

5. Write a thesis that contextualizes the work, presents the research question, describes the analysis performed to answer the question, and analyzes the results.

Audience: Undergraduate

**A A E 692 – SENIOR THESIS**

2 credits.

Individual study for majors completing theses for AAE degrees as arranged with a faculty member. Requires consent of supervising instructor. Continuation of A A E 691.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem.

Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses.

Audience: Undergraduate

3. Carry out analysis using data and/or economic models related to the research problem under investigation.

Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.

Audience: Undergraduate

5. Write a thesis that contextualizes the work, presents the research question, describes the analysis performed to answer the question, and analyzes the results.

Audience: Undergraduate

**A A E 699 – SPECIAL PROBLEMS**

1-4 credits.

Independent research guided by an AAE faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Investigate a special topic in conjunction with the faculty member and other investigators to develop an understanding of how economists would approach this topic.

Audience: Undergraduate

2. Meet with the faculty member based on their requirements and demonstrate how the independent work is progressing.

Audience: Undergraduate

3. Communicate the results of investigations via written and/or oral means to an appropriate audience.

Audience: Undergraduate

**A A E 701 – APPLIED ECONOMIC DATA ANALYSIS**

4 credits.

Application of data science methods to economic analyses. Integration of data acquisition, cleaning, analysis, and interpretation in managerial contexts. Emphasis on applications in the agri-food supply chain.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Manipulate, organize, and visualize quantitative economic data using computer software

Audience: Graduate

2. Conduct statistical analyses and estimate basic linear regression models of economic data

Audience: Graduate

3. Correctly report and interpret results from statistical analyses of economic data in the context of informing managerial decisions

Audience: Graduate

4. Set up and solve linear and non-linear programming problems that inform economic decision-making using computer software

Audience: Graduate

5. Integrate uncertainty into the analysis of economic decisions and articulate how uncertainty influences managerial decisionmaking

Audience: Graduate

6. Effectively communicate verbally, visually, and in writing the process and results of data analysis for managerial decisionmaking

Audience: Graduate

**A A E 705 – APPLIED MICROECONOMICS**

3 credits.

Focuses on developing a conceptual as well as empirical analysis of microeconomic behavior, including production and consumption analysis, technical change, and investment. Emphasizes empirical applications of microeconomics, with implications for efficiency and welfare analysis. Knowledge of statistics such as STAT/MATH 309 is recommended.

**Requisites:** A A E 635 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Understand formal models of economic problems such as production and consumption allocations and the efficiency consequences.

Audience: Graduate

2. Employ analytical and mathematical models to analyze economic problems.

Audience: Graduate

3. Articulate and critique theories and practices in such analyses.

Audience: Graduate

4. Communicate clearly economic and policy issues related to such analyses.

Audience: Graduate

**A A E 706 – APPLIED RISK ANALYSIS**

3 credits.

Conceptual empirical analysis of economic behavior under risk and its implications for management and policy decisions. Emphasis on economic applications to the agricultural and food sector.

**Requisites:** A A E 635 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Evaluate the linkages between economic theory and the analysis of behavior under risk.

Audience: Graduate

2. Describe and employ alternative models used in risk analysis.

Audience: Graduate

3. Formulate, analyze and report on current and emerging issues related to risk assessment, risk management and public decision making related to risk management.

Audience: Graduate

4. Conduct applied risk analysis.

Audience: Graduate

### **A A E 718 – DATA SCIENCE FOR AGRICULTURAL AND APPLIED ECONOMICS**

3 credits.

Introduction to data and data processing using both Python and R programming languages. Concepts covered include loading data, data acquisition, cleaning data, visualization/exploring data, and storing data.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use Python and R to load, clean and visualize data.

Audience: Graduate

2. Prepare and manipulate/transform data to support analysis in Python and R.

Audience: Graduate

3. Create effective visualizations to communicate complex data.

Audience: Graduate

4. Implement Simple Linear Regression in Python and R.

Audience: Graduate

5. Apply the above R and Python methods to public-use datasets related to agricultural and applied economics.

Audience: Graduate

### **A A E 719 – APPLIED BUSINESS ECONOMICS**

4 credits.

Overview of fundamental topics related to macroeconomics, economic measurement, financial markets and forecasting. Concepts include fiscal and monetary policy, the money system, models of aggregate supply and demand, business cycles, financial instruments, productivity, measurements and indicators of employment and economic growth, financial institutions, international trade and finance, and various forecasting methods and models.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain, contrast and analyze topics related to business economics such as forecasting, business cycle analysis, fiscal and monetary policy, and financial markets.

Audience: Graduate

2. Compare and contrast the relevant strengths and weaknesses of established macroeconomic theories.

Audience: Graduate

3. Identify and visualize data related to business economics, analyze trends in light of macroeconomic principles, and apply forecasting methods.

Audience: Graduate

4. Effectively communicate relevant ideas through writing and presentation.

Audience: Graduate

### **A A E 720 – SEMINAR IN QUANTITATIVE AND APPLIED ECONOMICS**

1 credit.

This is a 1 credit seminar that will be offered each spring. There will be different presenters each year.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand and evaluate the arguments and methods of presentations from industry and academia.

Audience: Graduate

2. Employ the vocabulary relevant to an economics topic, understand the economic context for the issue, and pros/cons associated with potential solutions.

Audience: Graduate

3. Professionally present results of economic analysis.

Audience: Graduate

**A A E 721 – PROFESSIONAL COMMUNICATION OF APPLIED ECONOMIC ANALYSIS**

1 credit.

Professional communication for careers in applied economics. Writing for technical and non-technical audiences, including writing about research findings, client memos executive summaries, detailed analysis reports etc.

**Requisites:** A A E 636**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and use elements of reader-friendly writing strategies  
Audience: Graduate

2. Communicate effectively with technical and non-technical audiences  
Audience: Graduate

3. Summarize different types of econometric analyses and explain the intuition behind them to non-economists  
Audience: Graduate

4. Situate analysis results into a larger context and reflect on their implications  
Audience: Graduate

5. Differentiate between some of the ethical and non-ethical uses of generative AI tools as writing/editing assistants in a professional setting  
Audience: Graduate

**A A E 722 – MACHINE LEARNING IN APPLIED ECONOMIC ANALYSIS**

4 credits.

The basic methods, implementation and applications of machine learning for understanding contemporary economic issues using large data sets. Building upon understanding of standard econometric models, the topics include data mining techniques; regression model selection and regularization; post selection inference and economic applications; tree-based methods; neural networks; random forests and casual inference; and unsupervised learning.

**Requisites:** A A E 636 or ECON 704**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe and explain the mechanics of basic machine learning methods  
Audience: Graduate

2. Employ data exploration and visualization tools for analyzing large amounts of data  
Audience: Graduate

3. Select model and conduct post-selection inference of high-dimensional data  
Audience: Graduate

4. Apply machine learning methods on large data sets for economic and policy analysis  
Audience: Graduate

5. Demonstrate the ability to use statistical packages for methods covered in the course  
Audience: Graduate

**A A E 723 – PROFESSIONAL DEVELOPMENT SEMINAR**

1 credit.

Professional development for applied economists in sequential contexts. Examples include understanding and preparing for the professional economist job market; preparing and packaging job search materials; technical and non-technical interactions with potential employers and clients; understanding leadership styles and exploring leadership potential; examining professional ethics and norms; and gaining exposure to trends in professional development. Students will develop career skills by completing stand-alone activities, and by coordinating soft skill development tasks with exercises in simultaneously or previously offered theory and econometric classes.

**Requisites:** A A E 721**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Summarize different career paths for applied economists.

Audience: Graduate

2. Produce a suite of written materials, including a resume, curriculum vitae, online webpage and short project proposals.

Audience: Graduate

3. Identify and apply for specific jobs, including writing targeted cover letters.

Audience: Graduate

4. Organize and apply strategies for in-person interviewing by participating in practice interviews.

Audience: Graduate

**A A E 724 – PRACTICUM FOR APPLIED ECONOMISTS**

4 credits.

Quantitative methods typically used by economic analysts in a professional setting. Synthesize and apply previous coursework to conduct econometric analysis and produce a professional report.

**Requisites:** A A E 637 or 719**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and clarify project objectives

Audience: Graduate

2. Identify and prepare the data to be used to meet the project objectives

Audience: Graduate

3. Develop the relevant analytical approach and the models to be used in the analysis

Audience: Graduate

4. Conduct the analysis and report analysis results and conclusions in a written report

Audience: Graduate

5. Communicate clearly both in written report and oral presentation relevant applied economic and policy issues in the analysis

Audience: Graduate

**A A E 730 – FRONTIERS IN DEVELOPMENT ECONOMICS 1**

3 credits.

Theory and empirical evidence on growth and development in low-income countries. Topics may include: measurement of poverty and inequality, risk and insurance, social networks, technology adoption, education, corruption, institutions, and behavioral economics.

**Requisites:** ECON 709 and 711**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Construct models of credit and insurance markets in developing countries and measure their impacts empirically.

Audience: Graduate

2. Measure corruption and governance and their impact on economic development.

Audience: Graduate

3. Use and evaluate econometric concepts including fixed effects, attenuation bias, and instrumental variables.

Audience: Graduate

4. Think critically about empirical research and write a referee report.

Audience: Graduate

**A A E 731 – FRONTIERS IN DEVELOPMENT ECONOMICS 2**

3 credits.

Theory and evidence on growth and development in emerging economies, with primary focus on globalization, trade, labor markets and human capital. We use open-economy general equilibrium models to examine welfare implications of global shocks and domestic economic policies.

**Requisites:** ECON 709 and 711

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the general equilibrium approach to problems of economic growth and development.

Audience: Graduate

2. Understand intersectoral linkages in factor and product markets as well as the constraints imposed by resource endowments, international markets, and domestic technology and preferences.

Audience: Graduate

3. Apply models to parse the economic effects of exogenous events such as resource export booms, world market shocks and domestic policy innovations on prices, sectoral production, investment incentives, incomes and income distribution, and key measures of poverty and household welfare.

Audience: Graduate

4. Interpret the implications of these results for long-run economic growth and development, including some political economy aspects.

Audience: Graduate

5. Understand and work creatively with models of international trade and globalization insofar as they inform the development process.

Audience: Graduate

**A A E 737 – APPLIED ECONOMETRIC ANALYSIS III**

3 credits.

Prepares students for their own empirical work by examining contemporary econometric techniques as they are used in development, environment and natural resources, and agricultural economics. Guides students through a selection of applied models using past and current research as examples. By hearing lectures and working through papers, problem sets, replication exercises, and/or research projects, students will develop a deeper understanding of the many facets of empirical research in economics.

**Requisites:** ECON 709 and 710

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain and assess the concepts of causal inference and identification in econometric analyses.

Audience: Graduate

2. Articulate the necessary assumptions underpinning various applied identification strategies.

Audience: Graduate

3. Assess and critique specific applications of various identification strategies.

Audience: Graduate

4. Conduct and interpret econometric analyses applying various identification strategies using statistical software.

Audience: Graduate

5. Summarize ongoing debates about the validity of empirical research in economics including issues of internal validity, external validity, and replicability.

Audience: Graduate

**A A E 746 – FRONTIERS IN AGRICULTURAL ECONOMICS 1**

3 credits.

Economics of agricultural technology innovation and adoption, properties and measurement of production and productivity, and impact evaluation. Empirical methods, including surveys, experiments, randomized trials, and instrumental variable methods of testing applied microeconomic models.

**Requisites:** ECON 709 and 711

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

**Learning Outcomes:** 1. Understand the tools used in applied policy analysis.

Audience: Graduate

2. Apply economic concepts to analyze efficiency and equity impacts of policies.

Audience: Graduate

3. Understand the role of uncertainty in analyzing impacts of policy.

Audience: Graduate

4. Understand how political factors may constrain or impact policy choices.

Audience: Graduate

**A A E/ECON 747 – FRONTIERS IN AGRICULTURAL ECONOMICS 2**

3 credits.

Organization, design, and performance of food and agricultural markets. Industrial organization; firm boundaries, contracting, and collective action; spatial, temporal, and quality dimensions of market design.

**Requisites:** ECON 709 and 711

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Describe the general state and history of the American agricultural sector, agricultural policy, and the major subfields of agricultural economics.

Audience: Graduate

2. Apply and extend economic models in agricultural contexts to evaluate or predict economic behavior or outcomes.

Audience: Graduate

3. Conduct and interpret econometric analyses motivated by economic theory.

Audience: Graduate

4. Synthesize and summarize research in the field of agricultural economics through clear writing.

Audience: Graduate

5. Generate interesting and relevant research questions informed by the economic literature.

Audience: Graduate

**A A E 750 – PROFESSIONAL DEVELOPMENT FOR AGRIBUSINESS MANAGERS**

3 credits.

Development of professional and communication skills beyond standard technical training critical for career success. Foster interpersonal and professional career skills by engaging with academic practitioners and industry professionals. Topics include verbal and written communication, project management, leadership, networking, strategic decision-making, active listening, business intelligence, teamwork, and business culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe and evaluate information presented orally through the use of active listening skills

Audience: Graduate

2. Communicate orally and in writing with technical and non-technical audiences

Audience: Graduate

3. Apply communication skills to the larger context of strategic decision-making

Audience: Graduate

4. Assess the implications of management decisions

Audience: Graduate

5. Discuss professional ethics and norms, leadership styles, and business culture

Audience: Graduate

6. Develop written materials for the job-search

Audience: Graduate

7. Communicate formally and informally with potential employers

Audience: Graduate

**A A E 760 – FRONTIERS IN ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS 1**

3 credits.

Economic tools and principles pertaining to the optimal management of natural resources. Theoretical models characterize efficient resource use and predict management decisions under different institutional settings. Empirical applications relate to public and private management of forests, fish, wildlife, minerals, and energy resources. Examples highlight the importance of discount rates, property rights, and government policies.

**Requisites:** ECON 709 and 711

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Model the dynamic management of natural resources by rational economic actors.

Audience: Graduate

2. Apply appropriate methodologies to demonstrate the conditions under which benefits from resources are likely to be captured or dissipated by real world actors.

Audience: Graduate

3. Develop and hone presentation skills.

Audience: Graduate

4. Develop the beginning of their own research agenda.

Audience: Graduate

### **A A E 762 – FRONTIERS IN ENVIRONMENTAL AND NATURAL RESOURCE ECONOMICS 2**

3 credits.

The role of markets and government in the allocation of environmental goods and services. Topics include public goods, externalities and market failure; policy instruments for dealing with environmental quality problems such as air pollution; and distributional impacts of environmental regulations.

**Requisites:** ECON 709 and 711

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Read research papers with an eye towards understanding, critiquing, and extending research in environmental economics.

Audience: Graduate

2. Hone presentation skills related to peer interactions about research ideas.

Audience: Graduate

3. Develop a working knowledge of the frontier or research in key areas in environmental economics.

Audience: Graduate

4. Begin to develop their own research ideas.

Audience: Graduate

### **A A E 770 – INTRODUCTION TO QUANTITATIVE METHODS IN RESOURCE AND ENERGY ECONOMICS**

3 credits.

The fundamental mathematics and statistics necessary for the study of quantitative methods in resource and energy demand. Topics include the mathematics of optimization and its role in basic welfare theory and consumer demand; linear and matrix algebra and their application in both modeling consumer behavior and the statistical analysis of models; and the fundamentals of statistical analysis relevant to econometric analysis of resource and energy demand, including probability theory, sampling distributions, and statistical inference.

**Requisites:** Declared in the Resource and Energy Demand Analysis program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2020

### **A A E 771 – MICROECONOMICS OF RESOURCES AND ENERGY: THEORY TO PRACTICE**

3 credits.

Applying economic theory to the practice of resource and energy demand analysis. Topics include consumer demand theory and the proper modeling of demand systems, theoretical underpinnings of behavioral economics, welfare theory, cost benefit analysis and cost-effectiveness analysis, and technology adoption and diffusion.

**Requisites:** Declared in the Resource and Energy Demand Analysis program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### **A A E 772 – APPLIED ECONOMETRICS OF RESOURCE AND ENERGY DEMAND**

4 credits.

The estimation of the economic models of resource and energy demand, including evaluation of energy and resource programs, estimating demand systems in the study of dynamic pricing models, estimating discrete choice models, forecasting resource and energy demand from econometric models, and topics in the application of big-data analytics in resource and energy demand analysis.

**Requisites:** A A E 636 and declared in Agricultural Applied Economics: Resource and Energy Demand Analysis

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **A A E 773 – SEMINAR IN RESOURCE AND ENERGY DEMAND ANALYSIS**

1-2 credits.

Current issues in resource and demand analysis, with presentations by academic researchers and industry professionals, to introduce students to current issues in resource and demand analysis, and to develop their critical thinking about addressing these issues.

**Requisites:** Declared in the Resource and Energy Demand Analysis program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

### **A A E 774 – PRACTICUM IN RESOURCE AND ENERGY DEMAND ANALYSIS I**

1 credit.

The first in a 2-course sequence that comprises the capstone course in Resource and Energy Demand Analysis, in which students synthesize their training in a simulated "real world" analysis. The course is designed to reflect the full range of professional responsibilities of a resource/energy demand analyst, from data retrieval/cleaning to analysis to reporting.

**Requisites:** A A E 636 and declared in Agricultural Applied Economics: Resource and Energy Demand Analysis

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**A A E 776 – PRACTICUM IN RESOURCE AND ENERGY DEMAND ANALYSIS II**

3 credits.

The second in a 2-course sequence that comprises the capstone course in Resource and Energy Demand Analysis, in which students synthesize their training in a simulated "real world" analysis. The course is designed to reflect the full range of professional responsibilities of a resource/energy demand analyst, from data retrieval/cleaning, to analysis, to reporting.

**Requisites:** A A E 772 and declared in Agricultural Applied Economics: Resource and Energy Demand Analysis

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2021

**A A E 777 – SURVEY AND SAMPLE DESIGN IN APPLIED ECONOMICS**

2 credits.

Teaches generation and use of survey data. Topics include identification of target population, random, stratified, cluster sampling, power analysis, survey collection implementation, retrospective and prospective surveys of respondent choice, experimental choice in survey design, and econometric modeling of respondent choices.

**Requisites:** Declared in the Resource and Energy Demand Analysis program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**A A E 780 – RESEARCH COLLOQUIUM**

3 credits.

For AAE Ph.D. students to develop a dissertation proposal. Working in groups and with some additional feedback from individual advisors. Developing research questions, literature search, word models, math models, testable hypotheses, identification strategies. Working with data, using LATEX, giving presentations. Peer review of weekly assignments. Developing cohort for subsequent feedback through dissertation writing and job search.

**Requisites:** Declared in Agricultural & Applied Economics, Ph.D.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Give constructive peer feedback.

Audience: Graduate

2. Compose a dissertation proposal.

Audience: Graduate

3. Produce a clear and professional proposal defense presentation.

Audience: Graduate

4. Summarize the main characteristics of the data and empirical strategy for the dissertation.

Audience: Graduate

**A A E 799 – PRACTICUM IN AGRICULTURAL AND APPLIED ECONOMICS TEACHING**

1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**A A E/POLI SCI 835 – GAME THEORY AND POLITICAL ANALYSIS**

3 credits.

An introduction to the tools of game theoretic analysis, with reference to the use of game theory in political science. Intended for those desiring a basic familiarity with the theory, and for those planning further work in formal modeling.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**A A E 875 – SPECIAL TOPICS**

1-4 credits.

Special topics on contemporary issues relevant to agricultural and applied economics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze and critique research in applied economics.

Audience: Graduate

2. Evaluate the significance of current research in applied economics by presenting and/or critiquing scientific presentations.

Audience: Graduate

3. Synthesize the state of the literature related to the applied economics topic being studied.

Audience: Graduate

**A A E/ENVIR ST/POP HLTH/PUB AFFR 881 – BENEFIT-COST ANALYSIS**

3 credits.

Presents the welfare economics underpinnings for evaluating the social benefits and costs of government activities. Issues such as uncertainty, the social discount rate, and welfare weights will be discussed; case studies from the environmental, social policy, and agricultural areas will be studied.

**Requisites:** Graduate/professional standing and (PUB AFFR 818 and 880), or POP HLTH/I SY E 875, or A A E 635

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the basic mechanics of performing a Cost Benefit Analysis, including methods for valuing costs and benefits, aggregating over time, and analyzing uncertainties.

Audience: Graduate

2. Evaluate the strengths and weaknesses of different CBAs and propose strategies to address any shortcomings.

Audience: Graduate

3. Debate the advantages and limitations of CBA for public policy and compare it to other approaches.

Audience: Graduate

4. Create a CBA for a real-world client from beginning to end, including scoping, background research, valuation of costs and benefits, uncertainty analysis, and interpretation.

Audience: Graduate

**A A E 899 – AAE GRADUATE PRACTICAL TRAINING/INTERNSHIP**

1-6 credits.

Real-world, hands-on collaboration with industry partners to offer practical training projects or internships under the direction and oversight of an instructor in the Department of Agricultural and Applied Economics. The goal of both internships and practical training is to offer valuable opportunities to acquire practical, industry-related skills through hands-on learning.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Learning Outcomes:** 1. Apply theoretical knowledge gained in coursework to an experiential learning opportunity with a stakeholder business/organization

Audience: Graduate

2. Produce and deliver recommendations to stakeholder business/organization through a formal written report and professional oral presentation

Audience: Graduate

**A A E/ANTHRO/C&E SOC/GEORG/HISTORY/LACIS/POLI SCI/PORTUG/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA**

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**A A E 990 – RESEARCH AND THESIS**

1-12 credits.

Independent research and writing to complete dissertation requirement.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct and report on applied economics research under the guidance of a qualified instructor.

Audience: Graduate

2. Develop novel research questions and propose methods to answer the questions using tools from applied economics.

Audience: Graduate

3. Connect their research clearly to other research in their field of study.

Audience: Graduate

**A A E 999 – SPECIAL WORK - AGRICULTURAL AND APPLIED ECONOMICS**

1-3 credits.

Directed study projects for graduate students as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct and report on independent applied economics research topic under the guidance of a qualified instructor.

Audience: Graduate

2. Independently develop research questions in agricultural or applied economics.

Audience: Graduate

3. Connect their research to the broader literature and express where the research makes new contributions.

Audience: Graduate

# AGROECOLOGY (AGROECOL)

## AGROECOL/C&E SOC/ENTOM/ENVIR ST 103 – AGROECOLOGY: AN INTRODUCTION TO THE ECOLOGY OF FOOD AND AGRICULTURE

3 credits.

Agroecology has blossomed across the world in recent decades as not only a science, but also a practice, and a movement. Employ the multiple disciplines and perspectives that Agroecology affords to analyze our agricultural and food systems within a broader context of dynamic social and ecological relationships.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain and analyze basic biophysical processes of agricultural ecosystems and the challenges and benefits of various management systems

Audience: Undergraduate

2. Interrogate social, economic, and political structures underlying agriculture at local, regional, national, and global scales

Audience: Undergraduate

3. Describe how they personally connect to local to global agricultural landscape as humans, ecological actors, food and fuel consumers, and thoughtful citizens

Audience: Undergraduate

## AGROECOL 187 – PLANTS AND THE SCIENCE OF SURVIVAL

3 credits.

Could you grow and gather enough food to feed yourself? Learn the biology behind how to grow healthy plants in a healthy ecosystem by creating plans for a large food garden. Focus on understanding the scientific method, analyzing data and sources, and using scientific research as a tool to make decisions. Identify credible information sources for solving unpredictable, real-world problems faced by food growers. Practice awareness and understanding of the natural world.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Create an evidence-based plan for a growing space

Audience: Undergraduate

2. Explain how the structure, function, growth, origin, evolution, distribution, and taxonomy of plants impact humans' use of them as food and medicine

Audience: Undergraduate

3. Demonstrate knowledge of scientific concepts and assumptions as they apply to growing and harvesting plants

Audience: Undergraduate

4. Analyze, interpret, and locate scientific evidence about homesteading-related topics

Audience: Undergraduate

5. Demonstrate knowledge of the scientific method

Audience: Undergraduate

6. Apply scientific reasoning to determine when scientific information supports a given conclusion about plant use and production

Audience: Undergraduate

7. Critically evaluate the impacts of plant sciences on our communities and food systems

Audience: Undergraduate

### AGROECOL/HIST SCI 301 – (HORTI)CULTURAL ROOTS: HUMAN HISTORIES OF PLANTS AND SCIENCE

4 credits.

Dig into the history of plant sciences to understand why plants and humans have the relationships they do today. Focus on the experiences of Indigenous Americans and People of Color to understand the roots of inequities in horticulture, agriculture, and other plant sciences. Practice skills as a translator of science and history through engagement with scientific publications, library resources, and archival materials. Define important societal questions, collect and analyze evidence, present original conclusions, and contribute to ongoing discussions about the relationship of people and plants.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed – Communication Part B

Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Compare and contrast plant-human systems in multiple historical contexts with an emphasis on the impact of racism

Audience: Undergraduate

2. Produce written and spoken work that incorporates critical reading, logical thinking, and use of evidence that is appropriate to the plant sciences

Audience: Undergraduate

3. Recognize ethnic, racial, and religious minorities' historical and ongoing marginalization in horticulture, agriculture, botany, and other plant-related disciplines

Audience: Undergraduate

4. Effectively participate in a multicultural society through written and spoken contributions to ongoing discussions

Audience: Undergraduate

5. Translate current research into a written and spoken format that is relevant and understandable to a public audience and scholars in other disciplines

Audience: Undergraduate

6. Apply core library resources to research and communication about human-plant systems

Audience: Undergraduate

### AGROECOL 303 – AGROECOLOGICAL SYSTEMS: WORKING TOWARDS SUSTAINABILITY

3 credits.

Explores in-depth agriculture systems as coupled ecological and social complexities. Examines the components of agricultural systems and analyzes how different ecological and social contexts influence and are influenced by the agricultural system. Explores and analyzes how management decisions (crop breeding, in-crop management, landscape-level, etc.) ramify to influence processes and outcomes at different levels of complexity (e.g., ecosystem, landscape, social well-being, human health, economic) and the socio-ecological tradeoffs that ensue. Develops skills to analyze how the design and implementation of integrated agricultural systems can contribute to solutions for pressing societal challenges such as climate change, biodiversity declines, unsustainable resource use and social inequality.

**Requisites:** ENVIR ST/AGROECOL/C&E SOC/ENTOM 103

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify ecological biotic and abiotic aspects of agricultural systems as stocks and flows of energy and matter within and between organizational levels (e.g. cellular, organismal, ecosystem, landscape, and global)

Audience: Undergraduate

2. Describe the social dimensions of agricultural systems as stocks and flows of knowledge, information, and beliefs at organizational levels within agroecosystems

Audience: Undergraduate

3. Explain and analyze how the management of agroecosystems influences ecological and social processes

Audience: Undergraduate

4. Evaluate how agriculture can be designed and managed to be a solution for modern ecological and social challenges of today (e.g. climate change, unsustainable resources use, biodiversity declines, social inequality) in different socio-ecological contexts

Audience: Undergraduate

5. Compare and contrast careers in agroecology through interactions with a wide variety of persons working in the field, from practitioners to industry professionals

Audience: Undergraduate

6. Solve problems individually and as part of teams using the scientific method, logic, and reasoning by identifying and differentiating the strength and value of information, evidence, and approaches related to the management and sustainability of agroecosystems

Audience: Undergraduate

7. Reflect on one's participation in food systems from local to global scales

Audience: Undergraduate

**AGROECOL 370 – GRASSLAND ECOLOGY**

3 credits.

Understand factors driving global, continental, regional, and local distribution of grasslands. Discuss how management affects provision of grassland ecosystem goods and services. Compare and contrast plant community and ecosystem dynamics in native prairie and intensively managed pastures.

**Requisites:** PL PATH/BOTANY 123, BOTANY/BIOLOGY 130, SOIL SCI/ENVIR ST 101, SOIL SCI/ATM OCN 132, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, BOTANY 100, PLANTSCI 110, AGRONOMY 100, ENTOM/AGROECOL/C&E SOC/ENVIR ST 103, or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the social, economic, and environmental dimensions of the sustainability challenges of grasslands

Audience: Undergraduate

2. Describe the social, economic, and environmental dimensions of grasslands and identify potential trade-offs and interrelationships among these dimensions

Audience: Both Grad & Undergrad

3. Predict the distribution, structure, function, and services of grasslands from global to local levels of resolution

Audience: Graduate

**AGROECOL 375 – SPECIAL TOPICS**

1-4 credits.

Special topics on issues relevant to agroecology.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Explain concepts relating to an agroecology topic outlined in the title

Audience: Undergraduate

**AGROECOL 377 – GLOBAL FOOD PRODUCTION AND HEALTH**

3 credits.

Crops, food, and cropping systems from different parts of the world and their impact on global sustainability and health. Introduction to crop biology, environmental requirements, and agronomic production practices of major food crops. Environmental, socioeconomic, and health impacts of farming systems and how to assess their sustainability. A global perspective on agroecology, food, environment, health, and agriculture.

**Requisites:** BOTANY/BIOLOGY/ZOOLOGY 151, BIOLOGY/ZOOLOGY 101, BIOLOGY/BOTANY 130, BIOCORE 381, HORT 120, AGRONOMY 100, ENVIR ST/AGROECOL/C&E SOC/ENTOM 103, PLANTSCI 110, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe, analyze, and understand cropping systems of different parts of the world.

Audience: Both Grad & Undergrad

2. Describe the social, economic, and environmental dimensions of cropping systems and identify potential trade-offs and interrelationships among these dimensions.

Audience: Both Grad & Undergrad

3. Analyze sustainability issues and/or practices using a systems-based approach within the Agroecology framework.

Audience: Both Grad & Undergrad

4. Reflect about engaging in international sustainable agriculture and health issues.

Audience: Both Grad & Undergrad

5. Communicate effectively ideas in written reports and oral presentations.

Audience: Both Grad & Undergrad

6. Use sustainability principles for developing personal goals and professional values.

Audience: Both Grad & Undergrad

7. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of global food production systems and health.

Audience: Graduate

**AGROECOL 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

Internship under guidance of a faculty or instructional academic staff member in Agroecology and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Apply concepts learned in coursework to authentic professional situations

Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry

Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations

Audience: Undergraduate

**AGROECOL 400 – STUDY ABROAD IN AGROECOLOGY**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Current enrollment in a UW-Madison study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**AGROECOL 503 – AGROECOLOGY CAPSTONE**

3 credits.

A stepping stone between the classroom and society. Emphasizes integration of diverse bodies of agroecological knowledge, critical thinking, and engagement with real-world problems and current research. Topics such as: bioproducts, food systems and security, economic vitality of communities, climate change, humans and their environment, biodiversity, resource management and policy, and social equity.

**Requisites:** ENVIR ST/AGROECOL/C&E SOC/ENTOM 103, AGROECOL 303, and senior standing

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Integrate diverse bodies of knowledge to solve an agroecological problem or formulate a policy of society importance

Audience: Undergraduate

2. Evaluate the strength and value of information, evidence, and approaches relevant to a specific problem or policy

Audience: Undergraduate

3. Discuss and lead discussions with peers regarding a specific agroecological problem or policy

Audience: Undergraduate

4. Write and present comprehensive reports regarding a specific agroecological problem or policy for scientists or policymakers

Audience: Undergraduate

5. Write and present comprehensive reports regarding a specific agroecological problem or policy for the general public

Audience: Undergraduate

**AGROECOL 699 – SPECIAL PROBLEMS**

1-3 credits.

Scholarship on special topics, under the supervision of an agroecology faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Frame an agricultural problem using an agroecological lens

Audience: Undergraduate

2. Describe multifunctional agricultural solutions

Audience: Undergraduate

**AGROECOL 701 – THE FARM AS SOCIO-ENVIRONMENTAL ENDEAVOR**

3 credits.

Farms may be analyzed as intentional entities shaped by the contexts in which they must operate. This course explores how these biophysical and social contexts both exert constraints and provide opportunities, leading to the diversity of farms observed.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop a vision of agriculture as a social and ecological activity for which we have many diverse demands  
Audience: Graduate

2. Differentiate the roles of the natural and social sciences of agriculture, including their basic methods of inquiry  
Audience: Graduate

3. Apply an agroecological imagination to think about food and agriculture contextually  
Audience: Graduate

4. Reflect on the organizational, political, and personal challenges to cultivating a more beneficent agriculture  
Audience: Graduate

5. Engage with the organizational, political, and personal challenges of this contextualized diversity for the cultivation of a more beneficent agriculture  
Audience: Graduate

**AGROECOL 702 – THE MULTIFUNCTIONALITY OF AGRICULTURE**

3 credits.

Agroecology systems provide a variety of social, economic, and ecological functions to society, each with a different network of stakeholders. This course explores methods of evaluating these diverse functions and perspectives, with a special focus on participatory approaches.

**Requisites:** Declared in Agroecology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Collect, analyze, and interpret data on an agroecology-related issue  
Audience: Graduate

2. Integrate and apply multiple disciplinary perspectives such as technical, economic, socio-political, and environmental factors in the context of complex agroecology problems  
Audience: Graduate

3. Plan and manage a long-term project  
Audience: Graduate

4. Communicate effectively with clients and multidisciplinary teams  
Audience: Graduate

5. Produce professional-quality deliverables such as presentations and reports  
Audience: Graduate

**AGROECOL 710 – SEMINAR IN AGROECOLOGY**

1 credit.

Facilitated discussions on agroecology-related scholarship, policies, and practices. May include presentations on current or proposed research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Present current or proposed research  
Audience: Graduate

2. Facilitate discussion of agroecology-related scholarship  
Audience: Graduate

3. Integrate and apply multidisciplinary perspectives to evaluate and propose solutions to agroecology problems  
Audience: Graduate

4. Analyze and discuss agroecology research, policies, and practices  
Audience: Graduate

5. Evaluate peer presentations  
Audience: Graduate

**AGROECOL 720 – AGROECOLOGY FIELD STUDY**

1-3 credits.

Field study of farms, processing, marketing, distribution, and policy-making in the food system. Courses will be several days of visits, discussions with the operators, and student-faculty discussion sections. Presentations or written reports may be required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Interact with practitioners of agroecology, such as farmers, ranchers, field researchers, policy makers, social scientists  
Audience: Graduate

2. Describe the scope of agriculture in Wisconsin and relationships among the university and the community  
Audience: Graduate

**AGROECOL/ENVIR ST 724 – AGROECOSYSTEMS AND GLOBAL CHANGE**

3 credits.

Impacts of global change drivers (climate change, atmospheric chemistry, bioenergy, urbanization, policy) on agroecosystems and their associated goods and services; environmental impacts of agricultural land use and feedbacks to climate; modeling approaches; critical review of current scientific literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Explain key physical, biological, and social drivers of change to agroecosystems on planet Earth  
Audience: Graduate

2. Apply important biophysical and biological concepts to describe how a changing climate and changes in atmospheric composition impact agricultural systems  
Audience: Graduate

3. Describe how agricultural land management impacts the Earth's climate system through changing biogeochemical cycling  
Audience: Graduate

4. Discuss how agricultural land management impacts Earth's climate system through biogeophysical processes that effect energy and water balance in the soil-plant-atmosphere system  
Audience: Graduate

5. Identify and summarize ecosystem services that are impacted by agroecosystems and land management decision-making, and how this effects global environmental sustainability  
Audience: Graduate

**AGROECOL 799 – PRACTICUM IN AGROECOLOGY TEACHING**

1-3 credits.

Instructional orientation to teaching at the higher education level in Agroecology, direct evidence-based teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Articulate learning goals for the practicum in cooperation with supervising instructor  
Audience: Graduate

2. Prepare and/or implement lesson plans for a class period, week, or module of the class  
Audience: Graduate

3. Deliver course content and/or facilitate discussion  
Audience: Graduate

4. Identify pedagogical strengths and opportunities for growth based on classroom assessment and/or feedback  
Audience: Graduate

**AGROECOL/ATM OCN/BOTANY/ENTOM/ENVIR ST/F&W ECOL/  
GEOG/ZOOLOGY 953 – INTRODUCTION TO ECOLOGY  
RESEARCH AT UW-MADISON**

1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison  
Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison  
Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology  
Audience: Graduate

4. Develop appropriate expectations for advisors and advisees  
Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics  
Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science  
Audience: Graduate

**AGROECOL 990 – RESEARCH**

1-12 credits.

Independent research on the student's thesis or degree project.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct agroecological research including framing with a multifunctional perspective, engaging in co-learning with communities, and communicating with diverse partners  
Audience: Graduate

**AIR FORCE AEROSPACE  
STUDIES (A F AERO)****A F AERO 101 – HERITAGE AND VALUES I**

1 credit.

An introduction to the Air Force (AF), potential careers, and role of the United States Air Force today. Examine general aspects of the Department of the Air Force, AF Leadership, AF benefits, and opportunities for AF officers. Provides the foundation for becoming an Airman by outlining our heritage and values, as well as a historical perspective such as lessons on war and US military, AF operations, principles of war, and airpower. Gain a knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the Air Force Core Values and their importance to Airmen.

Audience: Undergraduate

2. Remember how air power developments helped create the U.S. Air Force.

Audience: Undergraduate

3. Remember Air Force dress and appearance standards.

Audience: Undergraduate

4. Remember the fundamental customs and courtesies of the U.S. Air Force.

Audience: Undergraduate

5. Remember The Tongue & Quill (T&Q) guidance to develop and deliver a professional military briefing.

Audience: Undergraduate

6. Remember basic guidelines for writing official AF papers.

Audience: Undergraduate

7. Remember the variety of career fields available to AFROTC cadets.

Audience: Undergraduate

8. Remember the monetary benefits of service for Air Force Airmen.

Audience: Undergraduate

**A F AERO 102 – HERITAGE AND VALUES II**

1 credit.

Continuation of A F AERO 101. An introduction to the Air Force (AF), potential careers, and role of the United States Air Force today. Examine general aspects of the Department of the Air Force, AF Leadership, AF benefits, and opportunities for AF officers. Provides the foundation for becoming an Airman by outlining our heritage and values, as well as a historical perspective such as lessons on war and US military, AF operations, principles of war, and airpower. Gain a knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Remember the course material to be covered, course requirements to be met, and the opportunities and benefits available to cadets.

Audience: Undergraduate

2. Understand basic warfare as it pertains to the US military.

Audience: Undergraduate

3. Remember the importance of proper social media interactions for Air Force members.

Audience: Undergraduate

4. Remember the evolution of the Air Force, and its significance from 1947 to today.

Audience: Undergraduate

5. Understand how the principles of war and tenets of airpower contribute to warfare.

Audience: Undergraduate

6. Remember the Air Force organizational structure, its mission, and basic facts about leadership positions.

Audience: Undergraduate

7. Comprehend the Air Force's core values of integrity, service before self, and excellence in all we do and the importance of maintaining these values.

Audience: Undergraduate

8. Remember the levels of Air Force Doctrine and the types of operations providing airpower to the United States.

Audience: Undergraduate

9. Remember the mission and organization of the United States Air Force Major Commands.

Audience: Undergraduate

**A F AERO 201 – TEAM AND LEADERSHIP FUNDAMENTALS I**

1 credit.

Provides a fundamental understanding of leadership and team building. Discover the many layers to Air Force leadership, such as understanding oneself, listening to others, and being a good follower. Apply these leadership perspectives when completing team building activities and discussing topics such as Full Range Leadership, Problem Solving, and Motivation. Demonstrate basic verbal and written communication skills.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Comprehend the basics of leadership and team building.

Audience: Undergraduate

2. Comprehend the process of building and developing cohesive teams.

Audience: Undergraduate

3. Appreciate the intricacies of human resources management.

Audience: Undergraduate

4. Comprehend basic problem-solving processes

Audience: Undergraduate

5. Understand and exercise ethical decision making using examples and case studies.

Audience: Undergraduate

6. Demonstrate basic verbal and written communication skills.

Audience: Undergraduate

**A F AERO 202 – TEAM AND LEADERSHIP FUNDAMENTALS II**

1 credit.

Continuation of A F AERO 202. Provides a fundamental understanding of leadership and team building. Discover the many layers to Air Force leadership, such as understanding oneself, listening to others, and being a good follower. Apply these leadership perspectives when completing team building activities and discussing topics such as Full Range Leadership, Problem Solving, and Motivation. Demonstrate basic verbal and written communication skills.

**Requisites:** None**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Comprehend the basics of leadership and team building

Audience: Undergraduate

2. Comprehend the process of building and developing cohesive teams.

Audience: Undergraduate

3. Appreciate the intricacies of human resources management.

Audience: Undergraduate

4. Comprehend basic conflict management processes.

Audience: Undergraduate

5. Understand and exercise ethical decision-making using examples and case studies.

Audience: Undergraduate

6. Demonstrate basic verbal and written communication skills.

Audience: Undergraduate

**A F AERO 301 – LEADING PEOPLE AND EFFECTIVE COMMUNICATION I**

3 credits.

Provides a fundamental understanding of leadership. Learn about the leadership process with its complex interaction among leaders, followers and circumstances. Focus on developing intermediate to advanced verbal and written communication skills. Cadets apply knowledge in leadership laboratories and other cadet wing activities.

**Requisites:** A F AERO 202**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Understand how effective leadership can enable mission success in diverse organizations.

Audience: Undergraduate

2. Know the impact of embracing, supporting, and leading change on mission accomplishment.

Audience: Undergraduate

3. Know Leadership and Force Development Doctrine, the Air Force enlisted force structure and effective supervision techniques.

Audience: Undergraduate

4. Embrace attributes to be a leader of character, a coalition builder and a continuous learner.

Audience: Undergraduate

5. Comprehend the Code of Conduct and DoD Directive 5500.7-R, Joint Ethics Regulation.

Audience: Undergraduate

6. Apply clear and concise verbal and written communications.

Audience: Undergraduate

## **A F AERO 302 – LEADING PEOPLE AND EFFECTIVE COMMUNICATION II**

3 credits.

Continuation of A F AERO 301. Provides a fundamental understanding of leadership. Learn about the leadership process with its complex interaction among leaders, followers and circumstances. Focus on developing intermediate to advanced verbal and written communication skills. Cadets apply knowledge in leadership laboratories and other cadet wing activities. Demonstrate intermediate to advanced verbal and written communication skills.

**Requisites:** A F AERO 301

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand how leadership enables mission success in diverse and dynamic organizations.

Audience: Undergraduate

2. Comprehend how leadership, vision, goals, listening and communication enhance the mission.

Audience: Undergraduate

3. Adopt the role of an officer to enable the safety and well-being of Airmen and their families.

Audience: Undergraduate

4. Comprehend how motivation, feedback, boundaries, expectations, self-assessment and mentoring impact individual performance and subordinate development.

Audience: Undergraduate

5. Embrace the Air Force core values, heritage, and character and continuous learning attributes.

Audience: Undergraduate

6. Value proper organizational climate, media engagement and use of social media.

Audience: Undergraduate

7. Apply clear and concise verbal and written communications.

Audience: Undergraduate

## **A F AERO 401 – NATIONAL SECURITY AFFAIRS**

3 credits.

Provides a fundamental understanding of National Security Strategy and the organization of the Department of Defense. Introduces strategic-level thinking by exploring the various domains in which the Air Force operates. Discuss joint operations and the integration of air, space, land and sea forces. Demonstrate intermediate to advanced verbal and written communication skills.

**Requisites:** A F AERO 302

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Comprehend the basic elements of national security policy and process

Audience: Undergraduate

2. Comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession.

Audience: Undergraduate

3. Comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system.

Audience: Undergraduate

4. Demonstrate basic verbal and written communication skills.

Audience: Undergraduate

**A F AERO 402 – LEADERSHIP RESPONSIBILITIES & COMMISSIONING PREPARATION**

3 credits.

Prepares cadets for life as Second Lieutenants. Covers various human resources topics to prepare each future officer for mid- to upper-level management positions, including evaluation systems, supervision and counseling, and annual training requirements. Become familiar with a myriad of officer responsibilities that they will incur upon joining the Active Duty community. Demonstrate intermediate to advanced verbal and written communication skills.

**Requisites:** A F AERO 401**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Comprehend the basics of supervision and counseling

Audience: Undergraduate

2. Distinguish between professional and unprofessional relationships

Audience: Undergraduate

3. Comprehend core human resource topics and be prepared to handle issues related to suicide and sexual assault prevention, ethical decision-making, and religious accommodation

Audience: Undergraduate

4. Comprehend the Law of Armed Conflict and the military justice system

Audience: Undergraduate

5. Comprehend the Officer and Enlisted Evaluations Systems and be prepared to administer these programs as well as performance feedback, awards and decorations, and progressive discipline

Audience: Undergraduate

6. Understand the pay, allowance, leave and retirement systems

Audience: Undergraduate

7. Demonstrate basic verbal and written communication skills

Audience: Undergraduate

**A F AERO 501 – LEADERSHIP LABORATORY I**

1 credit.

Apply officer education training and serve as an orientation to Air Force procedures, leadership roles, and other topics dealing with the professional development of future Air Force Officers.

**Requisites:** Member of Air Force Reserve Officer Training Corps (AFROTC)**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Provide first-year cadets an informative and motivational program designed to recruit, retain, and familiarize cadets with the Air Force way of life and foster leadership, followership, teamwork, and esprit de corps.

Audience: Undergraduate

2. Provide cadets scheduled to attend Field Training (FT) with the mental and physical skills needed to succeed in the AFROTC FT environment

Audience: Undergraduate

3. Provide cadets returning from FT sufficient opportunities to demonstrate and develop the leadership and management skills needed to successfully function as active duty officers.

Audience: Undergraduate

4. Provide cadets to be commissioned additional opportunities to demonstrate and develop the leadership and management skills needed to successfully function as an active duty officer and to adequately prepare them to transition from the AFROTC environment to active duty.

Audience: Undergraduate

**A F AERO 502 – LEADERSHIP LABORATORY II**

1 credit.

Apply leadership training and orient to Air Force procedures, leadership roles, and other topics dealing with the professional development of future Second Lieutenants.

**Requisites:** Member of Air Force Reserve Officer Training Corps (AFROTC)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Provide first-year cadets an informative and motivational program designed to recruit, retain, and familiarize cadets with the Air Force way of life and foster leadership, followership, teamwork, and esprit de corps.

Audience: Undergraduate

2. Provide cadets scheduled to attend Field Training (FT) with the mental and physical skills needed to succeed in the AFROTC FT environment.

Audience: Undergraduate

3. Provide cadets returning from FT sufficient opportunities to demonstrate and develop the leadership and management skills needed to successfully function as active duty officers.

Audience: Undergraduate

4. Provide cadets to be commissioned additional opportunities to demonstrate and develop the leadership and management skills needed to successfully function as an active duty officer and to adequately prepare them to transition from the AFROTC environment to active duty.

Audience: Undergraduate

## AMERICAN INDIAN STUDIES (AMER IND)

**AMER IND 100 – INTRODUCTION TO AMERICAN INDIAN STUDIES**

3 credits.

Focus is history, social organization, political experience, artistic expression of North American Indians, using methods and materials from a number of disciplines as an introduction to the interdisciplinary field.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**AMER IND/AFROAMER/ASIAN AM/CHICLA/FOLKLORE 102 – INTRODUCTION TO COMPARATIVE US ETHNIC AND AMERICAN INDIAN STUDIES**

3 credits.

Introduction to comparative ethnic studies, examining race, ethnicity, and indigeneity within the United States. Includes perspectives from African American, American Indian, Asian American, and Chican@ and Latin@ studies.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the multicultural history of the United States of America and the essential role of Indigenous, African, Asian and Chicanx/e & Latinx/e peoples in the American story.

Audience: Undergraduate

2. Identify the creation, development and legacies of race-based discrimination in the United States.

Audience: Undergraduate

3. Explain the role of race in the creation of value systems in American society.

Audience: Undergraduate

4. Explore the heterogeneity and complexity within persistently marginalized groups as well as their relations to each other.

Audience: Undergraduate

5. Reflect on their learning experience so that they may develop as well-rounded, informed, and educated members of society who can effectively and successfully participate in a multicultural society.

Audience: Undergraduate

**AMER IND/LAND ARC 106 – EARTH PARTNERSHIP INDIGENOUS ARTS AND SCIENCES**

3 credits.

In collaboration with Tribal partners in Wisconsin, emphasize environmental science rooted in land stewardship and land management aligned with cultural values and Indigenous science processes. Experience the culture and ecology of a place while engaging in ecological restoration and stewardship, reflecting on relationships to the land and as global citizens. The intersection of Indigenous knowledge and Western science helps explain the need for a diversity of perspectives to respond to social and environmental justice in our changing world.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Articulate the importance of legitimizing diverse cultural perspectives and knowledge, and forming equitable relationships in a multicultural society

Audience: Undergraduate

2. Recognize Indigenous and other cultural groups' contributions to addressing environmental and social justice issues locally, regionally, and globally

Audience: Undergraduate

3. Comprehend how past traumas of colonization and racism impact communities today along with how inaccurate assumptions impact all peoples

Audience: Undergraduate

4. Apply an approach to restoration and stewardship that considers diverse perspectives and assets related to equity and inclusion

Audience: Undergraduate

5. Reflect and deepen one's understanding of the ancestral and contemporary lands of the Ho-Chunk Nation on whose land UW-Madison resides

Audience: Undergraduate

6. Experience firsthand the resiliency and self-determination of Indigenous communities in Wisconsin.

Audience: Undergraduate

7. Apply the four guiding principles of respect, responsibility, relationship, and reciprocity with the land community (including human and non-human members) through work in restoration and stewardship.

Audience: Undergraduate

8. Demonstrate understanding of Earth Partnership's 10 steps for restoration by applying appropriate steps to community-based projects and local Mound restoration efforts.

Audience: Undergraduate

**AMER IND/ENGL 172 – LITERATURES OF NATIVE AMERICA**

3 credits.

Introduction to the oral and written literatures of the peoples of native North America. An engagement with texts across historical periods, tribal groups, and regions to examine forms such as oratory, sermon, testimony, autobiography, and contemporary poetry and novels.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**AMER IND 185 – INDIGENOUS ATHLETES AND SPORTS**

3 credits.

Offers an overview of physical, competitive games, from ancient Mesoamerica to the United States today, highlighting those with Indigenous cultural and social connections. Profile Indigenous athletes competing in both team and individual sports, from schoolyards to professional competitions with a central focus on Indigenous contributions to sports in North America.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe the role of Indigenous sports in traditional culture and modern society

Audience: Undergraduate

2. Conduct entry-level research into an understudied area of Indigenous sports

Audience: Undergraduate

3. Demonstrate understanding of individual Indigenous athletes' struggles and achievements as role models, past and present

Audience: Undergraduate

4. Articulate research outcomes in both the verbal and written mediums

Audience: Undergraduate

5. Recognize and question long-held assumptions and stereotypes about Indigenous people in general and specifically in all levels of sport, including collegiate arenas

Audience: Undergraduate

6. Acquire an awareness of history's impact on the present through the study of Indigenous athletes and their sports

Audience: Undergraduate

### **AMER IND/HISTORY 190 – INTRODUCTION TO AMERICAN INDIAN HISTORY**

3-4 credits.

A broad survey of American Indian history which centers Indigenous peoples, communities, and nations in the context of U.S. policy and culture that emphasizes decolonial methods and Native ways of knowing the past.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe and explain the significance of the historical events, structures, and themes which historians have identified as foundational to the field of American Indian history.

Audience: Undergraduate

2. Deploy interdisciplinary Indigenous studies frameworks, theoretics, and methodologies in the analysis of historical events, structures, and themes to prioritize Indigenous worldviews and perspectives on American Indian history.

Audience: Undergraduate

3. Interpret the continuities and shifts in the lives of various Native peoples, communities, and nations in relation to political, cultural, and material conditions in U.S. history using terminology used within the field of American Indian history to describe processes (such as racialization) and structures (such as settler colonialism).

Audience: Undergraduate

4. Discuss tribal sovereignty and processes of racialization, which impact the historical experiences and contemporary struggles facing Native nations and peoples in the United States.

Audience: Undergraduate

5. Analyze historical sources to curate a collection that draws on both Euro-American and Native ways of knowing the past.

Audience: Undergraduate

### **AMER IND 199 – DIRECTED STUDY**

1-3 credits.

Independent study for freshmen and sophomores in collaboration with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2009

### **AMER IND 230 – INDIGENOUS RESISTANCE AND ACTIVISM**

3 credits.

Examines historic and contemporary forms of Indigenous resistance including grassroots organizing, treaty rights, language revitalization, art and media, and environmental justice from Indigenous perspectives in North America and the Pacific.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the diversity of Indigenous perspectives and worldviews predominantly within North America and the western hemisphere

Audience: Undergraduate

2. Identify historic and contemporary issues that impact Indigenous nations and communities and analyze connections between them and systems of discrimination, racism, and marginalization

Audience: Undergraduate

3. Discuss a range of responses and solutions generated by Indigenous peoples, nations, and communities to historic and contemporary issues within localized, national, and transnational contexts

Audience: Undergraduate

4. Describe and define key concepts and terms that are used within Indigenous studies, particularly as they relate to activism, community organizing, and their attendant issues

Audience: Undergraduate

### **AMER IND/ENGL 246 – LITERATURE BY AMERICAN INDIAN WOMEN**

3 credits.

Presents a broad range of literatures from diverse Native traditions and eras, to provide students with a basic knowledge of major issues affecting and best-known texts by American Indian women authors.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AMER IND 250 – INDIANS OF WISCONSIN**

3 credits.

Introduction to the various American Indian Nations within Wisconsin's borders with an emphasis on their history, culture, and sovereignty. Examines individual tribes and bands as well as common issues that affect tribal and non-tribal people in Wisconsin.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**AMER IND 301 – FIRST SEMESTER OJIBWE**

3 credits.

Introduction to the Ojibwe language, spoken and written, with emphasis on oral tradition and extensive study of grammar.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Frng Lang - 1st semester language course

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe Ojibwe language, culture, and history, and of key historical and ongoing relations with the United States.

Audience: Undergraduate

2. Read and write the Ojibwe language using the standard orthography in use in Wisconsin and Minnesota.

Audience: Undergraduate

3. Carry on basic conversation in Ojibwe (speaking and understanding) in a variety of common social situations, such as greetings and leave-takings, talking about the weather, sharing meals, and asking informational questions and giving appropriate responses.

Audience: Undergraduate

4. Recognize the basic grammar of Ojibwe as it applies to communicative functions (making statements, asking questions and giving commands), and be able to inflect (decline and conjugate) nouns and verbs in various basic functions.

Audience: Undergraduate

**AMER IND 302 – BEGINNER LEVEL OJIBWE LANGUAGE II**

3 credits.

Continuation of Ojibwe language study, with an emphasis on traditional winter cycle myths.

**Requisites:** AMER IND 301**Course Designation:** Frng Lang - 2nd semester language course Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Inflect common verb forms for transitive and intransitive verbs

Audience: Undergraduate

2. Carry on a basic conversation about various aspects of daily life; including describing weather, telling time, asking about and reporting on personal activities personal daily activities, such as cooking, eating, and going to and from places.

Audience: Undergraduate

3. Demonstrate a growing ability to learn new aspects of Ojibwe independently

Audience: Undergraduate

**AMER IND 303 – BEGINNER LEVEL INDIGENOUS LANGUAGE**

3 credits.

Gain an understanding of the grammatical and cultural features of an Indigenous language. Includes exploration of cultural practices and values through the study of oral and written narrative.

**Requisites:** None**Course Designation:** Frng Lang - 1st semester language course Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate basic knowledge of Native language, culture, and history, and of key historical and ongoing relations with the United States.

Audience: Undergraduate

2. Use the standard orthography to read and write the Native language Texts and Materials

Audience: Undergraduate

3. Engage in conversation in Native Language (speaking and understanding) in a variety of common social situations, such as greetings and leave-taking, talking about the weather, sharing meals, and asking informational questions and giving appropriate responses.

Audience: Undergraduate

4. Learn the usage of appropriate grammatical structures which include beginning-level vocabulary, and verb conjugations.

Audience: Undergraduate

**AMER IND 304 – BEGINNER LEVEL INDIGENOUS LANGUAGE II**

3 credits.

Focus on proficiency in reading, speaking, and writing of an Indigenous language. Includes exploration of cultural practices and values through the study of oral and written narrative.

**Requisites:** AMER IND 303

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Review and improve the use of grammatical structures that include advanced vocabulary, verb conjugations, and regional usage of common lexicon

Audience: Undergraduate

2. Use listening and speaking skills in multiple group activities to express opinions.

Audience: Undergraduate

3. Write descriptive and summary paragraphs with clear topic sentences and supporting detail

Audience: Undergraduate

4. Analyze reading segments on a diverse number of cultural topics.

Audience: Undergraduate

5. Engage in discussions about creative and artistic ideas.

Audience: Undergraduate

**AMER IND/ENVIR ST 306 – INDIGENOUS PEOPLES AND THE ENVIRONMENT**

3 credits.

Indigenous peoples often have very close relationships to ancestral homelands, species and natural resources. However, definitions of "indigenous" can be controversial and highly politicized. Diverse outlooks on identities, worldviews and environmental governance clarify the complex meanings of indigeneity in the US. Highlights American Indian perspectives, conservation practices, and policy environments through consideration of US and international case studies. American Indian experiences shed light on pressing issues of resource sustainability and sovereignty, and demonstrate linkages to global Indigenous environmental issues and strategies.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify diverse Indigenous experiences of and relationships to landscapes

Audience: Undergraduate

2. Recognize that American Indian and Global Indigenous identities are inextricably linked with the environment

Audience: Undergraduate

3. Analyze how American Indian and Global Indigenous histories and epistemologies have been marginalized

Audience: Undergraduate

4. Evaluate relationships between local Wisconsin and global Indigenous environmental issues

Audience: Undergraduate

5. Reflect on personal, family, and cultural identity

Audience: Undergraduate

6. Explore outside of cultural and academic comfort zones

Audience: Undergraduate

7. Practice global citizenry skills, i.e. cultural communications and protocols

Audience: Undergraduate

8. Critique American Indian stereotypes, exploring subtle versus overt racism

Audience: Undergraduate

9. Synthesize diverse approaches to addressing global environmental issues

Audience: Undergraduate

10. Demonstrate skills in articulating these concepts in multi-media formats

Audience: Undergraduate

11. Recognize contributions of indigenous perspectives and actions to environmental resource protection and management

Audience: Undergraduate

12. Articulate different perspectives on how indigenous identities are defined in academia and lived in indigenous communities

**AMER IND 308 – BEGINNER LEVEL HOOCAC/HO-CHUNK LANGUAGE**

3 credits.

Learn the sounds and writing system of the language and examine the associated grammar and vocabulary. Develop literacy and an understanding of the unique sentence and verb structures, and utilize basic introductory conversational skills currently being used among Hoocak speakers. Hoocak (Ho-Chunk, formerly referred to as the Wisconsin Winnebago) is one of the five Indigenous aboriginal languages spoken in the state of Wisconsin and part of a larger Souian language family found only in North America.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Utilize proper Orthography of the Hoocak  
Audience: Undergraduate

2. Construct proper sentences (TSOV) in conversational settings including greetings, introductions, sentence negations.

Audience: Undergraduate

3. Discuss Hoocak clans and the kinship system; converse on family relations

Audience: Undergraduate

4. Count 1-99

Audience: Undergraduate

5. Use wa'u and identify positionals correctly.

Audience: Undergraduate

6. Conjugate class 1 verbs

Audience: Undergraduate

**AMER IND 309 – BEGINNER LEVEL HOOCAC/HO-CHUNK LANGUAGE II**

3 credits.

Learn the sounds and writing system of the language and examine the associated grammar and vocabulary. Develop literacy and an understanding of the unique sentence and verb structures, and utilize basic introductory conversational skills currently being used among Hoocak speakers. Hoocak (Ho-Chunk, formerly referred to as the Wisconsin Winnebago) is one of the five Indigenous aboriginal languages spoken in the state of Wisconsin and part of a larger Souian language family found only in North America.

**Requisites:** AMER IND 308**Course Designation:** Frgn Lang - 2nd semester language course Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Speak fluidly about general statements and questions introduced in Hoocak I

Audience: Undergraduate

2. Discuss the locations of objects, use object orientation positional

Audience: Undergraduate

3. Identify and construct verb modifiers that demonstrate how an action is being done.

Audience: Undergraduate

4. Construct increasingly complex sentences with time-subject-object-verb grammar structures

Audience: Undergraduate

5. Expand vocabulary of everyday objects.

Audience: Undergraduate

6. Expand vocabulary of verbs.

Audience: Undergraduate

7. Negate sentences with accuracy

Audience: Undergraduate

8. Implement proper use of wa'u and correct positionals

Audience: Undergraduate

9. Formulate and use inflection for actor/undergoer including in inclusive and dual forms

Audience: Undergraduate

**AMER IND 310 – BEGINNER LEVEL MENOMINEE LANGUAGE**

3 credits.

Focus on proficiency in reading, speaking, and writing of the Menominee language. Includes exploration of cultural practices and values through the study of oral and written narrative.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Discuss Menominee language, culture, and history, and key historical and ongoing relations with the United States.

Audience: Undergraduate

2. Cultivate conversation in Menominee Language (speaking and understanding) in a variety of common social situations, such as greetings and leave-taking, talking about the weather, sharing meals, and asking informational questions and giving appropriate responses.

Audience: Undergraduate

3. Utilize appropriate grammatical structures which include beginning-level vocabulary, and verb conjugations.

Audience: Undergraduate

4. Use the standard orthography to read and write the Menominee language texts and materials

Audience: Undergraduate

**AMER IND 311 – BEGINNER LEVEL MENOMINEE LANGUAGE II**

3 credits.

Focus on proficiency in reading, speaking, and writing of the Menominee language. Includes exploration of cultural practices and values through the study of oral and written narrative.

**Requisites:** AMER IND 310

**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Discuss Menominee language, culture, and history, and key historical and ongoing relations with the United States

Audience: Undergraduate

2. Cultivate conversation in Menominee Language (speaking and understanding) in a variety of common social situations, such as greetings and leave-taking, talking about the weather, sharing meals, and asking informational questions and giving appropriate responses.

Audience: Undergraduate

3. Utilize appropriate grammatical structures which include beginning-level vocabulary, and verb conjugations.

Audience: Undergraduate

4. Use the standard orthography to read and write the Menominee language texts and materials

Audience: Undergraduate

**AMER IND 312 – BEGINNER LEVEL ONEIDA LANGUAGE**

3 credits.

Introduction to the morphology of Oneida at the most basic level, including the interaction with, and awareness for, Ukwewuhwehneha and an Oneida universal perspective. An emphasis on the development of a basic understanding of the syntactic structure of Ukwewuhwehneha and a base vocabulary. Includes the utilization of existing resources, becoming familiar with current best practices for endangered language learning, and building language proficiency.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Use grammatical structures that include introductory vocabulary, verb conjugations, and regional usage of common lexicon.

Audience: Undergraduate

2. Convey thoughts in discussions about creative and artistic ideas.

Audience: Undergraduate

3. Write descriptive and summary paragraphs with clear topic sentences and supporting detail.

Audience: Undergraduate

4. Use listening and speaking skills in multiple group activities to express opinions.

Audience: Undergraduate

5. Analyze reading segments on a diverse number of cultural topics.

Audience: Undergraduate

**AMER IND 313 – BEGINNER LEVEL ONEIDA LANGUAGE II**

3 credits.

Introduction to the morphology of Oneida at the most basic level, including the interaction with, and awareness for, Ukwewuhwehneha and an Oneida universal perspective. An emphasis on the development of a basic understanding of the syntactic structure of Ukwewuhwehneha and a base vocabulary. Includes the utilization of existing resources, becoming familiar with current best practices for endangered language learning, and building language proficiency.

**Requisites:** AMER IND 312**Course Designation:** Frgn Lang – 2nd semester language course

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Use grammatical structures that include introductory vocabulary, verb conjugations, and regional usage of common lexicon.

Audience: Undergraduate

2. Convey thoughts in discussions about creative and artistic ideas.

Audience: Undergraduate

3. Write descriptive and summary paragraphs with clear topic sentences and supporting detail.

Audience: Undergraduate

4. Use listening and speaking skills in multiple group activities to express opinions.

Audience: Undergraduate

5. Analyze reading segments on a diverse number of cultural topics.

Audience: Undergraduate

**AMER IND/ANTHRO 314 – INDIANS OF NORTH AMERICA**

3 credits.

Description and analysis of native cultures, and the role of environmental and historical factors in North America.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2020**AMER IND 325 – AMERICAN INDIANS IN FILM**

3 credits.

A critical examination of the portrayal of the American Indian in film, including documentaries and films made by Native filmmakers.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Outline the history of Native and Indigenous representation in American film from silent film to Hollywood to Indigenous documentaries

Audience: Undergraduate

2. Recognize and question long-held assumptions about Native America and its peoples as conveyed through the film industry

Audience: Undergraduate

3. Describe the ways historical representations impact contemporary representation and understanding of Native and Indigenous peoples in film today

Audience: Undergraduate

4. Engage with nuanced conversations and academic scholarship about representation and understanding of Native and Indigenous peoples in film today

Audience: Undergraduate

5. Apply academic research methods in discussion of Indigenous representation and participation in the American film industry

Audience: Undergraduate

### **AMER IND/CSCS 330 – AMERICAN INDIAN COMMUNITIES: SOVEREIGNTY, STRUGGLES, AND SUCCESSES**

3 credits.

Learn about contemporary Native communities, both domestically and globally, through a carefully curated selection of readings, podcasts, and videos from Indigenous scholars, community members, knowledge holders, and activists. Offers a broad historical overview of Native American communities in the United States that illustrates the historical trajectory from early colonization and dispossession through self-determination and the recognition of tribal sovereignty in action by local, state, and federal governments.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Awareness of History's Impact on the Present: Understand and identify the relationships and effects of colonial & historical trauma that shaped and continues to influence current sovereignty issues, health disparities, food inequalities, and Tribal lifeways for both rural and urban communities.

Audience: Undergraduate

2. A Consciousness of Self and Other: Explore individual implicit biases in which to construct respectful and culturally responsive self-awareness.

Audience: Undergraduate

3. Identify key ways Native communities differ from other racial/ethnic groups. Students will "unlearn" and question assumptions about Native communities in the US and reflect on their own racial/ethnic identity.

Audience: Undergraduate

4. Describe the role of sovereignty for Native American communities historically and contemporarily.

Audience: Undergraduate

5. Evaluate the impact and significance of colonization on Native communities in the US including global Indigenous populations. Students will offer a critical analysis of who has and who continues to benefit from dominant narratives of colonization.

Audience: Undergraduate

6. Apply learned knowledge to interrogate the complex systems of oppression and marginalization that Native communities continue to face.

Audience: Undergraduate

7. Compare and analyze the efforts of Native communities working to make systemic changes in their own communities and better understand the cultural perspectives of those communities.

Audience: Undergraduate

### **AMER IND/ENVIR ST 341 – INDIGENOUS ENVIRONMENTAL COMMUNICATORS**

3 credits.

Native Nations show leadership globally in addressing major environmental issues. Indigenous languages describe deep relationships with the natural world, including information on environmental stewardship - harvesting, caretaking and reciprocity. Indigenous scholars contribute crucial perspectives to conversations about human relationships to the Earth - cultural relationships to wildlife and plants, and the ethical and practical roles of humans in socio-ecological systems. Focuses on indigenous environmental scholarship, including the ongoing legacy of oral traditions, developing research, writing, and public speaking skills.

**Requisites:** Satisfied Communications A requirement and sophomore standing, or graduate/professional standing

**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Engage in protocols for learning with Tribes, including Elder epistemology and active listening

Audience: Undergraduate

2. Identify styles of indigenous environmental writing and communications from throughout the US and the world

Audience: Undergraduate

3. Summarize major theories and research findings in the field of environmental writing

Audience: Undergraduate

4. Demonstrate skills in articulating Indigenous environmental concepts in multimedia formats

Audience: Undergraduate

5. Engage in critical reading and the use of evidence

Audience: Undergraduate

6. Apply appropriate style and disciplinary conventions in writing and speaking

Audience: Undergraduate

7. Use core library resources specific to indigenous studies, environmental studies, and environmental communications

Audience: Undergraduate

8. Hone writing, public speaking, and library research skills

Audience: Undergraduate

9. Analyze how Native American and Global Indigenous histories and epistemologies have been marginalized

Audience: Undergraduate

10. Critique Native American stereotypes, exploring subtle versus overt racism

Audience: Undergraduate

11. Articulate different perspectives on how indigenous identities are defined in academia and lived in indigenous communities

Audience: Undergraduate

12. Engage in effective and respectful thinking and expression

Audience: Undergraduate

**AMER IND/ENVIR ST/GEOG 345 – CARING FOR NATURE IN NATIVE NORTH AMERICA**

3 credits.

Surveys the concepts, practices, and issues associated with caring for nature in American Indian communities.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Interpret the diverse arrangements for tribal sovereignty, indigenous land tenure, and claims to natural resources and the environment.

Audience: Undergraduate

2. Illustrate natural resource and environmental issues important to both American Indians and Wisconsin Indians.

Audience: Undergraduate

3. Identify similarities and differences between indigenous knowledge systems and Western Science.

Audience: Undergraduate

4. Discuss the marked cultural and natural diversity across native North America.

Audience: Undergraduate

5. Recall the many different conceptions of place, nature, and development in native North America.

Audience: Undergraduate

6. Describe the diversity of American Indian experiences and their varied responses to assorted histories of exclusion and marginalization.

Audience: Undergraduate

7. Demonstrate an awareness of history's impact on the present.

Audience: Undergraduate

**AMER IND/ANTHRO 354 – ARCHAEOLOGY OF WISCONSIN**

3 credits.

Introduction to the archaeological evidence for the diverse Native American cultures of Wisconsin over the past 12,000 years.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**AMER IND/ANTHRO 355 – ARCHAEOLOGY OF EASTERN NORTH AMERICA**

3 credits.

Learn about the great diversity of Native American cultures in eastern North America, with an emphasis on those of the Midwest and Southeast. More than twelve thousand years of accommodations to diverse natural and social environments are covered, starting with archaeological evidence for and oral traditions describing the initial peopling of the Americas and ending with the European invasion and interactions with the Native Americans of the Eastern Woodlands.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate a grasp of fundamental knowledge about the Native American ancient past (and aspects of the present) in eastern North America with a focus on the Southeast and Midwest, including the complexities of the deep history of Native Americans, the important and often invisible contributions of Native culture and peoples to our lives today, and the value of heritage preservation

Audience: Both Grad & Undergrad

2. Explain how archaeologists build empirical inferences about past human societies and use different theoretical perspectives to guide their interpretations

Audience: Both Grad & Undergrad

3. Build an informed and individualized perspective on the full span of Native American history in eastern North America and archaeology that might carry over into your professional life or influence your attitude toward historic preservation

Audience: Both Grad & Undergrad

4. Compare and contrast multiple perspectives on the past and present with reference to evidence

Audience: Undergraduate

5. Analyze, evaluate, and synthesize complex information learned in the class and through independent research

Audience: Graduate

6. Improve the effectiveness with which you participate in our multicultural society

Audience: Undergraduate

7. Recognize history's impact on the present

Audience: Undergraduate

8. Assess the myths, stereotypes, and assumptions about ancient and present-day Native Americans

Audience: Both Grad & Undergrad

### AMER IND/LINGUIS 371 – SURVEY OF NORTH AMERICAN INDIAN LANGUAGES

3 credits.

Overview of native languages of North America, including topics such as history, distribution, diversity, government policy, language endangerment, elaboration of cultural domains, language and worldview, speech styles, language structure (phonology, morphology, grammatical categories), performance (narrative, song), writing systems.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### AMER IND/HISTORY 380 – SOVEREIGNTY AND THE SCHOOLHOUSE

3 credits.

Introduction to the history of American Indian education. Evaluate the relationship between education and sovereignty through a survey of schools including missions, boarding schools, survival schools, tribal colleges, language nests, charter schools, and more.

**Requisites:** AMER IND 100, HISTORY/AMER IND 190, or graduate/professional standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify important concepts in the history of education and American Indian studies to understand how the past has affected present day circumstances regarding inequalities in education in Indian Country and in the U.S.

Audience: Both Grad & Undergrad

2. Evaluate theories of schooling and sovereignty through the interpretation of primary sources related to American Indian education to practice historical empathy toward the cultural perspectives and worldviews of others.

Audience: Both Grad & Undergrad

3. Craft rigorous historical arguments in the form of an original research paper on the history of an American Indian school, and question cultural assumptions and knowledge claims as they relate to race, ethnicity, and sovereignty in education.

Audience: Both Grad & Undergrad

4. Assess the foundational works in the historiography on schooling in Native lives, communities, and nations as part of the field of contemporary Indigenous Studies.

Audience: Graduate

### AMER IND 401 – INTERMEDIATE LEVEL OJIBWE LANGUAGE

3 credits.

Develop an upper intermediate level of the Ojibwe writing system and examine the associated morphology and syntactical verb structures. Develop literacy and an understanding of the unique verb-based sentence structures, and utilize conversational skills currently being used among Ojibwe speakers. Explore the relationships between the language, culture, and history of the Ojibwe people. Ojibwe is one of the five Indigenous aboriginal languages spoken in the state of Wisconsin and part of a larger Algonquian language family found only in North America. Taught primarily using the dialect of the eastern Minnesota and western Wisconsin region. Ojibwe is considered to be a severely endangered language.

**Requisites:** AMER IND 302

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use key grammatical concepts, verb conjugations, and vocabulary items as needed for basic conversations.

Audience: Undergraduate

2. Cultivate conversations within a structured environment via asking and answering questions regarding common objects from the surrounding environment.

Audience: Undergraduate

3. Present information on familiar topics using a series of simple spoken sentences, with the assistance of graphic aids.

Audience: Undergraduate

4. Develop strategies for decoding unfamiliar words using grammar concepts and existing Ojibwe language resources.

Audience: Undergraduate

5. Describe connections between Ojibwe culture and language as present in vocabulary, grammar, and storytelling and conversational norms.

Audience: Undergraduate

**AMER IND 402 – INTERMEDIATE LEVEL OJIBWE LANGUAGE II**

3 credits.

Continuation of the Ojibwe language, focusing on conversational skills.

**Requisites:** AMER IND 401**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand and use key grammatical concepts, verb conjugations, and vocabulary items as needed for basic conversations.

Audience: Undergraduate

2. Cultivate conversations within a structured environment via asking and answering questions regarding common objects from the surrounding environment.

Audience: Undergraduate

3. Present information on familiar topics using a series of simple and complex spoken sentences, with the assistance of graphic aids.

Audience: Undergraduate

4. Develop strategies for decoding unfamiliar words using grammar concepts and existing Ojibwe language resources.

Audience: Undergraduate

5. Describe connections between Ojibwe culture and language as present in vocabulary, grammar, and storytelling and conversational norms.

Audience: Undergraduate

**AMER IND 403 – INTERMEDIATE LEVEL INDIGENOUS LANGUAGE**

3 credits.

Build on elementary skills of a specific indigenous language. Advanced grammar and syntax; advanced conversation and composition; cultural background of Indigenous people speaking the language through reading of stories, histories and cultural exploration. Requires completion of AMER IND 304 in the same language.

**Requisites:** Consent of instructor**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Interpersonal communication: Participate in short conversations on a number of familiar topics using simple sentences and handle short social interactions in everyday situations by asking and answering simple questions.

Audience: Undergraduate

2. Presentational speaking: Present information on familiar topics using a series of simple spoken sentences.

Audience: Undergraduate

3. Presentational writing: Write briefly about familiar topics and present information using a series of simple sentences.

Audience: Undergraduate

4. Interpretive listening: Understand the main idea in short, simple messages and presentations on familiar topics, and understand the main idea of simple conversations.

Audience: Undergraduate

5. Interpretive reading: Understand the main idea of short and simple texts when the topic is familiar

Audience: Undergraduate

## AMER IND 404 – INTERMEDIATE LEVEL INDIGENOUS LANGUAGE II

3 credits.

Build on intermediate skills of a specific indigenous language. Increased focus on developing conversational skills. Requires completion of AMER IND 403 in the same language.

**Requisites:** Consent of instructor

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Fluently converse about everyday topics, based on the learning of short dialogues.

Audience: Undergraduate

2. Determine the meaning of every word in our readings, by using the research tool of the dictionary, and applying grammatical understanding derived from course lectures and assignments.

Audience: Undergraduate

3. Produce all basic forms for any noun or verb.

Audience: Undergraduate

## AMER IND 405 – INTERMEDIATE LEVEL HOOCAC/HO-CHUNK LANGUAGE

3 credits.

Develop literacy and an understanding of the unique sentence and verb structures and utilize basic to intermediate conversational skills currently being used among Hoocak speakers. Utilize a growing vocabulary that is appropriate for higher level conversations. Hoocak (Ho-Chunk, formerly referred to as the Wisconsin Winnebago) is one of the five Indigenous aboriginal languages spoken in the state of Wisconsin and part of a larger Souian language family found only in North America.

**Requisites:** AMER IND 309

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Engage in conversations using the Hoocak language that are fluid and organic, showing an understanding of sentence types, verb modification, and negation.

Audience: Undergraduate

2. Demonstrate listening comprehension when listening to stories told by first language speakers without needing to relisten to the recordings.

Audience: Undergraduate

3. Demonstrate language proficiency by varying sentence structures when telling/asking locations of objects and using the object orientation positional.

Audience: Undergraduate

4. Utilize appropriate vocabulary and grammar for the difficulty of conversations, including refining formulation and using the actor/undergoer and inclusive or dual forms.

Audience: Undergraduate

## AMER IND 407 – INTERMEDIATE LEVEL MENOMINEE LANGUAGE

3 credits.

Learn the sounds and writing system of the language and examine the associated morphology and syntactical verb structures. Develop literacy and an understanding of the unique verb-based polysynthetic sentence structures, and utilize basic conversational skills currently being used among Menominee speakers. Menominee is one of the five Indigenous aboriginal languages spoken in the state of Wisconsin and part of a larger Algonquian language family found only in North America. Menominee is considered to be a highly endangered language.

**Requisites:** AMER IND 311

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Engage in discussions on basic knowledge of Menominee language, culture, and history, and of key historical and ongoing relations with the United States.

Audience: Undergraduate

2. Engage in conversation in Native Language (speaking and understanding) in a variety of common social situations, such as greetings and leave-taking, talking about the weather, sharing meals, and asking informational questions and giving appropriate responses.

Audience: Undergraduate

3. Converse easily with the use of appropriate grammatical structures which include beginning and intermediate level vocabulary, and verb conjugations.

Audience: Undergraduate

4. Use the standard orthography to read and write the Native language Texts and Materials

Audience: Undergraduate

**AMER IND/GEOG 410 – CRITICAL INDIGENOUS ECOLOGICAL KNOWLEDGES**

3 credits.

Critical Indigenous Ecological Knowledges are a set of diverse understandings, responsibilities, and laws held by distinct groups of Indigenous peoples that are enacted in multiple ways across socio-political and geographical contexts. These knowledges intersect with Indigenous political sovereignties and longstanding, complex, and nuanced relationships to the more-than-human world. Learn multiple entry points to exploring and examining these knowledge sets in the context of what's for now called the U.S. and Canada to think critically about the politics of Nature, environmentalism, race, indigeneity, and colonialism both historically and in the contemporary moment. Reflect upon how critical Indigenous knowledges about ecology, environment, and government have been erased, co-opted, criminalized, and also continually practiced, reimagined, and revitalized in multiple spheres through a range of interdisciplinary, critical, and cutting-edge Native scholarships and writings.

**Requisites:** Junior standing**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2022**Learning Outcomes:** 1. Gain understandings of the diversity of Ecological Thought among Native peoples across the U.S. and Canada.

Audience: Both Grad &amp; Undergrad

2. Gain understanding of the intersections between Critical Indigenous Ecological Knowledges and Indigenous Sovereignty.

Audience: Both Grad &amp; Undergrad

3. Identify forces of colonialism that have negatively shaped access to and continuation of Ecological Knowledges in Native communities both historically and in ongoing forms.

Audience: Both Grad &amp; Undergrad

4. Identify and gain understanding of the ongoing practices of Indigenous Ecological Knowledges that have persisted against colonialism.

Audience: Both Grad &amp; Undergrad

5. Identify and gain understanding of practices of revitalization that Native peoples practice to reestablish and reimagine relationships with their knowledges, languages, and lands

Audience: Both Grad &amp; Undergrad

6. Engage and demonstrate knowledge with the latest and most cutting edge literature in the discipline of Native American and Indigenous Studies.

Audience: Graduate

7. Gain an ability to analyze and synthesize the political, philosophical, and analytical import of Native American and Indigenous Studies, especially in the context relating to Critical Indigenous Ecological Knowledges.

Audience: Graduate

**AMER IND 411 – INTERMEDIATE LEVEL ONEIDA LANGUAGE**

3 credits.

Learn the sounds and writing system of the language and examine the associated morphology and syntactical verb structures. Develop literacy and an understanding of the unique verb-based polysynthetic sentence structures, and utilize basic conversational skills currently being used among Ukwewuwehneha speakers. Ukwewuwehneha (Oneida) is one of the five Indigenous aboriginal languages spoken in the state of Wisconsin and part of a larger Iroquoian language family found only in North America. Ukwewuwehneha is considered to be a critically endangered language.

**Requisites:** AMER IND 313**Course Designation:** Frgn Lang – 3rd semester language course Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Discuss insights into Ukwewuwehneha and an Oneida universal perspective.

Audience: Undergraduate

2. Converse using the syntactic structure of Ukwewuwehneha, including using basic vocabulary correctly.

Audience: Undergraduate

3. Utilize existing resources and implement current best practices for endangered language learning.

Audience: Undergraduate

**AMER IND 425 – SPECIAL TOPICS IN AMERICAN INDIAN STUDIES**

3 credits.

Special focus on American Indian thought and perspectives on subjects in the arts and sciences.

**Requisites:** Sophomore standing**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Articulate and apply the key principles related to the Special Topic

Audience: Both Grad &amp; Undergrad

2. Understand the historical and contemporary events and circumstances which impact the Special Topic

Audience: Both Grad &amp; Undergrad

3. Critically examine the impact of key dynamics related to the Special Topic on society.

Audience: Both Grad &amp; Undergrad

**AMER IND/ANTHRO/FOLKLORE/GEN&WS 437 – AMERICAN INDIAN WOMEN**

3 credits.

Examines and interprets the roles of American Indian women in traditional societies, and in contemporary North America.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**AMER IND 450 – ISSUES IN AMERICAN INDIAN STUDIES**

3 credits.

Special focus on American Indian thought and perspectives on subjects in the arts and sciences.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate and apply the key principles related to the Special Topic

Audience: Both Grad & Undergrad

2. Understand the historical and contemporary circumstances which impact the Special Topic

Audience: Both Grad & Undergrad

3. Critically examine the impact of key dynamics related to the Special Topic on society.

Audience: Both Grad & Undergrad

**AMER IND/ANTHRO/BOTANY 474 – ETHNOBOTANY**

3-4 credits.

Study of the interactions between human cultures and plants. Topics include: traditional resource management and agriculture; crop domestication, evolution, and conservation; archaeobotany; indigenous knowledge; folk taxonomy; plants in symbolism and religion; dietary patterns; phytochemistry; global movement of plants and peoples.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Biological Science or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**AMER IND/C&E SOC/SOC 578 – POVERTY AND PLACE**

3 credits.

The allocation of economic and social rewards in the United States; emphasis on persistently poor regions and communities; analysis of selected minority groups and their poverty statuses; poverty programs and their consequences for structural and cultural changes.

**Requisites:** SOC/C&E SOC 140, 210, 211, or SOC 181

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**AMER IND/SOC WORK 636 – SOCIAL WORK IN AMERICAN INDIAN COMMUNITIES: THE INDIAN CHILD WELFARE ACT**

3 credits.

The role of social workers and social services in American Indian and tribal communities, particularly compliance with the Indian Child Welfare Act. Historical context includes land removal and loss, the boarding school and adoption eras, and social determinants of health including the impacts of historical and intergenerational trauma.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage diversity and difference in practice

Audience: Graduate

2. Advance Human Rights and Social, Economic, and Environmental Justice

Audience: Graduate

3. Engage in Policy Practice

Audience: Graduate

4. Engage with Individuals, Families, Groups, Organizations, and Communities

Audience: Graduate

5. Assess Individuals, Families, Groups, Organizations, and Communities

Audience: Graduate

6. Intervene with Individuals, Families, Groups, Organizations and Communities

Audience: Graduate

7. Evaluate Practice with Individuals, Families, Groups, Organizations and Communities

Audience: Graduate

8. Demonstrate awareness of the history of American Indian Tribes, including historical and intergenerational trauma and the impact on the Present experience of American Indians.

Audience: Undergraduate

9. Demonstrate the ability to recognize and question assumptions regarding American Indian Tribes and people.

Audience: Undergraduate

10. Apply knowledge learned in this course to practice in a multicultural society

Audience: Undergraduate

**AMER IND 699 – DIRECTED STUDY**

1-3 credits.

Independent study for junior, senior and graduate students in collaboration with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

# ANATOMY & PHYSIOLOGY (ANAT&PHY)

## ANAT&PHY 235 – HUMAN PHYSIOLOGY AND HEALTH

4 credits.

Learn basic physiological concepts, apply them to understand human health and disease, and link them to broader core concepts in biology. Complete a project that applies conceptual understanding of general biology and physiology to investigate and create informational materials for the public about a disease or health promotion strategy. The foundational knowledge covered serves those interested in health sciences majors, as well as non-science students interested in life-long health.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate basic knowledge of the function of human organ systems

Audience: Undergraduate

2. Demonstrate knowledge of biology core concepts and use them to contextualize and understand physiological processes and organ system function in humans

Audience: Undergraduate

3. Define the components of physiological feedback systems and explain the fundamental role that feedback systems play in regulating physiological processes

Audience: Undergraduate

4. Apply knowledge of organ systems and their regulation to explain the integration of functions across systems at the organismal level – homeostasis

Audience: Undergraduate

5. Apply knowledge of human physiology to understand the human condition in health and disease

Audience: Undergraduate

6. Demonstrate ability to critically read and apply scientific information in daily life

Audience: Undergraduate

## ANAT&PHY 335 – PHYSIOLOGY

5 credits.

Core concepts in human physiology from cells to organ-systems via online lectures and active learning activities including laboratory experiments. Topics include homeostasis, membrane transport, cellular physiology, regulation of metabolism, and functions of the nervous, endocrine, muscular, reproductive, cardiovascular, respiratory, renal, and gastrointestinal system.

**Requisites:** Sophomore standing, (ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153 or BIOCORE 381) and (CHEM 103, 108, 109 or 115), or graduate/professional standing. Not open to students with credit for PHYSIOL 435 or ANAT&PHY 435

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of the basic functions of the major human organ systems, from the cellular level to the whole organism.

Audience: Undergraduate

2. Describe why homeostasis is a central theme of physiology and how it relates to the function of each human organ system.

Audience: Undergraduate

3. Integrate knowledge of how organ systems interact to regulate physiological processes in order to maintain homeostasis.

Audience: Undergraduate

4. Apply knowledge of physiology to predict outcomes, and justify those predictions, when homeostasis is not maintained due to disease or experimental manipulation.

Audience: Undergraduate

5. Develop critical and scientific thinking skills through the application of physiology knowledge in preparation for real-world situations and further educational settings.

Audience: Undergraduate

6. Demonstrate effective collaboration and communicate with peers to achieve shared outcomes.

Audience: Undergraduate

**ANAT&PHY 337 – HUMAN ANATOMY**

3 credits.

Uses a regional approach to provide a foundation of knowledge in human anatomy. Units cover an introduction to anatomical systems; back and limbs; thorax, abdomen, and pelvis; and head and neck.

**Requisites:** Not open to first-year freshman students

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate a thorough understanding of the anatomy of the human body

Audience: Undergraduate

2. Explain how structure governs function in the human body

Audience: Undergraduate

3. Describe how systems work together in normal function

Audience: Undergraduate

4. Discuss how anatomy can contribute to dysfunction or pathology

Audience: Undergraduate

5. Use anatomical terminology when discussing the human body

Audience: Undergraduate

6. Describe key transformative features occurring in the human body throughout the lifespan

Audience: Undergraduate

7. Apply anatomical knowledge to reason through clinical scenarios

Audience: Undergraduate

**ANAT&PHY 338 – HUMAN ANATOMY LABORATORY**

2 credits.

Takes a regional approach to cover the gross anatomy of the human body in four units: introduction to anatomical systems; back and limbs; thorax, abdomen, and pelvis; and head and neck. A variety of tools, including interactive software, models, and specimens, will be used.

**Requisites:** ANAT&PHY 337 (KINES 337 before fall 2018), or KINES 328, or concurrent enrollment

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify key structures of the human body, including muscles, organs, and bones, and their characteristics

Audience: Undergraduate

2. Explain how structure governs function

Audience: Undergraduate

3. Recognize how structures work together in normal function

Audience: Undergraduate

4. Use anatomical terminology in communication with others in the health field

Audience: Undergraduate

5. Apply anatomical knowledge and identification skills in preparation for practice as a clinician in a variety of health fields

Audience: Undergraduate

**ANAT&PHY 399 – INDEPENDENT STUDY**

1-3 credits.

Individual work in the fields of anatomy and/or physiology offers the opportunity to participate in more in-depth study (beginning to intermediate level) under the direct guidance of anatomy and/or physiology faculty.

**Requisites:** Consent of instructor

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Express basic knowledge of content, analyze related data and apply knowledge in a variety of academic settings.

Audience: Undergraduate

**ANAT&PHY 435 – FUNDAMENTALS OF HUMAN PHYSIOLOGY**

5 credits.

Explores the major organ systems including nervous, endocrine, muscular, cardiovascular, renal, and gastrointestinal. The main learning objective is an understanding of the cellular and molecular mechanisms through which homeostasis is integrated and maintained. Not open to students with credit for PHYSIOL 335 or 435 prior to fall 2018 or ANAT&PHY 335

**Requisites:** Junior standing, (ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 381), (CHEM 103, 108, 109, or 115) and (PHYSICS 103, 201, or 207) or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and illustrate the physiological mechanisms within a human body

Audience: Undergraduate

2. Explain how the organs and their functional units work together as a system within the human body

Audience: Undergraduate

3. Explain how human homeostasis is maintained by a contribution from each organ system and understand what has gone wrong in the illustrative pathophysiological situations

Audience: Undergraduate

**ANAT&PHY 699 – INDEPENDENT STUDY**

1-3 credits.

Individual work in the fields of anatomy and/or physiology will offer the opportunity to participate in more in-depth study (advanced level) under the direct guidance of anatomy and/or physiology faculty.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Express advanced knowledge of content, analyze related data and apply knowledge in a variety of academic settings.

Audience: Undergraduate

**ANATOMY (ANATOMY)****ANATOMY 622 – HUMAN ANATOMY FOR PHYSICAL AND OCCUPATIONAL THERAPY STUDENTS**

6 credits.

Dissection-based gross human anatomy relevant with a physical and occupational therapy focus. Special emphasis is placed on the musculoskeletal and peripheral nervous systems, and living subject and surface anatomy.

**Requisites:** Declared in Doctor of Physical Therapy Program or Occupational Therapy OTD Program

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Acquire foundational knowledge of anatomy, with an emphasis on the musculoskeletal and peripheral nervous systems.

Audience: Graduate

2. Develop spatial reasoning skills in the anatomy lab.

Audience: Graduate

3. Explore structure-function relationships and their clinical implications.

Audience: Graduate

4. Develop clinical reasoning skills by solving anatomically-based clinical problems.

Audience: Graduate

5. Develop team-based professional skills.

Audience: Graduate

### ANATOMY 699 – INDEPENDENT STUDY

1-4 credits.

Directed study projects as arranged with instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2019

**Learning Outcomes:** 1. Define learning objectives for an independent, dissection-based anatomy project.

Audience: Undergraduate

2. Create a detailed dissection of a specific anatomical region or structure.

Audience: Undergraduate

3. Design and construct an individual project integrating anatomy, histology, embryology, and neuroanatomy with a relevant clinical condition.

Audience: Undergraduate

## ANESTHESIOLOGY (ANESTHES)

### ANESTHES 699 – INDEPENDENT STUDY

0-5 credits.

Independent study projects as arranged with faculty or instructional staff.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

### ANESTHES 910 – INDEPENDENT READING & RESEARCH IN ANESTHESIOLOGY

1-4 credits.

Independent research under the direct supervision of Anesthesiology Faculty. Each student's research project is individualized to meet student research goals within the context of the faculty research needs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research

Audience: Graduate

2. Conduct a thorough literature review as it pertains to the specific scholarly project

Audience: Graduate

3. Select and apply, and/or understand statistical methodologies as appropriate for the proposed scholarly project

Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review

Audience: Graduate

**ANESTHES 911 – THE SHOCK COURSE**

2 credits.

Early recognition and aggressive management of shock states is one of the most challenging and rewarding patient care experiences. If done well the patient impact is incredible and lives can be saved. Integrate detailed physiologic understanding of shock states and shock evaluation - including echocardiography - with the pharmacology of shock management to develop a practical approach to patient care. Echocardiography training will emphasize obtaining views, recognizing anatomy and appreciating biventricular function as a method to differentiate shock states and select an appropriate treatment plan. The in-depth science of the course will be supplemented by clinical experiences focusing on shock evaluation and management in the cardiothoracic critical care unit, medical intensive care unit and, when possible, with cardiac anesthesiology enabling the student to develop a practical bedside approach to the evaluation and management of shock.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Describe the autonomic nervous system innervation and receptor function (alpha-1, alpha-2, beta-1, beta-2, dopamine (1 and 2). Describe the receptor function for the vasopressin and angiotensin systems.

Audience: Graduate

2. Describe the pharmacology of available vasoactive drugs and drips including vasoconstrictors, vasodilators and inotropes. Describe the resulting changes in hemodynamics when each drug is given.

Audience: Graduate

3. Define the term "shock".

Audience: Graduate

4. Describe the relevant goal directed, limited physical examination for a patient in "shock". Describe echo findings for varied shock states.

Audience: Graduate

5. Describe the invasive and non-invasive monitors we use to evaluate patients with shock. Understand how shock states will change the monitor results (e.g. cardiogenic shock may decrease pulse pressure on an arterial line by decreasing stroke volume; severe acute hemorrhagic shock will yield tachycardia, low stroke volume and low CVP).

Audience: Graduate

6. Describe which vasoactive to select for a given physical examination, or echocardiographic finding, and be able to describe in words or write the rationale for that medication or combination of medications.

Audience: Graduate

7. Independently obtain views for a limited point of care transthoracic echocardiogram and for pleural ultrasound

Audience: Graduate

8. Recognize anatomy on transesophageal echocardiography (TEE).

Audience: Graduate

9. Recognize basic anatomy for each view for both transthoracic echocardiogram (TTE) and TEE.

Audience: Graduate

10. Recognize shock states including hypovolemic, hyperdynamic, cor pulmonale, cardiogenic shock, obstructive shock (AS, MS, pulmonary embolism).

**ANESTHES 919 – INDIVIDUALIZED ANESTHESIOLOGY CLINICAL ELECTIVE**

2-4 credits.

In-depth exposure to inpatient and outpatient anesthesiology as well as sub-specialty anesthesiology, working under the direct supervision of Anesthesiology faculty, residents, fellows and advanced practice providers. Each student's schedule is individualized to meet each location's capacity and student preference.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform an anesthesiologically-relevant history and physical exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Correctly interpret imaging and laboratory findings and communicate results to team members

Audience: Graduate

5. Develop and present effective anesthetic plans

Audience: Graduate

6. Review, interpret, and present current literature to support patient care

Audience: Graduate

7. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

8. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

9. Avoid medical jargon when communicating with patients and families

Audience: Graduate

10. Recognize limitations and seek assistance as appropriate

Audience: Graduate

11. Recognize perioperative conditions that determine patient level of care and interpret physiologic changes that require changing that level of care

Audience: Graduate

12. Perform minor procedures with supervision

Audience: Graduate

13. Demonstrate the ability to manage time and understand, access, and utilize the resources and systems necessary to provide optimal patient care

Audience: Graduate

**ANESTHES 920 – CLINICAL ANESTHESIOLOGY ELECTIVE**

2-4 credits.

Supervised by house staff, clinical anesthetists and attending physicians. Activities include: pre-operative chart review and anesthetic plan proposal, participating in scheduled procedures, presenting cases and teaching topics, and discussing patient cases. Evaluate and learn to co-manage the full spectrum of inpatient and ambulatory anesthesia patients. Care for patients undergoing sedation, monitored anesthesia care, general and regional anesthesia. Learn the indications for and data provided by various invasive and non-invasive monitoring techniques. Become familiar with relevant pharmacology including, anesthetic agents, muscle relaxants, resuscitation drugs and pain medications. Learn fundamental airway management skills including bag-mask ventilation, supraglottic airway placement, and endotracheal intubation skills. Intravenous access technique practice is taught, including a central line placement course.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the initial steps of resuscitation, including IV access, central venous access, and airway management.

Audience: Graduate

2. Explain the anatomy, physiology, and pharmacology relevant to anesthetic induction, maintenance, and emergence.

Audience: Graduate

3. Perform pre-operative airway examination; identify airway anatomy and structures, including innervation and rationale for/approach to awake intubation.

Audience: Graduate

4. Identify medical conditions that affect anesthetic risk by organ system and describe the role of medical management of these conditions.

Audience: Graduate

5. Propose comprehensive anesthetic plans for surgery or procedures to resident and attending physician mentors.

Audience: Graduate

6. Demonstrate effective, respectful communication with patients, faculty, and staff to provide high-level patient care.

Audience: Graduate

7. Incorporate feedback regarding technical skill and clinical performance into improved clinical skill technique and patient care.

Audience: Graduate

8. Interpret the medical literature and apply it to the practice of evidence-based medicine.

Audience: Graduate

9. Interpret basic Transesophageal Echocardiogram, (TEE) images.

Audience: Graduate

**ANESTHES 922 – CARDIOTHORACIC INTENSIVE CARE UNIT CLINICAL ANESTHESIA ELECTIVE**

2-4 credits.

Participate in the care of critically ill patients assigned to the Cardiothoracic Intensive Care Unit (CITCU) critical care team. Includes post-surgical patients who have undergone coronary artery bypass grafting, cardiac valvular procedures, ventricular assist device placements, cardiac transplantation and lung transplantation. May include patients with significant cardiothoracic surgical history (e.g. patients who have a ventricular assist device or who had prior lung transplantation) who are admitted for "medical" reasons including sepsis or shock of varying etiologies. As part of the CITCU team, participate in management of patients requiring venovenous and venoatrial extracorporeal membrane oxygenator (ECMO) support. The students are supervised by residents (house staff), fellows (largely in critical care anesthesiology, occasionally in pulmonology critical care) and attending physicians.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define shock and list the categories of Shock

Audience: Graduate

2. Describe the clinical presentation of all forms of shock including hypovolemic under resuscitated hemorrhagic cardiogenic or valvular left ventricle and right ventricle etiologies vasoplegic and mixed shock states

Audience: Graduate

3. Describe a goal orientated physical examination for a patient in shock

Audience: Graduate

4. Diagnose a patient's shock state with the use of physical examination and advanced monitors including arterial lines pulmonary arterial catheters central venous pressure and echocardiography

Audience: Graduate

5. Develop a management plan for a patient's shock state by appropriate use avoidance of fluids pressors vasodilators and inotropes of varying combinations

Audience: Graduate

6. Describe the different valvular cardiomyopathies and describe the hemodynamic goals for these clinical states in the precorrection and post correction states

Audience: Graduate

7. Describe lung protective ventilation

Audience: Graduate

8. Describe how optimal PEEP is determined at the bedside

Audience: Graduate

9. Assess for ventilator synchrony and compliance

Audience: Graduate

10. Describe ventilator modes and breath delivery for the following: pressure regulated volume control pressure control assist control volume control assist control synchronized intermittent mechanical ventilation and pressure support

Audience: Graduate

11. Adjust ventilator settings to improve synchrony or the acid base status of a patient

Audience: Graduate

**ANESTHES 930 – RESUSCITATION ANESTHESIOLOGY ELECTIVE**

1 credit.

An expanded version of the American Heart Association's Advanced Cardiac Life Support (ACLS) course designed to provide the necessary knowledge and skills to manage the first minutes of a cardiorespiratory emergency using ACLS protocols. Opportunities to learn the proper management of the ten core cases (i.e. Asystole, Bradycardia, Tachycardia, etc.) in the three rescuer roles: lone rescuer; resuscitation team member; and resuscitation team leader. Learn essential resuscitation skills including: recognition of cardiac arrest rhythms and common bradycardias and tachycardias; proper use of conventional and automated external defibrillators (AED); use of transcutaneous pacing devices; advanced airway management; administration of drugs via intravenous and endotracheal routes; recognition of the 12-lead electrocardiogram signs of acute injury and ischemia; adult CPR.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Manage a code with confidence

Audience: Graduate

2. Describe the physiology of cardiac arrest

Audience: Graduate

3. Ability to perform advanced CPR

Audience: Graduate

4. Practice team leader skills and utilize them not only in a code, but in other high acuity settings

Audience: Graduate

5. Successfully complete the AHA ACLS course

Audience: Graduate

6. Define systems of care

Audience: Graduate

**ANESTHES 940 – INTEGRATED ELECTIVE IN PAIN MANAGEMENT**

2 credits.

Direct supervision by residents, fellows, and attending physicians in Anesthesiology, Neurology, and Palliative Care departments, including but not limited to the Acute Pain Service, Regional Anesthesia service, Chronic Pain Service, Chronic Pain Clinic, Headache Clinic, Carbone Cancer Center, and Madison Surgery Center. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, interviewing clinic patients, participating in scheduled procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Distinguish between acute pain as a symptom indicating actual or potential tissue damage, and while chronic pain, that has no physiological function.

Audience: Graduate

2. Describe the pathophysiological effects of poorly controlled acute pain.

Audience: Graduate

3. Discuss the epidemiology and risk factors for developing chronic pain.

Audience: Graduate

4. Demonstrate ability to assess pain and its impact on function, mood and QOL including in adults and children.

Audience: Graduate

5. Describe differences in treatment approaches for acute and chronic pain.

Audience: Graduate

6. Discuss causes, clinical presentation and treatment of common chronic pain disorders, e.g. low back pain, fibromyalgia, osteoarthritis, CRPS, headaches, and neuropathy.

Audience: Graduate

7. Describe the prevalence of pain in cancer and palliative care settings, mechanisms of pain, evaluation and treatment approaches.

Audience: Graduate

8. Describe evidence for use of different drugs, including opiod analgesics in acute and chronic pain treatments

Audience: Graduate

9. Describe evidence for use of non-pharmacological approaches (rehabilitation treatments and behavior psychology) in acute and chronic pain treatments

Audience: Graduate

10. Describe evidence for interventional approaches (regional anesthetic blocks, spinal injections, nerve and joint injections) in pain management.

Audience: Graduate

## ANIMAL SCIENCES (AN SCI)

### AN SCI 1 – COOPERATIVE EDUCATION/CO-OP IN ANIMAL SCIENCES

1 credit.

Full-time off-campus work experience which combines classroom theory with practical knowledge of operations to provide a background upon which to base a professional career. Students receive credit only for the term in which they are actively enrolled and working. The same work experience may not count toward credit in another course.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### AN SCI/DY SCI 101 – INTRODUCTION TO ANIMAL SCIENCES

3 credits.

An overview of animal sciences covering anatomy, physiology, nutrition, reproduction, genetics, management, animal welfare, and behavior of domesticated animals. Food animals are emphasized to discuss their contributions to humans.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate a uniform background of animal agriculture including animal growth, nutrition, reproduction, behavior, and breeds to facilitate learning in subsequent animal science courses

Audience: Undergraduate

2. Accurately use terminology associated with animal agriculture including but not limited to animals, management practices, industry, and equipment

Audience: Undergraduate

3. Identify major animal groups and breeds in the topic areas of companion, service, draft, food, and biomedical, their uses, and their care

Audience: Undergraduate

4. Critically analyze past, current, and future controversial issues in animal agriculture and demonstrate capacity for ethical reasoning and action

Audience: Undergraduate

5. Situate common contemporary animal production systems within the context of economic, social, and environmental sustainability

Audience: Undergraduate

6. Characterize the impacts of animal agriculture at global, national, regional, and local levels

Audience: Undergraduate

### AN SCI/DY SCI 102 – INTRODUCTION TO ANIMAL SCIENCES LABORATORY

1 credit.

Hands-on experience and demonstrations to develop practical skills with animals and to better understand the application of science to food production animals. It covers anatomy, physiology, nutrition, reproduction, genetics, management, animal welfare, and behavior of domesticated animals.

**Requisites:** DY SCI/AN SCI 101 or concurrent enrollment

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recall and summarize fundamental concepts in animal growth, nutrition, reproduction, and behavior to facilitate learning in subsequent animal science courses

Audience: Undergraduate

2. Accurately use terminology associated with animal agriculture including but not limited to animals, management practices, industry, and equipment

Audience: Undergraduate

3. Demonstrate proper handling, restraint, care, and management of food animals

Audience: Undergraduate

4. Identify anatomical parts of animal gastrointestinal and reproductive tracts, and explain the key functions of each part

Audience: Undergraduate

5. Classify common feedstuff and nutritional analysis used in the livestock industry

Audience: Undergraduate

6. Effectively engage in collaborative problem-solving and reflective practice

Audience: Undergraduate

7. Interpret and discuss scientific literature

Audience: Undergraduate

### **AN SCI 135 – GRAND CHALLENGES AND CAREER OPPORTUNITIES IN ANIMAL AND DAIRY SCIENCES**

1 credit.

Covers the current key challenges and opportunities in the broad fields of animal agriculture, animal biology, animal health, and veterinary medicine, as well as internship and career opportunities and professional development activities that will maximize the value of an undergraduate career at UW-Madison and provide preparation for post-graduation endeavors.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the Grand Challenges in our broad field, including Animal Health and Welfare, Food Safety, Land and Water Stewardship, Precision Livestock Farming, and Biomedical Advancements  
Audience: Undergraduate

2. Identify animal-related faculty and coursework, and create plans for courses and co-curricular opportunities that support your degree and future goals  
Audience: Undergraduate

3. Describe common independent and experiential learning opportunities, including undergraduate research, internships, study abroad, international study tours, intercollegiate competitions, and related activities  
Audience: Undergraduate

4. Identify internships, graduate and professional programs, and career opportunities in the public, private, and non-profit sectors related to animal agriculture, animal biology, animal health, veterinary medicine, and related fields  
Audience: Undergraduate

5. Develop professional skills that will help undergraduate students succeed in future endeavors, including preparing a resume, writing a cover letter, building a professional network, finding an internship, having a successful interview, and maximizing the job or internship experience  
Audience: Undergraduate

### **AN SCI 140 – INTRODUCTION TO POULTRY: FROM BACKYARD CHICKENS TO COMMERCIAL PRODUCTION**

1 credit.

Overview of poultry science and production. Topics include anatomy and physiology, nutrition, health, reproduction, genetics, egg and meat quality, and management. Includes information on poultry flocks of various sizes and purposes, from hobby flocks to commercial production.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe common methods of poultry production and management.

Audience: Undergraduate

2. Explain basic biological aspects of poultry, including health, nutrition, and reproduction.  
Audience: Undergraduate

3. Discuss the organization and structure of the poultry industry.  
Audience: Undergraduate

4. Identify measures of quality in poultry and egg products.  
Audience: Undergraduate

**AN SCI 200 – THE BIOLOGY AND APPRECIATION OF COMPANION ANIMALS**

3 credits.

A systematic coverage of many of the animals (including birds) that humans keep as their social companions. The classification, nutritional requirements, environmental considerations, reproductive habits, health, legal aspects and economics of companion animals and their supportive organizations.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize a broad range of types of companion animals and identify some unique characteristics of each

Audience: Undergraduate

2. Characterize the basic biology of most companion animals, including health, nutrition, reproduction, etc

Audience: Undergraduate

3. Summarize the basic requirements of care and husbandry for a variety of companion animals

Audience: Undergraduate

4. Identify differences in the biology and requirements of various types of companion animals.

Audience: Undergraduate

5. Identify current topics regarding companion animals.

Audience: Undergraduate

6. Characterize some ethical issues associated with animal ownership, care, and use.

Audience: Undergraduate

**AN SCI 210 – YOU AND YOUR FOOD: FARM TO TABLE**

2 credits.

Develop an understanding of the global food supply from farm to table by exploring ruminant animals, non-ruminant animals including insects, and selected agricultural materials. Topics such as the following will be discussed: land usage, environmental impacts from different feeding operations, utilization of food waste, and health risks associated with food consumption.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss topics related to agriculture and food manufacturing

Audience: Undergraduate

2. Identify unique aspects of ruminant animals that turn inedible plants and byproducts into human edible food with unique nutritional attributes

Audience: Undergraduate

3. Describe the role of side-stream utilization and circular economy of food production.

Audience: Undergraduate

4. Explain the role of alternative feedstuffs for animals in having a resilient food supply

Audience: Undergraduate

5. Describe how animal tissues are converted to protein-rich ingredients uniquely enriched in 'bioactive' molecules

Audience: Undergraduate

6. Describe how stabilization steps (a process or additive) convert protein-rich raw materials to food products, providing a diverse food supply

Audience: Undergraduate

7. Evaluate the tension between extending shelf life to limit food waste and health concerns from utilizing certain ingredients

Audience: Undergraduate

**AN SCI 240 – ANCIENT ANIMALS AND PEOPLES**

3 credits.

Provides an introduction to human and animal relationships from prehistory to the present. Examines how animals have influenced social and economic structures of past societies, with a focus on the advent of domestication. Explores the cultural and economic changes that domestication has had on human societies, as well as the behavioral, genetic, and morphological changes that this process had on once wild animals. Emphasizes the methods used to retrace human-animal interactions, drawing on cross-cultural examples from anthropology, ethnozoology, archaeology, history, and genetics.

**Requisites:** None**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2022**Learning Outcomes:** 1. Develop skills in searching for and identifying literature using online and library resources, and gain familiarity with citing and referencing different source types.

Audience: Undergraduate

2. Synthesize scholarly articles in the areas of animal science, archaeology, biology, and history.

Audience: Undergraduate

3. Understand animal-human interactions from a global and historical perspective.

Audience: Undergraduate

4. Evaluate the archaeological, historical, and genetic lines of evidence used to generate hypothesis on past animal-human interactions.

Audience: Undergraduate

5. Develop a general chronology of the history of animal husbandry, livestock, and pet keeping around the world.

Audience: Undergraduate

6. Analyze the process of artificial selection and the different pathways to domestication (commensal, prey, or directed).

Audience: Undergraduate

7. Differentiate domesticated from tamed from feral and identify the behavioral and biological characteristics which makes certain animal favorable to domestication.

Audience: Undergraduate

8. Apply course material to evaluate the role of past animal interactions on contemporary issues in conservation and food security.

Audience: Undergraduate

**AN SCI 245 – ANIMAL WELFARE**

3 credits.

Explores animal welfare topics from the animal's perspective. Analyzes contemporary welfare issues and policies based on our scientific understanding of the experiences of animals. Emphasizes farmed animals, but also draws on examples from zoo, lab, and companion animals.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Discuss the scientific process as applied to animal welfare

Audience: Undergraduate

2. Apply scientific concepts to analyze contemporary animal welfare issues

Audience: Undergraduate

3. Identify situations that may compromise welfare in diverse species and contexts

Audience: Undergraduate

4. Interpret scientific literature to evaluate animal welfare assurance programs

Audience: Undergraduate

5. Articulate concepts of animal welfare in oral and written format

Audience: Undergraduate

**AN SCI 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Honors research work under direct guidance of a faculty member in an area of Animal Sciences. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor**Course Designation:** Honors – Honors Only Courses (H)**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2007**Learning Outcomes:** 1. Demonstrate content knowledge and skills as signified in an honors project or scholarly honors work.

Audience: Undergraduate

2. Articulate their honors experience to peers.

Audience: Undergraduate

3. Apply perspectives to composed work through engagement in academic experiences.

Audience: Undergraduate

**AN SCI 299 – INDEPENDENT STUDY**

1-3 credits.

Individual introductory to intermediate work under direct guidance of a faculty member in an area of Animal Sciences. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Summarize intellectual growth associated with independent study work through mentor discussion.

Audience: Undergraduate

2. Identify diversity of viewpoints through critical thinking.

Audience: Undergraduate

3. Illustrate growth in reading, writing, and communication skills..

Audience: Undergraduate

**AN SCI/FOOD SCI 305 – INTRODUCTION TO MEAT SCIENCE AND TECHNOLOGY**

4 credits.

Application of biological, technological, and economical principles to muscle and related tissue utilized for food.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 152 or ZOOLOGY/BIOLOGY 101 and 102) and (CHEM 103, 109, or 115) or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss the nutritional value of fresh and processed meats in addition to addressing diet/health issues and food safety of these products

Audience: Both Grad & Undergrad

2. Describe the processes associated with animal harvest and explain the differences among different livestock species

Audience: Both Grad & Undergrad

3. Demonstrate where carcass fabrication cuts are made to produce the major carcass primal cuts and the ability to separate out and identify major muscles of economic importance

Audience: Both Grad & Undergrad

4. Describe how the biochemical properties of meat proteins relate to muscle function

Audience: Both Grad & Undergrad

5. Explain of the chemical and physical properties of fresh meat and how these properties can be evaluated and analyzed

Audience: Both Grad & Undergrad

6. Collect carcass data and determine USDA quality and yield grades

Audience: Both Grad & Undergrad

7. Calculate the appropriate amounts of non-meat ingredients and explain the applicable manufacturing procedures to produce various types of processed meats including whole muscle products and finely comminuted sausages

Audience: Both Grad & Undergrad

8. Explain how an understanding of muscle microstructure ultrastructure, and changes in postmortem biochemistry can be used to predict ultimate meat quality characteristics

Audience: Graduate

### AN SCI/DY SCI/NUTR SCI 311 – COMPARATIVE ANIMAL NUTRITION

3 credits.

Nutrients and their assimilation, function, and interactions that affect metabolism in mammals. Differences among species will be used to emphasize unique digestive and physiological functions and how these differences affect metabolism of nutrients. Humans will be used in some comparisons. Follows physiological progression of nutrients, starting with an overview of the digestive tract followed by water and builds on specific roles of nutrients and substrates needed to provide basic processes required for maintenance, tissue accretion, and homeostatic regulation of nutrients.

**Requisites:** CHEM 341, 343, (BIOCHEM 301 or concurrent enrollment), or (BIOCHEM 501 or concurrent enrollment)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recall and summarize the cellular, tissue, and whole-body metabolism and function of nutrients

Audience: Undergraduate

2. Identify key elements of digestive anatomy that enable digestion and absorption of consumed nutrients

Audience: Undergraduate

3. Explain the physiological processes required for assimilation of consumed macro- and micro-nutrients

Audience: Undergraduate

4. Compare the similarities and differences in nutritional and metabolic strategies across species

Audience: Undergraduate

5. Evaluate the interactions between nutrients, animals, environment, physiological status, and functions and integrate these interactions to understand whole-animal nutrition

Audience: Undergraduate

### AN SCI 314 – POULTRY NUTRITION

3 credits.

Provides a conceptual understanding of nutrient requirements for optimal growth and production of commercial poultry species. The use of computer programming for feed formulation is emphasized.

**Requisites:** DY SCI/AN SCI 101

**Repeatable for Credit:** No

**Last Taught:** Summer 2019

**Learning Outcomes:** 1. Describe fundamental concepts of metabolizable energy, protein/amino acids, minerals and vitamins, digestive physiology, and their application in commercial poultry nutrition.

Audience: Undergraduate

2. Use a computer-based formulation program for least cost formulation of diets for poultry.

Audience: Undergraduate

3. Design effective poultry nutrition experiments and summarize and interpret the results of the experiments.

Audience: Undergraduate

4. Describe basic and practical aspects of feed milling/manufacturing

Audience: Undergraduate

5. Describe feeding programs for organic poultry production and production of niche poultry products and the use of feed additives in these programs

Audience: Undergraduate

### **AN SCI 315 – POULTRY ENTERPRISE MANAGEMENT**

3 credits.

Fundamental business and economic principles and practices for successful poultry production with emphasis on problem solving in flock management.

**Requisites:** DY SCI/AN SCI 101

**Repeatable for Credit:** No

**Last Taught:** Summer 2019

**Learning Outcomes:** 1. Demonstrate a systematic approach to decision making within the poultry industry.

Audience: Undergraduate

2. Characterize fundamental business aspects for many segments of the poultry industry.

Audience: Undergraduate

3. Apply basic knowledge of the poultry industry for use in problem-solving.

Audience: Undergraduate

4. Demonstrate proper interviewing skills relevant to securing a career in the poultry industry.

Audience: Undergraduate

5. Describe key areas of emotional intelligence and personality traits and how they can impact employer/employee relationships.

Audience: Undergraduate

6. Develop a basic poultry operation business plan.

Audience: Undergraduate

### **AN SCI/DY SCI 320 – ANIMAL HEALTH AND DISEASE**

3 credits.

Provides an introduction to and exploration of the interconnectivity between factors that affect health and disease and the central role of the immune system using infectious disease in animals as a key focus. Explores principal causes and identification of animal diseases, common diseases of farm animals, zoonoses and public health, disease prevention and management including biosecurity measures and host immune responses. Fosters appreciation for the translatability and universality of knowledge between human and animal health and disease.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), BIOCORE 383, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the interconnectivity and interdependence between factors that influence health and disease

Audience: Both Grad & Undergrad

2. Discuss fundamental biological and scientific concepts valuable for a career in animal agriculture, veterinary medicine, human medicine or biomedical animal research

Audience: Both Grad & Undergrad

3. Translate novel knowledge of health and disease in one species to another

Audience: Both Grad & Undergrad

4. Integrate concepts covered in the course and explore in depth how they are relevant to a specific challenge currently faced in animal health or disease.

Audience: Graduate

**AN SCI/FOOD SCI 321 – FOOD LAWS AND REGULATIONS**

1 credit.

Food laws and regulations, regulatory and commercial grading standards used in the food industry.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify major food laws, their authoritative departments and enforcement agencies (regulatory framework)

Audience: Undergraduate

2. Identify, examine and analyze the implications of laws and regulations required for the manufacture and sale of food products

Audience: Undergraduate

3. Discuss current topics of importance to the food industry that have the potential to generate new or refine existing regulations on food laws and regulations that apply to specific segments of the food industry

Audience: Undergraduate

4. Find pertinent information on food laws and regulations that apply to specific segments of the food industry

Audience: Undergraduate

**AN SCI 324 – APPLIED COMPANION ANIMAL BEHAVIOR AND LEARNING**

3 credits.

Explore companion animal behavior and learning. Examine species-specific and abnormal behavior in a variety of environments where companion animals exist. Investigate basic learning principles and how they can be applied to companion animals.

**Requisites:** (DY SCI/AN SCI 102 or concurrent enrollment) or graduate/professional standing

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe species-specific behavior in companion animals

Audience: Both Grad & Undergrad

2. Construct an ethogram and use it to record and track companion animal behavior

Audience: Both Grad & Undergrad

3. Differentiate between different forms of behavior modification

Audience: Both Grad & Undergrad

4. Identify abnormal behavior and theorize how the behavior developed and is maintained

Audience: Both Grad & Undergrad

5. Identify a problem behavior in a companion animal, and design a behavior modification plan to address that behavior

Audience: Graduate

**AN SCI/BOTANY/MICROBIO 335 – THE MICROBIOME OF PLANTS, ANIMALS, AND HUMANS**

3 credits.

Examination of the structure and function of microbial communities that live inside and on host organisms (plants, animals, and humans).

Introduction to general concepts of the microbiome and microbiota, and their relationship to host nutrition, health, and disease.

**Requisites:** MICROBIO 101 or 303 or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how microorganisms interact with plant and animal (including human) hosts in beneficial, neutral or detrimental ways.

Audience: Undergraduate

2. Express how the environment affects these host-microbe interactions.

Audience: Undergraduate

3. Summarize new molecular and bioinformatic methods that allow for the study of microbial communities.

Audience: Undergraduate

4. Describe how microbial communities are essential for life as we know it, and the processes that support life.

Audience: Undergraduate

5. Articulate several ways in which microbial communities are essential to plant and animal (including human) health.

Audience: Undergraduate

6. Explain our current knowledge about the diversity of microbial life and why its effects and potential benefits have not been fully explored.

Audience: Undergraduate

**AN SCI 336 – ANIMAL GROWTH AND DEVELOPMENT**

3 credits.

Covers growth and development of an animal from a single cell to an organism and factors such as nutrition, hormone, genetics and gut microbials influencing growth and development in both cell and tissue levels. Includes the molecular and cellular basis of prenatal and postnatal growth and development. Focuses on development and growth of tissues including muscle, adipose, connective, mammary, and bone tissues that are associated with animal production. Also includes the use of growth promotants in livestock to improve growth performance and increase the quality of carcasses and animal production.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151 and 152), (ZOOLOGY/BIOLOGY 101 and 102), or BIOCORE 383

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the process of growth and development from a single cell level to a whole organism level

Audience: Undergraduate

2. Describe the principles and basic biological functions associated with animal growth and development applied to animal production systems

Audience: Undergraduate

3. Explain what factors affect livestock growth and development and how alteration of these factors impacts growth performance of livestock

Audience: Undergraduate

4. Integrate and apply multi-disciplinary knowledge acquired from this course to estimate and enhance growth and efficiency of animal products

Audience: Undergraduate

**AN SCI/BSE 344 – DIGITAL TECHNOLOGIES FOR ANIMAL MONITORING**

3 credits.

Introduces key concepts of sensor technology used for livestock and companion animal monitoring and veterinary medicine. Describes applications of Artificial Intelligence (AI) systems for livestock animals and veterinary medicine, including animal monitoring, computer-aided diagnosis, and optimized farm management decisions.

**Requisites:** (MATH 112, 114, 171, or placement into MATH 221) or graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain what precision livestock is and why it is needed

Audience: Undergraduate

2. Demonstrate familiarity with data science and artificial intelligence principles as applied to agricultural systems and veterinary medicine

Audience: Undergraduate

3. Describe the current sensor sensing technologies used in livestock and companion animals

Audience: Undergraduate

4. Explain principles and applications of sensor technology applied to animals

Audience: Undergraduate

5. Identify artificial intelligence applications in veterinary medicine

Audience: Undergraduate

6. Evaluate the major ethical concerns associated with Artificial Intelligence for agriculture

Audience: Undergraduate

### AN SCI/DY SCI 361 – INTRODUCTION TO ANIMAL AND VETERINARY GENETICS

2 credits.

The molecular basis for inheritance of monogenic and polygenic traits related to animal disease and production. An introduction to the principles of improving animal health and performance by selection and mating systems in companion animals, horses, livestock, and poultry.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), or (BIOCORE 382, 383, and 384) or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Retrieve, analyze and interpret gene and genomic data for species conservation, genetic variants and gene function  
Audience: Both Grad & Undergrad

2. Apply genotype data to determination of animal parentage and mapping of variants underlying genetic variation for animal traits  
Audience: Both Grad & Undergrad

3. Articulate knowledge of methods used to discover and modify genetic information for purposes of altering phenotypes  
Audience: Both Grad & Undergrad

4. Identify the key components of the basic genetic model describing the expression of phenotypic traits  
Audience: Both Grad & Undergrad

5. Explain the four forces that change gene frequency: selection, drift, mutation and migration  
Audience: Both Grad & Undergrad

6. Calculate and interpret the coefficients of a simple linear regression to determine the expected genetic change from phenotypic selection  
Audience: Both Grad & Undergrad

7. Calculate the detection probability of a recessive genotype for some simple mating systems  
Audience: Both Grad & Undergrad

8. Examine opportunities for genetic improvement of a trait in a species of interest using knowledge gained in the course, comparing alternative strategies and expected outcomes with the results of their analysis  
Audience: Graduate

### AN SCI/DY SCI 362 – VETERINARY GENETICS

2 credits.

The genetic basis for predisposition to disease or resistance to disease in livestock and companion animal species. Genetic defects, their discovery, diagnosis and treatment.

**Requisites:** DY SCI/AN SCI 361 or concurrent enrollment

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate critically the primary literature in the genetic variants and their role in animal phenotypes and disease  
Audience: Both Grad & Undergrad

2. Describe how gene x environment interactions affect gene expression and how these effects can be transmitted to the next generations  
Audience: Both Grad & Undergrad

3. Use animal biotechnology knowledge and biomedical models to design experiments to treat animal diseases and alter phenotypes  
Audience: Both Grad & Undergrad

4. Explain the processes by which epigenetic marks regulate gene expression and how these marks can be manipulated  
Audience: Both Grad & Undergrad

5. Generate a hypothesis from a set of observations related to the genetic basis of animal production and then design experiments to test the hypothesis  
Audience: Graduate

**AN SCI/DY SCI 363 – PRINCIPLES OF ANIMAL BREEDING**

2 credits.

Application of the principles of quantitative genetics to the improvement of livestock and poultry; breeding value estimation and selection techniques; effects of inbreeding and hybrid vigor; crossbreeding systems.

**Requisites:** DY SCI/AN SCI 361 or concurrent enrollment

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Calculate and interpret the values of narrow and broad sense heritabilities as well as repeatability of quantitative traits given their genetic and environmental variance components

Audience: Both Grad & Undergrad

2. Apply additive and multiplicative adjustments on phenotypic traits to correct for environmental effects

Audience: Both Grad & Undergrad

3. Interpret key components of sire summaries

Audience: Both Grad & Undergrad

4. Calculate expected correlated response to selection

Audience: Both Grad & Undergrad

5. Calculate retained hybrid vigor for various crossbreeding schemes in livestock

Audience: Both Grad & Undergrad

6. Perform quantitative genetic analysis of family data using linear regression and analysis of variance techniques

Audience: Graduate

**AN SCI 366 – CONCEPTS IN GENOMICS**

3 credits.

Genomics has revolutionized many fields of science, including animal breeding, plant breeding, physiology, microbiology, and human medicine. A basic overview of the latest concepts in genomics, including 3D genome organization, the importance of genome annotation, the use of genomic testing in plant and animal breeding, the potential of genomic prediction on human medicine, and the latest advances in omics integration.

**Requisites:** Junior Standing and BOTANY/BIOLOGY/ZOOLOGY 152, (BIOLOGY/ZOOLOGY 101, 102, and BIOLOGY/BOTANY 130), BIOCORE 381, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize the importance of functional annotation

Audience: Both Grad & Undergrad

2. Explain the principles of gene mapping and genomic testing

Audience: Both Grad & Undergrad

3. Describe the impact of genomic selection on agriculture

Audience: Both Grad & Undergrad

4. Recognize the potential of genomic prediction on human medicine

Audience: Both Grad & Undergrad

5. Describe the latest advances in multi-omics data integration

Audience: Both Grad & Undergrad

6. Explain the principles of pathway analysis and network inference

Audience: Graduate

7. Describe available tools and software for omics analyses

Audience: Graduate

### AN SCI/DY SCI 370 – LIVESTOCK PRODUCTION AND HEALTH IN AGRICULTURAL DEVELOPMENT

3 credits.

Physical, biological and social nature of animal agriculture systems and their improvement in developing countries; analysis of the state of livestock research and development in the developing countries and the world role of U.S. animal agriculture.

**Requisites:** DY SCI/AN SCI 101, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY/BIOLOGY 101, or (BIOCORE 381 and 382), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the physical, biological and social nature of animal agriculture and its improvement in developing countries.

Audience: Both Grad & Undergrad

2. Analyze the constraints to improving livestock production on resource poor farms in developing countries.

Audience: Both Grad & Undergrad

3. Demonstrate knowledge about institutional infrastructures involved in research, education, and development projects in animal agriculture.

Audience: Both Grad & Undergrad

4. Develop skills needed to analyze and project strategies for improvement of a production system in a developing country.

Audience: Graduate

### AN SCI/DY SCI 373 – ANIMAL PHYSIOLOGY

3 credits.

Covers physiological processes that regulate the body and the anatomy and function of different physiological systems. Includes interactions between organ systems, analysis of a single organ system from the molecular to the organismal, and comparisons and contrasts of organ systems among different domestic animal species.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), or BIOCORE 383

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate the physiological processes that regulate the body of different animal species (largely domestic animals and humans)

Audience: Undergraduate

2. Synthesize the regulation of an organ system from the molecular level all the way to the whole animal level and apply knowledge of a physiological mechanism to explain how a whole animal physiological process occurs

Audience: Undergraduate

3. Integrate interactions between different organ systems (homeostasis) and explain the anatomy of different physiological systems and their specific functions

Audience: Undergraduate

4. Determine how changes in internal or external environment will alter physiologic processes to deal with these changes

Audience: Undergraduate

5. Determine how changes in one physiological system may impact a different physiological system

Audience: Undergraduate

6. Describe similarities and differences in physiologic systems between animal species (with emphasis on domestic animals and humans)

Audience: Undergraduate

**AN SCI 375 – SPECIAL TOPICS**

1-4 credits.

Various topics in Animal Science of current interest to undergraduate students.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze concepts and processes related to specific topics in Animal Sciences.

Audience: Undergraduate

2. Integrate and apply knowledge to understand issues associated with in animal industries.

Audience: Undergraduate

3. Synthesize scientific literature to develop critical thinking skills.

Audience: Undergraduate

**AN SCI 377 – INTEGRATIVE ANIMAL PHYSIOLOGY LABORATORY**

1 credit.

Provides immersive, hands-on training in large animal procedural and surgical techniques to develop knowledge and appreciation for the interconnectivity and interdependence between physiological processes of the various organ systems. Serves as an introduction to translatable skills for careers in biomedical animal research, veterinary medicine, or human medicine.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), or BIOCORE 383

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the interconnectivity and interdependence between physiological processes and anatomical systems.

Audience: Undergraduate

2. Perform basic techniques in animal handling, anesthesia, and surgical procedures.

Audience: Undergraduate

3. Communicate information and thoughts effectively within a team performing complex procedures.

Audience: Undergraduate

**AN SCI 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Animal and Dairy Sciences and internship site supervisor.

Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Establish a network of mentors to support academic and professional growth.

Audience: Undergraduate

2. Develop and illustrate specialized skills relevant to the focus of study associated with internship program.

Audience: Undergraduate

3. Differentiate a diversity of disciplinary approaches and viewpoints in the agriculture industry.

Audience: Undergraduate

**AN SCI 400 – STUDY ABROAD IN ANIMAL SCIENCES**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**AN SCI/DY SCI 414 – RUMINANT NUTRITION & METABOLISM**

3 credits.

Integrates nutritional and biochemical concepts to understand digestive and metabolic processes in dairy and beef cattle, which are then quantitatively represented to predict and manipulate production and health outcomes.

**Requisites:** DY SCI/AN SCI/NUTR SCI 311, (BIOCHEM 301 or 501) or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Integrate nutritional and biochemical concepts to understand digestion and metabolism of nutrients.

Audience: Both Grad & Undergrad

2. Predict quantitative metabolic and production outcomes in ruminants.

Audience: Both Grad & Undergrad

3. Determine the role of metabolism in feed efficiency, animal production and health, and environmental load of ruminant production systems.

Audience: Both Grad & Undergrad

4. Investigate, interpret, summarize, and debate findings from scientific literature in order to develop and communicate recommendations for ruminant diets to identified audiences.

Audience: Both Grad & Undergrad

5. Apply research models to experimental and production data to predict metabolic outcomes

Audience: Graduate

**AN SCI 415 – APPLICATION OF MONOGASTRIC NUTRITION PRINCIPLES**

2 credits.

Nutrient requirements for growth and production of monogastric animals. Discuss concepts of establishing nutrient requirements and feeding strategies. Laboratory exercises are designed to develop problem solving skills required for the assessment of nutritional adequacy and economical soundness of feeding programs.

**Requisites:** DY SCI/AN SCI/NUTR SCI 311, (BIOCHEM 301 or 501) or graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify classifications and profiles of major feed ingredients used to supply nutrients for monogastric animals

Audience: Both Grad & Undergrad

2. Assess the major nutrient requirements for monogastric animals established by empirical experimental methods

Audience: Both Grad & Undergrad

3. Build spreadsheets to calculate mathematical solutions required for formulations of complete diets for monogastric animals

Audience: Both Grad & Undergrad

4. Design an experiment and critique the results

Audience: Both Grad & Undergrad

5. Participate in discussions of laboratory assignments and presentations of experimental results

Audience: Both Grad & Undergrad

6. Provide a completed statistical analysis of the data from the animal trials with a defense for the analysis provided in the oral presentation

Audience: Graduate

**AN SCI 420 – MICROBIOMES OF ANIMAL SYSTEMS**

3 credits.

Provides a knowledgebase in both theoretical and applied scientific approaches associated with microbiome sciences in animal production systems. Covers the basic principles of microbiology through applied practical approaches in using cross-species comparisons in companion and agricultural species from classical microbiological techniques to novel next-generation sequence-based approaches.

**Requisites:** (BIOLOGY/ZOOLOGY 101 and 102, BOTANY/BIOLOGY/ZOOLOGY 151, BOTANY/BIOLOGY 130, or BIOCORE 383) and (CHEM 341, 343, or BIOCHEM 301), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compare and contrast the anatomic differences and basic functions of the GI tract across agricultural species.

Audience: Both Grad & Undergrad

2. Apply biochemical concepts to evaluate the impact of substrates on microbial bioenergetics, growth yield, and the establishment and stability of microbial communities

Audience: Both Grad & Undergrad

3. Evaluate and recommend approaches to assess microbiome diversity and function.

Audience: Both Grad & Undergrad

4. Relate basic principles of microbial community membership and function in the context of host-microbe crosstalk.

Audience: Both Grad & Undergrad

5. Associate internal versus external environmental pressures that influence microbial niches and cross-kingdom interactions.

Audience: Both Grad & Undergrad

6. Critically evaluate key literature related to studying the microbiome of animal systems

Audience: Graduate

**AN SCI 431 – BEEF CATTLE PRODUCTION**

3 credits.

Application of genetics, systems of mating, physiology, nutrition and economics to the production of beef.

**Requisites:** NUTR SCI/AN SCI/DY SCI 311, DY SCI/AN SCI 361, and (DY SCI/AN SCI 434 or concurrent registration) or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Apply principles from pre-requisite courses to production systems for beef cattle and appreciate management practices specific to these systems.

Audience: Both Grad & Undergrad

2. Integrate fundamental principles of beef cattle biology and economics into a business plan of their design.

Audience: Both Grad & Undergrad

3. Analyze and evaluate beef production systems.

Audience: Graduate

**AN SCI 432 – SWINE PRODUCTION**

3 credits.

Application of research findings in breeding, feeding, management and marketing to modernize production. Lab may include farm visits, practical exercises in testing changes, and "tools" used by producers.

**Requisites:** NUTR SCI/AN SCI/DY SCI 311, DY SCI/AN SCI 361, DY SCI/AN SCI 434, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Be able to describe and contrast current topics in the context of historical perspectives that influence the current and future US commercial swine industry.

Audience: Both Grad & Undergrad

2. Evaluate and integrate the foundational principles in swine nutrition, reproduction, breeding, genetic selection, herd health management, biosecurity protocols, animal behavior, swine husbandry, marketing, and housing to discern swine production practices which improve animal well-being and sustainable swine production in a manner that is acceptable to consumers

Audience: Both Grad & Undergrad

3. Develop an ability to link components of a production system to market costs and revenues.

Audience: Both Grad & Undergrad

4. Gain hands-on experience with common swine production techniques

Audience: Both Grad & Undergrad

5. Diversify student experience with a major food animal species and the industries and career opportunities associated with the swine industry.

Audience: Both Grad & Undergrad

6. Extend academic experience acquired in the Animal Sciences department into areas of personal interest and develop new ideas working with academic and industrial organizations

Audience: Graduate

**AN SCI/DY SCI 434 – REPRODUCTIVE PHYSIOLOGY**

3 credits.

Principles of reproductive physiology, improvement of fertility, and artificial insemination.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 152, (ZOOLOGY/BIOLOGY 101 and 102) or (BIOCORE 382, 383, and 384) or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify structures and function of reproductive anatomy in the male and female of all livestock species, humans, pets and wildlife

Audience: Both Grad & Undergrad

2. Identify hormones, their production site, physiology impacts and how to manipulate specific hormones to control reproduction either positively or negatively

Audience: Both Grad & Undergrad

3. Summarize critical components of reproductive technologies involved in breeding, semen collection, gamete biology and embryonic development. Demonstrate ability to monitor and manipulate cyclicity, artificial insemination, and pregnancy detection in both horses and pigs

Audience: Both Grad & Undergrad

4. Summarize events in reproduction from the cellular to whole animal level in livestock species, humans, pet species and wildlife

Audience: Both Grad & Undergrad

5. Communicate via oral, written, podcast, and website modalities

Audience: Both Grad & Undergrad

6. Solve reproductive physiology problems associated with a foreign country or novel region of U.S. including how to digitally communicate with local residents who may not speak English

Audience: Both Grad & Undergrad

7. Identify how ethical issues in global agriculture, wildlife management, and federal grazing lands impact reproductive management of livestock

Audience: Both Grad & Undergrad

8. Evaluate effective learning outcomes of a specific lab and access its impact on undergraduate students

Audience: Graduate

**AN SCI 435 – ANIMAL SCIENCES PROSEMINAR**

2 credits.

Methods of assessing information quality are studied. Each student develops an analytical and critical seminar on a topic of personal interest in the animal sciences.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply the knowledge and skills acquired in the different areas of Animal Sciences to solve a specific problem using a multidisciplinary approach

Audience: Undergraduate

2. Analyze academic, professional, societal, economic, ethical, or scientific issues related to Animal Science and construct creative solutions for those issues

Audience: Undergraduate

3. Communicate and extend the capstone experience to refine research skills and demonstrate proficiency in written and oral forms

Audience: Undergraduate

4. Extend academic experience acquired in the Animal Sciences department into areas of personal interest and develop new ideas working with academic and industrial organizations.

Audience: Undergraduate

**AN SCI/DY SCI/FOOD SCI/SOIL SCI 472 – ANIMAL AGRICULTURE AND GLOBAL SUSTAINABLE DEVELOPMENT**

1 credit.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; food security, the role of women in agriculture, and the role of dairy products in a healthy diet.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply sustainability principles and/or framework to addressing the challenge of feeding an increasing world population sustainably.

Audience: Undergraduate

2. Define and characterize sustainability, sustainable agriculture and Sustainable Development

Audience: Undergraduate

3. Analyze the contributions of animal agriculture to the Sustainable Development Goals both in developing and developed countries.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of diverse animal agricultural systems both in developing and developed countries.

Audience: Undergraduate

5. Evaluate the role of livestock in communities where poverty, hunger and marginalization are embedded as a way of life.

Audience: Undergraduate

6. Critically evaluate the causes of –and ways to break– the chains of hunger and poverty among the poorest of the poor.

Audience: Undergraduate

### **AN SCI/DY SCI/FOOD SCI/SOIL SCI 473 – INTERNATIONAL FIELD STUDY IN ANIMAL AGRICULTURE AND SUSTAINABLE DEVELOPMENT**

2 credits.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; and the role of women in agriculture and the role of dairy products in a healthy diet.

**Requisites:** DY SCI/AN SCI/FOOD SCI/SOIL SCI 472

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Improve communication and interpersonal skills associated with participating in team-based intercultural experiences

Audience: Undergraduate

2. Be better prepared for professional success in an interconnected world by navigating unfamiliar cultural norms and societal differences

Audience: Undergraduate

3. Reflect on US-centric personal and cultural values while building an appreciation and respect for the Latin America culture.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of alleviating poverty and malnutrition in Mexico

Audience: Undergraduate

5. Apply sustainability principles and/or framework to addressing the challenge of fostering prosperity in marginalized indigenous communities

Audience: Undergraduate

6. Analyze both from their own disciplinary lens and from an interdisciplinary lens the contributions of dairy farming to the Sustainable Development Goals

Audience: Undergraduate

7. Evaluate the sustainability of subsistence, market-oriented, and industrial-scale farming systems

Audience: Undergraduate

### **AN SCI 503 – AVIAN PHYSIOLOGY**

3 credits.

Principles of organ and system function with emphasis on male and female reproduction, embryonic development and factors affecting hatchability.

**Requisites:** DY SCI/AN SCI 101

**Repeatable for Credit:** No

**Last Taught:** Summer 2019

**Learning Outcomes:** 1. Describe the major functions and processes associated with behavior, nervous, muscular, cardiovascular, immune, digestive, endocrine and reproductive system.

Audience: Undergraduate

2. Describe physiological processes that are unique to avian species and that provide challenges and opportunities for housing and management in the poultry industry.

Audience: Undergraduate

3. Critically evaluate and communicate both verbally and written scientific research that integrates physiological concepts discussed in class.

Audience: Undergraduate

### **AN SCI 508 – POULTRY PRODUCTS TECHNOLOGY**

3 credits.

Procurement, processing and distribution of poultry meat, eggs and derived products; factors affecting quality, including methods of determining quality.

**Requisites:** CHEM 103, 109, or 115

**Repeatable for Credit:** No

**Last Taught:** Summer 2019

**Learning Outcomes:** 1. Relate physiological processes during animal growth and tissue harvest to quality attributes in the resulting food

Audience: Undergraduate

2. Utilize principles of pH, ionic strength, isoelectric point, fermentation, curing, temperature, antimicrobial use, and antioxidant technology to ensure that manufactured products are safe to eat, have the desired sensory attributes, and have extended shelf life

Audience: Undergraduate

3. Differentiate function(s) from sensory effect(s) for the wide range of ingredients found on labels of various meat products

Audience: Undergraduate

4. Identify the various chemical, physical, and thermal processes that go into producing a high-quality product with emphasis on how the order of each process during manufacturing is relevant

Audience: Undergraduate

5. Measure quality attributes of the different products produced in the laboratory segments

Audience: Undergraduate

**AN SCI 511 – BREEDER FLOCK AND HATCHERY MANAGEMENT**

3 credits.

History of artificial incubation relevant to the U.S. hatching industry. Practices involved in successful incubation of hatching eggs. Embryonic development in birds. Management factors involved in breeder hen production and operating a hatchery.

**Requisites:** DY SCI/AN SCI 101**Repeatable for Credit:** No**Last Taught:** Summer 2019**Learning Outcomes:** 1. Identify normal incubation requirements and problems associated with improper conditions.

Audience: Undergraduate

2. Evaluate biosecurity plans and measures of microbial cleanliness of hatcheries.

Audience: Undergraduate

3. Identify current management systems for poultry breeding flocks and understand differences among different species.

Audience: Undergraduate

4. Apply knowledge of incubation and breeder management systems to analyze industry situations.

Audience: Undergraduate

**AN SCI 512 – MANAGEMENT FOR AVIAN HEALTH**

3 credits.

The occurrence, etiology, clinical signs, control and prevention of infectious and noninfectious diseases commonly affecting domestically reared poultry. Instruction in avian necropsy, zoonosis, sanitation and regulation.

**Requisites:** DY SCI/AN SCI 101**Repeatable for Credit:** No**Last Taught:** Summer 2019**Learning Outcomes:** 1. Identify and describe the origins of disease, methods to control infections through immunological function, vaccination, sanitation, biosecurity, and regulatory agency response

Audience: Undergraduate

2. Identify and distinguish normal and abnormal signs caused by disease

Audience: Undergraduate

3. Describe the microbial world of infectious disease

Audience: Undergraduate

4. Explain human's role in transmission of disease

Audience: Undergraduate

5. Develop a visual understanding of gross lesions caused by disease

Audience: Undergraduate

**AN SCI/FOOD SCI 515 – COMMERCIAL MEAT PROCESSING**

2 credits.

Principles and procedures in the commercial manufacture of processed meat products; sausage manufacturing, curing, smoking, freezing and packaging.

**Requisites:** AN SCI/FOOD SCI 305, FOOD SCI 410, or graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Summarize the various chemical and physical properties of meat and non-meat ingredients used to manufacture processed meats

Audience: Both Grad &amp; Undergrad

2. Formulate various processed meats in compliance with governmental regulations

Audience: Both Grad &amp; Undergrad

3. Identify basic meat processing principles

Audience: Both Grad &amp; Undergrad

4. Demonstrate the ability to determine if a thermal processing procedure will produce a safe product

Audience: Graduate

5. Recognize how various types of meat processing equipment operate

Audience: Both Grad &amp; Undergrad

6. Summarize proper cleaning and sanitation procedures

Audience: Both Grad &amp; Undergrad

**AN SCI/F&W ECOL/ZOOLOGY 520 – ORNITHOLOGY**

3 credits.

Introduction to bird biology, ecology, and behavior. Topics include the evolutionary origin of birds and flight, anatomy and physiology, functional morphology, migration, communication, reproductive strategies, ecological adaptations and roles, and biogeographical patterns.

**Requisites:** ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

### AN SCI/F&W ECOL/ZOOLOGY 521 – BIRDS OF SOUTHERN WISCONSIN

3 credits.

Outdoor and indoor labs/lectures emphasizing identification of southern Wisconsin birds by sight and vocalization. Two required Saturday field trips in Southern Wisconsin.

**Requisites:** ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### AN SCI 610 – QUANTITATIVE GENETICS

3 credits.

An advanced approach with emphasis on statistical foundations. Classical theory with extensions to maternal and paternal effects. Selection theory is considered in depth.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. demonstrate an understanding regarding the various components contributing to variation of phenotypic traits  
Audience: Graduate

2. estimate basic genetic parameters of phenotypic traits using family data  
Audience: Graduate

3. compare different selection strategies in terms of expected genetic change  
Audience: Graduate

4. perform gene mapping using molecular marker data  
Audience: Graduate

5. examine and critically evaluate technical literature related to quantitative genetics  
Audience: Graduate

6. assess advantages and disadvantages of indirect genetic selection  
Audience: Graduate

7. perform mixed model analysis to infer variance components and to compute estimated breeding values  
Audience: Graduate

### AN SCI/NUTR SCI 626 – EXPERIMENTAL DIET DESIGN

1 credit.

Discuss nutrient requirements, composition of ingredients used to meet requirements and the mathematical steps involved in diet formulation with emphasis on research animals and human subjects.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Develop an understanding of nutrient requirements, ingredients used to meet requirements, and the mathematical steps involved in diet formulation, with emphasis on research animals.

Audience: Both Grad & Undergrad

2. Develop skills required to formulate and prepare research diets  
Audience: Both Grad & Undergrad

3. Develop an appreciation of nutrient requirements and the nutrient content of foods in development of healthy human diets.  
Audience: Graduate

### AN SCI 681 – SENIOR HONOR THESIS

2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Develop objectives and formulate hypothesis into experimental methods  
Audience: Undergraduate

2. Participate in a supportive community of academically engaged peers  
Audience: Undergraduate

3. Develop a research proposal and implement research project under supervision of a honors faculty mentor  
Audience: Undergraduate

4. Demonstrate intellectual curiosity through engagement in challenging academic experiences  
Audience: Undergraduate

**AN SCI 682 – SENIOR HONORS THESIS**

2-4 credits.

Second semester of individual study for majors completing theses for Honors degrees as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate advanced content knowledge as reflected in an honors thesis, publication, performance, or scholarly work

Audience: Undergraduate

2. Articulate the value of the honors experience to peers and to a broader community

Audience: Undergraduate

**AN SCI 691 – THESIS**

2 credits.

Individual study for majors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Develop questions to address important gaps in the scientific literature of your topic of interest

Audience: Undergraduate

2. Analyze and select optimal research approaches to address scientific questions

Audience: Undergraduate

3. Develop objectives and formulate hypothesis into experimental methods

Audience: Undergraduate

4. Implement research project under supervision of thesis mentor

Audience: Undergraduate

**AN SCI 692 – THESIS**

2 credits.

Second semester of individual study for majors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Implement research project under supervision of thesis mentor

Audience: Undergraduate

2. Understand outcomes of statistical analysis or research data

Audience: Undergraduate

3. Report on scientific honors research through diverse means of communication

Audience: Undergraduate

4. Demonstrate excellent reading, writing, communication, and research skills

Audience: Undergraduate

**AN SCI 699 – SPECIAL PROBLEMS**

1-3 credits.

Individual advanced work in an area of Animal Sciences under the direct guidance of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate and apply knowledge to understand issues associated with in Animal industries or associated with animal scientific research

Audience: Undergraduate

2. Report findings through diverse means of communication

Audience: Undergraduate

3. Develop and illustrate specialized skills relevant to a focused body of work associated with a specific learning experience

Audience: Undergraduate

4. Summarize intellectual growth associated with independent study work

Audience: Undergraduate

**AN SCI/FOOD SCI 710 – CHEMISTRY OF THE FOOD LIPIDS**

2 credits.

Chemical constitution, structures, reactions, stereochemistry of fats, phospholipids, related compounds; methods of isolation, characterization; synthesis; relation of structure to physical properties.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Write a clear and concise research paper

Audience: Graduate

2. Improve oral communication by presenting major points of the research paper

Audience: Graduate

3. Utilize software to illustrate a protein containing a bound lipid at atomic resolution.

Audience: Graduate

4. Explain lipid functions in relation to varying environmental conditions and electron transfer reactions

Audience: Graduate

5. Develop a detailed understanding of lipid analysis, lipid synthesis as well as digestion and transport of dietary lipids in different vertebrates.

Audience: Graduate

6. Derive the likely volatiles to be generated during storage of any unsaturated fatty acid using the beta-scission of a linoleic acid hydroperoxide as a template

Audience: Graduate

7. Determine if a given reaction is thermodynamically favorable based on standard one-electron reduction potentials and concentrations of reactants (oxidized/reduced couples)

Audience: Graduate

**AN SCI/FOOD SCI 711 – FOOD BIOCHEMISTRY**

3 credits.

Explores methods for interrogating structure-function relationships, molecular profiles, and microstructure of foods. Provides hands-on experience using computational approaches to model protein-small molecule interactions, analysis of small molecules using high-resolution MS, and protein composition and morphology with fluorescence spectroscopy and microscopy. Knowledge of food chemistry or organic chemistry (such as FOOD SCI 410, CHEM 341, 343, or 345) required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically evaluate recent literature in the field of food chemistry

Audience: Graduate

2. Illustrate the interactions between food molecules (lipids, protein, carbohydrates, bioactive) at atomic resolution using software.

Audience: Graduate

3. Analyze and differentiate the molecular composition of a food or ingredient using HPLC-MS/MS data; fluorescence spectroscopy; and microscopy

Audience: Graduate

4. Propose and analyze how reactions and physical changes affect food microstructure and composition

Audience: Graduate

**AN SCI 799 – PRACTICUM IN ANIMAL SCIENCES TEACHING**

1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. articulate learning goals of the practicum separately from the main educational goals of the course in which the practicum takes place;

Audience: Graduate

2. gain experience in creating, revising, critiquing course syllabi, that is, get firsthand experience in developing course requirements and policies

Audience: Graduate

3. develop a strategy process to align course materials and course assignments with course objectives.

Audience: Graduate

4. practice teaching under distinct instructional modalities; lecture vs discussion vs labs; synchronous vs asynchronous remote instruction

Audience: Graduate

5. prepare and implement lesson plans of a class period, a week of instruction, or a module of the class

Audience: Graduate

6. acquire classroom management skills including how to deliver content, lead a discussion, handle questions and answers

Audience: Graduate

7. develop both formative and summative evaluation instruments to gain feedback on how to assess and improve the teaching and learning process

Audience: Graduate

**AN SCI/DY SCI 824 – RUMINANT NUTRITIONAL PHYSIOLOGY I**

4 credits.

Focuses on rumen microbiology, metabolite modeling, as well as protein and VFA nutrition and metabolism.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Assess source, digestion, absorption, utilization, and metabolism of nutrients in ruminants

Audience: Graduate

2. Integrate concepts of carbon and nitrogen tracing and flux through ruminant body systems

Audience: Graduate

3. Develop a command of modeling nutrient flux through tissues and be able to apply and extrapolate concepts to nutrient utilization and tracing methodology

Audience: Graduate

4. Clearly communicate the conceptual basis, assumptions, and limitations of techniques and methodology necessary to quantify digestive and metabolic processes

Audience: Graduate

5. Evaluate nutritional recommendations and current topics in ruminant nutrition

Audience: Graduate

**AN SCI/DY SCI 825 – RUMINANT NUTRITIONAL PHYSIOLOGY II**

4 credits.

Focuses on calf and heifer nutrition, regulation of dry matter intake, plant and forage chemistry, vitamins, lipids, and starch.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Assess source, digestion, absorption, utilization, and metabolism of nutrients in ruminants

Audience: Graduate

2. Integrate concepts of carbon and nitrogen tracing and flux through ruminant body systems

Audience: Graduate

3. Develop a command of modeling nutrient flux through tissues and be able to apply and extrapolate concepts to nutrient utilization and tracing methodology

Audience: Graduate

4. Clearly communicate the conceptual basis, assumptions, and limitations of techniques and methodology necessary to quantify digestive and metabolic processes

Audience: Graduate

5. Evaluate nutritional recommendations and current topics in ruminant nutrition

Audience: Graduate

**AN SCI/GENETICS/POP HLTH 849 – GENOMIC EPIDEMIOLOGY**

2 credits.

An introduction to genomic epidemiology, including a general overview of genetics and Mendelian and complex inheritance, as well as various elements of study design, such as participant ascertainment; phenotype definition; biologic sample selection; genotyping, sequencing, and quality control; measurement of covariates; and choice of analytic methods. Briefly covers original study designs; focuses on current study designs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Evaluate and discuss genetic/genomic epidemiological literature.

Audience: Graduate

2. Design simple genetic/genomic epidemiological studies.

Audience: Graduate

3. Identify and apply appropriate tests of association between genetic variants and both qualitative and quantitative outcomes using either unrelated individuals or families.

Audience: Graduate

4. Summarize and interpret the results of genetic/genomic tests of association.

Audience: Graduate

**AN SCI 865 – DESIGN AND ANALYSIS OF BIOLOGICAL STUDIES**

4 credits.

Experimental design and proper data analysis are critical processes for scientific research. Planning and performing research studies have statistical implications that influence how results are interpreted. Learn the fundamentals of generalized linear models, experimental design, and data analysis using common examples from biological studies.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Use regression models properly

Audience: Graduate

2. Select the most appropriate experimental design for a particular experiment

Audience: Graduate

3. Select the most appropriate method of data analysis

Audience: Graduate

4. Determine the most appropriate model that fits the data

Audience: Graduate

5. Interpret the results of the data analysis

Audience: Graduate

6. Use the statistical software R to analyze data

Audience: Graduate

**AN SCI 875 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest to graduate students.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Analyze and critique research results, interpretations and proposals.

Audience: Graduate

2. Demonstrate critical thinking and knowledge about the significance of current research in the fields of animal and dairy science by presenting and/or critiquing scientific presentations

Audience: Graduate

**AN SCI/DY SCI 931 – SEMINAR IN ANIMAL NUTRITION**

1 credit.

Discussion of literature that has a bearing on animal nutrition. Students are to survey the literature and present a seminar.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**AN SCI/DY SCI/GENETICS 951 – SEMINAR IN ANIMAL BREEDING**

0-1 credits.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2020**AN SCI/OBS&GYN/ZOOLOGY 954 – SEMINAR IN ENDOCRINOLOGY-REPRODUCTIVE PHYSIOLOGY**

0-1 credits.

Promotes scientific and professional development. Presenters develop and deliver research presentations to a scientific audience, field questions, and receive critiques about their presentation style and scientific approach. Additional presentations include professional development, career advancement opportunities, and topics of interest to the endocrinology and reproduction community at large.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate knowledge of cutting-edge research in and related to one's research area through the development and delivery of research presentations

Audience: Graduate

2. Communicate complex ideas in research presentations and questions in a clear and understandable manner

Audience: Graduate

3. Evaluate presentations and providing effective feedback

Audience: Graduate

**AN SCI 990 – RESEARCH**

1-12 credits.

Independent research in preparation of a graduate thesis under supervision of a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

# ANTHROPOLOGY (ANTHRO)

## ANTHRO 100 – GENERAL ANTHROPOLOGY

3 credits.

General understanding of humans in relation to cultures, evolutionary development and racial diversity, capacities for society, and the development of the world's major cultures.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## ANTHRO 102 – ARCHAEOLOGY AND THE PREHISTORIC WORLD

3 credits.

Introduction to the ancient world from origins of human culture to the beginnings of written history as revealed by archaeological research at great sites and ruins around the globe. Archaeological analyses of important sites as case studies to illustrate concepts and techniques used by archaeologists in their efforts to understand the diversity of the human past.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## ANTHRO 104 – CULTURAL ANTHROPOLOGY AND HUMAN DIVERSITY

3 credits.

Introduction to cultural anthropology. Comparative cross-cultural consideration of social organization, economics, politics, language, religion, ecology, gender, and cultural change. Includes a primary focus on U.S. ethnic and racial minorities.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## ANTHRO 105 – PRINCIPLES OF BIOLOGICAL ANTHROPOLOGY

3 credits.

Genetic basis of morphological, physiological and behavioral variations within and between human populations, and their origins and evolution.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## ANTHRO 120 – FRESHMAN/SOPHOMORE SEMINAR IN ANTHROPOLOGY

3 credits.

Intensive study of a problem in human variability through study of nontechnical materials. Emphasis on acquiring anthropological concepts through discussion and direct experience of ethnographic, archaeological, or human physical evidence.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## ANTHRO/FOLKLORE/INTL ST/LINGUIS 211 – GLOBAL LANGUAGE ISSUES

3 credits.

Focuses on language and its culture, example topics include: extinction and revival, language and nationhood, how widely and deeply languages differ, language and worldview, writing systems and literacy, language discrimination and inequality.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify ways that geographic, social, and political events, movements, and trends shape the sociolinguistic context of the world's languages

Audience: Undergraduate

2. Demonstrate an understanding of subfields of global sociolinguistic inquiry, including language contact, variation, change, and death; language revitalization; the intersections of language, race, and ethnicity; the intersections of language and gender, and sexuality

Audience: Undergraduate

3. Critically evaluate specific examples of language use in a variety of linguistic and cultural contexts

Audience: Undergraduate

4. Design and conduct a sociocultural linguistic research project, including: identify a research question; collect appropriate resources and data; conduct data analysis and interpretation; draw conclusions, and summarize results

Audience: Undergraduate

**ANTHRO 212 – PRINCIPLES OF ARCHAEOLOGY**

3 credits.

Introduction to the methods, historical development, and scientific principles of archaeology. Discover how archaeologists generate and interpret information about the human past. Introduces scientific inquiry and provides a foundation for pursuing advanced archaeological courses and field research.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ANTHRO/MED HIST 231 – INTRODUCTION TO SOCIAL MEDICINE**

3 credits.

Provides analytical tools for the critical examination of the social, cultural, political and economic determinants of health conditions and medical practice. Pays special attention to how these factors determine how patients and providers experience and ideate disease and treatment, and how they respond to specific health care policies. Emphasizes the important role that conditions of structural violence and inequality play as determinants of health conditions in a globalized world.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Identify and analyze within their social, cultural and economic contexts key historical issues, and their significance, in the history of healing practices and public health.

Audience: Undergraduate

2. Develop an understanding of the mutually shaping interactions between perceptions of health, illness and medical practices and culture and society.

Audience: Undergraduate

3. Analyze the role of social factors, race, gender, ethnicity, class, among others, in shaping cultural realities related to body normativity, health, medical practice, public health and medical education.

Audience: Undergraduate

4. Identify the role that patients, healthcare providers, institutions and the state play in modeling medical practice, ideas about the body, public health policies, and medical education.

Audience: Undergraduate

5. Discern the impact of programs of global health as they intersect with international politics in the shaping of ideas about human rights, race, medical hierarchies and public health policies.

Audience: Undergraduate

**ANTHRO 237 – CUT 'N' MIX: MUSIC, RACE, AND CULTURE IN THE CARIBBEAN**

3 credits.

Explores the history and culture of the Caribbean by focusing on its musics, both religious and secular. Special attention will be directed to the impact of colonialism on the emergence of racially stratified societies. Music will also enable us to investigate the concepts of diaspora and creolization. Other topics include: gender and sexuality, the role of technology in the production and distribution of music, music and politics, the impact of tourism, and the global impact of Caribbean musics.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ANTHRO/AFROAMER/C&E SOC/GEOG/HISTORY/LACIS/  
POLI SCI/SOC/SPANISH 260 – LATIN AMERICA: AN  
INTRODUCTION**

3–4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze Latin American culture and society from an interdisciplinary perspective.

Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.

Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.

Audience: Undergraduate

**ANTHRO/ART HIST/DS/HISTORY/LAND ARC 264 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ANTHRO 265 – INTRODUCTION TO CULTURE AND HEALTH**

3 credits.

Uses the conceptual tools of anthropology to explore how culture, biology, and power together shape the ways people are born, experience good and poor health, seek therapeutic aid, and die. Draws on material from around the world, with a particular focus on the experience of marginalized minority people in the United States.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ANTHRO/AFRICAN/AFROAMER/GEOG/HISTORY/POLI SCI/SOC 277 – AFRICA: AN INTRODUCTORY SURVEY**

4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Analyze African society and culture from a multidisciplinary perspective.

Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.

Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.

Audience: Undergraduate

**ANTHRO 300 – CULTURAL ANTHROPOLOGY: THEORY AND ETHNOGRAPHY**

3 credits.

Survey of cultural anthropology with emphasis on ethnographic description, methodology, and contemporary theories. Focuses on humanistic and social scientific approaches to human sociocultural diversity.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**ANTHRO/LINGUIS 301 – INTRODUCTION TO LINGUISTICS: DESCRIPTIVE AND THEORETICAL**

3 credits.

Elementary theory and practical work in phonetics, phonology, morphology, and syntax, with attention to formal grammar.

**Requisites:** Graduate/professional standing. Not open to students with credit for LINGUIS 101.

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Read and write phonetic transcriptions of speech using the International Phonetic Alphabet

Audience: Undergraduate

2. Describe the mechanisms at work during the production of human speech sounds

Audience: Undergraduate

3. List from memory the distinctive features of the sounds of English, and be familiar with the phonetic features of many non-English sounds

Audience: Undergraduate

4. Use appropriate tests to determine the morphological and syntactic structure of English words and sentences.

Audience: Undergraduate

5. Apply knowledge of phonetics, phonology, morphology, and syntax in analyzing linguistic datasets from a wide variety of unfamiliar languages

Audience: Undergraduate

6. Use basic linguistic terms and concepts to read and summarize academic research in linguistics

Audience: Undergraduate

**ANTHRO 302 – HOMINOID EVOLUTION**

3 credits.

The evolution of the Hominoidea is reconstructed from direct and indirect evidence. Cladistic and phylogenetic analyses are used to study the relationships among species. Interpretations of the fossil record are presented from a historical perspective, focusing on the hominoid-hominid transition.

**Requisites:** ANTHRO 105 or graduate/professional standing

**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**ANTHRO 303 – HUMAN SKELETAL ANATOMY**

4 credits.

A comprehensive examination of skeletal anatomy at both the gross and histologic levels. Utilizes laboratory methods for the archaeological identification of skeletal fragments; criteria for the estimation of age, sex, stature, and other aspects of forensic anthropology.

**Requisites:** ANTHRO 105 or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ANTHRO 304 – HEREDITY, ENVIRONMENT AND HUMAN POPULATIONS**

3 credits.

Cultural and ecological factors influencing the composition and structure of human populations; variation and distribution of genes within and between populations; history and evolution of human populations as evidenced by genomes.

**Requisites:** ANTHRO 105, ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY/BIOLOGY 101, F&W ECOL/ENVIR ST/ZOOLOGY 360, BIOCORE 382, ZOOLOGY/BOTANY/ENVIR ST 260, ZOOLOGY/ANTHRO/BOTANY 410, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ANTHRO 310 – TOPICS IN ARCHAEOLOGY**

3 credits.

Selected areas, periods or problems in archaeology.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ANTHRO/AMER IND 314 – INDIANS OF NORTH AMERICA**

3 credits.

Description and analysis of native cultures, and the role of environmental and historical factors in North America.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**ANTHRO 321 – THE EMERGENCE OF HUMAN CULTURE**

3 credits.

Worldwide archaeological evidence for the development of human culture and behavior from the earliest appearance of human groups to the threshold of the agricultural revolution.

**Requisites:** ANTHRO 102, 212, 322, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ANTHRO 322 – THE ORIGINS OF CIVILIZATION**

3 credits.

Global archaeological survey of the origins of pristine civilizations beginning with the development of food production and ending with the emergence of the world's first civilizations. Focus of attention: Near East, Egypt, the Indus Valley, North China, Mesoamerica, and Peru.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ANTHRO 330 – TOPICS IN ETHNOLOGY**

3-4 credits.

Content varies. Some representative topics: peoples and cultures of the European part of the USSR, peoples and cultures of Soviet Asia, anthropology of space and time, anthropology and history, pastoralists and pastoral Nomads, American Indian folklore, etc.

**Requisites:** ANTHRO 100, 104, 300 or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ANTHRO 333 – PREHISTORY OF AFRICA**

3 credits.

A survey of the archaeological record of human development in Africa, beginning over two million years ago and continuing through the transition to farming and metallurgy; greatest emphasis on the stone age portion of prehistory.

**Requisites:** ANTHRO 102, 212, 321, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**ANTHRO 337 – LITHICS AND ARCHAEOLOGY**

3 credits.

Explores the ways in which humans have used of rocks and associated minerals, i.e. lithics and lapidary technology, to create utilitarian as well as ornamental objects in the past and the present. Explores gender roles in lithic technology and how specific technologies were used to create utilitarian as well as ornamental and symbolic objects. Gain a new perspective of the critical role of lithic technologies in long term human adaptive strategies as well as in ornament and symbolic art.

**Requisites:** ANTHRO 102, 212, 321, 322, or graduate/professional standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**ANTHRO 339 – ARCHAEOLOGY OF WARFARE AND HUMAN NATURE**

3 credits.

Introduction to the evidence, debates, and theories related to violence and warfare in the human past, and how related behaviors are linked to the evolution of our species and modern manifestations of war. Highlights archaeological methods that recognize past warfare practices. Using case studies from the Pleistocene to the present, explores variations of warfare from all over the world. Topics considered include 1) the highly variable nature of violence and warfare in different cultural settings; 2) the antiquity of warfare; 3) how violence has shaped human societies. Historical and cross-cultural ethnographic research will be juxtaposed against archaeological cases to provide contextualized and data-rich examinations. Learn to critically evaluate arguments, claims, and interpretations made about war, peace, and human nature.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Become familiar with available evidence and theories related to social violence, warfare, and associated practices in the human past, and how these are related to both the evolution of our species and modern manifestations of war  
Audience: Both Grad & Undergrad

2. Through specialized anthropological research, gain understanding of different lines of evidence used to identify and interpret diverse practices of violence and warfare in the past  
Audience: Both Grad & Undergrad

3. Obtain comparative global knowledge of human diversity, material culture, culture and history, and the evolution of people's relationships with the physical, cultural, and natural world  
Audience: Both Grad & Undergrad

4. Become equipped to critically evaluate various arguments, theories, and speculative claims about humanity and war, distinguishing between speculative and empirical narratives about the past  
Audience: Both Grad & Undergrad

5. Gain understanding of how to synthesize information relevant to archaeology across multiple disciplines  
Audience: Both Grad & Undergrad

6. Gain experience in collaborative teamwork and public presentation  
Audience: Both Grad & Undergrad

7. Acquire specialized archaeological and anthropological knowledge, becoming familiar with major research cases and authors from different world regions  
Audience: Graduate

8. Improve skills in evaluating research theories, arguments, and the limits, potentials, and challenges in knowledge production  
Audience: Graduate

9. Develop research agendas with testable hypotheses for specific research problems  
Audience: Graduate

10. Gain experience presenting research and communicating complex ideas to a diverse audience

**ANTHRO 340 – MUSIC, RACE, AND CULTURE IN BRAZIL**

3 credits.

Focuses on music's significant role in the formation and maintenance of Brazilian national identity. Learn how a variety of Brazilian individuals, groups, and institutions have contributed to popular and scholarly debates about Brazilian culture, identity, and forms of belonging. These discussions will be anchored to important themes in Brazil's recent history, present, and imagined future, such as cultural cannibalism (antropofagia), and racial hybridity (mestiçagem). Gain insight into how Brazilian artists and their audiences have debated race and racism through expressive means by analyzing a variety of anthropological and ethnomusicological texts about Brazilian popular music, literature, and its most famous annual ritual, Carnival.

**Requisites:** ANTHRO 100, 104, or sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ANTHRO/RELIG ST 343 – ANTHROPOLOGY OF RELIGION**

3-4 credits.

Anthropological approaches. Illustrated by critical considerations of outstanding contributions. Selected religious systems; areal and topical comparative studies; religion as an ethnographic problem.

**Requisites:** ANTHRO 104 or graduate/professional standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2021**ANTHRO 345 – FAMILY, KIN AND COMMUNITY IN ANTHROPOLOGICAL PERSPECTIVE**

3 credits.

Comparison of the form and function of such social institutions as marriage and the family, age and sex groups, secret societies, task groups, and class in cross-cultural perspective.

**Requisites:** ANTHRO 104, 300, or graduate/professional standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2021**ANTHRO 348 – ECONOMIC ANTHROPOLOGY**

3-4 credits.

Production, distribution and consumption in a broad range of societies; land tenure and personal property concepts, prestige systems, and incentives to labor.

**Requisites:** ANTHRO 104, 300, or graduate/professional standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2020

**ANTHRO 350 – POLITICAL ANTHROPOLOGY**

3-4 credits.

Comparison and analysis of political structures, behavior and processes among selected peoples of the world; special emphasis on leadership, authority, power, and the origins of the states; the relevance of primitive political systems to anthropological theory and to the comparative study of politics.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ANTHRO 352 – ANCIENT TECHNOLOGY AND INVENTION**

3 credits.

The origins and development of early technologies. Impact of key prehistoric and pre-industrial inventions on the course of human evolution.

**Requisites:** ANTHRO 102, 212, 321, or graduate/professional standing**Course Designation:** Gen Ed – Communication Part B

Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ANTHRO/AMER IND 354 – ARCHAEOLOGY OF WISCONSIN**

3 credits.

Introduction to the archaeological evidence for the diverse Native American cultures of Wisconsin over the past 12,000 years.

**Requisites:** Junior standing**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ANTHRO/AMER IND 355 – ARCHAEOLOGY OF EASTERN NORTH AMERICA**

3 credits.

Learn about the great diversity of Native American cultures in eastern North America, with an emphasis on those of the Midwest and Southeast. More than twelve thousand years of accommodations to diverse natural and social environments are covered, starting with archaeological evidence for and oral traditions describing the initial peopling of the Americas and ending with the European invasion and interactions with the Native Americans of the Eastern Woodlands.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate a grasp of fundamental knowledge about the Native American ancient past (and aspects of the present) in eastern North America with a focus on the Southeast and Midwest, including the complexities of the deep history of Native Americans, the important and often invisible contributions of Native culture and peoples to our lives today, and the value of heritage preservation

Audience: Both Grad &amp; Undergrad

2. Explain how archaeologists build empirical inferences about past human societies and use different theoretical perspectives to guide their interpretations

Audience: Both Grad &amp; Undergrad

3. Build an informed and individualized perspective on the full span of Native American history in eastern North America and archaeology that might carry over into your professional life or influence your attitude toward historic preservation

Audience: Both Grad &amp; Undergrad

4. Compare and contrast multiple perspectives on the past and present with reference to evidence

Audience: Undergraduate

5. Analyze, evaluate, and synthesize complex information learned in the class and through independent research

Audience: Graduate

6. Improve the effectiveness with which you participate in our multicultural society

Audience: Undergraduate

7. Recognize history's impact on the present

Audience: Undergraduate

8. Assess the myths, stereotypes, and assumptions about ancient and present-day Native Americans

Audience: Both Grad &amp; Undergrad

**ANTHRO 357 – INTRODUCTION TO THE ANTHROPOLOGY OF JAPAN**

3-4 credits.

Japanese culture from anthropological perspectives. Emphasis on the order of meaning which serves both as model for and model of the day-to-day behavior and thought processes of the Japanese.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ANTHRO/LACIS 361 – ELEMENTARY QUECHUA**

4 credits.

Phonology and morphology; concentration on the acquisition of conversational skills; reading of texts of graded difficulty.

**Requisites:** None**Course Designation:** Frgn Lang – 1st semester language course

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ANTHRO/LACIS 362 – ELEMENTARY QUECHUA**

4 credits.

Continued introduction to phonology and morphology; concentration on the acquisition of conversational skills; reading of texts of graded difficulty.

**Requisites:** LACIS/ANTHRO 361**Course Designation:** Frgn Lang – 2nd semester language course

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ANTHRO/LACIS 363 – INTERMEDIATE QUECHUA**

4 credits.

Advanced morphology and syntax; advanced conversation and composition; cultural background of Quechua speaking peoples through reading of myths, legends and folktales.

**Requisites:** LACIS/ANTHRO 362**Course Designation:** Frgn Lang – 3rd semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**ANTHRO/LACIS 364 – ADVANCED QUECHUA**

4 credits.

Continuation of advanced conversation and composition; cultural background of Quechua-speaking peoples through reading of myths, legends, folktales; problems in dialectology.

**Requisites:** LACIS/ANTHRO 363**Course Designation:** Frgn Lang – 4th semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ANTHRO 365 – MEDICAL ANTHROPOLOGY**

3 credits.

The ecology of health and disease in human cultures; health-related social systems and behavior cross-culturally; practical implications of medical anthropology for improving the health of specific populations.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2016**ANTHRO 370 – FIELD COURSE IN ARCHAEOLOGY**

3-6 credits.

An introduction to the techniques of field archaeology, including site survey, mapping, and excavation by participation in an actual, off-campus archaeological field project. Also instruction in the description and analysis of artifacts. Includes full-time, off-campus, on-site excavation work, which typically takes place outside of Madison. Excavation sites vary.

**Requisites:** ANTHRO 102, 212, 321, 322, or graduate/professional standing**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2024**ANTHRO/LACIS 376 – FIRST SEMESTER YUCATEC MAYA**

4 credits.

Introduction to Yucatec Maya language. Focus on acquiring vocabulary and grammar for basic conversational proficiency. Taught through in-class oral and aural exercises, language tapes, and primary texts. Learn about Maya culture, history, folklore, and language politics.

**Requisites:** None**Course Designation:** Breadth – Humanities

Frgn Lang – 1st semester language course

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**ANTHRO/LACIS 377 – SECOND SEMESTER YUCATEC MAYA**

4 credits.

Continued introduction to Yucatec Maya language. Focus on acquiring vocabulary and grammar for basic conversational proficiency. Taught through in-class oral and aural exercises, language tapes, and primary texts. Learn about Maya culture, history, folklore, and language politics.

**Requisites:** LACIS/ANTHRO 376**Course Designation:** Breadth – Humanities

Frqn Lang – 2nd semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ANTHRO 391 – BONES FOR THE ARCHAEOLOGIST**

3 credits.

An introduction to the principles and techniques in the identification and interpretation of animal bones. Includes analysis of an archaeological bone assemblage.

**Requisites:** ANTHRO 102, 212, 321, 322, or graduate/professional standing**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ANTHRO 405 – INTRODUCTION TO MUSEUM STUDIES IN ANTHROPOLOGY**

3 credits.

Provides a comprehensive understanding of the policies, procedures, and ethics pertaining to the development, management, and exhibition of anthropology collections. This includes an overview of the establishment, history, and laws governing anthropology collections and collections management methods used specifically for archaeological artifacts, ethnographic objects, and bioanthropological specimens. Ideal for those interested in natural history museums, museum studies, or the museum profession.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe legal, ethical, and social issues that have guided the establishment and evolution of anthropology collections in the United States.

Audience: Undergraduate

2. Explore anthropological research and ethical policies and practices by demonstrating globally-accepted methods that form an effective collections management program.

Audience: Undergraduate

3. Speak and write critically about curation policies and collections care, including drawing from personal experiences outside of the classroom setting.

Audience: Undergraduate

4. Operationalize the knowledge and skills taught in this course in a real-life setting through completion of a community-based learning project.

Audience: Undergraduate

**ANTHRO/BOTANY/ZOOLOGY 410 – EVOLUTIONARY BIOLOGY**

3 credits.

Evolutionary biology, emphasizing how modern scientists study evolution. Topics include: nature and mechanisms of microevolution, macroevolution, adaptation, speciation; systematics and taxonomy; quantitative genetics and measurement of natural selection; phylogenetic analyses of behavior, physiology, morphology, biochemistry; current controversies in evolution.

**Requisites:** ZOOLOGY/BIOLOGY 101, BIOLOGY/BOTANY 130, ZOOLOGY/BIOLOGY/BOTANY 152, BIOCORE 381, (ANTHRO 105 and satisfied QR-A requirement), or graduate/professional standing**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**ANTHRO 411 – THE EVOLUTION OF THE GENUS, HOMO**

3 credits.

Human evolution beginning with the Pliocene appearance of our genus, Homo, and ending with the worldwide spread of modern Homo sapiens throughout the world.

**Requisites:** ANTHRO 105, 302, or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ANTHRO 415 – THE ANTHROPOLOGICAL STUDY OF CHILDREN & YOUTH**

3 credits.

Uses the conceptual tools of cultural anthropology to explore the wide range of children's and youths' experiences outside of and beyond school.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**ANTHRO 420 – INTRODUCTION TO PRIMATOLOGICAL RESEARCH**

3 credits.

Supervised research on topics selected by students. Independently design a research project, synthesize methods and empirical results, and report one's findings. Develop the skills necessary for independent research in Primatology.

**Requisites:** ANTHRO 100, 105, PSYCH 450, or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ANTHRO 424 – HISTORICAL ANTHROPOLOGY**

3 credits.

An introduction to historical approaches in anthropology: topics covered include early theories, evolutionism, ethnohistory, culture change, ritual and symbolic transformation, indigenous/oral histories, conceptions of time and the analysis of texts and visual images.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ANTHRO/LINGUIS 430 – LANGUAGE AND CULTURE**

3-4 credits.

The relationship of language as a communication system to the culture transmitted by it. Principle problems in the interrelations of language and nonlinguistic human behavior.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ANTHRO/AMER IND/FOLKLORE/GEN&WS 437 – AMERICAN INDIAN WOMEN**

3 credits.

Examines and interprets the roles of American Indian women in traditional societies, and in contemporary North America.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ANTHRO/GEN&WS 443 – ANTHROPOLOGY BY WOMEN**

3 credits.

Contributions of women anthropologists to feminist and anthropological theories and research methods. Field research and gender. Current debates in women's studies and anthropology in light of recent research on women and gender in cross-cultural perspective.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ANTHRO 453 – STUDY ABROAD: TOPICS IN ARCHAEOLOGY**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2001

### **ANTHRO 454 – STUDY ABROAD: TOPICS IN BIOLOGICAL ANTHROPOLOGY**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

### **ANTHRO 455 – STUDY ABROAD: TOPICS IN CULTURAL ANTHROPOLOGY**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2001

### **ANTHRO 456 – SYMBOLIC ANTHROPOLOGY**

3-4 credits.

The study of society through the analysis of symbolic systems. Myth, cosmology, ritual, political symbolism, the symbolic study of kinship, symbols and social change.

**Requisites:** ANTHRO 104 and junior standing, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **ANTHRO 458 – PRIMATE BEHAVIORAL ECOLOGY**

3 credits.

Primate behavior examined from an evolutionary and ecological perspective, focusing on adaptations to the social and nonsocial environment. Topics include: nepotism, reciprocity, competition, cooperation, sex differences, the ecological role of primates in their communities, cognition, and conservation. Considers the major threats to primates today, and how behavioral adaptations and anthropogenic variables interact to affect the future survival of primates at local, regional, and global scales.

**Requisites:** ANTHRO 105, ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY/BIOLOGY 101, (BIOCORE 381 and 382), ZOOLOGY/BOTANY/ENVIR ST 260, ZOOLOGY/ENVIR ST/F&W ECOL 360, PSYCH 450, or graduate/professional standing

**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate knowledge about primate behavior and ecology and the major threats to primate survival

Audience: Both Grad & Undergrad

2. Compare models of past and present diversity of primates as well as evolutionary and ecological models of primate behavioral and ecological adaptations, including primate cognition, life histories, and community ecology, and their conservation status

Audience: Both Grad & Undergrad

3. Critically evaluate theoretical predictions about primate behavioral and ecological adaptations using examples derived from empirical studies of primates

Audience: Both Grad & Undergrad

4. Apply informed perspectives about the potential and constraints on primates to adapt in a rapidly changing world

Audience: Both Grad & Undergrad

5. Demonstrate capacity to research and critically evaluate contemporary knowledge by producing a concise, synthetic written review of the importance of new empirical studies on a topic of choice

Audience: Graduate

6. Apply principles of primate adaptive flexibility to ethical methods of research in primate behavioral ecological, behavioral genetics, behavioral endocrinology, microbiomes, and behavioral energetics

Audience: Both Grad & Undergrad

**ANTHRO/AMER IND/BOTANY 474 – ETHNOBOTANY**

3–4 credits.

Study of the interactions between human cultures and plants. Topics include: traditional resource management and agriculture; crop domestication, evolution, and conservation; archaeobotany; indigenous knowledge; folk taxonomy; plants in symbolism and religion; dietary patterns; phytochemistry; global movement of plants and peoples.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Biological Science or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ANTHRO 477 – ANTHROPOLOGY, ENVIRONMENT, AND DEVELOPMENT**

3 credits.

Identifies and examines cultural and environmental factors which should be taken into account in planning effective development. Case studies of development programs in less developed countries. Possible contributions of anthropologists and environmental scientists in planning, implementing, and evaluating development programs.

**Requisites:** ANTHRO 100, 104, or graduate/professional standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2021**ANTHRO 490 – UNDERGRADUATE SEMINAR**

3 credits.

Discussion and preparation of reports on specific topics indicated by changing title of seminar.

**Requisites:** Junior standing and declared in the Anthropology undergraduate program or Archaeology undergraduate certificate**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ANTHRO 545 – PSYCHOLOGICAL ANTHROPOLOGY**

3 credits.

Survey of psychologically oriented approaches in cultural anthropology: ethnopsychiatry, the ethnography of emotion, conceptions of the self, cognitive development, and culturally defined deviance and mental illness.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ANTHRO/ED POL 570 – ANTHROPOLOGY AND EDUCATION**

3 credits.

An exploration of the foundational concepts and methods of educational anthropology. Examines anthropological inquiry on educational research with particular reference to cultural perspectives on education and educational systems, learning as cultural transmission, and application of anthropological knowledge to curriculum.

**Requisites:** Junior standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate an understanding of the social, cultural, and/or historical contexts of education policy.

Audience: Both Grad &amp; Undergrad

2. Analyze education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference.

Audience: Both Grad &amp; Undergrad

3. Write clearly and compellingly for diverse audiences about complex topics in educational policy.

Audience: Both Grad &amp; Undergrad

4. Utilize social and cultural research theories and methodologies to articulate perspectives and viewpoints

Audience: Graduate

**ANTHRO 603 – SEMINAR IN EVOLUTIONARY THEORY**

3 credits.

Examination of theory relevant to the evolution of humans and nonhuman primates including morphological, behavioral, and genetic aspects.

**Requisites:** ANTHRO 105, ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY/BIOLOGY 101, F&W ECOL/ENVIR ST/ZOOLOGY 360, BIOCORE 382, ZOOLOGY/BOTANY/ENVIR ST 260, ZOOLOGY/ANTHRO/BOTANY 410, or graduate/professional standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2021

### **ANTHRO 605 – SEMINAR-CURRENT PROBLEMS IN PALEOANTHROPOLOGY**

3 credits.

Current research with attention to the evolutionary biology of humans and fossil human relatives.

**Requisites:** ANTHRO 105, ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY/BIOLOGY 101, F&W ECOL/ENVIR ST/ZOOLOGY 360, BIOCORE 382, ZOOLOGY/BOTANY/ENVIR ST 260, ZOOLOGY/ANTHRO/BOTANY 410, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

### **ANTHRO/PSYCH/ZOOLOGY 619 – BIOLOGY OF MIND**

3 credits.

Origins and structures of mind, brain, and consciousness. Transitions from early mammalian through primate to hominid intelligence. Genetics and plasticity in brain development. Modern studies of human brain mechanisms and consciousness.

**Requisites:** Junior standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **ANTHRO 659 – ANTHROPOLOGY FROM COLONIALISM TO DECOLONIALITY**

3 credits.

Surveys both theoretical and ethnographic writing from the 1970s to the present in order to critically examine anthropology's ongoing efforts to decolonize. How have anthropologists confronted their discipline's colonial history? How have they integrated theories and insight from subaltern, postcolonial, and decolonial scholars? How can anthropologists ensure that they continue to decolonize their methods?

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the epistemological and political consequences of anthropology's historical entanglements with European colonialism.

Audience: Graduate

2. Synthesize the contributions of subaltern, postcolonial, and decolonial studies scholars.

Audience: Graduate

3. Assess anthropologists' contributions to postcolonial and decolonial scholarship.

Audience: Graduate

4. Critically reflect on the current debates in anthropology and the calls to decolonize the discipline.

Audience: Graduate

5. Identify how your own position and upbringing influence how you learn, what you learn, and how you conduct research.

Audience: Graduate

6. Integrate decolonial ethnographic methods into your own research.

Audience: Graduate

### **ANTHRO 668 – PRIMATE CONSERVATION**

3 credits.

Evaluates the conservation status of non-human primates, and considers why different species are vulnerable to different kinds of threats. The ways in which regional and global conservation policies are developed and implemented will also be discussed.

**Requisites:** ANTHRO 458, PSYCH 450, ZOOLOGY/ENVIR ST/F&W ECOL 360, ZOOLOGY/ANTHRO/BOTANY 410, ZOOLOGY/BOTANY/F&W ECOL 460, or graduate/professional standing

**Course Designation:** Breadth - Either Biological Science or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ANTHRO 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ANTHRO 682 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ANTHRO 690 – PROBLEMS IN ANTHROPOLOGY**

3-4 credits.

Independent research in specific problems in physical anthropology, archaeology, or cultural anthropology; under supervision.

**Requisites:** Junior standing and (declared in Anthropology undergraduate program or Archaeology undergraduate certificate), or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ANTHRO 691 – SENIOR THESIS**

2 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ANTHRO 692 – SENIOR THESIS**

2 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ANTHRO 696 – ARCHAEOLOGICAL METHODS OF CURATION**

1-3 credits.

Practicum in the curation of prehistoric stone, bone, and ceramics. Involves handling materials, identification of artifacts, conservation techniques, preparation of materials for storage or display.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ANTHRO 698 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**ANTHRO 699 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ANTHRO/ART HIST/DS/HISTORY/LAND ARC 764 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ANTHRO 801 – PROFESSIONAL DEVELOPMENT IN ANTHROPOLOGY PROSEMINAR**

1 credit.

Learn how to navigate graduate education and graduate-level research in anthropology while avoiding unnecessary pitfalls. Hone essential skills required for graduate school and careers.

**Requisites:** Declared in Anthropology MA, MS, PHD, or doctoral minor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the major elements of an academic CV, and leave with a plan for keeping yours updated.

Audience: Graduate

2. Describe the function of a dissertation committee, and have a list of possible committee members generated.

Audience: Graduate

3. Draft and revise a sample application for a pre-dissertation research grant, targeted for an actual possible funder.

Audience: Graduate

4. Give, receive, and use peer reviews

Audience: Graduate

5. Create a plan to develop, submit, and revise an academic article.

Audience: Graduate

6. Prepare for professional life during and after graduate school.

Audience: Graduate

### **ANTHRO 860 – HISTORY OF ANTHROPOLOGICAL THEORY**

3 credits.

Intellectual history of the major theoretical debates and key figures in cultural anthropology up to the 1960's.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **ANTHRO 900 – FUNDAMENTALS OF ANTHROPOLOGICAL THEORY**

3 credits.

Fundamentals of anthropological thought using a cross-section of basic works in social science. Emphasizes discussion, critical analysis, and development of professional writing skills.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ANTHRO/PSYCH 906 – METHODS AND HYPOTHESIS-TESTING FOR BEHAVIORAL ECOLOGISTS**

1-3 credits.

A detailed overview of field methods for behavioral ecologists, focusing specifically on behavioral and ecological sampling techniques. It addresses the challenging process of situating an empirical study within the context of theoretical paradigms.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

### **ANTHRO 909 – RESEARCH METHODS AND RESEARCH DESIGN IN CULTURAL ANTHROPOLOGY**

3 credits.

Theoretical and practical aspects of ethnographic research; history of field research in anthropology; research design issues; writing proposals; the fieldwork experience; methods of field data collection; ethical issues; data interpretation and analysis; writing ethnography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **ANTHRO 917 – GLOBALIZATION AND TRANSNATIONAL CULTURES**

3 credits.

Reviewing the current state of anthropological studies of globalization and examining various approaches taken to the subject. Focusing on works that conceptualize and theorize the transnational culture and ethnographies that represent and explore its multiplicity and complexity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **ANTHRO/GEN&WS 920 – ANTHROPOLOGY OF GENDER**

3 credits.

Theoretical and ethnographic approaches to the anthropology of gender, focusing on current works. Topics include sexual inequality, research methods, gender and history, gender and ethnographic writing, cultural constructions of masculinity, sexuality, and gender studies and anthropological theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ANTHRO/C&E SOC/ECON/SOC 925 – SEMINAR: SOCIO-ECONOMIC CHANGE IN UNDERDEVELOPED AREAS**

2-3 credits.

Social and economic factors relating to stability, growth, and change in the non-Western areas of the contemporary world.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ANTHRO 940 – SEMINAR-PROBLEMS IN CULTURAL ANTHROPOLOGY**

3 credits.

Current anthropological literature and methods. Assigned problems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ANTHRO 942 – SEMINAR-ARCHAEOLOGICAL PROBLEMS**

3 credits.

Current literature and methods and work on assigned problems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ANTHRO/ED POL 970 – SEMINAR IN ANTHROPOLOGY AND EDUCATION**

3 credits.

Anthropological theory, methodology, and field techniques with specific reference to school ethnography and cross-cultural studies of socialization and education. Topics vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**ANTHRO/A A E/C&E SOC/GEORG/HISTORY/LACIS/POLI SCI/PORTUG/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA**

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ANTHRO/AFRICAN/ECON/GEORG/HISTORY/POLI SCI 983 – INTERDEPARTMENTAL SEMINAR IN AFRICAN STUDIES TOPICS**

3 credits.

Interdisciplinary inquiry in African societies and cultures.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop in-depth knowledge in a sub-field of specialization within African studies

Audience: Graduate

2. Acquire and demonstrate understanding of major theories, approaches, concepts, currently informing African studies

Audience: Graduate

3. Understand your process of learning and possess the capacity to intentionally seek, evaluate, and learn from information, and to recognize and reduce bias in thinking.

Audience: Graduate

4. Gain firm knowledge of existing research in African studies

Audience: Graduate

5. Develop and improve speaking, readings, listening, and writing skills

Audience: Graduate

6. Write and speak across disciplinary boundaries

Audience: Graduate

7. Analyze texts from various theoretical and critical perspectives

Audience: Graduate

**ANTHRO 990 – RESEARCH AND THESIS**

1-3 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ANTHRO 999 – READING AND RESEARCH**

1-9 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

# APPLIED BIOTECHNOLOGY (ABT)

## ABT 700 – PRINCIPLES OF BIOTECHNOLOGY

3 credits.

Principles and techniques pertaining to biotechnology and its applications to our society. Survey of classical and emerging techniques.

**Requisites:** Declared in Applied Biotechnology program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Appraise the applications of biotechnology to various industrial settings.

Audience: Graduate

2. Demonstrate general understanding on the key concepts and assess the technologies that impact current biotechnology developments.

Audience: Graduate

3. Demonstrate understanding pertaining to genes, genomes and their organizations, gene expression, genetic variation and genetic engineering.

Audience: Graduate

4. Compare various biotechnologies approaches and recommend appropriate strategies for problem solving.

Audience: Graduate

5. Critique biotechnology-related journal articles and appraise the broader impacts of such studies.

Audience: Graduate

6. Demonstrate the ability to synthesize ideas to solve given problems and write scientific reports in the area of biotechnology.

Audience: Graduate

## ABT 705 – ETHICS, SAFETY, AND REGULATORY ENVIRONMENTS IN BIOTECHNOLOGY

3 credits.

Ethical and safety concerns in development, production, funding, and application of biotechnology. Analysis of socioeconomic impacts. Understanding the importance of data integrity. Overview of risk assessment and management in a regulatory environment designed to ensure safety of workers, study subjects, and patients, and protect intellectual property, data, and the environment.

**Requisites:** Declared in Applied Biotechnology program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Critically assess workplace and research situations that may lead to ethical conflicts of interest and demonstrate appropriate responses.

Audience: Graduate

2. Identify regulatory agencies and recommendation bodies that inform and/or enforce areas of ethical oversight in both the US and abroad.

Audience: Graduate

3. Obtain and interpret primary documentation from regulatory bodies.

Audience: Graduate

4. Analyze and assess the costs and benefits of different regulatory frameworks.

Audience: Graduate

5. Communicate regulatory information to others in a professional capacity.

Audience: Graduate

**ABT 710 – PROFESSIONAL AND TECHNICAL COMMUNICATION IN BIOTECHNOLOGY**

3 credits.

Application and analysis of professional scientific communication, both written and oral. Focuses on designing documents that convey complex, data-rich technical and scientific content to audiences with diverse information needs using a variety of professional genres, including reports, proposals, presentations, and documentation.

**Requisites:** Declared in Applied Biotechnology program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate technical and scientific information in biotechnology contexts

Audience: Graduate

2. Evaluate and select the most appropriate communication strategies (modalities, methods, tools, and practices) to convey complex ideas effectively to diverse audiences

Audience: Graduate

3. Demonstrate effective listening, written, verbal, and nonverbal communication skills

Audience: Graduate

4. Design and deliver effective professional presentations

Audience: Graduate

5. Analyze and integrate scientific literature into a variety of professional genres

Audience: Graduate

**ABT 715 – TECHNIQUES IN BIOTECHNOLOGY**

3 credits.

Application of biological and chemical methods to modern biotechnological product development. Overview of analysis techniques used to characterize products and evaluate quality and safety. Exploration of technological pipeline from conception to market, including proof-of-concept assessment, pre-clinical trials, clinical trials, and post-production testing.

**Requisites:** ABT 700

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Outline proper experimental design, experimental controls, and quality controls for proper quantitative experimental design

Audience: Graduate

2. Identify and interpret basic statistical methods and their outcomes in experimental data

Audience: Graduate

3. Summarize the phases of product development, testing, and commercialization

Audience: Graduate

4. Compare classical and emerging technologies for the identification and characterization of biotechnological products

Audience: Graduate

5. Analyze product safety and efficacy

Audience: Graduate

6. Employ knowledge of biotechnological safety and efficacy requirements to assess the commercialization potential of a product

Audience: Graduate

7. Critique existing product development processes using technological information on the safety and efficacy of the product

Audience: Graduate

8. Interpret data from product testing to assess viability of product for commercialization

Audience: Graduate

9. Apply appropriate technologies to analyze biotechnological products

Audience: Graduate

## ABT 720 – EXPERIMENTAL DESIGN AND ANALYSIS IN BIOTECHNOLOGY

3 credits.

Principles of descriptive and inferential statistics with applications in biotechnology including experimental design, quantitative data analysis, and bioinformatic evaluation of complex molecular and biological data sets.

**Requisites:** Declared in MS Applied Biotechnology or Capstone Certificate in Applied Bioinformatics

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply statistical methods that are commonly used in experimental design in biotechnology research

Audience: Graduate

2. Explain the rationale behind statistical procedures as it relates to experimental design

Audience: Graduate

3. Select an appropriate statistical method and design experiments for a given experimental question

Audience: Graduate

4. Implement statistical procedures using software, especially R and RStudio

Audience: Graduate

5. Implement bioinformatic methods using a set of software tools

Audience: Graduate

6. Communicate statistical findings in biotech research to stakeholders

Audience: Graduate

## ABT 725 – LEADERSHIP IN ORGANIZATIONS

3 credits.

Focuses on strategies and tools that managers use to maximize employee contribution and create organizational excellence. Basic business and leadership principles. Best practices to overcome biases that inhibit organizations and teams from communicating effectively. Examples will come from diverse biotechnology fields, including pharmaceuticals, agriculture, and biotechnology services.

**Requisites:** Declared in Applied Biotechnology program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Evaluate technical, human and cultural factors contributing to an organization's readiness for significant change, and for success or failure of previous or current change processes.

Audience: Graduate

2. Create organizational change vision, mission, and objectives by creating dialogue among stakeholders and incorporating diverse perspectives and objectives

Audience: Graduate

3. Develop change process and strategy to achieve biotechnology organizational objectives and communicate the need for organizational change and a vision for change.

Audience: Graduate

4. Develop a systems perspective and identify the ways in which organizational behavior, structure and culture contribute to successful organizational change.

Audience: Graduate

5. Clarify why leaders lose their way and develop the self-awareness needed to avoid derailment.

Audience: Graduate

6. Gain clarity about their leadership principles, values, and ethical boundaries, and how they will respond under pressure when challenged.

Audience: Graduate

7. Implement their leadership and empower other leaders, while they are optimizing their leadership effectiveness.

Audience: Graduate

8. Create a Personal Leadership Development Plan.

Audience: Graduate

**ABT 730 – PYTHON FOR BIOINFORMATICS**

3 credits.

Introduce diverse strategies for computational analysis of macromolecular data using Python including sequence alignment, genome annotation, data retrieval from databases, phylogenetic analysis, and molecular evolution. Experiential learning is emphasized; confidence in practical skills is developed through persistent application of course content to projects focused on current problems in bioinformatic research.

**Requisites:** Declared in MS Applied Biotechnology or Capstone Certificate in Applied Bioinformatics

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Select appropriate computational strategies for the analysis of genomic, transcriptomic, proteomic, and metabolomic data.

Audience: Graduate

2. Implement analyses of large datasets and model relationships among elements of very complex systems.

Audience: Graduate

3. Use python programming strategies to solve problems in bioinformatics.

Audience: Graduate

4. Demonstrate the ability to integrate python programming strategies with complementary resources, especially UNIX, GitHub, and libraries.

Audience: Graduate

**ABT 735 – QUALITY CONTROL AND VALIDATION**

3 credits.

Focuses on the importance of quality control and validation in biotechnology product design, development, and manufacturing. Explores quality systems and documentation, global quality standards, and methods for assessing validation including installation, operational, and performance qualifications. Overviews biomanufacturing processes, automation, and cGMP practices necessary to meet quality standards.

**Requisites:** ABT 700, 705, and 710

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe and contrast various quality systems and how Quality by Design is implemented in biotechnology

Audience: Graduate

2. Appraise the current quality standards that are used in the US and abroad

Audience: Graduate

3. Compare the Current Good Practices that are required in biotechnology product development (cGMPs) and assess how they are implemented

Audience: Graduate

4. Describe the key aspects of CMC (Chemistry, Manufacturing, and Controls) and how they impact biotechnology product development

Audience: Graduate

5. Design a biomanufacturing process including upstream and downstream processes

Audience: Graduate

6. Justify the importance of validation (IQ/OQ/PQ) and risk assessment and reduction in biotechnology

Audience: Graduate

7. Explain the importance of facilities, equipment, and utilities in biotechnology

Audience: Graduate

**ABT 740 – REGULATORY PRACTICE AND COMPLIANCE**

3 credits.

Identifies and examines the key regulatory agencies and practices that govern the highly regulated and diverse biotechnology industry, both domestically and internationally. Highlights current and emerging FDA and ICH regulations and guidance documents to successfully navigate meeting with the agencies and to submit required documentation for successful product development.

**Requisites:** ABT 700, 705, and 710

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe and contrast the FDA, ICH, EMA, and Japanese PMDA

Audience: Graduate

2. Justify the importance of regulatory affairs in biotechnology

Audience: Graduate

3. Develop a meeting and communication strategy for interacting with the FDA and submitting appropriate documentation

Audience: Graduate

4. Analyze the regulations that impact drug and biologics development, medical devices and diagnostics, agricultural biotechnology, and industrial biotechnology

Audience: Graduate

5. Analyze and compare nonclinical and clinical testing and the regulations that govern the use of animals and humans in research

Audience: Graduate

6. Describe genome editing and regulatory considerations that impact its applications in agriculture and humans

Audience: Graduate

**ABT 745 – INDUSTRIAL APPLICATIONS IN REGULATORY AFFAIRS**

3 credits.

Examines regulatory environments in risk-based assessment of biotechnological developments in industry, agriculture, and probiotics ensuring consumer and environmental protection. Addresses how validation is essential to the incorporation of emerging technologies into viable, accessible, and successful products. Highlights the stakeholders' role in regulatory oversight and policy through relevant industry case studies.

**Requisites:** ABT 700, 705, and 710

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the foundations and history of industrial, agricultural, and probiotic biotechnology.

Audience: Graduate

2. Identify and discuss historical and current participants, both national and global, in the development of agricultural biotechnology traits, probiotics, and industrial biotechnology products.

Audience: Graduate

3. Explain the national and global regulatory process and compliance issues for probiotic and industrial biotechnology products.

Audience: Graduate

4. Describe key aspects involved in development of an agricultural regulatory product development plan.

Audience: Graduate

5. Identify and describe emerging technologies and companies that may impact future regulations.

Audience: Graduate

**ABT 750 – BIOTECHNOLOGY MARKETING AND ENTREPRENEURSHIP**

3 credits.

Examines marketing case studies in diverse areas of biotechnology. Addresses marketing fundamentals and strategies, communicating value proposition strategy, ethical and regulatory concerns, startup strategies, pharmaceutical marketing, b2b marketing, salesforce development, branding, and promotion. Culminates with the creation of a marketing plan/analysis.

**Requisites:** Declared in Applied Biotechnology program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Categorize fundamental concepts of marketing management

Audience: Graduate

2. Compare and Contrast marketing segmentation, innovation, and positioning in the bio-technology industry and related marketing channels

Audience: Graduate

3. Understand channel systems of marketing and simulate personal selling and customer satisfaction service

Audience: Graduate

4. Integrate advertising elements, publicity marketing, and sales promotion in a Business to Business (B2B) model

Audience: Graduate

5. Evaluate decisions leading to successful and unsuccessful biotechnology products

Audience: Graduate

6. Synthesize marketing plan for biotechnology products

Audience: Graduate

7. Demonstrate team work aspects and leadership attributes in marketing elements

Audience: Graduate

8. Integrate Data into the Marketing decision making model

Audience: Graduate

**ABT 755 – GLOBAL OPERATIONS AND SUPPLY CHAIN MANAGEMENT**

3 credits.

Focuses on the strategic importance of operations and supply chain to overall performance relevant to a variety of business processes specific to biotechnology. Topics include production, transportation, distribution systems, sourcing, and purchasing.

**Requisites:** Declared in Applied Biotechnology program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize and use terminology commonly used in the management of general supply chains

Audience: Graduate

2. Apply concepts to manage suppliers, production and distribution in biotech firms/industry

Audience: Graduate

3. Select and use appropriate quantitative and/or qualitative techniques to manage suppliers, production and distribution in biotech firms/industry

Audience: Graduate

4. Demonstrate ability to use technology, communication skills, and teamwork

Audience: Graduate

**ABT 760 – QUALITY AND PROJECT MANAGEMENT**

3 credits.

Quality and project management issues and roles during different phases from RD to market. Introduction to Installation qualification, operation qualification and process qualification (PQ). Project management phases: conceptualizing, planning, executing and closing. Project schedule and time management tools and techniques. Project requirements including quality assurance.

**Requisites:** ABT 720 and 725

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Justify the importance of quality management in biotechnology.

Audience: Graduate

2. Understand the IQ/OQ/PQ validation process.

Audience: Graduate

3. Demonstrate the role of quality assurance in product development

Audience: Graduate

4. Demonstrate the design for manufacturing, design for reliability, design for safety and design for sustainability concept

Audience: Graduate

5. Practice the key components to project management

Audience: Graduate

6. Understand the relationship of leadership to effective management to maximize outcomes

Audience: Graduate

7. Explain the implementation of ISO and HACCP system in biotechnology organizations as well as how to conduct auditing activities to evaluate the system compliance

Audience: Graduate

8. Use project management tools to support project management practices

Audience: Graduate

**ABT 765 – ASSESSING INNOVATION IN BIOTECHNOLOGY**

3 credits.

A survey of biotechnology assessments in areas such as regenerative medicine, agricultural biotechnology, and bioremediation. Course links disciplines with the critical evaluative role played by scientific discovery, market valuation, intellectual property, freedom-to-operate (FTO), and licensing strategy by assessing the role each played in the commercialization of a specific technology.

**Requisites:** ABT 700

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate effective listening, written, verbal, and nonverbal communication skills

Audience: Graduate

2. Evaluate and describe systems of product research, development, and production

Audience: Graduate

3. Analyze the potential for commercialization of innovations within the biotechnology industry

Audience: Graduate

4. Identify and provide evidence-based solutions to problems in compliance, product development, personnel, and finance

Audience: Graduate

5. Demonstrate understanding of relevant domestic and global regulatory agencies, laws, policies, and guidance

Audience: Graduate

6. Assess intellectual property considerations in biotechnology

Audience: Graduate

**ABT 770 – PRODUCT DEVELOPMENT**

3 credits.

Explores strategies in evaluating and implementing new technologies or products in the context of different bioindustries. Identifies considerations in product valuation, feasibility of production, scalability, and supply chain management. Models the process of business growth and innovation through integration of emerging technologies.

**Requisites:** ABT 700 and 715

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Outline the factors that inform valuation of a new technology and potential for product development

Audience: Graduate

2. Discuss biotic and abiotic considerations in the process design of different bioindustry production platforms

Audience: Graduate

3. Describe the purpose of Good Practice (GMP, GCP, GLP, etc.) standards in production and different modes through which these standards can be achieved

Audience: Graduate

4. Evaluate the pertinent regulatory standard and appropriate product quality assessments in bioindustry production pipelines

Audience: Graduate

5. Propose and defend a process design for production of a new technology in an existing or startup bioindustry model

Audience: Graduate

**ABT 775 – TOOLS FOR DATA ANALYSIS**

3 credits.

Using a variety of existing and emerging bioinformatics tools and computational methods, emphasizes hands-on experiences analyzing and interpreting large data sets (e.g. genomic, proteomic, microbiomics, interactome, target discovery). Evaluate and adapt existing computational approaches for specific use in solving a problem in biotechnology.

**Requisites:** ABT 700 and 715

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the revolution in big data related to advances in science and the bottlenecks the corresponding data analytics

Audience: Graduate

2. Explain how several disciplines and specialties within biotechnology analyze and interpret various datasets to address a biological question

Audience: Graduate

3. Develop practical bioinformatics skills applicable to various data types and biological studies

Audience: Graduate

4. Utilize and discriminate between various bioinformatics and data visualization tools to answer research question

Audience: Graduate

5. Construct and deliver effective professional written and oral presentations incorporating scientifically relevant outcomes from various data analytics

Audience: Graduate

**ABT 780 – BIOINFORMATIC INQUIRY**

3 credits.

Advances the development of competencies promoting efficient analysis of biological data. Emphasizes matching a research problem with the most effective tools for its completion, balancing use of existing software and de novo software development. Advanced aspects of Python and R, algorithmics, machine learning, simulations, and effective communication of results are emphasized.

**Requisites:** ABT 720 and 730

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement successful solutions to tasks in bioinformatics using existing software and newly developed code.

Audience: Graduate

2. Write R scripts and packages, including formulation of new R classes.

Audience: Graduate

3. Create helpful, user-defined classes in Python.

Audience: Graduate

4. Implement knowledge of algorithmics to write elegant solutions to bioinformatics tasks.

Audience: Graduate

5. Interface with a MySQL database in Python.

Audience: Graduate

6. Simulate biological data to use as a null distribution for novel test statistics.

Audience: Graduate

7. Decide when machine learning methods are appropriate to a task in bioinformatics.

Audience: Graduate

8. Use GitHub to effectively share new software and manage version control.

Audience: Graduate

9. Communicate complicated methodology and results to a variety of stakeholders.

Audience: Graduate

**ABT 785 – APPLICATION OF BIOINFORMATICS**

3 credits.

Exploration and application of existing bioinformatic tools. Implementation of pre-coded solutions to data acquisition, wrangling, analysis, visualization, and structural modeling problems. Complete a project that generates a multi-system workflow to solve bioinformatic problems.

**Requisites:** ABT 720 and 730

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and demonstrate use of existing databases for genomic, transcriptomic, proteomic, and metabolomics analysis

Audience: Graduate

2. Describe construction and limitations for existing databases

Audience: Graduate

3. Identify and demonstrate existing tools for sequence analysis

Audience: Graduate

4. Identify and critique methods and tools for annotation of genomes and phylogentic analysis

Audience: Graduate

5. Identify and critique methods for assigning protein structure and function and metabolite profiles

Audience: Graduate

6. Describe and select best practices in adapting and editing existing tools

Audience: Graduate

7. Identify methods for developing multi-tool workflows; build, analyze, and critique functional workflows

Audience: Graduate

**ABT 789 – PRE-CAPSTONE**

1 credit.

Prepares the student for applied self-directed capstone experience. Addressing problem identification, research, and project formulation. Culminates in an oral and written proposal with project schedule.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Identify a problem the individual capstone project will address

Audience: Graduate

2. Integrate scientific knowledge and professional skill development accrued through research, didactic learning, and professional networking  
Audience: Graduate

3. Develop a well-articulated, focused project  
Audience: Graduate

4. Present a project proposal in a professional manner to one's peers  
Audience: Graduate

**ABT 790 – CAPSTONE**

3 credits.

Complete a project (report, business plan, program, etc.) in an area of quality assurance and compliance, business and management, and/or research and development. Culminating in a substantive body of work, executive summary, and reflection. Networking and communication in a professional capacity is expected.

**Requisites:** ABT 789**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Integrate scientific knowledge and professional skill development accrued through research, didactic learning, and professional networking, to achieve fruition of a project  
Audience: Graduate

2. Develop a well-articulated written paper and summation of the capstone  
Audience: Graduate

3. Reflect upon the capstone experience  
Audience: Graduate

**ART DEPARTMENT (ART)****ART 100 – INTRODUCTION TO ART**

3 credits.

Seek answers to the fundamental question "What is art?" from multiple perspectives such as historical, theoretical, critical, conceptual, formal, and experiential. Develop visual literacy, sophisticated observational skills and a formal language to assist in the interpretation of objects and experiences in the context of art. Through both theory and practice, develop an understanding of the ways artists arrive at the ideas that inform their creative processes. Includes a survey of developments in art media and looks broadly at art movements, trends and styles throughout history and in varied world cultures.

**Requisites:** Not open to students declared in Art BS, Art BFA, or Art Education BS**Course Designation:** Breadth - Humanities  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Identify major functions, themes, and styles in the visual arts from pre-history to the present.

Audience: Undergraduate

2. Recognize the formal elements and design principles in works of art and analyze their effect on interpretation and meaning.  
Audience: Undergraduate

3. Conduct technical exercises as well as open-ended experiments with art tools and media to determine how to articulate an idea visually and conceptually.  
Audience: Undergraduate

4. Demonstrate habits for researching, analyzing and creating artworks.  
Audience: Undergraduate

5. Communicate the role of art and artists to the larger society.  
Audience: Undergraduate

6. See oneself as an active participant in the art world.  
Audience: Undergraduate

**ART 102 – 2D FOUNDATIONS**

3 credits.

Application of 2D design principles for image creation and graphic arrangement, with both analog and digital skills. Provides skillsets for 2D-related content, such as photography, graphic design, drawing, painting, and printmaking.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Conduct research to generate multiple solutions to two-dimensional design problems and to inform artistic decisions.

Audience: Undergraduate

2. Gain competency with creative problem solving in digital formats such as Adobe Illustrator, InDesign, and Photoshop and in analog formats such as ink, pencil and collage.

Audience: Undergraduate

3. Analyze and critique two-dimensional work based on the relationship between subject matter, form, and content.

Audience: Undergraduate

4. Explore 2D design within its historical and contemporary contexts through readings, research, artist presentations and/or discussion.

Audience: Undergraduate

**ART 104 – 3D FOUNDATIONS**

3 credits.

Uses hands-on problem solving to develop an informed understanding of the creation of objects in three dimensions. Provides foundational skillsets for sculpture, ceramics, wood, glass, and metals.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Define and apply the terminology, elements, and principles of three-dimensional design.

Audience: Undergraduate

2. Ideate, execute, and iterate three-dimensional objects with a variety of materials, tools, and techniques.

Audience: Undergraduate

3. Demonstrate an understanding of the relationship between form, subject matter and content as they relate to three-dimensional objects and the spaces they inhabit.

Audience: Undergraduate

4. Perform safe and effective studio practices with a variety of tactile materials, hand tools and basic construction techniques.

Audience: Undergraduate

5. Critically analyze one's work and the work of one's peers using appropriate three-dimensional design terminology.

Audience: Undergraduate

6. Successfully engage in collaborative learning through group activities, discussions, and critiques.

Audience: Undergraduate

**ART 107 – INTRODUCTION TO DIGITAL FORMS**

3 credits.

An introduction to a range of digital media techniques for artists and designers, including digital imaging, vector graphics, web design and 3D digital modeling. Emphasis on creative development along with technical skill building.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025**ART 108 – FOUNDATIONS OF CONTEMPORARY ART**

3 credits.

Artists' formal, technical and expressive concerns; the principal ideas of movements which have significantly influenced the major tendencies in contemporary art.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**ART 112 – DRAWING FOR NON-ART MAJORS**

3 credits.

Introduction to basic drawing. Core elements of drawing such as the use of line, shape, composition, space, perspective, value, and texture. Provides foundational skillsets for drawing.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define and apply the elements of art and the principles of design in drawing construction.

Audience: Undergraduate

2. Demonstrate observational and perceptual skills, translating three-dimensional forms in space into two-dimensions using the formal elements of drawing.

Audience: Undergraduate

3. Explore historical and contemporary drawing media and techniques.

Audience: Undergraduate

4. Critically analyze their work and the work of classmates using appropriate terminology related to the elements and principles of drawing.

Audience: Undergraduate

5. Practice a variety of research methods to structure and contextualize drawing projects.

Audience: Undergraduate

**ART 176 – DIGITAL PHOTOGRAPHY FOR NON-ART MAJORS**

4 credits.

Introduction to the tools, techniques and concepts of digital photography. An emphasis will be placed on the digital photography workflow beginning with composition and image capture, to digital manipulation and enhancement, to the end goal of print or online publication. Develop a robust fundamental skill set in digital photography.

**Requisites:** Not open to students declared in Art BS or Art BFA

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify the fundamentals of digital cameras and their applications (exposure, focus, white balance).

Audience: Undergraduate

2. Develop a proficiency in techniques for raw-file conversion, non-destructive image adjustment & manipulation using Adobe Photoshop and Adobe Bridge software.

Audience: Undergraduate

3. Develop a working understanding of image file types, compression and resolution.

Audience: Undergraduate

4. Explore creative ideas and concepts through photography.

Audience: Undergraduate

5. Develop visual and critical thinking skills.

Audience: Undergraduate

6. Develop understanding of a range of issues in contemporary fine art photography.

Audience: Undergraduate

7. Learn to write about their creative work.

Audience: Undergraduate

8. Discuss and critique photographs and their content and technique in depth.

Audience: Undergraduate

**ART 208 – CURRENT DIRECTIONS IN ART**

3 credits.

Examination of current artists' motivations, intentions, and processes and their relationship to general developments in contemporary art.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ART 212 – DRAWING FOUNDATIONS**

3 credits.

Apply the elements of drawing to more exploratory drawing methods and explore a wide variety of drawing concepts and applications in the context of Modern and Contemporary Art. Provides foundational skillsets for drawing and painting, printmaking and book art.

**Requisites:** ART 112, or declared in Art BS, Art BFA, or Art Education BS

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Utilize the knowledge and experience acquired in previous art courses to create drawings that demonstrate increasingly more sophisticated technical and conceptual proficiency.

Audience: Undergraduate

2. Demonstrate experimentation and investigation with a variety of drawing media.

Audience: Undergraduate

3. Develop an index of ideas and research references to support the creation of drawing-based work.

Audience: Undergraduate

4. Apply drawing skills and concepts more broadly as a vehicle for conveying ideas in other media such as printmaking and book art.

Audience: Undergraduate

5. Analyze and critique drawing-based artworks using relevant concepts and terminology.

Audience: Undergraduate

**ART 214 – SCULPTURE I**

4 credits.

Introduction to techniques and basic sculpture concepts to provide a survey of sculpture studio practices.

**Requisites:** ART 104

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 222 – INTRODUCTION TO PAINTING**

3-4 credits.

Introduction to various technical processes and aspects of painting. Studio practice, lectures, discussions, and critiques.

**Requisites:** ART 102, 112, 212, or 302

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ART 224 – CERAMICS I**

4 credits.

Properties of clay and fundamentals of forming; hand-building, throwing, slip-casting, press molding; with emphasis on individual form concepts.

Glazing, decorating, firing techniques including reduction, oxidation and primitive methods.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ART/DS 226 – TEXTILE DESIGN: OFF-LOOM CONSTRUCTION**

3 credits.

Studio design problems in two and three dimensional off-loom constructions; off-loom weaving, looping, and knotting; historical reference and contemporary application.

**Requisites:** DS 120 and 153

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**ART/DS 229 – TEXTILE DESIGN: WEAVING I**

3 credits.

The relationship of hand weaving to textural surfaces and sculptural forms are examined through the study of problems including structure, pattern, composition, and additional conceptual technical possibilities. Content is explored in the development of individual direction and in relationship to the discussion of historical and contemporary textiles and other works of art. Pursue an advanced investigation of concept and technique of hand-woven cloth.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate understanding of theories, approaches, concepts, and current and historical textile/weaving practices in projects and presentations.

Audience: Undergraduate

2. Utilize the techniques, skills and modern tools/software necessary to create work in the field.

Audience: Undergraduate

3. Examine articles and conduct and present research to inform personal style and concept goals.

Audience: Undergraduate

4. Synthesize knowledge and use insight and creativity to better understand and improve their own design/art

Audience: Undergraduate

5. Communicate effectively through oral presentations, discussion and critiques.

Audience: Undergraduate

**ART 232 – LIFE DRAWING I**

4 credits.

Anatomical structure and intrinsic forms involved in drawing from different models. Development of technical control in a range of media.

**Requisites:** ART 212 and (ART 100, 108, or 208)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 236 – BASCOM COURSE**

3 credits.

A low-enrollment course developing skills in critical reading, logical thinking, use of evidence, and use of library resources. Emphasis on writing in the conventions of specific fields.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 242 – WATERCOLOR I**

3-4 credits.

Painting with watercolor and mixed media on paper. Experimental and traditional uses of the media will be explored, emphasizing drawing, composition, and imagination. Field trips.

**Requisites:** ART 112, 212, 222, 316, 326, or 336

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 244 – ART METAL I**

3-4 credits.

Basic jewelry techniques; metal fabrication dealing with piercing, soldering, forming.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 302 – COLOR**

4 credits.

Color phenomena and visual perception as applied in art problems. Lectures, readings in theory, philosophy, and history of design.

**Requisites:** ART 102, 107, 112, 212, 222, 232, 242, 306, 312, 316, 326, 336, or DS 120

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ART 306 – RELIEF PRINTMAKING**

3-4 credits.

Woodcut, collage print, linoleum cut, and wood engraving; color printing. Studio practice, lectures, discussion, critiques.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ART 307 – MAKING COMICS 1**

4 credits.

An introduction to making comics as both a subject and means of academic inquiry. This is a rigorous class and the workload is substantial. Students will learn a variety of ways of making pictures and stories using materials that will vary over the course of the semester. Final project will be an original, reproducible, handmade book of at least 32 pages, based on the stories or comics or characters created during the semester. No previous drawing experience necessary, but must be eager to draw seven days per week throughout the duration of the course.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Translate autobiographical stories, interviews and fictional stories into illustrative comics form.

Audience: Both Grad & Undergrad

2. Illustrate, label, and compose on a daily basis in journaling style.

Audience: Both Grad & Undergrad

3. Identify and apply methodologies for teaching others to create comics.

Audience: Both Grad & Undergrad

4. Read, analyze and discuss a wide variety of comics and comics related articles.

Audience: Both Grad & Undergrad

5. Develop technical facility with materials involved in making comics including basic ink pens, color pencils, watercolor, Chinese ink and brush, and different types of drawing papers.

Audience: Both Grad & Undergrad

6. Design, create and assemble a 32-page publication as a final project

Audience: Both Grad & Undergrad

7. Will use comics as a means of academic inquiry, along with active engagement with the latest research and scholarly activity of the use of comics in their field of study.

Audience: Graduate

**ART 309 – DIGITAL ART AND CODE**

4 credits.

An introduction to the principles of computer coding in a visual context. Course emphasizes the production of graphical and interactive output delivered on a screen.

**Requisites:** ART 107 or declared in an Art graduate program

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ART 312 – INTERMEDIATE DRAWING I**

3-4 credits.

The exploration of conceptual drawing in various media. Emphasis on conceptual/formal solutions.

**Requisites:** (ART 212, 232, 316, or 326), or declared in an Art graduate program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 314 – SCULPTURE II**

4 credits.

Continued investigation in sculpture studio practices with an emphasis on developing concepts and technique.

**Requisites:** ART 214 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 316 – LITHOGRAPHY**

4 credits.

Direct drawing on stone with crayon and tusche, transfer techniques, color processes; studio practice, lectures, discussions, and critiques.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 318 – INTRODUCTION TO VIDEO, PERFORMANCE & INSTALLATION ART**

4 credits.

An introduction to time-based art forms including video, installation, and visual art performance.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe art world practices in video, performance and installation at an introductory level

Audience: Undergraduate

2. Analyze art world practices in video, performance and installation at an advanced level

Audience: Graduate

**ART 322 – INTERMEDIATE PAINTING I**

4 credits.

Development of technical processes, concepts, historical continuity. Study and application of various media of oils, acrylics, collage materials.

**Requisites:** ART 222 or declared in an Art graduate program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ART 324 – CERAMICS II**

4 credits.

Continued investigation into forming; hand-building, throwing, slip-casting, press molding; with emphasis on individual form concepts. Glazing, decorating, firing techniques including reduction, oxidation and primitive methods.

**Requisites:** ART 224 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 326 – ETCHING**

4 credits.

Introduction to intaglio printmaking techniques. Studio problems in platemaking and printing.

**Requisites:** (ART 102, 112, 212, 232, 306, 316, or 336) or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 332 – LIFE DRAWING II**

4 credits.

Further investigation into anatomical structure and intrinsic forms involved in drawing from different models. Development of concepts and technique.

**Requisites:** ART 232 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 333 – INTRO TO RESPONSIVE WEB DESIGN**

4 credits.

Introduction to user-centered, responsive web design for mobile, tablet, and laptop. Write HTML, CSS, and Javascript directly to design and develop fully responsive websites.

**Requisites:** (ART 102 or 107), ART 346, and ART 438 or concurrent enrollment in ART 438, or declared in (MFA-Art or MS Design + Innovation)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Critique and apply graphic design principles and functions in web composition.

Audience: Both Grad & Undergrad

2. Demonstrate the capabilities of web typography.

Audience: Both Grad & Undergrad

3. Demonstrate the capabilities of creating responsive web designs.

Audience: Both Grad & Undergrad

4. Enhance responsive web page presentation with HTML5 & CSS3.

Audience: Both Grad & Undergrad

5. Design responsive websites from scratch with HTML5 & CSS3.

Audience: Both Grad & Undergrad

6. Develop complex layouts and effects with advanced CSS.

Audience: Both Grad & Undergrad

7. Design and develop professional research documentation for the Web.

Audience: Graduate

**ART 334 – WOOD WORKING**

3-4 credits.

Exploration of wood as a medium for constructing creative and functional three-dimensional forms.

**Requisites:** (ART 104, 112, 212, 214, 224, 244, 354 or DS 220) or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 336 – SERIGRAPHY**

3-4 credits.

Materials and techniques of silk screen process; silk screen as a fine art form.

**Requisites:** (ART 102, 112, 212, 222, 232, 306, 316, or 326) or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 338 – SERVICE LEARNING IN ART**

2 credits.

Students discuss community-based practices in the field, and will work with a community partner in an art-related capacity.

**Requisites:** None

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART/DANCE 341 – SOUND DESIGN FOR THE PERFORMING AND VISUAL ARTS**

3 credits.

Production of audio soundtracks to complement the work of artists. The relationship of sound and music to dance, video, film, computer art, and other interdisciplinary forms.

**Requisites:** Declared in an Art, Dance, or Communication Arts program

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 342 – WATERCOLOR II**

4 credits.

Continued investigations in watercolor and mixed media works on paper with goal of development of concepts and technical skill.

**Requisites:** ART 242 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 343 – METAL FABRICATION AND WELDING IN SCULPTURE**

3-4 credits.

Reviews common welding and metal fabrication techniques available to artists, including various welding processes, brazing techniques, torch work, cutting devices, bending methods, and finishing techniques. Mild steel will be the primary material of exploration.

**Requisites:** (ART 214 or 244) or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**ART 346 – BASIC GRAPHIC DESIGN**

4 credits.

Introduces the basic principles of graphic design. Develop an initial understanding of formal, conceptual, and technical aspects of the field. Emphasis will be given to the importance of working process, presentation and craftsmanship.

**Requisites:** (ART 102 or 107) and declared in Art , Art Education, Certificate in Art Studio, or Certificate in Graphic Design; or declared in Art MFA or Design + Innovation MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the role of design process in creative practice for designers.

Audience: Both Grad & Undergrad

2. Understand basic visual research methodologies used by graphic designers in the field.

Audience: Both Grad & Undergrad

3. Strengthen professional presentation skills.

Audience: Both Grad & Undergrad

4. Develop a body of work that displays your design skills in the best possible light.

Audience: Both Grad & Undergrad

5. Extend knowledge of software used in design practice.

Audience: Both Grad & Undergrad

6. Expand knowledge and use of design terminology and vocabulary.

Audience: Both Grad & Undergrad

7. Appraise these tools, methods, and processes, and learn how to strategically, creatively apply them to your own work and research.

Audience: Graduate

**ART 348 – INTRODUCTION TO DIGITAL PRINTMAKING**

4 credits.

Provides students with fundamental skills in combining hand printed and digital output. Hybrid print integrates laser plate, monoprint, collograph, stencil, stamping, and embossment with inkjet output. Focuses on enhancement of digital output through integration of hand printed elements.

**Requisites:** (ART 102, 107, 176, 306, 316, 326, 336, 346, or 376) or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 354 – GLASSWORKING**

4 credits.

Glassworking toward a personal concept of material.

**Requisites:** (ART 104, 214, 224, 244, or 334) or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 356 – CODING FOR GRAPHIC DESIGN**

4 credits.

Explore the aesthetic of computational graphic design and typography with physical interaction, sound, data, and digital fabrication.

**Requisites:** (ART 102 or 107), ART 346, and ART 438 or concurrent enrollment in ART 438, or declared in (MFA-Art or MS Design + Innovation)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Apply design and typography principles and functions in computational drawing.

Audience: Both Grad & Undergrad

2. Apply mathematic expressions, computer algorithms, and libraries to create computational illustrations.

Audience: Both Grad & Undergrad

3. Demonstrate image, text, video, sound, and data skills to create computational graphic design and typography.

Audience: Both Grad & Undergrad

4. Demonstrate ability to explore linear and non-linear visual storytelling using computer algorithms and physical interaction.

Audience: Both Grad & Undergrad

5. Demonstrate ability to develop ideas from conceptualization to implementation in computational graphic design and typography.

Audience: Both Grad & Undergrad

6. Demonstrate ability to extend visual output from cyberspace to physical space using digital fabrication.

Audience: Both Grad & Undergrad

7. Develop professional documentation for generative graphic design systems.

Audience: Both Grad & Undergrad

8. Cultivate and develop graphic design research and practices with various new mediums, including computation, sound, data, self-portraits, and digital fabrication.

Audience: Graduate

**ART/THEATRE 366 – STAGE LIGHTING I**

3 credits.

Application of lighting design to the stage and natural environment. Color principles, lighting instruments, and control equipment. Production participation and labs.

**Requisites:** THEATRE 130, ART 100, or DS 120

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Observe light in its natural, artistic, and theatrical environments, and discuss its controllable qualities and functions.

Audience: Undergraduate

2. Summarize the role of a lighting designer and the roles of other members of a production team.

Audience: Undergraduate

3. Understand theatrical lighting production planning and implementation methods, including: lighting hang and focus, lighting control, instrument design and selection.

Audience: Undergraduate

4. Develop the analytical skills needed to read a script, communicate ideas, and establish a design aesthetic and personal design process.

Audience: Undergraduate

5. Design the lighting for a play and produce all relevant paperwork and documentation, including drafting a full light plot.

Audience: Undergraduate

**ART/THEATRE 372 – SET DESIGN I**

3 credits.

Principles of composition, scale, perspective, and color applied to the stage; production of ground plans, elevations, sketches, and models.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ART 376 – DARKROOM PHOTOGRAPHY**

3-4 credits.

Emphasizes the basic aesthetic grammar of photography while providing a historical and critical context for looking at and making photographs. Techniques, philosophies, and concepts in photography as an art form. Emphasis on personal expression and relationship to other media.

**Requisites:** ART 100, 102, 104, 107, 108, 176, 208 or declared in Art MFA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the basic functions of a film camera.

Audience: Both Grad & Undergrad

2. Explain visual history and grammar of photography.

Audience: Both Grad & Undergrad

3. Demonstrate the ability to approach B&W film photography in a serious problem solving manner.

Audience: Both Grad & Undergrad

4. Demonstrate skill to edit and discuss both your own work as well as other visual artists in the field of contemporary photography.

Audience: Both Grad & Undergrad

5. Examine the technical, mechanical and history of photography for future instructional skills.

Audience: Graduate

**ART 393 – INTERSHIPS IN ART**

1 credit.

This online course allows students who have found outside art-related internships to earn academic credit in connection with their work experience.

**Requisites:** None

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**ART 409 – DIGITAL FABRICATION STUDIO**

4 credits.

Introduction to the practice and application of digital fabrication technologies in an artistic context with an emphasis on extending and integrating with traditional material approaches to art production. Includes theoretical readings devoted to the implications of digital and machine technologies on art practice.

**Requisites:** ART 107 or declared in an Art graduate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ART 414 – ART FOUNDRY**

3 credits.

Traditional and nontraditional methods of fine art foundry.

**Requisites:** (ART 104, 214, 224, 244, 314, 334, 343, or 354), or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 428 – DIGITAL IMAGING STUDIO**

4 credits.

Explore current and historical practices in the digital fine arts while refining conceptual and technical understanding of digital art forms as powerful tools for generating and communicating images and ideas. Students will create and manipulate both static and moving imagery, with implications for digital drawing, painting, print-making, video editing/post-production, and narrative or non-narrative 2D animation in a fine art context.

**Requisites:** (ART 107, 176, 318, 429, or 529) or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ART 429 – 3D DIGITAL STUDIO I**

4 credits.

Introduction to three-dimensional modeling in the computer, in particular the use of 3D digital models for the creation of images and objects.

**Requisites:** ART 107 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ART 438 – HISTORY OF GRAPHIC DESIGN AND TYPOGRAPHY**

3 credits.

Examines the major developments in graphic design and typography as the fields slowly emerged and began to define themselves during the 19th, 20th, and 21st centuries.

**Requisites:** (ART 102 or 107), and ART 346 or concurrent enrollment; or declared in Art MFA or Design + Innovation MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Foster respect and appreciation for the achievements of graphic designers and typographers.

Audience: Both Grad & Undergrad

2. Identify the major designers and graphic works of each period covered.

Audience: Both Grad & Undergrad

3. Recognize the major aesthetic movements and ideas that have influenced graphic design and typography.

Audience: Both Grad & Undergrad

4. Understand the social, cultural, and political contexts that have shaped graphic design and typography.

Audience: Both Grad & Undergrad

5. Appraise these influences and learn how to strategically, creatively, apply them to your own work and research.

Audience: Graduate

**ART 442 – ICONS, SYMBOLS, AND PICTOGRAMS**

4 credits.

Addresses basic visual communication principles that include semiotics, gestalt, form, and context, and applies them to the design of icons, symbols, and pictograms. Cultural, psychological, social, and historical interpretations of these forms are analyzed through design projects, readings, discussion, and research.

**Requisites:** (ART 102 or 107), ART 346 and 438

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Apply basic visual communication principles to the design process.

Audience: Undergraduate

2. Explore semiotics analysis in relation to forms and messages intended for diverse audiences.

Audience: Undergraduate

3. Identify the various contexts and functions for which icons, symbols, and pictograms can be designed.

Audience: Undergraduate

4. Practice the specific techniques and processes that are used in the construction of icons, symbols, and pictograms.

Audience: Undergraduate

5. Extend knowledge of software used in design practice.

Audience: Undergraduate

6. Strengthen collaboration and presentation skills.

Audience: Undergraduate

**ART 443 – GRAPHIC DESIGN FOR EXHIBITIONS**

4 credits.

Provides an introduction to exhibition design from spatial typography, posters, banners, and wayfinding to online exhibition design, including virtual reality for the Web.

**Requisites:** (ART 102 or 107), ART 346, and ART 438 or concurrent enrollment in ART 438, or declared in (MFA-Art or MS Design + Innovation)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Define the fundamental elements of two and three-dimensional typography.

Audience: Both Grad & Undergrad

2. Apply those fundamental elements in developing a typographic system for environmental settings.

Audience: Both Grad & Undergrad

3. Analyze existing way-finding problems and apply design to the practice of exhibit design.

Audience: Both Grad & Undergrad

4. Explore environmental graphic venues, materials, and applications to produce visual components for exhibition design.

Audience: Both Grad & Undergrad

5. Demonstrate how innovative concepts, branding, and custom exhibition design can improve showroom design and function.

Audience: Both Grad & Undergrad

6. Practice exhibition design for the Web and virtual reality.

Audience: Both Grad & Undergrad

7. Develop the complete functional exhibition design for the Web and virtual reality.

Audience: Graduate

**ART 446 – ARTISTS' BOOKS**

4 credits.

The multiple and sequential visual imagery of the non-printed book, including its design and creation.

**Requisites:** (ART 306, 316, 326, 336, 346, or 376) or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 448 – SPECIAL TOPICS**

1-4 credits.

Various beginning-level special topics courses in Art.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ART 452 – INTERMEDIATE PAINTING: NEW FIGURATION I**

4 credits.

The human figure as a source for creative and independent viewpoints in painting and other media. Students work together in the painting studio from a live model and from other figural sources.

**Requisites:** (ART 222, 232 or 322) or declared in an Art graduate program

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 454 – NEON: LIGHT AS SCULPTURE**

4 credits.

Introduction to light as sculptural medium including techniques for creating art using luminous tubes.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ART 458 – GRAPHIC DESIGN FOR BRANDING AND IDENTITY**

4 credits.

This is an advanced graphic design course with an emphasis on corporate brand identity development. Topics can include mark development, product packaging, marketing and advertising collateral, web branding, and broadcast advertising development. Special attention is given the application of semiotics and other forms of basic communication theory to the design process.

**Requisites:** (ART 102 or 107 or declared in an Art graduate program), ART 346, and 438

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ART 463 – INFORMATION GRAPHICS**

4 credits.

This course examines the theory and practice of visual representation of information. Students will learn to create effective and illuminating graphical displays of data based on four basic formulations -- location, time, category, hierarchy, and index.

**Requisites:** (ART 102 or 107), ART 346 and 438

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 465 – GRAPHIC DESIGN FOR PACKAGING**

4 credits.

Defines the role of packaging in product identification, presentation, and production. The unique challenges of adapting typography, illustration, design and materials to three-dimensional forms are explored. Research includes marketing objectives, structural integrity and display aesthetics.

**Requisites:** (ART 102 or 107), ART 346 and 438

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**ART 466 – PAPERMAKING: HISTORY, ELEMENTS AND TECHNIQUES**

4 credits.

Investigation and explanation of papermaking by hand as it relates to printmaking, drawing, and sculpture. History of papermaking stressing the last hundred years. Techniques of the craft, traditional sheet forming and use of paper pulp as pure plastic material with same educational goals as metal, ceramics, and wood.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ART 467 – GRAPHIC DESIGN FOR POSTERS**

4 credits.

Examines the design of posters as a mode of communication. Students will learn to create effective combinations of words and images that mobilize principles of composition, perception, and rhetoric. Projects will encourage students to further explore graphic design as a means of communication, artistic expression, and information organization.

**Requisites:** (ART 102 or 107), ART 346 and 438

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 470 – SPECIAL TOPICS IN 4D ART**

3-4 credits.

Topics courses exploring historical, theoretical and studio components surrounding time-based art forms including digital animation, video, installation, and visual art performance.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ART 476 – INTERMEDIATE PHOTOGRAPHY

4 credits.

Introduction to advanced digital printing techniques, critical analysis, and discussion of history of photography and current trends.

**Requisites:** ART 107, 176, or declared in Art MFA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the visual history and grammar of digital photography.

Audience: Both Grad & Undergrad

2. Demonstrate the ability to approach photography in a serious problem-solving manner.

Audience: Both Grad & Undergrad

3. Demonstrate the skill to edit and discuss both your own work as well as other visual artists.

Audience: Both Grad & Undergrad

4. Demonstrate the ability to understand your own work in the context of contemporary photography.

Audience: Both Grad & Undergrad

5. Examine the technical, mechanical and history of photography for future instructional skills.

Audience: Graduate

### ART 486 – LETTERPRESS PRINTING: BOOKS AND MULTIPLES

4 credits.

Covers materials and techniques used in contemporary letterpress printing of both text and image with a focus on letterpress printing as an art medium. Learn how to print using handset type, photopolymer plates and other printmaking techniques suitable for letterpress. Design and letterpress print broadsides and artist's books.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Master a range of letterpress printing techniques to complete original artwork.

Audience: Both Grad & Undergrad

2. Engage in creative and design thinking in the development of creative projects that include text and image.

Audience: Both Grad & Undergrad

3. Develop ability to work both independently and collaboratively on creative projects.

Audience: Both Grad & Undergrad

4. Develop written and visual ideas that address issues in the world around them.

Audience: Both Grad & Undergrad

5. Apply problem-solving techniques needed to work with letterpress printing tools and equipment.

Audience: Both Grad & Undergrad

6. Develop oral and written communication skills and critical thinking during critique sessions of work and the work of peers.

Audience: Both Grad & Undergrad

7. Develop creative work that is directly connected to their wider creative practices

Audience: Graduate

8. Develop a familiarity and understanding of the artist's book collection at the Kohler Art Library through research for class that will influence their wider creative practices.

Audience: Graduate

### ART 506 – ADVANCED RELIEF PRINTMAKING

4 credits.

Emphasis on color problems, surface qualities; studio practice, discussion, critiques.

**Requisites:** ART 306 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 507 – MAKING COMICS 2**

4 credits.

Builds on the work begun in Making Comics 1. Students will already be comfortable working on deadline, with applying previous comics-making experience to a variety of story styles, both fictional and non-fictional, and with using a variety of materials. This class is just as rigorous and demanding as Art 307. You'll be required to write and draw in your journal every day. Homework is substantial. Students will finish a 3-4 page comic strip each week, even when feeling uninspired. Readings will include more long-form comics. Students will identify a theme present in their own work to be explored through drawing and writing. In the last part of the semester, students will create a 'zine with a focused narrative. It will be an original, reproducible, handmade book of at least 32 pages, comprised of both visual and written elements. Everything created will be drawn, painted and written by hand.

**Requisites:** ART 307**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, for 3 number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Increase facility with using dip pens, manga ink and manga paper

Audience: Both Grad &amp; Undergrad

2. Continue developing technical facility with materials involved in making comics including basic ink pens, color pencils, watercolor, Chinese ink and brush, and different types of drawing papers.

Audience: Both Grad &amp; Undergrad

3. Translate academic articles, autobiographical stories, interviews with others, and works of fiction into longer form comics

Audience: Both Grad &amp; Undergrad

4. Illustrate, label and compose in a journal on a daily basis.

Audience: Both Grad &amp; Undergrad

5. Identify and apply methodologies for teaching others to create comics

Audience: Both Grad &amp; Undergrad

6. Read, analyze and discuss a wide variety of long-form comics, graphic novels and comics-related articles

Audience: Both Grad &amp; Undergrad

7. Design, create and assemble a 32-page book with a single theme as a final project.

Audience: Both Grad &amp; Undergrad

8. Use comics as a means of academic inquiry, along with active engagement with the latest research and scholarly activity of the use of comics in their field of study.

Audience: Graduate

**ART 508 – COLLOQUIUM IN ART**

1 credit.

Prominent artists, curators critics present their work through lectures and visual presentations.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART 511 – ART PERFORMANCE**

3-4 credits.

An exploration of art genres that often incorporate a form of time-based performance, including but not limited to elements found in theater, dance, music, spoken word/poetry, etc.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ART 512 – ADVANCED DRAWING I**

4 credits.

Advanced level drawing course taught in a structured format where students work on various problems/issues in drawing.

**Requisites:** ART 312 and (ART 100, 108 or 208) or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ART 514 – ADVANCED SCULPTURE WORKSHOP 1**

4 credits.

Instruction in the use of various materials as required by the individual in terms of the formal and conceptual basis of the work. Emphasis on independent research and development of studio projects.

**Requisites:** ART 314 or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ART 516 – ADVANCED LITHOGRAPHY**

2-3 credits.

Development of advanced concepts and techniques in lithography, to include drawing on stone with crayon and tusche, transfer techniques, color processes; studio practice, lectures, discussions, and critiques.

**Requisites:** ART 316 or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**ART 518 – ARTIST'S VIDEO**

4 credits.

Principles and techniques in video art.

**Requisites:** (ART 208 and 318) or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2021**ART 521 – INSTALLATIONS AND ENVIRONMENTS**

4 credits.

Studio projects in site-specific art making supplemented by readings and examples of relevant contemporary artists' work.

**Requisites:** ART 214 or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART 522 – ADVANCED PAINTING I**

4 credits.

Technical processes; emphasis on personal expression, concepts, in various approaches to painting.

**Requisites:** (ART 322 or 452) or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**ART 524 – ADVANCED CERAMICS I**

4 credits.

Thrown and hand-built forms, clay bodies, glazes, firing, general studio procedure; emphasis on development of personal concepts.

**Requisites:** ART 324 or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ART 525 – ADVANCED TYPOGRAPHY**

4 credits.

An advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through, materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function typography plays in design, art, and culture.

**Requisites:** (ART 102 or 107), ART 346 and 438**Repeatable for Credit:** No**Last Taught:** Fall 2024**ART 526 – ADVANCED ETCHING/INTAGLIO**

4 credits.

Research in advanced intaglio techniques. Color printing.

**Requisites:** ART 326 or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART 529 – 3D DIGITAL STUDIO II**

4 credits.

Intermediate/advanced class covering the theory and practice of 3D digital modeling and animation software as a tool for making art.

**Requisites:** ART 429**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Use keyframe animation, motion paths and "Set Driven" keys.

Audience: Both Grad &amp; Undergrad

2. Use a variety of deformers.

Audience: Both Grad &amp; Undergrad

3. Develop and create an effective animation from sketching and storyboarding through final video delivery.

Audience: Both Grad &amp; Undergrad

4. Demonstrate knowledge about contemporary practice in the field, including the use of 3D digital technology in fine art, design and entertainment.

Audience: Both Grad &amp; Undergrad

5. Incorporate techniques and information covered by the class into their own research.

Audience: Graduate

**ART 531 – SCREEN PERFORMANCE**

3-4 credits.

Focuses on performance made for the screen including first person narrative, spoken word, video dance, fictional cinema, experimental documentary and other forms of mediated performance practice.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**ART 532 – ADVANCED LIFE DRAWING I**

4 credits.

Further examination of the percepts of drawing with the human figure. Emphasis on formal elements. Problems of structure. Intense studio practice working from the model.

**Requisites:** ART 332 or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ART 534 – ADVANCED WOOD WORKING**

4 credits.

Development of advanced concepts and techniques in wood-based functional and/or fine art forms.

**Requisites:** ART 334 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 536 – ADVANCED SERIGRAPHY**

4 credits.

Development of advanced concepts and techniques using silk screen processes to create fine art forms.

**Requisites:** ART 336 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 542 – ADVANCED WATERCOLOR I**

4 credits.

Transparent and opaque watercolor media; studio practice, critiques, field trips.

**Requisites:** ART 342 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 544 – ADVANCED ART METAL I**

4 credits.

Advanced techniques in creating functional and/or fine art metal objects.

**Requisites:** ART 244 or 344 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 546 – GRAPHIC DESIGN FOR PUBLICATIONS**

4 credits.

Covers the theory and practice of designing newspapers, magazines, books, and other narrative forms. Emphasis will be placed on advanced typographic theory, and advanced digital and manual production skills.

**Requisites:** (ART 102 or 107 or declared in an Art graduate program), ART 346, and 438

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 548 – SPECIAL TOPICS: ADVANCED LEVEL**

1-4 credits.

Topical courses in art at an advanced level.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 552 – ADVANCED PAINTING: NEW FIGURATION II**

4 credits.

Advanced work in depicting the human figure as a source for creative and independent viewpoints in painting and other media.

**Requisites:** ART 452 or declared in an Art graduate program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ART 554 – ADVANCED GLASSWORKING**

4 credits.

Advanced concepts and techniques in fine art glass.

**Requisites:** ART 354 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **ART 556 – GRAPHIC DESIGN FOR INTERACTIVE MEDIA**

4 credits.

Explore creative visual interface and interactive storytelling for the Web.

**Requisites:** (ART 102 or 107), ART 346, 438, and one of: (ART 443, 458, 463, 465, 467, 546, 563, 565, 568 or 575); or declared in MFA Art or MS Design + Innovation.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Critique and apply visual principles in the design of expressive/communicative digital interactions.

Audience: Both Grad & Undergrad

2. Analyze and apply relevant screen-based interaction theories, processes, and methodologies.

Audience: Both Grad & Undergrad

3. Apply appropriate software and coding skills to create and publish a fully functional website.

Audience: Both Grad & Undergrad

4. Apply dynamic web design skills using user interaction, sound, and video.

Audience: Both Grad & Undergrad

5. Interact, critique, and collaborate through group critiques, discussions, writing, and visual works.

Audience: Both Grad & Undergrad

6. Design and develop spatial web design including virtual reality or augmented reality.

Audience: Graduate

### **ART 558 – PRODUCT DEVELOPMENT FOR GRAPHIC DESIGN**

4 credits.

Focuses on developing an understanding of design processes through the utilization of specific fabrication materials and methods. Experience is gained in giving form to objects and products. Prototyping techniques and digital design tools will be explored. In addition, investigates the movements in the history of product design and the development of materials, production, technologies, consumption and other social and cultural concerns that impact the field. A special focus on the identification and use of sustainable materials and processes.

**Requisites:** (ART 102 or 107), ART 346 and 438

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Apply creativity, design thinking, and design process to bring new ideas, products, and value to companies, communities, and people.

Audience: Undergraduate

2. Integrate the notion of sustainability into a more holistic understanding of the interdependency of people, functional disciplines, socio-cultural systems and physical resources.

Audience: Undergraduate

3. Demonstrate comfort with complex, ambiguous problems and the uncertain path towards specific, viable solutions

Audience: Undergraduate

4. Understand the importance of the design process to guide your thinking without constraining it.

Audience: Undergraduate

5. View graphic design as an entrepreneurial practice.

Audience: Undergraduate

### **ART 560 – GRAPHIC DESIGN SENIOR THESIS PROJECT AND EXHIBITION**

4 credits.

A capstone experience for seniors in the Graphic Design Program. A hybrid of studio and seminar, course work will combine inquiry, research, creative problem-solving, and design prototyping. Students will use research to launch a comprehensive graphic design thesis project which will be exhibited at the end of the term.

**Requisites:** (ART 102 or 107), ART 346, 438, and two of: ART 458, 463, 465, 467, 546, 556, 565, 568

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART 563 – GRAPHIC DESIGN FOR GAMES**

4 credits.

Game design is a subdiscipline in which graphic designers create meaningful play and interactive experience through words, images, structure, process, and the study of user experience. This course, which explores both digital and non-digital games, aims to provide you with a critical vocabulary and historical context for analyzing games, as well as the skills and techniques necessary to incorporate game design into your ongoing design practice.

**Requisites:** (ART 102 or 107), ART 346 and 438**Repeatable for Credit:** No**Last Taught:** Fall 2020**ART 564 – GRAPHIC DESIGN FOR ACCESSIBILITY**

4 credits.

An introduction to designing for accessibility and inclusion including visual design research, design thinking, and digital fabrication.

**Requisites:** (ART 102 or 107), ART 346, and (ART 458, 463, 465, 467, 546, 565 or 568), or declared in Art MFA or Design + Innovation MS**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Gather meaningful information about users and their experiences by asking, observing, learning, and surveying  
Audience: Both Grad & Undergrad

2. Understand the importance and the impact of designing for accessibility and inclusion  
Audience: Both Grad & Undergrad

3. Analyze design problems and propose design interventions based on the user-centered process  
Audience: Both Grad & Undergrad

4. Apply an iterative design process, including prototyping skills with various analog and digital methods and testing for user experience design  
Audience: Both Grad & Undergrad

5. Prepare high-quality professional documentation of the design process and presentation for a professional portfolio  
Audience: Both Grad & Undergrad

6. Develop an abstract for conference presentations and a gallery plan for an exhibition using the final projects  
Audience: Graduate

**ART 565 – TYPEFACE DESIGN**

4 credits.

Examine conceptual and technical processes used for designing fonts and typefaces in a digital environment.

**Requisites:** (ART 102 or 107), ART 346 and 438**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**ART 568 – MOTION TYPOGRAPHY**

4 credits.

Examines conceptual and technical processes used setting type in motion in a digital environment using digital video, computer graphic, and digital photo technologies. Students must take ART 107 and ART 346 prior to enrolling in this course.

**Requisites:** (ART 102 or 107), ART 346 and 438**Repeatable for Credit:** No**Last Taught:** Fall 2019**ART 570 – ADVANCED TOPICS IN 4D ART**

3-4 credits.

Topics courses exploring advanced concepts in historical, theoretical and studio practices in the discipline of time-based art forms, including but not limited to: digital animation, video, installation, and visual art performance.

**Requisites:** ART 470 or declared in an Art graduate program**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2019**ART/THEATRE 572 – SET DESIGN II**

3 credits.

Historical survey of visual theatre, painting, and architectural styles adapted to various dramatic forms. Application of design elements and styles to contemporary theatre productions.

**Requisites:** THEATRE/ART 372**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2019**ART 575 – USER EXPERIENCE FOR GRAPHIC DESIGN**

4 credits.

A project-based introduction to the examination of user experience, and is oriented toward practical methods for approaching a design problem. The focus of the course is to develop conceptual design based on the needs of users. Students will receive grounding in user research methods, design sketching, and design validation.

**Requisites:** (ART 102 or 107), ART 346 and 438**Repeatable for Credit:** No**Last Taught:** Summer 2025**ART 576 – ADVANCED PHOTOGRAPHY**

4 credits.

Emphasis on advanced techniques, color, personal concepts and expression, criticism, communicative potential of photography.

**Requisites:** ART 476 or declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**ART 608 – INTERDISCIPLINARY CRITIQUE IN THE VISUAL ARTS**

3 credits.

Group critique for advanced students working in the various disciplines of the visual arts.

**Requisites:** Senior standing and declared in BS-Art, BFA-Art or BS-Art Ed degree program or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2023

**ART 612 – ADVANCED DRAWING II**

3-4 credits.

Continuation of advanced level drawing. Focus on advanced techniques and conceptual development in conversation with contemporary drawing practices.

**Requisites:** ART 512 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 614 – ADVANCED SCULPTURE WORKSHOP 2**

3-4 credits.

Continuing instruction in the use of various materials as required by each student in terms of the formal and conceptual basis of their work. Emphasis on the development of individually directed studio projects, professional art practices, and preparing work for exhibition.

**Requisites:** ART 514 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ART 622 – ADVANCED UNDERGRADUATE PAINTING WORKSHOP**

3 credits.

Continuation of 522. Entrance is by consent through competitive portfolio review, held in the final week of the fall and spring semesters. Qualified applicants will have completed Art 222, 322, and at least one of the following: Art 312, 332, 342, 452, 512, 522, 542; or have transferred equivalent coursework. Not open to graduate students.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 624 – ADVANCED CERAMICS II**

4 credits.

Advanced concepts and practices using clay/ceramics to create fine art objects.

**Requisites:** ART 524 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 629 – 3D DIGITAL STUDIO III**

4 credits.

An advanced project based class in 3D Digital Animation. Students will complete a single major animation project based on their own proposal as approved by the instructor.

**Requisites:** ART 429 or 529

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 632 – ADVANCED LIFE DRAWING II**

3-4 credits.

Advanced work and examination of the percepts of drawing with the human figure. Emphasis on conceptual development in conversation with contemporary life drawing practices.

**Requisites:** ART 532 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**ART 636 – COMPUTER AUGMENTED PRINTMAKING**

4 credits.

Advanced computer imaging for printmaking. Emphasis is on self-initiated projects that combine printmaking or photographic techniques with digital output.

**Requisites:** (ART 306, 316, 326, 336, or 348) or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 642 – ADVANCED WATERCOLOR II**

4 credits.

Advanced concepts and processes in transparent and opaque watercolor media.

**Requisites:** ART 542 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**ART 644 – ADVANCED ART METAL II**

4 credits.

Further advanced study in the art of metalsmithing.

**Requisites:** ART 544 or declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 656 – DESIGN PORTFOLIO AND PROFESSIONAL PRACTICE**

4 credits.

Advanced level graphic course designed to prepare senior level students for entrance into the design profession. Portfolio and resume preparation will be the primary emphasis. Legal and professional practice topics also will be addressed.

**Requisites:** (ART 102 or 107), ART 346, 438, and two of: ART 458, 463, 465, 467, 546, 556, 565, 568

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**ART 663 – GRAPHIC DESIGN PRACTICUM**

2 credits.

Gives students direct experience in the field of graphic design by working on actual client-based projects. Projects vary each term, and include both on and off campus clients. The course operates as professional design studio doing work for university, local and regional clients.

**Requisites:** (ART 102 or 107), ART 346 and 438

**Repeatable for Credit:** Yes, unlimited number of completions

**ART 699 – INDEPENDENT STUDY**

1-3 credits.

Independent undergraduate work in advanced area of study under direction of art faculty.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ART 700 – INTRODUCTION TO GRADUATE STUDIES IN ART**

3 credits.

Introduction to graduate study in art. Will explore the relationships between the contemporary art world, research and studio practice, theoretical issues, and education in the arts. Also addresses building and sustaining a career in the arts.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ART 706 – TEACHING FOUNDATIONS OF COLLEGE ART**

1 credit.

Practical tools and techniques for teaching the foundations of college art and effectively managing the classroom.

**Requisites:** Declared in Art MFA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Learning Outcomes:** 1. Identify and apply key teaching methods in college-level art instruction.

Audience: Graduate

2. Examine key issues in teaching of college-level art foundations.

Audience: Graduate

3. Reflect and collaborate on challenges that arise in the teaching and learning of college-level art.

Audience: Graduate

4. Develop resources and support peers in the teaching and learning of college-level art.

Audience: Graduate

**ART 722 – GRADUATE PAINTING I**

2-3 credits.

Graduate level instruction in all painting media.

**Requisites:** Declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**ART 726 – GRADUATE INTAGLIO PRINTMAKING I**

2-3 credits.

Graduate level investigations of advanced intaglio methods; exploration toward an individual and mature imagery in graphics materials.

**Requisites:** Declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART 736 – GRADUATE GRAPHICS WORKSHOP I**

2-6 credits.

Graduate level study in advanced graphics media. Emphasis on development of personal concepts.

**Requisites:** Declared in an Art graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ART 740 – INTERDISCIPLINARY GRADUATE CRITIQUE**

1 credit.

Present studio research to peers and faculty and engage with collaborative audience representing multiple artistic disciplines. Provides a holistic understanding of the creative process as it relates to practice and research. Diverse array of skills-sets and the opportunity to influence and enhance the creative process strengthening abilities in performing analysis and critical inquiry into practice and research.

**Requisites:** Declared in Art MFA**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, for 3 number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Position the student's artistic research within contemporary landscape of visual art

Audience: Graduate

2. Demonstrate understanding of research as it relates to a pluralistic approach outside a singular medium

Audience: Graduate

3. Present the complexities of their work to professionals in the field

Audience: Graduate

**ART 908 – SEMINAR-ART**

3 credits.

Special topics in grad-level seminars.

**Requisites:** Declared in an Art graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART 912 – ADVANCED RESEARCH-DRAWING**

1-4 credits.

Graduate level instruction in all drawing media processes.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2020**ART 914 – ADVANCED RESEARCH-SCULPTURE**

1-4 credits.

Graduate level instruction in all sculpture processes.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART 922 – ADVANCED RESEARCH-PAINTING**

1-4 credits.

Graduate level instruction in all painting processes.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2022**ART 924 – ADVANCED RESEARCH-CERAMICS**

1-4 credits.

Graduate level instruction in all ceramics processes.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART 944 – ADVANCED RESEARCH-ART METAL**

1-4 credits.

Graduate level instruction in metalsmithing.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2021**ART 996 – ADVANCED RESEARCH-GRAPHICS**

1-4 credits.

Graduate level instruction in all printmaking and photography processes.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART 999 – INDEPENDENT STUDY**

1-4 credits.

Independent graduate work in advanced area of study under direction of art faculty.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

# ART EDUCATION (DEPARTMENT OF ART) (ART ED)

## ART ED 321 – INTRODUCTION TO TEACHING ART

2 credits.

Explore art education careers, develop art and art-integrated curriculum, practice instructional strategies, and conduct fieldwork in community and school-based settings.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explore art education careers through observing and interviewing art educators, reflecting on their own developing teacher identities, and identifying art and education internship, job, and volunteer opportunities in the community.

Audience: Undergraduate

2. Experiment with a range of 2D and 3D media techniques and processes, and identify associated concepts and vocabulary to inform the development of art and art-integrated curriculum appropriate for k-8 populations.

Audience: Undergraduate

3. Create developmentally and culturally appropriate art curriculum for k-8 afterschool programs in Madison (i.e. basic lesson planning, including writing learning objectives, lesson sequencing, and structuring effective demonstrations, material management and clean up).

Audience: Undergraduate

4. Employ a variety of instructional strategies to engage students in conversations about art and relevant art making experiences and implement simple pre and post-instruction assessments to gather data on student learning.

Audience: Undergraduate

## ART ED 323 – FOUNDATIONS IN ART EDUCATION

3 credits.

Examination of foundational principles of art education and art curriculum planning, instruction and assessment for kindergarten through twelfth-grade students.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define the components of Discipline-Based Art Education and Culturally Relevant Pedagogy and use them to guide decisions related to art curriculum, instruction and assessment.

Audience: Undergraduate

2. Explain choice-based models of art education, prominent theories of creativity, and methods for facilitating creative processes and use them to inform curricular and instructional decisions.

Audience: Undergraduate

3. Demonstrate the fundamental skills of lesson planning through the design of standards-based, culturally relevant, developmentally appropriate art curriculum inspired by the pedagogical models studied during the semester.

Audience: Undergraduate

4. Apply a variety of effective instructional strategies for engaging art learners in community-based settings, such as art centers, after-school programs and art clubs.

Audience: Undergraduate

## ART ED 324 – METHODS IN ART EDUCATION

3 credits.

Study of principles in art curriculum planning, instruction and assessment, classroom management and learner diversity in elementary and secondary schools.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use considerations of learner diversity (gender, culture, special needs, etc.) to inform the creation of developmentally-appropriate, culturally relevant, differentiated curriculum and instruction

Audience: Undergraduate

2. Design and facilitate standards-based units of instruction (unit planning), using contemporary approaches to art curriculum development

Audience: Undergraduate

3. Explain purposes for art in education, analyzing the benefits and limitations of various models of art education and use them as frameworks for their teaching practice

Audience: Undergraduate

4. Define facets of classroom management and practice effective classroom management strategies in fieldwork placements

Audience: Undergraduate

**ART ED 327 – PRACTICUM IN ART EDUCATION**

6 credits.

Observation and instruction of learners in elementary and secondary school settings. Study of art curriculum, instruction, assessment, learner diversity and class management.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze classroom art teaching to develop a realistic awareness of challenges, diverse student needs, and strategies to meaningfully engage students in creating, responding to, connecting with, and presenting art

Audience: Undergraduate

2. Effectively collaborate with cooperating teachers to provide one-to-one, small group and whole class instruction, material and lesson preparation, and other related professional tasks

Audience: Undergraduate

3. Teach art lessons to elementary and secondary students and implement a range of class management strategies to facilitate visual arts learning and assessment

Audience: Undergraduate

**ART ED 423 – STUDENT TEACHING IN ELEMENTARY ART**

5 credits.

Supervised student teaching in elementary art classrooms.

**Requisites:** ART ED 324

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate proficient pedagogical skills and knowledge regarding art curriculum, instruction, assessment, classroom management, and professionalism through work experience as student teaching in elementary school settings

Audience: Undergraduate

2. Effectively communicate and collaborate with cooperating teaching and other school staff to create inclusive, supportive, safe and culturally responsive learning environments to meet the needs of diverse learners in elementary art classrooms

Audience: Undergraduate

3. Document and reflect on evidence addressing professional growth and School of Education performance standards for degree completion and licensure

Audience: Undergraduate

**ART ED 424 – STUDENT TEACHING IN SECONDARY ART**

5 credits.

Supervised student teaching in middle or high school art classrooms.

**Requisites:** ART ED 324

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate proficient pedagogical skills and knowledge regarding art curriculum, instruction, assessment, classroom management, and professionalism through work experience as student teachers in secondary school settings

Audience: Undergraduate

2. Effectively communicate and collaborate with cooperating teachers and other school staff to create inclusive, supportive, safe and culturally responsive learning environments to meet the needs of diverse learners in secondary art classrooms

Audience: Undergraduate

3. Document and reflect on evidence addressing professional growth and School of Education performance standards for degree completion and licensure

Audience: Undergraduate

**ART ED 425 – SEMINAR IN ART EDUCATION**

2 credits.

Advanced study of current topics in elementary, middle and high school visual arts education.

**Requisites:** ART ED 324

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Provide professional and moral support to your peers by reflecting on, discussing and collectively responding to issues and challenges that emerge in student teaching placements.

Audience: Undergraduate

2. Develop strategies for writing curriculum for an entire secondary course or an entire year of elementary instruction, plus create an assessment system for summative evaluation.

Audience: Undergraduate

3. Analyze the relationship of curriculum and instruction to assessment, and use assessment data to inform next steps for student learning.

Audience: Undergraduate

4. Produce artifacts and reflect on evidence addressing your professional growth in relation to the School of Education teaching standards.

Audience: Undergraduate

5. Prepare application materials for entering the job market and apply for a PK-12 art teaching license with Wisconsin's Department of Public Instruction.

Audience: Undergraduate

### **ART ED/CURRIC 493 – PRACTICUM IN SECONDARY SCHOOL ART** 3 credits.

Observation and instruction of elementary and secondary pupils in a laboratory setting. Lecture and discussion of topics related to art instruction.

**Requisites:** Declared in Art Education BSE

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### **ART ED 699 – INDEPENDENT READING AND RESEARCH** 1-3 credits.

Student-designed project and activities to explore a topic in depth.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **ART ED 999 – ADVANCED INDEPENDENT READING** 1-3 credits.

Student-designed project and activities to explore a topic in depth.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2015

## **ART HISTORY (ART HIST)**

### **ART HIST 102 – SEEING THROUGH CONSPIRACY THEORIES** 3 credits.

Fake news is not a new problem. In taking on this ongoing issue, we begin before living memory (to avoid the deadening effect of feedback loops within today's media world), with a focus on the visual and built environment. How do conspiracy theories work? Do they fall into patterns? How can we recognize them? If they are empowering, how should we think about that? Visual material plays a special role in the reinforcement of conspiracy theories. Case studies around the world, from the Egyptian pyramids to the birth of "modern" art in the twentieth century, center on ways in which an evidence-based account of the making of an artwork or architectural site has been replaced by a (usually more interesting) story about its true, hidden nature. This story usually purports to reveal the "conspiracy" of an empowered institution or group to keep the truth away from average people. Of course, the reality is often much simpler and the dynamics of power more complex.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Research: Accurately research the history of images, objects, performances, and sites.

Audience: Undergraduate

2. Critical Thinking: Identify the structure of a conspiracy theory and differentiate art historical research therefrom; Differentiate sources at a field-specific level (museum catalogues v. museum websites; blogs vs. academic journals; popular books vs. peer-reviewed academic monographs; etc.) and evaluate each source's appropriate use in building evidence.

Audience: Undergraduate

3. Original Argumentation: Build convincing and original interpretations of images, objects, performances, and sites.

Audience: Undergraduate

4. Visual Analysis: Acquire skills of close looking and formal analysis.

Audience: Undergraduate

5. Oral Communication: Execute the typical methods of presenting art historical research at a beginning level

Audience: Undergraduate

6. Writing: Compose short art history essays. Give useful, concise feedback to peers relevant to art historical best practices. Incorporate feedback and reflect on how feedback alters a previous approach.

Audience: Undergraduate

**ART HIST 103 – TOPICS IN ART HISTORY**

3–4 credits.

Offers an introduction to world art by taking a thematic approach. Topics will center around art and architecture produced in a variety of media, from a wide time span, and a range of cultural and geographic points of origin.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ART HIST 104 – THE ART OF DIVERSITY: RACE AND REPRESENTATION IN THE ART AND VISUAL CULTURE OF THE UNITED STATES**

3–4 credits.

The history of art and visual culture in the United States from the period of colonization until the present from the perspective of how that imagery produced ideas of race and operated to define, exclude, and include various groups over time. Three basic aims: 1. To introduce art history of the United States from c. 1600–2018; 2. To provide skills in visual analysis and critical thinking; and 3. To encourage the understanding of ethnic and cultural minorities in the United States with an emphasis on the visual arts related to marginalization or minority status in the twentieth- and twenty-first century.

**Requisites:** None**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ART HIST 105 – INTRODUCTORY TOPICS IN ART HISTORY**

3 credits.

Introductory topics in Art History.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2022**ART HIST 106 – HAVE BRUSH, WILL TRAVEL: THE ITALIAN RENAISSANCE FROM FLORENCE TO ROME**

3 credits.

Examines artistic developments that took place in Florence in the 15th century, and how the Florentine Renaissance paved the way to the achievements by painters, sculptors, and architects in Rome in the 16th century, many of whom traveled from Florence to Rome in pursuit of economic opportunity. Introduces the numerous important artistic works produced in Florence, Rome, and other artistic centers, and provides a basic understanding of the purposes, methodology, and terminology of art historical study.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**Learning Outcomes:** 1. Understand the Italian Renaissance as a historical phenomenon and concept

Audience: Undergraduate

2. Understand and articulate economic structures and artist-patron-viewer relationships

Audience: Undergraduate

3. Evaluate material evidence in its cultural and historical context as a general, transferable skill

Audience: Undergraduate

4. Comprehend art's fundamental relation to ethics, ideology and politics

Audience: Undergraduate

5. Improve analytical reading, writing and oral communication skills

Audience: Undergraduate

6. Recognize and track stylistic changes in Western art

Audience: Undergraduate

**ART HIST 107 – THE BODY, SEX, & HEALTH IN ART**

3 credits.

Considers the many fascinating ways in which cultures represented ideas of health, sex, disease, medicine, and death, focusing on the ways different art forms (painting, sculpture, architecture, prints, photography, textiles, decorative arts, hair, costume, music and dance, food) conveyed historically and culturally distinctive ideas about bodies. Linking the topics will be an attention to how notions of race, gender, and disability determine representations of the body. Enjoy an introduction to basic skills in visual interpretation that are widely applicable in today's world, while covering health and body-related topics chosen from the arts of Europe, China, Japan, Africa, the Islamic World, and the United States. Our objects of study range from ancient Greece and Rome to the present, with an emphasis on nineteenth- to twenty-first century art.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Visual Analysis: Understand and apply formal analysis method of interpreting artwork, based on visually analyzing medium, form, color, and other material elements

Audience: Undergraduate

2. Communication, oral: Contribute in informed and supportive ways to group discussion about artworks and articles

Audience: Undergraduate

3. Communication, written: Compose short essays in proper expository prose style supporting an original thesis

Audience: Undergraduate

4. Critical Thinking: Analyze essays in art history to identify the argument, defend or disagree with it, then apply it

Audience: Undergraduate

5. Historical and Cultural Understanding: Identify and explain socio-historical reasons for different cultures' arts

Audience: Undergraduate

**ART HIST/RELIG ST 115 – RELIGION AND ART**

3 credits.

Fundamental to all religions are shared beliefs about human beings' relation to that which they regard as holy, sacred, spiritual, divine, or worthy of reverence. Focuses on how religions around the world, from antiquity to the present, mediate sacred and divine presence through material means, aimed to stimulate the human senses. Considers the questions: What makes particular places sacred? How do architecture and ritual contribute to the fashioning sacred worship spaces or places of pilgrimage and healing in diverse religious traditions? How do some religions use icons/images, painted or sculpted, to mediate divine presence, while others consider figural images to be idols? How do art, architecture, and even landscapes serve as places of memory and convey fundamental beliefs about the afterlife?

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze, compare, and evaluate theories about the material manifestations of religion

Audience: Undergraduate

2. Recognize, describe, compare and differentiate visual images, architecture, landscapes and religious material culture of different religious traditions

Audience: Undergraduate

3. Demonstrate collaborative skills by working in small groups to critically respond to questions about readings prepared in advance or works of art in the museum

Audience: Undergraduate

4. Develop written and oral arguments based on visual and material evidence.

Audience: Undergraduate

5. Employ research skills to interpret religious images and architecture

Audience: Undergraduate

**ART HIST 130 – SEEING RACE: ANTI-RACISM AND VISUAL CULTURE**

3 credits.

Confronting how images work to shape ways of seeing race, this introduction to visual cultures tracks how power works through the visual – from visual surveillance and racial profiling to anti-racist visual activism. Trains critical understanding of the role of imaging in producing ways of seeing race in its intersections with gender, sexuality, and ability. Through critical consideration of the spectacle of racialized violence and the everyday micro-aggressions of the stereotype, addresses the ways that images harm. Also considers how just representation may offer restitution and repair. Explores forms of anti-racist visual activism that seize the power to look back. And questions the ethics of an assumed right to look and to take an image. In asking these imperative ethical and political questions about what images do, trains the critical capacity to harness and intervene in the powers of imaging.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Develop working understanding of what images do and how they operate to shape how we see race, our assumptions about race, and our ideas about self and other.

Audience: Undergraduate

2. Develop skill in critical analysis of images, especially in terms of racialization and its shaping intersections with gender, sexuality, and ability.

Audience: Undergraduate

3. Develop knowledge of de-colonial and anti-racist images and visual culture that shows awareness of history's impact on the present, ability to recognize and question assumptions, and a consciousness of self and other.

Audience: Undergraduate

4. Develop ability to apply skills in critical analysis and knowledge of de-colonial and anti-racist images and visual culture to produce critical and creative interventions in visual media that shows awareness of history's impact on the present, ability to recognize and question assumptions, and a consciousness of self and other.

Audience: Undergraduate

**ART HIST/ASIAN 179 – PASSAGE THROUGH INDIA: SOUTH ASIA'S GLOBAL ARCHITECTURAL HISTORIES**

3 credits.

Historical overview of India and South Asia's global architectural histories from the ancient to the modern periods. While focusing predominantly on architectural sites in India, examine architecture at multiple sites across the globe which share connected histories with South Asia. We live in a world of nation states and are shaped by national histories. However, in the arc of human history, nation states are of recent vintage. Examine India's global architectural histories not only through comparison but, in the words of historian Sanjay Subrahmanyam, "by seeking out the at times fragile threads that connected" India to "the globe." Capturing the mobility of populations, traders, conquerors, missionaries, pilgrims, tourists, colonists, architects, artists, scholars, religion, merchandise, art, architecture, and ideas, we show that South Asia's global architectural histories are themselves the complex products of varied histories of cultural encounters.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe, appraise and analyze the connected histories of India with other parts of the globe through its art, and architecture.

Audience: Undergraduate

2. Discuss texts from various critical perspectives, formulate ideas and make connections between visual/spatial/cultural concepts and themes.

Audience: Undergraduate

3. Recognize and visually analyze architectural sites and buildings in India and across the globe that share connected histories with South Asia.

Audience: Undergraduate

### **ART HIST 201 – HISTORY OF WESTERN ART I: FROM PYRAMIDS TO CATHEDRALS**

4 credits.

Examines the arts and cultures of Europe and the Mediterranean basin before the Renaissance. Explores canonical works such as the pyramids at Giza, the Parthenon in Athens, the Venus di Milo, Hagia Sophia in Constantinople, the Book of Kells, the Great Mosque at Córdoba, Chartres cathedral, and Giotto's Arena Chapel. Define art broadly, to encompass the material culture of everyday life, including jewelry, ceramics, and textiles. Considers the social and historical contexts of art and artistic production – art and imperialism, ethnicity, technology, religious ritual and belief, and myth and storytelling, and its relationships to basic human concerns: death and the afterlife, desire and the body, self-definition and portraiture, power and propaganda, monstrosity and the supernatural, the divine and the sacred. Develops crucial skill sets: critical visual analysis, contextual interpretation, research methods and resources, historiography, and oral, written and digital communication.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ART HIST 202 – HISTORY OF WESTERN ART II: FROM RENAISSANCE TO CONTEMPORARY**

4 credits.

Examine the arts and culture of Europe and North America from the Renaissance through the present. Explore important fine art, architecture, decorative arts, and photographic masterpieces by artists like Leonardo da Vinci, Rembrandt van Rijn, Claude Monet, Paul Cézanne, Pablo Picasso, Frida Kahlo, and Frank Lloyd Wright. Learn how works of art were valued from the moment of their making, fought over by different nations, bought, sold, stolen, or ignored for centuries and revived only recently for study through the political, historical, social and cultural contexts of their making. Critically examine the concept of artistic genius; the influence of colonialism and imperialism on artistic production and consumption; the role of the patron and the art market in art's production and circulation; the relationship of fine art and popular culture; and the idea of globalization as it relates to "western" artistic traditions. Develop skills in visual analysis to understand artistic production.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ART HIST 205 – GLOBAL ARTS**

3-4 credits.

ART IS GLOBAL (and always has been). Today, we find Egyptian protest artists inspiring activists around the globe via the internet, but in earlier times, Roman glass and Buddhist icons moved along the ancient Silk Route, networks of exchange flourished in the medieval Mediterranean region, and colonial empires brought visual cultures into volatile contact. Learn how to analyze images and objects produced through such exchanges that occurred around the world from ancient times through the contemporary. Develop skills needed to live fully in a world in which borders are no barriers to the movement of images, objects, and ideas and to deepen understanding of cultural differences and interactions. By exploring works in a range of media and tracing processes of cross-cultural exchange, develop sensitivity to visual and material form and a solid foundation in the practice of visual and material analysis.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Increased knowledge, understanding, and appreciation of cultural diversity across time and space

Audience: Undergraduate

2. Ability to analyze images and objects in various cultural contexts, linking their visual forms to cultural practices

Audience: Undergraduate

3. Increased skill in observing and describing the visual environment around us

Audience: Undergraduate

4. Increased skills in written and verbal expression of complex ideas

Audience: Undergraduate

### **ART HIST 206 – SURVEY OF PHOTOGRAPHY: 1839 TO 1989**

3-4 credits.

Survey of 150 years of photography's processes, practitioners, and genres. Emphasis on tensions between its commercial, vernacular, and artistic forms.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**ART HIST 210 – A HISTORY OF THE WORLD IN 20 BUILDINGS**

3 credits.

Why were the ancient Egyptians obsessed with building elaborate tombs? Was the Taj Mahal really a monument to love? Why do the Greeks want the Parthenon marbles returned? Was Frank Lloyd Wright "modern?" How have buildings reflected and shaped the historical forces of the modern age, from colonialism, to industrialization, to globalization? Take a journey through space and time and explore the history of the world through its great buildings. Learn to recognize, analyze, and question the dynamic interaction between culture, politics, religion, and architectural form. Perhaps more than any other visual art, architecture is alive. Buildings shapeshift over decades, centuries, millennia. They stand as both witnesses to and agents of historical change. Unpack our buildings' histories to reveal their role in our shared human story.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Interpret architecture in its cultural context.

Audience: Undergraduate

2. Analyze the relationship between architectural form and historical change.

Audience: Undergraduate

3. Observe, describe, and appreciate the buildings around them.

Audience: Undergraduate

4. Argue for what makes a "great building" in its historical context.

Audience: Undergraduate

**ART HIST 227 – THE MODERNIST REVOLUTION**

4 credits.

Overview of the emergence and development of modernism in the visual arts between approximately 1880 and 1970, beginning with the origins of modernist visual art in the late 19th century, then moving on to the proliferation of avant-garde movements in the first half of the 20th century before concluding with the crisis and collapse of modernism in the post-World War II period. Movements covered include Cubism, Futurism, Dadaism, Surrealism, and Abstract Expressionism. Major topics: the breakdown of traditional pre-modernist artistic styles and genres; invention of radical new techniques such as abstraction and collage; impacts of the political, social, and technological upheavals of the modern era; relations between modernist art, racialization, and colonialism; the transition between modernism and contemporary (or post-modernist) art.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate an understanding of key issues in the field of 20th century art history through exams, writing assignments, and discussion section participation.

Audience: Undergraduate

2. Relate modern art movements to their social, economic, political, and cultural contexts.

Audience: Undergraduate

3. Develop techniques of written and oral communication in an academic setting.

Audience: Undergraduate

### **ART HIST/ENVIR ST/GEOG/HISTORY/LAND ARC 239 – MAKING THE AMERICAN LANDSCAPE**

3-4 credits.

Traces the history and evolution of the American cultural landscape from precolonial times to present. Explores how class, ethnic, and racial inequality have shaped the appearance of the American landscape over time, and how that landscape in turn has affected relationships between people and groups through the present day. Examines extraordinary things (civic structures (like our State Capitol), National Parks, War Memorials) and more ordinary kinds of places (mining towns, cotton plantations, sites of recreation and leisure, and suburban tract housing) to stimulate critical thinking about how these places have served people and groups unequally and disproportionately over time and across space. Considers complex meanings of American spaces and places to different people and groups, stimulating empathy and encouraging participation in a multicultural society.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and interpret the American landscape as a richly layered historical document mediated by complex relationships between people and groups

Audience: Undergraduate

2. Explain how the American cultural landscape has affected present day circumstances regarding ethnicity and race as well as racial and ethnic inequalities

Audience: Undergraduate

3. Articulate ways in which historical change manifest in buildings, enclosed spaces, and other elements of the American landscape reveal racial, ethnic, class and gender dynamics between and among people and groups over time

Audience: Undergraduate

4. Enlist forms of historical evidence – maps (current and historic), photographs (aerial and otherwise), historical newspapers, census records, deeds and land records – to interpret landscapes and landscape change

Audience: Undergraduate

5. Explain the American landscape as a product of competing interests, which will demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others

Audience: Undergraduate

### **ART HIST/AFROAMER 241 – INTRODUCTION TO AFRICAN ART AND ARCHITECTURE**

3 credits.

Examines the rich heritage of African arts and architecture as they shape and have been shaped by the histories and cultural values (social, political, religious, philosophical, and aesthetic) of African peoples, both past and present, on the continent where humanity began. It includes an historical overview of selected artistic traditions from different parts of the continent from 26,000 BCE to the 21st century and thematic/cultural case studies: artists and aesthetics; textiles, decorative, and personal/body arts; architecture; and individual artists.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ART HIST/AFROAMER 242 – INTRODUCTION TO AFRO-AMERICAN ART**

3 credits.

Historical survey of African American art. Beginning with the African heritage and concluding with creativity of the 1970's, examine the evolution of African American art. Attention to the aesthetic sensibilities of diverse styles as well as the social significance of Black art within the art arena.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ART HIST/ANTHRO/DS/HISTORY/LAND ARC 264 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART HIST/CLASSICS 300 – THE ART AND ARCHAEOLOGY OF ANCIENT GREECE**

3-4 credits.

Explores the art and archaeology of ancient Greece from the Bronze Age through the Hellenistic period.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Greek society and culture.

Audience: Undergraduate

2. Examine, analyze, and interpret material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Understand and evaluate the art and archaeology of ancient Greece, current archaeological methods, the ethics of collecting antiquities, and the legacy of ancient Greek material culture and technologies.

Audience: Undergraduate

**ART HIST 301 – MYTHS, LOVES, AND LIVES IN GREEK VASES**

3-4 credits.

Explore the world of the ancient Greeks through their painted pottery. Greek pottery offers a uniquely rich imagery of mythology, athletics, domestic scenes, fabulous monsters, drinking parties, and other aspects of Greek life and imagination. They were used by ordinary people, and their use offers insights into their everyday lives and concerns, and a counterbalance to the elite accounts preserved in literature and poetry. Consider the long history of Greek vases from about 800 BC until about 350 BC, and focus on themes such as relationships with the East, myth and epic poetry, narrative, and everyday subjects such as women's lives, death and the afterlife, and the symposium. Make use of the excellent collection of Greek vases in the Chazen Museum, and write research papers using that collection.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ART HIST 302 – GREEK SCULPTURE**

3-4 credits.

Problems in style, techniques and reconstruction of glyptic sculpture, koroplastics and bronzes from the Late Bronze Age through fifth century B.C.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ART HIST 303 – TOPICS IN ART HISTORY**

3 credits.

Surveys the arts or visual culture of varying geographical regions, time periods, or cultures depending on selected topic.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Ability to analyze images and objects in various cultural contexts, linking their visual forms to cultural practices

Audience: Undergraduate

2. Increased skill in observing, describing, and analyzing visual evidence

Audience: Undergraduate

3. Increased skill in weighing and coordinating visual and textual evidence in making arguments

Audience: Undergraduate

4. Increased skills in written and verbal expression of complex ideas

Audience: Undergraduate

5. Increased knowledge of the art and artists and their place in socio-cultural contexts.

Audience: Undergraduate

### ART HIST/CLASSICS 304 – THE ART AND ARCHAEOLOGY OF ANCIENT ROME

3-4 credits.

Explores the art and archaeology of ancient Italy, the Roman Republic, and the Roman Empire from the Iron Age to Late Antiquity.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Roman society and culture.

Audience: Undergraduate

2. Examine, analyze, and interpret material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Understand and evaluate the art and archaeology of ancient Rome, current archaeological methods, the ethics of collecting antiquities, and the legacy of ancient Roman material culture and technologies.

Audience: Undergraduate

### ART HIST 305 – HISTORY OF ISLAMIC ART AND ARCHITECTURE

3 credits.

Surveys the architecture, landscape, book arts, and luxury objects produced in Islamic contexts from Spain to India from the 7th through the 21st centuries. Attention will be focused upon the relationships between Islamic visual idioms and localized religious, political, and socioeconomic circumstances. In particular, examine the vital roles played by theology, royal patronage, ceremonies, gift exchange, trade, and workshop practices in the formulation of visual traditions.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ART HIST 307 – FROM TOMB TO TEMPLE: ANCIENT CHINESE ART AND RELIGION IN TRANSITION

3 credits.

How did ancient Chinese create an underground space for the afterlife? Why was jade used as a medium to prolong human life or transcend the finite world? How was Buddhist art reappropriated in China? Why did calligraphy emerge as the highest artistic form of self-expression? What is the art of the silk-road? Learn about art forms and concepts that developed in China from remote antiquity to the mid-10th century. The artworks that survive from this long period were created primarily in the contexts of funerary culture and religion, while knowledge of art made for other purposes is based on texts. Organized chronologically, examine the materials, techniques, and functions of the most important artistic media in each period. These media will include jade-carving, metalwork, sculpture, ceramics, calligraphy, painting, textile and architecture. Consider the aesthetic concepts and social groups associated with the various art forms.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically read art historical texts critically to interrogate authors for their argument, evidence, and content.

Audience: Undergraduate

2. Analyze how an artwork's format, materials, and visual properties convey meaning, content, and social function.

Audience: Undergraduate

3. Discuss how an artwork relates to its socio-historical context, and—in turn—how its socio-historical context informs our reading of the artwork.

Audience: Undergraduate

**ART HIST 308 – THE TASTES OF SCHOLARS AND EMPERORS: CHINESE ART IN THE LATER PERIODS**

3 credits.

In what ways were Chinese arts special and noteworthy within the broad history of world art? Why is Chinese landscape painting regarded as the "highest form" of Chinese painting? How did scholars' taste influence garden, furniture and other craft-making? Why did each emperor have his own porcelains made as a way to claim his sovereignty? How did the booming of print culture influence Chinese religious practice in the early modern period? Why did dreams become a popular subject in Chinese art? Learn about art forms and concepts that developed in China from the mid-10th century to the early 20th century. Chronologically, examine the development of painting, calligraphy, woodblock printing, ceramics, lacquer wares, textile, architecture, and photography. In addition to material, technique, subject and function, consider the aesthetic concepts and social groups associated with various art forms.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Critically read art historical texts to interrogate authors for their argument, evidence, and content.

Audience: Undergraduate

2. Analyze how an artwork's format, materials, and visual properties convey meaning, content, and social function.

Audience: Undergraduate

3. Understand how an artwork relates to its socio-historical context, and—in turn—how its socio-historical context informs our reading of the artwork.

Audience: Undergraduate

**ART HIST 310 – ICONS, RELIGION, AND EMPIRE: EARLY CHRISTIAN AND BYZANTINE ART, CA. 200-1453**

3 credits.

Why did early Christians consider art necessary, if potentially dangerous? How did they adapt and compete with Roman and Jewish traditions? How were the visual propaganda and monumental architecture of the Roman Empire transformed during a millennium of Byzantine (East Roman) rule? These are key questions addressed as we explore the role of architecture and images in religion and imperial politics of the Mediterranean basin between the 3rd and 15th centuries. Other broader topics include the cult of the saints; theories and functions of icons and iconoclasm in Orthodox Christianity; text and image in illuminated manuscripts; multi-sensory aspects of sacred space and ritual; Byzantium's role in global cultural exchange.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Ability to "read" visual images (iconography)

Audience: Undergraduate

2. Critical reading and discussion skills with particular attention methodology

Audience: Undergraduate

3. Respect and value different points of view

Audience: Undergraduate

4. Develop written and oral communication skills with emphasis on articulating arguments based on visual and material evidence of the objects of study

Audience: Undergraduate

5. Develop bibliographic and research methods

Audience: Undergraduate

6. Competence using digital image databases

Audience: Undergraduate

**ART HIST 318 – ROMANESQUE AND GOTHIC ART AND ARCHITECTURE**

3-4 credits.

Art and architecture of Western Europe, ca. 1000 to ca. 1350. Particular emphasis on the relationship of the arts to theology, ritual, concepts of the body, rulership and courtliness.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023

**ART HIST 320 – ITALIAN RENAISSANCE ART**

3-4 credits.

Painting, sculpture, and architecture.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ART HIST 323 – FROM MICHELANGELO & RAPHAEL TO TITIAN:  
THE ARTS IN 16TH CENTURY ITALY**

3-4 credits.

Examines art from 1500-1570, or the High Renaissance to Mannerism, and concludes at the beginning of the Church Reform period. Emphasis is on painting, sculpture and architecture, but the graphic and decorative arts as well as patronage and the impact of global discoveries also are included.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2020**ART HIST 335 – STUDY ABROAD IN ANCIENT/MEDIEVAL ART**

1-6 credits.

Treatment of an art historical topic in a course offered at a university outside the United States. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2001**ART HIST 336 – STUDY ABROAD IN RENAISSANCE/BAROQUE/  
NORTHERN ART**

1-6 credits.

Treatment of an art historical topic in a course offered at a university outside the United States. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2002**ART HIST 337 – STUDY ABROAD IN 18TH-20TH CENTURY ART**

1-6 credits.

Treatment of an art historical topic in a course offered at a university outside the United States. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2001**ART HIST 338 – STUDY ABROAD IN AFRICAN/ASIAN ART**

1-6 credits.

Treatment of an art historical topic in a course offered at a university outside the United States. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 1998**ART HIST 346 – BRITISH ART AND SOCIETY FROM THE  
EIGHTEENTH CENTURY TO THE PRESENT**

3-4 credits.

Major movements covered include: eighteenth century art of the public sphere (Hogarth, Wright of Derby), Neo-Classicism (Reynolds), Romanticism (Blake, Turner), landscape, Pre-Raphaelites, modern movements and the postmodern revival of British art.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2022**ART HIST 350 – 19TH CENTURY PAINTING IN EUROPE**

3-4 credits.

History of European painting from 1800 to 1900.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**ART HIST 354 – CROSS-CULTURAL ARTS AROUND THE ATLANTIC RIM: 1800 TO THE PRESENT**

3-4 credits.

Interdisciplinary study of cross-cultural exchange and conflict, focusing on the visual arts, with sections on literature, film and music from the Americas, Africa and Europe.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ART HIST 355 – HISTORY OF PHOTOGRAPHY**

3 credits.

European and American photography from its invention to the challenge of electronic media, emphasizing the student's development of a critical approach to the medium.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ART HIST 357 – HISTORY OF WISCONSIN ARCHITECTURE, 1800-PRESENT**

3 credits.

Introduces methods of studying historical architecture through a focused examination of buildings across the state of Wisconsin. Learn about particular building features, building types, and methods of approaching buildings through a tight focus on a bounded geographical realm. This geographical focus allows for in-depth analysis and research of buildings.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2023

**Learning Outcomes:** 1. Recognize and identify features and traits of Wisconsin's architecture from the nineteenth century to the present  
Audience: Undergraduate

2. Describe these features, components, and traits and buildings and cultural landscapes more broadly using vocabulary and methods of architectural history that are applicable to Wisconsin buildings (and beyond)  
Audience: Undergraduate

3. Interpret examples of Wisconsin's buildings using tools, methods, and scholarship from anthropology, history, American studies, cultural geography, landscape architecture, folklore, and material culture, among others, that helps give them meaning and significance to buildings  
Audience: Undergraduate

4. Produce an original digital project focused on describing, analyzing, and researching a building around them that enlists skills acquired over the course  
Audience: Undergraduate

### **ART HIST 360 – GORE LUXURY IDENTITY MIMESIS: NORTHERN RENAISSANCE**

3 credits.

Why do Netherlandish Lamentations feature bloody, putrefying wounds? Why is a skull distorted across Holbein's Ambassadors? Is there interracial love in Bosch's Garden of Earthly Delights? Featuring the cultural production of Jan van Eyck, Tilman Riemenschneider, Albrecht Dürer, Hieronymus Bosch, Hans Holbein the Younger, Pieter Bruegel the Elder, and others, surveys both visual culture and canonical monuments of art in Northern Europe c. 1400-1570. Engage with media ranging from mass-producible prints to the pseudo-antique format of medals, emphasizing the canonical formats of painting and sculpture. How did this visual output emerge in the context of cultural changes in the spheres of naturalism, technology, humanism, theology, and European "expansion," among others? Informed by readings of primary and secondary textual sources, develop strong skills in visual analysis, a deep sense of historical context, and experience with traditional methodologies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Know plenty about Northern Renaissance art.

Audience: Undergraduate

2. Feel confident building shared critical discourse in any context.

Audience: Undergraduate

3. Gain familiarity with various approaches to visual content of any time and place.

Audience: Undergraduate

4. Think beyond inappropriate corporate/quantified frameworks for humanistic learning.

Audience: Undergraduate

### **ART HIST 364 – HISTORY OF AMERICAN ART: ART, MATERIAL CULTURE, AND CONSTRUCTIONS OF IDENTITY, 1607-PRESENT**

3-4 credits.

Examines the history of American Art from the period of permanent European settlement through the present. Works of art and other forms of material culture will be explored and discussed within the context of philosophical, historical, social, and cultural developments in the United States and across the globe.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **ART HIST 365 – THE CONCEPT OF CONTEMPORARY ART**

3-4 credits.

Traces out some of the radical changes in art produced after roughly 1950, or what might be called contemporary art. focuses on American and European art after the "decline" of Modernism. That entails becoming familiar with movements ranging from color field painting, to postmodern production, to performance, video, and installation. Additionally, attention will be paid to artists and artwork that are not adequately represented by the traditional categories of art history.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**ART HIST/RELIG ST 373 – MECCA, CAIRO, ISTANBUL, DELHI: GREAT CITIES OF ISLAM**

3 credits.

Have you always wanted to visit the Taj Mahal? Are you intrigued by the annual pilgrimage of millions of Muslims to Mecca in Saudi Arabia? Do you wonder how ancient cities like Cairo or Istanbul preserve their history while operating as modern, global megacities? Explore the development of some of the world's most fascinating cities – Mecca (Saudi Arabia), Cairo (Egypt), Istanbul (Turkey), and Delhi (India). Through images, texts, films, sounds, and even food, examine the development of architectural wonders and the urban fabric from the time of their foundation to the present day.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Interpret architecture and urban development in ways that take into account the historical contexts in which they were produced and received.

Audience: Undergraduate

2. Recognize distinct architectural languages in various Islamic cities over time.

Audience: Undergraduate

3. Understand the role of architecture in articulating urban/national narratives about the past and the present.

Audience: Undergraduate

4. Improve in ability to understand complex scholarly arguments, beginning to judge the strength of the visual and textual evidence presented.

Audience: Undergraduate

5. Communicate about architecture and urban history in written and oral form.

Audience: Undergraduate

6. Locate, assess, and use research resources in both print and digital form.

Audience: Undergraduate

**ART HIST/ASIAN 379 – CITIES OF ASIA**

3 credits.

Historical overview of the built environment of cities of Asia from antiquity to the present; architectural and urban legacy in its social and historical context; exploration of common themes that thread through the diverse geographical regions and cultures of Asia. Not open to students with credit for LCA 379 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ART HIST 403 – TOPICS IN ART HISTORY**

3 credits.

Topics will vary as to media, geography, culture, and time frame.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Ability to analyze images and objects in various cultural contexts, linking their visual forms to cultural practices

Audience: Undergraduate

2. Increased skill in observing, describing, and analyzing visual evidence

Audience: Undergraduate

3. Increased skill in weighing and coordinating visual and textual evidence in making arguments

Audience: Undergraduate

4. Increased skills in written and verbal expression of complex ideas

Audience: Undergraduate

**ART HIST 405 – CITIES AND SANCTUARIES OF ANCIENT GREECE**

3 credits.

Topics include urbanism in ancient Greece in theory and practice; the forms, technologies, patronage and use of buildings; the creation and conception of urban space; and the organization of religious sites, dedications, and rituals.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ART HIST 407 – TOPICS IN NINETEENTH CENTURY ART**

3–4 credits.

Nineteenth century visual culture. Topics include: representations of race and gender; the history of photography; popular imagery and aspects of Modernism.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**ART HIST 408 – TOPICS IN TWENTIETH-CENTURY ART**

3-4 credits.

Special topics of 20th-century art that focuses variously on Europe, England, America, or their international interaction. Emphasis on art in its historical and social context.

**Requisites:** Sophomore standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**ART HIST 409 – TOPICS IN CONTEMPORARY ART**

3 credits.

Topics offered concern the rigorous study of the history and theory of contemporary art.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**ART HIST 411 – TOPICS IN ASIAN ART**

3-4 credits.

In-depth examination of special topics related to Asian art, including South Asia, East Asia, Southeast Asia, and Central Asia.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ART HIST 412 – TOPICS IN AFRICAN AND AFRICAN DIASPORA ART HISTORY**

3-4 credits.

Cultural and historical forces that have shaped the arts of either a specific people or a specific site in Africa or the African Americas.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART HIST 413 – ART AND ARCHITECTURE IN THE AGE OF THE CALIPHS**

3 credits.

The tenth century CE marked a period of drastic change in the Islamic world, as the unified Islamic caliphate splintered into three rival dynasties: the Sunni Iraqi Abbasids, Spanish Umayyads, and the Shi'ite Fatimids in Egypt. Consider this turning point in the history of Islamic culture through the lens of art and architectural patronage. Explore the architectural and urban projects of the three dynasties to examine competing visions of power, sources of legitimacy and the development of Cairo, Baghdad/Samarra and Cordoba as capital cities. Also consider the role of portable arts, addressing the role of exchange and gift-giving in the Mediterranean context and the problems of attribution in this highly mobile environment. Themes include the role of sectarian identity (Shi'ite vs Sunni); the incorporation of Christian and Jewish culture; the relation between the court and urban populations; and the meaning of ornament and style in Islamic art.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**ART HIST/MEDIEVAL 415 – TOPICS IN MEDIEVAL ART**

3 credits.

Advanced topics in Medieval art. Topics may include: "Death and the Afterlife in Medieval Art"; "Civic Art and Architecture and Public Space in Medieval Italy"; "Rome in the Middle Ages"; "Pilgrimage the Cult of the Saints in Medieval Byzantine Art."

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ART HIST 420 – TOPICS IN ITALIAN RENAISSANCE ART**

3 credits.

Advanced topics in Italian Renaissance art.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ART HIST/ASIAN 428 – VISUAL CULTURES OF INDIA**

3 credits.

Concentrates on image complexes (art, photography, and cinema) and visual environments (architecture, urban planning, and public rituals) of India; examination of visual culture through thematic issues such as, sexuality, patronage, cultural encounter, transculturation, ways of viewing, modernism, and nationalism. Not open to students with credit for LCA 428 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ART HIST 430 – TOPICS IN VISUAL CULTURE**

3 credits.

Introduces key issues, theories, and methods in visual cultures studies, emphasizing aspects that affect the practices of art history and providing a changing topical focus that addresses new research in this developing interdisciplinary area.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ART HIST 431 – TOPICS IN THEORY**

3 credits.

Introduces philosophy and theory relevant to the study of art history and visual cultures with a focus on a particular body of theoretical work and an organization in terms of key questions and concepts.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2023**ART HIST 435 – STUDY ABROAD IN ANCIENT/MEDIEVAL ART**

1-6 credits.

Treatment of an art historical topic in a course offered at a university outside the United States. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**ART HIST 436 – STUDY ABROAD IN RENAISSANCE/BAROQUE/NORTHERN ART**

1-6 credits.

Treatment of an art historical topic in a course offered at a university outside the United States. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**ART HIST 437 – STUDY ABROAD IN 18TH-20TH CENTURY ART**

1-6 credits.

Treatment of an art historical topic in a course offered at a university outside the United States. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**ART HIST 438 – STUDY ABROAD IN AFRICAN/ASIAN ART**

1-6 credits.

Treatment of an art historical topic in a course offered at a university outside the United States. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**ART HIST 440 – ART AND POWER IN THE ARAB WORLD**

3 credits.

Considers the use of art and architecture as an expression of power in the Arab world, from the seventh century to the present. Beginning with the establishment of the caliphate and ending with the arts of revolution following the Arab Spring, investigates the shifting role of art and architecture in the quest for political dominance. With a particular focus on the arts of Cairo, Baghdad, Cordoba, Mecca, Jerusalem, Damascus, and the modern Arabian Gulf, explore competing visions of power and sources of legitimacy, through the lens of artistic production.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

### **ART HIST 457 – HISTORY OF AMERICAN VERNACULAR ARCHITECTURE AND LANDSCAPES**

3 credits.

Survey of American vernacular buildings and landscapes from the colonial period to the present. Emphasis is on acquiring descriptive tools and developing interpretive frameworks to explore the significance that these vernacular environments have had for their makers and users.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

### **ART HIST 468 – FRANK LLOYD WRIGHT**

3–4 credits.

An analysis of Frank Lloyd Wright's architecture and writings.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ART HIST 475 – JAPANESE CERAMICS AND ALLIED ARTS**

3 credits.

A history of Japanese ceramics and related topics such as Chinese and Korean ceramics and the tea ceremony. Emphasis placed on the technological, cultural, political, and economic, as well as aesthetic, dimensions of ceramic development.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### **ART HIST/RELIG ST 478 – ART AND RELIGIOUS PRACTICE IN MEDIEVAL JAPAN**

3 credits.

A study of spaces, objects, and images within the context of religious belief and practice in Japan between 1300 and 1600, when great Zen monasteries grew up alongside older Buddhist/Shinto religious "megaplexes," and new salvationist sects spread throughout Japan.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### **ART HIST 480 – GLOBAL MODERNISMS**

3 credits.

Considers modernist art movements in Africa, the Middle East, Asia, the Americas, and Europe between approximately 1900 and 1975, with an emphasis on practices in what has more recently been called the Global South. Key issues include: interactions between Indigenous, diasporic, and cosmopolitan practices; the phenomenon of modernist "primitivism"; modernism's involvement in the revolutions of the 20th century (e.g., the Mexican Revolution; Russian Revolution; decolonization movements in Asia and Africa); nationalism, developmentalist ideologies, and state support for the arts; Blackness as a transnational paradigm; and the emergence of global contemporary art from the coalescence of various local art worlds.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify and differentiate major tendencies in global modernist art between approximately 1900 and 1975.

Audience: Undergraduate

2. Compare related issues in modernist art across geographical, cultural, and historical boundaries.

Audience: Undergraduate

3. Interpret works of global modernist art in written and spoken form using concepts derived from readings, lectures, and group discussions.

Audience: Undergraduate

4. Critically evaluate advanced secondary literature and primary sources in the field of art history.

Audience: Undergraduate

**ART HIST 481 – THE ART OF OUR TIME**

3 credits.

Outline of major developments in global visual art from the 1960s to the present, with an emphasis on influential recent theorizations of contemporary art that have been developed by critics, art historians, and artists themselves. Topics include: the globalization of the art world, re-definitions of art after modernism, politics of contemporary art, issues of identity (race, gender, sexuality), technology and new media, the art market, and theoretical approaches to contemporary art.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Identify trends in global contemporary art from the 1960s to the present.

Audience: Undergraduate

2. Assess important concepts and debates in the fields of contemporary art history and art criticism.

Audience: Undergraduate

3. Combine knowledge of these topics in critical writing and in-class discussion.

Audience: Undergraduate

4. Apply theoretical “tools” to produce a deeper appreciation of artworks.

Audience: Undergraduate

5. Demonstrate research, writing, and oral presentation skills.

Audience: Undergraduate

**ART HIST 500 – PROSEMINAR: SPECIAL TOPICS IN ART HISTORY**

3 credits.

Advanced topics in Art History taught in a seminar-style format. Topics will vary as to media, geography, culture, and time frame.

**Requisites:** Consent of instructor**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ART HIST 505 – PROSEMINAR IN ANCIENT ART**

3 credits.

Advanced topics in Ancient Art History taught in a seminar-style format.

**Requisites:** Consent of instructor**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ART HIST 506 – CURATORIAL STUDIES EXHIBITION PRACTICE**

3 credits.

Preparation of an exhibition for the Chazen Museum of Art or other exhibition spaces on campus. Help conceptualize the exhibition and its layout, research and interpret individual objects, prepare wall texts for the display and other materials published in print or online in conjunction with the exhibition. The specific focus will be different each time the course is taught.

**Requisites:** Consent of instructor**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**ART HIST 510 – PROSEMINAR IN ISLAMIC ART AND ARCHITECTURE**

3 credits.

A rotating topic in Islamic Art and Architectural History

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop advanced skills in reading academic texts in Islamic art history

Audience: Undergraduate

2. Carry out sustained research in Islamic art history.

Audience: Undergraduate

3. Develop skills in oral communication.

Audience: Undergraduate

4. Develop collaborative approaches to Islamic art history.

Audience: Undergraduate

**ART HIST 515 – PROSEMINAR IN MEDIEVAL ART**

3 credits.

Advanced topics in Medieval Art History taught in a seminar-style format.

**Requisites:** Consent of instructor**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**ART HIST 535 – PROSEMINAR IN NORTHERN EUROPEAN PAINTING**

3 credits.

Advanced topics in Art History focusing on Northern European Painting taught in a seminar-style format.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2016

**ART HIST 555 – PROSEMINAR IN 19TH CENTURY EUROPEAN ART**

3 credits.

Advanced topics in 19th Century European Art History taught in a seminar-style format.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART HIST 556 – PROSEMINAR IN 20TH CENTURY EUROPEAN ART**

3 credits.

Advanced topics in 20th Century European Art History taught in a seminar-style format.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ART HIST 563 – PROSEMINAR IN MATERIAL CULTURE**

3 credits.

Interdisciplinary study of the way people use objects and environments to express identities and relationships in households, communities, and larger social/economic systems.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ART HIST 567 – PROSEMINAR IN AMERICAN ARCHITECTURE**

3 credits.

Advanced topics in Art History focusing on American Architecture taught in a seminar-style format.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**ART HIST 575 – PROSEMINAR IN JAPANESE ART**

3 credits.

Advanced topics in Japanese Art History taught in a seminar-style format.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**ART HIST 576 – PROSEMINAR IN CHINESE ART**

3 credits.

Advanced topics in Chinese Art History taught in a seminar-style format.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ART HIST 600 – SPECIAL TOPICS IN ART HISTORY**

3 credits.

Topics will vary as to media, geography, culture, and time frame.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART HIST 601 – INTRODUCTION TO MUSEUM STUDIES I**

3 credits.

Introduces the history of museums and collecting; studies and practices in museology and connoisseurship; exhibition planning, research, cataloging, and installation.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ART HIST 602 – INTRODUCTION TO MUSEUM STUDIES II**

3 credits.

Implementation of an exhibition, permanent collection installation or another museum-based project. Builds on projects from ART HIST 601.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ART HIST 603 – CURATORIAL STUDIES COLLOQUIUM**

3 credits.

Engage in a broad range of questions, both theoretical and practical, related to curatorial practice through a series of sessions on curatorial strategies. Particular emphasis will be placed on integrative and collaborative approaches to curating a wide variety of material: art, film, music, books, anthropology/culture, archeology, history, geology, zoology, dance, etc. Engage with experts on the theories, objectives, and processes of conceiving, designing, and mounting exhibitions, as well as reaching different audiences with both physical and virtual exhibitions. Also introduces the distinctive collections and resources on campus and in the region.

**Requisites:** Consent of instructor**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2019**ART HIST/ASIAN 621 – MAPPING, MAKING, AND REPRESENTING COLONIAL SPACES**

3 credits.

Spatial legacy of colonialism; explores important ways in which the population, landscape, architecture, and urban environment of colonies were mapped, made, and represented, particularly in the 19th and 20th centuries; theoretical and empirical analyses from diverse disciplines and spatial terrain. Not open to students with credit for LCA 621 prior to Fall 2019.

**Requisites:** Senior standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ART HIST/HISTORY/JOURN/L I S 650 – HISTORY OF BOOKS AND PRINT CULTURE IN EUROPE AND NORTH AMERICA**

3 credits.

History of books and print culture in the West from ancient times to the present. Focus on the influence of reading and writing on social, cultural, and intellectual life. Methodologies, theories, and sources for study of book and print culture history.

**Requisites:** Graduate/professional standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ART HIST 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ART HIST 682 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ART HIST 691 – SENIOR THESIS**

3-6 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**ART HIST 692 – SENIOR THESIS**

3-6 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ART HIST 697 – UNDERGRADUATE CURATORIAL STUDIES INTERNSHIP (DIRECTED STUDY)**

1-3 credits.

Internship study in applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities with substantial research components. and have them approved by the instructor.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2024

**ART HIST 698 – DIRECTED STUDY**

2-3 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2010

**ART HIST 699 – DIRECTED STUDY**

1-3 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART HIST/CLASSICS 700 – THE ART AND ARCHAEOLOGY OF ANCIENT GREECE**

3 credits.

Explores the art and archaeology of ancient Greece from the Bronze Age through the Hellenistic period.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ART HIST 701 – PRACTICUM IN ART HISTORY: BIBLIOGRAPHY, HISTORIOGRAPHY, METHODS**

3 credits.

Intensive work in critical analysis and research methods; introduction to the methods and historiography of art history; orientation to source work in the Elvehjem collection and in University libraries.

**Requisites:** Declared in Art History graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ART HIST 703 – CURATORIAL STUDIES COLLOQUIUM**

3 credits.

Engage in a broad range of questions, both theoretical and practical, related to curatorial practice through a series of sessions on curatorial strategies. Particular emphasis will be placed on integrative and collaborative approaches to curating a wide variety of material: art, film, music, books, anthropology/culture, archeology, history, geology, zoology, dance, etc. Engage with experts on the theories, objectives, and processes of conceiving, designing, and mounting exhibitions, as well as reaching different audiences with both physical and virtual exhibitions. Also introduces the distinctive collections and resources on campus and in the region.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**ART HIST/CLASSICS 704 – THE ART AND ARCHAEOLOGY OF ANCIENT ROME**

3 credits.

Explores the art and archaeology of ancient Italy, the Roman Republic, and the Roman Empire from the Iron Age to Late Antiquity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**ART HIST 706 – TOPICS IN AMERICAN ART HISTORY**

3 credits.

Varied topics on American Art History.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART HIST 707 – TOPICS IN NINETEENTH-CENTURY EUROPEAN ART**

3 credits.

Topics in specific aspects of 19-century visual culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ART HIST 715 – TOPICS IN MEDIEVAL ART**

3 credits.

Various themes of current interest in the art, architecture and visual culture of medieval Europe and the Mediterranean (including the Byzantine Empire and Islamic states of the Mediterranean rim).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ART HIST 731 – TOPICS IN EARLY MODERN ART**

3 credits.

Topics in Early Modern Art.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ART HIST/ANTHRO/DS/HISTORY/LAND ARC 764 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ART HIST 775 – TOPICS IN JAPANESE ART HISTORY**

3 credits.

Topics in Japanese Art History.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**ART HIST 776 – TOPICS IN CHINESE ART HISTORY**

3 credits.

Topics in Chinese Art History.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ART HIST 779 – TOPICS IN ARCHITECTURE & URBANISM OF ASIA**

3 credits.

Topics in Architecture and Urbanism of Asia.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART HIST 797 – CURATORIAL STUDIES INTERNSHIPS (DIRECTED STUDY)**

3 credits.

Internship study in applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities with substantial research components and have them approved by the instructor.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART HIST 799 – INDEPENDENT STUDY**

1-6 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART HIST 800 – SEMINAR: SPECIAL TOPICS IN ART HISTORY**

3 credits.

Topics will vary as to media, geography, culture, and time frame.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**ART HIST/AFROAMER 801 – HISTORIOGRAPHY, THEORY AND METHODS IN VISUAL CULTURE**

3 credits.

Focuses on the knowledge, theories, and methods that are fundamental to the transdisciplinary discipline of Visual Cultures. Develops skills in critical reading, research, analysis, writing, and oral presentation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Show comprehension of the history, theories, and methods of Visual Culture as a field of study as they are practiced in the field of Visual Cultures.

Audience: Graduate

2. Demonstrate critical ability to work with and develop Visual Culture theories and methods.

Audience: Graduate

3. Develop capacity to conduct original research in Visual Culture.

Audience: Graduate

4. Show ability to work with Visual Culture theories and methods in the analysis and presentation of original research which may take oral, written, and visual forms.

Audience: Graduate

5. Develop the critical analytic, rhetorical, and technical skills necessary to effectively communicate original research in Visual Culture.

Audience: Graduate

**ART HIST/AFROAMER 802 – VISUAL CULTURES: TOPICS IN VISUAL CULTURES**

3 credits.

Content will vary to facilitate in-depth engagement with a particular topic in Visual Culture. Topics will be pursued with analytic attention to gender, sexuality and race.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop ability to work with Visual Culture theories and methods

Audience: Graduate

2. Develop ability to critique, extend and even revise visual culture theories

Audience: Graduate

3. Demonstrate a practice-based, working knowledge of visual culture theories and methods in producing original research which may take written or visual form

Audience: Graduate

4. Develop the critical analytic, rhetorical, and technical skills necessary to effectively communicate original research in Visual Culture.

Audience: Graduate

**ART HIST 805 – SEMINAR-ANCIENT ART AND ARCHITECTURE**

3 credits.

Rotating topics in Ancient Art.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ART HIST 810 – SEMINAR IN ISLAMIC ART AND ARCHITECTURE**

3 credits.

Rotating topics in Islamic art and architectural history.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop advanced skills in reading academic texts in Islamic art history

Audience: Graduate

2. Carry out sustained research in Islamic art history.

Audience: Graduate

3. Develop skills in oral communication.

Audience: Graduate

4. Develop collaborative approaches to Islamic art history.

Audience: Graduate

**ART HIST 815 – SEMINAR-MEDIEVAL ART**

3 credits.

Rotating topics in Medieval Art.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART HIST 835 – SEMINAR-NORTHERN EUROPEAN ART**

3 credits.

Rotating topics in Northern European Art.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2016**ART HIST 855 – SEMINAR-19TH CENTURY EUROPEAN ART**

3 credits.

Rotating topics in 19th Century European Art.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ART HIST 856 – GRADUATE SEMINAR IN TWENTIETH CENTURY EUROPEAN ART**

3 credits.

Rotating topics in 20th Century European Art.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**ART HIST 863 – SEMINAR IN MATERIAL CULTURE**

3 credits.

Interdisciplinary study focusing on the way people use objects and environments to express identities and relationships in households, communities, and larger social/economic systems.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**ART HIST 867 – SEMINAR-AMERICAN ARCHITECTURE**

3 credits.

Rotating topics in American Architecture.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2022**ART HIST 875 – SEMINAR IN JAPANESE ART**

3 credits.

Rotating topics in Japanese Art.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**ART HIST 876 – SEMINAR IN CHINESE ART**

3 credits.

Rotating topics in Chinese Art.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**ART HIST 990 – RESEARCH AND THESIS**

3 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

# ASIAN AMERICAN STUDIES (ASIAN AM)

## ASIAN AM 101 – INTRODUCTION TO ASIAN AMERICAN STUDIES 3 credits.

Introduction to the historical, sociological, anthropological, political, and cultural study of Americans of Asian ancestry.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## ASIAN AM/AFROAMER/AMER IND/CHICLA/FOLKLORE 102 – INTRODUCTION TO COMPARATIVE US ETHNIC AND AMERICAN INDIAN STUDIES 3 credits.

Introduction to comparative ethnic studies, examining race, ethnicity, and indigeneity within the United States. Includes perspectives from African American, American Indian, Asian American, and Chicana and Latin@ studies.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the multicultural history of the United States of America and the essential role of Indigenous, African, Asian and Chicana/x & Latina/x peoples in the American story.

Audience: Undergraduate

2. Identify the creation, development and legacies of race-based discrimination in the United States.

Audience: Undergraduate

3. Explain the role of race in the creation of value systems in American society.

Audience: Undergraduate

4. Explore the heterogeneity and complexity within persistently marginalized groups as well as their relations to each other.

Audience: Undergraduate

5. Reflect on their learning experience so that they may develop as well-rounded, informed, and educated members of society who can effectively and successfully participate in a multicultural society.

Audience: Undergraduate

## ASIAN AM/DANCE 121 – ASIAN AMERICAN MOVEMENT 3 credits.

Techniques of exercises and movement forms derived from several Asian cultures as taught in the United States. Studied in the context of the construction and expression of ethnic and cultural identity.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## ASIAN AM/ENGL 150 – LITERATURE & CULTURE OF ASIAN AMERICA 3 credits.

Since the 19th century, "America" has often been defined by its relationship with "Asia," through cultural influence, immigration, imperialism, and war. Traces the role of Asia and Asians in American literature and culture, from the Chinese and Japanese cultural influences that helped shape literary modernism to the rise of a distinctive culture produced by Asian immigrants to America and their descendants.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## ASIAN AM 152 – ASIAN AMERICAN LITERARY AND POPULAR CULTURE: RACE, FANTASY, FUTURES 3 credits.

Explores fantasy as a conduit of political meaning in Asian American fiction, graphic novels, anime, and art. Analyzes race as it circulates in visual mediums and literary texts. Engages issues such as stereotyping, caricature, and microaggressions; whitewashing, yellowface, and passing; race fetishism; cultural appropriation; multiracialism; kawaii or cute style; techno-orientalism and virtual Asians. Foregrounding fantasies of bodilessness, examine race as it is grafted onto nonhuman forms-objects, digital avatars, robots-at the borders of science and fiction. Examines how projections of the future reflect cultural anxieties about race, immigration, and Asian Americans.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIAN AM/HISTORY 160 – ASIAN AMERICAN HISTORY: MOVEMENT AND DISLOCATION**

3-4 credits.

Examines the impact of colonialism, war, and capitalism on the movement of Asians to the U.S. Considers how racial, gendered, class, sexual, and national formations within the U.S. structured Asian immigration to North America.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIAN AM/HISTORY 161 – ASIAN AMERICAN HISTORY: SETTLEMENT AND NATIONAL BELONGING**

3-4 credits.

Examines the social, cultural, and political citizenship of Asians in the U.S. with particular emphasis on diaspora, transnationality, and place.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ASIAN AM 170 – HMONG AMERICAN EXPERIENCES IN THE UNITED STATES**

3 credits.

Explores how Hmong's participation in the Secret War that the U.S. waged in Laos shaped their experiences in the U.S., heightening the importance of Hmong Americans' social, cultural, and political self-definition and in making known their contributions to the advancement of U.S. society.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Increase awareness of how historical circumstances such as the U.S. Secret War in Laos impacted the lives of Hmong Americans.

Audience: Undergraduate

2. Understand how racial privilege and dominance works to marginalize Hmong American experiences and to generate one-dimensional accounts of the Hmong in the U.S.

Audience: Undergraduate

3. Understand how racial incorporation and political mobilization have contributed to empowering Hmong Americans to contest their marginalization and to develop nuanced representations of their experiences in the U.S.

Audience: Undergraduate

**ASIAN AM/SOC 220 – ETHNIC MOVEMENTS IN THE UNITED STATES**

3-4 credits.

Sociological analysis of historical and recent ethnic/racial conflict and movements in the U.S., including the relations between European Americans, African Americans, Mexican Americans, Native Americans, and Asian Americans, with additional material on other groups and relations.

**Requisites:** Satisfied Communications A requirement**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ASIAN AM 240 – TOPICS IN ASIAN AMERICAN STUDIES**

3 credits.

An examination of specific themes in Asian American life and culture.

Topics may include comparative analyses of Asian American communities, Asian American experience and history, and the specific concerns and histories of Asian groups in the U.S., such as Korean, Hmong, South Asian, Southeast Asian, Chinese, and Japanese.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand how Hmong-U.S. relations during the American War in Southeast Asia resulted in the creation of a global Hmong diaspora in the U.S.

Audience: Undergraduate

2. Learn about the global politics, particularly, the relationship between the Soviet Union, China, and the United States, over the control of Southeast Asia during the Cold War

Audience: Undergraduate

3. Analyze how empire and war cause massive devastation and disruption in the form of trauma, displacement, and transnational migration and how these processes have dramatically affected family and community life

Audience: Undergraduate

4. Broaden their knowledge of the diversity of immigrant experiences to include refugees by learning about the history of Hmong refugees and how the U.S. war in Vietnam changed U.S. refugee policy

Audience: Undergraduate

**ASIAN AM/ASIAN/HISTORY 246 – SOUTHEAST ASIAN REFUGEES OF THE "COLD" WAR**

4 credits.

In-depth study of the peoples, conflicts, and wars in Cambodia, Laos, and Vietnam, with emphasis on the Cold War era (1945-1990) and on the resulting migration and resettlement of over one million Hmong, Khmer, Lao, and Vietnamese in the United States. Not open to students with credit for LCA 246 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIAN AM 250 – EATING ASIAN AMERICA**

3 credits.

Examines the diverse food cultures of Asian America as an entryway to questions about Asian American politics, identities, and histories. Considers Asian American food consumption, labor, and discourses in relation to challenging racism and fighting for belonging in the U.S.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze food cultures in relation to intersectional understandings of race, gender, and class in Asian America

Audience: Undergraduate

2. Examine Asian American food as expressions of community, politics, and identity

Audience: Undergraduate

3. Connect histories of anti-Asian racism and xenophobia to contemporary discourse surrounding Asian American food

Audience: Undergraduate

4. Critically examine how race can be constructed through cultural mediums like food

Audience: Undergraduate

5. Collaborate with peers in developing empathy toward other worldviews and reflecting on personal relationships to race and food

Audience: Undergraduate

**ASIAN AM 251 – CONTEMPORARY ASIAN AMERICAN IDENTITIES**

3 credits.

Focuses on recently arrived Asian immigrant groups and historically excluded groups to highlight their exclusion from mainstream Asian America. Covers how Asian American-based identity politics has reduced the experiences of these groups to categorical understandings of race, citizenship, nationality, class, immigration, and others. Uses intersectional lens to analyze their experiences with the goal of expanding what it means to be "Asian American." Lastly, examines how Asian American-based identity politics has influenced conversations around higher education, politics, and race relations.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze how recent waves of Asian immigration and the inclusion of historically excluded groups has confronted Asian American-based identity politics and the racialization that Asian Americans face.

Audience: Undergraduate

2. Examine how the demographic changes in Asian America have shifted its socioeconomic landscape and consequently impacted issues around higher education, political engagement and race relations with other populations of color.

Audience: Undergraduate

3. Identify how the changing demographics of Asian America creates significant nuances in how we understand the larger Asian American experience.

Audience: Undergraduate

4. Collaborate with peers about how the diversity of Asian America is connected to the histories of other communities of color and their treatment in the United States through group work and activities.

Audience: Undergraduate

**ASIAN AM 253 – CRITICAL REFUGEE STUDIES**

3 credits.

The United Nations High Commissioner for Refugees (UNHCR) defines refugee "as someone who has been forced to flee his or her country because of persecution, war, or violence." This definition represents the refugee as a victim, whose statelessness compels the need for resettlement within the nation-state. In the context of Asian America, this narrow construct of the refugee has overlapped with how Asians/Asian Americans have been racialized, gendered, and sexualized in the United States. Consider how newly arrive Asian refugee groups and their experiences have challenged their perceived victimization to challenge how the United States has positioned itself as a benevolent, humanitarian force.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Define and utilize the framework of critical refugee studies to demonstrate a nuanced understanding of the refugee that considers the larger conditions and violence of colonization, imperialism, and displacement.

Audience: Undergraduate

2. Identify how the racialization of the Asian refugees has intersected with the racialization of Asian Americans and shaped the larger landscape of the Asian American experience.

Audience: Undergraduate

3. Compare the displacement of Asian refugees in the United States to other displaced communities of color to highlight the larger patterns of displacement, imperialism, and colonialism.

Audience: Undergraduate

4. Collaborate with peers in reflecting on the importance of refugee epistemologies and how this knowledge can reshape how we understand refugees in our increasingly diverse society.

Audience: Undergraduate

**ASIAN AM/ENGL 270 – A SURVEY OF ASIAN AMERICAN LITERATURE**

3 credits.

Survey of Asian American literature from 1880 to present.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2022

### ASIAN AM/AFROAMER/DANCE/FOLKLORE 319 – AFRO ASIAN IMPROV: FROM HIP HOP TO MARTIAL ARTS FUSION

3 credits.

An Afro Asian perspective provides a lens through which intersections between Asian American and African American dance and martial arts are studied and practiced. Asian American and African American movement genres provide tools to explore dance fusion, choreography, and improvisation, to create dances informed by African American and Asian American legacies of struggle, innovation and transformation, while cognizant of historical forces of oppression and racism. Building connections through respectful communication with others are learned through dance practice, discussion and writing about concepts learned through readings, videos, and guest artist visits. Engagement with dance as a cultural vehicle for creative problem-solving and risk-taking occurs through guided class or smaller group activities.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate perspectives on the diversity of the human condition through critical and interpretive skills to analyze the past, present, and future of human movement in a complex world  
Audience: Undergraduate

2. Prepare for participation in a multicultural society through developing a consciousness of self and other and building empathy towards others' perspective, thinking critically and questioning assumptions of certain valued or devalued histories, and analyzing how these differences have promulgated disparities in contemporary American society  
Audience: Undergraduate

3. Demonstrate skills in writing and speaking about dance in its historical, contemporary and cultural contexts  
Audience: Undergraduate

4. Articulate Afro Asian perspectives on the intersections of Asian American and African American cultural, social and historical knowledge, and communicate important ideas through dance and story-telling performance  
Audience: Undergraduate

5. Practice Asian American and African American foundational movement toolboxes as a basis for improvisation and dance choreography supported by concepts of theater and culturally-based learning traditions  
Audience: Undergraduate

6. Engage in imagination-led and creative problem-solving movement activities  
Audience: Undergraduate

7. Build connections with others through class practice, discussions, working groups within and outside of class  
Audience: Undergraduate

8. Use the skills you learn to lead a calmer, more focused, responsible and productive life  
Audience: Undergraduate

### ASIAN AM/GEN&WS 321 – ASIAN AMERICAN FEMINIST & QUEER CULTURAL PRODUCTIONS

3 credits.

Examines the different ways feminist and queer Asian Americans have used cultural production to speak up about issues of race, class, gender, sexuality, identity, diaspora, nation, justice, art, and activism. Asian American feminist and queer critiques can bring to light the ways that structures of domination uphold and further perpetuate Asian American marginalization within the U.S. Examines Asian American racialized, gendered, and sexualized images and stereotypes, as well as the daily lives and experiences of Asian American women and queer folks. Engages with scholarly articles, novels, memoirs, documentaries, and narrative films authored by and/or focusing on feminist and queer Asian Americans. Explores how systemic ideologies are reflected, challenged, and deconstructed in Asian American feminist and queer cultural productions.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the historical, political, social, and cultural implications of Asian American feminist and queer cultural productions and formations as they relate to larger social issues.

Audience: Undergraduate

2. Recognize how critical race theory, feminist theory, and queer theory can help with deconstructing taken-for-granted assumptions about race, class, gender, sexuality, identity, injustice, art, and activism.  
Audience: Undergraduate

3. Articulate how feminist and queer politics have changed the terrains of Asian American identities and culture.  
Audience: Undergraduate

4. Explain how historical forces such as war, colonialism, and immigration policies have shaped contemporary Asian American experiences of sexuality and gender.  
Audience: Undergraduate

5. Foster self-awareness and empathy toward the experiences of Asian Americans of all gender and sexual identities.  
Audience: Undergraduate

**ASIAN AM/COM ARTS 420 – ASIAN AMERICANS AND MEDIA**

3 credits.

Examines representations of Asian American in American media using historical, analytical, and critical approaches. Issues of cultural production, identity, race, politics, and gender are linked to examinations of specific media forms.

**Requisites:** CHICLA/COM ARTS 347, ASIAN AM 101, or sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Connect the way that Asian Americans have historically been represented in mainstream media to the way that they are represented in contemporary media and to their treatment in contemporary society more broadly

Audience: Both Grad & Undergrad

2. Define anti-Asian racism and its connections to other forms of oppression, including sexism, heteronormativity, classism, colonization, and ableism

Audience: Both Grad & Undergrad

3. Analyze the different constraints and possibilities for how Asian Americans produce and consume media texts

Audience: Both Grad & Undergrad

4. Respectfully engage in nuanced discussions about race and reflect on the cultural perspectives and worldviews of others

Audience: Both Grad & Undergrad

5. Demonstrate advanced analysis of Asian American media texts that rigorously engages with scholarship in Asian American media studies

Audience: Graduate

**ASIAN AM 441 – HMONG AMERICAN SOCIAL MOVEMENTS IN THE 20TH AND 21ST CENTURIES**

3 credits.

Explores the history and circumstances whereby Hmong Americans came together as a political unit to address the domestic and international concerns of the Hmong American community.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Understand major sociological theories about social movements.

Audience: Undergraduate

2. Increase the awareness of the historical context from which Hmong immigrated to the U.S. and how this history shapes the domestic and international concerns of Hmong Americans.

Audience: Undergraduate

3. Explore how and why Hmong Americans came together as a political unit to address the domestic and international concerns of Hmong Americans.

Audience: Undergraduate

4. Advance the importance of Hmong political incorporation within the U.S., whereby Hmong are themselves active participants in advocating for and shaping social justice concerns in the U.S.

Audience: Undergraduate

**ASIAN AM/ENGL 462 – TOPIC IN ASIAN AMERICAN LITERATURE**

3 credits.

Topics will vary. All topics will emphasize the following learning outcomes: awareness of history's impact on the present, ability to recognize and question assumptions, development of critical thinking skills, awareness of relations between self and others, and effective participation in a multicultural society.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **ASIAN AM/ENGL/GEN&WS 463 – RACE AND SEXUALITY IN AMERICAN LITERATURE**

3 credits.

Explores the intersection between race and sexuality in American literature with an emphasis on sex/gender difference, feminism, transgenderism, and nationalism. Focuses on the nature of literature as advocacy, with an emphasis on Asian-American issues.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **ASIAN AM/ENGL/GEN&WS 464 – ASIAN AMERICAN WOMEN WRITERS**

3 credits.

Major texts by Asian American women writers.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ASIAN AM/ENGL 465 – ASIAN AMERICAN POETRY**

3 credits.

Throughout the history of Asian America, poetry has been a vehicle for the creation and exploration of an Asian American voice; in poetry we can see the continuing struggle over what form Asian American expression will take. Will it follow Asian or European models? Will it employ traditional forms, or experiment in search of new styles? Will it be individual or collective, introspective or political? We will explore these questions through a study of a wide range of Asian American poets from a variety of historical periods and ethnicities, including Janice Mirikitani, Lawson Fusao Inada, Li-Young Lee, John Yau, Myung Mi Kim, and Linh Dinh.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **ASIAN AM 540 – SPECIAL TOPICS**

3 credits.

Themes in Asian American Studies. Topics may include activism, public policy, history, poverty, family, law, immigration, diaspora, refugeeism, gender, sexuality.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **ASIAN AM 560 – HUMANITIES TOPICS**

3 credits.

Topics in the arts and humanities that illuminate the Asian American experience.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

### **ASIAN AM/JOURN 662 – MASS MEDIA AND MINORITIES**

4 credits.

Representations of minority groups in U.S. news and entertainment mass media. Historical, social, political, economic, and other factors influencing the mass mediated depictions of minorities.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **ASIAN AM 699 – INDEPENDENT STUDY: DIRECTED READINGS IN ASIAN AMERICAN STUDIES**

1-4 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

# ASIAN LANGUAGES AND CULTURES (ASIAN)

## ASIAN 100 – GATEWAY TO ASIA: SPECIAL TOPICS

3–4 credits.

Offers a comparative and interdisciplinary introduction to multiple cultures of Asia. Possible topics include but are not limited to: travelogues; the languages of Asia; food cultures of Asia.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## ASIAN/HISTORY 103 – INTRODUCTION TO EAST ASIAN HISTORY: CHINA

3–4 credits.

Survey of major developments in Chinese history from 1500 B.C. to the founding of the Communist state in 1949. Emphasis on patterns and themes; equal time devoted to the classical and traditional period and the modern era.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## ASIAN/HISTORY 104 – INTRODUCTION TO EAST ASIAN HISTORY: JAPAN

3–4 credits.

Survey of major cultural, social, political and economic developments in Japanese history from ancient to recent times.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## ASIAN/HISTORY 108 – INTRODUCTION TO EAST ASIAN HISTORY - KOREA

3–4 credits.

Survey of major cultural, social, political, and intellectual developments in Korea from the 10th century to the 21st century.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

## ASIAN/COUN PSY/ED PSYCH/PSYCH 120 – THE ART AND SCIENCE OF HUMAN FLOURISHING

3 credits.

Explore perspectives related to human flourishing from the sciences and humanities; investigate themes such as transformation, resilience, compassion, diversity, gratitude, community; expand self-awareness, enhanced social connectivity, and ability to change; formulate a sense of what it means to lead a flourishing life that sustains meaningful and fulfilling engagement with studies, relationships, community, and career.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and describe the relevant concepts and theories on the nature and cultivation of human flourishing from multiple intellectual fields including psychology, neuroscience, anthropology, philosophy, and religious studies.

Audience: Undergraduate

2. Describe and engage with the many dimensions of flourishing, and the various extrinsic and intrinsic factors influencing them.

Audience: Undergraduate

3. Formulate an account of human flourishing.

Audience: Undergraduate

4. Employ contemplative practices in an inquiry that cultivates qualities of human flourishing from within.

Audience: Undergraduate

5. Integrate contemplative practice and knowledge of course materials in order to establish a foundation for flourishing in your life and the communities in which you live.

Audience: Undergraduate

### ASIAN/ART HIST 179 – PASSAGE THROUGH INDIA: SOUTH ASIA'S GLOBAL ARCHITECTURAL HISTORIES

3 credits.

Historical overview of India and South Asia's global architectural histories from the ancient to the modern periods. While focusing predominantly on architectural sites in India, examine architecture at multiple sites across the globe which share connected histories with South Asia. We live in a world of nation states and are shaped by national histories. However, in the arc of human history, nation states are of recent vintage. Examine India's global architectural histories not only through comparison but, in the words of historian Sanjay Subrahmanyam, "by seeking out the at times fragile threads that connected" India to "the globe." Capturing the mobility of populations, traders, conquerors, missionaries, pilgrims, tourists, colonists, architects, artists, scholars, religion, merchandise, art, architecture, and ideas, we show that South Asia's global architectural histories are themselves the complex products of varied histories of cultural encounters.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe, appraise and analyze the connected histories of India with other parts of the globe through its art, and architecture.

Audience: Undergraduate

2. Discuss texts from various critical perspectives, formulate ideas and make connections between visual/spatial/cultural concepts and themes.

Audience: Undergraduate

3. Recognize and visually analyze architectural sites and buildings in India and across the globe that share connected histories with South Asia.

Audience: Undergraduate

### ASIAN 205 – ANIMAL ETHICS IN ASIA

3 credits.

Examines the relationships between humans and animals across Asia, exploring cosmological and cultural frameworks as well as modern debates. Examines perspectives from myth, literature, and religion, where ideas about animal symbolism emerge along with concepts of morality, violence, and spiritual kinship with animals. Discusses moral philosophy and critical animal studies, using these perspectives to ethically evaluate issues like animal sacrifice, wildlife trade, animal biotechnologies, zoonotic disease, companion animals, and the ethics of keeping pets and other forms of interspecies intimacy. Considers the impacts of urban expansion, conservation challenges, and the formation of emerging animal rights and justice movements across Asia. How do cultural practices, metaphors, and traditions shape attitudes towards animals? How do people balance economic and ethical responsibilities when it comes to labor, farming, breeding, public health, and environmental challenges?

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze ethical frameworks and cultural beliefs that shape human-animal relationships across Asia, drawing on religious, philosophical, and anthropological perspectives.

Audience: Undergraduate

2. Evaluate contemporary debates on animal welfare, conservation, and public health, considering the intersection of local traditions, national policies, and global movements.

Audience: Undergraduate

3. Apply interdisciplinary approaches to assess ethical dilemmas related to animal labor, food production, medicine, and conservation.

Audience: Undergraduate

4. Develop critical, evidence-based arguments in both written and verbal formats, synthesizing diverse sources to engage with ethical and political questions surrounding non-human animals.

Audience: Undergraduate

**ASIAN/RELIG ST 206 – THE QUR'AN: RELIGIOUS SCRIPTURE & LITERATURE**

3 credits.

An introduction to the Qur'an, the sacred scripture of the Islamic religious tradition, focused on Muslim approaches to reading the text, its themes and history, and its use as a source of law, theology, aesthetics, politics, and practices of piety.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Demonstrate knowledge of the content of the complete Qur'an through reading English-language interpretation ("translation"), focused writing assignments, and close listening exercises  
Audience: Undergraduate

2. Identify parameters of Qur'an's study in Muslim and other academic contexts  
Audience: Undergraduate

3. Demonstrate an appreciation of the complexities of the interpretative process within multiple historical contexts, such as key issues and debates  
Audience: Undergraduate

4. Demonstrate knowledge of major movements, trends, or events in the development of Muslim cultures with respect to the Qur'an and Islamic global experience, early period to contemporary expression  
Audience: Undergraduate

5. Apply critical approaches to the "texts"/works and alternative ways of considering them, as per the approach of the academic study of religion  
Audience: Undergraduate

6. Critically and constructively examine "culture," hybridity, and global community in a comparative sense  
Audience: Undergraduate

**ASIAN/LITTRANS 212 – CLASSICAL SOUTH ASIAN LITERATURES**

3 credits.

Surveys the classical literatures of South Asia, from ancient origins to adaptations in the modern world. Includes poetry, prose, and drama translated into English from Persian, Prakrit, Sanskrit, Tamil, Telugu, Hindi/Urdu, and other languages. Examines the relationship between literature in theory, in practice, and politics.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Identify major and minor works of classical South Asian literature

Audience: Undergraduate

2. Analyze works of classical South Asian literature in their historical contexts  
Audience: Undergraduate

3. Interpret works of classical South Asian literature using classical and contemporary aesthetic theories  
Audience: Undergraduate

4. Articulate the significance of classical literatures to contemporary literary cultures  
Audience: Undergraduate

5. Conduct and present original writing and research on classical South Asian literature  
Audience: Undergraduate

**ASIAN/RELIG ST 218 – HEALTH AND HEALING IN SOUTH ASIA**

3-4 credits.

Study primary and secondary sources to explore how South Asian societies have understood the ideas of health and well-being throughout history. We will consider a number of cases that illustrate uniquely South Asian conceptions of illness and physical dysfunction and the ways in which people in South Asia have attempted (and continue to attempt today) to heal bodies. Students will learn about the traditional healing systems of South Asia, including Ayurveda, Siddha, and Unani, the basic components of each systems' ideas about disease pathology and treatment that have been used for centuries to heal illness, maintain good health, and, in some instances, aspire to a state of super-health that transcends the limitations of bodily existence altogether.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

### ASIAN/RELIG ST 236 – ASIA ENCHANTED: GHOSTS, GODS, AND MONSTERS

3 credits.

Explores how different cultures in Asia conceive of and relate to the monstrous, ghostly, and divine, both in the past and in the contemporary world. These themes are approached from a range of different disciplinary perspectives, including religious studies, literature, anthropology, and history.

**Requisites:** None

**Course Designation:** Gen Ed – Communication Part B

Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Consider the cultural and personal functions of depictions of gods, ghosts, and monsters, both in the past and the present day.

Audience: Undergraduate

2. Practice writing and oral presentations in a variety of forms for a variety of purposes, including critical use and proper citation of primary and secondary sources.

Audience: Undergraduate

3. Practice research skills on previously unfamiliar topics, gaining skills in using both on-campus and online resources.

Audience: Undergraduate

4. Be introduced to different approaches a variety of humanities disciplines (including anthropology, art history, history, film studies, folklore studies, literature, and religious studies) take to the course subject matter.

Audience: Undergraduate

5. Use the course subject matter to improve their knowledge of the cultural geography of Asia.

Audience: Undergraduate

### ASIAN/GEOG/HISTORY/POLI SCI/SOC 244 – INTRODUCTION TO SOUTHEAST ASIA: VIETNAM TO THE PHILIPPINES

4 credits.

As an introduction to Southeast Asia, covers the ethnic, cultural, religious, and political histories of the region from the classical states period to the present, with an emphasis on colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century, including an exposure to region's contemporary literature. Not open to students who completed LCA 244 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the ethnic, cultural, religious, and political histories of Southeast Asia from the classical states period to the present.

Audience: Undergraduate

2. Analyze colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century in Southeast Asia.

Audience: Undergraduate

3. Explore contemporary literature in Southeast Asia.

Audience: Undergraduate

### ASIAN/ASIAN AM/HISTORY 246 – SOUTHEAST ASIAN REFUGEES OF THE "COLD" WAR

4 credits.

In-depth study of the peoples, conflicts, and wars in Cambodia, Laos, and Vietnam, with emphasis on the Cold War era (1945-1990) and on the resulting migration and resettlement of over one million Hmong, Khmer, Lao, and Vietnamese in the United States. Not open to students with credit for LCA 246 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIAN 252 – CONTEMPORARY INDIAN SOCIETY**

3 credits.

An interdisciplinary exploration of contemporary Indian society, politics, and culture. Consider the diverse, complex, and often contradictory fabric of modern India through the lens of several conceptual themes which consider emergent discourses and dynamics of change as the joint product of India's classical heritage and its transformation into a post-colonial nation-state since 1947. Explores tensions and continuities between the pre-modern and modern.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Prepare and present well-researched and persuasive arguments.

Audience: Undergraduate

2. Demonstrate knowledge about modern India and its recent history in their final projects.

Audience: Undergraduate

3. Show evidence of critical thinking by writing balanced responses to readings that challenge their existing world views.

Audience: Undergraduate

4. Integrate academic knowledge gleaned from scholarly readings with popular viewpoints presented in the media.

Audience: Undergraduate

**ASIAN 253 – JAPANESE POPULAR CULTURE**

3 credits.

An introduction to the culture, life-styles and thought of the Japanese people, with frequent reference to their history, literature and art. Not open to students with credit for E ASIAN 253 prior to Fall 2018

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIAN 254 – KOREAN POPULAR CULTURE**

3 credits.

Critically engages with Korean popular culture in order to explore how an arena often dismissed as "mere entertainment" can act as an indicator of cultural values and a producer of cultural meaning. Treats works of popular culture as important economic, political, and social texts and asks us to reflect on how the production and consumption of popular culture shapes, and is shaped by, our lived experiences. Explores what popular culture says about society and, conversely, what society says about popular culture.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Use theoretical and methodological frameworks to engage with popular culture and develop students' own ideas about popular culture texts.

Audience: Undergraduate

2. Analyze Korean media within the context of Korean culture and social issues, including understanding shifts in culture over time.

Audience: Undergraduate

3. Assess various cultural texts through analytic and creative expressions

Audience: Undergraduate

**ASIAN/HISTORY/POLI SCI 255 – INTRODUCTION TO EAST ASIAN CIVILIZATIONS**

3-4 credits.

Multidisciplinary and historical perspectives on the East Asian civilizations of China, Japan, Korea, Tibet and Mongolia from prehistory to the present, including developments in philosophy, economy, governance, social structure, kinship, geography, etc.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ASIAN 268 – TIBETAN CULTURES AND TRADITIONS**

3 credits.

Introduction to a wide variety of ancient Tibetan cultural beliefs, practices and motifs that are practiced to this day. Examines topics such as: gender roles and stereotypes in Tibetan society; folk beliefs and practices; astrology, divination, dream interpretation and related issues; art, music and theater; traditional Tibetan medicine and healing practices; and finally, the varied and extensive religious traditions of Tibet in their cultural manifestations. Examines central themes and inquires into the ways it contributes to-or contests-a cultural universe that has direct impact on Tibetan lives.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ASIAN/RELIG ST 274 – RELIGION IN SOUTH ASIA**

3 credits.

Introductory survey of Hinduism, Buddhism, Islam, Sikhism, etc., and an examination of the cultural, historical, ritual, and philosophical foundations of South Asian religion. Not open to students with credit for LCA 274 prior to Fall 2019.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIAN 277 – KENDO: INTEGRATION OF MARTIAL ARTS AND LIBERAL ARTS**

2 credits.

Kendo practice (martial art) supplemented by lecture describing its historical roots and philosophical background. Not open to students with credit for E ASIAN 277 prior to Fall 2019.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2019**Learning Outcomes:** 1. Identify and describe the history of Kendo and the diverse cultural and ideological backgrounds for modern Kendo.

Audience: Undergraduate

2. Learn Japanese terms associated with kendo practice and the philosophical background for kendo practice

Audience: Undergraduate

3. Execute and demonstrate basic physical Kendo actions in a safe and practical manner

Audience: Undergraduate

4. Understand and follow cultural norms and disciplines associated with Japanese and other Asian martial arts traditions.

Audience: Undergraduate

**ASIAN 299 – DIRECTED STUDY**

1-3 credits.

Directed study projects for undergraduate students as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ASIAN 300 – TOPICS IN ASIAN STUDIES**

3 credits.

Selected topics in the study of Asian Languages and Cultures.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ASIAN 301 – SOCIAL SCIENCE TOPICS IN ASIAN STUDIES**

3 credits.

Interdisciplinary approaches to specific social sciences topics in Asian studies. Topics may include comparative analysis of a theme across the countries in Asia or focus on a theme within a single country.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Prepare and present well-researched and persuasive arguments.

Audience: Undergraduate

2. Show evidence of critical thinking by writing balanced responses to readings that challenge their existing world views.

Audience: Undergraduate

3. Create your own viewpoint on social issues, with the capability to support your arguments.

Audience: Undergraduate

4. Understand key social science concepts, theories, and methodologies discussed in academic articles and apply them to examine a variety of examples of the social and cultural ties within Asia as well as between Asia and the rest of the globe.

Audience: Undergraduate

5. Critically examine taken-for-granted notions and stereotypes and to inquire into the process of their construction.

Audience: Undergraduate

**ASIAN/RELIG ST 303 – JAINISM: RELIGION AND CULTURE OF NONVIOLENCE**

3 credits.

Introduction to the Jain tradition. Despite being a small minority religion, core Jain ethical and philosophical concepts of ahimsa (non-violence) and anekantavada (non-absolutism) have influenced all other major traditions in India and secular Indian society. Examines how Jain philosophy, ritual, social relations, and politics are informed by a commitment to ascetic ethics that uphold ahimsa as the greatest virtue for renouncers (monks and nuns) and lay practitioners, tracing the evolution of Jain ethical engagements with modern social and political issues including environmental and animal rights activism, business and finance, and medicine and bioethics. Course covers canonical texts and scholarly literature on Jainism to understand how ahimsa has been historically articulated within Jain philosophy and doctrine, re-articulated in modern social movements, and how it has been constructed in academic studies of Jainism.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Identify and explain basic concepts, ideas, and terminology relating to Jainism from both the monastic and lay perspectives

Audience: Undergraduate

2. Compare and differentiate between the basic tenets of Jainism, Hinduism, and Buddhism.

Audience: Undergraduate

3. Apply anthropological and religious studies concepts and theories to the relationship of Jain rituals, theology, and experience as well as the larger world of South Asian religions

Audience: Undergraduate

4. Make connections between historical and current practice of Jainism in both living and historical situations

Audience: Undergraduate

5. Analyze a social, cultural, historical, visual, or textual aspect of Jain philosophy in a research project to support their interpretations of course material and apply them to the student's own local and global context

Audience: Undergraduate

**ASIAN/RELIG ST 306 – HINDUISM**

3 credits.

A historical survey of Hindu scriptures, rituals, philosophies, and ethics from the ancient to the contemporary world. Concepts such as karma, yoga, and reincarnation will be put in the broader contexts of Hindu theism, worship, and law. Not open to students who completed RELIG ST 355 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**Learning Outcomes:** 1. Recognize and understand the fundamental rituals, social systems, philosophical schools, and devotional traditions that make up the many forms of the Hindu religion.

Audience: Undergraduate

2. Explore important conceptual categories in Hinduism and significant sociohistorical developments in India.

Audience: Undergraduate

3. Consider, through close readings and discussions of philosophical texts, law books, devotional literature, and mythologies the ways in which Hinduism influences the everyday lives of Hindu women and men, Hindus of different classes and castes, and Hindus in different locations in India and throughout the world.

Audience: Undergraduate

**ASIAN/RELIG ST 307 – A SURVEY OF TIBETAN BUDDHISM**

3 credits.

By studying the distinctively Tibetan forms of Buddhism, we also examine more general issues, such as the relationship between theory and practice, ancient meditation and mind training, the politics of "world making", and the connection between identity and experience. Not open to students with credit for LCA 421 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify the core practical and theoretical aspects of Tibetan Buddhism and Buddhism in general.

Audience: Undergraduate

2. Apply multiple variations of meditation for personal use and demonstrate for others.

Audience: Undergraduate

3. Summarize and explain Buddhist perspectives of true mode of existence of internal and external phenomena, the environment and its habitants, mental factors and external physical matter.

Audience: Undergraduate

**ASIAN/HISTORY/RELIG ST 308 – INTRODUCTION TO BUDDHISM**

3–4 credits.

The basic thought, practices and history of Buddhism, including selflessness and relativity, practices of meditation, merit-making and compassion from both local and translocal perspectives. Includes a discussion of Buddhism as a contemporary, North American religion. Not open to students with credit for E ASIAN or LCA 308 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ASIAN 310 – INTRODUCTION TO COMICS AND GRAPHIC NOVELS: THEORY, HISTORY, METHOD**

3 credits.

Explores the theory and history of comics, graphic novels, and other media with a comics-like quality from around the world. Our goal is to develop a deeper understanding of comics as a major mode of human communication.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate knowledge of the history of comics as a major mode of human communication in a comparative context  
Audience: Undergraduate

2. Develop cultural awareness across historical periods and national boundaries  
Audience: Undergraduate

3. Understand and critically rethink the theory of comics as strip-based sequential narrative  
Audience: Undergraduate

4. Apply different theoretical models to the reading of comics; synthesize and critically evaluate source materials  
Audience: Undergraduate

**ASIAN 311 – MODERN INDIAN LITERATURES**

3 credits.

Introduction to advanced study of modern literatures of India in translation from several languages. Emphasizes literary and critical analysis of short story, novel, poetry, and drama; historical and cultural contexts of literature; and relations and dynamics of multiple literary cultures. Not open to students with credit for LCA 311 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2018**ASIAN/HISTORY 319 – THE VIETNAM WARS**

3–4 credits.

Explores the prolonged cycle of wars in Vietnam and its neighbors, 1940 to date, with due regard for both local and U.S. perspectives.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ASIAN/SOC 334 – GENDER, WORK, AND FAMILY IN EAST ASIA**  
3 credits.

An examination of contemporary East Asia (mainly South Korea, Japan, Taiwan, and China) by using concepts and frameworks from history, anthropology, sociology, political science, economics, and law. An emphasis will be on the intersection of multiple structures of inequality such as gender, race/ethnicity, citizenship, class, and sexuality.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain how institutional processes, including the labor market, family, and education generate, maintain, and change the cultural understandings of gender.

Audience: Undergraduate

2. List past and current studies on how and why female labor force participation and gender wage gap are different across Korea, Japan, Taiwan, and China.

Audience: Undergraduate

3. Answer the question of “Can women in East Asia have it all?” and of how social development influence women’s aspirations and choices, producing the patterned behaviors that we observe.

Audience: Undergraduate

4. Develop a comparative lens in constructing your own argument on whether – if so, how – different speeds of social change and development influence institutions and cultures of a society.

Audience: Undergraduate

5. Draw a conceptual map of cultural and structural foundations of gender inequality in the context of East Asia.

Audience: Undergraduate

**ASIAN/HISTORY 335 – THE KOREAS: KOREAN WAR TO THE 21ST CENTURY**

3–4 credits.

A historical examination of the Korean War and the politics and society of North Korea and South Korea.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**ASIAN/SOC 336 – SOCIAL CHANGE IN CONTEMPORARY SOUTH KOREA**

3 credits.

An exploration of social continuity and change of contemporary South Korea. Covers different institutions of a society – political, economic, and societal/cultural spheres. Incorporates material from anthropology, sociology, political science, economics, and law. Focus on South Korea after the division of the ‘two Koreas’.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Through a critique of the status quo in class, gender, and racial/ethnic dynamics of contemporary Korean society, an intermediate to advanced level of understanding of modern Korean society and its location in the modern world will be achieved.

Audience: Undergraduate

2. Discern the patterns, rules, and logic that undergird a social system and the consequences of these for social change and continuity within the Korean context.

Audience: Undergraduate

3. Be able to explain in your own language, how individuals’ lives are shaped by social institutions such as the family, education, and work.

Audience: Undergraduate

4. Increase the social science literacy of contemporary Korea.

Audience: Undergraduate

5. Create your own viewpoint on social issues, with the capability to support your arguments.

Audience: Undergraduate

**ASIAN/HISTORY 337 – SOCIAL AND INTELLECTUAL HISTORY OF CHINA, 589 AD-1919**

3–4 credits.

The culture of the literati in the T’ang; major trends of Neo-Confucianism during the Sung and Ming; the Confucian response to the West in the nineteenth century; the emergence of the modern Chinese intelligentsia and iconoclasm in the early May Fourth period.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIAN 340 – STUDY ABROAD: TOPICS IN KOREAN**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Current enrollment in a UW-Madison study abroad program.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. demonstrate an appreciation of the complexities of the interpretative process within Korean historical and cultural contexts  
Audience: Undergraduate

2. demonstrate knowledge of major movements, trends, or events in the development of Korean cultures  
Audience: Undergraduate

3. think critically about and appreciate the complexities of one's own culture and larger global communities  
Audience: Undergraduate

**ASIAN/HISTORY 341 – HISTORY OF MODERN CHINA, 1800-1949**

3-4 credits.

The disintegration of traditional Chinese society under the impact of Western imperialism, the rise of modern Chinese nationalism, and the emergence of modern revolutionary movements and ideologies.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2022**ASIAN/HISTORY 342 – HISTORY OF THE PEOPLES REPUBLIC OF CHINA, 1949 TO THE PRESENT**

3-4 credits.

The social, economic and political transformation of China under Communism; the role of ideology in contemporary Chinese historical development; the nature of that historical development in the comparative perspective of other post-revolutionary histories.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2023**ASIAN 351 – SURVEY OF CLASSICAL CHINESE LITERATURE**

3 credits.

A critical introduction to the literature of China from early texts through the late imperial period. Works include poetry, prose, fiction and drama. Not open to students who completed E ASIAN 351 prior to Fall 2019.

**Requisites:** ASIALANG 102 (or E ASIAN 102 prior to Fall 2019), placement into ASIALANG 201, or graduate/professional standing**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**ASIAN 352 – SURVEY OF MODERN CHINESE LITERATURE**

3 credits.

A critical introduction to Chinese-language prose fiction and poetry from the late 19th century through today.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe representative works and topics of modern Chinese literature.

Audience: Undergraduate

2. Recognize and evaluate how these works respond to and are shaped by their social, cultural, historical, and political contexts both in China and globally.

Audience: Undergraduate

3. Acquire skills of close reading by considering the importance of language, translation, literary form, narrative structure, and ideology.

Audience: Undergraduate

4. Develop critical and creative thinking, supported by question-centered inquiry and discussion.

Audience: Undergraduate

5. Improve written and oral communication.

Audience: Undergraduate

**ASIAN 353 – LOVERS, WARRIORS AND MONKS: SURVEY OF JAPANESE LITERATURE**

3 credits.

Historical introduction to the important literary works of Japan, generally about courtly romance, idealized warriors, and the Buddhist search for enlightenment. This course will cover the classical period, from the eighth through the mid-nineteenth century; most material comes from the particularly wonderful tenth through sixteenth centuries. Not open to students with credit for E ASIAN 353 prior to Fall 2019.

**Requisites:** ASIALANG 104 or 356 (or E ASIAN 104 or 312 prior to Fall 2019) or placement into ASIALANG 203. Not open to students with credit for LITTRANS 263

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ASIAN 354 – EARLY MODERN JAPANESE LITERATURE**

3 credits.

An extensive overview of the literature during Japan's early modern or Edo period (1600-1868). Introduction to one of the world's great cultures through its literature during a period that many people consider to be the culmination of a millennium of cultural development prior to Japan's forced opening to the West in the second half of the nineteenth century. Covers snippets from vastly popular works in the major genres of comic books, novellas, essays, poetry, kabuki and puppet plays and so on, concentrating on the eighteenth and nineteenth centuries. Some key questions in this course include: What is early modernity? What is literature? What is Japanese about these materials?

**Requisites:** ASIALANG 104

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe cultural awareness across historical epochs;

Audience: Undergraduate

2. Synthesize and critically evaluate source materials in English with reference to Japanese;

Audience: Undergraduate

3. Read, analyze, and explain the significance of major Japanese texts during the early modern historical epoch.

Audience: Undergraduate

**ASIAN 355 – MODERN JAPANESE LITERATURE**

3 credits.

Covers Japanese literature from the late nineteenth through the present century. Not open to students with credit for E ASIAN 354 prior to Fall 2019.

**Requisites:** ASIALANG 104 or 356 (E ASIAN 104 or 320 prior to Summer 2019) or placement into ASIALANG 203

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**ASIAN 357 – JAPANESE GHOST STORIES**

3 credits.

Surveys Japanese ghost stories in translation from a range of eras and media, including theater and film. Considers historical origins and reception, with particular emphasis on storytelling and adaptation across formats.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify tropes in Japanese ghost stories across time and media.

Audience: Undergraduate

2. Analyze textual/ AV details to identify how tropes function in distinct genres and narratives.

Audience: Undergraduate

3. Produce credible and accessible arguments about Japanese ghost stories in English.

Audience: Undergraduate

4. Demonstrate knowledge of genre-specific nuances by translating/ subtitling a related text or by adapting a related text to a new genre/ medium.

Audience: Undergraduate

**ASIAN 358 – LANGUAGE IN JAPANESE SOCIETY**

3 credits.

Enhances knowledge of and sensitivity towards social factors that influence how Japanese language is used in different contexts. Topics include language standardization and policies, dialects, gender differences, multilingualism, translation, and impact of technology on language. In addition to discussing books and articles on these subject matters, engage in the collaborative analysis of actual examples of Japanese language use taken from everyday interactions, interviews, traditional and social media discourse, popular culture, and public signage, among others. Through this process, evaluate critically taken-for-granted beliefs and assumptions about the Japanese language and its users; examine how particular beliefs and assumptions have been established, maintained, and challenged; and make informed choices in adopting different styles of language and in positioning themselves in a Japanese speech community. Not open to students with credit for E ASIAN 358 prior to Fall 2019.

**Requisites:** ASIALANG 104 or 356 (E ASIAN 104 or 320 prior to Summer 2019) or placement into ASIALANG 203

**Course Designation:** Breadth – Either Humanities or Social Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S  
Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. think critically about sociocultural and sociolinguistic factors that contribute to the construction of various genres of spoken and written language  
Audience: Both Grad & Undergrad

2. think critically about taken-for-granted beliefs and assumptions about the Japanese language and its users and inquire into the process of their construction  
Audience: Both Grad & Undergrad

3. make informed choices in adopting different styles of language and in positioning themselves in a Japanese speech community  
Audience: Both Grad & Undergrad

4. state and support their perspectives on sociolinguistic matters while acknowledging diverse viewpoints  
Audience: Both Grad & Undergrad

5. understand key sociolinguistic concepts, theories, and methodologies discussed in academic articles and apply them to examine a variety of examples of language use  
Audience: Both Grad & Undergrad

6. evaluate strengths and weaknesses of published research and develop ideas for future research  
Audience: Graduate

7. evaluate how sociolinguistic matters are treated in language textbooks and classroom instruction and make suggestions for improvement  
Audience: Graduate

**ASIAN 360 – TOPICS IN ASIAN LITERATURE**

3 credits.

Literary or cultural study of a particular theme, work, period, or genre in regions across Asia. Translations serve as the principal texts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify literary techniques and creative uses of language in literary texts  
Audience: Undergraduate

2. Articulate a thesis and present evidence to support it  
Audience: Undergraduate

3. Explain the relevance of themes found in literary texts to contemporary, personal, and cultural values  
Audience: Undergraduate

4. Identify genres, conventions, and period-specific discourses and their relevance to broader historical force  
Audience: Undergraduate

5. Apply relevant theoretical concepts to literary or other texts and practices  
Audience: Undergraduate

**ASIAN 361 – LOVE AND POLITICS: THE TALE OF GENJI**

3 credits.

Explores the themes, structure, and reception history of Japan's The Tale of Genji (ca. 1008). Not open to students with credit for E ASIAN 361 prior to Fall 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIAN/HISTORY 363 – CHINA AND WORLD WAR II IN ASIA**

3-4 credits.

This course is intended to help students understand World War II from the perspective of Asia. The focus is not only on the American and Japanese roles in the war but also on lesser, often overlooked participants such as China, Korea, and Southeast Asia. The course will focus not only on the diplomatic, political, and military situation of wartime Asia, but also on perceptions and experiences of the war from those most heavily affected by it: those experiencing it on the ground. Understanding this war is critical for helping us understand contemporary Asia. The foundations of the Cold War and the post-Cold War world that we live in today were forged on battlefields in mainland China, Burma, small islands in the Pacific, and in the skies over the archipelago of Japan. In order to provide the background and understand the legacies, this course covers an extended time frame, beginning in the 19th century with the arrival of the West in Asia and continues into the 1950s.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2022**ASIAN 367 – HAIKU**

3 credits.

Introduction to the haiku, one of the world's great verseforms, in its original Japanese context. Debunks the notion of the haiku as a traditional form of Zen Japanese micropoetry, instead arguing that it was an "invented tradition," a late nineteenth-century Japanese response to modernization and westernization. Not open to students with credit for E ASIAN 367 prior to Fall 2018

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ASIAN/AFRICAN/RELIG ST 370 – ISLAM: RELIGION AND CULTURE**

3-4 credits.

The emergence and development of Islam; schism; theology; asceticism; speculative and popular mysticism; literatures in diverse Islamic languages. Not open to students with credit for LCA 370 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**ASIAN 371 – TOPICS IN CHINESE LITERATURE**

2-3 credits.

Literary or cultural study of a particular theme, work, period, or genre in Chinese literature. Possible topics include: Confucian Analects, The Dream of the Red Chamber, Journey to the West, or Traditional Chinese Drama. Translations serve as the principal texts, but students of Chinese are required to do some reading in the original.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ASIAN 372 – TOPICS IN CHINESE: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**ASIAN 373 – TOPICS IN JAPANESE: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions

**ASIAN 374 – KOREAN CINEMA**

3 credits.

Survey of Korean cinema from the Golden Age classics of the 1950s and 1960s to new blockbuster hits and art-house films throughout the contemporary period; investigate not only the major genres of Korean cinema, but also the increased recognition throughout the world of such renowned Korean auteurs as Park Chan-wook and Bong Joon-ho; discusses the issues of colonialism, national division, civil war, military dictatorships, the democratic movement, and globalization.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze how films shape and are shaped by South Korean politics, economy, and culture.

Audience: Undergraduate

2. Understand the history of Korean cinema with a set of key film texts from the classical to the contemporary era

Audience: Undergraduate

3. Interpret cinema as a medium in analytical and creative ways

Audience: Undergraduate

**ASIAN 375 – SURVEY OF CHINESE FILM**

3 credits.

A historical narrative of Chinese-language film from the turn of the century to contemporary China, Taiwan, and Hong Kong. All films include English subtitles. No knowledge of Chinese language is required. Not open to students with credit for E ASIAN 520 prior to Fall 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and describe major works, genres, and trends of Chinese-language film

Audience: Undergraduate

2. Interpret and evaluate how these films respond to and are shaped by the social, cultural, and political histories of modern China, Taiwan, and Hong Kong

Audience: Undergraduate

3. Develop skills of film analysis and close reading, including interrelated issues of form (e.g. visual language, narrative structure), politics and ideology, and film's capacity to enchant and disenchant

Audience: Undergraduate

4. Sharpen ability to think critically and creatively, supported by question-centered inquiry and discussion

Audience: Undergraduate

5. Improve written and oral communication in the form of a 1) concise, well-organized, and original paper; and 2) concise, well-organized oral presentation.

Audience: Undergraduate

**ASIAN 376 – MANGA**

3 credits.

Surveys the manga (Japanese comicbook) from its precursors in premodern woodblock-printed booklets to its contemporary manifestations in subgenres like shonen, gekiga, mecha, and shojo. Draws upon critical writings on visual culture, literature, and visual-verbal narrative. Not open to students with credit for E ASIAN 376 prior to Fall 2019

**Requisites:** ASIALANG 104 (or E ASIAN 104 prior to Summer 2019) or placement into ASIALANG 203

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ASIAN 378 – ANIME**

3 credits.

Surveys anime (Japanese animation) from 1930s shorts through contemporary feature-length, experimental, and televised serial-form productions. Draws on critical writings on postmodernism, digital cinema, and visual culture. Some Japanese language ability is required. Not open to students with credit for E ASIAN 378 prior to Fall 2019.

**Requisites:** ASIALANG 104 (or E ASIAN 104 prior to Fall 2019) or placement into ASIALANG 203

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ASIAN/ART HIST 379 – CITIES OF ASIA**

3 credits.

Historical overview of the built environment of cities of Asia from antiquity to the present; architectural and urban legacy in its social and historical context; exploration of common themes that thread through the diverse geographical regions and cultures of Asia. Not open to students with credit for LCA 379 prior to Fall 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIAN 403 – SOUTHEAST ASIAN LITERATURE**

3 credits.

An introduction to the societies, politics and cultures of Southeast Asia through modern literature. Fiction, testimony, poetry and ephemeral materials will be read alongside literary analysis to understand the roles of writing and art in social and political transformation. Topics will include revolution and uprising; violence and war; environment, migration and displacement; gender and sexuality; censorship and what cannot be written; and cities, the countryside and the spaces between them. Not open to students with credit for LCA 403 prior to Fall 2018

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIAN/RELIG ST 405 – GODS AND GODDESSES OF SOUTH ASIA**

3 credits.

Introduces some of the most important deities of South Asia through visual representation, mythical narratives and rituals of worship. Topics include the development of iconographic forms and concepts, masculine and feminine aspects of the divine, the belief in human embodiments of divinities, the phenomenon of possession, modes of domestic and public worship and the symbolism of the temple structure.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand ways of conceiving of divinity and its presence in the world and in the life of the practitioner

Audience: Both Grad & Undergrad

2. Interpret forms of religious expression, representations of deities and their function in ritual

Audience: Both Grad & Undergrad

3. Critically examine taken-for-granted notions and stereotypes pertaining to image worship and to inquire into the process of their construction

Audience: Both Grad & Undergrad

4. Articulate in writing a critical perspective on image worship and devotional practices

Audience: Both Grad & Undergrad

5. Learn critical analysis and research skills

Audience: Both Grad & Undergrad

6. Improve skills in delivering oral presentations

Audience: Both Grad & Undergrad

7. Refine writing skills

Audience: Both Grad & Undergrad

8. Become familiar with multiple perspectives scholars use to study gods and goddesses of South Asia and use these perspectives in self-reflective thinking

Audience: Graduate

9. Refine critical analysis and research skills

Audience: Graduate

**ASIAN/ART HIST 428 – VISUAL CULTURES OF INDIA**

3 credits.

Concentrates on image complexes (art, photography, and cinema) and visual environments (architecture, urban planning, and public rituals) of India; examination of visual culture through thematic issues such as, sexuality, patronage, cultural encounter, transculturation, ways of viewing, modernism, and nationalism. Not open to students with credit for LCA 428 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ASIAN/RELIG ST 430 – INDIAN TRADITIONS IN THE MODERN AGE**

3 credits.

Explores how ancient Indian traditions have been reframed for the modern age. Topics include the Ramayana in popular media, negotiations over sacred spaces, and popular Tantra. We will also examine recent controversies, such as the one surrounding the ancient Jain practice of fasting until death (sallekhana) in the modern age.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2020**ASIAN 432 – INTRODUCTION TO CHINESE LINGUISTICS**

3 credits.

Provides an introductory overview of the Chinese language from a contemporary perspective. Covers various topics including phonetics, phonology, dialects, morphology, syntax, orthography, semantics, and pragmatics. Not open to students with credit for E ASIAN 432 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Differentiate Chinese sounds

Audience: Undergraduate

2. understand the development of the Chinese writing system

Audience: Undergraduate

3. figure out word formation in Chinese

Audience: Undergraduate

4. understand sentence structure in Chinese

Audience: Undergraduate

5. interpret different semantic dimensions of Chinese

Audience: Undergraduate

6. work out the underlying rules of Chinese sounds

Audience: Graduate

7. know the differences in Chinese dialects

Audience: Graduate

8. analyze sentence structure in Chinese

Audience: Graduate

9. discuss pragmatic functions and contexts

Audience: Graduate

10. synthesize research materials related to pragmatics

Audience: Graduate

11. improve critical and analytical thinking skills

Audience: Graduate

**ASIAN 433 – TOPICS IN EAST ASIAN VISUAL CULTURES**

3 credits.

Topics in the study of the visual cultures of East Asia from antiquity to the present. Focuses on illustrative texts and genres, major historiographic, theoretical, and methodological issues, and the technologies of vision and visibility in China, Japan, and Korea.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ASIAN 434 – INTRODUCTION TO JAPANESE LINGUISTICS**

3 credits.

Phonology, morphology and syntax of the modern standard colloquial Japanese, including historical and dialectal aspects. Not open to students with credit for E ASIAN 434 prior to Fall 2019.

**Requisites:** ASIALANG 104 or 356 (E ASIAN 104 or 320 prior to Summer 2019) or placement into ASIALANG 203

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ASIAN 435 – TEACHING OF JAPANESE**

3 credits.

Methods of language teaching in general and Japanese language teaching in particular; with emphasis on special problems in teaching Japanese in the US context.

**Requisites:** ASIALANG 204 (or E ASIAN 204 prior to Summer 2019), placement into ASIALANG 303, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Theory: Discuss theories, approaches, and issues of foreign language education in the United States (both UGS and GS); Audience: Both Grad & Undergrad

2. Design: Design curriculum and teaching plans for elementary Japanese language classes

Audience: Graduate

3. Design: Design teaching plans, following the instructor's guidance, for a teaching demonstration

Audience: Undergraduate

4. Teaching: Utilize a broad repertoire of instructional strategies and reflect on their own teaching performance

Audience: Graduate

5. Teaching: Utilize some instructional strategies in their teaching demonstration and reflect on their own learning experience

Audience: Undergraduate

6. Assessment: Discuss theories of assessment

Audience: Graduate

7. Assessment: Develop appropriate assessment instruments

Audience: Both Grad & Undergrad

8. Professionalism: Articulate the importance of life-long professional development for teachers

Audience: Graduate

### ASIAN/COM ARTS 443 – INDIAN CINEMA IN THE U.S. AND BEYOND

3 credits.

India is home to one of the largest film industries in the world, Bollywood. Beyond Bollywood, India has a thriving film culture that caters to its many regional languages. Explore India's diverse, yet interconnected film and media cultures as well as the global resonances of Indian- and South-Asian-inflected media elsewhere. Examine questions of diasporic identity through media produced by the South Asian American community. Consider questions of genre, style and auteurship, ethnicity, decolonization, gender non-conformity, caste, settler colonialism, censorship and linguistic nationalism that shape cinematic discourses in the country and its intersection with South Asian diaspora in the United States.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Critically examine the representational nuances, ideological underpinnings and political rhetoric underlying South Asian Diaspora media texts.

Audience: Both Grad & Undergrad

2. Examine the aesthetic, contextual and historical framings of media artifacts to understand how it shapes conversations on ethnicity, race and diversity.

Audience: Both Grad & Undergrad

3. Analyze the varying patterns of desire, labor and agential assertions that mark film and media forms and practices to understand how it hinders production and positionality.

Audience: Both Grad & Undergrad

4. Demonstrate how film and media can provide us with conceptual grounds to understand the larger social realities that govern representational politics and media production practices.

Audience: Both Grad & Undergrad

5. Critically examine how postcoloniality has been used as a frame of reference in film and media studies.

Audience: Graduate

6. Examine how power, identity and representations shape diasporic media and its pursuit of an audience.

Audience: Both Grad & Undergrad

7. Encourage participation in the multi-cultural context by offering ways to engage with media material to understand how past the has shaped present day circumstances, perceptions of, and disparities in race in the U.S.

Audience: Both Grad & Undergrad

8. Recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity.

Audience: Both Grad & Undergrad

9. Apply course concepts to their lives outside classroom by demonstrating self-awareness and empathy towards the cultural perspectives and worldviews of others.

Audience: Both Grad & Undergrad

### ASIAN/RELIG ST 444 – INTRODUCTION TO SUFISM (ISLAMIC MYSTICISM)

3 credits.

The rise and development of mysticism in Islam; basic Sufi doctrines, values and practices; life and works of important speculative and popular Sufi saints; Sufi brotherhoods in the Middle East, South Asia and North Africa.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Discuss shared Muslim traditions, such as "classical" religious sources and sciences (Qur'an and Hadith, Sufism, law); recognize how this authority persists in the present

Audience: Undergraduate

2. Explain patterns in the diversity of Muslim religious systems across global regions including Asia, Africa and the Americas

Audience: Undergraduate

3. Report on contemporary approaches in the academic fields of Islamic Studies, relating to both historical and modern material

Audience: Undergraduate

4. Express understanding of comparative method in the academic study of religion, especially through writing assignments

Audience: Undergraduate

### ASIAN/HISTORY 454 – SAMURAI: HISTORY AND IMAGE

3-4 credits.

Japanese warriors, their ideals, and their images from the tenth century to the present.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

### ASIAN/HISTORY 456 – PEARL HARBOR & HIROSHIMA: JAPAN, THE US & THE CRISIS IN ASIA

3-4 credits.

Events leading to the Pearl Harbor attack, the conduct of World War II in the Pacific, the nature of the wartime Japanese state and effects of the war on Japanese society, the dropping of the atomic bombs, and Japan's decision to surrender. The war as an epoch in Japanese history.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**ASIAN/HISTORY 458 – HISTORY OF SOUTHEAST ASIA SINCE 1800**

3-4 credits.

Effects of the modern Western revolution on the established societies of Southeast Asia through colonial rule and economic and cultural change. Not open to students with credit for LCA 458 prior to Fall 2018.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2021**ASIAN/RELIG ST 460 – THE HISTORY OF YOGA**

3 credits.

Explores the history of Yoga techniques from the ancient to the modern period. Not open to students with credit for RELIG ST 623 prior to Spring 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1.

Audience: Undergraduate

2.

Audience: Graduate

**ASIAN/HISTORY 463 – TOPICS IN SOUTH ASIAN HISTORY**

3 credits.

Topics vary related to the History of South Asia, Eurasia, and the Indian Ocean.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2018**ASIAN/RELIG ST 466 – BUDDHIST THOUGHT**

3 credits.

Survey of the fundamental trends in Buddhist thought through the works of major philosophers. Themes include the concept of "selflessness" and concomitant theories of essencelessness, perception, language and rationality. Not open to students with credit for E ASIAN or LCA 466 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2020**ASIAN/RELIG ST 473 – MEDITATION IN INDIAN BUDDHISM AND HINDUISM**

3 credits.

Examines contemplative practices in the two major Indian religions, Buddhism and Hinduism. Covers practices described in ancient texts but also provides an overview of selected modern practices.

**Requisites:** Sophomore standing (not open to students with credit for LCA 624 prior to Fall 2019)**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Ability to understand the historical context of meditation practices;

Audience: Undergraduate

2. Explain the complex nature and interdependence of contemporary meditation practices;

Audience: Undergraduate

3. Articulate in writing a critical perspective on practices using evidence as support.

Audience: Undergraduate

**ASIAN/ENGL 478 – INDIAN WRITERS ABROAD: LITERATURE, DIASPORA AND GLOBALIZATION**

3 credits.

Study of literature, drama, and film produced by authors of South Asian origin in Europe, North America, and the Caribbean. Course considers theories of diaspora, changing patterns of subcontinental migration, and relation of diasporic forms to the cultures of origin and adoption. Not open to students with credit for LCA 478 prior to Fall 2019.

**Requisites:** Junior standing**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2018

### ASIAN/RELIG ST 505 – THE PERFECTIBLE BODY IN RELIGIONS, MEDICINES, AND POLITICS

3 credits.

Looking at the cultural institutions of politics, medicine, and religion in multiple cultures and historical times, students will explore ideas about what constitutes a perfect body, how and why different parts of the body are privileged over others, and how and why the notion of bodily perfectibility differs for men and women, children and adults, and humans and gods. Readings encourage such questions as: Is the perfect body attainable and, if so, how? And, who benefits from bodily perfection (or the rhetoric of the bodily perfection)? We will ask these questions with comparative intent: we want both to learn about cultures other than our own and, in the process of understanding the other, we will ask how this new knowledge might empower us to be more observant and critical of the role(s) and treatment of the body in our own society historically and today.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ASIAN 533 – READINGS IN EARLY MODERN JAPANESE LITERATURE

3 credits.

Provides an extensive overview of the literature during Japan's early modern or Edo period (1600-1868). The main goal of the course is to introduce students to the literature of this period through readings in the original early modern Japanese language.

**Requisites:** ASIALANG 404 and 313 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop cultural awareness across historical epochs

Audience: Both Grad & Undergrad

2. Synthesize and critically evaluate source materials in both English and Japanese

Audience: Both Grad & Undergrad

3. Read Japanese literature in the original language

Audience: Undergraduate

4. Produce academic Japanese in line with standards in the field (as embodied in the Monumenta Nipponica Style Sheet)

Audience: Graduate

### ASIAN 563 – READINGS IN MODERN JAPANESE LITERATURE

3 credits.

Extensive readings in modern Japanese literature and discussion of literary content.

**Requisites:** ASIALANG 303 (or E ASIAN 303 prior to Fall 2019) or placement into ASIALANG 304

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Improve one's ability to translate from Japanese to English through reading translation theory and practice.

Audience: Undergraduate

### ASIAN 573 – READINGS IN CLASSICAL JAPANESE LITERATURE

3 credits.

Extensive readings in early Modern or Classical Japanese literature, and discussion of visual-verbal content. Students may repeat this course if the topic is different.

**Requisites:** ASIALANG 303 (or E ASIAN 303 prior to Fall 2019) or placement into ASIALANG 304

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Identify narrative patterns and poetic themes.

Audience: Undergraduate

2. Analyze competing influences and adaptations.

Audience: Both Grad & Undergrad

3. Evaluate recent secondary scholarship.

Audience: Graduate

4. Construct literary and historicist arguments.

Audience: Both Grad & Undergrad

### ASIAN 600 – CAPSTONE SEMINAR IN ASIAN HUMANITIES

3 credits.

An examination of methodological and theoretical issues in Asian humanities, with emphasis on literary, religious, and cultural studies.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**ASIAN/ART HIST 621 – MAPPING, MAKING, AND REPRESENTING COLONIAL SPACES**

3 credits.

Spatial legacy of colonialism; explores important ways in which the population, landscape, architecture, and urban environment of colonies were mapped, made, and represented, particularly in the 19th and 20th centuries; theoretical and empirical analyses from diverse disciplines and spatial terrain. Not open to students with credit for LCA 621 prior to Fall 2019.

**Requisites:** Senior standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIAN 630 – PROSEMINAR: STUDIES IN CULTURES OF ASIA**

3 credits.

Advanced topics in Asian studies.

**Requisites:** Junior standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ASIAN 631 – HISTORY OF THE CHINESE LANGUAGE**

3 credits.

Introduction to Chinese historical linguistics, including the sound systems of the Shih-ching, T'ang poems, and Yuan songs, and their historical relations to the sounds of modern Mandarin, and syntactic interaction between classical and vernacular Chinese. Not open to students with credit for E ASIAN 631 prior to Fall 2019.

**Requisites:** ASIALANG 102 or 356 (E ASIAN 102 or 312 prior to Fall 2019) or placement into ASIALANG 201**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ASIAN 632 – STUDIES IN CHINESE LINGUISTICS**

3 credits.

Development and exchange of scholarly information on specific topics in the field of linguistics. It rotates between various topics about the Chinese language from contemporary perspectives. It may focus on phonetics, phonology, morphology, syntax, semantics, pragmatics, sociolinguistics, applied linguistics, second language acquisition, or discourse analysis. The mastery of the knowledge learned in this course is essential for further study in Chinese linguistics.

**Requisites:** Junior standing**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Sharpen their critical and analytical thinking skills

Audience: Undergraduate

2. Discuss various aspects of Chinese pragmatics intelligently

Audience: Undergraduate

3. Evaluate prior research and synthesize research materials

Audience: Undergraduate

4. Develop empirical research skills

Audience: Undergraduate

5. Critique academic readings and discuss various aspects of Chinese pragmatics

Audience: Graduate

6. Synthesize research materials and present strong arguments related to one of the topics discussed

Audience: Graduate

7. Apply theoretical constructs to original research in the field

Audience: Graduate

8. Analyze empirical data and make claims grounded by the data

Audience: Graduate

9. Demonstrate the interplay of context, practice and perception in their original research

Audience: Graduate

**ASIAN 633 – CHINESE APPLIED LINGUISTICS**

3 credits.

Subfields of applied linguistics in Chinese such as sociolinguistics, pragmatics, corpus linguistics, language pedagogy, second language acquisition, etc.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. understand how language is taught and learned

Audience: Undergraduate

2. develop innovative ideas for language assessment

Audience: Undergraduate

3. describe the relationships among language, context, and society

Audience: Undergraduate

4. apply critical thinking skills to analyze linguistic data

Audience: Undergraduate

5. critique academic readings and discuss various aspects of Chinese applied linguistics

Audience: Graduate

6. synthesize research materials and present strong arguments related to one of the topics discussed

Audience: Graduate

7. apply theoretical constructs to original research in the field

Audience: Graduate

8. analyze empirical data and make claims supported by the data

Audience: Graduate

**ASIAN 641 – HISTORY OF CHINESE LITERATURE I**

3 credits.

Covers the history of Chinese literature from the Zhou through the end of the Yuan, focusing primarily on poetic and prose genres. Primary source readings will be in Chinese, with additional critical assessment of published translations; secondary source readings in both Chinese and English.

**Requisites:** ASIALANG 301, placement into ASIALANG 302, or graduate/professional standing. Not open to students with credit for E ASIAN 651 prior to Fall 2019.

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Establish a comprehensive understanding of China's pre-1400 literary history, including major genres, figures, trends, and relationships

Audience: Both Grad & Undergrad

2. Develop the ability to summarize and evaluate literary works

Audience: Both Grad & Undergrad

3. Improve ability to read and translate Chinese literature closely and critically, supported by engaged, question-driven inquiry and discussion

Audience: Both Grad & Undergrad

4. Improve ability to conduct research in Chinese and Western-language sources on pre-1400 Chinese literature

Audience: Both Grad & Undergrad

5. Develop communication skills in the form of concise, well-organized, and original writing, and in-person presentations

Audience: Both Grad & Undergrad

6. Develop an understanding of the field of study of pre-1400 Chinese literature, including key debates and concepts, and resources for further research

Audience: Graduate

7. Develop the ability to contextualize and evaluate one's research interests within the broader literary history of China

Audience: Graduate

**ASIAN 642 – HISTORY OF CHINESE LITERATURE II**

3 credits.

Covers the history of Chinese-language literature from the late imperial period through today. The primary focus will be on prose fiction, with additional coverage of the development of major forms such as spoken drama, free-verse poetry, and modern criticism. In exploring these genres and forms, special attention given to issues of language, representation, and politics. The majority of readings will be in Chinese.

**Requisites:** ASIALANG 301 or placement into ASIALANG 302

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Establish a comprehensive understanding of China's late imperial and modern literary history, including major genres, figures, trends, and relationships.

Audience: Undergraduate

2. Improve ability to read and translate Chinese literature closely and critically, supported by engaged, question-driven inquiry and discussion.

Audience: Undergraduate

3. Develop communication skills in the form of concise, well-organized, and original writing, and in-person presentations.

Audience: Undergraduate

4. Develop the ability to summarize and evaluate literary works.

Audience: Both Grad & Undergrad

5. Develop an understanding of the field of modern Chinese literature studies, including key debates and concepts, and resources for further research.

Audience: Graduate

6. Develop the ability to contextualize and evaluate one's research interests within the broader literary history of China.

Audience: Graduate

**ASIAN/RELIG ST 650 – PROSEMINAR IN BUDDHIST THOUGHT**

2-3 credits.

Advanced topics in theories focused on the mechanisms of contemplative practices such as mindfulness, focused attention and compassion practices, with special emphasis on the interaction of traditional theories from contemplative traditions such as Buddhism and more recent theoretical accounts in psychology and cognitive science.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**ASIAN 655 – ETHNOGRAPHY IN ASIA**

3 credits.

From Greek *ethnos*, "folk" + *grapho*, "to write," doing ethnography involves writing about people, societies, and cultures. It is a qualitative, rather than a quantitative, type of research. One does ethnography, and thus it's a process. But an ethnography is also a product: the outcome of the ethnographic process is an ethnography. In-depth studies and discussions of classic and contemporary ethnographies in multiple Asian contexts that focus on themes like religion, health, economics, and sexuality in writing, photography, and film at once illustrate various methods involved in doing ethnography and illuminate why scholars have for decades studied and represented Asia through ethnography. The methods of ethnography are never divorced from the motivations of the scholars, and thus it is crucial to probe critically and collectively what ethnography is (theory), how it is done (practice), and why is it worth doing generally and in Asian contexts in particular.

**Requisites:** Senior standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Report on how the practice of ethnography relates to research agendas.

Audience: Both Grad & Undergrad

2. Understand how the craft of ethnography impacts the study and articulation of "Asia" as a place and an idea.

Audience: Both Grad & Undergrad

3. Reflect on ethnography in writing.

Audience: Both Grad & Undergrad

4. Learn how to identify and analyze visual ethnographies in filmmaking and photography.

Audience: Both Grad & Undergrad

5. Relate the history, practice, and production of ethnography to particular courses of study (i.e., majors and certificates) and, if applicable, to senior theses and/or final projects.

Audience: Undergraduate

6. Demonstrate how the practice and production of ethnography relates to specific disciplines and, if applicable, to dissertation projects.

Audience: Graduate

7. Articulate how the history, practice, and production of ethnography relates to prior research and experience "on the ground" in Asia.

Audience: Graduate

**ASIAN 672 – STUDIES IN CHINESE FICTION**

3 credits.

Intensive study of selected short story and novel texts from the xiaoshuo tradition. In addition to the primary texts, traditional and modern audience reception, criticism, and adaptations will be discussed. Readings will be conducted in the original Chinese, supplemented by English translations when available. The course can be repeated if the topic differs.

**Requisites:** ASIALANG 311 (or E Asian 302 prior to Fall 2019) or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ASIAN 681 – SENIOR HONORS THESIS**

3 credits.

Students engage in an independent research under the guidance of a faculty advisor. Students must be enrolled in Honors in the Major or Honors in the Liberal Arts.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIAN 682 – SENIOR HONORS THESIS**

3 credits.

Second semester is devoted to writing the thesis paper under the guidance of a faculty advisor. Students must be enrolled in Honors in the Major or Honors in the Liberal Arts.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIAN 691 – SENIOR THESIS**

3 credits.

The senior thesis involves research conducted in collaboration with a faculty member (non-honors student).

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2003

**ASIAN 692 – SENIOR THESIS**

3 credits.

The senior thesis involves research conducted in collaboration with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 1996

**ASIAN 698 – DIRECTED STUDY**

2-3 credits.

Directed study offers the student an opportunity to work with a faculty member on an individual study program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ASIAN 699 – DIRECTED STUDY**

2-3 credits.

Offers the student an opportunity to work with a faculty member on an individual study program. Students must have junior or senior standing.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ASIAN 700 – TEACHING ASIAN LANGUAGES**

2-3 credits.

Theoretical background and recent trends in foreign language teaching. Teaching of the four skills (speaking, listening, reading and writing) and culture, developing curricula and lesson plans, and assessment to help you develop a repertoire of teaching techniques and strategies.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**ASIAN 701 – PROSEMINAR IN CHINESE LITERATURE**

3 credits.

Acquaints entering graduate students with the history of the study of Chinese literature in the West, with the basic reference tools and methodologies, and with the various critical approaches to Chinese literature. BA in Chinese or equiv

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ASIAN 712 – TEACHING OF CHINESE**

3 credits.

Methods of teaching Chinese as a second language including comparative study of Chinese and English structure, introduction to teaching techniques. Not open to students with credit for E ASIAN 622 prior to Fall 2019.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**ASIAN 763 – STUDIES IN JAPANESE LITERATURE**

3 credits.

One of the general fields such as theater, fiction, etc., studied intensively.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**ASIAN 775 – JAPANESE APPLIED LINGUISTICS**

3 credits.

One of the general fields such as discourse analysis, sociolinguistics, pragmatics, language pedagogy, etc.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ASIAN 799 – READING FOR RESEARCH**

1-3 credits.

Under the guidance of their advisors and other committee members, students compile reading lists for their defined preliminary exam fields and read essential sources and scholarship from those lists. They will demonstrate their critical reading of this material in meetings with the advisor or other committee members.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ASIAN 815 – SEMINAR: INTERDISCIPLINARY APPROACHES TO ASIA**

3 credits.

An overview of current research being done on Asia in a variety of different disciplines.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2020**ASIAN 833 – TOPICS IN EAST ASIAN VISUAL CULTURES**

3 credits.

Topics in the study of the visual cultures of East Asia from antiquity to the present. Focuses on illustrative texts and genres, major historiographic, theoretical, and methodological issues, and the technologies of vision and visibility in China, Japan, and Korea.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ASIAN/HISTORY 857 – SEMINAR-HISTORY OF INDIA (SOUTH ASIA)**

1-3 credits.

Emphasis upon handling of research problems. Focus upon methods, resources, intellectual approaches, and changing interpretations.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2018**ASIAN 873 – SEMINAR IN LANGUAGES AND LITERATURES OF ASIA**

3 credits.

Explore topics in comparative, connected, and/or trans-Asian literatures and languages. Important thinkers and movements in Asian history will be examined and discussed. Through close readings and discussion, presentations, and writing probe vital theories, methodologies, and critical themes in Asian Studies research.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, for 4 number of completions**Last Taught:** Fall 2020**Learning Outcomes:** 1. Identify and analyze critical themes, both historically and in the present day, works of Asian literature, filmmaking, photography, and art.

Audience: Graduate

2. Articulate the ways in which classic and contemporary theories and methodologies in Asian Studies relate to their own research agendas at UW-Madison and how these theories and methods impact the study and exploration of "Asia" in their own work.

Audience: Graduate

3. Present progress of their research in writing and in presentations to the other seminar participants.

Audience: Graduate

**ASIAN 932 – SEMINAR IN CHINESE LINGUISTICS**

2-3 credits.

Rotating subjects in the study of Chinese Linguistics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**ASIAN 951 – SEMINAR IN CHINESE LITERATURE**

3 credits.

Rotating subjects in the study of Chinese Literature.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**ASIAN 990 – THESIS RESEARCH**

3 credits.

Research in connection with the doctoral thesis.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ASIAN 999 – INDEPENDENT RESEARCH**

1-3 credits.

Independent research for graduate students.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2022

# ASIAN LANGUAGES AND CULTURES: LANGUAGES (ASIALANG)

**ASIALANG 101 – FIRST SEMESTER CHINESE**

4 credits.

Introduces the sounds, basic grammar along with 400 characters of standard spoken Chinese. It also teaches beginner-level communication skills in everyday life.

**Requisites:** Not open to students with credit for ASIALANG 111 (or E ASIAN 101 or 122 prior to Fall 2019)**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIALANG 102 – SECOND SEMESTER CHINESE**

4 credits.

Introduces the basic grammar along with 400 Chinese characters of standard spoken Chinese. Students with prior experience in the language are required to take a placement test administered by the department.

**Requisites:** ASIALANG 101 or 111 (or E Asian 101 or 122 prior to Fall 2019) or placement into ASIALANG 102. Not open to students with credit for E ASIAN 102 prior to Fall 2019**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ASIALANG 103 – FIRST SEMESTER JAPANESE**

4 credits.

Focus on proficiency in four skills (speaking, listening, reading, and writing) to communicate in Japanese in basic everyday situations. No previous knowledge of Japanese expected. Not open to students with credit for E ASIAN 103 prior to Summer 2019).

**Requisites:** Not open to students who have completed ASIALANG 114 (or E ASIAN 124 prior to Summer 2019)**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIALANG 104 – SECOND SEMESTER JAPANESE**

4 credits.

Focus on proficiency in four skills (speaking, listening, reading, and writing) to communicate in Japanese in basic everyday situations. Continuation of skill development from ASIALANG 103. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 104 prior to Summer 2019.

**Requisites:** ASIALANG 103 or 114 (E ASIAN 103 or 124 prior to Summer 2019) or placement into ASIALANG 104**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ASIALANG 105 – FIRST SEMESTER KOREAN**

4 credits.

Provides students with basic conversation skills and grammatical patterns, assuming that students have no or little previous background knowledge of the Korean language. The learning goal of the course is to equip students with communicative skills in speaking, listening, reading, and writing at a basic level in Korean; Using contemporary standard Korean, students will learn how to express simple ideas such as attributes, identities, locations, time, daily activities, weekend plan, desires, as well as how to combine simple ideas in a various way. Not open to students who completed E ASIAN 105 prior to summer 2019.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIALANG 106 – SECOND SEMESTER KOREAN**

4 credits.

Essentials of modern spoken and written Korean. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 106 prior to Summer 2019

**Requisites:** ASIALANG 105 (E ASIAN 105 prior to Summer 2019) or placement into ASIALANG 106**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ASIALANG 110 – ELEMENTARY CHINESE I**

2 credits.

Introduction to the fundamental phonetic system and grammar of standard spoken Chinese along with 200 characters. Not open to students with credit for ASIALANG 101 (or E ASIAN 101 or 121 prior to Fall 2019).

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**ASIALANG 111 – ELEMENTARY CHINESE II**

2 credits.

Introduction to the fundamental phonetic system and grammar of standard spoken Chinese along with 200 characters. Students with prior experience in the language are required to take a placement test administered by the department.

**Requisites:** ASIALANG 110 (E ASIAN 121 prior to Fall 2019) or placement into ASIALANG 111. Not open to students with credit for ASIALANG 101 (or E ASIAN 101 or 122 prior to Fall 2019)**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2021**ASIALANG 113 – FIRST SEMESTER ELEMENTARY JAPANESE**

2 credits.

Focus on proficiency in four skills (speaking, listening, reading, and writing) to communicate in Japanese in basic everyday situations.

**Requisites:** Not open to students with credit for ASIALANG 103 (or E ASIAN 103 prior to Summer 2019)**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ASIALANG 114 – SECOND SEMESTER ELEMENTARY JAPANESE**

2 credits.

Focus on proficiency in four skills (speaking, listening, reading, and writing) to communicate in Japanese in basic everyday situations. Students with prior experience in the language are required to take a placement test administered by the department.

**Requisites:** ASIALANG 113 (or E ASIAN 123 prior to Summer 2019) or placement into ASIALANG 114. Not open to students who have completed ASIALANG 103 (or E ASIAN 103 prior to Summer 2019)**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIALANG 121 – FIRST SEMESTER ASIAN LANGUAGE**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**ASIALANG 122 – SECOND SEMESTER ASIAN LANGUAGE**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 302 prior to Fall 2019.

**Requisites:** ASIALANG 121 (or LCA LANG 301 prior to Fall 2019)**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2022

**ASIALANG 123 – FIRST SEMESTER FILIPINO**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Not open to students with credit for LCA LANG 305 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 124 – SECOND SEMESTER FILIPINO**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 306 prior to Fall 2019.

**Requisites:** ASIALANG 123 (or LCA LANG 123 prior to Fall 2019) or ASIALANG 355 or placement into ASIALANG 124

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 125 – FIRST SEMESTER HMONG**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Not open to students with credit for LCA LANG 307 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 126 – SECOND SEMESTER HMONG**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 308 prior to Fall 2019.

**Requisites:** ASIALANG 125 (or LCA LANG 307 prior to Fall 2019) or ASIALANG 355 or placement into ASIALANG 126

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 127 – FIRST SEMESTER INDONESIAN**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Not open to students with credit for LCA LANG 309 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 128 – SECOND SEMESTER INDONESIAN**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 310 prior to Fall 2019.

**Requisites:** ASIALANG 127 (or LCA LANG 309 prior to Fall 2019) or ASIALANG 355 or placement into ASIALANG 128

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 129 – FIRST SEMESTER THAI**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Not open to students with credit for LCA LANG 317 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 130 – SECOND SEMESTER THAI**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 318 prior to Fall 2019.

**Requisites:** ASIALANG 129 (or LCA LANG 317 prior to Fall 2019) or placement into ASIALANG 130

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 131 – FIRST SEMESTER VIETNAMESE**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Not open to students with credit for LCA LANG 319 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 132 – SECOND SEMESTER VIETNAMESE**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 320 prior to Fall 2019.

**Requisites:** ASIALANG 131 (or LCA LANG 319 prior to Fall 2019) or ASIALANG 355 or placement into ASIALANG 132

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 133 – FIRST SEMESTER HINDI**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Not open to students with credit for LCA LANG 353 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 134 – SECOND SEMESTER HINDI**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 354 prior to Fall 2019.

**Requisites:** ASIALANG 133 (or LCA LANG 353 prior to Fall 2019) or placement into ASIALANG 134

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 135 – FIRST SEMESTER MODERN TIBETAN**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Not open to students with credit for LCA LANG 369 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 136 – SECOND SEMESTER MODERN TIBETAN**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 370 prior to Fall 2019.

**Requisites:** ASIALANG 135 (or LCA LANG 369 prior to Fall 2019) or placement into ASIALANG 136

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 137 – FIRST SEMESTER PERSIAN**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Not open to students with credit for LCA LANG 363 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 138 – SECOND SEMESTER PERSIAN**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 364 prior to Fall 2019.

**Requisites:** ASIALANG 137 (or LCA LANG 363 prior to Fall 2019) or ASIALANG 355 or placement into ASIALANG 138

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 139 – FIRST SEMESTER URDU**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Not open to students with credit for LCA LANG 371 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 140 – SECOND SEMESTER URDU**

4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 372 prior to Fall 2019.

**Requisites:** ASIALANG 139 (or LCA LANG 371 prior to Fall 2019) or ASIALANG 355 or placement into ASIALANG 140

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 141 – FIRST SEMESTER SANSKRIT**

3-4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing using communicative approaches. Not open to students with credit for LCA LANG 375 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ASIALANG 142 – SECOND SEMESTER SANSKRIT**

3-4 credits.

Proficiency at the elementary level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 376 prior to Fall 2019.

**Requisites:** ASIALANG 141 (or LCA LANG 375 prior to Fall 2019)

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ASIALANG 201 – THIRD SEMESTER CHINESE**

4 credits.

Introduces intermediate-level communication skills in varying Chinese settings. Students will learn a wide range of vocabulary, grammar structure and pragmatic usage in situated dialogues. **Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 203 – THIRD SEMESTER JAPANESE**

4 credits.

Focus on proficiency in four skills (speaking, listening, reading, and writing) and Japanese culture. Continuation of skill development from elementary language courses reviewing, reinforcing and expanding grammar, kanji and vocabulary/ expressions. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 203 prior to Summer 2019.

**Requisites:** ASIALANG 104 or 356 (E ASIAN 104 or 320 prior to Summer 2019) or placement into ASIALANG 203

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 204 – FOURTH SEMESTER JAPANESE**

4 credits.

Focus on proficiency in four skills (speaking, listening, reading, and writing) and Japanese culture. Continuation of skill development from ASIALANG 203. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 204 prior to Summer 2019.

**Requisites:** ASIALANG 203 (E ASIAN 203 prior to Summer 2019) or ASIALANG 357 (or E ASIA 327 prior to Summer 2019) or placement into ASIALANG 204

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 205 – THIRD SEMESTER KOREAN**

4 credits.

Focus on two areas of Korean language learning (listening speaking) so that students can understand and express themselves in contemporary Korean. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 345 prior to Summer 2019.

**Requisites:** ASIALANG 106 (or E ASIAN 106 prior to Summer 2019) or placement into ASIALANG 205

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 206 – FOURTH SEMESTER KOREAN**

4 credits.

Further practice in speaking, reading and writing Korean. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 346 prior to Summer 2019.

**Requisites:** ASIALANG 205 (E ASIAN 345 prior to Summer 2019) or placement into ASIALANG 206

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 211 – HERITAGE CHINESE I**

3 credits.

**Requisites:** ASIALANG 211**Course Designation:** Frgn Lang – 4th semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**Learning Outcomes:** 1. Communicate formally and sophisticatedly in a wide range of Chinese contexts

Audience: Undergraduate

2. Appreciate Chinese linguistic and cultural heritage

Audience: Undergraduate

3. Read dense materials and difficult texts in Chinese more efficiently

Audience: Undergraduate

4. Produce texts of different genres in Chinese

Audience: Undergraduate

**ASIALANG 221 – THIRD SEMESTER ASIAN LANGUAGE**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department.

**Requisites:** ASIALANG 121 (or LCA LANG 301 prior to Fall 2019)**Course Designation:** Frgn Lang – 3rd semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ASIALANG 222 – FOURTH SEMESTER ASIAN LANGUAGE**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 402 prior to Fall 2019.

**Requisites:** ASIALANG 122 (LCA LANG 302 prior to Fall 2019)**Course Designation:** Frgn Lang – 4th semester language course

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ASIALANG 223 – THIRD SEMESTER FILIPINO**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 405 prior to Fall 2019.

**Requisites:** ASIALANG 124 (or LCA LANG 306 prior to Fall 2019) or placement into ASIALANG 223**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIALANG 224 – FOURTH SEMESTER FILIPINO**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 406 prior to Fall 2019.

**Requisites:** ASIALANG 223 (or LCA LANG 405 prior to Fall 2019) or placement into ASIALANG 224**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ASIALANG 225 – THIRD SEMESTER HMONG**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 407 prior to Fall 2019.

**Requisites:** ASIALANG 126 (or LCA LANG 308 prior to Fall 2019) or placement into ASIALANG 225**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ASIALANG 226 – FOURTH SEMESTER HMONG**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 408 prior to Fall 2019.

**Requisites:** ASIALANG 225 (or LCA LANG 307 prior to Fall 2019) or placement into ASIALANG 226**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ASIALANG 227 – THIRD SEMESTER INDONESIAN**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 409 prior to Fall 2019.

**Requisites:** ASIALANG 128 (or LCA LANG 310 prior to Fall 2019) or placement into ASIALANG 227

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 228 – FOURTH SEMESTER INDONESIAN**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 410 prior to Fall 2019.

**Requisites:** ASIALANG 227 (LCA LANG 409 prior to Fall 2019) or placement into ASIALANG 228

**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 229 – THIRD SEMESTER THAI**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 417 prior to Fall 2019.

**Requisites:** ASIALANG 130 (or LCA LANG 318 prior to Fall 2019) or placement into ASIALANG 229

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 230 – FOURTH SEMESTER THAI**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 418 prior to Fall 2019.

**Requisites:** ASIALANG 229 (or LCA LANG 417 prior to Fall 2019) or ASIALANG 357 or placement into ASIALANG 230

**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 231 – THIRD SEMESTER VIETNAMESE**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 419 prior to Fall 2019.

**Requisites:** ASIALANG 132 (or LCA LANG 320 prior to Fall 2019) or placement into ASIALANG 231

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**ASIALANG 232 – FOURTH SEMESTER VIETNAMESE**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 420 prior to Fall 2019.

**Requisites:** ASIALANG 231 (or LCA LANG 419 prior to Fall 2019) or placement into ASIALANG 232

**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 233 – THIRD SEMESTER HINDI**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 453 prior to Fall 2019.

**Requisites:** ASIALANG 134 (or LCA LANG 354 prior to Fall 2019) or placement into ASIALANG 233

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 234 – FOURTH SEMESTER HINDI**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 454 prior to Fall 2019.

**Requisites:** ASIALANG 233 (or LCA LANG 453 prior to Fall 2019) or placement into ASIALANG 234

**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 235 – THIRD SEMESTER MODERN TIBETAN**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 469 prior to Fall 2019.

**Requisites:** ASIALANG 136 (or LCA LANG 370 prior to Fall 2019) or placement into ASIALANG 235

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ASIALANG 236 – FOURTH SEMESTER MODERN TIBETAN**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 470 prior to Fall 2019.

**Requisites:** ASIALANG 235 (or LCA LANG 469 prior to Fall 2019) or placement into ASIALANG 236

**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ASIALANG 237 – THIRD SEMESTER PERSIAN**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 463 prior to Fall 2019.

**Requisites:** ASIALANG 138 (or LCA LANG 364 prior to Fall 2019) or placement into ASIALANG 237

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 238 – FOURTH SEMESTER PERSIAN**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 464 prior to Fall 2019.

**Requisites:** ASIALANG 237 (LCA LANG 463 prior to Fall 2019) or placement into ASIALANG 238

**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 239 – THIRD SEMESTER URDU**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 471 prior to Fall 2019.

**Requisites:** ASIALANG 140 (or LCA LANG 372 prior to Fall 2019) or placement into ASIALANG 239

**Course Designation:** Frgn Lang – 3rd semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 240 – FOURTH SEMESTER URDU**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading and writing, using communicative approaches.

**Requisites:** ASIALANG 239 (or LCA LANG 372 prior to Fall 2019) or placement into ASIALANG 240. Not open to students with credit for LCA LANG 472 prior to Fall 2019.

**Course Designation:** Frgn Lang – 4th semester language course  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Read simple Urdu sentences with understanding.  
Audience: Undergraduate

2. Carry out introduction and talk about themselves, their interests, their family and work, other person's family and work .

May be repeated if enrolled in a different language.

**Requisites:** ASIALANG 355

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ASIALANG 357 – THIRD SEMESTER ASIAN LANGUAGE FOR GRADUATE STUDENTS**

4 credits.

Graduate students enrolled in this course attend, and complete all assigned coursework, for one of the third-semester Asian languages offered by the department (Burmese, Chinese, Filipino, Hindi, Hmong, Indonesian, Japanese, Khmer, Korean, Persian, Sanskrit, Thai, Tibetan, Urdu, Vietnamese). In addition, graduate students develop field work interview scripts, simple research proposals, or other intermediate target language materials linked to individual research goals, and reflect both in oral discussion and in writing on progress towards research and professional language learning goals. Graduate students will have additional regular meetings with the instructor or supervisor. Students with prior experience in the language are required to take a placement test administered by the department. May be repeated if enrolled in a different language.

**Requisites:** ASIALANG 356

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### ASIALANG 358 – FOURTH SEMESTER ASIAN LANGUAGE FOR GRADUATE STUDENTS

4 credits.

Graduate students enrolled in this course attend, and complete all assigned coursework, for one of the fourth-semester Asian languages offered by the department (Burmese, Chinese, Filipino, Hindi, Hmong, Indonesian, Japanese, Khmer, Korean, Persian, Sanskrit, Thai, Tibetan, Urdu, Vietnamese). In addition, graduate students develop field work interview scripts, simple research proposals, or other intermediate target language materials linked to individual research goals, and reflect both in oral discussion and in writing on progress towards research and professional language learning goals. Graduate students will have additional regular meetings with the instructor or supervisor. Students with prior experience in the language are required to take a placement test administered by the department. May be repeated if enrolled in a different language.

**Requisites:** ASIALANG 357

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ASIALANG 360 – INTERMEDIATE READING PROFICIENCY IN ASIAN LANGUAGES

4 credits.

Reinforces the skills of reading various genres of Asian target-language writings. Designed for students who have taken at least a first year Asian language course.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

### ASIALANG 375 – ADVANCED JAPANESE: SOLIDIFYING THE FOUNDATIONS

3 credits.

Focus on proficiency in four skills (speaking, listening, reading, and writing) and Japanese culture. Continuation of skill development in reviewing, reinforcing, and expanding grammar, kanji and vocabulary/ expressions. Introduce skills to understand authentic textual and audiovisual materials. Solidify the foundations in preparation for advanced-level Japanese coursework.

**Requisites:** ASIALANG 303 or placement into ASIALANG 304

**Course Designation:** Breadth - Humanities

Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Connect sentences to provide information on some familiar and abstract topics (e.g., cultural differences and social issues)

Audience: Undergraduate

2. State nuanced opinions and understand others' view points

Audience: Undergraduate

3. Understand the main idea and some details in talk and authentic texts that contain mostly familiar vocabulary

Audience: Undergraduate

4. Develop the understanding and use of various styles such as spoken vs. written styles, formal vs. casual styles, etc.

Audience: Undergraduate

5. Examine some cultural similarities and differences between the target culture and one's own, as well as the diversity within each culture and their connections in the globalized world

Audience: Undergraduate

**ASIALANG 376 – JAPANESE CONVERSATION**

3 credits.

Enhance oral communication skills in various everyday contexts. Examines how different terminology, phrases, speech styles, and strategies are used to carry on conversations in various real-life situations and practice adopting them. Not open to students with credit for E ASIAN 335 prior to Fall 2019.

**Requisites:** ASIALANG 204 (or E ASIAN 204 prior to Summer 2019) or placement into ASIALANG 303

**Course Designation:** Frgn Lang - 5th + semester language course  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. understand the difference between grammars and expressions commonly used in conversational Japanese and written Japanese

Audience: Undergraduate

2. become familiar with a variety of strategies used to initiate, maintain and close a conversation, to overcome the lack of vocabulary knowledge, and to become a supportive listener

Audience: Undergraduate

3. appreciate different styles of speech used depending on the contexts, relationship with the interlocutors, and the speakers' identities

Audience: Undergraduate

4. understand main ideas on familiar topics and some unfamiliar topics delivered through conversations

Audience: Undergraduate

5. state and support your views on a variety of familiar topics and in uncomplicated situations

Audience: Undergraduate

6. narrate a story and make a presentation on familiar topics with preparation

Audience: Undergraduate

7. establish habits of reflecting on your strengths and weaknesses as a speaker of Japanese and consider ways to make improvements

Audience: Undergraduate

**ASIALANG 377 – BUSINESS JAPANESE COMMUNICATION**

3 credits.

Enhances oral and written communication skills that are specific to business contexts. Review essential grammar and honorific expressions for proper styles of communication. Develop the understanding of cultural and geographical factors that influence business practices in Japan.

Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 377 prior to Fall 2019.

**Requisites:** ASIALANG 204 or 358 (or E ASIAN 204 prior to Fall 2019) or placement into ASIALANG 303

**Course Designation:** Frgn Lang - 5th + semester language course  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply basic rules of Keigo, Japanese respectful expressions, to speak and write properly in common business situations.

Audience: Undergraduate

2. Communicate by e-mail and by phone in Japanese to accomplish everyday tasks.

Audience: Undergraduate

3. Demonstrate social and cultural knowledge that is necessary to work in Japan or to use Japanese at work.

Audience: Undergraduate

4. Evaluate career opportunities after graduation and be able to explain the reasons for applying to jobs in order to obtain desirable careers.

Audience: Undergraduate

5. Develop Shakaijin kiso ryoku, "fundamental competencies for working persons," which are defined by Japanese Ministry of Economy, Trade and Industry, - ability to make actions, ability to think thoroughly, and the ability to work in team.

Audience: Undergraduate

**ASIALANG 378 – CHINESE CONVERSATION**

3 credits.

Oral communication skills including verbal and nonverbal behavior in Mandarin Chinese. Useful terms and phrases for daily conversations and professional reports. Practice conversation and interacting appropriately in varying real-life situations. Not open to students with credit for E ASIAN 333 prior to Fall 2019.

**Requisites:** ASIALANG 202 (or E ASIAN 202 prior to Fall 2019) or placement into ASIALANG 301

**Course Designation:** Breadth - Humanities

Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Initiate, maintain, and close a conversation in both formal and informal settings

Audience: Undergraduate

2. Have basic knowledge of Chinese socio-cultural values in order to speak appropriately in various contexts

Audience: Undergraduate

3. Summarize main ideas, narrate a story and give presentations on a familiar topic.

Audience: Undergraduate

4. Discuss a variety of topics and share perspectives concerning both concrete and abstract ideas

Audience: Undergraduate

**ASIALANG 379 – BUSINESS CHINESE**

3 credits.

Introduces learners of Chinese to the culture, commerce, and etiquette in the Chinese society. Students will acquire a working knowledge of the vocabulary and expressions that are essential for business transactions. They will also learn culturally applicable business strategies and understand Chinese people's expectations, concerns and needs. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 379 prior to Fall 2019.

**Requisites:** ASIALANG 202 or 358 (or E ASIAN 202 or 314 prior to Fall 2019) or placement into ASIALANG 301

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 381 – BUSINESS KOREAN**

3 credits.

Build advanced-level speaking, vocabulary, and communication skills needed for a variety of Korean business settings. Become familiar with Korean business culture through classroom activities and homework assignments. Topics include formal communication skills, business-related vocabulary frequently used in formal writing, and current issues related to Korea's economy, society and culture. Understand Korean companies' hiring processes and detailed information regarding Korean-specific business culture and issues. Enhance language skills for business settings in South Korea.

**Requisites:** ASIALANG 305 (E ASIAN 347 prior to Summer 2019) or placement into ASIALANG 306

**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Understand and participate in work-related conversations

Audience: Both Grad & Undergrad

2. Produce coherent and clearly organized written texts in business settings

Audience: Both Grad & Undergrad

3. Understand Korean companies' hiring processes and detailed information regarding Korean-specific business culture and issues.

Audience: Graduate

**ASIALANG 401 – SEVENTH SEMESTER CHINESE**

3 credits.

Extensive readings in advanced general and specialized texts in contemporary Chinese, and discussion on the content of the reading materials. Conducted in Chinese. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 401 prior to Fall 2019.

**Requisites:** ASIALANG 302 (or E ASIAN 302 prior to Fall 2019)

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**ASIALANG 403 – SEVENTH SEMESTER JAPANESE**

3 credits.

Extensive readings in advanced general and specialized texts in contemporary Japanese, and discussion on the content of the reading materials. Conducted in Japanese. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 403 prior to Summer 2019.

**Requisites:** ASIALANG 304 (or E ASIAN 304 prior to Summer 2019)

**Course Designation:** Breadth – Humanities

Frng Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**ASIALANG 405 – SEVENTH SEMESTER KOREAN**

3 credits.

Extensive readings in advanced general and specialized texts in Korean, and discussion on the content of the reading materials. Conducted in Korean. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 405 prior to Summer 2019.

**Requisites:** ASIALANG 306 (or E ASIAN 348 prior to Summer 2019) or placement into ASIALANG 405

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASIALANG 406 – EIGHTH SEMESTER KOREAN**

3 credits.

Extensive readings in advanced general and specialized texts in Korean, and discussion on the content of the reading materials. Conducted in Korean. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for E ASIAN 406 prior to Summer 2019.

**Requisites:** ASIALANG 405 (or E ASIAN 405 prior to Summer 2019) or placement into ASIALANG 406

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ASIALANG 407 – THIRD SEMESTER SOUTHEAST ASIAN LANGUAGE**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading, and writing, using communicative approaches.

**Requisites:** Declared in Southeast Asian Studies Summer Institute

**Course Designation:** Frng Lang – 3rd semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ASIALANG 408 – FOURTH SEMESTER SOUTHEAST ASIAN LANGUAGE**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading, and writing, using communicative approaches.

**Requisites:** Declared in Southeast Asian Studies Summer Institute

**Course Designation:** Frng Lang – 4th semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ASIALANG 417 – THIRD SEMESTER SUMMER ASIAN LANGUAGE**

4 credits.

Proficiency at the intermediate level in listening, speaking, reading, and writing, using communicative approaches.

**Requisites:** Declared in South Asia Summer Language Institute, Southeast Asian Studies Summer Institute, Middle Eastern and Mediterranean Language Institute, or Central Eurasian Studies Summer Institute

**Course Designation:** Frng Lang – 3rd semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Converse on everyday topics in the target language.

Audience: Undergraduate

2. Communicate basic needs and ideas in common and less common conversational situations in the target language.

Audience: Undergraduate

3. Read and react to a variety of somewhat complicated texts, dealing with a variety of social situations, in the target language.

Audience: Undergraduate

4. Analyze how media discourse contributes to the creation, maintenance, or critique of certain ideological beliefs

Audience: Undergraduate

5. State and support their own views on some social and cultural issues discussed or implied in a variety of audio-visual media produced in Japanese

Audience: Undergraduate

6. Create audio-visual media presentations on topics of their interest  
Audience: Undergraduate

**ASIALANG 454 – ADVANCED CHINESE THROUGH MEDIA**

3 credits.

Designed for advanced learners of Chinese to improve their Chinese language skills and cultural knowledge. Students will watch and analyze audio-visual media, such as documentary, talk show, movies, etc. In addition, students will make audios/videos to tell stories about themselves, their friends, or others.

**Requisites:** ASIALANG 301 (or E ASIAN 301 prior to Fall 2019) or placement into ASIALANG 302

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASIALANG 456 – ADVANCED KOREAN THROUGH AUDIO-VISUAL MEDIA**

3 credits.

Improve listening comprehension, media literacy, speaking, and writing skills. Using various genres of audio-visual media materials, including drama, news, documentaries, talk/variety shows, and advertisements, gain a deeper understanding of contemporary Korean society and culture. Develop listening comprehension skills by watching and listening to authentic Korean media content. Analyze media content critically and develop media literacy skills. Practice speaking and writing skills through engaging discussions and assignments.

**Requisites:** ASIALANG 305 or placement into ASIALANG 306

**Course Designation:** Breadth - Humanities

Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and interpret unfamiliar topics presented through a diverse range of Korean audio-visual media.

Audience: Undergraduate

2. Demonstrate an understanding of different registers and styles of the Korean language used in various genres of media discourse.

Audience: Undergraduate

3. Analyze the role and significance of visual and sound effects in the creation of meaning within audio-visual media.

Audience: Undergraduate

4. Express students' own views on social and cultural issues depicted in Korean media.

Audience: Undergraduate

5. Create audio-visual media presentations on topics of interest and effectively communicate ideas and messages using audio-visual media.

Audience: Undergraduate

**ASIALANG 457 – ADVANCED CHINESE: READING AND WRITING**

3 credits.

Learn to interpret modified and authentic Chinese reading materials, including textbook articles, news reports, and online posts from various social media. Learn the basics of Chinese writing, and practice planning, writing, and revising Chinese essays. Solidify Chinese reading and writing skills, cultivate wider and deeper perspectives towards Chinese society and culture, and develop insight into one's own language and culture.

**Requisites:** ASIALANG 301, 379, placement into ASIALANG 302, or graduate/professional standing

**Course Designation:** Breadth - Humanities

Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and understand main messages and supporting details on selected Chinese reading materials.

Audience: Both Grad & Undergrad

2. Use Chinese (in speaking or writing) to express their opinions, explain complex matters in detail, and provide lengthy and coherent narrations or arguments in response to certain reading materials and writing prompts, all with fluency, accuracy and complexity.

Audience: Both Grad & Undergrad

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2019**ASIALANG 608 – EIGHTH SEMESTER SOUTHEAST ASIAN LANGUAGE**

4 credits.

Proficiency at the advanced-high level in listening, speaking, reading, and writing, using communicative approaches.

**Requisites:** Declared in Southeast Asian Studies Summer Institute**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2019**ASIALANG 675 – ADVANCED READINGS IN SANSKRIT**

3 credits.

Designed for advanced learners of Sanskrit and will enhance students' knowledge of the language through reading in a variety of genres from different time periods. Primarily focuses on reading and analyzing texts. Students with prior experience in the language are required to take a placement test administered by the department. Not open to students with credit for LCA LANG 675 prior to Fall 2019.

**Requisites:** ASIALANG 242 or 358 (or LCA LANG 476 prior to Fall 2019)**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2020**ASTRONOMY (ASTRON)****ASTRON 103 – THE EVOLVING UNIVERSE: STARS, GALAXIES, AND COSMOLOGY**

3 credits.

The cosmos is vast, mysterious, and beautiful. Join us on an exploration of the universe, from the big bang to the birth, life, and death of stars and the warped reality of black holes. Includes lifecycles of stars; supernovae and creation of elements; white dwarfs, pulsars and black holes; the Milky Way and galaxies; distances of stars and galaxies; quasars; expansion of universe; modern big bang cosmology, dark matter, dark energy.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement. Not open to students with credit for ASTRON 200**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Apply quantitative reasoning to evaluate scientific hypotheses to explain astronomical observations

Audience: Undergraduate

2. Understand and apply--quantitatively--the scientific basis of astronomical concepts such as the Hubble law, the inverse square law, and Newtonian gravity.

Audience: Undergraduate

3. Understand--qualitatively--and be able to explain to a lay audience the scientific basis for the laws of stellar structure and evolution

Audience: Undergraduate

4. Critically evaluate qualitative scientific arguments using the scientific method

Audience: Undergraduate

5. Write basic scientific prose for a variety of lay audiences

Audience: Undergraduate

**ASTRON 104 – OUR EXPLORATION OF THE SOLAR SYSTEM**

3 credits.

Humanity is linked to the solar system in countless ways. Our view of the solar system, how planets form, and how planetary systems evolve has fundamentally changed with the discovery of countless exoplanets around other stars. Join us in exploring the modern view of the solar system and its relation to other planetary worlds. Includes the sky and celestial motions; ancient astronomy; the Copernican revolution; gravity, orbits, and interplanetary travel; formation of solar system; survey of sun, planets and moons; asteroids, meteors and comets; origin of life.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement. Not open to students with credit for ASTRON 200

**Course Designation:** Gen Ed - Quantitative Reasoning Part B  
Breadth - Physical Sci. Counts toward the Natural Sci req  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply quantitative reasoning to evaluate scientific hypotheses to explain astronomical observations

Audience: Undergraduate

2. Understand and apply--quantitatively--the scientific basis of astronomical concepts such as the inverse square law, Newtonian gravity, and Kepler's laws.

Audience: Undergraduate

3. Understand--qualitatively--and be able to explain to a lay audience the scientific basis for the laws of stellar structure and stellar and planetary accretion

Audience: Undergraduate

4. Critically evaluate qualitative scientific arguments using the scientific method

Audience: Undergraduate

5. Write basic scientific prose for a variety of lay audiences

Audience: Undergraduate

**ASTRON 140 – EARTH 2.0: THE EXOPLANET REVOLUTION**

3 credits.

Our Galaxy contains about 100 billion stars. Most of these stars have planets as diverse and as fascinating as the worlds in our own neighborhood, the solar system. Learn about the study of planets and exoplanets, probing some of the deepest questions science and philosophy grapple with. Explore the ways in which scientists search for and analyze planets orbiting distant stars, both in the classroom and in hands-on laboratory experiences. From moons to super-Jupiters, this course provides an engrossing introduction into the brand new science of exoplanet research.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed - Quantitative Reasoning Part B  
Breadth - Physical Sci. Counts toward the Natural Sci req  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Make scientific measurements, with an emphasis on the role of uncertainty.

Audience: Undergraduate

2. Develop a testable hypothesis, and display and manipulate data in a way that supports or rejects it.

Audience: Undergraduate

3. Apply Newtonian laws of gravity and motion and a quantum mechanics-based understanding of electromagnetic radiation to interpret the properties of stars and exoplanets.

Audience: Undergraduate

4. Apply radial-velocity and transit techniques to discover exoplanets within existing data.

Audience: Undergraduate

5. Use mathematics effectively to determine the masses, radii, densities, and equilibrium temperatures of exoplanets.

Audience: Undergraduate

6. Interpret the compositions of exoplanets in the context of a unified theory of protoplanetary disks and planet formation.

Audience: Undergraduate

7. Apply basic atmospheric and geophysical evolutionary processes to predict exoplanet environments, with an emphasis on the greenhouse effect.

Audience: Undergraduate

8. Integrate history, philosophy, sociology and art to explain the human significance of the exoplanet revolution.

Audience: Undergraduate

**ASTRON 150 – TOPICS IN ASTRONOMY**

2 credits.

Intensively study selected topics of modern astronomy. Examples include missions to the planets, formation of stars and planets, end states of stellar evolution (supernovae, white dwarfs, pulsars, black holes), origin and evolution of the universe.

**Requisites:** ASTRON 103 or ASTRON 104

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ASTRON/GEOSCI 160 – LIFE IN THE UNIVERSE**

2 credits.

An examination of the origin and evolution of life in the universe based on our knowledge of astronomy, biology, and geology. Includes discussions on the search for extraterrestrial life and the history of life in our solar system.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Show how scientific reasoning and the scientific method are used to determine Earth's place within the solar system and the cosmos.

Audience: Undergraduate

2. Connect our current observations of exoplanets with their potential roles in the origin of life elsewhere in the Universe.

Audience: Undergraduate

3. Describe the physical and chemical limits of life on Earth to chart the potential for life on Mars and other worlds.

Audience: Undergraduate

4. Apply the genetic code to interpret the origin and evolution of life on Earth.

Audience: Undergraduate

5. Summarize key geologic events on Earth and Mars; interpret relationships between planetary tectonics and habitability.

Audience: Undergraduate

6. Explain the range of evidence in the rock record for early life on Earth and critique the fidelity of this record.

Audience: Undergraduate

7. Illustrate how quantitative approaches are used to analyze problems in astronomy, biology, and geology.

Audience: Undergraduate

**ASTRON 170 – THE DARK SIDE OF THE UNIVERSE: THE GREAT COSMIC MYSTERIES FROM BLACK HOLES TO DARK ENERGY**

3 credits.

Some of the greatest mysteries of the cosmos reside in what astrophysicists call "the dark sector". This course explores the nature of black holes, dark matter, and dark energy, which show us nature at its most extreme, taking you from the warping of spacetime and the launching of plasma beams around black holes to the acceleration of the cosmos that indicates the presence of some yet unknown form of energy. Learn about the fundamental laws of nature that govern everything from GPS satellites that enable navigation apps on your cell phone to the birth and ultimate fate of the universe.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate hypotheses to explain astronomical observations

Audience: Undergraduate

2. Write basic scientific prose for a variety of lay audiences

Audience: Undergraduate

3. Understand and apply--qualitatively--the scientific basis of Newtonian Gravity and Relativity

Audience: Undergraduate

4. Understand and apply the basics of cold-dark matter big-bang cosmology

Audience: Undergraduate

5. Understand and articulate evidence for dark matter, dark energy, and black holes

Audience: Undergraduate

**ASTRON 199 – DIRECTED STUDY**

1-3 credits.

Introductory mentored independent study as arranged with faculty.

**Requisites:** Consent of instructor

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ASTRON 200 – THE PHYSICAL UNIVERSE**

3 credits.

Modern astrophysics involves applying physical principles to understand astronomical phenomena. Includes the solar system, stars, nebulae, galaxies, and cosmology, with emphasis on origins and evolution. Some nighttime observation with telescopes required.

**Requisites:** PHYSICS 201, 207, 247 or MATH 222

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply quantitative reasoning to evaluate scientific hypotheses to explain astronomical observations.

Audience: Undergraduate

2. Apply--quantitatively--the scientific basis of astronomical concepts such as the Hubble law, the inverse square law, and Newtonian gravity.

Audience: Undergraduate

3. Explain to a lay audience the scientific basis for the laws of stellar structure and evolution.

Audience: Undergraduate

4. Critically evaluate qualitative scientific arguments using the scientific method.

Audience: Undergraduate

5. Explain scientific discoveries for a variety of lay audiences.

Audience: Undergraduate

6. Identify and summarize the nature of the universe's major components.

Audience: Undergraduate

7. Apply important physical laws and concepts to follow the process by which astronomical discoveries are made

Audience: Undergraduate

**ASTRON/HIST SCI 206 – HISTORY OF ASTRONOMY AND COSMOLOGY**

3 credits.

The development of astronomical knowledge and cosmological views from the earliest times to the present, viewed in their social, philosophical, and technological contexts.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Discuss the history of modern astronomy, with an emphasis on tracing how our current conception of the universe has developed.

Audience: Undergraduate

2. Describe the ancient background to western European astronomy, the role of astronomy in the scientific revolution of the 16th and 17th centuries, the development of modern astrophysics, and Wisconsin's contributions to modern astronomy.

Audience: Undergraduate

3. Engage actively and critically with primary historical sources, including Galileo's *Siderius Nuncius*, through reading, writing, discussion, and examination of rare books.

Audience: Undergraduate

4. Evaluate historical subjects and works in their own contexts while also appreciating their significance for our own world view.

Audience: Undergraduate

5. Demonstrate some familiarity with astronomical instruments, observatories, and technologies through actual use, visits, and class demonstrations.

Audience: Undergraduate

**ASTRON 236 – THE HISTORY OF MATTER IN THE UNIVERSE**

3 credits.

Multidisciplinary study of how the distribution of elements in the Universe has changed over the last 10–15 billion years by tracing the history of matter from the Big Bang to the present composition of the Earth.

Emphasizes connections between astronomy, geology, and chemistry.

Readings will draw both on scientific journals and the popular press to allow us to engage the material on multiple levels.

**Requisites:** None

**Course Designation:** Gen Ed – Communication Part B

Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop hypotheses and gather evidence on how the composition of the universe came about and how it evolved over cosmic time.

Audience: Undergraduate

2. Describe the composition and structure of the planetary systems.

Audience: Undergraduate

3. Describe how science develops insight and knowledge.

Audience: Undergraduate

4. Perform scientific experiments by gathering data and analyzing them.

Audience: Undergraduate

5. Share evidence and conclusions by writing scientific prose.

Audience: Undergraduate

6. Make productive use of the writing process, including brainstorming, outlining, drafting, incorporating feedback, and revising, to develop a fledgling idea into a formal paper, presentation, and/or project;

Audience: Undergraduate

7. Make use of expressive conventions and protocols (e.g., organization, content, presentation, formatting) consistent with genres of communication relevant to the course subject or discipline.

Audience: Undergraduate

**ASTRON 310 – STELLAR ASTROPHYSICS**

3 credits.

Properties of normal and peculiar stars as found from an analysis of the radiation they emit; introduction to radiation transfer. Theory of stellar atmospheres, interiors, and evolution.

**Requisites:** MATH 222 and (PHYSICS 205, 241, or 249, or concurrent enrollment)

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the properties of stars and explain how these properties are deduced from the radiation that they emit.

Audience: Undergraduate

2. Define the basic principles of radiative transfer and apply these principles to interpreting the atmospheres of stars.

Audience: Undergraduate

3. Apply basic physical principles and mathematical techniques learned in prerequisite classes to understand the structure, evolution, and ultimate fates of stars.

Audience: Undergraduate

4. Demonstrate thinking like a scientist, applying heuristics such as dimensional analysis and order-of-magnitude estimation to obtain quick insights into unfamiliar systems.

Audience: Undergraduate

5. Communicate scientific concepts and results clearly, using a combination of writing and visual representations with bibliographic references as appropriate.

Audience: Undergraduate

6. Access, read, and critically evaluate existing scientific literature and information repositories relating to stellar astrophysics.

Audience: Undergraduate

**ASTRON 320 – THE INTERSTELLAR MEDIUM**

3 credits.

Properties of neutral and ionized interstellar gas, giant molecular clouds, the warm and hot intercloud medium, supernova remnants, and interstellar dust. Physical processes in low density gases including radiation transfer, excitation and ionization of interstellar atoms and molecules, and the interaction between gas and dust.

**Requisites:** MATH 222 and (PHYSICS 205, 241, or 249, or concurrent enrollment)

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe characteristics of various phases of the interstellar medium (ISM) and explain why these particular phases are stable.

Audience: Undergraduate

2. Explain key physical processes in each phase of ISM.

Audience: Undergraduate

3. For a given set of observations of spectral lines, derive basic physical properties, such as temperature, density, and the total column density of the species.

Audience: Undergraduate

4. Analyze the effects and roles of dust in the ISM.

Audience: Undergraduate

5. For a given set of initial physical conditions, compose equations to describe the environment, and apply these equations to predict the excitation and ionization conditions, molecular abundances, temperatures, and densities of the ISM environment.

Audience: Undergraduate

6. Explain current theories on how stars and planets form to family and friends.

Audience: Undergraduate

**ASTRON 330 – GALAXIES**

3 credits.

Distribution of stars, gas, and dust within our Milky Way, and their motions. Nearby galaxies: our Local Group. Optical, radio, and other techniques for observing galaxies. Composition and motions of other galaxies; galaxies with active nuclei; galaxy formation.

**Requisites:** ASTRON 310

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe current astrophysical theories and modern observations of galaxies.

Audience: Undergraduate

2. Apply physical principles and mathematical techniques to understand the natural laws governing galaxies.

Audience: Undergraduate

3. Use scientific computing methods to analyze and physically interpret galaxy data.

Audience: Undergraduate

4. Practice clear and concise written and oral scientific communication.

Audience: Undergraduate

5. Exhibit proper professional and ethical conduct while working in group settings.

Audience: Undergraduate

**ASTRON 335 – COSMOLOGY**

3 credits.

Introduction to the study of our Universe as a whole. Distribution of matter on the largest scales. Equations for cosmic expansion; making observations in an expanding curved spacetime. Nucleosynthesis and other tests of the Big Bang hypothesis. Gravitational collapse and the growth of structure.

**Requisites:** MATH 222 and (PHYSICS 205, 241, or 249, or concurrent enrollment)

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain modern cosmological concepts, including dark matter and dark energy, and present evidence supporting the standard Lambda-CDM cosmology.

Audience: Undergraduate

2. Describe the physical and mathematical assumptions in basic cosmological models.

Audience: Undergraduate

3. Use knowledge of these concepts to make testable, observable predictions about the Universe.

Audience: Undergraduate

**ASTRON 340 – SOLAR SYSTEM ASTROPHYSICS**

3 credits.

Properties of solar system objects, solar atmospheric phenomena, physics of planetary atmospheres, results of recent planetary missions, comets, origin of the solar system.

**Requisites:** MATH 222 and (PHYSICS 205, 241, or 249, or concurrent enrollment)

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a sense of wonder and curiosity about our solar system and planetary systems around other stars.

Audience: Undergraduate

2. Describe various methods of how we collect information to study these systems and our limitations and challenges in this process.

Audience: Undergraduate

3. Apply physics learned in their previous physics courses to explain and analyze properties and phenomena seen in our solar system and beyond.

Audience: Undergraduate

4. Apply knowledge of current and forthcoming NASA missions to explain their objectives, and the vital role they play in enhancing our knowledge of the solar system and extrasolar systems.

Audience: Undergraduate

**ASTRON 460 – EXPERIENCES IN ASTRONOMICAL OBSERVING**

1 credit.

A basic introduction into astronomical research by undertaking a small observing project with optical and/or radio telescopes. Topics covered are: understanding the astronomical literature, observing and data reduction, writing scientific reports and papers, presenting scientific results, and basics of scientific ethics.

**Requisites:** Declared in Astronomy-Physics

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Design simple astronomical observations with a 2.3-m small radio telescope, and process and analyze obtained observations.

Audience: Undergraduate

2. Use simple scientific computing methods to plan astronomical observations and analyze astronomical data.

Audience: Undergraduate

3. Practice principles and standards of professional and ethical conduct; judge when and how to cite references and when it is appropriate to credit the contributions of others or claim credit for one's own work.

Audience: Undergraduate

4. Present scientific results clearly and concisely in multiple formats.

Audience: Undergraduate

## ASTRON 465 – OBSERVATIONAL ASTRONOMY AND DATA ANALYSIS

3 credits.

A basic introduction into astronomical observations and data analysis techniques by undertaking observational projects with optical and radio telescopes. Topics covered include observation and data reduction, basic calibration of radio and optical telescopes, basics of data analysis and statistics, presenting scientific results, and basics of scientific ethics. Although specific to observational astrophysics, these methods are applicable to any of the physical sciences disciplines.

**Requisites:** PHYSICS 205, 241, or 249

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand how astronomical observations are obtained, processed and analyzed.

Audience: Undergraduate

2. Use simple scientific computing methods to plan astronomical observations and analyze astronomical data.

Audience: Undergraduate

3. Understand uncertainties in astronomical measurements to draw meaningful conclusions from the conducted experiments.

Audience: Undergraduate

4. Demonstrate the basics of oral and written scientific presentations.

Audience: Undergraduate

5. Practice principles and standards of professional and ethical conduct. Learn when and how to cite references and when it is appropriate to credit the contributions of others or claim credit for one's own work.

Audience: Undergraduate

## ASTRON 500 – TECHNIQUES OF MODERN OBSERVATIONAL ASTROPHYSICS

3 credits.

An introduction to astrophysics data collection. Students will be familiarized with the concepts, techniques, skills and resources needed to plan, obtain, reduce and interpret observations of astronomical objects.

**Requisites:** ASTRON 310, 320, 330, 335, 340, or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Perform conversions between instrumental units (e.g., pixels, ADU), astronomical units (e.g., arcseconds, magnitudes), and physical quantities (e.g., distance, luminosity).

Audience: Both Grad & Undergrad

2. Describe limiting cases for signal-to-noise in astronomical observing and how signal-to-noise limitations impact observation planning or instrument design.

Audience: Both Grad & Undergrad

3. Explain steps required for calibrating photometric and spectroscopic data. Describe how Earth's atmosphere impacts ground-based imaging and spectroscopy.

Audience: Both Grad & Undergrad

4. Identify fundamental components of telescopes, imagers, and spectrographs within a conceptual design or diagram. Compare variations in telescope or instrument design and tradeoffs between multiple dimensions of performance.

Audience: Both Grad & Undergrad

5. Compare technology for observing in different electromagnetic regimes (e.g., X-ray, UV, optical, infrared, radio), as well as observing challenges and limitations.

Audience: Both Grad & Undergrad

6. Predict an astronomical instrument's performance using instrument specifications, and characterize the instrument's actual performance using empirical data.

Audience: Graduate

7. Compose technical pieces of an observing proposal: identify an appropriate facility and instrument, and develop an observing plan to achieve science requirements.

Audience: Graduate

**ASTRON 540 – EXOPLANETS**

3 credits.

Over the past several decades, astronomers have discovered thousands of planets orbiting stars other than the Sun. Learn about the various methods (transits, radial velocities, microlensing, and direct imaging) used to detect these exoplanets, the inherent challenges and limitations of current methodologies (data quality, processing, and bias), and theories related to exoplanet formation, atmospheres, and habitability.

**Requisites:** (ASTRON 310 or concurrent enrollment), (ASTRON 320 or concurrent enrollment), or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe how exoplanets are discovered and the limitations of current discovery methods.

Audience: Both Grad & Undergrad

2. Summarize the current theories of planet formation and observations of protoplanetary disks.

Audience: Both Grad & Undergrad

3. Explain observations of exoplanet atmospheres and habitability theories.

Audience: Both Grad & Undergrad

4. Use mathematical reasoning to derive planet properties from astronomical data.

Audience: Both Grad & Undergrad

5. Demonstrate how astronomical data is proposed for, obtained, reduced, and analyzed.

Audience: Both Grad & Undergrad

6. Effectively communicate scientific results in a written format.

Audience: Both Grad & Undergrad

7. Create a "full-fledged and potentially competitive" telescope proposal

Audience: Graduate

**ASTRON/E M A 550 – ASTRODYNAMICS**

3 credits.

Coordinate system transformations, central force motion, two body problem, three and n-body problem, theory of orbital perturbations, artificial satellites, elementary transfer orbits, and elementary rocket dynamics.

**Requisites:** (E M A 202, M E 240, or PHYSICS 311, or concurrent enrollment), or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASTRON 620 – SEMINAR IN ASTROPHYSICAL TOPICS**

1-3 credits.

Current problems; topic changes.

**Requisites:** ASTRON 310, 320, 330, 335, 340, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ASTRON 681 – SENIOR HONORS THESIS**

3 credits.

Individual study for seniors completing theses for honors in the major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASTRON 682 – SENIOR HONORS THESIS**

3 credits.

Individual study for seniors completing theses for honors in the major as arranged with a faculty member; continuation of ASTRON 681.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASTRON 691 – SENIOR THESIS**

2-3 credits.

Individual study for seniors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASTRON 692 – SENIOR THESIS**

2-3 credits.

Individual study for seniors completing theses as arranged with a faculty member; continuation of ASTRON 691.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASTRON 699 – DIRECTED STUDY**

1-6 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ASTRON 700 – BASIC ASTROPHYSICS I**

2 credits.

Thermodynamics, atomic and molecular spectra, ionization and excitation, line and continuum opacities. Synchrotron radiation, Compton scattering, X-ray spectra. Radiative transfer, simple model atmospheres, radiative and convective energy transport.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ASTRON 702 – BASIC ASTROPHYSICS II**

2 credits.

Basic particle and fluid dynamics of stellar and gaseous systems in astrophysics. Review of gravitational dynamics, 2-body relaxation, phase space, basic equations of fluid dynamics, waves, shocks, winds accretion, instabilities.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASTRON 715 – STELLAR INTERIORS AND EVOLUTION**

2 credits.

Physical principles, equilibrium of gaseous spheres, energy transport, energy generation, nucleosynthesis, main sequence red giant and electron degenerate stars. Advanced topics such as origins of stellar variability, binary star evolution, star formation, supernovae explosions, evolution with mass loss.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASTRON 720 – THE INTERSTELLAR MEDIUM I: BASIC PROCESSES**

2 credits.

Observational techniques for interstellar medium studies, overview of the role of interstellar gas in galaxies, dynamics, energetics, major theories of structure and evolution, introduction to star formations and supernova remnant evolution.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ASTRON 730 – GALAXIES**

2 credits.

Stellar content and dynamics of the Milky Way and other galaxies; galaxy types, evolution of normal galaxies, active nuclei, quasars, radio galaxies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ASTRON 735 – OBSERVATIONAL COSMOLOGY**

2 credits.

Extragalactic distance scale; groups and clusters of galaxies; distribution of galaxies and radio sources. Introduction to general relativity, cosmological models, microwave background, early universe, galaxy formation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ASTRON/PHYSICS 910 – SEMINAR IN ASTROPHYSICS**

0-1 credits.

Current topics in astrophysics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ASTRON 920 – SEMINAR-ASTROPHYSICAL TOPICS**

1-3 credits.

Current problems; topic changes.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ASTRON 990 – RESEARCH AND THESIS**

1-12 credits.

Advanced level mentored reading and research for graduate students.

**Requisites:** Declared in Astronomy PhD**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ASTRON 999 – ADVANCED INDEPENDENT READING**

1-2 credits.

Advanced level mentored reading and research for graduate students.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2022

# ATMOSPHERIC AND OCEANIC SCIENCES (ATM OCN)

**ATM OCN 100 – WEATHER AND CLIMATE**

3 credits.

Nature and variability of wind, temperature, clouds and precipitation. Storm systems, fronts, thunderstorms, tornadoes and their prediction. Air composition and pollution. Global winds, seasonal changes, climate and climatic change.

**Requisites:** Not open to students with credit for ATM OCN 101**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ATM OCN 101 – WEATHER AND CLIMATE**

4 credits.

Nature and variability of wind, temperature, clouds and precipitation. Storm systems, fronts, thunderstorms, tornadoes and their prediction. Air composition and pollution. Global winds, seasonal changes, climate and climatic change. Includes map analyses and basic quantitative lab exercises.

**Requisites:** Not open to students with credit for ATM OCN 100**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ATM OCN/ENVIR ST/GEOSCI 102 – CLIMATE AND CLIMATE CHANGE**

3 credits.

Describes the basic climate principles governing the climate system. It describes the climate and climate variability at present, climate evolution in the past, and the projected climate change into the future. The scientific principles underlying the natural and anthropogenic greenhouse effect and climate model forecasts are elucidated.

**Requisites:** None**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ATM OCN/GEOSCI 105 – SURVEY OF OCEANOGRAPHY**

3-4 credits.

Nature and behavior of ocean water, interaction of oceans and atmosphere, structure of the ocean floor, life in the oceans, our relationship to the marine environment.

**Requisites:** None**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

### ATM OCN/SOIL SCI 132 – EARTH'S WATER: NATURAL SCIENCE AND HUMAN USE

3 credits.

Water is central to the functioning of planet Earth. As humans increase their impact on Earth's systems and cohabitants, our understanding of the multiple roles of water becomes critical to finding sustainable strategies for human and ecosystem health. Explores the science of Earth's hydrosphere, with constant attention to human uses and impacts.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and summarize the connections amongst stocks and flows in the hydrosphere.

Audience: Undergraduate

2. Analyze chemical, physical and biological indicators of water quality and their influence in human health.

Audience: Undergraduate

3. Identify human impacts on water quality and quantity in local, regional and global perspectives, and in a changing global climate.

Audience: Undergraduate

4. Illustrate and summarize the dependence of the global food supply on water.

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of clean water and sanitation, contrasting issues in developed and developing countries.

Audience: Undergraduate

6. Apply sustainability principles to addressing the challenge of competing water uses in the US, particularly among water use for Food Production, Hygiene and Sanitation, Recreation and Environmental Flows.

Audience: Undergraduate

### ATM OCN/GEOSCI 140 – NATURAL HAZARDS AND DISASTERS

3 credits.

An exploration of the science behind natural disasters including earthquakes, tsunamis, volcanic eruptions, landslides, tornadoes, hurricanes, and floods. Why, where, and when do these events occur, and why are some predictable but others are not? Addresses hazard assessment, forecasting, and mitigation to lessen their impact on society.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### ATM OCN 141 – NATURAL HAZARDS OF WEATHER

2 credits.

Explores the basic science of weather hazards ongoing around the globe and practical issues of Prediction, Risk Reduction, Resilience and Vulnerability (PRRRV) associated with these hazards.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### ATM OCN/ENVIR ST 171 – GLOBAL CHANGE: ATMOSPHERIC ISSUES AND PROBLEMS

2-3 credits.

Atmospheric problems of global significance. Greenhouse warming, ozone layer, acid rain, climate change. Study based on elementary principles of atmospheric science. Systems approach applied to changing atmospheric composition. Interactions among geochemical cycles, anthropogenic inputs and other parts of the environment.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ATM OCN 201 – EXPLORATIONS OF ATMOSPHERIC AND OCEANIC SCIENCES

2-3 credits.

Exploration of a field within atmospheric and oceanic sciences. Exposure to scientific principles, current findings, and career routes as it applies to topics such as meteorology, weather systems and weather forecasting, climate and climate change, atmospheric satellite remote sensing, oceanography, and professional careers in the discipline.

**Requisites:** ATM OCN 100, 101, 141, ATM OCN/GEOSCI 105, 140, SOIL SCI/ATM OCN 132, ATM OCN/ENVIR ST 171, or ATM OCN/ENVIR ST/GEOSCI 102

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the basic scientific principles behind the concepts being explored and skills needed to further explore the topic

Audience: Undergraduate

2. Interpret how scientific articles, media stories, and reports advance our understanding of the topic

Audience: Undergraduate

3. Conduct and evaluate interviews of practitioners in the topic on their roles and professional development to understand future careers in this topic

Audience: Undergraduate

**ATM OCN 310 – DYNAMICS OF THE ATMOSPHERE AND OCEAN I**  
3 credits.

Introduction to theory of fluid motions for atmosphere and ocean. Elementary kinematics, fundamental forces, effects of earth's gravity and rotation, concepts and applications of hydrostatic and geostrophic balance.

**Requisites:** (PHYSICS 202, 208, or 248 or concurrent enrollment in PHYSICS 202, 208, or 248) and MATH 234 or concurrent enrollment in MATH 234

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN 311 – DYNAMICS OF THE ATMOSPHERE AND OCEAN II**  
3 credits.

Intermediate theory of fluid motions for atmosphere and ocean. Emphasis on large scale applications and basic theory for geophysical wave types. Thermal wind shear, frictional flow, vorticity concepts, Rossby waves, Sverdrup ocean flow.

**Requisites:** ATM OCN 310

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ATM OCN/ENVIR ST/GEOG 322 – POLAR REGIONS AND THEIR IMPORTANCE IN THE GLOBAL ENVIRONMENT**  
3 credits.

Reviews the past, present, and future of the Arctic and Antarctic regions. Covers the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and future state of the Arctic and Antarctica as projected by earth system models. Also explores the role of the polar regions in the earth's system and associated global climatic feedbacks.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and the future state of the Arctic and Antarctic Regions.

Audience: Both Grad & Undergrad

2. Explain the major theories and concepts of the Arctic and Antarctic regions.

Audience: Both Grad & Undergrad

3. Identify how interactions occur between the major components of each polar region and their influence on global processes and climate.

Audience: Both Grad & Undergrad

4. Recognize the need for multi-disciplinary research to further our understanding of the polar regions and their role in the global system.

Audience: Both Grad & Undergrad

5. Integrate thesis or dissertation research directly or indirectly with polar processes research, thereby gaining better insight into Arctic and Antarctic regions.

Audience: Graduate

**ATM OCN 330 – PHYSICS OF THE ATMOSPHERE AND OCEAN I**  
3 credits.

Physical variables, laws, characteristics and direct measurements for atmosphere and ocean. Thermodynamics and moist atmospheric processes. Basic physics of clouds, precipitation, and chemical constituents.

**Requisites:** (PHYSICS 202, 208, or 248 or concurrent enrollment in PHYSICS 202, 208, or 248) and MATH 234 or concurrent enrollment in MATH 234

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN/ENVIR ST/GEOG 332 – GLOBAL WARMING: SCIENCE AND IMPACTS**

3 credits.

Offers a fundamental understanding of how and why global warming is happening and what to expect in the future. Investigate and discuss the evidence for change, the science that explains these observations, predicted impacts on humans and ecosystems, and the societal debate over proposed solutions.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN/ENVIR ST/GEOG/GEOSCI 335 – CLIMATIC ENVIRONMENTS OF THE PAST**

3 credits.

Climate change at timescales from the last several million years to the last 100 years, with emphasis on more recent timescales. Examines how climate variability arises from interplay between external forcings, feedbacks within the earth system, and (more recently) human activity.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the major climatic events and trends during the Quaternary, spanning timescales from the last 50,000,000 years to the last 100 years.

Audience: Undergraduate

2. Identify the physical processes controlling the behavior of the earth system and its components (atmosphere, oceans, cryosphere, biosphere, etc.).

Audience: Undergraduate

3. Discuss how climatic variability results from a combination of external forcings and internal dynamics within the earth system.

Audience: Undergraduate

4. Recognize how paleoclimatologists collect, date, and analyze a staggering variety of paleoclimatic records, including ocean and lake sediment cores, ice cores, tree rings, corals, and speleothems.

Audience: Undergraduate

5. Analyze and critically evaluate climate experiments that are simulated by earth system models.

Audience: Undergraduate

6. Think and write critically, with particular attention to critically reading the scientific literature and critically employing the climate proxies and models used by paleoclimatologists.

Audience: Undergraduate

**ATM OCN 340 – PHYSICS OF THE ATMOSPHERE AND OCEAN II**

3 credits.

Radiation, energy budget, and cloud physics. Scattering, absorption, emission and diabatic heating by shortwave and longwave processes. Introduction to cloud physics including cloud nucleation processes, particle growth, precipitation development, and convective cloud processes.

**Requisites:** ATM OCN 330

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ATM OCN/ENVIR ST 355 – INTRODUCTION TO AIR QUALITY**

3 credits.

Links chemistry and meteorology to engineering, law, policy, and public health. Presents key ideas in air quality, with focus on reactive pollutants in the outdoor environment, especially gas and particle phase chemicals that react with human tissue to cause sickness and death. Discusses environmental impacts of these pollutants and regulatory approaches for their control in the U.S. and around the world. Indoor air quality will be included. Non-reactive pollutants, especially carbon dioxide, will be compared and contrasted with reactive air pollutants.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Build basic understanding of atmospheric pollutants affecting health, visibility, ecosystems, climate, and the ozone hold.

Audience: Undergraduate

2. Develop skills in analyzing air pollution data and related information, with a focus on evaluating and presenting original research on an air pollution episode of choice.

Audience: Undergraduate

3. Consider a single issue – air quality – from multiple disciplinary perspectives, including atmospheric science, engineering, policy, economics, and chemistry.

Audience: Undergraduate

**ATM OCN 401 – TOPICS IN METEOROLOGY**

2-3 credits.

Special topics to be given as the need and opportunity arise.

**Requisites:** ATM OCN 310 and 330

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ATM OCN 404 – METEOROLOGICAL MEASUREMENTS**

3 credits.

Practical experience in planning experiment implementation, performing instrument quality control, conducting computational data analysis, and writing and presenting of meteorological and climatological observations in a team setting.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Characterize principles of measurement, calibration, and uncertainty estimation of in situ meteorological instrumentation, including technologies for data acquisition.

Audience: Both Grad & Undergrad

2. Develop testable hypotheses of atmospheric phenomena and deploy instrumentation in lab or field settings to acquire observations for testing hypotheses.

Audience: Both Grad & Undergrad

3. Analyze and interpret collected observations and describe in oral and written form how observations help advance understanding of theories of atmospheric and oceanic sciences.

Audience: Both Grad & Undergrad

4. Share skills and techniques in project management, advanced data analysis, interpretation, and graphing with classmates.

Audience: Graduate

**ATM OCN 405 – AOS SENIOR CAPSTONE SEMINAR**

1 credit.

Provides synthesis and overview. Research on topic of the student's choosing is presented at the end.

**Requisites:** ATM OCN 310, 311, 330 and 340

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ATM OCN 425 – GLOBAL CLIMATE PROCESSES**

3 credits.

Overview of physical processes of the atmosphere and its coupling to the ocean and land. Understanding its seasonal climatology and variability. Synthesis through application of junior AOS core dynamics and physics to quantitatively understand diabatic, transport, and dissipative processes. Examples include global warming, air-ocean coupling, ENSO, ozone hole, tropospheric water and chemistry issues, diurnal to interannual time scales.

**Requisites:** ATM OCN 311 and 340**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ATM OCN 441 – RADAR AND SATELLITE METEOROLOGY**

3 credits.

Provides necessary knowledge about radar and satellite meteorology.

**Requisites:** ATM OCN 340**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ATM OCN 452 – SYNOPTIC LABORATORY I: THE FRONTAL CYCLONE**

4 credits.

Cyclone and frontal theory; case studies illustrating the structure and evolution of the frontal cyclone; diagnostic techniques: interpretation of satellite photographs, preparation of vertical cross sections and isentropic analysis.

**Requisites:** ATM OCN 311 and 340**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ATM OCN 453 – SYNOPTIC LABORATORY II: MESOSCALE METEOROLOGY**

4 credits.

Local wind systems, thunderstorms, mesoscale convection systems, interactions with synoptic scale weather. Analysis, prediction, nowcasting and observation of mesoscale weather, including interpretation of satellite and radar information.

**Requisites:** ATM OCN 311 and 340**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ATM OCN 460 – FUNDAMENTALS OF PHYSICAL OCEANOGRAPHY**

3 credits.

Introduction to the physics and thermodynamics of the ocean. Learn about the the physical characteristics and properties of the ocean and its circulation. Covers the basic equations of motion including the mathematics of Ekman transport, Sverdrup balance, thermal wind balance, ocean heat, salinity, and momentum conservation and budgets, waves, and tides.

**Requisites:** ATM OCN 311 and (MATH 319, 320, or 376), or graduate/professional standing**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe the general physical characteristics and properties of the ocean and the relationships between them via the thermodynamic equation of state of seawater

Audience: Undergraduate

2. Write down the general equations that govern movement in the ocean including gyre circulations, the meridional overturning circulation, waves, and tides

Audience: Undergraduate

3. Understand how the ocean's physical characteristics, properties, and spatial structure arise from thermodynamics and the general equations of motion

Audience: Undergraduate

4. Describe the ocean's role in Earth's climate and apply concepts in the course to novel situations or further research

Audience: Undergraduate

**ATM OCN/ENVIR ST 520 – BIOCLIMATOLOGY**

3 credits.

How climate systems and biological organisms operate and interact at the global scale and the implications of this for climate change, ecosystem ecology and human land use.

**Requisites:** (ATM OCN 101, ENVIR ST/ATM OCN 171, or GEOG 323), (ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 102, BIOCORE 381, or 485), and junior standing, or graduate/professional standing**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**ATM OCN 522 – TROPICAL METEOROLOGY**

3 credits.

Characteristics of the tropical atmosphere; local and diurnal phenomena; tropical synoptic systems; circulation and energetics; mechanisms of tropical climate variations.

**Requisites:** ATM OCN 311 and 340, or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN/PLANTSCI 532 – ENVIRONMENTAL BIOPHYSICS**

3 credits.

Plant-environment interactions with particular reference to energy exchanges and water relations. Models are used to provide a quantitative synthesis of information from plant physiology, soil physics, and micrometeorology with some consideration of plant-pest interactions.

**Requisites:** (BIOLOGY/BOTANY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381) and (MATH 211, 217, or 221) and (PHYSICS 103, 201, 207, or 247), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply numerical models that describe radiation fluxes in natural environments and account for latitude and longitude, time of day and year, sun angle, direct and diffuse solar radiation, and radiative properties of natural surfaces

Audience: Both Grad & Undergrad

2. Apply numerical models that describe how soil and air temperatures vary across a continuum of temporal scales (from hourly to annual) and are impacted by varied physical environments

Audience: Both Grad & Undergrad

3. Calculate growing degree-days using different numerical models and demonstrate knowledge about phenological development of plants and insects

Audience: Both Grad & Undergrad

4. Apply numerical models that represent wind speed within and above vegetative canopies and account for atmospheric turbulence

Audience: Both Grad & Undergrad

5. Calculate heat and mass (water, carbon dioxide) transport between organisms, soils, plant canopies, and the atmosphere using numerical models that represent conductance, diffusion, convective transport of heat, infiltration of water and drainage in soil, evaporation, and transpiration

Audience: Both Grad & Undergrad

6. Apply numerical modeling to calculate transmission and interception of direct, diffuse, and scattered solar radiation in plant canopies

Audience: Both Grad & Undergrad

7. Demonstrate knowledge about different numerical approaches to calculate evapotranspiration and photosynthesis of plants from the leaf to canopy level

Audience: Both Grad & Undergrad

8. Demonstrate basic knowledge about environmental biophysics through application of numerical equations and/or a model to a scientific question developed in close collaboration with the course instructor

Audience: Undergraduate

9. Demonstrate advanced knowledge about environmental biophysics through the independent development of a research project that produces new information

Audience: Graduate

**ATM OCN 573 – RESEARCH COMPUTING IN ATMOSPHERIC AND OCEANIC SCIENCES**

3 credits.

Hands-on introduction to open-source research computing tools commonly used in the atmospheric and oceanic sciences. Covers Python basics, including standard data structures, environments, and packages that are useful for analyzing and visualizing a variety of observational and computational atmospheric and oceanic science datasets. Additional open-source tools for version control, sharing code, and collaborating on analysis are also introduced and open science best practice are discussed.

**Requisites:** (MATH 234 and COMP SCI 220) or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Become familiar with computing tools that are useful in managing, analyzing, and visualizing atmospheric and oceanic science data, including Unix, git, and Python

Audience: Both Grad & Undergrad

2. Understand multiple Python packages that are critical for atmospheric and oceanic science data analysis and use these packages to analyze and visualize atmospheric and oceanic science datasets

Audience: Both Grad & Undergrad

3. Develop proficiency in the use of version control and other elements of open science best practices

Audience: Both Grad & Undergrad

4. Implement a reproducible data analysis workflow that incorporates Python computing tools and version control and apply it to an unfamiliar dataset or new research topic

Audience: Graduate

**ATM OCN 575 – CLIMATOLOGICAL ANALYSIS**

3-4 credits.

Mathematical and statistical tools applicable to the investigation of climatological problems; nature and treatment of climatological data.

**Requisites:** ATM OCN 311 and 340, or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate hypotheses about physical processes that can be tested by applying statistical analyses to existing data

Audience: Graduate

2. Identify appropriate statistical analyses that can be used to addressing specific problems in climatological analysis

Audience: Graduate

3. Carry out statistical analysis of digitized data, including parsing through and analyzing large (~100's of megabytes) data sets

Audience: Graduate

4. Critically evaluate the results of statistical analyses including identifying alternate interpretations of the results, other techniques that could be applied to investigate results, and sources of independent data that could be used to corroborate results

Audience: Graduate

5. Understand and critically evaluate the application of statistical analyses in existing literature

Audience: Graduate

6. Test hypotheses about physical processes by applying statistical analyses to existing data

Audience: Undergraduate

7. Identify and apply appropriate statistical analyses to address specific problems in climatological analysis

Audience: Undergraduate

8. Carry out statistical analysis of digitized data, including parsing through and analyzing large (~100's of megabytes) data sets

Audience: Undergraduate

9. Evaluate the results of statistical analyses of specific problems, including relating results to other statistical techniques or to alternate data sets

Audience: Undergraduate

10. Recognize and understand the application of statistical analyses in existing literature

Audience: Undergraduate

**ATM OCN 610 – GEOPHYSICAL FLUID DYNAMICS I**

3 credits.

Basic dynamic concepts: equations of motion, basic approximations, Coriolis force, wave motions, normal modes, gravity waves, frictional turbulence and convective processes, geostrophic adjustment, scaling argument, effects of rotation on wave motions. Vorticity and potential vorticity.

**Requisites:** (PHYSICS 202, 208, or 248) and MATH 234, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN 611 – GEOPHYSICAL FLUID DYNAMICS II**

3 credits.

Quasi-geostrophic motion, potential vorticity equations, E-P fluxes, Rossby waves, boundary layer processes, wind-driven ocean circulation and western boundary currents, barotropic and baroclinic instability, tropical flows.

**Requisites:** ATM OCN 610 or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ATM OCN 630 – INTRODUCTION TO ATMOSPHERIC AND OCEANIC PHYSICS**

3 credits.

Covers thermodynamics theory of multiphase systems, thermodynamic analysis of atmosphere, microphysical processes in the atmosphere, atmospheric and oceanic chemical processes, conduction of heat and moisture into the atmosphere from ocean and land surface.

**Requisites:** (PHYSICS 202, 208, or 248) and MATH 234, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN 637 – CLOUD PHYSICS**

3-4 credits.

Processes of cloud formation, growth, and dissipation from the standpoint of both the cloud particles and the whole cloud as a dynamic entity.

**Requisites:** ATM OCN 311 and 340, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ATM OCN 640 – RADIATION IN THE ATMOSPHERE AND OCEAN**

3 credits.

Introduction to radiation: basic laws, radiative transfer under clear sky conditions, scattering by individual particles, multiple scattering, radiative properties of clouds and aerosols, energy budget, miscellaneous applications.

**Requisites:** (PHYSICS 202, 208, or 248) and MATH 234, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ATM OCN 660 – INTRODUCTION TO PHYSICAL OCEANOGRAPHY**

3 credits.

Physical properties of sea water: ocean climatology, water, salt and heat budget, measurements, ocean circulation and water mass of the world ocean, thermocline, thermohaline, equatorial ocean and southern ocean.

**Requisites:** ATM OCN 311 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN 681 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ATM OCN 691 – SENIOR THESIS**

2-3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN 692 – SENIOR THESIS**

2-3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ATM OCN 698 – DIRECTED STUDY**

1-5 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ATM OCN 699 – DIRECTED STUDY**

1-5 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ATM OCN/CIV ENGR 701 – THE CHEMISTRY OF AIR POLLUTION**

2 credits.

Covers background and modern research methods for the application of chemical analysis tools to understanding of the origin, composition, and the chemical transformations of pollutants that occur in the atmosphere. Emphasis will be directed at the pollutants impacting human health, climate change, and ecosystem degradation. Approximately half of the course materials will be taken from the scientific literature and will provide the opportunity to advance skills in the critical reading of journal articles. The course is directed at graduate students conducting research and interested in air pollution and environmental chemistry. Gain experiences in presenting scientific research methods and results related to course materials.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN 705 – THE MIDDLE ATMOSPHERE**

3 credits.

Dynamics, chemistry and radiation of the stratosphere and mesosphere. Structure and composition. Observing techniques. Gravity, Rossby, and Kelvin waves. Wave-mean flow interaction. Instabilities. Tracer transport. Modeling the middle atmosphere. Ozone layer. Greenhouse effect.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

**ATM OCN 712 – GENERAL CIRCULATION OF THE ATMOSPHERE**

3 credits.

The theory of the general circulation with emphasis on the sources, sinks, and transport of mass, angular momentum, and energy that serve to maintain the circumpolar vortex.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ATM OCN 718 – DYNAMICS OF MOIST CONVECTIVE SYSTEMS**

3 credits.

Governing equations for non-hydrostatic dynamics, mixed phase thermodynamics and microphysics. Cumulus parameterization and scale interactions. Application to theoretical and numerical models of thunderstorms (and attendant weather phenomena) and Mesoscale Convective Systems in the extra tropics and tropics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**ATM OCN/ENVIR ST 745 – METEOROLOGICAL SATELLITE APPLICATIONS**

2-3 credits.

Use of satellite imagery and measurements in meteorological research and operations; orbital characteristics; navigation; instrumentation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ATM OCN/ENVIR ST/GEOSCI/ZOOLOGY 750 – PROBLEMS IN OCEANOGRAPHY**

3 credits.

Introduction to techniques used in the study of the biology, chemistry, geology, and physics of the marine environment.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ATM OCN 751 – THE FRONTAL CYCLONE**

3 credits.

Application of fundamental dynamics and thermodynamics to cyclone and frontal theory; case studies illustrating the structure and evolution of the frontal cyclone; diagnostic consideration of vertical motions, frontogenesis and potential inversion; computational analysis of fundamental diagnostic equations, analysis of vertical cross sections.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand how thermodynamics and dynamics of the atmosphere are brought to bear on the broad problem of the mid-latitude cyclone.

Audience: Graduate

2. Acquire an understanding of the diagnosis of synoptic-scale vertical motions, frontal circulations, the process of cyclogenesis, and the potential vorticity perspective on cyclone life cycles.

Audience: Graduate

3. Communicate diagnosis of the current weather and forecasts of future weather to both scientific and broad audiences.

Audience: Graduate

4. Develop computer code to solve diagnostic second order differential equations that appear in modern cyclone and frontal theory.

Audience: Graduate

**ATM OCN 753 – MESOSCALE METEOROLOGY**

3 credits.

Synthesizes the fundamentals of atmospheric dynamics, thermodynamics and microphysics to explain the theory behind the structure, evolution and prediction of microscale, mesoscale and cloud scale weather. Learn the dynamics, and thermodynamics of mesoscale, fogs, cumulus, and severe storms (including tornadoes), mountain meteorology and convective tropical weather systems (including hurricanes and typhoons) and application of multi-scale numerical methods and models for analysis and prediction.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Synthesize fundamentals of atmospheric dynamics and thermodynamics to develop a state-of-the-art understanding of the theory behind how weather systems are formed, maintained, and evolve.

Audience: Graduate

2. Apply adjustment theory to understanding of multiscale weather structures.

Audience: Graduate

3. Analyze raw data and numerical prediction products directly available in real time or archived on the Internet to predict mesoscale and cloud scale weather.

Audience: Graduate

4. Apply unconventional state-of the art observation tools, including ground- based, surface-based and mobile Radar, Lidar, aircraft, and satellite observational systems to diagnose and predict weather systems.

Audience: Graduate

5. Identify clues regarding the substructure of weather, that conventional observations have neither the temporal or special resolution to resolve.

Audience: Graduate

6. Recognize how data assimilation methods help build the unresolved structures into an analysis through marriage of numerical models, conventional and unconventional data.

Audience: Graduate

7. Communicate diagnosis of current weather and forecasts of future weather to both scientific and broad audiences.

Audience: Graduate

**ATM OCN 760 – LARGE-SCALE OCEAN-ATMOSPHERE COUPLING**

3 credits.

Various aspects of global ocean-atmosphere coupling and climate variability; global surface flux distribution; mixed layer dynamics; tropical dynamics and El Nino and Southern Oscillation; extratropical ocean-atmosphere coupling; interannual to interdecadal climate variability.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**ATM OCN/GEOSCI 762 – ICE AND CLIMATE DYNAMICS**

3 credits.

Introduction to the role of ice in the climate system. Review main components of the cryosphere (Arctic and Antarctic sea ice, Greenland and Antarctic ice sheets, mountain glaciers, snow cover, and permafrost), with particular focus on recent and future changes as documented in recent publications. Consider different methods to study the cryosphere and its role in the climate system, such as remote sensing and in situ observations, state estimates and reanalyses, with a particular focus on idealized and comprehensive global climate models. Covers fundamental physical concepts as well as unresolved research questions such as the debates surrounding potential instabilities in the climate system and uncertainties in future projections of ice loss, teleconnections, and sea level rise.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Differentiate between the main components of Earth's cryosphere and their respective roles in the climate system.

Audience: Graduate

2. Compare the range of methodologies used to study Earth's cryosphere, including in situ and remote sensing observations, theoretical considerations, and numerical models.

Audience: Graduate

3. Develop idealized models of sea ice, land ice, and snow and their interactions with the climate system.

Audience: Graduate

4. Carry out analysis of output from idealized and comprehensive ice and climate models.

Audience: Graduate

**ATM OCN 773 – BOUNDARY LAYER METEOROLOGY**

3 credits.

Observations of and theories for boundary layers, turbulence, spectra, plumes, dust devils, convection, terrain effects, and other phenomena in the lowest 2 km of the atmosphere.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**ATM OCN 801 – TOPICS IN THEORETICAL METEOROLOGY**

2-3 credits.

Advanced level subjects in dynamics, synoptics, climate-dynamics and atmospheric physics including recent advances.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ATM OCN 810 – PRACTICAL TRAINING IN ATMOSPHERIC AND OCEANIC SCIENCES I**

1 credit.

Practical training in atmospheric and oceanic sciences. Provides direct, hands-on exposure to careers in the discipline. Includes placement into student-designed or existing internship in atmospheric and oceanic science related companies, agencies, and organizations.

**Requisites:** Declared in Atmospheric and Oceanic Sciences MS**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Apply knowledge in the classroom to real-world atmospheric science programs

Audience: Graduate

2. Acquire direct hands-on experience in atmospheric science careers

Audience: Graduate

3. Develop portfolio materials necessary for the consulting meteorologist exam

Audience: Graduate

4. Work collaboratively in professional group and team settings

Audience: Graduate

**ATM OCN 811 – PRACTICAL TRAINING IN ATMOSPHERIC AND OCEANIC SCIENCES II**

2 credits.

Practical training in atmospheric and oceanic sciences. Provides direct hands-on exposure to careers in the discipline. Continues the internship in atmospheric and oceanic science related companies, agencies, and organizations. Develop a portfolio of items necessary for the American Meteorological Society Certified Consulting Meteorology exam.

**Requisites:** ATM OCN 810**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Apply knowledge in the classroom to real-world atmospheric science programs

Audience: Graduate

2. Acquire direct hands-on experience in atmospheric science careers

Audience: Graduate

3. Develop portfolio materials necessary for the consulting meteorologist exam

Audience: Graduate

4. Work collaboratively in professional group and team settings

Audience: Graduate

**ATM OCN 900 – SEMINAR-METEOROLOGY**

1-2 credits.

Discussion of the philosophy of science, communication, and history of atmospheric and oceanic science topics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**ATM OCN 901 – FOUNDATIONS OF ATMOSPHERIC AND OCEANIC SCIENCES RESEARCH**

1 credit.

Discussions on adapting to graduate school and graduate-level research, history and future of discipline, research ethics, issues of diversity and inclusion.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Recognize and describe the evolution of fundamental principles and processes that make up atmospheric and oceanic sciences

Audience: Graduate

2. Demonstrate capability in graduate-level learning and research through practice of skills in research ethics, literature review, and scientific collaboration

Audience: Graduate

3. Investigate how discrimination and bias have influenced the history of atmospheric and oceanic sciences and what efforts have occurred to redress harm through diversity and inclusion efforts

Audience: Graduate

**ATM OCN 902 – SCIENTIFIC COMMUNICATIONS IN THE ATMOSPHERIC AND OCEANIC SCIENCES**

1 credit.

Written and oral communication about topics related to graduate research.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify the purpose and structure of various genres of scientific writing and oral presentation in the atmospheric and oceanic sciences

Audience: Graduate

2. Describe and apply elements of effective science communication

Audience: Graduate

3. Evaluate and provide constructive feedback of written work through application of peer review practices

Audience: Graduate

4. Prepare written and presentation material that meets criteria for department advancement process and thesis requirements

Audience: Graduate

**ATM OCN 903 – RESEARCH ADVANCES IN THE ATMOSPHERIC AND OCEANIC SCIENCES**

1 credit.

Discussions on philosophy of science, literature review, development of ideas in Atmospheric and Oceanic Sciences, training in proposal writing, and preparation for Ph.D. dissertation proposal in advance of preliminary exam.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Appraise original papers of on atmospheric and oceanic sciences research to understand the evolution of approaches to solve problems

Audience: Graduate

2. Articulate unresolved research problems and formulate ideas beyond the current boundaries of knowledge within the atmospheric and oceanic sciences

Audience: Graduate

3. Formulate science problems and research questions and use these to evaluate experimental designs resources required to answer them

Audience: Graduate

4. Prepare dissertation proposals that meets criteria for department preliminary examination

Audience: Graduate

**ATM OCN/BOTANY/CIV ENGR/ENVIR ST/GEOSCI/ZOOLOGY 911 – LIMNOLOGY AND MARINE SCIENCE SEMINAR**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ATM OCN/ENVIR ST 925 – SEMINAR-CLIMATOLOGY**

1-2 credits.

Historical climatology with emphasis on the last few centuries.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**ATM OCN/AGROECOL/BOTANY/ENTOM/ENVIR ST/F&W ECOL/ GEOG/ZOOLOGY 953 – INTRODUCTION TO ECOLOGY RESEARCH AT UW-MADISON**

1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison

Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison

Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology

Audience: Graduate

4. Develop appropriate expectations for advisors and advisees

Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics

Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science

Audience: Graduate

**ATM OCN 965 – SEMINAR-OCEANOGRAPHY**

1-2 credits.

Advanced topics in oceanography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**ATM OCN/BOTANY/ENVIR ST/F&W ECOL/GEOG/GEOSCI/  
ZOOLOGY 980 – EARTH SYSTEM SCIENCE SEMINAR**

1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ATM OCN 990 – RESEARCH**

1-12 credits.

Research with atmospheric and oceanic science faculty advisors.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ATM OCN 999 – ADVANCED INDEPENDENT STUDY**

1-6 credits.

Advanced independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**BIOCHEMISTRY (BIOCHEM)****BIOCHEM 100 – BIOCHEMISTRY FRESHMAN SEMINAR**

1 credit.

Introduction to the discipline of biochemistry, to the UW Biochemistry Department, to some of the research projects the faculty are pursuing, to the University, and to the career options open to an individual with a biochemistry background.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Determine whether biochemistry is a major they want to pursue and defend that decision based on knowledge of the biochemistry major at UW-Madison

Audience: Undergraduate

2. Establish connections within the biochemistry department community including interacting with faculty

Audience: Undergraduate

3. Discuss the career opportunities available to individuals with biochemistry and/or life science backgrounds

Audience: Undergraduate

4. Identify resources available at the university that will support success at UW-Madison

Audience: Undergraduate

5. Describe the format and content of a scientific paper

Audience: Undergraduate

## BIOCHEM 104 – MOLECULES TO LIFE AND THE NATURE OF SCIENCE

3 credits.

Introduction to how life works at a molecular level and the evolutionary paths that led to the great diversity of life on our planet. With this foundation, discuss current topics in the news such as: exploring the human genome to understand our species' history and to diagnose and treat disease; genetic engineering of crops in relation to foods safety and effects on ecosystems; gene editing of insects and mammals including humans; how to determine whether herbal remedies, vaccines, etc. are effective and safe; and current trends in biotechnology and what might be on the horizon. Focus on appreciating the nature of science and becoming better equipped to explore and evaluate scientific topics of interest.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the nature of science and what science can tell us.

Audience: Undergraduate

2. Gain an appreciation for the beauty of biology and the remarkable diversity of life on earth.

Audience: Undergraduate

3. Discuss fundamentals of the evolutionary process and the molecular basis of how cells and organisms operate.

Audience: Undergraduate

4. Appreciate the range of how science is presented and sometimes misrepresented in the media.

Audience: Undergraduate

5. Equip students with the ability to inform their own decision making as they encounter scientific topics that may influence their daily life.

Audience: Undergraduate

## BIOCHEM 207 – ENGINEERING BACTERIOPHAGE LABORATORY

2 credits.

Introduces the lab skills and techniques used in biochemistry and molecular biology laboratories. Engineer mutants of the T7 bacteriophage and test the virulence of the bacteriophages on various bacterial strains. Integrate biochemistry, molecular biology, microbiology, genetics, and basic laboratory techniques.

**Requisites:** None

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply basic molecular biology laboratory techniques to engineer and test bacteriophages

Audience: Undergraduate

2. Demonstrate good laboratory habits such as, keeping laboratory records, following laboratory safety standards, working collaboratively, and maintaining a clean working environment

Audience: Undergraduate

3. Develop hypotheses and evaluate experimental results with instructor support

Audience: Undergraduate

4. Effectively communicate scientific ideas and results verbally and in written form

Audience: Undergraduate

5. Discuss the collaborative nature of biochemistry

Audience: Undergraduate

**BIOCHEM 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work for Honors students under direct guidance of a Biochemistry faculty member. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2016

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills through a scientific research project

Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving in a scientific research project

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies through a research project

Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format

Audience: Undergraduate

**BIOCHEM 299 – INDEPENDENT STUDY**

1-3 credits.

Research work for students under direct guidance of a Biochemistry faculty member. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate a clear research question or problem and formulate a hypothesis

Audience: Undergraduate

2. Identify appropriate research methodologies and collect sound scientific data

Audience: Undergraduate

3. Apply critical thinking skills to interpret laboratory data and apply problem solving skills to constructively address research setbacks

Audience: Undergraduate

4. Practice research ethics and responsible conduct in research

Audience: Undergraduate

5. Communicate scientific ideas and results verbally and in written form effectively

Audience: Undergraduate

**BIOCHEM 301 – SURVEY OF BIOCHEMISTRY**

3 credits.

Explore the basic chemical properties of proteins, lipids, carbohydrates, and nucleic acids. Topics to be discussed include protein structure and function, the chemical logic of metabolism, and the mechanisms of DNA replication, DNA transcription, DNA repair, and gene expression. Understand principles and themes in biochemistry that relate to metabolic diseases, drug design, virus infection and vaccination, and gene therapy. Does not cover the foundational material necessary to succeed in additional biochemistry coursework, and is not likely to be acceptable for medical or veterinary school admission.

**Requisites:** CHEM 104, 109, or 116. Not open to students with credit for BIOCHEM 501.

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply basic concepts of protein and enzyme structure and function

Audience: Undergraduate

2. Differentiate structures of lipids and their biochemical roles

Audience: Undergraduate

3. Differentiate structures of carbohydrates and their biochemical roles

Audience: Undergraduate

4. Differentiate structures of nucleic acids and their biochemical roles

Audience: Undergraduate

5. Apply chemical concepts involved in both anabolic and catabolic pathways

Audience: Undergraduate

6. Explain basics of gene expression and regulation

Audience: Undergraduate

7. Describe fundamentals of cancer and certain viral diseases

Audience: Undergraduate

**BIOCHEM 375 – SPECIAL TOPICS**

1-4 credits.

Examines various special topics in biochemistry. Topics and content will vary each semester and by section of the course.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**BIOCHEM 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Biochemistry and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Apply concepts learned in coursework to authentic professional situations

Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry

Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations

Audience: Undergraduate

**BIOCHEM 400 – STUDY ABROAD IN BIOCHEMISTRY**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**BIOCHEM 501 – INTRODUCTION TO BIOCHEMISTRY**

3 credits.

Chemistry, nutrition, and metabolism of biological systems.

**Requisites:** (CHEM 341, 343, or concurrent enrollment), or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe how biomolecules store, transmit, and receive information to carry out cellular functions, such as catalysis, information transfer, energy production, and biosynthesis

Audience: Undergraduate

2. Explain how molecular interactions drive the formation of macromolecular structure, including protein, lipid, nucleic acid, and carbohydrate structure

Audience: Undergraduate

3. Recognize and identify the molecular structure of the building blocks for proteins, lipids, nucleic acids, and carbohydrates and describe how their structure relates to their biological function.

Audience: Undergraduate

4. Describe the process of DNA replication, DNA repair, RNA transcription, and protein synthesis

Audience: Undergraduate

5. Relate the chemical structure of metabolites and the pathways through which they flow to how cells use those pathways for both biosynthesis (anabolism) and energy production (catabolism)

Audience: Undergraduate

6. Analyze the major anabolic and catabolic pathways of central metabolism in terms of energetics, molecular structure, hormonal control, and regulation

Audience: Undergraduate

7. Recognize that all life on earth shares a common ancestor as illustrated by the use of the same genetic code and the existence of common biochemical pathways between all organisms

Audience: Undergraduate

**BIOCHEM 507 – GENERAL BIOCHEMISTRY I**

3 credits.

Chemistry of biological materials, intermediary metabolism and protein structure.

**Requisites:** CHEM 345

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Relate the chemical structure of proteins, nucleic acids, carbohydrates, and lipids to their respective biological functions

Audience: Undergraduate

2. Analyze the molecular interactions that drive the formation of macromolecular structure, including protein and nucleic acid structure

Audience: Undergraduate

3. Apply qualitative and quantitative descriptions of protein-ligand, enzyme-substrate, and enzyme-inhibitor interactions, enzyme catalysis, and enzyme kinetics to interpret experimental data in terms of biochemical mechanism

Audience: Undergraduate

4. Describe how biomolecules store, transmit, and receive information to carry out cellular functions

Audience: Undergraduate

5. Analyze the major catabolic pathways of central metabolism in terms of energetics, chemical structure, and regulation

Audience: Undergraduate

6. Connect biochemical processes to applications in medicine, agriculture, food science, and other aspects of everyday life

Audience: Undergraduate

7. Communicate with others about scientific concepts and ideas using the vocabulary of biochemistry

Audience: Undergraduate

**BIOCHEM 508 – GENERAL BIOCHEMISTRY II**

3–4 credits.

Biosynthesis of biological molecules, signal transduction mechanisms, chemistry and metabolism of nucleic acids, protein synthesis, and molecular and cellular biology.

**Requisites:** BIOCHEM 507

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compare the molecular biology process of DNA replication, RNA transcription and protein synthesis between prokaryotes and eukaryotes

Audience: Undergraduate

2. Assess the investment of cellular energy during nucleic acid, protein carbohydrate and lipid synthesis

Audience: Undergraduate

3. Predict the outcome of disruptive mutations and diseases on nucleic acid, protein, carbohydrate and lipid synthesis and hormonal signaling

Audience: Undergraduate

4. Relate the chemical structure of metabolites to their functional role and amount of energy produced when oxidized

Audience: Undergraduate

5. Distinguish cellular and organ signaling pathways and their downstream effects on metabolism

Audience: Undergraduate

6. Predict how metabolism of carbohydrates and lipids changes depending on the supply of energy to the body disease state

Audience: Undergraduate

7. Relate molecular processes in biochemistry to medicine and agriculture

Audience: Undergraduate

### BIOCHEM/NUTR SCI 510 – NUTRITIONAL BIOCHEMISTRY AND METABOLISM

3 credits.

Lectures in nutrition with a substantial background in biochemistry. Emphasis on biochemical and physiological fundamentals of nutrition. Discussion of protein, fat, carbohydrate, energy, minerals and vitamins and their roles and interrelationships in nutrition and metabolism.

**Requisites:** BIOCHEM 301, 501, 507, BMOLCHEM 503, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand nutrient metabolism in normal and disease states

Audience: Both Grad & Undergrad

2. Integrate the regulation of metabolism of nutrients under normal and disease state conditions.

Audience: Both Grad & Undergrad

3. Understand the biochemical and molecular functions of nutrients we consume

Audience: Both Grad & Undergrad

4. Apply how nutrients affect pathogenesis and health

Audience: Graduate

5. Think critically about nutrient claims and fads using your knowledge of nutritional biochemistry.

Audience: Both Grad & Undergrad

6. Integrate current research in the area of metabolism and micronutrient function into existing knowledge and formulate new hypotheses to guide future research

Audience: Graduate

### BIOCHEM 551 – BIOCHEMICAL METHODS

4 credits.

Introduction to modern biochemical laboratory techniques and current biochemical literature. Includes student seminar presentations based upon scientific literature that parallels experiments performed in the lab.

**Requisites:** BIOCHEM 501, 507, or concurrent enrollment

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss the theory of several fundamental biochemical techniques that form hypotheses based on biochemical principles

Audience: Undergraduate

2. Form hypotheses based on biochemical principles

Audience: Undergraduate

3. Design and perform experiments to address a hypothesis

Audience: Undergraduate

4. Collect sound scientific data

Audience: Undergraduate

5. Critically analyze one's own data as well as data from other sources

Audience: Undergraduate

6. Communicate scientific theory and findings in both oral and written form

Audience: Undergraduate

7. Evaluate the importance of collaboration in biochemistry research

Audience: Undergraduate

**BIOCHEM/NUTR SCI 560 – PRINCIPLES OF HUMAN DISEASE AND BIOTECHNOLOGY**

2 credits.

Covers basic and applied biochemical principles related to human disease. Topics such as: cancer, including cell cycle regulation, oncogenes and tumor suppressors, and cellular metabolism; metabolic disorders, including cardiovascular disease, metabolic syndrome, and diabetes; biotechnology, including metabolomics, CRISPR-based genetic screens, and experimental models of human disease.

**Requisites:** BIOCHEM 501, 507, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically evaluate, and accurately describe findings from primary research publications

Audience: Both Grad & Undergrad

2. Analyze how genetic and cell cycle perturbations contribute to cancer progression

Audience: Both Grad & Undergrad

3. Identify how genetic and environmental factors impact altered cellular metabolism in cancer

Audience: Both Grad & Undergrad

4. Describe biochemical mechanisms that contribute to cardiovascular disease, metabolic syndrome, and diabetes

Audience: Both Grad & Undergrad

5. Explain biochemical techniques, engineering strategies, and state-of-the-art technologies used in biomedical research

Audience: Both Grad & Undergrad

6. Collaborate with peers in a small group

Audience: Both Grad & Undergrad

7. Apply knowledge of biochemical principles and biotechnology to solve research and disease treatment related problems

Audience: Both Grad & Undergrad

8. Execute written critical evaluation of primary research literature related to the molecular basis of human diseases and advances in biotechnology.

Audience: Graduate

**BIOCHEM/M M & I 575 – BIOLOGY OF VIRUSES**

2 credits.

Broad coverage of animal virology taught at molecular level. Topics include virus structure, viral replication/lifecycle, aspects of pathogenesis and prevention.

**Requisites:** (BIOCORE 381 and 382), ZOOLOGY/BIOLOGY/BOTANY 151, M M & I 301, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and recognize fundamental members of the predominant families of RNA and DNA viruses that affect animals (humans included) by causing viral diseases, including AIDS, cancer, flu, and COVID-19

Audience: Both Grad & Undergrad

2. Describe and demonstrate the basic concepts of virus particle structure and the biochemical mechanisms for entry and multiplication of diverse RNA and DNA viruses

Audience: Both Grad & Undergrad

3. Recognize and apply the basic principles of virus transmission and viral pathogenicity, combined with the factors that contribute to virus emergence and evolution, to situations involving virus outbreaks that affect global health

Audience: Both Grad & Undergrad

4. Identify and evaluate individual steps in a virus' replication cycle that can be effectively targeted by anti-viral drugs for pharmaceutical intervention of virus diseases

Audience: Both Grad & Undergrad

5. Design effective strategies for a) prevention of infection through development of viral vaccines and b) treatment of diverse human diseases by gene therapy through the design and administration of genetically engineered virus vectors

Audience: Both Grad & Undergrad

6. Use knowledge gained in lecture to critically assess primary literature and data presented in the weekly Molecular Virology Seminar Series

Audience: Graduate

## BIOCHEM 601 – PROTEIN AND ENZYME STRUCTURE AND FUNCTION

2 credits.

Protein structure and dynamics. Protein folding. Physical organic chemistry of enzymatic catalysis. Analysis of enzyme kinetics and receptor-ligand interactions. Enzymatic reaction mechanisms.

**Requisites:** CHEM 345 and (BIOCHEM 501 or 507) or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify basic stereochemical principles of protein components

Audience: Both Grad & Undergrad

2. Describe the chemistry of amino acids

Audience: Both Grad & Undergrad

3. Describe the noncovalent forces that control the secondary and tertiary structure of proteins

Audience: Both Grad & Undergrad

4. Evaluate the fundamental strengths and weaknesses of structures determined by X-ray crystallography and electron microscopy

Audience: Both Grad & Undergrad

5. Explain chemical kinetics as they apply to enzymes

Audience: Both Grad & Undergrad

6. Differentiate the role of cofactors in enzyme chemistry

Audience: Both Grad & Undergrad

7. Explain the fundamental underpinnings of protein stability, protein evolution, and their application to protein engineering by site-directed mutagenesis

Audience: Both Grad & Undergrad

8. Distinguish the key features of representative enzymes families including the ATPases and the peptidases

Audience: Both Grad & Undergrad

9. Compare the differences and unique properties of membrane proteins

Audience: Both Grad & Undergrad

10. Critically evaluate the primary biochemical literature regarding protein structure, function, and enzyme catalysis

Audience: Graduate

## BIOCHEM/B M I/BMOLCHEM/MATH 609 – MATHEMATICAL METHODS FOR SYSTEMS BIOLOGY

3 credits.

Provides a rigorous foundation for mathematical modeling of biological systems. Mathematical techniques include dynamical systems and differential equations. Applications to biological pathways, including understanding of bistability within chemical reaction systems, are emphasized.

**Requisites:** MATH 415 and (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recall and state the formal definitions of the mathematical objects and their properties in systems biology (e.g., reaction networks, reaction rate equations, mass-action kinetics models, detailed balanced and complex balanced systems, Lyapunov functions, etc.).

Audience: Both Grad & Undergrad

2. Use such definitions to argue that a mathematical object does or does not have the condition of being a particular type or having a particular property (e.g., reversible, weakly reversible, mass-action, detailed balanced, complex balanced, globally stable, oscillatory, persistent, permanent, etc.).

Audience: Both Grad & Undergrad

3. Recall and state the standard theorems of the field (e.g., the Horn-Jackson theorem, the deficiency zero theorem, theorems on characterization of mass-action systems, theorems on persistence and permanence, theorems on dynamical equivalence, etc.) and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Both Grad & Undergrad

4. Construct mathematical arguments related to the above definitions, properties, and theorems, including the construction of examples and counterexamples.

Audience: Both Grad & Undergrad

5. Convey arguments using English and appropriate mathematical terminology, notation and grammar.

Audience: Both Grad & Undergrad

6. Model real biological systems by means of systems of differential equations, and be able to use software (such as Matlab) for visualization of their dynamics. Example models could include: (i) Enzymes, substrates and saturating kinetics, (ii) Glycolytic oscillations, (iii) Cell cycle control, budding yeast cell cycle models, (iv) Activator-inhibitor and positive feedback systems.

Audience: Both Grad & Undergrad

7. Identify applications of course content in current areas of research.

Audience: Graduate

**BIOCHEM/GENETICS/MICROBIO 612 – PROKARYOTIC MOLECULAR BIOLOGY**

3 credits.

Molecular basis of bacterial physiology and genetics with emphasis on molecular mechanisms; topics include nucleic acid-protein interactions, transcription, translation, replication, recombination, regulation of gene expression.

**Requisites:** (BIOCHEM 501 or 507) and (MICROBIO 470, GENETICS 466 or 468) or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Access and evaluate original research literature.

Audience: Undergraduate

2. Demonstrate problem solving practices.

Audience: Undergraduate

3. Identify enzyme mechanisms responsible for transcription, translation, gene regulation, and replication in bacteria.

Audience: Graduate

4. Compare the structural bases for the mechanisms.

Audience: Graduate

5. Evaluate the experiments that led to our understanding of these mechanisms.

Audience: Graduate

6. Deconstruct how these enzymes respond to nutritional and environmental signals in cells.

Audience: Graduate

7. Outline the evolutionary basis and selection pressure for these mechanisms in vivo.

Audience: Graduate

**BIOCHEM/NUTR SCI 619 – ADVANCED NUTRITION: INTERMEDIARY METABOLISM OF MACRONUTRIENTS**

3 credits.

Principles underlying the control of metabolism as it applies to macronutrients. Discusses advanced aspects of metabolic control. Metabolism of protein and amino acids, fat, and carbohydrate. Discusses fuel sensing and metabolism in disease.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe regulatory mechanisms at the organ, cellular and biochemical level controlling intermediary metabolism of carbohydrates, lipids and proteins

Audience: Graduate

2. Identify regulatory points in metabolic pathways and explain how they may change with metabolic state

Audience: Graduate

3. Detail the changes and mechanisms underlying such changes in protein, carbohydrate and fat metabolism in changing physiological state and also in health vs disease state

Audience: Graduate

4. Evaluate modern experimental approaches for studying metabolism

Audience: Graduate

### **BIOCHEM/GENETICS/MD GENET 620 – EUKARYOTIC MOLECULAR BIOLOGY**

3 credits.

Focuses on the basic molecular mechanisms that regulate DNA, RNA, and protein metabolism in eukaryotic organisms.

**Requisites:** BIOCHEM 501, 508 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recall core principles that govern the structure and function of DNA, RNA, and protein.

Audience: Both Grad & Undergrad

2. Describe techniques for quantifying the expression, interaction, and cellular localization of specific molecules and for determining their necessity and sufficiency in molecular processes.

Audience: Both Grad & Undergrad

3. Explain how molecular processes that control the synthesis, decay, interactions, localization, folding, and modification of molecules are silenced, initiated, maintained, and terminated.

Audience: Both Grad & Undergrad

4. Describe how information is transferred between molecules to alter cellular activity in response to developmental and environmental signals.

Audience: Both Grad & Undergrad

5. Critique and weigh the credibility of existing molecular data.

Audience: Both Grad & Undergrad

6. Develop and draw hypotheses that use existing data to account for as yet unexplained molecular processes in eukaryotic organisms.

Audience: Both Grad & Undergrad

7. Design discovery/observation, loss-of-function, and gain-of-function experiments to test molecular hypotheses.

Audience: Both Grad & Undergrad

8. Implement problem solving strategies in thesis research project.

Audience: Graduate

### **BIOCHEM/BOTANY 621 – PLANT BIOCHEMISTRY**

3 credits.

Biochemistry of photosynthesis, respiration, cell walls, and other metabolic and biosynthetic processes in plants.

**Requisites:** BIOCHEM 501, 507, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Explain how CO<sub>2</sub> and other nutrients are converted to various metabolites in plants through different metabolic pathways

Audience: Both Grad & Undergrad

2. Employ various analytical tools used in the field of plant biochemistry

Audience: Both Grad & Undergrad

3. Apply critical scientific thinking skills (e.g. how to read literature, critically evaluate data, and identify unresolved questions) to support scientific arguments

Audience: Both Grad & Undergrad

4. Synthesize and critically evaluate scientific claims and hypotheses

Audience: Graduate

**BIOCHEM 625 – MECHANISMS OF ACTION OF VITAMINS AND MINERALS**

2 credits.

Emphasizes the importance of coenzyme and cofactors of enzymes (i.e., vitamins and minerals) in biochemistry. All aspects of the biochemistry of coenzymes will be covered, including their biosynthesis as far as is known, the biochemical reactions they catalyze, their chemical and spectroscopic properties, and the mechanisms by which they facilitate biochemical reactions.

**Requisites:** CHEM 345 and (BIOCHEM 501, 507, or concurrent enrollment), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify stereochemical, electronic, and spatial constraints on enzyme reactions

Audience: Undergraduate

2. Integrate principles from general chemistry, organic chemistry, basic biology and biochemistry to clarify how vitamins and minerals (cofactors and coenzymes) function in living systems

Audience: Undergraduate

3. Apply precise terminology when speaking and writing about biochemistry and organic chemistry principles

Audience: Undergraduate

**BIOCHEM/GENETICS 631 – PLANT GENETICS AND DEVELOPMENT**

3 credits.

Covers the basic concepts of genetics and genomics as applied to plants and their development, including discussions on breeding systems (modes of reproduction, sex determination, self incompatibility and crossing barriers), linkage analysis, genome structure and function (structure, function and evolution of nuclear and organellar chromosomes; haploidy and polyploidy; expression regulation and epigenetics), along with a description of current methodologies used in the analysis of these processes within the context of plant development. The objective is to instigate a broader knowledge and understanding of the principles and methodologies used in plant genetics and their applications in investigations of the molecular mechanisms that modulate plant development.

**Requisites:** GENETICS 466, 468, BIOCORE 587, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the plant life cycles and key concepts in plant development

Audience: Both Grad & Undergrad

2. Explore and compare experimental approaches to study breeding systems, recombination, and modes of trait segregation in plants, including quantitative traits

Audience: Both Grad & Undergrad

3. Explain genetic, epigenetic and genomic approaches to study plant growth, development and responses to the environment

Audience: Both Grad & Undergrad

4. Analyze and interpret data in plant genetics and development

Audience: Both Grad & Undergrad

5. Critically evaluate papers from the primary literature

Audience: Both Grad & Undergrad

6. Compare and contrast published experimental data that address specific biological questions in plants, use the corresponding information to develop novel hypotheses, and design experiments that test these hypotheses.

Audience: Graduate

### BIOCHEM/NUTR SCI 645 – MOLECULAR CONTROL OF METABOLISM AND METABOLIC DISEASE

3 credits.

Examination of various physiological states and how they affect metabolic pathways. Discussion of a number of special topics related to the unique roles of various tissues and to metabolic pathways in disease states, including adipocyte biology, beta-cell biology, epigenetics, inflammation, and aging related diseases.

**Requisites:** BIOCHEM 501, 508 or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the mechanisms by which tissues maintain metabolic flexibility.

Audience: Undergraduate

2. Differentiate between how lipid metabolism regulates carbohydrate metabolism and vice versa.

Audience: Undergraduate

3. Describe the regulation of lipogenesis.

Audience: Undergraduate

4. Discuss how hormone secreting endocrine cells in the pancreas sense nutrients to regulate blood glucose.

Audience: Undergraduate

5. Explain the importance of intracellular lipid cycling for body temperature regulation.

Audience: Undergraduate

6. Discuss the manner in which mitochondrial metabolism is assessed.

Audience: Undergraduate

7. Examine hormonal regulation of circadian rhythms.

Audience: Undergraduate

8. Describe the basis for thermogenesis.

Audience: Undergraduate

9. Explain the pathways leading to inflammation.

Audience: Undergraduate

### BIOCHEM 681 – SENIOR HONORS THESIS

2-4 credits.

First semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Biochemistry, as arranged with a Biochemistry faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Review and analyze scientific literature

Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question

Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research

Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format

Audience: Undergraduate

### BIOCHEM 682 – SENIOR HONORS THESIS

2-4 credits.

Second semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Biochemistry, as arranged with a Biochemistry faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Review and analyze scientific literature

Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question

Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research

Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format

Audience: Undergraduate

**BIOCHEM 691 – SENIOR THESIS**

2 credits.

First semester of individual study for undergraduate students completing a thesis in the area of Biochemistry, as arranged with a Biochemistry faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Review and analyze scientific literature

Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question

Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research

Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format

Audience: Undergraduate

**BIOCHEM 692 – SENIOR THESIS**

2 credits.

Second semester of individual study for undergraduate students completing a thesis in the area of Biochemistry, as arranged with a Biochemistry faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Review and analyze scientific literature

Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question

Audience: Undergraduate

3. Write a thesis based on original research

Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format

Audience: Undergraduate

**BIOCHEM 699 – SPECIAL PROBLEMS**

1-4 credits.

Provides academic credit for research, library, and/or laboratory work under direct guidance of a faculty member. Students are responsible for arranging the work and credits with the supervising faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate a clear research question or problem and formulate a hypothesis

Audience: Undergraduate

2. Identify appropriate research methodologies and collect sound scientific data

Audience: Undergraduate

3. Apply critical thinking skills to interpret laboratory data and apply problem solving skills to constructively address research setbacks

Audience: Undergraduate

4. Practice research ethics and responsible conduct in research

Audience: Undergraduate

5. Communicate scientific ideas and results verbally and in written form effectively

Audience: Undergraduate

**BIOCHEM/BMOLCHEM 701 – RESPONSIBLE CONDUCT IN BIOSCIENCE RESEARCH**

2 credits.

Introductory training in the practical aspects of being a graduate-level scientist and the professional standards and expectations of ethical researchers. Covers a wide variety of professional development topics, including choosing a research laboratory and a thesis mentor, transitioning to self-education, managing stress in graduate school, and the importance of diversity in science. Ethics topics include conflicts of interest, the protection of human subjects, the welfare of laboratory animals and workers, safe laboratory spaces, mentor and mentee responsibilities, collaborative research, peer review, data acquisition and data management practices, research misconduct, responsible authorship and publication, contemporary ethical issues in biomedical research, and the roles of responsible scientists in society. Covers all NIH-recommended topics for Responsible Conduct of Research, thus meeting the requirements for trainees involved in NIH-sponsored research programs.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Evaluate and apply fundamental concepts and best practices in bioscience research conduct and research ethics  
Audience: Graduate

2. Identify and meet individual and professional responsibilities and obligations to society  
Audience: Graduate

3. Explore and implement activities for professional skills development and career management  
Audience: Graduate

**BIOCHEM/CHEM 704 – CHEMICAL BIOLOGY**

3 credits.

Chemistry and biology of proteins, nucleic acids and carbohydrates; application of organic chemistry to problems in cell biology, biotechnology, and biomedicine.

**Requisites:** Declared in Biochemistry or Chemistry graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Be able to describe the chemical basis for replication, transcription, translation and how each of these central processes can be expanded to include new chemical matter.  
Audience: Graduate

2. Develop skills to critically read the literature and effectively communicate research in a peer setting.  
Audience: Graduate

3. Describe the substance and importance of chemical biology research in the format of a cover letter to a journal editor, and an original figure.  
Audience: Graduate

4. Demonstrate knowledge of chemical biology by designing an original research project that focuses on answering a biological question or solving a biomedical problem.  
Audience: Graduate

**BIOCHEM 719 – FROM ATOMS TO MOLECULES**

3 credits.

Topics covered include protein structure and folding, protein dynamics, biological catalysis, membrane structure and assembly, nucleic acid structure and folding, and bioenergetics. Each topic includes discussion of the primary literature, hypothesis generation, experimental design, data, analysis and interpretation underlying the facts in the textbook. Supports transition from undergraduate consumers of knowledge to graduate students and future independent scientists who will discover and add new knowledge.

**Requisites:** Declared in Biochemistry PhD program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the chemical principles underlying the structure, dynamics, interaction, and function of biological molecules  
Audience: Graduate

2. Design experiments to test a particular hypothesis using various techniques  
Audience: Graduate

3. Analyze, interpret, test, and share experimental data  
Audience: Graduate

4. Understand how biochemical principles are derived from primary experimental data and practice developing broader biochemical insights from experimental data  
Audience: Graduate

**BIOCHEM 721 – BIOCHEMICAL COMMUNICATION**

2 credits.

Introduction to written and visual communication of biochemical research, both to other scientists and to general audiences, including: how to recognize and adapt work to different audiences; how to construct a scientific argument and the different strategies used for research reports, reviews, and proposals; and how to create figures and posters that clearly convey scientific data and concepts. Learn about the peer review process and revision of scientific writing. An intensive writing component, which requires multiple written and visual documentation on topics related to thesis research.

**Requisites:** Declared in Biochemistry PhD program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Differentiate different types of scientific writing, including the goals, audience and components of research papers, review articles, and proposals  
Audience: Graduate

2. Analyze the structure of scientific arguments  
Audience: Graduate

3. Write about their own research and field of science, both retrospectively (research papers and review articles) and prospectively (proposal), utilizing the strategies previously identified to synthesize data or the literature, organize the work, and construct a convincing scientific argument at the appropriate level for the target audience to demonstrate mastery of these concepts  
Audience: Graduate

4. Create figures that clearly, accurately, and concisely convey scientific information to support the written words  
Audience: Graduate

5. Revise their scientific writing to improve clarity, organization, language, and to better achieve the rhetorical goals of the piece  
Audience: Graduate

6. Develop a scientific poster to visually and orally communicate scientific data and results  
Audience: Graduate

7. Compose one piece targeted to non-scientists  
Audience: Graduate

**BIOCHEM 729 – ADVANCED TOPICS**

1-3 credits.

Specialized subjects of current interest.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **BIOCHEM/BOTANY/GENETICS 840 – REGULATORY MECHANISMS IN PLANT DEVELOPMENT**

3 credits.

Molecular mechanisms whereby endogenous and environmental regulatory factors control development; emphasis on stimulus perception and primary events in the signal chain leading to modulated gene expression and cellular development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### **BIOCHEM/CHEM 872 – SELECTED TOPICS IN MACROMOLECULAR AND BIOPHYSICAL CHEMISTRY**

1-3 credits.

Various selected topics in contemporary macromolecular or biophysical chemistry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss current topics of active interest in molecular biophysics

Audience: Graduate

2. Evaluate primary research literature in molecular biophysics

Audience: Graduate

3. Design and interpret experiments in molecular biophysics

Audience: Graduate

4. Conduct rigorous research in molecular biophysics

Audience: Graduate

### **BIOCHEM/NUTR SCI 901 – SEMINAR-NUTRITION AND METABOLISM (ADVANCED)**

1 credit.

Presentation of original research results; discussion of recent articles in animal metabolism and nutrition.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss state-of-the-art research in nutrients and genetic regulation of metabolism

Audience: Graduate

2. Communicate scientific research and critically evaluate experimental results

Audience: Graduate

### **BIOCHEM 910 – SEMINAR-MOLECULAR VIROLOGY (ADVANCED)**

1 credit.

Research reports, special topics, and reports from recent literature in molecular virology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss current topics, cutting-edge research approaches, and next challenges in molecular virology

Audience: Graduate

2. Deliver an effective research presentation

Audience: Graduate

### **BIOCHEM/BMOLCHEM 913 – SEMINAR-RIBOGROUP (ADVANCED)**

1 credit.

Student-led discussions of RNA-related problems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an understanding of current research questions in the field of RNA biology

Audience: Graduate

2. Become familiar with the approaches used to study RNA and its interactions with proteins

Audience: Graduate

3. Build a professional network with other RNA biologists on campus

Audience: Graduate

4. Develop techniques for presenting complex concepts to a diverse audience

Audience: Graduate

**BIOCHEM/B M E/B M I/CBE/COMP SCI/GENETICS 915 –  
COMPUTATION AND INFORMATICS IN BIOLOGY AND MEDICINE**

1 credit.

Participants and outside speakers will discuss current research in computation and informatics in biology and medicine. This seminar is required of all CIBM program trainees.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss how methods from computer science, statistics, information science and engineering are applied to problems in biology, medicine and population health

Audience: Graduate

2. Recognize and be able to define applications in translational bioinformatics, clinical informatics and public health informatics

Audience: Graduate

**BIOCHEM 916 – CELLULAR MECHANISMS OF PROTEIN  
BIOGENESIS AND TRAFFICKING**

1 credit.

Recent literature relating to cellular aspects of the regulation of protein biogenesis including protein synthesis, folding, modification, degradation and trafficking, as well as function of molecular chaperones, will be presented and discussed.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Present on current research in membrane and organelle dynamics

Audience: Graduate

2. Interpret and evaluate the results and conclusions in primary research publications related to membrane and organelle dynamics

Audience: Graduate

3. Apply critical scientific thinking skills to supporting scientific arguments

Audience: Graduate

4. Discuss background literature in membrane and organelle dynamics

Audience: Graduate

5. Discuss methodologies and analytical tools used to study membrane and organelle dynamics

Audience: Graduate

**BIOCHEM/MICROBIO 917 – REGULATION OF GENE EXPRESSION  
(ADVANCED SEMINAR)**

1 credit.

Analysis of recent literature in topics related to prokaryotic and eukaryotic gene regulation, including regulation of transcription, translation, and genome organization.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss state-of-the-art research in gene expression and regulation

Audience: Graduate

2. Communicate and critically evaluate experimental results

Audience: Graduate

**BIOCHEM/CHEM 918 – SINGLE MOLECULE APPROACHES TO  
BIOLOGY**

1 credit.

A combination of recent literature and original research presentations relating to the use of single molecule techniques in biochemistry including fluorescence microscopy, tethered particle motion, patch-clamping, cryo-electron microscopy, optical trapping, magnetic tweezers, and super resolution microscopy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss state-of-the-art research in single molecule biophysics

Audience: Graduate

2. Communicate and critically evaluate experimental results

Audience: Graduate

**BIOCHEM 919 – SYNTHETIC BIOLOGY SEMINAR**

1 credit.

Synthetic biology is a burgeoning field encompassing understanding and designing biological systems spanning from biomolecules to ecosystems. It builds on advances in molecular and cellular technologies to revolutionize biological engineering in the same way that organic synthesis transformed chemistry and integrated circuit design transformed computing. Synthetic biology has the potential to address many of society's grand challenges including: understanding human disease, sustainable biomanufacturing, medical diagnostics and therapeutics, programming mammalian cell behaviors, engineering living materials, information storage, carbon sequestration, and energy generation. Latest advances in the field will be reviewed by covering literature including but not limited to biomolecular design, sequence-structure-function relationship, regulatory and signaling networks, metabolic engineering, interactions in microbial communities, cell-based therapeutics and genome design.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically analyze data and conclusions reported in current literature on synthetic biology

Audience: Graduate

2. Summarize and present the findings of a scientific article

Audience: Graduate

3. Lead and contribute productively to discussions of current research in the field

Audience: Graduate

**BIOCHEM 924 – MEMBRANE PROTEIN STRUCTURE AND FUNCTION**

1 credit.

Membrane proteins comprise over a fourth of proteins encoded in any given genome, providing many vital functions to all cells. For example, ion channels and pumps modulate the membrane potential and help conduct information via nerves and other long distance conducting tissue. Transporters mediate the uptake and secretion of molecules. Receptors, such as G protein coupled receptors and receptor protein kinases, transfer information about the environment to the inside of the cell. Membrane proteins also contribute to the shape of the cell, the structure of the membrane and a myriad of other functions. Structure/function relationships for this critical class of proteins are discussed, addressing questions such as "how do membrane proteins fold?", "how do certain important classes of membrane proteins work?", "what are the challenges in studying membrane proteins" and "what methods are available for studying their biophysical properties?"

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Synthesize recent and classic research literature about membrane proteins structure and function, including relevant methods, biological systems, or general principles.

Audience: Graduate

2. Critically analyze data and conclusions presented in research literature, present it with clarity and discuss it with peers.

Audience: Graduate

**BIOCHEM/CBE 932 – BIOTECHNOLOGY TRAINING PROGRAM SEMINAR**

1 credit.

Biotechnology Training Program trainees will present their research for critical review by audience.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss research conducted by Biotechnology Training Program trainee peers' labs and the biotechnological applications thereof

Audience: Graduate

2. Examine industrial applications of biotechnology through internship presentations

Audience: Graduate

3. Communicate with a broad scientific audience

Audience: Graduate

**BIOCHEM/CHEM 945 – SEMINAR-CHEMICAL BIOLOGY (ADVANCED)**

1 credit.

Presentations and discussions of recently published research in chemical biology and related areas.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss recent published research in chemical biology and related areas

Audience: Graduate

2. Apply tools used in research at the chemistry-biology interface

Audience: Graduate

3. Demonstrate professional and ethical responsibility in research

Audience: Graduate

4. Communicate and critically evaluate published research with scientists with diverse backgrounds and interests

Audience: Graduate

**BIOCHEM 990 – RESEARCH**

1-12 credits.

Independent laboratory research in preparation of a graduate thesis or dissertation under supervision of a faculty member.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate graduate-level research skills and techniques

Audience: Graduate

2. Apply the biochemical principles that underlie all biological processes

Audience: Graduate

3. Address research challenges using a broad range of theories, research methods, and approaches to scientific inquiry

Audience: Graduate

4. Formulate and design new approaches that extend biochemical principles beyond their current boundaries

Audience: Graduate

**BIOLOGICAL SYSTEMS ENGINEERING (BSE)****BSE 1 – COOPERATIVE EDUCATION PROGRAM**

1 credit.

Full-time off-campus work experience which combines classroom theory with practical knowledge of operations to provide a background upon which to base a professional career.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**BSE 170 – PRODUCT DESIGN PRACTICUM**

2 credits.

Work in small groups to design, fabricate, and test a device that solves a real world problem. Includes retrieval techniques, specification writing, methods for enhancing creativity, selection methodologies, safety engineering, sustainability in design, shop safety, fabrication equipment and techniques, and oral and written communication.

**Requisites:** Declared in Biological Systems Engineering BS or classified as Pre-Biological Systems Engineering

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Work effectively in teams by creating a collaborative and inclusive environment, establishing goals and meeting objectives

Audience: Undergraduate

2. Practice oral and written communication

Audience: Undergraduate

3. Demonstrate safe use of engineering fabrication equipment and techniques and general shop safety procedures

Audience: Undergraduate

4. Generate a functional design prototype based on working through the engineering design process steps

Audience: Undergraduate

### **BSE 249 – ENGINEERING PRINCIPLES FOR BIOLOGICAL SYSTEMS**

3 credits.

Applications of basic engineering principles such as mass and energy balances, psychrometric heat and mass transfer and fluid flow to problems encountered in agricultural and biological systems including grain conditioning, fruit and vegetable storage, food processing, animal housing, and environmental control.

**Requisites:** MATH 217 or 221

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the definitions and relationships between material properties of biological materials, such as bulk density, moisture content, and porosity.

Audience: Undergraduate

2. Employ dimensional analysis to check the correctness of physical relations and to convert the value of a physical quantity in one system to the value in another.

Audience: Undergraduate

3. Describe the definitions and relationships among the thermodynamic properties such as internal energy, enthalpy, and entropy for pure materials and air-water mixtures.

Audience: Undergraduate

4. Employ energy and material balances in the analysis of batch and continuous as well as reactive and nonreactive processes.

Audience: Undergraduate

5. Use psychrometric charts to design heating, cooling, and drying systems for biological materials.

Audience: Undergraduate

### **BSE 270 – INTRODUCTION TO COMPUTER AIDED DESIGN**

3 credits.

Introduction to computer aided design (CAD) concepts and techniques, including two- and three-dimensional drawing presentation, methods of graphic communication and design synthesis. Specific topics include parametric solid modeling, part design, survey data and surface construction, orthographic drawings, dimensioning rules and drawing standards, assemblies, and animation.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge about fundamentals of computer aided design (CAD) concepts and techniques that include two- and three-dimensional graphical presentations

Audience: Undergraduate

2. Create CAD parts, assemblies, and engineering drawings

Audience: Undergraduate

3. Apply the methods of graphic communication rules which include Geometric Dimensioning and Tolerancing (GD&T)

Audience: Undergraduate

4. Present data, design synthesis, and production methods in engineering graphics

Audience: Undergraduate

5. Apply the proper and efficient use of the latest engineering design and analysis tools

Audience: Undergraduate

### **BSE 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area of Biological Systems Engineering. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

### **BSE 299 – INDEPENDENT STUDY**

1-3 credits.

Research work for students under direct guidance of a faculty member in an area of Biological Systems Engineering. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

**BSE 301 – LAND INFORMATION MANAGEMENT**

3 credits.

An introduction to land information management through the principles of geospatial technologies and methods for analysis and interpretation of geospatial data. Includes both the basic land surveying technology and advanced remote observation of land resources by airborne and space-based sensors.

**Requisites:** MATH 113, 114, or 217

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe basic geospatial concepts and engineering principles applicable to the acquisition and management of land information.

Audience: Undergraduate

2. Apply an engineer's level and total station instrument for land surveying.

Audience: Undergraduate

3. Identify important resources, and retrieve, interpret, analyze and critique information for use in solving geospatial engineering problems and conducting basic land information investigations.

Audience: Undergraduate

4. Apply the remote sensing techniques and geospatial data processing tools for land information management.

Audience: Undergraduate

5. Communicate effectively through engagement during in-class discussions.

Audience: Undergraduate

**BSE 305 – INTRODUCTION TO PRECISION AGRICULTURE**

3 credits.

Introduces managing agricultural production systems using Precision Agriculture (PA), including its modern extensions in smart and digital farming. Provides an overview of the fundamentals of agricultural production systems and the sources of crop variability. Explores geographic positioning and information systems, examining how these tools integrate yield and quality sensors to monitor spatial variability. Covers temporal observation techniques using remote and proximal sensing systems. Culminates in studying the technologies used for implementing and managing variable-rate prescriptions and other management interventions.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Define key terminology related to agricultural production systems and precision agriculture technologies.

Audience: Undergraduate

2. Recognize factors contributing to variability in yield and quality of agricultural products.

Audience: Undergraduate

3. Explain the technologies used to predict spatial and temporal variability in plant growth and development.

Audience: Undergraduate

4. Assess management tools designed to optimize input usage and reduce environmental impact.

Audience: Undergraduate

**BSE 308 – CAREER MANAGEMENT FOR ENGINEERS**

1 credit.

Develop engineering career and life skills in time management, housing selection, financial management, the job search process, professional networking, branding and social media presence, professional development and professional society membership, leadership, professional ethics, and registration/licensure. Understand future trends in digital technology, climate change, diversity, and sustainability and how they affect career opportunities in the engineering field.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the basic personal financial management skills#necessary for early-career engineers, including preparing for costs such as#housing, healthcare, and transportation.#

Audience: Undergraduate

2. Recognize and implement select improvement strategies in the areas of interpersonal skills, communication, and social media facility to build personal and professional networks and create a "brand" as an engineer.#

Audience: Undergraduate

3. Identify and explain the benefits of direct involvement in one's engineering professional society/organization, including building ongoing professional relationships and pursuing ongoing professional development and lifelong learning.

Audience: Undergraduate

4. Explain the processes and professional benefits associated with completing the FE (Fundamentals of Engineering) exam and becoming a PE (Professional Engineer).

Audience: Undergraduate

5. Apply the Engineering Code of Ethics to specific cases and scenarios that present ethical challenges for engineers around decision making, product safety, economic tradeoffs, sustainability, and other issues.

Audience: Undergraduate

6. Provide examples of the importance of understanding diversity (gender, ethnicity, culture, etc.) as a practicing engineer as it relates to working on an engineering team and best serving a global customer base.#

Audience: Undergraduate

7. Develop a long-range,#comprehensive career plan that includes goal setting, plans for lifelong learning, personal financial management/ decision making, and#other factors,#synthesizing the semester's class content.

Audience: Undergraduate

8. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. (ABET Outcome 4)

Audience: Undergraduate

9. Acquire and apply new knowledge as needed, using appropriate learning strategies. (ABET Outcome 7)

Audience: Undergraduate

10. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. (ABET Outcome 2)

Audience: Undergraduate

**BSE 310 – PROJECT ECONOMICS & DECISION ANALYSIS**

3 credits.

Evaluation techniques for research, development engineering projects. Covers the time value of money and other cash-flow concepts, capital budgeting, economic practices and techniques used to evaluate and optimize decisions, and research development project portfolio management techniques.

**Requisites:** MATH 113, 114, or (MATH 171 and 217)**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define the terminology used in project economic analysis

Audience: Undergraduate

2. Describe time-value-of-money and discounting concepts

Audience: Undergraduate

3. Apply the criteria for making economic-based decisions

Audience: Undergraduate

4. Analyze before-tax and after-tax cash flows

Audience: Undergraduate

5. Explain economic risk analysis techniques

Audience: Undergraduate

6. Demonstrate capability to use a spreadsheet program in solving economic problems

Audience: Undergraduate

7. Estimate costs and perform an economic analysis in support of a research or engineering project

Audience: Undergraduate

8. Describe techniques used to manage company project portfolios

Audience: Undergraduate

9. Develop engineering economic problem-solving techniques similar to those in the Engineering Economics portion of the Fundamentals of Engineering exam

Audience: Undergraduate

**BSE/AN SCI 344 – DIGITAL TECHNOLOGIES FOR ANIMAL MONITORING**

3 credits.

Introduces key concepts of sensor technology used for livestock and companion animal monitoring and veterinary medicine. Describes applications of Artificial Intelligence (AI) systems for livestock animals and veterinary medicine, including animal monitoring, computer-aided diagnosis, and optimized farm management decisions.

**Requisites:** (MATH 112, 114, 171, or placement into MATH 221) or graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain what precision livestock is and why it is needed

Audience: Undergraduate

2. Demonstrate familiarity with data science and artificial intelligence principles as applied to agricultural systems and veterinary medicine

Audience: Undergraduate

3. Describe the current sensor sensing technologies used in livestock and companion animals

Audience: Undergraduate

4. Explain principles and applications of sensor technology applied to animals

Audience: Undergraduate

5. Identify artificial intelligence applications in veterinary medicine

Audience: Undergraduate

6. Evaluate the major ethical concerns associated with Artificial Intelligence for agriculture

Audience: Undergraduate

**BSE 349 – QUANTITATIVE TECHNIQUES FOR BIOLOGICAL SYSTEMS**

3 credits.

Principles of how energy and materials are utilized in Cells, organisms and ecosystems. Mass transfer, heat and energy balances applied to cell metabolism, plants, and ecosystems. Quantification of biological processes to allow manipulation for human benefit.

**Requisites:** MATH 222, (CHEM 104, 109, or 116), and (BOTANY/BIOLOGY/ZOOLOGY 151, ZOOLOGY 153, ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY 130, MICROBIO 101, or ENVIR ST/BOTANY/ZOOLOGY 260)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and analyze how energy and materials enter and are utilized by cells, organisms, and ecosystems using engineering concepts including material and energy balances, redox balance, and the first and second laws of thermodynamics.

Audience: Undergraduate

2. Mathematically model important biological processes including enzyme kinetics and microbial growth and be able to quantitatively assess how interactions between biological characteristics and the environment affect system performance.

Audience: Undergraduate

3. Recognize the basic types of plants and their ecosystems and be able to describe the ways in which plants interact with their environment and how that interaction can be manipulated to achieve desired outcomes.

Audience: Undergraduate

4. Describe the ways in which all living creatures interact with each other and their environment on the local, regional, and global scale and to consider how the activities of people can affect the sustainability of these interactions.

Audience: Undergraduate

### **BSE 364 – ENGINEERING PROPERTIES OF FOOD AND BIOLOGICAL MATERIALS**

3 credits.

Study of various physical, mechanical, thermal and other properties of food and biological materials. Importance of such property values on the design and operation of various food and bioprocess engineering systems.

**Requisites:** (BSE 249 or CBE 250) and (M E 361 or CBE 310)

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the engineering properties of food and biomaterials, including physical, rheological, thermal, aerodynamic and hydrodynamic, and electromagnetic properties

Audience: Undergraduate

2. Explain moisture and water activity and their impacts on the properties and processing of food and biomaterials

Audience: Undergraduate

3. Demonstrate the importance and applications of the engineering properties in agricultural systems

Audience: Undergraduate

4. Analyze how the environmental conditions and the composition and structure of biomaterials affect the engineering properties

Audience: Undergraduate

5. Interpret the designs, working principles, experimental setups. and operations of the instruments/devices for measuring/determining the engineering properties

Audience: Undergraduate

6. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics (ABET Outcome 1)

Audience: Undergraduate

7. Develop and conduct appropriate experimentation, analyze, and interpret data, and use engineering judgment to draw conclusions (ABET Outcome 6)

Audience: Undergraduate

### **BSE 365 – MEASUREMENTS AND INSTRUMENTATION FOR BIOLOGICAL SYSTEMS**

3 credits.

Principles of instrumentation and measurement systems, analysis of experimental data, electronic components, instrumentation for measuring various parameters of biological systems (e.g., temperature, force, flow).

**Requisites:** Declared in Biological Systems Engineering or Environmental Engineering BS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the calibration and measurement process.

Audience: Undergraduate

2. Design systems for the acquisition, analysis, and communication of measured data.

Audience: Undergraduate

3. Describe the principles of operation and limitations of common engineering instruments and sensors.

Audience: Undergraduate

4. Implement measures to minimize electromagnetic interference and noise in measurements.

Audience: Undergraduate

5. Select and use position, velocity, force, torque, temperature, pressure, and fluid flow sensors.

Audience: Undergraduate

6. Display enhanced problem solving skills involving electronics and instrumentation.

Audience: Undergraduate

7. Display improved communications skills both written (lab reports) and oral (presentation).

Audience: Undergraduate

8. Display enhanced teamwork skills.

Audience: Undergraduate

9. Select and/or utilize the most appropriate methodologies and practices.

Audience: Graduate

**BSE/ENVIR ST 367 – RENEWABLE ENERGY SYSTEMS**

3 credits.

Learn about the state-of-the-art in renewable energy applications including biomass for heat, electric power and liquid fuels as well as geo-energy sources such as wind, solar, and hydro power. Practice engineering calculations of power and energy availability of renewable energy sources and learn about requirements for integrating renewable energy sources into production, distribution and end-use systems.

**Requisites:** MATH 112, 114, 217, placement into MATH 221, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Calculate energy and power production for renewable energy systems

Audience: Both Grad & Undergrad

2. Determine renewable resource availability and impact on energy infrastructure

Audience: Both Grad & Undergrad

3. Design and assess the technical and economic feasibility of renewable energy systems

Audience: Both Grad & Undergrad

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of renewable energy systems.

Audience: Both Grad & Undergrad

5. Produce comprehensive renewable energy project analysis.

Audience: Graduate

**BSE/CIV ENGR/SOIL SCI 372 – ON-SITE WASTE WATER TREATMENT AND DISPERSAL**

2 credits.

On-site treatment and dispersal of waste water from homes, commercial sources and small communities. Sources, pretreatment units, nutrient removal units, constructed wetlands, surface and soil dispersal systems, recycle and reuse systems, regulations, alternative collection systems.

**Requisites:** CHEM 103, 109, or 115

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify, formulate, solve complex wastewater management and engineering problems by applying engineering and science principles to design a complete residential onsite wastewater treatment system.

Audience: Undergraduate

2. Use engineering design to produce wastewater management solutions that meet treatment goals with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Audience: Undergraduate

3. Communicate effectively with the instructor and other students during in-class discussions.

Audience: Undergraduate

4. Recognize ethical and professional responsibilities in onsite wastewater management and engineering situations and make informed design assumptions/judgments, which must consider the impact of wastewater management solutions in global, economic, environmental, and societal context.

Audience: Undergraduate

5. Analyze and interpret data related to wastewater flow, source, and characteristics, soil/site characteristics, and use engineering judgement to select appropriate design solutions.

Audience: Undergraduate

6. Acquire and apply new knowledge regarding advanced treatment processes for residential wastewater treatment.

Audience: Undergraduate

**BSE 375 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest to undergraduate students.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **BSE 380 – INTRODUCTORY DATA SCIENCE FOR THE AGRICULTURAL AND LIFE SCIENCES**

3 credits.

Agricultural and life scientists need to creatively apply physical, chemical, and biological principles to address technical, business, and environmental challenges. Many of these challenges involve numerical analyses, including the interpretation of large datasets. The fundamentals of computer coding using numerical software will be taught, using real-world data science challenges from the agricultural and life sciences.

**Requisites:** (CHEM 103, 109, or 115) and (MATH 112, 114, 217 or placement into MATH 211 or 221)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze agricultural and life sciences data using computer code

Audience: Undergraduate

2. Import data from multiple formats into numeric software for analysis

Audience: Undergraduate

3. Perform fundamental statistical analyses and basic data interpretation

Audience: Undergraduate

4. Write code to create graphical displays of data and model simulations

Audience: Undergraduate

5. Critique and improve data presentation with ethics and inclusivity in mind

Audience: Undergraduate

6. Work as an individual and in teams to solve data science challenges

Audience: Undergraduate

7. Create scientific workflows for automated data import, analysis, and presentation

Audience: Undergraduate

### **BSE 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under the guidance of a faculty or instructional academic staff member in BSE and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

### **BSE 400 – STUDY ABROAD IN BIOLOGICAL SYSTEMS ENGINEERING**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

### **BSE 405 – ARTIFICIAL INTELLIGENCE IN AGRICULTURE**

3 credits.

Provides an understanding of how cutting-edge Artificial Intelligence (AI) technologies revolutionize and optimize various aspects of the agricultural sector. Covers topics related to advanced sensors for data acquisition, data processing and visualization, and machine learning models to inform agricultural decision making. Introduces both theoretical concepts and practical insights into real-world AI implementation in agriculture.

**Requisites:** BSE 380, COMP SCI 220, 300, or graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply advanced sensing and computing techniques and modern engineering tools for intelligent agricultural system design

Audience: Undergraduate

2. Apply basic machine learning models and engineering principles to solve digital agriculture problems

Audience: Undergraduate

3. Identify important resources to retrieve, interpret, analyze, and critique information for use in solving problems in digital agriculture

Audience: Undergraduate

4. Deliver presentations to an audience of peers discussing the development of machine learning models and interpretation of modeling results

Audience: Undergraduate

**BSE 460 – BIOREFINING: ENERGY AND PRODUCTS FROM RENEWABLE RESOURCES**

3 credits.

Concepts, processes, status quo and future direction of biorefining for production of energy (fuels), chemicals and materials from biomass, with emphases on chemical, biological and engineering aspects of the biorefining.

**Requisites:** (CHEM 104 or 109) and (CHEM 341 or 343), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the opportunities and challenges of energy, chemicals, and materials from biomass

Audience: Both Grad & Undergrad

2. Describe chemical composition, anatomical structure, and physical & chemical properties of lignocellulosic biomass and their effect on biomass processing and conversion

Audience: Both Grad & Undergrad

3. Evaluate the technologies and processes and their working principles for producing liquid biofuels, such as corn ethanol, cellulose ethanol, biodiesel, and other alternative fuels.

Audience: Both Grad & Undergrad

4. Outline representative platform chemicals derivable from biomass, such as furfural, HMF, levulinic acid, lactic acid, xylitol, and sorbitol, and their production technologies and reaction chemistry

Audience: Both Grad & Undergrad

5. Compare the production of fibers, pulp & paper, and biobased materials from lignocellulosic biomass

Audience: Both Grad & Undergrad

6. Develop mass balance for a process to convert biomass to fuel, chemical, or material.

Audience: Both Grad & Undergrad

7. Design a process to produce a target product (fuel, chemical, or material)

Audience: Both Grad & Undergrad

8. Synthesize the historical and current research on a select topic in biorefining and generate evidence-based predictions regarding the future direction of the topic.

Audience: Graduate

**BSE 461 – FOOD AND BIOPROCESSING OPERATIONS**

3 credits.

Principles of mechanics, fluid dynamics, and heat and mass transfer as applied to food and bioprocessing operations. Specific focus on unit operations and equipment associated with the products key to Wisconsin industries including pulp and paper, dairy products, ethanol, forage, and grain.

**Requisites:** (BSE 249 or CBE 250), (CIV ENGR 310, CBE 320, or M E 363), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe bioprocessing operations (e.g., food processing and biofuels)

Audience: Both Grad & Undergrad

2. Develop mass and energy balances on unit operations (e.g., heat exchangers, evaporators, dryers, filters)

Audience: Both Grad & Undergrad

3. Develop a series of unit operations to perform the desired transformations of mass and energy in bioprocessing operations

Audience: Both Grad & Undergrad

4. Stimulate a system or process to determine impact of theoretical changes and conduct virtual experiments to optimize components or system

Audience: Both Grad & Undergrad

5. Consider the effect of public health, safety, and welfare, as well as global, culture, social, environmental, and economic factors on process design

Audience: Both Grad & Undergrad

6. Design a system to meet the operational and regulatory demands of food and bioprocessing plants

Audience: Graduate

**BSE 464 – HEAT AND MASS TRANSFER IN BIOLOGICAL SYSTEMS**

3 credits.

Introduction to heat and mass transfer fundamentals, including transport mechanisms of conduction, convection, radiation, diffusion and evaporation. Development of governing equations and boundary conditions with application to living systems, controlled environments, water systems, and food processing. Introduction to, and application of, finite-difference and finitevolume methods, including computational fluid dynamics (CFD).

**Requisites:** (M E 361 or CBE 310) and (M E 363, CBE 320, or CIV ENGR 310)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge about fundamental heat and mass transfer modes

Audience: Undergraduate

2. Identify governing equations, boundary conditions, and initial conditions

Audience: Undergraduate

3. Analyze the interrelationships among conduction, convection, radiation, and mass diffusion

Audience: Undergraduate

4. Demonstrate knowledge about the significance of theoretical, computational, and experimental approaches to solve heat and mass transfer problems

Audience: Undergraduate

5. Apply heat and mass transfer concepts and principles to real-world agricultural, environmental, and biosystems problems

Audience: Undergraduate

**BSE 472 – SEDIMENT AND BIO-NUTRIENT ENGINEERING AND MANAGEMENT**

3 credits.

Hydrologic, biologic and engineering applications in the design and management of sediment and bio-nutrient control systems.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify, formulate, and solve complex water, sediment, and manure management, and engineering problems by applying engineering and science principles to design water control, erosion control, and nutrient management systems.

Audience: Undergraduate

2. Apply engineering design to produce water, sediment, and manure management solutions that meet agricultural production needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Audience: Undergraduate

3. Communicate effectively with the instructor and other students during in-class discussions.

Audience: Undergraduate

4. Recognize ethical and professional responsibilities in water, sediment, and manure management, and engineering situations and make informed design assumptions/judgments, which must consider the impact of soil & water conservation and manure management solutions in global, economic, environmental, and societal context.

Audience: Undergraduate

5. Function effectively on a team to accomplish assigned tasks.

Audience: Undergraduate

6. Analyze and interpret data related to rainfall and runoff, soil characteristics, tillage practices, and manure characteristics and use engineering judgement to select appropriate design solutions.

Audience: Undergraduate

7. Acquire and apply new knowledge relate to sustainable agricultural production systems that can protect and preserve soil and water resources while maintaining agricultural productivity.

Audience: Undergraduate

**BSE 473 – WATER MANAGEMENT SYSTEMS**

3 credits.

Engineering and management applications of soil-plant-water relationships applied to water management systems and efficient water use.

**Requisites:** MATH 217, 221, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify, formulate and solve complex water management and engineering problems by applying hydrologic, biologic, and engineering principles applicable to the design of efficient water management systems and components.

Audience: Both Grad & Undergrad

2. Apply engineering design to produce water management solutions that meet agricultural production needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Audience: Both Grad & Undergrad

3. Communicate effectively through engagement during in-class discussions

Audience: Both Grad & Undergrad

4. Recognize ethical and professional responsibilities in water management and engineering situations and make informed judgements, which must consider the impact of water management solutions in global, economic, environmental, and societal context

Audience: Both Grad & Undergrad

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of water use

Audience: Both Grad & Undergrad

6. Analyze the causes of and solutions for the sustainability challenge of clean water and efficient use of water

Audience: Both Grad & Undergrad

7. Identify, evaluate, and synthesize contemporary literature on a specific water management issue

Audience: Graduate

**BSE/M E 474 – FLUID POWER**

3 credits.

Engineering principles of design and analysis of fluid power systems and fluid power components. Topics include hydraulic fluid properties, fluid flow and, positive displacement pumps, valves for pressure, flow, and directional control, linear and rotary actuators, accumulators, pressure compensation, load sensing, energy management and system efficiency.

**Requisites:** M E 363, CIV ENGR 310, CBE 320, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze various positive displacement pumps for flow, pressure, power, and efficiency

Audience: Both Grad & Undergrad

2. Determine flow and pressure drop characteristics of spool-type and poppet-type proportional, on-off, and servovalves

Audience: Both Grad & Undergrad

3. Construct hydraulic system schematics and select components from a functional system description

Audience: Both Grad & Undergrad

4. Determine efficiency and design improvements for mobile and industrial hydraulic systems

Audience: Both Grad & Undergrad

5. Develop mathematical models of hydraulic system/components and solve using numerical techniques

Audience: Graduate

**BSE/M E 475 – ENGINEERING PRINCIPLES OF AGRICULTURAL MACHINERY**

3 credits.

Engineering design principles of machines for the production, processing and handling of crops for food, fuel, bio-mass and fiber. Environmental and biological factors that influence machine design and operation. Economic and capacity analysis of machines and systems.

**Requisites:** Declared in Biological Systems Engineering or Mechanical Engineering and (M E 240, E M A 202, PHYSICS 201, 207, or 247), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and describe key operating and design principles, concepts, and methods related to agricultural field machinery  
Audience: Both Grad & Undergrad

2. Calculate relevant quantities regarding the design and engineering of agricultural field machinery  
Audience: Both Grad & Undergrad

3. Critically review results of engineering calculations to ensure answers are realistic  
Audience: Both Grad & Undergrad

4. Choose, synthesize and effectively utilize appropriate ASABE engineering standards, methods, and concepts regarding agricultural field machinery  
Audience: Both Grad & Undergrad

5. Hone skills in teamwork, oral and written communication, and problem solving  
Audience: Both Grad & Undergrad

6. Critically review emerging technology and apply relevant concepts to current issues with agricultural field machinery  
Audience: Both Grad & Undergrad

7. Demonstrate an ability to formulate, analyze, and independently solve advanced engineering problems  
Audience: Graduate

**BSE/M E 476 – ENGINEERING PRINCIPLES OF OFF-ROAD VEHICLES**

3 credits.

Engineering design principles of heavy-duty vehicles intended for off-road use: fuels, engine cycles, engine principles and construction, clutches, mechanical and hydrostatic transmissions, final drives, traction systems, traction modeling, dynamic behavior, suspension systems and braking.

**Requisites:** (M E 361 or concurrent enrollment), (M E 240, E M A 202, PHYSICS 201, 207, or 247), and declared in Biological Systems Engineering or Mechanical Engineering or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify, formulate, and solve engineering problems related to off-road vehicle dynamics and mobility  
Audience: Both Grad & Undergrad

2. Glean relevant data from the engineering research literature and technical data sheets, and specify appropriate components and systems in the application of off-road vehicle design  
Audience: Both Grad & Undergrad

3. Perform an experiment on off-road vehicle systems, analyze and interpret data, and use engineering judgment to draw conclusions  
Audience: Both Grad & Undergrad

4. Apply knowledge gained in the course to evaluate off-road vehicle design alternatives  
Audience: Both Grad & Undergrad

5. Critically review off-road vehicle research  
Audience: Graduate

**BSE 508 – BIOLOGICAL SYSTEMS ENGINEERING DESIGN PRACTICUM I**

2 credits.

Overview of the engineering design process including problem identification, information retrieval, specification writing, development and analysis of alternative solutions, selection methodology, product safety, standardization, scheduling and cost estimating. Develop design project proposals for real-world design problems.

**Requisites:** Declared in Biological Systems Engineering BS

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop design requirements for biological systems engineering design problems.

Audience: Undergraduate

2. Conduct technical reviews of engineering problems.

Audience: Undergraduate

3. Develop alternative solutions to biological systems engineering problems.

Audience: Undergraduate

4. Provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives as part of a team.

Audience: Undergraduate

**BSE 509 – BIOLOGICAL SYSTEMS ENGINEERING DESIGN PRACTICUM II**

3 credits.

Individual or team work on a biological systems engineering design project: problem identification, information retrieval, specification writing, development and analysis of alternative solutions, selection methodology.

**Requisites:** Senior standing and BSE 508

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Audience: Undergraduate

2. Develop alternative solutions to biological systems engineering problems.

Audience: Undergraduate

3. Develop a model or prototype to evaluate an engineering design.

Audience: Undergraduate

4. Provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives as part of a team.

Audience: Undergraduate

5. Communicate effectively with a range of audiences.

Audience: Undergraduate

**BSE 571 – SMALL WATERSHED ENGINEERING**

3 credits.

Application of engineering principles to small, ungauged watershed analysis. Application of hydrologic and sedimentologic principles to upland watersheds for run-off and sediment control.

**Requisites:** MATH 222 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify, formulate and solve complex hydrologic engineering problems by applying hydrologic, sedimentologic, and engineering principles applicable to the design of water and sediment control systems and components

Audience: Both Grad & Undergrad

2. Apply engineering design to produce water and sediment control solutions that meet regulatory requirements with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Audience: Both Grad & Undergrad

3. Communicate technical information effectively

Audience: Both Grad & Undergrad

4. Recognize ethical and professional responsibilities in watershed engineering situations and make informed judgements, which must consider the impact of watershed engineering solutions in global, economic, environmental, and societal context

Audience: Both Grad & Undergrad

5. Demonstrate advanced application of hydrologic, sedimentologic, and/or engineering principles.

Audience: Graduate

**BSE 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for undergraduate students in an Honors program completing a thesis in the area of Biological Systems Engineering, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**BSE 682 – SENIOR HONORS THESIS**

2-4 credits.

Second semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Biological Systems Engineering, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**BSE 691 – SENIOR THESIS**

2 credits.

Individual study for undergraduate students completing a thesis in the area of Biological Systems Engineering, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2017

**BSE 692 – SENIOR THESIS**

2 credits.

Second semester of individual study for undergraduate students completing a thesis in the area of Biological Systems Engineering, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2018

**BSE 699 – SPECIAL PROBLEMS**

1-4 credits.

Individual advanced work in an area of Biological Systems Engineering under the direct guidance of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**BSE 799 – PRACTICUM IN AGRICULTURAL ENGINEERING TEACHING**

1-3 credits.

Hands-on teaching experience through working with a course instructor to improve pedagogical understanding. Guidance will be provided on such aspects as course planning, delivery, student supervision, and evaluation, etc.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BSE 875 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest to graduate students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**BSE 900 – SEMINAR**

1 credit.

Provides an overview of research-related activities and resources available to graduate students in the department, college, and on campus. Includes library resources, statistical consulting, professional development, research proposal development, thesis writing, technical presentation, etc.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use departmental and campus resources to make academic progress (coursework and research) with their graduate degree program.

Audience: Graduate

2. Develop research questions related to their thesis research work.

Audience: Graduate

3. Develop skills to effectively review/critique scientific publications.

Audience: Graduate

4. Communicate technical information effectively using posters and oral presentations.

Audience: Graduate

**BSE 901 – GRADUATE RESEARCH SEMINAR**

1 credit.

Presentation, evaluation, and discussion of Biological Systems Engineering graduate student thesis and non-thesis research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 10 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate (in both verbal and written formats) the quality of professional or academic research presentations.

Audience: Graduate

2. Apply the principles of ethical and professional conduct.

Audience: Graduate

3. Analyze peer-reviewed research within a select subject area.

Audience: Graduate

4. Communicate field specific information effectively with a professional/academic audience.

Audience: Graduate

**BSE 990 – RESEARCH**

1-12 credits.

Independent laboratory research in preparation of a graduate thesis under supervision of a faculty member

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**BSE 999 – SPECIAL PROBLEMS**

1-3 credits.

In-depth study of a research or design and development problem under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

## BIOLOGY (BIOLOGY)

**BIOLOGY/ZOOLOGY 101 – ANIMAL BIOLOGY**

3 credits.

General biological principles. Topics include: evolution, ecology, animal behavior, cell structure and function, genetics and molecular genetics and the physiology of a variety of organ systems emphasizing function in humans.

**Requisites:** Not open to students with credit for BOTANY/BIOLOGY/ZOOLOGY 151 or 152

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**BIOLOGY/ZOOLOGY 102 – ANIMAL BIOLOGY LABORATORY**

2 credits.

General concepts of animal biology at an introductory level emphasizing the evolutionary relationships between animals. Learn about general body plans and strategies used to accomplish the basic tasks of staying alive in major animal groups using preserved and live animals. Study the diversity within each group of animals by integrating the body plans with the lifestyle and ecology of animals. Dissections of earthworm, freshwater mussel, squid, sea star, and rat aid the study of these general principles.

**Requisites:** Not open to students with credit for BOTANY/BIOLOGY/ZOOLOGY 151 or 152

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**BIOLOGY/BOTANY 130 – GENERAL BOTANY**

5 credits.

Introduction to the basic principles and concepts of the biology of plants. an integrative approach stressing evolutionary sequences and the relationship between structure and function at succeeding levels of organization: molecule, cell, organism, population, community. Correlated lectures, laboratories, and discussions.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BIOLOGY/BOTANY/ZOOLOGY 151 – INTRODUCTORY BIOLOGY**

5 credits.

Topics include: cell structure and function, cellular metabolism (enzymes, respiration, photosynthesis), information flow (DNA, RNA, protein), principles of genetics and selected topics in Animal Physiology.

**Requisites:** Not open to students with credit for BIOLOGY/ZOOLOGY 101, 102 or BIOLOGY/BOTANY 130

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BIOLOGY/BOTANY/ZOOLOGY 152 – INTRODUCTORY BIOLOGY**

5 credits.

Topics include: selected topics in plant physiology, a survey of the five major kingdoms of organisms, speciation and evolutionary theory, and ecology at multiple levels of the biological hierarchy.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151

**Course Designation:** Gen Ed - Communication Part B

Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BIOLOGY 299 – DIRECTED STUDIES**

1-4 credits.

Introductory directed study as arranged with a faculty member. Open only to students declared in Biology.

**Requisites:** Consent of instructor

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**BIOLOGY 375 – SPECIAL TOPICS**

1-5 credits.

Introductory special topics on contemporary issues relevant to studying biology.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**BIOLOGY 399 – INTERNSHIP/FIELD EXPERIENCE**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor. Open only to students declared in Biology.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**BIOLOGY/GENETICS 522 – COMMUNICATING EVOLUTIONARY BIOLOGY**

2-3 credits.

Exposure to diverse topics in contemporary evolutionary biology and development of critical thinking and communication skills. Most weeks guest lecturers present their own primary research on a specialized topic in evolutionary biology. Seminars include perspectives from genetics, ecology, geoscience, zoology, botany, microbiology, systematics, molecular biology, and integrative research. Some weeks feature special topics and discussions on pedagogical, legal, outreach, or other issues in evolutionary biology. Includes thinking critically about methodology, experimental design and interpretation, and how conclusions are reached in evolutionary biology by reading primary and secondary literature, attending seminars, discussing topics with speakers and other students, and preparing a written report. The 3-credit version of the course delves deeper into communication of evolutionary biology to researchers, undergraduates, K-12 students, and the general public.

**Requisites:** GENETICS 466, 468, ZOOLOGY/ANTHRO/BOTANY 410, or BIOCORE 381, or concurrent enrollment

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the ability to critically read and comprehend primary scientific literature from diverse areas of evolutionary biology.

Audience: Undergraduate

2. Comprehend and critically evaluate oral research presentations in the field of evolutionary biology.

Audience: Undergraduate

3. Participate effectively in discussions of scientific research in the field of evolutionary biology.

Audience: Undergraduate

4. Write a clear and concise review of a selected topic in evolutionary biology and a critique of a research seminar in that area.

Audience: Undergraduate

5. Synthesize and apply knowledge from other didactic courses and personal experiences in discussions of scientific research.

Audience: Undergraduate

**BIOLOGY 681 – SENIOR HONORS THESIS**

2-3 credits.

Individual study for seniors completing theses as arranged with a faculty member for an Honors program. Open only to students declared in Biology.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BIOLOGY 682 – SENIOR HONORS THESIS**

2–3 credits.

Individual study for seniors completing theses as arranged with a faculty member for an Honors program. Open only to students declared in Biology.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2025**BIOLOGY 691 – SENIOR THESIS**

2–3 credits.

Individual study for seniors completing theses as arranged with a faculty member. Open only to students declared in Biology.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**BIOLOGY 692 – SENIOR THESIS**

2–3 credits.

Individual study for seniors completing theses as arranged with a faculty member. Open only to students declared in Biology.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**BIOLOGY 699 – DIRECTED STUDIES**

1–4 credits.

Advanced directed study as arranged with a faculty member. Open only to students declared in Biology.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

## BIOLOGY CORE CURRICULUM (BIOCORE)

**BIOCORE 181 – BECOMING A SCIENTIST: DOING BIOLOGY RESEARCH**

2 credits.

Orientation to biology research on campus, work in a research team to investigate a novel research question, and do biology research on a choice of topics: from ecology and physiology to cell biology. Emphasis is on critical thinking required in designing and conducting experiments, analyzing and interpreting data, and communicating findings orally and in writing.

**Requisites:** None**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Apply approaches for being a successful college student

Audience: Undergraduate

2. Communicate what biology research looks like, sounds like, and feels like at UW Madison

Audience: Undergraduate

3. Do biology research and engage as a member of a biology research community

Audience: Undergraduate

**BIOCORE 381 – EVOLUTION, ECOLOGY, AND GENETICS**

3 credits.

Basic principles of ecology and interrelations between individuals, populations, communities, ecosystems and their environment; transmission genetics and introduction to population genetics; origin of life, evolutionary mechanisms, ancestral relationships among species, and the diversity of life.

**Requisites:** Declared in Biology Core Curriculum Honors Certificate

**Course Designation:** Gen Ed – Communication Part B

Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand what we know, how we know, and what we don't know in ecology, transmission genetics and evolution at the intermediate level

Audience: Undergraduate

2. Apply scientific theory, concepts, reasoning, and quantitative and qualitative approaches to understand and solve problems

Audience: Undergraduate

3. Use terminology accurately and effectively within appropriate conventions of the discipline

Audience: Undergraduate

4. Find, evaluate and relate relevant information found in primary scientific literature using core library resources

Audience: Undergraduate

5. Build a logical argument in writing based on critical reading, and use of evidence and scientific reasoning

Audience: Undergraduate

6. Analyze a problem using a systems approach, recognizing levels of biological scale and organization

Audience: Undergraduate

7. Work as a member of a productive, collaborative group

Audience: Undergraduate

8. Demonstrate scientific communication skills and the ability to translate scientific concepts to a broader community using appropriate style and disciplinary conventions

Audience: Undergraduate

**BIOCORE 382 – EVOLUTION, ECOLOGY, AND GENETICS LABORATORY**

2 credits.

Writing-intensive with opportunities to make observations and generate and test questions. Includes ecology field trips and research projects that focus on genetics and evolution.

**Requisites:** BIOCORE 381 or concurrent enrollment

**Course Designation:** Gen Ed – Communication Part B

Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BIOCORE 383 – CELLULAR BIOLOGY**

3 credits.

Cellular and molecular basis of life. The main themes are the structure and function of cells and organelles, the flow of energy in cells, and the storage, expression, and regulation of genetic information.

**Requisites:** BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BIOCORE 384 – CELLULAR BIOLOGY LABORATORY**

2 credits.

Writing-intensive with opportunities to generate and test questions utilizing concepts and procedures of cell biology. Includes research projects in subcellular fractionation, protein structure and enzyme catalysis, molecular genetics of *C.elegans* worms, and signal transduction in yeast.

**Requisites:** BIOCORE 383 or concurrent enrollment

**Course Designation:** Gen Ed – Communication Part B

Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BIOCORE 401 – PEER MENTORING**

1 credit.

Develops mentoring, group facilitation, leadership, and interpersonal skills used in peer learning and leading mentored study groups. Focuses on the pedagogy, skills, and effective techniques used to facilitate learning in small groups. Discuss lower order to higher order cognitive levels using Blooms Taxonomy, and reciprocal mentor observations.

**Requisites:** BIOCORE 381, 383, and (BIOCORE 382 or 384)

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BIOCORE 485 – PRINCIPLES OF PHYSIOLOGY**

3 credits.

Study the physiology of and consider how plants and animals interact with their environments to survive, obtain nutrients, exchange gases, and reproduce, also how the complex systems of neural and endocrine regulation in animals and hormonal and environmental regulation in plants allow cells and organs to communicate.

**Requisites:** BIOCORE 383

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Frame biological questions about physiological systems, formulate testable hypotheses to guide in answering the questions, design experiments to test hypotheses (including appropriate controls), and predict/recognize/graph data that support these hypotheses.

Audience: Undergraduate

2. Build logical arguments about the operation of physiological systems based on evidence.

Audience: Undergraduate

3. Use and manipulate basic mathematical equations that model physiological systems.

Audience: Undergraduate

4. Integrate past experience, accumulated knowledge, and creativity to solve complex physiological problems.

Audience: Undergraduate

5. Recognize diversity in organismal design and response to environmental challenges

Audience: Undergraduate

6. Define the components of regulatory systems, propose models to explain observed physiological phenomena, and explain the fundamental role of regulation in physiological processes.

Audience: Undergraduate

7. Explain and give specific examples to demonstrate how structure – function relationships underlie/determine physiological phenomena.

Audience: Undergraduate

8. Evaluate the reliability and validity of scientific information.

Audience: Undergraduate

9. Use scientific terminology precisely and appropriately.

Audience: Undergraduate

10. Demonstrate effective scientific discourse as a member of a group.

Audience: Undergraduate

**BIOCORE 486 – PRINCIPLES OF PHYSIOLOGY LABORATORY**

2 credits.

Experience the process of science by collaborating on independent experiments to investigate your questions about animal and plant physiology. Emphasis is on critical thinking required in designing and conducting experiments, analyzing and interpreting data, and communicating findings orally and in writing.

**Requisites:** BIOCORE 485 or concurrent enrollment

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Appropriately utilize Biocore 485 lecture concepts in an applied setting.

Audience: Undergraduate

2. Engage in the process of science, including the problem-solving involved in designing and executing experiments, and the critical thinking required to carefully analyze and interpret results.

Audience: Undergraduate

3. Work with tools & procedures to investigate biology.

Audience: Undergraduate

4. Concisely, clearly, and precisely communicate your plans and findings to others using written and oral communication

Audience: Undergraduate

5. Utilize quantitative reasoning skills (statistical analysis skills).

Audience: Undergraduate

6. Work as a member of a productive, collaborative research team

Audience: Undergraduate

7. Build on, apply, and integrate concepts & skills that you learn in other Biocore courses.

Audience: Undergraduate

8. Contribute to a safe, sustainable, socially and ethically responsible learning environment

Audience: Undergraduate

**BIOCORE 587 – BIOLOGICAL INTERACTIONS**

3 credits.

A capstone course to build on and integrate the knowledge and skills gained in previous Biocore coursework through readings and analysis of primary scientific literature. Work in small groups to analyze current and emerging topics through the lens of scientific research. Topics include signaling pathways, systems biology, genetic disease, and cancer.

**Requisites:** BIOCORE 485**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2025**BIOCORE 699 – DIRECTED STUDY**

1-3 credits.

Independent mentored study as arranged with a faculty member

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

## BIOMEDICAL ENGINEERING (B M E)

**B M E 1 – COOPERATIVE EDUCATION PROGRAM**

1 credit.

Work experience which combines classroom theory with practical knowledge of operations providing a background upon which to base a professional career in industry.

**Requisites:** Sophomore standing**Course Designation:** Workplace – Workplace Experience Course**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Undergraduate

**B M E 200 – BIOMEDICAL ENGINEERING DESIGN**

2 credits.

Collaborate with students in B M E 300 on a client-centered biomedical engineering design project to learn concept generation, product analysis, specifications, evaluation, regulation, and ethics.

**Requisites:** Sophomore standing and declared in Biomedical Engineering**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Audience: Undergraduate

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Audience: Undergraduate

3. an ability to communicate effectively with a range of audiences

Audience: Undergraduate

4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Audience: Undergraduate

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Audience: Undergraduate

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Audience: Undergraduate

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Audience: Undergraduate

**B M E 201 – BIOMEDICAL ENGINEERING DESIGN AND FUNDAMENTALS**

3 credits.

Fundamentals of biomedical engineering and principles of design including the design process, standards, documentation, inclusion in design and research methods. Hands-on skills including electronics, programming, computer-aided design, machining, safety training, microscopy, cell and tissue engineering principles and fabrication of physical prototypes.

**Requisites:** B M E 200**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Audience: Undergraduate

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Audience: Undergraduate

3. an ability to communicate effectively with a range of audiences

Audience: Undergraduate

4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Audience: Undergraduate

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Audience: Undergraduate

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Audience: Undergraduate

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Audience: Undergraduate

**B M E 300 – BIOMEDICAL ENGINEERING DESIGN AND LEADERSHIP**

3 credits.

Work on a client-centered biomedical engineering design project to learn leadership styles, concept generation, product analysis, specifications, evaluation, regulation, and ethics. Provide leadership and mentorship to students in B M E 200.

**Requisites:** B M E 201**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Audience: Undergraduate

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Audience: Undergraduate

3. an ability to communicate effectively with a range of audiences

Audience: Undergraduate

4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Audience: Undergraduate

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Audience: Undergraduate

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Audience: Undergraduate

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Audience: Undergraduate

### **B M E 301 – BIOMEDICAL ENGINEERING DESIGN AND COMMUNICATION**

3 credits.

Technical communication for biomedical engineering practice applied to real-world, client-based projects including research methods, documentation, preparing and critiquing reports, ethical problem solving, diversity and inclusion, presenting, and professional development.

**Requisites:** Satisfied Communications A requirement and B M E 201

**Course Designation:** Gen Ed – Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics  
Audience: Undergraduate

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors  
Audience: Undergraduate

3. share research, design ideas, testing plans and results in writing and in presentations to both peers and professionals  
Audience: Undergraduate

4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts  
Audience: Undergraduate

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives  
Audience: Undergraduate

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions  
Audience: Undergraduate

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies  
Audience: Undergraduate

8. identify and make skillful use of relevant, reliable, and high-quality research sources appropriate for the design project  
Audience: Undergraduate

9. make productive use of the writing process, including brainstorming, outlining, drafting, incorporating feedback, and revising, to develop a fledgling idea into a formal paper, presentation, and project  
Audience: Undergraduate

10. make use of expressive conventions and protocols (e.g., organization, content, presentation, formatting) consistent with technical communication  
Audience: Undergraduate

### **B M E 310 – BIOINSTRUMENTATION**

3 credits.

Bioinstrumentation covering clinical and research measurements. Laboratory experiments complement the lectures.

**Requisites:** (CHEM 104, 109, or 116), MATH 222, and (PHYSICS 202, 208, or 248), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Solve mathematical problems for electrical and electronic circuits

Audience: Undergraduate

2. Employ simulation tools to analyze electrical and electronic circuits  
Audience: Undergraduate

3. Design and build basic instrumentation system for measuring physiological and biological signals  
Audience: Undergraduate

4. Program a microcontroller to acquire and process physiological and biological signals  
Audience: Undergraduate

5. Perform experiments using the instrumentation system, analyze data and draw conclusions  
Audience: Undergraduate

### **B M E 315 – BIOMECHANICS**

3 credits.

An introduction to the mechanical behavior of biological tissues and systems. Specific topics include: structure and function of biological tissues, mechanical properties of biological tissues, and analysis of specific tissues (i.e. bone, muscle, and soft connective tissues).

**Requisites:** (E M A 303 or M E 306), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply mechanical equilibrium analyses to compute forces acting on tissues, organs and structures within the human body

Audience: Undergraduate

2. Examine mechanical stress and deformation associated with the loading of biological tissues  
Audience: Undergraduate

3. Analyze, interpret and present data collected during experiments in biomechanics  
Audience: Undergraduate

4. Describe the relevance of mechanics for investigating biological systems at scales ranging from cellular to the whole body  
Audience: Undergraduate

**B M E 325 – APPLIED STATISTICS FOR BIOMEDICAL ENGINEERS**  
 3 credits.

Learn and apply the fundamentals of descriptive and inferential statistics to analyze data and present the results in appropriate graphical formats. Emphasis will be on applications commonly encountered in biomedical engineering including t-tests, linear regression, analysis of variance, diagnostic tests, ROC curves, and methods for graphing and presenting data. Examples and practice problems will be drawn from biomedical research. Learn how to analyze data and interpret statistical analysis presented in research papers, and will get practical hands-on experience implementing these tools during class in a computer lab setting.

**Requisites:** Declared in Biomedical Engineering and MATH 222

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. interpret statistics that are presented and recognize statistical evidence that supports a conclusion  
 Audience: Undergraduate

2. apply descriptive statistical analysis to data  
 Audience: Undergraduate

3. make inferences based on sampled data (test a hypothesis)  
 Audience: Undergraduate

4. present data and statistical analysis in appropriate graphical format  
 Audience: Undergraduate

**B M E 330 – ENGINEERING PRINCIPLES OF MOLECULES, CELLS, AND TISSUES**  
 4 credits.

Introduction to the fundamental principles of kinetics and transport that are relevant for the analysis of biological systems. Topics covered include concepts of reaction rate, stoichiometry, equilibrium, momentum/mass transport, and the interaction between transport and kinetics in biological systems.

**Requisites:** (E M A 201, PHYSICS 201, 207, or 247), (MATH 319, 320, or 375) and (CHEM 104, 109, or 116), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Assess the relationship between system variables based on dimensional homogeneity and dimensional analysis  
 Audience: Undergraduate

2. Convert a reaction system into a series of kinetic equations  
 Audience: Undergraduate

3. Recognize the parallels between different transport mechanisms  
 Audience: Undergraduate

4. Analyze kinetic and transport equations to determine dynamic and steady state behavior  
 Audience: Undergraduate

5. Evaluate how the physical principles of kinetics and transport constrain living organisms and impact the design and interpretation of biological experiments  
 Audience: Undergraduate

**B M E 389 – HONORS IN RESEARCH**  
 1-3 credits.

Undergraduate honors research projects supervised by faculty members.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct and report on independent biomedical engineering research  
 Audience: Undergraduate

2. Formulate hypotheses into experimental methods  
 Audience: Undergraduate

**B M E 399 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct and report on independent biomedical engineering research

Audience: Undergraduate

**B M E 400 – CAPSTONE DESIGN COURSE IN BIOMEDICAL ENGINEERING**

3 credits.

Applies classroom study and prior design course experiences for senior teams to solve a directed client-based biomedical engineering design project.

**Requisites:** (B M E 300 or B M E 301) and (B M E 310, 315, or PHM SCI/ B M E 430)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Audience: Undergraduate

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Audience: Undergraduate

3. an ability to communicate effectively with a range of audiences

Audience: Undergraduate

4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Audience: Undergraduate

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Audience: Undergraduate

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Audience: Undergraduate

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Audience: Undergraduate

**B M E 402 – BIOMEDICAL ENGINEERING CAPSTONE DESIGN II**

3 credits.

Work in a team to evaluate, refine, document and present the client-centered biomedical engineering design started in B M E 400.

**Requisites:** B M E 400

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Audience: Undergraduate

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Audience: Undergraduate

3. an ability to communicate effectively with a range of audiences

Audience: Undergraduate

4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Audience: Undergraduate

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Audience: Undergraduate

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Audience: Undergraduate

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Audience: Undergraduate

**B M E/M E 414 – ORTHOPAEDIC BIOMECHANICS - DESIGN OF ORTHOPAEDIC IMPLANTS**

3 credits.

Apply the design process for orthopaedic implants (total joint replacements). Topics include: library skills; joint anatomy; tissue properties; surgical approach; joint loading; implants materials; preclinical testing and analysis.

**Requisites:** Senior standing and M E 342, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply engineering mechanics (statics, dynamics, mechanics of materials) to analyze human joints

Audience: Both Grad & Undergrad

2. Describe sources and implications of patient-to-patient variability in functional anatomy, biomechanics, and disease states

Audience: Both Grad & Undergrad

3. Synthesize knowledge about functional anatomy, biomechanics, and disease states to define clinical needs and design inputs

Audience: Both Grad & Undergrad

4. Justify design decisions and testing plans based on rigorous engineering calculations through both written and oral communication

Audience: Both Grad & Undergrad

5. Formulate rigorous testing plans for design and device verification and validation based on established standards and/or guidance documents

Audience: Both Grad & Undergrad

6. Analyze interactions between multiple sources of variability

Audience: Graduate

**B M E/M E 415 – BIOMECHANICS OF HUMAN MOVEMENT**

3 credits.

An overview of experimental and modeling techniques used to study human movement. Specific topics will include locomotion, motion capture systems, force plates, muscle mechanics, musculoskeletal modeling, three dimensional kinematics, inverse dynamics, forward dynamic simulation and imaging based biomechanics. Homework and laboratory activities emphasize applications of movement biomechanics in orthopedics and rehabilitation.

**Requisites:** B M E 315 and M E 340, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe fundamental concepts and methods in movement biomechanics

Audience: Both Grad & Undergrad

2. Apply fundamental concepts and methods in biomechanics to acquire experience and gain confidence using engineering tools to study movement

Audience: Both Grad & Undergrad

3. Establish a framework for self-teaching and research through open-ended laboratory assignments and a research project

Audience: Both Grad & Undergrad

4. Constructively review and provide feedback on written research proposals related to movement biomechanics

Audience: Graduate

**B M E/PHM SCI 430 – BIOLOGICAL INTERACTIONS WITH MATERIALS**

3 credits.

Addresses the range of materials currently being utilized for various biomedical applications, the biological systems governing biomaterial applications, analytical techniques pertinent to biomaterial evaluation, and selected major medical applications in which biomaterials play an important role.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 383) and (CHEM 341 or 343)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate biology, material science, and engineering

Audience: Undergraduate

2. Evaluate the design of materials for specific biomedical applications

Audience: Undergraduate

3. Formulate experimental designs and demonstrate data analyses to assess biological responses to materials

Audience: Undergraduate

4. Describe the clinical utility and limitations of various materials for specific biomedical applications

Audience: Undergraduate

5. Demonstrate practical understanding of biomaterial-based laboratory safety and techniques

Audience: Undergraduate

**B M E/E C E 462 – MEDICAL INSTRUMENTATION**

3 credits.

Design and application of electrodes, biopotential amplifiers, biosensors, therapeutic devices. Medical imaging. Electrical safety. Measurement of ventilation, blood pressure and flow.

**Requisites:** E C E 340, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Solve complicated mathematical problems for electrical and electronic circuits

Audience: Both Grad & Undergrad

2. Employ simulation tools to test and analyze electronic circuits for measuring physiological signals

Audience: Both Grad & Undergrad

3. Design electronic schematics for advanced instrumentation system using software tools

Audience: Both Grad & Undergrad

4. Solder and build advanced instrumentation system for measuring physiological signals

Audience: Both Grad & Undergrad

5. Program a microcontroller to acquire and process physiological signals

Audience: Both Grad & Undergrad

6. Perform experiments using the instrumentation system, analyze data and draw conclusions

Audience: Both Grad & Undergrad

7. Demonstrate an ability to formulate, analyze and, independently design and build instrumentation system to measure physiological signals

Audience: Graduate

### **B M E/E C E 463 – COMPUTERS IN MEDICINE**

3 credits.

Study of microprocessor-based medical instrumentation. Emphasis on real-time analysis of electrocardiograms. Labs and programming project involve design of biomedical digital signal processing algorithms. Knowledge of computer programming language like C, C++ or Java, strongly encouraged.

**Requisites:** E C E 330 and (COMP SCI 200, 220, 300, 301, or placement into COMP SCI 300), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Solve complicated mathematical problems with design of digital filters for biomedical signals

Audience: Both Grad & Undergrad

2. Build electrocardiogram (ECG) instrumentation system to view their ECG and use it as an input to a microcontroller for signal analysis

Audience: Both Grad & Undergrad

3. Employ simulation tools to design and test a variety of linear digital filters

Audience: Both Grad & Undergrad

4. Perform experiments, analyze and interpret the performance of digital filters on a database of ECGs

Audience: Both Grad & Undergrad

5. Write microcontroller code for real-time processing of biomedical signals, particularly the ECG, to attenuate diverse noise sources and find clinically-significant features

Audience: Both Grad & Undergrad

6. Demonstrate an ability to formulate and, independently design and implement digital filters and algorithm to process biomedical signals

Audience: Graduate

### **B M E 489 – HONORS IN RESEARCH**

1-3 credits.

Biomedical engineering undergraduate honors research projects supervised by faculty members.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct and report on independent biomedical engineering research

Audience: Undergraduate

2. Formulate hypotheses into experimental methods

Audience: Undergraduate

3. Prepare and defend experimental results and conclusions

Audience: Undergraduate

### **B M E/H ONCOL/MED PHYS/PHYSICS 501 – RADIATION PHYSICS AND DOSIMETRY**

3 credits.

Interactions and energy deposition by ionizing radiation in matter; concepts, quantities and units in radiological physics; principles and methods of radiation dosimetry.

**Requisites:** (PHYSICS 323, 449 and MATH 320) or graduate/professional standing or declared in Medical Physics VISP

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use the physics of microscopic structures of nucleus, nuclear decay, electronic structure of atoms to calculate nuclear decay lifespan and solid state energy band structure  
Audience: Both Grad & Undergrad

2. Calculate the radiation power spectrum for an accelerating charge particle under different physical conditions  
Audience: Both Grad & Undergrad

3. Calculate cross-sections for the following interaction processes between photons and matter: Rayleigh scattering, photoelectric effect, Compton scattering, and pair production  
Audience: Both Grad & Undergrad

4. Calculate the scattering cross-section of Coulomb scattering and energy transfer cross-section in collisions processes and radiative energy loss processes  
Audience: Both Grad & Undergrad

5. Calculate radiation dose for both external photon beams, neutron beams, and charged particle beams  
Audience: Both Grad & Undergrad

6. Identify open research topics in radiation imaging, radiation therapy, and radiation protection fields  
Audience: Graduate

### **B M E/M E 505 – BIOFLUIDICS**

3 credits.

Introduction to the physics of biological fluid flow with an emphasis on the cardiovascular system including blood rheology, pulsatile flow, wave travel, and topics relevant to blood flow measurement and biomedical device design.

**Requisites:** B M E 330, CBE 320, M E 363, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the physical properties of a fluid and the consequence of such properties on fluid flow; compare and contrast non-Newtonian models for blood rheology  
Audience: Both Grad & Undergrad

2. State the conservation principles of mass, linear momentum, and energy for fluid flow  
Audience: Both Grad & Undergrad

3. Analyze systems using the conservation equations  
Audience: Both Grad & Undergrad

4. Identify the relevant parameters that govern a fluid system and use dimensional analysis to identify the fundamental variables that define flow  
Audience: Both Grad & Undergrad

5. Describe the flow dynamic metrics in different physiological or pathological conditions  
Audience: Both Grad & Undergrad

6. Identify the role of other professionals in biofluid mechanics  
Audience: Graduate

7. Foster skills to interact with clinical professionals  
Audience: Graduate

### **B M E 510 – INTRODUCTION TO TISSUE ENGINEERING**

3 credits.

Overview of tissue engineering, including discussion of cell sources, cell-material interactions, tailoring biomaterials, methods of culture and characterization of engineering tissues, ethical issues, concluding with case studies of specific types of tissue engineering. Optional laboratory exercises offered throughout semester.

**Requisites:** B M E/PHM SCI 430, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify the experimental assay that is appropriate to characterize a particular cellular behavior

Audience: Both Grad & Undergrad

2. Describe how to tailor mechanical properties, cell-material interactions, growth factor/gene delivery, and bioreactor conditions to match the needs of a biological system

Audience: Both Grad & Undergrad

3. Critically evaluate tissue engineering approaches

Audience: Both Grad & Undergrad

4. Assess a biological system and develop a tissue engineering strategy

Audience: Both Grad & Undergrad

5. Summarize and synthesize recent tissue engineering related research from various resources

Audience: Graduate

### **B M E 511 – TISSUE ENGINEERING LABORATORY**

1 credit.

Tissue engineering refers to the generation of biological substitutes to restore, maintain, or improve tissue function. Laboratory techniques are multi-disciplinary, from basic biological sciences, engineering, and biotechnology. Engineering approaches and analysis will be applied to these techniques.

**Requisites:** B M E 510 or concurrent enrollment, or graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and describe the biology of, growth conditions for and laboratory equipment used in tissue culture

Audience: Undergraduate

2. Design and conduct laboratory experiments, including making measurements and interpreting experimental data from living systems

Audience: Undergraduate

3. Apply knowledge of advanced mathematics and statistical analysis to evaluate scientific outcomes

Audience: Undergraduate

4. Communicate scientific findings from experimental results effectively

Audience: Undergraduate

### **B M E/M E 516 – FINITE ELEMENTS FOR BIOLOGICAL AND OTHER SOFT MATERIALS**

3 credits.

Finite element modeling of soft materials, with an emphasis on biological tissues. Basics of the finite element method, verification and validation methods, and selection of constitutive models. Emphasis on finite element modeling for materials that are generally nonlinear, and that generally undergo large deformation.

**Requisites:** (M E 306 or E M A 303), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Define the finite element method, explain its mathematical basis, and articulate alternatives

Audience: Both Grad & Undergrad

2. Justify the selection of a constitutive model for a particular modeling application

Audience: Both Grad & Undergrad

3. Design and complete validation and verification analyses

Audience: Both Grad & Undergrad

4. Build and analyze a finite element model, and present relevant results

Audience: Both Grad & Undergrad

5. Complete a term project using finite element analysis individually

Audience: Graduate

### **B M E 517 – BIOLOGY IN ENGINEERING SEMINAR**

1 credit.

Current topics at the interface of biology and engineering with special emphasis on the ways in which engineers have contributed to knowledge and advances in biology.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 381), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and describe a wide variety of engineering approaches that have advanced our understanding of biology

Audience: Undergraduate

2. Assimilate presented topics with relevant literature into writing

Audience: Undergraduate

### **B M E 520 – STEM CELL BIOENGINEERING**

3 credits.

Covers engineering approaches that are used to understand and manipulate stem cells. Concepts covered include: introduction to stem cell biology, quantitative modeling of stem cell signaling, methods to engineer the stem cell microenvironment, and the role of stem cells in tissue development and regeneration.

**Requisites:** (MATH 319 or 320), (ZOOLOGY 470, 570, or BIOCORE 383), and (CHEM 341 or 343), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the historical development and current state of stem cell engineering

Audience: Both Grad & Undergrad

2. Model stem cell signaling

Audience: Both Grad & Undergrad

3. Characterize the technical features and functions of stem cell therapy

Audience: Both Grad & Undergrad

4. Evaluate stem cell-based tissue development and regeneration

Audience: Both Grad & Undergrad

5. Demonstrate higher-order synthesis and analysis to address a current problem in stem cell bioengineering

Audience: Graduate

**B M E/MED PHYS 535 – INTRODUCTION TO ENERGY-TISSUE INTERACTIONS**

3 credits.

Explore physical interactions between thermal, electromagnetic and acoustic energies and biological tissues with emphasis on therapeutic medical applications.

**Requisites:** PHYSICS 202, 208, 248, or PHYSICS/MED PHYS 265, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Derive and solve bioheat transfer problems relevant to therapeutic hyperthermia and hypothermia

Audience: Both Grad & Undergrad

2. Explain changes at the tissue and cellular levels during thermal therapies

Audience: Both Grad & Undergrad

3. Analyze technologies that apply electromagnetic and acoustic energy to tissue

Audience: Both Grad & Undergrad

4. Discuss medical applications and regulatory guidelines/requirements involving energy-tissue interactions

Audience: Both Grad & Undergrad

5. Demonstrate an advanced ability to synthesize recent literature, formulate technical problems, and describe plausible solutions

Audience: Graduate

**B M E 545 – ENGINEERING EXTRACELLULAR MATRICES**

3 credits.

Overview of the structure, function and biophysical properties of extracellular matrix (ECM) proteins, followed by discussion of how control or manipulation of ECM protein expression and distribution impacts on cell and tissue function, concluding with impacts of engineering ECM for regenerative medicine.

**Requisites:** B M E/PHM SCI 430, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the structure and function of individual ECM components and their relevance to physiological and pathophysiological processes

Audience: Both Grad & Undergrad

2. Apply biological knowledge of the ECM to inform the manipulation, mimicking, or engineering of ECM-based systems

Audience: Both Grad & Undergrad

3. Critically evaluate ECM engineering approaches

Audience: Both Grad & Undergrad

4. Apply advanced knowledge of bioconjugate chemistry to design dynamic scaffold platforms

Audience: Graduate

**B M E 550 – INTRODUCTION TO BIOLOGICAL AND MEDICAL MICROSYSTEMS**

3 credits.

Introduction to the field of MEMS (Micro-Electro-Mechanical-Systems), as it applies to biology and medicine. Topics will cover methodology of traditional MEMS devices, how they can be incorporated with biological systems, and methods for micro-structuring biological materials.

**Requisites:** B M E 310 and (ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 383), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify prominent materials and their properties commonly used in fabrication of biomedical microdevices

Audience: Both Grad & Undergrad

2. Analyze and implement microfabrication techniques for patterning, lithography, etching and deposition

Audience: Both Grad & Undergrad

3. Understand and design fabrication processes with appropriate fabrication tools for biomedical microdevices

Audience: Both Grad & Undergrad

4. Describe the principles underlying the interface between biological samples and different microdevices

Audience: Both Grad & Undergrad

5. Analyze, demonstrate, and communicate recent scientific literature in the field of biomedical microdevices

Audience: Graduate

**B M E 556 – SYSTEMS BIOLOGY: MAMMALIAN SIGNALING NETWORKS**

3 credits.

Introduction to the experimental and mathematical modeling techniques used in systems biology through lectures and critical analyses of relevant publications with a primary focus on gene/protein networks and mammalian systems.

**Requisites:** (MATH 319, 320, or 375), (B M E 510, ZOOLOGY 470, 570, PSYCH/ZOOLOGY 523, or BIOCORE 383) and Junior Standing, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Describe the structure and function of individual extracellular matrix (ECM) components and their relevance to physiological and pathophysiological processes

Audience: Both Grad & Undergrad

2. Apply biological knowledge of the ECM to inform the manipulation, mimicking, or engineering of ECM-based systems

Audience: Both Grad & Undergrad

3. Critically evaluate ECM engineering approaches

Audience: Both Grad & Undergrad

4. Apply advanced knowledge of bioconjugate chemistry to design dynamic scaffold platforms

Audience: Graduate

**B M E/CBE 560 – BIOCHEMICAL ENGINEERING**

3 credits.

Properties of biological molecules; enzyme kinetics, enzyme reactors, and enzyme engineering; metabolic engineering; microbial growth kinetics; bioreactor design; bioseparations.

**Requisites:** Junior standing and (ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 383), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply principles of chemical engineering in the analysis and design of industrial biochemical processes

Audience: Both Grad & Undergrad

2. Describe the role chemistry plays in understanding how bio-molecules and bio-molecular systems work

Audience: Both Grad & Undergrad

3. Extract, communicate and critique key idea(s) from any work of the current technical literature

Audience: Both Grad & Undergrad

4. Identify opportunities for biochemical engineering to address societal needs (e.g., energy, health, materials, food, and the environment)

Audience: Both Grad & Undergrad

5. Demonstrate how chemical engineering principles can be applied to alter the molecular properties of a biological system

Audience: Graduate

**B M E/I SY E 564 – OCCUPATIONAL ERGONOMICS AND BIOMECHANICS**

3 credits.

Introduces engineers how to design manufacturing and industrial operations in which people play a significant role, so that human capabilities are maximized, physical stress is minimized, and workload is optimized. Examples and topics emphasize industrial applications.

**Requisites:** PSYCH/I SY E 349 or B M E 315, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate jobs, equipment, tools, products, and environments, in which people play a significant role, for health and safety hazards and the risk of injuries and illnesses

Audience: Both Grad & Undergrad

2. Devise how to reduce or eliminate physical stresses and the risk of injuries and illnesses in jobs, equipment, tools, products, and environments

Audience: Both Grad & Undergrad

3. Design jobs, workspaces and products for a diverse work population, to accommodate the variability of human dimensions strength, endurance, and physical capacity to do work

Audience: Both Grad & Undergrad

4. Design jobs equipment, tools, products, and environments so that human capabilities are maximized, physical stress is minimized, and workload is optimized

Audience: Both Grad & Undergrad

5. Identify fundamental physiological principles and biomechanical theories that are germane to the evaluation, design and reduction or elimination of stresses and strain in jobs, equipment, tools, products, and environments

Audience: Graduate

**B M E/MED PHYS 566 – PHYSICS OF RADIOTHERAPY**

3 credits.

Ionizing radiation use in radiation therapy to cause controlled biological effects in cancer patients. Physics of the interaction of the various radiation modalities with body-equivalent materials, and physical aspects of clinical applications.

**Requisites:** PHYSICS/B M E/H ONCOL/MED PHYS 501

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of the potentials and limits, with respect to fundamental physics, of ionizing radiation production and therapy

Audience: Both Grad & Undergrad

2. Apply the concepts and/or techniques of radiation physics in cancer therapy

Audience: Both Grad & Undergrad

3. Accurately compute radiation dose and dose delivery for clinically acceptable conditions

Audience: Both Grad & Undergrad

4. Communicate applied concepts in a clear and understandable manner

Audience: Undergraduate

5. Communicate complex applied concepts in a clear and understandable manner, including concepts of medical imaging, radiation biology, radiation production, and radiation detection as they apply to radiation physics in cancer therapy

Audience: Graduate

**B M E/MED PHYS 567 – THE PHYSICS OF DIAGNOSTIC RADIOLOGY**

4 credits.

Physics of x-ray diagnostic procedures and equipment, radiation safety, general imaging considerations; lecture and lab.

**Requisites:** MATH 234 and (PHYSICS 241 or 249) or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Learn the physics and technology of medical x-ray system design and the parameters that determine image contrast, noise, spatial resolution, and patient radiation dose.

Audience: Both Grad & Undergrad

2. Gain a detailed knowledge of x-ray sources, x-ray detectors, and data acquisition strategies used in radiography, mammography, fluoroscopy, angiography and computed tomography.

Audience: Both Grad & Undergrad

3. Apply a knowledge of x-ray systems and physics to analyze and compare the performance of different medical x-ray imaging systems.

Audience: Both Grad & Undergrad

4. Through laboratory modules, receive hands on experience concerning the first three objectives. This includes learning the proper means for evaluating the performance and conducting measurements on x-ray systems which are commonly done by a clinical medical physicist.

Audience: Both Grad & Undergrad

5. Identify the defining strengths and limitations with utilizing the imaging modalities for conducting research investigations of human physiology and disease.

Audience: Graduate

**B M E/MED PHYS 568 – MAGNETIC RESONANCE IMAGING (MRI)**  
2 credits.

Core course covering the physics associated with magnetic resonance imaging emphasizing techniques employed in medical diagnostic imaging. Major MRI topics include: physics of MR, pulse sequences, hardware, imaging techniques, artifacts, and clinical applications. At the completion of this course, students should have an understanding of the technical and scientific details of modern magnetic resonance imaging and its use in diagnosing disease. Graduate students who have not taken MATH 222 and PHYSICS 202 at UW-Madison must have the equivalent coursework in order to be successful in this course.

**Requisites:** Graduate/professional standing or (MATH 222 and PHYSICS 202, 208, 241, 244, 248 or 249)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Identify the mechanisms in which nuclear magnetic resonance harnessed for imaging

Audience: Both Grad & Undergrad

2. Differentiate the different MRI sequences used and the appearance of disease aspects in each of these sequences

Audience: Both Grad & Undergrad

3. Evaluate potential biological effects of imaging on patients and effects of patients on imaging

Audience: Both Grad & Undergrad

4. Contextualize the acquired knowledge to formulate research questions to solve specific clinical needs

Audience: Graduate

**B M E/MED PHYS 573 – MATHEMATICAL METHODS IN MEDICAL PHYSICS**

3 credits.

Mathematical fundamentals required for medical physics and biomedical applications, including signal analysis and mathematical optimization.

**Requisites:** (MATH 234 and 319), (MATH 234 and 320), or MATH 376 and (PHYSICS 202 or 208), graduate/professional standing, or declared in Medical Physics VISP

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Summarize the utility of signal analysis in one and several dimensions

Audience: Both Grad & Undergrad

2. Identify and apply convolutions and Fourier Transforms in one and several dimensions

Audience: Both Grad & Undergrad

3. Apply the properties of the Fourier Transform in medical physics and other biomedical settings

Audience: Both Grad & Undergrad

4. Illustrate the limitations of the Fourier transform, and recall the advantages of alternative signal analysis tools (e.g. wavelet transform)

Audience: Graduate

5. Distinguish between types of optimization problems, including convex vs non-convex, and unconstrained vs constrained

Audience: Both Grad & Undergrad

6. Recognize the relative performance of basic optimization algorithms

Audience: Both Grad & Undergrad

7. Formulate image reconstruction as an optimization problem

Audience: Both Grad & Undergrad

8. Formulate therapy planning as an optimization problem

Audience: Both Grad & Undergrad

9. Implement practical optimization algorithms using computational methods

Audience: Both Grad & Undergrad

**B M E/MED PHYS 575 – DIAGNOSTIC ULTRASOUND IMAGING**

2 credits.

Propagation of ultrasonic waves in biological tissues; principles of ultrasonic measuring and imaging instrumentation; design and use of currently available tools for performance evaluation of diagnostic instrumentation; biological effects of ultrasound.

**Requisites:** Graduate/professional standing or (MATH 234, 319, or 320 and PHYSICS 202 or 208)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Explain principles underlying ultrasound propagation and biological effects of ultrasound.

Audience: Both Grad & Undergrad

2. Apply knowledge of clinical uses and limitations/artifacts of ultrasound imaging.

Audience: Both Grad & Undergrad

3. Recall the technical details of modern medical ultrasound devices and methods to measure acoustic parameters.

Audience: Both Grad & Undergrad

4. Utilize and integrate ultrasound imaging approaches for diagnostic and therapeutic research and clinical applications.

Audience: Graduate

**B M E/MED PHYS 578 – NON-IONIZING DIAGNOSTIC IMAGING**

4 credits.

Covers the physics associated with magnetic resonance imaging and diagnostic ultrasound emphasizing techniques employed in medical diagnostic imaging. Major MRI topics include: physics of MR, pulse sequences, hardware, imaging techniques, artifacts, and spectroscopic localization. Ultrasound based topics covered include: propagation of ultrasonic waves in biological tissues, principles of ultrasonic measuring and imaging instrumentation, design and use of currently available tools for performance evaluation of diagnostic instrumentation, and biological effects of ultrasound. Gain an understanding of the technical and scientific details of modern non-ionizing medical magnetic resonance and ultrasound devices and their use in diagnosing disease.

**Requisites:** MATH 234, (MATH 319 or 320) and (PHYSICS 202, 208, 241 or 248), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Accurately describe, using the correct mathematics and terminology, how the signals for MRI and ultrasound are generated, the sensitivity of these techniques to tissue variations

Audience: Both Grad & Undergrad

2. Accurately describe, using the correct mathematics and terminology, spatial encoding methods for MRI and ultrasound and trade offs in imaging parameter and hardware selection

Audience: Both Grad & Undergrad

3. Identify and develop strategies to mitigate common artifacts

Audience: Both Grad & Undergrad

4. Understand how to apply the knowledge to their own research projects

Audience: Graduate

**B M E/MED PHYS 580 – THE PHYSICS OF MEDICAL IMAGING WITH IONIZING RADIATION**

4 credits.

Concepts and principles on the physics of medical imaging systems that form images using high energy photons are presented. Such systems are divided into two categories: (1) those based on the transmission of x-rays through the human body, including radiography, mammography, fluoroscopy, and computed tomography (CT), and (2) those based on the emission of gamma rays or annihilation radiation following radioactive decay of an internal radiolabeled molecule, including the gamma camera, single photon emission tomography (SPECT), and positron emission tomography (PET) and PET hybrid imaging systems. Emphasis is placed on understanding how physics, system design, and imaging technique determine image performance metrics such as contrast, signal-to-noise ratio, and spatial resolution. Clinical applications and radiation safety concepts are detailed for the different types of imaging systems.

**Requisites:** PHYSICS/B M E/H ONCOL/MED PHYS 501 and MED PHYS/B M E 573

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the physical principles underlying imaging technologies used in radiology and nuclear medicine: radiography, mammography, fluoroscopy, computed tomography (CT), scintigraphy, single-photon emission tomography (SPECT), and positron emission tomography (PET).

Audience: Both Grad & Undergrad

2. Describe each imaging modality in terms of a general imaging framework in which (i) a form of energy or probe is introduced to the body, (ii) a clinically interesting signal is generated within the body, and (iii) this signal is detected and spatially localized to form an image.

Audience: Both Grad & Undergrad

3. Apply physics and engineering concepts to understand how the design and operation of an imaging system determines the contrast, noise, and spatial resolution of the images produced by the system.

Audience: Both Grad & Undergrad

4. Differentiate the characteristics of radiotracers that make them suitable for research and clinical applications in human physiology.

Audience: Both Grad & Undergrad

5. Identify the defining strengths and limitations with utilizing the imaging modalities for conducting research investigations of human physiology and disease.

Audience: Graduate

**B M E 601 – SPECIAL TOPICS IN BIOMEDICAL ENGINEERING**

1-3 credits.

Directed study projects as arranged with instructor.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in biomedical engineering

Audience: Undergraduate

2. Apply key theories, concepts, and methods in biomedical engineering, using appropriate tools, processes, and/or software

Audience: Undergraduate

**B M E 602 – SPECIAL TOPICS IN BIOMEDICAL ENGINEERING**

1-3 credits.

Special topics in biomedical engineering for graduate students or both graduate and undergraduate students together.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in biomedical engineering

Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in biomedical engineering, using appropriate tools, processes, and/or software

Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in biomedical engineering

Audience: Graduate

**B M E 603 – SPECIAL TOPICS IN BIOINSTRUMENTATION AND MEDICAL DEVICES**

1-3 credits.

Various special topics in bioinstrumentation and medical devices.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in bioinstrumentation and medical devices

Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in bioinstrumentation and medical devices, using appropriate tools, processes, and/or software

Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in bioinstrumentation and medical devices

Audience: Graduate

**B M E 604 – SPECIAL TOPICS IN BIOMEDICAL IMAGING AND OPTICS**

1-3 credits.

Various special topics in biomedical imaging and optics.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in biomedical imaging and optics

Audience: Both Grad &amp; Undergrad

2. Apply key theories, concepts, and methods in biomedical imaging and optics, using appropriate tools, processes, and/or software

Audience: Both Grad &amp; Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in biomedical imaging and optics

Audience: Graduate

**B M E/M E 605 – SPECIAL TOPICS IN BIOMECHANICS**

1-3 credits.

Various special topics in biomechanics.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in biomechanics

Audience: Both Grad &amp; Undergrad

2. Apply key theories, concepts, and methods in biomechanics, using appropriate tools, processes, and/or software

Audience: Both Grad &amp; Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in biomechanics

Audience: Graduate

**B M E 606 – SPECIAL TOPICS IN BIOMATERIALS, CELLULAR AND TISSUE ENGINEERING**

1-3 credits.

Various special topics in biomaterials, cellular and tissue engineering.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in biomaterials, cellular and tissue engineering

Audience: Both Grad &amp; Undergrad

2. Apply key theories, concepts, and methods in biomaterials, cellular and tissue engineering, using appropriate tools, processes, and/or software

Audience: Both Grad &amp; Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in biomaterials, cellular and tissue engineering

Audience: Graduate

**B M E/M E 615 – TISSUE MECHANICS**

3 credits.

Focus on solid mechanics of prominent musculoskeletal and cardiovascular tissues. Their normal and pathological behaviors (stiffness, strength, relaxation, creep, adaptive remodeling, etc.) in response to physiologic loading will be examined and quantified.

**Requisites:** M E 306 or E M A 303, or graduate/professional standing, or member of Engineering Guest Students**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Mathematically and conceptually define stress and strain tensors

Audience: Both Grad &amp; Undergrad

2. Calculate stress given a deformation and a constitutive relationship

Audience: Both Grad &amp; Undergrad

3. Describe key features of tissue mechanics

Audience: Both Grad &amp; Undergrad

4. Describe structure-function relationships for biological tissues

Audience: Both Grad &amp; Undergrad

5. Summarize and present current biomechanical knowledge on a specific tissue

Audience: Graduate

**B M E/MED PHYS/PHMCOL-M/PHYSICS/RADIOL 619 – MICROSCOPY OF LIFE**

3 credits.

Survey of state of the art microscopic, cellular and molecular imaging techniques, beginning with subcellular microscopy and finishing with whole animal imaging.

**Requisites:** PHYSICS 104, 202, 208, or 248 or PHYSICS/MED PHYS 265

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**B M E 640 – MEDICAL DEVICES ECOSYSTEM: THE PATH TO PRODUCT**

3 credits.

Development of medical devices for therapeutic or diagnostic purposes. Gap analysis, market analysis, reimbursement/distribution, regulatory approval, and manufacturing/supply chain development. Refinement and presentation of design ideas and corporate strategy within a team setting. Case studies of device design/manufacture including supply chain, intellectual property, pre-clinical testing, U.S. and European regulatory pathways and clinical trial design.

**Requisites:** B M E 402 or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an evolving competitive landscape analysis

Audience: Both Grad & Undergrad

2. Identify common issues in manufacturing/supply chain

Audience: Both Grad & Undergrad

3. Describe key aspects of clinical trial design

Audience: Both Grad & Undergrad

4. Discuss intellectual property both in theory and in practice

Audience: Both Grad & Undergrad

5. Articulate the differences between regulatory pathways in Europe and the United States

Audience: Graduate

6. Define key aspects of pre-clinical testing, including Quality Systems, Good Laboratory Practices, and Good Manufacturing Practices

Audience: Graduate

**B M E 651 – BIOPHOTONICS LABORATORY**

3 credits.

Learn and apply the fundamentals of optical imaging, microscopy and instrumentation via practical hands-on training with a specific emphasis on the life-sciences applications. Topics include constructing imaging systems using fundamental optical tools and instruments, illumination and aberrations, microscopy techniques, resolution and contrast measurement, optical spectroscopy, nanophotonics, bioimaging and biosensing.

**Requisites:** PHYSICS 202, 208, 248, MED PHYS/PHYSICS 265, E C E 320, 434, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and use optical tools and instruments and construct optical imaging systems

Audience: Both Grad & Undergrad

2. Measure optical resolution and summarize parameters, such as optical aberrations, illumination and collecting optical system settings, that affect resolution in optical imaging

Audience: Both Grad & Undergrad

3. Implement Kohler illumination, identify conjugate planes and illustrate Abbe theory of image formation on a hands-on optical hardware

Audience: Both Grad & Undergrad

4. Measure contrast in different microscopy techniques and identify parameters that contribute to signal-to-background

Audience: Both Grad & Undergrad

5. Measure and analyze light spectra using filters and spectrometers to identify different light sources, and nanoparticle and light interactions

Audience: Both Grad & Undergrad

6. Follow and implement written experiment protocols, collect, and analyze data, and write coherent reports presenting experimental findings

Audience: Both Grad & Undergrad

7. Identify and evaluate an optical imaging setup that was developed in a recently published journal article applying knowledge that was learned in class

Audience: Graduate

**B M E/I SY E 662 – DESIGN AND HUMAN DISABILITY AND AGING**

3 credits.

Design of products for persons with physical, sensory or cognitive impairments is covered as well as the design of standard mass market products. Interdisciplinary teams explore specific disabilities, then design a standard mass market product in competition with each other.

**Requisites:** Junior standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the access and usability issues that users with physical, sensory, or cognitive impairments due to age or permanent or temporary disability might experience when interacting with everyday products and environmental designs

Audience: Both Grad & Undergrad

2. Apply human factors principles of universal design to describe redesign solutions for common products and environmental designs to improve accessibility for all users

Audience: Both Grad & Undergrad

3. Identify barriers to access for users based on specific disabilities

Audience: Both Grad & Undergrad

4. Articulate common misconceptions and biases related to users with disabilities and use various data sources to discuss the reality of designing for users with disabilities or impairments

Audience: Both Grad & Undergrad

5. Identify usability issues for mass-market products and environmental designs using universal design and basic access principles

Audience: Both Grad & Undergrad

6. Propose methods for improving accessibility and usability using universal design and basic access principles

Audience: Both Grad & Undergrad

7. Articulate how social, institutional, and organizational structures and insufficiently designed systems and environments disadvantage various user groups, with special focus on aging and disabled users

Audience: Graduate

**B M E/CRB 670 – BIOLOGY OF HEART DISEASE AND REGENERATION**

3 credits.

Presents diverse topics in contemporary heart biology to facilitate understanding of biological, mechanistic, and experimental concepts of cardiac physiology, disease, and regeneration. Learn cellular and molecular mechanisms underlying heart physiology, function, disease and regenerative ability in various model systems. Includes thinking critically about methodology, experimental design and interpretation, and how conclusions are reached in heart biology through cutting-edge literature.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151 and BIOCHEM 501) or graduate/professional standing.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Gain knowledge of cardiovascular physiology and biology, use of genetic model organisms, stem cell biology and regenerative medicine (didactic portion of course; attendance, and exams).

Audience: Both Grad & Undergrad

2. Understand the main themes of heart biology by reading and discussing state-of-the-art literature (journal reviews; evaluated by lecturer for each journal review session).

Audience: Both Grad & Undergrad

3. Develop ability to critically evaluate published scientific research in the cardiovascular field by discussing with peers and instructors.

Audience: Both Grad & Undergrad

4. Analyze scientific data and methodology employed in the field of heart biology.

Audience: Graduate

5. Develop ability to create an experimental design for different types of heart biology research (such as hypothesis, methodology or phenomenon driven studies).

Audience: Graduate

6. Understand the current challenges for developing therapeutic strategies for heart disease and regeneration and propose feasible approaches to resolve these challenges.

Audience: Graduate

7. Understand the concepts of techniques and methods that are currently used for cardiac biology research.

Audience: Undergraduate

8. Describe the challenges for developing therapeutic strategies for heart disease and regeneration.

Audience: Undergraduate

**B M E 701 – SEMINAR IN BIOMEDICAL ENGINEERING**

1 credit.

Presentation of advancements in biomedical engineering research by leaders in the field, accompanied by critical analysis of related literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of technical presentations of current research in biomedical engineering

Audience: Graduate

2. Formulate and articulate a question regarding research presented in a technical seminar

Audience: Graduate

3. Analyze current scientific literature to draw connections to research presented in a technical seminar

Audience: Graduate

**B M E 702 – GRADUATE COOPERATIVE EDUCATION PROGRAM**

1-2 credits.

Work experience that combines classroom theory with practical knowledge of operations to provide students with a background on which to develop and enhance a professional career. The work experience is tailored for MS students from within the U.S. as well as eligible international students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Graduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Graduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Graduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Graduate

**B M E 703 – RESPONSIBLE CONDUCT OF RESEARCH FOR BIOMEDICAL ENGINEERS**

2 credits.

Develop an understanding of the elements involved in being a responsible member of the Biomedical Engineering research community. Topics include mentor/mentee relationships, identifying research problems, research integrity, ethics, regulations, and improving the scientific climate.

**Requisites:** Declared in Biomedical Engineering, Ph.D. or Biomedical Engineering: Research, M.S.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Interpret research ethics regulations and policies

Audience: Graduate

2. Differentiate research misconduct from sloppy behavior

Audience: Graduate

3. Identify biased or hostile behaviors

Audience: Graduate

4. Develop an individualized plan for graduate training

Audience: Graduate

### **B M E/MED PHYS 710 – ADVANCES IN MEDICAL MAGNETIC RESONANCE**

3 credits.

Addresses the theory and applications of magnetic resonance (MR) in medicine, by providing the necessary theoretical background to understand advanced MR techniques including magnetic resonance imaging (MRI).

**Requisites:** MED PHYS/B M E 568 or 578

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recall and apply principles of MR signal generation, relaxation, echo generation, and spatial encoding.

Audience: Graduate

2. Compose and test concepts of advanced MR image reconstruction concepts including partial Fourier MRI, parallel MRI, non-Cartesian MRI, compressed sensing.

Audience: Graduate

3. Apply and judge image processing methods for the analysis of MR images for biomarkers such as T1 and T2 mapping and metabolite maps.

Audience: Graduate

4. Summarize and organize advanced MR applications used in the clinic and research including quantitative MRI, BOLD MRI (fMRI), MR Angiography with and without contrast agents, motion sensitive MRI, perfusion and diffusion MRI, and PET-MRI.

Audience: Graduate

5. Organize and compose concepts on sampling theory, signal-to-noise, artifacts, and pulse sequences to design protocols for MRI data acquisition, reconstruction, or processing.

Audience: Graduate

6. Demonstrate scientific communication skills for MRI research by composing oral presentations, written reports, and critiquing the work of others.

Audience: Graduate

### **B M E/M E 715 – ADVANCED TISSUE MECHANICS**

3 credits.

Central topics in solid mechanics applied to soft tissues, including analysis of strain in the setting of large deformations, computation of stress in multiple experimental loading configurations, constitutive modeling of biomaterials using hyperelastic strain-energy functions, modeling tissue growth and remodeling, and the main theories for soft tissue failure will be covered. Application of finite elasticity theory in practical laboratory situations, and key papers and concepts in soft tissue mechanics.

**Requisites:** (M E/B M E 615, E M A 710, or 622 prior to Fall 2024) and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Compute strain from multiple different types of marker and image data

Audience: Graduate

2. Compute stresses using data from uniaxial, biaxial, and inflation mechanical tests

Audience: Graduate

3. Construct and utilize constitutive models appropriate for soft tissues

Audience: Graduate

4. Formulate and analyze continuum models of biological growth

Audience: Graduate

5. Identify common failure criteria applied to soft tissues

Audience: Graduate

**B M E 740 – BIOMANUFACTURING ENTREPRENEURSHIP**

3 credits.

Industry-relevant concepts of biotechnology innovation and translation, directly connecting lessons and classwork to real-world experience and career opportunities and promoting meaningful and sustained engagement between students and industry representatives. Diverse range of translational biotechnology principles, such as product development in biotechnology, regulating biotechnology products, and quality and compliance in biomanufactured products.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Recall, differentiate, and interpret key terms of art and jargon commonly associated with translation, commercial development, and regulation of novel biotechnologies and human therapies

Audience: Graduate

2. Describe common tools and strategies used by biotechnology industry to assess project progress, risk, and overall value

Audience: Graduate

3. Identify and evaluate business strategy and technology translation approach of a real biotech start-up company applying knowledge that was learned in class

Audience: Graduate

4. Produce a product-focused value proposition based on the student's research topic, or of a technology of interest to the student by integrating aspects of a business model canvas and constructing a strategic technology development plan

Audience: Graduate

**B M E/CHEM/MED PHYS 750 – BIOLOGICAL OPTICAL MICROSCOPY**

3 credits.

Covers several aspects of state-of-the-art biological and biophysical imaging with an emphasis on instrumentation, beginning with an overview of geometrical optics and optical and fluorescence microscopy. The bulk of the course will focus on advanced imaging techniques including nonlinear optical processes (multi-photon excitation, second harmonic generation, and stimulated Raman processes) and emerging super-resolution methods. Special emphasis will be given to current imaging literature and experimental design. Knowledge of physics-based optics [such as PHYSICS 202] strongly recommended.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Provide a clear, concise oral presentation critiquing a paper in the literature

Audience: Graduate

2. Write a hypothesis driven research proposal and present an oral defense

Audience: Graduate

3. Write a critical written assessment of literature papers

Audience: Graduate

4. Use course concepts to better design experiments and extract quantitative information

Audience: Graduate

5. Articulate a fundamental understanding of the function of a microscope

Audience: Graduate

**B M E 751 – BIOMEDICAL OPTICS AND BIOPHOTONICS**

3 credits.

The study and use of light in the life sciences. Interactions of light with cells and tissue can be used for imaging, measurement, diagnosis, and therapy. Applications include optical imaging, endoscopy, microscopy, resolution enhancement, adaptive optics, Optical Coherence Tomography (OCT), quantitative phase microscopy, spectroscopy (fluorescence, elastic scattering), diffuse optical tomography, and computational modeling of light transport in tissue. Fundamental skills, concepts, and theory used for these applications include geometric optics, lens design, Fourier transforms, polarization, interference, coherence, and scattering theory. Particular emphasis will be placed on current literature and cutting edge instruments and methods.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2021**Learning Outcomes:** 1. identify common optical components and describe their fundamental principles

Audience: Graduate

2. select an appropriate technique or technology best suited to solve a given research or medical problem and explain the rationale

Audience: Graduate

3. solve optical design problems including 1st order optical design of a scanning light microscope

Audience: Graduate

4. orally present and critique a recent journal article with a succinct description of the optical methods or concepts employed and evaluate the pros and cons

Audience: Graduate

**B M E 770 – NANOTECHNOLOGY IN NEUROSCIENCE**

2 credits.

Principles of micro- and nano-technology applied to neuroscience, including technological approaches applied to both in vitro and in vivo neurobiological experimentation and neurology. Fundamentals of recording and processing neural signals using nanoscale synthesis processes and technologies including nanostructured electrodes and their electrical, mechanical, and biochemical properties, active and passive 2D and 3D multielectrode arrays (MEAs), nanoscale transistors for subcellular recordings, nanoparticles, and nano-synthesized agents for recording and stimulating neural activity. Relevant theory of cell electrode coupling, electrophysiology, and neurochemical signaling. Knowledge of microfabrication technologies and biology [such as in B M E 550] recommended.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Evaluate nerve cell signaling and apply signal processing methods for analyzing neural signals

Audience: Graduate

2. Create nanofabrication processes for designing nano-scale patterning neural recording devices

Audience: Graduate

3. Analyze neuron-device interface and compute coupling using equivalent electrical circuit models

Audience: Graduate

4. Evaluate chemical synthesis techniques for biocompatible device coating, cell patterning, and nanoparticle-based sensing

Audience: Graduate

**B M E/E C E/MED PHYS 778 – MACHINE LEARNING IN ULTRASOUND IMAGING**

3 credits.

Concepts and machine learning techniques for ultrasound beamforming for image formation and reconstruction to image analysis and interpretation will be presented. Key machine learning and deep learning concepts applied to beamforming, compressed sampling, speckle reduction, segmentation, photoacoustics, and elasticity imaging will be evaluated utilizing current peer-reviewed publications.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically read and evaluate peer-reviewed journal papers describing machine learning applications in ultrasound imaging.

Audience: Graduate

2. Apply, implement and expand upon ideas from these publications to applications in ultrasound imaging.

Audience: Graduate

3. Present the results of their critical evaluation and implementation to the class.

Audience: Graduate

4. Write a research paper based on their findings suitable for publication.

Audience: Graduate

**B M E 780 – METHODS IN QUANTITATIVE BIOLOGY**

1 credit.

Focuses on understanding the key methods and principles of quantitative biology through a close reading of the primary literature. Topics covered will include deterministic and stochastic methods for modeling cellular systems, techniques in systems and synthetic biology, image processing tools and image analysis for biology, data-driven network models, genomic approaches, single-molecule approaches, and key computational biology tools. This course is intended for graduate students from a variety of backgrounds who are interested in pursuing quantitative biology during their graduate studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and describe the benefits and limitations of key methods used in the field of quantitative biology

Audience: Graduate

2. Critically evaluate experimental and theoretical papers in quantitative biology

Audience: Graduate

**B M E/CBE 783 – DESIGN OF BIOLOGICAL MOLECULES**

3 credits.

Introduction to the methodologies for engineering the structure and function of biological molecules, especially proteins. Develop an understanding for the integration of computation and experiment to address biological molecular engineering problems. Knowledge of biochemistry and cell biology [such as BIOCHEM 501 or ZOOLOGY 570] required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**B M E 790 – MASTER'S RESEARCH AND THESIS**

1-9 credits.

Under faculty supervision.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Integrate knowledge from a subset of the biological and physical sciences to address a research question

Audience: Graduate

2. Conduct a research study using experimental, computational, and/or theoretical approaches

Audience: Graduate

3. Communicate research results in a written thesis and defense

Audience: Graduate

**B M E 799 – ADVANCED INDEPENDENT STUDY**

1-5 credits.

Under faculty supervision.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct and report on an independent biomedical engineering project

Audience: Graduate

2. Appropriately utilize online and library resources

Audience: Graduate

3. Connect their research clearly to other research in their field of study

Audience: Graduate

**B M E 890 – PRE-DISSERTATION RESEARCH**

1-9 credits.

Under faculty supervision.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Integrate knowledge from a subset of the biological and physical sciences to address a research question

Audience: Graduate

2. Recognize and apply appropriate ethical and regulatory principles

Audience: Graduate

3. Conduct preliminary studies using experimental, computational, and/or theoretical approaches

Audience: Graduate

4. Generate and defend a research proposal

Audience: Graduate

**B M E/B M I/BIOCHEM/CBE/COMP SCI/GENETICS 915 –  
COMPUTATION AND INFORMATICS IN BIOLOGY AND MEDICINE**

1 credit.

Participants and outside speakers will discuss current research in computation and informatics in biology and medicine. This seminar is required of all CIBM program trainees.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Discuss how methods from computer science, statistics, information science and engineering are applied to problems in biology, medicine and population health

Audience: Graduate

2. Recognize and be able to define applications in translational bioinformatics, clinical informatics and public health informatics

Audience: Graduate

**B M E 990 – RESEARCH AND THESIS**

1-9 credits.

Under faculty supervision.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Integrate knowledge from a subset of the biological and physical sciences to address a research question

Audience: Graduate

2. Recognize and apply appropriate ethical and regulatory principles

Audience: Graduate

3. Conduct a research study using experimental, computational, and/or theoretical approaches

Audience: Graduate

4. Communicate research results in a written thesis and defense

Audience: Graduate

**B M E 999 – ADVANCED INDEPENDENT STUDY**

1-9 credits.

Under faculty supervision.

**Requisites:** Declared in Biomedical Engineering PhD or professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2019**Learning Outcomes:** 1. Conduct and report on an independent biomedical engineering project

Audience: Graduate

2. Appropriately utilize online and library resources

Audience: Graduate

3. Connect their research clearly to other research in their field of study

Audience: Graduate

## BIOMEDICAL SCIENCES AND TECHNOLOGIES (BIOMDSCI)

### BIOMDSCI 720 – SURVEY OF QUALITY ASSURANCE AND REGULATORY AFFAIRS IN BIOTECHNOLOGY

3 credits.

Success in the biotechnology industry is based on learning the language and understanding the development process utilized in bringing products to market. Focus on techniques used in the biotechnology industry to comply with the quality and regulatory requirements set forth by professional and governmental agencies in the effort to develop, manufacture, and commercialize products safely for the public.

**Requisites:** Declared in the Capstone Certificate in Quality Assurance and Regulatory Affairs in Biotechnology

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Recognize, foster, and apply principles of ethical and professional conduct.

Audience: Graduate

2. Describe local, national, and international agencies involved in ensuring quality and safety.

Audience: Graduate

3. Integrate how testing and manufacturing relies upon regulatory requirements.

Audience: Graduate

4. Demonstrate effective listening, written, verbal, and nonverbal communication skills.

Audience: Graduate

5. Analyze product development and project management innovations in terms of quality assurance and regulatory compliance requirements.

Audience: Graduate

### BIOMDSCI 721 – TOPICS IN QUALITY ASSURANCE AND REGULATORY AFFAIRS IN BIOTECHNOLOGY

3 credits.

Quality Assurance and Regulatory Affairs departments influence and facilitate successful product development within the biotechnology industry. Use a case study approach to explore and apply how quality assurance and regulatory compliance systems are used to bring medical devices to market. Practice how cross functional teams work together to meet regulatory standards of safety.

**Requisites:** Declared in the Capstone Certificate in Quality Assurance and Regulatory Affairs in Biotechnology

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Evaluate quality systems used in product development and commercialization of medical devices.

Audience: Graduate

2. Influence medical device development and project vision from quality assurance and regulatory affairs standpoints.

Audience: Graduate

3. Produce quality and regulatory strategies to achieve organizational objectives of medical devices.

Audience: Graduate

4. Compose effective communication with colleagues, customers, and regulatory agencies.

Audience: Graduate

5. Troubleshoot design and manufacturing issues of medical device development to meet regulatory standards.

Audience: Graduate

6. Monitor how diverse teams fit into organizational culture and successfully contribute towards product development.

Audience: Graduate

## BIOMDSCI 722 – LEADERSHIP IN QUALITY ASSURANCE AND REGULATORY AFFAIRS IN BIOTECHNOLOGY

3 credits.

Leaders in the Quality Assurance and Regulatory Affairs departments influence and facilitate bringing products to market within the biotechnology industry. Focus on building communication among cross functional teams; exercising writing to specific audiences; and meeting internal and external customer needs and expectations. Explore and apply how quality and regulatory affairs skills are managed within diverse product and project teams.

**Requisites:** Declared in the Capstone Certificate in Quality Assurance and Regulatory Affairs in Biotechnology

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Influence product and project vision from quality assurance and regulatory affairs standpoints.

Audience: Graduate

2. Develop strategies to achieve organizational objectives.

Audience: Graduate

3. Communicate effectively with colleagues, customers, and regulatory bodies.

Audience: Graduate

4. Illustrate leadership principles and use ethical behavior in challenging and ambiguous situations.

Audience: Graduate

5. Practice how diverse teams fit into organizational culture and successfully contribute from product development through submission, product launch, and post-market surveillance.

Audience: Graduate

## BIOMDSCI 800 – INTELLECTUAL PROPERTY, PATENTS AND LICENSING

2 credits.

Explore core concepts of how intellectual property, patent law, trademarks, copyrights, trade secrets, licensing and patent litigation specifically relate to the field of biotechnology. Evaluate how types of intellectual property work to protect a product or service. Explain the importance of patents in terms of licensing and technology transfer. Assess the unique aspects of early-stage intellectual property, including how it pertains to market dynamics, pricing and valuation.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Distinguish the principal types of intellectual property and how to protect a service or product.

Audience: Graduate

2. Assess technology transfer opportunities and its importance to the field of biotechnology.

Audience: Graduate

3. Evaluate market dynamics, pricing, and valuation of early-stage intellectual property.

Audience: Graduate

4. Deliver a technology assessment plan based on legal issues.

Audience: Graduate

**BIOMDSCI 801 – BIOTECHNOLOGY REGULATION AND ETHICS**

2 credits.

Explore political, legal, and ethical issues and paradigms that drive product development within the biotechnology industry with special emphasis given to how new drugs, devices, and biologics are regulated by local, national, and global agencies. Describe the regulations and ethics of human subjects' research. Develop skills to support how regulation and politics interact with business and finance to influence the formation and growth of biotechnology companies. Discuss how ethics and regulatory policy influence how biotechnology products come to market.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Examine the structure of the US legal and regulatory system.

Audience: Graduate

2. Explore ethical concerns regarding research on biotechnology and applications of biotechnology.

Audience: Graduate

3. Investigate content of key laws and regulations governing biotechnology research and its medical applications.

Audience: Graduate

4. Deliver an ethical argument that justifies a regulatory position.

Audience: Graduate

**BIOMDSCI 802 – BUSINESS OF BIOTECHNOLOGY: BUSINESS FUNDAMENTALS**

2 credits.

Discover the business challenges inherent in translating scientific discoveries into a successful business. Apply fundamental business principles that guide the operations of biotechnology companies.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Compare scientific and commercial success strategies.

Audience: Graduate

2. Evaluate how new product selection and development delivers a positive return on investment.

Audience: Graduate

3. Practice using financial tools to evaluate investments and monitor the financial progress of a company.

Audience: Graduate

4. Deliver a technology assessment plan utilizing business strategies.

Audience: Graduate

**BIOMDSCI 803 – MOLECULAR TECHNOLOGIES I: DIAGNOSTIC TESTING**

2 credits.

Assess various biotechnology techniques to determine effective and efficient methods used in biotechnology product development. Utilize analytical and communication skills when critiquing biotechnology applications that simulate both corporate and academic biotechnology settings.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Build effective communication skills and science theory and practice by developing a laboratory notebook and scientific presentations.

Audience: Graduate

2. Perform and evaluate molecular based technologies for genetic mutation detection.

Audience: Graduate

3. Identify the vocabulary of biotechnology and the science that underlies it through hands-on laboratory experience.

Audience: Graduate

4. Critically assess research studies and laboratory results for technology recommendations.

Audience: Graduate

**BIOMDSCI 810 – BIOTECHNOLOGY OPERATIONS**

4 credits.

Explore the six operational specialties of product development: Regulatory; Quality Assurance; Biomanufacturing; Quality Control; Nonclinical Development; and Clinical Development. Expand upon leadership skills by implementing biotechnology operation plans that successfully bring new products to market.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Examine key disciplines and principles required to successfully develop a variety of biotechnology products for targeted markets.

Audience: Graduate

2. Select the regulatory environments required for biotechnology product development.

Audience: Graduate

3. Design a biotechnology product development strategy, to clearly communicate objectives, and to provide leadership throughout implementation.

Audience: Graduate

4. Appraise the interplay between quality and efficacy in biotechnology product development relative to patient, regulatory, and business risk.

Audience: Graduate

5. Collaborate effectively to develop concise and accurate presentations and papers on key regulatory topics critical for biotechnology product development.

Audience: Graduate

**BIOMDSCI 812 – PROJECT MANAGEMENT AND LEADERSHIP**

2 credits.

Practice developing, modifying, and maintaining project management plans within the biotechnology and medical device industries. Hone leadership skills and experience by working among diverse teams and addressing situations faced by Project Managers.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Distinguish the components of technical project management, and the social and leadership skills that are needed to lead a team in the global biopharmaceutical or medical device industries.

Audience: Graduate

2. Apply effective leadership skills to work within diverse groups of professionals and communities as they address and solve problems, make critical decisions, and measure and mitigate risk.

Audience: Graduate

3. Design, use, and defend a project management plan using common project management methods.

Audience: Graduate

4. Discuss social forces that impact a team.

Audience: Graduate

**BIOMDSCI 813 – MOLECULAR TECHNOLOGIES II: BIOMANUFACTURING**

2 credits.

Develop, create, and present scientific poster presentation. Utilize and assess multiple technology platforms used in biomanufacturing. Develop and critique batch records used in biomanufacturing and bio-engineering environments.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Determine the importance of nucleic acid and protein analysis applications in biotechnology research and manufacturing.

Audience: Graduate

2. Perform and compare biomanufacturing strategies required to purify target biomolecules critical in biotechnology.

Audience: Graduate

3. Evaluate current technologies in agricultural biotechnology and protein engineering.

Audience: Graduate

4. Compose effective scientific poster presentations, biomanufacturing batch records, and genetic identity analysis reports.

Audience: Graduate

**BIOMDSCI 820 – EARLY DRUG DISCOVERY**

4 credits.

Examine the early drug discovery process, including target identification and validation, generation of diverse chemical libraries, assay development and high throughput screening, lead optimization by compound profiling, and drug targeting and delivery.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Assess the early drug discovery process and key steps, from target identification to nonclinical trials.

Audience: Graduate

2. Determine the scientific mechanism of one or more disease processes and assess how modulation of that target could treat or prevent a disease.

Audience: Graduate

3. Compare current and emerging methods for generating compound diversity in chemical libraries, natural products, and antibodies, including molecular modeling and structure-based drug design.

Audience: Graduate

4. Evaluate a technology used in drug discovery, understand the unmet need it addresses, and summarize the key information in a clear and concise way, both verbally and in a written format.

Audience: Graduate

**BIOMDSCI 822 – BUSINESS OF BIOTECHNOLOGY: COMMERCIALIZATION PATHWAYS**

2 credits.

Explore contemporary issues in the business of biotechnology and apply concepts critical to the success of modern biotechnology firms. Focus on modern problem-solving topics, including issues relating to corporate leadership, fundings sources for product development, customer identification, financial accounting management, and negotiation.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Justify risks and challenges associated with commercialization of early-stage research and innovation.

Audience: Graduate

2. Analyze the elements that make up a viable business opportunity.

Audience: Graduate

3. Evaluate strengths and limitations of various business models.

Audience: Graduate

4. Develop an argument to influence product buy in and support.

Audience: Graduate

**BIOMDSCI 823 – MOLECULAR TECHNOLOGIES III: ASSAY DEVELOPMENT**

2 credits.

Evaluate laboratory assays and methods used in primary, secondary, and in vitro ADMETox (Absorption, Distribution, Metabolism, Excretion, Toxicity) drug screening. Build scientific communication and critical thinking skills while working on team projects and analyzing scientific results.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Employ effective scientific communication methods demonstrating knowledge and skills when: writing scientific papers, preparing detailed scientific protocols, critiquing scientific journal articles in drug discovery, and developing and presenting detailed scientific presentations.

Audience: Graduate

2. Determine how protein kinase and cytochrome P450 enzyme assay technologies are used in the drug discovery process.

Audience: Graduate

3. Perform and evaluate multiple assay formats (luminescent, fluorescent, colorimetric) including, but not limited to: Cytochrome P450 enzymes, kinase assay technologies, cell culture techniques, and genome editing and CRISPR/Cas-9.

Audience: Graduate

4. Compare and contrast the roles that fluorescent microscopy, high content screening, and in vivo imaging play in the drug discovery process and biotechnology.

Audience: Graduate

5. Analyze and interpret scientific data and quality control measures as they relate to biotechnology and drug discovery, facilitating critical thinking.

Audience: Graduate

**BIOMDSCI 830 – PROFESSIONAL DEVELOPMENT AND EFFECTIVE MANAGEMENT**

1 credit.

Focus on effective management and career development techniques that lead to career success. Practice and apply skills needed to effectively lead synergistic team success within a biotechnology company. Explore different communication styles used to engage and assess employees. Expand career pathways through networking and by generating professional resumes and interviewing skills.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Evaluate team culture in terms of what really matters to set goals, enable results, and provide psychological safety.

Audience: Graduate

2. Create situational, behavioral, and impact driven feedback strategies so that both the employee and manager are successful.

Audience: Graduate

3. Prepare a career development plan that includes effective resumes, cover letters, networking, and employment research skills.

Audience: Graduate

4. Analyze skills required to influence, prioritize, and set goals in a biotechnology company.

Audience: Graduate

**BIOMDSCI 831 – ADVANCED BIOTECHNOLOGY: GLOBAL PERSPECTIVES**

3 credits.

Investigate state-of-the-art topics of global importance to biotechnology. Integrated skills and knowledge to achieve synergistic levels of understanding the importance of biotechnology today. Formulate the scientific, ethical, and regulatory standards used in the development of novel technologies around the globe. Increase awareness for intellectual collaboration and entrepreneurship opportunities.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify, research, and create a final research project with both faculty and peer input, from numerous perspectives (science, business, law, regulatory, ethical, and political).

Audience: Graduate

2. Evaluate an assigned special topic in global biotechnology, including stem cell applications, healthcare innovations, biomanufacturing issues, metagenomic and microbiome analysis, or agricultural biotechnology.

Audience: Graduate

3. Develop effective written and oral communication through a variety of formats to a variety of audiences.

Audience: Graduate

4. Build effective strategies for researching and critically assessing different biotechnologies.

Audience: Graduate

**BIOMDSCI 832 – BUSINESS OF BIOTECHNOLOGY: CORPORATE STRATEGY**

3 credits.

Examine how companies gain and sustain competitive advantages by utilizing business tools, methods, and strategies. Critique how company leaders make decisions under uncertainty. Integrate the knowledge and skills gained from prior studies (e.g., marketing, management, finance, accounting) to apply synergistic responses and insights when developing company-wide strategy.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze industry forces and environmental trends to distinguish industry potential and competitive advantage.

Audience: Graduate

2. Relate how companies add value across diverse lines of business through knowledge of Research and Development strategic management.

Audience: Graduate

3. Evaluate how negotiation and management skills guide strategic change efforts.

Audience: Graduate

4. Deliver business strategies to support company growth.

Audience: Graduate

**BIOMDSCI 834 – BIOTECHNOLOGY CAPSTONE**

1 credit.

Identify a global biotechnology problem, find a novel technical solution, analyze all aspects from a business, regulatory, and intellectual property perspective, and deliver a final written capstone thesis.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify an important global biotechnology-based problem and formulate a novel biotechnology-based solution to address it.

Audience: Graduate

2. Analyze the economic logic of the global biotechnology problem and solution. Consider customers, market, pricing, and competitors.

Audience: Graduate

3. Compose insightful business and technical questions to research including identifying effective resources and subject matter experts.

Audience: Graduate

4. Identify a company to implement your proposed solution to augment the company's current portfolio.

Audience: Graduate

5. Justify key regulatory, intellectual property, manufacturing, social, and/or political issues that could impact the success of the solution.

Audience: Graduate

6. Critique both technical and business considerations in a clear, concise, and logical manner to make credible technical and business solutions and recommendations.

Audience: Graduate

**BIOMDSCI 890 – BIOTECHNOLOGY INDEPENDENT STUDY**

1-3 credits.

Learning experience to further develop skills and apply them in an independent and/or research project with a faculty advisor.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Learning Outcomes:** 1. Apply concepts learned in coursework to real life professional experiences (academic or industry).

Audience: Graduate

2. Develop critical, analytical, and independent thinking skills using scientific, business, legal, and/or regulatory knowledge.

Audience: Graduate

3. Evaluate scientific, business, legal, and/or regulatory practices as an active team member.

Audience: Graduate

# BIOMOLECULAR CHEMISTRY (BMOLCHEM)

## BMOLCHEM/B M I/BIOCHEM/MATH 609 – MATHEMATICAL METHODS FOR SYSTEMS BIOLOGY

3 credits.

Provides a rigorous foundation for mathematical modeling of biological systems. Mathematical techniques include dynamical systems and differential equations. Applications to biological pathways, including understanding of bistability within chemical reaction systems, are emphasized.

**Requisites:** MATH 415 and (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recall and state the formal definitions of the mathematical objects and their properties in systems biology (e.g., reaction networks, reaction rate equations, mass-action kinetics models, detailed balanced and complex balanced systems, Lyapunov functions, etc.).

Audience: Both Grad & Undergrad

2. Use such definitions to argue that a mathematical object does or does not have the condition of being a particular type or having a particular property (e.g., reversible, weakly reversible, mass-action, detailed balanced, complex balanced, globally stable, oscillatory, persistent, permanent, etc.).

Audience: Both Grad & Undergrad

3. Recall and state the standard theorems of the field (e.g., the Horn-Jackson theorem, the deficiency zero theorem, theorems on characterization of mass-action systems, theorems on persistence and permanence, theorems on dynamical equivalence, etc.) and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Both Grad & Undergrad

4. Construct mathematical arguments related to the above definitions, properties, and theorems, including the construction of examples and counterexamples.

Audience: Both Grad & Undergrad

5. Convey arguments using English and appropriate mathematical terminology, notation and grammar.

Audience: Both Grad & Undergrad

6. Model real biological systems by means of systems of differential equations, and be able to use software (such as Matlab) for visualization of their dynamics. Example models could include: (i) Enzymes, substrates and saturating kinetics, (ii) Glycolytic oscillations, (iii) Cell cycle control, budding yeast cell cycle models, (iv) Activator-inhibitor and positive feedback systems.

Audience: Both Grad & Undergrad

7. Identify applications of course content in current areas of research.

Audience: Graduate

## BMOLCHEM/MICROBIO 668 – MICROBIOLOGY AT ATOMIC RESOLUTION

3 credits.

Three-dimensional protein structures form the basis for discussions of high resolution microbiology; how particular problems are solved with given protein architectures and chemistries and how themes of protein structure are modified and recycled.

**Requisites:** (BIOCHEM 501 or 507) and (MICROBIO 470 or 612) or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate proficient use of PyMol software for visualizing 3D structures.

Audience: Both Grad & Undergrad

2. Evaluate the quality of published structural models for biological macromolecules.

Audience: Both Grad & Undergrad

3. Identify common themes in structural biology which are used when addressing structural biology research questions.

Audience: Both Grad & Undergrad

4. Design and deliver a presentation to communicate scientific results to an audience of their peers.

Audience: Graduate

## BMOLCHEM 675 – ADVANCED OR SPECIAL TOPICS IN BIOMOLECULAR CHEMISTRY

1-3 credits.

Examines special topics in biomolecular chemistry. Topics and content will vary each semester and by section of the course.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in biomolecular chemistry.

Audience: Both Grad & Undergrad

2. Explore a new phenomenon or modality in the biomolecular chemistry area and apply the knowledge gained to research in the field.

Audience: Graduate

**BMOLCHEM 699 – SPECIAL RESEARCH PROBLEMS**

1-5 credits.

Self-directed work under the supervision and guidance of an Instructor and often in conjunction with a day-to-day mentor that is a graduate student or postdoc researcher in the instructor's group. Students normally participate in aspects of ongoing research projects.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply concepts learned in coursework to real life situations

Audience: Undergraduate

2. Read and effectively search scientific literature

Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

**BMOLCHEM 700 – PRACTICAL BIOPHYSICS**

3 credits.

Introduction to methods used in biophysical measurements. Thermodynamics and kinetics are introduced along with the theory and instrumentation used for several complementary biophysical approaches. Hands-on experimentation using state-of-the-art instrumentation and data interpretation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the strengths and weaknesses of several biophysical methods and use that knowledge to design biophysical experiments for their research.

Audience: Graduate

2. Explain the fundamentals of thermodynamics, kinetics, and fluorescence and practically apply this knowledge to modern research problems.

Audience: Graduate

3. Use data interpretation skills to interpret results from several biophysical instruments.

Audience: Graduate

4. Integrate their knowledge of biophysical methods in the form of an experimental plan within a grant application.

Audience: Graduate

**BMOLCHEM/BIOCHEM 701 – RESPONSIBLE CONDUCT IN BIOSCIENCE RESEARCH**

2 credits.

Introductory training in the practical aspects of being a graduate-level scientist and the professional standards and expectations of ethical researchers. Covers a wide variety of professional development topics, including choosing a research laboratory and a thesis mentor, transitioning to self-education, managing stress in graduate school, and the importance of diversity in science. Ethics topics include conflicts of interest, the protection of human subjects, the welfare of laboratory animals and workers, safe laboratory spaces, mentor and mentee responsibilities, collaborative research, peer review, data acquisition and data management practices, research misconduct, responsible authorship and publication, contemporary ethical issues in biomedical research, and the roles of responsible scientists in society. Covers all NIH-recommended topics for Responsible Conduct of Research, thus meeting the requirements for trainees involved in NIH-sponsored research programs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Evaluate and apply fundamental concepts and best practices in bioscience research conduct and research ethics

Audience: Graduate

2. Identify and meet individual and professional responsibilities and obligations to society

Audience: Graduate

3. Explore and implement activities for professional skills development and career management

Audience: Graduate

**BMOLCHEM 720 – EXPERIMENTAL DESIGN AND PARADIGMS IN CELLULAR BIOCHEMISTRY AND MOLECULAR BIOLOGY**

3 credits.

Covers following areas from historical to modern contexts: biochemistry of post-translational modification of proteins, model organisms, transcriptional switches, chromosome replication, and RNA in biological regulation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop critical thinking skills required to design and interpret an experiment in molecular and/or cellular biology

Audience: Graduate

2. Develop the writing skills relevant to preparing a grant proposal

Audience: Graduate

3. Gain insight into how the scientific method is applied in molecular and cellular biology

Audience: Graduate

4. Develop an ability to critically evaluate research literature

Audience: Graduate

**BMOLCHEM 901 – BIOMOLECULAR CHEMISTRY SEMINAR**

1 credit.

Critical review of selected topics in biomolecular chemistry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Gain exposure to a variety of relevant research topics, potentially leading to cross-disciplinary, collaborative research opportunities

Audience: Graduate

2. Identify principles and best practice for preparing and presenting a seminar

Audience: Graduate

3. Gain experience in evaluating and critiquing research presentations in light of those principles and best practices

Audience: Graduate

**BMOLCHEM/BIOCHEM 913 – SEMINAR-RIBOGROUP (ADVANCED)**

1 credit.

Student-led discussions of RNA-related problems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an understanding of current research questions in the field of RNA biology

Audience: Graduate

2. Become familiar with the approaches used to study RNA and its interactions with proteins

Audience: Graduate

3. Build a professional network with other RNA biologists on campus

Audience: Graduate

4. Develop techniques for presenting complex concepts to a diverse audience

Audience: Graduate

**BMOLCHEM 990 – ADVANCED BIOMOLECULAR CHEMISTRY AND RESEARCH**

1-12 credits.

Research supervised by individual faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Exhibit a broad understanding of general biochemical principles.

Audience: Graduate

2. Conduct independent research using a variety of approaches.

Audience: Graduate

3. Think critically to address research challenges.

Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research.

Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab.

Audience: Graduate

# BIostatISTICS AND MEDICAL INFORMATICS (B M I)

## B M I/POP HLTH 451 – INTRODUCTION TO SAS PROGRAMMING FOR POPULATION HEALTH

2 credits.

Use of the SAS programming language for the management and analysis of biomedical data.

**Requisites:** Declared in the Population Health, Epidemiology or Clinical Investigation graduate program.

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Create and modify SAS datasets using programming structures within the SAS Data Step (e.g. Do loops, If/Then/Else, Functions, and Arrays).

Audience: Graduate

2. Utilize various SAS Procedures to explore SAS datasets, to summarize information in SAS datasets, and to perform basic statistical analyses.

Audience: Graduate

3. Recognize common SAS program errors, identify strategies for debugging SAS programs, and implement general techniques to check and verify your coding.

Audience: Graduate

## B M I/STAT 541 – INTRODUCTION TO BIOSTATISTICS

3 credits.

Course designed for the biomedical researcher. Topics include: descriptive statistics, hypothesis testing, estimation, confidence intervals, t-tests, chi-squared tests, analysis of variance, linear regression, correlation, nonparametric tests, survival analysis and odds ratio. Biomedical applications used for each topic.

**Requisites:** Graduate/professional standing. Not open to students with credit for STAT 511 or POP HLTH/B M I 551

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand building blocks and fundamentals that support core themes of Biostatistics in the application of biomedicine and public health

Audience: Both Grad & Undergrad

2. Conduct basic statistical analyses of biomedical data

Audience: Both Grad & Undergrad

3. Use R for statistical computing

Audience: Both Grad & Undergrad

4. Critique methods and evidence from others' studies

Audience: Graduate

5. Collaborate effectively with biostatisticians

Audience: Graduate

**B M I/STAT 542 – INTRODUCTION TO CLINICAL TRIALS I**

3 credits.

Intended for biomedical researchers interested in the design and analysis of clinical trials. Topics include definition of hypotheses, measures of effectiveness, sample size, randomization, data collection and monitoring, and issues in statistical analysis.

**Requisites:** B M I/STAT 541

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop skills to critically review clinical trials literature

Audience: Graduate

2. Formulate focused research questions, specific aims, and key outcomes

Audience: Graduate

3. Recognize the strengths and weaknesses of alternative clinical trials designs and design components

Audience: Graduate

4. Develop related technical skills, including basic sample size calculations and survival analysis

Audience: Graduate

5. Write a clinical trial protocol with all its core components

Audience: Graduate

**B M I 544 – INTRODUCTION TO CLINICAL AND HEALTHCARE RESEARCH II**

3 credits.

Practical training and skills required in clinical and healthcare research; design, implementation, and conduct of clinical trials and health services research studies; protocol and informed consent development using protocol templates; regulatory requirements; human subjects research protections considerations; data and safety monitoring plans; data collection strategies and data management; strategies to recruit/retain diverse and equitable study participants; research study agreements; budget development and justification; federal, institutional, and sponsor-defined requirements; establishment of research infrastructures for participant safety and study success; preparation of investigator-INDs/ IDEs; and investigator responsibilities.

**Requisites:** STAT/B M I 542

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Apply applicable legal and regulatory responsibilities, liabilities, and accountabilities for clinical trials and health services research studies according to IRBs, HIPAA, CGP, FDA, NIH, ClinicalTrials.gov, and other applicable entities

Audience: Graduate

2. Apply and implement best practices for human subjects' protection

Audience: Graduate

3. Apply team science through working with multidisciplinary and interprofessional team

Audience: Graduate

4. Analyze requirements in conduct of a clinical trial or health services research study and implement the use of a protocol to standardize procedures

Audience: Graduate

5. Evaluate and select data collection processes and implement quality control and assurance processes

Audience: Graduate

6. Create a protocol and consent/assent processes and documents for a clinical trial or health services research study, as well as supportive components

Audience: Graduate

**B M I/POP HLTH 551 – INTRODUCTION TO BIOSTATISTICS FOR POPULATION HEALTH**

4 credits.

Designed for population health researcher. Topics include descriptive statistics, elementary probability, probability distributions, one- and two-sample normal inference (point estimation, hypothesis testing, confidence intervals), power and sample size calculations, one- and two-sample binomial inference, underlying assumptions and diagnostic work.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and recognize statistical and probability terminology, symbols, definitions, and formulas

Audience: Graduate

2. Explain the meaning, assumptions, and interrelationships of statistical and probability concepts and formulas

Audience: Graduate

3. Execute probability and statistical calculations from information provided

Audience: Graduate

4. State assumptions, conclusions and interpretation in terms of statistical and probability computations

Audience: Graduate

**B M I/POP HLTH 552 – REGRESSION METHODS FOR POPULATION HEALTH**

3 credits.

Introduction to the primary statistical tools used in epidemiology and health services research; multiple linear regression, logistic regression and survival analysis.

**Requisites:** STAT/B M I 541 or POP HLTH/B M I 551

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. State the assumptions underlying linear, logistic, survival and Poisson regression models, recognize and address violations of those assumptions, and estimate and interpret regression models to answer epidemiologic and public health research questions.

Audience: Graduate

2. Critique uses of linear, logistic, survival and Poisson regression models in the epidemiologic and public health literature.

Audience: Graduate

3. Translate epidemiologic concepts into statistical modeling assumptions, and explain statistical modeling assumptions in epidemiologic terms.

Audience: Graduate

4. Recognize applications that require methods beyond their expertise, and identify resources to learn about more advanced techniques.

Audience: Graduate

**B M I/COMP SCI 567 – BIOMEDICAL IMAGE ANALYSIS**

3 credits.

Hands-on introduction to biological and medical image analysis techniques. Topics include medical imaging formats, segmentation, registration, image quantification, and classification.

**Requisites:** (MATH 320, 340, 341, 345, or 375) and (STAT 511, 541, POP HLTH/B M I 551, MATH 331, MATH/STAT 431, 309, STAT 240, 301, 311, 324, 371, or STAT/F&W ECOL 571) or graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement the key principles of ideas from probability, statistics and computer vision algorithms used in medical image analysis

Audience: Undergraduate

2. Recognize which image analysis problems will benefit from which modeling approach

Audience: Undergraduate

3. Apply algorithms about image analysis tasks and implement algorithms and pipelines using a programming language

Audience: Undergraduate

4. Implement the building blocks taught in this course to independently learn and apply new, but related imaging analysis algorithms

Audience: Undergraduate

**B M I 573 – FOUNDATIONS OF DATA-DRIVEN HEALTHCARE**

3 credits.

Familiarize students with basic informatics principles and techniques to support clinical research and quality improvement studies from a perspective of data-driven approaches. Content includes information systems for study design; regulatory compliance; use of electronic health records data for research; data collection and acquisition; data security, storage, transfer, processing and analysis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Utilize informatics-based tools in translational research including locate relevant informatics tools; select appropriate informatics tools; and use those tools in research for managing and analyzing biomedical and health information.

Audience: Graduate

2. Describe the essential functions of the major clinical systems ( e.g., the EHR-- (electronic health record and its feeder systems, such as radiology and lab) that are relevant to healthcare analytics and quality improvement and the challenges to using these data for research.

Audience: Graduate

3. Explain the role of health information technology standards in the interoperability of research, clinical, and administrative information systems and on secondary use of data for Clinical Translational Research or CTS.

Audience: Graduate

4. Describe the essential information generation, management, analysis, transformation, summarization, and visualization methods that apply to healthcare analytics and quality improvement, such as clinical data; imaging data; consumer and patient reported data; and population-level and environmental exposure data.

Audience: Graduate

5. Identify and describe available methods for handling large-scale data for machine learning and medical language processing.

Audience: Graduate

6. Illustrate the nature of the contributions in consulting and/or collaborating with biomedical and health informaticians throughout the life cycle of clinical and translational research projects: use the terminology and principles of biomedical informatics; discriminate among the different subdomains of biomedical informatics; and enumerate the roles of biomedical informatics specialists.

Audience: Graduate

7. Identify how structure and organization of information in a domain can affect quality research foci through fundamental data categories and elements, terminologies and taxonomies, and ontologies.

Audience: Graduate

8. Identify, retrieve, and manage biomedical and health science knowledge through literature searches using advanced search techniques (MeSH, PubMed, Google Scholar, etc.).

Audience: Graduate

9. Discuss the fundamental principles and practices that address the ethical, legal, social, privacy, and security implications of bio- medical and health informatics.

Audience: Graduate

**B M I/COMP SCI 576 – INTRODUCTION TO BIOINFORMATICS**

3 credits.

Algorithms for computational problems in molecular biology. Studies algorithms for problems such as: genome sequencing and mapping, pairwise and multiple sequence alignment, modeling sequence classes and features, phylogenetic tree construction, and gene-expression data analysis.

**Requisites:** (COMP SCI 320 or 400) and MATH 222, graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the biology and significance of the most commonly measured molecules in molecular biology.

Audience: Undergraduate

2. Identify the primary computational problems associated with each type of biological data.

Audience: Undergraduate

3. Explain the major algorithms and approaches used to address the computational problems.

Audience: Undergraduate

4. Implement efficient algorithms for bioinformatic tasks through the use of the discussed approaches.

Audience: Undergraduate

5. Apply the discussed algorithms to novel but closely-related tasks.

Audience: Undergraduate

6. Understand the methods covered such that parts of the methods sections of published biological papers are interpretable.

Audience: Undergraduate

7. Begin to gain the qualifications of a bioinformatician.

Audience: Undergraduate

**B M I/BIOCHEM/BMOLCHEM/MATH 609 – MATHEMATICAL METHODS FOR SYSTEMS BIOLOGY**

3 credits.

Provides a rigorous foundation for mathematical modeling of biological systems. Mathematical techniques include dynamical systems and differential equations. Applications to biological pathways, including understanding of bistability within chemical reaction systems, are emphasized.

**Requisites:** MATH 415 and (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recall and state the formal definitions of the mathematical objects and their properties in systems biology (e.g., reaction networks, reaction rate equations, mass-action kinetics models, detailed balanced and complex balanced systems, Lyapunov functions, etc.).

Audience: Both Grad & Undergrad

2. Use such definitions to argue that a mathematical object does or does not have the condition of being a particular type or having a particular property (e.g., reversible, weakly reversible, mass-action, detailed balanced, complex balanced, globally stable, oscillatory, persistent, permanent, etc.).

Audience: Both Grad & Undergrad

3. Recall and state the standard theorems of the field (e.g., the Horn-Jackson theorem, the deficiency zero theorem, theorems on characterization of mass-action systems, theorems on persistence and permanence, theorems on dynamical equivalence, etc.) and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Both Grad & Undergrad

4. Construct mathematical arguments related to the above definitions, properties, and theorems, including the construction of examples and counterexamples.

Audience: Both Grad & Undergrad

5. Convey arguments using English and appropriate mathematical terminology, notation and grammar.

Audience: Both Grad & Undergrad

6. Model real biological systems by means of systems of differential equations, and be able to use software (such as Matlab) for visualization of their dynamics. Example models could include: (i) Enzymes, substrates and saturating kinetics, (ii) Glycolytic oscillations, (iii) Cell cycle control, budding yeast cell cycle models, (iv) Activator-inhibitor and positive feedback systems.

Audience: Both Grad & Undergrad

7. Identify applications of course content in current areas of research.

Audience: Graduate

**B M I/STAT 620 – STATISTICS IN HUMAN GENETICS**

3 credits.

Provides a comprehensive survey of statistical methods in human genetics research. Covered topics include linkage analysis, genome-wide association study, rare variant association analysis, meta-analysis, genome and variant annotation, heritability estimation, multi-trait modeling techniques, multi-omic data integration, and genetic risk prediction.

**Requisites:** STAT 333, 340, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize problems in human genetics that are appropriate for statistical modeling

Audience: Both Grad & Undergrad

2. Identify appropriate statistical procedures and computational algorithms for different tasks

Audience: Both Grad & Undergrad

3. Gain practical experience in applying a select set of statistical methods on real data and evaluate its outputs

Audience: Both Grad & Undergrad

4. Evaluate the strengths and weaknesses of different statistical and computational approaches designed for a specific biological problem

Audience: Graduate

**B M I/STAT 641 – STATISTICAL METHODS FOR CLINICAL TRIALS**

3 credits.

Statistical issues in the design of clinical trials, basic survival analysis, data collection and sequential monitoring.

**Requisites:** STAT/MATH 310 or graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**B M I/STAT 642 – STATISTICAL METHODS FOR EPIDEMIOLOGY**

3 credits.

Methods for analysis of case-control, cross sectional, and cohort studies.

Covers epidemiologic study design, measures of association, rates, classical contingency table methods, and logistic and Poisson regression.

**Requisites:** STAT/MATH 310 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize key concepts of statistical methods in epidemiology study: study design, association, causation

Audience: Both Grad & Undergrad

2. Build parametric or semiparametric model for analyzing categorical data and survival data

Audience: Both Grad & Undergrad

3. Utilize model design tools for model performance assessment

Audience: Both Grad & Undergrad

4. Build semiparametric model for analyzing categorical data and survival data

Audience: Graduate

**B M I/STAT 643 – CLINICAL TRIAL DESIGN, IMPLEMENTATION, AND ANALYSIS**

3 credits.

Gain an understanding of fundamental elements of clinical trials (such as objectives, endpoints, surrogate endpoints, and statistical decisions) and statistical design considerations (such as randomization and blinding).

Designs of clinical trials for Phase I, II, and III studies including single-arm, two-arm, and drug combination trials. Introduction to adaptive designs for precision medicine and master protocol designs such as umbrella trials and basket trials.

**Requisites:** STAT 609, 610, B M I/STAT 641, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Summarize the objectives of clinical trials and key statistical design components

Audience: Both Grad & Undergrad

2. Design the clinical trials and investigate the operating characteristics of the design to implement clinical trials

Audience: Both Grad & Undergrad

3. Write the protocol section of statistical considerations and communicate the design of clinical trials to both statisticians and clinicians

Audience: Both Grad & Undergrad

4. Build sequential and adaptive methods for clinical trials

Audience: Graduate

**B M I/POP HLTH 651 – ADVANCED REGRESSION METHODS FOR POPULATION HEALTH**

3 credits.

Extension of regression analysis to observational data with unequal variance, unequal sampling and propensity weights, clusters and longitudinal measurements, using different variance structures, mixed linear models, generalized linear models and GEE. Matrix notation will be introduced and underlying mathematical and statistical principles will be explained. Examples use data sets from ongoing population health research.

**Requisites:** POP HLTH/B M I 552

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Extend the knowledge of regression analysis beyond ordinary linear models

Audience: Graduate

2. Describe the features of correlated data and their implications in drawing inference

Audience: Graduate

3. Construct proper linear and generalized linear models for longitudinal and clustered data

Audience: Graduate

4. Describe the assumptions needed for estimation and inference

Audience: Graduate

5. Implement the inference procedures to solve real-world problems using statistical packages such as SAS and R

Audience: Graduate

6. Use diagnostic tools to assess model fit

Audience: Graduate

7. Interpret and present the analytic results to answer substantive questions

Audience: Graduate

### **B M I/POP HLTH 694 – APPLIED BIOMEDICAL INFORMATICS & REAL-WORLD DATA FOR PRECISION MEDICINE & POPULATION HEALTH**

2 credits.

Provides an introduction to key concepts, methods, and tools of biomedical and health informatics used in precision medicine and population health, with emphasis on collection, management, and analysis of real-world data.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate understanding of biomedical informatics concepts, methods, and tools used in precision medicine and population health.

Audience: Graduate

2. Demonstrate understanding of real-world data (patient-generated, clinical, and genomic) and data standards used in biomedical research.

Audience: Graduate

3. Demonstrate understanding of FAIR Guiding Principles for scientific data management and stewardship.

Audience: Graduate

4. Demonstrate understanding of regulations for using protected health information (PHI) data in health research, and ability to recognize potential ethical and compliance issues.

Audience: Graduate

### **B M I 699 – INDEPENDENT STUDY**

1-8 credits.

Directed study to pursue knowledge beyond curriculum.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply concepts learned in coursework to real biomedical applications

Audience: Both Grad & Undergrad

2. Read and effectively analyze scientific literature

Audience: Both Grad & Undergrad

3. Develop critical, analytical, and independent thinking skills

Audience: Both Grad & Undergrad

4. Create literature reviews and publications

Audience: Graduate

### **B M I/COMP SCI/E C E/MED PHYS 722 – COMPUTATIONAL OPTICS AND IMAGING**

3 credits.

Computational imaging includes all imaging methods that produce images as a result of computation on collected signals. Learn the tools to design new computational imaging methods to solve specific imaging problems. Provides an understanding of the physics of light propagation and measurement, and the computational tools to model it, including wave propagation, ray tracing, the radon transform, and linear algebra using matrix and integral operators and the computational tools to reconstruct an image, including linear inverse problems, neural networks, convex optimization, and filtered back-projection. Covers a variety of example computational imaging techniques and their applications including coded apertures, structured illumination, digital holography, computed tomography, imaging through scattering media, compressed sensing, and non-line-of-sight imaging.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply ray and wave based light propagation models

Audience: Graduate

2. Explain the process of image formation in conventional imaging systems using theory and computational models

Audience: Graduate

3. Select and combine the different components required in an imaging system to perform light manipulation, collection, and image reconstruction

Audience: Graduate

4. Apply the linear matrix and integral operators that model light propagation

Audience: Graduate

5. Apply the linear inverse algorithms that allow an imaging system to reconstruct properties of the scene from collected data

Audience: Graduate

6. Simulate different computational imaging systems and perform computation on simulated datasets

Audience: Graduate

7. Understand the most common computational imaging techniques and be able to use and adapt them for their own applications

Audience: Graduate

**B M I/STAT 727 – THEORY AND METHODS OF LONGITUDINAL DATA ANALYSIS**

3 credits.

Theory and methods of fundamental statistical models for the analysis of longitudinal data, including repeated measures analysis of variance, linear mixed models, generalized linear mixed models, and generalized estimating equations. Introduction of how to implement these methods in statistical softwares such as in R and/or SAS, within the context of appropriate statistical models and carry out and interpret analyses.

**Requisites:** STAT 610**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Analyze longitudinal data in a variety of settings and with a variety of outcome variables

Audience: Graduate

2. Apply statistical methods in fitting longitudinal data models for addressing scientific questions

Audience: Graduate

3. Perform longitudinal data analyses in statistical softwares such as R and/or SAS

Audience: Graduate

4. Interpret and communicate the scientific meanings of the results to both statisticians and non-statisticians (such as clinicians and scientists)

Audience: Graduate

**B M I 738 – ETHICS FOR DATA SCIENTISTS**

1 credit.

Designed to educate data scientists, particularly those who work with biomedical data, about ethical and regulatory issues that may arise in the course of their research and professional interactions.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify ethical issues and recognize challenges to integrity that arise during the course of planning and conducting research or reporting research results.

Audience: Graduate

2. Formulate a justified response to an ethical issue or integrity challenge, using ethical decision-making approaches and concepts.

Audience: Graduate

3. Identify where to find professional resources that provide guidance for resolving ethical and research integrity issues.

Audience: Graduate

4. Conduct improved discussions about ethical issues.

Audience: Graduate

**B M I/STAT 741 – SURVIVAL ANALYSIS THEORY AND METHODS**

3 credits.

Theory and practice of analytic methods for censored survival data, including nonparametric and parametric methods, the proportional hazards regression model, and a review of current topics in survival analysis.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Summarize the features of censored data and their implications in drawing inference

Audience: Graduate

2. Implement proper non- and semi-parametric methods for analysis of various types of data

Audience: Graduate

3. Recognize and check the assumptions needed for estimation and inference

Audience: Graduate

4. Implement the inference procedures to solve real-world problems using statistical packages such as R (or SAS)

Audience: Graduate

5. Interpret and present the analytic results in a clear and coherent way to answer substantive questions

Audience: Graduate

**B M I/COMP SCI 767 – COMPUTATIONAL METHODS FOR MEDICAL IMAGE ANALYSIS**

3 credits.

Review of advanced medical image analysis techniques. Covers advanced segmentation and registration methods. Describes the use and extension of statistical and machine learning methods for medical image analysis tasks.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2016**Learning Outcomes:** 1. Implement advanced ideas from machine learning, statistics, and computer vision for medical image analysis tasks.

Audience: Graduate

2. Develop a deep technical understanding of the machine learning and statistical ideas being utilized in contemporary research in this area, and identification of blockers where research efforts can be focused

Audience: Graduate

### **B M I/STAT 768 – STATISTICAL METHODS FOR MEDICAL IMAGE ANALYSIS**

3 credits.

Introduce key statistical methods and concepts for analyzing various medical images. Analyze publicly available and student/instructor supplied imaging data using the most up-to-date methods and tools.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement the key concepts of biomedical image processing and analysis

Audience: Graduate

2. Describe the key concepts of statistical inference procedures for single and multiple images

Audience: Graduate

3. Apply scalable computation in breaking bigger imaging problems into smaller computable problems

Audience: Graduate

4. Describe functional data analysis (FA), geometric data analysis (GDA) and topological data analysis (TDA) methods in analyzing biomedical images

Audience: Graduate

### **B M I/COMP SCI 771 – LEARNING BASED METHODS FOR COMPUTER VISION**

3 credits.

Addresses the problems of representation and reasoning for large amounts of visual data, including images and videos, medical imaging data, and their associated tags or text descriptions. Introduces deep learning in the context of computer vision. Covers topics on visual recognition using deep models, such as image classification, object detection, human pose estimation, action recognition, 3D understanding, and medical image analysis. Emphasizes the design of vision and learning algorithms and models, as well as their practical implementations. Strongly recommended to have knowledge in computer vision or machine learning [such as COMP SCI 540] or medical image analysis [such as B M I / COMP SCI/ B M I 567].

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate their understanding of basic theories, current approaches, key concepts, and common practices in the area of deep learning for computer vision.

Audience: Graduate

2. Recognize and distinguish among a variety of visual recognition problems in computer vision, including their problem formulations and evaluation metrics.

Audience: Graduate

3. Utilize and implement deep learning models to solve visual recognition problems.

Audience: Graduate

4. Design deep learning models for visual recognition problems, conduct experiments to evaluate the proposed model, and analyze and interpret the results.

Audience: Graduate

5. Communicate effectively through written reports, oral presentations, and discussions.

Audience: Graduate

**B M I 773 – CLINICAL RESEARCH INFORMATICS**

3 credits.

Course will familiarize students with basic informatics principles and techniques to support clinical research. Content includes information systems for protocol design; regulatory compliance; approaches for patient recruitment; efficient protocol management; data collection and acquisition; data security, storage, transfer, processing and analysis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Recognize the various types and sources of health data, and the key issues involved in processing health data including security, privacy, noise, and missingness

Audience: Graduate

2. Conduct observational studies using data that are centered around answering research questions

Audience: Graduate

3. Implement basic programming and data manipulation using R, and be familiar with a variety of techniques such as descriptive analysis, regression methods, prediction models, phenotyping, and natural language processing

Audience: Graduate

4. Apply common tools for managing, accessing and mapping health data, including data standards, controlled vocabularies, and ontologies

Audience: Graduate

**B M I/COMP SCI 775 – COMPUTATIONAL NETWORK BIOLOGY**

3 credits.

Introduces networks as a powerful representation in many real-world domains including biology and biomedicine. Encompasses theory and applications of networks, also referred to as graphs, to study complex systems such as living organisms. Surveys the current literature on computational, graph-theoretic approaches that use network algorithms for biological modeling, analysis, interpretation, and discovery. Enables hands-on experience in network biology by implementing computational projects.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize problems in molecular biology that are appropriate for network modeling

Audience: Graduate

2. Identify appropriate network algorithms for different tasks

Audience: Graduate

3. Evaluate the strengths and weaknesses of different network algorithms designed for a specific biological problem

Audience: Graduate

4. Gain practical experience in applying a select set of network algorithms on real data and evaluate its outputs

Audience: Graduate

5. Understand the algorithmic and statistical concepts of different network-based approaches

Audience: Graduate

**B M I/COMP SCI 776 – ADVANCED BIOINFORMATICS**

3 credits.

Advanced course covering computational problems in molecular biology. The course will study algorithms for problems such as: modeling sequence classes and features, phylogenetic tree construction, gene-expression data analysis, protein and RNA structure prediction, and whole-genome analysis and comparisons.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Select and implement appropriate algorithms and probabilistic models for analyzing genomes, RNA, proteins, and biological networks

Audience: Graduate

2. Write a manuscript describing a bioinformatics research study, including the motivation for the research, the scientific outcomes, and the detailed methods required to reproduce the study

Audience: Graduate

3. Read a bioinformatics research paper to identify the key computational techniques and assess the evidence supporting the paper's claims

Audience: Graduate

4. Identify emerging biological data types and data processing (e.g., single cell biology) and how the data can contribute to their research

Audience: Graduate

**B M I 800 – BECOMING A BIOMEDICAL DATA SCIENTIST**

1 credit.

Learn how to conduct research as an interdisciplinary scientist at the interface of biomedical sciences and data science. Consider the diverse career trajectories available to an individual scientist. Gain an overview of problems in the field, approaches and practices in biomedical research, and different examples of approaches and paths taken from conceptualization to implementation of computational/statistical/data science tools to address specific biomedical research problems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the breadth of research in biomedical data science.

Audience: Graduate

2. Describe the approaches, resources and environment available to conduct interdisciplinary research at UW.

Audience: Graduate

3. Describe the high-level goals of research programs of individual faculty trainers in the Biomedical Data Science program.

Audience: Graduate

**B M I 826 – SPECIAL TOPICS IN BIOSTATISTICS AND BIOMEDICAL INFORMATICS**

1-3 credits.

Covers advanced topics in the areas of biostatistics and biomedical informatics. Includes reading and discussion of original literature and individual student projects.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Design, implement, and evaluate a graduate level independent research project that applies or extends these theories, concepts, and methods

Audience: Graduate

**B M I/STAT 828 – SEMIPARAMETRIC METHODS IN DATA SCIENCE**

3 credits.

Review of statistical convergence modes, M-estimation, and basics of Hilbert space. Introduction of how to derive the nuisance tangent space, its complement, and the corresponding efficient influence function, from the geometric perspective of semiparametric models. Introduction of how to estimate nuisance functions using machine learning methods, and their implementations in R and/or Python. Introduction of a variety of semiparametric models in missing data analysis, causal inference, dimension reduction, precision medicine, semi-supervised learning, transfer learning and domain adaptation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Derive the nuisance tangent space, its complement, and the corresponding efficient influence function in semiparametric models

Audience: Graduate

2. Apply a variety of semiparametric methods and models in applications ranging from biomedical studies to social sciences

Audience: Graduate

3. Perform machine learning algorithms for estimating nuisance functions in software such as R and/or Python

Audience: Graduate

**B M I/COMP SCI/PSYCH 841 – COMPUTATIONAL COGNITIVE SCIENCE**

3 credits.

Studies the biological and computational basis of intelligence, by combining methods from cognitive science, artificial intelligence, machine learning, computational biology, and cognitive neuroscience. Requires ability to program.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**B M I/STAT 877 – STATISTICAL METHODS FOR MOLECULAR BIOLOGY**

3 credits.

Statistical and computational methods in statistical genomics for human and experimental populations. Review methods for quality control, experimental design, clustering, network analysis, and other downstream analysis of next-generation sequencing studies along with methods for genome wide association studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Understand the statistical and computational background underlying many state-of-the-art techniques for the pre-processing and analysis of high-throughput genomics datasets  
Audience: Graduate

2. Identify the appropriateness and limitations of such methods in a variety of settings.

Audience: Graduate

3. Discuss scientific problems and identify the statistical and computational aspects embedded in the processing and analysis of genomics datasets.

Audience: Graduate

4. Become proficient in select software packages commonly used in analysis of next-generation sequencing data.

Audience: Graduate

**B M I 881 – BIOMEDICAL DATA SCIENCE SCHOLARLY LITERATURE 1**

2 credits.

Critical evaluation of the scholarly literature is a crucial skill for researchers. Through this course, students will develop this valuable skill by focused reading and discussion of a variety of journal articles of present or historical importance from the biomedical sciences literature, including biostatistics, biomedical informatics, and relevant topics in statistics and computer science.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically evaluate quantitative approaches in the scientific literature  
Audience: Graduate

2. Articulate the biological context of a research question and the scientific relevance of analysis results

Audience: Graduate

3. Identify and articulate the strengths and weaknesses of different study designs and analysis methods, including potential biases in research data sets

Audience: Graduate

**B M I 882 – BIOMEDICAL DATA SCIENCE SCHOLARLY LITERATURE 2**

2 credits.

Critical evaluation of the scholarly literature is a crucial skill for researchers. Through this course, students will develop this valuable skill by focused reading and discussion of a variety of journal articles of present or historical importance from the biomedical sciences literature, including biostatistics, biomedical informatics, and relevant topics in statistics and computer science.

**Requisites:** B M I 881

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Critically evaluate quantitative approaches in the scientific literature  
Audience: Graduate

2. Articulate the biological context of a research question and the scientific relevance of analysis results

Audience: Graduate

3. Identify and articulate the strengths and weaknesses of different study designs and analysis methods, including potential biases in research data sets

Audience: Graduate

### **B M I 883 – BIOMEDICAL DATA SCIENCE PROFESSIONAL SKILLS 1** 1 credit.

A variety of skills that are important for a successful research career are often left to students to develop on their own. This course attempts to fill many of those gaps, including writing and reviewing papers, securing research funding, giving talks, presenting posters, making a personal website, job opportunities in universities and industry, and teaching.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the review processes for journal articles and research grant proposals

Audience: Graduate

2. Write clear, well-formed journal articles and research grant proposals

Audience: Graduate

3. Provide a clear oral presentation of their research work

Audience: Graduate

4. Demonstrate understanding of research on unconscious bias (for example, in reviewing papers/grants, in writing/evaluating recommendation letters, and in hiring/promotion) and assumptions and strategies to overcome them

Audience: Graduate

### **B M I 884 – BIOMEDICAL DATA SCIENCE PROFESSIONAL SKILLS 2** 1 credit.

A variety of skills that are important for a successful research career are often left to students to develop on their own. This course attempts to fill many of those gaps, including writing and reviewing papers, securing research funding, giving talks, presenting posters, making a personal website, job opportunities in universities and industry, and teaching.

**Requisites:** B M I 883

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Prepare a web-based profile of their research efforts and products

Audience: Graduate

2. Describe good practices for research scientists' participation in social media

Audience: Graduate

3. Define sexual harassment and describe practices for handling sexual harassment

Audience: Graduate

4. Describe strategies for forming and managing scientific collaborations

Audience: Graduate

5. Construct a personal website for networking and self-promotion

Audience: Graduate

6. Identify employment opportunities at universities and in industry and demonstrate understanding of strategies for applying and interviewing for such positions

Audience: Graduate

7. Describe and compare different teaching practices and methods for motivating students

Audience: Graduate

### **B M I 899 – PRE-DISSERTATOR RESEARCH** 1-12 credits.

Pre-dissertator Research. Course is open to pre-dissertator students only.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills to support the development of independent research

Audience: Graduate

**B M I 901 – FUNDAMENTALS OF INFORMATICS IN CLINICAL RESEARCH**

2 credits.

Become familiar with basic informatics principles and techniques to support clinical research. Content includes information systems for protocol design; regulatory compliance; approaches for patient recruitment; efficient protocol management; data collection and acquisition; data security, storage, transfer, processing and analysis.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Utilize informatics-based tools in translational research including: locate relevant informatics tools; select appropriate informatics tools; and use those tools in research for managing and analyzing biomedical and health information. Describe the essential functions of the major clinical systems (e.g., the EHR and its feeder systems, such as radiology and lab) that are relevant to CTS and the challenges to using these data for research.

Audience: Graduate

2. Describe the essential functions of major research computer systems (e.g., clinical trials management systems, biospecimen management systems, research grant and finance management systems, and research services tracking systems) that are relevant to CTS.

Audience: Graduate

3. Compare and contrast the organizational roles and principal responsibilities essential for access, management, and governance of data related to CTS.

Audience: Graduate

4. Explain the role of health information technology standards in the interoperability of research, clinical, and administrative information systems and on secondary use of data for CTS.

Audience: Graduate

5. Describe the essential information generation, management, analysis, transformation, summarization, and visualization methods that apply to CTS data, such as: genomic, proteomic and other "-omics" data; clinical data; imaging data; consumer and patient-reported data; and population-level and environmental exposure data.

Audience: Graduate

6. Illustrate the nature of the contributions in consulting and/or collaborating with biomedical and health informaticians throughout the life cycle of clinical and translational research projects: use the terminology and principles of biomedical informatics; discriminate among the different subdomains of biomedical informatics; and enumerate the roles of biomedical informatics specialists.

Audience: Graduate

7. Identify how structure and organization of information in a domain can impact researchers' translational research foci through fundamental data categories and elements, terminologies and taxonomies, and ontologies.

Audience: Graduate

8. Identify, retrieve, and manage biomedical and health science knowledge through literature searches using advanced search techniques (MeSH, PubMed, Google Scholar, etc.).

Audience: Graduate

9. Discuss the fundamental principles and practices that address the ethical, legal, social, privacy, and security implications of bio- medical and health informatics.

**B M I/B M E/BIOCHEM/CBE/COMP SCI/GENETICS 915 – COMPUTATION AND INFORMATICS IN BIOLOGY AND MEDICINE**

1 credit.

Participants and outside speakers will discuss current research in computation and informatics in biology and medicine. This seminar is required of all CIBM program trainees.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss how methods from computer science, statistics, information science and engineering are applied to problems in biology, medicine and population health

Audience: Graduate

2. Recognize and be able to define applications in translational bioinformatics, clinical informatics and public health informatics

Audience: Graduate

### **B M I/MEDICINE 918 – HEALTH INFORMATICS FOR MEDICAL STUDENTS ELECTIVE**

2 credits.

Biomedical Informatics is an interdisciplinary field that combines knowledge of information sciences and medical sciences to optimize the use and application of biomedical data across the spectrum from molecules to individuals to populations. Offers an overview of the field of health informatics by providing students with the fundamental knowledge of the concepts of health informatics and how technology can be used in the delivery of health care.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe main concepts and challenges in health informatics.

Audience: Graduate

2. Identify the different aspects of electronic health records.

Audience: Graduate

3. Recognize medical safety issues related to chart maintenance and poor systems.

Audience: Graduate

4. Instruct patients in proper use of a personal health record (PHR).

Audience: Graduate

5. Compare and contrast the concept of learning health systems that is patient-centered, population-based, and promotes learning from data.

Audience: Graduate

6. Define population-based care and the informatics underlying it.

Audience: Graduate

7. Recognize different types of clinical decision support.

Audience: Graduate

8. Describe the area of quality measurement and improvement.

Audience: Graduate

9. Formulate how the area of quality measurement and improvement applies to clinical practice.

Audience: Graduate

10. Recognize the types and limitations of different types of quality measures.

Audience: Graduate

11. Formulate a clinical question as an answerable one, and then be able to select the appropriate resource and make optional use of it.

Audience: Graduate

12. Recognize growing role of genomics and personalized medicine in care.

Audience: Graduate

13. Describe and manage ethical issues in privacy and security.

Audience: Graduate

### **B M I 990 – DISSERTATOR RESEARCH**

1-3 credits.

Dissertator Research. Course is open to dissertators only.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop skills to design, implement and apply computational and statistical frameworks to address diverse biomedical questions

Audience: Graduate

## **BOTANY (BOTANY)**

### **BOTANY 100 – SURVEY OF BOTANY**

3 credits.

Major emphasis on the roles of plants and microbes in past and present global ecology, and the past and present uses of plants and microbes by humans, including emerging applications of biotechnology.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BOTANY 105 – MUSHROOMS**

3 credits.

An introduction to fungi. The fungal kingdom is made up of millions of species. We use fungi to brew beer and make cheese, as medicines, and as symbols of both rampant decay and unstinting selflessness. Come unpack the mythology and walk away with a deep appreciation of a poorly understood but fascinating part of Earth's biodiversity.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Notice, recognize, and catalog fungi as you walk in the world; in Madison, in surrounding lands and waters, and wherever you travel.

Audience: Undergraduate

2. Explain the myriad ecological roles fungi play on planet Earth.

Audience: Undergraduate

3. Talk about fungal biodiversity at length and in depth, for example by teaching fungal biology to your community at the dinner table.

Audience: Undergraduate

4. Think critically about the natural world; be able to not just read but also critique popular science writing.

Audience: Undergraduate

5. Interpret "how science gets done" and what constitutes scientific knowledge.

Audience: Undergraduate

**BOTANY/PL PATH 123 – PLANTS, PARASITES, AND PEOPLE**

3 credits.

Explores the interaction between society and plant-associated microbes. Topics include: the Irish potato famine, pesticides in current agriculture, role of economics and consumer preference in crop disease management and the release of genetically engineered organisms.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**BOTANY/BIOLOGY 130 – GENERAL BOTANY**

5 credits.

Introduction to the basic principles and concepts of the biology of plants. an integrative approach stressing evolutionary sequences and the relationship between structure and function at succeeding levels of organization: molecule, cell, organism, population, community. Correlated lectures, laboratories, and discussions.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**BOTANY/BIOLOGY/ZOOLOGY 151 – INTRODUCTORY BIOLOGY**

5 credits.

Topics include: cell structure and function, cellular metabolism (enzymes, respiration, photosynthesis), information flow (DNA, RNA, protein), principles of genetics and selected topics in Animal Physiology.

**Requisites:** Not open to students with credit for BIOLOGY/ZOOLOGY 101, 102 or BIOLOGY/BOTANY 130**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**BOTANY/BIOLOGY/ZOOLOGY 152 – INTRODUCTORY BIOLOGY**

5 credits.

Topics include: selected topics in plant physiology, a survey of the five major kingdoms of organisms, speciation and evolutionary theory, and ecology at multiple levels of the biological hierarchy.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151**Course Designation:** Gen Ed – Communication Part B

Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

### **BOTANY 211 – UNDERSTANDING CHANGED LANDSCAPES: WISCONSIN**

3 credits.

Exposure to the changing uses of Wisconsin landscapes: as the home of native peoples; as a source of fur, lead and timber; as part of the new nation of the United States; and as a modern, vibrant collection of communities focused on enterprises as diverse as agriculture and education. Asks what roles science has played in shaping the landscape and in current land use. Covers genetically modified crops, the endangered species act, water use, global change.

**Requisites:** Sophomore standing and declared in an Honors program

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Describe the last 400 years of Wisconsin's environmental history, with a particular focus on human uses of land

Audience: Undergraduate

2. Understand the science behind Wisconsin's environmental history (e.g. whether or not early Wisconsinites recognized it, soil fertility was a driver in the shift from wheat to dairy, and then the green revolution radically changed agriculture, etc.)

Audience: Undergraduate

3. Think critically about the roles science plays in human choices (e.g. does understanding the genetics of genetic modification impact whether or not we plant GMO soybeans?)

Audience: Undergraduate

4. Describe and think critically about the environmental history of a specific place in Wisconsin, based on original research (often drawing on the resources of the Wisconsin Historical Society)

Audience: Undergraduate

### **BOTANY 240 – PLANTS AND HUMANS**

3 credits.

Plant parts and demonstrations of their utility to humans, origins of domesticated plants, modifications of plants by humans, ecosystem services owed to plants, and reasons to sustain plant diversity.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **BOTANY/F&W ECOL 250 – FORESTS AND HUMANS: FROM THE MIDWEST TO MADAGASCAR**

2 credits.

Provides an overview of the geography, ecology, and economic importance of the world's forest biomes. Learn how climate influences vegetation and, in-turn, how forests impact global climate. Meet scientists working to understand the astounding biodiversity and ecological complexity of forest ecosystems, and how these ecosystems support human life. Discuss the threats to forest ecosystems around the world, and hear from the people trying to protect them. Emphasizes the forest resources and services upon which humans depend, and how we can maintain these resources into the future. Analyze the idea of "sustainability" when it comes to forest management, hear alternative viewpoints about what this word means, and discuss potential trade-offs and conflicts. Look at the many real-world programs in place at the global, national, and local level to sustainably manage forests.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2020

### **BOTANY/ENVIR ST/ZOOLOGY 260 – INTRODUCTORY ECOLOGY**

3 credits.

The relationships of organisms and the environment. Population dynamics and community organization, human-environment relationships, action programs.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **BOTANY 265 – RAINFORESTS AND CORAL REEFS**

3 credits.

Are you awed by the amazing biodiversity found in rainforests and coral reefs? See these ecosystems first hand and decide if a career in tropical biology or international conservation is for you. Focuses on the ecology of the world's most biodiverse ecosystems, and their global importance. Learn the physical, chemical, and biological processes that make rainforests and coral reefs function, and the history of human dependence upon these ecosystems. Understand why both of these ecosystems currently are threatened and what actions can and must be taken to protect them.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BOTANY 299 – DIRECTED STUDY IN BOTANY**

1-3 credits.

Introduces students to research questions and facilitates learning in the field of botany by providing guidance and mentorship in a research environment.

**Requisites:** Consent of instructor

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**BOTANY 300 – PLANT ANATOMY**

4 credits.

Plant structure and development of seed plants, primarily of flowering plants. Emphasis is placed on structure in relation to function and on the plant body as a structural and functional entity.

**Requisites:** Sophomore standing and (ZOOLOGY/BIOLOGY/ BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, or BIOCORE 381) or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BOTANY 305 – PLANT MORPHOLOGY AND EVOLUTION**

4 credits.

A broad survey of the diversity of plants in the context of their evolutionary history. Similarities and differences in structure and reproduction among extant bryophytes, lycopods, ferns, gymnosperms, and flowering plants are emphasized along with the study of fossils representing extinct plant lineages.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BOTANY 330 – ALGAE**

3 credits.

Introduction to ecology, evolution, systematics, taxonomy, physiology, biochemistry, cell biology, and molecular biology of freshwater, terrestrial and marine algae. Emphasis on techniques for identification, culture, analysis of growth and reproduction, and community composition assessment.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Comprehend the local-global biogeochemical impacts of the organisms known as algae at a level needed for future graduate or professional work.

Audience: Both Grad & Undergrad

2. Acquire hands-on technical laboratory experience and skills key to future graduate or professional work in biology, particularly microbiology.

Audience: Both Grad & Undergrad

3. Write technical reports with excellent English usage, information content, and accessibility at a level expected by future professional colleagues in biology fields.

Audience: Both Grad & Undergrad

4. Develop skills to search, assess, and summarize relevant scientific literature on algal topics related to research.

Audience: Graduate

**BOTANY/PL PATH 332 – FUNGI**

4 credits.

Growth, development, variability and dispersal of saprophytic, parasitic, and symbiotic fungi, with a consideration of their ecological and economic significance. Develop skills in microscopy with live fungal materials.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BOTANY/PL PATH 333 – BIOLOGY OF THE FUNGI**

2 credits.

Growth, development, variability and dispersal of saprophytic, parasitic, and symbiotic fungi, with a consideration of their ecological and economic significance.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Will have a detailed knowledge of the biodiversity of Fungi, and organisms traditionally included in mycology courses, including but not limited to systematics, life cycles, genetics, pathology, ecology.

Audience: Both Grad & Undergrad

2. Apply knowledge of Fungi and fungal-like organisms for use in agriculture and industry.

Audience: Both Grad & Undergrad

3. Communicate about fungi in either an outreach or professional capacity.

Audience: Graduate

**BOTANY/AN SCI/MICROBIO 335 – THE MICROBIOME OF PLANTS, ANIMALS, AND HUMANS**

3 credits.

Examination of the structure and function of microbial communities that live inside and on host organisms (plants, animals, and humans).

Introduction to general concepts of the microbiome and microbiota, and their relationship to host nutrition, health, and disease.

**Requisites:** MICROBIO 101 or 303 or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how microorganisms interact with plant and animal (including human) hosts in beneficial, neutral or detrimental ways.

Audience: Undergraduate

2. Express how the environment affects these host-microbe interactions.

Audience: Undergraduate

3. Summarize new molecular and bioinformatic methods that allow for the study of microbial communities.

Audience: Undergraduate

4. Describe how microbial communities are essential for life as we know it, and the processes that support life.

Audience: Undergraduate

5. Articulate several ways in which microbial communities are essential to plant and animal (including human) health.

Audience: Undergraduate

6. Explain our current knowledge about the diversity of microbial life and why its effects and potential benefits have not been fully explored.

Audience: Undergraduate

**BOTANY/GEOG 338 – ENVIRONMENTAL BIOGEOGRAPHY**

3 credits.

Explores how physical and biological factors affect the distribution of terrestrial biomes, ecosystem types, and biodiversity, as well as the role of disturbance and recent human activities on differences in past and modern day species distributions.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BOTANY 400 – PLANT SYSTEMATICS**

4 credits.

Plant systematics: the integration of taxonomy (identification, nomenclature, classification emphasizing flowering plants), evolution (speciation, reproductive biology, adaptation, convergence, biogeography), and phylogenetics. Emphasis on representative families and genera of flowering plants in Wisconsin, use of keys, manuals, and iNaturalist, plant collection.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BOTANY 401 – VASCULAR FLORA OF WISCONSIN**

4 credits.

Taxonomic survey of the vascular plants of Wisconsin. Emphasis on in forest identification.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BOTANY/F&W ECOL 402 – DENDROLOGY: WOODY PLANT IDENTIFICATION AND ECOLOGY**

3 credits.

Identification, ecological characteristics, ranges, adaptations to environment, and uses of evergreen and deciduous woody plants, with emphasis on species native to Wisconsin; lab and field work.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify all native Wisconsin trees, some common shrubs and vines, and a few important woody exotics by common and scientific name, in summer or winter condition.

Audience: Both Grad & Undergrad

2. Demonstrate a basic understanding of wood structure and use a key to identify blocks of wood.

Audience: Both Grad & Undergrad

3. Recognize the characteristic tree taxa of some of the world's major forest types and some interesting examples of the diversity of trees and their adaptations to their environments.

Audience: Both Grad & Undergrad

4. Compare the morphology, life history, and ecology of woody species to their distribution and habits.

Audience: Both Grad & Undergrad

5. Understand how humans affect the composition, structure and economic value of tree communities and apply this information to questions about management of woody vegetation under changing conditions.

Audience: Both Grad & Undergrad

6. Compare at least two methods for learning to identify a plant species using evidence from your experience in this course.

Audience: Both Grad & Undergrad

7. Construct new materials to teach woody plant ID or tree management issues to a particular target audience.

Audience: Graduate

8. Survey current scientific literature on a particular topic relevant to management of woody vegetation under changing conditions, and summarize current knowledge and knowledge gaps. Recommend next steps in research to improve management.

Audience: Graduate

**BOTANY 403 – FIELD COLLECTIONS AND IDENTIFICATION**

1-4 credits.

An independent experience in collecting plant specimens, identifying the specimens to species, making labels, and mounting of some specimens.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BOTANY/ANTHRO/ZOOLOGY 410 – EVOLUTIONARY BIOLOGY**

3 credits.

Evolutionary biology, emphasizing how modern scientists study evolution. Topics include: nature and mechanisms of microevolution, macroevolution, adaptation, speciation; systematics and taxonomy; quantitative genetics and measurement of natural selection; phylogenetic analyses of behavior, physiology, morphology, biochemistry; current controversies in evolution.

**Requisites:** ZOOLOGY/BIOLOGY 101, BIOLOGY/BOTANY 130, ZOOLOGY/BIOLOGY/BOTANY 152, BIOCORE 381, (ANTHRO 105 and satisfied QR-A requirement), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**BOTANY 422 – PLANT GEOGRAPHY**

3 credits.

Biogeography of plants. Relationship to climate and geology; paleobiogeography, historical biogeography and island biogeography; history and distribution of floras of North America and Wisconsin.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, ENVIR ST/GEOL 120, 127, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**BOTANY/ZOOLOGY 450 – MIDWESTERN ECOLOGICAL ISSUES: A CASE STUDY APPROACH**

2 credits.

How ecological principles can be used to address contemporary environmental issues such as water quality, invasive species, and population growth. Emphasis on midwestern issues, practical approaches, the role of history, and geographic context.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, (ZOOLOGY/BIOLOGY 101 and ZOOLOGY/BIOLOGY 102), or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**BOTANY/F&W ECOL 455 – THE VEGETATION OF WISCONSIN**

4 credits.

Ecology of Wisconsin plant communities: floristic composition, community structure; relationship to history, climate, soil, and geology; response to human perturbation.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BOTANY/F&W ECOL/ZOOLOGY 460 – GENERAL ECOLOGY**

4 credits.

Ecology of individual organisms, populations, communities, ecosystems, landscapes, and the biosphere. The interaction of organisms with each other and their physical environment. These relationships are studied, often in quantitative terms, in both field and laboratory settings.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and ZOOLOGY/BIOLOGY/BOTANY 152, (ZOOLOGY/BIOLOGY 101 and 102), BIOCORE 381, or BOTANY/BIOLOGY 130, or graduate/professional standing

**Course Designation:** Gen Ed – Quantitative Reasoning Part B Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**BOTANY/ENTOM/ZOOLOGY 473 – PLANT-INSECT INTERACTIONS**

3 credits.

Multiple ways in which arthropods exploit plants, plant traits that deter or augment insects, environmental mediation of these interactions, effects on population dynamics, community ecology and co-evolution, and implications to natural resource management, environmental quality, and sustainable development.

**Requisites:** F&W ECOL/BOTANY/ZOOLOGY 460, FW ECOL 500, ENTOM/BOTANY/PL PATH 505, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**BOTANY/AMER IND/ANTHRO 474 – ETHNOBOTANY**

3-4 credits.

Study of the interactions between human cultures and plants. Topics include: traditional resource management and agriculture; crop domestication, evolution, and conservation; archaeobotany; indigenous knowledge; folk taxonomy; plants in symbolism and religion; dietary patterns; phytochemistry; global movement of plants and peoples.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Either Biological Science or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**BOTANY 499 – INTERMEDIATE DIRECTED RESEARCH**

1-3 credits.

Explore research questions that facilitate learning in the field of botany through guidance and mentorship in a research environment.

**Requisites:** Consent of instructor

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**BOTANY 500 – PLANT PHYSIOLOGY**

3-4 credits.

An in-depth look at plant growth, development, respiration, photosynthesis, mineral nutrition, and water relations. Experimental approaches will be used to demonstrate principles described.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement, sophomore standing, and (ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, or BIOCORE 381), or graduate/professional standing

**Course Designation:** Gen Ed – Quantitative Reasoning Part B

Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BOTANY/ENTOM/PL PATH 505 – PLANT-MICROBE INTERACTIONS: MOLECULAR AND ECOLOGICAL ASPECTS**

3 credits.

Molecular and ecological aspects of the interactions between plants and microorganisms. Explores many of the themes, from genetic to integrative, of modern biology, and illustrates how study of plant-microbe interactions contributes to understanding of fundamental plant science.

**Requisites:** MICROBIO 303, GENETICS 466, 468, BIOCHEM 501, 508, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## **BOTANY/ENVIR ST/F&W ECOL/ZOOLOGY 516 – CONSERVATION BIOLOGY**

3 credits.

Investigate the science behind the protection of nature and preservation of biodiversity by focusing on both the biological and socioeconomic factors that underlie the challenges to and the impacts of conservation efforts. Explore the theory, research, and application of biological conservation from an interdisciplinary, international, solutions-focused perspective. Learn about the many threats to Earth's biodiversity but also examine in-depth and apply approaches to overcome them.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Gen Ed – Quantitative Reasoning Part B  
Breadth – Biological Sci. Counts toward the Natural Sci req  
Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S  
Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Distinguish conservation biology from other scientific disciplines and describe its over-arching principles.

Audience: Both Grad & Undergrad

2. Articulate many reasons why the conservation of biological diversity (at many levels) is important.

Audience: Both Grad & Undergrad

3. Quantify biodiversity at the individual, population, and species level by applying various commonly used models and indices.

Audience: Both Grad & Undergrad

4. Explain orally and in writing the principal threats to biodiversity, to both scientific and layperson audiences (habitat loss and fragmentation; industrial agriculture; climate change; overexploitation; invasive species; pollution) and the specific biological effects of these threats.

Audience: Both Grad & Undergrad

5. Outline strategies to implement at the personal, local, and global scales for solving the biodiversity crisis.

Audience: Both Grad & Undergrad

6. Critically analyze, apply, and communicate recommendations for changing personal behaviors to mitigate the biodiversity and climate crises.

Audience: Both Grad & Undergrad

7. Assess the strengths and weaknesses of various conservation strategies or policy approaches.

Audience: Both Grad & Undergrad

8. Synthesize multiple investigations of conservation strategies to assess tradeoffs and synergies among them.

Audience: Graduate

9. Make science-based recommendations for the appropriate conservation approach or strategy for a given situation.

Audience: Graduate

10. Manipulate quantitative data using multi-step arguments to evaluate, interpret, and express solutions to problems in biodiversity estimation, population monitoring, and genetics in the context of conservation.

Audience: Both Grad & Undergrad

## **BOTANY/PL PATH 563 – PHYLOGENETIC ANALYSIS OF MOLECULAR DATA**

3 credits.

Theory and practice of phylogenetic inference from DNA sequence data.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, or BIOCORE 381) and (STAT 240, 301, 324, or 371) or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain in details all the steps in the pipeline for phylogenetic inference and how different data and model choices affect the inference outcomes

Audience: Both Grad & Undergrad

2. Plan and produce reproducible scripts with the analysis of real biological data

Audience: Both Grad & Undergrad

3. Justify the data and model choices made for the data analysis

Audience: Both Grad & Undergrad

4. Interpret the results of the most widely used phylogenetic methods in biological terms

Audience: Both Grad & Undergrad

5. Orally present the results of phylogenomic data analyses based on the best scientific and reproducibility practices

Audience: Graduate

## **BOTANY 575 – SPECIAL TOPICS**

1-3 credits.

Topics of interest focusing on specific subjects or groups of organisms of plants, algae, or fungi.

**Requisites:** (ZOOLOGY/BIOLOGY 101, 102 and BIOLOGY/BOTANY 130), ZOOLOGY/BIOLOGY/BOTANY 152, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**BOTANY/BIOCHEM 621 – PLANT BIOCHEMISTRY**

3 credits.

Biochemistry of photosynthesis, respiration, cell walls, and other metabolic and biosynthetic processes in plants.

**Requisites:** BIOCHEM 501, 507, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Explain how CO<sub>2</sub> and other nutrients are converted to various metabolites in plants through different metabolic pathways

Audience: Both Grad & Undergrad

2. Employ various analytical tools used in the field of plant biochemistry

Audience: Both Grad & Undergrad

3. Apply critical scientific thinking skills (e.g. how to read literature, critically evaluate data, and identify unresolved questions) to support scientific arguments

Audience: Both Grad & Undergrad

4. Synthesize and critically evaluate scientific claims and hypotheses

Audience: Graduate

**BOTANY/GENETICS/M M & I/PL PATH 655 – BIOLOGY AND GENETICS OF FUNGI**

3 credits.

Fungal genetics, genomics, and physiology using plant pathogenic fungi and the genetic models *Aspergillus nidulans* and *Neurospora crassa* as model systems to explore the current knowledge of fungal genetics and plant/fungal interactions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a basic understanding of fungal biology and genetics

Audience: Graduate

2. Analyze current research topics in fungal genetics/biology

Audience: Graduate

3. Identify members of the fungal research community

Audience: Graduate

4. Write and critique research grants

Audience: Graduate

5. Critique and discuss peer reviewed manuscripts

Audience: Graduate

6. Develop and deliver oral presentations (research paper and own research)

Audience: Graduate

7. Improve communication skills (oral and written)

Audience: Graduate

**BOTANY/F&W ECOL/ZOOLOGY 672 – HISTORICAL ECOLOGY**

2 credits.

Study the importance of past events for current ecosystems. Emphasizes concepts and applications.

**Requisites:** Senior standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**BOTANY 681 – SENIOR HONORS THESIS**

3 credits.

Individual research for students completing theses for honors in the Botany major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**BOTANY 682 – SENIOR HONORS THESIS**

3 credits.

Individual research for students completing theses for honors in the Botany major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BOTANY 691 – SENIOR THESIS**

2-3 credits.

Individual research for students completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**BOTANY 692 – SENIOR THESIS**

2-3 credits.

Individual research for students completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**BOTANY 698 – DIRECTED STUDY**

1-4 credits.

Advanced directed research projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2017

**BOTANY 699 – DIRECTED STUDY**

1-4 credits.

Explore research questions that facilitate learning in the field of botany through guidance and mentorship in a research environment.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**BOTANY/ZOOLOGY 725 – ECOSYSTEM CONCEPTS**

3 credits.

Scope and objectives of ecosystem ecology; roles of theory, long-term studies, comparative studies, and large-scale experiments; scaling problems; ecosystem services and ecological economics; adaptive ecosystem assessment and management.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**BOTANY 801 – ADVANCED PLANT COMMUNITY ECOLOGY**

4 credits.

Ecological determinants of plant community structure, dynamics, and diversity from an evolutionary perspective. Relations of vegetation types, physiognomy and phenology to plant adaptation and constraints. Gradient analysis, succession, nutrient cycling, plant-herbivore interactions, species richness.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**BOTANY 802 – PHYSIOLOGICAL PLANT ECOLOGY**

3 credits.

Gas exchange at the individual plant and community level, energy balance and water relations, nutrient cycling, biomechanical adaptations; growth analysis; adaptations to sun and shade, primary productivity models, physiological ecology of selected plant communities (arctic/alpine, boreal, chaparral, desert, tropical, aquatic).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**BOTANY/ENTOM/GENETICS/ZOOLOGY 820 – FOUNDATIONS OF EVOLUTION**

2 credits.

Explore some of the most important themes and debates that have permeated evolutionary biology over the last 50 years. Read key papers related to each controversial topic, debate the pros and cons of competing viewpoints, and reflect on the relevance of the issue to contemporary evolutionary biology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**BOTANY/ENTOM/F&W ECOL/ZOOLOGY 821 – FOUNDATIONS OF ECOLOGY**

2 credits.

Foundational ideas in the field of ecology. Discussion topics trace the development of ecology as a discipline, and the roots of modern ecological thought, as well as the research approaches in ecology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and describe key debates in the history of ecology and ongoing controversies in the field.

Audience: Graduate

2. Differentiate ecological processes and how they sustain ecological systems.

Audience: Graduate

3. Moderate and participate in discussions about the significance of important ecological concepts.

Audience: Graduate

4. Summarize, interpret, and synthesize conceptual theories of ecology orally and in writing.

Audience: Graduate

5. Evaluate peer work and provide constructive, professional feedback.

Audience: Graduate

**BOTANY/BIOCHEM/GENETICS 840 – REGULATORY MECHANISMS IN PLANT DEVELOPMENT**

3 credits.

Molecular mechanisms whereby endogenous and environmental regulatory factors control development; emphasis on stimulus perception and primary events in the signal chain leading to modulated gene expression and cellular development.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2020**BOTANY 858 – SPECIAL TOPICS IN PLANT PHYSIOLOGY**

1-3 credits.

Topics of interest in the area of Plant Physiology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**BOTANY 860 – PLANT CELL BIOLOGY**

2 credits.

Structure/function relationships at the cellular level. Topics include the biogenesis of organelles, vesicle traffic, ion transport and signalling processes, and organization of the cytoskeleton and cell wall.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**BOTANY/F&W ECOL/ZOOLOGY 879 – ADVANCED LANDSCAPE ECOLOGY**

3 credits.

Emphasizes spatial patterning (its development and importance for ecological processes) and often focuses on large regions. Learn concepts, methods, and applications of landscape ecology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**BOTANY/ATM OCN/CIV ENGR/ENVIR ST/GEOSCI/ZOOLOGY 911 – LIMNOLOGY AND MARINE SCIENCE SEMINAR**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**BOTANY/PL PATH 930 – SEMINAR-MYCOLOGY**

1 credit.

Topics, recent advances literature in the area of Mycology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**BOTANY 940 – SEMINAR IN PLANT SYSTEMATICS AND EVOLUTION**

1 credit.

Topics, recent advances literature in the area of Plant Systematics and Evolution.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**BOTANY 941 – PLANT TAXONOMY JOURNAL REVIEW**

1 credit.

Review of recent journal publications in the area of Plant Taxonomy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**BOTANY 950 – SEMINAR-PLANT ECOLOGY**

1 credit.

Topics, recent advances literature in the area of Plant Ecology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**BOTANY/AGROECOL/ATM OCN/ENTOM/ENVIR ST/F&W ECOL/ GEOG/ZOOLOGY 953 – INTRODUCTION TO ECOLOGY RESEARCH AT UW-MADISON**

1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison

Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison

Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology

Audience: Graduate

4. Develop appropriate expectations for advisors and advisees

Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics

Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science

Audience: Graduate

**BOTANY 960 – SEMINAR-PLANT PHYSIOLOGY**

1 credit.

Topics, recent advances literature in the area of Plant Physiology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**BOTANY/ATM OCN/ENVIR ST/F&W ECOL/GEOG/GEOSCI/  
ZOOLOGY 980 – EARTH SYSTEM SCIENCE SEMINAR**

1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**BOTANY 990 – RESEARCH-PHYCOLOGY**

1-12 credits.

Independent research in the area of Phycology.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

**BOTANY 993 – RESEARCH: FUNGAL BIOLOGY**

1-12 credits.

Independent research in the area of Fungal Biology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**BOTANY 994 – RESEARCH-PLANT SYSTEMATICS**

1-12 credits.

Independent research in the area of Plant Systematics.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**BOTANY 995 – RESEARCH-PLANT ECOLOGY**

1-12 credits.

Independent research in the area of Plant Ecology.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**BOTANY 996 – RESEARCH-PLANT PHYSIOLOGY**

1-12 credits.

Independent research in the area of Plant Physiology.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**BOTANY 999 – INDEPENDENT WORK**

1-3 credits.

Mentored reading and research for dissertators.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2011

## CELL AND REGENERATIVE BIOLOGY (CRB)

**CRB/MED HIST 615 – REGENERATIVE MEDICINE ETHICS AND  
SOCIETY**

3 credits.

Study of regenerative medicine and stem cell research within social, ethical and political contexts.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand current and past legal, political and social issues related to regenerative medicine. This includes laws and regulations, but also an understanding of clinical ethics issues, translational research and commercialization, and emerging, novel techniques requiring careful ethical consideration.

Audience: Both Grad & Undergrad

2. Understand more about relations of science, the state, and public, particularly around controversial or novel innovations and will learn how best to address emerging controversies and public concerns ethically in their professional careers.

Audience: Both Grad & Undergrad

3. Learn the guidelines for the responsible conduct of research for stem cell science, where to access regulatory and oversight documents, and how to apply for research protocols with ethics oversight.

Audience: Both Grad & Undergrad

4. Gain analytical skills for addressing policy, legal and social issues through research and writing exercises. Analytical and professional presentation skills will also be learned through classroom interactions and discussion.

Audience: Graduate

**CRB 625 – STEM CELL SEMINAR**

1 credit.

Examines various special topics in stem cell and regenerative medicine research.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Appreciate the broad range of stem cell and regenerative medicine research and potential clinical applications

Audience: Both Grad & Undergrad

2. Critically consider the current state of specific regenerative medicine applications

Audience: Both Grad & Undergrad

3. Evaluate the ethical and public policy questions that stem cell research raises

Audience: Both Grad & Undergrad

4. Identify and describe potential clinical applications of current stem cell and regenerative medicine research

Audience: Undergraduate

5. Apply the knowledge gained on current themes in stem cell and regenerative medicine to research in the field

Audience: Graduate

**CRB 630 – PROTEOMICS APPROACHES FOR BIOLOGISTS**

2 credits.

Proteomics and metabolomics are playing an increasingly important role in biology and medicine. Many biology labs are now starting to use proteomics and metabolomics in their research projects. Includes the essential fundamentals and applications in mass spectrometry-based proteomics and metabolomics to address biological/medical problems. Design of proteomics/metabolomics experiments, troubleshooting, and proper interpretation of the results.

**Requisites:** BIOCHEM 501, 507, or graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CRB 640 – FUNDAMENTALS OF STEM CELL AND REGENERATIVE BIOLOGY**

3 credits.

Provides a foundation to understand fundamental biological, mechanistic, and experimental concepts in the field of stem cell and regenerative biology.

**Requisites:** BIOCORE 383, BIOCHEM 501, BIOCHEM 507, GENETICS 466, GENETICS 467, ZOOLOGY 570, or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the characteristics of embryonic stem cells, induced pluripotent stem cells, and adult stem cells from cardiac, blood, neural, endodermal, and vascular tissues

Audience: Both Grad & Undergrad

2. Identify experimental technologies used to investigate stem cells

Audience: Both Grad & Undergrad

3. Present scientific articles assigned by the instructor

Audience: Both Grad & Undergrad

4. Moderate a scientific discussion among their peers

Audience: Both Grad & Undergrad

5. Critique and discuss scientific articles

Audience: Both Grad & Undergrad

6. Formulate hypotheses and propose experiments as future directions that could follow from the discussed articles

Audience: Graduate

**CRB 650 – MOLECULAR AND CELLULAR ORGANOGENESIS**

3 credits.

Covers the most current knowledge of the principles of organogenesis. Focuses on the molecular and cellular pathways leading to normal tissue and organ development and regeneration, including in depth discussions of specification and differentiation processes.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151 or BIOCORE 383) and junior standing, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CRB/B M E 670 – BIOLOGY OF HEART DISEASE AND REGENERATION**

3 credits.

Presents diverse topics in contemporary heart biology to facilitate understanding of biological, mechanistic, and experimental concepts of cardiac physiology, disease, and regeneration. Learn cellular and molecular mechanisms underlying heart physiology, function, disease and regenerative ability in various model systems. Includes thinking critically about methodology, experimental design and interpretation, and how conclusions are reached in heart biology through cutting-edge literature.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151 and BIOCHEM 501) or graduate/professional standing.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Gain knowledge of cardiovascular physiology and biology, use of genetic model organisms, stem cell biology and regenerative medicine (didactic portion of course; attendance, and exams).

Audience: Both Grad & Undergrad

2. Understand the main themes of heart biology by reading and discussing state-of-the-art literature (journal reviews; evaluated by lecturer for each journal review session).

Audience: Both Grad & Undergrad

3. Develop ability to critically evaluate published scientific research in the cardiovascular field by discussing with peers and instructors.

Audience: Both Grad & Undergrad

4. Analyze scientific data and methodology employed in the field of heart biology.

Audience: Graduate

5. Develop ability to create an experimental design for different types of heart biology research (such as hypothesis, methodology or phenomenon driven studies).

Audience: Graduate

6. Understand the current challenges for developing therapeutic strategies for heart disease and regeneration and propose feasible approaches to resolve these challenges.

Audience: Graduate

7. Understand the concepts of techniques and methods that are currently used for cardiac biology research.

Audience: Undergraduate

8. Describe the challenges for developing therapeutic strategies for heart disease and regeneration.

Audience: Undergraduate

**CRB 675 – TOPICS IN CELL AND REGENERATIVE BIOLOGY**

1-3 credits.

Examines various special topics in Cell and Regenerative Biology.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102) or BOTANY/BIOLOGY 130 or (ZOOLOGY/BIOLOGY/BOTANY 151 and 152) or BIOCORE 383; or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in cell and regenerative biology

Audience: Both Grad & Undergrad

2. Identify and describe key theories, concepts, and methods in cell and regenerative biology

Audience: Both Grad & Undergrad

3. Explore a new phenomenon or modality in cell and regenerative biology and apply the knowledge gained to research in the field

Audience: Graduate

**CRB 699 – INDEPENDENT STUDY**

1-4 credits.

One-on-one learning experience allowing undergraduates to work with a faculty adviser to develop research projects and skills.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply concepts learned in coursework to real life situations and settings

Audience: Undergraduate

2. Read, understand, and effectively search scientific literature

Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

**CRB/MEDICINE 701 – CELL SIGNALING AND HUMAN DISEASE**

1 credit.

Landmark discoveries, as well as current knowledge and controversies in human health, with an emphasis on cancer biology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically evaluate the primary literature underlying medical knowledge.

Audience: Graduate

2. Practice presentation and leading discussion of primary literature.

Audience: Graduate

3. Read the basic evidence underlying landmark discoveries and controversies in cancer biology.

Audience: Graduate

4. Understand how grant proposals are written and evaluated.

Audience: Graduate

**CRB/GENETICS 710 – DEVELOPMENTAL GENETICS**

3 credits.

Covers a broad range of topics in animal development, with an emphasis on molecular mechanisms. Focuses on common themes, with the goal of understanding and analyzing current research in developmental biology and genetics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Ability to critically evaluate published scientific work (journal reviews).

Audience: Graduate

2. Ability to communicate critical evaluations professionally and articulately (lecturer and TA feedback at each session).

Audience: Graduate

3. Develop deep knowledge of developmental biology, use of genetic model organisms, stem cell biology and regenerative medicine (didactic portion of course).

Audience: Graduate

4. Improved presentation skills (each student has a scheduled presentation four times during the semester in addition to ad hoc participation).

Audience: Graduate

5. Skills in providing feedback to peers (through student evaluations peer presentations each class period).

Audience: Graduate

**CRB 800 – INTELLECTUAL PROPERTY, PATENTS AND LICENSING**

2 credits.

Presents important core concepts, including intellectual property, patent law, trademarks, copyrights, trade secrets, licensing and patent litigation, all specific to the field of biotechnology. Covers the types of intellectual property and how they fit together to protect a product or service. Covers the fundamentals of licensing and technology transfer and the important role of patent examines. Explores the unique aspects of early-stage intellectual property, including market dynamics, pricing and valuation.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the principal types of intellectual property.

Audience: Graduate

2. Appreciate how the various types of intellectual property fit together to protect a service or product.

Audience: Graduate

3. Apply the fundamentals of licensing intellectual property.

Audience: Graduate

4. Gain a basic understanding of what is meant by technology transfer and its importance to the field of biotechnology.

Audience: Graduate

5. Develop an understanding of the market dynamics, pricing, and valuation of early-stage intellectual property.

Audience: Graduate

**CRB 802 – BUSINESS OF BIOTECHNOLOGY: FUNDAMENTALS OF PRODUCT DEVELOPMENT**

2 credits.

Exposure to business principles as applied to the operation of biotechnology companies and serve as a foundation for the more advanced business curriculum. Lays the groundwork to fully appreciate the challenges inherent in translating scientific discoveries into a successful business.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the difference between scientific and commercial success. Bring awareness of technology evolution processes to both issues.

Audience: Graduate

2. Appreciate the challenge of selecting and developing new products that will both provide useful products and deliver a positive return on investment.

Audience: Graduate

3. Be able to select and use the appropriate financial tools for evaluating investments and monitoring the financial progress of a company.

Audience: Graduate

4. Integrate what they have learned into an Opportunity Assessment for a candidate technology.

Audience: Graduate

**CRB 803 – MOLECULAR TECHNOLOGIES I**

2 credits.

An intensive workshop that will teach biotechniques, biotechnology product development, and biotechnology applications interfaced with analytical, communication and teaching skills. Simulates the corporate and academic biotechnology setting.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop effective communication and basic science theory & practice by writing and maintaining a laboratory notebook.

Audience: Graduate

2. Perform and evaluate molecular based technology protocols.

Audience: Graduate

3. Learn the vocabulary of biotechnology and the science that underlies it through hands-on experience.

Audience: Graduate

4. Critique research studies and laboratory results.

Audience: Graduate

**CRB 804 – BIOTECHNOLOGY REGULATION AND ETHICS**

2 credits.

An introductory survey course of the political, legal, and ethical issues that have driven the development of the biotechnology industry. Special emphasis is given to FDA regulation of new drugs, devices, and biologics, and to federal regulation and ethics of human subjects research. Come away with an enhanced ability to understand how regulation and politics interact with business and finance to influence the formation and growth of biotechnology companies. Introduction to the ethical issues that help shape public policy regarding applications of biotechnology.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the structure of the US legal and regulatory system.

Audience: Graduate

2. Identify some areas of ethical concern regarding research on biotechnology and applications of biotechnology.

Audience: Graduate

3. Identify and understand the source and some content of key laws and regulations governing biotechnology research and its medical applications.

Audience: Graduate

### CRB 810 – MOUSE GENETICS AND EMBRYONIC STEM CELLS: LAB IMMERSION AND UNDERSTANDING CURRENT LITERATURE

2 credits.

Clinically relevant methods of scientific thought, inquiry and analysis via the presentation of specific research topics. Emerging concepts in developmental genetics and embryonic stem (ES) cell biology are used as a means of introducing the participants to the critical importance of identifying the "right" question, selecting the "best" tools to answer the question, using the appropriate logic to interpret experimental results and finally, constructing appropriate conclusions. Application of the literature of mouse genetics and laboratory research to biomedical health decisions. Strong emphasis on the tools used in the research literature and to 'get your hands dirty' learning the basics of the laboratory techniques involved.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate competencies in design and interpretation of mouse genetic experiments from literature.

Audience: Graduate

2. Demonstrate competencies in techniques in early embryonic stem cell fate decisions.

Audience: Graduate

3. Successful performance of basic wet lab techniques related to mouse genetic experiments

Audience: Graduate

4. Successful performance of embryonic stem cell culture derivation and differentiation.

Audience: Graduate

### CRB 820 – BIOTECHNOLOGY OPERATIONS

5 credits.

Addresses issues related to the development and manufacture of products for human health, including medical devices and human therapeutics.

Topics include regulatory affairs, quality control and validation, clinical and nonclinical studies.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand key disciplines and principles required to successfully develop a variety of biotechnology products for targeted markets.

Audience: Graduate

2. Appreciate the need to, and understand the procedures required to, plan, manage, coordinate and synchronize development activities within a biotechnology company.

Audience: Graduate

3. Comprehend the regulatory environments under which biotechnology products are developed and approved for market.

Audience: Graduate

4. Be able to foster team participation leading to increased product value and the fastest route to the marketplace.

Audience: Graduate

5. Demonstrate the ability to design a development strategy, to clearly communicate objectives, and to provide leadership throughout implementation.

Audience: Graduate

**CRB 824 – MOLECULAR TECHNOLOGIES II**

3 credits.

An intensive workshop that will teach biotechniques, biotechnology product development, and biotechnology applications interfaced with analytical, communication and teaching skills. Simulates the corporate and academic biotechnology setting.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze importance of biotechnology research and diagnostic applications, especially in the area of nucleic acid and protein applications.

Audience: Graduate

2. Perform biomanufacturing protocols required to purify target protein from a number of different laboratory techniques.

Audience: Graduate

3. Critically analyze and maintain biomanufacturing operations.

Audience: Graduate

**CRB 830 – EARLY DRUG DISCOVERY**

4 credits.

Provides an overview of the early drug discovery process, including target identification and validation, generation of diverse chemical libraries, assay development and high throughput screening, lead optimization by compound profiling, and drug targeting and delivery.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Outline the early drug discovery process, from target identification up to nonclinical trials.

Audience: Graduate

2. Develop a scientific understanding of mechanisms of one or more disease processes.

Audience: Graduate

3. Identify a disease target and explain how modulation of that target could treat or prevent a disease.

Audience: Graduate

4. Describe current and emerging methods for generating compound diversity in chemical libraries, natural products, and antibodies, including molecular modeling and structure-based drug design.

Audience: Graduate

5. Be able to research a technology used in drug discovery, understand the unmet need it addresses, and summarize the key information in a clear and concise way, both verbally and in a written format.

Audience: Graduate

**CRB 834 – MOLECULAR TECHNOLOGIES III**

2 credits.

Covers topics and concepts in the drug discovery process, with emphasis on laboratory assays and methods used in primary, secondary, and in vitro ADMETox (Absorption, Distribution, Metabolism, Excretion, Toxicity) drug screening. In addition, students build communication and critical thinking skills while working on team projects and analyzing scientific results.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Employ effective scientific communication methods demonstrating knowledge and skills when: writing scientific papers; preparing detailed scientific protocols, critiquing scientific journal articles in the area of ADMET and drug discovery, and organizing and presenting detailed scientific presentations.

Audience: Graduate

2. Investigate how protein kinase and cytochrome P450 enzyme assay technology are used in the drug discovery process.

Audience: Graduate

3. Perform and evaluate multiple assays using a variety of technologies including, but not limited to: Cytochrome P450 enzyme and TR-FRET kinase assay technologies, cell culture techniques, and genome editing and CRISPR/Cas-9.

Audience: Graduate

4. Evaluate multiple assay methods for efficiency by measuring viability, toxicity, permeability, and ion channel activity.

Audience: Graduate

5. Compare the following roles in biotechnology and the drug discovery processes for fluorescent microscopy, high content screening, and in vivo imaging.

Audience: Graduate

6. Analyze and summarize data and quality control measures for assays as they relate to biotechnology and drug discovery, which will facilitate critical thinking.

Audience: Graduate

**CRB 841 – BUSINESS OF BIOTECHNOLOGY: CONTEMPORARY CHALLENGES AND APPLICATIONS**

2 credits.

Presents contemporary issues in the business of biotechnology where students apply concepts critical to the success of modern biotechnology firms. Topics focus on modern problem-solving, including issues relating to leadership and management, product development and negotiation and licensing.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize and appreciate risks and challenges associated with commercialization of early-stage research and innovation.

Audience: Graduate

2. Determine those elements that make up a viable business opportunity.

Audience: Graduate

3. Recognize strengths and limitations of a variety of business models.

Audience: Graduate

**CRB 842 – BUSINESS OF BIOTECHNOLOGY: SUSTAINING GROWTH**

3 credits.

Examine how companies gain and sustain competitive advantages.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze industry forces and environmental trends to assess industry potential.

Audience: Graduate

2. Assess company's resources for potential to generate a competitive advantage.

Audience: Graduate

3. Identify opportunities and strategies to add or supplement capabilities.

Audience: Graduate

4. Understand the challenges and opportunities of creating value through a global strategy.

Audience: Graduate

5. Explain how companies might add value across diverse lines of business through knowledge of R&D strategic management.

Audience: Graduate

6. Understand how to apply negotiation and management skills to guide strategic change efforts.

Audience: Graduate

7. Apply tools learned across curriculum, including quantitative and qualitative analysis.

Audience: Graduate

**CRB 843 – PROJECT MANAGEMENT AND LEADERSHIP**

2 credits.

With a focus on the biotechnology and medical device industries, provides an opportunity to share experiences and information and to practice leadership and project management knowledge and skills. Focuses upon understanding and developing a Project Management Plan. Addresses the issues and various situations faced by Project Managers and their effective response.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the components of technical project management, and the social and leadership skills that are needed to lead a team in the global biopharmaceutical or medical device industries.

Audience: Graduate

2. Apply effective leadership skills to work within diverse groups of professionals and communities as they address and solve problems, make critical decisions, and measure and mitigate risk.

Audience: Graduate

3. Describe the nature of and responses to social forces that impact a team or team leader and the technologies managed by that team.

Audience: Graduate

4. Design, use, and defend a project management plan using common project management methods.

Audience: Graduate

5. Compare and contrast the challenges and unique components of leading teams in a global environment compared to domestically.

Audience: Graduate

**CRB 844 – ADVANCED BIOTECHNOLOGY: GLOBAL PERSPECTIVES**

3 credits.

Focuses on state-of-the-art topics of global importance in biotechnology. Skills and knowledge from previous courses are integrated and applied to achieve a new level of synthesis and depth of understanding about important programs in biotechnology today. Deepen technical understanding of novel technologies and broaden awareness of ethical and regulatory issues in biotechnology globally. Increase awareness of opportunities for intellectual collaboration and entrepreneurship.

**Requisites:** Declared in the Biotechnology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify, research, and devise a final research topic with both faculty and peer input, from numerous perspectives (science, business, law, regulatory, ethical, and political)

Audience: Graduate

2. Summarize and communicate an assigned special topic in global biotechnology, including stem cell applications, healthcare innovations, biomanufacturing issues, or metagenomic and microbiome analysis.

Audience: Graduate

3. Demonstrate effective written and oral communication through a variety of formats and to a variety of audiences.

Audience: Graduate

4. Develop effective strategies for researching different biotechnologies in depth and critical analysis, using a variety of sources.

Audience: Graduate

### CRB 845 – PROFESSIONAL DEVELOPMENT AND EFFECTIVE MANAGEMENT

1 credit.

Focus on effective management and career development. Learn and practice the applied skills needed for effective managers that lead to synergistic team success within a biotechnology company. Different communication styles will be explored that are used to engage and assess employees. Professional development will be explored to expand career pathways through networking and by generating professional resumes and interviewing skills.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze skills required to influence, prioritize, and set goals in a biotechnology company.

Audience: Graduate

2. Evaluate team culture in terms of what really matters to enable results and provide psychological safety.

Audience: Graduate

3. Create situational, behavioral, and impact driven feedback strategies so that both the employee and manager are successful.

Audience: Graduate

4. Explore the differences between managing and coaching the team through case studies and scenarios.

Audience: Graduate

5. Generate a career development plan that includes effective resumes, cover letters, networking, and employment research skills.

Audience: Graduate

### CRB 846 – BIOTECHNOLOGY CAPSTONE

1 credit.

Goal is to identify a global biotechnology problem, find a technical solution, and analyze all aspects from a business, regulatory, and scientific perspective.

**Requisites:** Declared in Biotechnology MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify an important global biotechnology-based problem and define a novel biotechnology-based solution to address it.

Audience: Graduate

2. Analyze the economic logic of the global biotechnology problem and solution. Consider customers, market, pricing, and competitors.

Audience: Graduate

3. Provide insightful business and technical questions to research including finding effective resources and subject matter experts.

Audience: Graduate

4. Discuss the global/international technical and business considerations using information and tools covered in previous courses in the MS in Biotechnology Program.

Audience: Graduate

5. Identify a company to implement your proposed solution to augment the company's current portfolio.

Audience: Graduate

6. Identify key regulatory, intellectual property, manufacturing, social, or political issues that could impact the success of the solution.

Audience: Graduate

7. Critique both technical and business considerations in a clear, concise, and logical manner to make credible technical and business solutions and recommendations.

Audience: Graduate

**CRB 850 – FUNDAMENTALS OF STEM CELL AND REGENERATIVE BIOLOGY**

1 credit.

Gain in-depth knowledge of the fundamentals of stem cell and regenerative biology. This knowledge forms the basis for novel translational research and both diagnostic and therapeutic options. Topics to be covered include the origins of embryonic stem cells (ESCs) and induced pluripotent stem cells (iPSCs) and how they are being used for both research and for clinical applications. Read, discuss, and present cutting-edge literature on how iPSCs are being used to model a variety of human diseases and how stem cell therapies are being used to treat autoimmune disorders such as Lupus Erythematosus, Multiple Sclerosis, and Crohn's disease. Participate in the Stem Cell and Regenerative Medicine Center weekly seminar, and hear from top UW researchers about how they are using stem cells to develop therapies for bone and vascular repair.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the fundamentals of stem cell biology, including the derivation of embryonic and induced pluripotent stem cells  
Audience: Graduate

2. Describe the ethical considerations for using stem cells in research  
Audience: Graduate

3. Describe the ethical considerations for using stem cells in the clinic  
Audience: Graduate

4. Discuss how induced pluripotent stem cells can be used to model human diseases  
Audience: Graduate

5. Discuss translational approaches to use of stem cells for bone and vascular regeneration  
Audience: Graduate

6. Discuss the current status of stem cell transplantation for treatment of autoimmune disorders  
Audience: Graduate

**CRB 860 – THE BEAT GOES ON: GENERATION AND REGENERATION OF THE HEART**

2 credits.

The molecular and cellular development of the heart and of its regenerative potential. This knowledge forms the basis for novel translational research and both diagnostic and therapeutic options. Topics to be covered include the genetics underlying normal heart development as well as cardiac tissue specification and differentiation with a focus on molecular signals, associated signal transduction pathways, and transcriptional regulation. Read, discuss, and present cutting-edge literature on the genetic contributions to congenital heart defects and adult heart disease and on cardiac stem cells and the regenerative capacity of the heart. Participate in Adult and Pediatric Cardiology Grand Rounds, the Madison Perinatology Conference, learn about cutting-edge molecular diagnostics for fetal, pediatric and adult cardiac disease, and learn when and how to perform an adult echocardiogram.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the fundamentals of cardiac development, including the transcription factors and signaling pathways that regulate normal cardiac morphogenesis  
Audience: Graduate

2. Describe the genetic factors underlying normal and pathological cardiac development  
Audience: Graduate

3. Provide examples of fetal, neonatal and adult cardiac defects that have genetic etiologies  
Audience: Graduate

4. Discuss animal models and tissue-engineering systems used to investigate cardiac development  
Audience: Graduate

5. Discuss the current status of cardiac regeneration using stem cells and resident cardiac cells  
Audience: Graduate

6. Describe state of the art molecular and imaging tools used to diagnose cardiac defects  
Audience: Graduate

7. Explain when each of these tools should be applied  
Audience: Graduate

**CRB 990 – RESEARCH AND THESIS**

1-9 credits.

Research and Thesis.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Exhibit a broad understanding of general cell and regenerative biology principles.

Audience: Graduate

2. Conduct independent research using a variety of approaches.

Audience: Graduate

3. Think critically to address research challenges.

Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research.

Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab.

Audience: Graduate

## CHEMICAL AND BIOLOGICAL ENGINEERING (CBE)

**CBE 1 – COOPERATIVE EDUCATION PROGRAM**

1 credit.

Work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career.

**Requisites:** Sophomore standing**Course Designation:** Workplace - Workplace Experience Course**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Undergraduate

**CBE 150 – INTRODUCTION TO CHEMICAL ENGINEERING**

1 credit.

Overview of the field of chemical engineering, including types of careers, industries, and skills required for successful completion of the degree and entry into the chemical engineering profession.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. describe industries and career paths available to B.S. chemical engineers

Audience: Undergraduate

2. describe skills required for successful completion of the chemical engineering degree program, and entry into the chemical engineering profession

Audience: Undergraduate

**CBE 250 – PROCESS SYNTHESIS**

3 credits.

An introduction to the invention of processes for the large scale, low cost processing of materials such as water, chemicals, petroleum products, food, drugs and wastes.

**Requisites:** CHEM 116, 329, or concurrent enrollment**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Create and interpret simplified chemical process flowsheets

Audience: Undergraduate

2. Apply mass and energy balances to chemical processes and unit operations

Audience: Undergraduate

3. Use phase equilibrium data and equations to calculate performance of simple separation processes

Audience: Undergraduate

4. Use reaction equilibrium concepts to calculate the performance of simple chemical reactors

Audience: Undergraduate

**CBE 255 – INTRODUCTION TO CHEMICAL PROCESS MODELING**

3 credits.

Introduction to modeling of chemical processes and introduction to using modern computational tools to analyze the models.

**Requisites:** (CBE 250 or concurrent enrollment) and (MATH 319, 320, 376, or concurrent enrollment)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use modern computational software for numerical problem solving

Audience: Undergraduate

2. Explain concepts for numerical problem-solving strategies including logic statements and DO loops

Audience: Undergraduate

3. Use programming tools to solve systems of equations relevant to chemical engineering

Audience: Undergraduate

**CBE 310 – CHEMICAL PROCESS THERMODYNAMICS**

3 credits.

Introduction to thermodynamics, energy balances, applications to steady state and unsteady state processes, behavior of pure fluids, chemical reaction equilibria.

**Requisites:** (MATH 234 or 376), (PHYSICS 201, 207, 247, E M A 202 or M E 240), CBE 250, and (CBE 255 or concurrent enrollment), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the relationship between heat and work through the first law of thermodynamics

Audience: Undergraduate

2. Determine limitations imposed by the second law of thermodynamics on the conversion of heat to work

Audience: Undergraduate

3. Describe the definitions and relationships among the thermodynamic properties of pure materials, such as internal energy, enthalpy, and entropy

Audience: Undergraduate

4. Obtain or estimate the thermal and volumetric properties of real fluids

Audience: Undergraduate

5. Employ energy balances in the analysis of batch, flow, and cyclical processes, including power cycles and refrigeration

Audience: Undergraduate

**CBE 311 – THERMODYNAMICS OF MIXTURES**

3 credits.

Properties of ideal and non-ideal vapors and liquids, ideal and non-ideal multicomponent vapor-liquid and liquid-liquid equilibria, complex chemical reaction equilibria, electrolytic solutions, surface thermodynamics, solid phase thermodynamics.

**Requisites:** CBE 310

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the terminology, theory and models that describe multicomponent, multiphase systems at equilibrium

Audience: Undergraduate

2. Explain the terminology, theory and models that describe chemical reacting systems at equilibrium

Audience: Undergraduate

3. Apply chemical thermodynamic principles to describe, analyze data, and predict properties of multicomponent systems at phase and/or chemical reaction equilibrium

Audience: Undergraduate

**CBE 320 – INTRODUCTORY TRANSPORT PHENOMENA**

4 credits.

Mass, momentum, and energy transport; calculation of transport coefficients; solution to problems in viscous flow, heat conduction, and diffusion; dimensional analysis; mass, momentum, and heat transfer coefficients; over-all balances; elementary applications.

**Requisites:** (PHYSICS 201, 207, 247, or E M A 201) and (MATH 319, 320 or 376), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Setup and solve shell balances for conservation of momentum, energy, and mass

Audience: Undergraduate

2. Reduce and solve the appropriate equations of change to obtain desired profiles for velocity, temperature and concentration

Audience: Undergraduate

3. Reduce and solve appropriate macroscopic balances for conservation of momentum, energy and mass

Audience: Undergraduate

4. Utilize information obtained from solutions of the balance equations to obtain engineering quantities of interest

Audience: Undergraduate

**CBE 324 – TRANSPORT PHENOMENA LAB**

3 credits.

Determination of thermodynamic properties, transport properties, and transfer coefficients; study of related phenomena.

**Requisites:** CBE 310, (CBE 320 or concurrent registration), and STAT 324

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct laboratory experiments using engineering lab practices

Audience: Undergraduate

2. Communicate experimental results through written and visual methods  
Audience: Undergraduate

3. Apply macroscopic balances of mass, energy, and chemical species to analyze experimental data  
Audience: Undergraduate

4. Design experiments for measuring transport properties  
Audience: Undergraduate

**CBE 326 – MOMENTUM AND HEAT TRANSFER OPERATIONS**

3 credits.

Analysis of chemical engineering operations involving fluid flow and heat transfer. Flow of fluids through ducts and porous media; motion of particulate matter in fluids; general design and operation of fluid-flow equipment. Conductive, convective and radiative heat exchange with and without phase change; general design and operation of heat-exchange equipment.

**Requisites:** (CBE 310 and 320) or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply thermodynamics and transport phenomena to analyze and design process equipment used for fluid transport and heat transfer

Audience: Undergraduate

2. Explain the theory and design equations that describe common process equipment used for fluid transport and heat transfer  
Audience: Undergraduate

**CBE 355 – STATISTICS FOR CHEMICAL ENGINEERS**

3 credits.

Concepts and techniques from statistics, data science, and machine learning applied to problems in chemical engineering. Random variables, estimation, statistical data analysis and learning, and decision-making under uncertainty.

**Requisites:** (MATH 234 or 375) and CBE 255

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify, formulate, and solve chemical engineering problems by applying principles and methods of statistics, data science, and machine learning

Audience: Undergraduate

2. Use principles of statistics, data science, and machine learning to analyze chemical engineering data, to develop models from data, to quantify uncertainty, and to make decisions under uncertainty  
Audience: Undergraduate

**CBE 424 – OPERATIONS AND PROCESS LABORATORY**

5 credits.

Experiments in unit operations, and supervised individual assignments selected from areas such as: fluid dynamics, analytical methods, reaction kinetics, plastics technology, and use of computers in data processing and simulation.

**Requisites:** CBE 324, 326, 426, and 430

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of operation of common chemical engineering process equipment by conducting experiments on pilot-scale apparatus and analyzing data

Audience: Undergraduate

2. Take a novel project assignment, define an investigation, design and construct experimental apparatus, collect and analyze data, and present conclusions and recommendations in oral or written formats  
Audience: Undergraduate

**CBE 426 – MASS TRANSFER OPERATIONS**

3 credits.

Analysis of chemical engineering operations involving mass transfer. Differential and stagewise separation processes; simultaneous heat and mass transfer; mass transfer accompanied by chemical reaction; general design and operation of mass-transfer equipment.

**Requisites:** CBE 311 and 320**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe major chemical process separations units

Audience: Undergraduate

2. Apply appropriate criteria for selecting among alternative separation technologies

Audience: Undergraduate

3. Complete design calculations for equilibrium staged separation processes (e.g., distillation, absorption)

Audience: Undergraduate

4. Complete design calculations for differential contactors

Audience: Undergraduate

5. Apply mass transfer fundamentals to calculate rates of mass transfer for practical situations and to identify rate-limiting processes

Audience: Undergraduate

**CBE 430 – CHEMICAL KINETICS AND REACTOR DESIGN**

3 credits.

Analysis and interpretation of kinetic data and catalytic phenomena; application of basic engineering principles to chemical reactor design.

**Requisites:** CBE 311 and 320**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Analyze kinetic data and determine rate laws

Audience: Undergraduate

2. Apply ideal reactor models to solve mass and energy balances for chemical reactors

Audience: Undergraduate

3. Analyze the performance of reactors in which multiple reactions are occurring

Audience: Undergraduate

4. Analyze non-ideal flow conditions in reactors and utilize simple models to characterize the performance of such reactors

Audience: Undergraduate

5. Analyze data for heterogeneous catalytic reactions and employ the results of such analyses in designing simple reactors

Audience: Undergraduate

**CBE 440 – CHEMICAL ENGINEERING MATERIALS**

3 credits.

Structure and properties of metallic and nonmetallic materials of construction; interrelations between chemical bonding, structure, and behavior of materials.

**Requisites:** CBE 310 and CHEM 345, or member of Engineering Guest Students**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe how atomic-level composition, structure, and chemical bonding determine macroscopic properties of a material

Audience: Undergraduate

2. Explain the differences in functional properties among classes of materials

Audience: Undergraduate

3. Interpret the results of common materials characterization techniques

Audience: Undergraduate

4. Analyze phase diagrams and explain effects of processing conditions on material properties

Audience: Undergraduate

**CBE 450 – PROCESS DESIGN**

3 credits.

Analysis and design of chemical processing systems and equipment.

**Requisites:** CBE 326, 426, and 430**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate integrated application of chemical engineering knowledge acquired in prior courses

Audience: Undergraduate

2. Solve a complex engineering design problem using modern computational tools

Audience: Undergraduate

3. Perform an economic evaluation of a chemical process and capital projects

Audience: Undergraduate

4. Use professional conventions and formats for representing engineering results

Audience: Undergraduate

**CBE 470 – PROCESS DYNAMICS AND CONTROL**

3 credits.

A systematic introduction to dynamic behavior and automatic control of industrial processes; lab includes instrumentation, measurement and control of process variables by using conventional hardware and real-time digital computers.

**Requisites:** CBE 326 and (CBE 430 or concurrent enrollment)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify, formulate, and solve linear chemical process dynamics problems

Audience: Undergraduate

2. Use techniques, skills, and modern engineering tools necessary for the practice of chemical engineering

Audience: Undergraduate

3. Design and conduct laboratory experiments, as well as analyze and interpret data, in particular to determine the efficacy of control designs

Audience: Undergraduate

4. Design a control system to meet desired needs for a given process

Audience: Undergraduate

5. Communicate effectively, through laboratory experiences

Audience: Undergraduate

**CBE 489 – HONORS IN RESEARCH**

1-3 credits.

Undergraduate honors research projects supervised by faculty members.

Declared in Chemical Engineering Honors in Research Program

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**CBE/CHEM 505 – ASPECTS OF INDUSTRIAL CHEMISTRY AND BUSINESS FUNDAMENTALS**

3 credits.

Learn the chemistry and chemical engineering that defines societies' standard of living. Commercial chemical processes will be reviewed. Practical realities of how a discovery moves from research to commercial product will be taught through examples and case studies. Financial concepts that guide investment will be reviewed.

**Requisites:** Junior standing and CHEM 345, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the most important value-chains in the chemical industry

Audience: Undergraduate

2. Connect the fundamental chemistry and chemical engineering principles learned in other courses with real-world applications

Audience: Undergraduate

3. Evaluate how laboratory discoveries can be legally protected and successfully commercialized

Audience: Undergraduate

4. Assess and compare alternative technologies against current state-of-the-art technologies

Audience: Undergraduate

**CBE 512 – ENERGY TECHNOLOGIES AND SUSTAINABILITY**

3 credits.

Chemical engineering principles of material and energy balances, chemical process design, and chemical engineering economics are used to analyze a wide variety of energy systems and their impact on the economy, the environment, society, and the chemical process industry.

**Requisites:** CBE 310, CIV ENGR 324, M E 361, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe present and future technologies for energy production and use

Audience: Both Grad & Undergrad

2. Use mass and energy balances to evaluate energy options, understand historical progression and development of energy sources

Audience: Both Grad & Undergrad

3. Evaluate technical issues, scale, and economic practicality of energy alternatives

Audience: Both Grad & Undergrad

4. Critique popular media descriptions with quantitative, factual analyses

Audience: Both Grad & Undergrad

5. Propose research to improve existing energy technologies

Audience: Graduate

**CBE 535 – HETEROGENEOUS CATALYSIS: PRINCIPLES AND APPLICATIONS**

3 credits.

Discusses catalytic phenomena, with extensions to reactor design and catalyst characterization. Examples will be drawn from current problems in catalysis.

**Requisites:** CBE 430, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe catalytic phenomena

Audience: Undergraduate

2. Describe catalytic design

Audience: Undergraduate

3. Explain methods of catalyst characterization

Audience: Undergraduate

**CBE 538 – PROCESSES FOR THE PRODUCTION OF RENEWABLE FUELS AND CHEMICALS FROM BIOMASS**

3 credits.

Various options for conversion of biomass into fuels and chemicals. Evaluation of different biofuel technologies from a chemical engineering perspective, and a holistic overview of the current technical, legal, business, and financial challenges, and opportunities for the production of fuels and chemicals from biomass. Several case studies on biomass conversion provide an overview of how technology is developed.

**Requisites:** CBE 250 and 310, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Understand processes and process flowsheets for chemical processes for converting biomass to fuels and chemicals

Audience: Both Grad & Undergrad

2. Describe and utilize the chemical engineering tools for designing the processes including material balances, energy balances, and economic models

Audience: Both Grad & Undergrad

3. Create quantitative reactor models of a process for converting biomass to fuels and chemicals

Audience: Graduate

**CBE 540 – POLYMER SCIENCE AND TECHNOLOGY**

3 credits.

Synthesis, properties, and fabrication of plastic materials of industrial importance.

**Requisites:** CHEM 345, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain factors that influence the synthesis and structure of polymers

Audience: Undergraduate

2. Describe methods used to analyze and characterize polymer properties

Audience: Undergraduate

3. Describe the breadth of polymer properties and applications

Audience: Undergraduate

4. Explain in depth the use of polymers in a particular application area

Audience: Undergraduate

### **CBE 547 – INTRODUCTION TO COLLOID AND INTERFACE SCIENCE**

3 credits.

Introduction to topics in colloid and interface science, including sedimentation and diffusion, solution thermodynamics, rheology, light scattering, surface tension and contact angle, adsorption, association colloids, particle interactions, electrokinetics, and colloidal stability.

**Requisites:** (CBE 311, CHEM 561, or 562), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the various colloidal forces and phenomena

Audience: Both Grad & Undergrad

2. Employ standard mathematical models of colloidal forces and phenomena

Audience: Both Grad & Undergrad

3. Critically evaluate the interpretation of colloidal phenomena and the application of mathematical models in published literature

Audience: Graduate

### **CBE 554 – CHEMICAL ENGINEERING AND THE COMMUNITY**

1 credit.

Connect with a local community through the development and implementation of two research based hands-on inquiry engineering demonstrations for middle school level after-school science programs.

**Requisites:** CBE 250

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate complex science and engineering topics

Audience: Undergraduate

2. Work with a diverse group of middle school students

Audience: Undergraduate

3. Use best practices for the development and implementation of after-school STEM lessons

Audience: Undergraduate

### **CBE 555 – SEMINAR-CHEMICAL ENGINEERING CONNECTIONS**

1 credit.

Considers a variety of current engineering applications and problems.

Investigate background information on topics of their choice, and present seminars to describe how engineering fundamentals interact with societal impact and how chemical engineering is relevant to societal concerns at large.

**Requisites:** Senior standing or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how engineering fundamentals interact with societal impact and how our undergraduate education in chemical engineering is relevant to societal concerns at large

Audience: Undergraduate

### **CBE/B M E 560 – BIOCHEMICAL ENGINEERING**

3 credits.

Properties of biological molecules; enzyme kinetics, enzyme reactors, and enzyme engineering; metabolic engineering; microbial growth kinetics; bioreactor design; bioseparations.

**Requisites:** Junior standing and (ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 383), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply principles of chemical engineering in the analysis and design of industrial biochemical processes

Audience: Both Grad & Undergrad

2. Describe the role chemistry plays in understanding how bio-molecules and bio-molecular systems work

Audience: Both Grad & Undergrad

3. Extract, communicate and critique key idea(s) from any work of the current technical literature

Audience: Both Grad & Undergrad

4. Identify opportunities for biochemical engineering to address societal needs (e.g., energy, health, materials, food, and the environment)

Audience: Both Grad & Undergrad

5. Demonstrate how chemical engineering principles can be applied to alter the molecular properties of a biological system

Audience: Graduate

**CBE 562 – SPECIAL TOPICS IN CHEMICAL ENGINEERING**

1-3 credits.

Topics of specialized interest to majors in chemical engineering. Given on demand.

**Requisites:** Junior standing or member of Engineering Guest Students

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in chemical engineering

Audience: Undergraduate

**CBE/M E 567 – SOLAR ENERGY TECHNOLOGY**

3 credits.

Radiant energy transfer and its application to solar exchangers; energy balances for solar exchangers, review of theory, economics, and practice of solar energy applications.

**Requisites:** (M E 364, CBE 326, or concurrent enrollment), or graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Predict available solar radiation at a given location and time, for a given surface orientation

Audience: Undergraduate

2. Predict and model thermal and optical losses for solar thermal systems

Audience: Undergraduate

3. Calculate the load on a solar system

Audience: Undergraduate

4. Predict and model long term performance of solar thermal systems

Audience: Undergraduate

**CBE 575 – INSTRUMENTAL ANALYSIS FOR CHEMICAL ENGINEERS**

3 credits.

Instrumental methods as applied to chemical and physical processes in chemical engineering. Spectroscopic, optical, and electrochemical methods; chromatography, differential thermal analysis, and microscopy.

**Requisites:** CBE 324 or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze measurement devices and circuits

Audience: Undergraduate

2. Interface sensors to electronic systems

Audience: Undergraduate

3. Use electromechanical devices to automate chemical engineering equipment

Audience: Undergraduate

4. Fabricate instrumentation for processes and research

Audience: Undergraduate

**CBE 599 – SPECIAL PROBLEMS**

1-4 credits.

Research or independent study.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct and report on independent chemical engineering research

Audience: Undergraduate

**CBE 620 – INTERMEDIATE TRANSPORT PHENOMENA**

3 credits.

Mass, momentum, and energy transport; kinetic theory of transport properties; analytical and approximate solutions to the equations of change; boundary layer theory; turbulence; simultaneous heat and mass transfer; multicomponent diffusion.

**Requisites:** Declared in a Chemical Engineering graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the mechanisms of diffusion and convection of momentum, energy and mass

Audience: Graduate

2. Describe the concepts of conservation of momentum, energy, and mass

Audience: Graduate

3. Reduce and solve the appropriate equations of change and/or use dimensional analysis and scaling arguments to predict desired features (fluxes and/or distributions) of velocity, temperature and concentration

Audience: Graduate

**CBE 648 – SYNTHETIC ORGANIC MATERIALS IN BIOLOGY AND MEDICINE**

2-3 credits.

Introduction to topics relevant to the design, synthesis, fabrication, engineering, and characterization of organic materials currently used in or being designed for use in medical and biotechnological applications.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the physical, chemical, and engineering principles that form the foundation for the design of advanced organic materials for medical applications.

Audience: Graduate

2. Describe the structure and function or selection of a material required for the specific requirements of different applications

Audience: Graduate

3. Read the scientific literature critically, think creatively, and present and discuss scientific ideas in both written and verbal formats

Audience: Graduate

**CBE 660 – INTERMEDIATE PROBLEMS IN CHEMICAL ENGINEERING**

3 credits.

Illustrations of solving chemical engineering problems by using a variety of mathematical topics such as ordinary and partial differential equations, Laplace transform, Bessel functions, matrices, and tensor analysis. Problem formulation and interpretation of results emphasized.

**Requisites:** Declared in a Chemical Engineering graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Formulate chemical engineering problems in appropriate mathematical frameworks

Audience: Graduate

2. Solve chemical engineering problems involving linear algebra

Audience: Graduate

3. Solve chemical engineering problems involving differential equations

Audience: Graduate

**CBE 699 – ADVANCED INDEPENDENT STUDIES**

1-6 credits.

Research on assigned topics under the guidance of a qualified instructor.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Conduct and report on independent chemical engineering research

Audience: Graduate

2. Independently develop researchable chemical engineering questions

Audience: Graduate

3. Appropriately utilize online and library resources

Audience: Graduate

4. Connect their research clearly to other research in their field of study

Audience: Graduate

**CBE 702 – GRADUATE COOPERATIVE EDUCATION PROGRAM**

1-2 credits.

Work experience that combines classroom theory with practical knowledge of operations to provide students with a background on which to develop and enhance a professional career. The work experience is tailored for MS students from within the U.S. as well as eligible international students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Graduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Graduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Graduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Graduate

**CBE 710 – ADVANCED CHEMICAL ENGINEERING THERMODYNAMICS**

3 credits.

Application of thermodynamic principles to selected topics, including equations of state, non-ideal solutions, and complex physical and chemical equilibria.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain molecular-level descriptions of thermodynamics

Audience: Graduate

2. Explain how to obtain thermodynamic properties using molecular simulation

Audience: Graduate

3. Explain continuum-level descriptions of thermodynamics

Audience: Graduate

**CBE 720 – MICROHYDRODYNAMICS, BROWNIAN MOTION, AND COMPLEX FLUIDS**

3 credits.

Foundations for understanding microscale flow and transport phenomena in multiphase and complex fluids, as well as tools for modeling and simulation of their dynamics.

**Requisites:** CBE 620 and 660

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Analyze transport phenomena in complex fluids

Audience: Graduate

2. Describe motions of particles and macromolecules in flow

Audience: Graduate

3. Formulate mathematical models of flows of complex fluids

Audience: Graduate

4. Analyze the relationship between structure and rheology for complex fluids

Audience: Graduate

**CBE 735 – KINETICS AND CATALYSIS**

2-3 credits.

Survey of kinetic principles and factors which influence reaction rates, with particular emphasis on catalysts and catalytic reactions. May include a seminar on modern catalytic research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe kinetic principles and factors that influence reaction rates

Audience: Graduate

2. Describe common catalysts

Audience: Graduate

3. Explain the principles of and factors that influence catalysis

Audience: Graduate

**CBE 750 – ADVANCED CHEMICAL PROCESS SYNTHESIS AND OPTIMIZATION**

3 credits.

Methodologies for synthesis and optimization of chemical process systems. Application of linear, nonlinear, and mixed integer programming to steady state process optimization, production planning, and flowsheet synthesis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain topics from the recent and classic literature on the analysis, synthesis, design, and optimization of chemical engineering systems

Audience: Graduate

2. Apply advanced techniques and algorithms for the synthesis, design, and optimization of chemical engineering systems

Audience: Graduate

**CBE 781 – BIOLOGICAL ENGINEERING: MOLECULES, CELLS & SYSTEMS**

3 credits.

Protein engineering and protein-protein interactions, receptor-ligand binding, cell metabolism and signaling, metabolic engineering and synthetic biology, tissue engineering. Additional topics may be covered such as: regenerative medicine, biomaterials, microbe-host interactions.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Employ quantitative perspectives and approaches to enhance the engineering of biomolecular, cellular and tissue-level systems

Audience: Graduate

2. Explain the primary biological, biomedical and bioengineering literature

Audience: Graduate

**CBE/B M E 783 – DESIGN OF BIOLOGICAL MOLECULES**

3 credits.

Introduction to the methodologies for engineering the structure and function of biological molecules, especially proteins. Develop an understanding for the integration of computation and experiment to address biological molecular engineering problems. Knowledge of biochemistry and cell biology [such as BIOCHEM 501 or ZOOLOGY 570] required.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**CBE 790 – MASTER'S RESEARCH OR THESIS**

1-9 credits.

Directed study projects arranged with instructor.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**CBE 890 – PRE-DISSERTATOR'S RESEARCH**

1-9 credits.

Directed study projects arranged with instructor.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**CBE/B M E/B M I/BIOCHEM/COMP SCI/GENETICS 915 – COMPUTATION AND INFORMATICS IN BIOLOGY AND MEDICINE**

1 credit.

Participants and outside speakers will discuss current research in computation and informatics in biology and medicine. This seminar is required of all CIBM program trainees.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Discuss how methods from computer science, statistics, information science and engineering are applied to problems in biology, medicine and population health

Audience: Graduate

2. Recognize and be able to define applications in translational bioinformatics, clinical informatics and public health informatics

Audience: Graduate

**CBE/BIOCHEM 932 – BIOTECHNOLOGY TRAINING PROGRAM SEMINAR**

1 credit.

Biotechnology Training Program trainees will present their research for critical review by audience.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Discuss research conducted by Biotechnology Training Program trainee peers' labs and the biotechnological applications thereof

Audience: Graduate

2. Examine industrial applications of biotechnology through internship presentations

Audience: Graduate

3. Communicate with a broad scientific audience

Audience: Graduate

**CBE 961 – SEMINAR-CHEMICAL ENGINEERING**

0-1 credits.

Seminar in Chemical Engineering.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**CBE 990 – THESIS-RESEARCH**

1-12 credits.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**CBE 999 – ADVANCED INDEPENDENT STUDIES**

1-6 credits.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 1997

## CHEMISTRY (CHEM)

**CHEM 101 – GENERAL CHEMISTRY I LABORATORY**

1 credit.

Stoichiometry and the mole concept, chemical reactions, thermochemistry, electronic structure of atoms, periodic properties, chemical bonding, intermolecular forces, and the behavior of gases, liquids and solids. Equivalent to laboratory-only part of CHEM 103. Provides a mechanism for awarding credit for experiences with no lecture component. The combination of CHEM 101 and CHEM 105 is equivalent to CHEM 103.

**Requisites:** Consent of instructor**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct, modify, and analyze experiments in the laboratory pertaining to stoichiometry, thermochemistry, and spectroscopy while developing fundamental safety, measurement, and sample isolation techniques.

Audience: Undergraduate

2. Articulate the rationale behind experimental results in verbal communications and written assessments.

Audience: Undergraduate

**CHEM 102 – GENERAL CHEMISTRY II LABORATORY**

1 credit.

Principles and applications of chemical equilibrium, electrochemistry, thermodynamics, kinetics, organic chemistry and other topics that may include nuclear chemistry, biological chemistry and coordination chemistry. Equivalent to laboratory-only part of CHEM 104. Provides a mechanism for awarding credit for experiences with no lecture component. The combination of CHEM 102 and CHEM 106 is equivalent to CHEM 104.

**Requisites:** Consent of instructor**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct, modify, and analyze experiments in the chemistry laboratory pertaining to relevant course concepts (e.g., simple organic synthesis, reaction kinetics, acid/base chemistry, and electrochemistry) while continuing to develop safety, measurement, and sample isolation techniques.

Audience: Undergraduate

2. Articulate the rationale behind experimental results in verbal communications and written assessments.

Audience: Undergraduate

**CHEM 103 – GENERAL CHEMISTRY I**

4 credits.

Stoichiometry and the mole concept, the behavior of gases, liquids and solids, thermochemistry, electronic structure of atoms and chemical bonding, descriptive chemistry of selected elements and compounds, intermolecular forces, and chemistry laboratory skills.

**Requisites:** MATH 112, 114, 171, 221, or placement into MATH 211 or 221. Not open to students with credit for CHEM 109 or 115

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Construct models of atomic, ionic, and molecular substances that account for interactions between particles and energy flows between system and surroundings and use these models to explain trends in physical properties.

Audience: Undergraduate

2. Construct models for atoms or ions that highlight the probable locations and energies of all electrons and use them to explain atomic-level phenomena (e.g., periodic properties or light-matter interactions).

Audience: Undergraduate

3. Construct and use appropriate three-dimensional bonding models that describe the probable valence electron distribution in a molecule and use these models to explain structural observations and chemical behavior.

Audience: Undergraduate

4. Conduct, modify, and analyze experiments in the laboratory pertaining to stoichiometry, thermochemistry, and spectroscopy while developing fundamental safety, measurement, and sample isolation techniques.

Audience: Undergraduate

5. Articulate the rationale behind experimental results in verbal communications and written assessments.

Audience: Undergraduate

6. Calculate, evaluate, and rationalize quantities relevant to stoichiometry and thermodynamics, e.g., amounts in moles, mass, concentration, energy changes.

Audience: Undergraduate

**CHEM 104 – GENERAL CHEMISTRY II**

5 credits.

Principles and application of chemical equilibrium, coordination chemistry, oxidation-reduction and electrochemistry, kinetics, nuclear chemistry, introduction to organic chemistry, and chemistry laboratory skills.

**Requisites:** CHEM 103 and (MATH 112, 114, 171, or 221). Not open to students with credit for CHEM 109 or 115

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Construct and use appropriate three-dimensional bonding models that describe the probable valence electron distribution in the molecule and use these models to explain structural observations and chemical behavior.

Audience: Undergraduate

2. Construct and use particle-level models of structure and energy to describe how systems undergo chemical and/or physical changes toward achieving equilibrium (e.g., predict or explain the outcome of a reaction, the temperature dependence, and/or how energy is harnessed from the reaction).

Audience: Undergraduate

3. Use particle-level models of chemical reactions along with kinetic data to explain or predict how a chemical reaction occurs.

Audience: Undergraduate

4. Conduct, modify, and analyze experiments in the chemistry laboratory pertaining to relevant course concepts (e.g., simple organic synthesis, reaction kinetics, acid/base chemistry, and electrochemistry) while continuing to develop safety, measurement, and sample isolation techniques.

Audience: Undergraduate

5. Articulate the rationale behind experimental results in verbal communications and written assessments.

Audience: Undergraduate

**CHEM 105 – GENERAL CHEMISTRY I**

3 credits.

Stoichiometry and the mole concept, chemical reactions, thermochemistry, electronic structure of atoms, periodic properties, chemical bonding, intermolecular forces, and the behavior of gases, liquids and solids. Equivalent to lecture-only part of CHEM 103. Provides a mechanism for awarding credit for experiences with no laboratory component. The combination of CHEM 101 and CHEM 105 is equivalent to CHEM 103.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Construct models of atomic, ionic, and molecular substances that account for interactions between particles and energy flows between system and surroundings and use these models to explain trends in physical properties.

Audience: Undergraduate

2. Construct models for atoms or ions that highlight the probable locations and energies of all electrons and use them to explain atomic-level phenomena (e.g., periodic properties or light-matter interactions).

Audience: Undergraduate

3. Construct and use appropriate three-dimensional bonding models that describe the probable valence electron distribution in a molecule and use these models to explain structural observations and chemical behavior.

Audience: Undergraduate

4. Calculate, evaluate, and rationalize quantities relevant to stoichiometry and thermodynamics, e.g., amounts in moles, mass, concentration, energy changes.

Audience: Undergraduate

**CHEM 106 – GENERAL CHEMISTRY II**

4 credits.

Principles and applications of chemical equilibrium, electrochemistry, thermodynamics, kinetics, organic chemistry and other topics that may include nuclear chemistry, biological chemistry and coordination chemistry. Equivalent to lecture-only part of CHEM 104. Provides a mechanism for awarding credit for experiences with no laboratory component. The combination of CHEM 102 and CHEM 106 is equivalent to CHEM 104.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Construct and use appropriate three-dimensional bonding models that describe the probable valence electron distribution in the molecule and use these models to explain structural observations and chemical behavior.

Audience: Undergraduate

2. Construct and use particle-level models of structure and energy to describe how systems undergo chemical and/or physical changes toward achieving equilibrium (e.g., predict or explain the outcome of a reaction, the temperature dependence, and/or how energy is harnessed from the reaction).

Audience: Undergraduate

3. Use particle-level models of chemical reactions along with kinetic data to explain or predict how a chemical reaction occurs.

Audience: Undergraduate

**CHEM 108 – CHEMISTRY IN OUR WORLD**

5 credits.

Selected topics in inorganic and organic chemistry. Emphasis is on relevance to biological, environmental and social issues.

**Requisites:** Not open to students with credit for CHEM 104, 109, or 115

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply appropriate chemical concepts to describe contemporary scientific issues and evaluate proposed solutions to these issues.

Audience: Undergraduate

2. Identify the chemical concepts and principles needed to solve a chemistry problem and evaluate the validity of an answer to a given problem.

Audience: Undergraduate

3. Apply models of atoms, molecules, and their interactions to explain the physical and chemical macroscopic properties of gasses, liquids, and solids.

Audience: Undergraduate

4. Visualize and apply chemical and mathematical models to link atomic and molecular structure to macroscopic properties (e.g., to predict the outcome of selected chemical reactions).

Audience: Undergraduate

5. Conduct, modify, and analyze experiments in the laboratory pertaining to product-generation, thermochemistry, and spectroscopy while developing fundamental safety, measurement, and sample isolation techniques.

Audience: Undergraduate

6. Articulate the rationale behind experimental results in verbal communications and written assessments.

Audience: Undergraduate

**CHEM 109 – ADVANCED GENERAL CHEMISTRY**

5 credits.

Accelerated coverage of topics in general chemistry, including introduction to laboratory techniques. Topics include atomic and molecular structure, chemical equilibrium, acid-base chemistry, thermodynamics, kinetics, and electrochemistry.

**Requisites:** MATH 113, 114, 171, or placement into MATH 221. Not open to students with credit for CHEM 104 or 115

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Construct models for atoms or ions that highlight the probable locations and energies of all electrons and use them to explain atomic-level phenomena (e.g., periodic properties, entropy, or light-matter interactions).

Audience: Undergraduate

2. Construct and use geometrically accurate three-dimensional bonding models that describe the probable valence electron distribution in the molecule and use these models to explain structural observations or parameters.

Audience: Undergraduate

3. Construct models of atomic, ionic, metallic, and molecular substances (including polymers and biomolecules) that include interactions between particles and energy flows between system and surroundings and use these models to explain trends in physical properties.

Audience: Undergraduate

4. Use models of structure and energy to describe how systems undergo chemical and/or physical changes toward achieving equilibrium (e.g., predict or explain the outcome of a reaction, the temperature dependence, and/or how energy is harnessed from the reaction).

Audience: Undergraduate

5. Use particle-level models of chemical reactions along with kinetic data to explain or predict how a chemical reaction occurs.

Audience: Undergraduate

6. Conduct, modify, and analyze experiments in the chemistry laboratory pertaining to relevant course concepts (e.g., simple organic synthesis, reaction kinetics, acid/base chemistry, and electrochemistry) while continuing to develop safety, measurement, and sample isolation techniques.

Audience: Undergraduate

7. Articulate the rationale behind experimental results in verbal communications and written assessments.

Audience: Undergraduate

**CHEM 115 – CHEMICAL PRINCIPLES I**

5 credits.

Explores a detailed atomic and molecular view of matter and its interactions, with a specific focus on quantum theory, molecular structure, and chemical bonding. Application required for enrollment.

**Requisites:** Consent of instructor

**Course Designation:** Gen Ed – Quantitative Reasoning Part B  
Breadth – Physical Sci. Counts toward the Natural Sci req  
Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply a qualitative and quantitative understanding of quantum mechanics to fundamental chemical concepts to rationalize the structure of the atom and molecules, bond formation, and chemical and physical properties.

Audience: Undergraduate

2. Apply mathematical models such as elementary quantum mechanics eigenvalue problems, including the “particle in a box” and “harmonic oscillator” to describe chemical phenomena.

Audience: Undergraduate

3. Apply models of atoms, molecules, and their interactions to explain the physical and chemical macroscopic properties of gasses, liquids and solids.

Audience: Undergraduate

4. Perform chemical measurements, adapt analytical methods (e.g., titrations, separations, electrochemical measurements, and spectroscopy), and interpret results for the purpose of quantitative and qualitative analysis.

Audience: Undergraduate

5. Evaluate laboratory data by applying statistical methods (e.g. statistical uncertainty, confidence intervals, propagation of error).

Audience: Undergraduate

**CHEM 116 – CHEMICAL PRINCIPLES II**

5 credits.

A quantitative treatment of macroscopic phenomena including thermodynamics, chemical equilibria, solution behavior, electrochemistry, and chemical kinetics.

**Requisites:** CHEM 115

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply a qualitative and quantitative understanding of aqueous equilibria and electrochemistry using fundamental chemical concepts, founded in the laws of thermodynamics.

Audience: Undergraduate

2. Model the rate mechanisms of chemical reactions in terms of elementary reaction states and associated rate laws to explain chemical phenomena.

Audience: Undergraduate

3. Locate, evaluate, and use information in the chemical literature.

Audience: Undergraduate

4. Design and analyze experiments pertaining to the covered chemical concepts while developing fundamental skills in safe laboratory practices and analysis techniques.

Audience: Undergraduate

5. Participate in a research project in an active campus research group, which formulating hypotheses informed by scientific literature, designing and performing experiments, processing data, and communicating results.

Audience: Undergraduate

6. Communicate scientific knowledge effectively through written reports and oral presentations with visual aids.

Audience: Undergraduate

**CHEM 155 – STUDY ABROAD IN INTRODUCTORY CHEMISTRY**

1-6 credits.

Study abroad equivalency for introductory chemistry. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**CHEM 175 – INTRODUCTORY TOPICS IN CHEMISTRY**

1-3 credits.

Various topics in chemistry at the introductory level.

**Requisites:** None

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explore the relationships among chemical knowledge, the discipline and practice of chemistry, and related interdisciplinary areas of study.

Audience: Undergraduate

2. Identify applications of chemistry to the world around us.

Audience: Undergraduate

3. Synthesize scientific information and practice oral or written communications about scientific content.

Audience: Undergraduate

**CHEM 260 – ENTERING RESEARCH I**

1 credit.

Introduction to skills that support conducting research in chemistry.

**Requisites:** CHEM 103, 109, or 115

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Find, analyze, and evaluate relevant primary literature and background information related to a scientific research project.

Audience: Undergraduate

2. Obtain, analyze, evaluate, and effectively communicate scientific research findings orally and in written form.

Audience: Undergraduate

3. Explain the main scientific focus of a research group, how members and projects of the research group are connected, and how the research contributes to new knowledge in the discipline.

Audience: Undergraduate

4. Describe and engage in safe, ethical, and responsible scientific research practices.

Audience: Undergraduate

**CHEM 299 – DIRECTED STUDY**

1-4 credits.

Mentored research project as arranged with a faculty or academic staff member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CHEM 311 – CHEMISTRY ACROSS THE PERIODIC TABLE**

4 credits.

Explores the properties, reactions and uses of elements and compounds, with emphasis on coordination chemistry of transition-metal ions, bioinorganic chemistry, solid-state structure and main-group elements. Introduces the synthesis and characterization of inorganic compounds.

**Requisites:** CHEM 104, 109, or 116

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Construct and use appropriate chemical models and structural representations to explain observed differences in the physical and chemical properties of substances in terms of electrostatics, orbital overlap and energy.

Audience: Undergraduate

2. Construct and use appropriate models of chemical bonding and reactivity (e.g., acids/bases, redox, complexation) and relative energies to justify why a particular reaction system is likely to produce the product formed most quickly or which is most stable.

Audience: Undergraduate

3. Identify and use molecular symmetry to predict a molecule's chemical and physical properties (e.g., chirality, polarity, and vibrational spectroscopy).

Audience: Undergraduate

4. Describe the nature of solid-state compounds and their atomic arrangements and use their structures to predict and rationalize their chemical and physical properties.

Audience: Undergraduate

5. Conduct, modify, and analyze experiments for the synthesis and characterization of inorganic compounds, using inorganic laboratory techniques, apparatus, and instrumentation.

Audience: Undergraduate

6. Obtain, analyze, evaluate, and effectively communicate scientific research findings orally and in written form (ex: abstract, introduction, procedure, results, discussion, and references).

Audience: Undergraduate

**CHEM 327 – FUNDAMENTALS OF ANALYTICAL SCIENCE**

4 credits.

Fundamentals of chemical measurement in chemistry, biology, engineering, geology, and the medical sciences. Topics include equilibria of complex systems, spectroscopy, electrochemistry, separations, and quantitative laboratory technique.

**Requisites:** CHEM 104 or 109. Not open to students with credit for CHEM 329.

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Perform chemical measurements, adapt analytical methods (e.g., titrations, separations, electrochemical measurements, and spectroscopy), and interpret results for the purpose of quantitative analysis.

Audience: Undergraduate

2. Evaluate laboratory data by applying statistical methods (e.g. statistical uncertainty, confidence intervals, propagation of error).

Audience: Undergraduate

3. Develop quantitative chemical models involving thermodynamics, equilibrium concentrations, separation performance, and electrochemical potentials and compare them to experimental results.

Audience: Undergraduate

4. Solve chemistry problems that connect concepts from across the curriculum and apply them to real world situations.

Audience: Undergraduate

5. Effectively communicate experimental outcomes through written reports, oral presentations, and/or visual aids.

Audience: Undergraduate

**CHEM 329 – FUNDAMENTALS OF ANALYTICAL SCIENCE**

4 credits.

Fundamentals of chemical measurement in chemistry, biology, engineering, geology, and the medical sciences. Topics include equilibria of complex systems, spectroscopy, electrochemistry, separations, and quantitative laboratory technique. Covers chemical equilibria in greater depth and with greater mathematical rigor than CHEM 327.

**Requisites:** CHEM 104 or 109. Not open to students with credit for CHEM 327.

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform chemical measurements, adapt analytical methods (e.g., titrations, separations, electrochemical measurements, and spectroscopy), and interpret results for the purpose of quantitative analysis.

Audience: Undergraduate

2. Evaluate laboratory data by applying statistical methods (e.g. statistical uncertainty, confidence intervals, propagation of error).

Audience: Undergraduate

3. Develop quantitative chemical models involving thermodynamics, equilibrium concentrations, separation performance and electrochemical potentials and compare them to experimental results.

Audience: Undergraduate

4. Solve chemistry problems that connect concepts from across the curriculum and apply them to real world situations.

Audience: Undergraduate

5. Design and execute independent analytical chemistry experiments using methods sourced from the scientific literature.

Audience: Undergraduate

6. Effectively communicate experimental outcomes through written reports, oral presentations, and/or visual aids.

Audience: Undergraduate

**CHEM 341 – ELEMENTARY ORGANIC CHEMISTRY**

3 credits.

Core organic chemistry concepts of structure, reactivity, and synthesis with regards to the functional groups commonly found in commercial and biological substances. Covers a selection of topics from CHEM 343 and 345.

**Requisites:** CHEM 104, 109, or 116. Not open to students with credit for CHEM 343 or 345

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Construct and use an electron pushing mechanism or reaction energy profile to evaluate the validity of claims as to the outcome of a chemical process.

Audience: Undergraduate

2. Construct and use appropriate structural representations to explain observed differences in the physical and chemical properties of substances in terms of electrostatics, orbital overlap and energy.

Audience: Undergraduate

3. Construct and use a reaction energy profile to justify why a particular reaction system is likely to produce the product formed most quickly or which is most stable.

Audience: Undergraduate

4. Design and justify a multi-step synthetic route capable of feasibly generating a molecular target from specified starting materials.

Audience: Undergraduate

**CHEM 342 – ELEMENTARY ORGANIC CHEMISTRY LABORATORY**

1 credit.

Introduces organic laboratory techniques in synthesis, purification and spectral interpretation.

**Requisites:** CHEM 341 or concurrent enrollment. Not open to students with credit for CHEM 344

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use spectroscopic data to elucidate chemical structures and analyze samples of pure and impure mixtures.

Audience: Undergraduate

2. Safely use basic organic chemistry apparatus, glassware, and techniques for the synthesis, isolation, and purification of organic molecules.

Audience: Undergraduate

3. Obtain and use computational data to support their analysis of a molecular structure and/or reaction outcome.

Audience: Undergraduate

4. Use the electronic and molecular structure of organic molecules to predict and rationalize chemical reactivity.

Audience: Undergraduate

5. Construct and use a reaction energy profile to justify why a particular reaction system is likely to produce the product formed most quickly or which is most stable with an emphasis on the reactions of alcohols, alkyl halides, aromatic compounds, and carbonyl-containing compounds.

Audience: Undergraduate

**CHEM 343 – ORGANIC CHEMISTRY I**

3 credits.

Principles of molecular structure and bonding applied to predict and explain the reactivity of alkanes, alkenes, alkynes, alkyl halides, alcohols, and thiols. Emphasis placed on rationalizing the stereochemical and regiochemical outcome of chemical processes.

**Requisites:** CHEM 104, 109, or 116

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Construct and use a transition state rendering to explain how donor-acceptor interactions result in the stereochemical or regiochemical outcome observed for a reaction

Audience: Undergraduate

2. Construct and use an electron pushing mechanism or reaction energy profile to evaluate the validity of claims as to the outcome of a chemical process

Audience: Undergraduate

3. Construct and use appropriate structural representations to explain observed differences in the physical and chemical properties of substances in terms of electrostatics, orbital overlap and energy

Audience: Undergraduate

4. Construct and use a reaction energy profile to justify why a particular reaction system is likely to produce the product formed most quickly or which is most stable

Audience: Undergraduate

5. Design and justify a multi-step synthetic route capable of feasibly generating a molecular target from specified starting materials

Audience: Undergraduate

**CHEM 344 – INTRODUCTORY ORGANIC CHEMISTRY LABORATORY**

2 credits.

Introduces the basic synthesis, purification, and characterization techniques of organic chemistry, along with critical interpretation of experimental data.

**Requisites:** (CHEM 345 or concurrent enrollment) and (CHEM 102, 104, 109, or 116)

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use spectroscopic data to elucidate chemical structures and analyze samples of pure and impure mixtures.

Audience: Undergraduate

2. Safely use basic organic chemistry apparatus, glassware, and techniques for the synthesis, isolation, and purification of organic molecules.

Audience: Undergraduate

3. Obtain and use computational data to support their analysis of a molecular structure and/or reaction outcome.

Audience: Undergraduate

4. Use the electronic and molecular structure of organic molecules to predict and rationalize chemical reactivity.

Audience: Undergraduate

5. Construct and use a reaction energy profile to justify why a particular reaction system is likely to produce the product formed most quickly or which is most stable with an emphasis on the reactions of alcohols, alkyl halides, aromatic compounds, and carbonyl-containing compounds.

Audience: Undergraduate

**CHEM 345 – ORGANIC CHEMISTRY II**

3 credits.

Principles of molecular structure and bonding applied to predict and explain the reactivity of aromatic systems, benzylic and allylic systems, aryl and vinyl halides, and carbonyl-containing compounds (e.g., ketones, carboxylic acids, esters, acid chlorides, amides). Emphasis placed on rationalizing the stereochemical and regiochemical outcome of chemical processes as well as arguing reaction outcomes from spectroscopic evidence.

**Requisites:** CHEM 343**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Construct and use a transition state rendering to explain how donor-acceptor interactions result in the stereochemical or regiochemical outcome observed for a reaction

Audience: Undergraduate

2. Construct and use an electron pushing mechanism or reaction energy profile to evaluate the validity of claims as to the outcome of a chemical process

Audience: Undergraduate

3. Construct and use appropriate structural representations to explain observed differences in the physical and chemical properties of substances in terms of electrostatics, orbital overlap and energy

Audience: Undergraduate

4. Construct and use a reaction energy profile to justify why a particular reaction system is likely to produce the product formed most quickly or which is most stable

Audience: Undergraduate

5. Construct or critique an argument, using spectroscopic evidence, as to the product(s) emergent from a particular reaction process.

Audience: Undergraduate

6. Design and justify a multi-step synthetic route capable of feasibly generating a molecular target from specified starting materials

Audience: Undergraduate

**CHEM 346 – INTERMEDIATE ORGANIC CHEMISTRY LABORATORY**

1-2 credits.

Multi-step synthetic processes. Advanced experimental techniques such as high-vacuum distillation. Independent research projects.

**Requisites:** CHEM 344 and 345**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Use spectroscopic data to elucidate chemical structures and analyze samples of pure and impure mixtures.

Audience: Undergraduate

2. Safely use basic and advanced organic chemistry apparatus, glassware, and techniques for the synthesis, isolation, and purification of organic molecules.

Audience: Undergraduate

3. Obtain and use computational data to support their analysis of a molecular structure and/or reaction outcome.

Audience: Undergraduate

4. Use the electronic and molecular structure of organic molecules to predict and rationalize chemical reactivity.

Audience: Undergraduate

5. Construct and use a reaction energy profile to justify why a particular reaction system generates certain products with an emphasis on modern organic reactions.

Audience: Undergraduate

6. Plan and conduct independent chemical syntheses and use spectroscopic evidence to evaluate, modify, and implement improvements.

Audience: Undergraduate

7. Communicate results from student-run chemical reactions in writing and oral presentations authentic to professional publications and settings.

Audience: Undergraduate

**CHEM 355 – STUDY ABROAD IN INTERMEDIATE CHEMISTRY**

1-6 credits.

Study abroad equivalency for intermediate chemistry. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**CHEM 361 – MACHINE LEARNING IN CHEMISTRY**

3 credits.

An in-depth introduction to the use of machine learning techniques in Chemistry. Topics will include basics of probability theory and statistics, basics of function fitting and parameter inference, basics of optimization, and machine learning techniques. Discuss a selection of Chemistry topics that are particularly amenable to analysis using machine learning. These might include generative models for organic synthesis, force-fields, application to phase transitions, structure and dynamics of molecular systems, and AI-driven drug discovery.

**Requisites:** (CHEM 103, 109, or 115) and (MATH 234, 320, 331, 340, or 375)

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Employ statistical and machine learning models to analyze chemical datasets.

Audience: Undergraduate

2. Represent chemical compounds using molecular descriptors.

Audience: Undergraduate

3. Model and predict properties and activities of chemical compounds.

Audience: Undergraduate

4. Apply appropriate machine learning approaches to analyze time-series data for molecular systems.

Audience: Undergraduate

5. Apply machine-learning-based potential functions to describe chemical and biological molecules.

Audience: Undergraduate

6. Be familiar with programming techniques and common tools in machine learning when applied to molecular systems.

Audience: Undergraduate

7. Assess the quality of machine learning approaches in the chemistry literature.

Audience: Undergraduate

**CHEM 375 – INTERMEDIATE TOPICS IN CHEMISTRY**

1-4 credits.

Various topics in chemistry at the intermediate level.

**Requisites:** CHEM 104, 109, or 116

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**CHEM/M S & E 421 – POLYMERIC MATERIALS**

3 credits.

Polymer chemistry and physics terminologies, structure-property relationship, polymer characterization, polymer synthesis, material requirements for optoelectronics including conjugated polymers, thin film transistors, light emitting diodes, non-linear optical materials, holographic data storage and liquid crystal polymers.

**Requisites:** CHEM 341, 343, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Classify, identify, and write the structure of different types of common polymers

Audience: Undergraduate

2. Characterize the molecular weights of polymers, their microstructure, and morphology

Audience: Undergraduate

3. Describe the common methods for the synthesis of polymers

Audience: Undergraduate

4. Demonstrate quantitative understanding of the kinetics of polymerization

Audience: Undergraduate

5. Characterize the principle thermal transitions that occur in polymers

Audience: Undergraduate

6. Analyze the interrelationships among structure, properties, processing and applications of polymers

Audience: Undergraduate

**CHEM/CBE 505 – ASPECTS OF INDUSTRIAL CHEMISTRY AND BUSINESS FUNDAMENTALS**

3 credits.

Learn the chemistry and chemical engineering that defines societies' standard of living. Commercial chemical processes will be reviewed. Practical realities of how a discovery moves from research to commercial product will be taught through examples and case studies. Financial concepts that guide investment will be reviewed.

**Requisites:** Junior standing and CHEM 345, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the most important value-chains in the chemical industry

Audience: Undergraduate

2. Connect the fundamental chemistry and chemical engineering principles learned in other courses with real-world applications

Audience: Undergraduate

3. Evaluate how laboratory discoveries can be legally protected and successfully commercialized

Audience: Undergraduate

4. Assess and compare alternative technologies against current state-of-the-art technologies

Audience: Undergraduate

**CHEM 509 – SENIOR SEMINAR**

2 credits.

Synthesize and integrate advanced chemistry knowledge and skills. Through a series of seminars, specific research problems will be identified. Work in groups utilizing the chemical literature to identify routes to the solutions of these problems.

**Requisites:** (CHEM 561 or 565) and CHEM 563 or concurrent enrollment in CHEM 563

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Synthesize knowledge and skills that have been introduced across the chemistry curriculum to understand complex chemical problems.

Audience: Undergraduate

2. Identify and discuss current research challenges based on faculty research presentations.

Audience: Undergraduate

3. Critically evaluate the scientific literature to identify possible ways to solve a specific research challenge.

Audience: Undergraduate

4. Collaborate with peers to discuss and propose solutions to current research problems.

Audience: Undergraduate

5. Explain findings in oral presentations and written assignments.

Audience: Undergraduate

**CHEM 511 – ADVANCED INORGANIC CHEMISTRY**

3 credits.

Emphasizes the symmetry, structure and bonding of inorganic compounds. Selected topics may include applications in transition metal chemistry, organometallic chemistry, industrial catalysis, advanced bioinorganic chemistry, solid-state chemistry or main group chemistry.

**Requisites:** (CHEM 345 or concurrent enrollment and junior standing) or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply group theory to solve problems dealing with molecular vibrations and chemical bonding.

Audience: Undergraduate

2. Analyze experimental spectroscopic data quantitatively within the theoretical frameworks of molecular orbital theory or ligand field theory.

Audience: Undergraduate

3. Explain the role of organometallic complexes and metalloenzymes in the key steps of catalytic cycles.

Audience: Undergraduate

4. Perform electronic structure calculations (e.g., density functional theory) for small molecules and transition metal complexes and validate the computational results using experimental observables (e.g., structural and spectroscopic data).

Audience: Undergraduate

**CHEM 512 – ADVANCED SYNTHESIS AND LABORATORY TECHNIQUES**

1-2 credits.

Synthesis, purification, and characterization of compounds spanning the sub-disciplines of inorganic chemistry, including main-group, transition metal, bioinorganic, organometallic, and solid-state compounds. Laboratory skills developed include Schlenck techniques, glovebox methods, and high-temperature methods, all with an emphasis on chemical safety. Characterization methods may include UV-visible and IR spectroscopy, multi-nuclear NMR spectroscopy, magnetic susceptibility, cyclic voltammetry, mass spectrometry, X-ray diffraction, and chromatographic methods.

**Requisites:** CHEM 311

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use the chemical literature to identify methods of synthesis for specific compounds

Audience: Undergraduate

2. Interpret published synthetic procedures to come up with a plan to reproduce the synthesis of the desired compounds

Audience: Undergraduate

3. Apply the theoretical synthetic principles, including and understanding of how and why reactions work, by performing laboratory experiments

Audience: Undergraduate

4. Apply synthetic techniques/skills, and demonstrate scientific/information literacy, critical and creative thinking, quantitative reasoning, and communication

Audience: Undergraduate

5. Apply the fundamentals of synthetic inorganic chemistry, including laboratory safety, handling of air-sensitive and water-sensitive reagents and products, and commonly used characterization techniques

Audience: Undergraduate

6. Use Schlenck techniques and glovebox methods to synthesize and manipulate air-sensitive compounds

Audience: Undergraduate

7. Use hydrothermal and tube-furnace methods to synthesize materials

Audience: Undergraduate

8. Assess compound purity using reported and measured magnetic moments of compounds synthesized in the laboratory

Audience: Undergraduate

9. Assess compound purity using the spectroscopic techniques of nuclear magnetic resonance, infrared and UV/Visible spectroscopy

Audience: Undergraduate

10. Troubleshoot experiments that do not yield anticipated results

Audience: Undergraduate

**CHEM 524 – CHEMICAL INSTRUMENTATION**

3 credits.

Basic principles for designing, developing, and using chemical instrumentation and applying these principles in the laboratory. Spectroscopy, separations, and mass spectrometry instruments are emphasized.

**Requisites:** (CHEM 116, 327, or 329), CHEM 343, MATH 222, and (PHYSICS 202, 208, or 248)

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of the fundamental principles for the design of chemical instrumentation.

Audience: Undergraduate

2. Apply knowledge of chemical instrumentation to make effective chemical measurements.

Audience: Undergraduate

3. Critically analyze and evaluate results of measurements made with chemical instrumentation

Audience: Undergraduate

**CHEM 547 – ADVANCED ORGANIC CHEMISTRY**

3 credits.

Modern principles of synthetic and mechanistic organic chemistry.

**Requisites:** CHEM 345

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Design, justify, and evaluate multi-step synthetic routes capable of efficiently generating a molecular target from specified starting materials, with an emphasis on modern organic chemistry and natural product synthesis.

Audience: Undergraduate

2. Construct and use appropriate structural representations to rationalize observed differences in the physical and chemical properties of substances in terms of electrostatics, constructive orbital overlap, and energy differences.

Audience: Undergraduate

3. Construct and use an electron-pushing mechanism or potential energy surface to evaluate the validity of claims as to the outcome of a chemical process (e.g., pericyclic reactions and carbonyl reactions).

Audience: Undergraduate

4. Construct and use catalytic cycles to rationalize and predict the outcome of simple organometallic reactions.

Audience: Undergraduate

**CHEM 555 – STUDY ABROAD IN ADVANCED CHEMISTRY**

1-6 credits.

Study abroad equivalency for advanced chemistry. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**CHEM 561 – PHYSICAL CHEMISTRY I**

3 credits.

Macroscopic theory: laws and fundamental equations of thermodynamics, chemical equilibria, phase equilibria, and kinetic theory of gases.

**Requisites:** (CHEM 116, 327, or 329), MATH 222, and (PHYSICS 201, 207, or 247), or graduate/professional standing. Not open to students with credit for CHEM 565 or 665.

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Derive, interpret, and explain important thermodynamic relationships from the three laws of thermodynamics.

Audience: Undergraduate

2. Explain how thermodynamics and kinetics govern observable physical and chemical properties of matter and their transformations.

Audience: Undergraduate

3. Apply the laws of thermodynamics and kinetic theories to solve quantitative problems involving chemical and physical processes.

Audience: Undergraduate

**CHEM 562 – PHYSICAL CHEMISTRY II**

3 credits.

Molecular theory: quantum chemistry, molecular structure and spectra, statistical mechanics, selected topics in the molecular theory of matter in bulk.

**Requisites:** MATH 222, (PHYSICS 202, 208, or 248), and (CHEM 561, 665, CBE 310, or M S & E 330)

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe fundamental quantum mechanics concepts, including operators, wave functions, and uncertainty principle.

Audience: Undergraduate

2. Use quantum chemistry models to describe translational, rotational, and vibrational motion of particles, the microscopic details of atomic and molecular structures, and the basis of rotational, vibrational, and electronic spectroscopies.

Audience: Undergraduate

3. Apply quantum chemistry and statistical thermodynamic models to describe bulk thermodynamic properties, chemical equilibrium, and chemical reaction dynamics.

Audience: Undergraduate

**CHEM 563 – PHYSICAL CHEMISTRY LABORATORY I**

1 credit.

Principles of experimental physical chemistry applied to the acquisition of thermodynamic and kinetic data; use of basic physical laboratory equipment; related computations, analysis of errors, interpretation of results.

**Requisites:** (CHEM 116, 327 or 329) and (CHEM 561 or concurrent enrollment, CHEM 665 or concurrent enrollment, CBE 310, or M S & E 330)

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Characterize the quality and information content of experimental measurements in the physical sciences.

Audience: Undergraduate

2. Develop experimental procedures that provide quantitative information about physical properties.

Audience: Undergraduate

3. Articulate course content (e.g., background theory, instrumentation, experimental design, and data analysis) in oral conversation.

Audience: Undergraduate

**CHEM 564 – PHYSICAL CHEMISTRY LABORATORY II**

1 credit.

Principles of experimental physical chemistry applied to the acquisition and interpretation of basic data on molecular structure and dynamics, and properties of macromolecules; principles and use of spectroscopic and other electronic instrumentation.

**Requisites:** (CHEM 562 or concurrent enrollment) and CHEM 563

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the fundamentals of spectroscopic techniques.

Audience: Undergraduate

2. Explain the basic components of spectroscopic instruments.

Audience: Undergraduate

3. Articulate course content (e.g., classical and quantum mechanical descriptions of background theory, instrumentation, and data analysis) in oral conversation.

Audience: Undergraduate

**CHEM 575 – ADVANCED TOPICS IN CHEMISTRY**

1-4 credits.

Various topics in chemistry at the advanced level.

**Requisites:** CHEM 311, 327, 329, or 343

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CHEM 605 – SPECTROCHEMICAL MEASUREMENTS**

3 credits.

Determination of organic structures and reaction mechanisms using mass spectrometry and nuclear magnetic resonance techniques.

**Requisites:** CHEM 344 and 345, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Analyze, interpret, and assign a variety of spectroscopic data (NMR, IR, MS) to structural features of known compounds or reaction mixtures.

Audience: Undergraduate

2. Deduce the chemical structure of an unknown compound using a variety of spectroscopic data (NMR, IR, MS) and justify the structural assignment.

Audience: Undergraduate

3. Choose the appropriate spectroscopic experiment(s) to determine the structure and/or dynamic behavior of a known or unknown compound.

Audience: Undergraduate

4. Critically evaluate the spectroscopic data and analyses provided in primary literature with an emphasis on the spectroscopic techniques relevant to the students' own research.

Audience: Graduate

**CHEM 606 – PHYSICAL METHODS FOR STRUCTURE DETERMINATION**

1-3 credits.

A survey of spectroscopic methods for inorganic structure determination. Introduces major non-crystallographic techniques with an emphasis on the application to structural analysis. The basic theory and methodology of each form of spectroscopy will be presented. Topics covered include: ligand field theory, electronic absorption, Raman, Mossbauer and EPR spectroscopies, and magnetic susceptibility.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**CHEM 607 – LABORATORY SAFETY**

1 credit.

Aspects of laboratory safety relating to chemical, electrical, optical, mechanical, cryogenic and radiological hazards will be discussed. Safety equipment, techniques (including first aid), and facilities will be introduced.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CHEM 608 – SYMMETRY, BONDING, AND MOLECULAR SHAPES**

1-3 credits.

Elementary bonding theory and its application to understanding molecular geometry and reactivity. Emphasizes qualitative methods applied to the bonding of elements from throughout the periodic table.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CHEM 613 – CHEMICAL CRYSTALLOGRAPHY**

3 credits.

Theory of structural chemistry, experimental methods involved, applications to problems of chemical interest; use of diffractometric equipment and computer data analysis for an actual structure determination.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CHEM 622 – ORGANIC ANALYSIS**

2 credits.

Biological Mass Spectrometry: Fundamentals and Applications.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**CHEM 623 – EXPERIMENTAL SPECTROSCOPY**

2-3 credits.

Current spectroscopic methods employed in chemical analysis with applications in atomic and molecular absorption spectroscopy, infrared and Raman vibrational spectroscopy, fluorescence and light scattering; lecture and laboratory projects.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**CHEM 624 – ELECTROCHEMISTRY**

2-3 credits.

Interfacial electron transfer and mass transport processes in electrochemistry, with applications to electroanalysis, electrodeposition and electrochemical separations.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CHEM/GENETICS 626 – GENOMIC SCIENCE**

2 credits.

Brings cutting-edge topics in the genomic sciences into the reach of those in chemistry, biology, engineering, computer science statistics fields. Enables biologically-oriented students to deal with advances in analytical science so that they may incorporate new genomic science concepts into their own scientific repertoires.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**CHEM 629 – ATMOSPHERIC CHEMICAL MECHANISMS**

3 credits.

Focuses on the chemical mechanisms and kinetics of reactive gases and aerosol in Earth's atmosphere. Fundamental concepts from analytical, physical, and organic chemistry will be used as tools to describe atmospheric processes occurring in both the troposphere and the stratosphere. Specific topics include: Evolution and chemical composition of Earth's atmosphere; applications of the steady-state approximation; residence and renewal time; sources, transformation, transport and deposition of trace gases in the troposphere; air pollution control strategies; stratospheric chemistry.

**Requisites:** CBE 310 or concurrent enrollment in CHEM 561 or 565; or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a deep chemical intuition for atmospheric chemical mechanisms and processes operating over wide ranges of time and length scales.

Audience: Both Grad & Undergrad

2. Construct photochemical box models of atmospheric processes (e.g., smog formation) to determine the response of criteria air pollutants to changes in atmospheric emissions.

Audience: Both Grad & Undergrad

3. Articulate and synthesize complex chemical knowledge and understanding in both written and oral formats.

Audience: Graduate

**CHEM 630 – SELECTED TOPICS IN ANALYTICAL CHEMISTRY**

1-3 credits.

Lectures of a specialized nature in advanced analytical chemistry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**CHEM 635 – TOPICS IN COMPUTATIONAL CHEMISTRY**

1 credit.

An introduction to computational chemistry. Covers new techniques and developments in the literature, and specific types of calculations that are relevant to current research and needs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CHEM 636 – TOPICS IN CHEMICAL INSTRUMENTATION: INTRODUCTION TO NMR**

2 credits.

Theory and practice of nuclear magnetic resonance (NMR) spectroscopy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CHEM 637 – TOPICS IN CHEMICAL INSTRUMENTATION: ADVANCED METHODS IN NMR**

1-2 credits.

Advanced methods of nuclear magnetic resonance (NMR) spectroscopy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CHEM 641 – ADVANCED ORGANIC CHEMISTRY**

3 credits.

Topics in physical organic chemistry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CHEM 652 – CHEMISTRY OF INORGANIC MATERIALS**

3 credits.

Materials chemistry of inorganic solids. Focuses on the application of chemical concepts to an understanding of properties of solids and how these properties are manifested in practical applications.

**Requisites:** Graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**CHEM 653 – CHEMISTRY OF NANOSCALE MATERIALS**

3 credits.

Introduction to solid state materials chemistry, with an emphasis on contemporary topics in the chemistry of nanomaterials. Incorporates fundamental knowledge of solid-state chemistry and traditional materials chemistry with current nanoscale and nanostructural materials research.

**Requisites:** (CHEM 311 and 561) or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe and compare various synthetic methods used in the synthesis of single crystals, polycrystalline, thin film materials, and nanomaterials.

Audience: Undergraduate

2. Identify and analyze crystal structures, integrating concepts of lattice and reciprocal lattices, symmetry, and space groups.

Audience: Undergraduate

3. Interpret and describe crystal structures of solid-state materials using crystallographic tables.

Audience: Undergraduate

4. Describe the impact of defects and non-stereometry.

Audience: Undergraduate

5. Interpret and analyze phase diagrams and use them to rationally design the synthesis of solid state materials.

Audience: Undergraduate

**CHEM 654 – MATERIALS CHEMISTRY OF POLYMERS**

2-3 credits.

Polymer classification, synthesis, and molecular architecture; solid state structure and characterization; glassy state and glass transition; polymer rheology in solids and gels; transport, dielectric and optical properties.

**Requisites:** CHEM 345 and (CHEM 561, 565 or CBE 310), or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe structural features of polymers, including connections to reactivity and function.

Audience: Undergraduate

2. Propose and critique syntheses for target polymer structures.

Audience: Undergraduate

3. Compare and critique disparate mechanistic approaches for polymer syntheses.

Audience: Undergraduate

4. Identify strengths and weaknesses of classic polymer synthetic methods.

Audience: Undergraduate

5. Propose polymer targets that would provide desired, currently unavailable function or capability.

Audience: Graduate

**CHEM 661 – CHEMICAL AND STATISTICAL THERMODYNAMICS**

3 credits.

Basic chemical thermodynamics with applications to chemical and phase equilibria and the study of solutions; introduction to statistical mechanics and calculation of thermodynamic quantities from molecular models; stability and fluctuations.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CHEM 664 – PHYSICAL CHEMISTRY OF MACROMOLECULES**

2-3 credits.

Structure, thermodynamics, and dynamics of polymers in solution and in the bulk; theoretical models and experimental methods; polymer characterization.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CHEM 665 – BIOPHYSICAL CHEMISTRY**

3 credits.

Equilibrium thermodynamics and chemical kinetics with emphasis on solution behavior and applications to biological macromolecules in solution. Focus on biological applications of physical chemistry.

**Requisites:** (CHEM 116, 327, or 329), MATH 222, (PHYSICS 201, 207, or 247), and (BIOCHEM 501, 507, BIOCORE 383, or concurrent enrollment), or graduate/professional standing. Not open to students with credit for CHEM 561 or 565.

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and apply fundamental principles of thermodynamics to biological systems.

Audience: Both Grad & Undergrad

2. Understand and apply fundamental principles of kinetics to biological systems.

Audience: Both Grad & Undergrad

3. Rationally interpret the results of experiments performed on biological systems in terms of energetics and outcome probabilities

Audience: Both Grad & Undergrad

4. Predict the outcome of biological processes, once experimentally or theoretically derived thermodynamic/kinetic parameters are known

Audience: Both Grad & Undergrad

5. Design new experiments on biological systems based on appropriate thermodynamic and kinetic criteria

Audience: Both Grad & Undergrad

6. Explain a selected topic related to the course material to other students

Audience: Graduate

**CHEM 668 – BIOPHYSICAL SPECTROSCOPY**

2-3 credits.

Focuses on the underlying principles and applications of spectroscopic and microscopy methods employed to solve biological problems at the atomic and molecular level. Techniques covered include electronic absorption and fluorescence spectroscopy, circular dichroism, light scattering, fluorescence microscopy, multidimensional nuclear magnetic resonance and electron spin resonance.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CHEM 675 – INTRODUCTORY QUANTUM CHEMISTRY**

3 credits.

Basic principles of quantum chemistry, exactly solvable problems, angular momentum, approximation methods, applications to electronic structure.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CHEM 681 – SENIOR HONORS THESIS**

2-4 credits.

Mentored research for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CHEM 682 – SENIOR HONORS THESIS**

2-4 credits.

Mentored research for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CHEM 691 – SENIOR THESIS**

2-6 credits.

Mentored research for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**CHEM 692 – SENIOR THESIS**

2-6 credits.

Mentored research for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CHEM 699 – DIRECTED STUDY**

1-6 credits.

Advanced mentored research project as arranged with a faculty or academic staff member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CHEM 701 – RESPONSIBLE CONDUCT OF RESEARCH IN THE CHEMICAL SCIENCES**

1 credit.

Scientific integrity and professional behavior in the chemical sciences. Topics include conflict of interest, human and animal subjects in research, mentor and mentee responsibilities, collaborative research, peer review, data acquisition and management, research misconduct, responsible authorship and publication, and societal impacts.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate basic principles of moral/ethical reasoning

Audience: Graduate

2. Articulate basic principles of universal design

Audience: Graduate

3. Articulate how they contribute to diversity, equity and inclusion in their workplaces

Audience: Graduate

4. Articulate their social responsibility in research, including societal and environmental impacts

Audience: Graduate

5. Identify best practices in job searches and interviews, generating and managing data, writing and reviewing publications and grant applications

Audience: Graduate

6. Identify best practices in networking, collaboration, giving and receiving feedback, setting expectations, effective communication with mentors and peers

Audience: Graduate

7. Identify best practices in animal and human welfare in research

Audience: Graduate

8. Recognize ethical breaches and articulate how to handle them, including conflicts of interest, research misconduct, inappropriate behavior

Audience: Graduate

**CHEM/BIOCHEM 704 – CHEMICAL BIOLOGY**

3 credits.

Chemistry and biology of proteins, nucleic acids and carbohydrates; application of organic chemistry to problems in cell biology, biotechnology, and biomedicine.

**Requisites:** Declared in Biochemistry or Chemistry graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Be able to describe the chemical basis for replication, transcription, translation and how each of these central processes can be expanded to include new chemical matter.

Audience: Graduate

2. Develop skills to critically read the literature and effectively communicate research in a peer setting.

Audience: Graduate

3. Describe the substance and importance of chemical biology research in the format of a cover letter to a journal editor, and an original figure.

Audience: Graduate

4. Demonstrate knowledge of chemical biology by designing an original research project that focuses on answering a biological question or solving a biomedical problem.

Audience: Graduate

**CHEM 713 – INORGANIC AND ORGANOMETALLIC CHEMISTRY OF THE MAIN GROUP ELEMENTS**

1-3 credits.

Descriptive inorganic chemistry, organometallic chemistry of main-group elements, and organosilicon chemistry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply concepts of chemical reactivity important to creating new knowledge in synthetic chemistry research.

Audience: Graduate

2. Interpret content from chemical literature and summarize in writing the key ideas.

Audience: Graduate

3. Discuss and debate ideas from the chemical literature with a team to collaboratively articulate key concepts.

Audience: Graduate

4. Locate, evaluate, and adapt tools and techniques described in the chemical literature to conduct research.

Audience: Graduate

**CHEM 714 – ORGANOMETALLIC CHEMISTRY OF THE TRANSITION ELEMENTS**

2-3 credits.

Fundamental and applied aspects of organotransition-metal chemistry, including structure and bonding, reactivity, and catalytic applications of organometallic complexes.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CHEM 721 – INSTRUMENTAL ANALYSIS**

3-4 credits.

Chemical instrumentation and instrumental methods of analysis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a deep knowledge of the fundamental principles for the design, development, and use of chemical instrumentation

Audience: Graduate

2. Apply this knowledge to effectively use chemical instrumentation for your research.

Audience: Graduate

3. Demonstrate skill in building and using chemical instrumentation (lab learning outcome.)

Audience: Graduate

**CHEM 725 – SEPARATIONS IN CHEMICAL ANALYSIS**

2-3 credits.

Basic principles of chemical and biochemical separations by chromatography and electrophoresis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Lecture outcome - gain solid knowledge of the basic principles and terminology of chemical separations and demonstrate the ability to read and comprehend the scientific literature in the field.

Audience: Graduate

2. Laboratory outcome- acquire the hands-on experience necessary to apply the theory of separations to its practical implementation.

Audience: Graduate

**CHEM 728 – ELECTRONICS FOR CHEMICAL INSTRUMENTATION**

3 credits.

Learn and apply the principles of analog and digital electronics and computer interfaces for controlling and monitoring components of importance to chemical instrumentation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the working principles of the electronics behind modern chemical instrumentation

Audience: Graduate

2. Interconnect and modify commercial instrumental modules for use in new applications

Audience: Graduate

3. Build new instrumental modules based on operational amplifiers, microcontrollers, and other integrated circuits

Audience: Graduate

**CHEM 738 – INTRODUCTION TO MASS SPECTROMETRY**

1 credit.

Introduction to the theory and practice of mass spectrometry. Topics include gas chromatography/mass spectrometry (GCMS), electrospray ionization (ESI), matrix assisted laser-desorption ionization (MALDI), liquid chromatography/mass spectrometry (LCMS), imaging mass spectrometry, and ion mobility mass spectrometry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Read and interpret mass spectra.

Audience: Graduate

2. Match ionization methods to compound types.

Audience: Graduate

3. Understand the coupling of separation techniques to mass spectrometers.

Audience: Graduate

4. Recognize how mass spectrometry could be used in one's own research.

Audience: Graduate

**CHEM/B M E/MED PHYS 750 – BIOLOGICAL OPTICAL MICROSCOPY**

3 credits.

Covers several aspects of state-of-the-art biological and biophysical imaging with an emphasis on instrumentation, beginning with an overview of geometrical optics and optical and fluorescence microscopy. The bulk of the course will focus on advanced imaging techniques including nonlinear optical processes (multi-photon excitation, second harmonic generation, and stimulated Raman processes) and emerging super-resolution methods. Special emphasis will be given to current imaging literature and experimental design. Knowledge of physics-based optics [such as PHYSICS 202] strongly recommended.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2021**Learning Outcomes:** 1. Provide a clear, concise oral presentation critiquing a paper in the literature  
Audience: Graduate

2. Write a hypothesis driven research proposal and present an oral defense

Audience: Graduate

3. Write a critical written assessment of literature papers

Audience: Graduate

4. Use course concepts to better design experiments and extract quantitative information

Audience: Graduate

5. Articulate a fundamental understanding of the function of a microscope

Audience: Graduate

**CHEM 758 – CHEMISTRY EDUCATION RESEARCH**

2 credits.

An introduction to chemistry education research and the theories that underpin it. Develop and refine models of learning on the basis of primary literature. Explore how theories of cognition could and should inform learning objectives and assessments in college chemistry learning environments. Substantial emphasis placed on critically reading and analyzing studies in the chemistry education research literature with an eye toward the implicit and explicit theories of cognition informing the work.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Develop and refine a model of learning based on discussion and analysis of the primary chemistry education and science education literature

Audience: Graduate

2. Design assessable learning objectives describing what students should know and be able to do at the conclusion of a college chemistry course

Audience: Graduate

3. Assess the validity of conclusions in the literature on the basis of theories of cognition underpinning assessments

Audience: Graduate

4. Design assessments with the capacity to measure aspects of learning objectives using evidence-centered-design

Audience: Graduate

**CHEM 763 – INTRODUCTION TO MOLECULAR SPECTROSCOPY**

2-3 credits.

Quantum mechanics of molecular rotation and vibration; principles of group theory; electronic, vibrational, and magnetic resonance spectroscopy in gas and condensed phases.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2023**CHEM/PHM SCI 766 – MOLECULAR RECOGNITION**

2-3 credits.

Origin, nature, classification, and description of intermolecular forces. The hydrophobic effect. Molecular complexes, binding constants, and their measurements. General principles of self-assembly, molecular recognition, complex formation, host design. Supramolecular systems and their dynamics. Micelles, bilayers, vesicles, biological membranes.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**CHEM 775 – ELECTRONIC STRUCTURE OF MOLECULES**

2-3 credits.

Applications of quantum mechanics to the electronic structure and properties of molecules.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CHEM 777 – PHYSICAL CHEMISTRY OF SURFACES**

2-3 credits.

Structure, thermodynamics, kinetics, and reactivity of molecules at the interfaces between gases, liquids and solids, with applications to catalysis, atmospheric chemistry, monolayers, and thin films.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**CHEM 801 – SELECTED TOPICS IN INORGANIC CHEMISTRY**

1-3 credits.

Various selected topics in contemporary inorganic chemistry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**CHEM 840 – ADVANCED TOPICS IN ORGANIC CHEMISTRY**

1-4 credits.

Various selected topics in contemporary organic chemistry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Engage with, understand, and critique the primary research literature describing contemporary advances and historical topics in organic chemistry

Audience: Graduate

2. Acquire a deep and sophisticated understanding of important topics and research areas associated with the practice of organic chemistry

Audience: Graduate

**CHEM 841 – ADVANCED ORGANIC CHEMISTRY**

3 credits.

Synthesis of simple and complex organic compounds.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Interpret and apply the concepts, models, and terminology essential to contemporary organic synthesis.

Audience: Graduate

2. Plan logical, stereocontrolled syntheses of complex organic structures using retrosynthetic analysis as a strategic tool.

Audience: Graduate

3. Predict and rationalize the stereochemical outcomes of common organic reactions using three-dimensional transition state models.

Audience: Graduate

4. Read and critically analyze the scholarly literature of synthetic organic chemistry.

Audience: Graduate

5. Describe the importance and implications of modern organic synthesis techniques in pharmaceutical and medicinal chemistry.

Audience: Graduate

6. Use the peer review process to provide constructive, supportive feedback on colleagues' research proposals.

Audience: Graduate

**CHEM 843 – ADVANCED ORGANIC CHEMISTRY**

1-3 credits.

Fundamental concepts in organic chemistry reactions and mechanisms.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CHEM 845 – MACROMOLECULAR CHEMICAL BIOLOGY**

2 credits.

Critically read, analyze and discuss the primary literature in chemical biology by focusing on topics associated with macromolecules (largely proteins and nucleic acids).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Critically read, analyze and discuss primary scientific literature in macromolecular chemical biology.

Audience: Graduate

2. Evaluate the literature from the perspective of the scientific method.

Audience: Graduate

3. Incorporate primary scientific literature into the student's research and scholarship.

Audience: Graduate

4. Apply effective methods of scientific communication.

Audience: Graduate

**CHEM 858 – SPECIAL TOPICS IN CHEMISTRY EDUCATION**

1-3 credits.

Various selected topics in contemporary chemistry education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Engage with, understand, and critique the primary research literature describing contemporary advances and historical topics in chemistry education

Audience: Graduate

2. Acquire a deep and sophisticated understanding of important topics, research areas, and research methods associated with chemistry education.

Audience: Graduate

**CHEM 860 – SELECTED TOPICS IN PHYSICAL CHEMISTRY**

1-3 credits.

Various selected topics in contemporary physical chemistry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CHEM 864 – STATISTICAL MECHANICS**

2-3 credits.

Fundamentals of statistical mechanics; applications to equilibrium and non-equilibrium properties of gases and condensed phases.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**CHEM/BIOCHEM 872 – SELECTED TOPICS IN MACROMOLECULAR AND BIOPHYSICAL CHEMISTRY**

1-3 credits.

Various selected topics in contemporary macromolecular or biophysical chemistry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss current topics of active interest in molecular biophysics

Audience: Graduate

2. Evaluate primary research literature in molecular biophysics

Audience: Graduate

3. Design and interpret experiments in molecular biophysics

Audience: Graduate

4. Conduct rigorous research in molecular biophysics

Audience: Graduate

**CHEM 890 – HIGHLIGHTS AT THE CHEMISTRY-BIOLOGY INTERFACE**

1 credit.

Oral presentations on thesis research at the chemistry-biology interface. Includes discussions of reproducibility, rigor, and the responsible conduct of research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and clearly present key background concepts relating to their research

Audience: Graduate

2. Explain experiments leading to research conclusions

Audience: Graduate

3. Analyze the results of each experiment with the appropriate scientific rigor, and develop skills to justify their analytical choices

Audience: Graduate

4. Identify short-term and long-term research steps and goals

Audience: Graduate

5. Provide feedback to other trainees on presentation style and clarity, data analysis, and scientific rigor and responsible conduct of research

Audience: Graduate

**CHEM 900 – SEMINAR-INORGANIC CHEMISTRY**

0 credits.

Presentations of recent research in inorganic chemistry and related areas by external and internal speakers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CHEM 901 – SEMINAR-TEACHING OF CHEMISTRY**

0-1 credits.

The role of the teaching assistant in undergraduate chemistry instruction. Effective utilization of instructional aids. Innovations for better teaching.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**CHEM/BIOCHEM 918 – SINGLE MOLECULE APPROACHES TO BIOLOGY**

1 credit.

A combination of recent literature and original research presentations relating to the use of single molecule techniques in biochemistry including fluorescence microscopy, tethered particle motion, patch-clamping, cryo-electron microscopy, optical trapping, magnetic tweezers, and super resolution microscopy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss state-of-the-art research in single molecule biophysics

Audience: Graduate

2. Communicate and critically evaluate experimental results

Audience: Graduate

**CHEM 920 – SEMINAR-ANALYTICAL CHEMISTRY**

0 credits.

Presentations of recent research in analytical sciences and related areas by external and internal speakers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CHEM 923 – GENOMIC SCIENCES PROGRAM SEMINAR**

1 credit.

Cross-disciplinary exposure to cutting edge research in genomic sciences. Seminars presented by trainees and other scientists who study genomics using approaches based in chemistry, computer science, biostatistics, engineering and biological and biomedical sciences. Research objectives, findings and future directions are discussed.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and summarize background information and key concepts important for the diverse audience to understand their research topic and aims.

Audience: Graduate

2. Describe their experimental approach to answer the genomic questions poised in their research aims, paying attention to making their presentation accessible to the broad audience.

Audience: Graduate

3. Analyze and provide critical guidance for interpreting the experimental results; describe issues of reproducibility and rigor.

Audience: Graduate

4. Describe their new, proposed invention that pushes past the envelope of current investigations in genomic sciences

Audience: Graduate

5. Apply knowledge of new concepts and systems in the genomic sciences by providing feedback and suggestions to help other trainees further their experimental aims.

Audience: Graduate

**CHEM 940 – SEMINAR-ORGANIC CHEMISTRY**

0 credits.

Presentations of recent research in organic chemistry and related areas by external and internal speakers.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**CHEM/BIOCHEM 945 – SEMINAR-CHEMICAL BIOLOGY (ADVANCED)**

1 credit.

Presentations and discussions of recently published research in chemical biology and related areas.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Discuss recent published research in chemical biology and related areas

Audience: Graduate

2. Apply tools used in research at the chemistry-biology interface

Audience: Graduate

3. Demonstrate professional and ethical responsibility in research

Audience: Graduate

4. Communicate and critically evaluate published research with scientists with diverse backgrounds and interests

Audience: Graduate

**CHEM 960 – SEMINAR-PHYSICAL CHEMISTRY**

0-2 credits.

Presentations of recent research in physical chemistry and related areas by external and internal speakers.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

### CHEM 980 – SEMINAR: REVIEW OF CURRENT RESEARCH

1 credit.

Research discussions facilitated by individual faculty members and occurring between all members of the research group.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop new and novel directions in research.

Audience: Graduate

2. Evaluate rigor and accuracy of current scientific literature.

Audience: Graduate

3. Analyze and communicate key background concepts relating to current research succinctly and clearly.

Audience: Graduate

4. Analyze and communicate experimental results with the appropriate scientific rigor.

Audience: Graduate

5. Develop skills to justify experimental, theoretical, and analytical interpretations of data.

Audience: Graduate

### CHEM 990 – RESEARCH

1-15 credits.

Research supervised by individual faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Exhibit a broad understanding of general chemical principles.

Audience: Graduate

2. Conduct independent research using a variety of approaches.

Audience: Graduate

3. Think critically to address research challenges.

Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research.

Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab.

Audience: Graduate

## CHICANA/O AND LATINA/O STUDIES (CHICLA)

### CHICLA/AFROAMER/AMER IND/ASIAN AM/FOLKLORE 102 – INTRODUCTION TO COMPARATIVE US ETHNIC AND AMERICAN INDIAN STUDIES

3 credits.

Introduction to comparative ethnic studies, examining race, ethnicity, and indigeneity within the United States. Includes perspectives from African American, American Indian, Asian American, and Chican@ and Latin@ studies.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the multicultural history of the United States of America and the essential role of Indigenous, African, Asian and Chicanx/e & Latinx/e peoples in the American story.

Audience: Undergraduate

2. Identify the creation, development and legacies of race-based discrimination in the United States.

Audience: Undergraduate

3. Explain the role of race in the creation of value systems in American society.

Audience: Undergraduate

4. Explore the heterogeneity and complexity within persistently marginalized groups as well as their relations to each other.

Audience: Undergraduate

5. Reflect on their learning experience so that they may develop as well-rounded, informed, and educated members of society who can effectively and successfully participate in a multicultural society.

Audience: Undergraduate

**CHICLA/HISTORY 151 – THE NORTH AMERICAN WEST TO 1850**

3-4 credits.

Explores the history of places that have been called the American West before 1850. We start with Indigenous occupation; continue with European invasion and the creation of two new nations, Mexico and the U.S.; and end with U.S. conquest. We watch Indian lands becoming the object of Spanish, French, and English empires, and then see European incursions giving way to the hopes of new nation-states and newly empowered Indian peoples like Lakotas and Comanches. After studying the trails and trades that brought newcomers west, we reach key converging events: U.S. seizure of the Mexican North, resolution of the Oregon boundary dispute, discovery of western gold, West Coast arrival of Chinese immigrants, and Mormon exodus to the Great Basin. We use economic, environmental, political, cultural, and social analyses, and we attend to the dreams of many westerners: of North American, Latin American, European, African, and Asian origin or descent, and of all genders and class statuses.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the various peoples who occupied the North American West before the 16th century, how they lived in their respective environments and vis-à-vis one another, and how scholars and Native communities themselves have made sense of that occupation  
Audience: Undergraduate

2. Identify and analyze the relationships among the political, social, cultural, economic, and environmental factors that brought Europeans and enslaved Africans to places that came to be called the West from the 16th through the 18th centuries  
Audience: Undergraduate

3. Identify and analyze the political, social, cultural, economic, and environmental factors that gave rise to two new occupying nations in places that came to be called the West in the late 18th and early 19th centuries, as well as increasingly powerful Indigenous peoples  
Audience: Undergraduate

4. Identify and analyze the political, social, cultural, economic, and environmental factors that paved the way for U.S. conquest of various parts of the North American West by the middle of the 19th century  
Audience: Undergraduate

5. Identify and analyze the political, social, cultural, economic, and environmental factors that brought increasing numbers of Americans, Europeans, and Asians to the West by the middle of the 19th century  
Audience: Undergraduate

6. Explain the how the history of places that came to be called the West demonstrates the workings of imperialism and colonialism  
Audience: Undergraduate

7. Identify and analyze the ways in which westerners of various genders navigated their lives; the forces that created hierarchies among and within human communities; and the means by which various westerners either maintained or challenged those hierarchies  
Audience: Undergraduate

8. Explain the significance of the West for the development of the U.S. nation-state and for the fate of those who lived in the West before the U.S. claimed it

**CHICLA/HISTORY 152 – THE UNITED STATES WEST SINCE 1850**

3-4 credits.

Introduction to histories of places that have been called the American West, focusing on the period since 1850. Beginning in the mid nineteenth century, the United States sought to establish power over vast western regions that it claimed on maps but did not in fact control. Moving through the twentieth century to the present day, considers how attention to the American West allows us to reimagine US history more broadly - and how the United States represents just one facet the region's pasts. Learn to think like a historian by analyzing primary sources, evaluating competing narratives, and formulating arguments about the past. Investigate how people, ideas, and infrastructures have transformed a region repeatedly redrawn and consider the ongoing legacies of the past - and the stories we tell about it - in the American West today.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Challenge common myths that distort our understanding of the modern U.S. West  
Audience: Undergraduate

2. Understand how historians make history and why our understandings of the past change over time  
Audience: Undergraduate

3. Use primary sources to ask and answer questions about the modern North American West  
Audience: Undergraduate

4. Evaluate arguments about history and weigh in on existing historical debates  
Audience: Undergraduate

5. Identify how the past has affected present day circumstances regarding race and racial inequalities in the U.S.  
Audience: Undergraduate

**CHICLA/HISTORY 153 – LATINA/LATINO/LATINX HISTORY**

3-4 credits.

Examines the historical, social, and legal experiences of Latinas/Latinos/Latinxs in the US since the mid-1800s with emphasis on Mexican migrations. Latinxs became an important part of the US population through western expansion, conquest, and immigration. We will learn about the 3 main Latinx groups in the US: Mexicans, Puerto Ricans, and Cubans, but will also learn about other Latinx communities. We begin with an examination of conquest by studying the Treaty of Guadalupe Hidalgo that annexed roughly half of former Mexican territory and the Spanish-American War that resulted in the possession of Puerto Rico. Then, we examine the history of Latinx immigration to understand the experiences of Mexicans, Central Americans, South Americans, and people from the Caribbean who have immigrated to the US in search of economic opportunities and political asylum. This course serves as an introduction to the varied experiences of Latinxs in the US in order to understand their unique histories.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop a critical understanding of the diverse experiences of Latinas/Latinos/Latinxs in the U.S. by conducting a close examination of assigned readings through assignments, lectures, presentations, and in-class discussions.

Audience: Undergraduate

2. Build a critical lens of race, ethnicity, gender, sexuality, and class by engaging in analytical essay writing that incorporates the assigned readings and primary research in the archives at the Wisconsin Historical Society.

Audience: Undergraduate

3. Develop sociological tools and perspectives to discuss the experiences of Latinas/Latinos/Latinxs in the U.S. through in-class oral presentations based on the research conducted for the final paper.

Audience: Undergraduate

4. Critically engage in public debates about policies pertaining to Latinas/Latinos/Latinxs in the U.S. and be able to make informed decisions by learning about historical social and legal issues surrounding Latina/Latino/Latinx communities that continue to impact Latinxs today. This, through the assigned readings, original research, and data presented in lectures.

Audience: Undergraduate

**CHICLA 201 – INTRODUCTION TO CHICANA/O AND LATINA/O STUDIES**

3 credits.

Introduction to the interdisciplinary study of Chicanas/os in the United States. Become acquainted with recent scholarly literature, paradigms, theories, and debates within Chicana/o studies pertaining to the historical, economic, cultural, and sociopolitical dimensions of the Chicana/o experience in the United States.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate how the historical processes by which Chicanas/os/xs and Latinas/os/xs have been socially, politically, and legally constructed in the United States affect present-day circumstances regarding race and racial inequalities in the US today.

Audience: Undergraduate

2. Recognize and question your own assumptions and knowledge claims regarding race and ethnicity in the US in relation to communities of Latin American descent.

Audience: Undergraduate

3. Identify and analyze the interlocking issues of race, class, gender, migration status, and power relations as they relate to Chicana/o and Latina/o lives and communities in the United States.

Audience: Undergraduate

4. Apply concepts from the course to your life outside the classroom.

Audience: Undergraduate

5. Demonstrate comprehension of interdisciplinarity as it pertains to Chicana/o and Latina/o studies.

Audience: Undergraduate

**CHICLA 210 – CHICANA/O AND LATINA/O CULTURAL STUDIES**

3 credits.

Introduction to the cultural worlds of Chicana/os and Latina/os in the U.S. Examines how diverse peoples came to understand themselves as members of a racial, ethnic, and cultural community by exploring the production of music, art, theater, film, television, and literature.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Use interdisciplinary cultural studies theories and methods to analyze examples of Chicanx and Latinx/e cultural expression.  
Audience: Undergraduate

2. Critically examine the ways Chicanx/e and Latinx/e cultural expression relates to the way Chicanx and Latinx/e communities have been imagined and imagine themselves in local and national contexts, including attention to nation, race, gender, and sexuality.  
Audience: Undergraduate

3. Recognize and question assumptions related to course material and demonstrate consciousness of your own identity in relation to course material.  
Audience: Undergraduate

4. Conduct research on an example of Chicanx and Latinx/e cultural expression and communicate this research to a broad audience.  
Audience: Undergraduate

**CHICLA/SPANISH 215 – BORDER AND MIGRATION STUDIES OF LATINX AMERICA**

3 credits.

Drawing from cultural studies, border studies, migration and race theory, explores through cultural and literary texts the social and political issues regarding migration, contact zones, transculturation, and/or diaspora. Considers the various meanings of the word "border" or "frontera". What is a border geographically speaking? What does it mean in political and legal terms? How do we conceive the border in cultural, literary, linguistic, political, judicial, and personal ways? What is like to live on the border or on the margins? It is said that the border is a contact zone, a meeting point, a way to transfer and share information, an invitation to (in)tolerance and ex/inclusion. Read texts from history, politics, cultural anthropology, literature, and theatre to grasp the vast understanding of what is life on the border. Focus on the humanities, paying close attention to how visual artists (theater, performance, documentaries) understand and confront life on the border.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and analyze the historical and political impact of the U.S.-Mexico border zone and Latin America.  
Audience: Undergraduate

2. Demonstrate empathy for those impacted by border interventions.  
Audience: Undergraduate

3. Explain the importance of speaking about borders and how borders have impacted present day circumstances regarding race and racial inequalities in the U.S.  
Audience: Undergraduate

4. Recognize and question previously held assumptions about the border and migration.  
Audience: Undergraduate

5. Demonstrate knowledge of artistic and literary interventions on and about the border.  
Audience: Undergraduate

6. Explore the contemporary political and economic effects of border policy through a humanistic approach  
Audience: Undergraduate

7. Apply important historical concepts and terms to draw conclusions on and about border literature, art, and theater.  
Audience: Undergraduate

8. Interpret how literature, theatre, and performance explore a humanistic approach to a geopolitical dilemma.  
Audience: Undergraduate

**CHICLA/SPANISH 222 – INTRODUCTION TO LATINX CULTURES**

3 credits.

Offers an introduction to the culture and history of the Mexican and Latin American origin people in the United States. Emphasis on diversity, emergence of new imagined communities, and cultural hybridity. Focusing on key issues such as U.S. imperial expansion, colonialism, nation and community formations, migration, urban spaces, and the dynamics of race, class, gender, ethnicity, and sexuality, study a range of socio-political, historical, literary, and artistic expressions that inform the whole process of culture and reveal the way Latinos and Latinas negotiate their presence, cultural difference, and creativity in the U.S.

**Requisites:** SPANISH 226 or concurrent enrollment, or SPANISH 311 or concurrent enrollment

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Frng Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and analyze the factors that have shaped the presence of Mexican and Latin American origin peoples in the U.S., and the historical processes by which Latinos/as have been culturally, politically, and legally constructed in the United States.

Audience: Undergraduate

2. Demonstrate knowledge of the varied make-up of Latinos and the role that race, ethnicity, gender, class, and migration have played in their own histories.

Audience: Undergraduate

3. Demonstrate an understanding of how Latinidad is constructed and contested in the United States by various communities, institutions, and individuals.

Audience: Undergraduate

4. Demonstrate knowledge on how Latinos/as negotiate or respond to situations of internal colonialism, social disparities, lack of political representation, migration, generational conflicts, assimilation and transcultural issues, gender roles, and transnational situations.

Audience: Undergraduate

5. Learn and employ diverse tools and critical thinking in the analysis of Latinx cultural production.

Audience: Undergraduate

6. Demonstrate further mastering of Spanish speaking and writing skills necessary for articulating arguments in field of study.

Audience: Undergraduate

**CHICLA/POLI SCI 231 – POLITICS IN MULTI-CULTURAL SOCIETIES**

3-4 credits.

Race, ethnicity, and religion as political factors; cultural pluralism, politics, and policy in the United States and selected other multi-cultural politics.

**Requisites:** Freshman or sophomore standing only

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate how events of the past gave rise to racial and ethnic hierarchies in the United States today and how those hierarchies manifest themselves in politics.

Audience: Undergraduate

2. Recognize and question assumptions about race and ethnicity that are embedded in discussions of U.S. politics.

Audience: Undergraduate

3. Apply concepts raised in class to life in a multi-cultural society.

Audience: Undergraduate

4. Describe the ways that racial and ethnic worldviews are shaped and how they change.

Audience: Undergraduate

### CHICLA/GEN&WS/HISTORY 245 – CHICANA AND LATINA HISTORY

3 credits.

Introduces the cultural, economic, social, and political history of Chicanas and Latinas in the U.S. and focuses on four major themes: contact between different ethnic/racial groups; ideas of nation and nationalism; constructions of identity; and struggles for social justice.

**Requisites:** None

**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Critically analyze the presence or absence of Chicanas and Latinas in US history.

Audience: Undergraduate

2. Use methods and vocabularies of history to analyze primary and secondary sources.

Audience: Undergraduate

3. Consider the relevance of Chicana and Latina history to present-day issues.

Audience: Undergraduate

4. Write and revise research aimed at an audience beyond the classroom.

Audience: Undergraduate

### CHICLA/HISTORY/LACIS/POLI SCI 268 – THE U.S. & LATIN AMERICA FROM THE COLONIAL ERA TO THE PRESENT: A CRITICAL SURVEY

3 credits.

A critical examination of US-Latin American relations from the colonial era to the present, tracing the emergence and evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America. Primary attention will be focused on US relations with Mexico, Central America and the Caribbean, but other Latin American countries will figure prominently during certain episodes.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Critically examine US-Latin American relations from the colonial era to the present.

Audience: Undergraduate

2. Examine tracing the evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America.

Audience: Undergraduate

3. Discuss US relations with Mexico, Central America and the Caribbean.

Audience: Undergraduate

### CHICLA 299 – DIRECTED STUDY

1-3 credits.

Introductory independent research, readings or projects mentored by faculty.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2012

### CHICLA 301 – CHICANA/O AND LATINA/O HISTORY

3 credits.

Examines the history of the making of a people from pre-hispanic time to the present. Examines how people of Mexican and Latin American descent in the United States have come to think of themselves as constituting a collectivity by examining the social, cultural, and political worlds of Chicana/os and Latina/os.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CHICLA/POLI SCI 302 – MEXICAN-AMERICAN POLITICS**

3-4 credits.

This class examines the major problems and issues in Mexican-American politics since World War II. An emphasis will be placed on the ways in which race, class and culture have structured politics for the Mexican origin people. Not open to students with credit for POLI SCI 464 prior to fall 2017

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an analytical framework for understanding the political dynamics of multi-cultural societies.

Audience: Undergraduate

2. Understand how the dynamics of race, class, and ethnicity shape Mexican American politics and Latino politics.

Audience: Undergraduate

3. Examine the historical conflict between Mexican and Anglo Americans.

Audience: Undergraduate

4. Understand the politics of cultural pluralism in the United States.

Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**CHICLA/CURRIC 306 – LATINX LITERACIES**

3 credits.

Addresses how members of Latinx communities have used writing for both personal and social change. Develop a deeper understanding of the political, family, and school contexts in which Latinx peoples in the United States write and read.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Develop a theoretical understanding of literacy studies, homing in on concepts, such as "reading the word and reading the world," "funds of knowledge," "mestiz@ scripts," relevant to many Latinx literacy traditions.

Audience: Undergraduate

2. Identify and analyze key social, political, and historical pressures on many Latinx literacies, including the relationship between racism and literacy, legal status and literacy, and linguistic discrimination.

Audience: Undergraduate

3. Identify and analyze central ways that Latinx communities have used and use writing for social change through close readings of ethnographic and literary accounts.

Audience: Undergraduate

4. Create a portfolio of creative, scholarly, and reflective writing connected to course themes, deepening understandings of Latinx literacies, and developing writing and revision techniques that will transfer to other contexts.

Audience: Undergraduate

### CHICLA/GEN&WS/GEOG 308 – LATINX FEMINISMS: WOMEN'S LIVES, WORK, AND ACTIVISM

3 credits.

An examination of Latinx women's lives, experiences, and activism through the lens of testimonio, life histories, and feminist writings rooted in social justice movements and critical pedagogies.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Identify and describe key theoretical concepts and frameworks used in interdisciplinary studies of Latinas/xs and other women of color in the U.S.

Audience: Undergraduate

2. Explain the historical origins of Chicanx and Latinx feminisms and their relationship with social justice movements.

Audience: Undergraduate

3. Critically analyze the works of leading Latinx feminist scholars and theorists, who have written on issues of race, ethnicity, gender, LGBTQ identities, labor, color, citizenship status, and generation.

Audience: Undergraduate

4. Explore different writing genres and methodologies used in the study of women's lives, experiences, and activism.

Audience: Undergraduate

5. Apply the framework of testimonio to complete a digital storytelling project, examining a key theme or issue in women's lives.

Audience: Undergraduate

### CHICLA/ED POL 310 – LATINE STUDENTS IN THE U.S. HIGHER EDUCATION SYSTEM

3 credits.

Develop a deeper understanding of U.S. higher education by examining connections between historical and present-day circumstances for a group of students often called the key to the sector's future. Latine students are the fastest growing population in postsecondary education today. Why did this growth happen? How has it impacted colleges and universities? How are Latine college students dealing with varying levels of institutional support? And what strengths do they bring to their education and future careers? By studying research from sociologists, historians, and education scholars, develop informed critiques of higher education and reimagine a better system for all.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify the major players in the U.S. higher education system, along with their relationships to one another.

Audience: Undergraduate

2. Summarize the development of this system - especially its early treatment of People of Color - and identify the historical roots of modern educational trends.

Audience: Undergraduate

3. Describe the strengths Latine students bring to their own educational trajectories and list their contributions to American colleges and universities.

Audience: Undergraduate

4. Apply social science theories and methods to understanding inequality in college enrollment, experiences, and outcomes for underrepresented minority students, especially Latines.

Audience: Undergraduate

5. Evaluate new ideas for improving the productivity, diversity, stability, and/or innovativeness of the higher education system.

Audience: Undergraduate

6. Assess and synthesize existing education research to formulate new arguments about the U.S. higher education system.

Audience: Undergraduate

7. Participate in informed and respectful conversations about higher education with a variety of people - taking into consideration the cultural perspectives and worldview of others.

Audience: Undergraduate

**CHICLA 315 – RACIAL FORMATION AND WHITENESS**

3 credits.

Examines the construction of whiteness in the United States from the colonial period to the present with an eye to the ways in which Chicana Latinx communities have engaged with whiteness. Learn and apply a variety of relevant racial theories to historical cases, exploring the process of racialization through specific racial projects in time and space. Evaluate theories about identity, citizenship, and justice that influence contemporary anti-racist praxis and develop writing skills through essays that take positions on debates within Chicana Latinx studies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe processes of racial formation in the United States from the colonial period to the present.

Audience: Undergraduate

2. Discuss historical, economic, and political forces behind the social construction and maintenance of whiteness in the United States.

Audience: Undergraduate

3. Analyze Chicana & Latinx identity in the United States in relation to processes of racialization and the construct of whiteness.

Audience: Undergraduate

4. Students will learn and apply various racial theories to concrete cases from the history of the United States and to their own lives.

Audience: Undergraduate

5. Develop written, spoken, and graphic communication and argumentation skills.

Audience: Undergraduate

**CHICLA/CURRIC 321 – CHICANO/LATINO EDUCATIONAL JUSTICE**

3 credits.

Addresses the ways Chican@s/Latin@s in contemporary U.S. society have engaged in social, cultural, political, and ideological struggles for educational justice. Begins with a broad overview of educational issues and examines major social movements, legal cases, and local and national efforts that have established important precedents. Focus on different enactments of resistance, struggle, resilience, self-determination, and educational justice and focus on how these precedents and enactments pertain to teaching, learning, and curriculum practices that reflect key tenets of educational justice for Chican@/Latin@ students.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Summarize substantive educational issues and inequities that pertain to Chicana/o/x and Latina/o/x pupils in schools.

Audience: Undergraduate

2. Analyze underlying social, cultural, historical, and political, ideological dimensions that affect Chicana/o/x and Latina/o/x schooling.

Audience: Undergraduate

3. Apply knowledge about schooling for Chicana/o/x and Latina/o/x pupils to how organizations/entities outside of school advance notions of educational justice

Audience: Undergraduate

4. Identify concrete ways to improve Chicana/o/x and Latina/o/x pupils' learning opportunities, educational advancement, and academic achievement

Audience: Undergraduate

### CHICLA 327 – TOPICS IN CHICANX/E AND LATINX/E LITERATURES

3 credits.

An examination of specific themes in Chicanx/e and Latinx/e literature that address persistent marginalization due to race/ethnicity, gender, sexuality, and class.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, for 10 number of completions

**Learning Outcomes:** 1. History of literature and language: Recognize and identify the forms, techniques, social conditions, values, and genres, as well as cultural, aesthetic, philosophical, and ideological factors that are relevant to a particular topic or theme in Chicanx and Latinx literatures.

Audience: Undergraduate

2. Awareness of history's impact on the present: Appraise and contrast literary approaches to depicting a variety of social, cultural, and historical events and experiences.

Audience: Undergraduate

3. Critical thinking / Ability to recognize and question assumptions: Assess textual evidence leading to interpretation and discern multiple (and even contradictory) interpretations while querying textual meaning and significance.

Audience: Undergraduate

4. Creativity: Generate original ideas and texts, experimenting and taking risks, solving problems, and answering questions in a range of genres and media.

Audience: Undergraduate

5. Critical writing and communication: Write and present original, coherent, and compelling arguments that push beyond summary to analysis; are grounded in textual evidence; and offer independent and original thinking clear prose that meets expectations for grammatical correctness.

Audience: Undergraduate

6. Citizenship / A consciousness of self and other: Develop empathy by learning about the experiences of others and develop self-awareness of one's own positionality and views, and employ this consciousness in participating with others in the classroom while also creating productive patterns of study and work for yourself based on this growing self-awareness.

Audience: Undergraduate

### CHICLA 328 – CULTURES AND HISTORIES TOPICS IN CHICANA/O & LATINA/O STUDIES

3 credits.

Topics in Chicano/a Studies: An examination of specific themes in Chicano/a life, ways and culture, with readings drawn primarily from the arts and humanities.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, for 10 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Comprehend, and employ various approaches to interpreting and creating cultural artifacts such as works of art, literature, music, architecture, philosophy, film, etc.

Audience: Undergraduate

2. Demonstrate knowledge of major movements, trends, or events in the development of one or more U.S. Latinx culture

Audience: Undergraduate

3. Demonstrate an appreciation of the complexities of the interpretative process within historical and cultural contexts

Audience: Undergraduate

4. Apply critical approaches to works and alternative ways of considering them

Audience: Undergraduate

5. Think critically about and appreciate the complex histories of U.S. Latinx cultures and larger global communities

Audience: Undergraduate

**CHICLA 329 – EDUCATION AND SERVICE TOPICS IN CHICANA/O & LATINA/O STUDIES**

3 credits.

An examination of specific themes in Chicano/a life, ways and culture, with readings drawn primarily from fields related to education, social service, and applied social science.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Think critically about U.S. Latinx communities and the larger global community

Audience: Undergraduate

2. Demonstrate knowledge of one or more methodologies for the study of Latinx populations in relation to education and social services

Audience: Undergraduate

3. Synthesize and apply social science concepts to the study of communities of Latin American descent in the USA

Audience: Undergraduate

4. View issues related to communities of Latin American descent in the USA from multiple perspectives

Audience: Undergraduate

**CHICLA 330 – TOPICS IN CHICANO/A STUDIES**

3–4 credits.

An examination of specific themes in Chicano/a life, ways and culture.

Topics may include border culture, Chicano/a ethnicity and identity, and Mexican immigration to the United States.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain core social science concepts within the topic area of Chicanx/e & Latinx/e Studies.

Audience: Undergraduate

2. Discuss U.S. Latinx/e communities and the larger global community.

Audience: Undergraduate

3. Demonstrate knowledge of one or more social science methodologies for the study of Latinx populations.

Audience: Undergraduate

4. Synthesize and apply social science concepts to the study of communities of Latin American descent in the USA.

Audience: Undergraduate

5. Explain issues related to communities of Latin American descent in the USA from multiple perspectives.

Audience: Undergraduate

**CHICLA/COUN PSY 331 – IMMIGRANT HEALTH AND WELLBEING**  
3 credits.

Develop an understanding of immigrant health in the United States from the perspective of social and structural determinants. Applies concepts to a comprehensive framework for the development of health. Describes health assets and risks for specific vulnerable immigrant groups, such as women, children, and undocumented individuals and mixed immigration status families. Provides guidelines for improving immigrant access to quality health care, including language services, provider competence, policy and organizational supports, and community-based collaboration, advocacy, and research.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate knowledge of nature of health and well-being as well as concomitant risks for immigrant populations

Audience: Undergraduate

2. Examine the nature of social determinants and the pathways by which they influence health and well-being among immigrant populations

Audience: Undergraduate

3. Synthesize academic and public health data to provide an informed summary of health status of immigrants across domains of mental and physical health and disorders

Audience: Undergraduate

4. Survey personal, interpersonal, familial, and community contributors to health, well-being, resilience, healing/recovery, and disability across sociological contexts of immigrants

Audience: Undergraduate

5. Analyze public policy and health initiatives that address the health concerns specific to immigrant populations

Audience: Undergraduate

6. Identify skills, experiences, training, qualifications, and personal/ethical/professional standards involved in careers supporting health and well-being of immigrant populations

Audience: Undergraduate

**CHICLA/GEN&WS 332 – LATINAS: SELF IDENTITY AND SOCIAL CHANGE**  
3 credits.

Explores the multiracial and multicultural reality of Latina societies by becoming familiar with the history and cultures of Chicana, Cuban-American, and Puerto Rican women. Interdisciplinary readings in law, journalism, public policy, history, and self-reflective literature.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**CHICLA/GEN&WS 334 – FEMINIST SOCIAL MOVEMENTS ACROSS THE AMERICAS**

3 credits.

Explores feminist activism in the United States, Canada, the Caribbean, and Latin America. Feminist activism, broadly construed, will be explored through ethnography, interviews, documentaries, public facing scholarship, among other forms of intellectual production. Applies transdisciplinary perspectives to consider work from a range of academic fields and topics to understand the major political, economic, and social issues framing feminist social movements across the Americas.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify and recognize key themes and issues of feminist social movements across the Americas

Audience: Both Grad & Undergrad

2. Increase awareness of the histories of various social movements across the Americas and their impact in the present

Audience: Both Grad & Undergrad

3. Understand and analyze transnational connections among feminist social movements

Audience: Both Grad & Undergrad

4. Identify and critically analyze the theoretical frameworks that undergird feminist activist scholarship across the Americas

Audience: Both Grad & Undergrad

5. Engage more deeply with course materials with stronger written and analytical skills

Audience: Graduate

6. Develop critical thinking skills to identify and question the impact of power dynamics and institutionalized oppression on feminist social movements in the U.S and across the Americas.

Audience: Both Grad & Undergrad

**CHICLA/ED POL/LACIS 342 – EDUCATION ACROSS THE AMERICAS: EMPIRE, CAPITALISM, AND RESISTANCE**

3 credits.

Examines educational inequality across the Americas through the lens of imperialism, different forms of colonialism, and capitalism. By exploring the logics and actions of different education stakeholders, critically examine how educational policy across the hemisphere has a shared history of oppression and contestation.

**Requisites:** ED POL 300

**Course Designation:** Gen Ed – Communication Part B  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Draw from different sources to evaluate the transnational contexts of education policy and pose relevant questions about hemispheric educational issues

Audience: Undergraduate

2. Use clear understandings of terms such as imperialism, colonialism, capitalism, racism, and transnationalism to explain unequal educational processes

Audience: Undergraduate

3. Formulate and communicate research-based arguments on topics in education policy using academic literature, including primary and secondary sources

Audience: Undergraduate

4. Produce expository and argumentative texts and draw from this work to produce a podcast

Audience: Undergraduate

**CHICLA/COM ARTS 347 – RACE, ETHNICITY, AND MEDIA**

3 credits.

Introduction to the changing images of race and ethnicity in U.S. entertainment media and popular culture. Surveys history, key concepts and contemporary debates regarding mediated representation of ethnic minorities. Critical and cultural studies approaches are emphasized.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Connect the way that racial minorities have historically been represented in mainstream media to the way that they are represented in contemporary media

Audience: Undergraduate

2. Analyze the representation of race/ethnicity in contemporary media in a sophisticated way

Audience: Undergraduate

3. Point to evidence of the way that racism is upheld systemically in society, and the ways racism has been and is currently being challenged

Audience: Undergraduate

4. Reflect on and articulate your own participation in contributing to or fighting against racial inequalities

Audience: Undergraduate

5. Increase your ability to understand different perspectives on race in your everyday life, and respectfully engage in discussions of race with colleagues and peers

Audience: Undergraduate

6. Articulate some of the effects the past has had on present day circumstances, perceptions of, and disparities in, race in the U.S.

Audience: Undergraduate

7. Recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity

Audience: Undergraduate

**CHICLA/CURRIC 354 – RACE AND LANGUAGE IN STEM AND ENVIRONMENTAL EDUCATION**

3 credits.

Explores the contestation of ongoing histories of injustice, exclusion, and raciolinguistic hierarchies across science, mathematics, and environmental education. Scholarship from Chicane/Latine Studies, raciolinguistic perspectives, and post/de/anticolonial studies will be examined to critically analyze these school subjects and related hierarchies of knowing, languaging, and being. Applies transdisciplinary perspectives to consider how students, educators, and community activists have challenged those hierarchies and worked to repurpose science, mathematics, and environmental pedagogies toward aims of linguistic, racial, educational, and environmental justice.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Articulate how the past has affected present day circumstances regarding race/ethnicities and related inequities in the U.S., with a focus on histories of science, mathematics, and environmental education in relation to colonial, racializing, linguistic, and curricular hierarchies.

Audience: Undergraduate

2. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others by analyzing how students, educators, or community activists have contested hierarchies of science, mathematics, or environmental education and repurposed pedagogies toward aims of linguistic, racial, or environmental justice.

Audience: Undergraduate

3. Critically evaluate contemporary media (e.g., film) related to STEM or environmental education and draw upon raciolinguistic, Chicane/Latine, or post/de/anticolonial perspectives.

Audience: Both Grad &amp; Undergrad

4. Synthesize course concepts by investigating and developing a critical contribution to contemporary dialogue concerning issues of racial, linguistic, educational and/or environmental justice.

Audience: Undergraduate

5. Recognize and appraise the histories of science, mathematics, and environmental education in relation to colonial, racializing, linguistic, and curricular hierarchies

Audience: Graduate

6. Analyze how students, educators, or community activists have contested hierarchies of science, mathematics, or environmental education and repurposed pedagogies toward aims of linguistic, racial, or environmental justice

Audience: Graduate

7. Demonstrate graduate-level research knowledge of raciolinguistic perspectives, Chicane/Latine Studies, or post/de/anticolonial theories in STEM or environmental education.

Audience: Graduate

**CHICLA/HISTORY/LACIS/POLI SCI 355 – LABOR IN THE AMERICAS: US & MEXICO IN COMPARATIVE & HISTORICAL PERSPECTIVE**

3 credits.

Provides a critical examination of the history of labor and working people in the Americas, from the colonial era to the present. It focuses on the experience of the United States and Mexico, offering a comparative perspective on their distinct but also shared (and increasingly linked) histories. The seminar proceeds chronologically, highlighting major episodes in the evolution of labor systems in the two countries, beginning with the colonial labor systems implemented by the Spanish and British empires following the European conquest of the Western Hemisphere. Among other topics, we will examine the pivotal role of slavery and other forms of forced labor, the impact of the industrial revolution, the emergence and expansion of corporate capitalism and the labor unrest it provoked in the post-civil war U.S., the role of labor in the Mexican Revolution and its aftermath, the impact of the Great Depression and labor incorporation on the post-WWII social and political order of both countries, the breakdown of that order and the move to neo-liberalism in the 1970s and 1980s, and the emergence of an increasingly integrated North American production system and its consequences for labor and working people on both sides of the US-Mexico border.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**CHICLA/SPANISH 364 – SURVEY OF LATINX/E POPULAR CULTURE**

3 credits.

Analysis of Latinx/e popular culture to consider the varied make-up of Latinx/e populations, their specific histories, social dynamics, and politics through their creative expressions, performances, and cultural contestations. Covers key terms and concepts, cultural developments, and diverse interpretations while focusing in the analysis of Latinx/e music, performance art, film and media, sports, food, and car culture. Other topics include the production, circulation, and reception of Latinx/e popular culture, the use of Spanish and English languages, issues of identity, migration, and interculturality, the role of the cultural industry, and the context of globalization. Broadly explores the intersectionality of race, ethnicity, class, gender, sexuality, and nation regarding Latinx/e populations. Taught in Spanish.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Explain the varied make-up of Latinx/e populations and their place and political positions in the United States.

Audience: Undergraduate

2. Analyze the dilemmas, debates, and creativity reflected in Latinx/e popular culture.

Audience: Undergraduate

3. Employ tools and critical perspectives in analyzing Latinx/e popular culture and the intersection of nation, ethnicity, race, gender, and sexuality.

Audience: Undergraduate

4. Explain how Latinidad is constructed and contested in the United States by various communities, institutions, and individuals.

Audience: Undergraduate

5. Engage in cross-disciplinary conversations relevant to the current field of Latinx/e studies.

Audience: Undergraduate

**CHICLA/ENGL 368 – CHICANA/O AND LATINA/O LITERATURES**

3 credits.

Historical, political, and aesthetic roots and directions of Latin@ and Chican@ short stories, novels, poetry, music, plays, films, and essays.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. History of literature and language: Recognize and demonstrate knowledge of major forms, techniques, social conditions, values, genres, as well as cultural, aesthetic, philosophical and ideological factors that are relevant to the history of Chicanx and Latinx literatures.

Audience: Undergraduate

2. Awareness of history's impact on the present: Appraise and contrast literary approaches to depicting a variety of social, cultural, and historical events and experiences.

Audience: Undergraduate

3. Critical thinking / Ability to recognize and question assumptions: Assess textual evidence leading to interpretation and discern multiple (and even contradictory) interpretations while querying textual meaning and significance.

Audience: Undergraduate

4. Creativity: Generate original ideas and texts, experimenting and taking risks, solving problems, and answering questions in a range of genres and media.

Audience: Undergraduate

5. Critical writing and communication: Write and present original, coherent, and compelling arguments that push beyond summary to analysis; are grounded in textual evidence; and offer independent and original thinking clear prose that meets expectations for grammatical correctness.

Audience: Undergraduate

6. Citizenship/ A consciousness of self and other: Develop empathy by learning about the experiences of others and develop self-awareness of one's own positionality and views, and employ this consciousness in participating with others in the classroom while also creating productive patterns of study and work for yourself based on this growing self-awareness.

Audience: Undergraduate

**CHICLA/COM ARTS 419 – LATINO/AS AND MEDIA**

3 credits.

Critical and historical survey of the participation and representation of Latino/as in U.S. film, television, and popular culture, with a primary focus on Hispanic representation in Hollywood-produced imagery. The counter-images of Latino and Latina media producers also will be explored.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Connect the way that Latinx people have historically been represented in mainstream media to the way that they are represented in contemporary media and to their treatment in contemporary society more

Audience: Both Grad & Undergrad

2. Define anti-Latinx racism and its connections to other forms of oppression, including sexism, heteronormativity, classism, colonization, and ableism

Audience: Both Grad & Undergrad

3. Analyze the different constraints and possibilities for how Latinx people produce and consume media texts

Audience: Both Grad & Undergrad

4. Respectfully engage in nuanced discussions about race and reflect on the cultural perspectives and worldviews of others

Audience: Both Grad & Undergrad

5. Demonstrate advanced analysis of Latinx media texts that rigorously engages with scholarship in Latinx media studies

Audience: Graduate

## CHICLA/HISTORY/POLI SCI 422 – LATINO HISTORY AND POLITICS

3 credits.

Students will examine the historical, social, political, economic, and cultural experiences and conditions of Latinos, one of the largest US racial/ethnic minority groups. Course focus is on people who trace their origins to Mexico, the Caribbean, and countries of Latin America.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2015

**Learning Outcomes:** 1. Discuss the complexity of the Latino population and divergent political agendas of various subgroups.

Audience: Undergraduate

2. Develop an understanding of the historical origins of how Latino social/political movements have emerged and changed.

Audience: Undergraduate

3. Evaluate the role of movements and activists in policy reform and social/political change.

Audience: Undergraduate

4. Examine the impact of the Latino vote on contemporary politics.

Audience: Undergraduate

5. Explore contemporary policy issues affecting the Latino population.

Audience: Undergraduate

## CHICLA/HISTORY 435 – COLONY, NATION, AND MINORITY: THE PUERTO RICANS' WORLD

3 credits.

A historical introduction to the Puerto Rican experience, from island to mainland. Varieties of colonial rule, social institutions, cultural processes, and ethnic and national identity. Migration to the U.S. and social dynamics of stateside communities.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify major trends and debates in the historical studies about Puerto Rico and its global diaspora.

Audience: Both Grad & Undergrad

2. Explain how those who have inhabited the Puerto Rican archipelago have resisted and navigated colonialism.

Audience: Both Grad & Undergrad

3. Compare and contrast Spanish and United States colonialism in Puerto Rico.

Audience: Both Grad & Undergrad

4. Analyze the complex realities of Puerto Rican communities in the archipelago and abroad.

Audience: Both Grad & Undergrad

5. Evaluate colonial violence in present-day Puerto Rico

Audience: Both Grad & Undergrad

6. Analyze the history of Puerto Rico through the lens of three key concepts: la brega, coloniality, and nationhood.

Audience: Both Grad & Undergrad

7. Demonstrate advanced written and analytic skills through engagement with course materials.

Audience: Graduate

**CHICLA/LEGAL ST/SOC 440 – ETHNICITY, RACE, AND JUSTICE**

3-4 credits.

An examination of ethnicity, race, and justice, with a specific emphasis on US Latinos, the largest minority group in the United States.

**Requisites:** C&E SOC/SOC 140, 210, 211, SOC 181, FOLKLORE/AFROAMER/AMER IND/ASIAN AM/CHICLA 102, CHICLA 201, CHICLA 210, CHICLA 230, POLI SCI/CHICLA 231, HISTORY/CHICLA/GEN&WS 245, LEGAL ST/SOC 131, or POLI SCI/LEGAL ST 217

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss ethnic and racial differences in crime and criminal justice outcomes and analyze these patterns through the application of theory and empirical data in the social sciences.

Audience: Undergraduate

2. Engage major theoretical debates in social and legal scholarship. Why are there racial/ethnic disparities in crime and violence? How and why have these disparities changed over time? Are minorities treated differently by legal officials? Has mass incarceration mitigated or exacerbated racial and ethnic inequality? How has the Supreme Court viewed issues of ethnicity, race, and the law?

Audience: Undergraduate

3. Competently interpret representations of data and critically analyze study design in published research on ethnicity, race, and justice.

Audience: Undergraduate

4. Critically assess the often-controversial issues surrounding ethnicity, race, crime, and the law in society, drawing on readings and class discussion.

Audience: Undergraduate

**CHICLA/LEGAL ST/SOC 443 – IMMIGRATION, CRIME, AND ENFORCEMENT**

3-4 credits.

A study of immigration, crime, and border enforcement, engaging both historical and present-day debates, focusing on Latino immigration and the U.S.-Mexico border.

**Requisites:** C&E SOC/SOC 140, 210, 211, SOC 181, FOLKLORE/AFROAMER/AMER IND/ASIAN AM/CHICLA 102, CHICLA 201, CHICLA 210, CHICLA 230, POLI SCI/CHICLA 231, HISTORY/CHICLA/GEN&WS 245, LEGAL ST/SOC 131, or POLI SCI/LEGAL ST 217

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss trends in immigration, crime, and border enforcement in recent decades and analyze these patterns through the application of theory in the social sciences and empirical data.

Audience: Undergraduate

2. Engage major theoretical debates in migration scholarship. Why do people (not) move? How are migration decisions made? What effect does migration have on (a) receiving societies, (b) sending societies, and (c) migrants themselves? How is migration organized by gender? What differentiates forced and unforced migration? How are immigrants incorporated into new societies?

Audience: Undergraduate

3. Develop a broader understanding of border enforcement through critical analysis of immigration policies and practices from an international perspective. That is, are recent trends in border enforcement unique to the United States?

Audience: Undergraduate

4. Critically assess the often-controversial issues surrounding ethnicity, race, crime, and the law in society, drawing on readings and class discussion.

Audience: Undergraduate

**CHICLA/ENGL 460 – BLACK AND LATINX IN LITERATURE AND VISUAL CULTURE**

3 credits.

Chicanxs and Latinxs are frequently imagined in ways that erase the history, presence, and influence of African-descended peoples within these groups. However, this anti-Blackness does not go unanswered in Chicanx and Latinx cultural production. Covers literature, life-writing/autoethnography, visual culture, philosophy/theory, and history that takes up Black Latinx experience and/or that comparatively explores the African American and Latinx convergences, exploring a rich vein of thought and representation in U.S. literatures that is often more transamerican than American and that offers new definitions of both Latinx and Black. Readings on racial paradigms in the Americas, paying attention to the differences between US and Latin American contexts, as well readings on decoloniality, intersectional feminisms, borderlands, and diaspora.

**Requisites:** Declared in Chicana/o and Latina/o Studies (major or certificate) or English major, and sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Know major forms, techniques, social conditions, values, genres, as well as cultural, aesthetic, philosophical and ideological factors that have shaped the history of Black and Latinx literatures.

Audience: Undergraduate

2. Appraise and contrast literary approaches to depicting a variety of social, cultural, and historical events and experiences.

Audience: Undergraduate

3. Understand multiple interpretations, question textual meanings and significance, discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods.

Audience: Undergraduate

4. Generate original ideas and texts, conduct thought experiments, and answer critical questions about and in a range of genres and media.

Audience: Undergraduate

5. Write original, coherent, and compelling arguments that push beyond summary to analysis that is grounded in textual evidence and offer independent and critical thinking in clear prose that meets expectations for grammatical correctness.

Audience: Undergraduate

6. Develop empathy by learning about the experiences of others and develop self-awareness of one's own positionality and views, and to employ this consciousness in participating with others in the classroom. Create productive patterns of study and work for yourself based on this growing self-awareness.

Audience: Undergraduate

**CHICLA/SPANISH 467 – US LATINO LITERATURE**

3 credits.

Study the literature of Latinos and Latinas in the United States, particularly of writers of Mexican, Puerto Rican, Cuban, Dominican and Central American descent. Examines the impact of race and how individuals and communities negotiate situations of internal colonialism, migration, generational conflicts, tensions between assimilation and cultural preservation, gender roles, literary traditions, and transnational situations. Considers the linguistic, cultural and formal singularity of Latinx literature, the use of Spanish and English languages, the advent of feminist and queer writing, and the vision of the United States in their works regarding its past, its present and its future. Explores the intersectionality of race, ethnicity, class, gender, sexuality, and literary forms. Diverse theories and ways to read literary texts will be explored. Literary texts - novels, short stories, poetry and essays - will be read in English or Spanish, or a combination of both. Taught in Spanish

**Requisites:** SPANISH 223 and 224

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Achieve an understanding of how the past affected present day circumstances to Latinx people regarding race and racial inequalities and patterns of oppression in the U.S.

Audience: Undergraduate

2. Develop critical thinking skills to recognize and question cultural assumptions, situations of privilege, and knowledge claims as they relate to race and ethnicity.

Audience: Undergraduate

3. Demonstrate self-awareness about their own racial and ethnic identities and empathy towards the perspectives and histories of others.

Audience: Undergraduate

4. Apply key cultural concepts to a diverse array of literary texts in relation to lives outside the classroom.

Audience: Undergraduate

**CHICLA/SPANISH 469 – TOPICS IN LATINX CULTURE**

3 credits.

Focuses on the cultural evolution of Chicanos, Puerto Ricans, Cuban-Americans, and other U.S. Latinos in relation to their countries of origin. Topics vary.

**Requisites:** (CHICLA/SPANISH 222 and SPANISH 224), (SPANISH 223 and 224), SPANISH 361, 363, or CHICLA/SPANISH 364

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the place of migration in the development of the U.S. as a nation, of migration as an integral social phenomena, and of Mexican migration in particular.

Audience: Undergraduate

2. Apply various analytical tools and perspectives to grasp diverse practices of cultural retention, cultural transformation, hybridity, transnationalism, and plural identities.

Audience: Undergraduate

3. Recognize the intersectionality of ethnicity, race, gender, nation, and sexuality.

Audience: Undergraduate

4. Identify various cultural expressions in critical dialogue with hegemonic/dominant cultures.

Audience: Undergraduate

**CHICLA/SOC 470 – SOCIODEMOGRAPHIC ANALYSIS OF MEXICAN MIGRATION**

3 credits.

Introduces students to social and demographic analysis and explanations of the historical and present day causes and consequences of migration of the largest immigrant group to the United States in the 20th century.

**Requisites:** SOC 134, 170, 181, SOC/ASIAN AM 220, SOC/C&E SOC 140, 210, 211, CHICLA 201, CHICLA 210, or POLI SCI/CHICLA 231; or graduate/professional standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Describe micro-level and macro-level patterns in Mexico-U.S. migration and analyze these patterns through the application of theory and empirical data in the social sciences.

Audience: Undergraduate

2. Examine major theoretical debates in migration scholarship. Why do people (not) move? How are migration decisions made? What effect does migration have on (a) receiving societies, (b) sending societies, and (c) migrants themselves? How is migration organized by gender? What differentiates forced and unforced migration? How are immigrants incorporated into new societies?

Audience: Undergraduate

3. Apply empirical findings on Mexico-U.S. migration to evaluate theories in migration scholarship.

Audience: Undergraduate

4. Competently interpret representations of social science data on Mexico-U.S. migration.

Audience: Undergraduate

5. Critically analyze study design in published social science research on Mexico-U.S. migration.

Audience: Undergraduate

**CHICLA/LAND ARC 475 – LATINO URBANISM: DESIGN AND ENGAGEMENT IN THE AMERICAN CITY**

3 credits.

Urban design in the 21st century American city explores a new understanding of urban placemaking and development. Explores the intersections of culture, place, and design to critically address how the socioeconomic dynamics that underlie demographic shifts in the U.S. are influencing urban change in the American landscape. Focuses on the evolution and ways by which Latinos shape the built environment, both in the public realm and in the home.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the role that design, planning, and public engagement have in addressing the needs of Latino communities in the U.S.

Audience: Undergraduate

2. Evaluate through a historical lens how socio-economic conditions of Latinos influence choices in the contemporary American city

Audience: Undergraduate

3. Use real world examples to demonstrate how diversity and culture can impact regions, governments, and economies for producing a just city

Audience: Undergraduate

4. Understand the concept of justice in the city through both qualitative and quantitative measure

Audience: Undergraduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges as they relate to planning for Latino communities.

Audience: Undergraduate

6. Analyze the causes of and solutions for the sustainability challenge of marginalized population groups.

Audience: Undergraduate

**CHICLA/SPANISH 478 – BORDER AND RACE STUDIES IN LATIN AMERICA**

3 credits.

Drawing from cultural studies, border studies and/or critical race theory, this course explores through cultural and literary texts the social and political issues regarding migration, contact zones, transculturation, and/or diaspora.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224. Not open to students with credit for CHICLA/SPANISH 215.

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain political and historical issues between the U.S. and Latin America.

Audience: Undergraduate

2. Analyze the ways in which literature, theatre, and performance represent a humanistic approach to a geopolitical dilemma

Audience: Undergraduate

3. Recognize the visual arts (theatre and performance) as a way to explore issues of and about immigration.

Audience: Undergraduate

### CHICLA 501 – CHICAN@ AND LATIN@ SOCIAL MOVEMENTS IN THE U.S.

3 credits.

Explores Chicana/o and Latina/o social movement participation and collective action from the 1940s to the contemporary moment. Using interdisciplinary scholarship and mixed media, analyze paradigms, theories, and debates pertaining to the historical and contemporary economic, cultural, and sociopolitical dimensions of the Latina/o position in the United States. Focuses on social movements and collective action (rooted in labor, community, civil and human rights organizing) and the topics of race and racialization, power and powerlessness, migration, community development, and gender. Compares the experiences of different Latin@ groups.

**Requisites:** CHICLA 201, 230, FOLKLORE/AFROAMER/AMER IND/ ASIAN AM/CHICLA 102, POLI SCI/CHICLA 231, or HISTORY/CHICLA/ GEN&WS 245

**Course Designation:** Gen Ed – Communication Part B

Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply Chicana/o and Latina/o studies concepts and vocabulary to the topics of social movements, race, organized labor, migration and immigration.

Audience: Undergraduate

2. Demonstrate familiarity with the basic literature on Latina/o social movements and migration.

Audience: Undergraduate

3. Analyze the connections between contemporary social movements and groups organized around such issues as labor, migration, and citizenship.

Audience: Undergraduate

4. Relate issues faced by contemporary immigrant and non-immigrant Latina/a workers face today to those faced by earlier generations.

Audience: Undergraduate

5. Write well-organized, coherent arguments about Latina/o social movements.

Audience: Undergraduate

6. Collect, evaluate, and use information from resources in the University of Wisconsin libraries in their writing.

Audience: Undergraduate

7. Give clear, engaging formal oral presentations on topics related to the course.

Audience: Undergraduate

### CHICLA 520 – LATINX DIGITAL PUBLICS

3 credits.

Study and reflect on Latinx unequal access to media and the political and social context of media in Latinx communities. Develop research, writing, editing and copyediting, collaboration, and project management skills while contributing to Latinx Studies research. Create content for such online outlets as Latinx Talk, La Bloga, Latinx Project, Wikipedia and UW-Madison publications.

**Requisites:** CHICLA 201

**Course Designation:** Gen Ed – Communication Part B

Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Recognize and appraise the histories, experiences, and perspectives of Latinx people in creating, participating in, and influencing media, journalism, and digital/online information.

Audience: Both Grad & Undergrad

2. Identify links between media created by Latinx and minoritized peoples and their audiences, evaluate the effectiveness of these media for those audiences, and examine the significance of particular media forms.

Audience: Both Grad & Undergrad

3. Critically evaluate contemporary Latinx digital/online humanities and arts projects, scholarly publications, journalism, and community-based knowledge projects.

Audience: Both Grad & Undergrad

4. Create digital/online Latinx studies content and make convincing spoken presentations about their work, using appropriate style and disciplinary conventions and drawing on core Latinx studies library resources.

Audience: Both Grad & Undergrad

5. Evaluate the contributions of peers and provide useful feedback

Audience: Both Grad & Undergrad

6. Engage in best practices for collaborative work.

Audience: Both Grad & Undergrad

7. Demonstrate graduate-level research knowledge of Latinx Studies in the digital sphere in additional final research paper.

Audience: Graduate

**CHICLA/COUN PSY 525 – DIMENSIONS OF LATIN@ MENTAL HEALTH SERVICES**

3 credits.

Provides training for students who aspire to one of the helping, health, or mental health professions and who currently work or who envision themselves working with Latin@ populations. Provides important frameworks for working with Latin@s, including cultural, spiritual, linguistic and historical features relevant to this population and begin to apply their knowledge in service learning placements.

**Requisites:** Junior standing or 6 credits of CHICLA

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Acquire knowledge of the social, cultural, linguistic, spiritual, ethnic, and racial diversity within Latinx communities  
Audience: Undergraduate

2. Develop sensitivity to the forms of bias and discrimination that have historically and continue to impact Latinx communities  
Audience: Undergraduate

3. Increase awareness of the strengths and barriers in social services for the Latinxs communities  
Audience: Undergraduate

4. Increase skills to address social justice, advocacy, and cultural responsiveness in the context of Latinx communities  
Audience: Undergraduate

5. Reflect on students' own social identities and the implications of those identities and identity intersections when serving in Latinx communities  
Audience: Undergraduate

**CHICLA 530 – ADVANCED TOPICS IN CHICANA/O AND LATINA/O STUDIES**

1-4 credits.

Topics vary each semester, but may include history, literature, media, political science, culture, social work, etc., as they relate to Chicana/os and Latina/os in the United States.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain advanced social science concepts within the topic area of Chicanx/e & Latinx/e Studies.

Audience: Undergraduate

2. Discuss U.S. Latinx/e communities and the larger global community.  
Audience: Undergraduate

3. Demonstrate advanced knowledge of one or more social science methodologies for the study of Latinx/e populations.  
Audience: Undergraduate

4. Synthesize and apply social science concepts to the study of communities of Latin American descent in the USA at an advanced level.  
Audience: Undergraduate

5. View issues related to communities of Latin American descent in the USA from multiple perspectives.  
Audience: Undergraduate

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.  
Audience: Undergraduate

### CHICLA/COUN PSY 590 – ESPERANZA COMMUNITY-ENGAGED RESEARCH WITH LATINES

3 credits.

Introduction to the development and implementation of community-engaged research and programming for Latine populations with "Esperanza," an innovative university-community partnership with Centro Hispano of Dane County. Community-engaged research draws on interdisciplinary research and practice across education, psychology and public health that seeks to disrupt, mitigate, and eliminate mental health disparities among local Latine populations. Learn the principles of community-engaged research and apply them through the development of mutually beneficial, reciprocal, effective, equitable, and justice-oriented community-university projects.

**Requisites:** CHICLA/COUN PSY 525 or graduate/professional standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Learning Outcomes:** 1. Identify guiding principles of community-engaged research with Latines based on the social, cultural, linguistic, and historical influences on this population.

Audience: Both Grad & Undergrad

2. Develop equitable, effective, and culturally informed collaborations with Latine-serving community partners.

Audience: Both Grad & Undergrad

3. Apply principles of community-engaged scholarship to develop and implement projects that promote health equity and justice through a strengths-based approach for local Latine communities.

Audience: Both Grad & Undergrad

4. Relate the content and course skills to an interdisciplinary health profession role of scientist-practitioner-advocates to promote effective research with culturally diverse populations.

Audience: Both Grad & Undergrad

5. Integrate trauma-informed scholarly peer-reviewed publication with healing-centered Latine and indigenous epistemologies

Audience: Graduate

### CHICLA 699 – DIRECTED STUDY

1-3 credits.

Advanced independent research, readings or projects mentored by faculty.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

### CHICLA 902 – INTERDEPARTMENTAL SEMINAR IN CHICANX/E & LATINX/E STUDIES TOPICS

3 credits.

Interdisciplinary inquiry in communities of Latin American descent in the United States.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 10 number of completions

**Learning Outcomes:** 1. Discuss, analyze, and evaluate major theories, approaches, concepts, currently informing Chicanx/e and Latinx/e studies.

Audience: Graduate

2. Synthesize research in Chicanx/e and Latinx/e studies, applying methods and theories from more than one discipline to a research question.

Audience: Graduate

3. View issues related to communities of Latin American descent in the USA from multiple perspectives.

Audience: Graduate

4. Develop an extended original research project that can be submitted for publication, engaging with interdisciplinary scholarship in Chicanx/e and Latinx/e studies.

Audience: Graduate

# CIVIL AND ENVIRONMENTAL ENGINEERING (CIV ENGR)

## CIV ENGR 1 – COOPERATIVE EDUCATION PROGRAM

1 credit.

Work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career.

**Requisites:** Sophomore standing

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Undergraduate

## CIV ENGR 121 – SUSTAINABILITY ENGINEERING FOR NON-ENGINEERS

3 credits.

Interdisciplinary contexts of sustainability, including environment, economy, and society. History of sustainability in engineering, sustainability engineering tools, and contemporary applications of sustainability in a wide range of fields.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Synthesize how the evolution of sustainability engineering has influenced its application today

Audience: Undergraduate

2. Apply the concepts and tools of sustainability engineering to a modern-day problem or challenge

Audience: Undergraduate

## CIV ENGR 150 – INTRODUCTION TO ARCHITECTURAL THEORY

3 credits.

A survey of architectural design theory through research analysis and criticism of works and ideas of significant architects and architectural theorists.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine architectural design as a theoretical practice and the use of visual representation to successfully communicate ideas.

Audience: Undergraduate

2. Effectively communicate in a group and participate in constructive criticism and discussion about the presented ideas and work.

Audience: Undergraduate

3. Demonstrate comprehension of historical, philosophical, theoretical, and an aesthetic perspective commonly used in the discussion of architecture.

Audience: Undergraduate

4. Apply knowledge of artistic/design principles, conventions, methods, and practices through the creation of works of art/design.

Audience: Undergraduate

5. Compare and contrast the expressive and formal features of different artistic media and/or cultural traditions through both analytical studies and original artistic/design work.

Audience: Undergraduate

**CIV ENGR 151 – ARCHITECTURAL MAKING I**

3 credits.

Introduction to architecture and architectural making. 2D and 3D form and space tested through the theoretical, pragmatic, and contextual issues that influence architecture.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate knowledge of basic concepts in architecture and related disciplines.

Audience: Undergraduate

2. Strategize a solution to a fundamentally simple design problem based on a design precedent.

Audience: Undergraduate

3. Research design methodology for proposed a program and employ skills in scale and proportion, composition and form in 2D imagery.

Audience: Undergraduate

4. Employ skills in scale and proportion, composition and form in 3D.

Audience: Undergraduate

5. Demonstrate diagramming and journaling skills based on course content.

Audience: Undergraduate

**CIV ENGR 152 – ARCHITECTURAL MAKING II**

3 credits.

Survey and application of twentieth century design techniques in architecture.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate knowledge of basic concepts in architecture and related disciplines.

Audience: Undergraduate

2. Strategize a solution to a fundamentally simple design problem based on a design precedent.

Audience: Undergraduate

3. Research design methodology for a proposed program and employ skills in scale and proportion, composition and form in 2D imagery.

Audience: Undergraduate

4. Employ skills in scale and proportion, composition and form in 3D.

Audience: Undergraduate

5. Demonstrate diagramming and journaling skills based on course content.

Audience: Undergraduate

**CIV ENGR 155 – ARCHITECTURAL THINKING**

3 credits.

Canonical buildings since 1800 alongside their accompanying theoretical texts are evaluated within the discipline and allied fields of inquiry.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Visually recognize and identify major architectural modes of representation.

Audience: Undergraduate

2. Using formal and technical vocabulary, describe the defining characteristics of buildings.

Audience: Undergraduate

3. Distinguish and develop a working knowledge of significant developments in architectural thinking across time and in a cross-cultural context.

Audience: Undergraduate

4. Apply critical thinking to ideas and theories in the history of architecture.

Audience: Undergraduate

**CIV ENGR 159 – CIVIL ENGINEERING GRAPHICS**

2 credits.

Graphical communication including lettering, drawing equipment and techniques; geometric constructions, orthographic projections, technical sketching, isometric views, descriptive geometry, and computer-aided design drawing, with applications specific to civil engineering.

**Requisites:** Not open to students with credit for M E 170.**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Use basic drafting tools to create scaled images of civil and environmental engineering designs

Audience: Undergraduate

2. Use computer-aided design tools to create scaled images of civil and environmental engineering designs

Audience: Undergraduate

### **CIV ENGR 250 – ARCHITECTURAL VISUALIZATION**

3 credits.

Development of precise standards of drawing and the history and techniques of descriptive and analytical drawing.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Strategically deploy representational strategies with a range of tools available.

Audience: Undergraduate

2. Explain techniques of 2D and 3D representation.

Audience: Undergraduate

3. Explain history, theory, and contemporary application of representation strategies.

Audience: Undergraduate

4. Explain the techniques and tools available to produce them.

Audience: Undergraduate

### **CIV ENGR/G L E 291 – PROBLEM SOLVING USING COMPUTER TOOLS**

4 credits.

Introduction to engineering computations with emphasis on computer tools and computer based measurement, data collection, and processing. Tools will include computer aided design, spreadsheets, other engineering computation tools, and hardware and software for laboratory and spatial measurements.

**Requisites:** MATH 222 or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use spreadsheet software to perform fundamental civil, environmental, and geological engineering calculations, analyze datasets using logical filters, and interpret numeric data meant to represent time and text values

Audience: Undergraduate

2. Use computer programming as a tool to streamline engineering data analysis tasks, create visualizations, obtain numerical approximations, and retrieve data from local and remote (web-based) data sources

Audience: Undergraduate

3. Use automatic levels, total stations, and aerial photography to conduct land surveying operations and collect the type of geospatial data required for creating drawings that support engineering design

Audience: Undergraduate

4. Explain how measuring devices (data acquisition systems and sensors) work, use measuring devices to record/monitor the physical properties of a system, and use sensor readings as the foundation to control devices in the physical world

Audience: Undergraduate

### **CIV ENGR 299 – INDEPENDENT STUDY**

1-3 credits.

Under faculty supervision.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2016

**Learning Outcomes:** 1. Conduct and report on independent civil or environmental engineering research

Audience: Undergraduate

### **CIV ENGR 310 – FLUID MECHANICS**

3 credits.

Fluid statics and dynamics, dimensional analysis, flow of an ideal fluid, flow of a real fluid—including laminar and turbulent flow, applications to engineering problems.

**Requisites:** (MATH 234 or 375) and (E M A 202 or M E 240), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recall properties of fluids in relation to natural and engineered flows

Audience: Undergraduate

2. Explain how pressure varies in static and moving fluids

Audience: Undergraduate

3. Use conservation of mass, momentum, angular momentum, and energy to analyze flows in natural and engineered settings

Audience: Undergraduate

4. Use dimensional analysis to reduce the number of parameters in analysis of flows and to develop prototype-model relationships

Audience: Undergraduate

5. Assess the functioning of natural and engineered flow systems and determine appropriate analysis tools to achieve desired outcomes

Audience: Undergraduate

6. Design and conduct experiments to understand fluid flows and determine quantitative relationships between dimensionless variables

Audience: Undergraduate

**CIV ENGR 311 – HYDROSCIENCE**

3 credits.

Introduction to the water cycle, its relationship to the environment and human attempts to conserve, control, and utilize water judiciously. Fundamentals of hydrology, hydraulics, coastal engineering and water resources engineering.

**Requisites:** MATH 222, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. List and explain the fundamental processes of the hydrologic cycle

Audience: Both Grad & Undergrad

2. Explain the importance of hydrology and water resources in society

Audience: Both Grad & Undergrad

3. Use hydrologic principles to address engineering problems related to water supply, flooding, and environmental quality

Audience: Both Grad & Undergrad

4. Derive and use quantitative relationships to describe hydrologic behavior

Audience: Both Grad & Undergrad

5. Examine the causes of and solutions for the sustainability challenge of water availability under conditions of changing land use, climate, and demand and environmental issues.

Audience: Both Grad & Undergrad

6. Describe the social, economic, and environmental dimensions of the sustainability challenges of water management and identify potential tradeoffs and interrelationships among these dimensions

Audience: Both Grad & Undergrad

7. Synthesize the connections to and importance of hydrological processes and methods in broader contemporary interdisciplinary water resources and environmental issues

Audience: Graduate

**CIV ENGR 320 – ENVIRONMENTAL ENGINEERING**

3 credits.

Fundamental sanitary aspects of environmental engineering. Role of the engineer in the control of the environment; water supply and wastewater problems; solid waste disposal; air pollution; and administration in environmental engineering.

**Requisites:** CHEM 104, 109, 116, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify major issues pertaining to water and air quality, and general ecosystem quality

Audience: Undergraduate

2. Describe the roles and responsibilities of environmental engineers and scientists in society

Audience: Undergraduate

3. Carry out material and energy balances within a standard problem solving framework

Audience: Undergraduate

4. Derive and solve mathematical expressions to describe simple transformation and transport process that occur in environmental media

Audience: Undergraduate

5. Perform computations related to concepts and processes within the fields of water supply, wastewater treatment, solid waste, and air quality engineering

Audience: Undergraduate

**CIV ENGR 322 – ENVIRONMENTAL ENGINEERING PROCESSES**

3 credits.

Combination of theory and laboratory practice to study basic unit operations and processes in environmental engineering. Emphasis on water and wastewater treatment processes, such as coagulation/flocculation, chemical precipitation, filtration, adsorption, activated sludge, anaerobic digestion, and substrate utilization kinetics.

**Requisites:** CIV ENGR 320, CBE 250, BSE 249, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Conduct experiments appropriate to environmental engineering

Audience: Undergraduate

2. Use statistics to analyze uncertainties and interpret experimental results

Audience: Undergraduate

3. Design an experiment to test a specific hypothesis

Audience: Undergraduate

4. Design an experiment to establish engineering design criteria (e.g., estimate a required chemical dose, estimate a required reactor size)

Audience: Undergraduate

5. Function in an environmental engineering team to conduct experiments and interpret results

Audience: Undergraduate

6. Organize and deliver effective written and graphical communications

Audience: Undergraduate

**CIV ENGR 324 – ENVIRONMENTAL ENGINEERING THERMODYNAMICS**

3 credits.

A systematic introduction to the application of the first and second laws of thermodynamics to systems relevant to environmental engineering.

Energy balances used to solve environmental engineering problems in flowing and non-flowing systems. Examines the relationship between energy, heat and work using theoretical and practical models. Chemical reactions as well as gas and fluid mixing from a thermodynamics perspective. Performance limits imposed by the second law of thermodynamics on devices used in power generation, fluid flow, refrigeration, and air conditioning.

**Requisites:** (CHEM 104 or 109), MATH 234, and (E M A 201, PHYSICS 201 or 207), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the first and second laws of thermodynamics and their applications to environmental engineering problems

Audience: Undergraduate

2. Formulate energy balances to solve environmental engineering problems in flowing and non-flowing systems

Audience: Undergraduate

3. Apply the relationship between energy, heat and work to environmental engineering problems

Audience: Undergraduate

4. Conduct performance and design calculations based upon thermodynamic principles

Audience: Undergraduate

**CIV ENGR 325 – ENVIRONMENTAL ENGINEERING MATERIALS**

3 credits.

Properties and tests of materials used in the treatment and conveyance of water and air. Introduction to laboratory and field measurement techniques to assess material performance capabilities. Technical report preparation.

**Requisites:** CIV ENGR 320 and E M A 201, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply knowledge of materials behavior to select, specify, and monitor materials used in the treatment and conveyance of water and air

Audience: Undergraduate

2. Conduct and/or monitor standardized testing protocols, interpreting test results, and preparing technical reports

Audience: Undergraduate

3. Conduct forensic studies to determine role of material properties in treatment or conveyance failures

Audience: Undergraduate

4. Practice skills in teamwork and communication relevant to materials selection and monitoring

Audience: Undergraduate

**CIV ENGR/G L E 330 – SOIL MECHANICS**

3 credits.

Basic principles of soil mechanics and fundamentals of application in engineering practice; soil composition and texture; classification; permeability and seepage; consolidation; settlement; shear strength; lateral earth pressures and retaining structures, shallow and deep foundations, slope stability; subsurface exploration; laboratory characterization of physical and engineering properties of soils.

**Requisites:** E M A 303 or M E 306, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the physicochemical characteristics of soils and their importance to the engineering behavior of soils.

Audience: Both Grad & Undergrad

2. Define the factors which control the physical, mechanical and hydraulic behavior of soils.

Audience: Both Grad & Undergrad

3. Run the laboratory tests used for the determination of physicochemical properties of soils, the engineering classification of soils, hydraulic properties, and the stiffness and shear strength properties.

Audience: Both Grad & Undergrad

4. Perform analyses in each area described in the course and understand the limitations to these analyses.

Audience: Both Grad & Undergrad

5. List basic problems in Soil Mechanics design and describe how these problems are tackled.

Audience: Both Grad & Undergrad

6. Experimentally assess the interaction of multiple parameters controlling the physical, mechanical and hydraulic behavior of soils; perform more advanced 2D or 3D analyses in one area described in the course and understand the limitations of these analyses; or summarize the state of the art in one research or engineering-applied area described in the course.

Audience: Graduate

### **CIV ENGR 340 – STRUCTURAL ANALYSIS I**

3 credits.

Analysis of statically determinate and indeterminate beams, trusses, and rigid frames; deflections by virtual-work, moment-area; influence lines; force methods; structural design loads, introduction to structural design, approximate methods.

**Requisites:** (E M A 303 or M E 306) and M E/E M A 307, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compute the internal forces (axial, shear, and moment) applied to determinate structural systems

Audience: Both Grad & Undergrad

2. Construct shear and moment influence lines for patterned loads

Audience: Both Grad & Undergrad

3. Compute the deflections of a linear elastic structural system

Audience: Both Grad & Undergrad

4. Compute the internal forces (axial, shear, and moment) applied to simple indeterminate structural systems

Audience: Both Grad & Undergrad

5. Compute the internal forces (axial, shear, and moment) applied to any indeterminate structural system by computer code-based matrix method.

Audience: Graduate

### **CIV ENGR 352 – FRANK LLOYD WRIGHT - DESIGN SEMINAR**

3 credits.

Introduction to the design language of Frank Lloyd Wright. Beginning understanding of his architectural design process, his methods, tools and processes in building design and construction.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate knowledge of Human Cultures and the Natural World by studying the arts and sciences of other cultures.

Audience: Undergraduate

2. Apply Critical and Creative Thinking Skills, including inquiry, problem solving, and qualitative reasoning.

Audience: Undergraduate

3. Demonstrate effective Communication Skills in reading, visual communication, and information literacy.

Audience: Undergraduate

### **CIV ENGR 360 – CONSTRUCTION SYSTEMS**

3 credits.

Introduction to the parts and pieces of a building at the construction level. How a building is built from start to finish, and how the individual building systems affect one another. Systems, how they interact, design and construction, cost implications, schedule implications.

**Requisites:** E M A 201, PHYSICS 201, 207, 247, graduate/professional standing, or member of Engineering Guest Students. Not open to students with credit in CIV ENGR 290.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain many different design and construction of building systems

Audience: Both Grad & Undergrad

2. Identify types of systems visually on site

Audience: Both Grad & Undergrad

3. Evaluate which type of each system may be best for the design

Audience: Both Grad & Undergrad

4. Evaluate the cost, schedule, and procurement implications of designs

Audience: Both Grad & Undergrad

5. Work effectively in a design team and create an operations plan for a project

Audience: Both Grad & Undergrad

6. Analyze systems more deeply through research

Audience: Graduate

**CIV ENGR 370 – TRANSPORTATION ENGINEERING**

3 credits.

Characteristics of transportation supply and demand; measuring and estimating demand; social and environmental impacts; planning of transportation systems; characteristics of transportation modes; interaction between modes; mode interfaces; transportation technology; economics; public policy, implementation and management.

**Requisites:** STAT 311, 324 or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe the basic elements of the transportation delivery system

Audience: Undergraduate

2. Use quantitative and computerized techniques for planning, designing, and operating transportation systems

Audience: Undergraduate

3. Describe and critique theoretical design and operations issues

Audience: Undergraduate

4. Explain the need for highway design standards and how the political process, economics, and new technologies affect transportation decision making

Audience: Undergraduate

5. Explain how travel mode characteristics influence demand and mode choice; and how multiple modes of transportation interact

Audience: Undergraduate

6. Use the principles of transportation engineering and highway design standards to solve a specific problem

Audience: Undergraduate

7. Examine, design, optimize, simulate, and present, in both written and oral formats, a thorough description of their analysis procedure

Audience: Undergraduate

**CIV ENGR/BSE/SOIL SCI 372 – ON-SITE WASTE WATER TREATMENT AND DISPERSAL**

2 credits.

On-site treatment and dispersal of waste water from homes, commercial sources and small communities. Sources, pretreatment units, nutrient removal units, constructed wetlands, surface and soil dispersal systems, recycle and reuse systems, regulations, alternative collection systems.

**Requisites:** CHEM 103, 109, or 115

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify, formulate, solve complex wastewater management and engineering problems by applying engineering and science principles to design a complete residential onsite wastewater treatment system.

Audience: Undergraduate

2. Use engineering design to produce wastewater management solutions that meet treatment goals with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Audience: Undergraduate

3. Communicate effectively with the instructor and other students during in-class discussions.

Audience: Undergraduate

4. Recognize ethical and professional responsibilities in onsite wastewater management and engineering situations and make informed design assumptions/judgments, which must consider the impact of wastewater management solutions in global, economic, environmental, and societal context.

Audience: Undergraduate

5. Analyze and interpret data related to wastewater flow, source, and characteristics, soil/site characteristics, and use engineering judgement to select appropriate design solutions.

Audience: Undergraduate

6. Acquire and apply new knowledge regarding advanced treatment processes for residential wastewater treatment.

Audience: Undergraduate

**CIV ENGR/ENVIR ST/GEOG 377 – AN INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS**

4 credits.

Design, implementation and use of automated procedures for storage, analysis and display of spatial information. Covers data bases, information manipulation and display techniques, software systems and management issues. Case studies.

**Requisites:** Sophomore standing, member of Engineering Guest Students, or declared in Capstone Certificate in GIS Fundamentals

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**CIV ENGR 392 – BUILDING INFORMATION MODELING (BIM)**

3 credits.

An introduction to the use of Building Information Modeling (BIM) technology in the construction industry. Gain experience in using 3D 4D modeling software to model and coordinate building designs.

**Requisites:** CIV ENGR 159, M E 160, 231, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify concepts and principles of building information modeling  
Audience: Undergraduate

2. Explain construction management with 3-dimensional (3D) and 4D building information models  
Audience: Undergraduate

3. Use computer tools to model a building  
Audience: Undergraduate

4. Use communication and teamwork skills in multi-disciplinary building design modeling  
Audience: Undergraduate

5. List, examine, and critique modeling challenges  
Audience: Graduate

6. Develop innovative solutions to modeling challenges so that construction inefficiencies are minimized  
Audience: Graduate

**CIV ENGR/E M A 395 – MATERIALS FOR CONSTRUCTED FACILITIES**

3 credits.

Properties and tests of materials used in the initial construction or repair of facilities (including buildings, transportation systems, utility systems, and reinforced earth). Introduction to laboratory and field measurement techniques to assess material performance capabilities. Technical report preparation.

**Requisites:** (E M A 303 or M E 306), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use knowledge of construction materials behavior to select and specify materials for construction of civil engineering facilities  
Audience: Undergraduate

2. Use knowledge of construction materials behavior to monitor construction of civil engineering facilities  
Audience: Undergraduate

3. Conduct experiments with standardized testing protocols, interpret test results, and communicate results and interpretation in technical reports  
Audience: Undergraduate

4. Design and conduct forensic studies to determine the role of material properties or construction methods in facility failures  
Audience: Undergraduate

5. Use teamwork and communication skills relevant to the selection, specification, monitoring, and testing of construction materials  
Audience: Undergraduate

**CIV ENGR 410 – HYDRAULIC ENGINEERING**

3 credits.

Engineering approaches to measurement, control and conveyance of water and wastewater flows, emphasizing analysis, design, characteristics and selection of: measurement devices, distribution and collection pipe systems, and pumps and turbines with consideration of plant, quality, economic, reliability, and security aspects.

**Requisites:** CIV ENGR 310, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Quantitatively and qualitatively assess, estimate, and communicate the hydraulic performance of pressure-flow conveyance systems, including pumps, pipes, pipe grids, valves, storage tanks, and flow meters

Audience: Both Grad & Undergrad

2. Select a pipe material and pipe diameter to meet a specified objective

Audience: Both Grad & Undergrad

3. Describe the purpose of different valve types and select a valve to meet a specified objective

Audience: Both Grad & Undergrad

4. Select a pump and pump material to meet a specified objective

Audience: Both Grad & Undergrad

5. Estimate the performance of a pump operated at different speeds and against changing resistance to flow

Audience: Both Grad & Undergrad

6. Use hydraulic modeling software to simulate a drinking water distribution grid and to evaluate alternative solutions to meet changing objectives

Audience: Both Grad & Undergrad

7. Describe alternative ways of recovering energy from hydraulic systems and estimate return on investment for such systems

Audience: Graduate

**CIV ENGR 411 – OPEN CHANNEL HYDRAULICS**

3 credits.

Analysis and characteristics of flow in open channels (natural and artificial); channel design considerations including uniform flow (rivers, sewers), flow measuring devices (weirs, flumes), gradually varied flow (backwater and other flow profiles, flood routing), rapidly varied flow (hydraulic jump, spillways), and channel design problems (geometric considerations, scour, channel stabilization, sediment transport).

**Requisites:** CIV ENGR 310, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**CIV ENGR 412 – GROUNDWATER HYDRAULICS**

3 credits.

Engineering fundamentals of groundwater flow. Focus is on developing and implementing 2-D, steady-state, analytical models of groundwater flow. Also introduces transient groundwater flow modeling, hydraulic testing methods, and numerical modeling.

**Requisites:** CIV ENGR 311, GEOSCI/G L E 627, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conceptualize groundwater flow systems

Audience: Both Grad & Undergrad

2. Develop and apply 2-D, steady-state, analytical models of groundwater flow

Audience: Both Grad & Undergrad

3. Explain and use equations describing transient groundwater flow

Audience: Both Grad & Undergrad

4. Apply hydraulic testing methods

Audience: Both Grad & Undergrad

5. Develop and use a basic numerical model of groundwater flow

Audience: Both Grad & Undergrad

6. Explain contemporary groundwater issues and their societal relevance

Audience: Graduate

**CIV ENGR 414 – HYDROLOGIC DESIGN**

3 credits.

An introduction to the design of engineering structures which control and/or utilize runoff, emphasizing the sizing of structures to meet hydrologic uncertainty. Applies principles and techniques from several disciplines, including hydrology, hydraulics, probability and statistics. Specific techniques include flood frequency analysis; risk analysis; design storm and historic storm techniques; rainfall-runoff modeling.

**Requisites:** G L E/CIV ENGR 291 and CIV ENGR 311, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**CIV ENGR 415 – HYDROLOGY**

3 credits.

Water cycle as related to air mass properties and movement, precipitation, evaporation, snowmelt, infiltration, streamflow, watershed dynamics, and hydrologic extremes. Physics-based representations of hydrological processes. Basics of hydrologic modeling including calibration and validation.

**Requisites:** MATH 221, 217, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Differentiate between representations of runoff, streamflow, evapotranspiration, precipitation, infiltration, soil moisture, and snowpack based on physical principles and empirical simplifications  
Audience: Both Grad & Undergrad

2. Derive quantitative relationships describing terrestrial water and energy fluxes  
Audience: Both Grad & Undergrad

3. Formulate mathematical models of the water terrestrial water cycle at point and watershed scales  
Audience: Both Grad & Undergrad

4. Identify the strengths and weaknesses of hydrologic predictions for addressing real-world water resources challenges, including in a changing climate  
Audience: Both Grad & Undergrad

5. Contrast water resources engineering methods with more complex hydrologic and hydraulic methods  
Audience: Undergraduate

6. Identify the geophysical conditions under which specific hydrologic assumptions are valid  
Audience: Graduate

**CIV ENGR 416 – WATER RESOURCES SYSTEMS ANALYSIS**

3 credits.

Water supply and demand are increasingly stressed by climate, population, land-use, policy, etc. Presents a variety of systems analysis techniques for water resources planning and management. Deterministic and stochastic optimization and simulation models will be developed and applied.

Problems addressed include water supply, water quality, and river basin development.

**Requisites:** CIV ENGR 311, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Characterize planning, design, and management objectives in water systems  
Audience: Undergraduate

2. Formulate, design and solve optimization models of water systems  
Audience: Undergraduate

3. Integrate systems outputs into decision-making models  
Audience: Undergraduate

4. Apply basic fundamentals of economic theory to water resources problems  
Audience: Undergraduate

5. Articulate current issues in water resource management  
Audience: Undergraduate

6. Write codes to perform statistical analyses  
Audience: Undergraduate

7. Determine multiple performance metrics and subsequently draw suitable conclusions  
Audience: Undergraduate

### **CIV ENGR/G L E 421 – ENVIRONMENTAL SUSTAINABILITY ENGINEERING**

3 credits.

Uses the three paradigms of sustainability (environmental, social, and economic) for strategic environmental initiatives in an engineering setting. Proactive environmental management opportunities, including practices of pollution prevention, industrial ecology, and design for the environment. A systems approach to manufacturing, examining the life cycle of products, incorporating total cost accounting, extended producer responsibility, and design for end-of-life.

**Requisites:** (MATH 217 or 221) and (CHEM 104 or 109), or graduate/professional standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate why sustainability is important and relevant within the practice of engineering

Audience: Both Grad & Undergrad

2. Apply sustainability tools such as industrial ecology, life cycle assessment, economic assessment, material flow analysis, and criticality to inform engineering decisions

Audience: Both Grad & Undergrad

3. Analyze sustainability issues and/or practices using a systems-based approach

Audience: Both Grad & Undergrad

4. Describe the social, economic, and environmental dimensions of engineering and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course

Audience: Both Grad & Undergrad

5. Identify and critique recent peer reviewed sustainability literature

Audience: Graduate

### **CIV ENGR 422 – ELEMENTS OF PUBLIC HEALTH ENGINEERING**

3 credits.

Overview of the public health profession and the role of environmental sanitary engineers in public health. Introduction to chemical and microbial contaminants of public health concern – their routes of exposure and development of regulatory standards for drinking water, air, hazardous wastes, and industrial workplaces. Introduction to occurrence, toxicity, and virulence as components of public health risk and the engineer's role in identifying occurrence and design of engineering controls for public health protection.

**Requisites:** CIV ENGR 320, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Describe methods used to characterize risks associated with chemical toxins and microbial pathogens

Audience: Both Grad & Undergrad

2. Describe the contributions of exposure and potency/virulence to risk and calculate risks

Audience: Both Grad & Undergrad

3. List alternative routes of exposure and estimate the contribution of different sources to overall exposure

Audience: Both Grad & Undergrad

4. Explain how regulatory standards are derived from risk estimates

Audience: Both Grad & Undergrad

5. List the technologies that environmental engineers can design, build, and operate to limit exposure to a specified chemical toxin or microbial pathogen

Audience: Both Grad & Undergrad

6. Connect the topics of this course with their graduate research work

Audience: Graduate

**CIV ENGR 423 – AIR POLLUTION EFFECTS, MEASUREMENT AND CONTROL**

3 credits.

The influence of man-caused pollution on the atmosphere, globally and locally. Evaluation of human health, economic, and aesthetic effects of air pollution. Techniques for measurement of atmosphere pollutant concentrations and determination of local and regional air quality. Detailed presentation of air pollution sources and methods for their control. The role of local, state and federal government in air pollution control.

**Requisites:** Senior standing and declared in Biomed, Biological Sys, Chemical, Civil, Computer, Electrical, Environmental, Geological, Industrial, Mechanical or Nuclear Egr, Mat Sci & Egr, Egr Physics, Egr Mechanics, grad/prof standing or member of Egr Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the roles of engineers and scientists in managing air quality

Audience: Both Grad & Undergrad

2. Classify the breadth of air pollution problems into the following scales: indoor residential air quality, indoor industrial air quality, urban air pollution, regional air pollution, and global climate change

Audience: Both Grad & Undergrad

3. Describe the sources, transformations, fates, and impacts of key priority air pollutants at the scales noted above

Audience: Both Grad & Undergrad

4. Derive and use mass balance and reactor model calculations to estimate concentrations, and to identify fates and sources of air pollution at the scales noted above

Audience: Both Grad & Undergrad

5. Estimate transport and thermodynamic properties related to the formation, destruction, and removal of air pollutants

Audience: Both Grad & Undergrad

6. Explain the key technologies and processes used to prevent air pollution formation, transform air pollutants and remove air pollutants

Audience: Both Grad & Undergrad

7. Develop a basic design to mitigate an air pollution problem

Audience: Graduate

**CIV ENGR 425 – ENVIRONMENTAL ENGINEERING MICROBIOLOGY**

3 credits.

Microbial interactions in soils, water, extreme environments and biofilms. Modern methods for studying microbial ecology. Role of microbes in nutrient cycles and biogeochemistry. Use of microbes for mitigating human-made environmental problems of industrial, agricultural, and domestic origin. Emphasis on engineered systems.

**Requisites:** MICROBIO 303 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Predict which kinds of organisms will be found in different ecosystems using quantitative reasoning when possible

Audience: Both Grad & Undergrad

2. Describe research tools and applications in environmental microbiology as well as their limitations

Audience: Both Grad & Undergrad

3. Critically evaluate published research carried out in the field and think creatively about new potential research questions and applications

Audience: Both Grad & Undergrad

4. Work collaboratively in a team to enhance learning and solve complex problems

Audience: Both Grad & Undergrad

5. Synthesize and condense complex concepts into a form that is accessible to peers

Audience: Graduate

**CIV ENGR 426 – DESIGN OF WASTEWATER TREATMENT PLANTS**

3 credits.

Unit operations in wastewater treatment; physical, chemical, and biological processes for treatment of wastewater; sludge treatment and disposal; design of a wastewater treatment plant; site visits to wastewater treatment plants.

**Requisites:** Senior standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Find regulatory requirements for effluent permits, design, and operation of wastewater treatment plants and incorporate them as constraints when developing design solutions

Audience: Both Grad & Undergrad

2. Develop technically feasible alternative solutions, compare the alternative solutions, and recommend one of the solutions

Audience: Both Grad & Undergrad

3. Create plans and specifications that allow construction of a portion of the recommended solution

Audience: Both Grad & Undergrad

4. Design experiments necessary to gather data and create information for use in design

Audience: Both Grad & Undergrad

5. Implement measures to consider risk, reliability, and uncertainty in wastewater treatment

Audience: Both Grad & Undergrad

6. Use the skills and expertise of multiple disciplines on a design team to address complex engineering problems

Audience: Both Grad & Undergrad

7. Apply sustainability principles and/or frameworks to addressing the challenge of wastewater treatment

Audience: Both Grad & Undergrad

8. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of wastewater treatment

Audience: Both Grad & Undergrad

9. Manage a group of undergraduate students through the design process

Audience: Graduate

**CIV ENGR 427 – SOLID AND HAZARDOUS WASTES ENGINEERING**

3 credits.

Basic concepts in designing, evaluating, and operating solid wastes storage, collection, and disposal systems; waste reduction, resource recovery, incineration and land disposal methods; hazardous wastes engineering; legal, political, and administrative considerations.

**Requisites:** Senior standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Find regulatory requirements for design and operation in solid and hazardous waste engineering and incorporate them as constraints when developing design solutions

Audience: Both Grad & Undergrad

2. Develop technically feasible alternative solutions, compare the alternative solutions, and recommend one of the solutions

Audience: Both Grad & Undergrad

3. Create plans and specifications that allow construction of a portion of the recommended solution

Audience: Both Grad & Undergrad

4. Address professional and ethical issues in environmental engineering

Audience: Both Grad & Undergrad

5. Implement measures to consider risk, reliability, and uncertainty in hazardous waste management

Audience: Both Grad & Undergrad

6. Use the skills and expertise of multiple disciplines on a design team to address complex engineering problems

Audience: Both Grad & Undergrad

7. Apply sustainability principles and/or frameworks to address energy and resource use in solid and hazardous waste engineering design and operation

Audience: Both Grad & Undergrad

8. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of solid and hazardous wastes engineering

Audience: Both Grad & Undergrad

9. Manage a group of undergraduate students through the design process

Audience: Graduate

### **CIV ENGR 428 – WATER TREATMENT PLANT DESIGN**

3 credits.

Preliminary studies and design of water treatment processes and subordinate plant facilities; project control of design project; unit operations in water treatment; groundwater treatment; preliminary cost estimates; introduction of computer-aided design concept; site visits to water treatment plants.

**Requisites:** Senior standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Find regulatory requirements for water quality, operation, and design, and incorporate them as constraints when developing design solutions

Audience: Both Grad & Undergrad

2. Develop technically feasible alternative solutions, compare the alternative solutions, and recommend one of the solutions

Audience: Both Grad & Undergrad

3. Create plans and specifications that allow construction of a portion of the recommended solution

Audience: Both Grad & Undergrad

4. Implement measures to consider risk, reliability, and uncertainty in water treatment plant design

Audience: Both Grad & Undergrad

5. Apply sustainability principles and/or frameworks to addressing the challenge of drinking water treatment

Audience: Both Grad & Undergrad

6. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of drinking water treatment

Audience: Both Grad & Undergrad

7. Manage a group of undergraduate students through the design process

Audience: Graduate

### **CIV ENGR/G L E 430 – INTRODUCTION TO SLOPE STABILITY AND EARTH RETENTION**

1 credit.

Introduction to theory and approaches commonly used in geotechnical engineering practice for design and analysis of slopes and earth retaining structures.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Calculate the factor of safety of natural or engineered slopes

Audience: Both Grad & Undergrad

2. Design simple earth retaining structures

Audience: Both Grad & Undergrad

3. Perform additional design strategies to design complex slope or retaining structures

Audience: Graduate

4. Lead a team of undergraduate students for the final design project exercise

Audience: Graduate

**CIV ENGR/G L E 432 – INTRODUCTION TO SHALLOW AND DEEP FOUNDATION SYSTEMS**

1 credit.

Introduction to theory and approaches commonly used in geotechnical engineering practice for design and analysis of slopes and earth retaining structures.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply methods and requirements of a subsurface investigation program

Audience: Both Grad & Undergrad

2. Collect sufficient information to design basic shallow or deep foundation systems

Audience: Both Grad & Undergrad

3. Fulfill the design criteria for different structures and facilities

Audience: Both Grad & Undergrad

4. Design shallow and deep foundation structures

Audience: Both Grad & Undergrad

5. Perform additional design strategies to design the foundation of a soil retaining structure

Audience: Graduate

**CIV ENGR/G L E 434 – INTRODUCTION TO UNDERGROUND OPENINGS ENGINEERING**

1 credit.

Subsurface stress; rock failure criteria; openings in competent rock; openings in layered rocks; plastic behavior around openings in weak rock; stereographic projections and stereonet; block theory; rock bolts; stabilization methods and design.

**Requisites:** CIV ENGR/G L E 330, GEOSCI/CIV ENGR/G L E/ M S & E 474 or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Predict stress concentrations around underground openings

Audience: Both Grad & Undergrad

2. Identify weak points around underground openings in conjunction with the rock mass type information

Audience: Both Grad & Undergrad

3. Design openings to minimize hazard

Audience: Both Grad & Undergrad

4. Design reinforcement strategies

Audience: Both Grad & Undergrad

5. Perform advanced design strategies

Audience: Graduate

**CIV ENGR 440 – STRUCTURAL ANALYSIS II**

3 credits.

Analysis of structures by displacement methods with computer solutions. Slope deflection and moment distribution methods. Derivation of stiffness matrices for two-dimensional frames. Introduction to commercial structural analysis software. Shear deformations.

**Requisites:** CIV ENGR 340, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Model a structure, including boundary conditions and loading, for analysis using the stiffness method

Audience: Both Grad & Undergrad

2. Solve for unknown joint displacements, reactions, and member actions using the stiffness method

Audience: Both Grad & Undergrad

3. Use energy concepts for the determination of deflections, member stiffness/flexibility matrices, and equivalent joint loads

Audience: Both Grad & Undergrad

4. Account for material and geometric nonlinearities in the analysis of simple two-dimensional frame structures

Audience: Graduate

**CIV ENGR/ENVIR ST/G L E/GEOSCI 444 – PRACTICAL APPLICATIONS OF GPS SURVEYING**

2 credits.

Global positioning system surveying for field applications. Signals. Coordinate systems. Datums. Cartographic projections. Satellite orbits. Choosing hardware. Strategies for data collection and analysis. Assessing uncertainty. Geocoding satellite images. Integrating data with Geographic Information Systems. Emerging technologies.

**Requisites:** MATH 211, 217, 221, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CIV ENGR 445 – STEEL STRUCTURES I**

3 credits.

Design loads, codes, specifications and standards; philosophies of design; load and resistance factor design (LRFD); allowable stress design (ASD); properties and types of structural steel; residual stresses; behavior and LRFD design criteria for tension members, compression; laterally braced and unbraced beams; essentials of bolted and welded connections.

**Requisites:** CIV ENGR 340, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a working knowledge of the typical strength limit states of a tension member and simple bolted tension connection, including gross yielding, fracture of an effective net section, and block shear

Audience: Undergraduate

2. Demonstrate a working knowledge of the typical strength limit states of a compression member, including gross yielding, elastic and inelastic flexural buckling, and local web buckling

Audience: Undergraduate

3. Demonstrate a working knowledge of the typical strength limit states of a flexural member, including yielding, elastic and inelastic lateral-torsional buckling, and local flange buckling

Audience: Undergraduate

4. Demonstrate a working knowledge of the typical strength limit states of a member subjected to the combined effects of flexure and axial force, including yielding, lateral-torsional buckling, and local buckling

Audience: Undergraduate

5. Check, proportion and design structural steel members subjected to tension, compression, or/and flexure to satisfy the requirements of the AISC Specification for Structural Steel Buildings using the Load and Resistance Factor Design method

Audience: Undergraduate

6. Develop technically feasible alternative solutions to a problem, compare the alternative solutions, and recommended one of the solutions as the preferred option

Audience: Undergraduate

**CIV ENGR 447 – CONCRETE STRUCTURES I**

3 credits.

Behavior of reinforced concrete structural elements; concepts of design and proportioning sections for strength and serviceability; background of specification requirements; strength design applied to beams, columns, and members under combined axial load and bending; continuous beams.

**Requisites:** CIV ENGR 340, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compute required strengths for flexure, shear, and axial load, as well as moment and shear envelopes of design using the load factors and load combinations specified by the current building code requirements for structural concrete

Audience: Undergraduate

2. Perform a structural analysis and design of reinforced concrete members with rectangular and T-shaped sections subjected to flexure and shear (beams)

Audience: Undergraduate

3. Perform a structural analysis and design of reinforced concrete members subjected to combined flexure and axial loads (columns)

Audience: Undergraduate

4. Develop technically feasible alternative solutions to a problem, compare the alternative solutions, and recommend one of the solutions as the preferred option

Audience: Undergraduate

5. Compute required and design strengths for flexure, shear, and axial load for reinforced concrete members using commonly available structural analysis and design software

Audience: Undergraduate

**CIV ENGR 451 – ARCHITECTURAL DESIGN**

3 credits.

Introduction to building design, its methods, tools and processes and the interface with other professionals in building design and construction.

Buildings as an integrated system of components, assemblies and sub-systems, including: structure, enclosure, internal finish and furnishing, circulation, conveyance and mechanical systems. Pragmatic design elements that make a project sustainable, energy efficient and comfortable, including; fenestration options, daylighting, passive heating and cooling, energy efficiency and other lower impact approaches identified in LEED standards.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the social, formal and spatial context of buildings and urban sites and how they are used to configure building design solutions.

Audience: Undergraduate

2. Use architectural precedent (formal, spatial, organizational, typological and historical) for design direction on current project.

Audience: Undergraduate

3. Identify a building's integrated system of components, assemblies and sub-systems, including: structure, enclosure, internal finishing and furnishing, circulation and conveyance and environmental control and servicing.

Audience: Undergraduate

4. Identify and incorporate in design projects, critical health and life safety concerns and as exemplified in (building and zoning) codes, including; egress / exiting, accessibility, construction type, fire resistance and separation / isolation.

Audience: Undergraduate

5. Apply appropriate software to the architectural design process to develop, assemble, dimension and annotate a comprehensive set of architectural design documents in conventional formats.

Audience: Undergraduate

**CIV ENGR 465 – DATA SENSING AND ANALYSIS IN CONSTRUCTION**

3 credits.

Introduction to data sensing and analysis technologies for the onsite data capture, analysis and visualization in construction projects. Experience of using close range remote sensors and computing tools to facilitate construction engineering and management tasks. Focus on 1) project 3D as-built modeling and documentation, 2) visual detection, tracking and activity recognition of construction equipment and personnel, and 3) virtual construction inspection and site tour in mixed reality.

**Requisites:** G L E/CIV ENGR 291, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe challenges related to data sensing and analysis in construction

Audience: Both Grad & Undergrad

2. Use computer tools to analyze and visualize construction project data and models

Audience: Both Grad & Undergrad

3. Identify, formulate and solve construction engineering and management problems with remote sensors

Audience: Both Grad & Undergrad

4. Critically evaluate sensing technologies and actively develop innovative solutions to improve construction safety, productivity and quality

Audience: Graduate

**CIV ENGR/G L E/GEOSCI/M S & E 474 – ROCK MECHANICS**

3 credits.

Classification of rock masses, stress and strain in rock, linear and non-linear behavior of rock, failure mechanisms, state of stress in rock masses, lab testing, geological and engineering applications.

**Requisites:** E M A 201, PHYSICS 201, 207, or 247, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Measure basic index properties for rock mass classification

Audience: Both Grad & Undergrad

2. Describe stress and strain in continuums

Audience: Both Grad & Undergrad

3. Describe the factors which control the mechanical behavior of rocks

Audience: Both Grad & Undergrad

4. Apply basic concepts of rock mechanics and rock physics to analyze basic geomechanical engineering problems

Audience: Both Grad & Undergrad

5. Prepare rock samples for mechanical testing, conduct experiment, and analyze experimental data to obtain rock strength properties

Audience: Both Grad & Undergrad

6. Describe analytically time-dependent rock behaviors

Audience: Graduate

**CIV ENGR 489 – HONORS IN RESEARCH**

1-3 credits.

Undergrad honors research projects supervised by faculty members.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Conduct and report on independent civil or environmental engineering research

Audience: Undergraduate

2. Independently develop civil or environmental engineering research questions

Audience: Undergraduate

3. Appropriately use online and library resources

Audience: Undergraduate

**CIV ENGR 491 – LEGAL ASPECTS OF ENGINEERING**

3 credits.

Legal principles and institutions germane to engineering practice; formation and performance of engineer-client and owner-contractor relationships; preparation of technical specifications; surety bonds and insurance; construction liens; contract administration; construction contract remedies; intellectual property of engineers; engineers' obligations to society and their fellow engineers.

**Requisites:** Senior standing or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CIV ENGR 492 – INTEGRATED PROJECT ESTIMATING AND SCHEDULING**

3 credits.

Principles of estimating and scheduling for the construction industry, engineer's preliminary and final estimates' quantity take offs and cost and duration determinations for major items related to a construction project; use manual and computer techniques.

**Requisites:** Junior standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize and describe the core components of construction estimating, planning, and scheduling

Audience: Both Grad & Undergrad

2. List the steps needed to develop a cost estimate for a real-life project, then create a construction cost estimate using industry-appropriate software

Audience: Both Grad & Undergrad

3. List the steps needed to develop a time schedule for a real-life project, then create a construction schedule with a critical path plan using industry-appropriate software

Audience: Both Grad & Undergrad

4. Interpret construction blueprints

Audience: Both Grad & Undergrad

5. Integrate estimating and scheduling as a function of construction planning

Audience: Both Grad & Undergrad

6. Prepare and develop a contractor's bid document and deliver quantitative information in an organized manner to clients

Audience: Graduate

7. Work in a collaborative environment; lead and guide undergraduate students throughout the development of a scheduling and estimating project

Audience: Graduate

**CIV ENGR 494 – CIVIL AND ENVIRONMENTAL ENGINEERING DECISION MAKING**

3 credits.

Planning, designing, and managing civil and environmental engineering systems. Fundamentals of the systems approach; marginal analysis; optimization techniques; decision analysis; economic analysis; cost-effectiveness analysis. Case study applications.

**Requisites:** MATH 217, 221, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize planning, design, and management objectives in civil and environmental systems

Audience: Both Grad & Undergrad

2. Describe and solve fundamental engineering economics problems

Audience: Both Grad & Undergrad

3. Explain optimization concepts and modeling

Audience: Both Grad & Undergrad

4. Formulate, design, and solve linear optimization models

Audience: Both Grad & Undergrad

5. Describe and execute scheduling and critical paths methods

Audience: Both Grad & Undergrad

6. Explain decision theory, methods, and criteria

Audience: Both Grad & Undergrad

7. Define ethical responsibility in engineering

Audience: Both Grad & Undergrad

8. Analyze sustainability issues and/or practices using a systems-based approach

Audience: Both Grad & Undergrad

9. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of engineering decision making

Audience: Both Grad & Undergrad

10. Apply tools and methods to research analysis

Audience: Graduate

**CIV ENGR 495 – SUSTAINABLE BUILDING AND MATERIALS**

3 credits.

Concepts of sustainability in Civil Engineering with an emphasis on construction materials. Introduction to life-cycle assessment approach to evaluating the impact of infrastructure development. Current sustainable practices in construction projects. Connecting values to clients, stakeholders, and societal needs. Sustainability rating programs, such as LEED, Envision, and INVEST.

**Requisites:** CIV ENGR 325, E M A/CIV ENGR 395, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of building and infrastructure projects to the general public

Audience: Both Grad & Undergrad

2. Describe the social, economic, and environmental dimensions of material use in construction and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course

Audience: Both Grad & Undergrad

3. Explain the principles and functions of common sustainability rating programs used for construction projects

Audience: Both Grad & Undergrad

4. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Graduate

**CIV ENGR 496 – ELECTRICAL SYSTEMS FOR CONSTRUCTION**

3 credits.

Basic electricity, utility systems, standards and codes, electrical construction materials, branch circuit design, motor branch circuit design, feeder and service design, estimating and management concepts in electrical contracting, grounding, lighting, telecommunications.

**Requisites:** PHYSICS 202, 208, 248, graduate/professional standing, or member of engineering guest students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Interpret electrical construction documents

Audience: Both Grad & Undergrad

2. Find project-specific requirements in the National Electrical Code and interpret differences between common codes and standards used for electrical design of commercial, industrial, and institutional building systems

Audience: Both Grad & Undergrad

3. Design layouts for lighting and power devices

Audience: Both Grad & Undergrad

4. Size electrical feeders and building services using appropriate calculations, then draft and interpret electrical drawings based on these calculations

Audience: Both Grad & Undergrad

5. Describe key design considerations for fire alarm, telecommunications, and security systems

Audience: Both Grad & Undergrad

6. List advantages and disadvantages of different electrical construction materials according to their intended use

Audience: Both Grad & Undergrad

7. Perform quantity takeoffs and cost estimates of electrical components in construction

Audience: Graduate

**CIV ENGR 497 – MECHANICAL SYSTEMS FOR CONSTRUCTION**

3 credits.

Introduction to building mechanical systems. Plumbing, heating, ventilation, air conditioning, fire protection, automation/controls and process systems. Introduction to mechanical systems design and cost estimating. Mechanical system management.

**Requisites:** PHYSICS 202, 208, 248, graduate/professional standing, or member of engineering guest students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explore the Building Information Modeling (BIM) interface and BIM360 interface

Audience: Both Grad & Undergrad

2. Draft a 3D building model to explain how information is inter-related throughout the BIM model

Audience: Both Grad & Undergrad

3. Develop a project which includes stairs and "feature architectural designs", structural and MEP (Mechanical, Electrical, and Plumbing) components to strengthen BIM modeling skill sets

Audience: Both Grad & Undergrad

4. Integrate architectural, structural and MEP building components into a 3D model and avoid clashes between the building systems

Audience: Both Grad & Undergrad

5. Extract construction document sheets from the 3D model

Audience: Both Grad & Undergrad

6. Collaborate with multiple users across a wide area network and save their work to a central file

Audience: Graduate

7. Streamline data management and work from remote locations using a local server

Audience: Graduate

**CIV ENGR 498 – CONSTRUCTION PROJECT MANAGEMENT**

3 credits.

Characteristics of Construction Industry; project organizations; the design and construction process; labor, material, and equipment utilization; cost estimation; construction pricing and contracting; construction planning; cost control, monitoring accounting; and management systems construction.

**Requisites:** Junior standing or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define "ethical management practice", "personal development" and describe their personal commitment to each

Audience: Undergraduate

2. Define the terms "empathy" and "human capital" and describe their personal commitment to having empathy for human capital

Audience: Undergraduate

3. List and describe the core competencies of leadership and describe their personal commitment to leadership principles

Audience: Undergraduate

4. Identify and manage uncertainty and change in construction project management

Audience: Undergraduate

5. Use fundamentals of construction project management and its processes and/or components to solve real-life complex problems; define and distinguish construction project delivery systems and successful outcomes

Audience: Undergraduate

6. Use basic construction planning, cost management and contracts assessment skills

Audience: Undergraduate

### **CIV ENGR 500 – WATER CHEMISTRY**

3 credits.

Elements of fresh and marine water chemistry; acid-base, precipitation, complexation, oxidation-reduction, adsorption, and biochemical reactions in natural waters and water treatment processes.

**Requisites:** CHEM 104, 109, 116, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify important types of aqueous-phase chemical reactions

Audience: Both Grad & Undergrad

2. Use thermodynamic concepts to determine whether aqueous-phase chemical reactions can proceed and, if so, the extent to which they can proceed

Audience: Both Grad & Undergrad

3. Use graphical methods to solve ionic equilibrium problems

Audience: Both Grad & Undergrad

4. Use modern numerical tools to solve water chemistry problems

Audience: Both Grad & Undergrad

5. Explain the relevance of water chemistry concepts to their thesis research

Audience: Graduate

### **CIV ENGR 501 – WATER ANALYSIS-INTERMEDIATE**

3 credits.

Principles and applications of chemical and instrumental methods for the chemical analysis of water.

**Requisites:** CHEM 104, 109, 116, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Explain the need for progressive development of water quality analyses to respond to emerging water quality issues

Audience: Both Grad & Undergrad

2. Describe principles of physical, chemical and biological techniques for assessing water quality and discuss analytical procedures, results, and interpretations of data

Audience: Both Grad & Undergrad

3. Use knowledge of water quality analyses to assess real-world environmental issues

Audience: Both Grad & Undergrad

4. Evaluate raw data to progressively determine factors influencing water quality in contrasting environments

Audience: Both Grad & Undergrad

5. Use appropriate techniques to address drinking water and wastewater engineering issues

Audience: Both Grad & Undergrad

6. Take on leadership roles in group projects and discussions relevant to pertinent water quality issues

Audience: Graduate

**CIV ENGR/E M A/M E 508 – COMPOSITE MATERIALS**

3 credits.

Physical properties and mechanical behavior of polymer, metal, ceramic, cementitious, cellulosic and biological composite systems; micro- and macro-mechanics; lamination and strength analyses; static and transient loading; fabrication; recycling; design; analytical-experimental correlation; applications.

**Requisites:** (E M A 303 or M E 306), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. List the different types of composite materials and describe their manufacturing processes

Audience: Both Grad & Undergrad

2. Describe the mechanical behavior of various composite materials under different types of loading conditions

Audience: Both Grad & Undergrad

3. Derive mathematical models and solve them for engineering stresses and deformations in a composite structure

Audience: Both Grad & Undergrad

4. Describe special theories for heterogeneous and non-isotropic materials and solve boundary value problems associated with composite structures

Audience: Both Grad & Undergrad

5. Use the knowledge acquired in this class to design and conduct a complex analysis, design, and/or experiment to address key challenges relevant to composite materials

Audience: Graduate

**CIV ENGR/G L E 511 – MIXING AND TRANSPORT IN THE ENVIRONMENT**

3 credits.

Application of fluid mechanics to understand the mixing and transport of contaminants, pollutants, and other solutes in the environment. Introduction to chemical and biochemical transformation processes as well as boundary interactions at the air-water and sediment-water interfaces. Transport phenomena: diffusive processes, advective processes, turbulent diffusion, and shear flow dispersion. Introduction to both analytical and computational solutions with applications to mixing and transport in rivers, lakes, the atmosphere, and coastal waters.

**Requisites:** (CIV ENGR/G L E 291, COMP SCI 220, or E C E 203) and (CIV ENGR 310 or M E 363), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Recall the principles of conservation of mass, advective mass flux and Fick's law for diffusive mass flux

Audience: Both Grad & Undergrad

2. Apply the fundamental solution to the diffusion equation and use the principle of superposition to construct new solutions

Audience: Both Grad & Undergrad

3. Calculate the diffusivity given data of concentration distribution over time, and conversely, calculate the concentration distribution over time given the diffusivity

Audience: Both Grad & Undergrad

4. Calculate new solutions to advection-diffusion equation by modifying known solutions to include first-order reactions

Audience: Both Grad & Undergrad

5. Explain the differences between molecular diffusion, turbulent diffusion and shear flow dispersion

Audience: Both Grad & Undergrad

6. Apply models of mass transfer at boundaries to compute interfacial mass exchange between air-water and sediment-water interfaces

Audience: Both Grad & Undergrad

7. Evaluate the importance of mixing and transport processes in environmental processes and assess the utility of different types of solutions.

Audience: Graduate

**CIV ENGR 514 – COASTAL ENGINEERING**

2–3 credits.

The effect of natural forces associated with storms, hurricanes, and water-level variations on the coastal zone, and efforts made to combat these forces. Wave and storm-surge prediction, the change of waves as they approach shore, and wave forces on the shore; shore erosion and littoral drift; nearshore pollution in lakes and oceans; harbor, breakwater, and revetment design.

**Requisites:** CIV ENGR 311, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CIV ENGR 515 – HYDROCLIMATOLOGY FOR WATER RESOURCES MANAGEMENT**

3 credits.

Introduction to various strategies for integrating climate science into water resources, specifically addressing climatic influences on hydrologic variables, the prospects for prediction, and the implications on water management and development. Consider both space and time variability of hydrological processes in the context of sub-seasonal, seasonal, and climate change time-scales.

**Requisites:** CIV ENGR 415 and (STAT 224, 311, or 324), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify present to future and local to global hydroclimatic challenges

Audience: Both Grad & Undergrad

2. Perform diagnostics and attribution regarding the influence of climatic variables and phenomena on hydrologic variables

Audience: Both Grad & Undergrad

3. Design and verify probabilistic statistical and dynamical hydroclimatic forecasts

Audience: Both Grad & Undergrad

4. Explain the complexities of forecast communication

Audience: Both Grad & Undergrad

5. Explain the state and complexities of climate change science and modeling as it relates to water management

Audience: Both Grad & Undergrad

6. Write codes to perform statistical analyses

Audience: Graduate

7. Use multiple performance metrics and subsequently draw suitable conclusions

Audience: Graduate

**CIV ENGR 516 – HYDROLOGIC DATA ANALYSIS**

3 credits.

Introduction to probability and statistics and application to the analysis and modeling of real-world problems in hydrology, water resources engineering, and environmental data analysis.

**Requisites:** (MATH 221 or 217) and (STAT 311, 324, 340, MATH/STAT 309, 431, B M E 325, or E C E 331), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate data literacy in the context of temporal and geospatial hydrologic and environmental datasets

Audience: Both Grad & Undergrad

2. Employ modern statistical software to analyze and model hydrologic and other environmental phenomena

Audience: Both Grad & Undergrad

3. Detect trends, relationships, and patterns in temporal and spatial hydrologic and environmental datasets using regression, extreme value analyses, and other popular hydrologic statistical techniques

Audience: Both Grad & Undergrad

4. Derive and interpret predictions, parameters, confidence levels, uncertainties, and sensitivities in the context of common hydrologic applications such as rainfall/flood frequency, hydropower, streamflow forecasting, and water quality

Audience: Both Grad & Undergrad

5. Identify applications of data analysis methods to specific water resources engineering and other civil and environmental engineering applications

Audience: Undergraduate

6. Identify and apply appropriate statistical analysis methods to novel environmental datasets and problems

Audience: Graduate

### **CIV ENGR/G L E 520 – REACTIVE PROCESSES FOR SUSTAINABLE ENERGY AND RESOURCE PRODUCTION**

3 credits.

Key scientific concepts related to fossil and renewable energy resources. Apply the fundamentals of thermodynamics and chemical kinetics at solid interfaces to better understand the science behind using fossil and renewable energy resources. Evaluate the impacts of existing and emerging energy technologies on the environment.

**Requisites:** Senior standing, (MATH 211, 217, or 221), (CHEM 103, 104, or 109), and CIV ENGR 320, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify major issues pertaining to energy and environmental science and engineering, and evaluate the sustainability of technologies grounded in the science of material and energy balances and reaction kinetics

Audience: Both Grad & Undergrad

2. Derive and solve mathematical expressions to describe energy and material transformations

Audience: Both Grad & Undergrad

3. Critically evaluate and present their analysis and synthesis of literature in this area of energy and environment

Audience: Both Grad & Undergrad

4. Evaluate and propose novel technological solutions grounded in the fundamentals of thermodynamics of kinetics

Audience: Graduate

5. Analyze and defend emerging technologies in the area of energy and environment

Audience: Graduate

### **CIV ENGR 521 – MEMBRANE SCIENCE AND TECHNOLOGY**

3 credits.

Membrane-based technology used in water/wastewater treatment and seawater/brackish water desalination. Theoretical and practical knowledge of the membrane-based technology applied in a variety of water treatment processes. Specific topics such as membrane transport theory, types and principles of the membrane, process design and operation, and pre- and post-treatment requirements. Challenges and future development of membrane technology.

**Requisites:** (CIV ENGR 310 and 320), CBE 320, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe membrane separation mechanisms, membrane transport theory, concentration polarization, membrane types and modules, and membrane-based processes

Audience: Both Grad & Undergrad

2. Apply transport models for the calculation of membrane permeability, flux, and the extent of separation for various membrane separation systems

Audience: Both Grad & Undergrad

3. Determine the types of experimental data needed for calculation of membrane permeability parameters

Audience: Both Grad & Undergrad

4. Calculate membrane process performance and analyze membrane separation characteristics

Audience: Both Grad & Undergrad

5. Write Python codes for basic membrane process models and conduct calculations on energy consumption

Audience: Graduate

**CIV ENGR 522 – HAZARDOUS WASTE MANAGEMENT**

3 credits.

Environmental regulations, remediation site characterization, contaminant characterization, detailed engineering and management considerations related to the design and operation of hazardous waste remediation systems involving water pollution, air pollution, solid waste, and groundwater pollution.

**Requisites:** Senior standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Find regulatory requirements for hazardous waste management, remediation, and water quality, and incorporate them as constraints when developing design solutions

Audience: Both Grad & Undergrad

2. Develop technically feasible alternative solutions, compare the alternative solutions, and recommend one of the solutions

Audience: Both Grad & Undergrad

3. Create plans and specifications that allow construction of a portion of the recommended solution

Audience: Both Grad & Undergrad

4. Design experiments necessary to gather data and create information for use in design

Audience: Both Grad & Undergrad

5. Implement measures to consider risk, reliability, and uncertainty in hazardous waste management

Audience: Both Grad & Undergrad

6. Use the skills and expertise of multiple disciplines on a design team to address complex engineering problems

Audience: Both Grad & Undergrad

7. Apply sustainability principles and/or frameworks to addressing the challenge of energy and resource use in hazardous waste remediation

Audience: Both Grad & Undergrad

8. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of hazardous waste management

Audience: Both Grad & Undergrad

9. Manage a group of undergraduate students through the design process

Audience: Graduate

**CIV ENGR 525 – CASE STUDIES EXPLORING INFRASTRUCTURE SUSTAINABILITY AND CLIMATE CHANGE**

3 credits.

Critical evaluation of the sustainability of engineering projects, considering roles as designers, citizens, and collaborators in creating the infrastructure of the future. Consider the impact of climate change on sustainability, an urgent topic, through case studies in water supply, flood management, water quality, materials recovery and recycling, mobility, buildings and structures, and energy generation and distribution.

**Requisites:** Junior standing and (MATH 217 or 221), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a working knowledge of relevant sustainability principles and definitions

Audience: Both Grad & Undergrad

2. Critically evaluate the application and achievement of sustainability goals by real-world project case studies in the context of natural resource capacity and limits

Audience: Both Grad & Undergrad

3. Demonstrate how engineers can apply authentic sustainability goals into both large and small engineered works

Audience: Both Grad & Undergrad

4. Describe how engineers can act as citizens in developing sustainability policy as well as engineers designing a sustainable project

Audience: Both Grad & Undergrad

5. Critically evaluate the sufficiency of the sustainability goals that were defined for a project

Audience: Graduate

**CIV ENGR/G L E 530 – SEEPAGE AND SLOPES**

3 credits.

Practical aspects of seepage effects and ground water flow. Stability of natural and man-made slopes under various loading conditions. Design and construction of earth dams and embankments. Flow net and its use; wells; filters; total and effective stress methods of slope analysis; selection of pertinent soil parameters.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Characterize and classify slope failure

Audience: Both Grad & Undergrad

2. Identify stability risk factors in generalized slope design

Audience: Both Grad & Undergrad

3. Apply soil and rock mechanics and strength principles in the context of slope stability investigation and design

Audience: Both Grad & Undergrad

4. Determine strength parameters of soil materials under saturated and unsaturated conditions

Audience: Both Grad & Undergrad

5. Understand pore fluid pressure in underground environments and its effect on manmade structures integrated within the soil as well as the failure potential of differing geometries

Audience: Both Grad & Undergrad

6. Design slope remedial plans for earth structures subjected to varying physical properties, overburden and pore pressures, and restrictive geometries

Audience: Both Grad & Undergrad

7. Act as leaders of the small groups they have been assigned for the mini design project

Audience: Graduate

**CIV ENGR/G L E 532 – FOUNDATIONS**

3 credits.

Shallow and deep foundations. Analysis and design of footings, mats, piers and piles, and related fill and excavation operations. Consolidation settlement, time rate of settlement, stress distribution, elastic (immediate) settlement, load bearing capacity; methods to reduce settlements and increase shear strength; the selection of a foundation system.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Provide examples of when and where to consider shallow foundation systems in lieu of deep foundation systems and where stone columns or rammed aggregate piers are appropriate

Audience: Both Grad & Undergrad

2. Scope and Prepare a Foundation Investigation, including the equipment and standards used for subsurface exploration and the advantages/disadvantages therein

Audience: Both Grad & Undergrad

3. Calculate Allowable Bearing Pressure using (a) presumptive values, (b) the bearing capacity equation and (c) in situ approaches

Audience: Both Grad & Undergrad

4. Design a safe spread foundation system where structural capacity exceeds demand

Audience: Both Grad & Undergrad

5. Design a drilled shaft and a driven pile for axial loading considering vertical loading and a settlement estimate

Audience: Both Grad & Undergrad

6. Prepare a bid sheet, plan set, and set of specifications for a successful foundation design

Audience: Both Grad & Undergrad

7. Use soil moduli in the application of a laterally loaded deep-foundation system using an appropriate software program with a hand-calculated backcheck

Audience: Graduate

**CIV ENGR/G L E 534 – NONDESTRUCTIVE EVALUATION**

3 credits.

Practical aspects of nondestructive evaluation (NDE) techniques for identifying physical properties and damage within civil and geologic materials and structures. Data analyses and data science for wave propagation, arrival picking, distributed fiber optic sensing, and visualization tools such as augmented/mixed/virtual reality.

**Requisites:** E M A 201, PHYSICS 201, 207, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe multiple nondestructive evaluation (NDE) testing methods and their applications

Audience: Both Grad & Undergrad

2. Characterize flaws within Civil and Geological Engineering materials

Audience: Both Grad & Undergrad

3. Determine source locations of flaws or damage within a structure based on NDE data

Audience: Both Grad & Undergrad

4. Characterize both active and passive elastic wave observations in rock

Audience: Both Grad & Undergrad

5. Apply seismological principles to observed acoustic emissions for determining source locations of microcracks and infer the mechanism of failure

Audience: Both Grad & Undergrad

6. Analyze fiber optic distributed acoustic sensing (DAS) to find earthquake events within timeseries data

Audience: Both Grad & Undergrad

7. Apply artificial intelligence techniques to analyze fiber optic sensing data

Audience: Graduate

**CIV ENGR/G L E 535 – WIND ENERGY BALANCE-OF-PLANT DESIGN**

3 credits.

Wind Energy Development and Balance-of-Plant Design. Up-front coverage includes the science and mechanics of wind energy including turbine basics, wind resource assessment, energy production, and economic return. Balance-of-plant design aspects include site layout and micro-siting, foundation systems, collector systems and interconnection, site civil and electrical infrastructure, and structural tower analysis. Development includes environmental due diligence and permitting, stakeholder engagement, energy policy and markets, and levelized cost of energy (LCOE).

**Requisites:** PHYSICS 201, 207, 247, E M A 201, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Provide the necessary steps to evaluate the wind resource at a prospective site by characterizing and correlating (vertically and horizontally) the wind speed distribution functions

Audience: Both Grad & Undergrad

2. Translate (forward and backward) wind power: kinetic to mechanical to electrical and select appropriate wind turbine given site wind resource and turbine power curve

Audience: Both Grad & Undergrad

3. Demonstrate knowledge of the mechanics and principles of the tower load document, shallow and deep foundation designs, transportation logistics, geotechnical investigation and reporting, thermal resistivity and collection system design, and interconnection

Audience: Both Grad & Undergrad

4. Develop civil balance-of-plant engineering calculation design bases for access roads, stormwater control, turbine foundations, and crane pads and electrical balance-of-plant engineering calculation design bases for the collection system, grounding, substation design, and interconnection

Audience: Both Grad & Undergrad

5. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Both Grad & Undergrad

6. Describe the social, economic, and environmental dimensions of wind energy and identify potential tradeoffs and interrelationships among these dimensions at an intermediate level.

Audience: Both Grad & Undergrad

7. Prepare an economic Pro Forma for a successful distributed wind project and calculate Levelized Cost of Energy (LCOE) and environmental Life Cycle Assessments (LCAs) of green-house gasses, water use, and CO<sub>2</sub> per kW h.

Audience: Graduate

**CIV ENGR 545 – STEEL STRUCTURES II**

3 credits.

Composite construction; composite vs. non-composite behavior; shored vs. unshored construction; stability of frames; elastic analysis of frames including second order effects; strength of members subject to combined flexure and axial compression; plate girders; vertical flange buckling; flexural and shear strength; flexure and shear interaction; stiffener requirements.

**Requisites:** CIV ENGR 445, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Check, proportion, and design structural steel built-up plate girders to satisfy the requirements of the AISC Specification for Structural Steel Buildings using the Load and Resistance Factor Design method

Audience: Both Grad & Undergrad

2. Demonstrate a working knowledge of the Direct Analysis Method and the Advanced Analysis Method in the AISC Specification for Structural Steel Buildings to obtain the capacities of structural steel systems accounting for second order effects, geometric imperfections, and residual stresses

Audience: Both Grad & Undergrad

3. Check, proportion, and design for strength and stability limit states of structural steel braced and moment frames to satisfy the requirements of the AISC Specification for Structural Steel Buildings using the Load and Resistance Factor Design method

Audience: Both Grad & Undergrad

4. Check, proportion, and design composite structural steel and concrete beams to satisfy the requirements of the AISC Specification for Structural Steel Buildings using the Load and Resistance Factor Design method

Audience: Both Grad & Undergrad

5. Check and proportion a steel member subjected to an advanced topic loading which may include torsion, seismic, fire, or advanced topic scenario which may include slender members or connections, or another acceptable advanced topic

Audience: Both Grad & Undergrad

6. Critique current research and issues discussed in the professional literature of the discipline related to course topics

Audience: Graduate

**CIV ENGR 547 – CONCRETE STRUCTURES II**

3 credits.

Deflections under short duration and sustained loads; compression members with emphasis on stability and secondary bending moments; two-way slab systems; prestressed concrete including prestress losses; design of shear walls, special topics in strut and tie modelling, compression field theory and design for torsion may be covered; flexure analysis; design of sections; and shear strength.

**Requisites:** CIV ENGR 447, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Compute required strengths for flexure, shear, and axial load using the load factors and load combinations specified by current building code requirements for structural concrete

Audience: Both Grad & Undergrad

2. Compute bar development lengths of straight and hooked bars to determine bar cutoff locations in reinforced concrete beams and slabs

Audience: Both Grad & Undergrad

3. Compute immediate and long-term deflections under sustained loads for beams and slabs of reinforced concrete

Audience: Both Grad & Undergrad

4. Perform a structural analysis and design of slab structural systems of reinforced concrete including flat plates, flat slabs, and two-way slabs

Audience: Both Grad & Undergrad

5. Develop technically feasible alternative solutions to a problem, compare the alternative solutions, and recommend one of the solutions as the preferred option

Audience: Graduate

6. Compute required and design strengths for flexure, shear, and axial load for reinforced concrete members using available structural analysis and design software

Audience: Graduate

**CIV ENGR/ENVIR ST/LAND ARC 556 – REMOTE SENSING  
DIGITAL IMAGE PROCESSING**

3 credits.

Techniques of enhancement and quantification of remote sensing imagery. Emphasis on processing and analyzing data gathered by airborne and satellite sensors. Techniques to quantitatively analyze data from photography, electro-optical scanners, satellite systems, and radar and passive microwave systems. Applications to: agriculture and forestry, geology and soils, water quality, and urban and regional planning.

**Requisites:** LAND ARC/ENVIR ST/F&W ECOL/G L E/GEOG/GEOSCI 371, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CIV ENGR/A A E/ENVIR ST/URB R PL 561 – ENERGY MARKETS**

3 credits.

Energy resources are an essential element of the world's business, political, technical and environmental landscape. Analytic tools provided by the discipline of economics expands our understanding of this critical issue. Energy supply markets reviewed include both fossil fuels and renewable resources. Energy demand sectors include residential, commercial, industrial and transportation. Electricity represents an intermediate energy market. The interactions among these markets participants indicate how scarce resources are allocated among competing needs in the world economy.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CIV ENGR 570 – CONNECTED AND AUTOMATED  
TRANSPORTATION SYSTEMS**

3 credits.

Connected vehicle and automated vehicle technologies; comprehensive studies of sensing, trajectory planning, and vehicle control within the context of the automated vehicle; consideration of pertinent development and technologies in this field.

**Requisites:** CIV ENGR 370 and (STAT 324, E C E 331, STAT/MATH 431, or STAT 311), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate using connected vehicle (CV) and automated vehicle (AV) technology terms and concepts

Audience: Both Grad & Undergrad

2. Design operations of traffic containing connected autonomous vehicles (CAVs)

Audience: Both Grad & Undergrad

3. Incorporate CAVs in planning

Audience: Both Grad & Undergrad

4. Identify policy issues related to connected and automated vehicles

Audience: Both Grad & Undergrad

5. Demonstrate an advanced understanding of the underlying traffic principles and CAVs' implications in real-world scenarios

Audience: Graduate

6. Quantitatively analyze CAV models based on real trajectory data

Audience: Graduate

**CIV ENGR 571 – URBAN TRANSPORTATION PLANNING**

3 credits.

Principles of planning, evaluation, selection, adoption, financing, and implementation of alternative urban transportation systems; formulation of community goals and objectives, inventory of existing conditions; transportation modeling--trip generation, distribution, modal choice, assignment, technological characteristics and operation of modern transit and other movement systems.

**Requisites:** CIV ENGR 370, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe principles of planning, evaluation, selection, adoption, financing, and alternative urban transportation systems

Audience: Both Grad & Undergrad

2. Formulate community goals and objectives, inventory of existing conditions

Audience: Both Grad & Undergrad

3. Implement algorithms of transportation modeling--trip generation, distribution, and modal choice

Audience: Both Grad & Undergrad

4. Describe technological characteristics and operation of modern transit and other movement systems

Audience: Graduate

**CIV ENGR 572 – TRANSPORTATION OPERATIONS**

3 credits.

Introduction to assessment tools of transportation operations and fundamental concepts in flow theory, flow control, observation and measurement techniques, and scheduled transportation. Applied to various modes of transportation. Emphasis on logic rather than recipe-oriented practice.

**Requisites:** CIV ENGR 370 and (E C E 331, STAT/MATH 431, or STAT 311), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze operational characteristics of transportation systems using graphical tools (time-space diagram and cumulative curve)

Audience: Both Grad & Undergrad

2. Analyze vehicular traffic flow using advanced traffic models in different analysis scales: microscopic (vehicle-level), macroscopic (aggregate-level), and network-level scales

Audience: Both Grad & Undergrad

3. Characterize uncertainty in transportation systems

Audience: Both Grad & Undergrad

4. Analyze transportation data based on probability and statistics theories

Audience: Both Grad & Undergrad

5. Design traffic control strategies considering various uncertainties in traffic flow

Audience: Graduate

**CIV ENGR 573 – GEOMETRIC DESIGN OF TRANSPORT FACILITIES**

3 credits.

Problems in ground transportation facility design; generation, capacity, location and design; rural and urban at-grade intersection design; grade separations; interchanges; parking lots and terminals.

**Requisites:** CIV ENGR 370, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and characterize the key attributes of the vehicles, operators, and highway systems that affect geometric design  
Audience: Both Grad & Undergrad

2. Describe human behavior and accommodation of driver attributes in design  
Audience: Both Grad & Undergrad

3. Describe highway design objectives, constraints, and controlling factors

Audience: Both Grad & Undergrad

4. Identify the basic parameters and constraints for the design of rural and urban alignments, vertical profiles, cross sections, and intersections  
Audience: Both Grad & Undergrad

5. Design a highway from terrain to complete highway in a 3D computer-aided design package

Audience: Both Grad & Undergrad

6. Use design theory concepts and highway design knowledge in a real-world design project

Audience: Both Grad & Undergrad

7. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of highway design

Audience: Both Grad & Undergrad

8. Apply sustainability principles and/or frameworks to addressing the challenge of building highways in urban and rural areas

Audience: Both Grad & Undergrad

9. Describe highway design theory concepts regarding your area of research

Audience: Graduate

**CIV ENGR 574 – TRAFFIC CONTROL**

3 credits.

Traffic data collection studies; measures of effectiveness and evaluation of traffic system performance; design and application of traffic control devices; design of traffic signal systems; operational controls and traffic management strategies.

**Requisites:** CIV ENGR 370, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CIV ENGR 575 – ADVANCED HIGHWAY MATERIALS AND CONSTRUCTION**

3 credits.

Soils, soil stabilization, aggregates, bituminous materials and mixtures, general highway materials and construction of rigid and flexible pavements.

**Requisites:** E M A/CIV ENGR 395, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use knowledge of highway materials behavior to select and specify materials used for highway construction  
Audience: Both Grad & Undergrad

2. Interpret results of standardized and advanced testing of highway materials

Audience: Both Grad & Undergrad

3. Use material properties to optimize pavement layer thicknesses according to commonly used design methodologies

Audience: Both Grad & Undergrad

4. Identify and describe requirements for inspection and Quality Control/Quality Assurance of highway materials

Audience: Graduate

**CIV ENGR 576 – ADVANCED PAVEMENT DESIGN**

3 credits.

Covers the principles of stress and strain analyses in typical highway pavement structures due to loading from traffic and climate. Also covers the most commonly used analysis and design procedures/software to determine thickness of pavement layers and prediction of performance.

**Requisites:** E M A/CIV ENGR 395, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use knowledge of mechanics of materials and structural analysis of pavements to determine stresses and strains in highway pavements caused by traffic and climate changes  
Audience: Both Grad & Undergrad

2. Use knowledge of highway materials behavior for selecting materials to meet damage resistance requirements and estimate service life of pavements  
Audience: Both Grad & Undergrad

3. Conduct life cycle cost analysis of pavements and provide methodologies for maintenance and rehabilitation of pavements  
Audience: Both Grad & Undergrad

4. Use best practices to monitor pavement surface and structural conditions to enhance pavement service life  
Audience: Graduate

**CIV ENGR 577 – TRAFFIC FLOW THEORY**

3 credits.

Comprehensive overview of vehicular traffic flow theory and its use in evaluating congestion and determining control strategies. Starting from the basic concepts defining traffic streams, existing theories are presented at different scales, including car-following (microsimulation) models, lane-changing models, cellular automata models, the kinematic wave model, and macroscopic/network fundamental diagram. Techniques for empirical analysis. Connected and automated vehicles.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze vehicular traffic flow using advanced models and numerical techniques in different analysis scales: microscopic (vehicle-level), mesoscopic (platoon-level), macroscopic (aggregate-level), and network-level scales  
Audience: Graduate

2. Design traffic control strategies to improve efficiency and/or stability of traffic flow  
Audience: Graduate

3. Design traffic control strategies considering various uncertainties in traffic flow  
Audience: Graduate

**CIV ENGR 578 – SENIOR CAPSTONE DESIGN**

4 credits.

The application of theoretically and academically acquired knowledge to a civil and environmental engineering problem in as near "real-world" as possible.

**Requisites:** Declared in Civil Engineering BS or Environmental Engineering BS and (CIV ENGR 414, 426, 427, 428, 442, 445, 447, 522, 573, 574, 576, G L E/CIV ENGR 530, 532, or 535)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate and apply the knowledge gained in prior coursework into a simulated real-world design environment  
Audience: Undergraduate

2. Use open-ended problem-solving skills  
Audience: Undergraduate

3. Work effectively in a multidisciplinary team environment  
Audience: Undergraduate

4. Use oral and written communication skills to articulate proposed and completed work  
Audience: Undergraduate

5. Explain basic concepts in management, business, and public policy  
Audience: Undergraduate

6. Explain the importance of professional licensure  
Audience: Undergraduate

7. Identify common failure mechanisms of a component, process, or system and their causes and prevention  
Audience: Undergraduate

**CIV ENGR 579 – SEMINAR-TRANSPORTATION ENGINEERING**

1 credit.

Current problems and research developments in transportation, highways, traffic engineering, and transportation planning and systems analysis.

**Requisites:** Senior standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate awareness of historic and/or current advances in transportation engineering research, practice, policy and/or professional conduct  
Audience: Both Grad & Undergrad

2. Connect the topics of this course with their graduate research work  
Audience: Graduate

**CIV ENGR 609 – SPECIAL TOPICS IN WATER CHEMISTRY**

1-3 credits.

Topics vary.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in environmental chemistry

Audience: Both Grad &amp; Undergrad

2. Use appropriate tools, processes, and/or software to apply key theories, concepts, and methods in environmental chemistry

Audience: Undergraduate

3. Use appropriate tools, processes, and/or software to apply, analyze, and/or evaluate advanced theories, concepts, or methods in environmental chemistry

Audience: Graduate

**CIV ENGR/G L E 612 – ECOHYDROLOGY**

3 credits.

Mutual interactions between the hydrologic cycle and ecosystems, including hydrologic mechanisms that underlie ecological patterns and processes, movement of water and energy through the soil-plant-atmosphere continuum, application and development of models for simulating ecohydrologic processes, and case studies on ecohydrologic function and ecosystem services of varied environments.

**Requisites:** CIV ENGR 311, GEOSCI/G L E 627, graduate/professional standing, or member of Engineering Guest Students**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Identify, describe, and quantify ecohydrologic processes

Audience: Both Grad &amp; Undergrad

2. Build and use models for simulating hydrologic processes, ecologic structure and vegetation composition

Audience: Both Grad &amp; Undergrad

3. Work effectively and collaborate in groups to communicate ecohydrologic concepts

Audience: Both Grad &amp; Undergrad

4. Critically evaluate the ecohydrologic literature

Audience: Graduate

**CIV ENGR 618 – SPECIAL TOPICS IN HYDRAULICS AND FLUID MECHANICS**

1-3 credits.

Topics vary.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in hydraulics and fluid mechanics

Audience: Both Grad &amp; Undergrad

2. Use appropriate tools, processes, and/or software to apply key theories, concepts, and methods in hydraulics and fluid mechanics

Audience: Undergraduate

3. Use appropriate tools, processes, and/or software to apply, analyze, and/or evaluate advanced theories, concepts, or methods in hydraulics and fluid mechanics

Audience: Graduate

**CIV ENGR 619 – SPECIAL TOPICS IN HYDROLOGY**

1-3 credits.

Topics vary.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in hydrology

Audience: Both Grad &amp; Undergrad

2. Use appropriate tools, processes, and/or software to apply key theories, concepts, and methods in hydrology

Audience: Undergraduate

3. Use appropriate tools, processes, and/or software to apply, analyze, and/or evaluate advanced theories, concepts, or methods in hydrology

Audience: Graduate

**CIV ENGR 621 – BIOLOGICAL TREATMENT PROCESS MODELING**

1 credit.

Modeling for wastewater treatment plant evaluation and design using a commercial modeling program. Focus on biological treatment processes and the kinetics of biological growth and substrate degradation. Set up and calibrate model, configure and size plant processes, and explore the impact of configuration and kinetic parameters on treatment efficiency. Evaluate impacts and tradeoffs for advanced treatment scenarios with regards to chemical use, energy needs, sludge production, and plant footprint.

**Requisites:** CIV ENGR 426, 721, or 821

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Configure wastewater treatment plant processes and input data utilizing a commercial modeling program for design

Audience: Both Grad & Undergrad

2. Define the wastewater characterization requirements for calibrating a model for a given treatment scenario

Audience: Both Grad & Undergrad

3. Utilize models for planning, design, and operations problem statements

Audience: Both Grad & Undergrad

4. Utilize a model to evaluate alternatives for treatment considering carbon availability, chemical use, energy requirements, and sludge production

Audience: Graduate

5. Analyze possibilities for new and innovative control strategies

Audience: Graduate

6. Determine the most significant factors affecting plant design and use the model to do a sensitivity analysis for changes in these factors

Audience: Graduate

**CIV ENGR 629 – SPECIAL TOPICS IN ENVIRONMENTAL ENGINEERING**

1-3 credits.

Topics vary.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in environmental engineering

Audience: Both Grad & Undergrad

2. Use appropriate tools, processes, and/or software to apply key theories, concepts, and methods in environmental engineering

Audience: Undergraduate

3. Use appropriate tools, processes, and/or software to apply, analyze, and/or evaluate advanced theories, concepts, or methods in environmental engineering

Audience: Graduate

**CIV ENGR/M&ENVTOX/SOIL SCI 631 – TOXICANTS IN THE ENVIRONMENT: SOURCES, DISTRIBUTION, FATE, & EFFECTS**

3 credits.

Nature, sources, distribution, and fate of contaminants in air, water, soil, and food and potential for harmful exposure.

**Requisites:** (CHEM 104, 109, or 116) and (MATH 211, 217, or 221) and (PHYSICS 104, 202, 208, or 248), or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how the physicochemical properties of an organic chemical and equilibrium and kinetic principles influence the distribution of the chemical in the environment

Audience: Both Grad & Undergrad

2. Estimate the physico-chemical properties of organic compounds using linear free energy relationships

Audience: Both Grad & Undergrad

3. Predict the behavior of hazardous organic chemicals in the environment

Audience: Both Grad & Undergrad

4. Derive and use equilibrium and kinetic box models for determining the fate of organic pollutants in the environment

Audience: Graduate

**CIV ENGR/G L E 635 – REMEDIATION GEOTECHNICS**

3 credits.

Geotechnical practice for remediation of sites containing contaminated soil and groundwater is discussed. Topics include non-invasive and invasive subsurface exploration techniques, methods to monitor for the presence of contaminants in the saturated and unsaturated zones, and geotechnically-oriented remedial action technologies.

**Requisites:** CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**CIV ENGR 639 – SPECIAL TOPICS IN GEOTECHNICAL ENGINEERING**

1-4 credits.

Topics vary.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in geotechnical engineering

Audience: Both Grad & Undergrad

2. Use appropriate tools, processes, and/or software to apply key theories, concepts, and methods in geotechnical engineering

Audience: Undergraduate

3. Use appropriate tools, processes, and/or software to apply, analyze, and/or evaluate advanced theories, concepts, or methods in geotechnical engineering

Audience: Graduate

**CIV ENGR 643 – PRESTRESSED CONCRETE**

3 credits.

Analysis and design of prestressed concrete members, including working stress and ultimate strength analysis and design for flexure; shear design; prestress losses, deflections, and composite beams. Knowledge of Concrete Structures [such as CIV ENGR 447] required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify, formulate, and solve engineering problems

Audience: Graduate

2. Use the techniques, skills, and modern engineering tools necessary for engineering practice

Audience: Graduate

3. Determine the required number and layout of prestressing strands in a prestressed concrete beam based on allowable stresses

Audience: Graduate

4. Analyze and design a prestressed or partially prestressed concrete beam for ultimate flexural strength

Audience: Graduate

5. Design a prestressed concrete beam for shear

Audience: Graduate

6. Estimate immediate and time-dependent prestress losses

Audience: Graduate

7. Estimate short-term and time-dependent deflections of a prestressed concrete beam

Audience: Graduate

**CIV ENGR 647 – CONCRETE STRUCTURES III**

3 credits.

Inelastic behavior and modeling of reinforced concrete members, with emphasis on response to earthquake-type loading. Knowledge of concrete structures [such as CIV ENGR 447] required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify, formulate, and solve engineering problems

Audience: Graduate

2. Use the techniques, skills, and modern engineering tools necessary for engineering practice

Audience: Graduate

3. Calculate the moment versus curvature response of reinforced concrete flexural members with or without axial force

Audience: Graduate

4. Design reinforced concrete members for combined flexure, shear and torsion under gravity-type loading

Audience: Graduate

5. Describe the influence of various design/loading parameters on the flexure and shear behavior of reinforced concrete members when subjected to monotonic and reversed cyclic loading

Audience: Graduate

6. Design reinforced concrete beams, columns, joints, and structural walls for earthquake motions

Audience: Graduate

**CIV ENGR 649 – SPECIAL TOPICS IN STRUCTURAL ENGINEERING**

1-3 credits.

Topics vary.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in structural engineering

Audience: Both Grad & Undergrad

2. Use appropriate tools, processes, and/or software to apply key theories, concepts, and methods in structural engineering

Audience: Undergraduate

3. Use appropriate tools, processes, and/or software to apply, analyze, and/or evaluate advanced theories, concepts, or methods in structural engineering

Audience: Graduate

**CIV ENGR 669 – SPECIAL TOPICS IN CONSTRUCTION ENGINEERING AND MANAGEMENT**

1-4 credits.

Topics vary.

**Requisites:** Senior standing or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in construction engineering and management

Audience: Both Grad & Undergrad

2. Use appropriate tools, processes, and/or software to apply key theories, concepts, and methods in construction engineering and management

Audience: Undergraduate

3. Use appropriate tools, processes, and/or software to apply, analyze, and/or evaluate advanced theories, concepts, or methods in construction engineering and management

Audience: Graduate

**CIV ENGR 678 – ADVANCED TRAFFIC MODELING AND COMPUTER SIMULATION**

3 credits.

Theoretical and practical perspectives of traffic flow modeling with a focus on micro-simulation. Simulation software, such as CORSIM, VISSIM, and PARAMICS. Develop and calibrate a set of base models of existing conditions, extend the models to include design alternatives (generally using traffic demands projected for future years), and then generate conclusions on the basis of the modeling results.

**Requisites:** CIV ENGR 370, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply theoretical and practical perspectives of traffic flow modeling, with a focus on micro-simulation analytical methods

Audience: Both Grad & Undergrad

2. Use proficiently at least one major simulation software package for traffic flow modeling

Audience: Both Grad & Undergrad

3. Apply advanced vehicle-based microscopic traffic flow models and emerging theoretical concepts to analyze complex multi-modal conditions

Audience: Graduate

**CIV ENGR 679 – SPECIAL TOPICS IN TRANSPORTATION AND CITY PLANNING**

3 credits.

Topics vary.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in transportation and city planning

Audience: Both Grad &amp; Undergrad

2. Use appropriate tools, processes, and/or software to apply key theories, concepts, and methods in transportation and city planning

Audience: Undergraduate

3. Use appropriate tools, processes, and/or software to apply, analyze, and/or evaluate advanced theories, concepts, or methods in transportation and city planning

Audience: Graduate

**CIV ENGR/PUB AFFR 694 – MANAGEMENT OF CIVIL INFRASTRUCTURE SYSTEMS**

3 credits.

Comprehensive systems approach to civil infrastructure and asset management with emphasis on transportation facilities. Social, political, economic factors that influence transportation planning, design, construction, maintenance and operation. Needs assessment, information management, performance measurement, life cycle cost and benefits analysis, prioritization and optimization, budgeting and finance.

**Requisites:** CIV ENGR 494, or graduate/professional standing, or member of Engineering Guest Students**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**CIV ENGR 699 – INDEPENDENT STUDY**

1-9 credits.

Under faculty supervision.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Conduct and report on independent civil or environmental engineering research

Audience: Both Grad &amp; Undergrad

2. Appropriately use online and library resources

Audience: Both Grad &amp; Undergrad

3. Communicate research clearly to other researchers in their field of study

Audience: Graduate

**CIV ENGR/ATM OCN 701 – THE CHEMISTRY OF AIR POLLUTION**

2 credits.

Covers background and modern research methods for the application of chemical analysis tools to understanding of the origin, composition, and the chemical transformations of pollutants that occur in the atmosphere. Emphasis will be directed at the pollutants impacting human health, climate change, and ecosystem degradation. Approximately half of the course materials will be taken from the scientific literature and will provide the opportunity to advance skills in the critical reading of journal articles. The course is directed at graduate students conducting research and interested in air pollution and environmental chemistry. Gain experiences in presenting scientific research methods and results related to course materials.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

### **CIV ENGR 702 – GRADUATE COOPERATIVE EDUCATION PROGRAM**

1-2 credits.

Work experience that combines classroom theory with practical knowledge of operations to provide a background on which to develop and enhance a professional career. The work experience is tailored for MS students from within the U.S. as well as eligible international students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Graduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Graduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Graduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Graduate

### **CIV ENGR 703 – ENVIRONMENTAL GEOCHEMISTRY**

3 credits.

A quantitative treatment of chemical and biological processes controlling the speciation and partitioning of inorganic compounds in natural waters. Particular attention will be paid to heterogeneous reaction mechanisms, and kinetics controlling inorganic compounds in aqueous environments. Discuss in-situ techniques for measurement of environmental reactions. For those interested in environmental chemistry, chemistry, limnology, geology, environmental microbiology, soil science, and environmental modeling.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Describe the relationship of environmental reactions to kinetic and thermodynamic parameters

Audience: Graduate

2. Identify important biogeochemical reactions controlling nutrient and contaminant dynamics in aqueous systems

Audience: Graduate

3. Recognize factors controlling solid-phase mineralogy and reactivity with respect to engineered systems

Audience: Graduate

4. Incorporate biological reactions into a geochemical model of environmental systems

Audience: Graduate

**CIV ENGR 704 – ENVIRONMENTAL CHEMICAL KINETICS**

3 credits.

Fundamental molecular processes that govern the fate and transformation of organic contaminants in natural environmental systems and engineered treatment processes. Emphasizes the kinetics describing these processes and focuses on transformation mechanisms of organic contaminants in aquatic systems. Specific topics include partitioning between air, water, and solids; chemical kinetics; substitution, hydrolysis, and redox reactions; oxidation reactions encountered in ozone and chlorine-based disinfection systems; and photochemical and biological transformations. Knowledge of water chemistry [such as CIV ENGR 500] required.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**Learning Outcomes:** 1. Predict the environmental fate of organic compounds based on their structure

Audience: Graduate

2. Estimate partitioning between air, water, organic phases, particles, and biota

Audience: Graduate

3. Use the steady-state assumption to estimate reaction half-lives

Audience: Graduate

4. Predict the kinetics and mechanisms of nucleophilic attack and hydrolysis reactions

Audience: Graduate

5. Describe how temperature and ionic strength affect rate constants

Audience: Graduate

6. Describe direct and indirect photolysis reactions

Audience: Graduate

**CIV ENGR/ENVIR ST/URB R PL 717 – WATER RESOURCES MANAGEMENT PRACTICUM PLANNING SEMINAR I**

1 credit.

The first of two seminars for planning the activities of the practicum.

**Requisites:** Declared in Water Resources Management MS or Doctoral Minor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**CIV ENGR/ENVIR ST/URB R PL 718 – WATER RESOURCES MANAGEMENT PRACTICUM PLANNING SEMINAR II**

2 credits.

The second of two seminars for planning the field work, analysis, and reporting of the practicum.

**Requisites:** Declared in Water Resources Management MS or Doctoral Minor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**CIV ENGR/ENVIR ST/URB R PL 719 – WATER RESOURCES MANAGEMENT SUMMER PRACTICUM**

4 credits.

Interdisciplinary team of students and staff working with agency personnel, citizen groups, and/or private sector representatives on the analysis of a contemporary, problem-oriented water resource issue. Physical, biological, economic and social aspects of the issue analyzed. Comprehensive written report results, practicum's findings and management recommendations.

**Requisites:** URB R PL/CIV ENGR/ENVIR ST 718**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

**CIV ENGR 721 – BIOLOGICAL PRINCIPLES OF ENVIRONMENTAL ENGINEERING**

3 credits.

Biological principles important to diagnosing and controlling pollution through environmental engineering applications such as fate and transport of contaminants in the environment, eutrophication, water treatment for human consumption, biological waste treatment for pollution control and bioenergy generation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe how microorganisms gain energy from organic and inorganic contaminants

Audience: Graduate

2. Perform calculations to determine whether a specific chemical reaction would support microbial growth

Audience: Graduate

3. Perform calculations to quantitatively estimate the rates at which microorganisms transform chemical contaminants

Audience: Graduate

4. Describe different types of waterborne pathogens

Audience: Graduate

5. Describe how microorganisms are used to produce biofuels

Audience: Graduate

**CIV ENGR 722 – CHEMICAL PRINCIPLES OF ENVIRONMENTAL ENGINEERING**

3 credits.

Principles of general, physical, equilibrium, colloid and biochemistry applied to environmental engineering processes such as evaluating environmental quality and treating water, air and soil to meet environmental standards.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Use basic principles of general, physical, equilibrium, colloid, and biological chemistry to solve water chemistry problems related to environmental engineering

Audience: Graduate

2. Use conservation of mass and energy principles to solve water chemistry problems related to environmental engineering

Audience: Graduate

3. Describe the risks to public health and welfare associated with chemical contaminants and greenhouse gases and explain how these risks are used to develop environmental policies and regulations

Audience: Graduate

4. Describe the basic biochemical reactions important to environmental engineering (aerobic, anoxic, anaerobic, photosynthetic), and estimate the enthalpy of reactions when the formulation of reactants and products are known

Audience: Graduate

5. Explain the roles of nutrients and organic carbon in water quality, and their relative concentrations in oligotrophic waters, eutrophic waters, and typical wastes; discuss anthropogenic sources of nutrients and policies for their control

Audience: Graduate

6. Explain connections between environmental chemistry principles and processes used in environmental engineering

Audience: Graduate

7. Review viable options and complete the preliminary design of a solution to an identified environmental engineering problem using at least two areas of environmental chemistry

Audience: Graduate

**CIV ENGR 723 – ENERGY PRINCIPLES OF ENVIRONMENTAL ENGINEERING**

3 credits.

Principles of energy applied to environmental engineering such as energy resources, sustainability concerns, work and power, thermodynamics, system and process efficiencies, energy production from waste, heat transfer, and heating and cooling of systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the sources and limitations of renewable and non-renewable energy

Audience: Graduate

2. Describe options to minimize the use of energy and maximize its production from renewable resources

Audience: Graduate

3. Describe important environmental consequences of energy production and consumption

Audience: Graduate

4. Prepare process flow diagrams and perform relevant energy balance calculations for an environmental engineering system or process

Audience: Graduate

5. Estimate the performance efficiency of a process or component from thermodynamic principles and size a pump, compressor, or other machine based on these principles

Audience: Graduate

6. Estimate heat transfer, heat losses, and heating demand for a system or process

Audience: Graduate

7. Using at least two energy principles, complete a preliminary design of an environmental engineering system, process, or component to meet stated needs

Audience: Graduate

**CIV ENGR 729 – ENVIRONMENTAL SUSTAINABILITY TOOLS**

3 credits.

Environmental impact must be quantified systematically and rigorously in order to inform decision making, process improvement, and policy. Life cycle assessment will be utilized in a project-based framework to evaluate the environmental impacts of products and process across multiple environmental impact categories.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define a question to answer using life cycle assessment

Audience: Graduate

2. Determine the relevant goal and scope, and boundaries for a life cycle assessment

Audience: Graduate

3. Determine and quantify the relevant inputs and outputs of a product system or process

Audience: Graduate

4. Determine the most relevant functional unit for a life cycle assessment

Audience: Graduate

5. Conduct a life cycle assessment on a product or process using appropriate software

Audience: Graduate

6. Interpret a life cycle assessment on a product or process in order to evaluate the environmental sustainability of the system

Audience: Graduate

7. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Graduate

8. Describe the social, economic, and environmental dimensions of selected term project topic and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Graduate

**CIV ENGR/G L E 730 – ENGINEERING PROPERTIES OF SOILS**

3 credits.

Determination and interpretation of soil properties for engineering purposes; physio-chemical properties of soil-water systems, permeability and capillarity, compression characteristics of soils, measurement of soil properties in the triaxial test, properties of frozen soils and permafrost.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Describe the physicochemical characteristics of soils and their importance to the engineering behavior of soils

Audience: Graduate

2. Define the factors which control the hydraulic and mechanical behavior of soils

Audience: Graduate

3. Evaluate how engineering classification of soils capture fundamental responses

Audience: Graduate

4. Run and interpret laboratory tests used to characterize how physical and chemical properties of particles affect the behavior of soil masses, including hydraulic properties and the stiffness and shear strength properties

Audience: Graduate

5. Explain models that describe the behavior and properties of soils

Audience: Graduate

**CIV ENGR/G L E 732 – UNSATURATED SOIL GEOENGINEERING**

3 credits.

Engineering principles of unsaturated soils as they apply to geotechnical and geoenvironmental systems. Effect of soil water suction and stress on hydraulic conductivity, shear strength, and compressibility of soils in the context of geoengineering problems of flow and stability. Knowledge of Soil Mechanics [such as CIV ENGR/G L E 330] is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define properties of unsaturated soils

Audience: Graduate

2. Use principles of interfacial physics, hydrology, and soil mechanics to interpret unsaturated soil behavior

Audience: Graduate

3. Use results from measurement methods to characterize unsaturated soil properties

Audience: Graduate

**CIV ENGR/G L E 733 – PHYSICOCHEMICAL BASIS OF SOIL BEHAVIOR**

3 credits.

Applications of physiochemical, mineralogical and environmental considerations to the engineering behavior of soils. Soil composition, formation, fabric, pore fluid chemistry and interaction of phases. The particulate nature of soils and the fabric-engineering property (volume change, strength, deformation and conduction) relationships. Knowledge of Soil Mechanics [such as CIV ENGR/G L E 330] is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Characterize properties of soils that consist partly or wholly of clay

Audience: Graduate

2. Define the composition and fabric of natural soils, their surface and pore-fluid chemistry, and the physical and chemical factors that govern fine-grained soil behavior

Audience: Graduate

**CIV ENGR 744 – STRUCTURAL DYNAMICS AND EARTHQUAKE ENGINEERING**

4 credits.

Dynamic analysis and behavior of structures; basic principles and application of engineering seismology; determination of earthquake-induced loads for earthquake-resistant design; and analysis and design of reinforced concrete and steel buildings subjected to ground motion. Knowledge of analysis and design of reinforced concrete and structural steel buildings [such as CIV ENGR 440, 445, and 447] required.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Estimate the dynamic response of single- and multi-degree of freedom systems subjected to arbitrary loads

Audience: Graduate

2. Develop closed-formed and numerical solutions to compute the time-history response of single- and multi-degree of freedom systems

Audience: Graduate

3. Estimate the earthquake-induced ground motions that can be expected to occur at a given site

Audience: Graduate

4. Estimate the response of single- and multi-story buildings subjected to earthquakes

Audience: Graduate

5. Given a site and predicted ground motions, establish the layout of the structure to resist earthquake-induced loads and displacements

Audience: Graduate

6. Determine the response of the structure to design earthquake ground motions by computing displacements, forces, stresses, deformations, and estimating damage

Audience: Graduate

**CIV ENGR 749 – SPECIAL TOPICS IN STRUCTURAL ENGINEERING**

1-4 credits.

Advanced topics of special interest to graduate students in structural engineering.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2022**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in structural engineering

Audience: Graduate

2. Use appropriate tools, processes, and/or software to apply, analyze, and/or evaluate advanced theories, concepts, or methods in structural engineering

Audience: Graduate

**CIV ENGR 760 – RESEARCH METHODS IN CONSTRUCTION ENGINEERING MANAGEMENT**

1 credit.

Present research in Construction Engineering Management, discuss ideas and results. Receive feedback on research and presentation style.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Present and discuss research in Construction Engineering Management

Audience: Graduate

2. Formulate problem statement and methodology

Audience: Graduate

3. Give and receive constructive feedback

Audience: Graduate

**CIV ENGR/E M A/M E 775 – TURBULENT HEAT AND MOMENTUM TRANSFER**

3 credits.

Stochastic methods in turbulent heat and momentum transfer; fully developed turbulence; numerical methods including model applications to boundary layers, reacting flows, mass transfer, and unsteady flows; linear and non-linear stability and transition; emphasis on applications of interest to Mechanical, Aerospace, and Environmental Engineers. Knowledge of fluid mechanics [such as M E 363 or CBE 320] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the physics and mathematics of turbulence theory and modeling  
Audience: Graduate

2. Describe general features of turbulence  
Audience: Graduate

3. Use analysis tools to solve problems and process data related to turbulence  
Audience: Graduate

4. Use turbulence concepts to understand and explain turbulent behavior in more complex systems  
Audience: Graduate

**CIV ENGR 790 – MASTER'S RESEARCH OR THESIS**

1-9 credits.

Under faculty supervision.

**Requisites:** Declared in a Civil and Environmental Engineering or Environmental Chemistry and Technology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Integrate knowledge from multiple disciplines to address a civil or environmental engineering research question  
Audience: Graduate

2. Conduct a research study using experimental, computational, and/or theoretical approaches  
Audience: Graduate

3. Communicate research results in written and verbal formats  
Audience: Graduate

**CIV ENGR 820 – HYDRAULICS AND APPLIED FLUID MECHANICS FOR ENVIRONMENTAL ENGINEERS**

3 credits.

Principles of hydraulics and fluid mechanics applied to environmental engineering systems that convey, control, and measure the flow of liquids, solid-liquid slurries, and gases.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe flow measurement and conveyance piping, equipment, and appurtenances commonly used for fluids in environmental engineering  
Audience: Graduate

2. Describe and use concepts of conservation of mass and energy for fluid flow  
Audience: Graduate

3. Estimate energy losses in a given flow system for water, sludge/biosolids mixtures, other liquids, and gases under steady flow conditions  
Audience: Graduate

4. Describe problems of unsteady flow and transient flow conditions that may be encountered in environmental engineering and how such problems may be addressed by design  
Audience: Graduate

5. Examine and design full pipe flow and open channel flow systems, including pumping and blower/compressor systems, hydraulic control structures, piping and channels for fluids normally encountered in environmental engineering problems  
Audience: Graduate

6. Use modern engineering tools to solve hydraulics and applied fluid mechanics problems in environmental engineering  
Audience: Graduate

**CIV ENGR 821 – ENVIRONMENTAL ENGINEERING: BIOLOGICAL TREATMENT PROCESSES**

3-4 credits.

Advanced theory and applications of biological systems for the treatment of wastes; lab techniques to assess treatability and to provide design parameters. Introductory knowledge of Environmental Engineering [such as CIV ENGR 320] is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how microbial communities work in synergistic ways to remove organic and inorganic contaminants from wastewater

Audience: Graduate

2. Describe the specific microbial metabolism associated with nitrogen and phosphorus removal in wastewater treatment plants

Audience: Graduate

3. Perform calculations to estimate the efficiency of different wastewater treatment processes

Audience: Graduate

4. Use computer simulation tools for analysis of wastewater treatment processes

Audience: Graduate

5. Examine data from biological treatment processes to identify causes of poor performance

Audience: Graduate

**CIV ENGR 822 – ENVIRONMENTAL ENGINEERING: PHYSICAL/CHEMICAL TREATMENT PROCESS**

3-4 credits.

Advanced theory and applications of chemical and physical-chemical processes for the treatment of water and wastewater; lab techniques to assess design requirements and treatability. Introductory knowledge of Environmental Engineering [such as CIV ENGR 320] is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the fundamental physical and chemical mechanisms that drive the performance of phase transfer processes, chemical transformation processes, and physical separation processes

Audience: Graduate

2. Describe the influence of physical and chemical mechanisms on performance of the above processes

Audience: Graduate

3. Describe the fundamental hydraulic mechanisms of batch and flow-through reactors and the influence of these mechanisms on performance of the above processes

Audience: Graduate

4. Draw process flow diagrams and use them in deriving mathematical models that predict reactor performance

Audience: Graduate

5. List assumptions used in the derivation of mathematical models and list the limitations of the resulting models

Audience: Graduate

6. Conduct experiments and interpret results using derived mathematical models combined with statistical analysis methods such as nonlinear regression

Audience: Graduate

7. Describe limitations in experimental design and their effect on interpretation of data

Audience: Graduate

### **CIV ENGR 823 – ENVIRONMENTAL ENGINEERING DESIGN PROJECT**

3 credits.

Engineering design project applied to environmental engineering solutions involving environmental chemistry, environmental quality, physical-chemical treatment processes, biological treatment processes, solid and hazardous waste engineering, energy, resource recovery, economic analysis, hydrology, and/or hydraulics and applied fluid mechanics.

**Requisites:** Declared in Civil and Environmental Engineering MS, Environmental Chemistry and Technology MS, or Civil and Environmental Engineering: Environmental Engineering ME

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Use teamwork and leadership skills needed to plan and design solutions to open ended problems in environmental engineering

Audience: Graduate

2. Perform problem formulation and analysis of an environmental engineering problem

Audience: Graduate

3. Use modern engineering tools to analyze and solve an environmental engineering problem

Audience: Graduate

4. Use knowledge and experience gained during the course and in prior coursework to analyze and solve an environmental engineering problem

Audience: Graduate

5. Use written and verbal communication skills necessary to gain technical and public input to the analysis and understanding of the recommended solution

Audience: Graduate

### **CIV ENGR 890 – PRE-DISSERTATOR'S RESEARCH**

1-9 credits.

Under faculty supervision.

**Requisites:** Declared in Civil and Environmental Engineering PHD or Environmental Chemistry and Technology PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate broad knowledge of civil or environmental engineering

Audience: Graduate

2. Integrate knowledge from multiple disciplines to independently develop civil or environmental engineering research hypotheses

Audience: Graduate

3. Design and conduct preliminary research to iteratively test and finalize hypotheses

Audience: Graduate

4. Communicate research results in written and verbal formats

Audience: Graduate

### **CIV ENGR 909 – GRADUATE SEMINAR - ENVIRONMENTAL CHEMISTRY & TECHNOLOGY**

1 credit.

Current research in environmental chemistry and technology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate awareness of historic and/or current advances in environmental chemistry and technology research, practice, policy and/or professional conduct

Audience: Graduate

### **CIV ENGR/ATM OCN/BOTANY/ENVIR ST/GEOSCI/ZOOLOGY 911 – LIMNOLOGY AND MARINE SCIENCE SEMINAR**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CIV ENGR 919 – SEMINAR-HYDRAULIC ENGINEERING AND FLUID MECHANICS**

1 credit.

Current research and review of literature in theoretical and applied fluid mechanics and hydraulic engineering.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate awareness of historic and/or current advances in hydraulic engineering and fluid mechanics research, practice, policy and/or professional conduct

Audience: Graduate

**CIV ENGR 929 – SEMINAR-ENVIRONMENTAL ENGINEERING**

1 credit.

Current research and literature on water, wastewater, water pollution control, solid wastes engineering and management.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate awareness of historic and/or current advances in environmental engineering research, practice, policy and/or professional conduct

Audience: Graduate

**CIV ENGR 939 – GEOTECHNICAL ENGINEERING SEMINAR**

1 credit.

Geotechnical analysis, design, and construction.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate awareness of historic and/or current advances in geotechnical engineering research, practice, policy and/or professional conduct

Audience: Graduate

**CIV ENGR 949 – SEMINAR-STRUCTURAL ENGINEERING**

1 credit.

Structural analysis, design, and construction.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate awareness of historic and/or current advances in structural engineering research, practice, policy and/or professional conduct

Audience: Graduate

**CIV ENGR 990 – THESIS**

1-12 credits.

Under faculty supervision.

**Requisites:** Declared in Civil and Environmental Engineering PHD or Environmental Chemistry and Technology PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Integrate knowledge from multiple disciplines to independently develop civil or environmental engineering research hypotheses

Audience: Graduate

2. Design and conduct fundamental research tasks to test hypotheses

Audience: Graduate

3. Interpret the results of the research, then communicate the interpretation in both written and verbal formats

Audience: Graduate

**CIV ENGR 999 – ADVANCED INDEPENDENT STUDY**

1-9 credits.

Under faculty supervision.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct and report on independent civil or environmental engineering research

Audience: Graduate

2. Independently develop civil or environmental engineering research questions

Audience: Graduate

3. Appropriately use online and library resources

Audience: Graduate

# CIVIL SOCIETY AND COMMUNITY STUDIES (CSCS)

## CSCS 125 – COMMUNITY AND SOCIAL CHANGE

3 credits.

Examine contemporary issues with an emphasis on the role that individuals and communities play in achieving positive social change. Develop the mindsets and communication skills necessary to work in diverse community contexts. Specific themes may shift based on current events, but often include education reform, racial justice, health equity, alternative economies, food systems, and sustainability.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze community issues and contemporary social movements from human ecological & multicultural perspectives  
Audience: Undergraduate

2. Identify stakeholders and describe the possibilities, values, and limitations of strategies for achieving social change objectives  
Audience: Undergraduate

3. Link historical and contemporary scholarly authors as it relates to Community-Based and Action-Oriented research  
Audience: Undergraduate

4. Recognize how power, privilege, and social identity influence the ways diverse individuals and groups experience (and influence) social change  
Audience: Undergraduate

5. Reflect on how social identities, community contexts, and relative privilege impact the ways they experience and/or agitate for social change

Audience: Undergraduate

## CSCS 130 – COMMUNITY NEWSWRITING

3 credits.

News writing of interest to individuals, families, and communities.

**Requisites:** Sophomore standing

**Course Designation:** Gen Ed – Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## CSCS 155 – SOCIAL MEDIA FOR SOCIAL JUSTICE

3 credits.

Social media is a strategic tool to help organizations, advocacy groups, and individuals advance social justice initiatives to create a more equitable future. Analyze historical campaigns to evaluate social media presence, audience focus, communication goals, content resonance, storytelling techniques, and audience engagement. Explore ethical topics tied to social media as a communications and organizing medium including: first amendment rights and the emerging regulation of social media platforms; source authenticity and the weaponization of misinformation in an era of rapidly evolving technology; privacy in an increasingly connected world; biases built into our technology; and equity of technology access.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explore the history of social media as a communications tool to build a social movement and catalyze change  
Audience: Undergraduate

2. Analyze a campaign, recommend the most effective ways to reach and motivate diverse audience segments  
Audience: Undergraduate

3. Build information literacy, critically evaluate information sources and motives of the communicator  
Audience: Undergraduate

4. Differentiate ethical vs. unethical use of social media technology to foster community and relationships that advance well-being, public discourse, and civil society  
Audience: Undergraduate

**CSCS 254 – CAREER PATHWAYS IN COMMUNITY & ORGANIZATIONAL DEVELOPMENT**

1 credit.

Explores career pathways in community engagement, organizational development, and public service within Human Ecology professions. Features insights from professionals in social change, government, nonprofits, and grassroots movements. Examines roles, responsibilities, and challenges in community development. Covers options and guidance on advanced professional credentials and/or academic preparation.

**Requisites:** None**Repeatable for Credit:** Yes, for 1 number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key career pathways and opportunities within Human Ecology and community development, including roles in public, private, and nonprofit sectors, and opportunities for graduate school programs in these fields

Audience: Undergraduate

2. Analyze the challenges and opportunities faced by professionals working in various community-focused organizations, drawing insights from guest speakers and panel discussions

Audience: Undergraduate

3. Get to know individual community leaders and their unique perspectives and experiences that led to their current role(s) in social change professions

Audience: Undergraduate

4. Evaluate different organizational approaches and strategies for fostering community development, as presented by leaders and community-based professionals and graduate students

Audience: Undergraduate

**CSCS 255 – INTRODUCTION TO SOCIAL INNOVATION**

3 credits.

Introduction to the process of developing effective solutions to complex problems as a means of systemic social change. Provides a broad overview of the social innovation ecosystem, including history, context, case studies, and critical perspectives.

**Requisites:** None**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate their understanding of the social innovation ecosystem locally and globally across sectors and disciplines

Audience: Undergraduate

2. Analyze and reflect on characteristics of social innovators, including individuals, organizations, and coalitions

Audience: Undergraduate

3. Investigate and analyze social and systemic issues, including sources of inequity and injustice, and recognize the social responsibility of individuals within a community and the value of co-creation with communities

Audience: Undergraduate

4. Critically analyze and critique social innovation in theory and practice from human ecological and multicultural perspectives

Audience: Undergraduate

5. Formulate, communicate, and discuss concepts of problem-solving and value creation/co-creation connected to their professional and academic goals

Audience: Undergraduate

6. Assess major trends in social innovation, recognizing interconnectedness of the major sectors of society

Audience: Undergraduate

**CSCS 299 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024

**CSCS 300 – NONPROFIT SECTOR: OVERVIEW AND FOUNDATIONS**

3 credits.

Learn the concepts and tools to analyze the broad environment in which nonprofits operate and assess the impact of this environment at the community and individual organizational level.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Associate the roles and interrelationships among the three main sectors of the U.S. economy: civil society/NP, private/corporate, and public/government; and link identifying characteristics that are unique to the nonprofit sector

Audience: Undergraduate

2. Describe the historical development of the nonprofit sector in the United States

Audience: Undergraduate

3. Engage in the theories of NPO's contributions to the development of civil society

Audience: Undergraduate

4. Identify how expectations of nonprofit contributions to collaborations and community-building can affect individual nonprofit organizations

Audience: Undergraduate

5. Identify trends currently affecting the nonprofit sector in the United States, including (but not limited to) social identity, power, privilege, partisan politics & civil discourse via traditional media and social media, nonprofit industrial complex, neoliberalism

Audience: Undergraduate

**CSCS/AMER IND 330 – AMERICAN INDIAN COMMUNITIES: SOVEREIGNTY, STRUGGLES, AND SUCCESSES**

3 credits.

Learn about contemporary Native communities, both domestically and globally, through a carefully curated selection of readings, podcasts, and videos from Indigenous scholars, community members, knowledge holders, and activists. Offers a broad historical overview of Native American communities in the United States that illustrates the historical trajectory from early colonization and dispossession through self-determination and the recognition of tribal sovereignty in action by local, state, and federal governments.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Awareness of History's Impact on the Present: Understand and identify the relationships and effects of colonial & historical trauma that shaped and continues to influence current sovereignty issues, health disparities, food inequalities, and Tribal lifeways for both rural and urban communities.

Audience: Undergraduate

2. A Consciousness of Self and Other: Explore individual implicit biases in which to construct respectful and culturally responsive self-awareness.

Audience: Undergraduate

3. Identify key ways Native communities differ from other racial/ethnic groups. Students will "unlearn" and question assumptions about Native communities in the US and reflect on their own racial/ethnic identity.

Audience: Undergraduate

4. Describe the role of sovereignty for Native American communities historically and contemporarily.

Audience: Undergraduate

5. Evaluate the impact and significance of colonization on Native communities in the US including global Indigenous populations. Students will offer a critical analysis of who has and who continues to benefit from dominant narratives of colonization.

Audience: Undergraduate

6. Apply learned knowledge to interrogate the complex systems of oppression and marginalization that Native communities continue to face.

Audience: Undergraduate

7. Compare and analyze the efforts of Native communities working to make systemic changes in their own communities and better understand the cultural perspectives of those communities.

Audience: Undergraduate

### **CSCS 335 – COMMUNICATING WITH KEY AUDIENCES**

3 credits.

Comprehensive communication strategies for individuals, families, and communities.

**Requisites:** Sophomore standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate the context of communications planning based on several dispositions of nonprofit communications, including hospitality, gratitude, inclusion, engagement, and expressing need

Audience: Undergraduate

2. Engage in ‘best practices’ of nonprofit communications via grant-writing, donor communiqué, special events plans, social media and on-line strategies, and fundraising & development

Audience: Undergraduate

3. Engage in the fundamental principles of brand management, including graphic and visual design, social media strategies, print materials, and in-person communications

Audience: Undergraduate

4. Identify and analyze nonprofit sector “key audiences,” including: volunteers, donors, board members, community and political leaders, employees, community-based employers, religious organizations, civic clubs, government agencies, and neighborhood constituents

Audience: Undergraduate

5. Identify, analyze and evaluate components of nonprofit communications plans based on contemporary communications ‘best practices’

Audience: Undergraduate

6. Name the demographic make-up of a community nonprofit organization, with particular emphasis on its “key audiences”

Audience: Undergraduate

### **CSCS 345 – EVALUATION AND PLANNING FOR COMMUNITY AND NONPROFIT ORGANIZATIONS**

3 credits.

An applied introduction to planning and evaluation for nonprofit and community-based organizations. Develop skills that can be utilized in both existing and prospective organization-level strategic planning, individual program-level planning, as well as multi-organization planning contexts. Learn how to think of evaluation as a practice, a way of thinking, and as a process integral to and interdependent with strategic and program planning.

**Requisites:** CSCS 300

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and create ethical, inclusive, and culturally appropriate approaches to planning & eval that engage diverse stakeholders in a participatory process

Audience: Undergraduate

2. Develop strategic plans, program plans, and evaluation frameworks that bridge short-term objectives with the longer-term goals of justice and liberation

Audience: Undergraduate

3. Recognize and identify systems thinking, evidence-based evaluation, backwards design, strategic doing, and other methods for meeting the planning and evaluation needs of programs

Audience: Undergraduate

### **CSCS 375 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CSCS 400 – PHILANTHROPY AND CIVIC ENGAGEMENT**

3 credits.

Explores philanthropy and civic engagement through giving time, money and effort to a public purpose. Learn the philanthropic process including creating a giving plan, as well as exploring strategic and creative ways to give that promote civil society and engagement. Develop plans for assessment and evaluation of philanthropic giving.

**Requisites:** Sophomore standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically analyze philanthropy issues from a human ecology perspective

Audience: Undergraduate

2. Explore philanthropy trends such as women and giving, corporate philanthropy, diverse populations, and youth philanthropy

Audience: Undergraduate

3. Explore careers that focus on philanthropy in the nonprofit and corporate settings

Audience: Undergraduate

4. Identify multiple stakeholders and describe the possibilities, values, and limitations of philanthropic decisions

Audience: Undergraduate

5. Recognize the social responsibility of individuals within a community and reflect on the role of giving within civil society including corporate, international, & disaster relief philanthropy

Audience: Undergraduate

6. Share fund allocation decisions using written, oral, and visual communication

Audience: Undergraduate

7. Understand the mechanisms of social entrepreneurship

Audience: Undergraduate

**CSCS 410 – HUMAN TRAFFICKING: GLOBAL AND LOCAL PERSPECTIVES**

3 credits.

An interdisciplinary approach to understand human trafficking as a complex social phenomenon. The topic of human trafficking is analyzed through readings and a robust set of case studies, as part of a spectrum of interrelated violence, exploitation and systemic inequities influenced by various social determinants rooted in gender, power, class, sex, race, opportunity, education, culture, politics, access, and sexual orientation among other factors. Advocacy training will focus on commercial sexual exploitation and human trafficking with attention to supply and demand issues, vulnerability factors, immigration and law enforcement policies, and the overall impact on survivors' rights, health, and their status in society.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Review legal definitions of human trafficking and understand human trafficking in historical, geographical and geopolitical contexts including migration.

Audience: Undergraduate

2. Explain the scope and dynamics of human trafficking, both domestically and internationally

Audience: Undergraduate

3. Recognize the challenges in identifying and supporting victims of human trafficking and describe essential trauma-informed practices and strategies for promoting survivor agency and wellbeing.

Audience: Undergraduate

4. Analyze the intersection of race/ethnicity and indigenous identity with human trafficking, both in the U.S. and in international settings, considering the perspective of the victims, the needs of survivors, as well as the demand side of trafficking.

Audience: Undergraduate

5. Compare the roles of various disciplines, organizations and professionals working on anti-trafficking efforts and collaborative alliances that have the potential to confront human trafficking and bring positive social transformation.

Audience: Undergraduate

6. Develop survivor informed advocacy approaches to assist trafficking victims/survivors, confront traffickers, prevent trafficking, and reduce the demand for human trafficking.

Audience: Undergraduate

7. Apply competencies, skills and approaches within one's graduate discipline that are relevant to human trafficking policy, practice and advocacy.

Audience: Graduate

**CSCS/CURRIC 428 – PROGRAM PLANNING IN FAMILY AND CONSUMER EDUCATION**

3 credits.

Theory and processes of program planning for formal and informal educational settings; relation of vocational education to secondary, adult, and continuing education programs.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Design and implement ethical, inclusive, and culturally appropriate approaches to planning and evaluation that engage a variety of stakeholders together in a participatory process

Audience: Undergraduate

2. Develop program plans that bridge short-term objectives with long-term goals of justice and equity

Audience: Undergraduate

3. Engage in reflective thinking about individual, interpersonal, and organizational power, privilege, and positionality in relation to program planning, strategic planning, and evaluation

Audience: Undergraduate

4. Explain how organizations can propagate systems of injustice and inequity through their programming if they do not address root causes

Audience: Undergraduate

5. Justify the decision to develop a new program plan, adapt an existing program, or take no action, appraising the opportunities and challenges associated with each course of action

Audience: Undergraduate

6. Translate general program planning concepts to a variety of settings, social issues, and audiences

Audience: Undergraduate

**CSCS 430 – FUNDRAISING & DEVELOPMENT FOR NONPROFIT ORGANIZATIONS**

3 credits.

Explores the philosophy of fundraising and development, its bearing on the nonprofit sector, as well as the practical strategies employed by nonprofits in their fundraising efforts to secure time, talent and treasure for sustaining their work. Nonprofit sector organizations (NPO) seek to thrive in their efforts to have a positive impact in bringing social change – to individuals, families, and communities and, indeed, the world. To sustain these noble efforts, these dynamic organizations must attract and garner the time, talent and treasure necessary to develop and grow. Fundraising programs are a significant part of a NPO's work in bringing resources to support their fund development/institutional advancement. Development is a mindset – a way to frame the NPO's thinking and behaviors in providing a comprehensive approach to broad mission support.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Research and understand fundraising & development and the historical contexts for contemporary giving trends in the nonprofit sector (locally, nationally and globally)

Audience: Undergraduate

2. Know the key principles of nonprofit fundraising and development

Audience: Undergraduate

3. Be able to develop a Case Statement for nonprofit fundraising

Audience: Undergraduate

4. Understand the importance of donor relations and donor relationship-building

Audience: Undergraduate

5. Understand and engage in the important activities of nonprofit fundraising and development, including: major gifts, annual funds, special events, online fundraising, grant writing, donor stewardship, legacy giving, capital campaigns, and more

Audience: Undergraduate

6. Understand the social change dynamic of nonprofit organizations and how to manage fundraising efforts that honor and empower stakeholder engagement and leadership

Audience: Undergraduate

7. Know the 'best practices' of nonprofit development program management, including: personnel development, information and data management, volunteer program management, member services, development program planning

Audience: Undergraduate

8. Learn from nonprofit leaders, donors, corporate and foundation executives, and other professionals associated with nonprofit development and fundraising work – via guest lectures and discussions (in-person and online) – in order to broaden one's understanding of the scope of this important work

Audience: Undergraduate

**CSCS 455 – ENTREPRENEURIALISM AND SOCIETY**

3 credits.

Explores entrepreneurialism in nonprofits, business, government, and arts and humanities contexts. With a broad approach of ideas, readings, and lectures, students will understand the ever-changing role that entrepreneurs play and contribute to society.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain new ways of looking at and understanding familiar concepts, i.e. understanding systems, problem solving vs. management, various sectors, and the entities therein (non-profit, for-profit, and hybrid organizations)

Audience: Undergraduate

2. Expand ability to formulate, communicate, and discuss concepts of value creation/co-creation, irrespective of career path or professional aspiration

Audience: Undergraduate

3. Develop a sense of agency, leverage assets beyond immediate control, learn strategies that catalyze change, irrespective of domain

Audience: Undergraduate

4. Conceptualize, design, and iterate (using a conventional tool, e.g., a lean start-up canvas) a social enterprise model that incorporates the outcomes described above

Audience: Undergraduate

**CSCS 460 – CIVIL SOCIETY AND COMMUNITY LEADERSHIP**

3 credits.

Provides opportunities for learning about some of the "nuts and bolts" of nonprofit organizations. Through studying high-impact organizations, interacting with local experts, and through an independent investigation of the work of a local nonprofit organization, develop uniquely tailored understandings and skills for nonprofit leadership.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Define key traits, values, and skills related to leadership and community-building.

Audience: Undergraduate

2. Describe the history of community activism, evolution of civic engagement, and role(s) of significant individuals and organizations in shaping community and civil leadership today.

Audience: Undergraduate

3. Demonstrate the role(s) of -isms on community and civic leadership. More specifically, what is the role of race/gender/class/(dis)ability/religion/sexual orientation/etc. on those in leadership positions within communities and across civic groups.

Audience: Undergraduate

4. Examine how leadership operates in relation to important contemporary topics including diversity, white saviorism, and social justice across communities of color, social class, etc.

Audience: Undergraduate

5. Offer informed critique of today's civil society and community leaders.

Audience: Undergraduate

**CSCS 470 – THE HUMAN RIGHTS OF CHILDREN AND YOUTH: GLOBAL AND LOCAL PERSPECTIVES**

3 credits.

Human rights precepts, policies and frameworks for change in governments and civil society. Convention of the Rights of the Child (CRC), the principal human rights convention related to children, and other human rights policies related to children and young people. Critically analyze the CRC and access information from the Reports of the Committee on the Rights of the Child. Legal and policy frameworks which address the needs of children in adversity Internationally. Review and develop case studies from around the world and from the United States on child rights topics, including a statement of intention and profiles of relevant research, advocacy, or service organizations.

**Requisites:** Junior standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Summarize the Convention of the Rights of the Child (CRC) and compare it to other approaches to advancing of the wellbeing of children.

Audience: Both Grad &amp; Undergrad

2. Analyze and develop case studies from international settings.

Audience: Both Grad &amp; Undergrad

3. Analyze case studies related to selected populations of children in the United States.

Audience: Both Grad &amp; Undergrad

4. Discern and articulate their intentions for future engagement with child rights and identify and profile organizations that are doing related work.

Audience: Both Grad &amp; Undergrad

5. Relate child health and human rights to the learning objectives associated with graduate/professional course of study, discuss how a rights-based approach might inform the culminating project (clerkship, thesis or dissertation), and identify professional associations and grant opportunities that link child health and human rights with their graduate specialization.

Audience: Graduate

**CSCS 500 – GLOBAL HEALTH AND COMMUNITIES: FROM RESEARCH TO PRAXIS**

3 credits.

Explores global health and well-being from a community perspective and through the holistic lens of human ecology. Respectful community-engagement, evidence-based practice, and making the local to global connection are key themes. Almost everything we do has an impact on our own health and that of our communities and the world. Prepares students for community-oriented global health engagement. Consider the nature of community and different types of communities, both locally and globally. Reflect on experiences in communities where you have lived or called home. Review the concept of health and well-being, and evidence-based practice. Learn basic principles of asset-based participatory community research and study, compare and contrast case examples from around the world.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Define and analyze the concept of community, describe different types of communities, and effectively educate peers about communities where they have lived or called home.

Audience: Both Grad &amp; Undergrad

2. Understand the evolving definition of global health, develop a holistic understanding of the interrelated determinants of health and wellbeing, and make connections between assets, challenges and strategies in local and global communities.

Audience: Both Grad &amp; Undergrad

3. Become familiar with ways to describe and measure health status and be able to use tools and resources to describe disease burden and risk factors in national, state, city and neighborhood settings.

Audience: Both Grad &amp; Undergrad

4. Compare and contrast strategies for community engagement from around the world.

Audience: Both Grad &amp; Undergrad

5. Draw connections and implications for health and wellbeing across sectors using the Sustainable Development Goals, as well as other ways of knowing and conceptualizing community life.

Audience: Both Grad &amp; Undergrad

6. Practice self-directed learning, perspective-taking, peer-to-peer learning and experiential learning related to the course topics.

Audience: Both Grad &amp; Undergrad

7. Integrate knowledge and skills related to community-oriented global health engagement.

Audience: Both Grad &amp; Undergrad

8. Identify target publications and submission requirements relevant to individual work and submit final paper for publication.

Audience: Graduate

**CSCS 501 – SPECIAL TOPICS**

1-3 credits.

Specialized subject matter of current interest.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**CSCS 510 – DESIGN & WRITE GRANT PROPOSALS**

3 credits.

Theoretical and practical background in designing and writing grant proposals. Develop skills to locate funding opportunities, summarize program elements, create budgets, and write competitively. Emphasizes writing skills, budget creation, building collaborative partnerships, understanding funder interests and priorities. Analyzing requests for proposals, writing needs statements, methods, budgets, peer review.

**Requisites:** Junior standing**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Practice reflective, ethical leadership while facilitating communication, planning skills, and fostering innovation and creativity within teams.

Audience: Undergraduate

2. Design and create a grant proposal in response to an RFA/RFP that summarizes the basic elements and principles of a successful grant proposal using the language, terms, and vocabulary of a grantor, grantee, and grant writer.

Audience: Undergraduate

3. Identify individual or organizational needs and locate appropriate granting agencies or funding sources congruent with those needs.

Audience: Undergraduate

4. Apply a global lens in creating a literature review that provides the framework for an overview of knowledge on a particular subject area within a grant proposal.

Audience: Undergraduate

**CSCS 530 – PURPOSE-DRIVEN ORGANIZATIONS**

3 credits.

Purpose-driven organizations including community and grassroots efforts, nonprofits, nongovernmental organizations, social enterprises, cooperatives, and land trusts. Examines roles, critiques, characteristics, and infrastructural components. Includes analysis of historical, current, and trending approaches to purpose-driven work through textual, community-engaged, or case study learning.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Organizational management and professional development. Demonstrate knowledge and skills relevant to the structuring, operations, infrastructure, and strategy of a range of purpose-driven organizations, including nonprofit and community organizations, social enterprises, cooperatives, etc.

Audience: Undergraduate

2. Ecological perspectives on community and society. Apply an ecological perspective to the third sector and the roles of a variety of types of purpose-driven organizations locally and globally; recognize and discern the context in which they do their work and have an impact on communities and other sectors. Take into account history, power dynamics, theories, global and local context, and trends.

Audience: Undergraduate

3. Identity, diversity, and social justice. Recognize well-being and social justice in the context of purpose-based organizations and the third sector.

Audience: Undergraduate

**CSCS 555 – COMMUNITY AND SOCIAL INNOVATION LAB**

3 credits.

Develop and implement a social change project in collaboration with a community partner. Explore diverse approaches to changemaking and address systemic issues through project-based work.

**Requisites:** CSCS 255 or 455**Repeatable for Credit:** No

**Learning Outcomes:** 1. Apply a deep understanding of community transformation, social innovation, and human ecology knowledge and skills to a complex project

Audience: Undergraduate

2. Develop and implement project plans, considering scope, timeline, resource allocation, and evaluation, to create and deliver social transformation projects on schedule

Audience: Undergraduate

3. Demonstrate creative and critical thinking in the synthesis of foundational ideas applied to a social change project

Audience: Undergraduate

4. Communicate the results of their project to both academic and non-academic audiences, focusing on how the work contributes to positive systemic change

Audience: Undergraduate

**CSCS 570 – COMMUNITY BASED RESEARCH AND EVALUATION**

3 credits.

Theoretical, critical, and analytical understanding and application of the conscious and systematic use of data, inquiry and analysis for community, organization and program diagnosis, intervention and evaluation in various community-based and nonprofit organizations.

**Requisites:** Junior standing, satisfied Quantitative Reasoning (QR) A requirement, and CSCS 300

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CSCS 600 – COMMUNITY LEADERSHIP PORTFOLIO CAPSTONE**

3 credits.

Designed to demonstrate accumulated training and experience in community and nonprofit leadership. Explores how to better conceptualize, engage with, and reflect on social justice and community issues from a human ecology perspective, while also learning from prior practice and experience working with nonprofit, community- and mission-based organizations.

**Requisites:** Senior standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply human ecological perspectives at discrete levels of analysis – including individual, group, community, and society.

Audience: Undergraduate

2. Recognize the influence and interconnectedness across the major sectors of society – private, public and civil/nonprofit.

Audience: Undergraduate

3. Exhibit a strong capacity for sustained, high impact participation in civic life.

Audience: Undergraduate

4. Recognize wellbeing and social justice as relational and positional.

Audience: Undergraduate

5. Identify professional, academic and entrepreneurial options for applying wellbeing and social justice in community organizing and empowerment.

Audience: Undergraduate

6. Demonstrate entry-level knowledge and skills relevant to nonprofit and community organizations.

Audience: Undergraduate

7. Exhibit the practices of a lifelong learner through the development (production, completion) and implementation of a portfolio.

Audience: Undergraduate

8. Recognize the value of being a reflective, ethical leader who cultivates others' strengths and leadership capabilities, while exhibiting self-care and care for others.

Audience: Undergraduate

9. Create a dynamic professional portfolio, with content and format consistent with personal and vocational passions, interests, skills and strivings – exhibiting perspectives on and understandings of CSCS curricula.

Audience: Undergraduate

**CSCS 601 – INTERNSHIP**

1-6 credits.

A supervised internship providing hands-on training in a professional experience in community and nonprofit leadership related fields.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Engage in professional work experiences and training in the nonprofit sector. Training and work may involve (but not be limited to) activities and tasks related to: fundraising, event planning, advertising/public relations, volunteer coordination, budgeting, human resource management, and customer service programs.

Audience: Undergraduate

2. Develop analytical skills and problem-solving competencies related to working with nonprofit agencies.

Audience: Undergraduate

3. Apply academic knowledge to the nonprofit work environment

Audience: Undergraduate

4. Develop professional competencies in written and oral communication.

Audience: Undergraduate

5. Expand awareness of career opportunities & establish professional contacts with nonprofits.

Audience: Undergraduate

**CSCS 680 – SENIOR HONORS THESIS**

2-4 credits.

Individual study in honors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2014

**CSCS 690 – SENIOR THESIS**

2 credits.

Individual study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**CSCS 699 – INDEPENDENT STUDY**

1-4 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CSCS 742 – NONPROFIT BOARD LEADERSHIP DEVELOPMENT I**

2 credits.

Part one of a two part course sequence. Develop a commitment to community and civic engagement through volunteer leadership of nonprofit organizations in Madison/Dane County. Serve on the boards of nonprofits (in a non-voting capacity) and complete an independent governance project.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Demonstrate and articulate the responsibilities of a non-profit governance board including the duties of the board chair and board members by contributing time and talent to a working committee of the board.

Audience: Graduate

2. Recognize the processes and protocols used by the board to shepherd key issues through decision-making and into action by the organization.

Audience: Graduate

3. Partner with a diverse set of board members and organizational staff to develop and implement a governance-based strategy that addresses an important challenge of the organization.

Audience: Graduate

4. Articulate the ways in which boards can motivate organizations to be successful and sustainable and reflect on your board's professional development strategy for improving their value to future board work.

Audience: Graduate

5. Utilize effective team-based and interpersonal communication skills as a means to build a professional network with a set of diverse board members and staff leaders.

Audience: Graduate

### **CSCS 743 – NONPROFIT BOARD LEADERSHIP DEVELOPMENT II** 1 credit.

Part two of a two part course sequence. Continued development of a commitment to community and civic engagement through volunteer leadership of nonprofit organizations in Madison/Dane County. Continued service on the boards of nonprofits (in a non-voting capacity) and completion of an independent governance project.

**Requisites:** CSCS 742

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Interpret and relate the key strategic and tactical issues being addressed by an organization's board members.

Audience: Graduate

2. Partner with a diverse set of board members and organizational staff to develop and implement a governance-based strategy that addresses an important challenge of the organization.

Audience: Graduate

3. Identify and apply personal knowledge, experiences and skills that are most valued in board service that is equitable, diverse and inclusive.

Audience: Graduate

4. Utilize effective team-based and interpersonal communication skills as a means to build a professional network with a set of diverse board members and staff leaders.

Audience: Graduate

### **CSCS 775 – BUILDING CIVIL SOCIETY** 3 credits.

Consistent with the values of civil society, emphasizes engagement, debate, collegiality, personal discernment, and expression. Reflect on how developing academics and practitioners can use frameworks and practices of civil society to further professional goals and civic contributions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Form a learning community that integrates academic study with ongoing and iterative reflection on the lived experience and truth(s) of people, places, histories, and environments that have historically been marginalized.

Audience: Graduate

2. Explore the meaning and history of the concept of civil society in the US and around the world, through the study and critique of canonical texts and contemporary scholars. We will complement these texts with scholarship that enables us to consider civil society from different perspectives.

Audience: Graduate

3. Review the landscape and typologies for civil society organizations in the US and around the world. Map your own past experiences in civil society and consider what kind of civil society you would like to prioritize for future engagement.

Audience: Graduate

4. Identify and understand current frameworks of civic competencies that are related to building civil society.

Audience: Graduate

5. Define your own voice and identity and relationship to civil society – consider your role as a member, leader, researcher, practitioner, and your relationship to others.

Audience: Graduate

6. Increase capacity for civil discourse – conversational skills, clear communication, and strategies for joint learning. Identify personal strengths and goals and strategies to build skills in these areas in the future.

Audience: Graduate

7. Practice and develop improved written and oral communication skills needed for civil society leadership and scholarship.

Audience: Graduate

**CSCS 785 – CIVIC DEVELOPMENT ACROSS THE LIFESPAN**

3 credits.

Focus on ways in which people develop identities and commitments as members of cultural and community groups and how they exercise rights and assume responsibilities in those contexts. An ecological approach to civic development – considering characteristics of persons (age, race, ethnicity, gender, sexual orientation, culture) and the opportunities, structural impediments, and challenges of social and institutional contexts for different groups. Major themes are people's collective agency in working for social change and how engaging in civic work promotes well-being. Designed to encourage a collaborative approach to learning, to articulate scholarship based on your passions for social justice, and to make your work accessible to different scholarly and public audiences.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**Learning Outcomes:** 1. Become versed in a cross-disciplinary body of literature on civic engagement (CE) and its relevance for personal and community well-being

Audience: Graduate

2. Communicate their scholarship and its implications for well-being – to public and academic audiences

Audience: Graduate

3. Integrate and critique extant research and practice in their area of interest

Audience: Graduate

4. Synthesize and critique theories relevant to their scholarship

Audience: Graduate

5. Formulate a statement of aims and a testable hypothesis for their area of interest

Audience: Graduate

**CSCS 795 – COMMUNITY POWER AND COLLECTIVE ACTION**

3 credits.

Enhance your collective ability to identify, describe, and analyze power and empowerment within communities and social, economic, and political systems. Enables us to more effectively and intentionally situate our praxis with regard to power and collective action. Centers on inquiries into the roles that power plays in collective action for community change and improvement, as well as the roles that it often plays in hindering such efforts and maintaining the status quo or defending elite interests.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Build an understanding of the roles that power plays in producing social problems and social injustices.

Audience: Graduate

2. Make linkages among contemporary social structures and power differentials between and within communities and articulate them in relation to community-based interventions and research.

Audience: Graduate

3. Deepen capacity for thinking about social power in strategic ways for galvanizing social action and bringing about changes that enhance community wellbeing and social justice.

Audience: Graduate

4. Critically assess various strategies for building power incommunities and taking collective action.

Audience: Graduate

**CSCS 801 – SPECIAL TOPICS IN CIVIL SOCIETY AND COMMUNITY RESEARCH**

1-3 credits.

Specialized subject matter of current interest.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023

**CSCS 811 – COMMUNITY-BASED RESEARCH: THEORY AND PRACTICE**

3 credits.

An interdisciplinary, introduction to community-based research. Designed to be a co-exploration of different community-based, community-engaged, and action-oriented research approaches and methods as utilized in a variety of disciplines. An opportunity to apply skills gained through participation in community-based research (CBR) projects developed collaboratively with a local community partner.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the different approaches to doing research in communities

Audience: Graduate

2. Think critically about the relationship between researchers and those for whom the research is being done (i.e., the academy and the community)

Audience: Graduate

3. Gain the skills and knowledge necessary to successfully conduct research that is responsive to community needs

Audience: Graduate

**CSCS 812 – MIXED-METHODS IN COMMUNITY-BASED RESEARCH**

3 credits.

Applied, methodologically focused seminar that aims to develop capacities for action-oriented mixed-methods research design, as well as basic understanding of an array of methodological tools. Readings, discussions, assignments, and class projects are all oriented toward developing this capacity and understanding.

**Requisites:** CSCS 811

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Design research intended to produce or influence desirable social/community impacts.

Audience: Graduate

2. Apply the philosophical underpinnings of action research and mixed methods research.

Audience: Graduate

3. Build a critical understanding of multiple uses of evidence, forms of validity, and communication and dissemination techniques.

Audience: Graduate

4. Blend and apply multiple research methods in sequence or tandem.

Audience: Graduate

**CSCS 813 – TRANSFORMATIVE EVALUATION IN PRACTICE**

3 credits.

Develop, conduct, and lead a participatory program evaluation using a transformative lens. Emphasizes collaborative strategies that build evaluation capacity and improve the use of evaluation findings. Build knowledge and skills in evaluation and apply them through projects with institutions (e.g. community organizations, voluntary associations or foundations) involved in creating a civil and just society. Topics include but are not limited to professional standards and ethical practice, understanding context and engaging stakeholders, the role of power in evaluation, evaluation theory, mixed methods designs, developmental and collective approaches to evaluation, and systems thinking.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use terminology and apply concepts common to transformative evaluation practice;

Audience: Graduate

2. Build skills to create effective and equitable partnerships with community organizations that want to evaluate program(s) or services;

Audience: Graduate

3. Develop capacity to assess an evaluation's context and determine an approach and design for the evaluation using a transformative lens;

Audience: Graduate

4. Apply program evaluation standards and ethical guidelines in the development, design, conduct and reporting of an evaluation;

Audience: Graduate

5. Appropriately select and utilize qualitative, quantitative or mixed methods approaches to collect and analyze data; and

Audience: Graduate

6. Acquire skills and tools to effectively communicate with and engage stakeholders throughout the evaluation process.

Audience: Graduate

**CSCS 990 – RESEARCH AND THESIS**

1-12 credits.

Independent research and writing under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CSCS 999 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**CLASSICS (CLASSICS)****CLASSICS 100 – LEGACY OF GREECE AND ROME IN MODERN CULTURE**

3 credits.

Explores the legacy of ancient Greek and Roman Civilization in modern culture. Reflect on the roots of western civilization and understand and interpret reflections of antiquity in today's society.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Evaluate the influence of the Classical tradition on contemporary society and culture.

Audience: Undergraduate

**CLASSICS 101 – TOPICS IN CLASSICAL AND ANCIENT NEAR EASTERN STUDIES**

3 credits.

An introduction to the literature, history, and culture of Greece, Rome, and the Ancient Near East. Topics vary.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

**CLASSICS 102 – TOPICS IN CLASSICAL AND ANCIENT NEAR EASTERN LITERATURE**

3 credits.

General principles of reading ancient literature in translation. Topics include: genres and forms of ancient literature, oral and written cultures, social context of ancient literature, ancient and modern practices of linguistic translation, interactions between literary texts and other media, ancient literature and modern categories.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

**CLASSICS 103 – NATURE, RACE, AND HUMAN DIFFERENCE**

3 credits.

What do we mean when we talk about nature? What does it mean to call something natural? Are humans part of nature, and is human difference a product of nature or culture? An introduction to the concepts of nature, culture, and race in both the ancient Mediterranean and contemporary US society with an emphasis on how ancient accounts of human difference have shaped-and continue to shape-modern discourse. Approaching the topics of race, nature, and the environment using critical resources afforded by the humanities, consider how the nature/culture binary is deployed in definitions for race and ethnicity, and show how the experiences of racially marginalized groups in the United States are impacted by ancient debates surrounding nature and human difference, as well as their re-articulation over the intervening millennia.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

2. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

3. Strengthen skills in analytical writing and discussion.

Audience: Undergraduate

4. Investigate ancient and modern definitions of and debates surrounding the concepts of nature, culture, and race.

Audience: Undergraduate

5. Recognize and question cultural assumptions and knowledge claims relating to race and ethnicity by interrogating how they are used in both contemporary discourse and in vastly different societies.

Audience: Undergraduate

6. Articulate how ancient literature and ideology has affected present day circumstances regarding race and racial inequalities in the U.S.

Audience: Undergraduate

**CLASSICS/HISTORY 110 – THE ANCIENT MEDITERRANEAN**

4 credits.

An examination of the evolution of the human community in the Mediterranean Basin, from the beginning of the earliest civilizations in the Near East (3,000 B.C.E.) until the collapse of the Roman Empire in the West (500 C.E.).

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate a holistic view of the Ancient Mediterranean society and culture.

Audience: Undergraduate

**CLASSICS 111 – CLASSICS AND POP CULTURE**

3 credits.

Explores influence of Greco-Roman literature on contemporary popular culture putting classical texts, myths, and philosophical literature alongside modern media such as films, shows, books, pop songs, and music videos, to understand the past and critically engage with the present.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Make informed and original observations about Ancient Greek and Roman literature

Audience: Undergraduate

2. Critique Ancient Greek and Roman literature and culture in terms of contemporary culture and vice versa

Audience: Undergraduate

3. Understand ancient narratives through critical analysis of rhetoric and poetics, including attention to problems of accessing foreign literature in translation

Audience: Undergraduate

4. Increase familiarity with and convincingly employ secondary resources from scholarship to understand ancient literature

Audience: Undergraduate

5. Manage collaborative multimedia projects on complex themes

Audience: Undergraduate

**CLASSICS 120 – FAKES, FORGERIES, AND THE ETHICAL PROBLEMS IN CLASSICAL ANTIQUITIES**

3 credits.

Covers the crisis of fakes and forgeries in the world of classical antiquities, with emphasis on ancient Greek and Roman art from the period 1200 BCE to 400 CE, but also including comparative cases in the world of modern art. Introduces the basic vocabulary of fakes and, by means of readings and discussions, generates knowledge around the impact that fakes and forgeries have on perceptions of past civilizations and truths of the present day. Learn how to distinguish originals from counterfeits, how fakes and forgeries can distort understandings about the past and present, how to deploy tools for art historical analysis and the study of forgeries, how to discuss ethical problems in classical antiquities with peers, how to identify and organize evidence and scholarship to produce coherent and cogent arguments, and how to think critically about the impact of ancient art (both real and fake) in modern times.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Summarize the crisis of forgeries in the world of ancient and modern art, with emphasis on forgeries of ancient Greek and Roman art from the period 1200 BCE to 400 CE.

Audience: Undergraduate

2. Employ the basic vocabulary of art forgery and recognize the impact that fakes and forgeries have on perceptions of past civilizations and truths of the present day.

Audience: Undergraduate

3. Identify original works from fakes and forgeries and discover the ways that fakes and forgeries can distort understandings about the past and present.

Audience: Undergraduate

4. Employ tools for art historical analysis and the study of forgeries and discuss these matters with peers.

Audience: Undergraduate

5. Organize material to produce coherent and cogent arguments and think critically about the impact of ancient art (both real and fake) on today's modern world

Audience: Undergraduate

**CLASSICS 150 – ANCIENT GREEK AND ROMAN MONSTERS**

3 credits.

Ancient monsters were forces of chaos that threatened the natural order of the universe: they had to be contained, banished to the edges of the world or destroyed. But the Greeks and Romans also believed them to be magical beings that held the promise of special knowledge – of the past, of dangers to be faced, of musical arts – or which, like the Sphinx, possessed an enigmatic intelligence capable of fooling all but the most cunning of mortals. Investigate these contrasting aspects of ancient monsters, drawing directly on texts (in translation) and works of art through which the Greeks and Romans explored the monstrous and its place in their world. Compare ancient representations with those in modern artistic media – comics, games, stories and movies – considering both how our notions of the monstrous are influenced by or contrast with those of our ancient predecessors, and how our very identities are created by and enacted through our depictions of monsters.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Evaluate modern conceptions of the monstrous in the light of those of the Greeks and Romans.

Audience: Undergraduate

**CLASSICS 205 – GREEK AND LATIN ORIGINS OF MEDICAL TERMS**

3 credits.

Discover the elements of Latin and Greek that are most commonly used in modern medicine. Learn a great deal about the cultural influences that lie behind the linguistic developments, and explore some of the striking contrasts between ancient and modern medicine.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate knowledge of Greek and Latin etymology and semantics as it applies to modern medical terminology.

Audience: Undergraduate

**CLASSICS 206 – CLASSICAL INFLUENCES ON WESTERN ART AND SCIENCE**

3 credits.

Explores the legacy of ancient Greek, Roman, and Near Eastern art and science in later historical periods of Western culture. Identify, analyze and critique the roots of western culture and to understand and interpret how classical cultures influence global arts and sciences past and present.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation

Audience: Undergraduate

3. Compare and critique ancient Greek, Roman and/or Near Eastern societies and cultures to other societies and cultures

Audience: Undergraduate

4. Evaluate the influence of the Classical tradition of art and science on later Western societies and cultures

Audience: Undergraduate

5. Understand art and science as related forms of knowing the world

Audience: Undergraduate

**CLASSICS/JEWISH/LITTRANS/RELIG ST 227 – INTRODUCTION TO BIBLICAL LITERATURE (IN ENGLISH)**

4 credits.

Introduction to the text, development, history, and social context of the Hebrew Bible/Old Testament. Covers the Torah (Pentateuch), Neviim (Former and Latter Prophets), and Ketuvim (Writings), and provides a brief introduction to early Jewish literature (Pseudepigrapha/Apocrypha). Discusses various methods of analysis and theories of composition. Addresses major theological claims made of the text by Jewish and Christian communities. Explores contextualized interpretations in the ancient and modern day.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Articulate a self-critical understanding of one's own approach to the biblical text.

Audience: Undergraduate

**CLASSICS/JEWISH 241 – INTRODUCTION TO BIBLICAL ARCHAEOLOGY**

4 credits.

An overview of archaeology and its relationship to understanding the biblical world.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate a holistic view of Ancient Mediterranean society and culture.

Audience: Undergraduate

**CLASSICS 270 – CLASSICAL MYTHOLOGY**

3 credits.

Classical myths and their influence on later literature and art.

**Requisites:** Not open to students with credit for CLASSICS 370 prior to Fall 2023

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate knowledge of Classical myths and their influence in literature and art.

Audience: Undergraduate

**CLASSICS/ART HIST 300 – THE ART AND ARCHAEOLOGY OF ANCIENT GREECE**

3-4 credits.

Explores the art and archaeology of ancient Greece from the Bronze Age through the Hellenistic period.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Greek society and culture.

Audience: Undergraduate

2. Examine, analyze, and interpret material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Understand and evaluate the art and archaeology of ancient Greece, current archaeological methods, the ethics of collecting antiquities, and the legacy of ancient Greek material culture and technologies.

Audience: Undergraduate

**CLASSICS/ART HIST 304 – THE ART AND ARCHAEOLOGY OF ANCIENT ROME**

3-4 credits.

Explores the art and archaeology of ancient Italy, the Roman Republic, and the Roman Empire from the Iron Age to Late Antiquity.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Roman society and culture.

Audience: Undergraduate

2. Examine, analyze, and interpret material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Understand and evaluate the art and archaeology of ancient Rome, current archaeological methods, the ethics of collecting antiquities, and the legacy of ancient Roman material culture and technologies.

Audience: Undergraduate

### CLASSICS 308 – SEX AND VIOLENCE IN THE ANCIENT NEAR EAST

3 credits.

Examines the intersections of sex and violence in biblical and related literature. Read through a variety of lenses, including feminist interpretation, queer theory, and post-colonial theory. Consider how, why, and for whom texts depicting gender violence worked in the ancient world. Explore the reception of such texts in art, fiction, and film and their impact on modern society.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Understand and apply gender-nuanced interpretation to Classical and ancient Near Eastern literature.

Audience: Undergraduate

### CLASSICS 315 – AFRICANA APPROACHES TO BIBLICAL INTERPRETATION

3 credits.

An exploration of African and Black Diaspora interpretations of biblical literature (Hebrew and Greek Testaments). Includes a survey of Sub-Saharan Africans' roles in the Bible; studies the translation of the Bible in the 4th – 5th centuries CE in Axumite Ethiopia; follows the movement of biblical interpretation across the Middle Passage; explores the intellectual dimensions of Black Diaspora biblical interpretation in North America and the Caribbean. Discuss hermeneutics and reading strategies, the interplay of colonialist and post-colonialist dynamics of reading, and methods of reading scriptural texts.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, Analyze, and Interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Compare and Critique ancient Greek, Roman, and/or Near Eastern societies and cultures to other societies and cultures.

Audience: Undergraduate

4. Evaluate the reception of biblical texts in the modern period.

Audience: Undergraduate

5. Articulate how the past has affected present day circumstances regarding race and racial inequities in the U.S.

Audience: Undergraduate

6. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity.

Audience: Undergraduate

7. Hone their close reading skills so as to be able to read literary, exhortatory, and scholarly texts with deeper attention to detail and sharper interpretive instincts.

Audience: Undergraduate

8. Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society.

Audience: Undergraduate

### CLASSICS 320 – THE GREEKS

3 credits.

Greek literature in translation with emphasis on its social background.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Greek society and culture.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate advanced skills in critical reading, logical thinking, and the use of evidence.

Audience: Undergraduate

5. Demonstrate advanced skills in the use of appropriate style and disciplinary conventions in writing and speaking.

Audience: Undergraduate

6. Demonstrate advanced skills in the use of core library resources specific to the Greek world.

Audience: Undergraduate

### CLASSICS 321 – THE EGYPTIANS: HISTORY, SOCIETY, AND LITERATURE

3 credits.

An introduction to the study of Ancient Egypt, analyzing its political clout through two millennia of history, its society and economy, its variegated religious systems, the art and literature it produced, and its reception in the modern period.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Evaluate the reception of ancient Egypt in the modern period.

Audience: Undergraduate

**CLASSICS 322 – THE ROMANS**

3 credits.

Latin literature in translation with emphasis on its social background.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Roman society and culture.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate advanced skills in critical reading, logical thinking, and the use of evidence.

Audience: Undergraduate

5. Demonstrate advanced skills in the use of appropriate style and disciplinary conventions in writing and speaking.

Audience: Undergraduate

6. Demonstrate advanced skills in the use of core library resources specific to the Roman world.

Audience: Undergraduate

**CLASSICS/JEWISH/RELIG ST 323 – THE BIBLE AND FILM: LITERATURE AND MEDIA**

3 credits.

An introduction to the study of the Bible as literature and of biblical reception in the medium of film, from early Hollywood to the present day. Explores the way in which the Bible (including both Hebrew and Greek Testaments), one of the foundational literary corpora of American society, has been interpreted, reinterpreted, and misinterpreted through the medium of film over the past century. We will begin each segment of the course by reading portions of the biblical text that have experienced significant interpretation, in order to understand the literary text that has been received in film. How beholden are filmmakers to the interpretations of communities that view these texts as authoritative, and where are they free to depart from their sources? Is it possible to "translate" biblical narratives into film without losing something in the translation? These questions will focus our study on ways the literature has been interpreted in this new medium.

**Requisites:** Sophomore standing

**Course Designation:** Gen Ed - Communication Part B  
Breadth - Literature. Counts toward the Humanities req  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Develop understanding of film as a form of biblical reception.

Audience: Undergraduate

5. Hone close reading and film-watching skills so as to be able to read a literary text with deeper attention to detail and sharper interpretive instincts, as well as increase ability to articulate their observations.

Audience: Undergraduate

6. Demonstrate skills in critical reading, logical thinking, and the use of evidence.

Audience: Undergraduate

7. Demonstrate skills in the use of appropriate style and disciplinary conventions in writing and speaking.

Audience: Undergraduate

8. Demonstrate skills in the use of core library resources specific to the ancient Near Eastern world.

Audience: Undergraduate

**CLASSICS/HEBR-BIB/JEWISH/LITTRANS/RELIG ST 332 – PROPHETS OF THE BIBLE**

4 credits.

An introduction to the thought, literature, and history of the prophets of ancient Israel (in English).

**Requisites:** RELIG ST/CLASSICS/JEWISH/LITTRANS 227 or

Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate a critical understanding of the reception of David in various media.

Audience: Undergraduate

### CLASSICS 340 – CONSPIRACY IN THE ANCIENT AND MODERN WORLDS

3 credits.

Interrogates the phenomenon and notion of "conspiracy" within the political, social, and religious spheres of the ancient Roman world. Explores the structure of the traditional Roman household, including the preeminence of the paterfamilias and the challenges that women, children, and/or slaves pose to his notional "tyranny". Considers a number of prominent religions that came into conflict with Roman authorities – especially the mystery cults surrounding Bacchus as well as early Christianity. Apply insights from the ancient world to the modern one in our consideration of conspiracies such as the Salem Witch Trials, the Red Scare of the '50s, the Kennedy Assassination, and the Watergate Conspiracy.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Assess and critique the value of the concepts of "conspiracy" and "conspiracy theory" for understanding historical, political, social, cultural, familial, and religious phenomena.

Audience: Undergraduate

### CLASSICS/GEN&WS 351 – WOMEN AND GENDER IN THE CLASSICAL WORLD

3-4 credits.

Constructions of gender and sexuality in the classical world through art, literature and archaeology.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate knowledge of constructions of gender and sexuality in the classical world and their relevance for the contemporary world.

Audience: Undergraduate

**CLASSICS/GEN&WS 361 – SEX AND POWER IN GREECE AND ROME**

3 credits.

Sex as a source of domination and liberation in Ancient Greek and Roman literature and modern European and North American theory and practice, including questions of sexual orientation, gender identity, violence, and self-realization.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Apply critical concepts relating to gender and sexuality to contemporary phenomena.

Audience: Undergraduate

**CLASSICS/HISTORY/POLI SCI 362 – ATHENIAN DEMOCRACY**

3 credits.

Explores key issues in the ideology and practice of Athenian democracy.

Examines democratic values, institutions, rhetoric, and sociology in order to provide the basic tools to understand democracy in its ancient context. Engages with a variety of source material (literary, archaeological, epigraphic) in order to develop multiple skills of interpretation. Some questions examined include: What are the key features of Athenian democracy, how did it change over time, and how did it differ from modern democracy? How did the Athenians justify and critique this political system? How did they reconcile citizen egalitarianism with social inequalities of wealth, gender, and status? To what extent were women, foreigners, slaves, or the poor included or excluded from politics? Was Athenian democracy a robust political system or a system in crisis?

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and use appropriately the specific terminology (names, places, concepts) related to Athenian democracy

Audience: Undergraduate

2. Discuss with appropriate methodological awareness conflicting views expressed in modern scholarship

Audience: Undergraduate

3. Analyze problems relating to the reconstruction of historical concepts in the ancient world with reference to relevant source material

Audience: Undergraduate

4. Critically read and engage with complex academic texts (both ancient sources and modern literature)

Audience: Undergraduate

5. Present knowledge, ideas, and analysis orally (in classroom discussion) and in written formats

Audience: Undergraduate

**CLASSICS 371 – TOPICS IN GREEK CULTURE**

1-3 credits.

Selected aspects of Greek culture (e.g., sports, women, the family, warfare), with emphasis on literary remains.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Greek society and culture.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

**CLASSICS 373 – TOPICS IN CLASSICAL CULTURE**

1-3 credits.

Selected aspects of Classical culture (e.g., sports, women, the family, warfare ), with emphasis on literary remains.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

**CLASSICS 420 – ANCIENT TEXTS, MODERN CONTEXTS**

3 credits.

Explores how classical antiquity has been adapted, translated, and reimagined in the modern world through a variety of media and critical approaches.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Greek myth, literature, and culture.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts and their modern receptions.

Audience: Undergraduate

3. Compare and critique ancient Greek society and contemporary culture.

Audience: Undergraduate

4. Demonstrate knowledge of construction of gender and sexuality in ancient Greece and their relevance to the modern world.

Audience: Undergraduate

**CLASSICS 430 – TOPICS IN CLASSICAL ARCHAEOLOGY**

3 credits.

Explores topics in the archaeology of ancient Greece and Rome, such as the Seven Wonders of the Ancient World, the archaeology of Greek and Roman religion, or Late Antique Palaces.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

**CLASSICS/ENVIR ST 488 – GREEKS, ROMANS AND THE NATURAL ENVIRONMENT**

3 credits.

Examine ways in which the ancient Greeks and Romans interacted with their Mediterranean environments and the various conceptions of the natural world that they developed in poetry, prose and visual art. Explore a number of general topics that will underpin the course as a whole: the characteristics of the Mediterranean environment, the effect of nature on humankind, and the impact of humankind on nature. Study aspects of Greek and Roman engagements with nature, such as agriculture, hunting, sacrifice, the contested relationship between the natural and the civilized, and representations of human beings using terms drawn from the natural world ("bears" of Artemis, cannibalistic "wolves"). Consider how these aspects of the ancient world relate to modern treatments of such themes. (NB: All Greek and Latin texts will be read in English translation.)

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Both Grad &amp; Undergrad

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Both Grad &amp; Undergrad

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Both Grad &amp; Undergrad

4. Carry out and present the results of in-depth research into aspects of the modern and ancient worlds.

Audience: Graduate

5. Develop an extended scholarly argument in written form.

Audience: Graduate

6. Reflect on modern environmental issues in light of ancient experiences and thought.

Audience: Both Grad &amp; Undergrad

7. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of the over-exploitation of natural resources.

Audience: Both Grad &amp; Undergrad

8. Analyze the causes of and solutions for the sustainability challenges of human-caused climate change, pollution and other forms of environmental harm.

Audience: Both Grad &amp; Undergrad

**CLASSICS/HISTORY/RELIG ST 517 – RELIGIONS OF THE ANCIENT MEDITERRANEAN**

3 credits.

Ancient religions in their political, social and cultural contexts; topics include ritual, literary and artistic representations, religious persecutions, and/or modern approaches to the study of ancient religions. Chronological and geographical focus will vary between Greece, Rome, Judaea and Egypt.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate knowledge of ancient Mediterranean religions.

Audience: Undergraduate

**CLASSICS 523 – PALMYRA AND THE PALMYRENES**

3 credits.

Explores the history and culture of ancient Palmyra. Topics considered during the first half of the course will include the city-state's art, architecture, economy, religion, and foreign relations – including with the Roman and Sassanian Empires. Also explores issues of identity and reception centered on the following questions: How did Palmyrenes in the service of the Roman army retain their ethnic identity while also integrating into Roman society? How is ancient Palmyrene society remembered and used by modern cultures to promote diverse political goals? and What effects do museum collection and display and academic publication have on our perception of ancient Palmyra?

**Requisites:** Junior standing**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Both Grad &amp; Undergrad

2. Examine, Analyze, and Interpret ancient texts in translation and material culture.

Audience: Both Grad &amp; Undergrad

3. Compare and Critique ancient Near Eastern societies and cultures to other societies and cultures.

Audience: Both Grad &amp; Undergrad

4. Evaluate the reception of Roman-era Palmyra and Syria in the modern period.

Audience: Both Grad &amp; Undergrad

5. Develop a deeper understanding of the historical context and social structures of Roman-period Syria, especially as instantiated in the city-state of Palmyra and its population (both inhabiting Palmyra and abroad).

Audience: Both Grad &amp; Undergrad

6. Demonstrate familiarity with basic methodological approaches to archaeological, art historical, and textual study in reconstructing the history and society of ancient Palmyra.

Audience: Both Grad &amp; Undergrad

7. Evaluate critically one's own historical and social circumstances with an eye towards understanding the means that Palmyrenes used to construct identity and maintain social boundaries in the context of the ancient Mediterranean world (including places as far-flung as Roman Britain and North Africa).

Audience: Both Grad &amp; Undergrad

8. Develop an extended scholarly argument in written form, while also performing basic work in Palmyrene Aramaic.

Audience: Graduate

**CLASSICS 591 – UNDERGRADUATE SEMINAR: APPROACHES TO THE CLASSICAL WORLD**

3 credits.

Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures through examination and interpretation of ancient texts in translation. Learn to compare and critique ancient Greek, Roman, and/or Near Eastern societies and cultures to other societies and cultures. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.

**Requisites:** Junior standing**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.

Audience: Undergraduate

**CLASSICS 681 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.

Audience: Undergraduate

**CLASSICS 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced
