**Learning Outcomes:** 1. Demonstrate an understanding of professional nursing practice, including participation on an interprofessional team.

Audience: Undergraduate

2. Integrate nursing and interdisciplinary theories and philosophies into nursing practice.

Audience: Undergraduate

3. Examine the important influence of historical, cultural, political, and economic influences on nursing practice and healthcare.

Audience: Undergraduate

4. Apply ethical reasoning and professional values in nursing practice and healthcare.

Audience: Undergraduate

5. Demonstrate critical thinking and professional communication skills

Audience: Undergraduate

**CNP 441 – CHRONIC CARE MANAGEMENT**

3 credits.

Exploration of interaction of biological, psychological, social, and environmental factors important to understanding management of chronic conditions at the individual, family, community, and societal levels.

**Requisites:** Declared in Nursing (Collaborative Program) BSN

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze the interaction of biological, psychological, social, and environmental factors in the management of chronic conditions.

Audience: Undergraduate

2. Synthesize theories and concepts related to the management of chronic conditions to support self-management.

Audience: Undergraduate

3. Integrate selected concepts of pathophysiology and pharmacology in the nursing management of chronic health problems.

Audience: Undergraduate

4. Examine the impact of cultural, spiritual, ethical, healthcare policy, aging, and social concerns in the management of chronic conditions.

Audience: Undergraduate

5. Understand the roles and functions of the nurse in the management of chronic conditions.

Audience: Undergraduate

6. Demonstrate an understanding of resources and models of care to manage chronic health problems across the continuum of care.

Audience: Undergraduate

### **CNP 446 – NURSING RESEARCH AND EVIDENCE-BASED PRACTICE**

3 credits.

Introduces the concept of evidence-based practice, the importance of evidence to improve clinical practice, strategies to evaluate the quality of evidence, and how to design an evidence-based project.

**Requisites:** Declared in Nursing (Collaborative Program) BSN

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Contrast the relationships between theory, research, and nursing practice.

Audience: Undergraduate

2. Differentiate selected quantitative and qualitative approaches to research.

Audience: Undergraduate

3. Manipulate search terms to retrieve best evidence for practice in search engines.

Audience: Undergraduate

4. Critique individual research studies considering research approaches and the rights of human subjects.

Audience: Undergraduate

5. Discuss approaches for fostering adoption of an evidence-based practice change in a healthcare setting.

Audience: Undergraduate

6. Design an evidence-based practice change.

Audience: Undergraduate

### **CNP 447 – LEADERSHIP AND MANAGEMENT**

3 credits.

Examines nursing leadership and management using relevant theories and concepts. Analyze decision-making in relation to communication, delegation, supervision and group process.

**Requisites:** Declared in Nursing (Collaborative Program) BSN

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of the complex and dynamic economic, political, and social influences on health care organizations and professional nursing practice.

Audience: Undergraduate

2. Examine the interrelationships among organizational behavior, leadership and management strategies and processes, and professional nursing practice.

Audience: Undergraduate

3. Analyze decision-making in relation to ethics, communication, delegation, leadership and followership, supervision and group process.

Audience: Undergraduate

4. Analyze leadership and management behaviors, evidence-based leadership, and management research to promote quality care and professional nursing practice.

Audience: Undergraduate

### **CNP 453 – INFORMATION MANAGEMENT AND HEALTHCARE TECHNOLOGY**

3 credits.

Utilize computer and information/decision science to support quality and safety in health care. Explore informatics issues and examine nursing's role in healthcare technology. Opportunities to use and master various healthcare technologies and healthcare data will be given.

**Requisites:** Declared in Nursing (Collaborative Program) BSN

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Delineate the role of the nurse in healthcare informatics

Audience: Undergraduate

2. Describe how the manage data, information, knowledge, and technology to enhance and measure clinical practice, education, administration, and research

Audience: Undergraduate

3. Discuss health care informatics relationship to ethical, legal, political, social, cultural, economic, and management issues that impact the delivery of quality and cost-effective healthcare

Audience: Undergraduate

4. Demonstrate mastery of select and current technology skills

Audience: Undergraduate

5. Evaluate health care forces, trends, and professional standards impacting health care informatics

Audience: Undergraduate

### **CNP 454 – COMMUNITY HEALTH NURSING**

3 credits.

Nursing care of populations and communities to facilitate optimal health outcomes.

**Requisites:** Declared in Nursing (Collaborative Program) BSN

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Compare the components of community health nursing, public health nursing, and community-based nursing, and compare how they are enacted in the community.

Audience: Undergraduate

2. Examine community health issues and health systems/resources using state, national, and international health planning documents.

Audience: Undergraduate

3. Use epidemiological principles as a foundation for community health nursing practice.

Audience: Undergraduate

4. Describe community health nursing interventions used to assess, protect, and improve the health of individuals, families, populations, and communities.

Audience: Undergraduate

5. Articulate the impact of social, cultural, political, and environmental determinants on individual and population health.

Audience: Undergraduate

6. Apply principles of technology (i.e., telehealth) to the specialty of community health nursing.

Audience: Undergraduate

**CNP 490 – SPECIAL TOPICS IN NURSING**

1-4 credits.

The special topics course is designed to provide a planned, systematic analysis of topics, issues and problems in the area of nursing.

**Requisites:** Declared in Nursing (Collaborative Program) BSN

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Evaluate the impact of culture on health, illness, and wellness.

Audience: Undergraduate

2. Analyze the health responses and patterns of the following cultural groups: African American, Latino/Hispanic, Asian/Hmong and American Indian.

Audience: Undergraduate

3. Compare the similarities and differences of these four cultures as each view's health, illness, and wellness.

Audience: Undergraduate

4. Examine the interrelationships among a pluralistic society, the culturally diverse groups with that society, and the health/illness status of the group members, with a specific focus on African Americans, Latino/Hispanics, Hmong/Asians and American Indians.

Audience: Undergraduate

**CNP 519 – CAPSTONE PRACTICUM FOR REGISTERED NURSES**

3 credits.

Synthesizes professional nursing knowledge in a variety of practice settings. Practicum sites may include hospitals, clinics, long-term care (LTC), and community-based settings, or practicums in policy or health care systems. Expand skills sets by exposure to best practices in a clinical setting of choice. The practicum enriches the integration of knowledge from current and past academic and clinical learning experiences.

**Requisites:** CNP 306, 407, 441, 446, 447, 453, and 454 or concurrent enrollment

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate current and future practice goals by developing and enacting specific learning objectives with a clinical preceptor.

Audience: Undergraduate

2. Apply concepts learned in prior BSN-at-Home courses and relate them to professional nursing practice through reflective course assignments.

Audience: Undergraduate

3. Analyze scientific, theoretical, and experiential knowledge to guide professional nursing practice by providing professional nursing care or completing a project under the direction of a nurse preceptor in a hospital, outpatient, or community health care setting.

Audience: Undergraduate

4. Explore a current healthcare issue observed in the practicum setting.

Audience: Undergraduate

## COMMUNICATION ARTS (COM ARTS)

**COM ARTS 100 – INTRODUCTION TO SPEECH COMPOSITION**

3 credits.

Develop written and spoken communication skills through hands-on learning while studying audience-centered public speaking. Focus on becoming more confident and comfortable as a speaker and writer. Strengthen your library research skills and digital literacy. Gain essential skills for success in college courses and life beyond the university, from job interviews to professional presentations, to research talks.

**Requisites:** Students required to take the MSN ESLAT cannot enroll until the ESL 118 requirement is satisfied. Not open to students who have credit for COM ARTS 105 or 181.

**Course Designation:** Gen Ed - Communication Part A  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Write effective public speeches

Audience: Undergraduate

2. Deliver effective public speeches

Audience: Undergraduate

3. Think critically and to apply the skills of critical thinking to the analysis of written and oral texts

Audience: Undergraduate

4. Listen effectively to public speeches

Audience: Undergraduate

5. Utilize research skills and strategies

Audience: Undergraduate

6. Demonstrate an awareness of diversity in audiences by using language that is attentive to people's cultural backgrounds, values, viewpoints, and experiences

Audience: Undergraduate

### COM ARTS 155 – INTRODUCTION TO DIGITAL MEDIA PRODUCTION

4 credits.

Teaches the skills needed to produce, engage with, and understand new and emerging technologies within the context of communication and creative expression. Become a more critical consumer and producer of digital media.

**Requisites:** Not open to special students

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Employ aesthetic and design principles in the creation of digital media

Audience: Undergraduate

2. Integrate ethical and legal considerations in the creation of digital media

Audience: Undergraduate

3. Create works of digital media through the bringing together of concepts, aesthetic choices, and technical execution

Audience: Undergraduate

4. Analyze how stories are constructed and told across forms of digital media

Audience: Undergraduate

5. Critically reflect on the relationship and communication dynamic between artistic self-expression and audience engagement

Audience: Undergraduate

### COM ARTS 181 – ELEMENTS OF SPEECH-HONORS COURSE

3 credits.

The process of oral communication; principles of effective speaking; application of principles in selected speaking and reading projects.

**Requisites:** Declared in an Honors program. Not open to students with credit for COM ARTS 100 or 105. Students required to take the MSN ESLAT cannot enroll until the ESL 118 requirement is satisfied.

**Course Designation:** Gen Ed - Communication Part A  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Write effective public speeches

Audience: Undergraduate

2. Deliver effective public speeches

Audience: Undergraduate

3. Think critically and to apply the skills of critical thinking to the analysis of written and oral texts

Audience: Undergraduate

4. Listen effectively to public speeches

Audience: Undergraduate

5. Utilize research skills and strategies

Audience: Undergraduate

6. Demonstrate an awareness of diversity in audiences by using language that is attentive to people's cultural backgrounds, values, viewpoints, and experiences

Audience: Undergraduate

### COM ARTS 198 – DIRECTED STUDY

1-3 credits.

Elementary level directed study project(s) under supervision of faculty member. Graded on a credit/no credit basis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

### COM ARTS 199 – DIRECTED STUDY

1-3 credits.

Elementary level directed study project(s) under supervision of faculty member. Graded on a lettered basis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2007

**COM ARTS 200 – INTRODUCTION TO DIGITAL COMMUNICATION**

3 credits.

An introduction to digital communication and how it shapes our everyday lives. Develop digital communication skills, explore digital media tools and trends, and examine expressions of power online.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Consider the relationship between digital media and communication

Audience: Undergraduate

2. Explain basic concepts in digital communication theory

Audience: Undergraduate

3. Imagine a specific audience for digital communication

Audience: Undergraduate

4. Fashion digital messages that can effectively engage that audience

Audience: Undergraduate

5. Deploy basic design principles in text, photo, and video digital communications in communication to a chosen institutional audience

Audience: Undergraduate

6. Deploy basic video production techniques in video digital communications to a chosen non-institutional audience

Audience: Undergraduate

**COM ARTS 213 – INTRODUCTORY TOPIC IN COMMUNICATION ARTS: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Current enrollment in a UW-Madison study abroad program

**Requisites:** None

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Identify and describe core concepts within the topic area of communication arts

Audience: Undergraduate

**COM ARTS 250 – SURVEY OF CONTEMPORARY MEDIA**

3 credits.

Key concepts for the critical analysis of television, film, radio, and digital media. Focusing primarily on meanings, aesthetics, technology, media industries, representations, and audiences.

**Requisites:** None

**Course Designation:** Breadth – Humanities Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain what media are and why it's important to study media

Audience: Undergraduate

2. Develop media literacy and skills for engaging in critical analyses of contemporary media

Audience: Undergraduate

3. Understand how media industries developed and how they have changed over time

Audience: Undergraduate

4. Challenge common understandings about the relationship between media technologies and society

Audience: Undergraduate

5. Analyze the different ways that audiences engage with media as individuals and as communities

Audience: Undergraduate

6. Develop the study skills and habits of independent learners to be successful in more advanced Communication Arts courses

Audience: Undergraduate

**COM ARTS 260 – COMMUNICATION AND HUMAN BEHAVIOR**

3 credits.

Concepts and processes relevant to the study of communication and human behavior including approaches to communication inquiry, the dynamics of face-to-face interaction, and the pragmatic and artistic functions of public communication.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain an array of communication theories and research methodologies that are applicable to our lives and the world  
Audience: Undergraduate

2. Analyze real life communication concerns, questions, and problems using insights from scholarly communication research  
Audience: Undergraduate

3. Apply lessons from the course to better understand how communication shapes our lives and the world  
Audience: Undergraduate

4. Practice forms of writing and communicating that are common in our relationships, workplaces, and communities  
Audience: Undergraduate

**COM ARTS 262 – ARGUMENTATION AND DEBATE**

3 credits.

Develop your skills of argument to productively engage people in a diverse society. Learn to discuss differences with others and to contribute positively to a dynamic and diverse society. Critically examine the roles of advocates and audience members. Gain an understanding of the contexts and significance of argument in democratic societies, identify the components and qualities of arguments, construct cogent ethical arguments, and evaluate the arguments of others.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed – Communication Part B

Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the contexts and significance of public argument in democratic societies  
Audience: Undergraduate

2. Identify the components and qualities of arguments and processes of argumentation  
Audience: Undergraduate

3. Construct cogent arguments on political and public issues  
Audience: Undergraduate

4. Evaluate the arguments of others on political and public issues  
Audience: Undergraduate

5. Employ critical reading, logical thinking, and evidence in your arguments  
Audience: Undergraduate

6. Argue and communicate with fluency in writing and speaking conventions  
Audience: Undergraduate

7. Use library resources in productive ways  
Audience: Undergraduate

**COM ARTS 266 – THEORY AND PRACTICE OF GROUP DISCUSSION**

3 credits.

Structure and dynamics of small group decision-making. Critical and creative problems in group interaction processes.

**Requisites:** None

**Course Designation:** Gen Ed - Communication Part B

Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the central theories related to the formation, functioning, and effects of group communication dynamics

Audience: Undergraduate

2. Explain and evaluate the most influential lines of empirical research on the formation, functioning, and effects of group communication dynamic

Audience: Undergraduate

3. Demonstrate effective communication skills through the articulation of critical thinking about group communication dynamics through writing and informal oral presentation

Audience: Undergraduate

4. Hone skills in writing, public speaking, and library research

Audience: Undergraduate

5. Improve writing through responses to feedback and revision

Audience: Undergraduate

**COM ARTS 272 – INTRODUCTION TO INTERPERSONAL COMMUNICATION**

3 credits.

Survey of concepts, theories, and research concerning communication across all phases of interpersonal relationships, focusing on both theoretical and practical applications.

**Requisites:** Not open to students with credit for COM ARTS 273

**Course Designation:** Gen Ed - Communication Part B

Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the major theories and research findings in the field of interpersonal communication

Audience: Undergraduate

2. Describe how interpersonal communication affects vital relationships, such as those with family, friends, and romantic partners

Audience: Undergraduate

3. Reflect on your own interpersonal communication patterns within these relationships, and become better attuned to the needs, motivations, and communication styles of relational partners

Audience: Undergraduate

4. Develop your own interpersonal communication skills, such as emotional intelligence, active listening, and conflict management

Audience: Undergraduate

5. Hone skills in writing, public speaking, and library research

Audience: Undergraduate

### COM ARTS 273 – THEORY AND PRACTICE OF INTERPERSONAL COMMUNICATION

3 credits.

Survey of concepts, theories, and research concerning communication across all phases of interpersonal relationships, focusing on both theoretical and practical applications.

**Requisites:** Not open to students with credit for COM ARTS 272

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the major theories and research findings in the field of interpersonal communication

Audience: Undergraduate

2. Describe how interpersonal communication affects vital relationships, such as those with family, friends, and romantic partners

Audience: Undergraduate

3. Reflect on your own interpersonal communication patterns within these relationships, and become better attuned to the needs, motivations, and communication styles of relational partners

Audience: Undergraduate

### COM ARTS 298 – DIRECTED STUDY

1-3 credits.

Intermediate level project under the direction of faculty member e.g., independent reading with research paper, production project, or member of research team. Graded on a credit/no credit basis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

### COM ARTS 299 – DIRECTED STUDY

1-3 credits.

Intermediate level project under the direction of faculty member e.g., independent reading with research paper, production project, or member of research team. Graded on a letter basis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2016

### COM ARTS 300 – FILM COMEDY

3 credits.

An exploration of the comedy genre, examining theories of humor in film; introducing conceptual tools for critical appreciation and analysis; and investigating different subgenres and tendencies prominent in various phases and traditions of popular film comedy.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain what makes a comedy a comedy

Audience: Undergraduate

2. Draw pertinent distinctions among different forms and techniques of comedy

Audience: Undergraduate

3. Summarize key theories of humor and evaluate their pros, cons, and overlaps

Audience: Undergraduate

4. Discern formal, narrative, and rhetorical variables shaping particular comedic works

Audience: Undergraduate

5. Identify social and ethical values and pitfalls of humor and comedy

Audience: Undergraduate

### COM ARTS 308 – TOPICS IN RHETORIC, POLITICS, AND CULTURE

3 credits.

Explore various topics in rhetoric, politics, and culture.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Explain the role of a rhetorical perspective in interpreting emerging topic areas.

Audience: Undergraduate

2. Demonstrate knowledge of the cultural and/or historical aspects of emerging topic areas.

Audience: Undergraduate

3. Describe and compare key rhetorical theories, concepts, and/or methods

Audience: Undergraduate

4. Critically analyze emerging topic areas using key rhetorical theories, concepts, and/or methods.

Audience: Undergraduate

**COM ARTS 309 – TOPICS IN COMMUNICATION AND SOCIAL DYNAMICS**

3 credits.

Explore topics related to emerging communication practices and experiences, including those related to new information and communication technologies or new applications of such technologies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Explore communication practices and experiences in newly emerging topic areas.

Audience: Undergraduate

2. Review and critically evaluate social scientific theories and research in these topic areas.

Audience: Undergraduate

3. Apply social scientific concepts, theories, and methods to understand and enhance the communication practices and experiences in these topic areas.

Audience: Undergraduate

**COM ARTS 310 – TOPICS IN RHETORIC AND COMMUNICATION SCIENCE**

3 credits.

Explore various topics in rhetoric or communication science.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods used to analyze communication within its historical, technical, cultural, social or political contexts

Audience: Undergraduate

2. Identify and describe key theories, concepts, and methods used to analyze how communication structures shape the flow of information, policy law, culture, or power

Audience: Undergraduate

3. Apply key theories, concepts, and methods in the analysis of communication

Audience: Undergraduate

**COM ARTS/JOURN/RP & SE 312 – DISABILITY AND THE MEDIA**

3 credits.

Examines the interaction between disability and media in modern society. Explore representations of disability in various forms of mass media, including television and film, social media, advertising, and others. Analyze how these representations affect disabled people directly, including the development of their identities, as well as how they influence disability attitudes and stigma throughout society. Discuss overt and casual ableism within media, as well as how the disability community uses media for activism. Discuss issues of access for disabled people (e.g., assistive technology, captions, audio descriptions), as well as the future of disability representations within media.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key concepts and terminology for understanding the intersection of disability and the media, including the medical and social models of disability, definitions and conceptualizations of disability, ableism, stigma, disability justice, disability identity development, and others.

Audience: Undergraduate

2. Identify how disability is represented within various forms of media, and how these representations affect disabled people both directly and indirectly.

Audience: Undergraduate

3. Describe how technology can facilitate access to media for disabled people

Audience: Undergraduate

4. Discuss how the media is and can be utilized in pursuit of disability justice.

Audience: Undergraduate

**COM ARTS 313 – TOPICS IN FILM AND MEDIA STUDIES**

3 credits.

Explore various topics in film and media studies, history, and theory.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain core concepts within the topic area of film and media studies

Audience: Undergraduate

2. Analyze film and media texts, institutions, or audiences from theoretical, historical, and critical perspectives appropriate to the topic under examination

Audience: Undergraduate

3. Communicate effectively about the topic area in film and media studies

Audience: Undergraduate

4. Participate in discussions about diversity, equity, and inclusion for the historically marginalized within the topic area of film and media studies

Audience: Undergraduate

**COM ARTS 315 – THE RHETORIC OF REPRODUCTIVE JUSTICE**

3 credits.

Study the history of reproductive justice activism in the United States.

Consider the legal basis for reproductive rights and key Supreme Court decisions relating to birth control and abortion. Examine core questions: how have reproductive rights been defined differently in different historical moments? What are rights in the context of reproduction? Who has reproductive freedom, and whose reproduction has been controlled? What role does race play in the history of reproductive justice? How does class influence people's access to reproductive healthcare? How does analyzing gender help us understand the history of reproductive justice?

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify key moments in the organized movement for reproductive justice in the United States

Audience: Undergraduate

2. Explain key concepts from rhetorical criticism and social movement studies

Audience: Undergraduate

3. Apply theoretical concepts to primary and secondary texts

Audience: Undergraduate

4. Evaluate the links between reproduction and power

Audience: Undergraduate

5. Collaborate with classmates to develop an understanding of how historical and contemporary movements for reproductive freedom emerged

Audience: Undergraduate

**COM ARTS/GEN&WS 316 – GENDER AND COMMUNICATION**

3 credits.

Effective communication requires awareness of how gender influences communication and our capacity to build lasting and meaningful relationships. Learn about theories and concepts to understand how gender influences our interpersonal, professional, and social lives. Topics include terms and concepts relevant to the study of how we communicate about gender, sex and sexuality, including identity, language and nonverbal behavior, socialization, close personal relationships, education, work, violence, media and social movements.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Employ the definitions and theoretical explanations of gender and communication

Audience: Undergraduate

2. Examine how gender intersects with our personal identity

Audience: Undergraduate

3. Raise self-awareness concerning our communication behaviors within a gendered context

Audience: Undergraduate

4. Foster an open mind so that we may fully comprehend the complex social constructs that influence gender and communication

Audience: Undergraduate

5. Critically evaluate the impact gender has as a tool of power

Audience: Undergraduate

6. Create a safe space for online discussion and learning

Audience: Undergraduate

**COM ARTS 317 – RHETORIC AND HEALTH**

3 credits.

Investigate how the concept of health is rhetorically constructed and deployed in a number of different contexts. Explore how language and argument shape our understanding of health, how health is positioned in opposition to illness and disability, and how the meaning of health has become a site of argument and controversy.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply critical communication and cultural theory to issues of health, illness, disability, and healthcare

Audience: Undergraduate

2. Critically reflect on how structural inequity impacts the health and healthcare experiences of historically marginalized communities

Audience: Undergraduate

3. Illustrate how creative engagement can enhance the understanding of illness and the patient-provider relationship

Audience: Undergraduate

4. Demonstrate written and visual communication skills

Audience: Undergraduate

5. Demonstrate research and critical thinking skills

Audience: Undergraduate

**COM ARTS 318 – INTRODUCTION TO HEALTH COMMUNICATION**

3 credits.

Explore the diversity of health experiences and the ways in which health communication affects our lives, whether it is through interpersonal conversations about health issues, exposure to health information in the media, or through our personal involvement with the healthcare system.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Communicate how the healthcare system is structured and its influence on health perceptions and interactions  
Audience: Undergraduate

2. Identify differences in insurance plans and associated payments  
Audience: Undergraduate

3. Discuss how interpersonal and media messages influence our perceptions of health  
Audience: Undergraduate

4. Critically reflect on the diversity in individuals' health experiences  
Audience: Undergraduate

5. Read and synthesize social scientific research on health communication  
Audience: Undergraduate

**COM ARTS 323 – THE BUSINESS AND CULTURE OF DISNEY**

3 credits.

Analyze The Walt Disney Company and its prominence as a purveyor of narratives, consumer products, and dreams in global culture. Examine the business and culture of Disney to reveal how creators, capitalists, and consumers all relate to the corporate media empires that shape everyday life.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the industrial and cultural dynamics that animate the Walt Disney Company empire  
Audience: Undergraduate

2. Analyze the many products and practice of Disney from a cultural studies perspective attuned to the meaningful relationships between business and culture  
Audience: Undergraduate

3. Communicate effectively about Disney in writing, discussion, and/or creative work  
Audience: Undergraduate

4. Interrogate the ideologies, hierarchies, and inequalities that impact the production and consumption of Disney products  
Audience: Undergraduate

**COM ARTS 325 – MEDIA AND HUMAN BEHAVIOR**

3 credits.

Investigate the ways in which individuals use, create, and respond to media content in the context of increasingly blurred boundaries between "mass" and "interpersonal" media. We will consider social scientific theories and research on a wide array of topics, including media uses and effects with regard to social connection, learning, judgments, perceptions, stereotypes, violence, consumption, and political participation.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe a range of theories of media uses and effects  
Audience: Undergraduate

2. Explain the social scientific logic that you may employ to address questions about media and human behavior  
Audience: Undergraduate

3. Read and critically evaluate social scientific studies on media uses and effects  
Audience: Undergraduate

**COM ARTS 330 – MUSIC INDUSTRIES AND POPULAR CULTURE**

3 credits.

The popular music industries are a vital part of the media industries. Music is the soundtrack to our lives. It provides the score to our quietest moments alone and our loudest parties with friends. Music helps us create and understand our identities and those of others. It is both a form of subversive activism and one of the most commercially valuable commodities in the media industries. Explore the contemporary popular music industries and the roles businesses, artists, audiences, fans, and technologies play in shaping music as a media industry. Focus specifically on the disruption that the internet, digital technologies, and social media have ushered in over the last two decades and the new ways artists, listeners, and businesses are discovering, promoting, sharing and experiencing music. Talk about the music you love, how it gets made, and why that matters for how we understand creative industries, ourselves, and each other.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Assess the structure of the contemporary popular music industries, with attention to the inequalities it creates for artists and workers

Audience: Undergraduate

2. Analyze the role the music industries play in governing the circulation, discovery, and experience of popular music

Audience: Undergraduate

3. Employ audio production tools to create media about music and the music industries

Audience: Undergraduate

4. Develop communication skills for writing and speaking critically about the intersections of music, popular culture, identity, and power

Audience: Undergraduate

**COM ARTS 335 – SOCIAL MEDIA AS LITERATURE**

3 credits.

Analysis of artistic and expressive communication in social media as forms of literature.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Articulate definitions of literature in terms of literary elements that constitute genres

Audience: Undergraduate

2. Articulate some possible relationships between genres and the cultures and contexts that shape them

Audience: Undergraduate

3. Identify social media use in terms of culture, context, literary elements, and genre

Audience: Undergraduate

4. Create social media expressions based on culture, context, and the literary elements from specific social media genres

Audience: Undergraduate

5. Analyze social media expressions based on culture, context, literary elements, and genre

Audience: Undergraduate

6. Articulate ethical implications and possibilities of analyzing artistic and expressive communication online

Audience: Undergraduate

### COM ARTS 343 – HUMAN COMMUNICATION IN THE AGE OF ARTIFICIAL INTELLIGENCE (AI)

3 credits.

Explore the rapidly evolving landscape of communication technologies, with a particular focus on generative artificial intelligence (AI), and discuss its role in communication contexts. Examine the transformative effects of these emerging technologies on individual, social, and professional lives. Consider the potential dark sides of AI, including ethical concerns, biases, and the implications of over-reliance on technology in communication.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe key terms and definitions related to artificial intelligence (AI)

Audience: Undergraduate

2. Explain the characteristics of AI and how it is applied in various human communication contexts

Audience: Undergraduate

3. Demonstrate the use of theoretical frameworks to analyze the impacts of AI on personal and professional lives

Audience: Undergraduate

4. Compare and contrast different AI tools and their effectiveness in real-life scenarios

Audience: Undergraduate

5. Evaluate the use of today's emerging technologies, with an emphasis on the potential impacts they may have on users and society

Audience: Undergraduate

### COM ARTS 344 – SOCIAL MEDIA & WELL-BEING

3 credits.

One of the most widely debated and consequential issues of our time is how social media use affects users' well-being. Examine the ways in which social media use can promote well-being (e.g., by being a source of self-affirmation, social support, and social capital) and hinder it (e.g., by provoking envy and fear-of-missing out). Special attention is paid to how users' well-being deficits (e.g., low self-esteem, depression, anxiety) prompt them to use social media in beneficial or harmful ways.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define well-being and its multiple components, including positive (e.g., high self-esteem, relationship satisfaction) and negative elements (e.g., depression, anxiety)

Audience: Undergraduate

2. Apply theories of human behavior to understand how social media activities can benefit or hurt users' well-being, and how users' well-being shapes their social media activities

Audience: Undergraduate

3. Synthesize current research findings on the relationship between social media use and well-being

Audience: Undergraduate

4. Analyze how characteristics of users (e.g., life experiences, personality traits), specific social media activities and information (e.g., browsing, actively posting) and social media design features (e.g., access to audiences) work together to shape users' well-being

Audience: Undergraduate

5. Evaluate the potential of various social media platforms to support users' well-being

Audience: Undergraduate

**COM ARTS 345 – ONLINE COMMUNICATION AND PERSONAL RELATIONSHIPS**

3 credits.

Examines how personal relationships unfold in online communication contexts (social network sites, online dating, mobile computing). Topics include impression formation and management, deception and trust, self-perception and identity, social support and relationship maintenance.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify features of online environments that affect people's ability to express themselves and to manage relationships  
Audience: Undergraduate

2. Explain how information flow between people in online environments shapes social interaction  
Audience: Undergraduate

3. Describe the latest research findings in the area of online relationships  
Audience: Undergraduate

4. Discuss the main theories and models of how online technologies and online information shape human social behavior  
Audience: Undergraduate

5. Use research methods, practices, and tools for studying online technologies and online information flow in social spaces  
Audience: Undergraduate

**COM ARTS 346 – CRITICAL INTERNET STUDIES**

3 credits.

Traces the Internet's history, reception, audience, industries, rhetorics, fictional and filmic narratives, and potential as a purveyor and transmitter of culture and values.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define key terms/concepts related to the Internet and digital culture and use them in written work and everyday discussions  
Audience: Undergraduate

2. Explain how digital divides intersect with elements of identity, including race, gender, class, and ability, and how this structures different experiences of the Internet and its possibilities  
Audience: Undergraduate

3. Use methods from the course to enhance their Internet-based research skills  
Audience: Undergraduate

**COM ARTS/CHICLA 347 – RACE, ETHNICITY, AND MEDIA**

3 credits.

Introduction to the changing images of race and ethnicity in U.S. entertainment media and popular culture. Surveys history, key concepts and contemporary debates regarding mediated representation of ethnic minorities. Critical and cultural studies approaches are emphasized.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Connect the way that racial minorities have historically been represented in mainstream media to the way that they are represented in contemporary media  
Audience: Undergraduate

2. Analyze the representation of race/ethnicity in contemporary media in a sophisticated way  
Audience: Undergraduate

3. Point to evidence of the way that racism is upheld systemically in society, and the ways racism has been and is currently being challenged  
Audience: Undergraduate

4. Reflect on and articulate your own participation in contributing to or fighting against racial inequalities  
Audience: Undergraduate

5. Increase your ability to understand different perspectives on race in your everyday life, and respectfully engage in discussions of race with colleagues and peers  
Audience: Undergraduate

6. Articulate some of the effects the past has had on present day circumstances, perceptions of, and disparities in, race in the U.S.  
Audience: Undergraduate

7. Recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity  
Audience: Undergraduate

**COM ARTS 350 – INTRODUCTION TO FILM**

3 credits.

Explains how films work using classics such as "Citizen Kane," "Vertigo," "Battleship Potemkin," and "Do The Right Thing." Study film as an art form and a medium, cover all the major film types (silent, classical, and contemporary narrative cinema, art cinema, animation, documentary, and experimental film), and get introduced to two basic approaches to film criticism: authorship criticism and genre criticism. Learn to recognize film techniques--mise-en-scène, cinematography, editing, and sound--and to analyze how filmmakers make us watch, think, and feel.

**Requisites:** Sophomore standing or COM ARTS 250

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use the basic analytical tools that are required for a sustained critical engagement with cinematic narrative and form

Audience: Undergraduate

2. Examine the formal elements, historical and contextual specificities that shape film

Audience: Undergraduate

3. Demonstrate how directors, actors, cinematographers, producers, sound engineers and VFX artist build up a film brick-by-brick

Audience: Undergraduate

4. Analyze the aesthetic and stylistic aspects of film through form and content

Audience: Undergraduate

5. Identify the vocabulary of film language and criticism

Audience: Undergraduate

6. Combine course concepts to investigate contemporary media production in a sustained way

Audience: Undergraduate

**COM ARTS 351 – TELEVISION INDUSTRIES**

3 credits.

Critical overview of the cultural industries driving television in the United States, from broadcast networks and cable to downloading and streaming, focusing on economic and regulatory structures, programming practices, labor, globalization, audiences, and adaptations to changing conditions in the digital age.

**Requisites:** Sophomore standing or COM ARTS 250

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the economic, technological, and regulatory pressures reshaping American television

Audience: Undergraduate

2. Evaluate the relationship between industry and programming aesthetics, constraints, and conventions

Audience: Undergraduate

3. Critically examine the hierarchies of power that shape identity, community, and inclusion in television production cultures

Audience: Undergraduate

4. Develop strong arguments about industry through sustained research and analysis of trade journals and other primary evidence

Audience: Undergraduate

5. Use feedback to improve critical insights about industry through the process of revision

Audience: Undergraduate

6. Apply industry principles of long-term planning, development, and scheduling to course work

Audience: Undergraduate

### COM ARTS 354 – FILM GENRES

3 credits.

Explores six major film genres -- musical; thriller; comedy; horror; drama; and melodrama -- investigating their narrative and stylistic conventions and the principles underlying them. Critical, historical, and theoretical approaches examine definitional criteria and ambiguities; key elements, functions, goals, and effects; and significant subgenres, cycles, and trends.

**Requisites:** COM ARTS 350

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain and evaluate theories on the nature, functions, and appeals of popular storytelling

Audience: Undergraduate

2. Define the concept of genre

Audience: Undergraduate

3. Summarize various types of conventions informing classifications of film by genre

Audience: Undergraduate

4. Describe primary earmarks of specific major genres

Audience: Undergraduate

5. Recount historical developments, cycles, and variations shaping particular genres

Audience: Undergraduate

### COM ARTS 355 – INTRODUCTION TO MEDIA PRODUCTION

4 credits.

Theory and practice of media production and screenwriting.

**Requisites:** Sophomore standing or COM ARTS 155

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Employ the basics of videography and composition

Audience: Both Grad & Undergrad

2. Apply the concepts of cinematic storytelling to the production of short video projects

Audience: Both Grad & Undergrad

3. Examine a variety of cinematic forms, styles, and production strategies

Audience: Both Grad & Undergrad

4. Use industry-standard production tools for screenwriting, pre-visualization, video recording, and motion picture editing

Audience: Both Grad & Undergrad

5. Articulate the relationship and deployment of media production to other industries and fields of study

Audience: Graduate

**COM ARTS 357 – HISTORY OF THE ANIMATED FILM**

3 credits.

Survey of the development of animation as a motion picture production technique, as a film genre, a part of the Hollywood classical cinema, and an independent art form.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify the major studios, directors, technologies and techniques shaping film, television, and avant-garde animation

Audience: Both Grad & Undergrad

2. Compare the history and practice of animation in different cultural, commercial, and artistic contexts

Audience: Both Grad & Undergrad

3. Conduct close analysis of character-animation techniques on a frame-by-frame level

Audience: Both Grad & Undergrad

4. Explain strategies of "limited animation" as a resource for production efficiency and artistic stylization

Audience: Both Grad & Undergrad

5. Articulate relationships between industrial configuration, technology, technique, and style in animation

Audience: Graduate

6. Examine and evaluate the academic literature on animation history, criticism, and theory and discern opportunities for fruitful scholarly contribution

Audience: Graduate

**COM ARTS 358 – HISTORY OF DOCUMENTARY FILM**

3 credits.

Development and history of documentary film and video from Lumiere to the present.

**Requisites:** COM ARTS 350 or declared in Communication Arts MA or PhD

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Delineate the history and evolution of the documentary film tradition

Audience: Undergraduate

2. Identify the major theories, genres, and key directors of documentary film

Audience: Undergraduate

3. Analyze the style and rhetorical goals of key documentary film

Audience: Undergraduate

**COM ARTS 359 – SPORTS MEDIA**

3 credits.

Examines sports media using the frameworks of media and cultural studies. The relationship between sports and popular culture provides an important site for understanding and critiquing the media's relationships to social, cultural, economic, and political structures. Topics for discussion will include sports media industries and technologies; representations of race, class, gender, sexual orientation, nationality, and other identities; and the intersection of sports media cultures with such issues as activism and social change, ethics and morality, gambling and fantasy sports, celebrity athletes, and fandom.

**Requisites:** COM ARTS 250 or 351

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Draw connections between sports media, sports, and culture

Audience: Undergraduate

2. Explain the development of sports media industries

Audience: Undergraduate

3. Analyze representations of race, class, gender, sexuality, etc. in sports media

Audience: Undergraduate

4. Explore the different ways audiences and sports fans engage with sports media

Audience: Undergraduate

**COM ARTS 360 – INTRODUCTION TO RHETORIC IN POLITICS AND CULTURE**

3 credits.

An introduction to the study of rhetoric in politics and culture. Explores the interrelationship of theory, criticism, and practice. Students gain an understanding of rhetoric as a social force emerging from political and cultural contexts and as an influence on those contexts.

**Requisites:** Sophomore standing or COM ARTS 260

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain, assess, and analyze key terms, concepts, theories, and themes scholars use to evaluate rhetorical action

Audience: Undergraduate

2. Apply these critical and theoretical lenses to historical and contemporary discourse and public culture

Audience: Undergraduate

3. Articulate a clear, compelling rationale for how and why rhetoric is valuable and necessary for civic participation & democratic life

Audience: Undergraduate

4. Identify evidences of various rhetorical strategies in our contemporary moment

Audience: Undergraduate

**COM ARTS 361 – INTRODUCTION TO QUANTITATIVE RESEARCH IN COMMUNICATION**

3 credits.

An introduction to social science research methods and statistical analyses applicable to the study of communication research and mass media effects.

**Requisites:** Sophomore standing and satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed – Quantitative Reasoning Part B

Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Manipulate quantitative information to create models, and/or devise solutions to problems using multi-step arguments, based on and supported by quantitative information

Audience: Undergraduate

2. Evaluate models and arguments using quantitative information

Audience: Undergraduate

3. Express and interpret in context, models, solutions, and/or arguments using verbal, numerical, graphical, algorithmic, computational or symbolic techniques

Audience: Undergraduate

4. Become familiar with key issues in designing surveys, experiments, and content analyses

Audience: Undergraduate

5. Develop clear, falsifiable hypotheses

Audience: Undergraduate

6. Examine the validity and reliability of measures for an online survey to test your hypotheses

Audience: Undergraduate

7. Understand the logic of various statistical tests, which statistics are appropriate to examine your data, including univariate distributions, bivariate relationships, and moderated relationships

Audience: Undergraduate

8. Become competent in the use of Excel to conduct these analyses, and evaluate your hypotheses

Audience: Undergraduate

9. Assess the limitations of your study and the implications for your conclusions

Audience: Undergraduate

**COM ARTS 368 – PERSUASION AND SOCIAL INFLUENCE**

3 credits.

Study social influence and persuasion. Learn how to improve your persuasive and social influence skills, lower an audience's resistance to a persuasive message, and be a savvy consumer of persuasive messages and techniques. Explore nonconscious and emotional social influence processes in social media and other settings, especially in the context of influencers, marketing, advertising, and communication campaigns. Create a persuasion campaign, with both online and interpersonal components.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an understanding of social influence and persuasion in online contexts, such as social media influencers, persuasive AI, and persuasive technologies.

Audience: Undergraduate

2. Describe the fundamental assumptions and the causal mechanisms of selected theories of persuasion, social influence, and compliance gaining.

Audience: Undergraduate

3. Analyze multiple persuasive messages from the perspective of course theories.

Audience: Undergraduate

4. Create persuasive messages utilizing theories from the course.

Audience: Undergraduate

5. Create and use compliance-gaining techniques discussed in the course.

Audience: Undergraduate

6. Become a more critical and savvy consumer of social influence and persuasive messages.

Audience: Undergraduate

**COM ARTS 369 – RHETORIC OF THE U.S. PRESIDENTIAL ELECTION**

3 credits.

Approach the U.S. presidential election from a rhetorical perspective. Analyze how individual candidates and political parties use and abuse language and other symbols to 1) identify with U.S. voters; 2) advance an agenda to address a current need; 3) present a particular narrative of U.S. history, identity, and national purpose; and 4) convince U.S. citizens to support their candidacy and policies on Election Day.

**Requisites:** Sophomore standing or COM ARTS 260

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the rhetorical norms and expectations for U.S. presidential rhetoric throughout history.

Audience: Undergraduate

2. Assess and analyze how presidential speech (and the speech of potential U.S. presidents) contributes to ideas about American identity, history, diversity, and equity.

Audience: Undergraduate

3. Define and describe the key issues and debates shaping the U.S. presidential election, including party platforms, policy proposals, and other related issues.

Audience: Undergraduate

4. Articulate a clear, compelling rationale for how and why rhetoric is valuable and necessary for civic participation and democratic life.

Audience: Undergraduate

**COM ARTS 370 – GREAT SPEAKERS AND SPEECHES**

3 credits.

Significant speeches from throughout history, generally from the United States. Speakers studied include Pericles, Abraham Lincoln, Elizabeth Cady Stanton, Frederick Douglass, Emma Watson, John F. Kennedy, Barbara Jordan, Nelson Mandela.

**Requisites:** Sophomore standing or COM ARTS 260

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Read and discuss a wide variety of speeches  
Audience: Undergraduate

2. Listen to, comprehend, and assess oral discourse  
Audience: Undergraduate

3. Understand and utilize methods of rhetorical criticism when approaching texts  
Audience: Undergraduate

4. Engage rhetorical theory in your comprehension and assessment of discourse  
Audience: Undergraduate

**COM ARTS 371 – COMMUNICATION AND CONFLICT RESOLUTION**

3 credits.

Examines intra- and interpersonal theories of the causes and functions of conflict. Focuses on message strategies for conflict resolution and/or management. Both theoretical and applied issues.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain a variety of ways to think about conflict and conflict management  
Audience: Undergraduate

2. Identify the basic components of conflict escalation in interpersonal, organizational and intercultural conflicts  
Audience: Undergraduate

3. Interrogate your own conflict behavior and how it facilitates/inhibits conflict management  
Audience: Undergraduate

4. Expand your response repertoire for conflict-management situations  
Audience: Undergraduate

**COM ARTS 372 – RHETORIC OF CAMPAIGNS AND REVOLUTIONS**

3 credits.

Public discourse as it affects and reflects the process of dynamic social change. Historical and contemporary instances of rhetorical processes.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Explain the abolition movement, the US women's suffrage movement, the twentieth century movement for reproductive justice, and contemporary activism  
Audience: Both Grad & Undergrad

2. Utilize rhetorical methodologies to approach movement texts  
Audience: Both Grad & Undergrad

3. Read across primary texts, scholarly texts that provide contextualized analysis of primary sources, and book-length texts detailing movement history and actor biography  
Audience: Both Grad & Undergrad

4. Recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity  
Audience: Both Grad & Undergrad

5. Examine questions and make decisions with consideration for the cultural perspectives and worldviews of others  
Audience: Both Grad & Undergrad

6. Apply concepts from the course to contemporary examples of social movement rhetoric at the graduate level  
Audience: Graduate

7. Communicate about the rhetoric of campaigns and revolutions in graduate level communication genres  
Audience: Graduate

**COM ARTS 373 – INTERCULTURAL COMMUNICATION & RHETORIC**

3 credits.

The transnational movement of people, goods, and discourses blurs the boundaries between the local and global, making intercultural communication and rhetoric essential to our personal and public lives. We explore how rhetoric and communication function between and across cultures and examine how culture, history, and power constitute our cultural identities, our modes of communication, and how we engage with others.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain how culture and communication are mutually influential factors in human behavior

Audience: Undergraduate

2. Apply key theories about culture, communication and power to understand and explain the world around them

Audience: Undergraduate

3. Articulate how their identities, values, and ways of communication are steeped in culture, history and socio-political, economic dynamics

Audience: Undergraduate

4. Practice their intercultural competency and fluency

Audience: Undergraduate

5. Articulate some of the effects the past has had on present day circumstances, perceptions of, and disparities in, race in the U.S.

Audience: Undergraduate

6. Examine questions and make decisions with consideration for the cultural perspectives and worldviews of others

Audience: Undergraduate

**COM ARTS/RELIG ST 374 – THE RHETORIC OF RELIGION**

3 credits.

Rhetorical character of religious controversy and sectarian persuasion in Western religion.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2022

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods used to analyze religious communication within their historical, technical, cultural, social or political contexts

Audience: Undergraduate

2. Identify and describe key theories, concepts, and methods used to analyze how media shape the flow of information, policy law, culture, and power in relation to religious communication

Audience: Undergraduate

3. Apply key theories, concepts, and methods in the analysis of religious communication

Audience: Undergraduate

**COM ARTS 375 – ETHICS OF ENTERTAINMENT MEDIA**

3 credits.

Develop skills for viewing and interrogating entertainment media through the lens of ethical theory and to articulate their own ethical stance on a diverse range of media, including documentary film, sports entertainment, reality television, and digital media. By approaching ethics from a media studies perspective, ask questions about how media are produced, how audiences are created and engaged, how communities and cultures are represented, and how we should respond to these different forms of media and the ethical questions that they raise.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain core ethical theories

Audience: Undergraduate

2. Build arguments for moral positions and think about them critically

Audience: Undergraduate

3. Use ethical theories to analyze moral issues within contemporary entertainment media

Audience: Undergraduate

4. Distinguish between different moral dilemmas as they relate to the production, consumption, and analysis of media texts

Audience: Undergraduate

**COM ARTS 377 – TOPICS IN DIGITAL STUDIES (COMMUNICATION SCIENCE & RHETORIC)**

3 credits.

Explore topics in communication science and rhetoric, with a digital focus.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods used to analyze digital media within their historical, technical, cultural, social or political contexts.

Audience: Undergraduate

2. Identify and describe key theories, concepts, and methods used to analyze how digital information structures shape the flow of information, policy law, culture, or power.

Audience: Undergraduate

3. Apply key theories, concepts, and methods in the analysis of digital media and digital information structures.

Audience: Undergraduate

**COM ARTS 379 – GLOBAL TECHNOLOGY & DIGITAL CULTURE**

3 credits.

Digital media, devices, and networks are deeply embedded in our cultural fabric and are reshaping cultures worldwide. While networks enable instant communication and sharing, they aren't neutral, and their benefits aren't evenly distributed. Examine how digital environments affect global cultures differently, and how local differences shape the use of technology. Explore what being 'global' means in the context of rapid, technologically facilitated changes and analyze how these technologies impact offline experiences within communities based on nationality, region, race, gender, and class.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze global technologies, industries, and infrastructures from a historical and cultural standpoint.

Audience: Undergraduate

2. Describe concepts related to cultural globalization and transnational flows, and explain how digital technology impacts them.

Audience: Undergraduate

3. Explain how the design of specific digital technologies and access to them can lead to imbalances in social power.

Audience: Undergraduate

4. Evaluate how global adoption of technologies leads to changes in local cultural practices.

Audience: Undergraduate

5. Analyze concepts such as participatory culture and consumption and apply them to social and cultural contexts across the globe.

Audience: Undergraduate

6. Analyze how existing relationships of social power (for example race, gender, and class) can be exacerbated or resisted through digital technologies.

Audience: Undergraduate

**COM ARTS 402 – THE PSYCHOLOGY OF COMMUNICATION**

3 credits.

The role and function of information processing in human communication behavior.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Employ a range of theoretical ideas of social cognition

Audience: Undergraduate

2. Explain how these ideas may be (or have been) applied to studying human communication process

Audience: Undergraduate

3. Develop analytical skills to analyze human communication issues critically

Audience: Undergraduate

4. Analyze a communication phenomenon based on critically evaluation and integration of research literature

Audience: Undergraduate

**COM ARTS/GEN&WS 418 – GENDER, SEXUALITY, AND THE MEDIA**

3 credits.

Examines images of gender and sexuality in the media, with a focus on contemporary media in the U.S. Using theories from cultural studies, film and media studies, gender studies, and communication explore different processes and practices of gender and sexuality. Look at the way that gender and sexuality are constructed through social, cultural, and economic forces, and the way that these identities intersect with other social identities such as race, ethnicity, and class. Consider the way that media impact our understanding of feminism and post-feminism, violence, celebrity, consumer culture, subcultures and activism.

**Requisites:** GEN&WS 101, 102, 103, SOC/GEN&WS 200, COM ARTS 250 or graduate/professional standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the way that systems of oppression such as patriarchy and heteronormativity are manifested in today's society and media cultures

Audience: Both Grad & Undergrad

2. Analyze and interrogate the meaning of contemporary representations of sexuality and gender in the media

Audience: Both Grad & Undergrad

3. Conduct intersectional analyses of the way that different categories of identity such as gender, sexuality, race, class, and ability come together in the media

Audience: Both Grad & Undergrad

4. Articulate their own perspective on how empowerment and liberation are connected to media practices and cultures of production and consumption

Audience: Both Grad & Undergrad

5. Create and participate in creating a respectful environment for having informed discussions about power, identity, representation, and difference with peers

Audience: Both Grad & Undergrad

6. Demonstrate advanced analysis of gender and sexuality in media based on rigorous engagement with media studies scholarship

Audience: Graduate

**COM ARTS/CHICLA 419 – LATINO/AS AND MEDIA**

3 credits.

Critical and historical survey of the participation and representation of Latino/as in U.S. film, television, and popular culture, with a primary focus on Hispanic representation in Hollywood-produced imagery. The counter-images of Latino and Latina media producers also will be explored.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Connect the way that Latinx people have historically been represented in mainstream media to the way that they are represented in contemporary media and to their treatment in contemporary society more

Audience: Both Grad & Undergrad

2. Define anti-Latinx racism and its connections to other forms of oppression, including sexism, heteronormativity, classism, colonization, and ableism

Audience: Both Grad & Undergrad

3. Analyze the different constraints and possibilities for how Latinx people produce and consume media texts

Audience: Both Grad & Undergrad

4. Respectfully engage in nuanced discussions about race and reflect on the cultural perspectives and worldviews of others

Audience: Both Grad & Undergrad

5. Demonstrate advanced analysis of Latinx media texts that rigorously engages with scholarship in Latinx media studies

Audience: Graduate

**COM ARTS/ASIAN AM 420 – ASIAN AMERICANS AND MEDIA**

3 credits.

Examines representations of Asian American in American media using historical, analytical, and critical approaches. Issues of cultural production, identity, race, politics, and gender are linked to examinations of specific media forms.

**Requisites:** CHICLA/COM ARTS 347, ASIAN AM 101, or sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Connect the way that Asian Americans have historically been represented in mainstream media to the way that they are represented in contemporary media and to their treatment in contemporary society more broadly

Audience: Both Grad & Undergrad

2. Define anti-Asian racism and its connections to other forms of oppression, including sexism, heteronormativity, classism, colonization, and ableism

Audience: Both Grad & Undergrad

3. Analyze the different constraints and possibilities for how Asian Americans produce and consume media texts

Audience: Both Grad & Undergrad

4. Respectfully engage in nuanced discussions about race and reflect on the cultural perspectives and worldviews of others

Audience: Both Grad & Undergrad

5. Demonstrate advanced analysis of Asian American media texts that rigorously engages with scholarship in Asian American media studies

Audience: Graduate

### COM ARTS/ASIAN 443 – INDIAN CINEMA IN THE U.S. AND BEYOND

3 credits.

India is home to one of the largest film industries in the world, Bollywood. Beyond Bollywood, India has a thriving film culture that caters to its many regional languages. Explore India's diverse, yet interconnected film and media cultures as well as the global resonances of Indian- and South-Asian-inflected media elsewhere. Examine questions of diasporic identity through media produced by the South Asian American community. Consider questions of genre, style and auteurship, ethnicity, decolonization, gender non-conformity, caste, settler colonialism, censorship and linguistic nationalism that shape cinematic discourses in the country and its intersection with South Asian diaspora in the United States.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Critically examine the representational nuances, ideological underpinnings and political rhetoric underlying South Asian Diaspora media texts.

Audience: Both Grad & Undergrad

2. Examine the aesthetic, contextual and historical framings of media artifacts to understand how it shapes conversations on ethnicity, race and diversity.

Audience: Both Grad & Undergrad

3. Analyze the varying patterns of desire, labor and agential assertions that mark film and media forms and practices to understand how it hinders production and positionality.

Audience: Both Grad & Undergrad

4. Demonstrate how film and media can provide us with conceptual grounds to understand the larger social realities that govern representational politics and media production practices.

Audience: Both Grad & Undergrad

5. Critically examine how postcoloniality has been used as a frame of reference in film and media studies.

Audience: Graduate

6. Examine how power, identity and representations shape diasporic media and its pursuit of an audience.

Audience: Both Grad & Undergrad

7. Encourage participation in the multi-cultural context by offering ways to engage with media material to understand how past has shaped present day circumstances, perceptions of, and disparities in race in the U.S.

Audience: Both Grad & Undergrad

8. Recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity.

Audience: Both Grad & Undergrad

9. Apply course concepts to their lives outside classroom by demonstrating self-awareness and empathy towards the cultural perspectives and worldviews of others.

Audience: Both Grad & Undergrad

### COM ARTS/AFRICAN/L I S 444 – TECHNOLOGY AND DEVELOPMENT IN AFRICA AND BEYOND

3 credits.

Surveys the past 20 years of digital technology and communications culture on the African continent, cross-referenced with discourse on technology experiences in other parts of the developing world, through the framework of development studies. Readings include case studies of micro-tech practices as well as political and social use of new media, and government and NGO-led tech interventions. Information Communication Technology for Development (ICT4D) is a key area of focus. Cross-discipline areas include communications and media studies, African, Latin American and International area studies, as well as the social anthropology of technology and science, and design. Think critically about technology use in the context of different tech cultures from around the world. Apply this perspective towards new media solutions to social problems.

**Requisites:** Junior standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Identify canonical authors and texts, historical forms, genres, and structures in African culture studies and information and communication studies. Students will demonstrate their understanding of major theories, approaches, concepts and current and classical research findings.

Audience: Both Grad & Undergrad

2. Understand their own learning processes and possess the capacity to intentionally seek, evaluate and learn from information, and recognize and reduce bias in their thinking.

Audience: Both Grad & Undergrad

3. Communicate effectively through essays, oral presentations and discussion and project based work, so they may share their knowledge, wisdom and values with others across social and professional settings.

Audience: Both Grad & Undergrad

4. Write and speak across disciplinary boundaries with regard to existing research about Africa, the African diaspora and international development.

Audience: Graduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of the historic and contemporary challenges of development-oriented tech projects, and identify areas within ICT which could assist in their sustainability. [Sustainability]

Audience: Both Grad & Undergrad

6. Analyze sustainability issues and/or practices using a systems-based approach of information access and media communications within the sustainability framework with regards to environmental change, public infrastructure for clean water and sanitation, urban growth, education, governance and democracy, and public health. [Sustainability]

Audience: Both Grad & Undergrad

**COM ARTS 448 – MEDIA AND NATIONAL IDENTITY**

3 credits.

Examination of the various roles that film, television, and other media play in creating, challenging, and negotiating national and global identities.

**Requisites:** COM ARTS 250 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the nation as a unit that is in large part constituted by media, and be able to explain how this act of constitution occurs

Audience: Both Grad & Undergrad

2. Critically examine how lines of belonging and exclusion are drawn by the media

Audience: Both Grad & Undergrad

3. Critically reflect upon ways in which media become a primary battleground for competing notions of national identity

Audience: Both Grad & Undergrad

4. Assess multiple ways in which access to various identities is in some cases restricted by media to certain consumers or citizens

Audience: Both Grad & Undergrad

5. Identify and pursue opportunities to contribute to the scholarly analysis of national identity

Audience: Graduate

**COM ARTS 449 – SOUND CULTURES: PODCASTING AND MUSIC**

3 credits.

Sound plays a crucial but understudied role in experiences of media and cultural life. From the mundane sounds of our daily routines to the irresistible refrains of our favorite songs, sound (in its various guises as noise, music, echo, vibration, etc.) is fundamental to communications media and, more broadly, to our perceptions of the world around us. An introduction to the emerging field of sound studies and an investigation into the role sound and music (or lack thereof) play in various communications media. Through audio assignments such as the creation of podcasts, learn the basics of digital audio recording and editing software and how to present and distribute audio content via the Internet, specifically as podcasts. Gain practical skills for creating digital audio projects and a deeper appreciation for how paying attention to sound leads to unique understandings of history, culture, and media technologies.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply theories from the field of sound studies to discussions of the everyday sounds that structure our experiences.

Audience: Both Grad & Undergrad

2. Use digital audio recording/editing technologies and techniques to build a portfolio of soundwork for future projects

Audience: Both Grad & Undergrad

3. Critically analyze how sounds and sound media shape our identities and are shaped by factors such as race, gender, class and other markers of identity

Audience: Both Grad & Undergrad

4. Demonstrate facility with theory and methodologies from the field of sound studies

Audience: Graduate

5. Apply concepts, ideas and arguments from research in sound studies in the production of a scholarly podcast or soundwork

Audience: Graduate

**COM ARTS 450 – CULTURAL HISTORY OF BROADCASTING**

3 credits.

Traces the development of broadcasting as a cultural institution, examining the emergence of radio and television within the context of national identity and globalization.

**Requisites:** COM ARTS 250 or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify major events, ideas, and institutions from the history of American broadcasting

Audience: Both Grad & Undergrad

2. Analyze a range of television and radio programs and evaluate such programs as historical documents with relevance to American cultural, technological, and industrial histories

Audience: Both Grad & Undergrad

3. Describe the ways television and radio programs engage issues of class, race, gender, sexuality, ethnicity, religion, region, and nationhood

Audience: Both Grad & Undergrad

4. Evaluate primary and secondary sources as historical evidence and determine the range of historical claims such evidence supports

Audience: Both Grad & Undergrad

5. Practice the skills needed to conduct historical research and writing

Audience: Both Grad & Undergrad

6. Identify and pursue opportunities to contribute to the field of broadcasting history

Audience: Graduate

**COM ARTS 451 – TELEVISION CRITICISM**

3 credits.

Analysis of selected television programming, interpretation of contemporary television programs, and survey of existing critical approaches.

**Requisites:** COM ARTS 351 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop a wide variety of tools for the close, incisive analysis of television programs

Audience: Both Grad & Undergrad

2. Critically evaluate contemporary television programs for their messages and modes of delivering said messages

Audience: Both Grad & Undergrad

3. Explain in nuanced, sophisticated ways how television form and content are interrelated

Audience: Both Grad & Undergrad

4. Explain how a range of cultural, contextual factors impact textual meanings

Audience: Both Grad & Undergrad

5. Identify and pursue opportunities to contribute to the field of television studies

Audience: Graduate

### COM ARTS 454 – CRITICAL FILM ANALYSIS

3 credits.

Intensive analysis of selected films, using contemporary critical theories and methods.

**Requisites:** (Junior standing and COM ARTS 350) or declared in Communication Arts MA or PhD

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify the formal patterning of mise-en-scene, cinematography, and editing that produces various forms of meaning in a film text

Audience: Both Grad & Undergrad

2. Summarize different approaches to film analysis derived from semiotics, feminism, queer theory, critical race theory, Marxism, and neoformalism

Audience: Both Grad & Undergrad

3. Apply an array of principles and perspectives in close description and analysis of film scenes and sequences

Audience: Both Grad & Undergrad

4. Assess and utilize critical concepts pertinent to methodologies and practices of film analysis

Audience: Graduate

### COM ARTS 455 – FRENCH FILM

3 credits.

Survey of French cinema from 1895 to the present. Emphasis on aesthetic trends, film movements, film industry, and cultural context.

**Requisites:** COM ARTS 350 or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the major directors, movements and cycles that have shaped the history of French cinema

Audience: Both Grad & Undergrad

2. Explain the variety of modes of production in use, including large-scale industrial, independent, and artisanal models

Audience: Both Grad & Undergrad

3. Write persuasively, elegantly, and with precision about the narrative structure, style, and cultural context of the films covered in the course

Audience: Both Grad & Undergrad

4. Identify and pursue opportunities to contribute to the field of French film studies

Audience: Graduate

**COM ARTS 458 – GLOBAL MEDIA CULTURES**

3 credits.

Analysis of media systems, practices and uses from a global perspective.

**Requisites:** COM ARTS 351 or graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Analyze mechanisms and processes by which media move globally

Audience: Both Grad & Undergrad

2. Critically evaluate what cultural ripple effects often accompany global media movement, and how power, identity, and representation are intricately involved in media movement

Audience: Both Grad & Undergrad

3. Describe how specific media move across the globe

Audience: Both Grad & Undergrad

4. Explain how media interact with nation and national identity in diverse ways

Audience: Both Grad & Undergrad

5. Critically evaluate modern media developments within a history of how media have moved globally

Audience: Both Grad & Undergrad

6. Contextualize the United States' and US media's specific roles in both the global media economy and culture

Audience: Both Grad & Undergrad

7. Identify and pursue opportunities to contribute to the field of global media studies

Audience: Graduate

**COM ARTS 459 – NEW MEDIA AND SOCIETY**

3 credits.

Explores political, economic and cultural relationships between new media of communication and society, including issues of history, race, gender, class, globalization, national identity and everyday life.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Link key terms and course concepts to contemporary debates on technology and new media

Audience: Both Grad & Undergrad

2. Use a "new" media technology, while reflecting on the adoption process

Audience: Both Grad & Undergrad

3. Document the history and adoption of a new media technology, paying attention to its cultural implications

Audience: Both Grad & Undergrad

4. Demonstrate facility with theory and methodologies from the field of new media studies

Audience: Graduate

5. Apply concepts, ideas and arguments from research in new media studies toward an original analysis of a new media object/technology

Audience: Graduate

**COM ARTS/ITALIAN 460 – ITALIAN FILM**

3 credits.

General survey of Italian cinema and of the relationship between film and the other arts. Consideration of the Italian and European socio-political context and developments in film theory.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify the major directors, genres, movements and technological developments that have shaped the history of Italian cinema

Audience: Both Grad & Undergrad

2. Contextualize Italian film within cultural, socio-political and industrial developments at the national, European and global levels

Audience: Both Grad & Undergrad

3. Identify major theories of film aesthetics impacting the development of Italian cinema

Audience: Both Grad & Undergrad

4. Develop research skills and write persuasively, elegantly, and with precision about the narrative structure, style, and cultural context of Italian films

Audience: Both Grad & Undergrad

5. Conduct research and engage critically with the historiographical, theoretical, and methodological practices of scholarship in Italian film studies.

Audience: Graduate

**COM ARTS 461 – GLOBAL ART CINEMA**

3 credits.

In the wake of World War Two, European directors began making films that employed location shooting, ambiguity, psychological realism, and unfamiliar stylistic flourishes. Such films drew on literary modernism, experimenting with time shifting, extreme duration, subjectivity, and reflexivity. "Art cinema," as it came to be called, is now the dominant storytelling mode of the contemporary film festival circuit and constitutes a robust alternative to mainstream genre cinema. Explores art cinema from a variety of national and transnational contexts, analyzing its narratives, styles, and cultural contexts. Investigates the work of directors from the first generation of art cinema, including Michelangelo Antonioni, Robert Bresson, Ingmar Bergman, and Agnès Varda, and more recent work by Aki Kaurismäki, Abbas Kiarostami, Wong Kar-wai, and Claire Denis.

**Requisites:** COM ARTS 350 or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Identify the major directors, films, and cultural contexts that have shaped the history of art cinema

Audience: Both Grad & Undergrad

2. Analyze distinctive approaches to narrative and style in art Cinema

Audience: Both Grad & Undergrad

3. Demonstrate understanding of the funding, exhibition, and reception of art cinema

Audience: Both Grad & Undergrad

4. Evaluate the scholarly literature and assess opportunities to contribute to the field of art-cinema studies

Audience: Graduate

**COM ARTS 462 – AMERICAN INDEPENDENT CINEMA**

3 credits.

History of American independent narrative cinema with particular attention to the impact various art movements and subcultures have had on its development over the past 60 years.

**Requisites:** COM ARTS 350

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Identify major directors and films highlighting the history of American Independent cinema

Audience: Undergraduate

2. Explain cultural, artistic, and commercial contexts shaping this cinematic movement

Audience: Undergraduate

3. Delineate key difference between indie and mainstream film-making by analyzing distinctive narrative structures, styles, and modes of production

Audience: Undergraduate

**COM ARTS 463 – AVANT-GARDE FILM**

3 credits.

Examines the history and aesthetics of avant-garde/experimental film from its beginnings in the late 1910s to the present. Studies key aesthetic programs and their relations to adjacent movements in art and critical theory.

**Requisites:** COM ARTS 350 or declared in Communication Arts MA or PhD

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain general ideas and definitions of "avant-garde"

Audience: Both Grad & Undergrad

2. Distinguish aesthetic features associated with avant-garde film

Audience: Both Grad & Undergrad

3. Delineate a body of critically acclaimed and emblematic works in this mode

Audience: Both Grad & Undergrad

4. Contextualize avant-garde films in relation to broader artistic movements and tendencies

Audience: Both Grad & Undergrad

5. Think about the nature and possibilities of the cinematic medium in new ways

Audience: Both Grad & Undergrad

6. Communicate the nature and value of creative originality, perceptual expansion, and aesthetic pleasure

Audience: Both Grad & Undergrad

7. Evaluate methodologies and trends in the academic literature on avant-garde cinema and assess areas of inquiry inviting further conceptual engagement, research, and scholarly publication

Audience: Graduate

**COM ARTS 465 – EDITING AND POST-PRODUCTION FOR VIDEO AND FILM**

4 credits.

Focus on the theory and practice of video editing and post-production. Gain a thorough understanding of narrative editing techniques, color correction, audio post-production and the requisite software. Discusses the art of post-production and how post-production affects narrative function in moving picture media (including films, music videos, and television).

**Requisites:** COM ARTS 355**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Create effective dramatic scenes from raw footage

Audience: Undergraduate

2. Implement the principles and approaches underlying editing, both in terms of cutting mechanics and in terms of narrative construction

Audience: Undergraduate

3. Explain how editing fits within the larger post-production workflow

Audience: Undergraduate

4. Practice the basic elements of color correction and post-production sound

Audience: Undergraduate

5. Import and synchronize footage and prepare it for editing.

Audience: Undergraduate

6. Recognize how the tools of post-production have changed over time, and will continue to develop

Audience: Undergraduate

**COM ARTS 466 – WRITING FOR TELEVISION AND FILM**

3 credits.

Basic introduction to the elements of a successful dramatic screenplay. Particular emphasis placed on story concept, dramatic structure, character development, dialogue, and visual storytelling.

**Requisites:** COM ARTS 355**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Analyze, critically evaluate, and critique narrative screenplays and screenwriting

Audience: Undergraduate

2. Compose original, short, narrative screenplays, treatments and spec scripts

Audience: Undergraduate

3. Employ industry standards for screenplay formatting, pitch decks, and treatments

Audience: Undergraduate

4. Create narrative (fictional) characters, scenes, and story ideas

Audience: Undergraduate

**COM ARTS 467 – CINEMATOGRAPHY AND SOUND RECORDING**

4 credits.

Learn the fundamentals of short-film production, including cinematography, lighting, and sound recording. With an emphasis on dramatic storytelling, produce scenes from existing scripts, rotating through crew positions. Directing, editing, and color grading will be covered, with casting, location scouting, and production design incorporated to successfully produce each scene. Gain an understanding of the inner-workings of a film crew, the operation of digital cinema technologies, and visual and aural storytelling aesthetics and techniques.

**Requisites:** COM ARTS 355**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify how story works in short film form  
Audience: Undergraduate

2. Produce a scene from a motion picture screenplay, from pre-production to post-production

Audience: Undergraduate

3. Develop proficiency and command with the course technologies to achieve desired results

Audience: Undergraduate

4. Combine aesthetic options and technical limitations to make creative decisions on each project

Audience: Undergraduate

5. Follow industry standards throughout the production process

Audience: Undergraduate

**COM ARTS 468 – PRODUCING FOR INTERNET TV AND VIDEO**

3 credits.

Producing Internet television and video (which encompasses a wide range of media content, from expensive Netflix and Amazon shows to low-budget YouTube channels). With its focus on "producing" and the role of the producer, combines the hands-on production work of writing, shooting, and editing videos with an emphasis on entrepreneurship and the innovation of sustainable business models.

**Requisites:** COM ARTS 155 or 355**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Lead video projects in the role of the producer, the position in which art and commerce necessarily intersect

Audience: Undergraduate

2. Develop skills in cinematography and editing

Audience: Undergraduate

3. Analyze the Internet as a platform for distribution, advertising, and audience engagement, along with Internet aesthetics, economics, and policies

Audience: Undergraduate

4. Analyze a complex industry environment

Audience: Undergraduate

5. Prepare strategies to address the creative and economic imperatives of Internet video

Audience: Undergraduate

### COM ARTS 470 – CONTEMPORARY POLITICAL DISCOURSE

3 credits.

Examines themes, genres, and significant instances of contemporary political discourse, as well as issues and concerns that arise in public discussions of political discourse. Case studies and theoretical analyses are considered.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically examine the speech, writings, imagery, and symbolic actions that have influenced the origins and outcomes of democratic revolutions across the globe

Audience: Undergraduate

2. Identify both recurring and distinctive elements of the speech of leaders and groups studied (including types of argument, rhetorical devices, branding, imagery, and other figurative speech)

Audience: Undergraduate

3. Develop and demonstrate a critical, comparative perspective that will enable students to step back from, and make sense of, the different leaders, groups and forms of speech studied

Audience: Undergraduate

4. Explain how styles and elements of speech used by leaders and groups operate differently depending on historical and political context and on their specific configurations with other elements

Audience: Undergraduate

### COM ARTS 474 – RHETORIC OF THE COLD WAR

3 credits.

Examine the Cold War from a rhetorical perspective. Consider key texts, orators, movements, and foreign policy themes that have come to define the Cold War (1945-1991). Trace how these rhetorical strategies laid the groundwork for the contemporary moment, the "New Cold War."

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify key rhetorical moments in Cold War discourse.

Audience: Both Grad & Undergrad

2. Assess and analyze key terms, concepts, theories, and themes rhetoricians and historians use to examine the Cold War.

Audience: Both Grad & Undergrad

3. Apply these critical and theoretical lenses to historical and contemporary discourse and public culture

Audience: Both Grad & Undergrad

4. Articulate the relationship between rhetoric and history.

Audience: Both Grad & Undergrad

5. Research and write a rhetorical analysis of text/object related to the themes of the course.

Audience: Graduate

### COM ARTS 476 – NATURE OF CRITICISM-THE PUBLIC ARTS OF COMMUNICATION

3 credits.

A survey of rhetorical criticism methods. Apply methods to landmark historical and contemporary texts - from presidential war discourse to women's suffrage rhetoric to timely political debates.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Communicate appreciation of significant rhetorical texts

Audience: Undergraduate

2. Identify, evaluate, and apply significant methods of rhetorical criticism to rhetorical artifacts

Audience: Undergraduate

3. Identify rhetorical critics who have made significant contributions to the field of rhetorical criticism

Audience: Undergraduate

4. Articulate the relationship between critic, method, and text

Audience: Undergraduate

5. Define and explain the importance of audience, argument, and intent when performing rhetorical criticism

Audience: Undergraduate

6. Read, understand, and analyze peer-reviewed scholarly essays in the field of rhetorical criticism

Audience: Undergraduate

7. Deliver a cogent and concise research presentation

Audience: Undergraduate

### COM ARTS 478 – RHETORIC AND POWER ON THE INTERNET

3 credits.

Explores and analyzes Internet communication as a magnifier, transmitter, and limiter of power for both individual people and institutions with special attention to the roles of politics, social issues, and justice. Use rhetorical analysis to engage in the critical assessment of Internet media content that exerts power in their lives.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Use rhetorical and cultural theory to discuss examples of online expression in a group

Audience: Undergraduate

2. Locate and document in a digital form online expressive materials operating in your own experience

Audience: Undergraduate

3. Use rhetorical and cultural theory to evaluate online expressions orally

Audience: Undergraduate

4. Use rhetorical and cultural theory to evaluate online expressions in formal writing

Audience: Undergraduate

**COM ARTS 509 – DIGITAL MEDIA AND POLITICAL COMMUNICATION**

3 credits.

Examines core questions related to the impacts of digital media (including but not limited to the Internet) on processes of political communication and the health of democratic governance in advanced industrialized democracies.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Demonstrate understanding of the most influential theories and perspectives regarding the role of communication and information technologies in political communication processes

Audience: Both Grad & Undergrad

2. Evaluate contemporary claims about digital media and politics based on the extent to which they are supported by sound social scientific research

Audience: Both Grad & Undergrad

3. Demonstrate effective communication skills through the articulation of critical thinking about digital media and political communication through writing and informal oral presentation

Audience: Both Grad & Undergrad

4. Develop a proposal for, or improve upon an already in-progress, original research paper that makes a substantive contribution to the scholarly literature on digital media use in political communication

Audience: Graduate

**COM ARTS 513 – TOPICS IN COMMUNICATION ARTS: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2001

**COM ARTS 518 – COMMUNICATION AND HEALTH INEQUALITIES**

3 credits.

Explore the role of communication as a contributor to existing health inequalities and a means of helping to reduce them. Consider social scientific theories and research on a wide array of topics including communication inequalities and public discourse around social determinants of health.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the ways in which communication contributes to and can ameliorate health inequalities

Audience: Both Grad & Undergrad

2. Describe communication and social science theories and research methods that are commonly employed to study communication and health inequalities

Audience: Both Grad & Undergrad

3. Critique methodology and samples designed to examine the relationships between communication and health inequalities

Audience: Both Grad & Undergrad

4. Use communication theories and concepts to evaluate current communication about health inequalities

Audience: Both Grad & Undergrad

5. Write cogent analyses of journal articles, policy documents, and media

Audience: Both Grad & Undergrad

6. Develop a project that relates to communication and health inequalities and that utilizes appropriate, relevant theory and concepts from the literature

Audience: Both Grad & Undergrad

7. Synthesize, apply, and/or extend communication theories and research methods to investigate issues around communication and health inequalities

Audience: Graduate

### COM ARTS/FOLKLORE 522 – DIGITAL STORYTELLING FOR SOCIAL MEDIA

3 credits.

Explore everyday communication in social media. Learn digital recording technologies for documenting everyday communication and the use of digital content in social media.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Evaluate the reasons we value everyday artistic and expressive communication

Audience: Both Grad & Undergrad

2. Analyze the affordances of different social media platforms

Audience: Both Grad & Undergrad

3. Evaluate the formal elements best suited to the affordances of different media platforms

Audience: Both Grad & Undergrad

4. Apply that understanding in the design and production of digital text, photo, sound, and video communications that document everyday artistic and expressive communication

Audience: Both Grad & Undergrad

5. Analyze ethical implications of documenting human behavior

Audience: Both Grad & Undergrad

6. Apply scholarly theories on digital media to digital platforms and digital platform content

Audience: Graduate

### COM ARTS 540 – TELEVISION GENRES

3 credits.

An examination of a specific television genre, analyzing it as a narrative, economic, cultural, and political entity and exploring its role in perpetuating and/or challenging ideas of what society is or could be.

**Requisites:** (COM ARTS 250 and 351) or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Assess how the topic genre works as a unique mode of communication

Audience: Both Grad & Undergrad

2. Discuss thoughtfully the cultural work being done by current examples of the topic genre

Audience: Both Grad & Undergrad

3. Explain the roles that older examples of the topic genre played in cultural history

Audience: Both Grad & Undergrad

4. Analyze how the topic genre works as a business and/or industry

Audience: Both Grad & Undergrad

5. Critically examine various modes, styles, theories, and uses of the topic genre

Audience: Both Grad & Undergrad

6. Analyze various ways in which the topic genre both explicitly and implicitly engages important cultural issues, debates, and topics of concern to a society

Audience: Both Grad & Undergrad

7. Identify and pursue opportunities to contribute to the scholarly analysis of the topic genre

Audience: Graduate

**COM ARTS 545 – MEDIA AUDIENCE CULTURES**

3 credits.

Explore the complexities of what it means to be a media audience. Consider how audiences engage media thoughtfully and actively. Approach audiences both qualitatively and theoretically, focusing on how audiencehood becomes more than just a position of watching, listening, and downloading the intended message. Study audiencehood as a site of voice, agency, identity construction, play, activism, and meaning-making across various media audience types – fans, haters, casual viewers; television, film, social media, games, and other media consumers; watchers, listeners, readers, gamers, and users; networked communities and isolated individuals. Analyze the different worlds, affective positions, practices, and socialities that make up "the audience."

**Requisites:** COM ARTS 250 or graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze the cultures that surround media consumption

Audience: Undergraduate

2. Analyze and interpret a wide variety of modes and styles of media reception

Audience: Undergraduate

3. Critically examine methods and strategies for, and the ethics of, studying audiences

Audience: Undergraduate

4. Conduct qualitative research into media audiences

Audience: Undergraduate

5. Develop an awareness of the rich history of the cultural studies tradition of audience and reception research

Audience: Graduate

6. Write critically about audiences, balancing theory and empirical research

Audience: Graduate

**COM ARTS 547 – DIGITAL GAME CULTURES**

3 credits.

An examination of the forms, practices, economies, institutions, politics, and modes of engagement that make digital games an important site of culture and power.

**Requisites:** COM ARTS 250, (COM ARTS 351 or 346), and junior standing, or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Explain the complex cultural forms that constitute digital games

Audience: Both Grad & Undergrad

2. Critique the powerful structures and institutions that drive the cultural economies of gaming

Audience: Both Grad & Undergrad

3. Analyze the diverse practices and ways of life in which game players and communities engage

Audience: Both Grad & Undergrad

4. Evaluate the contradictory politics of digital games in terms of their complicity with cultural hierarchies and their potential for radical cultural critique

Audience: Both Grad & Undergrad

5. Share the experience of play to build a productive and inclusive community

Audience: Both Grad & Undergrad

6. Make choices to develop individualized pathways through course material and meaningful ways of engaging it

Audience: Both Grad & Undergrad

7. Embrace the challenges of play to take satisfaction and pride in accomplishments, regardless of failures along the way

Audience: Both Grad & Undergrad

8. Develop a vision for digital games as a part of research and/or teaching practice

Audience: Graduate

**COM ARTS 552 – CONTEMPORARY HOLLYWOOD CINEMA**

3 credits.

An examination of contemporary Hollywood films focusing on the interrelations of cinematic narrative, style, technology, and institutions. Survey the work of major directors and consider the box office impact of key genres and film cycles.

**Requisites:** COM ARTS 350 or concurrent enrollment

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the major directors, genres, and cycles that have shaped the contemporary landscape of Hollywood film production

Audience: Undergraduate

2. Explain the overall market structure of the contemporary film industry and the studios' main strategies for generating profits and managing financial risks

Audience: Undergraduate

3. Analyze the narrative patterns of a contemporary Hollywood film, including its large-scale sections, its turning points, its motifs, and its use of deadlines, dangling causes, and dialogue hook

Audience: Undergraduate

4. Produce a close textual analysis of the stylistic elements found in a scene or sequence from a contemporary Hollywood film

Audience: Undergraduate

**COM ARTS 556 – THE AMERICAN FILM INDUSTRY IN THE ERA OF THE STUDIO SYSTEM**

3 credits.

Influences of industrial structure, trade policies, foreign markets and censorship on Hollywood's production practices up to 1948.

**Requisites:** COM ARTS 350, 351, or declared in Communication Arts MA or PhD

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Identify major events, ideas, and institutions from the history of American film

Audience: Both Grad & Undergrad

2. Evaluate a range of films as historical works with relevance to American cultural, aesthetic, technological, and industrial histories

Audience: Both Grad & Undergrad

3. Analyze systems of power and unequal access to filmmaking resources in American film history, especially in regards to race and gender

Audience: Both Grad & Undergrad

4. Evaluate primary and secondary sources as historical evidence and determine the range of historical claims such evidence supports

Audience: Both Grad & Undergrad

5. Practice the skills needed to conduct historical research and writing

Audience: Both Grad & Undergrad

6. Identify and pursue opportunities to contribute to the field of American film history

Audience: Graduate

**COM ARTS 565 – COMMUNICATION AND INTERETHNIC BEHAVIOR**

3 credits.

The relation of communication processes to interethnic and interracial attitudes and behavior. Social and psychological foundations of interethnic communication and conflict, group identification and communication processes, interpersonal communication and culture, communication about race and ethnicity, mass media content and effects.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Summarize different historical and current beliefs about race

Audience: Undergraduate

2. Interpret and critique social science research on the impact of race/ethnicity on communication in a variety of contexts including family life, school, college, work, and healthcare

Audience: Undergraduate

3. Develop a research question related to race/ethnicity and communication in the U.S.

Audience: Undergraduate

4. Find and synthesize five social scientific studies that address the research question

Audience: Undergraduate

5. Examine questions and make decisions with consideration for the cultural perspectives and worldviews of others

Audience: Undergraduate

6. Recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity

Audience: Undergraduate

7. Articulate some of the effects the past has had on present day circumstances, perceptions of, and disparities in, race in the U.S.

Audience: Undergraduate

**COM ARTS 570 – CLASSICAL RHETORICAL THEORY**

3 credits.

Study of major theories of rhetoric from their origins in ancient Greece to Bacon, including theories of Plato, Aristotle, Cicero, Quintilian, Longinus, St. Augustine, and others.

**Requisites:** (Two from: COM ARTS 262, 360, 370, 372, 470, 472, 562, or RELIG ST/COM ARTS 374) or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Read major texts of ancient rhetoric and explain their historical contexts

Audience: Both Grad & Undergrad

2. Explain fundamental concepts from ancient rhetorical theory

Audience: Both Grad & Undergrad

3. Explain the history & development of rhetorical practice and education

Audience: Both Grad & Undergrad

4. Explain the connection between historical rhetorical texts to contemporary rhetorical theory

Audience: Both Grad & Undergrad

5. Practice critical reading, writing, research, and presentation skills

Audience: Both Grad & Undergrad

6. To interrogate the emphasis on these ancient traditions in the 21st century at the graduate level

Audience: Graduate

7. Communicate about classical rhetorical theory in graduate level communication genres

Audience: Graduate

### COM ARTS 573 – RHETORIC OF GLOBALIZATION AND TRANSNATIONALISM

3 credits.

Introduction to basic concepts in global and transnational rhetorical studies and provided with the analytic tools to examine discourses about globalization and transnationalism produced by key global actors including transnational corporations, states, global institutions such as the World Bank, media producers, human rights advocates, and activists.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify and describe key rhetorical theories, concepts, and methods that have a bearing on issues of globalization and transnationalism

Audience: Undergraduate

2. Use key theories, concepts, and methods from rhetorical studies to analyze how communication structures have a bearing on issues of globalization and transnationalism

Audience: Undergraduate

3. Communicate findings about globalization and transnationalism gained in the application of key theories, concepts, and methods from rhetorical studies

Audience: Undergraduate

### COM ARTS 575 – COMMUNICATION IN COMPLEX ORGANIZATIONS

3 credits.

Examine problem solving within complex organizations. Study communication pitfalls, decision-making biases, and problem-solving blind spots that negatively affect one's ability to communicate. Learn to innovate in teams and make high-quality decisions.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the different theories of decision-making and what type of decision-making process is more appropriate depending on the situation

Audience: Undergraduate

2. Nudge others and self to make better decisions

Audience: Undergraduate

3. Design your decisions and solve your problems using a better process based on empirical social science

Audience: Undergraduate

4. Design your teams and groups to maximize performance based on principles from social science

Audience: Undergraduate

5. Apply strategies to increase open communication and strategically use conflict in organizations to increase productivity and decision quality

Audience: Undergraduate

6. Create environments that nudge ethical decisions in organizations and create a healthy, ethical organizational culture

Audience: Undergraduate

**COM ARTS 577 – DYNAMICS OF ONLINE RELATIONSHIPS**

3 credits.

Examines how people form their identities and manage their personal relationships using new communication technologies (social network sites, online dating, video games). Emphasis will be placed on how humans adapt to technology and use it for social purposes.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss state-of-the-art research in the area of online relationship

Audience: Both Grad & Undergrad

2. Explain how humans adapt to technology and use it for social purposes

Audience: Both Grad & Undergrad

3. Identify features of technology that affect people's ability to express themselves and manage relationships online

Audience: Both Grad & Undergrad

4. Describe the scientific method and of theory-building in the social sciences

Audience: Both Grad & Undergrad

5. Evaluate theories critically and identify worthwhile avenues for future research

Audience: Both Grad & Undergrad

6. Develop research proposals for the social sciences

Audience: Both Grad & Undergrad

7. Contribute to the research in online relationships

Audience: Graduate

**COM ARTS 605 – DIGITAL STUDIES CAPSTONE**

1 credit.

Create an online portfolio integrating material learned throughout the certificate program. Explore opportunities for professional and personal growth. Must be declared in Digital Studies Certificate with senior standing.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Share your ideas, stories, and projects on your own personal website

Audience: Undergraduate

2. Articulate your personal brand and how this brand aligns with your career path and goals

Audience: Undergraduate

3. Use digital tools to network with alumni and others in your field(s) of interest and to research professional opportunities

Audience: Undergraduate

**COM ARTS 608 – SPECIAL TOPICS IN MEDIA AND CULTURAL STUDIES**

3 credits.

Specialized topics and issues in media and cultural studies.

**Requisites:** COM ARTS 250, 346, 351, CHICLA/COM ARTS 347 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Explain core concepts within the topic area of Media and Cultural Studies

Audience: Both Grad & Undergrad

2. Analyze media and culture from theoretical, historical, and critical perspectives appropriate to the topic under examination

Audience: Both Grad & Undergrad

3. Communicate effectively about the Media and Cultural Studies topic area

Audience: Both Grad & Undergrad

4. Participate in discussions about diversity, equity, and inclusion for the historically marginalized within the topic area of media and cultural studies

Audience: Both Grad & Undergrad

5. Use your investigation of the topic area to make a scholarly contribution to Media and Cultural Studies

Audience: Graduate

**COM ARTS 609 – SPECIAL TOPICS IN PRODUCTION**

3 credits.

Specialized advanced subject matter in film, video or digital media production.

**Requisites:** COM ARTS 355 or declared in Communication Arts MA or PhD

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate mastery of the aesthetic and technical tools image and/or audio storytelling

Audience: Both Grad & Undergrad

2. Analyze story structure and illustrate how creative decisions support story interpretation

Audience: Both Grad & Undergrad

3. Analyze the meaning, form, and process of cinematic work with the goal of providing honest, critical, and instructive feedback

Audience: Both Grad & Undergrad

4. Reproduce and apply industry standards

Audience: Both Grad & Undergrad

5. Articulate the relationship between the field of media production and the field of media studies

Audience: Graduate

**COM ARTS 610 – SPECIAL TOPICS IN RHETORIC AND PUBLIC ADDRESS**

3 credits.

Specialized subject matter of current interest in rhetoric and public address.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze communication rhetorically within its historical, technical, cultural, social or political contexts

Audience: Undergraduate

2. Analyze how communication structures shape the flow of information, policy law, culture, or power

Audience: Undergraduate

3. Apply key theories, concepts, and methods in the rhetorical analysis of communication

Audience: Undergraduate

4. Use key theories, concepts, and methods from rhetorical studies to analyze communication at a graduate level

Audience: Graduate

5. Communicate findings about communication gained in the application of key theories, concepts, and methods from rhetorical studies in graduate level communication genres

Audience: Graduate

**COM ARTS 612 – SPECIAL TOPICS IN COMMUNICATION SCIENCE**

3 credits.

Specialized subject matter of current interest in communication theory and research.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Explain the ways in which communication contributes to and can ameliorate various deficient societal and individual conditions

Audience: Both Grad & Undergrad

2. Identify and analyze communication and social science theories and methods commonly employed to examine communication and wellbeings

Audience: Both Grad & Undergrad

3. Critique methodology and samples designed to investigate the relationships between communication and wellbeings

Audience: Both Grad & Undergrad

4. Utilize communication theories and concepts to evaluate current communication about wellbeings

Audience: Both Grad & Undergrad

5. Write cogent analyses of journal articles, policy documents, and media

Audience: Both Grad & Undergrad

6. Communicate research findings of empirical research on communication and wellbeings to fellow researchers and/or general public

Audience: Graduate

**COM ARTS 613 – SPECIAL TOPICS IN FILM**

3 credits.

Specialized topics and issues in film history, theory, and criticism.

**Requisites:** COM ARTS 350 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain core concepts within the topic area of film studies

Audience: Both Grad & Undergrad

2. Analyze film texts, institutions, and relevant social and expressive contexts from theoretical, historical, and critical perspectives illuminating the topic under examination

Audience: Both Grad & Undergrad

3. Communicate effectively about the topic area in film studies

Audience: Both Grad & Undergrad

4. Participate in discussions about diversity, equity, and inclusion for the historically marginalized within the topic area of film studies

Audience: Both Grad & Undergrad

5. Explain critical and analytic methodologies pertinent to the specific topic

Audience: Graduate

6. Evaluate the relevant academic literature and identify areas affording opportunities to contribute in the field of film studies

Audience: Graduate

**COM ARTS 614 – FIELD EXPERIENCE IN COMMUNICATION**

1 credit.

Application of communication concepts to problems in such professional field settings as business organizations, media firms, political offices and organizations, and governmental agencies. Must be declared in Communication Arts.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Build strong working relationships

Audience: Undergraduate

2. Relate your employers' needs and strategies to your own career objective

Audience: Undergraduate

3. Confront responsibility, value, and inequality in the labor market

Audience: Undergraduate

4. Apply your previous Communication Arts coursework to your internship experiences

Audience: Undergraduate

5. Describe your internship experiences in ways that emphasize your accomplishments, qualifications gained, and potential for future employment

Audience: Undergraduate

6. Evaluate your work successes and failures with an eye toward pursuing future goals

Audience: Undergraduate

**COM ARTS 615 – SECOND FIELD EXPERIENCE IN COMMUNICATION**

1 credit.

Application of communication concepts to problems in such professional field settings as business organizations, media firms, political offices and organizations, and governmental agencies. Must be declared in Communication Arts.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Reflect on your previous experience and use it to maximize the value of your current internship

Audience: Undergraduate

2. Expand both the knowledge and skillsets that you bring into your work experiences

Audience: Undergraduate

3. Identify and take advantage of opportunities for mentorship

Audience: Undergraduate

4. Strengthen your network and participation in professional communities

Audience: Undergraduate

5. Develop positive working relationships and sustain them over time

Audience: Undergraduate

6. Create a strategy for the next stage in your career based on the experience you gain

Audience: Undergraduate

**COM ARTS/HDFS/JOURN 616 – MASS MEDIA AND YOUTH**

3 credits.

Children's and adolescents' use of mass media and mass media effects on them. Particular attention is given to changes in comprehension and other cognitive activities that give insights into media use and effects.

**Requisites:** JOURN 202, COM ARTS 325, HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, PSYCH 460, LSC 251, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how children and youth process media

Audience: Undergraduate

2. Compare/contrast the impact of different types of media content on development

Audience: Undergraduate

3. Explain how individual differences moderate the impact of media on development

Audience: Undergraduate

4. Describe moderating effects of the context in which media use occurs

Audience: Undergraduate

5. Read, interpret, evaluate, and discuss social scientific reports of findings in this area

Audience: Undergraduate

6. Synthesize and interpret research in this area for a lay audience

Audience: Undergraduate

7. Explain with nuance how children and youth process media

Audience: Graduate

8. Compare/contrast the impact of different types and formats of media content on development, with reference to key developmental milestones

Audience: Graduate

9. Explain how individual differences and social contexts moderate the impact of media uses and interpretations on development

Audience: Graduate

10. Synthesize and interpret research in this area and identify a research gap for future work

Audience: Graduate

**COM ARTS/JOURN/LSC 617 – HEALTH COMMUNICATION IN THE INFORMATION AGE**

3 credits.

Examines the role of communication in health, how the revolution in information technology has affected health communication, and the assumptions about health information and communication that drive current efforts to use technologies.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate their understanding of major theories, approaches, concepts, and current research findings in the area of health communication

Audience: Both Grad & Undergrad

2. Gain a sense of the methodological issues involved in the construction and evaluation of health communication

Audience: Both Grad & Undergrad

3. Demonstrate their understanding of the connections between the environment (e.g., physical, social, media), cognition, and behavior

Audience: Both Grad & Undergrad

4. Communicate effectively through written reports, oral presentations and discussion

Audience: Both Grad & Undergrad

5. Evaluate ideas from different sources critically

Audience: Graduate

6. Derive new testable hypotheses by integrating or contrasting different theories

Audience: Graduate

7. Develop variations on theoretical models or ideas such as contingent conditions or mediating factors

Audience: Graduate

### COM ARTS/ED PSYCH 626 – YOUTH DEVELOPMENT AND SOCIAL MEDIA: INTERDISCIPLINARY TRAINING SEMINAR

1 credit.

Advanced level seminar that involves critical analysis of conceptual and methodological issues underlying empirical research on how social media affect and are affected by adolescent development, provides a venue for feedback on design of research studies involving youth and social media, and fosters interdisciplinary approaches to studying connections between youth development and social media use.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Become familiar with conceptual and methodological approaches to studying youth development and social media use

Audience: Graduate

2. Sharpen the ability to read, understand, and critique research studies in the social sciences, through sustained readings and class discussion

Audience: Graduate

3. Learn how to formulate an original and theoretically meaningful research proposal in the area of social media, youth, and well-being

Audience: Graduate

4. Become clear and confident public speakers in an academic group setting

Audience: Graduate

### COM ARTS 651 – ADVANCED VIDEO PRODUCTION AND DIRECTION

3 credits.

Remote video production in both documentary and narrative genres.

**Requisites:** COM ARTS 355

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Produce a short film from idea to fine cut  
Audience: Undergraduate

2. Develop camera technique, sound recording, editing, writing, and directing skills

Audience: Undergraduate

3. Implement the storytelling strategy that best fits your short film's thesis

Audience: Undergraduate

4. Practice pre-production proposal writing

Audience: Undergraduate

5. Develop peer evaluation skills

Audience: Undergraduate

**COM ARTS 659 – ADVANCED MOTION PICTURE PRODUCTION WORKSHOP**

4 credits.

Provides an immersive experience in the art of cinematic storytelling. This capstone workshop is structured around the creation of a half-hour finished film, planned and completed as a group, with roles matching those of a professional crew. Working with an existing script and using state-of-the-art digital tools, students gain knowledge in a wide variety of motion-picture production skills. Most importantly, explore the meanings and nuances of a script, making the artistic choices necessary to bring the story to the screen. Present a completed film in a public, campus screening.

**Requisites:** COM ARTS 467**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Produce a scene from a motion picture screenplay, from pre-production to post-production

Audience: Undergraduate

2. Develop the necessary production skills for serving on a crew

Audience: Undergraduate

3. Combine aesthetic options and technical limitations to make creative decisions in each crew position

Audience: Undergraduate

4. Follow industry standards throughout the production process

Audience: Undergraduate

**COM ARTS 669 – FILM THEORY**

3 credits.

Survey of significant trends within both classical and contemporary film theory. Designed for those interested in reading, analyzing, and evaluating the central concepts and intellectual history of writings about film, particularly with respect to film as a medium presenting an array of aesthetic, psychological, and social potentialities. Whereas classical film theory attempts to treat cinema as a unique art form, contemporary film theory addresses issues related to cinema as a mode of communication, a source of visual pleasure, and as an ideological tool. Much contemporary theory attempts to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory, critical race theory, postmodernism, and cognitive science. Questions regarding the ontology of cinema, its relation to existing theories of art, its effects on spectators, and the various ways in which its formal properties create meaning are considered.

**Requisites:** COM ARTS 350 or graduate/professional standing**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Attain a deep and wide-reaching understanding of the ways in which cinema has been conceptualized by film theorists and practitioners globally, as a distinct aesthetic form with its own medium-specific characteristics

Audience: Both Grad &amp; Undergrad

2. Parse out the interconnections and influences between the work of film theorists and other disciplines and fields including but not limited to philosophy, psychology, semiotics, political theory, and cultural studies

Audience: Both Grad &amp; Undergrad

3. Understand the ways in which ideology, power and hegemony are intertwined with the status of the film object, especially in relation to articulations of gender, race, class, ethnicity and sexuality

Audience: Both Grad &amp; Undergrad

4. Evaluate and analyze the ways in which film theory and praxis approaches aspects of spectatorship and craft

Audience: Both Grad &amp; Undergrad

5. Articulate individual approaches to film theory based on the material

Audience: Both Grad &amp; Undergrad

6. Map the development of the discipline of film studies through an historical understanding of ideas and concepts in the field of film theory

Audience: Graduate

**COM ARTS 681 – SENIOR HONORS THESIS**

3 credits.

Research and preparation for writing senior Honors in the Major thesis under the direction of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**COM ARTS 682 – SENIOR HONORS THESIS**

3 credits.

Writing and completion of senior Honors in the Major thesis begun in COM ARTS 681 under the direction of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**COM ARTS 691 – SENIOR THESIS**

2-3 credits.

Research and preparation for the writing of the senior thesis under the direction of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**COM ARTS 692 – SENIOR THESIS**

2-3 credits.

Writing and completion of senior thesis begun in COM ARTS 691 under the direction of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2021

**COM ARTS 698 – DIRECTED STUDY**

1-3 credits.

Advanced level project under the direction of faculty member e.g., independent reading with research paper, production project, or member of research team. Graded on a credit/no credit basis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**COM ARTS 699 – DIRECTED STUDY**

1-3 credits.

Advanced level project under the direction of faculty member e.g., independent reading with research paper, production project, or member of research team. Graded on a letter basis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**COM ARTS/L IS 705 – INTRODUCTORY ANALYTICS FOR DECISION MAKING**

3 credits.

Introduces key stages in the processes of gathering and analyzing data for decision making, including tasks, methods, and tools used at each stage. Topics include developing the research question from organizational goals, choosing appropriate data collection methods, sampling, basics of measurement and question design, managing and visualizing data, descriptive statistics and basic inferential statistics such as correlations, regressions, and ANOVA.

**Requisites:** Graduate/professional standing or Declared in Analytics for Decision Making capstone certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COM ARTS 760 – ADVANCES IN COMMUNICATION THEORIES**

3 credits.

In-depth review and evaluation of behavioral and social scientific theories of human communication.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**COM ARTS 762 – COMMUNICATION RESEARCH METHODS**

3 credits.

Epistemological and methodological principles of behavioral and social scientific research of particular relevance to communication research, including various research designs and modes of observation, casual inferences, and basic hands-on experiences in empirical research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**COM ARTS 799 – INDEPENDENT STUDY**

1-3 credits.

Independent research and writing under the supervision of an instructor.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**COM ARTS 902 – FILM COLLOQUIUM**

1 credit.

Studies in advanced research in film history, theory and criticism.

**Requisites:** Declared in Communication Arts MA or PhD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COM ARTS 903 – MEDIA AND CULTURAL STUDIES COLLOQUIUM**

1 credit.

Current research in cultural studies, audience effects, broadcast regulation, history of broadcasting and comparative national systems.

**Requisites:** Declared in Communication Arts MA or PhD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COM ARTS 904 – COMMUNICATION SCIENCE COLLOQUIUM**

1 credit.

Social scientific approaches to the study of interpersonal communication and media effects.

**Requisites:** Declared in Communication Arts MA or PhD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COM ARTS 905 – RHETORIC COLLOQUIUM**

1-3 credits.

Advanced research in rhetorical theory and criticism, and in the history of public address.

**Requisites:** Declared in Communication Arts MA or PhD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COM ARTS/CURRIC 914 – HOW GAMES CHANGE US**

3 credits.

Video games can be powerful experiences that take us to new worlds, teach us about complex systems, and provoke a range of emotions. Games transform us while we play, and some of these changes can be hard to predict and understand. Games can disrupt our sense of self, reshape our pleasures and feelings, lead us to question deeply held values, and allow us to experience new forms of embodiment through an avatar. A growing body of research in game studies engages with this potential for expansive change by focusing on player experience from a variety of methodological perspectives, including phenomenological, feminist and queer theory, critical disability studies, learning sciences, ecocriticism, and media archeology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Devise, plan, and begin a research project in game studies.

Audience: Graduate

2. Articulate the disciplinary tenets and controversies of game studies and position your work in relation to other game scholars.

Audience: Graduate

3. Use strategic and purposeful reading methods to approach dense theoretical texts.

Audience: Graduate

4. Make clear and theoretically informed arguments about how a player is changed in the process of playing a game.

Audience: Graduate

5. Describe some of the common ways game designers have used the transformative potential of games and other design choices that have not been explored.

Audience: Graduate

**COM ARTS 950 – SEMINAR-RADIO TELEVISION FILM**

2-3 credits.

An advanced review and exploration of theoretical and methodological developments in media studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COM ARTS 955 – MEDIA HISTORY AND HISTORIOGRAPHY**

3 credits.

Post-structuralist historical theory, historiographical methods, and issues in historiography for students of media history. Introduction to archival research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COM ARTS 958 – SEMINAR IN FILM HISTORY**

2-3 credits.

Seminar probes theoretical questions concerning nature of historical knowledge, examines scholarly models and introduces methodologies and resources for research on the history of cinema.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**COM ARTS 967 – SEMINAR-PROBLEMS IN COMMUNICATION AND PUBLIC ADDRESS**

2-3 credits.

An examination of current theoretical and/or practical problems in communication and/or public address.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**COM ARTS 969 – SEMINAR: CONTEMPORARY RHETORICAL THEORY**

2-3 credits.

A review of recent and ongoing theoretical developments in rhetorical theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COM ARTS 970 – SEMINAR IN COMMUNICATION SCIENCE**

3 credits.

A critical review of theoretical developments in social scientific studies of communication and its psychological and/or social impact.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COM ARTS 976 – SEMINAR IN RHETORICAL CRITICISM**

2-3 credits.

An examination of historical and/or ongoing developments in methodological and analytic approaches to rhetorical studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**COM ARTS 990 – RESEARCH AND THESIS**

1-9 credits.

Independent research and writing under the supervision of an instructor.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## COMMUNICATION SCIENCES AND DISORDERS (CS&D)

**CS&D 110 – INTRODUCTION TO COMMUNICATIVE DISORDERS**

3 credits.

A survey of the scientific basis of normal and disordered communication; covers speech, hearing, and language.

**Requisites:** None

**Course Designation:** Breadth - Social Science  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 120 – CULTURAL AND LINGUISTIC DIVERSITY IN COMMUNICATION SCIENCES AND DISORDERS**

3 credits.

The impact of cultural and linguistic diversity on the field of Communication Sciences and Disorders (CSD); different ideas about what culture is, how culture influences different aspects of communication, and how cultural and linguistic differences intersect with neurodiversity, and with difficulties in speech, language, hearing, voice, and swallowing. Language variation, including bilingualism, multilingualism, dialect, and accent. Culturally responsive assessment and intervention; working with interpreters and translators. Main focus is on two populations – Spanish-English and African American English speakers in the United States. Also discusses other cultural and linguistic communities in the US and around the world.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand how race and racial inequities have affected access to speech, language, and hearing services in the U.S.

Audience: Undergraduate

2. Recognize and question cultural assumptions and knowledge claims regarding best practices for assessment and intervention in CSD and identify culturally responsive alternatives

Audience: Undergraduate

3. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others

Audience: Undergraduate

4. Apply concepts of cultural responsiveness outside the classroom by respectfully participating in our multicultural and multilingual society

Audience: Undergraduate

**CS&D 201 – ANATOMY AND PHYSIOLOGY OF SPEECH PRODUCTION**

3 credits.

Anatomy and physiology of the speech production mechanism; acoustic characteristics of the speech signal.

**Requisites:** None**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Recall, identify, and label the bones and cartilages that support respiration, phonation, and articulation.

Audience: Undergraduate

2. Recall, identify, and label the muscles (origin, insertion, and innervation) used in respiration, phonation, and articulation

Audience: Undergraduate

3. Identify and summarize physiological processes involved in respiration, phonation, and articulation.

Audience: Undergraduate

4. Identify and distinguish basic anatomical structures, including types of tissues and the cranial nerves.

Audience: Undergraduate

5. Explain major anatomical and physiological disorders of respiration, phonation, and articulation in their anatomical sources and behavioral consequences.

Audience: Undergraduate

**CS&D 202 – HEARING SCIENCE**

3 credits.

Physical acoustics of sound, the anatomy and physiology of the auditory system, and the psychology related to hearing, known as psychoacoustics.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Analyze sound: its characteristics, its propagation, and its fundamental components (frequencies)

Audience: Undergraduate

2. Map out the anatomy and physiology of the human auditory system

Audience: Undergraduate

3. Connect anatomy and physiology to their consequences for human auditory perception

Audience: Undergraduate

4. Describe psychoacoustic concepts such as intensity, pitch, selectivity, and hearing in time and space

Audience: Undergraduate

5. Identify appropriate tools and scientific methods used to study hearing

Audience: Undergraduate

**CS&D 210 – NEURAL BASIS OF COMMUNICATION**

3 credits.

Considers the neural basis for communicative behaviors. Provides understanding of the anatomy, physiology, and physiopathy of the central and peripheral nervous systems as they relate to normal and disordered communication.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**CS&D 240 – LANGUAGE DEVELOPMENT IN CHILDREN AND ADOLESCENTS**

3 credits.

Covers communication and language development from infancy to adulthood.

**Requisites:** None**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**CS&D 303 – SPEECH ACOUSTICS AND PERCEPTION**

3 credits.

Detailed examination of the acoustic properties of the speech signal within the source-filter theory of speech production. Theories of speech perception pertaining to phoneme and word recognition are presented and discussed.

**Requisites:** CS&D 201 and 202**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**CS&D 315 – PHONETICS AND PHONOLOGICAL DEVELOPMENT**

3 credits.

Introduction to the international phonetic alphabet and articulatory phonetics. Overview of typical and atypical phonological development.

**Requisites:** CS&D 201 and 240**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**CS&D 318 – VOICE, CRANIOFACIAL, AND FLUENCY DISORDERS**

3 credits.

Provides a basis for understanding the communication problems of individuals with voice disorders, orofacial anomalies, and fluency disorders.

**Requisites:** CS&D 201, 202, 240 and Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and summarize how structures of the head and neck develop to produce communication and swallowing is vital to understanding dysfunction.

Audience: Undergraduate

2. Identify and summarize how craniofacial disorders impair communication and swallowing, thus affecting health, well-being, and quality of life.

Audience: Undergraduate

3. Identify and summarize how craniofacial disorders can be evaluated and treated, improving communication and swallowing and quality of life.

Audience: Undergraduate

4. Identify and summarize how craniofacial disorders are treated with an interdisciplinary team, which includes the patient and their caregivers.

Audience: Undergraduate

5. Identify and summarize how voice is produced and used in communication is vital to understanding dysfunction.

Audience: Undergraduate

6. Identify and summarize how voice disorders impair communication, thus affecting health, well-being, and quality of life.

Audience: Undergraduate

7. Identify and summarize how voice disorders can be evaluated and treated, improving communication and quality of life.

Audience: Undergraduate

8. Identify and summarize how fluency disorders manifest and affect communication is vital to evaluation and treatment.

Audience: Undergraduate

9. Identify and summarize how fluency disorders impact communication, thus health, well-being, and quality of life.

Audience: Undergraduate

10. Identify and summarize how fluency disorders can be evaluated and treated, improving communication and quality of life.

Audience: Undergraduate

11. Identify and summarize the rationale for helping individuals accept dysfluency as part of their daily life is vital to living with stuttering.

Audience: Undergraduate

**CS&D 320 – INTRODUCTION TO AUDIOLOGY**

3 credits.

Introduction to the profession of Audiology, hearing assessment across the lifespan, ear and hearing disorders, management options.

**Requisites:** CS&D 202

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 371 – PRE-CLINICAL OBSERVATION OF CHILDREN AND ADULTS**

3 credits.

Emphasizes clinical writing, group participation, and observation of video and live treatment sessions to develop and improve observational skills related to communication behaviours and clinical teaching.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 424 – SIGN LANGUAGE I**

2 credits.

Manual alphabet, numbers, and 300 basic signs in both American Sign Language (ASL) and Manually Coded English (MCE) systems. Emphasizes words and sign skill for clinic/schools.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 425 – AUDITORY REHABILITATION**

3 credits.

Topics include hearing devices and technology, auditory rehabilitation principles and methods across the lifespan.

**Requisites:** CS&D 201, 202, and 320

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 434 – SIGN LANGUAGE II**

2 credits.

Interactive practice of ASL vocabulary; integrating principles of ASL facial expression and body language; conceptually accurate signed phrasing.

**Requisites:** Sophomore standing and CS&D 424

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand a variety of signers whose life experience is informed and enriched by exposure and/or proficiency with sign language

Audience: Undergraduate

2. Demonstrate understanding of at least 500 signs

Audience: Undergraduate

3. Demonstrate fluency at basic conversational level (20 turns in dyad)

Audience: Undergraduate

4. Demonstrate understanding of facial expression, spatial principles and body movement in a rehearsed and an impromptu conversational context

Audience: Undergraduate

5. Recognize how signs are taught

Audience: Undergraduate

**CS&D 440 – CHILD LANGUAGE DISORDERS, ASSESSMENT AND INTERVENTION**

3 credits.

Language differences and disorders in various populations are covered, as well as means of assessment and intervention.

**Requisites:** CS&D 240

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 481 – UNDERGRADUATE JUNIOR HONORS**

3 credits.

A writing-intensive introduction to research methodology in Communication Sciences and Disorders, emphasizing participant selection criteria, experimental design and methodology, data collection, and data analysis, leading to the design and future implementation of an independent research project. Activities include written and oral critiques of published research, written summaries of oral research presentations, and composition of an individual research proposal.

**Requisites:** Satisfied Communications A requirement and declared in an Honors program

**Course Designation:** Gen Ed - Communication Part B

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 503 – NEURAL MECHANISMS OF SPEECH, HEARING AND LANGUAGE**

3 credits.

Basic neuroanatomical and neurophysiological mechanisms underlying the communication process. Neuropathologies and their associated communication disorders.

**Requisites:** (Declared in Biology or Neurobiology) and (CS&D 210 or PSYCH/ZOOLOGY 523), or declared in Communication Sciences Disorders MS

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 681 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 698 – DIRECTED STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 1991

**CS&D 699 – DIRECTED STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CS&D 700 – CLINICAL FOUNDATIONS FOR SPEECH-LANGUAGE PATHOLOGY PRACTICE**

1 credit.

Overview of clinical practice procedures and skills with integration of evidence-based practice and practical career guidance.

**Requisites:** Declared in Communication Sciences and Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 5 number of completions

**Learning Outcomes:** 1. Describe considerations related to the clinical supervision and practicum.

Audience: Graduate

2. Integrate the ASHA Code of Ethics and evidence-based practice in clinical procedures and skills.

Audience: Graduate

3. Describe the role and importance of interdisciplinary practice in clinical care

Audience: Graduate

4. Define and measure behavior via baseline assessment

Audience: Graduate

5. Develop clinical goals that are specific, measurable, achievable, relevant, and time-bound.

Audience: Graduate

6. Describe procedures for and principles of data collection/progress monitoring, behavior management and shaping, and clinical writing.

Audience: Graduate

7. Apply cultural humility, counseling principles, and trauma-informed care practices to treatment implementation and planning.

Audience: Graduate

8. Describe the clinical fellowship, certification, and licensure process in speech-language pathology.

Audience: Graduate

9. Create materials central to the job search process.

Audience: Graduate

**CS&D 701 – AUGMENTATIVE AND ALTERNATIVE COMMUNICATION FOR INDIVIDUALS WITH COMPLEX COMMUNICATION NEEDS**

3 credits.

Assessment and treatment across the lifespan of individuals with complex communication needs who require augmentative and alternative communication systems and strategies to support functional communication.

**Requisites:** Declared in Communication Sciences and Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Define the purposes and role of AAC for individuals with complex communication needs.

Audience: Graduate

2. Discuss the complementary roles of speech and other modes of communication along with AAC systems and strategies.

Audience: Graduate

3. Apply AAC principles from a global perspective, including culturally sensitive practices.

Audience: Graduate

4. Identify, describe, and interpret clinical assessment procedures for individuals who may benefit from AAC.

Audience: Graduate

5. Develop and implement appropriate AAC intervention plans for individuals with complex communication needs.

Audience: Graduate

6. Explain population-specific issues in AAC, with special emphasis on individuals with motor speech disorders.

Audience: Graduate

**CS&D 703 – LANGUAGE AND LEARNING DISORDERS OF CHILDREN**

3 credits.

Theoretical concepts of symbolic disorders with emphasis on variables which interfere with language learning and function.

**Requisites:** Declared in Communication Sciences & Disorders MS or Pharmacy DPH

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 704 – ACQUIRED LANGUAGE AND COGNITIVE-COMMUNICATION DISORDERS IN ADULTS**

3 credits.

Intervention for adults with acquired aphasia and cognitive-communication disorders, including principles of evaluation and treatment.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 705 – ASSESSMENT AND TREATMENT OF MOTOR SPEECH DISORDERS ACROSS THE LIFESPAN**

2 credits.

Motor speech disorders with a focus on dysarthria.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe methods, strengths, and weakness of the different approaches to characterizing motor speech disorders.

Audience: Graduate

2. Demonstrate knowledge of clinical assessment methods and interpretation for motor speech disorders

Audience: Graduate

3. Define speech intelligibility and discuss strategies for its measurement as well as its clinical uses.

Audience: Graduate

4. Describe the Mayo Clinic classification system for dysarthria and discuss its strengths and weakness as well as contemporary alternative approaches to classification of dysarthria.

Audience: Graduate

5. Describe the unique issues associated with pediatric motor speech disorders relative to adult onset motor speech disorders and how these issues impact assessment and treatment.

Audience: Graduate

6. Develop treatment plans for individuals with motor speech disorders and provide theoretical and evidence-based justification for the selection of treatment targets in the context of the patient's ability profile.

Audience: Graduate

7. Differentiate between impairment-based (restorative/(re)habilitative) objectives / approaches vs. activities and participation focused (compensatory) objectives / approaches.

Audience: Graduate

8. Define population-specific features that impact intervention target selection and develop population-specific treatment plans.

Audience: Graduate

**CS&D 706 – MANAGEMENT AND ASSESSMENT OF VOICE DISORDERS**

3 credits.

Presents information of the anatomy and physiology of voice production, the various diseases and conditions that cause voice disorders, ways to assess and treat voice disorders across the lifespan.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 707 – SWALLOWING DISORDERS**

2-3 credits.

Presents information on the anatomy, physiology, and neural bases of normal swallowing, the various diseases that can affect swallowing function, the nature of swallowing dysfunction and ways to assess it, and treatment options for patients with swallowing disorders.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CS&D 708 – FLUENCY AND PHONOLOGICAL DISORDERS**

3 credits.

Etiology, definition, diagnosis, and management of fluency and phonological disorders in children and adults.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 709 – LANGUAGE DEVELOPMENT AND DISORDERS IN SCHOOL AGE POPULATIONS: SCHOOL METHODS AND PROCEDURES**

3 credits.

Reviews contemporary literature relating to the language development and disorders of school age children and adolescents. Emphasis is on a description of disorders, assessment techniques, and school methods and procedures. Addresses UW-Madison Teacher Education Standards; WI Rules and Statutes, Teaching Standards stipulated in PI 34.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 710 – ACQUIRED LANGUAGE AND COGNITIVE-COMMUNICATION DISORDERS IN ADULTS II**

3 credits.

Intervention for adults with acquired cognitive-communication disorders and language, including principles of evaluation and treatment.

**Requisites:** CS&D 704

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Compare and contrast aphasia and cognitive-communication disorders with regard to definitions, basic characteristics, and principles of assessment and intervention

Audience: Graduate

2. Compare and contrast the characteristics of acquired language and cognitive-communication disorders vs. normal aging effects on communication

Audience: Graduate

3. Describe assessment and intervention principles that apply across acquired communication disorders

Audience: Graduate

4. Demonstrate evidence of critical thinking skills, the ability to be a critical consumer of the research literature, and generate research questions, and professional presentation skills

Audience: Graduate

5. Demonstrate the ability to engage in collaborative and critical group discussion

Audience: Graduate

6. Describe social determinants of health, and the interaction between cultural, linguistic, and sociocultural factors in order to discuss and identify health disparities in persons with acquired language and cognitive-communication disorders.

Audience: Graduate

7. Explain the interaction of cultural and linguistic variables and linguistic diversity on the individuals served, and their caregivers, in order to maximize service delivery for adults with cognitive-communication disorders and their family and care partners.

Audience: Graduate

**CS&D 712 – ASSESSMENT AND MANAGEMENT OF SPEECH SOUND DISORDERS IN CHILDREN**

3 credits.

Speech sound disorders in children, with an emphasis on articulation and phonological disorders.

**Requisites:** Declared in Communication Sciences and Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe typical speech sound development

Audience: Graduate

2. Describe underlying differences between articulation disorders, phonological disorders, and apraxia of speech.

Audience: Graduate

3. Explain and demonstrate various articulation and phonological treatment and awareness approaches.

Audience: Graduate

4. Critically evaluate, using quality evidence, resources, and foundational knowledge, assessment and treatment of articulation and phonological disorders in children with varying linguistic, dialectical, and cultural backgrounds.

Audience: Graduate

5. Develop proficiency in administering and interpreting various norm-referenced speech sound disorder assessments.

Audience: Graduate

6. Identify and describe speech sound disorders, their severity, and impact on clients and their family's lives by integrating information from assessments/observations.

Audience: Graduate

7. Identify evidence and rationales for or against treatment or assessment techniques/approaches depending on clients' presenting characteristics and/or speech sound disorder diagnosis.

Audience: Graduate

8. Describe accent modification as an elective service provided by speech-language pathologists.

Audience: Graduate

9. Describe considerations when assessing and treating a child with phonological and articulation disorders and associated co-occurring conditions.

Audience: Graduate

10. Indicate how structural conditions like cleft lip and palate may affect speech sound production and how such conditions may be assessed and treated via speech-language pathologists and other team members.

Audience: Graduate

**CS&D 713 – INTRODUCTION TO MEDICAL SPEECH PATHOLOGY**

1 credit.

Focuses on methods for participating in medical site speech pathology including professionalism, documentation, insurance, ethics, and counseling.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**CS&D 720 – HEARING AND AUDITORY REHABILITATION FOR SPEECH-LANGUAGE PATHOLOGY PRACTICE**

2 credits.

Fundamental treatments for addressing the communication needs of individuals with hearing difficulties.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe how sound is produced and define properties of sound

Audience: Graduate

2. Name and describe internal and external structures and functions of the ear.

Audience: Graduate

3. Define the types of hearing loss and their effects across the lifespan.

Audience: Graduate

4. Explain audiologist's reports and create reports for audiologists to share the patient's advancement in auditory and linguistic skills.

Audience: Graduate

5. Explain characteristics, advantages, and disadvantages of contemporary styles of hearing aids as well as cochlear implants.

Audience: Graduate

6. Compare and contrast communication modes and approaches for facilitating oral language development in deaf children.

Audience: Graduate

7. Describe Assistive Listening Devices

Audience: Graduate

8. Design auditory, speech, and language lesson plans for children with hearing loss based on data gathered from assessments.

Audience: Graduate

9. Develop active listening and counseling skills when treating families of children with hearing loss.

Audience: Graduate

**CS&D 752 – CAPSTONE IN COMMUNICATION SCIENCES AND DISORDERS: INTEGRATION OF CLINICAL AND RESEARCH METHODS**

3 credits.

Practice using scientific principles in your daily life and clinical practice; Evaluate scientific evidence as disseminated through multiple channels for use in research and clinical practice; and apply parallel modes of thinking in clinical practice and research.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 790 – PRACTICUM IN COMMUNICATIVE DISORDERS**

1-5 credits.

Supervised experience with persons manifesting communicative problems. Evaluation, rehabilitation, and conservation of hearing, language, and speech disorders in various clinical settings.

**Requisites:** Declared in Communication Sciences & Disorders MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CS&D 791 – SCHOOL PRACTICUM IN COMMUNICATION SCIENCES & DISORDERS**

5 credits.

Supervised experience in a public/private school setting with children manifesting speech, language and/or hearing problems. Involves evaluation and management of a variety of communicative disorders, as well as participation in the multi-disciplinary team process.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate proficient performance in the knowledge, skills, and dispositions under all of the Department of Public Instruction's (DPI) teacher standards.

Audience: Graduate

2. Apply policies and procedures to your student teaching experience.

Audience: Graduate

3. Actively participate in seminar activities (e-portfolio, job search, etc.).

Audience: Graduate

**CS&D 799 – INDEPENDENT STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CS&D 806 – PROFESSIONAL ISSUES: MEDICAL ISSUES**

1 credit.

Evaluation and management of persons with communication disorders within a medical setting. Information regarding various medical settings, ethics, functional goals, and documentation (e.g. billing, reporting, etc.).

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**CS&D 832 – PEDIATRIC AUDIOLOGY**

3 credits.

Study of normal physical, social, cognitive, speech and language and auditory development in children, the causes and effects of childhood hearing loss, hearing screening and the principles of early intervention, and the behavioral and objective assessment of hearing in children.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 833 – OCCUPATIONAL AUDIOLOGY**

2 credits.

Consideration of principles and issues regarding the effects of noise on people, of federal and state regulation of workplace noise, and of the practical aspects of hearing conservation for those exposed to occupational noise, non-occupational noise, or both.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**CS&D 834 – COUNSELING IN AUDIOLOGY**

2 credits.

Study of various roles of counseling in the audiologic rehabilitative process, and developing skills and awareness of building a trusting relationship, reflective practice including examining personal biases, conveying diagnostic information, educating and empowering patients, responding to the social-emotional impact of hearing and balance disorders, and examining how diversity, equity, and inclusion intersect with the counseling process.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 835 – CLINICAL RESEARCH METHODS**

3 credits.

Critical analysis of research in speech-language pathology and audiology including theoretical support, research design, statistical levels of measurement, methods of reporting research results, and drawing conclusions from the results.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 836 – PEDIATRIC HABILITATION/REHABILITATION**

3 credits.

Study of the principles and techniques of intervention used with children with hearing loss, including the selection and fitting of amplification, the effect of hearing loss on speech perception, production, and language, communication and educational options, and the habilitation of communication skills.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 845 – THE HUMAN BALANCE SYSTEM: STRUCTURE, ASSESSMENT, AND REHABILITATION**

3 credits.

Study of human balance function with emphasis on the vestibular system, including neurophysiology, testing, and rehabilitation. Clinical experience in electronystagmography (ENG) and videonystagmography (VNG), analysis of results, familiarization with rotational and posturography tests, and treatment techniques are included.

**Requisites:** CS&D 850 and 852

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of anatomy and physiology related to vestibular and balance function.

Audience: Graduate

2. Demonstrate understanding of assessment purpose and techniques, relation of assessments to anatomy, physiology, and function.

Audience: Graduate

3. Demonstrate understanding of selecting appropriate management recommendations and techniques related to assessments and balance function.

Audience: Graduate

**CS&D 846 – THE HUMAN BALANCE SYSTEM: LABORATORY**

1 credit.

Training to perform and analyze the results of electronystagmography (ENG) and videonystagmography (VNG) examinations, and practice the canalith repositioning maneuver. May also include observations of rotational and posturography tests.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 849 – GERIATRIC AUDIOLOGY: DIAGNOSIS AND REHABILITATION**

2 credits.

A study of basic theories of aging, anatomical and physiological effects of aging on the auditory and balance systems, and resulting communication difficulties associated with aging. Emphasizes both the diagnostic and rehabilitative challenges in working with elderly patients.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 850 – HEARING SCIENCE I: BASIC ACOUSTICS AND PSYCHOACOUSTICS**

3 credits.

Study of anatomy and physiology of the human auditory system, with an emphasis on the peripheral system. Basic concepts in psychoacoustics are discussed with reference to the normal and pathological auditory systems.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 852 – HEARING ASSESSMENT**

3 credits.

Learn concepts and procedures necessary for a basic hearing evaluation, including otoscopy, immittance, pure tone and speech audiometry. Take a case history, document and report results, and communicate results to patients. Develop beginning-level abilities to rule out medical disorders and make appropriate referrals.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize safe and unsafe practices related to hearing assessment, particularly when performing otoscopy.

Audience: Graduate

2. Operate hearing assessment equipment with professionalism, confidence and competence including troubleshooting and seeking guidance from available resources and user guides.

Audience: Graduate

3. Explain the components and underlying anatomy, physiology, pathology and theories related to comprehensive diagnostic hearing evaluation of a diverse population.

Audience: Graduate

4. Solicit and evaluate a patient's case history, hearing handicap and other factors that may affect their hearing and/or the hearing assessment process, performing the components of a comprehensive diagnostic hearing evaluation of a diverse population with accuracy and efficiency.

Audience: Graduate

5. Participate in discussions and reflect on topics of diversity, equity, and inclusion.

Audience: Graduate

**CS&D 853 – HEARING ASSESSMENT LABORATORY**

1 credit.

Focuses on procedures for tests of auditory function, the importance of understanding auditory function and available evidence as bases for test selections and the importance of realizing the objective(s) forming the bases of diagnostic procedures.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 854 – ELECTROACOUSTICS AND INSTRUMENT CALIBRATION**

2 credits.

Systematic review of physical concepts of acoustics and electronics underpinning the practice of audiology, as well as formally adopted standards by which clinical environments, instruments and procedures are calibrated.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 855 – ELECTROACOUSTICS AND CALIBRATION LABORATORY**

1 credit.

Laboratory experience in electroacoustic measurement and calibration of examination spaces, test equipment, and amplification systems pertinent to the practice of audiology.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 856 – AMPLIFICATION SYSTEMS I**

3 credits.

Introduction to hearing aids. Components and signal processing features of hearing aids, electroacoustic measurement and verification of hearing aids in couplers and real ears, earmold and earshell acoustics, assessing patient needs and determining hearing aid candidacy, using prescriptive fitting strategies, and hearing aid repair and troubleshooting.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Determine, and explain the rationale for, appropriate stimulus choices for electroacoustic testing of hearing aids.  
Audience: Graduate

2. Accurately interpret results of electroacoustic testing to determine if hearing aids meet manufacturer specifications, to determine if features are working properly, and to understand the actual measured effects of programming adjustments.  
Audience: Graduate

3. Interpret real-ear measurements (REMs), troubleshoot problems with REM measurement, and verify hearing aid features.  
Audience: Graduate

4. Describe methods to appropriately fit, program, adjust, and troubleshoot compression signal processing in hearing aids.  
Audience: Graduate

5. Describe the main characteristics of essential HA components and other signal processing features, such as directionality, noise reduction, AI, feedback management, connectivity, and other noise management features.  
Audience: Graduate

6. Determine each individual's concerns and needs (hearing aid candidacy), and select appropriate amplification for sample/hypothetical patients.  
Audience: Graduate

7. Determine and justify appropriate frequency-gain and output characteristics of hearing aids based on evidence-based hearing aid prescriptive procedures.  
Audience: Graduate

8. Select and justify an appropriate earmold/earshell/dome, tubing, and venting configuration for hypothetical patients that allows the necessary gain and minimizes the risk of feedback.  
Audience: Graduate

**CS&D 857 – LABORATORY IN AMPLIFICATION SYSTEMS I**

1 credit.

Testing, fitting, and repairing hearing aids, performing basic hearing aid tests and repairs, proper cerumen removal and ear impression techniques, and using appropriate strategies in fitting. Electroacoustic evaluation and use of probe microphone measures in hearing aid fitting.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 858 – PHYSIOLOGICAL ASSESSMENT IN AUDIOLOGY I**

2 credits.

Study of concepts and procedures in physiological assessment of the auditory system, with emphasis on otoacoustic emissions and auditory brainstem responses. Clinical applications and case studies integrate these recordings with behavioral assessment of the auditory system.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 859 – LABORATORY IN PHYSIOLOGICAL ASSESSMENT OF THE AUDITORY SYSTEM I**

1 credit.

Laboratory experience in the procedures and interpretation of physiological assessment of the auditory system, with the major emphasis on otoacoustic emissions and the auditory brainstem response.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 860 – PHYSIOLOGICAL ASSESSMENT IN AUDIOLOGY II**

2 credits.

Advanced study of physiological measures used by audiologists in threshold and diagnostic evaluations, including acoustic immittance, middle and long latency auditory evoked potentials, and cognitive auditory potentials.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 861 – LABORATORY IN PHYSIOLOGICAL ASSESSMENT OF THE AUDITORY SYSTEM II**

1 credit.

Laboratory experience with hands-on recording and interpreting advanced physiological measures used by audiologists for threshold and diagnostic evaluations. Tests include advanced acoustic immittance, middle and long latency auditory evoked potentials, and cognitive auditory potentials.

Learn to administer and interpret these tests and integrate the findings to form an overall assessment of clinical patients.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CS&D 862 – AUDITORY AND VESTIBULAR PATHOLOGIES II**

3 credits.

Major disorders of the auditory and vestibular systems, with an emphasis on differential diagnosis of disorders of the endorgans and neural systems and multisystem disorders. Casual factors, treatment, prognosis, and case studies are included.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 863 – IMPLANTABLE AUDITORY PROSTHESES**

3 credits.

The audiological management of severe to profound hearing loss using implantable auditory prostheses. Focuses on cochlear implants, and provides an introduction to the auditory brainstem implant.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe different implantable auditory prostheses

Audience: Graduate

2. Understand history, background, development of internal and external components.

Audience: Graduate

3. Understand patient candidacy and outcomes.

Audience: Graduate

4. Demonstrate advanced understanding of design of auditory implantable devices and the philosophies underlying clinical programming approaches.

Audience: Graduate

5. Demonstrate advanced knowledge of appropriate use of electrophysiologic measurements in clinical settings and similar objective measures in implantable device programming .

Audience: Graduate

6. Demonstrate understanding of a topic in the field in preparation for a professional presentation

Audience: Graduate

**CS&D 865 – PRACTICE MANAGEMENT**

2 credits.

Consideration of non-profit and for-profit practice models with emphasis on organizational structure, legal and tax implications, financial performance, policies and practices of personnel management, marketing strategies, risk management and professional ethics.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 866 – AMPLIFICATION SYSTEMS II**

2 credits.

Strategies for fitting hearing aids, including selection and recommendation, use of prescription gain formulas, and verification of gain. Considerations in geriatric and pediatric hearing aid fitting and ethical issues. Basic techniques in determining patient satisfaction with hearing aids.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 867 – SCHOOL METHODS FOR AUDIOLOGISTS**

1 credit.

Designed to fulfill Wisconsin's Department of Public Instruction (DPI) licensing requirements for audiologists. Application of knowledge and skills in assessment and intervention of hearing related disorders to the public school setting.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CS&D 891 – CLERKSHIP IN AUDIOLOGY I**

1-3 credits.

Hands-on experience focusing on the acquisition of beginning skills in both screening and diagnostic audiology. It provides initial training in the use of audiometric instruments and software, patient interactions, and reporting procedures.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CS&D 892 – CLERKSHIP IN AUDIOLOGY II**

1-3 credits.

Provides the continued development of skills in the assessment of the hearing and implementation of treatment plans across all ages. It also may include assessment of vestibular and peripheral and central auditory systems.

**Requisites:** CS&D 891

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CS&D 893 – CLERKSHIP IN AUDIOLOGY III**

1-4 credits.

Provides opportunities to practice skills in settings outside of the university clinics. The goal is to advance all skills to the developing level and perform assessments and treatment with less supervision.

**Requisites:** CS&D 892

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CS&D 894 – EXTERNSHIP IN AUDIOLOGY**

2-4 credits.

Continue development of skills in assessment of hearing and implementation of treatment plans across all ages. Hone skills to the mastery level and perform competently with a minimum of supervision.

**Requisites:** CS&D 893

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CS&D 899 – CAPSTONE STUDY IN AUDIOLOGY**

1-3 credits.

Independent work on a capstone project under the supervision of a faculty member.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CS&D 900 – SEMINAR-SPEECH SCIENCE**

2-3 credits.

Focus varies with staff. Various aspects of physiological and acoustic phonetics and of speech perception.

**Requisites:** Declared in Communication Sciences and Disorders MS or PhD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CS&D 913 – SEMINAR-PROBLEMS IN VOICE DISORDERS**

1-3 credits.

Symptomatology, etiology, diagnosis, and treatment of voice disorders with emphasis on current research procedures and findings and consideration of special problems.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**CS&D 921 – SEMINAR-PROBLEMS IN AUDIOLOGY**

1-3 credits.

Current interests in areas of auditory evaluation, pathology or rehabilitation.

**Requisites:** Declared in Audiology Consortial Program with UW-Stevens Point AUD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CS&D 990 – RESEARCH AND THESIS**

1-12 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CS&D 999 – INDEPENDENT STUDIES**

1-3 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

# COMMUNITY AND ENVIRONMENTAL SOCIOLOGY (C&E SOC)

## C&E SOC/AGROECOL/ENTOM/ENVIR ST 103 – AGROECOLOGY: AN INTRODUCTION TO THE ECOLOGY OF FOOD AND AGRICULTURE

3 credits.

Agroecology has blossomed across the world in recent decades as not only a science, but also a practice, and a movement. Employ the multiple disciplines and perspectives that Agroecology affords to analyze our agricultural and food systems within a broader context of dynamic social and ecological relationships.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain and analyze basic biophysical processes of agricultural ecosystems and the challenges and benefits of various management systems

Audience: Undergraduate

2. Interrogate social, economic, and political structures underlying agriculture at local, regional, national, and global scales

Audience: Undergraduate

3. Describe how they personally connect to local to global agricultural landscape as humans, ecological actors, food and fuel consumers, and thoughtful citizens

Audience: Undergraduate

## C&E SOC/SOC 140 – INTRODUCTION TO COMMUNITY AND ENVIRONMENTAL SOCIOLOGY

4 credits.

Sociological examination of the linkages between the social and biophysical dimensions of the environment. Key topics include community organizing, local food systems, energy transitions, environmental justice, resource dependence, and sustainable development.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand how social science arguments are constructed and evaluated.

Audience: Undergraduate

2. Learn and practice core elements of sociological reasoning, including making connections between a social phenomenon and its larger context; evaluating the “situated” nature of knowledge; and recognizing the paradigms, or knowledge frameworks, that structure our thinking about social issues.

Audience: Undergraduate

3. Gain experience critically evaluating various sources of knowledge and data about social issues.

Audience: Undergraduate

4. Become familiar with key concepts such as: “community,” “development,” “growth,” “economic security,” “environmental justice,” “sustainability,” “globalization,” and “neoliberalism;” learn how these concepts are involved in contemporary debates about what is fair, just, and desirable for the places where we live and the world as a whole.

Audience: Undergraduate

5. Become familiar with important actors in the social processes that affect our communities and environment, including government, corporations, transnational institutions and social movements; also learn about historical shifts in the relationships among these actors.

Audience: Undergraduate

6. Develop skills and frameworks for analyzing how social processes disparately affect different groups of people.

Audience: Undergraduate

7. Make connections between sociological theories and concepts and your own experiences.

Audience: Undergraduate

**C&E SOC/SOC 210 – SURVEY OF SOCIOLOGY**

3–4 credits.

Introduction to the field of American sociology, its subfields and specialized areas of research, theoretical traditions and research methods.

**Requisites:** Satisfied Communications A requirement. Not open to students with credit for SOC 181 or C&E SOC/SOC 211

**Course Designation:** Gen Ed – Communication Part B

Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**C&E SOC/SOC 211 – THE SOCIOLOGICAL ENTERPRISE**

3 credits.

Basic principles and definitions of sociology. Readings and discussion of the perspectives of sociology, the individual and society, groups and social process, stratification, organizations and power, demography, and social change.

**Requisites:** Not open to students with credit for SOC 181 or C&E SOC/SOC 210

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze and discuss what sociologists (and scholars in “neighboring” disciplines) have written.

Audience: Undergraduate

2. Perform some forms of sociological research and writing.

Audience: Undergraduate

**C&E SOC/SOC 222 – FOOD, CULTURE, AND SOCIETY**

3 credits.

Social and cultural dimensions of food production and consumption. Uses historical and cross-cultural analytical frameworks. Treats a wide variety of topics including indigenous, racial, and ethnic foodways, industrialized food systems, sustainable agriculture, movements for food justice.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge about how the system of food production, distribution and consumption in the United States is organized, how it has changed, and how it is changing.

Audience: Undergraduate

2. Understand the ways that technologies, globalization, and social movements have affected the food system.

Audience: Undergraduate

3. Present clearly written, persuasive arguments in response to academic questions.

Audience: Undergraduate

4. Prepare for and present in oral discussion by offering points with evidence.

Audience: Undergraduate

5. Recognize, challenge and avoid false analogies, overgeneralizations, and other logical fallacies.

Audience: Undergraduate

**C&E SOC/SOC 245 – TECHNOLOGY AND SOCIETY**

3 credits.

Covers technology, the social forces shaping its development, and social impacts of its adoption. Examine one's assumptions about technology and its relationship to society.

**Requisites:** None

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**C&E SOC/F&W ECOL/SOC 248 – ENVIRONMENT, NATURAL RESOURCES, AND SOCIETY**

3 credits.

Introduces the concerns and principles of sociology through examination of human interaction with the natural environment. Places environmental issues such as resource depletion, population growth, food production, environmental regulation, and sustainability in national and global perspectives.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**C&E SOC/HISTORY/POLI SCI/SOC 259 – FORWARD? THE WISCONSIN IDEA, PAST AND PRESENT**

1-3 credits.

Engage in ongoing reflection and dialogue on the Wisconsin Idea and how it informs the mission of the University of Wisconsin. Consider the Wisconsin Idea as it has developed since its beginnings, with a focus on what it means today and what it can mean in the future.

**Requisites:** Junior or senior standing only**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**Learning Outcomes:** 1. Listen respectfully to different opinions, respond rationally rather than emotionally, make reasoned arguments.

Audience: Undergraduate

2. Respond to another point of view with research and substantive comments or questions, present and support your own position, and thus engage in a wider conversation.

Audience: Undergraduate

3. Consider a specific question ("What makes an idea a Wisconsin Idea...?") and present a reasoned argument supporting the conclusion. (1-credit students)

Audience: Undergraduate

4. Deeply analyze an argument and respond by applying it to the student's own educational strengths and weaknesses. (3-credit students)

Audience: Undergraduate

5. Use course content to explain a controversial issue and suggest a course of action to address it, stating reasons, and anticipating counterarguments. (3-credit students)

Audience: Undergraduate

**C&E SOC/AFROAMER/ANTHRO/GEOG/HISTORY/LACIS/ POLI SCI/SOC/SPANISH 260 – LATIN AMERICA: AN INTRODUCTION**

3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Analyze Latin American culture and society from an interdisciplinary perspective.

Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.

Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.

Audience: Undergraduate

**C&E SOC 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area of Community and Environmental Sociology. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor**Course Designation:** Honors - Honors Only Courses (H)**Repeatable for Credit:** Yes, unlimited number of completions**C&E SOC 299 – INDEPENDENT STUDY**

1-3 credits.

Research work for students under direct guidance of a faculty member in an area of Community and Environmental Sociology. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**C&E SOC/A A E/SOC 340 – ISSUES IN FOOD SYSTEMS**

3-4 credits.

With primary emphasis on the U.S., the course covers social, economic and biological dimensions of food systems. Using classroom and community experience, the course combines academic approaches with practitioner knowledge. A community project is required.

**Requisites:** SOC/C&E SOC 140, SOC 181, 210, or 211

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**C&E SOC/SOC 341 – LABOR IN GLOBAL FOOD SYSTEMS**

3 credits.

Overview of our current food system and how new technologies and globalization are reshaping it, focusing especially on the implications for workers throughout the food chain. Learn about the ways that social movements are working to reshape commodity chains by promoting local production, fair trade, and labor justice.

**Requisites:** 3 credits in C&E SOC or SOC

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**C&E SOC/SOC 343 – SOCIOLOGY OF HEALTH AND MEDICINE**

3 credits.

Social, cultural, and structural factors in shaping definitions of health and illness, distribution of disparate health outcomes, and the organization of health professions and healthcare.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand how concepts such as "disease" and "health" are socially constructed.

Audience: Undergraduate

2. Identify and describe how social contexts (e.g. race and gender) shape health outcomes and structure disparities.

Audience: Undergraduate

3. Identify the social and cultural shifts in medicine and healthcare.

Audience: Undergraduate

4. Critically analyze their own experiences with health, illness, and medicine using course material.

Audience: Undergraduate

5. Demonstrate understanding and engagement with course material and produce thoughtful and compelling arguments in assigned work.

Audience: Undergraduate

**C&E SOC/GEN&WS/SOC 347 – GENDER AND SEXUALITY IN RURAL PLACES**

3 credits.

A sociological examination of the influence of rurality and place on gender and sexual performances, norms, and identities in rural geographies.

**Requisites:** GEN&WS 101, 102, 103, C&E SOC/SOC 140, 210, 211, or SOC 181

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the role of social organization and social change in shaping equities and disparities in environment, health, and community.

Audience: Undergraduate

2. Describe how rurality and place influence gender norms and performance in private and public spheres.

Audience: Undergraduate

3. Critique ideas related to gender, sexuality, and rurality, including anti-urbanism, metronormativity, the rural idyll, natural/unnatural, and visibility politics.

Audience: Undergraduate

4. Assess how discourses and ideas about gender and sexuality influence dominant and minority groups.

Audience: Undergraduate

**C&E SOC/SOC 357 – METHODS OF SOCIOLOGICAL INQUIRY**

3-4 credits.

Scientific methods in the study of society; procedures for testing sociological theory: problem definition, hypothesis construction, collection and evaluation of data. Practical experience conducting small research projects.

**Requisites:** Sophomore standing or (SOC 181, SOC/C&E SOC 140, 210, or 211)

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**C&E SOC/SOC 360 – STATISTICS FOR SOCIOLOGISTS I**

4 credits.

Presentation of sociological data; descriptive statistics; probability theory and statistical inference; estimation and tests of hypotheses; regression and correlation and the analysis of contingency tables.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use the methods of quantitative social research to assemble, describe, and draw inference from quantitative data.

Audience: Undergraduate

2. Execute and present elementary statistical analyses.

Audience: Undergraduate

3. Critically evaluate statistical evidence in both academic and popular settings.

Audience: Undergraduate

**C&E SOC/SOC 361 – STATISTICS FOR SOCIOLOGISTS II**

4 credits.

Applied linear regression modeling for social scientists. Bivariate and multiple regression, dummy variables, interactions, nonlinear relationships, indirect effects and omitted variable bias, outliers, heteroskedasticity, and multicollinearity; associated diagnostics and corrections. Use of Stata and/or SAS for dataset creation and analysis.

**Requisites:** C&E SOC/SOC 360, ECON 310, PSYCH 210, GEOG 360, MATH/STAT 310, STAT 301, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Honors - Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Prepare oneself to conduct one's own research using linear and logistic regression analysis and secondary data sources, at a level befitting beginning research assistants on faculty research projects.

Audience: Both Grad & Undergrad

2. Find, download, and format social science data suitable for analysis.

Audience: Both Grad & Undergrad

3. Make, interpret, and critique advanced specifications involving dummy variables, interactions, and nonlinear transformations.

Audience: Both Grad & Undergrad

4. Use diagnostics for various threats to model fit and interpretation.

Audience: Both Grad & Undergrad

5. Establish a solid foundation for studying the many methods that are extensions of linear regression (including logistic regression).

Audience: Both Grad & Undergrad

6. Achieve a deep understanding of ordinary least squares regression (OLS).

Audience: Both Grad & Undergrad

7. Become expert at presenting quantitative results from OLS models in a substantively meaningful and accessible way.

Audience: Both Grad & Undergrad

8. Understand and critique the ways in which OLS is used in the field.

Audience: Both Grad & Undergrad

9. Prepare oneself to write an article-length description of an independent research project that uses linear or logistic regression.

Audience: Graduate

### **C&E SOC/SOC 365 – DATA MANAGEMENT FOR SOCIAL SCIENCE RESEARCH**

3-4 credits.

Understanding the structure of different types of social scientific data, techniques for data evaluation, cleaning, documentation and visual display, merging data from multiple sources, restructuring data for analysis.

**Requisites:** C&E SOC/SOC 360, PSYCH 210, STAT 301, ECON 310, MATH/STAT 310, or GEOG 360

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **C&E SOC/POP HLTH 370 – INTRODUCTION TO PUBLIC HEALTH**

3 credits.

Introduction to the principles of public health. Using local and global health problems as examples, introduces epidemiology, evidence-based public health practice, evaluation, and communication. Covers the major subject domains of public health including infectious and chronic disease, environmental health, injuries and accidents, and health care systems.

Key theoretical models and empirical approaches of public health are discussed.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Social Science or Natural Science  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define public health and its core functions

Audience: Undergraduate

2. Describe the difference between individual- and population-based strategies for improving health, including primary, secondary, and tertiary prevention approaches

Audience: Undergraduate

3. Describe major causes and trends in morbidity and mortality in the U.S. and globally

Audience: Undergraduate

4. Demonstrate knowledge of the 5-step public health approach (define the problem, find the causes, develop effective programs, implement programs, and evaluate impact)

Audience: Undergraduate

5. Describe the challenges and opportunities for evidence-based public health practice, focusing on health equity and social justice

Audience: Undergraduate

### **C&E SOC 375 – SPECIAL TOPICS**

1-4 credits.

Specialized topics in community and environmental sociology. In-depth investigation into the sociological aspects of a variety of community and environmental issues, such as globalization, climate change, social and environmental sustainability, technology.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **C&E SOC 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Community and Environmental Sociology and internship site supervisor. Students are responsible for arranging the work and credits with the UW-Madison instructor and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **C&E SOC 400 – STUDY ABROAD IN COMMUNITY AND ENVIRONMENTAL SOCIOLOGY**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

### **C&E SOC/CURRIC/ENVIR ST 405 – EDUCATION FOR SUSTAINABLE COMMUNITIES**

3 credits.

How can education - for children and adults, in school and out - help to address crucial environmental and social sustainability challenges? What ideas and strategies have guided environmental and sustainability education over the years? What can individual people do to address environmental challenges, and what can only be accomplished by people working together? What does sustainability have to do with justice - and vice versa? Examine the principles behind behavior change and empowerment, community action and whole-scale social reform. Drawing on research and theory from across the social sciences, we will explore the uncertain relationship between education and advocacy, seeking the means by which education can have the greatest impact without compromising the core ideals of a democratic society.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**C&E SOC/ENVIR ST/GEOG 434 – PEOPLE, WILDLIFE AND LANDSCAPES**

3 credits.

Explores the relationship between humans and wildlife amid diverse landscapes, both historic and contemporary, tropical and temperate. Investigates how humans shape wild animal populations by modifying physical environments, and by hunting, domesticating and introducing species.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**C&E SOC/SOC 475 – CLASSICAL SOCIOLOGICAL THEORY**

3 credits.

Classical theory; Marx, Durkheim, Weber, and other important classical theorists and schools of thought.

**Requisites:** Sophomore standing or (SOC 181, SOC/C&E SOC 140, 210, or 211)**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**C&E SOC 500 – CAPSTONE EXPERIENCE**

3 credits.

A capstone experience involving the application of sociological concepts and methods to concrete social and environmental problems. Involves working in teams, engaging in problems using approaches such as service learning, community based research, and interdisciplinary approaches.

**Requisites:** Senior standing**Repeatable for Credit:** No**Last Taught:** Spring 2025**C&E SOC/SOC 532 – HEALTH CARE ISSUES FOR INDIVIDUALS, FAMILIES AND SOCIETY**

3 credits.

Issues related to health and health care delivery in our society. Topics include social, cultural and ethical influences on consumer definitions of health and use of medical care, and on the health care system's responses.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2021**C&E SOC/SOC 533 – PUBLIC HEALTH IN RURAL & URBAN COMMUNITIES**

3 credits.

Sociological approaches to community, rural, and public health. Examines epidemiological evidence for and policy solutions to health issues that impact vulnerable populations in diverse geographic and social settings.

Topics include mental health, environmental and occupational health, preventive care, substance abuse.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, or 211**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**C&E SOC/ENVIR ST/SOC 540 – SOCIOLOGY OF INTERNATIONAL DEVELOPMENT, ENVIRONMENT, AND SUSTAINABILITY**

3 credits.

Sociological analysis of relationships among economic growth, environmental sustainability and social justice in the developing world.

Considers frameworks for understanding poverty, hunger, educational and technological inequality, and the impact of globalization on prospects for socially and ecologically sustainable development.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, or 211**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**C&E SOC/SOC 541 – ENVIRONMENTAL STEWARDSHIP AND SOCIAL JUSTICE**

3 credits.

Application of sociological theory and analysis to environmental issues. Examines the ways in which environmental stewardship and conflict are embedded within broader cultural, social, and political contexts.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, 211, F&W ECOL/C&E SOC/SOC 248, ENVIR ST 112, 113, GEOG/ENVIR ST 139, 337, 339, GEOG 101, or graduate/professional standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

### **C&E SOC/MED HIST/PHILOS 565 – THE ETHICS OF MODERN BIOTECHNOLOGY**

3 credits.

An in-depth study of a selection of ethical issues arising from the application of modern biotechnology to microorganisms, plants, non-human animals, and human beings. We will aim at a discussion that is informed by empirical research and by work done in ethical theory, political philosophy, and other relevant disciplines, and whose character is rigorous, clear, nuanced, and unbiased.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Think critically about arguments.

Audience: Both Grad & Undergrad

2. Communicate precisely and concisely in both writing and speech.

Audience: Both Grad & Undergrad

3. Exchange reasons about controversial matters respectfully and with the aim of uncovering the truth.

Audience: Both Grad & Undergrad

4. Practice interpretive charity and intellectual honesty, which includes appropriate attribute to others of their ideas, and recognition and frankness about the limitations of one's own ideas.

Audience: Both Grad & Undergrad

5. Independently locate and engage with the latest relevant empirical and philosophical research.

Audience: Graduate

6. Exhibit substantial synthetic and analytic abilities by considering how an application of modern biotechnology ethically compares to the status quo and to other possible alternatives.

Audience: Graduate

### **C&E SOC/SOC 573 – COMMUNITY ORGANIZATION AND CHANGE**

3 credits.

Examines theories of community change and different models of community organizing.

**Requisites:** Junior standing or (SOC 181, SOC/C&E SOC 140, 210, or 211)

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **C&E SOC/AMER IND/SOC 578 – POVERTY AND PLACE**

3 credits.

The allocation of economic and social rewards in the United States; emphasis on persistently poor regions and communities; analysis of selected minority groups and their poverty statuses; poverty programs and their consequences for structural and cultural changes.

**Requisites:** SOC/C&E SOC 140, 210, 211, or SOC 181

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **C&E SOC/SOC/URB R PL 617 – COMMUNITY DEVELOPMENT**

3 credits.

Social, cultural and personality factors influencing community development, with reference to developing countries as well as contemporary rural communities; consideration of theoretical and operational issues.

**Requisites:** SOC/C&E SOC 140, 210, 211, SOC 181, or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**C&E SOC/SOC 618 – SOCIAL NETWORK ANALYSIS**

3 credits.

Social network analysis is a social scientific approach examining individuals as embedded in networks of social relations. Covers the fundamentals of network thinking, network tools, and the analysis and presentation of social network data. Direct practice with network data using software R.

**Requisites:** Junior standing and (C&E SOC/SOC 360, STAT 301, STAT 371, ECON 310, PSYCH 210, GEOG 360, STAT/MATH 310, or GEN BUS 303)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify when data are suitable for network analysis.

Audience: Both Grad & Undergrad

2. Choose the appropriate network analysis techniques to answer one's research questions.

Audience: Both Grad & Undergrad

3. Use the R software and packages to perform the analyses.

Audience: Both Grad & Undergrad

4. Critically read network studies from across the social sciences.

Audience: Both Grad & Undergrad

5. Prepare a substantive social network analysis up to publication standards.

Audience: Graduate

**C&E SOC/SOC 630 – SOCIOLOGY OF DEVELOPING SOCIETIES/THIRD WORLD**

3 credits.

Review of problems and prospects of so-called "developing societies." Includes theory of economic/social development, political economic organizations of "developing" societies, history of colonialism/imperialism, attempts to industrialize and results of those attempts.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**C&E SOC/SOC/URB R PL 645 – MODERN AMERICAN COMMUNITIES**

3 credits.

Relevance of the concept of community to American society. Review of several basic theories of community and analysis of the nature of community in the broader political and economic context.

**Requisites:** SOC/C&E SOC 140, 210, 211, SOC 181, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**C&E SOC/SOC 650 – SOCIOLOGY OF AGRICULTURE**

3 credits.

Introduction to sociology of agriculture in advanced industrial-capitalist societies, including theoretical, historical, and empirical issues of agriculture in the United States.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, or 211

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**C&E SOC/SOC 652 – SOCIOLOGY OF ECONOMIC INSTITUTIONS**

3 credits.

Sociological perspectives on the organization of the firm, financial markets, and work, intermediate associations (unions, ethnic economies), the state, and the international economy. Contrast between neoclassical, traditional institutionalist, post-fordist, and neo-fordist perspectives on the nature and evolution of these institutions.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**C&E SOC 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for undergraduate students in an Honors program completing a thesis in the area of Community and Environmental Sociology, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

**C&E SOC 682 – SENIOR HONORS THESIS**

2-4 credits.

Second semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Community and Environmental Sociology, as arranged with a faculty member.  
C&E SOC 681

**Requisites:** Consent of instructor**Course Designation:** Honors - Honors Only Courses (H)**Repeatable for Credit:** No**Last Taught:** Spring 2020**C&E SOC 691 – SENIOR THESIS**

2 credits.

Individual study for undergraduate students completing a thesis in the area of Community and Environmental Sociology, as arranged with a faculty member.

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2018**C&E SOC 692 – SENIOR THESIS**

2 credits.

Second semester of individual study for undergraduate students completing a thesis in the area of Community and Environmental Sociology, as arranged with a faculty member. C&E SOC 691

**Requisites:** Consent of instructor**Repeatable for Credit:** No**Last Taught:** Spring 2019**C&E SOC/SOC 693 – PRACTICUM IN ANALYSIS AND RESEARCH**

3 credits.

Practical experience in techniques of social research through assignment to a research project for the semester. Focuses on the art and practice of research and the writing of research reports.

**Requisites:** SOC/C&E SOC 357, 361 and declared in Sociology: Concentration in Analysis and Research**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Accelerated Honors (!)

**Repeatable for Credit:** No**Last Taught:** Spring 2025**C&E SOC 699 – SPECIAL PROBLEMS**

1-4 credits.

Individual advanced work in an area of Community and Environmental Sociology under the direct guidance of a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**C&E SOC/ISYE/NE/SOC 708 – SOCIETAL RISK MANAGEMENT OF TECHNOLOGICAL HAZARDS**

3 credits.

Issues involved in decision-making regarding technological risks and risk management in areas such as nuclear power, hazardous waste disposal, and pollution control. Risk perception and cognitive biases; risk analysis and decision analysis; political issues in risk management; regulatory mechanisms; and risk communication. Selected case studies.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2020**C&E SOC/SOC 724 – INTERMEDIATE POLITICAL SOCIOLOGY**

3 credits.

Critical examination of theories and research in political sociology. Topics include: power and interests, state-formation, social movements, class and political behavior, revolutions, ideology, and states and social policy.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**C&E SOC/SOC 730 – INTERMEDIATE SOCIAL PSYCHOLOGY: THE INDIVIDUAL AND SOCIETY**

3 credits.

Major social psychological theories and research that focus on the individual in social context. Topics include: perspectives on socialization, the self, social perception and attribution, attitudes, language and nonverbal communication, and attraction and relationships.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2023**C&E SOC/SOC 750 – RESEARCH METHODS IN SOCIOLOGY**

3 credits.

Application of scientific methods to the analysis of social phenomena; methodological orientations in sociology; types of research procedure: nature of sociological variables.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**C&E SOC/ED POL/SOC 755 – METHODS OF QUALITATIVE RESEARCH**

3 credits.

Introduces qualitative, or ethnographic, research methods, emphasizing those suitable for educational and other organizational settings. Considers strengths and limitations of qualitative approaches in relation to varied research problems. Explores methodological procedures from entry into the field through writing.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**C&E SOC/SOC 875 – SPECIAL TOPICS**

1-4 credits.

Advanced topics in sociology. Topics vary.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**C&E SOC/GEN&WS/SOC 904 – SOCIOLOGICAL PERSPECTIVES ON GENDER**

3 credits.

Advanced topics in the analysis of gender relations in society.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**C&E SOC/SOC 922 – SEMINAR-RACE AND ETHNIC RELATIONS**

3 credits.

Theoretical, methodological, and current research problems.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**C&E SOC/SOC 923 – SEMINAR-SOCIAL STRATIFICATION**

3 credits.

Advanced study of current research in social stratification, e.g., historical and comparative studies of inequality; mathematical and econometric modeling of mobility and achievement processes; demographic approaches to power and inequality.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2022**C&E SOC/ANTHRO/ECON/SOC 925 – SEMINAR: SOCIO-ECONOMIC CHANGE IN UNDERDEVELOPED AREAS**

2-3 credits.

Social and economic factors relating to stability, growth, and change in the non-Western areas of the contemporary world.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**C&E SOC/SOC 940 – SEMINAR-SOCIOLOGY OF ECONOMIC CHANGE**

3 credits.

Theoretical and technical problems in research concerning organizational and socio-psychological aspects of changes in large scale social systems.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**C&E SOC/SOC 945 – SEMINAR-RURAL SOCIOLOGY**

3 credits.

Theory and research in alternate semesters in rural aspects of population, stratification, social change, and groups and institutions.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**C&E SOC/SOC 948 – SEMINAR: ENVIRONMENTAL SOCIOLOGY**

3 credits.

Examines topics such as theories of environment and society, the treadmill of production, environmental movements, political ecology, environmental justice, consumption, ecological modernization, sustainability, environmental risk, and the sociology of environmental science.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**C&E SOC/SOC 960 – SEMINAR-CURRENT METHODOLOGICAL ISSUES IN SOCIAL PSYCHOLOGY**

3 credits.

Alternative research designs and processes, measurement, and analytical techniques in social psychology; experience in developing and utilizing research plans and techniques.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2020

**C&E SOC/SOC 971 – SEMINAR-TOPICS IN DEMOGRAPHY AND ECOLOGY**

3 credits.

Advanced study of selected topics related to population and society, including health and inequality across the life course, environmental and spatial demography, biodemography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**C&E SOC/SOC 977 – SEMINAR-HUMAN ECOLOGY**

3 credits.

Review of ecological theory and research; critical assessment of the ecological complex (population, organization, environment, and technology); problems of measurement.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**C&E SOC/A A E/ANTHRO/GEOG/HISTORY/LACIS/POLI SCI/PORTUG/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA**

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**C&E SOC/SOC 985 – RESEARCH: COMMUNITY AND ENVIRONMENTAL SOCIOLOGY**

1-3 credits.

Critical analysis of recent theoretical and methodological issues through presentations of research in progress.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**C&E SOC/SOC 987 – RESEARCH: RACE AND ETHNIC STUDIES**

1-3 credits.

Analysis of recent research and theory, based on reviews of literature and presentations of research in progress.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**C&E SOC 990 – RESEARCH**

1-12 credits.

Independent graduate research under supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**C&E SOC/SOC 993 – RESEARCH: SOCIOLOGY OF ECONOMIC CHANGE TRAINEES**

1-3 credits.

Presentations of research in progress concerning social and economic change in developing countries.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**C&E SOC/SOC 995 – RESEARCH: METHODOLOGY TRAINEES**

1-3 credits.

Workshop on social science research methods and professional development, e.g. ethics, communication, data management, novel research methods.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**C&E SOC/SOC 997 – RESEARCH: DEMOGRAPHY AND ECOLOGY TRAINEES**

1-3 credits.

Interdisciplinary training workshop on current research in population science from scholars at research and teaching institutions around the world.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**C&E SOC 999 – READING AND RESEARCH**

1-3 credits.

Independent graduate research under supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

# COMPARATIVE BIOSCIENCES (COMP BIO)

## COMP BIO 500 – FUNDAMENTAL PRINCIPLES OF VETERINARY ANATOMY

5 credits.

A detailed consideration of gross anatomical structure with emphasis on major anatomical patterns present in species important to veterinary medicine. The dog is used as a model domestic mammal and comparisons with other species are considered. All body systems are dissected. Clinical implications of these dissections are emphasized.

**Requisites:** Declared in Doctor of Veterinary Medicine with first year standing

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use correct anatomical terminology to identify gross anatomical structures of the dog and cat

Audience: Undergraduate

2. Recognize anatomical principles and patterns that can be applied to future study of other veterinary species

Audience: Undergraduate

3. Describe topographical relationships between anatomical structures

Audience: Undergraduate

4. Explain the relationship between structure and function

Audience: Undergraduate

5. Apply the scientific method and critical thinking to the study of anatomy

Audience: Undergraduate

## COMP BIO 501 – VETERINARY HISTOLOGY

5 credits.

Light and digital microscopy are used to study the anatomy of organs and tissues at the cellular level. Microanatomic features of all major organ systems are identified, and pertinent physiologic concepts are discussed to correlate structure with function. Mammalian systems are emphasized, and comparisons to non-mammalian species are considered. Direct applications to clinical medicine are included.

**Requisites:** Declared in Doctor of Veterinary Medicine with first year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the characteristic cellular structure of the basic tissue types and major organs

Audience: Undergraduate

2. Identify tissues and organs by their histologic features

Audience: Undergraduate

3. Extrapolate the 3D microarchitecture of an organ from 2D histologic specimens

Audience: Undergraduate

4. Discuss how tissue composition and cellular organization of an organ facilitates its function

Audience: Undergraduate

5. Make basic predictions of how disruption of normal cellular architecture results in disease

Audience: Undergraduate

### COMP BIO 502 – MOLECULAR AND METABOLIC BASIS OF MEDICINE

3 credits.

Covers metabolism with a more advanced incorporation of concepts of chemistry, cell biology and physiology. Clinical correlations in veterinary medicine are also covered.

**Requisites:** Declared in Doctor of Veterinary Medicine with first year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how and why metabolism is altered in response to perturbations such as nutrient deprivation, stress, hormonal imbalance, or effectively any other pathological condition that a veterinarian might encounter.

Audience: Undergraduate

2. Apply molecular biology and genetics to elucidate the molecular basis of disease.

Audience: Undergraduate

3. Demonstrate understanding of current and potential uses of biotechnology in diagnosis and treatment of disease.

Audience: Undergraduate

4. Illustrate molecular/biochemical mechanisms of commonly used drugs.

Audience: Undergraduate

5. Apply scientific principles underlying veterinary medicine and recognize the importance of research in advancing the profession.

Audience: Undergraduate

6. Utilize effective communication, demonstrate sound problem-solving and critical-thinking skills, and apply evidence-based decision-making.

Audience: Undergraduate

### COMP BIO 503 – VETERINARY DEVELOPMENTAL ANATOMY

2 credits.

Principles of development and organogenesis in domestic animals. Normal developmental patterns are related to adult anatomy. Clinical implications of common congenital defects are discussed.

**Requisites:** Declared in Doctor of Veterinary Medicine with first year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Illustrate how morphogenetic processes in development can explain common developmental defects and adult anatomic structures.

Audience: Undergraduate

2. Organize adult cell types and anatomical structures to their embryonic cellular origins.

Audience: Undergraduate

3. Predict effects of perturbing key molecular and cellular pathways on embryogenesis.

Audience: Undergraduate

4. Given a clinical presentation of a developmental defect, propose a plausible molecular or cellular mechanism.

Audience: Undergraduate

5. Explain the basis of presented molecular biology techniques and apply them appropriately to research and clinical scenarios

Audience: Undergraduate

6. Apply the SVM problem solving paradigm to clinical scenarios and basic science questions presented in class.

Audience: Undergraduate

7. Identify and critically evaluate primary veterinary literature to enhance your understanding of developmental anatomy concepts and their clinical implications.

Audience: Undergraduate

### COMP BIO 505 – VETERINARY NEUROANATOMY AND NEUROPHYSIOLOGY

3 credits.

A comparative approach to the morphological and physiological properties of the central nervous system of animals, particularly those of veterinary importance.

**Requisites:** Declared in Doctor of Veterinary Medicine with first year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe three dimensional relationships of the central nervous system in relevant veterinary species.

Audience: Graduate

2. Identify the structure and function of the major divisions of the central nervous system as a basis for lesion localization.

Audience: Graduate

3. Explain key aspects of a neurologic exam and analyze and interpret the results from a neurologic evaluation.

Audience: Graduate

4. Localize lesions in the nervous system using results from neurologic assessment.

Audience: Graduate

5. Recognize the value of current neuroscience research and its potential applications to clinical veterinary neurology.

Audience: Graduate

### COMP BIO 506 – VETERINARY PHYSIOLOGY B

4 credits.

Covers comparative veterinary physiology covering digestive, endocrine, and reproductive systems.

**Requisites:** Declared in Doctor of Veterinary Medicine with first year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize the processes involved in the absorption of dietary nutrients and water, and examine the role these mechanisms play in support of important bodily functions.

Audience: Graduate

2. Apply the principles of gastrointestinal physiology to identify causes and propose treatments for gastrointestinal tract disorders in animals.

Audience: Graduate

3. Describe the functions of mammalian endocrine systems and the dynamic methods of hormone regulation.

Audience: Graduate

4. Define the major endocrine glands, their hormones, and the functions of those hormones that contribute to homeostasis throughout the body.

Audience: Graduate

5. Discuss how disruptions in balance of the major hormones manifest as clinical disease, and apply this understanding to predict outcomes of basic diagnostic testing and therapeutic approaches to correct disease states.

Audience: Graduate

6. Summarize the events that occur in male and female animals which leads to the generation of healthy gametes.

Audience: Graduate

7. Describe the processes involved in the orchestration and regulation of fertilization, pregnancy, parturition, lactation and the provision of neonatal health of mammals.

Audience: Graduate

8. Predict the effects that interventions and therapeutic approaches will have on animal reproduction.

Audience: Graduate

**COMP BIO 550 – ANATOMY OF THE LARGE DOMESTIC ANIMALS**

2 credits.

A study of the horse and the ox with special emphasis on the anatomical specializations of these species with extensive comparisons to the anatomy of the small domestic animals. Other large domestic animals, including swine, will be considered as appropriate to demonstrate anatomical variation.

**Requisites:** Declared in Doctor of Veterinary Medicine with first year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe functionally important and clinically relevant anatomical specializations in the horse and ox (and the pig, as applicable).

Audience: Undergraduate

2. Identify and describe topographical relationships, including external landmarks, in the ox and horse, and use external landmarks to locate anatomical structures when performing a physical exam.

Audience: Undergraduate

3. Use anatomic and associated common terminology interchangeably as it relates to large animals.

Audience: Undergraduate

4. Compare the anatomy of small and large animals and draw conclusions regarding fundamental anatomical principles which can be applied to many other species encountered in the curriculum and beyond.

Audience: Undergraduate

5. Engage in peer teaching to facilitate learning for all while developing the intellectual curiosity that fosters independent learning required as future professionals.

Audience: Undergraduate

**COMP BIO 551 – VETERINARY PHYSIOLOGY A**

4 credits.

Covers comparative veterinary physiology covering electrophysiology, and muscle, cardiovascular, respiratory, renal and acid-base physiology.

**Requisites:** Declared in Doctor of Veterinary Medicine with first year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use basic physiological principles to explain how neurological, cardiorespiratory, and renal systems function to maintain homeostasis in healthy animals

Audience: Graduate

2. Describe how neuroendocrine systems regulate organ function and integrate appropriate responses to physiological and environmental challenges

Audience: Graduate

3. Predict changes in physiological variables during pathological conditions and diseases

Audience: Graduate

4. Use fundamental equations to solve quantitative physiological problems and interpret the results appropriately.

Audience: Graduate

**COMP BIO 555 – VETERINARY TOXICOLOGY**

2 credits.

Science of toxicology as it relates to veterinary practice. The principles of toxicology and the mechanism and treatment of toxicants commonly encountered in small and large animals will be presented.

**Requisites:** Declared in Doctor of Veterinary Medicine with second year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify major classes of toxicants affecting small and large animals, birds, and other species

Audience: Graduate

2. Identify common toxicant exposure conditions

Audience: Graduate

3. Recall major biochemical, physiological, and dietary factors that cause variations in cell and tissue sensitivity and that may explain species-, sex-, and age-related differences in toxicity

Audience: Graduate

4. Integrate basic toxicological mechanisms and cellular adaptation responses with likely clinical signs and tissue lesions

Audience: Graduate

5. Select appropriate steps in emergency treatment, select appropriate tests to confirm diagnosis, and recall appropriate antidotal therapy to be used.

Audience: Graduate

**COMP BIO 556 – VETERINARY PHARMACOLOGY**

4 credits.

Basic pharmacology of various drug classes used in veterinary medicine together with examples of clinical drug use. Important species variations in drug use and drug response will be stressed.

**Requisites:** Declared in Doctor of Veterinary Medicine with second year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the principles of pharmacology (absorption, distribution, metabolism and excretion) to serve as the basis for selecting classes of drugs for clinical use.

Audience: Undergraduate

2. Predict the therapeutic and toxic effects of drugs based on their mechanisms of action, pharmaceutical properties and patient characteristics (species, age, food animal, etc.).

Audience: Undergraduate

3. Calculate correct drug dosages from a variety of different starting materials, define metric system prefixes, and describe various solution types that constitute drug formulations.

Audience: Undergraduate

4. Identify pre-existing patient conditions that impact drug efficacy, metabolism and excretion.

Audience: Undergraduate

5. Outline major therapeutic drug classes used to modulate the function of multiple organ systems (including cardiac, vascular, pulmonary, renal, urinary, endocrine, GI, CNS, and eye) as well as major drug classes used to treat inflammation, and reduce bacterial and parasite infections.

Audience: Undergraduate

6. Define cellular pathways and molecules that serve as drug targets for clinical therapy.

Audience: Undergraduate

**COMP BIO 675 – SPECIAL TOPICS**

1-5 credits.

**Requisites:** Declared in Doctor of Veterinary Medicine

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Develop competence and professional skills in veterinary medicine

Audience: Undergraduate

2. Explore current topics and trends in veterinary medicine

Audience: Undergraduate

3. Developing breadths of experiences related to veterinary medicine

Audience: Undergraduate

**COMP BIO 699 – DIRECTED STUDY**

1-5 credits.

Projects in the laboratory and/or through library work in specific subject area under the direct guidance of faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply foundational veterinary knowledge and critical thinking to identify problems in veterinary medicine

Audience: Undergraduate

2. Develop professional veterinary medicine skills of interest by performing select techniques and procedures

Audience: Undergraduate

3. Communicate in written and/or verbal reports to veterinary colleagues and supervisors

Audience: Undergraduate

**COMP BIO 775 – EXTERNSHIP**

1-24 credits.

Offers opportunities for faculty coordinated experience in the veterinary medical profession outside School of Veterinary Medicine.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Understand real-world applications of foundational veterinary medical knowledge and skills

Audience: Graduate

2. Apply foundational veterinary knowledge and critical thinking to solve real-world problems

Audience: Graduate

3. Perform select techniques and procedures to develop various skills professional in veterinary medicine

Audience: Graduate

**COMP BIO/PATH-BIO 812 – RESEARCH ETHICS AND CAREER DEVELOPMENT**

2 credits.

Provides instruction in principles and concepts of research ethics through presentations and discussion of case studies. Topics pertinent to development of a successful career in research are also included.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the complexities of ethical issues in research and the factors that can influence perceptions of ethical behavior.

Audience: Graduate

2. Develop a framework for making ethical decisions in research.

Audience: Graduate

3. Identify areas to apply best practices in responsible conduct of research to guide decision-making.

Audience: Graduate

4. Explain where to seek guidance for improving scientific communication skills.

Audience: Graduate

5. Develop the ability to effectively convey research results and findings.

Audience: Graduate

6. Recognize the importance of ethical conduct in research.

Audience: Graduate

7. Discuss the potential consequences of unethical behavior in research.

Audience: Graduate

8. Develop a sense of personal responsibility for maintaining ethical standards in research.

Audience: Graduate

9. Recognize the importance of safe research environments.

Audience: Graduate

### COMP BIO 990 – RESEARCH

1-12 credits.

Research.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Exhibit a broad understanding of general comparative bioscience principles

Audience: Graduate

2. Conduct independent research using a variety of approaches

Audience: Graduate

3. Think critically to address research challenges

Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research

Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab

Audience: Graduate

## COMPARATIVE LITERATURE (COMP LIT)

### COMP LIT 201 – INTRODUCTION TO PRE-MODERN LITERATURES/ IMPACT ON THE MODERN WORLD

3 credits.

Critical study of pre-modern literatures from the ancient worlds to the Middle Ages; broad survey covering many national literatures, stressing cross-cultural literary relations and their impact on the modern world.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### COMP LIT 202 – INTRODUCTION TO MODERN AND CONTEMPORARY LITERATURE

3 credits.

Critical study of modern literature, from the 15th century to the 20th century; broad survey covering many national literatures, stressing cross-cultural literary relations and including emergent literatures.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2022

### COMP LIT 203 – INTRODUCTION TO CROSS-CULTURAL LITERARY FORMS

3 credits.

Introduction to the critical study of specific literary forms (e.g., comedy, short story) and the connections between literary forms and other cultural and artistic phenomena (e.g., cinema, TV, music, visual arts).

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### COMP LIT 350 – PROBLEMS IN COMPARATIVE LITERATURES AND CULTURES

3-4 credits.

Comparative study - historical, theoretical, critical - of literatures and literary studies in their interaction with cultural themes, with social formations, with seminal concepts and ideas, with non-literary disciplines as they inform reading and analysis of literature.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

### COMP LIT 358 – PROBLEMS IN TRANSNATIONAL GENRE AND MODE

3-4 credits.

Comparative study of the nature and substance of genre distinctions; relations between genre and mode in diverse literatures; critical analysis of texts in the context of literary distinctions of genre and mode - with attention to cross-cultural, transnational and historical perspectives.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### COMP LIT 370 – COMPARATIVE PROBLEMS IN PERIODS AND MOVEMENTS

3-4 credits.

Comparative study of literatures of historical periods, international and inter-linguistic relations, flux of ideas, forms, styles; literary movements and trends, principles linking literary texts, their diversity and variation, their connection to relevant debates in aesthetics, philosophy, or other fields.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COMP LIT 475 – POETICS AND LITERARY THEORY**

3-4 credits.

Study of the changes and development of the systematics, theoretics, and mechanics of literary form and utterance.

**Requisites:** Junior standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2020**COMP LIT 500 – THE COMPARATIVE IN AND BEYOND COMPARATIVE LITERATURE**

3 credits.

Topics will vary and cover a wide range of comparative topics - literary, cultural, philosophical, historical, legal - with connections to traditional disciplines of comparativist faculty.

**Requisites:** Junior standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2020**COMP LIT 699 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2019**COMP LIT 750 – PROBLEMS IN COMPARATIVE LITERATURES AND CULTURES**

3 credits.

Comparative study - historical, theoretical, critical - of literatures and literary studies in their interaction with cultural themes, with social formations, with seminal concepts and ideas, with non-literary disciplines as they inform reading and analysis of literature.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**COMP LIT 990 – RESEARCH AND THESIS**

1-12 credits.

Advanced level mentored reading and research for students with dissertator status

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**COMPUTER SCIENCES  
(COMP SCI)****COMP SCI/L I S 102 – INTRODUCTION TO COMPUTING**

3 credits.

Provides a broad overview of computing at an introductory level, including topics such as security, robotics, and artificial intelligence. Increases understanding of how computers work and how algorithms solve problems. Design and implement creative applications in an introductory coding environment. Provides a broad overview of computing and algorithms without an emphasis on programming.

**Requisites:** MATH 96 or placement into MATH 141. MATH 118 does not fulfill the prerequisite. Not open to students with credit for COMP SCI 300 or 320**Course Designation:** Gen Ed - Quantitative Reasoning Part A  
Breadth - Natural Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop a fundamental understanding of the key concepts of computer science in a variety of contexts.

Audience: Undergraduate

2. Create art, music, stories, games and other programs in a visual, introductory programming language  
Audience: Undergraduate

3. Understand how computers use algorithms to solve problems and act in intelligent ways.  
Audience: Undergraduate

4. Understand how computers utilize large sets of data to provide insight and knowledge.  
Audience: Undergraduate

5. Learn how software and hardware make modern computers work  
Audience: Undergraduate

**COMP SCI 200 – PROGRAMMING I**

3 credits.

Learn the process of incrementally developing small (200-500 lines) programs along with the fundamental Computer Science topics. These topics include: problem abstraction and decomposition, the edit-compile-run cycle, using variables of primitive and more complex data types, conditional and loop-based flow control, basic testing and debugging techniques, how to define and call functions (methods), and IO processing techniques. Also teaches and reinforces good programming practices including the use of a consistent style, and meaningful documentation. Intended for students who have no prior programming experience.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Gen Ed - Quantitative Reasoning Part B  
Breadth - Natural Science  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Design and implement a standalone program that can interact with the user via prompts and or menus, access and edit data stored in an array or list structure, and use and further process the data found in those structures.

Audience: Undergraduate

2. Trace code to determine output or results.

Audience: Undergraduate

3. Implement a given program design and choose correct control structures for implementing algorithms expressed in pseudocode.

Audience: Undergraduate

4. Interpret a variety of diagram types used to express programming concepts and results: truth tables, memory model diagrams, control flow charts (activity diagrams), class diagrams, object diagrams, and use-case diagrams.

Audience: Undergraduate

5. List, describe, use the basic I/O operations for reading and writing text files to and from the computer's hard drive.

Audience: Undergraduate

6. Manipulate quantitative information to create models, and/or devise solutions to problems using multi-step arguments, based on and supported by quantitative information.

Audience: Undergraduate

7. Evaluate models and arguments using quantitative information.

Audience: Undergraduate

8. Express and interpret in context models, solutions and/or arguments using verbal, numerical, graphical algorithmic, computational or symbolic techniques.

Audience: Undergraduate

**COMP SCI 220 – DATA SCIENCE PROGRAMMING I**

4 credits.

Introduction to Data Science programming using Python. No previous programming experience required. Emphasis on analyzing real datasets in a variety of forms and visual communication.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement or declared in the Professional Capstone Program in Computer Sciences. Not open to students with credit for COMP SCI 301.

**Course Designation:** Gen Ed - Quantitative Reasoning Part B  
Breadth - Natural Science  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Integrate foundational concepts and tools from mathematics, computer science and statistics to solve data science problems

Audience: Undergraduate

2. Demonstrate competencies with tools and processes necessary for data management and reproducibility

Audience: Undergraduate

3. Produce meaning from data employing modeling strategies

Audience: Undergraduate

4. Demonstrate critical thinking related to data science concepts and methods

Audience: Undergraduate

5. Demonstrate oral, written and visual communication skills related to data science

Audience: Undergraduate

6. Manipulate quantitative information to create models, and/or devise solutions to problems using multi-step arguments, based on and supported by quantitative information

Audience: Undergraduate

**COMP SCI/MATH 240 – INTRODUCTION TO DISCRETE MATHEMATICS**

3 credits.

Basic concepts of logic, sets, partial order and other relations, and functions. Basic concepts of mathematics (definitions, proofs, sets, functions, and relations) with a focus on discrete structures: integers, bits, strings, trees, and graphs. Propositional logic, Boolean algebra, and predicate logic. Mathematical induction and recursion. Invariants and algorithmic correctness. Recurrences and asymptotic growth analysis. Fundamentals of counting.

**Requisites:** MATH 217 or 221

**Course Designation:** Breadth - Natural Science  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**COMP SCI/E C E 252 – INTRODUCTION TO COMPUTER ENGINEERING**

3 credits.

Logic components built with transistors, rudimentary Boolean algebra, basic combinational logic design, basic synchronous sequential logic design, basic computer organization and design, introductory machine- and assembly-language programming.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Perform basic operations on binary representations for data

Audience: Undergraduate

2. Analyze simple combinational and sequential digital logic and memory systems

Audience: Undergraduate

3. Identify the components and operation of an instruction set processor and write programs using assembly language

Audience: Undergraduate

4. Recognize and analyze ethical and professional responsibilities in engineering contexts

Audience: Undergraduate

**COMP SCI 272 – INTRODUCTION TO WEB DEVELOPMENT**

3 credits.

Introduces methods and tools for creating/maintaining secure and interactive web content. Topics include programming fundamentals to support core web concepts, application development essentials, and content management systems. Web best practices - such as accessibility, design, and critical thinking about relevant ethics and organization. Covers practical skills to design and implement websites using popular scripting languages and frameworks, content management systems (CMSs), and related tools.

**Requisites:** Not open to students with credit for L I S/COMP SCI 472.**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop understanding and application of current web scripting languages and development tools and frameworks.

Audience: Undergraduate

2. Install, configure, and customize open source content management systems.

Audience: Undergraduate

3. Understand and apply user experience and accessibility best practices in building accessible web-based systems.

Audience: Undergraduate

4. Design solutions to problems using multi-step scripting, logical operations, and functions.

Audience: Undergraduate

5. Understand ethical issues and concerns related to website development and its related technologies.

Audience: Undergraduate

6. Analyze the management challenges, and ethical considerations inherent in web development projects.

Audience: Undergraduate

**COMP SCI 298 – DIRECTED STUDY IN COMPUTER SCIENCE**

1-3 credits.

Undergraduate directed study in computer sciences.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**COMP SCI 300 – PROGRAMMING II**

3 credits.

Introduction to Object-Oriented Programming using classes and objects to solve more complex problems. Introduces array-based and linked data structures: including lists, stacks, and queues. Programming assignments require writing and developing multi-class (file) programs using interfaces, generics, and exception handling to solve challenging real world problems. Topics reviewed include reading/writing data and objects from/to files and exception handling, and command line arguments. Topics introduced: object-oriented design; class vs. object; create and define interfaces and iterators; searching and sorting; abstract data types (List, Stack, Queue, PriorityQueue(Heap), Binary Search Tree); generic interfaces (parametric polymorphism); how to design and write test methods and classes; array based vs. linked node implementations; introduction to complexity analysis; recursion.

**Requisites:** Satisfied QR-A and (COMP SCI 200, 220, 302, 310, 301, or placement into COMP SCI 300) or (E C E/COMP SCI 252 and E C E 203); graduate/professional standing; declared in Capstone Certificate in COMP SCI. Not open to students with credit for COMP SCI 367.

**Course Designation:** Gen Ed – Quantitative Reasoning Part B  
Breadth – Natural Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. List and describe common operations for List, Stack, Queue, Priority Queue, Tree.

Audience: Undergraduate

2. Analyze the time-complexity and compare the Big-Oh  $O(n)$  worst case complexity of different ADT implementations, and the complexity for any data structures and algorithms used to implement those operations.

Audience: Undergraduate

3. Identify and properly test all boundary conditions for comprehensive testing of their programs.

Audience: Undergraduate

4. Interpret and create a variety of diagrams: Call Stack trace; Stack, Queue, and Tree Data Structures; Recursive call (list or tree), control flow charts, class diagrams, object diagrams, and use-case diagrams.

Audience: Undergraduate

5. Implement Object-Oriented (multi-class) standalone programs that manage a variety of data storage and retrieval operations (Program development skills and experience).

Audience: Undergraduate

6. Evaluate models and arguments using quantitative information.

Audience: Undergraduate

**COMP SCI 304 – PEER COLLABORATION IN COMPUTER SCIENCES (WES-CS)**

1 credit.

Interactive opportunity to discuss basic computer science concepts such as programming, including data structures, algorithms, object-oriented programming principles and techniques for efficient coding, testing, and debugging in a smaller setting with peers. Requires concurrent enrollment in COMP SCI 200, 220, 252, 300, 320, 354, or 400.

**Requisites:** Consent of instructor

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate collaborative programming and thinking skills in group settings.

Audience: Undergraduate

2. Explain computer science concepts verbally.

Audience: Undergraduate

3. Describe computing's impact on communities, including its role in perpetuating bias and power.

Audience: Undergraduate

**COMP SCI 310 – PROBLEM SOLVING USING COMPUTERS**

3 credits.

Gives students an introduction to computer and analytical skills to use in their subsequent course work and professional development. Discusses several methods of using computers to solve problems, including elementary programming techniques, symbolic manipulation languages, and software packages. Techniques will be illustrated using sample problems drawn from elementary engineering. Emphasis is on introduction of algorithms with the use of specific tools to illustrate the methods.

**Requisites:** MATH 222, graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**COMP SCI 319 – DATA SCIENCE PROGRAMMING I FOR RESEARCH**

3 credits.

Introduction to Data Science programming using Python. In addition to a survey of programming basics (control flow and data structures), web scraping, database queries, and tabular analysis will be introduced. Projects will emphasize analyzing real datasets in a variety of forms and visual communication using plotting tools. Similar to COMP SCI 220 but the pedagogical style of the projects will be adapted to graduate students in fields other than computer science and data science. No previous programming experience required.

**Requisites:** Graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. integrate foundational concepts and tools from mathematics, computer science and statistics to solve data science problems

Audience: Undergraduate

2. demonstrate competencies with tools and processes necessary for data management and reproducibility

Audience: Undergraduate

3. produce meaning from data employing modeling strategies

Audience: Undergraduate

4. demonstrate critical thinking related to data science concepts and methods

Audience: Undergraduate

5. demonstrate oral, written and visual communication skills related to data science

Audience: Undergraduate

6. manipulate quantitative information to create models, and/or devise solutions to problems using multi-step arguments, based on and supported by quantitative information

Audience: Undergraduate

**COMP SCI 320 – DATA SCIENCE PROGRAMMING II**

4 credits.

Intermediate approach to Data Science programming using Python. Experience with basic tabular analysis in Python is assumed. Learn to implement data structures (e.g., graphs) to efficiently represent datasets. Software-engineering tools such as version control and Python virtual environments will be introduced, with an emphasis on reproducibility of analysis. Tracing and A/B testing will be introduced as techniques for generating meaningful datasets. Introduces basic classification, clustering, optimization, and simulation techniques. Plotting and visual communication will be emphasized throughout the course.

**Requisites:** COMP SCI 220 (or COMP SCI 301 prior to Spring 2020), COMP SCI 300, 319, graduate/professional standing, or declared in the Computer Sciences for Professionals Capstone Certificate

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. integrate foundational concepts and tools from mathematics, computer science and statistics to solve data science problems

Audience: Undergraduate

2. demonstrate competencies with tools and processes necessary for data management and reproducibility

Audience: Undergraduate

3. produce meaning from data employing modeling strategies

Audience: Undergraduate

4. demonstrate critical thinking related to data science concepts and methods

Audience: Undergraduate

5. conduct data science activities aware of and according to policy, privacy, security and ethical considerations

Audience: Undergraduate

6. demonstrate oral, written and visual communication skills related to data science

Audience: Undergraduate

**COMP SCI/E C E 352 – DIGITAL SYSTEM FUNDAMENTALS**

3 credits.

Logic components, Boolean algebra, combinational logic analysis and synthesis, synchronous and asynchronous sequential logic analysis and design, digital subsystems, computer organization and design.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and E C E/COMP SCI 252

**Course Designation:** Gen Ed – Quantitative Reasoning Part B  
Breadth – Physical Sci. Counts toward the Natural Sci req  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform operations on signed and unsigned numbers, including evaluating overflow  
Audience: Undergraduate

2. Implement Boolean logic circuits, use Boolean identities to perform algebraic manipulations, use Karnaugh maps to implement any function of 4 variables, use DeMorgans's Theorem, implement any function as SOP or POS

Audience: Undergraduate

3. Design datapath circuits, decoders, muxes, priority encoders, tri-states, understand hierarchy and how to build up larger datapaths from blocks, design ALUs and other digital circuits using rudimentary HDL constructs  
Audience: Undergraduate

4. Design sequential circuits, analyze synchronous vs. asynchronous designs and flip-flops vs. latches, trace the behavior of a sequential circuit, design state machines for control Logic  
Audience: Undergraduate

5. Analyze basic processor architecture, define a control word and analyze operation of the datapath in relation to it, describe the basic operation of a single-cycle stored program computer  
Audience: Undergraduate

**COMP SCI/E C E 354 – MACHINE ORGANIZATION AND PROGRAMMING**

3 credits.

An introduction to fundamental structures of computer systems and the C programming language with a focus on the low-level interrelationships and impacts on performance. Topics include the virtual address space and virtual memory, the heap and dynamic memory management, the memory hierarchy and caching, assembly language and the stack, communication and interrupts/signals, compiling and assemblers/linkers.

**Requisites:** E C E/COMP SCI 252 and (COMP SCI 300 or 302) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Gen Ed – Quantitative Reasoning Part B  
Breadth – Natural Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**COMP SCI 368 – LEARNING A PROGRAMMING LANGUAGE**

1 credit.

For students interested in learning a particular programming language. Focuses on a specific language offered at one of three levels: beginner, intermediate, and advanced. Students may repeat the course if the topic title is different.

**Requisites:** None

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COMP SCI 400 – PROGRAMMING III**

3 credits.

The third course in our programming fundamentals sequence. It presumes that students understand and use functional and object-oriented design and abstract data types as needed. This course introduces balanced search trees, graphs, graph traversal algorithms, hash tables and sets, and complexity analysis and about classes of problems that require each data type. Students are required to design and implement using high quality professional code, a medium sized program, that demonstrates knowledge and use of latest language features, tools, and conventions. Additional topics introduced will include as needed for projects: inheritance and polymorphism; anonymous inner classes, lambda functions, performance analysis to discover and optimize critical code blocks. Students learn about industry standards for code development. Students will design and implement a medium size project with a more advanced user-interface design, such as a web or mobile application with a GUI and event-driven implementation; use of version-control software.

**Requisites:** COMP SCI 300, graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth – Natural Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**COMP SCI/L I S/STAT 401 – UNDERGRADUATE COOPERATIVE EDUCATION**

1 credit.

Full time work experience which combines classroom theory with practical knowledge related to Computer Sciences, Data Science, Statistics, or Information Science.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, for 3 number of completions

**Learning Outcomes:** 1. Apply academic experience gained through coursework in a professional setting.

Audience: Undergraduate

2. Experience the nature and demands of a professional career in computer science, information science, and/or statistics/data science

Audience: Undergraduate

3. Develop professional and transferable skills like time management, collaboration, problem-solving, and communication in the workplace.

Audience: Undergraduate

**COMP SCI 402 – INTRODUCING COMPUTER SCIENCE TO K-12 STUDENTS**

2 credits.

Work in teams to lead Computer Science clubs and workshops for K-12 students at sites in the Madison area. Design and lead activities to help K-12 students learn computational thinking and computer programming.

**Requisites:** COMP SCI 200, 220, 300, 301, 302, 310, 367, placement into COMP SCI 300, or L I S/COMP SCI 102 (COMP SCI 202 prior to Fall 2023), graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Write programs in the Scratch programming language.

Audience: Undergraduate

2. Design and lead after-school programming clubs for K-12 students.

Audience: Undergraduate

3. Incorporate effective instructional strategies when teaching K-12 students.

Audience: Undergraduate

4. Reflect on and document their teaching.

Audience: Undergraduate

**COMP SCI/STAT 403 – INTERNSHIP COURSE IN COMP SCI AND DATA SCIENCE**

1 credit.

Enables students with outside internships to earn academic credit connected to their work experience related to the Computer Sciences or Data Science programs.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the challenges and opportunities in Computer Sciences and Data Science professions

Audience: Undergraduate

2. Be prepared to find, apply and interview for a job and/or additional education

Audience: Undergraduate

3. Articulate your career goals and long-term trajectory

Audience: Undergraduate

**COMP SCI 407 – FOUNDATIONS OF MOBILE SYSTEMS AND APPLICATIONS**

3 credits.

Design and implementation of applications, systems, and services for mobile platforms with (i) constraints, such as limited processing, memory, energy, interfaces, variable bandwidth, and high mobility, and (ii) features, such as touchscreens, cameras, electronic compasses, GPS, and accelerometers.

**Requisites:** COMP SCI 400 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the mobile ecosystem.

Audience: Undergraduate

2. Understand basics of mobile system design and constituents, including wireless communication, location services, energy management, use of cloud services, and mobile device interface design.

Audience: Undergraduate

3. Demonstrate the fundamentals of mobile app development: setting up the development environment, creating an app from scratch, and understanding the app lifecycle.

Audience: Undergraduate

4. Understand the various app components, strategies for optimizing app performance, and use of mobile features.

Audience: Undergraduate

5. Construct end-to-end applications that use server backends.

Audience: Undergraduate

6. Demonstrate strong teamwork capabilities including collaborative working, task distribution, and conflict resolution.

Audience: Undergraduate

**COMP SCI 412 – INTRODUCTION TO NUMERICAL METHODS**

3 credits.

Interpolation, solution of linear and nonlinear systems of equations, approximate integration and differentiation, numerical solution of ordinary differential equations, Data fitting (such as least squares) by polynomials and splines. Knowledge of matrix algebra recommended, such as MATH 340.

**Requisites:** MATH 222 and (MATH/COMP SCI 240 or MATH 234) and (COMP SCI 200, 300, 301, 302, 310, or placement into COMP SCI 300) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**COMP SCI/ISYE/MATH 425 – INTRODUCTION TO COMBINATORIAL OPTIMIZATION**

3 credits.

Focuses on optimization problems over discrete structures, such as shortest paths, spanning trees, flows, matchings, and the traveling salesman problem. We will investigate structural properties of these problems, and we will study both exact methods for their solution, and approximation algorithms.

**Requisites:** (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and use the structural properties of combinatorial optimization problems

Audience: Undergraduate

2. Apply algorithms for the solution -exact or approximate- of a combinatorial optimization problem

Audience: Undergraduate

3. Explain why the algorithms studied are correct and understand their running time

Audience: Undergraduate

**COMP SCI/EC/MATH 435 – INTRODUCTION TO CRYPTOGRAPHY**

3 credits.

Cryptography is the art and science of transmitting digital information in a secure manner. Provides an introduction to its technical aspects.

**Requisites:** (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**COMP SCI/STAT 471 – INTRODUCTION TO COMPUTATIONAL STATISTICS**

3 credits.

Classical statistical procedures arise where closed-form mathematical expressions are available for various inference summaries (e.g. linear regression; analysis of variance). A major emphasis of modern statistics is the development of inference principles in cases where both more complex data structures are involved and where more elaborate computations are required. Topics from numerical linear algebra, optimization, Monte Carlo (including Markov chain Monte Carlo), and graph theory are developed, especially as they relate to statistical inference (e.g., bootstrapping, permutation, Bayesian inference, EM algorithm, multivariate analysis).

**Requisites:** STAT/MATH 310 and (STAT 333 or 340), graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Use computational tools (alongside mathematical ones) to extract information from (a) the likelihood function, the central object of interest in frequentist statistics, and (b) the posterior distribution, the central object of interest in Bayesian statistics  
Audience: Undergraduate

2. Describe, understand the theoretical properties of, and implement basic algorithms for optimizing likelihood functions, including least squares and the IRLS algorithm, and the EM algorithm  
Audience: Undergraduate

3. Understand random numbers and pseudorandom numbers and how to distinguish them, and utilize a variety of techniques for generating random variates from a probability distribution  
Audience: Undergraduate

4. Use Monte Carlo methodology for such purposes as (a) carrying out a simulation study to study the properties of a statistical method, or (b) performing statistical inference via the bootstrap, or MCMC  
Audience: Undergraduate

5. Understand the use of graphical models for representing the structure of complex joint distributions, and be able to use computational tools to extract information from graphical models  
Audience: Undergraduate

**COMP SCI/L I S 472 – INTRODUCTION TO WEB DEVELOPMENT**

3 credits.

Applied web development introduces methods and tools for creating/maintaining secure and interactive web content. Topics include programming fundamentals to support core web concepts, application development essentials, and content management systems. Web best practices - such as accessibility, design, and critical thinking about relevant ethics and organization - will be incorporated throughout. Gain practical skills to design and implement websites using popular scripting languages and frameworks, content management systems (CMSs), and related tools.

**Requisites:** Junior standing, declared in Library and Information Studies MA, Information MS, or Capstone Certificate in Computer Sciences for Professionals. Not open to students with credit for COMP SCI 272.

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop understanding and application of current web scripting languages and development tools and frameworks.

Audience: Both Grad & Undergrad

2. Install, configure, and customize open source content management systems.

Audience: Both Grad & Undergrad

3. Understand and apply user experience and accessibility best practices in building accessible websites.

Audience: Both Grad & Undergrad

4. Design solutions to problems using multi-step scripting, logical operations, and functions.

Audience: Both Grad & Undergrad

5. Understand ethical issues and concerns related to website development and its related technologies.

Audience: Both Grad & Undergrad

6. Analyze the management challenges, and ethical considerations inherent in web development projects.

Audience: Both Grad & Undergrad

7. Critically evaluate and compare different frameworks and libraries for extending scripting capabilities.

Audience: Graduate

**COMP SCI/MATH/STAT 475 – INTRODUCTION TO COMBINATORICS**

3 credits.

Problems of enumeration, distribution, and arrangement. Inclusion-exclusion principle. Generating functions and linear recurrence relations. Combinatorial identities. Graph coloring problems. Finite designs. Systems of distinct representatives and matching problems in graphs. Potential applications in the social, biological, and physical sciences. Puzzles. Problem solving.

**Requisites:** (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand basic counting strategies, such as staged thought-experiments, inclusion/exclusion, generating functions, and recurrence relations, and apply these strategies to solve a wide variety of counting problems.

Audience: Undergraduate

2. Recall basic objects that are used in combinatorics, such as permutations and combinations of sets and multisets, binomial and multinomial coefficients, the Catalan numbers, the Stirling numbers, and the partition numbers.

Audience: Undergraduate

3. Analyze a given combinatorial problem using the standard theorems of combinatorics, such as the pigeonhole principle, the Newton binomial theorem, the multinomial theorem, the Ramsey theorem, the Dilworth theorem, the Burnside theorem, and the Polya counting theorem.

Audience: Undergraduate

4. Construct mathematical arguments related to combinatorial problems using the above definitions, properties, theorems, and counting strategies; including the construction of examples and counterexamples.

Audience: Undergraduate

5. Convey his or her arguments in oral and written form in English, using appropriate mathematical terminology, notation, and grammar.

Audience: Undergraduate

**COMP SCI/CURRIC 502 – THEORY AND PRACTICE IN COMPUTER SCIENCE EDUCATION**

1 credit.

Computer science educational pedagogy and general teaching practices. Practical experience gained through tutoring students. Knowledge of object-oriented programming required.

**Requisites:** COMP SCI 300 or 302 or declared in Computer Science graduate program

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COMP SCI/E C E 506 – SOFTWARE ENGINEERING**

3 credits.

Ideas and techniques for designing, developing, and modifying large software systems. Topics include software engineering processes; requirements and specifications; project team organization and management; software architectures; design patterns; testing and debugging; and cost and quality metrics and estimation. Students will work in large teams on a substantial programming project.

**Requisites:** (COMP SCI 367 or 400) and (COMP SCI 407, 536, 537, 545, 559, 564, 570, 679 or E C E/COMP SCI 552) or graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COMP SCI/MATH 513 – NUMERICAL LINEAR ALGEBRA**

3 credits.

Direct and iterative solution of linear and nonlinear systems and of eigenproblems. LU and symmetric LU factorization. Complexity, stability, and conditioning. Nonlinear systems. Iterative methods for linear systems. QR-factorization and least squares. Eigenproblems: local and global methods.

**Requisites:** (MATH 340, 341, or 375) and (COMP SCI 200, 300, 301, 302, 310, or placement into COMP SCI 300) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) program

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COMP SCI/MATH 514 – NUMERICAL ANALYSIS**

3 credits.

Polynomial forms, divided differences. Polynomial interpolation. Polynomial approximation: uniform approximation and Chebyshev polynomials, least-squares approximation and orthogonal polynomials. Numerical differentiation and integration. Splines, B-splines and spline approximation. Numerical methods for solving initial and boundary value problems for ordinary differential equations.

**Requisites:** (MATH 320, 340, 341, or 375), (MATH 322, 376, 421, or 521), and (COMP SCI 200, 220, 300, 310, or 301 prior to Spring 2020, or placement into COMP SCI 300); grad/professional standing; member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recall and state the formal definitions of the mathematical objects and their properties used in numerical analysis (e.g., Lagrange polynomials, Gibbs phenomenon, Runge phenomenon, orthogonal polynomials, recurrence relation, Gaussian quadrature points, splines, etc.).

Audience: Both Grad & Undergrad

2. Use different techniques of numerical analysis in their appropriate settings (e.g., polynomial interpolation, least square approximation, discrete Fourier transform, the Golub-Welsch algorithm, fast Fourier transform, trapezoidal rule and Simpson's rule, numerical differentiation, forward and backward Euler's method, etc.).

Audience: Both Grad & Undergrad

3. State the main theoretical results related to the error analysis for different methods (e.g., least square error, numerical integration using a Riemann sum, the trapezoidal rule, Simpson's rule and Gaussian quadratures, (semi-)discrete Fourier transform, forward and backward Euler, etc.), and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Both Grad & Undergrad

4. Convey arguments in oral and written forms using English and appropriate mathematical terminology, notation and grammar.

Audience: Both Grad & Undergrad

5. Identify applications of course content in current areas of research.

Audience: Graduate

**COMP SCI/DS/ISY E 518 – WEARABLE TECHNOLOGY**

3 credits.

Gives students hands-on experience in building wearable computing platforms. Designed for students who have a background in textiles and apparel design, computer science, engineering or media arts. By the completion of the course students will have fundamental knowledge of electronic circuitry, programming, and "maker skills".

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**COMP SCI 520 – INTRODUCTION TO THEORY OF COMPUTING**

3 credits.

Basics about the notion, capabilities, and limitations of computation: elements of finite automata and regular languages, computability theory, and computational complexity theory. Additional topics include context-free grammars and languages, and complexity-theoretic cryptography.

**Requisites:** (MATH/COMP SCI 240 or STAT/COMP SCI/MATH 475) and (COMP SCI 367 or 400), or graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COMP SCI/ECE/ISYE 524 – INTRODUCTION TO OPTIMIZATION**

3 credits.

Introduction to mathematical optimization from a modeling and solution perspective. Formulation of applications as discrete and continuous optimization problems and equilibrium models. Survey and appropriate usage of basic algorithms, data and software tools, including modeling languages and subroutine libraries.

**Requisites:** (COMP SCI 200, 220, 300, 301, 302, 310, or placement into COMP SCI 300) and (MATH 320, 340, 341, or 375) or graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Engage in topics about "optimization in practice".

Audience: Undergraduate

2. Use and analyze the results of state of the art optimization software.

Audience: Undergraduate

3. Use the GAMS modeling system and Jupyter notebooks (in conjunction with elementary Python) or Julia and JUMP.

Audience: Undergraduate

4. Design good models for realistic applications in engineering and the sciences.

Audience: Undergraduate

5. Develop a "commercial strength" application of optimization technology.

Audience: Undergraduate

**COMP SCI/ISYE/MATH/STAT 525 – LINEAR OPTIMIZATION**

3 credits.

Introduces optimization problems whose constraints are expressed by linear inequalities. Develops geometric and algebraic insights into the structure of the problem, with an emphasis on formal proofs. Presents the theory behind the simplex method, the main algorithm used to solve linear optimization problems. Explores duality theory and theorems of the alternatives.

**Requisites:** MATH 320, 340, 341, 375, or 443 or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use linear programming to formulate real world decision problems.

Audience: Both Grad & Undergrad

2. Apply algorithms to solve linear programming problems and demonstrate their correctness.

Audience: Both Grad & Undergrad

3. Combine different proving techniques explored in class in an original way to show new results.

Audience: Graduate

**COMP SCI/I SY E 526 – ADVANCED LINEAR PROGRAMMING**

3 credits.

Review of linear programming. Polynomial time methods for linear programming. Quadratic programs and linear complementarity problems and related solution techniques. Solution sets and their continuity properties. Error bounds for linear inequalities and programs. Parallel algorithms for linear and quadratic programs.

**Requisites:** STAT/COMP SCI/I SY E/MATH 525 and (COMP SCI 200, 220, 300, 301, 302, 310, or placement into COMP SCI 300) or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Use the theory of linear programming to prove general duality results

Audience: Undergraduate

2. Apply the concept of complementarity

Audience: Undergraduate

3. Analyze and develop algorithms for solving optimization and equilibrium problems

Audience: Undergraduate

4. Apply decomposition methods and other advanced algorithms for the solution of optimization and equilibrium problems

Audience: Undergraduate

5. Understand economic concepts and how they relate to optimization and equilibria

Audience: Undergraduate

6. Extend theory of linear programming into the framework of conic programming

Audience: Undergraduate

**COMP SCI/E C E/M E 532 – MATRIX METHODS IN MACHINE LEARNING**

3 credits.

Linear algebraic foundations of machine learning featuring real-world applications of matrix methods from classification and clustering to denoising and data analysis. Mathematical topics include: linear equations, regression, regularization, the singular value decomposition, and iterative algorithms. Machine learning topics include: the lasso, support vector machines, kernel methods, clustering, dictionary learning, neural networks, and deep learning. Previous exposure to numerical computing (e.g. Matlab, Python, Julia, R) required.

**Requisites:** (MATH 234, 320, 340, 341, or 375) and (E C E 203, COMP SCI 200, 220, 300, 301, 302, 310, 320, or placement into COMP SCI 300), graduate/professional standing, or declared in Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use matrices and vectors to formulate classification, prediction and matrix completion problems using techniques such as least squares, regularized least squares, the singular value decomposition, subspace methods, support vector machines, neural networks and kernel methods.

Audience: Both Grad & Undergrad

2. Implement machine learning techniques for classification, prediction and matrix completion problems in software, and validate their performance on datasets using cross validation.

Audience: Both Grad & Undergrad

3. Apply advanced techniques to formulate and prove optimality of various matrix based techniques in machine learning.

Audience: Graduate

**COMP SCI/E C E 533 – IMAGE PROCESSING**

3 credits.

Mathematical representation of continuous and digital images; models of image degradation; picture enhancement, restoration, segmentation, and coding; pattern recognition, tomography.

**Requisites:** E C E 330 and (MATH 320 or 340), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Process digital images using available engineering software

Audience: Both Grad & Undergrad

2. Use time-domain and frequency-domain methods to analyze images and their properties

Audience: Both Grad & Undergrad

3. Apply nonlinear filters to images such as morphological operations, edge-preserving nonlinearities, and optimization-based filters

Audience: Both Grad & Undergrad

4. Segment images using both small-scale and large-scale techniques

Audience: Both Grad & Undergrad

5. Apply classification techniques to image recognition

Audience: Both Grad & Undergrad

6. Extract features from images and apply to tasks such as registration and super-resolution

Audience: Both Grad & Undergrad

7. Lead team in meeting objectives of image processing operations

Audience: Graduate

**COMP SCI 534 – COMPUTATIONAL PHOTOGRAPHY**

3 credits.

Study of sensing and computational techniques that enhance or extend the capabilities of digital photography by using methods from computer vision and computer graphics to create new visual representations. Algorithms for analyzing, improving, manipulating, combining, and synthesizing images.

**Requisites:** (COMP SCI 300 or 367) and (MATH 217 or 221) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth – Natural Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**COMP SCI 536 – INTRODUCTION TO PROGRAMMING LANGUAGES AND COMPILERS**

3 credits.

Introduction to the theory and practice of compiler design. Comparison of features of several programming languages and their implications for implementation techniques. Several programming projects required.

**Requisites:** E C E/COMP SCI 354 and (COMP SCI 367 or 400) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth – Natural Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COMP SCI 537 – INTRODUCTION TO OPERATING SYSTEMS**

4 credits.

Input-output hardware, interrupt handling, properties of magnetic tapes, discs and drums, associative memories and virtual address translation techniques. Batch processing, time sharing and real-time systems, scheduling resource allocation, modular software systems, performance measurement and system evaluation.

**Requisites:** E C E/COMP SCI 354 and (COMP SCI 367 or 400) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth – Natural Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COMP SCI 538 – INTRODUCTION TO THE THEORY AND DESIGN OF PROGRAMMING LANGUAGES**

3 credits.

Design and theory of programming languages: procedural, object-oriented, functional and logic paradigms. Serial and concurrent programming. Execution models and formal specification techniques.

**Requisites:** E C E/COMP SCI 354 and (COMP SCI 367 or 400) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COMP SCI/E C E/M E 539 – INTRODUCTION TO ARTIFICIAL NEURAL NETWORKS**

3 credits.

Theory and applications of artificial neural networks: multi-layer perceptron, self-organization map, deep neural network, convolutional neural network, recurrent network, support vector machines, genetic algorithm, and evolution computing. Applications to control, pattern recognition, prediction, and object detection and tracking.

**Requisites:** COMP SCI 200, 220, 300, 301, 302, 310, placement into COMP SCI 300, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify if a given data analysis task is a pattern classification problem or a model approximation problem.

Audience: Undergraduate

2. Apply multi-layer perceptron neural network training algorithm to develop artificial neural network (ANN) based pattern classifiers and data predictors.

Audience: Undergraduate

3. Apply deep learning network for pattern classification

Audience: Undergraduate

4. Apply support vector machine (SVM) to develop pattern classifiers.

Audience: Undergraduate

5. Apply self-organization map and k-means to perform clustering operations of a given data set.

Audience: Undergraduate

6. Apply stochastic optimization methods, including simulated annealing, genetic algorithm and random search to solve a discrete optimization problem.

Audience: Undergraduate

**COMP SCI 540 – INTRODUCTION TO ARTIFICIAL INTELLIGENCE**

3 credits.

Principles of knowledge-based search techniques, automatic deduction, knowledge representation using predicate logic, machine learning, probabilistic reasoning. Applications in tasks such as problem solving, data mining, game playing, natural language understanding, computer vision, speech recognition, and robotics.

**Requisites:** (COMP SCI 300, 320 or 367) and (MATH 211, 217, 221, or 275) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. (Uninformed Search Methods) Identify the formulation of search for problem solving tasks. Understand important concepts in uninformed search. Apply the search methods on the formulated search problem.

Audience: Undergraduate

2. (Informed Search Methods) Understand important concepts in informed search. Differentiate from uninformed search. Solve the formulated search problem with the informed search method A\*.

Audience: Undergraduate

3. (Local Search Methods) Identify the formulation of search for problem solving tasks. Apply the hill climbing method for local search problems. Identify and summarize the important features of the simulated annealing and genetic algorithms.

Audience: Undergraduate

4. (Game Playing) Recall the concept of games. Perform the minimax game playing method on formulated game tasks. Apply alpha-beta pruning to speed up the minimax method.

Audience: Undergraduate

5. (Unsupervised and Supervised Learning) Identify and summarize important features about supervised learning and unsupervised learning. Differentiate between the two types of tasks.

Audience: Undergraduate

6. (Classic Learning Methods) Apply linear regression, hierarchical agglomerative clustering algorithm, k-means clustering, or K nearest neighbor algorithm on given problem instances. Judge if the method is appropriate for a given task.

Audience: Undergraduate

7. (Neural Networks and Deep Learning) Apply Perceptron learning rule on given problem instances. Implement neural networks using given software packages.

Audience: Undergraduate

8. (Reinforcement Learning) Understand the concepts of reinforcement learning. Identify and summarize its important features. Compute value function and Q function. Apply value iteration and Q learning on given problems.

Audience: Undergraduate

**COMP SCI 541 – THEORY & ALGORITHMS FOR DATA SCIENCE**

3 credits.

Theoretical methods for data science. Topics include: review of probability background, concentration inequalities, geometry of high dimensional random variables, parametric and non-parametric estimation, selected topics from optimization (optimality conditions; deterministic and stochastic gradient descent), PAC learning, sample complexity and algorithms for linear classification and regression, and property/distribution testing. Uses Python programming language.

**Requisites:** (COMP SCI 200, 220, placement into COMP SCI 300, or STAT 340), (MATH 320, 340, 341, 345, or 375), and (STAT 311, 333, 340, MATH/STAT 309, 431, MATH 331, 531, or I SY E 210), or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use and explain theoretical concepts in data science, such as concentration inequalities, learning, nonparametric distribution testing, optimization.

Audience: Undergraduate

2. Use properties of high-dimensional random variables to perform tasks such as dimension reduction and separating mixtures of Gaussians

Audience: Undergraduate

3. Use optimization algorithms such as gradient descent and stochastic gradient descent and analyze their computational complexity

Audience: Undergraduate

4. Analyze sample complexity for basic learning tasks such binary linear classification, as well as computational complexity of algorithms for solving them

Audience: Undergraduate

5. Analyze sample complexity of distribution testing tasks, such as testing uniformity and testing equivalence of discrete distributions

Audience: Undergraduate

**COMP SCI 542 – INTRODUCTION TO SOFTWARE SECURITY**

3 credits.

Teaches the security considerations that occur during all steps of the software development life cycle: methodologies for designing secure software, programming using secure programming techniques, in-depth vulnerability assessment methodologies, static and dynamic analysis tools for evaluating software security, and system defenses reducing security threats.

**Requisites:** COMP SCI 400 or 320, graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Think like an attacker, that is to think about software the way that an adversary would.

Audience: Undergraduate

2. Design secure programs based on a structured methodology such as Threat Modeling. Have security in mind before writing the first line of code.

Audience: Undergraduate

3. Program in a secure way by mastering a comprehensive set of techniques for producing code that is more resilient to attack.

Audience: Undergraduate

4. Think like a security analyst, that is how to perform an in-depth software vulnerability assessments using a structured methodology such as First Principles Vulnerability Assessment (FPVA). Acquire the skills of a security analyst.

Audience: Undergraduate

5. Use a variety of automated tools that help statically and dynamically analyze code for security flaws.

Audience: Undergraduate

**COMP SCI 544 – INTRODUCTION TO BIG DATA SYSTEMS**

3 credits.

Deploy and use distributed systems to store and analyze large datasets. Unstructured and structured approaches to storage will be covered. Analysis will involve learning new query languages, processing streaming data, and training machine learning models. Most programming will be done in Python.

**Requisites:** COMP SCI 320, 400, or Graduate/Professional Standing

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Deploy distributed systems for data storage and analytics

Audience: Undergraduate

2. Demonstrate competencies with tools and processes necessary for loading data into distributed storage systems

Audience: Undergraduate

3. Write programs that use distributed platforms to efficiently analyze large datasets

Audience: Undergraduate

4. Produce meaning from large datasets by training machine learning models in parallel or on distributed systems

Audience: Undergraduate

5. Measure resource usage and overall cost of running distributed programs

Audience: Undergraduate

6. Optimize distributed analytics programs to reduce resource consumption and program runtime

Audience: Undergraduate

7. Demonstrate competencies with cloud services designed to store or analyze large datasets

Audience: Undergraduate

**COMP SCI/E C E 552 – INTRODUCTION TO COMPUTER ARCHITECTURE**

3 credits.

The design of computer systems and components. Processor design, instruction set design, and addressing; control structures and microprogramming; memory management, caches, and memory hierarchies; and interrupts and I/O structures. E C E 551 or knowledge of Verilog is recommended.

**Requisites:** (E C E/COMP SCI 352 and E C E/COMP SCI 354) or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use standard performance metrics to compare performance of different digital systems

Audience: Undergraduate

2. Design a pipelined data path for a RISC (reduced instruction set computer) instruction set and identify concepts of data dependence, pipelined hazards and out of order execution

Audience: Undergraduate

3. Design basic data and control cache subsystems and be able to operate basic memory systems

Audience: Undergraduate

4. Design a pipelined RISC micro-processor system with data cache using computer aided design tool and validate the correctness of the design using logic simulation

Audience: Undergraduate

**COMP SCI 557 – PARALLEL & THROUGHPUT- OPTIMIZED PROGRAMMING**

3 credits.

A comprehensive yet accessible introduction to high-performance computing practices, emphasizing shared-memory systems and using numerical algorithms as case studies. A focus on shared-memory, single-node multiprocessor systems, with some attention to GPUs. Emphasis is given on multithreaded programming, vectorization, memory hierarchy and its implications, and analysis of performance-limiting factors.

**Requisites:** E C E/COMP SCI 354 and (MATH 320, 340, 341, or 375), or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate the efficiency and parallelism potential of algorithms, relative to bounds imposed by architectural limitations such as compute and memory bandwidth.

Audience: Undergraduate

2. Understand the implications of the memory system on parallel scaling, including considerations of memory throughput, latency and prefetching efficiency.

Audience: Undergraduate

3. Recognize instruction-level parallelism and evaluate how amenable different codes are to compiler-automated (or user-guided, via intrinsics) vectorization.

Audience: Undergraduate

4. Compare data layouts (dense vs. sparse data, structures-of-arrays vs. arrays-of-structures) to throughput-sensitive codes.

Audience: Undergraduate

5. Explore computational and memory-related performance implications of fundamental numerical codes such as convolutions, streaming vector operations, and matrix manipulations

Audience: Undergraduate

**COMP SCI 559 – COMPUTER GRAPHICS**

3 credits.

Survey of computer graphics. Image representation, formation, presentation, composition and manipulation. Modeling, transformation, and display of geometric objects in two and three dimensions. Representation of curves and surfaces. Rendering, animation, multi-media and visualization. Fluency with vector mathematics (e.g., from MATH 234 or a linear algebra class) is recommended.

**Requisites:** MATH 222 and (COMP SCI 367 or 400) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COMP SCI/E C E 561 – PROBABILITY AND INFORMATION THEORY IN MACHINE LEARNING**

3 credits.

Probabilistic tools for machine learning and analysis of real-world datasets. Introductory topics include classification, regression, probability theory, decision theory and quantifying information with entropy, relative entropy and mutual information. Additional topics include naive Bayes, probabilistic graphical models, discriminant analysis, logistic regression, expectation maximization, source coding and variational inference.

**Requisites:** (MATH 320, 340, 341, 375, or M E/COMP SCI/E C E 532 or concurrent enrollment) and (E C E 331, STAT/MATH 309, 431, STAT 311, 324, M E/STAT 424 or MATH 531) or grad/profsnl standing or declared in Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify how ambiguity and noise leads to the need for probabilistic methods in machine learning

Audience: Both Grad & Undergrad

2. Implement classification, prediction and generative algorithms using a variety of techniques based in probability, information theory and machine learning

Audience: Both Grad & Undergrad

3. Prove optimality of a variety of algorithms and demonstrate understanding of sample complexity bounds

Audience: Graduate

**COMP SCI 564 – DATABASE MANAGEMENT SYSTEMS: DESIGN AND IMPLEMENTATION**

4 credits.

What a database management system is; different data models currently used to structure the logical view of the database: relational, hierarchical, and network. Hands-on experience with relational and network-based database systems. Implementation techniques for database systems. File organization, query processing, concurrency control, rollback and recovery, integrity and consistency, and view implementation.

**Requisites:** E C E/COMP SCI 354 and (COMP SCI 367 or 400) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**COMP SCI 565 – INTRODUCTION TO DATA VISUALIZATION**

3 credits.

Introduction to topics such as perception, cognition, communication, design, implementation, applications, tools, and evaluation. Provides a broad survey of the field and covers fundamental concepts, theory, and tools in data visualization with opportunities for hands-on activities. Gain real-world experience in designing and evaluating visualizations.

**Requisites:** COMP SCI 320, 400, or Graduate/Professional Standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Differentiate between visualizations to communicate within situational context.

Audience: Undergraduate

2. Illustrate the types of properties that make visualizations more effective.

Audience: Undergraduate

3. Apply techniques and algorithms for creating effective visualizations based on principles and techniques from graphic design, visual art, perceptual psychology, and cognitive science.

Audience: Undergraduate

4. Utilize visualization creation tools in individual and group assignment

Audience: Undergraduate

**COMP SCI 566 – INTRODUCTION TO COMPUTER VISION**

3 credits.

Topics include image formation, feature detection, motion estimation, image mosaics, 3D shape reconstruction, and object recognition. Applications of these techniques include building 3D maps, creating virtual characters, organizing photo and video databases, human computer interaction, video surveillance, and automatic vehicle navigation. Broad overview of various computer vision and machine learning techniques and sensing and imaging technologies used in computer vision applications. Project-based.

**Requisites:** COMP SCI 400 and (MATH 320, 340, 341, 345 or 375) and (STAT 311, 324, 333, 340, 371, STAT/MATH 309, 431, MATH 331 or 531) or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe a broad range of fundamental concepts in 2D and 3D computer vision, including basic image processing, 2D image recognition, 3D sensing and motion recovery

Audience: Undergraduate

2. Explain basic theories, current approaches, key concepts, and common practices in computer vision.

Audience: Undergraduate

3. Design basic statistics and machine learning algorithms for computer vision problems, conduct experiments to evaluate the proposed approaches, and analyze and interpret the results.

Audience: Undergraduate

4. Develop basic computer vision applications and projects in MATLAB.

Audience: Undergraduate

5. Prepare and deliver clear and concise oral presentations.

Audience: Undergraduate

**COMP SCI/B M I 567 – BIOMEDICAL IMAGE ANALYSIS**

3 credits.

Hands-on introduction to biological and medical image analysis techniques. Topics include medical imaging formats, segmentation, registration, image quantification, and classification.

**Requisites:** (MATH 320, 340, 341, 345, or 375) and (STAT 511, 541, POP HLTH/B M I 551, MATH 331, MATH/STAT 431, 309, STAT 240, 301, 311, 324, 371, or STAT/F&W ECOL 571) or graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement the key principles of ideas from probability, statistics and computer vision algorithms used in medical image analysis

Audience: Undergraduate

2. Recognize which image analysis problems will benefit from which modeling approach

Audience: Undergraduate

3. Apply algorithms about image analysis tasks and implement algorithms and pipelines using a programming language

Audience: Undergraduate

4. Implement the building blocks taught in this course to independently learn and apply new, but related imaging analysis algorithms

Audience: Undergraduate

**COMP SCI 570 – INTRODUCTION TO HUMAN-COMPUTER INTERACTION**

3 credits.

User-centered software design: (1) principles of and methods for understanding user needs; designing and prototyping interface solutions; and evaluating their usability, (2) their applications in designing multiple types of interfaces through group projects.

**Requisites:** Junior standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand fundamental concepts and principles of Human-Computer Interaction (HCI).

Audience: Undergraduate

2. Apply user-centered design principles and methods to create effective and usable interfaces.

Audience: Undergraduate

3. Analyze and evaluate user interfaces using appropriate usability evaluation techniques.

Audience: Undergraduate

4. Develop a toolbox of user-centered design techniques that can be applied to new design problems.

Audience: Undergraduate

5. Understand user needs and expectations with the aid of user research methods.

Audience: Undergraduate

**COMP SCI 571 – BUILDING USER INTERFACES**

3 credits.

Introduces software development of user interfaces (UIs). Build competence in implementing UIs using state-of-the-art (1) UI paradigms, such as event-driven interfaces, direct-manipulation interfaces, and dialogue-based interaction; (2) methods for capturing, interpreting, and responding to different forms of user input and states, including pointing, text entry, speech, touch, gestures, user activity, context, and physiological states; and (3) platform-specific UI development APIs, frameworks, and toolkits for multiple platforms including web/mobile/desktop interfaces, natural user interfaces, and voice user interfaces. Learn about the fundamental concepts, technologies, algorithms, and methods in building user interfaces, implement UIs using of state-of-the-art UI development tools, and build a UI development portfolio.

**Requisites:** COMP SCI 400**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Engage in design thinking around user interface needs and problems, ideate and communicate conceptual design solutions

Audience: Undergraduate

2. Create visual designs, layouts, and navigation structures, and effectively use design languages, color palettes, and platform-specific design elements

Audience: Undergraduate

3. Prototype and develop user interfaces for the Web, mobile, and voice user interfaces (VUIs)

Audience: Undergraduate

4. Program front-end, user-facing software elements using the state-of-the-art programming languages, frameworks, and libraries

Audience: Undergraduate

5. Follow user-centered design principles, heuristics, and methods to iteratively build, assess, and refine design solutions

Audience: Undergraduate

**COMP SCI/B M I 576 – INTRODUCTION TO BIOINFORMATICS**

3 credits.

Algorithms for computational problems in molecular biology. Studies algorithms for problems such as: genome sequencing and mapping, pairwise and multiple sequence alignment, modeling sequence classes and features, phylogenetic tree construction, and gene-expression data analysis.

**Requisites:** (COMP SCI 320 or 400) and MATH 222, graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Explain the biology and significance of the most commonly measured molecules in molecular biology.

Audience: Undergraduate

2. Identify the primary computational problems associated with each type of biological data.

Audience: Undergraduate

3. Explain the major algorithms and approaches used to address the computational problems.

Audience: Undergraduate

4. Implement efficient algorithms for bioinformatic tasks through the use of the discussed approaches.

Audience: Undergraduate

5. Apply the discussed algorithms to novel but closely-related tasks.

Audience: Undergraduate

6. Understand the methods covered such that parts of the methods sections of published biological papers are interpretable.

Audience: Undergraduate

7. Begin to gain the qualifications of a bioinformatician.

Audience: Undergraduate

**COMP SCI 577 – INTRODUCTION TO ALGORITHMS**

4 credits.

Basic paradigms for the design and analysis of efficient algorithms: greed, divide-and-conquer, dynamic programming, reductions, and the use of randomness. Computational intractability including typical NP-complete problems and ways to deal with them.

**Requisites:** (MATH/COMP SCI 240 or STAT/COMP SCI/MATH 475) and (COMP SCI 367 or 400), or graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals**Course Designation:** Breadth - Natural Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**COMP SCI 578 – CONTEST-LEVEL PROGRAMMING**

1 credit.

Training in computer programming for competitions: assessing the coding difficulty and complexity of computational problems, recognizing the applicability of known algorithms, fast coding and testing, team work. COMP SCI 577 is suggested but not required.

**Requisites:** (COMP SCI 300 or 367), graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**COMP SCI/DS 579 – VIRTUAL REALITY**

3 credits.

Introduces students to the field of virtual reality and focuses on creating immersive, interactive virtual experiences. Survey topics include historical perspectives on virtual reality technology, computer graphics and 3D modeling, human perception and psychology, human computer interaction and user interface design. This course is designed for students with backgrounds in Computer Science, Engineering, Art, Architecture and Design. Students will work in interdisciplinary teams on projects, culminating in a final event that will be showcased to the public. While not an official uisite, the class will be technologically motivated; therefore students should be comfortable learning new software. The class will utilize publicly available game design software which provides tools and services for the creation of interactive content. While not necessary, students may find it helpful to have taken classes in programming and computer graphics (such as COMP SCI 559: Computer Graphics) or in 3D modeling (such as ART 429: 3D Digital Studio I or DS 242: Visual Communication II).

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**COMP SCI/L I S 611 – USER EXPERIENCE DESIGN I**

3 credits.

Introduction to the user experience design including key stages of the design process, design ethics, and the methods and tools involved at each stage of design. Conduct formative research on clients, users, use contexts and tasks. Gain experience with user research methodologies and learn to create intermediate design tools such as personas. Develop and present a design proposal for a chosen project.

**Requisites:** Declared in Information MS, Design + Innovation MS , or Capstone Certificate in User Experience Design

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply fundamental concepts and practices of user experience design

Audience: Graduate

2. Understand the ethics of design including practices of inclusive design and accessibility

Audience: Graduate

3. Conduct formative research to inform design

Audience: Graduate

4. Apply common user data collection methods

Audience: Graduate

5. Analyze and visualize processes across time and interfaces

Audience: Graduate

6. Create and apply common UX design tools such as personas, scenarios and user journey maps

Audience: Graduate

7. Effectively convey the output of user research and initial design through oral and written communication.

Audience: Graduate

**COMP SCI/L I S 612 – USER EXPERIENCE DESIGN 2**

3 credits.

Advanced study of UX design. Introduces processes of ideation, key concepts of visual design, conceptual and interaction design, low and high-resolution prototyping of design techniques. Applications include drafting designs based on user models and initial testing of prototypes.

**Requisites:** COMP SCI/L I S 611 and Declared in Information MS, Design + Innovation MS, or Capstone Certificate in User Experience Design

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop design ideas and communicate them through brainstorming, sketching, and modeling;

Audience: Graduate

2. Create designs that follow principles of and best practices in visual and interaction design;

Audience: Graduate

3. Prototype designs using rapid prototyping methods for communication and testing;

Audience: Graduate

4. Understand human perceptual, cognitive, and motor processes involved in interaction;

Audience: Graduate

5. Evaluate designs using expert- and empirical-evaluation methods;

Audience: Graduate

6. Integrate design, prototyping, and evaluation methods and principles into a process toward addressing a design problem

Audience: Graduate

7. Communicate their ideas to others, integrate feedback into their design work, and critique the work of others constructively.

Audience: Graduate

**COMP SCI/L I S 613 – USER EXPERIENCE DESIGN 3**

3 credits.

Conduct formal evaluations of the user experience (UX) or usability of a digital system. Gain familiarity with the evaluation and research process including key stages, tasks for each stage, common data collection and analysis methods, and common tools employed in the field. Gain experience with a variety of UX evaluation approaches. Collect pilot data and develop a proposal for further UX testing.

**Requisites:** COMP SCI/L I S 612 and Declared in Information MS, Design + Innovation MS, or Capstone Certificate in User Experience Design

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate understanding of a variety of UX testing approaches

Audience: Graduate

2. Plan and implement all phases of testing for a digital system including planning, data collection, analysis and reporting

Audience: Graduate

3. Demonstrate understanding of the relationship among research design, instruments, metrics, and data analysis

Audience: Graduate

4. Implement major testing approaches such as task-based, information architecture and accessibility

Audience: Graduate

5. Have knowledge of contemporary tools used for UX testing

Audience: Graduate

6. Communicate evaluation findings effectively and use data to improve systems design

Audience: Graduate

**COMP SCI/L I S 614 – USER EXPERIENCE DESIGN CAPSTONE**

1 credit.

Applies a design studio critique approach to produce a learning environment of collaborative and interdisciplinary peer critique and learning, in addition to provide expert feedback and suggestions. Present and defend the latest iteration of the user experience design project developed in earlier courses while learning about the professions associated with digital user experience design.

**Requisites:** COMP SCI/L I S 613 and declared in Design + Innovation MS, or the Capstone Certificate in User Experience Design

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Knowledge of, and ability to apply, data collection and analysis methodologies for user experience research.

Audience: Graduate

2. Knowledge of, and ability to apply, design principles and user behavior theories to digital environments.

Audience: Graduate

3. Create, critique and revise design prototypes based on testing data and feedback

Audience: Graduate

4. Effectively plan, manage and communicate a user experience design project.

Audience: Graduate

**COMP SCI 620 – COMPUTER SCIENCES CAPSTONE**

3 credits.

Build a meaningful product from start to finish with a local, regional, national and international corporate client that solves a real-world problem. In a collaborative space design, develop, test, debug, document, and deliver a software project for a corporate client, learning and using new technologies and agile software development techniques.

**Requisites:** COMP SCI 400, senior standing, and declared in an undergraduate Computer Sciences major

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate and utilize agile techniques such as Design Thinking and Scrum.

Audience: Undergraduate

2. Demonstrate effective teamwork skills.

Audience: Undergraduate

3. Develop a software product for a corporate client from start to finish including phases for discovery, design, coding, testing, and documentation.

Audience: Undergraduate

4. Execute presentation skills by holding weekly demos with corporate client.

Audience: Undergraduate

5. Examine the types of roles typically present in an agile software development organization such as Product Manager, UX, Scrum Master, engineers, testers, DevOps, etc

Audience: Undergraduate

**COMP SCI 638 – UNDERGRADUATE TOPICS IN COMPUTING**

1-4 credits.

Selected topics in computing. Each offering of the course will cover a topic selected by the instructor and may cover one or more topics from all of computer science.

**Requisites:** COMP SCI 200, 300, 301, 302, 310, 367, placement into COMP SCI 300, or L I S/COMP SCI 102 (COMP SCI 202 prior to Fall 2023), graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COMP SCI 639 – UNDERGRADUATE ELECTIVE TOPICS IN COMPUTING**

3-4 credits.

Selected topics in computing. Each offering of the course will cover a topic selected by the instructor. Offerings of this course will provide sufficient depth into their subject to count as electives to meet CS Major requirements.

**Requisites:** None**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**COMP SCI 640 – INTRODUCTION TO COMPUTER NETWORKS**

3 credits.

Architecture of computer networks and network protocols, protocol layering, reliable transmission, congestion control, flow control, naming and addressing, unicast and multicast routing, network security, network performance widely used protocols such as Ethernet, wireless LANs, IP, TCP, and HTTP.

**Requisites:** (COMP SCI/E C E 354 and COMP SCI 400) or graduate/professional standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand what a computer network is and its key components, such as switches, routers, firewalls, and access points.

Audience: Undergraduate

2. Explain the concept of network protocols and their role in communications, how the Internet works, and especially the OSI model and the TCP/IP protocol suite.

Audience: Undergraduate

3. Analyze network protocols at different layers, including TCP, UDP, IP, ARP, the IEEE 802 suite, DNS, BGP, and more, and including how they interact with each other.

Audience: Undergraduate

4. Evaluate network performance metrics, strategies that allow for effective navigation and troubleshooting of network issues, and approaches to design network architectures.

Audience: Undergraduate

5. Design and implement network services and applications.

Audience: Undergraduate

**COMP SCI 642 – INTRODUCTION TO INFORMATION SECURITY**

3 credits.

Senior level undergraduate course covering various topics on information security. Covers a wide range of topics, such as cryptographic primitives, security protocols, system security, and emerging topics. Elementary knowledge of mathematical logic and discrete probability theory needed, such as MATH/COMP SCI 240.

**Requisites:** COMP SCI 537 or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**COMP SCI 681 – SENIOR HONORS THESIS**

3 credits.

Individual study for seniors completing theses for honors in the Computer Sciences major as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**COMP SCI 682 – SENIOR HONORS THESIS**

3 credits.

Individual study for seniors completing theses for honors in the Computer Sciences major as arranged with a faculty member. Continuation of COMP SCI 681

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**COMP SCI 691 – SENIOR THESIS**

2-3 credits.

Individual study for seniors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**COMP SCI 692 – SENIOR THESIS**

2-3 credits.

Individual study for seniors completing theses as arranged with a faculty member, continuation of COMP SCI 691

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**COMP SCI 698 – DIRECTED STUDY**

1-6 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COMP SCI 699 – DIRECTED STUDY**

1-6 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**COMP SCI 701 – CONSTRUCTION OF COMPILERS**

3 credits.

Principles of the design and implementation of programming languages. Topics include: Principles of compilation, static program analysis, compilation methods to support profiling, and code-generation methods. Knowledge of programming languages and compiler design strongly encouraged, such as COMP SCI 536.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**COMP SCI 702 – GRADUATE COOPERATIVE EDUCATION**

1-2 credits.

Apply computer sciences principles in a hands-on, professional setting.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the nature and demands of a professional career in computer science.

Audience: Graduate

2. Apply knowledge gained in computer science coursework in a professional setting.

Audience: Graduate

**COMP SCI 703 – PROGRAM VERIFICATION AND SYNTHESIS**

3 credits.

Formal methods for program verification. Model-checking techniques; linear temporal logic; computational tree logic; logic/automata connection; bisimulations; probabilistic model-checking. Special topics include: program synthesis, verification and synthesis of privacy properties. Knowledge of programming languages and compiler design strongly encouraged, such as COMP SCI 536.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Logic: Syntax and formal semantics of temporal logics such as LTL and MSO and formalizing software safety properties. Translations from temporal logics to automata.

Audience: Graduate

2. Model Checking: Understand algorithms for checking whether a program satisfies a temporal property in temporal logic and apply such algorithms to verification problems.

Audience: Graduate

3. Synthesis: Understand and apply state-of-the-art program synthesis algorithms such as counterexample-guided inductive synthesis, syntax-guided synthesis, sketching, and MCMC sampling.

Audience: Graduate

**COMP SCI 704 – PRINCIPLES OF PROGRAMMING LANGUAGES**

3 credits.

Introduction to principles of advanced programming languages and programming-language theory. Topics include: lambda-calculus, functional languages, polymorphic functions, type inference, structural induction, lazy evaluation, operational semantics, denotational semantics, and axiomatic semantics. Students are strongly encouraged to have knowledge of programming languages, such as from COMP SCI 536.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**COMP SCI/E C E 707 – MOBILE AND WIRELESS NETWORKING**

3 credits.

Design and implementation of protocols, systems, and applications for mobile and wireless networking, particularly at the media access control, network, transport, and application layers. Focus is on the unique problems and challenges presented by the properties of wireless transmission, various device constraints such as limited battery power, and node mobility. Kowner of computer networking is strongly encouraged, such as from COMP SCI 640 or E C E 537.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**COMP SCI 710 – COMPUTATIONAL COMPLEXITY**

3 credits.

Study of the capabilities and limitations of efficient computation. Relationships between models representing capabilities such as parallelism, randomness, quantum effects, and non-uniformity; and models based on the notions of nondeterminism, alternation, and counting, which capture the complexity of important problems. Knowledge of the theory of computation is strongly encouraged, such as COMP SCI 520.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**COMP SCI/MATH 714 – METHODS OF COMPUTATIONAL MATHEMATICS I**

3 credits.

Development of finite difference methods for hyperbolic, parabolic and elliptic partial differential equations. Analysis of accuracy and stability of difference schemes. Direct and iterative methods for solving linear systems. Introduction to finite volume methods. Applications from science and engineering. Students are strongly encouraged to have programming skills (e.g. COMP SCI 200) and some undergraduate numerical analysis (e.g. MATH/COMP SCI 514 or COMP SCI 412), analysis and differential equations (e.g. MATH 322 and MATH 521) and linear algebra (e.g. MATH 341).

**Requisites:** Graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**COMP SCI/MATH 715 – METHODS OF COMPUTATIONAL MATHEMATICS II**

3 credits.

Introduction to spectral methods (Fourier, Chebyshev, Fast Fourier Transform), finite element methods (Galerkin methods, energy estimates and error analysis), and mesh-free methods (Monte-Carlo, smoothed-particle hydrodynamics) for solving partial differential equations. Applications from science and engineering. Applications from science and engineering. Students are strongly encouraged to have programming skills (e.g. COMP SCI 200), undergraduate numerical analysis (e.g. MATH/COMP SCI 514 or COMP SCI 412), analysis (MATH 322 and 521) and linear algebra (e.g. MATH 341 or equiv.)

**Requisites:** Graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**COMP SCI/I SY E 719 – STOCHASTIC PROGRAMMING**

3 credits.

Stochastic programming is concerned with decision making in the presence of uncertainty, where the eventual outcome depends on a future random event. Topics include modeling uncertainty in optimization problems, risk measures, stochastic programming algorithms, approximation and sampling methods, and applications. Students are strongly encouraged to have knowledge of linear programming (e.g., MATH/COMP SCI/I SY E/STAT 525) and probability and statistics (e.g., MATH/STAT 431). Knowledge of integer optimization (MATH/COMP SCI/I SY E 728) is helpful, but not required.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Learn the terms, basic capabilities, and limitations of stochastic programming models

Audience: Graduate

2. Formulate stochastic programming models

Audience: Graduate

3. Implement the algorithms used to solve stochastic programming problems

Audience: Graduate

4. Learn principles of decomposition algorithms for solving large-scale optimization problems

Audience: Graduate

**COMP SCI/B M I/E C E/MED PHYS 722 – COMPUTATIONAL OPTICS AND IMAGING**

3 credits.

Computational imaging includes all imaging methods that produce images as a result of computation on collected signals. Learn the tools to design new computational imaging methods to solve specific imaging problems. Provides an understanding of the physics of light propagation and measurement, and the computational tools to model it, including wave propagation, ray tracing, the radon transform, and linear algebra using matrix and integral operators and the computational tools to reconstruct an image, including linear inverse problems, neural networks, convex optimization, and filtered back-projection. Covers a variety of example computational imaging techniques and their applications including coded apertures, structured illumination, digital holography, computed tomography, imaging through scattering media, compressed sensing, and non-line-of-sight imaging.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Apply ray and wave based light propagation models

Audience: Graduate

2. Explain the process of image formation in conventional imaging systems using theory and computational models

Audience: Graduate

3. Select and combine the different components required in an imaging system to perform light manipulation, collection, and image reconstruction

Audience: Graduate

4. Apply the linear matrix and integral operators that model light propagation

Audience: Graduate

5. Apply the linear inverse algorithms that allow an imaging system to reconstruct properties of the scene from collected data

Audience: Graduate

6. Simulate different computational imaging systems and perform computation on simulated datasets

Audience: Graduate

7. Understand the most common computational imaging techniques and be able to use and adapt them for their own applications

Audience: Graduate

**COMP SCI/I SY E 723 – DYNAMIC PROGRAMMING AND ASSOCIATED TOPICS**

3 credits.

General and special techniques of dynamic programming developed by means of examples. Shortest-path algorithms. Deterministic equipment replacement models. Resource allocation problem. Traveling-salesman problem. Knapsack problem. Analysis of inventory systems. General stochastic formulations. Markovian decision processes. Students are strongly encouraged to have knowledge of mathematical optimization (e.g., COMP SCI/I SY E/MATH/STAT 525, I SY E 623, COMP SCI/I SY E/MATH/STAT 726), knowledge of analysis (e.g., MATH/STAT 431 or 521) and programming ability (e.g., COMP SCI 200 or 301)

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify basic components, such as the state space, of a dynamic program

Audience: Graduate

2. Formulate and solve dynamic programs under different performance criteria such as finite horizon discounted reward/cost criteria

Audience: Graduate

3. Apply dynamic programming tools and concepts in `traditional' industrial engineering applications such as supply chain, manufacturing, and healthcare

Audience: Graduate

**COMP SCI/I SY E/MATH/STAT 726 – NONLINEAR OPTIMIZATION I**  
3 credits.

Theory and algorithms for nonlinear optimization, focusing on unconstrained optimization. Line-search and trust-region methods; quasi-Newton methods; conjugate-gradient and limited-memory methods for large-scale problems; derivative-free optimization; algorithms for least-squares problems and nonlinear equations; gradient projection algorithms for bound-constrained problems; and simple penalty methods for nonlinearly constrained optimization. Students are strongly encouraged to have knowledge of linear algebra and familiarity with basic mathematical analysis.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**COMP SCI/ISY E 727 – CONVEX ANALYSIS**

3 credits.

Convex sets in finite-dimensional spaces: relative interiors, separation, set operations. Convex functions: conjugacy, subdifferentials and directional derivations, functional operations, Fenchel-Rockafellar duality. Applications to operations research and related areas. Students taking this course are strongly encouraged to have had a course in basic analysis (e.g. MATH 521) and a course in linear algebra (e.g., MATH 340).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**COMP SCI/ISY E/MATH 728 – INTEGER OPTIMIZATION**

3 credits.

Introduces optimization problems over integers, and surveys the theory behind the algorithms used in state-of-the-art methods for solving such problems. Special attention is given to the polyhedral formulations of these problems, and to their algebraic and geometric properties. Applicability of Integer Optimization is highlighted with applications in combinatorial optimization. Key topics include: formulations, relaxations, polyhedral theory, cutting planes, decomposition, enumeration. Students are strongly encouraged to have knowledge of Linear Programming (e.g., MATH/COMP SCI/ISY E/STAT 525), including algorithms, duality and polyhedral theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe and explain the basics of polyhedral theory, which consists in the study of systems of linear inequalities both from an algebraic and a geometric point of view

Audience: Graduate

2. Define perfect formulations and identify what properties are desirable in an integer programming formulation of a problem

Audience: Graduate

3. Explain how valid inequalities can be used as cutting planes to strengthen integer programming formulations

Audience: Graduate

**COMP SCI/ISY E/MATH 730 – NONLINEAR OPTIMIZATION II**

3 credits.

Theory and algorithms for nonlinearly constrained optimization. Relevant geometric concepts, including tangent and normal cones, theorems of the alternative, and separation results. Constraint qualifications. Geometric and algebraic expression of first-order optimality conditions. Second-order optimality conditions. Duality. Nonlinear programming algorithms: merit functions and filters; interior-point, augmented Lagrangian, and sequential quadratic programming algorithms.

**Requisites:** STAT/COMP SCI/ISY E/MATH 726**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**COMP SCI 736 – ADVANCED OPERATING SYSTEMS**

3 credits.

Advanced topics in operating systems, including process communication, resource allocation, multiprocess and network operating systems, kernel philosophies, fault-tolerant systems, virtual machines, high-level language systems, verifiability and proof techniques. Comp Sci 537 or cons inst

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**COMP SCI 739 – DISTRIBUTED SYSTEMS**

3 credits.

Large-scale distributed systems have become pervasive, underlying virtually all widely used computing services. Explore prevalent issues in designing and implementing distributed systems. Topics include fault tolerance, scalability, replication, distributed storage, consensus, reliability, performance, and correctness.

**Requisites:** COMP SCI 736, 744, 764, or 774**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe core concepts in distributed computing, such as logical clocks, consensus, partitioning, replication and fault tolerance, etc.

Audience: Graduate

2. Explain how real-world distributed systems are realized by relying on core distributed computing concepts.

Audience: Graduate

3. Analyze how emerging technology trends concerning new hardware and applications, influence the designs and implementations of distributed systems.

Audience: Graduate

4. Solve and develop distributed computing problems, services and applications.

Audience: Graduate

**COMP SCI 740 – ADVANCED COMPUTER NETWORKS**

3 credits.

Advanced topics in computer communications networks: congestion and flow control; routing; rate-based protocols; high speed interfaces and technologies: metropolitan area networks; fast packet switching technologies; advanced applications; network services: name service, authentication, resource location. Students are strongly encouraged to have knowledge of computer network design and protocols (e.g., COMP SCI 640)

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**COMP SCI 744 – BIG DATA SYSTEMS**

3 credits.

Issues in the design and implementation of big data processing systems, including: an overview of cluster architecture, key design goals (flexibility, performance and fault tolerance), popular execution frameworks, basic abstractions, and applications (e.g., batch analytics, stream processing, graph processing, and machine learning).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**COMP SCI/E C E 750 – REAL-TIME COMPUTING SYSTEMS**

3 credits.

Introduction to the unique issues in the design and analysis of computer systems for real-time applications. Hardware and software support for guaranteeing timeliness with and without failures. Resource management, time-constrained communication, scheduling and imprecise computations, real-time kernels and case studies. Students are strongly encouraged to have knowledge of computer architecture (e.g., E C E/COMP SCI 552) and operating system functions (e.g., COMP SCI 537)

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**COMP SCI/E C E 752 – ADVANCED COMPUTER ARCHITECTURE I**

3 credits.

Processor design, computer arithmetic, pipelining, multi-operation processors, vector processors, control units, precise interrupts, main memory, cache memories, instruction set design, stack machines, busses and I/O, protection and security. Students are strongly encouraged to have knowledge of computer architecture (e.g., E C E/COMP SCI 552).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**COMP SCI/E C E 755 – VLSI SYSTEMS DESIGN**

3 credits.

Overview of MOS devices and circuits; introduction to integrated circuit fabrication; topological design of data flow and control; interactive graphics layout; circuit simulation; system timing; organizational and architectural considerations; alternative implementation approaches; design project. E C E 555 or equivalent experience is strongly recommended.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**COMP SCI/E C E 756 – COMPUTER-AIDED DESIGN FOR VLSI**

3 credits.

Broad introduction to computer-aided design tools for VLSI, emphasizing implementation algorithms and data structures. Topics covered: design styles, layout editors, symbolic compaction, module generators, placement and routing, automatic synthesis, design-rule checking, circuit extraction, simulation and verification. Students are strongly encouraged to have programming skills and to have taken a course in Digital System Fundamentals such as E C E/COMP SCI 352.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**COMP SCI/E C E 757 – ADVANCED COMPUTER ARCHITECTURE II**

3 credits.

Parallel algorithms, principles of parallelism detection and vectorizing compilers, interconnection networks, MIMD machines, processor synchronization, data coherence, multis, dataflow machines, special purpose processors. Students are strongly encouraged to have knowledge of computer architecture (e.g., E C E/COMP SCI 552).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**COMP SCI 758 – ADVANCED TOPICS IN COMPUTER ARCHITECTURE**

3 credits.

Advanced topics in computer architecture that explore the implications to architecture of forthcoming evolutionary and revolutionary changes in application demands, software paradigms, and hardware implementation technologies. Students are strongly encouraged to have knowledge of computer architecture (e.g., E C E/COMP SCI 552).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**COMP SCI/E C E/E M A/E P/M E 759 – HIGH PERFORMANCE COMPUTING FOR APPLICATIONS IN ENGINEERING**

3 credits.

An overview of hardware and software solutions that enable the use of advanced computing in tackling computationally intensive Engineering problems. Hands-on learning promoted through programming assignments that leverage emerging hardware architectures and use parallel computing programming languages. Students are strongly encouraged to have completed COMP SCI 367 or COMP SCI 400 or to have equivalent experience.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**COMP SCI/E C E 760 – MACHINE LEARNING**

3 credits.

Computational approaches to learning: including inductive inference, explanation-based learning, analogical learning, connectionism, and formal models. What it means to learn. Algorithms for learning. Comparison and evaluation of learning algorithms. Cognitive modeling and relevant psychological results.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify different aspects of machine learning, including supervised learning, unsupervised learning, and reinforcement learning

Audience: Graduate

2. Implement and analyze a variety of supervised models for classification and regression, including decision trees, instance-based models, naive Bayes, support vector machines, a variety of neural networks, linear and logistic regression, and others

Audience: Graduate

3. Implement and analyze neural network models, starting with the perceptron, and continuing to multilayer perceptrons, convolutional neural networks, recurrent neural networks, along with deep generative models

Audience: Graduate

4. Identify various types of regularization techniques and their properties

Audience: Graduate

5. Implement optimization techniques used in modern machine learning, including gradient descent and stochastic gradient descent

Audience: Graduate

6. Apply various concepts and metrics involved in evaluating models: accuracy, F measures, ROC, and precision/recall curves, and implement cross-validation

Audience: Graduate

7. Analyze unsupervised learning techniques for clustering, dimensionality reduction, and latent models

Audience: Graduate

8. Identify classical and modern techniques to improve models or deal with dearth of data: ensemble methods, semi-supervised learning, weak supervision

Audience: Graduate

**COMP SCI/E C E 761 – MATHEMATICAL FOUNDATIONS OF MACHINE LEARNING**

3 credits.

Mathematical foundations of machine learning theory and algorithms. Probabilistic, algebraic, and geometric models and representations of data, mathematical analysis of state-of-the-art learning algorithms and optimization methods, and applications of machine learning. Knowledge of probability [such as MATH/STAT 431 or COMP SCI/E C E 561] and linear algebra [such as MATH 341 or M E/COMP SCI/E C E 532] is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Derive and apply mathematical tools for machine learning from probability, statistics, linear algebra, and optimization

Audience: Graduate

2. Perform mathematical analysis and characterization of generative and discriminative models

Audience: Graduate

3. Perform mathematical analysis of machine learning algorithms

Audience: Graduate

4. Perform derivation of basic machine learning error bounds and related performance analysis

Audience: Graduate

5. Read and understand theoretical papers from machine learning conferences

Audience: Graduate

**COMP SCI 762 – ADVANCED DEEP LEARNING**

3 credits.

Explore methods and applications of deep learning. Covers cutting-edge topics, including neural architecture design, robustness and reliability of deep learning, learning with less supervision, lifelong machine learning, deep generative modeling, theoretical understanding of deep learning, and interpretable deep learning.

**Requisites:** E C E/COMP SCI 760

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Understand the key elements and methods in the design and use of deep neural networks;

Audience: Graduate

2. Advance knowledge and get exposure to cutting-edge topics in AI and deep learning

Audience: Graduate

3. Explore new research directions and applications of deep learning

Audience: Graduate

4. Identify and participate in original research in a collaborative team

Audience: Graduate

5. Search for sources of information and evaluation methods and tools relevant to the project

Audience: Graduate

6. Get hands-on experience in writing software and programs using popular deep learning libraries and frameworks

Audience: Graduate

7. Develop analytic and problem-solving skills using computational approaches

Audience: Graduate

**COMP SCI/E C E 763 – TRUSTWORTHY ARTIFICIAL INTELLIGENCE**

3 credits.

Explore security and privacy aspects of trustworthy artificial intelligence. Three core subjects will be considered: differential privacy and algorithmic fairness; adversarial machine learning; and end-to-end trustworthy systems. A selection of more advanced topics may be covered such as additional notions of privacy, language-based security, and robust optimization. Knowledge of probability/statistics (such as MATH 431), cryptography (such as MATH 435), security (such as COMP SCI 642), and modern machine learning (such as M E/COMP SCI/E C E 539 or 540) is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Evaluate machine learning and AI systems from an adversarial, security and privacy mindset.

Audience: Graduate

2. Identify common pitfalls and problems in ensuring security and privacy for AI.

Audience: Graduate

3. Summarize the commonalities and differences between notions of security and privacy (e.g., the difference between privacy and cryptographic security).

Audience: Graduate

4. Explain the strengths and limitations of candidate definitions of robustness, security, privacy, and fairness properties in AI.

Audience: Graduate

5. Apply useful primitives from end-to-end trustworthiness to machine learning and AI systems.

Audience: Graduate

6. Use modern tools to design attacks and implement defensive measures.

Audience: Graduate

**COMP SCI 764 – TOPICS IN DATABASE MANAGEMENT SYSTEMS**

3 credits.

Implementation of database management systems, the impact of new technology on database management systems, back-end database computers, distributed database management systems, concurrency control, and query execution in both distributed and centralized systems, implementation of multiple user views, roll-back and recovery mechanisms, database translation. Students are strongly encouraged to have knowledge of database design (e.g., COMP SCI 564).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**COMP SCI 765 – DATA VISUALIZATION**

3 credits.

Principles of the visual presentation of data. Survey of Information Visualization, Scientific Visualization, and Visual Analytics. Design and evaluation of visualizations and interactive exploration tools. Introduction to relevant foundations in visual design, human perception, and data analysis. Encodings, layout and interaction. Approaches to large data sets. Visualization of complex data types such as scalar fields, graphs, sets, texts, and multi-variate data. Use of 2D, 3D and motion in data presentations. Implementation issues.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**COMP SCI/E C E 766 – COMPUTER VISION**

3 credits.

Fundamentals of image analysis and computer vision; image acquisition and geometry; image enhancement; recovery of physical scene characteristics; shape-from techniques; segmentation and perceptual organization; representation and description of two-dimensional objects; shape analysis; texture analysis; goal-directed and model-based systems; parallel algorithms and special-purpose architectures. Students are strongly encouraged to have basic proficiency in calculus and linear algebra, such as MATH 340, and basic programming such as COMP SCI 300.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Develop basic computer vision applications using a programming environment

Audience: Graduate

2. Formulate computer vision research problems motivated from real-world applications

Audience: Graduate

3. Evaluate and compare existing solutions to a computer vision problem

Audience: Graduate

4. Design approaches for solving computer vision problems based on a broad range of fundamental concepts in 2D and 3D computer vision, sensing and recognition

Audience: Graduate

5. Communicate solutions verbally and in writing to justify choices while designing solutions

Audience: Graduate

**COMP SCI/B M I 767 – COMPUTATIONAL METHODS FOR MEDICAL IMAGE ANALYSIS**

3 credits.

Review of advanced medical image analysis techniques. Covers advanced segmentation and registration methods. Describes the use and extension of statistical and machine learning methods for medical image analysis tasks.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2016**Learning Outcomes:** 1. Implement advanced ideas from machine learning, statistics, and computer vision for medical image analysis tasks. Audience: Graduate

2. Develop a deep technical understanding of the machine learning and statistical ideas being utilized in contemporary research in this area, and identification of blockers where research efforts can be focused Audience: Graduate

**COMP SCI 769 – ADVANCED NATURAL LANGUAGE PROCESSING**

3 credits.

Develop algorithms and mathematical models for natural language processing tasks, including text categorization, information retrieval, speech recognition, machine translation, and information extraction. Focus is on the state-of-the-art computational techniques as they are applied to natural language tasks. Students are strongly encouraged to have knowledge of introductory artificial intelligence (e.g., COMP SCI 540).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**COMP SCI/ED PSYCH/PSYCH 770 – HUMAN-COMPUTER INTERACTION**

3 credits.

Principles of human-computer interaction (HCI); human subjects research methods and procedures, qualitative and quantitative data analysis; and semester-long research project situated in critical domains of HCI, including applications in ubiquitous, affective, assistive, social, and embodied computing.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**COMP SCI/B M I 771 – LEARNING BASED METHODS FOR COMPUTER VISION**

3 credits.

Addresses the problems of representation and reasoning for large amounts of visual data, including images and videos, medical imaging data, and their associated tags or text descriptions. Introduces deep learning in the context of computer vision. Covers topics on visual recognition using deep models, such as image classification, object detection, human pose estimation, action recognition, 3D understanding, and medical image analysis. Emphasizes the design of vision and learning algorithms and models, as well as their practical implementations. Strongly recommended to have knowledge in computer vision or machine learning [such as COMP SCI 540] or medical image analysis [such as B M I / COMP SCI/ B M I 567].

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate their understanding of basic theories, current approaches, key concepts, and common practices in the area of deep learning for computer vision.

Audience: Graduate

2. Recognize and distinguish among a variety of visual recognition problems in computer vision, including their problem formulations and evaluation metrics.

Audience: Graduate

3. Utilize and implement deep learning models to solve visual recognition problems.

Audience: Graduate

4. Design deep learning models for visual recognition problems, conduct experiments to evaluate the proposed model, and analyze and interpret the results.

Audience: Graduate

5. Communicate effectively through written reports, oral presentations, and discussions.

Audience: Graduate

**COMP SCI 772 – LEARNING BASED IMAGE SYNTHESIS AND MANIPULATION**

3 credits.

Introduces machine learning based synthesis and manipulation of visual data (images and videos). Both classical (e.g., nearest neighbor, filtering) and modern deep learning based (e.g., ConvNets, GANs, Diffusion Models) algorithms will be presented for image representation, synthesis, and manipulation. Usage of self-developed algorithms for image synthesis and manipulation to understand and analyze state-of-the-art techniques, and to identify interesting open questions and future directions.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Apply knowledge of basic theories, current approaches, key concepts, and common practices in the area of deep learning based image synthesis and manipulation.

Audience: Graduate

2. Recognize and distinguish among a variety of image and video generation problems in computer vision, including their problem formulations and evaluation metrics.

Audience: Graduate

3. Utilize and implement deep learning models to solve image and video generation problems.

Audience: Graduate

4. Design deep learning models for image and video generation problems, conduct experiments to evaluate the proposed models, and analyze and interpret the results

Audience: Graduate

5. Communicate effectively through written reports, oral presentations, and discussions.

Audience: Graduate

**COMP SCI 774 – DATA EXPLORATION, CLEANING, AND INTEGRATION FOR DATA SCIENCE**

3 credits.

Big Data is often said to deal with four Vs: volume, velocity, variety, and veracity. The focus is on variety and veracity challenges, which often arise in data science projects. In many such projects, data is often incorrect, hard to understand, and come from a variety of sources. Data scientists often spend 80% of their effort to explore, clean, and integrate this data, before analysis can be carried out to extract insights. As a result, managing variety and veracity has received significant attention. Study these topics, understand their challenges, and discuss solutions. These solutions often require data management, machine learning, big data scaling, cloud, crowdsourcing, and user interaction techniques. Knowledge of machine learning/AI [COMP SCI 540], databases [COMP SCI 564] and Python [COMP SCI 320] recommended.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and examine the key challenges of managing variety and veracity with large data sets. These include data acquisition, data extraction, data exploration, cleaning, matching, and merging data.

Audience: Graduate

2. Summarize the variety and veracity solution approaches in academic and industry.

Audience: Graduate

3. Design and apply course concepts to experiential learning through a research project.

Audience: Graduate

4. Effectively communicate through written reports, oral presentations, and discussions.

Audience: Graduate

**COMP SCI/B M I 775 – COMPUTATIONAL NETWORK BIOLOGY**

3 credits.

Introduces networks as a powerful representation in many real-world domains including biology and biomedicine. Encompasses theory and applications of networks, also referred to as graphs, to study complex systems such as living organisms. Surveys the current literature on computational, graph-theoretic approaches that use network algorithms for biological modeling, analysis, interpretation, and discovery. Enables hands-on experience in network biology by implementing computational projects.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Recognize problems in molecular biology that are appropriate for network modeling

Audience: Graduate

2. Identify appropriate network algorithms for different tasks

Audience: Graduate

3. Evaluate the strengths and weaknesses of different network algorithms designed for a specific biological problem

Audience: Graduate

4. Gain practical experience in applying a select set of network algorithms on real data and evaluate its outputs

Audience: Graduate

5. Understand the algorithmic and statistical concepts of different network-based approaches

Audience: Graduate

**COMP SCI/B M I 776 – ADVANCED BIOINFORMATICS**

3 credits.

Advanced course covering computational problems in molecular biology. The course will study algorithms for problems such as: modeling sequence classes and features, phylogenetic tree construction, gene-expression data analysis, protein and RNA structure prediction, and whole-genome analysis and comparisons.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Select and implement appropriate algorithms and probabilistic models for analyzing genomes, RNA, proteins, and biological networks

Audience: Graduate

2. Write a manuscript describing a bioinformatics research study, including the motivation for the research, the scientific outcomes, and the detailed methods required to reproduce the study

Audience: Graduate

3. Read a bioinformatics research paper to identify the key computational techniques and assess the evidence supporting the paper's claims

Audience: Graduate

4. Identify emerging biological data types and data processing (e.g., single cell biology) and how the data can contribute to their research

Audience: Graduate

**COMP SCI/E C E 782 – ADVANCED COMPUTER SECURITY AND PRIVACY**

3 credits.

Security and privacy issues in software, networks, and hardware systems. Security vulnerabilities, privacy threats, threats modeling, and mitigation strategies. Privacy issues related to user interaction with devices, online systems, and networks. In addition, a selection of more advanced topics will be covered. Possible examples include applied cryptography in the context of systems, security and privacy policies, user authentication, and cyber-physical systems. Builds on prior experiences with one or more of the following: networking, security, modern machine learning, embedded systems, and mobile computing.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify contemporary research problems related to the security and privacy of modern computer systems

Audience: Graduate

2. Implement known security attacks to identify weaknesses that led to those attacks and evaluate defense strategies

Audience: Graduate

3. Differentiate among the different dimensions involved in protecting users' security and privacy as they relate to effectiveness, practicality, and usability

Audience: Graduate

4. Analyze, interpret, and critique research papers from top-tier security conferences by identifying their strengths and weaknesses

Audience: Graduate

5. Propose original research by defining a problem, outlining a plan, performing the original research, and designing, implementing, and evaluating the proposed solution

Audience: Graduate

6. Work effectively in teams to complete a research project

Audience: Graduate

7. Communicate effectively through written reports, oral presentations, and discussion

Audience: Graduate

**COMP SCI 784 – FOUNDATIONS OF DATA MANAGEMENT**

3 credits.

Foundational concepts in databases and data management. The first part of the course discusses topics on query languages (conjunctive queries, Datalog), their expressivity and complexity of evaluation. The second part studies advanced topics in modern data management, including data streams, massive parallelism, provenance, uncertain data management and privacy. There are no specific course prerequisites. It is strongly encouraged that the students are familiar with databases and relational algebra (COMP SCI 564 or equivalent). Knowledge of algorithms, complexity theory and probability will also be helpful.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**COMP SCI 787 – ADVANCED ALGORITHMS**

3 credits.

Advanced paradigms for the design and analysis of efficient algorithms, including the use of randomness, linear programming, and semi-definite programming. Applications to data structures, approximating NP-hard optimization problems, learning, on-line and distributed problems. Students are strongly encouraged to have introductory knowledge of algorithms (e.g., COMP SCI 577)

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**COMP SCI 790 – MASTER'S THESIS**

1-9 credits.

Grad st; Master's candidates only

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**COMP SCI 799 – MASTER'S RESEARCH**

1-9 credits.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**COMP SCI 809 – MATHEMATICAL TECHNIQUES IN THE ANALYSIS OF ALGORITHMS**

3 credits.

Techniques for quantitative analysis of algorithms. Charging arguments, amortization, probabilistic methods. Adversary and information lower bounds. Use of methods from combinatorics, complex analysis, and asymptotics in obtaining precise analyses of quicksort, chained hashing, and other algorithms. Students are strongly encouraged to have knowledge of algorithms (e.g., COMP SCI 577) or applied math analysis (e.g., MATH 321) and theory of probability (e.g., MATH/STAT 431).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2018**COMP SCI 812 – ARITHMETIC ALGORITHMS**

3 credits.

Survey of algorithms and design paradigms for exact arithmetic, as used in public-key cryptography, computer algebra, and pseudo-random number generation. Topics include primality testing, factorization of integers and polynomials, discrete logarithms, and (optionally) elliptic curves and integer lattices. Students are strongly encourage to have knowledge of basic abstract algebra (e.g., MATH 541), and intermediate programming ability (e.g., COMP SCI 367 or COMP SCI 300).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**COMP SCI 838 – TOPICS IN COMPUTING**

1-3 credits.

Advanced topics of special interest to students in various areas of Computer Science. Each offering of the course will cover a topic selected by the instructor. Credit varies by offering - check with the department to determine how an offering counts toward degree requirements.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**COMP SCI 839 – CORE TOPICS IN COMPUTING**

3 credits.

Topics selected from advanced areas.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**COMP SCI/B M I/PSYCH 841 – COMPUTATIONAL COGNITIVE SCIENCE**

3 credits.

Studies the biological and computational basis of intelligence, by combining methods from cognitive science, artificial intelligence, machine learning, computational biology, and cognitive neuroscience. Requires ability to program.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COMP SCI/E C E/STAT 861 – THEORETICAL FOUNDATIONS OF MACHINE LEARNING**

3 credits.

Advanced mathematical theory and methods of machine learning. Statistical learning theory, Vapnik-Chevronenkis Theory, model selection, high-dimensional models, nonparametric methods, probabilistic analysis, optimization, learning paradigms.

**Requisites:** E C E/COMP SCI 761 or E C E 830

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**COMP SCI 880 – TOPICS IN THEORETICAL COMPUTER SCIENCE**

3 credits.

Advanced topics in algorithms, complexity, and cryptography. The exact topic varies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COMP SCI 899 – PRE-DISSERTATOR RESEARCH**

1-9 credits.

Independent research supervised by a faculty member for students who have completed a master's degree but have not reached dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**COMP SCI 900 – ADVANCED SEMINAR IN COMPUTER SCIENCE**

0-1 credits.

Seminar on recent research on various aspects of computer science.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COMP SCI/B M E/B M I/BIOCHEM/CBE/GENETICS 915 – COMPUTATION AND INFORMATICS IN BIOLOGY AND MEDICINE**

1 credit.

Participants and outside speakers will discuss current research in computation and informatics in biology and medicine. This seminar is required of all CIBM program trainees.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss how methods from computer science, statistics, information science and engineering are applied to problems in biology, medicine and population health

Audience: Graduate

2. Recognize and be able to define applications in translational bioinformatics, clinical informatics and public health informatics

Audience: Graduate

**COMP SCI 990 – DISSERTATION**

1-6 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**COMP SCI 999 – DISSERTATOR RESEARCH**

1-6 credits.

Advanced level mentored reading and research for dissertators.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

# CONSUMER SCIENCE (CNSR SCI)

## CNSR SCI 111 – FINANCIAL LIFE SKILLS

1 credit.

Applied personal finance in college and after graduation. Financial values and behaviors, debt and credit, housing, transportation, retirement planning, investing, spending and saving plans.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define key financial terms and concepts

Audience: Undergraduate

2. Recognize the impact of financial decisions on personal well-being

Audience: Undergraduate

3. Apply critical thinking to financial decision-making and implement strategies for healthy money management

Audience: Undergraduate

4. Explore and analyze investment options and retirement savings

Audience: Undergraduate

## CNSR SCI/RELIG ST 173 – CONSUMING HAPPINESS

3 credits.

As the saying goes, money can't buy happiness -- but in modern America, we certainly try. This course will provide an overview of the study of happiness and well-being, examine how consumers engage in consumption in pursuit of happiness, as well as explore the emergence of the experience economy, and the intersection of money and well-being. Students will read academic and popular pieces on positive psychology, prosocial spending and explore the psychology of persuasion in the promises associated with this industry. In addition to integrating visual media, students will have the opportunity to experience first-hand whether the advice works in their own lives.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Differentiate between hedonic and eudaimonic happiness, prosocial spending and pure materialism and the pros and cons of the intersection of faith and happiness

Audience: Undergraduate

2. Theorize via thought-provoking discussions about the quest to "buy happiness" in modern America

Audience: Undergraduate

3. Contrast advice literature with positive and social psychology research

Audience: Undergraduate

4. Evaluate through the research whether one can 'get happier' through consumer culture

Audience: Undergraduate

5. Critique diverse materials including popular and academic readings

Audience: Undergraduate

**CNSR SCI 175 – INTRODUCTION TO CONSUMER FINANCE**

3 credits.

Introduction to consumer finance and the concepts and methods used in consumer planning and financial management. Topics covered include budgeting, credit, investing, insurance, taxes, retirement, estate planning, mortgages, and an introduction to behavioral finance. Discuss methods for calculating, planning, and allocating resources to attain specific financial objectives.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Describe the basic steps and principles of the financial planning process.

Audience: Undergraduate

2. Implement learned techniques for creating and managing a personal budget, tailored to individual financial goals and circumstances.

Audience: Undergraduate

3. Analyze the impact of economic factors on personal finances, fostering informed decision making in real-world scenarios.

Audience: Undergraduate

4. Evaluate various investment options and strategies, considering risk tolerance, time horizon, and financial objectives.

Audience: Undergraduate

5. Demonstrate proficiency in utilizing financial tools and technologies for effective money management.

Audience: Undergraduate

**CNSR SCI 201 – CONSUMER INSIGHTS**

3 credits.

Provides basic training in quantitative data analysis, with an emphasis on descriptive and inferential statistics with consumer research applications.

**Requisites:** (STAT 301, 371, C&E SOC/SOC 360, PSYCH 210, ECON 310, GEN BUS 306, or GEOG 360) and (GEN BUS 106 or A A E 335)**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Consider the various approaches to gathering information and methods for conducting consumer research

Audience: Undergraduate

2. Reflect on appropriate data analysis techniques that address problems and inform opportunities

Audience: Undergraduate

3. Develop best practices for crafting messages and stories that inspire audiences to take action

Audience: Undergraduate

**CNSR SCI 250 – RETAIL LEADERSHIP SYMPOSIUM**

1 credit.

Provides detailed examination of careers in the retailing industry. High level industry experts from leading companies in the retailing industry participate as guest speakers and panel members.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify strengths, skills and certifications necessary to be successful within the industry

Audience: Undergraduate

2. Examine current issues and areas of investigation in the industry

Audience: Undergraduate

3. Define the major and how it relates to Human Ecology and our society

Audience: Undergraduate

4. Connect potential careers in the industry to the major

Audience: Undergraduate

**CNSR SCI 251 – FINANCIAL SERVICES LEADERSHIP SYMPOSIUM**

1 credit.

Provides detailed examination of careers in the financial services industry. High level industry experts from leading companies in the financial services industry participate as guest speakers and panel members.

**Requisites:** None**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify strengths, skills and certifications necessary to be successful within the industry

Audience: Undergraduate

2. Examine current issues and areas of investigation in the industry

Audience: Undergraduate

3. Connect potential careers in the industry to the major

Audience: Undergraduate

**CNSR SCI 255 – CONSUMER FINANCIAL SERVICES INNOVATION**

3 credits.

Experience the current financial services market from the perspective of real families. Design, develop and evaluate innovative solutions to improve service or address unmet needs.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Anticipate consumer decisions and likely outcomes given a particular market structure;

Audience: Undergraduate

2. Apply Human Ecology Centered Design Thinking to consumer financial services and the alignment of consumer decisions to consumer preferences.

Audience: Undergraduate

3. Define opportunities or unmet needs as design challenges;

Audience: Undergraduate

4. Describe the financial services available to consumers today and how those came to be;

Audience: Undergraduate

5. Propose effective solutions for those challenges;

Audience: Undergraduate

**CNSR SCI 257 – INTRODUCTION TO RETAIL**

2 credits.

Foundational knowledge of the retail industry including the retail process, the evolution of the industry, key drivers and trends to provide a framework and set of concepts that will support the remainder of the core retail courses.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Define the functions and relationships required to implement retail activity

Audience: Undergraduate

2. Describe where retail has been, is today and where it is headed with an explanation of the drivers of that evolution

Audience: Undergraduate

3. Anticipate the possible and likely outcomes of change in retail strategy or competitive set for retailers & for consumers

Audience: Undergraduate

**CNSR SCI 273 – FINANCES & FAMILIES**

3 credits.

For the majority of Americans, money and family life is intertwined.

Learn about the basics of relationship formation and dissolution, gender and family dynamics and the psychology of money with the goal of encouraging financial equality among members of families of all types.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Critically assess research and media on family dynamics and household finance

Audience: Undergraduate

2. Discuss the social contexts that influence family finances and financial behavior

Audience: Undergraduate

3. Translate research on family finance to a general audience through the development of your professional writing skills

Audience: Undergraduate

**CNSR SCI 275 – INTRODUCTION TO PERSONAL FINANCIAL PLANNING**

3 credits.

Introduction to consumer finance covering techniques of personal sector cash flow, asset and liability management, life cycle financial planning, investment management, tax planning, retirement, and estate planning. Analysis and evaluation related to personal financial planning.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe the financial planning process, techniques and terminology

Audience: Undergraduate

2. Explain time value of money and its importance

Audience: Undergraduate

3. Calculate and solve for future values, present values, rate of return, net present value, and net future value

Audience: Undergraduate

4. Apply time value of money to help consumers achieve their financial goals

Audience: Undergraduate

5. Develop recommendations and evaluate decision making regarding budgets, assets, consumer credit, investments, insurance, retirement, and estate planning

Audience: Undergraduate

**CNSR SCI 299 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects for freshmen and sophomores as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**CNSR SCI 301 – CONSUMER ANALYTICS**

3 credits.

Leverage data analysis to drive consumer business decisions via the telling of a compelling, evidence-based story. Structured to 1) provide you with a core process by which data analysis can produce effective business actions, 2) build your analytical abilities to execute the process and 3) establish a method by which analytical results can be transformed into effective stories. The process and methods studied will have application across a broad range of careers.

**Requisites:** CNSR SCI 201

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop the knowledge and tools to carry out meaningful data analysis

Audience: Undergraduate

2. Build analytical abilities

Audience: Undergraduate

3. Establish a process for translating analysis into effective stories and presentations

Audience: Undergraduate

**CNSR SCI 340 – BUILDING FINANCIAL ASSETS AND CAPABILITY FOR VULNERABLE FAMILIES**

3 credits.

Learn how to assess and prevent household financial problems and improve financial security. Based on the context of vulnerable households, financial services and public policy, focus on skills related to managing cash flow, credit and debt, saving for emergencies and long-term goals.

**Requisites:** Satisfied Communications A requirement or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CNSR SCI 355 – FINANCIAL COACHING**

3 credits.

Financial coaching is an approach influenced by the fields of positive psychology and behavioral economics to help individuals build financial capability. This experiential course will prepare students for financial, social work, and asset building services.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Differentiate between financial coaching and other financial approaches, including counseling, planning, and financial education.

Audience: Undergraduate

2. Explain financial capability and financial competencies as components of financial well-being, and how to address these components through financial coaching.

Audience: Undergraduate

3. Identify values and biases affecting financial decision-making for themselves and a diverse range of audiences.

Audience: Undergraduate

4. Recognize theories of behavior change and how these theories apply to financial coaching.

Audience: Undergraduate

5. Understand and demonstrate the financial coaching framework and coaching skills, including effective communication techniques and theories of change.

Audience: Undergraduate

### **CNSR SCI 360 – SUSTAINABLE AND SOCIALLY JUST CONSUMPTION**

3 credits.

Examines how consumers influence sustainability and social justice through their purchases and how policy and globalization influence their choices.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Come away able to think beyond binary models and think about sustainability in terms of cycles or circular models

Audience: Undergraduate

2. Have the tools to connect historical narratives to contemporary ones, seeing how societal values set in motion the current relationship American society has to the environment

Audience: Undergraduate

3. Have a greater ability to be an informed consumer, conscious of the ways individual choices have effects on the environment and other societies

Audience: Undergraduate

4. Study environmental issues through a lens of environmental justice, understanding that certain communities are affected at disproportionate rates by all aspects of normative consumer life

Audience: Undergraduate

### **CNSR SCI 390 – FINANCIAL LIFE SKILLS: PEER EDUCATION TECHNIQUES**

2 credits.

Examine student learning and development to become effective peer educators in the BadgerSense Financial Life Skills program. Learn about common financial issues college students face. Develop knowledge and skills related to interpersonal and group communication, the impact of leadership, group learning and how to create a positive financial learning experience.

**Requisites:** Completion of CNSR SCI 275 OR CNSR SCI 111 OR CNSR SCI 321

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify and explain the challenges students face with money while in college.

Audience: Undergraduate

2. Describe why peer educating is an effective strategy to help undergraduate students learn about personal finance issues for their lives in college and beyond.

Audience: Undergraduate

3. Assess personal strengths, challenges and skills as it relates to the financial peer educator role.

Audience: Undergraduate

4. Demonstrate how to create a safe, positive learning environment for students enrolled in Financial Life Skills courses.

Audience: Undergraduate

5. Create and present a financial learning experience for a specific student population.

Audience: Undergraduate

**CNSR SCI/HDFS 465 – FAMILIES & POVERTY**

3 credits.

Introduction to research at the intersection of family and poverty studies. Learn how family behaviors vary by socioeconomic status; how romantic relationships, childbearing, and childrearing may be implicated in poverty; what the consequences of poverty are for family functioning and children; and about the role of policy in influencing families and poverty.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Ability to consider and evaluate how children, adults, and families affect and are affected by policies, media, or other social institutions.

Audience: Undergraduate

2. Demonstrate applied professional skills by practicing working effectively with others.

Audience: Undergraduate

3. Demonstrate professional speaking skills through giving an oral presentation.

Audience: Undergraduate

4. Demonstrate scientific reasoning/critical thinking skills through engaging in critical evaluation of research articles, websites, programs, or policies.

Audience: Undergraduate

5. Knowledge of family and community diversity.

Audience: Undergraduate

**CNSR SCI 477 – THE CONSUMER AND THE MARKET**

3 credits.

Analysis of the consumer's market, consumer's behavior, and government policies affecting the consumer in the American economy.

**Requisites:** ECON 101, 111, or graduate/professional standing**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**CNSR SCI 501 – SPECIAL TOPICS**

1-3 credits.

Specialized subject matter of current interest.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**CNSR SCI 555 – CONSUMER DESIGN STRATEGIES & EVALUATION**

3 credits.

Leveraging a combination of design thinking and strategic planning, students will design a clear plan of action with compelling evidence for expected outcomes, implement the proposed plan with contingencies for the inevitable challenges and adjustments, and evaluate impact relative to goals with objective recommendations for future action.

**Requisites:** CNSR SCI 657 and junior standing, or graduate/professional standing**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Reframe the challenges faced in a given situation from true empathy for the people involved

Audience: Both Grad &amp; Undergrad

2. Formulate and articulate a clear plan of action with compelling evidence for expected outcomes

Audience: Both Grad &amp; Undergrad

3. Design and implement a strong implementation plan with contingencies for the inevitable challenges and adjustments

Audience: Both Grad &amp; Undergrad

4. Craft and execute solid evaluation of impact relative to goals with objective recommendations for future action.

Audience: Both Grad &amp; Undergrad

5. Evaluate the proposed strategic evaluation plan

Audience: Graduate

**CNSR SCI 561 – CONSUMER ENGAGEMENT STRATEGIES**

3 credits.

Exploring applications of consumer behavior and insights in developing strategies for consumer engagement.

**Requisites:** CNSR SCI 657

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze current and evolving retail and brand strategies

Audience: Undergraduate

2. Evaluate design strategy approaches retailers and brands can build to obtain competitive advantage

Audience: Undergraduate

3. Examine typical and possible characteristics of the consumer experience

Audience: Undergraduate

4. Articulate how to effectively build brand advocacy

Audience: Undergraduate

5. Develop a compelling point of view and present a justifiable course of action for a brand or retailer

Audience: Undergraduate

**CNSR SCI 562 – THE GLOBAL CONSUMER**

3 credits.

Key issues in international retailing with consideration of the global consumer.

**Requisites:** CNSR SCI 257 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CNSR SCI 564 – RETAIL FINANCIAL ANALYSIS**

3 credits.

Provides tools for planning and analyzing retail financial performance.

Includes elements of retail financial statements, pricing, purchasing terms and conditions, merchandise planning, inventory control, and economic factors that impact retail businesses.

**Requisites:** CNSR SCI 257, (ACCT I S 100 or 300 or GEN BUS 310), and (GEN BUS 106 or A A E 335), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and define the different roles in merchandising, product development and manufacturing to produce products at the right time, right place, right price, right quantity, and right appeal for customers

Audience: Both Grad & Undergrad

2. Utilize the retail method of inventory to calculate book and physical inventory and explain the cause and effects of overages and shortages

Audience: Both Grad & Undergrad

3. Demonstrate the mathematical calculations and processes frequently used in the retail and manufacturing industry to evaluate inventory performance

Audience: Both Grad & Undergrad

4. Apply negotiation alternatives between retailers and manufactures

Audience: Both Grad & Undergrad

5. Define and calculate measurements of inventory mark-ups & profit indicators

Audience: Both Grad & Undergrad

6. Differentiate inventory pricing and markdowns strategies

Audience: Both Grad & Undergrad

7. Define and calculate measurements of inventory rate of sale

Audience: Both Grad & Undergrad

8. Define and calculate the components of a retailer's merchandise financial plan and forecast based upon market influences

Audience: Both Grad & Undergrad

9. Apply methods for analyzing and correcting problems related to retail assortments, purchases, inventory and sales

Audience: Both Grad & Undergrad

10. Prepare, modify and evaluate merchandising planning methods used to create seasonal inventory budgets

Audience: Both Grad & Undergrad

11. Evaluate the causes and effects of retail pricing adjustments

Audience: Both Grad & Undergrad

12. Evaluate profit and loss statements of retailers and manufacturers and impact of performances

Audience: Both Grad & Undergrad

13. Synthesis speed and profit to create a merchandise plan and forecast along with a full financial plan based upon a set of provided data

Audience: Graduate

### **CNSR SCI 567 – PRODUCT DEVELOPMENT STRATEGIES IN RETAILING**

3 credits.

Merchandise product development planning through market trend analysis, assortment planning sourcing production.

**Requisites:** CNSR SCI 257

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **CNSR SCI 579 – CONSUMER POLICY ANALYSIS**

3 credits.

Analysis of consumer policies enacted and proposed at federal, state, and municipal levels; application of economic analysis to consumer laws, public policies and regulations; study of the process of creating and enforcing legislation and impacts on consumers' well-being.

**Requisites:** Junior standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **CNSR SCI 601 – CONSUMER SCIENCE INTERNSHIP**

1-8 credits.

A supervised internship providing hands-on training in a professional experience in consumer science related fields.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop relationships with co-workers and supervisors working as a team member through varied experiences while improving interpersonal relationships

Audience: Undergraduate

2. Enhance knowledge of the industry's systems and procedures, including adapting to changing market trends and technology

Audience: Undergraduate

3. Reinforce educational and career goals while preparing for transition from student to a professional in the workplace

Audience: Undergraduate

4. Apply academic knowledge to the business / personal finance / consumer affairs work environment.

Audience: Undergraduate

5. Develop analytical skills and problem-solving competencies related to the field of personal finance

Audience: Undergraduate

6. Develop professional competencies in written and oral communication.

Audience: Undergraduate

7. Expand awareness of career opportunities and establish professional contacts

Audience: Undergraduate

8. Provide professional work experience regarding the following (but not exclusive to): financial planning, investment management, insurance, banking, sales management, human resource management, consumer mediation, wealth management, business finance, etc.

Audience: Undergraduate

**CNSR SCI 603 – RETAILING INTERNSHIP**

1-6 credits.

A supervised internship providing hands-on training in a professional experience in retailing related fields.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop relationships with co-workers and supervisors working as a team member through varied experiences while improving interpersonal relationships

Audience: Undergraduate

2. Enhance knowledge of the industry's systems and procedures, including adapting to changing market trends and technology

Audience: Undergraduate

3. Explore career opportunities within a company/organization and industry through real-world situations

Audience: Undergraduate

4. Gain a deeper understanding of how consumerism can be enhanced through retail functions and consumer behavior analytics

Audience: Undergraduate

5. Reinforce educational and career goals while preparing for transition from student to a professional in the workplace.

Audience: Undergraduate

**CNSR SCI 627 – ADVANCED CONSUMER FINANCE**

3 credits.

Studies financial markets and instruments from the perspective of individual consumers and their portfolio decisions over their lifetime.

**Requisites:** CNSR SCI 275 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CNSR SCI 635 – ESTATE PLANNING FOR FINANCIAL PLANNERS**

3 credits.

Analysis from a financial planner's perspective of the process of planning the accumulation, conservation, and distribution of an estate, in the manner that most effectively and efficiently accomplishes an individual's personal tax and non-tax objectives.

**Requisites:** CNSR SCI 275 or FINANCE/ECON 300

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze personal financial situations, evaluating clients' objectives, needs, and values to develop an appropriate strategy within their estate plan

Audience: Undergraduate

2. Apply the CFP Board Financial Planning Practice Standards to the financial planning process as it applies to estate planning

Audience: Undergraduate

3. Collect all necessary and relevant qualitative and quantitative information required to develop an estate plan

Audience: Undergraduate

4. Demonstrate a comprehensive understanding of the content found within the Estate Planning for Financial Planners curriculum and effectively apply and integrate this information in the formulation of an estate plan for sample clients

Audience: Undergraduate

5. Demonstrate logic and reasoning to identify the strengths and weaknesses of various approaches to problems found with client situations

Audience: Undergraduate

6. Effectively communicate the estate plan, including information based on research, peer, colleague or simulated client interaction and/or results emanating from synthesis of material

Audience: Undergraduate

7. Evaluate the impact of economic, political, and regulatory issues with regard to the estate plan

Audience: Undergraduate

**CNSR SCI 657 – CONSUMER BEHAVIOR**

3 credits.

Analyses from social and psychological perspectives. Motivation, perception, learning and attitude formation. Effects of social class, family structure, cultural backgrounds and reference groups.

**Requisites:** Sophomore standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**CNSR SCI 665 – HOUSEHOLD RISK MANAGEMENT**

3 credits.

Application of advanced analytical techniques to examine household financial risk. Implications for financial planning of changes in family structure and earnings. Private and social insurance that guard against economic consequences of death, disability, ill health, retirement, marital dissolution. Use of financial planning software.

**Requisites:** (ECON 101 or 111) and CNSR SCI 275

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze personal financial situations, evaluating clients' objectives, needs, and values to develop an appropriate strategy within their personal risk management plan

Audience: Undergraduate

2. Apply the CFP Board Financial Planning Practice Standards to the financial planning process as it applies to personal risk management planning

Audience: Undergraduate

3. Collect all necessary and relevant qualitative and quantitative information required to develop a personal risk management plan

Audience: Undergraduate

4. Demonstrate a comprehensive understanding of the content found within the Household Risk Management curriculum and effectively apply and integrate this information in the formulation of personal risk management plan for sample clients

Audience: Undergraduate

5. Demonstrate logic and reasoning to identify the strengths and weaknesses of various approaches to problems found with client situations

Audience: Undergraduate

6. Effectively communicate the personal risk management plan, including information based on research, peer, colleague or simulated client interaction and/or results emanating from synthesis of material

Audience: Undergraduate

7. Evaluate the impact of economic, political, and regulatory issues with regard to the personal risk management plan

Audience: Undergraduate

**CNSR SCI 675 – FAMILY FINANCIAL COUNSELING**

3 credits.

Systems approach to family financial management, stressing development of interpersonal techniques by professionals who will assist individuals and families to become responsible financial managers.

**Requisites:** CNSR SCI 275 and 627

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze personal financial situations, evaluate clients' objectives, needs, and values to develop an appropriate strategy within the financial plan

Audience: Undergraduate

2. Apply the CFP Board Financial Planning Practice Standards to the financial planning process

Audience: Undergraduate

3. Collect all necessary and relevant qualitative and quantitative information required to develop a financial plan

Audience: Undergraduate

4. Demonstrate a comprehensive understanding of the content found within the Financial Planning curriculum and effectively apply and integrate this information in the formulation of a financial plan

Audience: Undergraduate

5. Demonstrate logic and reasoning to identify the strengths and weaknesses of various approaches to a specific problem

Audience: Undergraduate

6. Effectively communicate the financial plan, both orally and in writing, including information based on research, peer, colleague or simulated client interaction and/or results emanating from synthesis of material

Audience: Undergraduate

7. Evaluate the impact of economic, political, and regulatory issues with regard to the financial plan

Audience: Undergraduate

**CNSR SCI 680 – SENIOR HONORS THESIS**

2-4 credits.

Individual study in honors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2011

**CNSR SCI 690 – SENIOR THESIS**

2 credits.

Individual study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**CNSR SCI 699 – INDEPENDENT STUDY**

1-6 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**CNSR SCI 748 – THE ECONOMIC ORGANIZATION OF THE HOUSEHOLD**

3 credits.

Studies family behavior and family outcomes using an economic framework. Covers theoretical models of consumption, fertility, household production, time allocation, and household formation. Knowledge of microeconomic theory [such as ECON 301] recommended.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Explain the theory of household formation and dissolution, labor supply, and child investment from a utility maximizing framework

Audience: Graduate

2. Demonstrate how households make consumption and investment decisions across time using a two period model

Audience: Graduate

3. Identify and critically analyze how public policy affects families, particularly policies focused on children, the labor market, and marriage

Audience: Graduate

**CNSR SCI 768 – INTRODUCTION TO QUANTITATIVE METHODS IN SOCIAL SCIENCE**

3 credits.

Introduction to empirical consumer science research methods, with an emphasis on application. Covers different types of data structures commonly encountered, statistical properties of data, bivariate and multivariate linear regression models.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Ascertain differences in data structures and key statistical properties to understand types of quantitative data used in consumer science research

Audience: Graduate

2. Master technical proficiency in linear regression and statistical inference by applying these techniques to real-world consumer data

Audience: Graduate

3. Critically assess estimates derived from linear models commonly used in consumer research by evaluating the accuracy, precision, and relevance of model estimates to draw meaningful insights from empirical analyses

Audience: Graduate

4. Discern the suitability of model assumptions for different empirical challenges in consumer research by evaluating assumptions and selecting and modifying models to best fit the specific characteristics of the data and the nature of the research question

Audience: Graduate

**CNSR SCI 775 – HOUSEHOLD FINANCE AND WELL-BEING**

3 credits.

Provides an overview of major theories in household finance, financial literacy, financial capability. Evaluates programs and strategies designed to improve consumer well-being by changing household financial behaviors, building household financial assets, and regulation of consumer financial markets.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the contributions and identify opportunities to expand current research on household finance

Audience: Graduate

2. Synthesize and translate information from academic research for varied academic and non-academic audiences

Audience: Graduate

3. Construct a research project that applies your understanding of household finance and well-being based on basic econometric analyses

Audience: Graduate

4. Understand the various professional designations related to financial coaching, counseling, and planning

Audience: Graduate

**CNSR SCI 778 – CAUSAL MODELS IN HOUSEHOLD AND CONSUMER RESEARCH**

3 credits.

Research on the application of modern econometric techniques commonly used in empirical consumer research with an emphasis on causal inference.

**Requisites:** CNSR SCI 768

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize and describe common methodological approaches used for causal inference in empirical consumer research.

Audience: Graduate

2. Identify the underlying identification assumptions behind common methodological approaches and describe the key considerations for assessing the validity of these assumptions.

Audience: Graduate

3. Critically evaluate and discuss the methodological approaches in recent empirical consumer research, including being able to identify potential limitations to being able to draw causal inferences from the findings.

Audience: Graduate

4. Interpret and synthesize findings from empirical consumer research, enabling them to communicate research outcomes effectively and with the appropriate caveats to both academic and non-academic audiences.

Audience: Graduate

5. Apply modern econometric techniques to analyze observational data in the context of consumer research, with a particular focus on causal inference.

Audience: Graduate

**CNSR SCI 820 – HEALTH AND FINANCIAL WELL-BEING**

3 credits.

Explores the interrelationships of health, health insurance, the health care system, and financial well-being. Provides an in-depth understanding of how the financing and delivery of health care affects consumer financial health, as well as consumer financial health as a central determinant of individual health.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Discuss health insurance as both a consumer financial product that contributes to consumer financial health and a means of payment for health care that affects consumer financial health  
Audience: Graduate

2. Explain how financial well-being affects health and the demand for health care  
Audience: Graduate

3. Explain how health, health insurance, and health care produce financial health  
Audience: Graduate

4. Propose research questions that explore the interrelationships between health, health insurance, the use of health care, and financial health  
Audience: Graduate

**CNSR SCI 830 – FAMILIES AND HOUSEHOLDS IN COMMUNITIES**

3 credits.

Examines how local communities inform family economic well-being.

Explores the intersection of people and organizations using quantitative and qualitative techniques.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize how markets, consumer behavior, and family dynamics are both influenced by and shape social structures and systems within their community  
Audience: Graduate

2. Dissect the networked systems that influence neighborhood construction as well as individual, family, and community well-being  
Audience: Graduate

3. Differentiate the role of key stakeholders including policymakers, business, nonprofit sector, and individuals in co-creating community  
Audience: Graduate

4. Investigate the complex relationship between people and systems within a community using a range of quantitative techniques (e.g., generating indices of segregation, employing spatial data visualization and regression techniques)  
Audience: Graduate

5. Investigate the complex relationship between people and systems within a community using a range of qualitative techniques (e.g., in-depth interviews, focus groups, photo elicitation, text analysis)  
Audience: Graduate

6. Incorporate community processes and contexts to develop and analyze an empirical research proposal examining the socio-spatial relationships between people and systems within a community  
Audience: Graduate

**CNSR SCI 851 – MEASURING HOUSEHOLD AND COMMUNITY WELL-BEING**

3 credits.

Provides broad knowledge of major quantitative measures of consumer well-being. Investigates construction of and literature on well-being measures across various domains.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify and critically analyze the primary measures of consumer well-being

Audience: Graduate

2. Explore how measures of consumer well-being are constructed

Audience: Graduate

3. Compare and contrast measures of well-being

Audience: Graduate

4. Explain how consumer well-being measures are used in research and policy

Audience: Graduate

5. Review major literature on each of these measures

Audience: Graduate

**CNSR SCI 852 – ADVANCED CONSUMER POLICY**

3 credits.

Studies the intersection of behavioral economics and public policy.

Explores the effect of deviations from rational economic behavior on consumer well-being. Analyzes the impact of policy design on consumer well-being across a variety of policy domains.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe some of the ways in which individuals make decisions and exhibit behavior that systematically deviates from the predictions of traditional economic models of rational actors

Audience: Graduate

2. Compare and contrast traditional policy tools and levers with interventions informed by behavioral economics and assess their relative efficacy in addressing a potential policy problem

Audience: Graduate

3. Critically evaluate and discuss policy solutions in recent empirical policy-focused consumer research, including being able to assess the extent to which given solutions may or may not extrapolate to other domains and populations

Audience: Graduate

4. Identify policy issues and generate potential solutions that apply insights from behavioral economics to policy design, drawing on both existing research and behavioral economic theories

Audience: Graduate

**CNSR SCI 888 – ADVANCED CONSUMER BEHAVIOR**

3 credits.

Provide a broad-based knowledge of the consumer behavior literature. Develop skills to be an active researcher in fields that require an understanding of consumer research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop abilities to identify research problems and to develop conceptual and empirical solutions to problems

Audience: Graduate

2. Develop critical thinking and creative problem solving skills

Audience: Graduate

3. Enhance appreciation of the interdisciplinary and varied methodological orientations of consumer research

Audience: Graduate

4. Become familiar with the primary research streams and knowledge priorities

Audience: Graduate

5. Develop an understanding of the major conceptual and empirical contributions to the field of consumer research

Audience: Graduate

**CNSR SCI 901 – GRADUATE SPECIAL TOPICS IN CONSUMER SCIENCE**

1-3 credits.

Specialized subject matter of current interest.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**CNSR SCI 920 – CONSUMER SCIENCE GRADUATE WORKSHOP**

1 credit.

Develops professional skills. Provides opportunities for presenting research and respectfully critiquing the work of others.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop research questions through presenting original research and/or critiquing the research questions of others

Audience: Graduate

2. Develop skills in creating and delivering research presentations through presentation and/or critiquing the presentations of others

Audience: Graduate

3. Receive and/or respond to formal and informal feedback from peers and faculty

Audience: Graduate

4. Create materials for the job market and professional skills through course assignments

Audience: Graduate

**CNSR SCI 930 – SEMINAR IN FAMILY ECONOMIC POLICY**

3 credits.

Topics on family economic well-being and the social and consumer policies that influence economic behavior and family economic status.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Communicate the substance of a real-world policy problem(s) using relevant scholarly studies and practical applications

Audience: Graduate

2. Demonstrate critical thinking skills by retrieving and examining literature

Audience: Graduate

3. Evaluate evidence for and against hypotheses, identify knowledge gaps, strengths and weaknesses in existing literature, synthesize knowledge, and develop conclusions

Audience: Graduate

### CNSR SCI 990 – RESEARCH AND THESIS

1-12 credits.

Independent research and writing under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### CNSR SCI 999 – INDEPENDENT STUDY

1-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## COUNSELING PSYCHOLOGY (COUN PSY)

### COUN PSY 101 – ACADEMIC ENHANCEMENT SEMINAR

1 credit.

Introduction to and development of new skills and behaviors to assist with academic and personal goals. Focus on social competencies, values clarification, and problem-solving to support short- and long-term goals for students on academic probation.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify personal and academic strengths and obstacles.

Audience: Undergraduate

2. Identify and solve problems using self-reflective processes.

Audience: Undergraduate

3. Apply specific techniques and skills to set and meet academic and personal goals.

Audience: Undergraduate

4. Demonstrate an understanding of campus resources and systems of academic support.

Audience: Undergraduate

5. Write self-reflective assessments of academic processes and university experiences.

Audience: Undergraduate

6. Evaluate academic priorities and develop change strategies for academic success.

Audience: Undergraduate

### COUN PSY 105 – HUMAN RESOURCES DEVELOP: AWARENESS PROCESSES–CNLS&GUID PERSPECTIVE

1 credit.

Didactic and experiential learning and exploration to provide basic understanding of inter- and intrapersonal relations. Topics include values clarification, information acquisition, skill acquisition, human relations, self-understanding, self-development, and self-evaluation.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### COUN PSY 110 – HUMAN RESOURCES DEVELOPMENT: CAREER STRATEGIES

1 credit.

Exploration and vocational development through didactic and experiential learning. Career education concerns the place and value of work in the individual's life span and style--development and assessment of self, an understanding of the world of work, and facilitation of decision-making, planning, and preparation.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### COUN PSY 115 – HUMAN RESOURCES DEVELOPMENT: EDUCATIONAL EFFECTIVENESS

1 credit.

Exploration of personal, institutional, and community resources that optimize academic success and persistence. Utilizes didactic and experiential methods to develop higher level learning, skill, and understanding.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**COUN PSY/ASIAN/ED PSYCH/PSYCH 120 – THE ART AND SCIENCE OF HUMAN FLOURISHING**

3 credits.

Explore perspectives related to human flourishing from the sciences and humanities; investigate themes such as transformation, resilience, compassion, diversity, gratitude, community; expand self-awareness, enhanced social connectivity, and ability to change; formulate a sense of what it means to lead a flourishing life that sustains meaningful and fulfilling engagement with studies, relationships, community, and career.

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and describe the relevant concepts and theories on the nature and cultivation of human flourishing from multiple intellectual fields including psychology, neuroscience, anthropology, philosophy, and religious studies.

Audience: Undergraduate

2. Describe and engage with the many dimensions of flourishing, and the various extrinsic and intrinsic factors influencing them.

Audience: Undergraduate

3. Formulate an account of human flourishing.

Audience: Undergraduate

4. Employ contemplative practices in an inquiry that cultivates qualities of human flourishing from within.

Audience: Undergraduate

5. Integrate contemplative practice and knowledge of course materials in order to establish a foundation for flourishing in your life and the communities in which you live.

Audience: Undergraduate

**COUN PSY 125 – THE WISCONSIN EXPERIENCE SEMINAR**

1 credit.

Examine transition to UW-Madison through exploration of the research university and the Wisconsin Experience. A variety of texts, including a novel and textbook, will provide a context for discussion, writing, and experiential assignments.

**Requisites:** First year students or first year transfer students only**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Appraise the history, culture, and mission of UW-Madison and how those shared reference points may influence your Wisconsin Experience

Audience: Undergraduate

2. Engage with campus resources and opportunities to develop habits that support academic success and psychosocial well-being

Audience: Undergraduate

3. Analyze the multiple dimensions of social identity and how those dimensions impact your and others' experiences at UW-Madison

Audience: Undergraduate

4. Define and design goals to practice Relentless Curiosity, Purposeful Action, Humility and Empathy, and Intellectual Confidence throughout your college experiences

Audience: Undergraduate

5. Plan how you will connect with and contribute to the UW-Madison and greater Madison community during your undergraduate career

Audience: Undergraduate

**COUN PSY 200 – LGBTQ+ PEOPLE AND MENTAL HEALTH EQUITY**

3 credits.

Theories and research concerning the reasons for sexuality and gender mental health disparities; the significance of contemporary and historical debates over inequality; policies and practices to reduce inequality in health care for LGBTQ+ people.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Critically analyze and evaluate psychological research, policies, and practice in relation sexuality, gender, and inequality in the U.S.

Audience: Undergraduate

2. Analyze the role of health care systems in relation to broader LGBTQ+ inequalities and intersecting systems of oppression, with an understanding of history's impact on present institutional issues

Audience: Undergraduate

3. Connect course concepts and ideas to other courses and to current events, recognizing and questioning one's own assumptions and those of others in the process

Audience: Undergraduate

4. Draw from course concepts to critically reflect upon and analyze one's own personal educational experiences and academic trajectory

Audience: Undergraduate

5. Clearly communicate (in both oral and written form) key course concepts of LGBTQ+ mental health equity to lay audiences.

Audience: Undergraduate

**COUN PSY 225 – INTERSECTIONALITIES, SELF AWARENESS, AND SOCIAL ACTIONS FOR SOCIAL CHANGE**

3 credits.

An introduction to the intersectionality framework in the United States to enhance skills necessary for culturally responsive awareness and interactions, with specific emphasis on how to think critically about and hold multiple perspectives and how to prepare for service learning. In addition to learning how contexts and social histories matter to situate an understanding of experience, develop self-awareness and understanding of social location as well as learn how contextual factors shape identity, opportunities, and barriers for others. Relevant for all students of different identities, backgrounds, and experiences, who are interested in developing their awareness, knowledge and skills with multiculturalism and diversity.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define and understand intersectionality

Audience: Undergraduate

2. Engage and hold different perspectives

Audience: Undergraduate

3. Develop an understanding of how history, context, and group identities are linked

Audience: Undergraduate

4. Reflect on one's own cultural processes as they define one's identity and sense of self and examine one's own beliefs and attitudes

Audience: Undergraduate

5. Engage in critical dialogue with others about cultural issues, identities, and contemporary social issues within different social context

Audience: Undergraduate

6. Develop capacity to listen, ask questions, and explore differences of opinions and perspectives

Audience: Undergraduate

7. Explore the initial processes of how to resolve differences of opinions in a civil manner

Audience: Undergraduate

8. Explore the initial processes of repairing cultural misunderstandings or gaffes

Audience: Undergraduate

9. Engage in service learning with populations different from oneself

Audience: Undergraduate

**COUN PSY 230 – RACE AND THE DEVELOPING CHILD**

3 credits.

Children's psychological experience of racial, ethnic and cultural (REC) status, development of their understandings of REC, and implications of this development for discussing, dialoguing, and working with REC diversity with an emphasis on educational contexts.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply developmental frameworks to understand children's conceptions of social worlds with a focus on racial, ethnic, and cultural contexts

Audience: Undergraduate

2. Identify differences in socialization goals across ethnic and racial groups as well as differences across generational and cultural roots in child socialization

Audience: Undergraduate

3. Develop sensitivity to the nature and expressions of racial, ethnic, and cultural bias targeting children and youth

Audience: Undergraduate

4. Acquire knowledge about cultural assumptions and bias and how various racial, ethnic and cultural (REC) scripts are enacted, and how assumptions, bias, and scripts may be different from those of other REC groups

Audience: Undergraduate

5. Gain exposure to Chican@/Latin@ Studies by contextualizing learning with Latinx populations

Audience: Undergraduate

**COUN PSY 237 – MENTAL HEALTH, SELF-AWARENESS, AND SOCIAL JUSTICE: WORKING IN DIVERSE COMMUNITIES**

3 credits.

Designed to increase knowledge, awareness, and skills of students interested in working on mental health matters within diverse identity groups and communities. Conceptualize mental health and well-being across communities in terms of (a) intersectional identities (individual and groups), (b) mental health and access and utilization of services, and (c) social determinants of health in different contexts and settings. Engage in reflective exercises to understand how their social identities influence their work in different types of communities.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Examine the complex intersections of well-being, mental health, and various social locations (e.g., race, class, gender, sexual orientation, socioeconomic status, religion, spirituality, (dis)ability, generation, language, nationality)

Audience: Undergraduate

2. Engage in reflective processes to develop awareness of self and other within the context of theory, research, and best practices for and within communities (broadly defined) and in relation to various social locations

Audience: Undergraduate

3. Examine the ways in which systems of the personal, psychological, social, cultural, contextual, and institutional influence well-being and mental health across communities

Audience: Undergraduate

4. Examine western concepts of mental health through the lens of other cultures and cultural nosologies and develop a critical cultural understanding of western concepts

Audience: Undergraduate

5. Examine culturally-specific expressions of distress

Audience: Undergraduate

6. Engage in reflective exercises to understand how student's social locations may influence their work across different communities given their own sociocultural positionality

Audience: Undergraduate

7. Examine U.S. mental health equity and disparities across communities and contexts

Audience: Undergraduate

8. Examine ethical considerations in mental health practices across communities

Audience: Undergraduate

**COUN PSY 300 – SPECIAL TOPICS: COUNSELING AND COUNSELING PSYCHOLOGY**

1-4 credits.

Examines various special topics in Counseling and Counseling Psychology. Students need to submit an application and have sophomore standing in order to be considered for this class.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COUN PSY 325 – SEMINAR: STUDENTS SEEKING EDUCATIONAL EQUITY AND DIVERSITY (SEED)**

3-4 credits.

Use personal experiences, readings, and discussions as frameworks for interrogating social, cultural, and political inequities. Engage in dialogues and experiential activities about social differences to promote critical consciousness and intercultural competence across disciplines.

**Requisites:** Sophomore standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Participate in the process of co-creating a dialogue-based learning community

Audience: Undergraduate

2. Reflect on and engage with complexities of socialization and social group membership, especially as they relate to the UW campus and Madison community

Audience: Undergraduate

3. Examine how differential power manifests at individual, institutional, and systemic levels

Audience: Undergraduate

4. Practice critical dialogue and community-building skills across difference

Audience: Undergraduate

5. Apply knowledge, experiences, and skills gain through the course in current and future academic and/or work environments

Audience: Undergraduate

**COUN PSY/CHICLA 331 – IMMIGRANT HEALTH AND WELLBEING**

3 credits.

Develop an understanding of immigrant health in the United States from the perspective of social and structural determinants. Applies concepts to a comprehensive framework for the development of health. Describes health assets and risks for specific vulnerable immigrant groups, such as women, children, and undocumented individuals and mixed immigration status families. Provides guidelines for improving immigrant access to quality health care, including language services, provider competence, policy and organizational supports, and community-based collaboration, advocacy, and research.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate knowledge of nature of health and well-being as well as concomitant risks for immigrant populations

Audience: Undergraduate

2. Examine the nature of social determinants and the pathways by which they influence health and well-being among immigrant populations

Audience: Undergraduate

3. Synthesize academic and public health data to provide an informed summary of health status of immigrants across domains of mental and physical health and disorders

Audience: Undergraduate

4. Survey personal, interpersonal, familial, and community contributors to health, well-being, resilience, healing/recovery, and disability across sociological contexts of immigrants

Audience: Undergraduate

5. Analyze public policy and health initiatives that address the health concerns specific to immigrant populations

Audience: Undergraduate

6. Identify skills, experiences, training, qualifications, and personal/ethical/professional standards involved in careers supporting health and well-being of immigrant populations

Audience: Undergraduate

**COUN PSY 332 – GENDER AND QUEER ISSUES IN PSYCHOLOGY**

3 credits.

Explore history, theory, and research related to the psychology of gender and sexuality. A feminist approach is used to deconstruct gender and sexuality within the field of psychology and other mental health fields. Discussions include challenging the current system of psychology, while also integrating concepts to work within the system. An applied approach is used to encourage participation in activities to integrate activism and knowledge into professional identity, bringing in experiences from field placements, internship, and/or places of employment.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Integrate an understanding of definitions, terms, and labels related to gender and/or queer identities.

Audience: Undergraduate

2. Increase knowledge about mental health concerns and psychological treatments for trans, lesbian, gay, bisexual, pansexual, queer, polyamorous, and questioning individuals.

Audience: Undergraduate

3. Understand the theoretical underpinnings of queer and gender psychological theories.

Audience: Undergraduate

4. Increase awareness and knowledge of the diversity within LGBTQ populations.

Audience: Undergraduate

5. Integrate cross-cultural considerations with LGBTQ populations.

Audience: Undergraduate

**COUN PSY 333 – ASIAN AMERICAN PSYCHOLOGY**

3 credits.

Examines the personality and mental health issues of Asian Americans. Special emphasis is given to how minority group status, adaptation processes, and bicultural development influence various aspects of psychological functioning. Specific topics include stereotypes and racism, acculturation and enculturation, cultural values/behavioral norms, family roles, ethnic identity development, communication styles, gender and interracial relationships, academic and career achievement, stressors and social support systems within Asian communities, psychopathology, and culturally competent mental health treatment and service delivery.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2022

**Learning Outcomes:** 1. Demonstrate knowledge of one or more methodologies pertaining to Asian American psychological research.

Audience: Both Grad & Undergrad

2. Demonstrate knowledge of one or more theoretical approaches as it pertains to Asian American psychological research.

Audience: Both Grad & Undergrad

3. Synthesize and apply social science concepts.

Audience: Both Grad & Undergrad

4. Demonstrate knowledge of understanding of issues related to Asian American psychology from multiple perspectives.

Audience: Both Grad & Undergrad

5. Articulate how the past has affected present day circumstances regarding race and racial inequalities in the U.S.

Audience: Both Grad & Undergrad

6. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity.

Audience: Both Grad & Undergrad

7. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others.

Audience: Both Grad & Undergrad

8. Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society.

Audience: Both Grad & Undergrad

9. Demonstrate advanced application of new skills and information to significant issues related to Asian American psychology.

Audience: Graduate

10. Demonstrate an ability to pose questions, facilitate discussions, critically think about Asian American psychology as a past, present, and future construct.

Audience: Graduate

**COUN PSY 334 – BLACK PSYCHOLOGY**

3 credits.

A critical analysis of the experiences of Black people through the lens of psychology and the role of advocacy rooted in the establishment of the field of Black psychology. Explore a broad range of topics relating to Black people experiences in the United States including the history of Black Psychology, Black identity development, intersectionality theory, gender, as well as Black advocacy. Special emphasis will be given to acknowledging the sociohistorical and political contexts of Black people in the diaspora and how time and space impacts how psychologists study the well-being and psychological outcomes of Black people, understanding positionality, and envisioning the future of Black psychology.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze ideas, arguments, and points of view related to the sociohistorical and political contexts of the field Black Psychology

Audience: Undergraduate

2. Identify various theories and tensions in the psychological study of Black people within the US and the larger Black diaspora

Audience: Undergraduate

3. Articulate how the experiences of multiple dimensions of oppression influence various psychological processes, including identity development, well-being, and health outcomes

Audience: Undergraduate

4. Demonstrate self-awareness of positionality in engaging with Black psychology research

Audience: Undergraduate

5. Examine the knowledge production in Black Psychology by understanding how lived experiences of researchers and activists impact their positions on the study of Black People

Audience: Undergraduate

6. Critically engage with the advocacy inherent in the field of Black Psychology development and ongoing throughout study Black folk in psychology

Audience: Undergraduate

**COUN PSY 335 – BODY IMAGE AND EATING DISORDERS IN THE HELPING PROFESSIONS**

3 credits.

Frameworks, concepts, and practical approaches to support individuals of all body sizes, with a particular focus on those grappling with eating disorders and body image concerns. Critical topics such as the pervasive issue of weight bias; the complex relationship between identity, culture, and body image; the limitations and strengths of the medical model in treating eating disorders; the principles of Health at Every Size (HAES) and intuitive eating (IE); and the powerful role of advocacy and activism in challenging societal norms on small and large scales.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define anti-fat bias, fatphobia, and healthism.

Audience: Both Grad & Undergrad

2. Identify key areas in which oppression against fat people permeates contexts across society.

Audience: Both Grad & Undergrad

3. Compare norms and experiences around food and body across cultural contexts and identities.

Audience: Both Grad & Undergrad

4. Recognize the racist roots of fatphobia.

Audience: Both Grad & Undergrad

5. Describe how intersectionality and one's positionality are relevant in the fight for fat liberation.

Audience: Both Grad & Undergrad

6. Summarize the principles of the Health at Every Size (HAES) movement and Intuitive Eating (IE).

Audience: Both Grad & Undergrad

7. Summarize the eating disorders listed with the DSM 5-TR and critique the criteria for these disorders based on the information in other course readings and lived experience.

Audience: Both Grad & Undergrad

8. Compare and contrast medical and HAES/IE frameworks for conceptualizing and treating concerns related to body image and disordered eating.

Audience: Both Grad & Undergrad

9. Assess the connection between fatphobia, anti-fat bias and the perpetuation of body image concerns and disordered eating. Identify the institutions within society that profit from this relationship.

Audience: Both Grad & Undergrad

10. Develop a project at UW Madison to advocate on behalf of people struggling with challenges related to food security, disordered eating, body image, or anti-fat bias.

Audience: Both Grad & Undergrad

11. Integrate course materials and concepts with current academic emphasis and scholarship.

Audience: Graduate

**COUN PSY 371 – PSYCHOLOGY OF SUICIDE**

3 credits.

Provides a theoretical and research framework for understanding suicide, to develop understanding of the experiences of those who are suicidal, and to introduce prevention, assessment, and treatment approaches.

Topics will include common myths related to suicide, and research challenging those myths; suicide assessment, intervention, and prevention strategies; suicide bereavement; ethical and legal issues related to suicide; and the experiences of populations disproportionately affected by suicide.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply and integrate knowledge from the course, including theory and research, to explain why people attempt and die from suicide

Audience: Undergraduate

2. Use current, precise, and respectful suicide-related terminology

Audience: Undergraduate

3. Analyze a scenario to recognize individuals at risk for suicide, and know how to respond appropriately and respectfully

Audience: Undergraduate

4. Identify populations disproportionately affected by suicide, and describe some contributing factors

Audience: Undergraduate

5. Describe evidence-based suicide prevention and treatment approaches

Audience: Undergraduate

6. Evaluate the impact of suicide at the individual/familial, societal, and global levels

Audience: Undergraduate

7. Evaluate some of the ethical and legal issues related to suicide and suicide prevention

Audience: Undergraduate

8. Critically evaluate and discuss major issues and controversies within the field, and identify gaps in research

Audience: Undergraduate

**COUN PSY 372 – PSYCHOLOGY OF MINDFULNESS**

3 credits.

An academic and experiential introduction to mindfulness meditation framed within the perspective of psychology is provided. Scientific research and modern meditation instructions that have formed the basis of a variety of secular mindfulness-based interventions are reviewed.

Readings will adopt a variety of perspectives and methodologies, including conceptual/theoretical work, clinical trials, review articles including meta-analyses (i.e., aggregating findings across studies), and measurement-oriented studies. Key topics include: Buddhist and historical underpinnings of secular mindfulness-based stress reduction (MBSR) and similar interventions (e.g., lovingkindness and compassion-based meditation), and empirical literature pertaining to neuroscientific and clinical effects of mindfulness training and related interventions.

**Requisites:** PSYCH 202, KINES 150, RP & SE 505, COUN PSY 237 or 531

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Gain an experiential understanding of mindfulness and its psychological underpinnings

Audience: Undergraduate

2. Become familiar with interventions that have been developed based on mindfulness

Audience: Undergraduate

3. Gain familiarity with the scientific literature pertaining to these interventions

Audience: Undergraduate

**COUN PSY 500 – RADICAL HEALING AND ETHICS OF BILINGUAL LATINX TRAINING**

1 credit.

Provide the philosophical foundations and ethical considerations for delivering culturally- and linguistically-appropriate mental health support to multilingual Latinx communities. Build a foundational knowledge of liberatory philosophy, community-engaged work that promotes radical healing, review the ethical codes relevant to their field of study, and discuss how professional values and ethical mandates relate to Latinx cultural values and multilingual psychological service delivery.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Acquire knowledge of liberation psychology, decolonization frameworks, radical healing, and strengths-based approaches to working with Latinx populations

Audience: Graduate

2. Understand the historical and current sociopolitical context that influences psychologically-based bilingual (Spanish/English) service provision to Latinxs as a broad, heterogeneous cultural and ethnic group

Audience: Graduate

3. Learn about the effects of colonization, migration, racism, and racial trauma in facilitating healing with multilingual Latinx populations

Audience: Graduate

4. Examine the ethical standards of helping professions and understand how they relate to broader Latinx values, belief systems and cultural practices

Audience: Graduate

5. Develop cultural humility and self-reflection on student's role in intervening with Latinxs

Audience: Graduate

**COUN PSY/CHICLA 525 – DIMENSIONS OF LATIN@ MENTAL HEALTH SERVICES**

3 credits.

Provides training for students who aspire to one of the helping, health, or mental health professions and who currently work or who envision themselves working with Latin@ populations. Provides important frameworks for working with Latin@s, including cultural, spiritual, linguistic and historical features relevant to this population and begin to apply their knowledge in service learning placements.

**Requisites:** Junior standing or 6 credits of CHICLA

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Acquire knowledge of the social, cultural, linguistic, spiritual, ethnic, and racial diversity within Latinx communities

Audience: Undergraduate

2. Develop sensitivity to the forms of bias and discrimination that have historically and continue to impact Latinx communities

Audience: Undergraduate

3. Increase awareness of the strengths and barriers in social services for the Latinxs communities

Audience: Undergraduate

4. Increase skills to address social justice, advocacy, and cultural responsiveness in the context of Latinx communities

Audience: Undergraduate

5. Reflect on students' own social identities and the implications of those identities and identity intersections when serving in Latinx communities

Audience: Undergraduate

### **COUN PSY 531 – PREVENTION AND INTERVENTION IN MENTAL HEALTH ACROSS THE LIFESPAN**

3 credits.

Introduction to mental health concerns and wellbeing, protective and risk factors, and the design and outcomes of evidence-based intervention and prevention programs to promote behavioral and emotional wellbeing across the lifespan. Focus on individual, family, and community health, with particular attention to socioeconomic, cultural, social, and structural mechanisms. Provides an overview of mental health outcomes and prevention programs or interventions aimed to prevent or ameliorate mental illness and distress, and promote positive mental health across the lifespan, including description of issues related to the design, implementation, and evaluation of prevention and intervention programs.

**Requisites:** KINES 150

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe behavioral, emotional, and drug use problems, as well as psychological resilience and well-being.

Audience: Undergraduate

2. Explain underlying mental health mechanisms and influences.

Audience: Undergraduate

3. Discuss how prevention and intervention programs are classified and conceptualized.

Audience: Undergraduate

4. Use a human development framework to examine outcomes and types of prevention and intervention programs.

Audience: Undergraduate

5. Evaluate the design and implementation of prevention and intervention programs.

Audience: Undergraduate

6. Consider dissemination, policy, advocacy, and collaboration through an interdisciplinary and social justice prevention framework.

Audience: Undergraduate

### **COUN PSY 550 – STRENGTHENING LATINXS**

3 credits.

Develop proficiency in conducting basic psychotherapeutic helping skills in Spanish through role-plays and specialized training that integrates Latinx psychological theories into practical clinical interventions. Demonstrate advanced Spanish proficiency on ACTFL Proficiency Placement Exam

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Discuss characteristics and behaviors that influence helping processes with Latinxs, including individual, cultural, social, political and historical factors

Audience: Graduate

2. Learn basic attentional and interviewing skills in Spanish such as asking questions, paraphrasing, reflecting content and feeling, summarizing, and clarifying

Audience: Graduate

3. Understand how to adapt interviewing abilities to individual differences and incorporate Latinx-centered values and practices

Audience: Graduate

4. Learn how to gather clinical information and complete an initial diagnostic interview in Spanish

Audience: Graduate

5. Understand how to effectively use supervision and consultation in Spanish

Audience: Graduate

6. Develop self-awareness and self-assessment of one's role in psychological service provision with Spanish-speaking Latinxs

Audience: Graduate

**COUN PSY 575 – LATINX FOUNDATIONAL PRACTICUM: CASE  
CONCEPTUALIZATION**

1 credit.

Examine the mental health treatment and practice implications of working with Spanish-speaking Latinxs through a culturally affirming, linguistically appropriate, and strengths-based approach. Evaluate different counseling strategies and develop skills to understand and assess Latinx mental health to appropriately guide treatment. Foster reflexivity and examine one's own sociopolitical positionality and influence on the process of psychotherapy with Latinxs.

**Requisites:** COUN PSY/CHICLA 525 and COUN PSY 550

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop culturally affirming and linguistically appropriate case conceptualization skills with Spanish-speaking Latinxs.  
Audience: Graduate

2. Demonstrate skills to solicit information to inform culturally congruent and strengths-based understanding of Latinx clients' presenting concerns.

Audience: Graduate

3. Evaluate your theoretical approach to counseling and culturally tailor to increase psychotherapeutic effectiveness with Latinxs.

Audience: Graduate

4. Engage in group supervision that facilitates critical self-reflection of your role in counseling Latinxs and provides feedback to peers.

Audience: Graduate

5. Demonstrate understanding of your implicit cultural assumptions and how those influence your case conceptualization, interactions with clients and colleagues, and understanding of the therapeutic process.

Audience: Graduate

**COUN PSY 580 – LATINX ADVANCED PRACTICUM: TREATMENT  
PLANNING & INTERVENTIONS**

1 credit.

Examine the mental health treatment and practice implications of working with Spanish-speaking Latinxs through a culturally affirming, linguistically appropriate, and strengths-based approach. Evaluate different counseling strategies and develop skills to understand and assess Latinx mental health to appropriately guide treatment. Foster reflexivity and examine one's own sociopolitical positionality and influence on the process of psychotherapy with Latinxs.

**Requisites:** COUN PSY 575

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop skills to solicit information to inform culturally congruent and strengths-based treatment goals and counseling strategies with Latinxs.  
Audience: Graduate

2. Demonstrate culturally affirming and linguistically appropriate case conceptualization skills and treatment interventions with Spanish-speaking Latinxs.

Audience: Graduate

3. Facilitate critical self-reflection of your role in counseling Latinxs and provide feedback to peers.

Audience: Graduate

4. Demonstrate an advanced understanding of your implicit cultural assumptions and how those influence your case conceptualization, treatment interventions, interactions with clients and colleagues, and overall understanding of the therapeutic process.

Audience: Graduate

### **COUN PSY/CHICLA 590 – ESPERANZA COMMUNITY-ENGAGED RESEARCH WITH LATINES**

3 credits.

Introduction to the development and implementation of community-engaged research and programming for Latine populations with "Esperanza," an innovative university-community partnership with Centro Hispano of Dane County. Community-engaged research draws on interdisciplinary research and practice across education, psychology and public health that seeks to disrupt, mitigate, and eliminate mental health disparities among local Latine populations. Learn the principles of community-engaged research and apply them through the development of mutually beneficial, reciprocal, effective, equitable, and justice-oriented community-university projects.

**Requisites:** CHICLA/COUN PSY 525 or graduate/professional standing  
**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Learning Outcomes:** 1. Identify guiding principles of community-engaged research with Latines based on the social, cultural, linguistic, and historical influences on this population.

Audience: Both Grad & Undergrad

2. Develop equitable, effective, and culturally informed collaborations with Latine-serving community partners.

Audience: Both Grad & Undergrad

3. Apply principles of community-engaged scholarship to develop and implement projects that promote health equity and justice through a strengths-based approach for local Latine communities.

Audience: Both Grad & Undergrad

4. Relate the content and course skills to an interdisciplinary health profession role of scientist-practitioner-advocates to promote effective research with culturally diverse populations.

Audience: Both Grad & Undergrad

5. Integrate trauma-informed scholarly peer-reviewed publication with healing-centered Latine and indigenous epistemologies

Audience: Graduate

### **COUN PSY 601 – BEST PRACTICES IN COMMUNITY-ENGAGED SCHOLARSHIP**

2 credits.

Community-engaged scholarship (CES) captures a broad understanding of the possibilities to learn, teach, and do research through academic-community collaboration. CES encompasses the interaction known as "service-learning" or "community-based learning" (CBL) as well as complex models of academic-community engagement known as "community-based research" or "participatory action research." Staff members from the Morgridge Center for Public Service (MCPS) will introduce the concepts and models of CES, discuss the importance of building and maintaining community relationships, identify challenges and solutions in implementing CES, and assist you in creating your own course, project, or proposal.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand and evaluate different models of community-engaged teaching and research

Audience: Graduate

2. Apply theoretical models of community-engaged scholarship in practice

Audience: Graduate

3. Develop or continue mutually beneficial, reciprocal relationships with community partners

Audience: Graduate

4. Understand how to evaluate community-based teaching and research

Audience: Graduate

5. Develop awareness of resources available to you related to community-engaged scholarship at UW-Madison

Audience: Graduate

6. Create actionable ways to integrate community-engaged scholarship into your research, teaching, and/or service portfolio as a graduate student and beyond

Audience: Graduate

### **COUN PSY 620 – SPECIAL TOPICS IN COUNSELING AND GUIDANCE**

1-6 credits.

Instruction and/or practice in specialized counseling approaches, strategies, and techniques; working with various populations of clients served by counselors.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**COUN PSY 650 – THEORY AND PRACTICE IN INTERVIEWING**

3 credits.

Theoretical bases for conducting interviews; types of interviewing; introduction to counseling and interviewing techniques. Limited opportunity to practice.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2019

**Learning Outcomes:** 1. Increase awareness of one's self as a cultural being in order to understand and engage in effective communication  
Audience: Undergraduate

2. Gain familiarity with research and theory on communication  
Audience: Undergraduate

3. Become familiar with your own communication style and how it applies in different types of interviews  
Audience: Undergraduate

4. Practice basic communication skills of active listening, effective questioning, empathy, and letting others know you understand their point of view  
Audience: Undergraduate

5. Conduct video-recorded practice interviews and evaluate your performance  
Audience: Undergraduate

6. Develop understanding of the goals and techniques utilized in different types of interviews  
Audience: Undergraduate

**COUN PSY 655 – CLINICAL COMMUNICATION SKILLS**

3 credits.

Designed to help students develop an understanding of the clinical communication process, introduce applications of this process in a variety of contexts, and practice and develop clinical communication skills. Gain familiarity with research and theory on communication in a variety of clinical settings. Provides didactic and experiential training in developing basic competencies in clinical communication and listening skills, including personal and cultural characteristics that impact the communication process.

**Requisites:** Not open to students with credit for COUN PSY 650

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate familiarity with research and theory on communication in a variety of clinical settings.  
Audience: Undergraduate

2. Engage in critical self-reflection and gain an increased awareness of how your personal style and cultural characteristics influence your interpersonal and communication interactions.  
Audience: Undergraduate

3. Demonstrate basic communication skills of active listening, effective questioning, reflective listening, and empathy.  
Audience: Undergraduate

4. Demonstrate comfort and competence in dealing with client emotion.  
Audience: Undergraduate

5. Conduct video-recorded practice interviews and evaluate your performance in demonstrating intentional use of a repertoire of communication skills.  
Audience: Undergraduate

6. Demonstrate the ability to give and receive feedback.  
Audience: Undergraduate

7. Increase ability to successfully develop and manage professional relationships with clients/patients, colleagues, and others.  
Audience: Undergraduate

### **COUN PSY 665 – CAREER DEVELOPMENT THROUGHOUT THE LIFE SPAN**

3 credits.

We are all engaged with, and affected by, the world of work. Career development is a lifelong process that includes tasks and decision-making related to: selecting our dream job at age five, planning our major in college, transitioning to a new field, working as career counselors, and planning for retirement. Surveys foundational and emerging career development theories and interventions. A key component includes exploration of how knowledge from career development scholarship can be applied to students' own lives within a changing socioeconomic context. Requires reflection on personal development (e.g., personalities, identities, life experiences, cultures, interests, skills, needs, and values) and apply this self-knowledge to engage career exploration and planning.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Gain an understanding of your personality, interests, skills, values, and how these relate to occupational options and career development

Audience: Undergraduate

2. Apply career development theory by taking career assessments and gathering occupational information through available resources and informational interviewing

Audience: Undergraduate

3. Become familiar with key career development theories and constructs that assist us in understanding the development, role, and meaning of work in people's lives across the lifespan

Audience: Undergraduate

4. Become oriented to the socioeconomic world of work as it impacts individual and family career systems

Audience: Undergraduate

5. Demonstrate skill in recognizing, understanding, and articulating cultural and contextual factors that shape career development and impact career interventions

Audience: Undergraduate

6. Develop a base knowledge of career-related intervention models and strategies

Audience: Undergraduate

7. Develop lifelong skills associated with career decision making and career management

Audience: Undergraduate

### **COUN PSY 699 – INDEPENDENT READING**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **COUN PSY 700 – PRACTICUM ACTIVITIES**

1 credit.

The foundation structure for first-year Master's students to complete their required 40 hours of practicum. Develop the conceptual and administrative skills to complete practicum hours in collaboration with Counseling Psychology courses and their specific activities. Focuses on gaining the requisite developmental skills to prepare for and practice individual counseling-like interviews with student volunteers.

**Requisites:** Declared in Counseling

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement basic attending skills in individual interviews.

Audience: Graduate

2. Gain fundamental information about psychosociocultural and contextual narratives.

Audience: Graduate

3. Understand perspective-taking and consciousness specific to diversity and intersectionality.

Audience: Graduate

4. Demonstrate administrative skill with tracking clinical hours and negotiating organizational structure of interviews.

Audience: Graduate

5. Gain personal insight about one's clinical interviewing skills and areas for developmental growth.

Audience: Graduate

### **COUN PSY/CURRIC/ED POL/ED PSYCH/ELPA/RP & SE 719 – INTRODUCTION TO QUALITATIVE RESEARCH**

3 credits.

Provides an overview of qualitative inquiry, examining assumptions, standards, and methods for generating and communicating interpretations. Methodological and theoretical works illustrate case study, ethnography, narrative, and action research. Does not include a field method component.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COUN PSY/ED PSYCH 723 – DEVELOPMENTAL PROCESSES ACROSS THE LIFE SPAN**

3 credits.

Life-span perspective on studying individual development from conception to death. Emphasis on multidisciplinary, multidirectional, and contextual approaches to physical, psychological, social, and intellectual developmental processes.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**COUN PSY/ED PSYCH/HDFS 726 – ETHNIC AND RACIAL DIVERSITY IN SOCIAL DEVELOPMENT**

3 credits.

Review of empirical and theoretical research on ethnic/racial diversity in social development across childhood, adolescence and early adulthood with emphasis on implications for counseling and school psychology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**COUN PSY/PSYCH/RP & SE 729 – ADVANCED SOCIAL PSYCHOLOGY**

3 credits.

Intensive examination of theoretical conceptions in contemporary social psychology, including learning-theoretic, reinforcement, incentive, cognitive, and psychodynamic approaches, and research in selected topic areas reflecting these approaches, such as aggression, attitude formation and change, conformity, limitation and modeling, interpersonal attraction, perception of others, prosocial behavior, and social influence.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**COUN PSY/RP & SE 730 – PROFESSIONAL COUNSELING ORIENTATION**

3 credits.

Provides a broad understanding of professional counselor roles and functions. Also provides a broad understanding of the ethical and legal standards for professional counselors. Gain familiarity with the ACA Code of Ethics, as well as with credentialing standards and organizations relevant to the practice of mental health counseling.

**Requisites:** Declared in a Rehabilitation Psychology or Counseling Psychology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**COUN PSY/ED PSYCH/RP & SE 736 – SEMINAR IN PSYCHOLOGY OF INDIVIDUAL DIFFERENCES**

3 credits.

Seminar in the psychology of individual differences, providing broad and general coverage of theory and research related to individual and cultural differences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**COUN PSY/ED PSYCH/RP & SE 737 – SEMINAR IN HISTORY AND SYSTEMS OF PSYCHOLOGY**

3 credits.

Seminar in the history of psychology, providing broad and general coverage of the development of psychology as a scientific discipline. Includes coverage of philosophy of science and systems of psychological inquiry, with applications to current research in psychology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**COUN PSY 740 – ABNORMAL BEHAVIOR AND PSYCHOPATHOLOGY**

3 credits.

Covers the research and theory of abnormal psychology, including etiology, manifestation, and diagnosis of mental health disorders. Emphasizes research on developmental psychopathology and cultural issues in assessment and diagnosis.

**Requisites:** Declared in Counseling, Counseling Psychology, Rehabilitation Counseling, or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize signs and symptoms of common forms of psychopathology

Audience: Graduate

2. Formulate a diagnostic conceptualization integrating individual level as well as contextual/cultural/systemic variables

Audience: Graduate

3. Utilize existing resources (DSM-5, scientific literature, assessment) to verify and fully articulate a formal diagnosis, including consideration of differential diagnoses

Audience: Graduate

4. Formulate potential treatment approaches

Audience: Graduate

**COUN PSY 745 – CLINICAL MENTAL HEALTH COUNSELING:  
DIAGNOSIS AND TREATMENT PLANNING FOR COUNSELORS**

3 credits.

Examine the treatment and practice implications of different mental health diagnoses and adjustment disorders. Reviews advanced principles of mental health diagnoses based on DSM 5 and ICD 10 nomenclatures and contextualizes this review for the practice of counseling applied and adapted for a diversity of clients and communities. Additionally, counseling strategies are reviewed for challenges with adjustment within various sociocultural contexts. Review empirically supported interventions for specific disorders as well as common factors that have been empirically supported as efficacious across disorders. Includes an examination of the cultural foundation of the counseling profession's and clients' explanatory models for (a) psychological and mental health distress as well as (b) healing and treatment strategies.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct intake assessments that gather comprehensive biopsychosocial data and mental health history  
Audience: Graduate

2. Formulate clinical diagnoses with clients on internship within diverse sociocultural contexts and across a broad range of mental health disorders and distress  
Audience: Graduate

3. Develop understanding of the sociocultural foundation and diversity associated with the explanatory models used to infer etiological assumptions and treatment implications for clients' mental health distress and healing strategies  
Audience: Graduate

4. Demonstrate familiarity with empirically supported interventions associated with specific mental health disorders as well as the empirical support for the common factors approach to counseling interventions  
Audience: Graduate

5. Demonstrate skill in soliciting information to inform treatment goals and strategies and in collaborating with clients to formulate treatment plans  
Audience: Graduate

6. Demonstrate case management skills, as well as skills to monitor and evaluate client progress, goal attainment, and outcomes in counseling interventions and how to use client feedback to adapt treatment and intervention strategies  
Audience: Graduate

**COUN PSY 755 – SEMINAR ON META-ANALYSIS**

3 credits.

Focus on meta-analysis, a set of techniques for synthesizing the results of multiple studies addressing the same research question. Conduct a "mini" meta-analysis in an area of interest.

**Requisites:** ED PSYCH 761

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Conduct rigorous literature search for quantitative review using research databases  
Audience: Graduate

2. Calculate and interpret effect sizes and statistical tests within quantitative reviews  
Audience: Graduate

3. Identify best practices for conducting quantitative reviews from established guidelines  
Audience: Graduate

4. Code study characteristics and conduct moderator analyses  
Audience: Graduate

5. Interpret and present results of quantitative review  
Audience: Graduate

**COUN PSY 777 – CRISIS AND TRAUMA COUNSELING**

3 credits.

Counseling approaches that effectively address crises and trauma, exploring the impact of trauma and crisis and potential neurobiological responses, the development of skills and techniques for assessment and intervention in specific crisis or trauma situations including suicide assessment and intervention.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Show competency in how to manage crisis response and trauma as a mental health professional  
Audience: Graduate

2. Articulate empirical and theoretical support for individual and systems-level interventions in crisis and trauma situations  
Audience: Graduate

3. Develop an understanding about the disproportionate impact of crises and trauma on marginalized communities and identify appropriate, culturally relevant interventions  
Audience: Graduate

4. Explore the basis for self-care as an ethical and professional standard and develop a personal understanding of self-care through practice  
Audience: Graduate

**COUN PSY/CURRIC/ED POL/ED PSYCH/ELPA/RP & SE 788  
– QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD  
METHODS I**

3 credits.

Introductory field methods experience in qualitative research. Learn to define good research questions, determine which methods of data collection and analysis are useful for addressing those questions, engage in these methods, reflect on their utility in education research.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 719

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**COUN PSY/CURRIC/ED POL/ED PSYCH/ELPA/RP & SE 789  
– QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD  
METHODS II**

3 credits.

Focus on data analysis and translation of finds and implications. Gain theoretical and practical knowledge and skills regarding coding and analysis techniques, use of qualitative analytic tools, strategies for sharing findings with audiences beyond research team.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 788

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**COUN PSY 791 – FOUNDATIONS OF CLINICAL MENTAL HEALTH  
COUNSELING**

3 credits.

History development of profession; professional ethics; credentialing; major theories models; roles; and principles including prevention, intervention, consultation, education, advocacy, systems promoting mental health and well-being.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Become familiar with the history of the counseling profession  
Audience: Graduate

2. Develop understanding of the roles, functions, preparation standards, credentialing, licensure, and professional identity of clinical mental health counselors  
Audience: Graduate

3. Increase understanding of legal and ethical considerations related to the practice of clinical mental health counseling  
Audience: Graduate

4. Become familiar with different global and local settings and contexts of mental health counseling  
Audience: Graduate

5. Explore advocacy processes on behalf of the profession and clients experiencing inequities in mental health  
Audience: Graduate

6. Develop professional presentation skills  
Audience: Graduate

**COUN PSY 800 – THEORIES OF COUNSELING**

3 credits.

Historical and philosophical foundations of counseling. Examination of individual counseling theories, research, roles and practices within the counseling profession.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate an understanding of the history and the major theoretical foundations of the counseling profession

Audience: Graduate

2. Assess theories of counseling regarding their current viability and applicability to various work settings

Audience: Graduate

3. Articulate an awareness of the influence of clients' and counselors' beliefs, attitudes, and biases on the counseling process

Audience: Graduate

4. Demonstrate an understanding of basic counseling skills and their relationship to different theoretical approaches

Audience: Graduate

5. Demonstrate an understanding of ethical issues that should be considered while using each of the theoretical approaches

Audience: Graduate

6. Articulate an understanding of multicultural issues that are embedded in the use of each theoretical approach and demonstrate how these issues might be adequately addressed

Audience: Graduate

7. Articulate your emerging theoretical orientation and worldview and demonstrate a recognition that it is in development as part of an ongoing process

Audience: Graduate

8. Demonstrate self-evaluation skills, writing skills, presentation skills, and critical thinking skills

Audience: Graduate

9. Demonstrate theoretically-based counseling skills, knowledge, and strategies to practiced counseling situations

Audience: Graduate

**COUN PSY 802 – GROUP DYNAMICS PROCESSING AND COUNSELING**

3 credits.

Reviews practice, theory, and research on group development, dynamics, and group counseling theories; group leadership styles; basic and advanced group counseling methods and skills; and other group approaches.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify therapeutic factors in group interventions, including what groups offer that individual meetings cannot

Audience: Graduate

2. Demonstrate familiarity with a "process" model of group intervention that can be adapted to a variety of problems and settings

Audience: Graduate

3. Articulate an awareness of the influence of clients' and counselors' beliefs, attitudes, cultural assumptions and biases on the group process

Audience: Graduate

4. Describe how the special features of group work can be useful in treating a target problem or population of your choice

Audience: Graduate

5. Demonstrate skills in observing group process and in relating your observations to a) theories of group dynamics and group development and b) therapeutic goals

Audience: Graduate

6. Engage in a process of self-reflection and self-awareness of one's interpersonal style, particularly as it relates to the role(s) one takes within groups of all kinds

Audience: Graduate

7. Identify critical incidents in group and describe effective facilitator responses

Audience: Graduate

8. Demonstrate knowledge of professional ethics and issues involved in group work and in work with systems (e.g., agencies, organizations, etc.) and how these issues may impact your current and future practice

Audience: Graduate

**COUN PSY 805 – HELPING RELATIONSHIPS AND TECHNIQUES**

3 credits.

Understanding and development of basic and advanced helping, interviewing, and counseling skills; consultation theory and application; development of counselor and client self understanding; facilitation of client or consultee change.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Illustrate an understanding of CACREP 2009 Standards in preparation for practice within counseling  
Audience: Graduate

2. Recognize oneself as a means to understanding others through activities aimed at increasing self and cultural awareness  
Audience: Graduate

3. Identify core knowledge about counseling and use self as a tool within the counseling and supervisory interactions  
Audience: Graduate

4. Develop a range of skills to engage intentionally and effectively within the counseling and supervisory relationships  
Audience: Graduate

**COUN PSY 806 – SUPERVISED PRACTICUM IN COUNSELING**

3 credits.

Introduction to psychotherapy. See volunteer clients and receive individual and group supervision related to their work with volunteer clients. Receive specialized training in case conceptualization and integrating theory into the specific interventions they are using with their volunteer clients.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop intentional and culturally-appropriate counseling skills and processes  
Audience: Graduate

2. Demonstrate professional and ethical demeanor and comportment as a counselor-in-training  
Audience: Graduate

3. Engage in individual and group supervision  
Audience: Graduate

**COUN PSY 808 – SUPERVISED INTERNSHIP IN COUNSELING**

2-5 credits.

Supervision of Master's internship counseling experience.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage in the process of critical self-reflection, feedback, and understanding of how the personal impacts the professional

Audience: Graduate

2. Demonstrate understanding of your role as a person and professional within the counseling process and supervision (both individual and group)  
Audience: Graduate

3. Demonstrate understanding of your implicit cultural assumptions and their influences and interactions with the way you conceptualize and work with your clients & colleagues, as well as how you understand the therapeutic process  
Audience: Graduate

4. Hone your clinical & diagnostic skills, theoretical case conceptualization, professional demeanor, and ethical practice  
Audience: Graduate

5. Develop an understanding of the clinical agency setting with which you are affiliated, and demonstrate the application of clinical, theoretical, and empirical knowledge to psychosocial and psychocultural issues presented by clients  
Audience: Graduate

6. Provide a conceptual and experiential base for the delivery of counseling services within a community or college population context, including case management, ethical practice, and demonstration of professional demeanor in professional relationships  
Audience: Graduate

7. Prepare for the comprehensive Professional Identity Exercise (PIE)  
Audience: Graduate

**COUN PSY 810 – PROFESSIONAL DEVELOPMENT AND CLINICAL PRACTICE**

1-6 credits.

Full-time involvement. Various assignments. Requires participation in a concurrent seminar.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**COUN PSY 825 – COUNSELING PSYCHOLOGY TECHNIQUES WITH FAMILIES**

3 credits.

Approaches to counseling intervention for families across the life-cycle. Specific attention paid to family stress.

**Requisites:** Declared in Counseling, Counseling Psychology, Rehabilitation Counseling, or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Become familiar with evidence-based models of therapy as well as specific strategies relevant to working with families and couples

Audience: Graduate

2. Demonstrate understanding and competence in the application of evidence-based family systems models in intervention and conceptualization of a family system

Audience: Graduate

3. Demonstrate the ability to apply family-based and systems principles to a variety of social and organizational systems, including families and community settings

Audience: Graduate

4. Comprehend the role of power and privilege issues, including issues of oppression and trauma, within the context of family practice

Audience: Graduate

**COUN PSY 850 – MENTAL HEALTH CONSULTATION IN HEALTH SERVICE PSYCHOLOGY**

3 credits.

Provides an opportunity to understand and practice the process of consultation and to experience how the role of a consulting psychologist differs from other professional roles (i.e., clinician, supervisor, administrator). Includes a review of consultation models and theories for individuals, groups, and organizations, the fundamentals of program development and evaluation, and considerations for working within communities as a consulting psychologist. Additionally, students will begin to explore the role of the clinical supervisor, supervisor development, and models of supervision.

**Requisites:** Declared in Counseling, Counseling Psychology, Rehabilitation Counseling, or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate awareness of yourself and others within the context of consultation and prevention.

Audience: Graduate

2. Demonstrate an understanding of consultation dynamics and the stages of development through which the consulting relationship progresses.

Audience: Graduate

3. Clearly define the nature of consultation and differentiate it from other forms of psychological intervention.

Audience: Graduate

4. Develop an understanding of organizational systems and demonstrate the ability to analyze, plan, implement, and evaluate consultation interventions.

Audience: Graduate

5. Demonstrate an understanding of, and adhere to, the ethical guidelines in consultation.

Audience: Graduate

6. Demonstrate knowledge of consulting strategies and interventions when working with diverse populations.

Audience: Graduate

7. Clearly define the role of clinical supervisor and how it differs from other roles of a professional psychologist.

Audience: Graduate

8. Articulate an understanding of the major models of clinical supervision.

Audience: Graduate

9. Understand the process of becoming an effective clinical supervisor.

Audience: Graduate

**COUN PSY 860 – SOCIAL AND CULTURAL FOUNDATIONS OF COUNSELING**

3 credits.

Review of theory and research into social identity and cultural foundations of counseling including: (a) the societal context for bias, discrimination and differential treatment of sociocultural groups including but not limited to diversity of sexual orientation, gender expression, social class, cultural/ethnic/racial groups, ability status among other groups; (b) human diversity in social norms, cultural values, social identities, as well as intergroup and intragroup relations; (c) counselors' roles in developing cultural competence, reducing bias and discriminatory treatment of subgroups, and advocating for social justice; and (d) the practice implications of for providing cultural competence in serving across forms of sociocultural diversity.

**Requisites:** Declared in Counseling, Counseling Psychology, Rehabilitation Counseling, or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe attitudes, beliefs, and acculturative experiences; including specific experiential learning activities that are designed to foster students' understanding of self and of the cultural and social identity diversity of clients  
Audience: Graduate

2. Develop the ability to respond constructively to others who have different perspectives  
Audience: Graduate

3. Evaluate various implications of concepts such as internalized oppression, institutional racism, and the historical and current political climate regarding immigration, poverty, and welfare  
Audience: Graduate

4. Analyze the ethical and legal considerations associated with providing services in contexts that represent social and cultural diversity  
Audience: Graduate

5. Apply knowledge of counselors' roles in developing cultural self-awareness, promoting cultural social justice, advocacy and conflict resolution, and other culturally-supported behaviors that promote optimal wellness and growth of the human spirit, mind, or body  
Audience: Graduate

**COUN PSY 865 – LIFESTYLE AND CAREER DEVELOPMENT**

3 credits.

Theoretical and practical foundations relating to the practice of lifestyle and career counseling, career guidance, and career development.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate awareness of yourself and others within the context of career development

Audience: Graduate

2. Demonstrate foundational knowledge of theory and constructs that assist us in understanding the development, role, and meaning of work in people's lives across the lifespan  
Audience: Graduate

3. Demonstrate familiarity with a variety of assessment measures and tools across career-related domains (e.g., interests, values, skills, etc.) and proficiency using these tools  
Audience: Graduate

4. Develop a base knowledge of career-related intervention models and strategies  
Audience: Graduate

5. Demonstrate skill in recognizing, understanding, and articulating cultural and contextual factors that shape career development and impact career interventions  
Audience: Graduate

6. Demonstrate knowledge of professional ethics and their impact on the work and professional development of career counselors  
Audience: Graduate

### **COUN PSY 890 – ADVANCED ASSESSMENT TECHNIQUES IN COUNSELING PSYCHOLOGY**

3 credits.

Methods commonly employed by counseling psychologists in the assessment of the problems of living of normal adults. Diagnostic assessment and assessment of career interests, personality, behavior, and social environment. Development of written individual assessment reports.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an understanding of psychometric theory and its importance to the construction, administration, and interpretation of psychological tests

Audience: Graduate

2. Evaluate assessment tools critically and make reasoned judgments about their development including standardization and norming processes  
Audience: Graduate

3. Evaluate measures for reliability and validity, including across cultural validity and appropriateness for use across groups

Audience: Graduate

4. Select, administer, and interpret tests in response to the referral question and in a manner that minimizes bias, mitigates threats to validity and is ethically sound

Audience: Graduate

5. Administer, score, and interpret at least two tests (e.g., MMPI-3, WAIS-IV) and conduct a clinical interview for assessment

Audience: Graduate

6. Communicate test findings in an integrative, comprehensive, formal written report with recommendations and gain practice with providing verbal and/or written assessment feedback

Audience: Graduate

7. Demonstrate an understanding of contextual and cultural factors that may influence the assessment process, including cultural features of the assessor-client dyad

Audience: Graduate

### **COUN PSY 900 – COUNSELING PSYCHOLOGY PRACTICUM-- FOUNDATIONAL**

3 credits.

Foundational practicum and seminar in counseling psychology.

**Requisites:** Declared in Counseling Psychology

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop and recognize your epistemological position, your assumptions about people, your worldview, and how these influence your work as a psychotherapist

Audience: Graduate

2. Review and analyze evidence-based psychotherapy practice.

Audience: Graduate

3. Create and present case conceptualization.

Audience: Graduate

4. Demonstrate use of theory to guide psychotherapy decision-making.

Audience: Graduate

5. Apply knowledge of social justice and multiculturalism to psychotherapy.

Audience: Graduate

6. Understand and apply the APA Code of Ethics to psychotherapy and reflect on ethical issues in psychotherapy and professional decision-making.

Audience: Graduate

7. Identify and discuss your awareness of how contextual and environmental factors impact case conceptualization, clients' problems, clients' psychotherapy experience, and the integration of multiculturalism and social justice into psychology.

Audience: Graduate

8. Use of group and individual supervision processes with respect to your needs as a psychologist-in-training across the various roles you may encounter in practice including therapist, supervisee, consultant, and peer.

Audience: Graduate

### **COUN PSY 901 – COUNS PSYCH PRACT: GROUP COUNSELING, CONSULTATION, COLLEGE TEACHING**

1-6 credits.

Supervised practice in group counseling, consultation, and/or college teaching with a focus on psychosocial development and human relations.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **COUN PSY 902 – COUNSELING PSYCHOLOGY PRACTICUM IN SUPERVISION**

4 credits.

Practicum in supervising counselor trainees in laboratory and field settings.

**Requisites:** Declared in Counseling Psychology

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the ethical, legal, and theoretical underpinnings of effective clinical supervision.

Audience: Graduate

2. Note the ethical, legal, and clinical considerations for telehealth and technologically-mediated clinical supervision.

Audience: Graduate

3. Discuss the essential components and research supporting the development of an effective supervisory relationship.

Audience: Graduate

4. Identify one's strengths and growth areas as a supervisor-in-training.

Audience: Graduate

5. Demonstrate one's approach to supervision from an identified model of supervision through a work sample.

Audience: Graduate

### **COUN PSY 903 – COUNSELING PSYCHOLOGY PRACTICUM--ADVANCED**

3 credits.

Advanced practicum and topical seminar in counseling psychology.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify strengths and areas of growth in clinical skills using multiple self-assessment methods

Audience: Graduate

2. Present and discuss a clinical case using specific theoretical orientation

Audience: Graduate

3. Identify resistances to learning in supervision and utilize the supervisory relationship in more effective ways

Audience: Graduate

4. Demonstrate clinical micro-skills and conceptualizing for treating a variety of mental health problems

Audience: Graduate

5. Articulate clear treatment plan and rationale for therapeutic techniques

Audience: Graduate

6. Demonstrate an increased ability to listen for and attune to emotion from patients

Audience: Graduate

7. Demonstrate an increased and nuanced understanding on mutuality and collaboration in the psychotherapy process

Audience: Graduate

8. Demonstrate greater awareness related to diversity issues and ethics in the practice of psychology

Audience: Graduate

**COUN PSY 904 – COUNSELING PSYCHOLOGY EXTERNSHIP**

1-3 credits.

Advanced training in counseling psychology assessment, intervention, and/or supervision.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Deepen your understanding of your epistemological position as related to psychological assessment and/or psychotherapy through a supervised clinical experience

Audience: Graduate

2. Investigate implicit cognitive schemas you have (i.e., assumptions and biases) about your clinical work as well as psychology and people

Audience: Graduate

3. Apply psychological theories about mental health treatment as well as psychology and people in a supervised clinical experience

Audience: Graduate

4. Engage in clinical supervision focused on your development as a biological, psychological, social, and cultural being, as evaluated via a developmental framework

Audience: Graduate

5. Increase your awareness of how contextual and environmental factors impact case conceptualization, problems presented by clients, clients' experience of psychotherapy, and the integration of multiculturalism or social justice into psychotherapy

Audience: Graduate

**COUN PSY 905 – RESEARCH PRACTICUM IN COUNSELING PSYCHOLOGY**

3 credits.

Supervised research experience in the field of counseling psychology.

Read about, discuss, and practice research skills that are critical at various phases of the research design and implementation process.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate research questions based on existing quantitative or qualitative research studies

Audience: Graduate

2. Apply research ethics in the development of a human subjects review application

Audience: Graduate

3. Engage in data collection and preparation

Audience: Graduate

4. Use appropriate statistical analyses and interpret results

Audience: Graduate

5. Prepare a manuscript for journal submission or study presentation

Audience: Graduate

**COUN PSY 908 – PRE-DOCTORAL INTERNSHIP IN HEALTH SERVICE PSYCHOLOGY PREPARATION SEMINAR**

2 credits.

Provides preparation for application to predoctoral internship in Health Service Psychology. Includes modules designed to provide knowledge, skills, and information regarding the application, interview, and decision-making process.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and be able to discuss the theoretical orientation that guides your work in psychotherapy with clients, case conceptualization skills, and areas of strength and growth as a psychologist-in-training  
Audience: Graduate

2. Identify and be able to discuss experiences and skills working with diverse clients  
Audience: Graduate

3. Identify and be able to discuss research experiences and interests  
Audience: Graduate

4. Identify and be able to discuss career goals  
Audience: Graduate

5. Match successfully to a predoctoral internship placement for the subsequent year in order to complete requirements of the PhD program in counseling psychology  
Audience: Graduate

**COUN PSY 926 – SEMINAR IN ETHICAL AND PROFESSIONAL ISSUES IN COUNSELING PSYCHOLOGY**

3 credits.

Intended to strengthen students' identities as counseling psychologists. Includes examination of (a) historical and contemporary issues that have affected psychology; (b) training and practice guidelines; and (c) ethical and legal issues, including the American Psychological Association ethics code and ethical decision-making.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop the ability to make ethical decisions using various resources such as the APA's Ethics Code, Guidelines, and Decision-Making Models  
Audience: Graduate

2. Gain competence in reading and translating the APA Ethics Code into its component parts (e.g., Principles, Sections, and Standards)  
Audience: Graduate

3. Identify professional values, principles, and issues affecting psychologists and psychologists-in-training  
Audience: Graduate

4. Practice consulting and collaborating with colleagues on relevant, applied ethical dilemmas and scenarios  
Audience: Graduate

5. Expand familiarity with laws and other legal requirements for the provision of psychological services  
Audience: Graduate

6. Integrate social justice and multicultural considerations into practical and applied scenarios, presentations, and writings  
Audience: Graduate

### **COUN PSY 950 – RESEARCH METHODS IN COUNSELING PSYCHOLOGY**

2-3 credits.

Historical, philosophical, descriptive, experimental, case-study and other models of research in counseling psychology.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Become familiar with the logic of research design and implementation

Audience: Graduate

2. Become knowledgeable of the major designs used in counseling research

Audience: Graduate

3. Evaluate the validity and reliability of measurement used in research studies

Audience: Graduate

4. Gain an introduction to common quantitative and qualitative methodologies

Audience: Graduate

5. Demonstrate knowledge of ethical principles guiding research activity and gain knowledge of IRB procedures at UW

Audience: Graduate

6. Develop the ability to write scientific prose

Audience: Graduate

7. Develop the capacity to participate in a scientific learning community through providing and receiving feedback on your work

Audience: Graduate

8. Gain greater awareness of the implications of design issues when working with diverse populations and multicultural topics

Audience: Graduate

### **COUN PSY 951 – COUNSELING PSYCHOLOGY RESEARCH IN INDIVIDUAL INTERVENTION**

2-3 credits.

Theory and research related to the counseling dyad.

**Requisites:** COUN PSY 950

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Become familiar with research on individual interventions

Audience: Graduate

2. Recognize principles of scientific inference; develop ability to critique scientific claims and arguments based on evidence

Audience: Graduate

3. Evaluate strengths and limitations of different forms of evidence adduced to support claims regarding intervention effectiveness

Audience: Graduate

4. Apply scientifically informed principles to psychological practice and training

Audience: Graduate

**COUN PSY 956 – SEMINAR: RESEARCH IN VOCATIONAL PSYCHOLOGY AND CAREER DEVELOPMENT**

2-3 credits.

Theory and research in vocational behavior and career development.

**Requisites:** Declared in Counseling Psychology or Counseling

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Demonstrate awareness of yourself and others within the context of career development

Audience: Graduate

2. Demonstrate foundational knowledge of theory and constructs that assist us in understanding the development, role, and meaning of work (and lack thereof) in people's lives across the lifespan

Audience: Graduate

3. Develop knowledge of career and life constructs that relate to mental health and to psychologists' work with clients in psychotherapy

Audience: Graduate

4. Demonstrate skill in recognizing, understanding, and articulating cultural and contextual factors that shape career development and impact our understanding of the role of work (and lack thereof) in individuals' lives

Audience: Graduate

5. Develop knowledge of the structure of occupations, individual and societal issues in career development, the role of work in society, and the role of vocational psychology in health service psychology

Audience: Graduate

6. Demonstrate an ability to identify systemic factors that act as barriers and supports to vocational development

Audience: Graduate

7. Demonstrate application and integration of class content to public discourse

Audience: Graduate

8. Recognize key characteristics that are relevant to the future of work

Audience: Graduate

**COUN PSY 960 – RESEARCH METHODS IN COUNSELING PSYCHOLOGY, II**

3 credits.

Advanced training in research methods in counseling psychology to build skills in conceptualization, research design, data analysis and interpretation.

**Requisites:** COUN PSY 950

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Select the most appropriate statistical method for a particular research problem

Audience: Graduate

2. Conduct statistical analysis using R programming language

Audience: Graduate

3. Interpret the output from the analysis and draw appropriate conclusions

Audience: Graduate

4. Write up the findings in a form suitable for publication

Audience: Graduate

**COUN PSY 990 – RESEARCH OR THESIS**

1-12 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**COUN PSY/ED PSYCH/PSYCH/RP & SE 995 – PREDOCTORAL INTERNSHIP**

0 credits.

Registration for Ph.D. students who have successfully defended the dissertation and are in the process of completing the required predoctoral internship.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**COUN PSY 999 – INDEPENDENT READING**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## CURRICULUM AND INSTRUCTION (CURRIC)

### **CURRIC 209 – DIGITAL MEDIA AND LITERACY**

3 credits.

Explores theories of knowing and learning as they relate to digital media. Focused on digital media in all of its forms – from Wikipedia to YouTube mashups to mobile apps – and how these new ways of doing and making are related to learning.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **CURRIC 240 – CRITICAL ASPECTS OF TEACHING, SCHOOLING, AND EDUCATION**

3 credits.

Investigates aspects of social justice and equity as they relate to teaching, schooling, and education.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **CURRIC 243 – PRACTICUM IN WORLD LANGUAGES (K-12)**

3 credits.

Systematic observation and participation in world language classes (French, German, or Spanish) in the public school.

**Requisites:** Consent of instructor

**Course Designation:** Workplace – Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### **CURRIC/ED POL/LEGAL ST 250 – INCARCERATION AND EDUCATION**

3 credits.

Investigates how the systems of incarceration and education operate alongside, within, around and through one another. Provides a historical examination of how education and incarceration have interacted. Examines how prisons operate as 'teaching institutions,' what it teaches all of us impacted by it, and what interventions have been designed to facilitate particular kinds of learning. Presents firsthand accounts of those who work and live in the carceral system currently.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze the relationship between schooling and incarceration including issues related to discipline, gender, and disability

Audience: Undergraduate

2. Articulate and evaluate your understanding of experiences of incarceration including the sources, assumptions, and implications behind your understanding

Audience: Undergraduate

3. Synthesize the lived experiences of diverse individuals impacted by incarceration to understand the range of forms learning takes place inside carceral facilities;

Audience: Undergraduate

4. Evaluate different policies and practices that operate at the intersections of education and incarceration.

Audience: Undergraduate

**CURRIC 276 – CONTEMPORARY ISSUES IN K-12 SCHOOLS**

1 credit.

Introduction to current practices and issues in K-12 school systems as they relate specifically to educational inequality, the concept of "educational debt," and the role of teachers and administrators in system change. Encourages future educators to think critically about these issues while preparing them to serve in culturally and socio-economically diverse schools.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify at least three critical contemporary issues in US PK-12 schooling.

Audience: Undergraduate

2. Identify major sources of educational inequity in schools and across school districts.

Audience: Undergraduate

3. Explain the differences between the concepts of "achievement gap" and "educational debt."

Audience: Undergraduate

4. Describe the crucial roles of teachers in the classroom and administrators in schools and districts for addressing educational inequity.

Audience: Undergraduate

**CURRIC 277 – VIDEOGAMES & LEARNING**

3 credits.

Explores current research on videogames and learning. Critically reflect on the intellectual and educational merits and drawbacks of videogames and how videogame culture shapes how individuals think and learn.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**CURRIC 292 – GLOBALIZING EDUCATION**

3 credits.

Designed to explore the regionally, societally and culturally embedded nature of schooling, impacts of globalization on schooling, the relationship of schooling to increasingly global societies, and how policy, curriculum instruction, both domestically and internationally, are both shaped by and sometimes responsive to globalization.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2022**Learning Outcomes:** 1. Identify the relationship of education to people, communities and societies from social, cultural and global perspectives

Audience: Undergraduate

2. Locate schooling within local and global economic, political, social and cultural patterns

Audience: Undergraduate

3. Determine how schools and classrooms do and can reflect and represent global populations, knowledge, perspectives and issues

Audience: Undergraduate

**CURRIC/MUSIC 300 – PRINCIPLES OF MUSIC EDUCATION**

2 credits.

Principles of music education, including philosophy, history, and current practices and curricular trends. Survey of music education in and out of schools as situated within diverse, pluralistic communities.

**Requisites:** Declared in Music: Education BM and sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain why music and music education are important, valuable, and meaningful.

Audience: Undergraduate

2. Demonstrate understandings of and dispositions toward music learning and teaching that are mindful, inclusive, respectful, empathic, relevant, and responsive to human difference.

Audience: Undergraduate

3. Develop and demonstrate awareness, sensitivity, and honor for human differences, including gender, sexuality, race, ethnicity, nationality, culture, class, language, religion, and ability.

Audience: Undergraduate

4. Demonstrate developing awareness of the connection between how you think about music learning and teaching and how those beliefs play out in all decisions that you make regarding your music classroom.

Audience: Undergraduate

5. Develop awareness of your own unique musical experiences and personality traits.

Audience: Undergraduate

6. Identify traits of successful music educators and the professional characteristics, expectations, sensitivity, and interpersonal skills required of music educators.

Audience: Undergraduate

**CURRIC/MUSIC 301 – MUSIC LEARNING AND TEACHING 1**

2 credits.

The learning and teaching of music at the elementary and middle school levels.

**Requisites:** MUSIC/CURRIC 300 and concurrently enrolled in MUSIC/CURRIC 337 and declared in Music: Education

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CURRIC/MUSIC 302 – MUSIC LEARNING AND TEACHING 2**

2 credits.

The learning and teaching of music at the high school level.

**Requisites:** MUSIC/CURRIC 301 and MUSIC/CURRIC 337

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC/MUSIC 304 – COMPOSITION, ARRANGEMENT, AND ORCHESTRATION FOR THE MUSIC TEACHER**

2 credits.

Introduction to the teaching of musical composition, arrangement, and orchestration. Special emphasis on how music technologies interact with conceptions of composition, arrangement, and orchestration; implications for music learning and teaching.

**Requisites:** MUS PERF 104

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CURRIC 305 – INTEGRATING THE TEACHING OF READING WITH OTHER LANGUAGE ARTS**

3 credits.

Theory, research and instructional practices supporting the teaching of reading, writing, speaking and listening skills in an integrated curriculum from kindergarten through grade twelve.

**Requisites:** None

**Course Designation:** Gen Ed – Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC/CHICLA 306 – LATINX LITERACIES**

3 credits.

Addresses how members of Latinx communities have used writing for both personal and social change. Develop a deeper understanding of the political, family, and school contexts in which Latinx peoples in the United States write and read.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Develop a theoretical understanding of literacy studies, homing in on concepts, such as "reading the word and reading the world," "funds of knowledge," "mestiz@ scripts," relevant to many Latinx literacy traditions.

Audience: Undergraduate

2. Identify and analyze key social, political, and historical pressures on many Latinx literacies, including the relationship between racism and literacy, legal status and literacy, and linguistic discrimination.

Audience: Undergraduate

3. Identify and analyze central ways that Latinx communities have used and use writing for social change through close readings of ethnographic and literary accounts.

Audience: Undergraduate

4. Create a portfolio of creative, scholarly, and reflective writing connected to course themes, deepening understandings of Latinx literacies, and developing writing and revision techniques that will transfer to other contexts.

Audience: Undergraduate

**CURRIC 309 – READING AND WRITING ACROSS THE CONTENT AREAS**

3 credits.

Prepares prospective teachers of children 8/9 to 12/13 to teach reading and writing across all content areas.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**CURRIC 311 – LANGUAGE ACQUISITION FOR MULTILINGUAL LEARNERS**

3 credits.

Explore theories of first and second language acquisition (SLA) and factors that impact language, literacy, and academic learning and development for emergent bilinguals (or English Learners). Develop an understanding of theories of language learning and development to build a theoretical foundation that will provide the basis for work with bi/multilingual learners. Analyze the language learning and language use of an emergent bilingual across multiple contexts at a practicum site. Consider the implications of theories for language learning and development for instructional design while learning research tools to enhance teaching practice.

**Requisites:** Declared in Elementary Education: Kindergarten - 9th Grade, BSE and English as a Second Language Minor

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and summarize major theories of the field of SLA about how language is structured in and through everyday practices and interactions.

Audience: Undergraduate

2. Analyze and evaluate how research in SLA shapes the study of language in context.

Audience: Undergraduate

3. Apply teacher research methods to examine the implications of theories of language learning and development for classroom design and practice.

Audience: Undergraduate

4. Apply critical, reflective thinking skills to the process of teacher research and the improvement of teaching, learning, and curriculum practices.

Audience: Undergraduate

**CURRIC 312 – FOUNDATIONS OF ESL EDUCATION**

3 credits.

Addresses social, cultural, and educational issues related to schooling for young English learners. Provides an overview of multiple factors that impact teaching and learning. Issues include but are not limited to: theories relating to language use and learning; registers and varieties of English; program structures and designs; school and classroom environments, and connections between families and schools.

**Requisites:** Declared in Elementary Education BSE, Capstone Certificate in Spanish-English Bilingual-Bicultural Education, Certificate in Preparing to Teach Abroad, or Certificate in Global Cultures, Languages and Education

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate how key topics and issues pertaining to emergent ESL students intersect with differing views about equitable schooling and education.

Audience: Undergraduate

2. Apply theories and concepts about factors related to equitable teaching, learning, and curriculum to assess practicum experiences that involve emergent ESL students.

Audience: Undergraduate

3. Identify and articulate key topics and issues related to the schooling and education of emergent ESL students.

Audience: Undergraduate

4. Evaluate the social, cultural, political and historical contexts of educational policies and programs related to emergent ESL students.

Audience: Undergraduate

**CURRIC 314 – BECOMING LITERATE IN AND OUT OF SCHOOLS**

3 credits.

Surveys critical issues related to literacy for early childhood teachers including early literacy and language learning, insights into cultural differences related to literacy and language, and knowledge of the social dimensions of literacy.

**Requisites:** Declared in Elementary Education

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**CURRIC 315 – READING AND WRITING ACROSS THE CURRICULUM IN EARLY CHILDHOOD**

3 credits.

Provides early childhood educators with information, strategies, and activities for instructing young children with literacy. Teachers explore the multiple sources of information that young readers must orchestrate as they learn to read.

**Requisites:** CURRIC 314

**Course Designation:** Gen Ed – Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**CURRIC 316 – ESL/BILINGUAL METHODS**

3 credits.

Identify and develop methodological approaches and techniques that coordinate instructional practice with current theories on language and learning. Develop criteria for designing, implementing, and evaluating appropriate lessons and materials that integrate with classroom curricula and goals.

**Requisites:** Declared in Elementary Education: Kindergarten – 9th Grade, BSE and English as a Second Language Minor

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply linguistically and culturally relevant methods of teaching English as a Second Language across the content areas.

Audience: Undergraduate

2. Use a language standards framework to identify and articulate language and content objectives for given teaching and learning tasks, targeting the necessary language demands of the lesson.

Audience: Undergraduate

3. Demonstrate effective use of pre-, mid- and post instruction assessment to inform instruction.

Audience: Undergraduate

4. Apply effective support and differentiation strategies for teaching English as a Second Language across content areas.

Audience: Undergraduate

5. Articulate your own philosophy about being a linguistically and culturally relevant teacher.

Audience: Undergraduate

**CURRIC 317 – DIMENSIONS OF LITERACY**

3 credits.

Surveys critical literacy issues for elementary teachers. Provides understandings related to literacy and language learning, insights into cultural differences related to literacy and language, and knowledge of the social dimensions of literacy. Addresses various theories that inform literacy teaching including deficit versus strength models of literacy learning, meaning-based models, systematic instruction, and sociocultural approaches.

**Requisites:** Declared in Elementary Education

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**CURRIC 318 – TEACHING READING AND WRITING**

3 credits.

Provides information and instructional strategies to support literacy learning. Addresses a wide range of literacy abilities including reading, writing, comprehending, and decoding. Focuses on the continuing developmental processes associated with becoming competent readers and writers.

**Requisites:** Declared in Elementary Education BSE

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand that the alphabetic code stems from oral language first, and that oral language is about communication.

Audience: Undergraduate

2. Recognize that a student's oral language and forms of communication are the most valuable ways to establish an affinity toward reading and writing

Audience: Undergraduate

3. Recognize the complex nature of the reading, writing, and language arts processes as they are influenced by linguistic, sociological, cultural, cognitive, and psychological factors.

Audience: Undergraduate

4. Understand the multiple dimensions of reading, writing, and communicating in the development of a strong theoretical and empirical (research-based) foundation for making instructional decisions.

Audience: Undergraduate

5. Explain the vocabulary, components, and methods of teaching phonological awareness (including but not limited to phonemic awareness), including how phonological awareness relates to emergent reading and later reading and spelling (orthography) skills.

Audience: Undergraduate

6. Explain the vocabulary and concepts involved in teaching phonics and The Alphabetic Principle (i.e., phonemes [sounds] are represented by graphemes [letters])

Audience: Undergraduate

7. Understand and explain word-reading strategies (e.g., phonics, syllabic analysis, morphemic analysis, vocabulary), including how to know (through observation and assessment) precisely when they should be taught to and used by students.

Audience: Undergraduate

8. Explain the vocabulary and methods for teaching reading comprehension as a complex construct (e.g., literal interpretation/recall of single texts to critical readings across multiple texts).

Audience: Undergraduate

9. Explain the vocabulary and conceptual models of the reading process.

Audience: Undergraduate

10. Explain the vocabulary and conceptual models of the writing process

Audience: Undergraduate

11. Understand and define the sociocultural and multidynamic complexities of literacy engagement, including social and emotional factors.

Audience: Undergraduate

12. Demonstrate relationships among reading, writing, listening, and speaking.

Audience: Undergraduate

**CURRIC 319 – PEDAGOGICAL CONTENT KNOWLEDGE FOR TEACHING ELEMENTARY MATHEMATICS 1**

3 credits.

Develops preservice teachers' mathematical knowledge for teaching i.e., Pedagogical Content Knowledge - the kind of knowledge that blends mathematical and pedagogical understandings. Explores topics defined by the Common Core State Standards for Mathematics such as foundations of arithmetic, addition, subtraction, multiplication and division of whole numbers and integers, the base-ten system, number theory, foundations of fraction operations and geometry.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and classified in pre-Elementary Education or declared in Elementary Education program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate proficiency in mathematical knowledge, conceptual foundations, and practices for teaching

Audience: Undergraduate

2. Demonstrate proficiency in understanding children's mathematical thinking and practices for learning

Audience: Undergraduate

**CURRIC 320 – PEDAGOGICAL CONTENT KNOWLEDGE FOR TEACHING ELEMENTARY MATHEMATICS 2**

3 credits.

Further develop the pedagogical knowledge that elementary and middle school teachers need to appropriately understand and extend students' mathematical ways of knowing as defined by the Common Core State Standards. Critically reflect on personal assumptions about mathematics and think beyond standardized mathematical practices.

**Requisites:** CURRIC 319

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Deepen their understanding of the reasoning, problem solving strategies, models, mathematical tools, structures, and principles, which underlie core elementary mathematics topics related to fractions, decimals, proportional reasoning, measurement

Audience: Undergraduate

2. Develop the important mathematical practices, or habits of mind, that are also an integral part of the Common Core State Standards. This includes practices that question and critique the assumptions that we make about mathematical knowledge and practices

Audience: Undergraduate

### **CURRIC/CHICLA 321 – CHICANO/LATINO EDUCATIONAL JUSTICE**

3 credits.

Addresses the ways Chican@s/Latin@s in contemporary U.S. society have engaged in social, cultural, political, and ideological struggles for educational justice. Begins with a broad overview of educational issues and examines major social movements, legal cases, and local and national efforts that have established important precedents. Focus on different enactments of resistance, struggle, resilience, self-determination, and educational justice and focus on how these precedents and enactments pertain to teaching, learning, and curriculum practices that reflect key tenets of educational justice for Chican@/Latin@ students.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Summarize substantive educational issues and inequities that pertain to Chicana/o/x and Latina/o/x pupils in schools.

Audience: Undergraduate

2. Analyze underlying social, cultural, historical, and political, ideological dimensions that affect Chicana/o/x and Latina/o/x schooling.

Audience: Undergraduate

3. Apply knowledge about schooling for Chicana/o/x and Latina/o/x pupils to how organizations/entities outside of school advance notions of educational justice

Audience: Undergraduate

4. Identify concrete ways to improve Chicana/o/x and Latina/o/x pupils' learning opportunities, educational advancement, and academic achievement

Audience: Undergraduate

### **CURRIC 325 – EDUCATING YOUNG ENGLISH LEARNERS**

3 credits.

Addresses social, cultural, and educational issues related to schooling for young English learners. Provides an overview of multiple factors that impact teaching and learning for these students.

**Requisites:** Declared in the Elementary Education: Early Childhood/English as a Second Language

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### **CURRIC 326 – LANGUAGE USE AND ACQUISITION IN EARLY CHILDHOOD**

3 credits.

Become familiar with aspects of forms and features of the English language and language use in and out of schools. Analysis of language learning and use across settings provides tools to enhance practice.

**Requisites:** Declared in the Elementary Education: Early Childhood/English as a Second Language

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **CURRIC 327 – METHODS OF TEACHING YOUNG ENGLISH LEARNERS**

3 credits.

Identify, develop and implement methodological approaches and techniques for teaching English learners that coordinate instructional practice with current theories on language and learning.

**Requisites:** Declared in the Elementary Education: Early Childhood/English as a Second Language

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### **CURRIC 328 – ARTS INTEGRATION FOR TEACHING AND LEARNING**

3 credits.

Prepares prospective educators to integrate the arts into their teaching practices.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **CURRIC 329 – TEACHING ARTIST PRACTICUM**

3 credits.

An opportunity to learn from professional teaching artists, continue to develop practical skills of teaching, and reflect on one's teaching artist practice. Participate in two different teaching artist residencies in order to learn a variety of disciplinary practices. Observe and assist the teaching artists and lead a portion of one class. Engage in collective reflection of residencies and explore relationship to theory. Address classroom challenges and establish the habits of ongoing reflection and effective pedagogical critique. Articulate a personal teaching artist statement, reflect on teaching experiences, and identify ways to make the arts accessible to diverse groups of learners.

**Requisites:** CURRIC 328

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Experience being a teaching artist through a practicum experience with an out-of-school arts program

Audience: Undergraduate

2. Reflect on your experiences with other emerging teaching artists and compare shared victories and challenges across art forms and arts programs

Audience: Undergraduate

3. Articulate a personal teaching artist statement

Audience: Undergraduate

4. Identify ways to make the arts accessible to diverse groups as learners

Audience: Undergraduate

**CURRIC 331 – TAKING EDUCATION OUTSIDE OF SCHOOL**

3 credits.

Education is often considered only to take place in formal schooling environments with professionally-trained teachers and students sitting in classrooms. However, research shows – and our intuitions suggest – that education occurs every day in a variety of ways, with a variety of people, and in a variety of spaces. For example, education – or more specifically, teaching and learning – happens in spaces such as museums and libraries but also, perhaps, at sports practice and around the family dinner table. Truly understanding what it means to teach and learn involves delving into and unpacking this variety. Further, if creating change in whether and how different people have opportunities to teach and learn in our society requires exposing and exploiting this variety.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Compare and contrast best practices of teaching and learning in formal school and non-school contexts

Audience: Undergraduate

2. Expand definitions of teaching and learning and explore the affordances and constraints of those definitions

Audience: Undergraduate

3. Synthesize across past and current experiences, as well as the research literature, to identify salient features of non-school contexts including locations, duration, purpose, roles, etc

Audience: Undergraduate

4. Evaluate how teaching and learning outside of schools disrupts and perpetuates structural inequities of formal schooling

Audience: Undergraduate

5. Identify potential career paths involving teaching and learning outside schools

Audience: Undergraduate

**CURRIC/MUSIC 337 – PRACTICUM IN TEACHING MUSIC**

1 credit.

Observation and participation in K-12 music education settings.

**Requisites:** Declared in Music: Education and concurrent enrollment in MUSIC/CURRIC 301 or 302**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Workplace – Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**CURRIC 338 – LINGUISTICS FOR TEACHERS**

3 credits.

Addresses aspects of forms, features and functions of the English language, including an understanding of multiple varieties and registers of English, and how language use functions in and out of schools. Attention to the emergent bilingual students' use of dual/multiple languages, varieties, registers, and discourses, relationships between first and additional languages, and ways to support students as they develop linguistic repertoires that include particular varieties of language that can help facilitate school success.

**Requisites:** Declared in Elementary Education: Kindergarten – 9th Grade, BSE and English as a Second Language Minor**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify students' use of diverse forms, features, and functions of language for learning

Audience: Undergraduate

2. Analyze relationships between the classroom and school environment and learner's language practices

Audience: Undergraduate

3. Bring theoretical and empirical work to bear on analysis of learners' language practices

Audience: Undergraduate

4. Develop strategies for leveraging home and school language, varieties, registers, and discourses to provide learners with access to the language of schooling

Audience: Undergraduate

5. Discuss critically social and ideological constructions of classroom and school language practices

Audience: Undergraduate

**CURRIC 339 – CULTURAL FOUNDATIONS OF LEARNING AND DEVELOPMENT**

3 credits.

Addresses core ideas of learning theory and human development focusing on the middle childhood population. Explores how learning and development are necessarily situated in local and global contexts, offering a cultural frame for understanding the work of teachers. Explores the cultural nature of learning and development and how these understandings can be applied to classroom practice.

**Requisites:** Sophomore Standing and classified as pre-Elementary Education or Declared in Elementary Education BSE

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the factors that influence students' development and learning using the bioecological model

Audience: Undergraduate

2. Create representations of various components of the model that reflect both your understanding of the abstract ideas as well as personal experiences and practices

Audience: Undergraduate

3. Design your own teaching philosophy and teaching practices by bringing these theoretical ideas and experiences

Audience: Undergraduate

**CURRIC 340 – ELEMENTARY EDUCATION PRACTICUM I**

3 credits.

Observe, supervise small groups, develop lesson plans for instruction, teach and assess a series of lessons in the related subject matter of science, social studies, literacy, and language acquisition.

**Requisites:** Declared in Elementary Education BSE

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an understanding of children as learners and social beings; practice the rhythms and routines of classrooms and schools; and become part of a complex, interdependent learning community.

Audience: Undergraduate

2. Develop teaching identity and build professional relationships with children, staff, families and the neighborhood community.

Audience: Undergraduate

3. Learn the skills to plan, teach, assess and reflect on instruction; collaborate with the cooperating teacher and broader school community to meet the needs of pupils.

Audience: Undergraduate

4. Engage as a member of a school-based instructional team, apply material learned in methods courses to the classroom, and bring classroom experience to bear on topics discussed in courses.

Audience: Undergraduate

**CURRIC 342 – TEACHING WORLD LANGUAGES (K-8)**

3 credits.

Designed for future teachers of world languages to build their philosophy of education and philosophy of teaching in conjunction with building practical knowledge about teaching and learning, professional standards, and issues facing schools. Provides opportunities to apply theories and standards through the practice of planning for language and child development through the creation of lesson plans, unit plans, and assessment creation. Pass oral proficiency exam, concurrent enrollment in CURRIC 243, and declared in French, German, or Spanish BSE

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**CURRIC 343 – TEACHING WORLD LANGUAGES (6-12)**

3 credits.

Theories, principles, and practical applications of instructional strategies and curriculum development for teaching a world language (Spanish, German, French, etc.) in secondary schools. Pass oral proficiency exam, concurrent enrollment in CURRIC 243, and declared in French, German, or Spanish BSE

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**CURRIC/MUSIC 344 – TEACHING VOCAL STYLES IN THE MUSIC CLASSROOM**

1 credit.

Introduction to the teaching and learning of diverse vocal styles. Special emphasis on what makes each style distinct, as well as the acquisition practices associated with each style.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**CURRIC 346 – FOUNDATIONS OF LANGUAGE AND READING INSTRUCTION IN ELEMENTARY EDUCATION**

3 credits.

Provides information and instructional strategies to support literacy learning. Addresses a wide range of literacy abilities including reading, writing, comprehending, and decoding. Focuses on the continuing developmental processes associated with becoming competent readers and writers.

**Requisites:** Declared in Elementary Education BSE or Elementary Education and Special Education BSE

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Recognize the complex nature of early literacy learning processes, including the ways that cultural, linguistic, racial, and ethnic diversity shape these processes.

Audience: Undergraduate

2. Situate diversity as a core asset in early literacy instructional planning, teaching, and selecting texts and materials.

Audience: Undergraduate

3. Explain the centrality of language to literacy learning and identify instructional approaches and materials that support listening, speaking, viewing, and representing skills of young learners.

Audience: Undergraduate

4. Articulate the multiple dimensions of reading development, including concepts of print, phonological awareness, phonics, word recognition, fluency, vocabulary, and comprehension.

Audience: Undergraduate

5. Demonstrate knowledge of instructional approaches that support early reading instruction and understand the strengths and limitations of various informal and formal assessments.

Audience: Undergraduate

**CURRIC 347 – THE TEACHING OF WRITING AND OTHER LANGUAGE ARTS**

3 credits.

Focuses on written and oral language development of children from infancy through early adolescence. Explores the cognitive, social, cultural, and political implications of literacy education.

**Requisites:** Declared in Elementary Education BSE or Elementary Education and Special Education BSE

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Articulate with the major concepts and approaches to teaching writing.

Audience: Undergraduate

2. Practice various types of writing and develop instructional plans and assessments based on these types of writing.

Audience: Undergraduate

3. Explain oral language development in children and ways that oral language supports literacy learning.

Audience: Undergraduate

4. Explore disciplinary-specific literacy practices across the PK-9 range.

Audience: Undergraduate

5. Discuss the role of texts and children's literature in the literacy classroom.

Audience: Undergraduate

6. Incorporate principles of social justice and equity into the Language Arts curriculum to create lessons with high expectations for all students, honor students' cultures and personal literacies, and also support and encourage their achievement.

Audience: Undergraduate

7. Critically examine research, theories, and practices in literacy education and explore the social, cultural, and political implications of literacy education.

Audience: Undergraduate

**CURRIC/CHICLA 354 – RACE AND LANGUAGE IN STEM AND ENVIRONMENTAL EDUCATION**

3 credits.

Explores the contestation of ongoing histories of injustice, exclusion, and raciolinguistic hierarchies across science, mathematics, and environmental education. Scholarship from Chicane/Latine Studies, raciolinguistic perspectives, and post/de/anticolonial studies will be examined to critically analyze these school subjects and related hierarchies of knowing, languaging, and being. Applies transdisciplinary perspectives to consider how students, educators, and community activists have challenged those hierarchies and worked to repurpose science, mathematics, and environmental pedagogies toward aims of linguistic, racial, educational, and environmental justice.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Articulate how the past has affected present day circumstances regarding race/ethnicities and related inequities in the U.S., with a focus on histories of science, mathematics, and environmental education in relation to colonial, racializing, linguistic, and curricular hierarchies.

Audience: Undergraduate

2. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others by analyzing how students, educators, or community activists have contested hierarchies of science, mathematics, or environmental education and repurposed pedagogies toward aims of linguistic, racial, or environmental justice.

Audience: Undergraduate

3. Critically evaluate contemporary media (e.g., film) related to STEM or environmental education and draw upon raciolinguistic, Chicane/Latine, or post/de/anticolonial perspectives.

Audience: Both Grad &amp; Undergrad

4. Synthesize course concepts by investigating and developing a critical contribution to contemporary dialogue concerning issues of racial, linguistic, educational and/or environmental justice.

Audience: Undergraduate

5. Recognize and appraise the histories of science, mathematics, and environmental education in relation to colonial, racializing, linguistic, and curricular hierarchies

Audience: Graduate

6. Analyze how students, educators, or community activists have contested hierarchies of science, mathematics, or environmental education and repurposed pedagogies toward aims of linguistic, racial, or environmental justice

Audience: Graduate

7. Demonstrate graduate-level research knowledge of raciolinguistic perspectives, Chicane/Latine Studies, or post/de/anticolonial theories in STEM or environmental education.

Audience: Graduate

**CURRIC 357 – GAME DESIGN I**

3 credits.

Explores the fundamentals of game design. Develop fundamental skills in designing interactive systems (much as art students develop fundamental skills through courses in figure drawing or color theory). Applicable to careers in educational game design or in design fields in related settings, such as museums, theme parks, and technology-mediated classrooms.

**Requisites:** Sophomore standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**CURRIC 359 – TEACHING OF HISTORY AND THE OTHER SOCIAL STUDIES**

3 credits.

Develop lesson and unit plans, appropriate assessments, and understand what it means to teach social studies for democratic citizenship. Make connections between educational theory and the use of different pedagogical strategies, and be able to critically evaluate and discuss the assigned journal articles and book chapters.

**Requisites:** Declared in Curriculum and Instruction: Secondary Social Studies Education MS**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**CURRIC/SLAVIC/THEATRE 362 – DRAMA FOR TEACHING AND LEARNING**

3 credits.

Methods for all involved in teaching and learning, including foreign languages. Introduction to philosophy, methodology, and practice of the use of drama and performance techniques in any educational or recreational settings. Focus on creativity and embodied and contextual learning, based on current neurological, psychological, and sociological research. A practical class which includes demonstration and practice with children.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2022**Learning Outcomes:** 1. Articulate the importance of drama in the education of all children.

Audience: Both Grad &amp; Undergrad

2. Connect drama to multiple forms of expressing and receiving experiences, ideas, and feelings.

Audience: Both Grad &amp; Undergrad

3. Apply the basic terms, skills, philosophies, and methodologies for leading drama sessions

Audience: Both Grad &amp; Undergrad

4. Articulate the difference and similarities between the drama methodologies offered in the course.

Audience: Both Grad &amp; Undergrad

5. Connect the use of drama with current brain based research

Audience: Both Grad &amp; Undergrad

6. Demonstrate ability to design, implement, and evaluate activities and lesson plans with sound objectives and goals.

Audience: Both Grad &amp; Undergrad

7. Connect school and community-making connections between community-based knowledge and school knowledge in theory and practice of drama.

Audience: Both Grad &amp; Undergrad

8. Demonstrate ability to design, implement, and evaluate lesson plans that focus on inclusion and diversity in theory, practice, and pedagogy.

Audience: Graduate

9. Articulate the value of drama in relation to children's social, cultural, cognitive, linguistic, emotional, and moral development.

Audience: Graduate

**CURRIC 363 – PRACTICUM IN EARLY CHILDHOOD EDUCATION IN KINDERGARTEN**

1-3 credits.

Observation and participation in a classroom setting. Reserve two mornings, two afternoons, or one full day.

**Requisites:** CURRIC 550 or concurrent enrollment**Course Designation:** Workplace - Workplace Experience Course**Repeatable for Credit:** No**Last Taught:** Fall 2021**CURRIC 364 – INTRODUCTION TO EDUCATION**

3 credits.

Nature of teaching; fundamental issues which confront the teacher and bases for making decisions; overview of the program, field trips to educational sites.

**Requisites:** Declared in Elementary Education**Repeatable for Credit:** No**Last Taught:** Fall 2021**CURRIC/RP & SE 365 – TEACHING MATHEMATICS IN INCLUSIVE SETTINGS**

3 credits.

Introduction to a variety of approaches for teaching mathematics to students in inclusive schools

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Describe and implement principles of systematically designed instruction to develop lesson plans that foster high-quality mathematics instruction for students with disabilities.

Audience: Undergraduate

2. Determine a multitude of tools to assess students' mathematical learning and utilize assessment results to adjust instructional practice.

Audience: Undergraduate

3. Identify, employ, and advocate for instructional practices that promote rich learning experiences and meaningful inclusion of students with disabilities in mathematical settings.

Audience: Undergraduate

4. Evaluate mathematics as a practice, as a philosophy, and how it impacts your own identity as a teacher and the identities of students with disabilities

Audience: Undergraduate

5. Articulate key mathematics concepts relevant to special educators' instruction in K-12 settings.

Audience: Undergraduate

### **CURRIC 366 – INTERNATIONALIZING EDUCATIONAL KNOWLEDGE**

3 credits.

Internationalizing education means both internationalizing our thinking and the ways we perceive the world, and internationalizing the field of curriculum and instruction. An introduction to various educational systems around the world, focusing on similarities and dissimilarities in what is taught. Discussions center on curriculum across cultures, and its relation to political systems and religions to build an understanding of diversity in societies and schools. Explores local and indigenous knowledge; the role of international agencies in comparing nation's school systems; the rise of private schools and universities; immigration and the changing borders of society and cultures in the curriculum; questions of sexuality and gender diversity; diversity of families and social exclusions and inequalities in elementary and secondary schools; as well as international opportunities for study with international and local speakers from multiple perspectives.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **CURRIC 367 – ELEMENTARY EDUCATION PRACTICUM II**

3 credits.

Observe, supervise small groups, develop lesson plans for instruction, and teach a series of lessons in the related subject matter of math, literacy, language acquisition and inclusive schooling.

**Requisites:** CURRIC 340

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate an understanding of children as learners and social beings; practice the rhythms and routines of classrooms and schools; and become part of the complex, interdependent learning community at classroom and school levels  
Audience: Undergraduate

2. Demonstrate increased skill at interacting as education professionals with families and communities by developing their teaching identity and building professional relationships with children, staff, families and the neighborhood community  
Audience: Undergraduate

3. Demonstrate the skills to plan, teach, assess and reflect on instruction in collaboration with the cooperating teacher and broader school community to meet the needs of pupils  
Audience: Undergraduate

4. Apply material learned in methods courses to the classroom, and to bring their classroom experience to bear on topics discussed in courses  
Audience: Undergraduate

### **CURRIC 368 – THE TEACHING OF READING**

3 credits.

Examines the psycholinguistics of reading; reading in social and cultural contexts in schools, families, communities, and workplaces; and the politics of reading. Provides strategies for teaching all children to read.

**Requisites:** Declared in Elementary Education

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **CURRIC 369 – THE TEACHING OF LANGUAGE ARTS**

3 credits.

Focuses on written and oral language development of children from infancy through early adolescence. Explores the cognitive, social, cultural, and political implications of literacy education.

**Requisites:** Declared in Elementary Education

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### **CURRIC 370 – TEACHING MATHEMATICS**

3 credits.

Investigate the mathematics in the elementary school curriculum, how critical mathematics concepts and skills are learned, and how those concepts can be taught.

**Requisites:** Declared in Elementary Education BSE and (CURRIC 320 or MATH 132)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Support all students to engage in authentic mathematical work

Audience: Undergraduate

2. Cultivate every child's identity as a capable learner  
Audience: Undergraduate

3. Create a classroom community in which people related to one another as intellectual equals, who all have valuable knowledge and ideas  
Audience: Undergraduate

**CURRIC 371 – TEACHING SOCIAL STUDIES**

3 credits.

Examines recent trends in the field of social studies. Develop social studies curricula and instructional strategies that help prepare children for active citizenship in a democratic, multicultural, technological society.

**Requisites:** Declared in Elementary Education BSE

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the five core areas of social studies

Audience: Undergraduate

2. Explain contemporary issues facing elementary social studies today

Audience: Undergraduate

3. Identify conceptual frameworks for how best to teach social studies

Audience: Undergraduate

4. Identify, evaluate, and create elementary social studies resources

Audience: Undergraduate

5. Plan a high-quality social studies inquiry unit

Audience: Undergraduate

6. Commit to integrating social studies instruction into your future practice

Audience: Undergraduate

**CURRIC 372 – TEACHING SCIENCE**

3 credits.

Explore how children learn science, how to create classrooms where children learn to inquire, and how to assess children's learning. Conduct inquiries as the basis for considering these issues.

**Requisites:** Declared in Elementary Education BSE

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explore your own identities (as people, as teachers, as scientists) and analyze the impact of those identities on how we see, understand, and interact with students

Audience: Undergraduate

2. Question the idea that science is "objective" by investigating science teaching to identify oppression of non-white, non-male students

Audience: Undergraduate

3. Develop instructional strategies and intuitions to elicit and build on student ideas in a way that redistributes who is seen as a "knower" of science

Audience: Undergraduate

4. Design lessons and redesign curricular units based on research on best-practices in science teaching that will support the equitable learning

Audience: Undergraduate

5. Reflect on science teaching practice in a way that supports both student learning and continued professional development

Audience: Undergraduate

**CURRIC 373 – ELEMENTARY TEACHING PRACTICUM III**

3 credits.

Observe, supervise small groups, develop lesson plans for instruction, and teach a series of lessons relating theories of learning with the subject matter of mathematics and art.

**Requisites:** Declared in Elementary Education

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CURRIC 374 – GENERAL EDUC PRACTICUM & INSTRUCTIONAL PLANNING FOR DIVERSE LEARNERS**

2-5 credits.

Develop lesson plans, design an integrated curriculum unit, and employ active and collaborative learning strategies in general education classrooms.

**Requisites:** Declared in Special Education BSE

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**CURRIC 375 – PROSEMINAR**

1-3 credits.

Explore new frontiers in curriculum and instruction.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**CURRIC 390 – TEACHING OF SCIENCE IN SECONDARY SCHOOLS**

3 credits.

Explore teaching methods for secondary science education based on extensive research.

**Requisites:** CURRIC 290 or graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**CURRIC 393 – THE TEACHING OF SECONDARY SCHOOL MATHEMATICS I**

3 credits.

Provides an introduction to issues associated with mathematics curriculum and instruction in secondary schools. Instructional strategies, classroom management, and assessment of learning are examined in the context of current and reformed curricula.

**Requisites:** Declared in Curriculum and Instruction: Secondary Mathematics Education MS**Repeatable for Credit:** No**Last Taught:** Fall 2024**CURRIC 394 – THE TEACHING OF SECONDARY SCHOOL MATHEMATICS II**

3 credits.

Provides a more in-depth examination of the issues associated with mathematics curriculum and instruction in secondary schools. A special emphasis is on curriculum choices and assessment practices.

**Requisites:** CURRIC 393 or graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**CURRIC 396 – TEACHING OF ENGLISH**

3 credits.

Examine pedagogical and curricular issues related to the teaching of English Language Arts in secondary grades. Analyze and construct texts that address multiple aspects related to the teaching of English as reading the word and the world, while attending to notions of equity, cultural funds of knowledge, and strengths-based pedagogies. Use theory and practice to explore effective pedagogical strategies in the teaching of reading, writing, speaking, listening, and thinking using critical lenses

**Requisites:** Declared in Curriculum and Instruction: Secondary English Education MS**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**CURRIC 399 – INDEPENDENT STUDY**

1-3 credits.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**CURRIC/C&E SOC/ENVIR ST 405 – EDUCATION FOR SUSTAINABLE COMMUNITIES**

3 credits.

How can education – for children and adults, in school and out – help to address crucial environmental and social sustainability challenges? What ideas and strategies have guided environmental and sustainability education over the years? What can individual people do to address environmental challenges, and what can only be accomplished by people working together? What does sustainability have to do with justice – and vice versa? Examine the principles behind behavior change and empowerment, community action and whole-scale social reform. Drawing on research and theory from across the social sciences, we will explore the uncertain relationship between education and advocacy, seeking the means by which education can have the greatest impact without compromising the core ideals of a democratic society.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**CURRIC/RP & SE 406 – RACE, INTERSECTIONALITY, AND EQUITY IN EDUCATION**

3 credits.

Addresses a range of issues to help teachers more thoughtfully and equitably serve their students of color and develop a critical and historical understanding of the racism, marginalization, and exclusion that is endemic to the U.S. public school system. Provides an overview of foundational constructs that are essential for pre-service teachers preparing to teach and serve diverse students and families. Explore how race, racism, and racialization in education intersect with class, gender, dis/ability, religion, sexuality, etc. to shape inequitable schooling conditions and experiences for students of color. Analyze the effects at the individual, interactional, institutional, and societal levels. Consider how power always-already enables particular policies and practices that reproduce educational inequities and hence sustain white privilege and dominance.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others.

Audience: Undergraduate

2. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity.

Audience: Undergraduate

3. Articulate how the past has affected present day circumstances regarding race and racial inequalities in the U.S.

Audience: Undergraduate

4. Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society.

Audience: Undergraduate

**CURRIC/MUSIC 409 – STUDENT TEACHING IN GENERAL AND VOCAL MUSIC**

6-12 credits.

Supervised student teaching in general and vocal K-12 settings.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No**Last Taught:** Spring 2025**CURRIC/MUSIC 410 – STUDENT TEACHING IN GENERAL AND INSTRUMENTAL MUSIC**

6-12 credits.

Supervised student teaching in general and instrumental K-12 settings.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No**Last Taught:** Spring 2025**CURRIC 418 – PREPARING TO TEACH ABROAD**

3 credits.

Critically approaches a range of complexities entailed in teaching abroad. Power-knowledge relations in pedagogical acts of planning, implementation and reflection will be identified and analyzed. Several basic formats for lesson preparation will be introduced. A variety of teaching techniques for implementing lesson plans will be practiced with peers. Approaches for critically reflecting in verbal and written ways upon teaching/learning and power-knowledge relations integral to curriculum and instruction, student inclusion/exclusion, and cultural responsiveness will be surveyed.

**Requisites:** Sophomore standing**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Design culturally responsive lesson plans for small group instruction

Audience: Undergraduate

2. Implement lesson plans using different teaching techniques

Audience: Undergraduate

3. Learn to critically reflect upon teaching sessions within a teaching abroad framework

Audience: Undergraduate

4. Recommend modifications and improvements based on power-knowledge analysis

Audience: Undergraduate

5. Map complexities in national-local contexts of interest for teaching abroad.

Audience: Undergraduate

**CURRIC 419 – PREPARING TO TEACH ABROAD CAPSTONE**

3 credits.

Formulate and reflect on the obligations and responsibilities of teaching in contexts different from the US. Capstone provides field experiences with virtual, community, and campus organizations relevant to planning curriculum, teaching, and cross-cultural comparison of educational contexts. Addresses colonization and power, assumptions of difference, and cross-cultural awareness in teaching and learning.

**Requisites:** CURRIC 418 and 366

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Reflect on pedagogical and cultural differences relevant to teaching and learning in non-US settings, particularly issues of coloniality, power, and assumptions of difference.

Audience: Undergraduate

2. Participate in field experiences that permit opportunities for cross-cultural learning and reflecting on issues of teaching, curriculum, and learning in non-US settings.

Audience: Undergraduate

3. Consider inclusive practices that account social and cultural qualities of teaching in non-US settings.

Audience: Undergraduate

4. Connect intellectual issues of teaching and learning with field experiences to inform future pedagogical practice in non-US settings.

Audience: Undergraduate

**CURRIC/MUSIC 420 – TEACHING POPULAR INSTRUMENTAL MUSIC 1**

1 credit.

Development of critical perspectives, musical knowledge, and pedagogical skills needed to teach instrumental popular music. Focus on popular string instruments, their electronic counterparts, and emerging technologies for the performance and production of popular music.

**Requisites:** Declared in Music: Education BM and sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop basic skills necessary for teaching and learning various popular music styles on the guitar, bass, and drum set.

Audience: Undergraduate

2. Develop a series of instructional strategies for teaching, focusing on lesson plans and curricular units that incorporate instruments commonly used in popular music.

Audience: Undergraduate

3. Develop critical perspectives on popular music by exploring the intersection of popular music with issues of identity, technology, and globalization.

Audience: Undergraduate

**CURRIC/MUSIC 421 – TEACHING POPULAR INSTRUMENTAL MUSIC 2**

1 credit.

Development of critical perspectives, musical knowledge, and pedagogical skills needed to teach instrumental popular music. Focus on popular percussion instruments, their electronic counterparts, and emerging technologies for the performance and production of popular music.

**Requisites:** Declared in Music: Education BM and sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop skills associated with digital audio workstations (DAWS), including inputting MIDI, manipulating audio files, and recording.

Audience: Undergraduate

2. Examine and implement pedagogies of popular music associated with DAWs.

Audience: Undergraduate

3. Critically interrogate issues of power and identity (including race, gender, class, and ability) in music education and schooling through popular music.

Audience: Undergraduate

**CURRIC/CSCS 428 – PROGRAM PLANNING IN FAMILY AND CONSUMER EDUCATION**

3 credits.

Theory and processes of program planning for formal and informal educational settings; relation of vocational education to secondary, adult, and continuing education programs.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Design and implement ethical, inclusive, and culturally appropriate approaches to planning and evaluation that engage a variety of stakeholders together in a participatory process

Audience: Undergraduate

2. Develop program plans that bridge short-term objectives with long-term goals of justice and equity

Audience: Undergraduate

3. Engage in reflective thinking about individual, interpersonal, and organizational power, privilege, and positionality in relation to program planning, strategic planning, and evaluation

Audience: Undergraduate

4. Explain how organizations can propagate systems of injustice and inequity through their programming if they do not address root causes

Audience: Undergraduate

5. Justify the decision to develop a new program plan, adapt an existing program, or take no action, appraising the opportunities and challenges associated with each course of action

Audience: Undergraduate

6. Translate general program planning concepts to a variety of settings, social issues, and audiences

Audience: Undergraduate

**CURRIC 432 – GAME DESIGN II**

3 credits.

Explore the expressive, social, and cultural impact of games as a medium through focused creation of a single capstone project. Develop an analog or digital game depending on interest and skill set. Designed to build skills in designing interactive games using an iterative approach that incorporates user testing and feedback. Focuses on design practices common to all games which can be applied by a game designer working in any medium, including sports, board games, computer games, and videogames. Opportunities to explore a wide variety of independent games as well as the platforms used to create them.

**Requisites:** CURRIC 357 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 435 – FOUNDATIONS OF WORLD LANGUAGE EDUCATION**

2 credits.

Examines theoretical, pedagogical, and sociopolitical foundations for the teaching and learning of languages in U.S. schools.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Articulate the sociopolitical evolution of language teaching in U.S. schools in historical and contemporary contexts.

Audience: Graduate

2. Articulate the needs, goals, and benefits of language learning to a variety of stakeholders: students, colleagues, administrators, lawmakers, parents, and community members.

Audience: Graduate

3. Identify and evaluate current trends and innovations in the teaching of languages.

Audience: Graduate

4. Identify and critique their own biases with regard to the teaching and learning of languages.

Audience: Graduate

### **CURRIC 442 – STUDENT TEACHING IN WORLD LANGUAGES (PK-8)**

2-12 credits.

Practice teaching in world languages education classes at the PK-8 school level in elementary and middle schools.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use a variety of curricular resources (World-Readiness Standards, Can-Do Statements, Social Justice Standards, Intercultural Reflection Tool) to plan and implement justice-oriented language instruction.

Audience: Graduate

2. Establish and maintain an equitable and inclusive classroom environment.

Audience: Graduate

3. Develop meaningful, contextualized, student-centered learning experiences to promote interpersonal, interpretive, and presentational communication.

Audience: Graduate

4. Develop meaningful formative and summative assessments and use data from those assessments to inform instruction.

Audience: Graduate

5. Reflect on instructional and professional practice and discover a sense of personal identity within the teaching profession.

Audience: Graduate

### **CURRIC 443 – STUDENT TEACHING IN WORLD LANGUAGES (6-12)**

2-12 credits.

Practice teaching in world languages education classes at the 6-12 school level in middle and high schools.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use a variety of curricular resources (World-Readiness Standards, Can-Do Statements, Social Justice Standards, Intercultural Reflection Tool) to plan and implement justice-oriented language instruction.

Audience: Graduate

2. Establish and maintain an equitable and inclusive classroom environment.

Audience: Graduate

3. Develop meaningful, contextualized, student-centered learning experiences to promote interpersonal, interpretive, and presentational communication.

Audience: Graduate

4. Develop meaningful formative and summative assessments and use data from those assessments to inform instruction.

Audience: Graduate

5. Reflect on instructional and professional practice and discover a sense of personal identity within the teaching profession.

Audience: Graduate

### **CURRIC 454 – STUDENT TEACHING IN THE MIDDLE SCHOOL**

1-10 credits.

Supervised student teaching experience in elementary education located in a 5th-9th grade classroom.

**Requisites:** CURRIC 367 and concurrent enrollment in CURRIC 463

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Deepen individual and collaborative awareness of self as it intersects with communities and schools

Audience: Undergraduate

2. Expand developmental awareness and understanding of institutional and systemic inequities

Audience: Undergraduate

3. Engage in activities that allow for demonstrated proficiency of the UW Teacher Education Performance Standards and Elementary Education Social Justice Mission Statement

Audience: Undergraduate

**CURRIC 458 – STUDENT TEACHING IN HISTORY AND SOCIAL STUDIES IN THE MIDDLE SCHOOL**

2-12 credits.

Supervised student teaching in the middle school. Employ and evaluate a variety of approaches to social studies curriculum and instruction.

**Requisites:** Declared in Curriculum and Instruction: Secondary Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 459 – STUDENT TEACHING IN HISTORY AND SOCIAL STUDIES IN THE HIGH SCHOOL**

2-12 credits.

Supervised student teaching in the high school. Employ and evaluate a variety of approaches to social studies curriculum and instruction.

**Requisites:** Declared in Curriculum and Instruction: Secondary Social Studies Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CURRIC 463 – SEMINAR IN ELEMENTARY EDUCATION**

1-2 credits.

Weekly workshop to provide an opportunity to develop skills as critically reflective practitioners and make specific plans for the full-time teaching experience.

**Requisites:** CURRIC 367 and concurrent enrollment in CURRIC 454, 464 or 468

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Deepen individual and collaborative awareness of self as it intersects with communities and schools  
Audience: Undergraduate

2. Expand developmental awareness and understanding of institutional and systemic inequities  
Audience: Undergraduate

3. Engage in activities that allow for demonstrated proficiency of the UW Teacher Education Performance Standards and Elementary Education Social Justice Mission Statement  
Audience: Undergraduate

**CURRIC 464 – STUDENT TEACHING IN THE ELEMENTARY SCHOOL**

1-10 credits.

Supervised student teaching semester of the elementary education program in a 4K-6th grade classroom.

**Requisites:** CURRIC 367 and concurrent enrollment in CURRIC 463

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Deepen individual and collaborative awareness of self as it intersects with communities and schools  
Audience: Undergraduate

2. Expand developmental awareness and understanding of institutional and systemic inequalities  
Audience: Undergraduate

3. Engage in activities that allow for demonstrated proficiency of the UW Teacher Education Performance Standards and Elementary Education Social Justice Mission Statement  
Audience: Undergraduate

**CURRIC 468 – EARLY CHILDHOOD/ENGLISH AS A SECOND LANGUAGE STUDENT TEACHING**

5-10 credits.

Student teaching specific to Early childhood/English as a Second Language certification

**Requisites:** CURRIC 367 and concurrent enrollment in CURRIC 463

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Deepen individual and collaborative awareness of self as it intersects with communities and schools  
Audience: Undergraduate

2. Expand developmental awareness and understanding of institutional and systemic inequities  
Audience: Undergraduate

3. Engage in activities that allow for demonstrated proficiency of the UW Teacher Education Performance Standards and Elementary Education Social Justice Mission Statement  
Audience: Undergraduate

**CURRIC/MATH 471 – MATHEMATICS FOR SECONDARY SCHOOL TEACHERS**

3 credits.

Capstone for future middle and high school teachers, drawing connections between higher mathematics and school mathematics.

**Requisites:** (MATH 341, 375, or 421) and (MATH 461 or concurrent enrollment)

**Course Designation:** Breadth – Natural Science  
Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the conceptual difficulties, fundamental ideas, and techniques of secondary school mathematics.

Audience: Undergraduate

2. Describe connections between advanced mathematics and the content typically found in middle and high school mathematics curriculum.

Audience: Undergraduate

3. Recall and state alternate definitions, extensions, and constructions of content typically found in middle and high school mathematics curriculum.

Audience: Undergraduate

4. Demonstrate symbolic and computational proficiency.

Audience: Undergraduate

5. Justify mathematical reasoning as a means to deepen understanding.

Audience: Undergraduate

6. Analyze multiple solution strategies from a mathematical perspective (e.g. understanding different approaches to solving a problem, assessing whether a strategy generalizes, making connections between strategies, examining student strategies when appropriate etc.).

Audience: Undergraduate

7. Explain mathematics to others and assess the mathematical understanding of others.

Audience: Undergraduate

**CURRIC 472 – STUDENT TEACHING OF ENGLISH IN THE MIDDLE SCHOOL**

2-12 credits.

Supervised student teaching in the middle school. Employ and evaluate a variety of approaches to English curriculum and instruction.

**Requisites:** Declared in Elementary Education or graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC/KINES 478 – ELEMENTARY SCHOOL PHYSICAL EDUCATION STUDENT TEACHING**

2-8 credits.

Student teaching placement in elementary school setting.

**Requisites:** None

**Course Designation:** Workplace – Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 490 – STUDENT TEACHING IN SCIENCE IN THE HIGH SCHOOL**

2-12 credits.

**Requisites:** Declared in Curriculum and Instruction: Secondary Science Education MS

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CURRIC/ART ED 493 – PRACTICUM IN SECONDARY SCHOOL ART**

3 credits.

Observation and instruction of elementary and secondary pupils in a laboratory setting. Lecture and discussion of topics related to art instruction.

**Requisites:** Declared in Art Education BSE

**Course Designation:** Workplace – Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**CURRIC 494 – STUDENT TEACHING IN HIGH SCHOOL MATHEMATICS**

2-12 credits.

**Requisites:** Declared in Curriculum and Instruction: Secondary Mathematics Education MS

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 495 – STUDENT TEACHING IN SCIENCE IN THE MIDDLE SCHOOL**

2-12 credits.

Supervised student teaching at the middle school. Employ and evaluate a variety of approaches to science curriculum and instruction.

**Requisites:** Declared in Curriculum and Instruction: Secondary Science Education MS and CURRIC 390

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 496 – STUDENT TEACHING OF ENGLISH IN THE HIGH SCHOOL**

2-12 credits.

**Requisites:** Declared in Curriculum and Instruction: Secondary English Education MS**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**CURRIC 497 – STUDENT TEACHING IN MIDDLE SCHOOL MATHEMATICS**

4-12 credits.

Supervised student teaching at the middle school. Employ and evaluate a variety of approaches to mathematics curriculum and instruction.

**Requisites:** Declared in Curriculum and Instruction: Secondary Mathematics Education MS**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**CURRIC 500 – LITERACY AND LANGUAGE DEVELOPMENT**

3 credits.

Survey and critical analysis of language and literacy development in and out of school, with a focus on the elementary school years.

**Requisites:** Declared in Elementary Education or graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2021**CURRIC/COMP SCI 502 – THEORY AND PRACTICE IN COMPUTER SCIENCE EDUCATION**

1 credit.

Computer science educational pedagogy and general teaching practices. Practical experience gained through tutoring students. Knowledge of object-oriented programming required.

**Requisites:** COMP SCI 300 or 302 or declared in Computer Science graduate program**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**CURRIC 503 – LITERACY ACROSS THE CURRICULUM**

3 credits.

Survey and critical analysis of theories and practices for literacy development across the curriculum. Reading, writing, oral language, and technology as situated in the content areas. Focus on middle and high schools.

**Requisites:** Declared in Elementary Education or graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**CURRIC 504 – LITERACY ASSESSMENT AND INTERVENTION**

3 credits.

Theories and practices in regard to assessing and intervening in literacy development for a variety of different sorts of learners, including those facing various reading or writing difficulties.

**Requisites:** CURRIC 318 or graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2019**CURRIC/RP & SE 506 – STRATEGIES FOR INCLUSIVE SCHOOLING**

3 credits.

Comparison of historical and current practices in special education; legal, philosophical, and programmatic changes leading to inclusive models of education; emphasis on concepts of collaboration, cooperative learning structures, and curricular and instructional adaptations to accommodate learners with disabilities in general education classrooms.

**Requisites:** Sophomore standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Apply disability law to understand students with disabilities in the classroom.

Audience: Both Grad &amp; Undergrad

2. Utilize disability law to create inclusive classroom for students with disabilities

Audience: Both Grad &amp; Undergrad

3. Apply understanding of varied types of disabilities to students

Audience: Both Grad &amp; Undergrad

4. Utilize a general understanding of differentiation and universal design for learning practices

Audience: Graduate

### **CURRIC 507 – INCLUSIVE EDUCATION IN SECONDARY SCHOOLS** 2 credits.

Comparison of historical and current practices in special education; legal, philosophical, and programmatic changes leading to inclusive models of education; emphasis on concepts of universal design for learning, methods of differentiation, collaboration among educators, and responsive instructional strategies for learners with disabilities in general education classrooms.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. explore and engage with strategies and techniques for including students with diverse learning needs in general education schools using concepts of collaborative teamwork, active learning models, Universal Design, and differentiation.

Audience: Graduate

2. collectively build a historical overview of special education services to understand the legal, philosophical, and programmatic changes leading toward and beyond inclusive models of education.

Audience: Graduate

3. apply and analyze a process designed for general educators and specialists to co-plan an upcoming curriculum that is responsive to learners with diverse abilities.

Audience: Graduate

### **CURRIC 510 – COMMUNITY-BASED PRACTICUM** 1-4 credits.

Provides an opportunity to connect teaching and learning theory and research knowledge to community based settings. Explore how community education is organized and educational services are delivered. Interact with children and develop an identity as an educator. Develop the necessary knowledge and skills required to work with students and educational professionals in a supervised community-based educational setting.

**Requisites:** Declared in Curriculum and Instruction MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **CURRIC 511 – SCHOOL-BASED PRACTICUM** 1-4 credits.

Provides an opportunity to connect teaching and learning theory and research knowledge to the practical setting of schools. Explore how schools are organized and educational services are delivered. Interact with students and develop an identity as an educator. Develop the necessary knowledge and skills required to work with students and educational professionals in a supervised school-based setting.

**Requisites:** Declared in Curriculum and Instruction MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **CURRIC/ED POL/HISTORY/JEWISH 515 – HOLOCAUST: HISTORY, MEMORY AND EDUCATION** 3 credits.

Explores the ways in which Holocaust history, memory and education are mutually entangled, politically charged and morally complex. Using primarily American sites of memory, critically analyze a variety of representations of the Shoah--in literature, films, memoirs, monuments, museums and classrooms.

**Requisites:** Junior standing

**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Examine and question cultural assumptions and knowledge claims about race, ethnicity, and religion

Audience: Both Grad & Undergrad

2. Improve written and oral communication skills by engaging in critical conversations, making presentations, practicing group projects and writing papers

Audience: Both Grad & Undergrad

3. Demonstrate self-awareness and empathy to other worldviews and cultural differences and apply course concepts outside of the classroom by engaging in respectful conversations about race, ethnicity, and religion in our multi-cultural society

Audience: Both Grad & Undergrad

4. Construct and develop a meaningful project around a topic that interests you

Audience: Both Grad & Undergrad

5. Articulate answers to and pose complex questions regarding ethical issues, connecting historical events to present circumstances regarding racial inequalities

Audience: Undergraduate

6. Develop your academic writing by thinking carefully through your ideas and editing your work and your peers'

Audience: Undergraduate

7. Pose and answer complex historical and ethical questions regarding the Holocaust, genocide, their representations and political uses, connecting historical events to present circumstances regarding racial inequalities

Audience: Graduate

8. Develop interpersonal academic skills by editing peers' work

Audience: Graduate

**CURRIC/ED POL/RELIG ST 516 – RELIGION AND PUBLIC EDUCATION**

3 credits.

Examines theories and practices related to the role of religion in public schooling and its accompanying tensions: political and philosophical, practical and personal.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**CURRIC 534 – TOOLS FOR GAME DESIGN**

1 credit.

An introduction to tools used to design and develop video games.

**Requisites:** None

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Build and publish games

Audience: Both Grad & Undergrad

2. Use version control in the building of games

Audience: Both Grad & Undergrad

3. Work both individually and in a team on a game project

Audience: Both Grad & Undergrad

4. Collect player/game data from a game project

Audience: Graduate

5. Calculate play metrics from player/game data

Audience: Graduate

**CURRIC 535 – FOUNDATIONS OF LITERACY**

2 credits.

Examines key arguments in literacy studies to help future teachers make intentional and informed decisions about teaching literacy.

**Requisites:** Declared in Curriculum and Instruction MS: Secondary Education Teaching Certification

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Examine key arguments in the history of literacy studies from the perspective of scholars in diverse fields.

Audience: Graduate

2. Analyze their own literacy context critically.

Audience: Graduate

3. Describe the implications of literacy ideologies present at a youth community site.

Audience: Graduate

**CURRIC 537 – TEACHING DIVERSE LEARNERS**

3 credits.

Designed to foster cultural awareness at the individual and institutional levels, and to promote equitable and anti-racist behaviors as well as social justice in educational practices.

**Requisites:** Declared in Educational Psychology MS: Professional Educator (MSPE) MS

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2021

**CURRIC 545 – TEACHING WORLD LANGUAGES I**

3 credits.

Fundamental elements of curriculum development, instruction, and assessment for teaching world languages in PK-12 contexts.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use a variety of curricular resources (World-Readiness Standards, Can-Do Statements, Social Justice Standards, Intercultural Reflection Tool) to plan and implement justice-oriented language instruction.

Audience: Graduate

2. Develop meaningful, contextualized, student-centered learning experiences to promote interpersonal, interpretive, and presentational communication.

Audience: Graduate

3. Adapt language instruction for a variety of program models: Foreign Language in the Elementary Schools (FLES), Foreign Language Exploratory (FLEX), middle/high school.

Audience: Graduate

**CURRIC 546 – TEACHING WORLD LANGUAGES II**

2 credits.

Provides in-depth examination of the issues associated with elements of teaching world languages in PK-12 contexts. Focuses on classroom community and procedures as well as advanced elements of instructional design and assessment.

**Requisites:** CURRIC 545

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Establish and maintain an equitable and inclusive classroom environment.

Audience: Graduate

2. Develop meaningful formative and summative assessments and use data from those assessments to inform instruction.

Audience: Graduate

3. Modify and differentiate instruction for linguistically and racially diverse students (e.g., heritage language learners, minoritized students).

Audience: Graduate

4. Articulate specific ways to diversify language educators and learners in order to pursue and enact a more equitable profession.

Audience: Graduate

**CURRIC 550 – METHODS, MATERIALS AND ACTIVITIES IN EARLY CHILDHOOD EDUCATION**

3 credits.

Developing strategies for teaching young children. Relationships between development and culture, play, the variety of teachers' roles in learning, the functions of observation and assessment, developmentally appropriate practices, engaging children in their own learning, and constructing a curriculum unit.

**Requisites:** Declared in Elementary Education, Special Education, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Become familiar with a variety of early childhood methods and materials and their use with children in a variety of learning contexts.

Audience: Both Grad & Undergrad

2. Plan instruction for children ages 3-8 years using strategies that responds to the ways young children learn, addresses an array of subject matter knowledge, and that promotes culturally responsive experience.

Audience: Both Grad & Undergrad

3. Learn teaching strategies for planning an equitable student-centered curriculum.

Audience: Both Grad & Undergrad

4. Identify the equity and developmental theories underlying these methods and materials

Audience: Graduate

**CURRIC 559 – ADVANCED PRACTICES IN THE TEACHING OF SOCIAL STUDIES**

3 credits.

Explore research and practice on topics such as social studies instruction for diverse pupils, critical thinking, and authentic assessment.

**Requisites:** CURRIC 359 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 564 – ADVANCED PROBLEMS ON THE TEACHING OF WORLD LANGUAGES**

3 credits.

Recent developments in technologies and methods of teaching world languages; exploration and analysis of teaching practices; critical review of relevant literature and adaptation of materials; recent innovations in elementary and secondary world language teaching.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**CURRIC 576 – TOPICS IN GAME DESIGN**

3 credits.

An exploration of theories, issues, and histories within a specialized area of game design such as developing games for a particular genre, for social impact, or using novel technologies.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate with large teams about complex and specialized tasks using common project management techniques.

Audience: Undergraduate

2. Identify the affordances and constraints of different game design contexts including specific genres, new technologies, and specialized subfields.

Audience: Both Grad & Undergrad

3. Design, describe, and/or implement a ludic exemplar based on a narrow set of design principles.

Audience: Both Grad & Undergrad

4. Articulate possible directions for future experiments within game design.

Audience: Both Grad & Undergrad

5. Put new trends and developments in games into conversation with critical theories of technology, power, and education.

Audience: Graduate

**CURRIC 590 – ADVANCED PRACTICES IN THE TEACHING OF SCIENCE**

3 credits.

An extended and in-depth analysis of the key themes in science education introduced in the introductory methods course as well as an exploration of additional topics important to beginning science educators.

**Requisites:** CURRIC 390 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 596 – ADVANCED PRACTICES IN TEACHING ENGLISH IN SECONDARY SCHOOLS**

3 credits.

Explores central issues of theory and practice in the teaching of English in middle and secondary schools using an inquiry framework in which beginning and experienced teachers act as researchers.

**Requisites:** CURRIC 396 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 604 – SEMINAR ON LITERACY**

3 credits.

Examines current research on reading, writing and varieties of oral language from perspective of sociocognitive and sociocultural literacy studies. Explore various theories of school, community, and workplace literacy, different approaches to literacy pedagogy and curricula, assessment practices, and interventions for learners with various needs.

**Requisites:** CURRIC 318 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**CURRIC 606 – CRITICAL PERSPECTIVES ON DIGITAL MEDIA IN EDUCATION**

2-3 credits.

Critical review of literature on digital media and learning; utilization of digital media inside and outside classrooms.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**CURRIC/LIS 620 – FIELD PROJECT IN LIBRARY AND INFORMATION AGENCIES**

3 credits.

Analysis of field experience through seminars, individual conferences, required reading and consultations with cooperating librarians and information specialists. Enrollment limited.

**Requisites:** LIS 601 and 602 or concurrent enrollment

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **CURRIC 625 – BILINGUAL-BICULTURAL EDUCATION PRACTICUM** 1 credit.

Field experiences that promote bilingualism-biculturalism and content area learning in K-12 schools; review of pedagogies and methodologies that support bi/multilingual pupils; application of effective pedagogies, methodologies, and instructional practices; taught in Spanish.

**Requisites:** CURRIC 671 or 676 or concurrent enrollment in CURRIC 671 or 676

**Repeatable for Credit:** Yes, for 4 number of completions

**Learning Outcomes:** 1. Identify bilingual pedagogical practices and instructional methods to both draw on and expand bilingual learners' linguistic repertoires

Audience: Undergraduate

2. Apply standards for Spanish language development and English language development as well as content area standards to teaching, learning, and instructional design

Audience: Undergraduate

3. Compose (1) language objectives and (2) content objectives as part of their instructional and assessment implementation practices

Audience: Undergraduate

### **CURRIC 626 – ACTION RESEARCH IN SCHOOLS** 3 credits.

Provides instruction and support for individual research on personal practices in schools.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

### **CURRIC 630 – PROFESSIONAL DEVELOPMENT FOR SCHOOLS AND COMMUNITY EDUCATORS** 1-6 credits.

Specific construction and theoretical implications for professional in-service and field student teaching assignments. Learning materials and school systems program needs for children.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **CURRIC 632 – LITERATURE AND LITERACY** 3 credits.

Role of literature in literacy development from pre-school to high school. Theories and practices in regard to interpretation, reader response, criticism, genres, multiculturalism, and literature for early literacy and in content learning.

**Requisites:** Declared in Elementary Education or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

### **CURRIC 635 – EPISTEMOLOGY OF MATHEMATICS FOR TEACHERS** 2 credits.

Focuses on the nature of knowing mathematics.

**Requisites:** Declared in Curriculum and Instruction: Secondary Mathematics Education MS

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **CURRIC 645 – FOUNDATIONS OF EDUCATIONAL ASSESSMENT** 3 credits.

Gain the ability to think critically and creatively about the role of assessment in our education system, aiming to pave a pathway toward better assessments. Seeks to challenge standard methods in assessment design and development, as well as psychometric notions of what constitutes good assessment. Through the application of critical pedagogies and theories, create assessments that align with the modern understanding of how people learn, placing justice at the core of the commitment and design principles.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Articulate, based on a solid understanding of the existing literature, what educational assessment is and how it has been changing over time.

Audience: Graduate

2. Articulate the qualities pertinent to educational assessment and how they manifest across diverse contexts where educational assessments are utilized to inform both formal and informal decisions.

Audience: Graduate

3. Identify educational systemic structures within society and educational system that have influenced the development of educational assessment over time.

Audience: Graduate

4. Articulate the prevailing trends and emerging themes that have the potential to reshape educational assessment, along with their implications.

Audience: Graduate

5. Utilize assessment design frameworks with critical lenses to propose equitable assessment methods and tools.

Audience: Graduate

6. Employ critical thinking to assess the qualities of assessments, such as validity and fairness.

Audience: Graduate

### **CURRIC 660 – FOUNDATIONS OF EARLY CHILDHOOD EDUCATION** 2-3 credits.

Trends, basic principles, issues, evaluation, and curriculum planning for the group education of preschool children.

**Requisites:** Junior standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Deepen understanding of young children's lived experiences in social and cultural contexts

Audience: Both Grad & Undergrad

2. Consider your own early learning experiences and those of your classmates

Audience: Both Grad & Undergrad

3. Recognize the power and importance of families and communities in early learning

Audience: Both Grad & Undergrad

4. Examine varied approaches to the schooling of young children

Audience: Both Grad & Undergrad

5. Acknowledge issues of injustice and inequity in early childhood classrooms

Audience: Both Grad & Undergrad

6. Reimagine early childhood classrooms in ways that sustain young children's languages, abilities, and racial identities

Audience: Both Grad & Undergrad

7. Examine the roles of early childhood theory and research on practice

Audience: Graduate

### **CURRIC 663 – LEARNING ENVIRONMENTS FOR INITIAL EDUCATION PROGRAMS** 3 credits.

Historical foundations, basic theories, and contemporary patterns of instruction underlying educational programs for young children (3-9). Integrating and contrasting features of comprehensive curricula for the very young: play, communication, self concepts, health, arts, motor, literacy numeracy, science, and other areas of educational concern.

**Requisites:** Junior standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the nature of high-quality (culturally, linguistically, and developmentally responsive) environments in early education (ECE)

Audience: Both Grad & Undergrad

2. Understand the teaching practices for implementing and sustaining high-quality environments for ECE

Audience: Both Grad & Undergrad

3. Understand the relationships between children and environment

Audience: Both Grad & Undergrad

4. Recognize what children and teachers do in learning environments

Audience: Both Grad & Undergrad

5. Evaluate and plan quality learning environments

Audience: Both Grad & Undergrad

6. Understand how teachers promote student engagement and belonging in environments for ECE

Audience: Both Grad & Undergrad

7. Understand how a learning environment relates to equity and agency

Audience: Both Grad & Undergrad

8. Describe and analyze the historical and theoretical foundations for different types of classroom environment for ECE

Audience: Graduate

**CURRIC 670 – THEORIES OF BILINGUALISM AND BILITERACY**

3 credits.

Study of contemporary theoretical perspectives, constructs, models, and frameworks related to bilingualism and biliteracy development and relationship between home/first languages (i.e., Spanish) and second/additional languages (i.e., English); review of cultural backgrounds and experiences, transnational experiences and mobility, and social and linguistic identities; application of theory to curriculum and instructional decision-making for K-12 bilingual learners; taught in Spanish. Demonstrate advanced-low Spanish language proficiency

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Demonstrate understanding of bilingualism and biliteracy as dynamic sociocultural processes that vary widely from student to student

Audience: Both Grad &amp; Undergrad

2. Demonstrate theoretical understandings of bilingualism and biliteracy, including relevant constructs, frameworks, and models

Audience: Both Grad &amp; Undergrad

3. Articulate, critique, and justify implications of particular constructs, frameworks, and models on bi/multilingual pupils' schooling experiences

Audience: Both Grad &amp; Undergrad

4. Articulate, critique, and justify implications of particular constructs, frameworks, and models on teaching, learning, and curriculum for bi/multilingual pupils

Audience: Both Grad &amp; Undergrad

5. Articulate, critique, and justify how particular theoretical constructs, frameworks, and models can help realize equitable and humanizing schooling for bi/multilingual pupils

Audience: Both Grad &amp; Undergrad

6. Articulate and justify critical perspectives about varied and shifting definitions of what counts as bilingualism and biliteracy, and who has the power to define them

Audience: Graduate

7. Synthesize latest research and scholarship about relevant course topics to identify pressing theoretical/conceptual inquiries in bilingual-bicultural education

Audience: Graduate

**CURRIC 671 – EDUCATIONAL LINGUISTICS FOR BILINGUAL TEACHERS**

3 credits.

Study of applied linguistics in relation to Spanish, English, and bilingualism; introduction to the basic structures of language (i.e., phonetics and phonology, morphology and semantics, syntax, pragmatics); application of educational linguistics to curriculum and instructional decision-making for K-12 bilingual learners; taught in Spanish. Demonstrate advanced-low Spanish language proficiency

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Demonstrate knowledge of basic forms and structures of Spanish, English, and bilingual language practices

Audience: Both Grad &amp; Undergrad

2. Identify and analyze bilingual-biliteracy processes and how multiple languages relate, shape, and reinforce one another

Audience: Both Grad &amp; Undergrad

3. Analyze and differentiate bilingual learners' linguistic repertoires and how they are shaped by their contexts for language use, learning, and development

Audience: Both Grad &amp; Undergrad

4. Analyze bilingual learners' language practices by applying knowledge of Spanish, English, and bilingual language practices

Audience: Both Grad &amp; Undergrad

5. Articulate and justify critical perspectives about historical perspectives on bilingualism and biliteracy, and who has the power to define them

Audience: Graduate

6. Synthesize latest research and scholarship in educational linguistics to identify pressing theoretical/conceptual and empirical inquiries in bilingual-bicultural education

Audience: Graduate

**CURRIC 673 – LEARNING SECOND LANGUAGE AND LITERACIES**

1-6 credits.

Explores theoretical and practical aspects of second language and literacy development in schooling for English learners. Includes a fieldwork component. Informed by theories, students conduct and analyze data from classroom-based research, investigating implications for learning and teaching.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**CURRIC 674 – ADVANCED METHODS IN TEACHING ENGLISH AS A SECOND LANGUAGE**

3-6 credits.

Designed to help identify/develop and implement methodological approaches and techniques for supporting the language and literacy development of English learners that coordinate with current theories on language and learning.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 675 – GENERAL SEMINAR**

1-3 credits.

Subjects of current interest. Recent topics have included educational linguistics, language awareness, understanding language, foundations in teaching English or social studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CURRIC 676 – BILINGUALISM AND BILITERACY IN SCHOOLS**

3 credits.

Study of pedagogies, frameworks, and methodologies appropriate for bilingual-bicultural education; review of contemporary scholarship about rigorous, responsive, and effective practices with K-12 bilingual learners; review of Spanish and English language standards and bilingual standards-based teaching and learning; taught in Spanish.

**Requisites:** Declared in Elementary Education BSE, Capstone Certificate in Spanish-English Bilingual-Bicultural Education or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and summarize broad issues related to equitable teaching and learning in/across two (or more) languages  
Audience: Both Grad & Undergrad

2. Integrate knowledge of teaching, learning, and curriculum to support bi/multilingual learning and development and K-12 bi(multi)lingual students  
Audience: Both Grad & Undergrad

3. Analyze strategies that build and develop students linguistic repertoires to facilitate content area learning and meaning making  
Audience: Both Grad & Undergrad

4. Articulate theoretical and methodological justifications about when, why, and how to teach in/across two (or more) languages across content areas  
Audience: Graduate

5. Compose (1) language objectives and (2) content objectives as part of their instructional and assessment planning practices  
Audience: Graduate

**CURRIC 690 – INDEPENDENT FIELD WORK**

1-9 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**CURRIC 699 – INDEPENDENT READING**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CURRIC 702 – SOCIOCULTURAL THEORY**

3 credits.

Sociocultural theories posit that the fundamental mechanism for teaching and learning is social interaction. Examine the varying positions within this generally body of theoretical literature, compare and contrast how each position construes the fundamentally social nature of thinking and learning, and consider the methods entailed by each given theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**CURRIC 704 – CURRICULUM PLANNING**

3 credits.

The concept of curriculum in modern American education.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**CURRIC 709 – DIGITAL MEDIA & TECHNOLOGY IN SCHOOLS**

1 credit.

Introduction for secondary educators to the role of digital media technologies in their classrooms. Covers major topics in digital media in teaching and design several instructional units that incorporate technology meaningfully into the classroom.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**CURRIC 712 – INTRODUCTION TO CURRICULUM AND INSTRUCTION: RESEARCH AND RESOURCES**

3 credits.

Become familiar with faculty, procedures, policy, and the wide range of research in curriculum and instruction.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**CURRIC 713 – TECHNOLOGY INTEGRATION FOR TEACHING AND LEARNING**

1-3 credits.

A broad introduction to the field of Educational Communications and Technology (ECT) and attempts to balance theoretical inquiry with "hands on" design work. Cover the theoretical foundations of ECT and explore new developments in technology, theory and practice. Identifies new horizons for practicing and pre-service teachers to leverage technology for their own professional and personal empowerment through thinking systematically about technology and the classroom.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2020**CURRIC 714 – RESEARCH AND EVALUATION PARADIGMS IN CURRICULUM AND INSTRUCTION**

3 credits.

An analysis of differing orientations to evaluation and research. Emphasis on assumptions, attitudes, and expectations of what constitutes scientific knowledge and explanation; relationship of research orientation, methods of inquiry, theory, and practice.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2020**CURRIC 715 – DESIGN OF RESEARCH IN CURRICULUM AND INSTRUCTION**

3 credits.

Introductory survey of empirical foundations of research. Development of methods and tools of research.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**CURRIC 716 – REFORM AND CHANGE IN CURRICULUM AND INSTRUCTION**

3 credits.

Social, political and epistemological assumptions underlying current efforts towards curriculum and instructional reform in elementary and secondary schools.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2021

**CURRIC 718 – INTRODUCTION TO NARRATIVE INQUIRY**

3 credits.

Introduction to material on framing, generating, gathering, and analyzing stories that people tell.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**CURRIC/COUN PSY/ED POL/ED PSYCH/ELPA/RP & SE 719 – INTRODUCTION TO QUALITATIVE RESEARCH**

3 credits.

Provides an overview of qualitative inquiry, examining assumptions, standards, and methods for generating and communicating interpretations. Methodological and theoretical works illustrate case study, ethnography, narrative, and action research. Does not include a field method component.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 721 – RESEARCH IN COMPUTING EDUCATION**

3 credits.

The history, theories, philosophies, tools, research, and technologies of Computing Education, with a focus on K-12 Computer Science Education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**CURRIC 723 – LIFE HISTORY: THEORIES & METHODS**

3 credits.

Focuses on framing, generating, collecting, and analyzing data gathered from interviews and documents related to people's lives.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CURRIC 726 – QUALITATIVE METHODS OF STUDYING CHILDREN AND CONTEXTS**

3 credits.

Examines the theoretical, methodological, and ethical issues in studying children from interpretive perspectives. A small group research project, focused on examination of an individual child and context, provides an introduction to qualitative methods within fieldwork.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**CURRIC 727 – INTERNATIONALIZING EDUCATIONAL KNOWLEDGE**

3 credits.

Starts with a simple proposition that 19th century modern school curriculum is concerned with making kinds of people: "the citizen", "a worker", "civic minded", "life-long learner", "motivated", "with grit", etc. Discussions explore "the building (and disseminating) of knowledge" in schools (curriculum) across nations, cultures, and within political and religious modes of thought, to understand how differences in the self and others are produced through schooling. Internationalizing education means understanding how curriculum, pedagogy, theories of learning, and notions of childhood from schooling generate "ways of thinking" about "kinds of people". Internationalizing the field of curriculum and instruction shows how difference is produced and categorized. Facilitates thinking about how regional and national representations of people go unexamined in school curriculums when studying "others".

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**CURRIC 729 – CLASSROOM MANAGEMENT FOR SECONDARY EDUCATORS**

1 credit.

Designed to inform students of basic principles of good classroom management within a social justice framework. Learn about motivating student learning through clear classroom management strategies, communicating with parents and families regarding student behavior, establishing positive teacher-student relationships, responding to challenging student behaviors, and responding to bullying.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CURRIC 731 – COLLABORATIVE TEAMWORK FOR INCLUSIVE SCHOOL REFORM**

3 credits.

Critically examine the process of collaboration and its multiple forms among professionals in the creation of inclusive school communities. Explore various methods and tools for collaboration that promote effective team relationships, problem solving, and co-planning of differentiated curriculum and instruction. Activities and projects are problem-based and focus on generating solutions to programmatic, student-specific, or school-wide issues related to inclusive education. Acquire skills to engage in collaborative teamwork and act as change facilitators within a school system.

**Requisites:** Declared in Educational Psychology MS: Professional Educator (MSPE) MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**CURRIC/STS 733 – PUBLIC ENGAGEMENT WITH SCIENCE**

3 credits.

Examines the influence of science in everyday life. Provides both academic context (research and theory) and a firsthand look at how science matters to people who are not themselves scientists.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify and critique common claims about the importance and value of science literacy, public understanding of science, and public engagement with science

Audience: Graduate

2. Describe the different ways in which researchers have attempted to measure and otherwise evaluate science literacy etc.

Audience: Graduate

3. Understand and be able to recognize the implications of social and cultural forces that shape particular episodes of public engagement with science.

Audience: Graduate

4. Describe and discuss the complex relevance of science in one particular public setting.

Audience: Graduate

5. Discuss the merits and challenges associated with common strategies for improving public engagement with science through formal education, museums, and sponsored outreach activities.

Audience: Graduate

**CURRIC/STS 734 – SCIENCE STUDIES AND SCIENCE EDUCATION**

3 credits.

Examination of the key ideas from the field of science and technology studies (history, philosophy, sociology of science, etc.) and how they have been taken up in both the school science curriculum as well as the science education research community.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**CURRIC 735 – EPISTEMIC PRACTICE AND SCIENCE TEACHING**

2 credits.

Pursues the following questions: Where does our scientific knowledge come from and how does science work to generate that knowledge? In what ways might science education meaningfully engage learners in science?

**Requisites:** Declared in Curriculum and Instruction: Secondary Science Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**CURRIC 736 – EDUCATING LINGUISTICALLY AND CULTURALLY DIVERSE LEARNERS**

2-3 credits.

Overview of issues that influence and determine the language and academic development of English language learners. Explore social, cultural and educational contexts and practices as they relate to the education of this population.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify the complexities of the terrain of schooling for multilingual learners.

Audience: Graduate

2. Know and analyze both concepts/theories and specific factors that affect the English learning and academic success of multilingual learners, and how they mutually inform one another.

Audience: Graduate

3. Apply concepts and theories from class to represented teachers, students, families, programs and practices, in order to see theory in practice.

Audience: Graduate

4. Critically reflect on current ideas and concepts in the field of ESL and language studies to examine the impact on linguistically and culturally diverse (and all) students.

Audience: Graduate

**CURRIC 737 – LINGUISTICS FOR EDUCATORS**

2 credits.

An introduction to language, literacy and linguistic diversity for teachers. Provides an overview of the components of language, the structure of the English language and how language functions, with special emphasis on how language is used in schools, with the goal of supporting teachers' work with multilingual learners. Through exploration of language(s) and a critical reflection of personal experiences as language users, language learners, language analysts and language advocates, enhance understanding of communicative repertoires as dynamic, fluid, and complex.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Engage in critical reflection of their own communicative repertoires, as well as those of others

Audience: Graduate

2. Develop explicit knowledge about language forms and functions in teaching and learning.

Audience: Graduate

3. Develop a responsive and expansive multilingual orientation to teaching and learning language(s) and content in the classroom

Audience: Graduate

4. Identify the components of language and how they relate to one another to produce meaning

Audience: Graduate

**CURRIC 744 – PERSPECTIVES IN MULTICULTURAL EDUCATION**

3 credits.

A critical examination of the conceptual and theoretical traditions that contribute to the educational reform and ideology known as multicultural education. Includes readings from ethnic studies, black studies, feminist theory, antiracist pedagogy, bilingual education, and critical race theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**CURRIC 747 – MASTERS CAPSTONE IN TEACHER EDUCATION**

3 credits.

Develop and complete a synthetic, research-based project. Projects are individualized to professional interests and draw from the knowledge gained from previous coursework and the experiences in practicum and student-teaching placements in area schools.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Understand how current ideas in educational research contribute to best practices in teaching through the development of a masters project that furthers their professional interests.

Audience: Graduate

2. Develop an integrated understanding of the theory and practice of some aspect of teaching and/or student learning as a result of completing their projects.

Audience: Graduate

3. Understand the conventions of various modes of reporting research/ project findings including written reports, research talks and roundtables, and poster presentations.

Audience: Graduate

**CURRIC/GEN&WS 760 – SEX/GENDER-RELATED ISSUES IN CURRICULUM AND INSTRUCTION**

3 credits.

A poststructural feminist analysis of educational discourse and practice; examines selected sex/gender issues in curriculum and instruction; explores some implications for classroom teaching of the complex interrelationships between sex/gender, race, social class, sexuality, and ability/disability.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**CURRIC 764 – GLOBALIZATION AND LINGUISTIC HUMAN RIGHTS IN EDUCATION**

2-3 credits.

An introduction to language instruction policies and linguistic human rights. Examines teaching and learning in a multilingual society. Explores the various dimensions of the language used in the schools for instruction in different countries during the globalization process.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2019

### **CURRIC 765 – GLOBALIZATION AND TEACHING: DIMENSIONS FOR CURRICULUM PLANNING**

3 credits.

Critically examines efforts to introduce teaching and curriculum on globalization in elementary and secondary schooling, as well as in teacher education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### **CURRIC 775 – THEORIES OF RACE, RACISM, AND RACIALIZATION IN EDUCATION RESEARCH**

3 credits.

Studies of race-related issues in education often borrow from a narrow conceptual field that can limit how the researcher forms and investigates questions. It is important for education researchers to develop a solid conceptual understanding of race, racism, and racialization, and the analytical concepts that relate to these ideas determine appropriate questions and theories to apply to the analysis of educational phenomena. Bringing together concepts related to race, racism, and racialization via core conceptual literature from philosophy, sociology, and cultural studies supports the design of education research that attends to these issues.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define race, racism, racialization, and related concepts.

Audience: Graduate

2. Synthesize core literature related to race, racism, and diversity across disciplines.

Audience: Graduate

3. Evaluate methodological implications of race, racism, and racialization for education research.

Audience: Graduate

### **CURRIC 778 – TEACHING, LITERACIES, AND IDENTITIES**

3 credits.

Examines issues related to identity through three interrelated concepts--teaching, literacies, and diversity--from a variety of perspectives, including psychology, sociology, narrative studies, and sociocultural perspectives. Explore what "identity" means and how each conceptualization is related to teaching and learning, especially for children from diverse communities and backgrounds.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

### **CURRIC/COUN PSY/ED POL/ED PSYCH/ELPA/RP & SE 788 – QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD METHODS I**

3 credits.

Introductory field methods experience in qualitative research. Learn to define good research questions, determine which methods of data collection and analysis are useful for addressing those questions, engage in these methods, reflect on their utility in education research.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 719

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **CURRIC/COUN PSY/ED POL/ED PSYCH/ELPA/RP & SE 789 – QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD METHODS II**

3 credits.

Focus on data analysis and translation of finds and implications. Gain theoretical and practical knowledge and skills regarding coding and analysis techniques, use of qualitative analytic tools, strategies for sharing findings with audiences beyond research team.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 788

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **CURRIC 790 – MASTER'S PROJECT OR THESIS**

1-9 credits.

Planning and completing a master's project or thesis.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **CURRIC 799 – MASTER'S INDEPENDENT STUDY**

1-3 credits.

Student-designed opportunity to explore a subject in depth.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CURRIC 802 – DISCOURSE ANALYSIS**

3 credits.

Theories and methods for analyzing "discourse" or language in use. Covers formal and informal written text, formal and informal oral speech, and face-to-face and online social interaction, with particular focus on cultural and social institutions and norms (such as school) and learning through social interaction.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**CURRIC/ED PSYCH/L I S 803 – COMPUTATIONAL RESEARCH METHODS**

3 credits.

Provides a broad overview of ways of formulating and investigating novel questions with tools from educational data mining and learning analytics including social network analysis, natural language processing, Markov modeling, Bayesian inference, and agent-based modeling.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CURRIC 805 – GUIDING AND DIRECTING THE SCHOOL READING PROGRAM**

3 credits.

Issues and practices in reading program development from first through twelfth grade. Emphasis on the various roles and responsibilities of instructional leaders in reading program development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**CURRIC 809 – POLITICS OF STEM EDUCATION**

3 credits.

In recent years, there has been an increase in attention to what has come to be known as STEM education in education circles and in the public sphere. Although this focus on STEM may seem recent, it is part of a long history of interest in the STEM disciplines. Consider STEM education from a political perspective by examining its histories, philosophies, policies, and effects.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Read and interpret federal, state, and local policy documents and reports related to STEM education and how these policies differ based on their authors and intended audience.

Audience: Graduate

2. Explore the history and philosophy of STEM education in the United States and, to a lesser extent, globally.

Audience: Graduate

3. Explore how STEM education coincides with other elements of education such as teacher education, pedagogy, curriculum, and policymaking.

Audience: Graduate

4. Consider how STEM education interacts with its component subjects (i.e., science, technology, engineering, and mathematics, the arts [in part]) as well as the subjects that are not implied in the acronym (e.g., social studies, literacy).

Audience: Graduate

**CURRIC 810 – GOALS, CONTENT AND PROGRAMS IN MATHEMATICS EDUCATION**

3 credits.

Analysis of current programs and the identification of the mathematical content of K-12 education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**CURRIC 811 – THE INSTRUCTION OF MATHEMATICS**

3 credits.

Analysis of current research and examination of current programs to identify how they reflect different theories of learning and instruction.

**Requisites:** CURRIC 810

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**CURRIC 818 – TEACHING CONTROVERSIAL ISSUES**

3 credits.

Critically examines different lines of research in controversial issues instruction such as the contextual factors affecting the teaching of controversial topics, and the instructional practices involved in teaching controversial issues. Contextual factors affecting teachers' decisions to teach controversial issues or topics include official curricular policies, community beliefs, emotional histories, and teachers' differing beliefs and sense of purpose. Examines the affordances and constraints of different pedagogical approaches to teaching controversial issues such as the use of discussion and deliberation, as well as pedagogies that recognize the importance of trust, power, emotion, and personal connections.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Evaluate the different contextual factors affecting teachers' decisions to teach controversial issues or topics  
Audience: Graduate

2. Assess the affordances and constraints of different pedagogical approaches to teaching controversial issues

Audience: Graduate

**CURRIC/ED PSYCH 821 – CONSTRUCTIONISM**

3 credits.

Survey of constructionist theory, research, and tools. Develop a deeper understanding of the history, theories, philosophies, tools, research, and technologies of constructionism and its children.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**CURRIC 823 – COLONIALITY OF LANGUAGE AND SCIENCE IN EDUCATION**

3 credits.

Explores interdisciplinary theories on coloniality used in education research, with a focus on historicizing and interrogating hierarchies of language, race, and scientific reason. Examines distinct analytics of power offered by raciolinguistic perspectives, postcolonial science studies, and postfoundational curriculum studies.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Read and discuss core literature related to postcolonial science studies, raciolinguistic studies, and cultural studies, and articulate implications of these theories for education research, policy, or practice.

Audience: Graduate

2. Describe how science, language, voice, race, and coloniality have been theorized across literatures.

Audience: Graduate

3. Analyze assumptions of science, language, race, or coloniality in an educational artifact and makes explicit the analytic of power

Audience: Graduate

4. Research and write a paper examining the coloniality or racialization of language, science, and education in relation to the student's research interests.

Audience: Graduate

**CURRIC 829 – PROSEMINAR IN AMERICAN CURRICULUM THEORY: 1890-PRESENT**

3 credits.

Major movements in the field such as Herbartianism, scientific curriculum planning, rational decision making, group process, and structure of the disciplines. Analysis of major documents and leading figures.

**Requisites:** CURRIC 662, 704, or 706**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**CURRIC 830 – THEORY AND DESIGN OF THE CURRICULUM**

3 credits.

Dimensions of theory and their interrelationships with reference to the curriculum field.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023

**CURRIC 835 – FOUNDATIONS OF SOCIAL STUDIES EDUCATION**

2 credits.

Focuses on helping pre-service teachers understand what it means to teach social studies for democratic citizenship. Focuses on central debates within social studies education and considers how different national, historical, economic, and political contexts have shaped social studies curricula. Offers an opportunity to compare and contrast social studies education curricula and approaches in diverse national contexts.

**Requisites:** Declared in Curriculum and Instruction MS: Secondary Education Teaching Certification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Assess the central debates within social studies and consider how these debates have shaped the structure and goals of social studies curricula in different educational contexts.

Audience: Graduate

2. Make connections between educational theory and the use of different pedagogical strategies.

Audience: Graduate

3. Evaluate and discuss relevant journal articles and book chapters.

Audience: Graduate

**CURRIC 840 – FIELD WORK IN SCHOOL READING PROGRAMS**

2-7 credits.

Supervised field experience in working with school-wide reading programs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**CURRIC 844 – CULTURALLY RELEVANT PEDAGOGY**

3 credits.

Pedagogy that explores the relationships between culture and learning as well as teacher ideology and beliefs systems. Examines critical pedagogy and pedagogies of resistance.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**CURRIC 860 – SUPERVISION IN TEACHER EDUCATION**

1-3 credits.

For those who are or wish to be university supervisors or cooperating teachers in practicum or student teaching programs. Study and discussion of factors which enter into the supervision of prospective teachers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CURRIC 864 – SEMIOTICS FOR EDUCATION**

1-3 credits.

Dedicated to Semiotics or the study sign action for Education purpose, described as any activity or process including the production of meaning and apprenticeship.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

**CURRIC 900 – ADVANCED SEMINAR IN DIGITAL MEDIA**

2-3 credits.

Survey and critical analysis of selected research and other literature in the major divisions of the field, with emphasis according to individual interest.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CURRIC 912 – WRITING IN EDUCATIONAL RESEARCH**

3 credits.

Examination of substantive and stylistic elements of writing in the field of education research. Development of individual skills within and mastery through analysis, practice, and peer editing.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify writing in education and its primary purpose within the scholarly community

Audience: Graduate

2. Identify the main elements of high-quality writing in education and recognize how they work together to accomplish an author's purpose

Audience: Graduate

3. Produce a piece of scholarly writing in their own field of study within education that is of publication quality

Audience: Graduate

**CURRIC/COM ARTS 914 – HOW GAMES CHANGE US**

3 credits.

Video games can be powerful experiences that take us to new worlds, teach us about complex systems, and provoke a range of emotions. Games transform us while we play, and some of these changes can be hard to predict and understand. Games can disrupt our sense of self, reshape our pleasures and feelings, lead us to question deeply held values, and allow us to experience new forms of embodiment through an avatar. A growing body of research in game studies engages with this potential for expansive change by focusing on player experience from a variety of methodological perspectives, including phenomenological, feminist and queer theory, critical disability studies, learning sciences, ecocriticism, and media archeology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Devise, plan, and begin a research project in game studies.

Audience: Graduate

2. Articulate the disciplinary tenets and controversies of game studies and position your work in relation to other game scholars.

Audience: Graduate

3. Use strategic and purposeful reading methods to approach dense theoretical texts.

Audience: Graduate

4. Make clear and theoretically informed arguments about how a player is changed in the process of playing a game.

Audience: Graduate

5. Describe some of the common ways game designers have used the transformative potential of games and other design choices that have not been explored.

Audience: Graduate

**CURRIC 916 – SMR: SPECIAL TOPICS IN RESEARCH & EVALUATION IN CURRICULUM & INSTRUCTION**

3 credits.

In the past few decades, social thought and philosophy have provided alternative arguments and styles of reasoning in thinking about the history and sciences of education. Explores readings and the importance of this literature to education in multiple layers; provides ways of thinking about difference outside of theories of representation and identity; embodies ways of engaging the knowledge of science and the political in schooling; provides alternative strategies for discourse analyses; problematizes the givenness of the subject of schooling as the object of change; (re)vises notions of materialism and power in understanding the effects of schooling; provides ways of thinking about knowledge and language as not merely an epiphenomena to structures; and historically explores the limits of theories of practice that are given as what is real and useful.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**CURRIC/ENVIR ST 932 – FOUNDATIONS OF ENVIRONMENTAL AND SUSTAINABILITY EDUCATION**

3 credits.

Education is often portrayed as a critical part of the solution to the intertwined problems of environment and society. Examines environmental education and related traditions such as nature study, conservation education, and outdoor education, as well as more recent movements such as place-based education and education for sustainability. Grounds discussions in concrete examples of educational practice, considers historical and contemporary critiques of environmental education.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**CURRIC 943 – MOBILITY, LANGUAGE & EDUCATION**

3 credits.

Engages in consideration of and deep dialog around cutting-edge theoretical approaches and framings to languages, literacies, mobility, communication, learning and teaching globally, and to show what different perspectives may offer to understandings of language-in-use across varied global educational and life contexts.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2021

**CURRIC/MUSIC 946 – PAST PERSPECTIVES ON MUSIC EDUCATION**

3 credits.

Focus on analysis of music education in primary and secondary schools via examination of historical, philosophical, and psychological sources. Explore ideas that have shaped the field in the past and investigate the influence of these ideas on current thinking and practice.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Describe the history of music education  
Audience: Graduate

2. Articulate the concept of interest convergence and how it can apply to the history of music education

Audience: Graduate

3. Demonstrate ability to connect theory and practice in music educational approaches

Audience: Graduate

**CURRIC 947 – CURRENT ISSUES IN MUSIC EDUCATION**

3 credits.

An exploration of current issues facing music education and an examination of future directions for the field. Identify and investigate individual topics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CURRIC 950 – SEMINAR IN THE STUDY OF TEACHER EDUCATION**

3 credits.

Examination of issues related to preservice teacher education and teacher education reform.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CURRIC 964 – SEMINAR IN WORLD LANGUAGE EDUCATION**

1-3 credits.

Develop a review of literature and a research project related to Second Language acquisition.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**CURRIC 975 – GENERAL SEMINAR**

2-3 credits.

For the exploration of new frontiers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**CURRIC 976 – SEMINAR IN READING**

2-3 credits.

Series of advanced seminars on such topics as: diagnostic and remedial teaching; sociology of reading; developmental reading; linguistics in the teaching of reading; or others as designated.

**Requisites:** CURRIC 500 or 503

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2022

**CURRIC 990 – DISSERTATION RESEARCH**

1-12 credits.

Planning and completing a doctoral dissertation.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**CURRIC 991 – POST-SECONDARY TEACHING PRACTICUM**

3 credits.

Opportunity to gain an understanding about the design and instruction of teacher education courses.

**Requisites:** Declared in Curriculum and Instruction PhD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**CURRIC 999 – DOCTORAL INDEPENDENT STUDY**

1-3 credits.

Student-designed opportunity to explore a subject in depth.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## DAIRY SCIENCE (DY SCI)

### DY SCI 1 – COOPERATIVE EDUCATION/CO-OP IN DIARY SCIENCE

1 credit.

Full-time off-campus work experience which combines classroom theory with practical knowledge of operations to provide a background upon which to base a professional career. Students receive credit only for the term in which they are actively enrolled and working. The same work experience may not count toward credit in another course.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### DY SCI/AN SCI 101 – INTRODUCTION TO ANIMAL SCIENCES

3 credits.

An overview of animal sciences covering anatomy, physiology, nutrition, reproduction, genetics, management, animal welfare, and behavior of domesticated animals. Food animals are emphasized to discuss their contributions to humans.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate a uniform background of animal agriculture including animal growth, nutrition, reproduction, behavior, and breeds to facilitate learning in subsequent animal science courses

Audience: Undergraduate

2. Accurately use terminology associated with animal agriculture including but not limited to animals, management practices, industry, and equipment

Audience: Undergraduate

3. Identify major animal groups and breeds in the topic areas of companion, service, draft, food, and biomedical, their uses, and their care

Audience: Undergraduate

4. Critically analyze past, current, and future controversial issues in animal agriculture and demonstrate capacity for ethical reasoning and action

Audience: Undergraduate

5. Situate common contemporary animal production systems within the context of economic, social, and environmental sustainability

Audience: Undergraduate

6. Characterize the impacts of animal agriculture at global, national, regional, and local levels

Audience: Undergraduate

### DY SCI/AN SCI 102 – INTRODUCTION TO ANIMAL SCIENCES LABORATORY

1 credit.

Hands-on experience and demonstrations to develop practical skills with animals and to better understand the application of science to food production animals. It covers anatomy, physiology, nutrition, reproduction, genetics, management, animal welfare, and behavior of domesticated animals.

**Requisites:** DY SCI/AN SCI 101 or concurrent enrollment

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recall and summarize fundamental concepts in animal growth, nutrition, reproduction, and behavior to facilitate learning in subsequent animal science courses

Audience: Undergraduate

2. Accurately use terminology associated with animal agriculture including but not limited to animals, management practices, industry, and equipment

Audience: Undergraduate

3. Demonstrate proper handling, restraint, care, and management of food animals

Audience: Undergraduate

4. Identify anatomical parts of animal gastrointestinal and reproductive tracts, and explain the key functions of each part

Audience: Undergraduate

5. Classify common feedstuff and nutritional analysis used in the livestock industry

Audience: Undergraduate

6. Effectively engage in collaborative problem-solving and reflective practice

Audience: Undergraduate

7. Interpret and discuss scientific literature

Audience: Undergraduate

**DY SCI 205 – DAIRY CATTLE IMPROVEMENT PROGRAMS**

2 credits.

Dairy cattle evaluation and selection, including: linear type appraisal, dairy cattle judging, mating programs, breed comparisons, cattle marketing, and national genetic improvement programs.

**Requisites:** DY SCI/AN SCI 101

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge about the organizations that play major roles in the US dairy cattle genetics industry.

Audience: Undergraduate

2. Apply dairy cattle appraisal systems for evaluating functional conformation.

Audience: Undergraduate

3. Use dairy management scorecards that contribute to animal welfare and productivity.

Audience: Undergraduate

4. Identify characteristics associated with the North American dairy breeds and analyze their genetic progress.

Audience: Undergraduate

5. Recognize factors that influence dairy cattle values for merchandising and herd management purposes.

Audience: Undergraduate

6. Integrate herd level genetic improvement strategies, including corrective mating systems, to foster genetic progress and achieve producer goals.

Audience: Undergraduate

**DY SCI 233 – DAIRY HERD MANAGEMENT I**

3 credits.

Overview of practical dairy herd management with components of reproduction, nutrition, milk quality, raising dairy replacements, facilities and records. Laboratories emphasize practical applications, analyses of alternatives and decision making.

**Requisites:** DY SCI/AN SCI 101

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply dairy management terms and systems to real-world situations.

Audience: Undergraduate

2. Evaluate farm management practices using dairy industry benchmarks.

Audience: Undergraduate

3. Identify, formulate and solve dairy management related problems using appropriate information and approaches.

Audience: Undergraduate

4. Assess effective dairy herd management using dairy records.

Audience: Undergraduate

5. Work productively in teams to provide constructive input and leadership on dairy management related problems.

Audience: Undergraduate

6. Communicate effectively through written reports, oral presentations and discussions.

Audience: Undergraduate

**DY SCI 234 – DAIRY HERD MANAGEMENT II**

3 credits.

The second of a two course sequence designed as an overview of practical dairy herd management with components of animal welfare and handling, health, calf and heifer rearing, facilities and production economics.

Laboratories emphasize practical applications, investigation of alternatives and decision making.

**Requisites:** DY SCI 233

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply dairy management terms and systems to real-world situations.

Audience: Undergraduate

2. Evaluate farm management practices using dairy industry benchmarks.

Audience: Undergraduate

3. Identify, formulate and solve dairy management related problems using appropriate information and approaches.

Audience: Undergraduate

4. Assess effective dairy herd management using dairy records.

Audience: Undergraduate

5. Work productively in teams to provide constructive input and leadership on dairy management related problems.

Audience: Undergraduate

6. Communicate effectively through written reports, oral presentations and discussions.

Audience: Undergraduate

**DY SCI 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Honors research work under direct guidance of a faculty member in an area of Dairy Science. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 1998

**Learning Outcomes:** 1. Demonstrate content knowledge and skills as signified in an honors project or scholarly honors work.

Audience: Undergraduate

2. articulate their honors experience to peers

Audience: Undergraduate

3. apply perspectives to composed work through engagement in academic experiences

Audience: Undergraduate

**DY SCI 299 – INDEPENDENT STUDY**

1-3 credits.

Individual introductory to intermediate work under direct guidance of a faculty member in an area of Dairy Science. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize intellectual growth associated with independent study work through mentor discussion

Audience: Undergraduate

2. Identify diversity of viewpoints through critical thinking.

Audience: Undergraduate

3. Illustrate growth in reading, writing, and communication skills

Audience: Undergraduate

**DY SCI/AN SCI/NUTR SCI 311 – COMPARATIVE ANIMAL NUTRITION**

3 credits.

Nutrients and their assimilation, function, and interactions that affect metabolism in mammals. Differences among species will be used to emphasize unique digestive and physiological functions and how these differences affect metabolism of nutrients. Humans will be used in some comparisons. Follows physiological progression of nutrients, starting with an overview of the digestive tract followed by water and builds on specific roles of nutrients and substrates needed to provide basic processes required for maintenance, tissue accretion, and homeostatic regulation of nutrients.

**Requisites:** CHEM 341, 343, (BIOCHEM 301 or concurrent enrollment), or (BIOCHEM 501 or concurrent enrollment)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recall and summarize the cellular, tissue, and whole-body metabolism and function of nutrients

Audience: Undergraduate

2. Identify key elements of digestive anatomy that enable digestion and absorption of consumed nutrients

Audience: Undergraduate

3. Explain the physiological processes required for assimilation of consumed macro- and micro-nutrients

Audience: Undergraduate

4. Compare the similarities and differences in nutritional and metabolic strategies across species

Audience: Undergraduate

5. Evaluate the interactions between nutrients, animals, environment, physiological status, and functions and integrate these interactions to understand whole-animal nutrition

Audience: Undergraduate

**DY SCI/AN SCI 320 – ANIMAL HEALTH AND DISEASE**

3 credits.

Provides an introduction to and exploration of the interconnectivity between factors that affect health and disease and the central role of the immune system using infectious disease in animals as a key focus. Explores principal causes and identification of animal diseases, common diseases of farm animals, zoonoses and public health, disease prevention and management including biosecurity measures and host immune responses. Fosters appreciation for the translatability and universality of knowledge between human and animal health and disease.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), BIOCORE 383, or graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the interconnectivity and

interdependence between factors that influence health and disease

Audience: Both Grad & Undergrad

2. Discuss fundamental biological and scientific concepts valuable for a career in animal agriculture, veterinary medicine, human medicine or biomedical animal research

Audience: Both Grad & Undergrad

3. Translate novel knowledge of health and disease in one species to another

Audience: Both Grad & Undergrad

4. Integrate concepts covered in the course and explore in depth how they are relevant to a specific challenge currently faced in animal health or disease.

Audience: Graduate

### DY SCI/AN SCI 361 – INTRODUCTION TO ANIMAL AND VETERINARY GENETICS

2 credits.

The molecular basis for inheritance of monogenic and polygenic traits related to animal disease and production. An introduction to the principles of improving animal health and performance by selection and mating systems in companion animals, horses, livestock, and poultry.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), or (BIOCORE 382, 383, and 384) or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Retrieve, analyze and interpret gene and genomic data for species conservation, genetic variants and gene function  
Audience: Both Grad & Undergrad

2. Apply genotype data to determination of animal parentage and mapping of variants underlying genetic variation for animal traits  
Audience: Both Grad & Undergrad

3. Articulate knowledge of methods used to discover and modify genetic information for purposes of altering phenotypes  
Audience: Both Grad & Undergrad

4. Identify the key components of the basic genetic model describing the expression of phenotypic traits  
Audience: Both Grad & Undergrad

5. Explain the four forces that change gene frequency: selection, drift, mutation and migration  
Audience: Both Grad & Undergrad

6. Calculate and interpret the coefficients of a simple linear regression to determine the expected genetic change from phenotypic selection  
Audience: Both Grad & Undergrad

7. Calculate the detection probability of a recessive genotype for some simple mating systems  
Audience: Both Grad & Undergrad

8. Examine opportunities for genetic improvement of a trait in a species of interest using knowledge gained in the course, comparing alternative strategies and expected outcomes with the results of their analysis  
Audience: Graduate

### DY SCI/AN SCI 362 – VETERINARY GENETICS

2 credits.

The genetic basis for predisposition to disease or resistance to disease in livestock and companion animal species. Genetic defects, their discovery, diagnosis and treatment.

**Requisites:** DY SCI/AN SCI 361 or concurrent enrollment

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate critically the primary literature in the genetic variants and their role in animal phenotypes and disease  
Audience: Both Grad & Undergrad

2. Describe how gene x environment interactions affect gene expression and how these effects can be transmitted to the next generations  
Audience: Both Grad & Undergrad

3. Use animal biotechnology knowledge and biomedical models to design experiments to treat animal diseases and alter phenotypes  
Audience: Both Grad & Undergrad

4. Explain the processes by which epigenetic marks regulate gene expression and how these marks can be manipulated  
Audience: Both Grad & Undergrad

5. Generate a hypothesis from a set of observations related to the genetic basis of animal production and then design experiments to test the hypothesis  
Audience: Graduate

**DY SCI/AN SCI 363 – PRINCIPLES OF ANIMAL BREEDING**

2 credits.

Application of the principles of quantitative genetics to the improvement of livestock and poultry; breeding value estimation and selection techniques; effects of inbreeding and hybrid vigor; crossbreeding systems.

**Requisites:** DY SCI/AN SCI 361 or concurrent enrollment

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Calculate and interpret the values of narrow and broad sense heritabilities as well as repeatability of quantitative traits given their genetic and environmental variance components

Audience: Both Grad & Undergrad

2. Apply additive and multiplicative adjustments on phenotypic traits to correct for environmental effects

Audience: Both Grad & Undergrad

3. Interpret key components of sire summaries

Audience: Both Grad & Undergrad

4. Calculate expected correlated response to selection

Audience: Both Grad & Undergrad

5. Calculate retained hybrid vigor for various crossbreeding schemes in livestock

Audience: Both Grad & Undergrad

6. Perform quantitative genetic analysis of family data using linear regression and analysis of variance techniques

Audience: Graduate

**DY SCI/AN SCI 370 – LIVESTOCK PRODUCTION AND HEALTH IN AGRICULTURAL DEVELOPMENT**

3 credits.

Physical, biological and social nature of animal agriculture systems and their improvement in developing countries; analysis of the state of livestock research and development in the developing countries and the world role of U.S. animal agriculture.

**Requisites:** DY SCI/AN SCI 101, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY/BIOLOGY 101, or (BIOCORE 381 and 382), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the physical, biological and social nature of animal agriculture and its improvement in developing countries.

Audience: Both Grad & Undergrad

2. Analyze the constraints to improving livestock production on resource poor farms in developing countries.

Audience: Both Grad & Undergrad

3. Demonstrate knowledge about institutional infrastructures involved in research, education, and development projects in animal agriculture.

Audience: Both Grad & Undergrad

4. Develop skills needed to analyze and project strategies for improvement of a production system in a developing country.

Audience: Graduate

**DY SCI/AN SCI 373 – ANIMAL PHYSIOLOGY**

3 credits.

Covers physiological processes that regulate the body and the anatomy and function of different physiological systems. Includes interactions between organ systems, analysis of a single organ system from the molecular to the organismal, and comparisons and contrasts of organ systems among different domestic animal species.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), or BIOCORE 383

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate the physiological processes that regulate the body of different animal species (largely domestic animals and humans)

Audience: Undergraduate

2. Synthesize the regulation of an organ system from the molecular level all the way to the whole animal level and apply knowledge of a physiological mechanism to explain how a whole animal physiological process occurs

Audience: Undergraduate

3. Integrate interactions between different organ systems (homeostasis) and explain the anatomy of different physiological systems and their specific functions

Audience: Undergraduate

4. Determine how changes in internal or external environment will alter physiologic processes to deal with these changes

Audience: Undergraduate

5. Determine how changes in one physiological system may impact a different physiological system

Audience: Undergraduate

6. Describe similarities and differences in physiologic systems between animal species (with emphasis on domestic animals and humans)

Audience: Undergraduate

**DY SCI 375 – SPECIAL TOPICS**

1-4 credits.

Various topics in Dairy Science of current interest to undergraduate students.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain concepts and processes related to specific topics in Dairy Science

Audience: Undergraduate

2. Integrate and apply knowledge to understand issues associated with in Dairy industry

Audience: Undergraduate

3. Synthesize scientific literature to develop critical thinking skills

Audience: Undergraduate

**DY SCI 378 – LACTATION PHYSIOLOGY**

3 credits.

Focuses on lactation physiology across mammalian species. Structure and function of mammary glands; hormonal control of mammary development and lactation; cellular mechanisms of milk synthesis; the chemistry of milk synthesis; mastitis and other abnormalities of mammary functions.

**Requisites:** (BIOCHEM 301, 501, BMOLCHEM 314, or concurrent enrollment) and (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 382, 383, and 384), or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain mammary gland macro- and microanatomy and physiology

Audience: Undergraduate

2. Distinguish mammary gland development (in utero all the way through the lactation cycle)

Audience: Undergraduate

3. Explain the mechanisms governing mammalian milk synthesis and secretion

Audience: Undergraduate

4. Articulate the distinctive roles of systemic (i.e., hormonal) and local (i.e., autocrine) factors governing lactation and mammary gland development

Audience: Undergraduate

5. Discriminate components management interventions that might comprise or potentiate milk production in dairy cattle

Audience: Undergraduate

6. Assess the diseases that affect the mammary gland (i.e., mastitis) and learn proper milking routines to ensure high quality milk standard and welfare of dairy cattle

Audience: Undergraduate

7. Formulate a position on a research topic of societal debate using scientific literature and popular media

Audience: Graduate

8. Audit common dairy practices by evaluating the primary literature critically and using research-based knowledge acquired in class.

Audience: Graduate

**DY SCI 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Animal and Dairy Sciences and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Establish a network of mentors to support academic and professional growth

Audience: Undergraduate

2. Develop and illustrate specialized skills relevant to the focus of study associated with internship program

Audience: Undergraduate

3. Differentiate a diversity of disciplinary approaches and viewpoints in the agriculture industry

Audience: Undergraduate

**DY SCI 400 – STUDY ABROAD IN DAIRY SCIENCE**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**DY SCI/AN SCI 414 – RUMINANT NUTRITION & METABOLISM**

3 credits.

Integrates nutritional and biochemical concepts to understand digestive and metabolic processes in dairy and beef cattle, which are then quantitatively represented to predict and manipulate production and health outcomes.

**Requisites:** DY SCI/AN SCI/NUTR SCI 311, (BIOCHEM 301 or 501) or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Integrate nutritional and biochemical concepts to understand digestion and metabolism of nutrients.

Audience: Both Grad & Undergrad

2. Predict quantitative metabolic and production outcomes in ruminants.

Audience: Both Grad & Undergrad

3. Determine the role of metabolism in feed efficiency, animal production and health, and environmental load of ruminant production systems.

Audience: Both Grad & Undergrad

4. Investigate, interpret, summarize, and debate findings from scientific literature in order to develop and communicate recommendations for ruminant diets to identified audiences.

Audience: Both Grad & Undergrad

5. Apply research models to experimental and production data to predict metabolic outcomes

Audience: Graduate

**DY SCI/AN SCI 434 – REPRODUCTIVE PHYSIOLOGY**

3 credits.

Principles of reproductive physiology, improvement of fertility, and artificial insemination.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 152, (ZOOLOGY/BIOLOGY 101 and 102) or (BIOCORE 382, 383, and 384) or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify structures and function of reproductive anatomy in the male and female of all livestock species, humans, pets and wildlife

Audience: Both Grad & Undergrad

2. Identify hormones, their production site, physiology impacts and how to manipulate specific hormones to control reproduction either positively or negatively

Audience: Both Grad & Undergrad

3. Summarize critical components of reproductive technologies involved in breeding, semen collection, gamete biology and embryonic development. Demonstrate ability to monitor and manipulate cyclicity, artificial insemination, and pregnancy detection in both horses and pigs

Audience: Both Grad & Undergrad

4. Summarize events in reproduction from the cellular to whole animal level in livestock species, humans, pet species and wildlife

Audience: Both Grad & Undergrad

5. Communicate via oral, written, podcast, and website modalities

Audience: Both Grad & Undergrad

6. Solve reproductive physiology problems associated with a foreign country or novel region of U.S. including how to digitally communicate with local residents who may not speak English

Audience: Both Grad & Undergrad

7. Identify how ethical issues in global agriculture, wildlife management, and federal grazing lands impact reproductive management of livestock

Audience: Both Grad & Undergrad

8. Evaluate effective learning outcomes of a specific lab and access its impact on undergraduate students

Audience: Graduate

**DY SCI 471 – FOOD PRODUCTION SYSTEMS AND SUSTAINABILITY**

3 credits.

Delves into aspects of natural sciences (biology and agricultural sciences) and social sciences underpinning the assessment of food production systems as related to a variety of outcomes including but not restricted to human and environmental health, air and water quality, greenhouse gases emission, land use, economic opportunity, social justice, as well as mitigation and adaptation to climate change, locally, regionally, domestically, across continents, and globally.

**Requisites:** (Graduate/professional standing) or junior standing and satisfied Quantitative Reasoning (QR) B requirement

**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the social, economic, and/or environmental dimension of sustainability challenges associated with food production systems.

Audience: Both Grad & Undergrad

2. Evaluate food production systems for their contribution to, mitigation potential of, and adaption to climate change.

Audience: Both Grad & Undergrad

3. Identify ways in which social structures profoundly affect not only people, but also biology, ecology, and our very climate. And the complement: how people's race/class/gender/occupation/nation status within the global social structure, as well as the nature of the global social structure itself, profoundly impacts their ability to cope with changing climate.

Audience: Both Grad & Undergrad

4. Critically evaluate the scientific literature and other sources of information related to the sustainability of food systems.

Audience: Both Grad & Undergrad

5. Analyze the causes of and solutions for the sustainability of food production, distribution, marketing, consumption, and waste disposal.

Audience: Both Grad & Undergrad

6. Develop analytical and problem-solving skills individually and in teams of classmates with diverse worldviews.

Audience: Both Grad & Undergrad

7. Communicate effectively information to multiple audiences through multiple medias

Audience: Both Grad & Undergrad

8. Develop an aptitude for working with mixed teams including undergraduate students

Audience: Graduate

9. Demonstrate research and writing skills to produce academically rigorous literature reviews

Audience: Graduate

**DY SCI/AN SCI/FOOD SCI/SOIL SCI 472 – ANIMAL AGRICULTURE AND GLOBAL SUSTAINABLE DEVELOPMENT**

1 credit.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; food security, the role of women in agriculture, and the role of dairy products in a healthy diet.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply sustainability principles and/or framework to addressing the challenge of feeding an increasing world population sustainably.

Audience: Undergraduate

2. Define and characterize sustainability, sustainable agriculture and Sustainable Development

Audience: Undergraduate

3. Analyze the contributions of animal agriculture to the Sustainable Development Goals both in developing and developed countries.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of diverse animal agricultural systems both in developing and developed countries.

Audience: Undergraduate

5. Evaluate the role of livestock in communities where poverty, hunger and marginalization are embedded as a way of life.

Audience: Undergraduate

6. Critically evaluate the causes of –and ways to break– the chains of hunger and poverty among the poorest of the poor.

Audience: Undergraduate

**DY SCI/AN SCI/FOOD SCI/SOIL SCI 473 – INTERNATIONAL FIELD STUDY IN ANIMAL AGRICULTURE AND SUSTAINABLE DEVELOPMENT**

2 credits.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; and the role of women in agriculture and the role of dairy products in a healthy diet.

**Requisites:** DY SCI/AN SCI/FOOD SCI/SOIL SCI 472

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Improve communication and interpersonal skills associated with participating in team-based intercultural experiences

Audience: Undergraduate

2. Be better prepared for professional success in an interconnected world by navigating unfamiliar cultural norms and societal differences

Audience: Undergraduate

3. Reflect on US-centric personal and cultural values while building an appreciation and respect for the Latin America culture.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of alleviating poverty and malnutrition in Mexico

Audience: Undergraduate

5. Apply sustainability principles and/or framework to addressing the challenge of fostering prosperity in marginalized indigenous communities

Audience: Undergraduate

6. Analyze both from their own disciplinary lens and from an interdisciplinary lens the contributions of dairy farming to the Sustainable Development Goals

Audience: Undergraduate

7. Evaluate the sustainability of subsistence, market-oriented, and industrial-scale farming systems

Audience: Undergraduate

**DY SCI 534 – REPRODUCTIVE MANAGEMENT OF DAIRY CATTLE**

3 credits.

Provides the technical knowledge and practical skills to design and execute an effective reproductive management program for dairy cattle. Study key reproductive physiology and practical research results that underlie reproductive management programs. Participate in hands-on laboratories to learn, practice, and demonstrate practical reproductive management techniques including: semen handling, artificial insemination, and ultrasound of ovaries and uterus.

**Requisites:** DY SCI/AN SCI 434

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify female reproductive tract structures, reproductive hormones, and know the changes during the estrous cycle

Audience: Both Grad & Undergrad

2. Design a reproductive management program for cows or heifers

Audience: Both Grad & Undergrad

3. Identify use of different pregnancy diagnosis procedures in a reproductive management program

Audience: Both Grad & Undergrad

4. Evaluate reproductive efficiency in dairy farms. Design new reproductive management programs based on evaluation of farm data

Audience: Both Grad & Undergrad

5. Design and execute a superovulation program

Audience: Both Grad & Undergrad

6. Describe process used for artificial insemination of dairy cattle

Audience: Both Grad & Undergrad

7. Describe and interpret an ultrasound of the ovaries and uterus of dairy cattle.

Audience: Graduate

8. Complete a research project using ultrasound

Audience: Graduate

**DY SCI 535 – DAIRY FARM MANAGEMENT PRACTICUM**

3 credits.

Principles of nutrition, breeding, reproduction, and management at the farm level are integrated. Develop skills in decision making, information gathering, problem solving, and interpersonal communication through field trips to working commercial dairy operations.

**Requisites:** DY SCI 234 or GRAD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify, formulate and solve problems using appropriate information and approaches

Audience: Both Grad & Undergrad

2. Communicate effectively through written reports, oral presentations and discussions

Audience: Both Grad & Undergrad

3. Work effectively in teams to provide constructive input and leadership on dairy management related problems

Audience: Both Grad & Undergrad

4. Evaluate farm management and performance using dairy industry benchmarks

Audience: Both Grad & Undergrad

5. Demonstrate an understanding of business concepts and thinking

Audience: Both Grad & Undergrad

6. Synthesize knowledge and apply peer reviewed research to solve dairy management problems

Audience: Graduate

**DY SCI 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop objectives and formulate hypothesis into experimental methods

Audience: Undergraduate

2. Participate in a supportive community of academically engaged peers

Audience: Undergraduate

3. Develop a research proposal and implement research project under supervision of an honors faculty mentor

Audience: Undergraduate

4. Demonstrate intellectual curiosity through engagement in challenging academic experiences

Audience: Undergraduate

**DY SCI 682 – SENIOR HONORS THESIS**

2-4 credits.

Second semester of individual study for majors completing theses for Honors degrees as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate advanced content knowledge as reflected in an honors thesis, publication, performance, or scholarly work.

Audience: Undergraduate

2. Articulate the value of the honors experience to peers and to a broader community

Audience: Undergraduate

**DY SCI 699 – SPECIAL PROBLEMS**

1-3 credits.

Individual advanced work in an area of Dairy Sciences under the direct guidance of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Integrate and apply knowledge to understand issues associated with in Dairy industries or associated with animal scientific research

Audience: Undergraduate

2. Develop and illustrate specialize skills relevant to a focused body of work associated with a specific learning experience

Audience: Undergraduate

3. Report findings through divers means of communication

Audience: Undergraduate

4. Summarize intellectual growth associate with independent study work

Audience: Undergraduate

**DY SCI 799 – PRACTICUM IN DAIRY SCIENCE TEACHING**

1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate learning goals of the practicum separately from the main educational goals of the course in which the practicum takes place.

Audience: Graduate

2. Gain experience in creating, revising, critiquing course syllabi, that is, get firsthand experience in developing course requirements and policies

Audience: Graduate

3. Develop a strategy process to align course materials and course assignments with course objectives.

Audience: Graduate

4. Practice teaching under distinct instructional modalities; lecture vs discussion vs labs; synchronous vs asynchronous remote instruction

Audience: Graduate

5. Prepare and implement lesson plans of a class period, a week of instruction, or a module of the class

Audience: Graduate

6. Acquire classroom management skills including how to deliver content, lead a discussion, handle questions and answers

Audience: Graduate

7. Develop both formative and summative evaluation instruments to gain feedback on how to assess and improve the teaching and learning process

Audience: Graduate

**DY SCI/AN SCI 824 – RUMINANT NUTRITIONAL PHYSIOLOGY I**  
4 credits.

Focuses on rumen microbiology, metabolite modeling, as well as protein and VFA nutrition and metabolism.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Assess source, digestion, absorption, utilization, and metabolism of nutrients in ruminants

Audience: Graduate

2. Integrate concepts of carbon and nitrogen tracing and flux through ruminant body systems

Audience: Graduate

3. Develop a command of modeling nutrient flux through tissues and be able to apply and extrapolate concepts to nutrient utilization and tracing methodology

Audience: Graduate

4. Clearly communicate the conceptual basis, assumptions, and limitations of techniques and methodology necessary to quantify digestive and metabolic processes

Audience: Graduate

5. Evaluate nutritional recommendations and current topics in ruminant nutrition

Audience: Graduate

**DY SCI/AN SCI 825 – RUMINANT NUTRITIONAL PHYSIOLOGY II**  
4 credits.

Focuses on calf and heifer nutrition, regulation of dry matter intake, plant and forage chemistry, vitamins, lipids, and starch.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Assess source, digestion, absorption, utilization, and metabolism of nutrients in ruminants

Audience: Graduate

2. Integrate concepts of carbon and nitrogen tracing and flux through ruminant body systems

Audience: Graduate

3. Develop a command of modeling nutrient flux through tissues and be able to apply and extrapolate concepts to nutrient utilization and tracing methodology

Audience: Graduate

4. Clearly communicate the conceptual basis, assumptions, and limitations of techniques and methodology necessary to quantify digestive and metabolic processes

Audience: Graduate

5. Evaluate nutritional recommendations and current topics in ruminant nutrition

Audience: Graduate

**DY SCI 875 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest to graduate students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Analyze and critique research results, interpretations and proposals

Audience: Graduate

2. Articulate critical thinking and knowledge about the significance of current research in the fields of animal and dairy science by presenting and/or critiquing scientific presentations

Audience: Graduate

**DY SCI 900 – SEMINAR**

1 credit.

Comprehensive reviews of research aimed at broadening understanding of dairy science.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and critique research results, interpretations and proposals

Audience: Graduate

2. Articulate critical thinking and knowledge about the significance of current research in the fields of animal and dairy science by presenting and/or critiquing scientific presentations

Audience: Graduate

**DY SCI/AN SCI 931 – SEMINAR IN ANIMAL NUTRITION**

1 credit.

Discussion of literature that has a bearing on animal nutrition. Students are to survey the literature and present a seminar.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**DY SCI/AN SCI/GENETICS 951 – SEMINAR IN ANIMAL BREEDING**

0-1 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**DY SCI 990 – RESEARCH**

1-12 credits.

Independent research in preparation of a graduate thesis under supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**DANCE (DANCE)****DANCE 100 – UNDERSTANDING DANCE**

1 credit.

Builds understanding and appreciation for the field of Dance. Delves into dance and its' many facets, integrating, theoretical, historical, and embodied learning through viewing, reading, reflecting, discussing and finally, creating. Develops students into an informed audience and encourages relevance to other disciplines.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**DANCE 101 – SOCIAL DANCE I**

1 credit.

Introduction to basic movement concepts and skills involved in social dancing. Covers the fundamental skills in leading and following, rhythm, and style of the Waltz, Fox Trot, Jitterbug/Swing, Tango, and Cha-Cha. Many social dance forms require that participants work in pairs, which will switch throughout the semester. Other dances may be explored.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop awareness of proper body alignment and its relationship to efficient and coordinated movement

Audience: Undergraduate

2. Develop the rhythmic skills needed to move accurately with the specific rhythmic structure of dance and music forms

Audience: Undergraduate

3. Develop competency in performing the basic social dance steps and variations presented in class.

Audience: Undergraduate

4. Develop "leading and following" skills and performance in each designated role

Audience: Undergraduate

5. Develop and apply a proper social dance style and technique

Audience: Undergraduate

6. Develop confidence in the ability to dance socially outside the classroom situation

Audience: Undergraduate

**DANCE 102 – SOCIAL DANCE II**

1 credit.

Improves and expands social dance skills. Covers the fundamental skills in leaning and following, rhythm, and style of the Fox Trot, Jitterbug/Swing, Waltz, Cha-Cha, Tango, Rumba, Merengue, and Polka. Other social dances may be explored.

**Requisites:** DANCE 101**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Improve style and rhythm.

Audience: Undergraduate

2. Learn to manipulate rhythm in a dance.

Audience: Undergraduate

3. Increase social dance vocabulary.

Audience: Undergraduate

4. Gain ability to adapt to various tempos and types of music.

Audience: Undergraduate

5. Increase confidence in the ability to create dance steps.

Audience: Undergraduate

6. Create notations for recording learned and original dance steps.

Audience: Undergraduate

7. Translate skills to social dance settings outside of the classroom.

Audience: Undergraduate

8. Share knowledge with community.

Audience: Undergraduate

**DANCE 103 – MODERN JAZZ DANCE**

1 credit.

Introduction to Modern Jazz Dance with emphasis on practical application, including center work, traveling, and memorized movement sequences.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Exhibit a basic knowledge of modern jazz techniques and vocabulary.

Audience: Undergraduate

2. Show physical development of strength, flexibility, and endurance.

Audience: Undergraduate

3. Increase spatial awareness, definition and execution of line and form, and rhythmical acuity/musicality.

Audience: Undergraduate

4. Learn to prevent injuries while participating in dance and other physical activities.

Audience: Undergraduate

5. Demonstrate ability to understand and employ self-evaluation skills

Audience: Undergraduate

6. Display an understanding of the discipline, motivation, and concentration.

Audience: Undergraduate

7. Display self-awareness and confidence.

Audience: Undergraduate

**DANCE 105 – BALLET I**

1 credit.

Emphasizes the study and practice of the fundamental principles of Ballet technique and exploration of the body as a creative and expressive instrument. Movement based experiential learning.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Increase the understanding of concepts fundamental to Ballet technique.

Audience: Undergraduate

2. Apply Anatomy and Biomechanics to alignment, efficiency, safety, and aesthetic line in the art form of Ballet.

Audience: Undergraduate

3. Practice evaluation and critique of movement execution.

Audience: Undergraduate

4. Perform movement qualities with clarity.

Audience: Undergraduate

5. Build speed, strength, fluidity, and flexibility in the execution of movement.

Audience: Undergraduate

6. Demonstrate a working vocabulary and technical skills for further study of Ballet technique.

Audience: Undergraduate

**DANCE 106 – BALLET II**

1 credit.

Emphasizes the study and practice of the fundamental principles of Ballet technique and exploration of the body as a creative and expressive instrument.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate understanding of concepts fundamental to Ballet technique.

Audience: Undergraduate

2. Apply Anatomy and Biomechanics concepts to alignment, efficiency, safety, and aesthetic line in the art form of Ballet.

Audience: Undergraduate

3. Evaluate and critique movement execution.

Audience: Undergraduate

4. Perform movement qualities with clarity.

Audience: Undergraduate

5. Demonstrate speed, strength, fluidity, and flexibility in the execution of movement.

Audience: Undergraduate

6. Learn a working vocabulary and technical skill for further study of Ballet technique.

Audience: Undergraduate

**DANCE 107 – CONTEMPORARY DANCE I**

1 credit.

Emphasizes the study and practice of the Contemporary dance technique and exploration of the body as a creative and expressive instrument capable of gaining new understanding through the art of dance.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop an appreciation and understanding of dance as an art form

Audience: Undergraduate

2. Develop an understanding and awareness of the body's movement potential

Audience: Undergraduate

3. Increase movement efficiency and expressiveness as individual dance artists

Audience: Undergraduate

4. Explore varying elements of dance and how to manipulate and/or utilize those elements for creative and expressive communication

Audience: Undergraduate

**DANCE 108 – CONTEMPORARY DANCE II**

1 credit.

Emphasizes the study and practice of the Contemporary dance technique and exploration of the body as a creative and expressive instrument capable of gaining new understanding through the art of dance.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of concepts fundamental to Contemporary dance technique.

Audience: Undergraduate

2. Manipulate the elements of dance for creative and expressive communication and understanding: space, time, force/energy/movement qualities

Audience: Undergraduate

3. Develop personal expression and group awareness through movement

Audience: Undergraduate

4. Increase the body's facility for health and expression

Audience: Undergraduate

5. Apply a working vocabulary and technical skills for further study of Contemporary technique; a survey of Contemporary Dance Technique Principles.

Audience: Undergraduate

6. Apply basic skills: basic locomotion, simple pathways, and direction changes.

Audience: Undergraduate

**DANCE 110 – WORKSHOP IN DANCE ACTIVITY**

1-2 credits.

Explores the creative and expressive aspects of dance movement.

Develops technical skills and creative ability through whole body work on flexibility, strength, alignment, endurance, movement and improvisation.

Develops appreciation of dance as an art form.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain awareness of Contemporary Dance as an expressive art form.

Audience: Undergraduate

2. Develop Contemporary Dance techniques.

Audience: Undergraduate

3. Manipulate the elements of dance for creative and expressive communication: space, time, force/energy/movement qualities.

Audience: Undergraduate

4. Develop personal expression and group awareness through movement.

Audience: Undergraduate

5. Gain skills for improvising with movement.

Audience: Undergraduate

6. Increase the body's facility for health and expression through Bartenieff's Six Body Connectivity Patterns.

Audience: Undergraduate

7. Learn a working vocabulary and technical skills for further study of Contemporary technique.

Audience: Undergraduate

8. Apply basic skills in Contemporary Dance, including basic locomotion, simple pathways, and direction changes.

Audience: Undergraduate

**DANCE 111 – CONTEMPORARY DANCE TECHNIQUE AND THEORY I**

1-3 credits.

Level I Core course in technique. Study and practice of the fundamental principles of contemporary dance technique and theory. Exploration of the body as a creative and expressive instrument. Audition at first class meeting determines course eligibility and placement.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**DANCE 112 – CONTEMPORARY DANCE TECHNIQUE AND THEORY II**

1-3 credits.

Level I Core course in technique. Study and practice of the fundamental principles of contemporary dance technique and theory. Exploration of the body as a creative and expressive instrument. Audition at first class meeting determines course eligibility and placement.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DANCE 115 – HIP-HOP DANCE TECHNIQUE AND THEORY I**

1-2 credits.

Provides an introduction to foundational movement technical knowledge necessary to perform Hip-Hop dance safely with form and skill. Introduces the theory, practice, aesthetics, and historical foundations of hip-hop dance. Hip-Hop dance is an artistic manifestation of Hip-Hop culture with dances and movement activities related to histories and philosophies as well as improvisatory states of expression. Engage with the history, theory and philosophy surrounding the dance vocabulary, which directly impacts the physical intelligence of the dancer. Explore the roots of funk and Hip-Hop dance in the social fabric of African, Caribbean, and Afro-Latin cultures while examining reinventions of ragtime, swing, and rock n' roll throughout the 20th and 21st centuries in America.

**Requisites:** None**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate sound knowledge of Hip-Hop/funk vocabulary with technical clarity and rhythmic accuracy – use technical approaches to encourage safe and efficient movement articulation  
Audience: Undergraduate

2. Demonstrate knowledge and understanding of terminology and historical foundation of technique and codified language in Hip-Hop/funk movement vocabulary  
Audience: Undergraduate

3. Develop interpretation and communication skills as a dance artist. Use African aesthetics hip hop/funk vocabulary to develop personal artistry through improvisation  
Audience: Undergraduate

4. Explain the deep-rooted structure and retention of language, music and movement in the African Diaspora  
Audience: Undergraduate

**DANCE 116 – WORKSHOP IN WORLD DANCE**

2 credits.

Exploration in different traditional or folk dance forms from around the world.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2015**DANCE 118 – AFRICAN DANCE**

1 credit.

Technique and practice of several basic African dance forms with study of their musical, historical and cultural contexts.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DANCE/ASIAN AM 121 – ASIAN AMERICAN MOVEMENT**

3 credits.

Techniques of exercises and movement forms derived from several Asian cultures as taught in the United States. Studied in the context of the construction and expression of ethnic and cultural identity.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DANCE 125 – BALLET TECHNIQUE I**

1-2 credits.

Introduction to basic skills and terminology; includes barrework, center work, petit allegro, grand allegro; focus on form, kinesthetic principles and aesthetic values.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DANCE 126 – BALLET TECHNIQUE I-B**

1-2 credits.

Level I Core continued expanding terminology, further developing barre work, center work, petit allegro, grand allegro; focus on form, kinesthetic principles and aesthetic values.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate technical specificity, musicality and artistic confidence in ballet technique through sequenced skill level progressions  
Audience: Undergraduate

2. Demonstrate growth in theoretic, performance, and creative work through reflective and critical assessment approaches  
Audience: Undergraduate

**DANCE 131 – SOMATIC THEORY AND PRACTICES**

2 credits.

Integration of body and mind is explored through various somatic practices.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025

**DANCE 132 – WORKSHOP IN BODY STUDIES AND PRACTICES**

1 credit.

A laboratory in mind-body practice. Topics titles reflect the type of body practices or modalities covered. Each specific practice focuses on increased bodily awareness and function for the performing artist. Includes movement practices, readings, discussion, writing assignments, videos and performances/lectures.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**DANCE 133 – RELAXATION TECHNIQUES FOR EMBODIMENT AND STRESS MANAGEMENT**

1 credit.

Study and practice of neuro-muscular relaxation, self-regulation, focus/concentration, stress/anxiety management, and body awareness. Exploration of the body as a creative tool to facilitate ease of movement and flexible approaches to stressors.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop an ability to consciously achieve a deep state of muscular relaxation.

Audience: Undergraduate

2. Cultivate ease of movement and maintain or improve flexibility.

Audience: Undergraduate

3. Develop awareness of the stress response on overall functioning and techniques for maximizing ability to deal with it positively.

Audience: Undergraduate

4. Learn and understand the basic principles of neuro-muscular relaxation, flexibility and the physiology of stress.

Audience: Undergraduate

5. Learn multiple methods of relaxation and through exploration find the techniques that work best.

Audience: Undergraduate

6. Develop and utilize a stress management plan and a regular practice of relaxation and movement.

Audience: Undergraduate

**DANCE 135 – PILATES MAT I**

1 credit.

Pilates is a physical conditioning program that creates balance, improves posture, decompresses joints and creates elongated, toned muscles. The exercises focus on core strength, breath, and a flexible spine. Incorporates Level I-III Mat exercises. Explore functional anatomy and imagery-based alignment.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**DANCE 136 – PILATES EQUIPMENT I**

2 credits.

Focuses on learning Level I II (Lab I) exercises on the Pilates equipment, which includes the Reformer, Cadillac, Low Chair, and High Barrel.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate clear body awareness by responding to verbal, visual and kinesthetic cuing

Audience: Undergraduate

2. Execute Pilates exercises with attention to detail and efficient musculoskeletal alignment

Audience: Undergraduate

3. Develop strength, coordination and flexibility

Audience: Undergraduate

4. Implement different strategies for breathing and coordinate movement with breath

Audience: Undergraduate

5. Maintain consistent mental focus while exercising, effectively applying imagery and anatomical concepts

Audience: Undergraduate

6. Memorize and perform the Intermediate Pilates Reformer flow

Audience: Undergraduate

**DANCE 140 – DANCE PRODUCTION**

2 credits.

Introduction to design and production for the performing arts with emphasis on dance. Covers the use of lighting, sound and other scenographic elements in theory and with practical experience.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**DANCE 156 – MOVEMENT AS MATERIAL THROUGH IMPROVISATION**

2 credits.

Use of improvisation to develop a personal movement vocabulary and explore compositional form.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**DANCE 157 – INTRODUCTION TO MOVEMENT ANALYSIS**

2 credits.

An examination of the qualitative variations in movement processes as they relate to human function and expression.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024

**DANCE 159 – COLLABORATIVE ARTS WORKSHOP**

2 credits.

Focuses on sharing ideas by creating dance and theatre through a collaborative process. Exposes a range of artistic disciplines with the focus of collaboratively developing a concert program projected through the lens of hip hop theatre. Engage in various art disciplines to develop interdisciplinary tools through a collaborative process that will strengthen and teach creative problem solving skills. By audition

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2016**DANCE 162 – FIRST YEAR WORKSHOP**

1 credit.

Introduction to the world of contemporary dance, and covers topics in contemporary dance performance and professionalism.

**Requisites:** Declared in Dance or Dance**Repeatable for Credit:** No**Last Taught:** Fall 2024**DANCE 165 – INTRODUCTION TO THE HISTORIES OF DANCE**

3 credits.

A survey providing a framework for understanding and appreciating the significance of dance in and as human culture.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand dance as a form of human expression and communication.

Audience: Undergraduate

2. Investigate dances in relation to their larger social, cultural, and political contexts.

Audience: Undergraduate

3. Investigate the differences and similarities of dance in various cultures and historical periods

Audience: Undergraduate

4. Appreciate the infinite variety of human movement that can be called dance.

Audience: Undergraduate

5. Understand critical issues in dance and culture historically and at present

Audience: Undergraduate

6. Apply criteria and methods for observing, interpreting, and explaining dance in historical contexts to written critique.

Audience: Undergraduate

**DANCE 168 – DANCING GENDER: EMBODIMENT, POLITICS AND FEMINIST THEORY**

3 credits.

Gender theories and feminist theories focus on the body as the main site where gender distinctions are understood. As the body holds a central position in the art of dance and the academic discipline of dance studies, explores gender and feminist theories through the lens of dance. Drawing on a wide array of examples and dance genres ranging from across the globe (such as Ballroom, Bollywood, Folk Dance, Ballet and more) introduces the cultural specificity of gender norms and the ways that dance has the potential to challenge heteronormativity through performance.

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**DANCE 200 – WRITING THE MOVING BODY**

3 credits.

Examines performance texts from the 20th century to the present, and applies them through written analyses.

**Requisites:** None**Course Designation:** Gen Ed - Communication Part B**Repeatable for Credit:** No**Last Taught:** Summer 2025**DANCE 211 – CONTEMPORARY DANCE TECHNIQUE AND THEORY III**

1-3 credits.

Continuation of DANCE 111 and DANCE 112. Exploration of dance dynamics and quality through improvisation and the practice of set dance sequences.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**DANCE 212 – CONTEMPORARY DANCE TECHNIQUE AND THEORY IV**

1-3 credits.

Continuation of DANCE 211. Further development of skills. Development of dance phrases and movement vocabulary for invention.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**DANCE 213 – NEW MOVEMENT TECHNIQUES**

1-2 credits.

Exploration of new movement techniques in dance outside of traditional forms and methods.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**DANCE/THEATRE 218 – AFRICAN DANCE PERFORMANCE**

2 credits.

Technique, practice and performance of complex African and African-based dances in relation to polyrhythmic musical and percussive accompaniment. Study of historical and cultural contexts of these forms. Development of improvisational skills in dialogue with musicians.

**Requisites:** DANCE 118**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2017**DANCE 225 – BALLET TECHNIQUE II**

1-2 credits.

Emphasis on basic skills; barrework, center work, petit and grand allegro, adagio, and increased use of demi-pointe. Focus on form, kinesthetic principles and aesthetic values.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DANCE 226 – BALLET TECHNIQUE II-B**

1-2 credits.

Level II Core continued expanding terminology, further developing barre work, center work, petit allegro, grand allegro; focus on form, kinesthetic principles and aesthetic values.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate technical specificity, musicality and artistic confidence in ballet technique through sequenced skill level progression

Audience: Undergraduate

**DANCE 231 – INTRODUCTION TO DANCE/MOVEMENT THERAPY**

3 credits.

Orientation to the scope of dance therapy as a profession. Historical framework, theoretical rationale, and present application of dance/movement therapy.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Gain factual knowledge of the history of dance/movement therapy and the requirements for practicing in the field. This includes learning about the American Dance Therapy Association

Audience: Undergraduate

2. Understand how DMT is used with a variety of issues, e.g. autism, learning disabilities, abuse, woman's issues, etc. & within a number of structures such as individuals, groups, families, classrooms.

Audience: Undergraduate

3. Understand movement connections between body, mind, and spirit. Gain a sense of what DMT has to offer without actually doing therapy in class.

Audience: Undergraduate

4. Develop awareness of the various applications of basic dance therapy theory & concepts to other related fields such as counseling, teaching, occupational and physical therapy, violence prevention, etc.

Audience: Undergraduate

5. Apply concepts and skills from the Violence Prevention through Movement Curriculum to therapy and education.

Audience: Undergraduate

6. Develop knowledge of different cultural approaches to child development.

Audience: Undergraduate

7. Understand connections between theories that use creativity to explore feelings and create change in other creative art therapies such as music, art, and drama therapy.

Audience: Undergraduate

### DANCE 232 – INTRODUCTION TO DYNAMICS OF DANCE THERAPY

3 credits.

Continued development of the field of dance/movement therapy with specific emphasis on DMT with specific populations and research in the field. Fieldwork in community programs is required.

**Requisites:** DANCE 231

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Cultivate body-mind connections through movement experiences, somatic explorations, journaling, art, and discussions.

Audience: Undergraduate

2. Gain knowledge of the efficacy of DMT through reading, writing and discussing research in the field.

Audience: Undergraduate

3. Gain factual knowledge about the needs of different populations that DMT is effective with e.g. autism, learning disabilities, abuse, woman's issues, elderly, physical disabilities, handicapped, pain, anxiety, depression, etc. through readings, discussion and movement activities. This includes exploring different structures such as individuals, small groups, families and classrooms.

Audience: Undergraduate

4. Create a document of movement experiences using props to work on specific goals through movement exploration and discussion.

Audience: Undergraduate

5. Understand the flow of a DMT session –role of the beginning, middle and end of a session through movement exploration, videos of actual DMT sessions, and readings.

Audience: Undergraduate

### DANCE 233 – DISARMING THE PLAYGROUND: VIOLENCE PREVENTION THROUGH MOVEMENT

1 credit.

Study and Practice of using movement, body awareness, creativity and discussion to experience and develop skills to teach others embodied practices for handling stress, anxiety, conflicts, etc. in a peaceful, healthy way. Learn how to use tools to set healthy boundaries and deal with conflicts in the classroom or your life. Receive a thorough introduction to the Disarming the Playground Curriculum, a school violence prevention program rooted in the principles of dance/movement therapy. Learn to adjust activities and experiences for different age groups and different populations.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Gain cognitive and bodily knowledge of the Disarming the Playground curriculum.

Audience: Undergraduate

2. Gain skill in expressing movement and understanding its connection to emotion.

Audience: Undergraduate

3. Develop lesson plans and lead activities in the following six units: Spatial Awareness viewed through a multi-cultural lens, Self-Regulation, Focus and Attention, Impulse or Self-Control, Awareness of and response to dangerous or tense situations, Building Empathy, Managing strong feelings such as anger and anxiety, and other issues, i.e. peer pressure, alienation, cyber bullying, prejudice.

Audience: Undergraduate

4. Develop skills for adapting curriculum for different age groups and different types of sessions, i.e. classroom, therapy groups, family work

Audience: Undergraduate

5. Develop collaboration skills w/fellow students, providing support and constructive observations

Audience: Undergraduate

### DANCE 235 – PILATES MAT II

1 credit.

Continuation of DANCE 135. Learn the intermediate to advanced level mat exercises, which continue to focus on core strength, breath and spinal flexibility while challenging upper body strength, range of motion in the hips and spine, spinal extension and inverted balance.

**Requisites:** DANCE 135

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**DANCE 236 – PILATES EQUIPMENT II**

2 credits.

Covers the Intermediate to Advanced exercises (Level IV and V) on all equipment. The V exercises challenge a body's uniform development, range of motion in all actions of the spine, hips and shoulders, and require significant control and balance. These exercises are great cross-training for athletes, dancers or Pilates enthusiasts who wish to feel the advanced movement potential of their own bodies. Achieving mastery over these exercises requires more practice and commitment than the Beginner-Intermediate exercises as the body is expected to move beyond its average range of strength and flexibility.

**Requisites:** DANCE 136**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate clear body awareness as evidenced by physical responses to verbal, visual and kinesthetic cuing  
Audience: Undergraduate

2. Execute Pilates exercises with precise form, efficient musculoskeletal alignment, and intentional core muscle recruitment  
Audience: Undergraduate

3. Develop coordinated strength, flexibility and balance  
Audience: Undergraduate

4. Demonstrate knowledgeable and safe use of equipment, while setting-up, performing and transitioning through exercises  
Audience: Undergraduate

5. Apply anatomical knowledge and imagery in order to integrate breath and refine personal alignment  
Audience: Undergraduate

6. Use and maintain consistent mental focus while exercising  
Audience: Undergraduate

7. Memorize and perform any Pilates Equipment exercise with technical skill  
Audience: Undergraduate

**DANCE 237 – PILATES STUDIO I**

3 credits.

Experience in teaching Pilates, which includes private, semi-private, and small group sessions. Gives student-teachers class structure formats, including an understanding of the instructor to student relationship, pacing of class sessions, and the physical detail with which Pilates is taught.

**Requisites:** DANCE 236**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**DANCE 240 – DANCE PRODUCTION LABORATORY**

1 credit.

Provides hands-on experience working with the technical aspects of dance program performances.

**Requisites:** DANCE 140**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DANCE 241 – MUSIC FUNDAMENTALS FOR DANCERS**

3 credits.

Study of the elements of music and their relationship to movement, a history of contemporary music and modern dance and an introduction to digital audio applications for choreography.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Create and Design in related collaborative arts in the context of music, video and screen, and technical aspects of dance performance  
Audience: Undergraduate

2. Articulate how design translates abstract ideas into visual and aural support for performance  
Audience: Undergraduate

**DANCE 255 – MOVEMENT COMPOSITION FOR THE PERFORMING AND VISUAL ARTS**

2 credits.

Basic principles of solo composition explored and applied to movement in visual and performing arts.

**Requisites:** DANCE 156**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DANCE/THEATRE 259 – COLLABORATIVE ARTS PERFORMANCE LAB: DEVISING COLLABORATIVE PERFORMANCE THROUGH HIP HOP ARTS**

1-2 credits.

Work together to create a repertory company which produces performances of short hip hop theater and other collaborative performance art works for public viewing. Experimental works are researched and developed. Involves the development of collaborative and small group pieces as well as artistic training with a focus on individual and multi-voice work, theater improvisation, dance/movement.

**Requisites:** None**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023

**DANCE 265 – DANCE HISTORY I: DANCE IN THE MODERN ERA**

3 credits.

Surveys dance history from about 1500 through the 1900s. Through research, discussion, and viewing images and video, students will analyze and understand dance in relation to the fundamental changes to human experiences that arose in the modern era.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Understand dance in social, cultural, political, and economic contexts from the 16th through the 19th centuries

Audience: Undergraduate

2. Analyze, discuss, and compare dance practices and discourses in relation to historical and global contexts

Audience: Undergraduate

3. Analyze, discuss, and compare their technical, choreographic, and theoretical training within a greater historical context

Audience: Undergraduate

4. Respond critically and thoughtfully to dance scholarship

Audience: Undergraduate

5. Find and analyze primary sources to reflect upon and synthesize a personal interaction with historical artifacts with knowledge gained from secondary sources

Audience: Undergraduate

**DANCE 268 – POLITICAL AND CULTURAL PERSPECTIVES IN DANCE STUDIES**

3 credits.

Examines the role of dance as a cultural form of expression within the political sphere. Draws on a variety of case studies ranging from popular dance TV shows, to European modern dance and from hip-hop to dancing at public protests and asks the question of what constitutes dance and what is its social and political function.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**DANCE 274 – METHODS IN DANCE EDUCATION**

3 credits.

Study of principles in dance curriculum planning, instruction, assessment, classroom management, and learner diversity through a trauma-informed and culturally responsive-sustaining lens.

**Requisites:** DANCE 156**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify, analyze, and apply trauma-informed and culturally responsive-sustaining practices, styles, and methods of successful teaching in lesson and curricula planning.

Audience: Undergraduate

2. Critically reflect on and constructively respond to lesson and curricula designs.

Audience: Undergraduate

3. Develop student-centered, process-based lesson plans and curricula.

Audience: Undergraduate

4. Construct sequential, artistic, and age appropriate dance experiences.

Audience: Undergraduate

5. Examine and analyze dance pedagogical theories in education.

Audience: Undergraduate

6. Create and analyze assessments for student learning.

Audience: Undergraduate

**DANCE 311 – CONTEMPORARY DANCE TECHNIQUE AND THEORY V**

1-3 credits.

Level III. Contemporary dance technique and theory on the intermediate level. Emphasis on movement skills employing proper body alignment.

**Requisites:** None**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**DANCE 312 – CONTEMPORARY DANCE TECHNIQUE AND THEORY VI**

1-3 credits.

Continuation of DANCE 311.

**Requisites:** None**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**DANCE/AFROAMER/MUSIC 318 – CULTURAL CROSS CURRENTS: WEST AFRICAN DANCE/MUSIC IN THE AMERICAS**

3 credits.

The influence of traditional West African dance/music heritage in historical, artistic, social contexts in the development of new hybrid forms of music/dance created by cross-pollination of cultures of Africans, Europeans and indigenous peoples in the New World.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**DANCE/AFROAMER/ASIAN AM/FOLKLORE 319 – AFRO ASIAN IMPROV: FROM HIP HOP TO MARTIAL ARTS FUSION**

3 credits.

An Afro Asian perspective provides a lens through which intersections between Asian American and African American dance and martial arts are studied and practiced. Asian American and African American movement genres provide tools to explore dance fusion, choreography, and improvisation, to create dances informed by African American and Asian American legacies of struggle, innovation and transformation, while cognizant of historical forces of oppression and racism. Building connections through respectful communication with others are learned through dance practice, discussion and writing about concepts learned through readings, videos, and guest artist visits. Engagement with dance as a cultural vehicle for creative problem-solving and risk-taking occurs through guided class or smaller group activities.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate perspectives on the diversity of the human condition through critical and interpretive skills to analyze the past, present, and future of human movement in a complex world  
Audience: Undergraduate

2. Prepare for participation in a multicultural society through developing a consciousness of self and other and building empathy towards others' perspective, thinking critically and questioning assumptions of certain valued or devalued histories, and analyzing how these differences have promulgated disparities in contemporary American society  
Audience: Undergraduate

3. Demonstrate skills in writing and speaking about dance in its historical, contemporary and cultural contexts  
Audience: Undergraduate

4. Articulate Afro Asian perspectives on the intersections of Asian American and African American cultural, social and historical knowledge, and communicate important ideas through dance and story-telling performance  
Audience: Undergraduate

5. Practice Asian American and African American foundational movement toolboxes as a basis for improvisation and dance choreography supported by concepts of theater and culturally-based learning traditions  
Audience: Undergraduate

6. Engage in imagination-led and creative problem-solving movement activities  
Audience: Undergraduate

7. Build connections with others through class practice, discussions, working groups within and outside of class  
Audience: Undergraduate

8. Use the skills you learn to lead a calmer, more focused, responsible and productive life  
Audience: Undergraduate

**DANCE 325 – BALLET TECHNIQUE III**

1-2 credits.

Intermediate: barrework, center work, petit and grand allegro, adagio, demi-pointe, and more complex combinations and skills. Focus on form, kinesthetic principles, and aesthetic values.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**DANCE 326 – BALLET TECHNIQUE III-B**

1-2 credits.

Intermediate level continued: barrework, center work, petit and grand allegro, adagio, demi-pointe, and more complex combinations and skills. Focus on form, kinesthetic principles, and aesthetic values.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**DANCE 330 – FUNCTIONAL ANATOMY FOR MOVEMENT PRACTICES**

2 credits.

Provides an understanding of functional anatomy in kinetic terms, exploring efficient musculoskeletal function as it relates to pedestrian movement and vigorous movement. Learn how to see and feel the difference between healthy movement and movement pathology.

**Requisites:** DANCE 131, 135, or 136

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Memorize basic musculoskeletal anatomy and functions

Audience: Undergraduate

2. Comfortably execute touch-based partner work with maturity and skill  
Audience: Undergraduate

3. Demonstrate clear body awareness by responding to instructor and peer corrections and through self-correction  
Audience: Undergraduate

4. Develop visual and kinesthetic skill for identifying anatomical pathways and patterns in others  
Audience: Undergraduate

5. Identify and distinguish pathological vs healthy movement patterns theoretically and in live bodies  
Audience: Undergraduate

6. Create imagery-based movement exercises that address specific movement concepts  
Audience: Undergraduate

**DANCE 331 – DYNAMICS OF DANCE THERAPY**

3 credits.

Movement lab integrating theory and techniques of dance therapy. Field work in community service projects.

**Requisites:** DANCE 231

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**DANCE 337 – PILATES STUDIO II**

3 credits.

Cover the Pilates Level IV-V (Intermediate-Advanced) material on the equipment and continues work from DANCE 237.

**Requisites:** DANCE 235, 237, and 336

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**DANCE/ART 341 – SOUND DESIGN FOR THE PERFORMING AND VISUAL ARTS**

3 credits.

Production of audio soundtracks to complement the work of artists. The relationship of sound and music to dance, video, film, computer art, and other interdisciplinary forms.

**Requisites:** Declared in an Art, Dance, or Communication Arts program

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DANCE 345 – SCREENDANCE PRODUCTION**

3 credits.

Provides technical and aesthetic knowledge of the use of video camera and editing techniques, the introduction to digital video, and the relationship of video to the performing and visual arts.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate how design translates abstract ideas into visual and aural support for performance  
Audience: Both Grad & Undergrad

2. Compose dance work for the concert stage and/or alternate spaces  
Audience: Both Grad & Undergrad

3. Develop and practice a critical vocabulary for communicating about one's own work and that of others  
Audience: Graduate

### DANCE 355 – DANCE COMPOSITION II

3 credits.

Composition and performance of dances based on pre-classic and modern dance forms to include practical application of theater production, costuming, and stage design.

**Requisites:** DANCE 156 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Generate and manipulate innovative movement material quickly

Audience: Both Grad & Undergrad

2. Create meaning and context for work through thoughtful and informed structural development

Audience: Both Grad & Undergrad

3. Make effective editing choices about choreography

Audience: Both Grad & Undergrad

4. Demonstrate discipline and consistency in the working process

Audience: Both Grad & Undergrad

5. Take risks and exhibit confidence in creative work and performance

Audience: Both Grad & Undergrad

6. Lead dancers effectively in the rehearsal process

Audience: Both Grad & Undergrad

7. Offer astute and useful feedback to classmates

Audience: Both Grad & Undergrad

8. Consciously integrate other dance studies into the choreographic process

Audience: Both Grad & Undergrad

9. Demonstrate an increased literacy in contemporary dance/performance

Audience: Both Grad & Undergrad

10. Write and speak articulately about one's creative point of view and progress in the context of contemporary dance/performance

Audience: Both Grad & Undergrad

11. Present a complete work of three or more dancers (not including the choreographer)

Audience: Both Grad & Undergrad

12. Integrate ideas, frameworks, or questions drawn from knowledge outside the field of dance into the choreographic process.

Audience: Graduate

13. Write and speak about one's creative point of view and progress in an interdisciplinary context that includes contemporary dance and related areas of knowledge.

Audience: Graduate

### DANCE 365 – DANCE HISTORY II: DIRECTIONS AND ISSUES OF CONTEMPORARY DANCE

3 credits.

Surveys dance history from the 1960's to the present. Through research, video viewing, and discussions, grasp aesthetic ideas of modern dance; contextualize the major components of contemporary dance; and characterize trends and styles relative to underlying philosophies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key approaches and pioneers in dance practices of the 20th and 21st century

Audience: Undergraduate

2. Analyze, discuss, and compare performance in various geographical and historical contexts

Audience: Undergraduate

3. Situate performance practices and choreographic approaches in broader historical contexts

Audience: Undergraduate

4. Critically contextualize performance approaches in relation to prevalent dance studies discourses

Audience: Undergraduate

5. Research and critically evaluate and compare primary and secondary sources

Audience: Undergraduate

**DANCE 368 – DANCING CULTURES IN GREECE**

3 credits.

Examine the construction of Greek national identity and cultural heritage through dance, embodied practices, and art creation practices by utilizing dance studies frameworks and ethnographic research tools. Experiential multi-sited research to be completed in Greece, conducted through dance workshops, performances, museum visits, attendance to regional dance festivals, and in conversation with local experts featured as guest lecturers, such as dance historians, folklorists, choreographers, teachers, and performers. Genres covered include folk dance, social dance, concert dance, and other somatic practices that foster a sense of belonging, community, and unity amongst practitioners. Must have sophomore standing and a valid passport that does not expire 6 months past the Greece travel dates.

**Requisites:** Consent of instructor**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the role of dance in varying cultural contexts: traditional folk dance, community practices, and contemporary concert dance performance.

Audience: Undergraduate

2. Engage in a range of embodied experiences through critical dance studies frameworks

Audience: Undergraduate

3. Identify how a country's cultural history and national identity impact artistic practices of the present both locally and internationally through the case study of Greece.

Audience: Undergraduate

4. Identify cultural specificity in institutional structures and frameworks (such as dance in education, festival curation, arts-funding structures) using Greece as a case study.

Audience: Undergraduate

**DANCE 373 – INTRODUCTION TO DANCE AND COMMUNITY**

3 credits.

Introduction to community engagement through dance and movement.

Focus on skills to work within service-oriented programs that engage communities in transformative, decolonizing, and humanizing dance practices. Investigate theory, practice, and empirical research to support ethnographic approaches with feminist and critical perspectives when working with dance in communities.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Devise dance/movement choreography through community engagement.

Audience: Undergraduate

2. Devise teaching strategies based on community interests/needs.

Audience: Undergraduate

3. Recognize complex identities that create obstacles or privileges for individuals and communities.

Audience: Undergraduate

4. Foster inclusive environments.

Audience: Undergraduate

**DANCE 374 – TEACHING DANCE**

3 credits.

Provides methods and materials for appropriate dance instruction in the public and private sectors for an array of ages. Advocates for Dance Education in both public and private settings and emphasizes the value of Dance in enhancing the quality of life for all people.

**Requisites:** DANCE 156 and 274

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Emphasize the value of Dance in enhancing the quality of life for all people.

Audience: Undergraduate

2. Advocate for Dance Education in public and private settings.

Audience: Undergraduate

3. Provide methods and material appropriate for teaching and facilitating dance instruction in public and private sectors for an array of ages.

Audience: Undergraduate

4. Create proper progressions, building blocks, and underlying concepts for teaching dance technique.

Audience: Undergraduate

5. Use laboratory settings for teaching and observing students that will deepen the understanding for, and appreciation of, a variety of populations.

Audience: Undergraduate

6. Promote understanding of developmentally appropriate dance skills, movement concepts, and progressions for varied ages.

Audience: Undergraduate

7. Provide Dance movement and teaching experiences to help develop personal teaching techniques.

Audience: Undergraduate

8. View creative dance education as a viable tool for teaching cross-curriculum, integrative academic/vocational education.

Audience: Undergraduate

9. Understand teaching and learning through the arts in an Arts Integration framework.

Audience: Undergraduate

**DANCE 375 – PILATES TEACHING METHODS**

1 credit.

Designed to provide an understanding of the practice of teaching and learning Pilates. Develops understanding of body mechanics as well as an appreciation of the variety of movement possibilities and compensatory patterns present in individual bodies. Consists of lecture, discussion, practice teaching and mentorship as students begin the process of teaching Pilates.

**Requisites:** DANCE 135

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DANCE 376 – PILATES TEACHING I**

2 credits.

Emphasizes private session teaching, applied anatomy and imagery, and overall Pilates pedagogy.

**Requisites:** Declared in Certificate in Pilates

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate personal knowledge and understanding of Pilates material

Audience: Undergraduate

2. Develop a personal teaching style and emphasis

Audience: Undergraduate

3. Demonstrate clear teacher/student relationships, professional etiquette, and skillful rapport

Audience: Undergraduate

4. Design clear thematic lessons and improvise on that theme

Audience: Undergraduate

5. Effectively communicate personalized feedback that catalyzes client growth

Audience: Undergraduate

6. Become thoughtful, articulate, and effective teachers

Audience: Undergraduate

**DANCE 379 – DANCE TEACHING PRACTICUM**

3 credits.

Supervised practicums; teaching dance or movement integrated strategies from a trauma-informed, culturally responsive-sustaining lens. Practicums take place in public schools, private studios, community centers, or Lathrop Hall depending on interests and experiences.

**Requisites:** DANCE 274, 373, and 374

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Design and implement dance or movement integrated strategies in a variety of settings.

Audience: Undergraduate

2. Critically reflect on and constructively respond to teaching observations.

Audience: Undergraduate

3. Design and implement trauma-informed, culturally responsive-sustaining dance and movement experiences for diverse student populations.

Audience: Undergraduate

**DANCE 399 – INDEPENDENT PROJECT**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**DANCE 410 – CONTEMPORARY DANCE FORMS**

1-3 credits.

Contemporary dance technique and theory at the advanced level. Emphasis on movement skills employing proper body alignment and artistry.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Demonstrate technical specificity, musicality, and artistic confidence in ballet and contemporary dance techniques through sequenced skill level progressions.

Audience: Both Grad & Undergrad

2. Recognize, identify, and embody a wide range of somatic theories and practices and produce work investigating its impacts and uses in contemporary dance as practice.

Audience: Both Grad & Undergrad

3. Demonstrate an advanced level of contemporary dance literacy and artistry.

Audience: Both Grad & Undergrad

4. Assess theoretic work, performance growth, and creative work by utilizing curricular scaffolded reflective and critical assessment approaches.

Audience: Both Grad & Undergrad

5. Compose dance work for the concert stage and/or alternate spaces.

Audience: Undergraduate

6. Choreograph combination variation that demonstrates an extended challenge (appropriately scaffolded) for performance and to teach to undergraduate peers in class.

Audience: Graduate

**DANCE 431 – DANCE THERAPY PRACTICUM**

3 credits.

One semester supervised experience in psychiatric setting, i.e., special school, hospital, or community mental health center, and one semester of independent study.

**Requisites:** DANCE 331

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**DANCE 440 – ADVANCED PRODUCTION LABORATORY**

1 credit.

Provides hands-on experience working with the technical aspects of dance program performances.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Practice previously acquired skills necessary to the specific artistic staff role assumed for the assigned Dance Department production.

Audience: Both Grad & Undergrad

2. Demonstrate mentorship and guidance in practice of craft.

Audience: Both Grad & Undergrad

3. Demonstrate artistic competency by completing assigned production role.

Audience: Both Grad & Undergrad

4. Identify problems/challenges, solutions, and evaluate of how well the solution worked.

Audience: Graduate

**DANCE 449 – SURVEY OF INTERARTS AND TECHNOLOGY**

3 credits.

Overview of the history and practice of interdisciplinary work by artists working alone or in collaboration with others. Explores work that relies on or has a contingent relationship to the technology of the era in which it was created. Covers the history of Interarts and Technology from the early 1900's to the present with additional lectures focusing on relevant topics from earlier periods of history, e.g. Guttenburg's printing press, Da Vinci's flying machines, etc. Individual artists and movements will be profiled with a focus on the Futurists, Dada, and Surrealists in the early half of the century, dance and technology in general and the crossover of contemporary avant garde theater and performing artists such as Laurie Anderson and others whose work is dependent on high tech electronics.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Contextualize the contemporary hybrid of art and technology within a historical framework which the student will learn through lecture, screenings, and readings.

Audience: Both Grad & Undergrad

2. Develop a firm grasp of the relationship of technology to the arts throughout history.

Audience: Both Grad & Undergrad

3. Analyze both the philosophical and aesthetic strategies at work within the various methodologies chosen by artists within the framework of art and technology.

Audience: Graduate

**DANCE 451 – DANCE REPERTORY THEATER**

1-3 credits.

Study of choreography created by member of the faculty and guest artists, leading to public performance. Must take a 100 level or higher dance technique or theory course concurrently. Must be cast in the Faculty Concert or Guest Artist work. Audition at first class meeting.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**DANCE 452 – DANCE REPERTORY THEATER**

1-3 credits.

Study of choreography created by member of the faculty and guest artists, leading to public performance. Must take a 100 level or higher dance technique or theory course concurrently. Must be cast in the Faculty Concert or Guest Artist work. Audition at first class meeting.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**DANCE 453 – DANCE REPERTORY THEATRE**

1 credit.

Study of choreography created by member of the faculty and guest artists, leading to public performance. Must be cast in the Faculty Concert or Guest Artist work, and concurrently enrolled in one of the following: DANCE 111, 112, 115, 118, 125, 126, 211, 212, 213, 218 225, 226, 231, 311, 312, 325, or 326. Open to first-year students.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Collaborate in the choreographic process  
Audience: Both Grad & Undergrad

2. Utilize tools for generating and developing performance material from across disciplines  
Audience: Both Grad & Undergrad

3. Work with others toward a common goal in the context of dance performance  
Audience: Both Grad & Undergrad

4. Identify and prioritize skills required to realize choreographic vision  
Audience: Both Grad & Undergrad

5. Embody choreographic material  
Audience: Both Grad & Undergrad

6. Demonstrate effective rehearsal practice and effort  
Audience: Both Grad & Undergrad

7. Implement qualitative movement skills to enhance performance  
Audience: Both Grad & Undergrad

8. Examine your role as a performer in the artistic process of creating dance.  
Audience: Graduate

**DANCE 455 – DANCE COMPOSITION III**

2-3 credits.

Principles of organization in group composition. Planning, composing and presenting of group dances.

**Requisites:** DANCE 255, DANCE 355, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Develop one's creative habit  
Audience: Both Grad & Undergrad

2. Develop one's personal and unique voice as a dancemaker  
Audience: Graduate

3. Build one's compositional toolbox  
Audience: Both Grad & Undergrad

4. Create dance works with different methods of generating, forming, and shaping  
Audience: Both Grad & Undergrad

5. Stretch and expand: take risks, be daring, try out the unfamiliar, explore new concepts, work out of the box  
Audience: Both Grad & Undergrad

6. Create work inspired by or in response to different stimuli  
Audience: Both Grad & Undergrad

7. Increase one's understanding of the art and craft of movement composition  
Audience: Both Grad & Undergrad

8. Communicate one's ideas effectively in written and spoken form--on paper and in person, in words and in dance.  
Audience: Graduate

9. Display organizational skills: work alone and with groups, prepare, schedule, and hold rehearsals  
Audience: Both Grad & Undergrad

10. Meet deadlines; complete projects or studies, take an idea and carry it through to the end  
Audience: Both Grad & Undergrad

### **DANCE 462 – SENIOR SEMINAR**

3 credits.

Reflect on the entirety of dance coursework, develop current work in performance and dance scholarship, and prepare for future engagement with the discipline outside the university.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and hone personal strengths in relation to their dance studies (Dance Department Learning Goal 2.3)

Audience: Undergraduate

2. Develop career goals, with more in-depth exploration of one specific option (Dance Department Learning Goal 2.3)

Audience: Undergraduate

3. Be introduced to some of the skills, strategies, and processes needed for success in the professional world (Dance Department Learning Goal 2.3)

Audience: Undergraduate

4. Produce high-quality professional materials that represent themselves and their work well (Dance Department Learning Goal 2.3)

Audience: Undergraduate

5. Be exposed to the comprehensiveness of dance and the wide range of professions and professional options related to dance (Dance Department Learning Goals 2.1 & 2.2)

Audience: Undergraduate

6. Demonstrate critical thinking, leadership, and facilitation skills through a student-led seminar (Dance Department Learning Goal 2.3)

Audience: Undergraduate

7. Increase confidence in themselves and their work demonstrated through oral presentation (Dance Department Learning Goal 2.3)

Audience: Undergraduate

### **DANCE 463 – SENIOR PROJECT**

1-2 credits.

Focuses on artistic and scholarly senior dance projects such as choreography, performance, pedagogy, research studies, papers, and articles.

**Requisites:** Senior standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Design a semester-long research project in collaboration with the professor.

Audience: Undergraduate

2. Plan a project using purpose/problem statements, methods, and literature review.

Audience: Undergraduate

3. Engage with scholarly research on the relevant issues.

Audience: Undergraduate

4. Present a project at the end of the course for peers and invited faculty.

Audience: Undergraduate

**DANCE 466 – CURATING THE PRACTICE**

4 credits.

Explores the evolving practice of performance curation in the 21st century, emphasizing the role of curators and artists in shaping contemporary performance art. Critical engagement with diverse curatorial practices, considering both historical and emerging models influenced by the 2020 global lockdown, digital platforms, and virtual spaces. Exploration of how performance reception, access, and curation have been reshaped since 2020, and investigation of new paradigms such as digital and technologically mediated sites for performance through interdisciplinary discussions, presentations, and guest speakers.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Analyze the history and evolution of curatorial practices in performance art.

Audience: Graduate

2. Identify and integrate issues of inclusion, exclusion, and representation in curatorial practices.

Audience: Graduate

3. Evaluate the impact of the pandemic and global lockdown on performance curation and explore digital and virtual platforms as new sites for performance.

Audience: Graduate

4. Develop a curatorial proposal or creative project that incorporates contemporary issues such as accessibility, digital adaptation, and community care.

Audience: Graduate

5. Present and defend curatorial decisions in both written and oral formats, drawing from theoretical and practical case studies.

Audience: Graduate

**DANCE 469 – INTERDISCIPLINARY STUDIES IN THE ARTS**

1-4 credits.

Guest artists present topics appropriate to their specializations.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2022**DANCE 476 – PILATES TEACHING II**

3 credits.

Complete a minimum of 3 hours of teaching per week (or equivalent) working with individuals one on one or with group classes. Teach Pilates coursework Level I-V. Attend weekly seminars and mentor meetings.

**Requisites:** Declared in Pilates Certificate, DANCE 337 and 376**Repeatable for Credit:** No**Last Taught:** Fall 2024**DANCE 551 – ADVANCED DANCE AND REPERTORY PERFORMANCE I**

1 credit.

Focuses on the creation and performance of dance repertory, whether through the development of new choreographic works or the re-staging of existing pieces. Emphasizes live performance as a process to contribute to both the creative and performance aspects of the work. Collaboratively engage in critical discussions and provide expert feedback, reinforcing arguments around artistry, excellence, and the role of live performance in contemporary dance. Hands-on experience in contemporary performance skills and techniques related to dance repertory, emphasizing collaboration in the creation and practice of live dance. Requires concurrent enrollment in DANCE 311, 312, 325, or 326 and audition at first class meeting.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Demonstrate enhanced skills in the creation, rehearsal, and performance of repertory, contributing to both the development and execution of choreographic works.

Audience: Graduate

2. Analyze traditional, folk, and popular dance vocabularies from the African Diaspora and explore their relevance in contemporary concert dance.

Audience: Graduate

3. Develop an understanding of artistry and excellence in live performance, developing the ability to articulate and apply these concepts in their work.

Audience: Graduate

4. Evaluate the contributions of others in the collaborative process to provide constructive, expert feedback.

Audience: Graduate

5. Investigate the potential impact of future technologies on live performance.

Audience: Graduate

**DANCE 552 – ADVANCED DANCE REPERTORY AND PERFORMANCE II**

1 credit.

Focuses on the creation and performance of dance repertory, whether through the development of new choreographic works or the re-staging of existing pieces. Emphasizes live performance as a process to contribute to both the creative and performance aspects of the work. Collaboratively engage in critical discussions and provide expert feedback, reinforcing arguments around artistry, excellence, and the role of live performance in contemporary dance. Hands-on experience in contemporary performance skills and techniques related to dance repertory, emphasizing collaboration in the creation and practice of live dance. Requires concurrent enrollment in DANCE 311, 312, 325, or 326 and audition at first class meeting.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Demonstrate enhanced skills in the creation, rehearsal, and performance of repertory, contributing to both the development and execution of choreographic works.

Audience: Graduate

2. Analyze traditional, folk, and popular dance vocabularies from the African Diaspora and explore their relevance in contemporary concert dance.

Audience: Graduate

3. Develop an understanding of artistry and excellence in live performance, developing the ability to articulate and apply these concepts in their work.

Audience: Graduate

4. Evaluate the contributions of others in the collaborative process to provide constructive, expert feedback.

Audience: Graduate

5. Investigate the potential impact of future technologies on live performance.

Audience: Graduate

**DANCE 560 – CURRENT TOPICS IN DANCE: WORKSHOP**

1-3 credits.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**DANCE 567 – HISTORY OF SCREENDANCE**

3 credits.

Focus on the history and practice of screendance in its myriad forms including, but not limited to, performance made for the camera, first person narrative, spoken word, fictional cinema, experimental documentary and other forms of mediated performance practice within the broadly defined context of dance. Interdisciplinary approach to making performative work for the screen.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Analyze history of screendance within a historical framework which the student will learn through lecture, screenings, and readings.

Audience: Both Grad &amp; Undergrad

2. Demonstrate strong written skills to communicate grasp of the myriad forms of this hybrid art form and the various approaches and concerns over time.

Audience: Both Grad &amp; Undergrad

3. Analyze socio-political and cultural perspectives, as well as philosophical and aesthetic strategies at work within the form and content explored by the directors and choreographers.

Audience: Both Grad &amp; Undergrad

4. Demonstrate conceptual rigor, research, and critical analysis to gain knowledge and skills in cross-cutting methodologies and approaches.

Audience: Graduate

**DANCE 665 – DANCE HISTORY AND THEORY**

3 credits.

Examines dance historical work in the changing field of Dance Studies since the mid-1980s. Introduces significant perspectives on dance history and dance theory, and considers how these impact and relate to dance creation and pedagogy. Engage with new research in dance history, practice archival research methods, and form a teaching approach to dance history that is responsive to the current direction and needs of the field.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the impact of the field of Dance Studies on dance historical research and discourses.

Audience: Graduate

2. Execute archival research methods.

Audience: Graduate

3. Synthesize materials into a preliminary interpretation and suggestions for formulating an argument from the documents.

Audience: Graduate

4. Examine current dance historical literature.

Audience: Graduate

5. Formulate a creative approach to literature.

Audience: Graduate

**DANCE 675 – DANCE AND COMMUNITY**

2-3 credits.

Engages with dance arts for and in communities. Working in relation to core ideas about the value of dance/movement in community, covers interdisciplinary research, scholarship, and praxis within this diverse area of work. Investigates how dance and interrelated arts serve as vehicles for social and environmental change in diverse communities. Specific themes might include racial justice, environmental justice, indigenous survival struggles, and how these themes impact or galvanize communities. Theory and practice reaches beyond campus and connects to the H'Doubler legacy as well as the Wisconsin idea.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Learn to listen to learn

Audience: Graduate

2. Become self-reflective, respectful, and thoughtful

Audience: Graduate

3. Develop understanding and appreciation of community groups through breadth and depth approach to this area of study

Audience: Graduate

4. Gain perspective on space, place, and identity

Audience: Graduate

5. Demonstrate awareness of issues and show sensitivity to access and accommodations

Audience: Graduate

6. Apply skills in working with community groups and diverse populations

Audience: Graduate

7. Design and use strategies to effectively engage, coordinate, communicate, collaborate, create with different groups

Audience: Graduate

**DANCE 679 – DANCE FIELD WORK**

2-4 credits.

Off-campus, in-the-field experience pursuing an intensive, self-directed study or project under faculty guidance and mentorship. Research directly leads to the development of a creative performance project. May be conducted in a local, national, or international community or professional settings as related to student's practice-as-research work. One-on-one high-value creative research activity, individual-level feedback, and model the behavior and norms of academia and professional life. Devise a research project while guided through the research and creative process.

**Requisites:** Declared in Dance MFA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Learning Outcomes:** 1. Identify critical perspectives on dance through cultural, philosophical, aesthetic, historical, social, political, and scientific perspectives.

Audience: Graduate

2. Integrate knowledge of the field of dance and innovative methods in dance research.

Audience: Graduate

3. Apply specific knowledge and skills related to one's chosen path of inquiry.

Audience: Graduate

4. Utilize qualitative, quantitative, and mixed methods for conducting dance research.

Audience: Graduate

5. Utilize analytical skills for conducting research including auto-ethnography and considerations for information gathering, documentation, data collection, analysis, and reporting.

Audience: Graduate

**DANCE 699 – INDEPENDENT PROJECT**

0-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**DANCE 762 – RESEARCH METHODS**

3 credits.

Examines different research methodologies and approaches to researching dance. Topics range from studio-based research to theoretical research and include: Practice as Research, Embodied Approaches to Research, Ethnographic Methodologies, Dramaturgy, Critical Theory, and Issues in Dance Studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify approaches for engaging in dance research.

Audience: Graduate

2. Summarize main trends and latest scholarship in the field of dance and dance studies.

Audience: Graduate

3. Analyze scholarly sources and critically evaluate research tools.

Audience: Graduate

4. Conduct a large research project that aligns with individual interests.

Audience: Graduate

**DANCE 776 – DANCE CURRICULUM AND TEACHING PRACTICES**

1 credit.

Foundational structure engaging in various dance teaching experiences. Cultivate self-reflective, student-centered teaching skills through discussions, integrating an awareness of current issues and developments impacting the field with personal artistry. Investigate the expansion and evolution of dance pedagogy to explore and address the evolution of the field at local, regional, national, and global levels.

**Requisites:** Declared in Dance MFA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Learning Outcomes:** 1. Communicate clearly and effectively enact pedagogy to the dance community, the public, and in teaching situations.

Audience: Graduate

2. Work collaboratively and productively within a diverse global community of artists and to acknowledge and respect diverse aesthetic viewpoints.

Audience: Graduate

3. Integrate, and synthesize information a breadth of understanding of dance and related disciplines within the dance discipline and across disciplines.

Audience: Graduate

4. Develop and implement arts integrated curricula, including cross-curricular interdisciplinary focus

Audience: Graduate

5. Enact pedagogical approaches appropriate for various dance teaching experiences.

Audience: Graduate

**DANCE 990 – CREATIVE PROJECT FOR RESEARCH**

3 credits.

Individual research projects following the approval stage of thesis proposal. Create research plans and schedules determined by the particulars of creative research, whether methodologies and approaches are studio-based or theory-based. Early through final stages of thesis projects are guided with faculty mentorship.

**Requisites:** DANCE 762

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Demonstrate a critical awareness of the relationship of their artwork to its social, cultural, historical, theoretical and contemporary contexts.

Audience: Graduate

2. Develop, polish, and clearly articulate artistic goals, manifested in a substantial body of artwork and communicated through oral presentations and thesis writing.

Audience: Graduate

3. Organize and conduct a large creative research project.

Audience: Graduate

4. Track and complete all tasks connected to implementation.

Audience: Graduate

5. Engage with feedback and discussion of relevant topics.

Audience: Graduate

6. Create a visual and oral presentation of one's body of work that is shared with peers and faculty, addressing any issues or questions that arise.

Audience: Graduate

**DANCE 999 – INDEPENDENT PROJECT**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 1991

## DERMATOLOGY (DERM)

### DERM 601 – SKIN BIOLOGY AND SKIN DISEASES

3 credits.

Introduction to basic science principles of skin biology and skin diseases (biochemistry, molecular biology, genetics, etc.). Provides a strong base and training to future scientists, physicians, and industrial leaders in skin sciences and skin care, as well as drug and device development.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151 or ZOOLOGY/BIOLOGY 101), (CHEM 104, CHEM 109 or BIOCHEM 501), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Learn and demonstrate advanced knowledge of the fundamentals of skin biology.

Audience: Both Grad & Undergrad

2. Demonstrate knowledge of cutaneous disorders and diseases.

Audience: Both Grad & Undergrad

3. Demonstrate advanced knowledge of innovation, technology, and regulations in the field of skin biology.

Audience: Both Grad & Undergrad

4. Enhance communication and presentation skills related to evaluating and sharing scientific knowledge.

Audience: Both Grad & Undergrad

5. Design experiments applicable to one's own research.

Audience: Both Grad & Undergrad

6. Demonstrate critical understanding of skin biology that helps ongoing or future research projects and/or career development.

Audience: Graduate

7. Lead journal club discussions.

Audience: Graduate

### DERM 602 – ADVANCES IN SKIN BIOLOGY AND SKIN DISEASES

2 credits.

Offers an interactive platform to critically analyze classic and state-of-the-art research articles in skin biology and skin diseases, as well as the opportunity to present journal articles. Provides a strong base and training for future scientists, physicians, and industrial leaders in skin sciences, skincare, and drug development.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY 130, BIOCORE 381, CHEM 104, 109, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the motivations and thought processes in classic papers.

Audience: Both Grad & Undergrad

2. Keep up to date with the latest developments and research findings in skin biology and skin diseases.

Audience: Both Grad & Undergrad

3. Develop the skills to critically evaluate and assess research methodologies, results, and conclusions in journal articles.

Audience: Both Grad & Undergrad

4. Demonstrate advanced knowledge of innovation, technology, and regulations in the field of skin biology.

Audience: Both Grad & Undergrad

5. Enhance communication and presentation skills related to evaluating and sharing scientific knowledge.

Audience: Both Grad & Undergrad

6. Demonstrate critical understanding of skin biology that helps ongoing or future research projects and/or career development.

Audience: Graduate

7. Lead journal club discussions.

Audience: Graduate

**DERM 904 – SCIENCE OF CUTANEOUS DISEASE**

2 credits.

The practice of Dermatology encompasses diseases of the skin, mucosal surfaces, hair and nails. The scientific specialty integrates cellular and molecular biology, immunology, microbiology, and physiology to support patient care decisions. Learn basic science principles of normal and abnormal cutaneous functioning, building on the principles introduced in the MED SC-M 774. These core concepts will be applied through interactions with patients in the clinical setting, building foundational basic science knowledge to diagnose and treat dermatologic diseases.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the process of normal keratinization and cellular factors that lead to disorders of keratinization

Audience: Graduate

2. Explain the immunologic mechanisms underlying inflammatory dermatoses, including atopic dermatitis, allergic contact dermatitis, psoriasis, immunobullous disease, urticarial and acne vulgaris

Audience: Graduate

3. Describe the cellular mechanisms of cutaneous malignancies, including non melanoma skin cancer, melanoma and cutaneous lymphoma

Audience: Graduate

4. Explain normal hair and nail physiology

Audience: Graduate

5. Identify key histologic features of normal skin

Audience: Graduate

6. Recognize histologic patterns of cutaneous disease and explain the cellular mechanisms underlying these changes

Audience: Graduate

7. Explain the mechanism of action of various dermatology medications and vaccines in the treatment and prevention of cutaneous diseases

Audience: Graduate

8. Critically appraise primary literature as it relates to the etiology and/or treatment of skin diseases

Audience: Graduate

**DERM 910 – INDEPENDENT READING AND RESEARCH IN DERMATOLOGY**

2-8 credits.

Independent research under the direct supervision of Dermatology faculty. Each student's research project is individualized to meet student research goals within the context of faculty research needs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage in clinical research through an apprenticeship-style learning experience with a research mentor.

Audience: Graduate

2. Formulate a hypothesis (or specific study objective if project does not involve hypothesis testing).

Audience: Graduate

3. Conduct a thorough literature review of the specific research question.

Audience: Graduate

4. Develop skills in research design by writing or contributing to a research proposal.

Audience: Graduate

5. Develop skills in the analysis of research data.

Audience: Graduate

6. Select and apply statistical methodologies appropriate for the proposed analyses.

Audience: Graduate

7. Interpret results correctly and in context of previous findings from literature review.

Audience: Graduate

8. Develop a plan for disseminating the results of the research project.

Audience: Graduate

9. Improve verbal and written communication skills by preparing findings for presentation.

Audience: Graduate

**DERM 919 – INDIVIDUALIZED CLINICAL ELECTIVE IN DERMATOLOGY**

2-4 credits.

Experience blends medical and procedural dermatology, dermatopathology and basic science topics. Advance patient care skills through exposure to a broad array of common and complex cutaneous diseases, formulation of basic differential diagnoses and treatment plans, and performance of common diagnostic procedures. Experience via rotations through general adult and pediatric dermatology clinics, as well as specialty clinics. Opportunities may arise for participation in inpatient dermatology consults. All clinical activities will be completed under the direct supervision of attending physicians and residents. Participate in additional educational activities, including faculty lectures, Grand Rounds conference, and reading or on-line assignments. Additional patient care related learning activities may be assigned by instructors (e.g., literature reviews, presentations on specific topics); these are dependent on the individual student, attending physician, and clinical site.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Describe clinical findings using accurate descriptive terminology.

Audience: Graduate

3. List the features of common dermatologic disorders and recognize them in the clinical setting.

Audience: Graduate

4. Formulate differential diagnosis for common skin diseases.

Audience: Graduate

5. List the steps for performing office-based tests, including potassium hydroxide (KOH) examination and scabies prep.

Audience: Graduate

6. Formulate a basic treatment plan for common dermatologic disorders, including selecting the appropriate strength of topical steroids.

Audience: Graduate

7. Counsel patients on principles of photoprotection, signs of skin cancer, side effects of topical steroids and appropriate use of oral antibiotics in the care of dermatology patients.

Audience: Graduate

8. Use clinical and histologic evidence, adapt and justify the working diagnosis.

Audience: Graduate

9. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

10. Review, interpret and present current literature to support patient care.

Audience: Graduate

11. Engage patients in shared decision-making regarding tests, orders and procedures.

Audience: Graduate

**DERM 953 – DERMATOLOGY ELECTIVE**

2-4 credits.

Experience blends medical and procedural dermatology, dermatopathology and basic science topics. Advance patient care skills through exposure to a broad array of common and complex cutaneous diseases, formulation of basic differential diagnoses and treatment plans, and performance of common diagnostic procedures. Experience via rotations through general adult and pediatric dermatology clinics, as well as specialty clinics. Opportunities may arise for participation in inpatient dermatology consults. All clinical activities will be completed under the direct supervision of attending physicians and residents. Participate in additional educational activities, including faculty lectures, Grand Rounds conference, and reading or on-line assignments. Additional patient care related learning activities may be assigned by instructors (e.g., literature reviews, presentations on specific topics); these are dependent on the individual student, attending physician, and clinical site.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Describe clinical findings using accurate descriptive terminology.

Audience: Graduate

3. List the features of common dermatologic disorders and recognize them in the clinical setting.

Audience: Graduate

4. Formulate differential diagnosis for common differential diagnosis

Audience: Graduate

5. List the steps for performing office-based tests, including potassium hydroxide (KOH) examination and scabies prep.

Audience: Graduate

6. Formulate a basic treatment plan for common dermatologic disorders, including selecting the appropriate strength of topical steroids.

Audience: Graduate

7. Counsel patients on principles of photoprotection, signs of skin cancer, side effects of topical steroids and appropriate use of oral antibiotics in the care of dermatology patients

Audience: Graduate

8. Using clinical and histologic evidence, adapt and justify the working diagnosis.

Audience: Graduate

9. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

10. Review, interpret and present current literature to support patient care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

**DERM 954 – AMBULATORY DERMATOLOGY ELECTIVE**

2-4 credits.

Outpatient dermatology experience provides exposure to a typical private practice where patients present with a broad array of problems. Learn to diagnose, treat, and/or appropriately refer common dermatologic conditions and to be aware of cutaneous manifestations of serious and significant systemic disease.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Accurately describe skin lesions including morphology, configuration and distribution.

Audience: Graduate

2. Recognize cutaneous manifestations of systemic diseases.

Audience: Graduate

3. Demonstrate familiarity with common diagnostic and therapeutic procedures used in dermatology, including cryotherapy, shave and punch skin biopsy, potassium hydroxide mounts, scabies oil mounts, Tzanck smear, and dermoscopy.

Audience: Graduate

4. Describe 1st and 2nd lines of therapy for common and important lesions and eruptions.

Audience: Graduate

5. Identify risk factors for melanoma and non-melanoma skin cancers.

Audience: Graduate

6. Perform supervised full-body skin exams for high-risk patients.

Audience: Graduate

7. Demonstrate ability to write appropriate clinical notes and communicate effectively with the health care team.

Audience: Graduate

8. Identify clinical situations in which a dermatologist should be consulted and other clinical situations which may be managed in a primary care clinic without referral.

Audience: Graduate

**DERM 955 – PUBLIC HEALTH IN DERMATOLOGY SELECTIVE**

2 credits.

Explore the difficulties and opportunities available in improving public health in the specialized field of dermatology. Topics and readings have been developed with public health experts from around the country, and include discussions surrounding skin cancer screening and overdiagnosis, as well as dermatologic challenges in LGBTQ+, skin of color, rural, and inmate communities.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the social ecological model framework to examine factors that influence dermatologic health outcomes

Audience: Graduate

2. Identify and discuss principles of screening and surveillance of skin cancer, and relate this to screening and surveillance of other medical conditions

Audience: Graduate

3. Examine equity issues in dermatology with respect to diverse communities, including: rural vs. urban, LGBTQ+, skin of color, and inmate populations

Audience: Graduate

4. Critically appraise medical literature focused on dermatologic public health

Audience: Graduate

5. Respectfully engage with community organizations around the topic of dermatology

Audience: Graduate

6. Communicate public health-oriented dermatology messaging to a variety of audiences

Audience: Graduate

## DESIGN STUDIES (DS)

**DS 101 – INTRODUCTION TO TEXTILE DESIGN**

3 credits.

This survey class will be an introduction to the technical and conceptual ways of working in Textile Design. Students will participate in three five week modules: one module introducing print and dye concerns, one module introducing off-loom processes, and one module introducing structural enrichment techniques and concepts. Each module will include a series of introductory exercises leading to a final larger project. The work in each module will be supported by short readings and slide lectures highlighting historical and contemporary work. Course fee: yes.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DS 120 – DESIGN: FUNDAMENTALS I**

3 credits.

Elements and principles of design relevant to design of the visual environment.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**DS 123 – WHAT IS DESIGN?**

3 credits.

Design is a key component of our daily lives and can profoundly affect all people. But how? And to what end? What does design mean and what can it do for us? Interrogate those questions by looking broadly at the place of design in everyday life, and how design intersects with society, economics, politics, the environment, and culture. Study the form, function, and philosophy of design, from what we wear on our bodies to how we move through the world. Ground discussions in close observation and analysis of previous design solutions, leading to innovative approaches to the roles, and responsibilities, of design for the future.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Interrogate design in the context of everyday life, including social, cultural, political, economic, technological, and environmental circumstances that both influence and are influenced by the design sector.

Audience: Undergraduate

2. Use methods of observation, analysis, and application to assess the role of design in everyday life.

Audience: Undergraduate

3. Analyze primary and secondary research sources across a range of media (eg, written texts, visual and material culture, oral testimony, embodied experience, etc) to promote awareness and understanding of design.

Audience: Undergraduate

4. Demonstrate knowledge of design practice, purpose, uses, outcomes, and responsibilities, across scales of human experience.

Audience: Undergraduate

5. Communicate clearly, effectively, and critically using terminology appropriate to the field of design, across a variety of modes of expression (eg, academic writing, peer discussion, public commentary, visual storytelling, etc).

Audience: Undergraduate

**DS 130 – INTRODUCTION TO INTERIOR ARCHITECTURE**

3 credits.

Introduction to interior architecture, as a discipline and as a profession. Examine the ways in which interior environments impact our lives, and the challenges and responsibilities faced by those who work in this field. Topics include: the history of interior design as a profession; the increased professionalization of interior design; the relation of interior design to other design disciplines (such as architecture and furniture design); the social, economic, and environmental issues that impact design; the role of emerging technologies (including digital media); design research and documentation; the elements and principles of design; the identification and observation of quality work in both commercial and residential settings; contemporary trends in taste and aesthetics; and the application of design research methods to a real-world project.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**DS 140 – VISUAL THINKING - FORM AND SPACE**

3 credits.

Manual and digital techniques for idea exploration, concept development, and design presentation using a variety of media. Projects in hand drawing techniques and professional design software. Gain heightened attention to detail; understand the relationship of two-dimensional drawings and three-dimensional objects; explore multiple design solutions visually; convey technical information, and professionally communicate design concepts. Introduce visual communication, visual thinking, visual inspiration and visual representation

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Practice studio habits that support a consistent, rigorous, reflective work ethic.

Audience: Undergraduate

2. Practice fundamental skills for self-discovery and exploration in design.

Audience: Undergraduate

3. Investigate current software and techniques for contemporary design.

Audience: Undergraduate

4. Describe the elements that contribute to the visualization of design.

Audience: Undergraduate

5. Apply the elements of art and the principles of design in drawing and digital exercises to express ideas, concepts, and moods.

Audience: Undergraduate

6. Practice a variety of methods to structure, contextualize, and communicate the visual representation of ideas.

Audience: Undergraduate

**DS 150 – VISUAL THINKING - PIXELS AND PENCILS**

3 credits.

Explores visual media as a means of describing what exists, as a method for generating ideas for what could be, and for professionally communicating a design concept. Use hand drawing techniques and professional design software. Supports the proficiency of technical skills while teaching essential methods for creative practice. Learn to move fluidly across platforms to visually explore possibilities, refine ideas, and professionally communicate design plans.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop heightened attention to detail, light and form through observational drawing while developing coordination between hand and eye.

Audience: Undergraduate

2. Use hand drawing and digital tools to visually explore multiple design solutions.

Audience: Undergraduate

3. Create professional visuals to communicate a complex design idea, mood and concept.

Audience: Undergraduate

4. Increase fluency of commonly used design software

Audience: Undergraduate

5. Critically analyze individual work and the work of classmates using appropriate terminology related to the design field.

Audience: Undergraduate

6. Develop studio habits that support a consistent, rigorous, reflective work ethic.

Audience: Undergraduate

**DS 153 – SEWN CONSTRUCTION I**

3 credits.

Introduces the principles of sewn construction and addresses the physical and aesthetic properties of fiber and fabrics in the context of apparel design. The studios address skills necessary to plan and construct basic garments. Lectures, hands-on studios, and critiques explore the fundamentals of apparel structure and emphasize the interrelationship of fabric, design and apparel construction as well as the creative, expressive potential of materials and making.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Differentiate and demonstrate an understanding of key characteristics and interaction of fiber content and fabric structures as applied in apparel construction.

Audience: Undergraduate

2. Demonstrate competence in using professional tools and machinery for garment construction.

Audience: Undergraduate

3. Develop a basic skill set for sewn construction

Audience: Undergraduate

4. Demonstrate the ability to follow, and alter a commercial pattern

Audience: Undergraduate

5. Analyze garment structure and fabrics to determine proper use of interfacings, appropriate closures and edge finishes.

Audience: Undergraduate

6. Apply the principles of construction, fiber content and structure to produce a well-constructed, expressive garment.

Audience: Undergraduate

### DS 154 – SEWN CONSTRUCTION II

3 credits.

Emphasizes specialty fabrics, finishes and complex construction such as matching plaids and working with pile fabrics. Introduces pattern manipulation through basic flat patternmaking principles. Design and fabricate an original collection of garments for a target customer and will develop and construct two of the garments.

**Requisites:** DS 153

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and develop skill set to apply appropriate construction methods for specialty fabrics.

Audience: Undergraduate

2. Understand advanced construction concepts and experiment with advanced construction techniques.

Audience: Undergraduate

3. Identify and analyze fabric qualities to determine suitability for a specified silhouette, target market, and consumer end-use.

Audience: Undergraduate

4. Recognize and execute principles of flat pattern manipulation to create original designs

Audience: Undergraduate

5. Design a group of garments appropriate for a specific customer and end-use.

Audience: Undergraduate

### DS 210 – FASHION ILLUSTRATION

3 credits.

Introduction to visual communication of apparel design concepts using selected media. Focus is on drawing the fashion figure, using special techniques, with emphasis on the relationship of figure, garment, fabric, texture, and pattern.

**Requisites:** DS 120 and 154

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### DS 215 – PATTERNMAKING FOR ACCESSORIES

3 credits.

The principles and theories of flat pattern, drafting and draping methods for 3D accessories are explored. The principles of patternmaking are applied to headwear, handbags and footwear. Complete projects that require designing, patterning and constructing hats, bags and footwear.

**Requisites:** DS 153

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Understand and apply draping and flat pattern methods used to develop patterns for a variety of accessories

Audience: Undergraduate

2. Understand and apply shaping devices and how they are used to transform 2-D materials into 3-D forms

Audience: Undergraduate

3. Understand vocabulary specific to headwear, handbags and footwear including terms, categories, styles and parts. Analyze structure and construction methods of existing accessories construction

Audience: Undergraduate

4. Learn skill set needed to apply patternmaking and construction to original design

Audience: Undergraduate

5. Design, test pattern and construct original design

Audience: Undergraduate

### DS 220 – DESIGN: FUNDAMENTALS II

3 credits.

Elements and principles of three-dimensional design relevant to design and analysis of the spatial environment.

**Requisites:** DS 120

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### DS 221 – PERSON AND ENVIRONMENT INTERACTIONS

3 credits.

Effects of building and outdoor spaces on people over the life course.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### DS 222 – INTERIOR DESIGN I

4 credits.

Understanding and applying the process of solving design problems of interiors. Space planning; selection and use of furnishings and materials; preparation of presentations.

**Requisites:** DS 220 and declared in Interior Architecture BS

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**DS 223 – INTERIOR ARCHITECTURAL DESIGN**

3 credits.

Building components, construction, interpretation of working drawing, and the process of project development.

**Requisites:** DS 222

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**DS 224 – INTERIOR MATERIALS AND FINISHES**

3 credits.

The materials used in interior environments are immense, diverse and constantly changing. Focus on the composition of materials, their uses, and how they affect human health and well being.

**Requisites:** Declared in Interior Architecture BS

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**DS 225 – APPAREL DESIGN I**

3 credits.

Basic principles and elements of design as they apply to apparel. Emphasizing both process and product, students analyze fashion trends and practical problems while developing and executing original designs.

**Requisites:** DS 210 and 253

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DS/ART 226 – TEXTILE DESIGN: OFF-LOOM CONSTRUCTION**

3 credits.

Studio design problems in two and three dimensional off-loom constructions; off-loom weaving, looping, and knotting; historical reference and contemporary application.

**Requisites:** DS 120 and 153

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**DS 227 – TEXTILE DESIGN: PRINTING AND DYEING I**

3 credits.

Surface design developed in print and resist techniques using historic and contemporary methods.

**Requisites:** DS 101

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Be familiar with the history and technique of the following textile processes: indigo dyeing, immersion dyeing with natural dyes, dip dyeing, mechanical resists, block printing, silk-screen printing  
Audience: Undergraduate

2. Demonstrate design awareness: motifs, spacing, scale, and colour in relation to assignments  
Audience: Undergraduate

3. Discover what possibilities there are for a career in textiles  
Audience: Undergraduate

4. See the potential for cloth as a medium for artistic expression and the importance of experimentation in textile media  
Audience: Undergraduate

5. Implement basic techniques in dyeing and printing  
Audience: Undergraduate

6. Demonstrate an understanding of working through not only technical problems as learned in the execution of assignments, but begin to show an understanding of developing a conceptual idea.  
Audience: Undergraduate

7. Display curiosity about unexplored areas in the textile field  
Audience: Undergraduate

## DS 228 – TEXTILE EMBELLISHMENT I

3 credits.

Historic and contemporary design techniques for embellishing textiles; including embroidery, beadwork and appliqué.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Acquire a deepened understanding of the importance of reflection in creative work (learning to pay attention to what you love; what you want to find out; what captures your imagination; and what questions the work suggests).

Audience: Undergraduate

2. Recognize the value of critical thinking and research as it applies to creative work.

Audience: Undergraduate

3. Produce a small collection of embellishment samples showing thoughtful experiential engagement with embroidery, beadwork, and fabric collage.

Audience: Undergraduate

4. Create an original textile work informed by and honoring a textile tradition originating on the African continent.

Audience: Undergraduate

5. Originate one ambitious, thoughtfully considered work informed by your individual, emerging creative practice, and making use of the embellishment techniques introduced in the class.

Audience: Undergraduate

6. Demonstrate public presentation skills appropriate to the discussion of creative research.

Audience: Undergraduate

## DS/ART 229 – TEXTILE DESIGN: WEAVING I

3 credits.

The relationship of hand weaving to textural surfaces and sculptural forms are examined through the study of problems including structure, pattern, composition, and additional conceptual technical possibilities. Content is explored in the development of individual direction and in relationship to the discussion of historical and contemporary textiles and other works of art. Pursue an advanced investigation of concept and technique of hand-woven cloth.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate understanding of theories, approaches, concepts, and current and historical textile/weaving practices in projects and presentations.

Audience: Undergraduate

2. Utilize the techniques, skills and modern tools/software necessary to create work in the field.

Audience: Undergraduate

3. Examine articles and conduct and present research to inform personal style and concept goals.

Audience: Undergraduate

4. Synthesize knowledge and use insight and creativity to better understand and improve their own design/art

Audience: Undergraduate

5. Communicate effectively through oral presentations, discussion and critiques.

Audience: Undergraduate

**DS/GEN BUS 240 – HUMAN-CENTERED DESIGN AND BUSINESS**

2 credits.

Design thinking is an iterative problem-solving process geared toward producing innovative solutions for complex and persistent problems in various fields and organizations. Its process, culture, and value system from both design and business point of views will be covered: Empathetic understanding of the end users, problem definition rooted in systems thinking, ideation with a strong emphasis on creativity, visualization and prototyping, testing rooted in a set of research methods, and finally, the importance of iteration in bringing about innovative solutions. The path from project to market will also be explored, with an understanding of how one might balance desirability, feasibility and viability.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate the ability to understand and gain empathy into human (customer/consumer/user) experience of product, services and systems through systematic inquiries.

Audience: Undergraduate

2. Exhibit the ability to be creative, collaborative, and divergent thinkers who can generate and visually communicate multiple ideas.

Audience: Undergraduate

3. Demonstrate ability to iterate proposed solutions toward innovation.

Audience: Undergraduate

4. Explore questions around cultural and intellectual exchange between business and design such as "What can business learn from design, and vice versa?", or "How might the incorporation of design thinking help human-centered business to grow and flourish?"

Audience: Undergraduate

5. Illuminate and expand on existing touch points between design thinking and "business thinking", including, but not limited to, marketing/new product design and development, entrepreneurship and venture creation, operations and new process design

Audience: Undergraduate

**DS 241 – VISUAL COMMUNICATION I**

3 credits.

Focuses on the basic concepts, methods and materials used for communicating ideas during the design process. Emphasizes creating visually driven experiences, with the goal of providing the tools to integrate traditional manual approaches with up-to-the-minute digital approaches, all within the context of creative design thinking.

**Requisites:** Declared in Interior Architecture BS**Repeatable for Credit:** No**Last Taught:** Fall 2024**DS 242 – VISUAL COMMUNICATION II**

3 credits.

Advanced topics focusing on the concepts, methods and materials used for communicating ideas during the design process. With an emphasis on creating visually driven experiences, integrates traditional manual approaches with up-to-the-minute digital approaches, all within the context of creative design thinking.

**Requisites:** DS 241**Repeatable for Credit:** No**Last Taught:** Spring 2025**DS 251 – TEXTILE SCIENCE**

3 credits.

Chemistry and physics of fibers and polymers. Principles of chemical finishes and dyeing. Qualitative fiber analysis. Structure and properties of yarns and fabrics.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**DS 252 – DESIGN LEADERSHIP SYMPOSIUM**

1 credit.

Provides detailed examination of design careers in the fields of textiles, fashion, and apparel design as well as interior design, industrial design, and architecture. High level industry experts from leading companies in the design industry participate as guest speakers and panel members.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DS 253 – PATTERNMAKING FOR APPAREL DESIGN**

3 credits.

The theory and principles of pattern making through flat pattern and draping techniques.

**Requisites:** DS 154**Repeatable for Credit:** No**Last Taught:** Fall 2024

**DS/ANTHRO/ART HIST/HISTORY/LAND ARC 264 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**DS 270 – DESIGN AND FASHION EVENT PRACTICUM**

2 credits.

Addresses the multi-disciplinary production of a student-centered, student-driven design and fashion event. Topics include, creative direction, strategic marketing, stage and performance, visual communication, event organization, audience engagement and event production. Gain knowledge, skills and hands-on experience implementing a large-scale art event. Emphasizes teamwork and fosters multi-disciplinary appreciation.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2020**DS 299 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023**DS 319 – CLOTH TO CLOTHING**

3 credits.

Explore specific dye and manipulation techniques that directly relate to integrated textile and garment design. Working with color, composition and fabric movement discuss simple garment shapes and how they can be used in conjunction with expressive textiles.

**Requisites:** DS 101 and 154**Repeatable for Credit:** No**Last Taught:** Fall 2024**DS 321 – PROBLEM-DEFINITION: DESIGN PROGRAMMING**

3 credits.

Programming is the problem definition phase of design process. An architectural or design program is used to guide the design process and to evaluate design solutions. A variety of design programming approaches, tools, and techniques are presented. Opportunity to develop skills in preparing a design program document that includes multiple user-needs and principles of environment-behavior interaction.

**Requisites:** DS 221 and sophomore standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge about various programming approaches and tradeoffs of selecting a specific approach. Audience: Undergraduate

2. Illustrate understanding of components within programming documents for designs of different building types.

Audience: Undergraduate

3. Integrate programming tools such as observation, behavior mapping, interviews, and questionnaires in a design program.

Audience: Undergraduate

4. Develop a programming approach and apply it to a project to produce a design program that meets the clients' and users' needs.

Audience: Undergraduate

5. Identify strategies to gather design requirements and integrate them into translatable programming statements.

Audience: Undergraduate

6. Collect, analyze, and organize space requirement information using tools such as adjacency diagrams, criteria matrices, and line-by-line programs.

Audience: Undergraduate

7. Develop analytic and problem-solving skills through use of programming tools and methods.

Audience: Undergraduate

8. Formulate and communicate programmatic requirements to a client and designers.

Audience: Undergraduate

**DS 322 – INTERIOR DESIGN II**

4 credits.

Design of residential interiors including space planning, lighting design, selections of materials and furniture, professional communication of design solutions. Emphasis on the aesthetic and functional needs of the family and residents with special needs.

**Requisites:** DS 222**Repeatable for Credit:** No**Last Taught:** Spring 2025

### DS 327 – TEXTILE DESIGN: MANUAL/COMPUTER GENERATED IMAGERY AND PATTERN

3 credits.

Pattern design for textiles, wallpaper and other applications (motif, layout, repeats, colorways, coordinates), using various manual and digital creation methods. Development of imagery, design concepts, collaboration and presentation.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate the use of Photoshop and Illustrator for textile applications

Audience: Both Grad & Undergrad

2. Display proficiency in the use of Pointcarre to develop designs, colourways and repeating patterns

Audience: Both Grad & Undergrad

3. Develop ideas into conceptually solid designs/works

Audience: Both Grad & Undergrad

4. Research important issues surrounding fair trade and artisan production

Audience: Both Grad & Undergrad

5. Explore the history and techniques of the artisans' crafts through research and conversation with the artisans

Audience: Both Grad & Undergrad

6. Operate computers, software programs, scanners and printers

Audience: Both Grad & Undergrad

7. Exhibit the ability to work in a variety of mediums that incorporate digital imaging

Audience: Both Grad & Undergrad

8. Communicate with confidence

Audience: Both Grad & Undergrad

9. Develop an appreciation for a collaborative interdisciplinary environment

Audience: Both Grad & Undergrad

10. Display an advanced level of design awareness: motifs, spacing, scale, and colour in relation to assignments

Audience: Graduate

11. Create innovative applications for co-design

Audience: Graduate

12. Lead critiques and discussions

Audience: Graduate

13. Model a willingness to take on a leadership role in a collaborative interdisciplinary environment

Audience: Graduate

14. Express curiosity about unexplored areas or possibilities within the fields of textile design, fair trade and artisan production

Audience: Graduate

### DS 333 – DIGITAL FABRICATION FOR DESIGNERS

3 credits.

Modern tools and techniques including professional design software and digital fabrication equipment are used in combination with traditional model making for tangible prototyping using a variety of media. Leverage digital design software, laser cutting, and 3D printing alongside traditional methods and manual tools to develop design concepts into physical forms.

**Requisites:** DS 140 or LAND ARC 210

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Practice studio habits that support a consistent, rigorous, reflective work ethic.

Audience: Undergraduate

2. Demonstrate proficiency in industry standard software to design original digital files for fabrication.

Audience: Undergraduate

3. Develop practical skills in operating laser cutters and 3D printers, understanding both the technical aspects and material limitations of these tools

Audience: Undergraduate

4. Gain hands-on experience in assembly techniques, using basic hand tools to assemble and complete designs

Audience: Undergraduate

5. Troubleshoot and iterate multiple design solutions, fostering problem-solving and critical thinking abilities essential for successful digital fabrication.

Audience: Undergraduate

6. Explore the integration of digital and physical methods to create functional and aesthetically compelling projects

Audience: Undergraduate

### DS 341 – DESIGN THINKING FOR TRANSFORMATION

3 credits.

Learn design thinking techniques to enhance creative analysis and problem solving. Directly apply those techniques to a variety of human centered design challenges. Innovate, prototype, and test designs that address real-world problems with real-world constraints and the limitations of technology. Projects range from ways to improve everyday situations to community issues.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DS 355 – HISTORY OF FASHION, 1400-PRESENT**

3 credits.

Changing form and meaning of costume in the West from Renaissance to present. Dress considered in relation to social/cultural milieu and as an art form. Includes treatment of the body; ethnic/class variations; couture; "antifashion".

**Requisites:** Junior standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**DS 361 – DESIGN-RELATED INTERNATIONAL EXPERIENCE**

1-6 credits.

In-depth study of art/design concepts and/or practice in a specific culture while studying abroad. Looks at cultural issues through a particularized design-related lens.

**Requisites:** DS 120 or ART 104**Repeatable for Credit:** Yes, unlimited number of completions**DS 401 – FIT ACCESSORIES DESIGN**

1-6 credits.

Provides equivalency for accessory design courses completed at the Fashion Institute of Technology (FIT) by Textiles Fashion Design majors as part of the FIT visiting student program. This is not a course that can be enrolled in at UW-Madison

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**DS 402 – FIT ADVERTISING AND MARKETING COMMUNICATIONS**

1-6 credits.

Provides equivalency for advertising and marketing communications courses completed at the Fashion Institute of Technology (FIT) by Textiles Fashion Design majors as part of the FIT visiting student program. This is not a course that can be enrolled in at UW-Madison

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**DS 403 – FIT COMMUNICATION DESIGN FOUNDATION**

1-6 credits.

Provides equivalency for communication design foundation courses completed at the Fashion Institute of Technology (FIT) by Textiles Fashion Design majors as part of the FIT visiting student program. This is not a course that can be enrolled in at UW-Madison

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**DS 404 – FIT FASHION BUSINESS MANAGEMENT**

1-6 credits.

Provides equivalency for fashion business management courses completed at the Fashion Institute of Technology (FIT) by Textiles Fashion Design majors as part of the FIT visiting student program. This is not a course that can be enrolled in at UW-Madison

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**DS 405 – FIT FASHION DESIGN**

1-6 credits.

Provides equivalency for fashion design courses completed at the Fashion Institute of Technology (FIT) by Textiles Fashion Design majors as part of the FIT visiting student program. This is not a course that can be enrolled in at UW-Madison

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**DS 406 – FIT TEXTILE DESIGN AND SCIENCE**

1-6 credits.

Provides equivalency for textile design and science courses completed at the Fashion Institute of Technology (FIT) by Textiles Fashion Design majors as part of the FIT visiting student program. This is not a course that can be enrolled in at UW-Madison

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**DS 407 – FIT RELATED AREA**

1-6 credits.

Provides equivalency for related area courses completed at the Fashion Institute of Technology (FIT) by Textiles Fashion Design majors as part of the FIT visiting student program. This is not a course that can be enrolled in at UW-Madison

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**DS 421 – HISTORY OF ARCHITECTURE AND INTERIORS I: ANTIQUITY THROUGH 18TH CENTURY**

3 credits.

Surveys the history of architecture, interiors, furnishings and decorative arts from antiquity to the mid-19th century. Introduction to major design cultures and movements, emphasizing the role of social, economic, political, technological, and aesthetic factors in the shaping design.

**Requisites:** DS 120 or (ART HIST 201 and 202)**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**DS 422 – HISTORY OF ARCHITECTURE & INTERIORS II: 19TH AND 20TH CENTURIES**

3 credits.

Surveys the history of architecture, interiors, furnishings and decorative arts from the mid-19th to the mid-20th century. Introduction to major design cultures and movements, emphasizing the role of social, economic, political, technological, and aesthetic factors in the shaping design.

**Requisites:** DS 421 or (ART HIST 201 and 202)**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**DS 427 – TEXTILE DESIGN: PRINTING AND DYEING II**

3 credits.

Focuses on silkscreen printing. Discharge, burnout, and chemical resist processes, specific to screen printing. Develop conceptual ideas and explore alternative ways of producing images.

**Requisites:** DS 227 and 327, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DS 428 – TEXTILE EMBELLISHMENT II**

3 credits.

Opportunity to continue creative research introduced in Textile Embellishment I, with a special emphasis on student driven design. Advance skill and vision using traditional and experimental ways of altering and enriching the surface of pliable materials using techniques such as stitching, embroidery, beading, and fabric collage. Identify and pursue individual conceptual concerns. Readings, formal and informal presentations, group and individual critiques will support the work. Presentation of research will include formal power point talks and physical presentation of the completed textile works.

**Requisites:** DS 228

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Acquire a deepened understanding of the importance of reflection in creative work (learning to pay attention to what you love; what you want to find out; what captures your imagination; and what questions the work suggests).

Audience: Undergraduate

2. Recognize the value of critical thinking and research as it applies to creative work.

Audience: Undergraduate

3. Create original textile work informed by personal vision, and supported with traditional and applied research.

Audience: Undergraduate

4. Originate ambitious, thoughtfully considered work informed by their individual, emerging creative practice, and making use of the embellishment techniques appropriate to their research.

Audience: Undergraduate

5. Demonstrate public presentation skills appropriate to the discussion of creative research through power point presentations and the opportunity to facilitate discussion.

Audience: Undergraduate

**DS 429 – TEXTILE DESIGN: WEAVING II**

3 credits.

Analysis of complex or compound hand weave techniques. Individual development of solutions to problems of structural textile design.

**Requisites:** DS/ART 229

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DS 430 – HISTORY OF TEXTILES**

3 credits.

Designs and meanings and interrelationships of textiles in selected cultures and time periods.

**Requisites:** None

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**DS 451 – COLOR THEORY AND TECHNOLOGY**

3 credits.

Specialized topics of current interest.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement or graduate/professional standing

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DS 501 – SPECIAL TOPICS**

1-3 credits.

Specialized topics of current interest.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**DS/COMP SCI/ISYE 518 – WEARABLE TECHNOLOGY**

3 credits.

Gives students hands-on experience in building wearable computing platforms. Designed for students who have a background in textiles and apparel design, computer science, engineering or media arts. By the completion of the course students will have fundamental knowledge of electronic circuitry, programming, and "maker skills".

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**DS 519 – COLLECTION DEVELOPMENT**

3 credits.

Demonstrate accumulated learning through a semester long project in the development of a collection of marketable artisan works within your own media. Combines classroom-based learning explorations with real world technical and economic considerations to successfully navigate a balance between expansive thinking and application in real world situations.

**Requisites:** Junior standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DS 521 – ENVIRONMENTS OF CRISIS & DESIGN**

3 credits.

Explores emerging built environments designed to support people undergoing crises such as disasters, conflicts, forced migration. Focuses on psycho-social components to employ human-centered design lens to environments of crisis. Examines theoretical frameworks on stress, trauma-informed practices, supportive environments, and restoration. Investigates physical spaces in crisis environments and their health and wellbeing impacts. Evaluates design, policy interventions from lenses of equity and justice, human rights, and dignity.

**Requisites:** Junior standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine theoretical frameworks in environmental psychology investigating human-environment relations in environments of crisis.

Audience: Both Grad &amp; Undergrad

2. Demonstrate familiarity with the breadth of human experiences in crisis situations focusing on the built environment.

Audience: Both Grad &amp; Undergrad

3. Describe health and well-being impacts of built environments on people undergoing crisis.

Audience: Both Grad &amp; Undergrad

4. Critically evaluate environmental interventions in spaces of crisis to investigate their psycho-social supportiveness.

Audience: Both Grad &amp; Undergrad

5. Apply theoretical frameworks in development of research questions within the context of environments of crisis.

Audience: Graduate

6. Critique existing crisis contexts from a human-centered perspective.

Audience: Graduate

**DS 527 – GLOBAL ARTISANS**

3 credits.

In the field of design, there has been an increased emphasis on ethical practices in production and consumption. Utilizing "design thinking", become exposed to important issues surrounding small-scale artisan production and develop valuable hands-on skills working with artisan partners through design, quality control, branding and story-telling. Topics may include: fair trade development, product design, cultural implications, as well as pricing, marketing, and sales.

**Requisites:** Junior standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DS 528 – EXPERIMENTAL TEXTILE DESIGN**

2-3 credits.

Experimental design and decorative principles; elements and techniques for the animation of textile surfaces.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024**DS 529 – BUILDING A SUSTAINABLE CREATIVE PRACTICE**

3 credits.

Artists and designers' material choices influence the content, social meaning, and physical structure of their work, as well as leaving an environmental foot print and affecting social exchange. Consideration given to reuse and recycling, and critically engaging ideas of sustainability in art making and design practice with an emphasis on fiber related topics including textile and apparel design, soft sculpture, papermaking and book arts, as well as exhibition, installation, and/or the distribution of finished works.

**Requisites:** Junior standing**Repeatable for Credit:** No**Last Taught:** Spring 2025

**DS 549 – ENVIRONMENTAL CONTROL SYSTEMS: LIGHTING, ACOUSTICS, AND THERMAL COMFORT IN BUILDINGS**

3 credits.

The ways in which we design, construct, and operate has significant impacts on the building occupants and the environment. Architects, designers, and building engineers can work closely together to reduce depletion of critical resources, prevent environmental degradation, and create built environments that are livable, comfortable, safe, and productive. Offers the foundational knowledge on which such practice can be built on. Through a series of lectures, field measurements, and building simulations, understand how lighting, acoustics, and thermal properties behave in buildings and influence the building occupants. The proper application of building design as well as methods for designing and evaluating these features are discussed.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and declared in Interior Architecture; or graduate/professional standing

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand physics of light, sound, color, and thermal transfer as they pertain to lighting, acoustics, and thermal comfort in buildings.

Audience: Both Grad & Undergrad

2. Understand the earth science that governs solar geometry and the climate as they pertain to lighting and thermal comfort in buildings.

Audience: Both Grad & Undergrad

3. Understand human physiology and psychology related to lighting, acoustics, and thermal comfort in buildings.

Audience: Both Grad & Undergrad

4. Critically evaluate lighting, acoustics, and thermal comfort in both existing and future buildings using various measurement methods and computational models.

Audience: Both Grad & Undergrad

5. Apply concepts of lighting, acoustics, and thermal transfer to design strategies in order to create optimal experiences for building occupants.

Audience: Both Grad & Undergrad

6. Develop a conceptually sophisticated research projects that focuses on building performance evaluation.

Audience: Graduate

7. Learn and lead from class activities, research projects, and self-directed study.

Audience: Graduate

**DS 550 – MATERIAL CULTURE OF CHILDHOOD**

3 credits.

Explores the histories of Children and Childhood and a set of scholarly methods called Material Culture. How have changing understandings of child development, social and cultural history, and the history of the family shaped and been shaped by children's material worlds? Explores design and material culture topics that illuminate how histories of young children have been understood and treated and considers objects that reflect the experiences of young people, from birth through school age--clothing for babies and children, garments that mark aging and transitions, histories of homes and interior furnishings, toys and play things, objects for learning, and material objects related to caregiving.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Interpret theoretical and historical texts in Material Culture, applying the concepts to written and oral explanations

Audience: Both Grad & Undergrad

2. Evaluate objects and images as sources of social and cultural information from a material culture perspective

Audience: Both Grad & Undergrad

3. Describe and write about the historical development of the concept of childhood and the influence of material culture on its construction

Audience: Both Grad & Undergrad

4. Explore and test how concepts of childhood are closely connected to ideas about race, gender, class, ethnicity, religion/faith, and socioeconomic class--and all of those distinctions are reflected materially.

Audience: Both Grad & Undergrad

5. Practice conducting object-based research and writing.

Audience: Both Grad & Undergrad

6. Propose and draft a scholarly project focused on the material culture of childhood that aims to make an original contribution to your field.

Audience: Graduate

**DS 561 – TEXTILES: SPECIFICATIONS AND END USE ANALYSIS**

3 credits.

Physical textile testings are studied. Emphasis is placed on the evaluation of textiles intended for use as apparel and for interiors. Writing specifications, and minimum performance standards are also discussed.

**Requisites:** DS 224, 251, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**DS 570 – DESIGN AND FASHION EVENT MANAGEMENT**

3 credits.

Production of a student-driven, student-centered design and fashion event presents the framework for advanced experience and study. Provides the opportunity to study and to actively engage in high-level interdisciplinary exploration and collaboration. Transferring discipline-specific skills to a new context, learn methods for testing, review, and revision to develop problem-solving skills and communication. Encourages teamwork as well as crossdisciplinary understanding and appreciation.

**Requisites:** DS 270 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**DS/COMP SCI 579 – VIRTUAL REALITY**

3 credits.

Introduces students to the field of virtual reality and focuses on creating immersive, interactive virtual experiences. Survey topics include historical perspectives on virtual reality technology, computer graphics and 3D modeling, human perception and psychology, human computer interaction and user interface design. This course is designed for students with backgrounds in Computer Science, Engineering, Art, Architecture and Design. Students will work in interdisciplinary teams on projects, culminating in a final event that will be showcased to the public. While not an official uisite, the class will be technologically motivated; therefore students should be comfortable learning new software. The class will utilize publicly available game design software which provides tools and services for the creation of interactive content. While not necessary, students may find it helpful to have taken classes in programming and computer graphics (such as COMP SCI 559: Computer Graphics) or in 3D modeling (such as ART 429: 3D Digital Studio I or DS 242: Visual Communication II).

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**DS 601 – INTERNSHIP**

1-8 credits.

A supervised internship providing hands-on training in a professional experience in design studies related fields.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**DS 620 – VISUAL THINKING FOR PROBLEM SOLVING**

3 credits.

Visual thinking's theoretical foundations are paired with visual thinking skills, tools, and applications. The format explores the way these can be combined while thinking critically and engaging with problem solving methodologies such as design thinking. Theoretical foundations include the elements and principles of design, the processes of visual narrative, and perceptual theories. Skills and applications include manual sketching, 3D visualization and modeling, data visualization, image manipulation, graphic design, video presentation, multimedia, design for 3D printing and fabrication, diagramming, digital rendering, and graphic design.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand what it means to think and communicate visually.

Audience: Graduate

2. Manipulate visual content created by others, create new visual content related to problem solving, and integrate a wide range of visual thinking tools and processes in order to create a compelling narrative (including data visualization) in the context of solving a design problem.

Audience: Graduate

3. Understand and apply the theoretical foundations of visual communication, such as the elements and principles of design, to engage in effective visual communication and data visualization.

Audience: Graduate

4. Understand the differences between, and similarities among, a wide array of visual thinking tools and methods,

Audience: Graduate

5. Choose and apply visual thinking tools and methods that are useful for different types of problem solving

Audience: Graduate

6. Generate quick hand drawn sketches and diagrams for study and communication.

Audience: Graduate

7. Develop a basic knowledge of how to apply technologies used for visual communication, including industry standard software applications in 2D, 3D, and 4D, along with foundational skills that will support future in-depth study.

Audience: Graduate

8. Generate digital output files that can be used for digital fabrication such as laser cutting, CNC routing, and 3D printing.

Audience: Graduate

**DS 622 – INTERIOR DESIGN III**

4 credits.

Design of commercial interiors with emphasis on design process, programming, space planning, selection of interior materials, furniture, and lighting. Field trip required.

**Requisites:** DS 322

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**DS 623 – INTERIOR DESIGN IV**

4 credits.

Design of commercial interiors with emphasis on acoustics, codes, costs, specifications, details, and visual presentation. Field trip required.

**Requisites:** DS 622

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**DS 624 – INTERIOR ARCHITECTURE PROFESSIONAL PRACTICE**

3 credits.

Prepares Interior Architecture majors to launch their careers in design. Become acquainted with aspects of the interior design profession: how an office works, the project delivery process in interior design practice, and post-graduation material preparation.

**Requisites:** DS 322

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define contexts for interior design practice such as large or small practices, stand-alone or interior practices included in architectural firms, hybrid practices, and collaborative practices.

Audience: Undergraduate

2. Demonstrate awareness of the impact of a global market for design services on design practices.

Audience: Undergraduate

3. Describe the breadth and depth of interior design's impact and value including sustainability and economic, social, and human-performance responsibility.

Audience: Undergraduate

4. Identify the components of business practice such as business development, brand management, financial management, risk management, client relations, and human resources.

Audience: Undergraduate

5. Give examples of professional organization in the field and legal recognition for the interior design profession.

Audience: Undergraduate

6. Recognize the various types of professional business formations, elements of project management, and instruments of service.

Audience: Undergraduate

7. Understand business practices related to professional ethics and conduct.

Audience: Undergraduate

8. Integrate best practices and design principles in the production of self-marketing materials such as the portfolio and resume.

Audience: Undergraduate

**DS 626 – INTERIOR DESIGN V**

4 credits.

Provides the opportunity to explore and refine interior design skills while responding to current events and the ever changing world around us. Follow the design process from research, programming, conceptual and schematic design, full design development and presentation. All aspects of designing an interiors project in detail will be addressed, including space planning, interior architectural articulation, furniture selection, finish selection, detailing of custom elements, rendering, website development for client presentation, and more.

**Requisites:** DS 623**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Develop studio habits that support a consistent, rigorous, reflective work ethic.

Audience: Undergraduate

2. Critically analyze individual work and the work of classmates using appropriate terminology related to the elements and principles of interior architecture.

Audience: Undergraduate

3. Visualize interior architecture design concepts through the integrated approach of using various pieces of software.

Audience: Undergraduate

4. Explore the role of an interior designer in an ever changing world

Audience: Undergraduate

5. Utilize and build upon all of the fundamental skills learned in the Interior Architecture program

Audience: Undergraduate

6. Advance knowledge of the design process, from research to presentation.

Audience: Undergraduate

7. Create a contemporary client presentation in an era of limited contact.

Audience: Undergraduate

**DS/LAND ARC 639 – CULTURE AND BUILT ENVIRONMENT**

3 credits.

Explores cultural values embedded in buildings through understanding physical configurations, social organizations, practiced/symbolic/representational aspects of buildings. Covers a wide range of cultures and the built environments they produce including examples from the Americas, the Middle East, as well as those of the many ethnic minorities in the U.S.

**Requisites:** Junior standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**DS 641 – ADVANCED DESIGN THINKING FOR TRANSFORMATION**

3 credits.

An empathetic, human-centered perspective that uses Design Thinking and draws from historical precedence and current research from a variety of fields to help solve complex and persistent problems such as student mental health awareness and lack of clean drinking water. Utilizes advanced design thinking techniques to enhance creative analysis and problem solving to address real-world problems with real-world constraints and the limitations of technology. Projects range from ways to improve everyday situations to community issues.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate the ability to develop and understand empathy through the practice of observation, interviewing skills and other methods.

Audience: Graduate

2. Recognize how knowledge, concepts, and theories outside of the field of design are relevant to informing new approaches to design solutions.

Audience: Graduate

3. Examine a wide range of problems confronting society and identify interdependencies between context practice and methods.

Audience: Graduate

4. Exhibit the ability to be creative, collaborative and divergent thinkers who can generate and visually communicate multiple ideas.

Audience: Graduate

5. Apply the iterative design thinking process to develop innovative solutions for challenging real world problems.

Audience: Graduate

**DS 642 – TASTE**

3 credits.

Exploration of the idea of taste - both "good" and "bad", in "popular" and "high" culture. Cross-cultural readings from theoretical and historical perspectives, relating to architecture, landscape, public space, art, and clothing.

**Requisites:** Graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**DS 650 – COLLABORATIVE DESIGN CAPSTONE**

3 credits.

Culminates design education through real-world challenges. Develops critical thinking, creativity, innovation for effective solutions. Emphasizes collaborative teamwork within multidisciplinary groups. Guides portfolio development, underscoring growth and versatility as a designer. Topics include defining problems through research, conceptualizing solutions, designing prototypes and interfaces, conducting user testing, and implementing designs.

**Requisites:** DS 123, 140, 220, 221, DS/GEN BUS 240, and ART HIST/ANTHRO/DS/HISTORY/LAND ARC 264

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Apply a deep understanding of design principles, aesthetics, and usability to create visually compelling and functional solutions.

Audience: Undergraduate

2. Synthesize knowledge from various design disciplines to address complex design challenges.

Audience: Undergraduate

3. Define design problems accurately by conducting thorough research, historical analysis, analyzing user needs, and identifying project constraints.

Audience: Undergraduate

4. Collaborate effectively within diverse teams, leveraging each member's strengths to achieve project goals and outcomes.

Audience: Undergraduate

5. Develop and implement project plans, considering scope, timeline, resource allocation, and risk management to deliver projects on schedule.

Audience: Undergraduate

6. Communicate design concepts persuasively through compelling visual presentations, articulate written explanations, and confident verbal discussions.

Audience: Undergraduate

7. Actively seek and incorporate constructive feedback to refine and enhance design iterations, demonstrating a commitment to continuous improvement.

Audience: Undergraduate

8. Deliver polished and professional design pitches and presentations that effectively convey the design process, rationale, and outcomes.

Audience: Undergraduate

**DS 679 – RESEARCH METHODS IN DESIGN**

3 credits.

Future designers need to have critical research knowledge and skillsets that include mastery of various research methods, related issues, and practical experiences in understanding and interpreting quantitative or qualitative research. Design research allows designers to be involved directly with objects, products, and environments they design through human-centered inquiry. The major concepts addressed include design research and its influence on the practice of design, generating research questions, critical literature review, research evaluation, data management and analysis, and various research strategies, all geared toward application to various design practices.

**Requisites:** Senior standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Appreciate the role of research in design as a tool to involve directly with object, products, and environment that you design  
Audience: Both Grad & Undergrad

2. Recognize the value of multiple methods and perspectives in design research  
Audience: Both Grad & Undergrad

3. Explore how research can inform design practices in each design stages  
Audience: Both Grad & Undergrad

Audience: Both Grad & Undergrad

4. Identify relevant sources and professional organizations that can be accessed for information gathering, research, and problem-solving processes  
Audience: Both Grad & Undergrad

Audience: Both Grad & Undergrad

5. Apply assessment processes to evaluate design outcomes  
Audience: Both Grad & Undergrad

6. Effectively present and communicate research to an audience both in written, graphic and oral format  
Audience: Both Grad & Undergrad

7. Critically assess the strengths and weaknesses of various research methodologies and techniques  
Audience: Graduate

8. Choose and apply specific research methods based on critical assessment of various research methods  
Audience: Graduate

9. Develop a conceptually sophisticated research projects that suits their graduate research agenda  
Audience: Graduate

10. Demonstrate beginning-level statistical techniques, and critically read studies using such techniques  
Audience: Graduate

11. Learn and lead from class activities, research projects, and self-directed study  
Audience: Graduate

**DS 680 – SENIOR HONORS THESIS**

2-4 credits.

Individual study in honors as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Honors – Honors Only Courses (H)**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2016**DS 690 – SENIOR THESIS**

2-4 credits.

Individual study as arranged with a faculty member.

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**DS 699 – INDEPENDENT STUDY**

1-6 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**DS/ANTHRO/ART HIST/HISTORY/LAND ARC 764 – DIMENSIONS OF MATERIAL CULTURE**

4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**DS 920 – SEMINAR IN DESIGN STUDIES**

1-3 credits.

A forum to discuss issues in contemporary art and design.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**DS/F&W ECOL/URB R PL 955 – PRACTICAL RESEARCH DESIGN AND METHODS OF EMPIRICAL INQUIRY**

3 credits.

Provides a practical introduction to basic concepts of research question formulation, research designs and alternative methods of inquiry, implications for internal validity of the research and generalizability of the findings, operational definitions and measurement validity, reliability, utility and precision.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**DS 990 – RESEARCH AND THESIS**

1-12 credits.

Independent research and writing under the supervision of a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**DS 999 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

## ECONOMICS (ECON)

**ECON 100 – ECONOMIC APPROACH TO CURRENT ISSUES**

3-4 credits.

Emphasizes current economic issues and illustrates how the economist's perspective helps understand them. Academic readings and popular books such as Freakonomics will be used to indicate the breadth and scope of questions that can be analyzed from an economic perspective.

**Requisites:** MATH 96 or placement into MATH 112 or satisfied Quantitative Reasoning (QR) A requirement. Not open to students with credit for ECON 101, 102, or 111**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ECON 101 – PRINCIPLES OF MICROECONOMICS**

4 credits.

Economic problems of individuals, firms and industries with emphasis on value, price, and distribution of income.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement. Not open to students with credit for ECON 111**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ECON 102 – PRINCIPLES OF MACROECONOMICS**

3-4 credits.

Macroeconomic measurement and models of aggregate demand and supply; fiscal and monetary policy for unemployment, inflation, and growth.

**Requisites:** ECON 101, A A E 101, or 215 prior to Fall 2024. Not open to students with credit for ECON 111**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ECON 109 – STUDY ABROAD IN INTRODUCTORY ECONOMICS**

1-4 credits.

Provides an equivalency for introductory level economics courses taken on UW-Madison study abroad programs.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**ECON 111 – PRINCIPLES OF ECONOMICS-ACCELERATED TREATMENT**

4 credits.

Integrated treatment of macroeconomics and microeconomics (see ECON 101 and ECON 102). Accelerated approach to economics training, especially for Economics: Math Emphasis majors.

**Requisites:** MATH 112 or 113 or placement into MATH 221. Not open to students with credit for ECON 101 or 102**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Accelerated Honors (!)

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**ECON 205 – QUANTITATIVE TOOLS FOR ECONOMICS**

3–4 credits.

The objective of this course is to refine the quantitative skills necessary to succeed in intermediate- and advanced-level economics courses. The principle focus will be on applying the skills acquired in your math courses to the questions, models, and optimization problems that are common in economics. Topics include specific economic applications of algebra, financial mathematics, and calculus.

**Requisites:** (ECON 101, 102, 111 or concurrent enrollment) and (MATH 211, 217, or 221)

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply techniques in algebra and financial mathematics to analyze common economic questions

Audience: Undergraduate

2. Understand select topics from calculus and apply them to standard economic optimization problems

Audience: Undergraduate

**ECON 228 – INTERNSHIP ECONOMICS**

1 credit.

Internship in economics related field. Students must be declared in the Economics major.

**Requisites:** Consent of instructor

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Summer 2025

**ECON 299 – DIRECTED STUDY**

1–3 credits.

Study of topics at elementary undergraduate level as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2014

**ECON/FINANCE 300 – INTRODUCTION TO FINANCE**

3 credits.

Concepts and techniques in corporate finance and investments. Topics include the financial environment, securities markets, financial markets, financial statements and analysis, working capital management, capital budgeting, cost of capital, dividend policy, asset valuation, investments, decision-making under uncertainty, mergers, options, and futures.

**Requisites:** (ECON 101, 111 or A A E 101) and (ACCT I S 100 or 300 or concurrent enrollment) and (GEN BUS 206, 306, ECON 310, MATH 331, STAT/MATH 309, 431, STAT 224, 301, 302, 311, 324, 371 or PSYCH 210 or concur enrollment) or declared undergrad Bus Exchange Program

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply discounted cash flow analysis in various contexts and determine the appropriate discount rate for these calculations.

Audience: Undergraduate

2. Calculate and interpret the effect of leverage on firms' cost of debt, cost of equity, and a company's cost of capital under different assumptions.

Audience: Undergraduate

3. Characterize an efficient market and explain the implications of market efficiency for investors and corporations.

Audience: Undergraduate

4. Characterize different types of securities (including stocks, bonds, and derivatives) and identify the key features of each.

Audience: Undergraduate

5. Compute present and future values under different compounding assumptions.

Audience: Undergraduate

6. Demonstrate a command of the Capital Asset Pricing Model, including its strengths and weaknesses and its use in computing expected returns.

Audience: Undergraduate

7. Demonstrate the power of diversification and the risk-return tradeoff quantitatively.

Audience: Undergraduate

8. Solve capital budgeting problems using appropriate decision rules, taking into account the strengths and weaknesses of the available approaches.

Audience: Undergraduate

**ECON 301 – INTERMEDIATE MICROECONOMIC THEORY**

4 credits.

Contemporary theory of consumption, production, pricing and resource allocation.

**Requisites:** (ECON 101, 111, A A E 101, or 215 prior to Fall 2024) and (MATH 213, 217, 221, ECON 205, or MATH 211 prior to Fall 2024). Not open to students with credit for ECON 311.

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. apply economic models to understand household and firm behavior and market outcomes

Audience: Undergraduate

2. specify and adapt microeconomic models to analyze economic environments

Audience: Undergraduate

3. solve economic decision problems using tools of mathematical optimization

Audience: Undergraduate

4. understand the role of these models as the foundation for more advanced analysis

Audience: Undergraduate

**ECON 302 – INTERMEDIATE MACROECONOMIC THEORY**

4 credits.

Principles and theories of national income determination, analysis of savings, consumption, investment and other aggregates in the national and international economy and relation to employment, inflation and stabilization.

**Requisites:** (ECON 102 or 111) and (MATH 213, 217, 221, ECON 205, or MATH 211 prior to Fall 2024). Not open to students with credit for ECON 312.

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use disaggregated data to inform the construction of economic models and policy

Audience: Undergraduate

2. Critically evaluate economic models using publicly available data

Audience: Undergraduate

3. Use mathematical methods to capture economic relationships

Audience: Undergraduate

4. Distinguish between short run and long run theories and policy objectives

Audience: Undergraduate

5. Identify how international markets affect the macroeconomy and macroeconomic policy

Audience: Undergraduate

**ECON/HIST SCI 305 – DEVELOPMENT OF ECONOMIC THOUGHT**

3–4 credits.

Development of economic thought from the middle ages to the present; emphasis on major schools of thought including Classical, Marxian, Neo-Classical, and Keynesian schools.

**Requisites:** (ECON 101 and 102) or (ECON 102 and A A E 101 or 215 prior to Fall 2024) or ECON 111

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**ECON/A A E/REAL EST/URB R PL 306 – THE REAL ESTATE PROCESS**

3 credits.

Introductory overview focused on the key aspects of the real estate process: developing real estate, permitting real estate, buying and selling real estate, understanding the economics of real estate, financing real estate, valuing real estate, leasing real estate, and managing real estate.

**Requisites:** (ECON 101, 111, A A E 101, or 215 prior to Fall 2024) or declared in undergraduate Business Exchange program

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop a working knowledge of the real estate process, including the roles of the various key real estate professionals and the unique challenges associated with the real estate asset class.

Audience: Undergraduate

2. Explain the characteristics, advantages, and disadvantages of the primary commercial real estate property types.

Audience: Undergraduate

3. Discuss the role of debt and equity in a real estate transaction as well as the fundamental terms, conditions, and requirements of commercial real estate financing.

Audience: Undergraduate

4. Navigate the basic regulatory framework governing the real estate process, including land use planning, zoning and the required project approvals.

Audience: Undergraduate

5. Describe the role of leasing in the commercial real estate transaction, including the critical terms and conditions of commercial leases.

Audience: Undergraduate

**ECON 309 – STUDY ABROAD IN INTERMEDIATE ECONOMICS**

1-4 credits.

Provides an equivalency for intermediate level economics courses taken on UW-Madison study abroad programs.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**ECON 310 – STATISTICS: MEASUREMENT IN ECONOMICS**

4 credits.

Introduction to analysis of economic data. The techniques of descriptive statistics and statistical inference (hypothesis testing and estimation) as directed toward application in economic research.

**Requisites:** (ECON 101, 102, or 111) and (MATH 211, 217, or 221)

**Course Designation:** Gen Ed – Quantitative Reasoning Part B

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ECON 311 – INTERMEDIATE MICROECONOMIC THEORY - ADVANCED TREATMENT**

3 credits.

A mathematical approach to the theory of consumption, production, pricing and resource allocation.

**Requisites:** MATH 222 and (ECON 101 and 102) or ECON 111. Not open to students who have credit for ECON 301

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 312 – INTERMEDIATE MACROECONOMIC THEORY - ADVANCED TREATMENT**

3 credits.

A mathematical approach to the principles and theories of national income determination, analysis of savings, consumption, investment and other aggregates in the national and international economy and relation to employment, inflation, and stabilization.

**Requisites:** MATH 222 and (ECON 101 and 102) or ECON 111. Not open to students who have credit for ECON 302

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 315 – DATA VISUALIZATION FOR ECONOMISTS**

3-4 credits.

Introduction to the fundamental concepts of economic data visualization and analysis. Develop a toolkit of skills to visualize, interpret, and communicate data. After examining the fundamentals of data visualization, emphasis is on methods using Tableau to design and develop dashboards, graphs, and charts to ease quick and accurate interpretation of economic relationships. Move beyond tabular results to display and demonstrate the findings of economic research.

**Requisites:** (ECON 101 or 111) and ECON 310

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Visually represent, interpret, and communicate economic data

Audience: Undergraduate

2. Understand data visualization theory

Audience: Undergraduate

3. Incorporate data visualization into economic research

Audience: Undergraduate

4. Present economic research findings clearly and efficiently

Audience: Undergraduate

5. Use Tableau software to interact with economic data

Audience: Undergraduate

**ECON/FINANCE 320 – INVESTMENT THEORY**

3 credits.

Structure and functioning of securities markets; principles of portfolio construction; models of the tradeoff between risk and expected return.

**Requisites:** FINANCE/ECON 300, (MATH 213 or 222) and (GEN BUS 307, 317, 656, ACT SCI 654, 655, ECON 400, 410, STAT/ MATH 310, STAT 312, or 333 or concurrent enrollment) or declared in undergraduate Business Exchange program

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Solve real-world investment problems

Audience: Undergraduate

2. Formulate the trade-off between risk and return

Audience: Undergraduate

3. Describe the distribution of returns on broad asset classes

Audience: Undergraduate

4. Identify investors' risk preferences

Audience: Undergraduate

5. Use portfolio optimization techniques to develop an asset allocation for an investor

Audience: Undergraduate

6. Examine factor models of returns

Audience: Undergraduate

7. Compare different equilibrium security pricing models

Audience: Undergraduate

8. Debate market efficiency

Audience: Undergraduate

**ECON 321 – SPORTS ECONOMICS**

3-4 credits.

An examination of the economics behind major professional and intercollegiate sports teams and franchises. Topics covered include the organization of leagues, competitive balance, cooperative and collusive behavior, measurement of productivity, the market for franchises, sale and resale of tickets, and public financing of facilities.

**Requisites:** ECON 101, 111, A A E 101, or 215 prior to Fall 2024

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ECON 325 – ECONOMICS OF RACE IN THE UNITED STATES**

3 credits.

Historical and contemporary sources and causes of, and potential policy responses to, racial and ethnic economic inequality in the United States. Topics covered include healthcare, education, labor markets, housing and neighborhoods, wealth, and criminal justice, with a focus on aspects of the economy where there are differences in economic outcomes for racial or racial minority groups. Questions include how these differences can result from disparities in how people, markets, or policies treat or impact different groups using economic theory as a foundation, and how economists have studied and measured these differences. In light of the history and range of economic opportunity and change in some communities, particular attention is given to the African American experience.

**Requisites:** ECON 101, 111, A A E 101, or 215 prior to Fall 2024

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize the areas of racial economic inequality in the United States

Audience: Undergraduate

2. Articulate how the economic and social history of the United States has affected present day circumstances regarding race and racial economic inequities in the U.S.

Audience: Undergraduate

3. Identify how current policies, social institutions, and cultural assumptions work to maintain inequality.

Audience: Undergraduate

4. Interpret economic models that attempt to explain the existence of inequality.

Audience: Undergraduate

5. Synthesize existing economic research focused on the causes and effects of racial inequality.

Audience: Undergraduate

6. Present the pros and cons of potential policy solutions to racial inequality.

Audience: Undergraduate

7. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others.

Audience: Undergraduate

8. Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society.

Audience: Undergraduate

**ECON 330 – MONEY AND BANKING**

4 credits.

Monetary economics; the role of money in the determination of output, prices and interest rates; commercial and central banking, monetary policy, the international monetary system.

**Requisites:** (ECON 101 and 102) or ECON 111

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 340 – MICROECONOMICS IN POPULAR CULTURE**

3 credits.

A critical look at the portrayal of housing, homelessness, globalization, and economic mobility in popular media (primarily films, documentaries, and popular sociological studies), both using the discipline of economic theory and from the perspective of broader economic data.

**Requisites:** ECON 101, 111, A A E 101, or 215 prior to Fall 2024. Not open to students with credit for ECON 390 topic: Microeconomics in Popular Culture prior to Fall 2024.

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. describe the financial instruments and policies that impact US mortgage markets, with particular emphasis on the causes, consequences, and lessons from the 2008 Financial Crisis

Audience: Undergraduate

2. explain the theory and empirical evidence about the effectiveness of alternative policy approaches toward problems associated with both low-income housing and homelessness

Audience: Undergraduate

3. discuss alternative approaches to understanding variations in economic mobility and opportunity both over time and across regions, with an emphasis on current data, approaches, and policies

Audience: Undergraduate

**ECON/A A E/ENVIR ST 343 – ENVIRONMENTAL ECONOMICS**

3-4 credits.

Microeconomic principles underlying the use of natural resources such as air, water, forests, fisheries, minerals and energy. These principles are applied in the examination of pollution control, preservation vs. development, deforestation, and other environmental issues.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand why environmental problems occur in a market-based economy.

Audience: Undergraduate

2. Identify market-based environmental policies to address market failures.

Audience: Undergraduate

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of pollution control.

Audience: Undergraduate

4. Apply sustainability principles and/or frameworks to addressing the challenge of optimizing the use of scarce resources over time.

Audience: Undergraduate

**ECON 350 – THE CHINESE ECONOMY**

3 credits.

The history of China's economic reforms and development, the nature of its growth, and the fundamental institutions that underlie its transformation into an economic powerhouse. China's integration into and impact on the world economy through trade and financial flows. Major challenges modern China faces, such as regional inequalities, environmental concerns, and the prospects for sustainable growth in the future.

**Requisites:** ECON 101, 111, A A E 101, or 215 prior to Fall 2024

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply economic theories to explain China's record of economic growth

Audience: Undergraduate

2. Critically analyze the strengths and weaknesses of China's policy implementation

Audience: Undergraduate

3. Evaluate academic literature related to China's economic reforms and development

Audience: Undergraduate

**ECON 355 – THE ECONOMICS OF GROWING-UP AND GETTING OLD**

3-4 credits.

What does economics have to say about how or why people decide to go to school, get married (or divorced), or have children? Use economic models to investigate these "every day occurrences." Start with early childhood and trace out the life cycle from schooling to retirement, concentrating on six stages of life: early childhood; schooling; adolescence; marriage and divorce; fertility; and retirement decisions.

**Requisites:** ECON 310

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Understand important empirical problems in social science (such as correlation vs causation, endogeneity, omitted variable bias) and tools for overcoming them

Audience: Undergraduate

2. Understand important theoretical models of human behavior (such as game theory, signaling models, hyperbolic discounting) and how to apply them to particular environments

Audience: Undergraduate

3. Understand important models of particular "life cycle" decisions (health, schooling, marrying, divorce, fertility)

Audience: Undergraduate

**ECON 370 – ECONOMICS OF POVERTY AND INEQUALITY**

3 credits.

Analysis of patterns and causes of poverty and inequality. Topics include theoretical approaches, measurement, historical perspectives and policy responses.

**Requisites:** (ECON 101, 102, and 310) or (ECON 111 and 310)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**ECON/A A E 371 – ENERGY, RESOURCES AND ECONOMICS**

3 credits.

Use microeconomic theory to analyze energy markets. Discuss the economics of oil, gas, and electricity and learn about applications to contemporary issues and policy questions.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use economic tools to describe energy demand

Audience: Undergraduate

2. Apply economic models of competition to energy markets

Audience: Undergraduate

3. Analyze how policies to mitigate climate change affect energy markets

Audience: Undergraduate

4. Analyze the causes of and solutions for the sustainability challenge of climate change

Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of energy policy and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course

Audience: Undergraduate

**ECON 390 – CONTEMPORARY ECONOMIC ISSUES**

3-4 credits.

Topics vary, including current developments in all fields of economics.

**Requisites:** ECON 101 or 111

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. apply economic reasoning to contemporary questions and settings

Audience: Undergraduate

**ECON 400 – INTRODUCTION TO APPLIED ECONOMETRICS**

4 credits.

An introduction to applied econometrics - the statistical methods economists use to evaluate empirical relationships and test economic theory. Emphasis on application of econometrics to real world data using modern statistical software and developing skills needed to understand empirical work in economics.

**Requisites:** ECON 310, (STAT 240 and 340), STAT 302, 303, 311, 324, STAT/MATH 309, or 431. Not open to students with credit for ECON 410.

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss the properties of an ordinary least squares (OLS) estimator for a linear regression model

Audience: Undergraduate

2. Test theories about the true model using formal hypothesis tests

Audience: Undergraduate

3. State the assumptions underpinning OLS, recognize violations of these assumptions, discuss the consequences of such violations, and - where possible - suggest alternative statistical approaches that are more appropriate given the circumstances

Audience: Undergraduate

4. Evaluate the extent to which econometric methods can be used to determine whether a statistical association represents a causal relationship

Audience: Undergraduate

5. Use statistical software to apply these statistical techniques to analyze the relationship between real-world economic variables

Audience: Undergraduate

6. Read and interpret results from applied economics journal articles that employ these statistical techniques

Audience: Undergraduate

**ECON 409 – STUDY ABROAD IN ADVANCED ECONOMICS**

1-4 credits.

Provides an equivalency for advanced level economics courses taken on UW-Madison study abroad programs for which there is no exact UW-Madison equivalent. Course must be of equal rigor to those offered on campus. To receive this equivalent, departmental pre-approval is required.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**ECON 410 – INTRODUCTORY ECONOMETRICS**

4 credits.

Statistical methods used in applied economic research. Topics include: survey methods and data sources; multiple regression and analysis of variance; econometric estimation; forecasting and policy applications.

**Requisites:** ECON 310 and (MATH 217 or 221). Not open to students with credit for ECON 400

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ECON/REAL EST/URB R PL 420 – URBAN AND REGIONAL ECONOMICS**

3 credits.

Focuses on the study of the allocation of scarce resources across space. Uses economic methods to analyze urban real estate. Topics covered include the determinants of real estate values, the location decisions of households and firms, land use, urban growth and agglomeration, real estate pricing, cycles, development, housing market and policies, and sustainable development.

**Requisites:** (ECON 101 or 111) or declared in undergraduate Business Exchange program

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the economic forces that drive urban growth and regional development.

Audience: Undergraduate

2. Analyze how business and residential location decisions are made and how these decisions impact housing prices, land use, labor market, and many other aspects of cities.

Audience: Undergraduate

3. Apply the spatial equilibrium concepts to urban development and real estate analysis.

Audience: Undergraduate

4. Develop statistical models to assess residential and commercial real estate and perform sensible business and policy analysis.

Audience: Undergraduate

5. Apply the economic decision-making framework to real estate development decisions.

Audience: Undergraduate

6. Demonstrate understanding of cycles, risks and bubbles in residential and commercial real estate markets.

Audience: Undergraduate

7. Evaluate the challenges in economic, social and environmental sustainability in urban development around the world.

Audience: Undergraduate

8. Apply urban and regional economics to real estate business decisions and policy analysis.

Audience: Undergraduate

**ECON/A A E 421 – ECONOMIC DECISION ANALYSIS**

4 credits.

Managerial oriented, applied presentation of microeconomic theory. Quantitative emphasis with extensive homework use of spreadsheets and written executive summaries of applied economic analyses. Applications on natural resources and agricultural markets.

**Requisites:** STAT 301, 371, ECON 310, SOC/C&E SOC 360, PSYCH 210, or (GEN BUS 306 and 307)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Manipulate, organize, and visualize quantitative economic data using computer software.

Audience: Undergraduate

2. Conduct statistical analyses and estimate basic linear regression models of economic data.

Audience: Undergraduate

3. Correctly report and interpret results from statistical analyses in the context of informing economic decisions.

Audience: Undergraduate

4. Set up and solve linear and non-linear programming problems that inform economic decision-making using computer software.

Audience: Undergraduate

5. Integrate uncertainty into the analysis of economic decisions and articulate how uncertainty influences economic behavior.

Audience: Undergraduate

6. Effectively communicate verbally, visually, and in writing the process and results of economic decision analyses.

Audience: Undergraduate

**ECON 435 – THE FINANCIAL SYSTEM**

3 credits.

Banking, credit markets and financial institutions, monetary and debt management policies; relation of national monetary and credit institutions to the international system.

**Requisites:** (ECON 301 or ECON 311) and (ECON 302 or ECON 312) and ECON 330

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**ECON 441 – ANALYTICAL PUBLIC FINANCE**

3-4 credits.

Analyzes the problems of the public sector in dealing with domestic issues of education, urban areas, welfare, natural resources, and the environment; provides students with opportunity to apply the tools of economic analysis that are pertinent to domestic public sector problems.

**Requisites:** ECON 301 or 311

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 442 – MACROECONOMIC POLICY**

3-4 credits.

Addresses current issues in modern macroeconomic policymaking. Topics include: fiscal and monetary policy, financial and sovereign debt crisis, and financial regulation.

**Requisites:** (ECON 301 or 311), (ECON 302 or 312), and ECON 310; or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 448 – HUMAN RESOURCES AND ECONOMIC GROWTH**

3-4 credits.

Theoretical and empirical analysis of public and private investment in people, emphasizing the contribution to productivity of education, training, health, and mobility.

**Requisites:** ECON 301 or 311

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ECON/ENVIR ST/POLI SCI/URB R PL 449 – GOVERNMENT AND NATURAL RESOURCES**

3-4 credits.

Problems of public policy and administration for development and use of natural resources.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ECON 450 – WAGES AND THE LABOR MARKET**

3-4 credits.

Economic and institutional forces which determine labor supply and demand; wage theories, wages in the economy, the labor force, unemployment, wages, labor mobility, functioning of labor markets.

**Requisites:** ECON 301 or 311**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ECON 455 – BEHAVIORAL ECONOMICS**

3-4 credits.

Empirical evidence documenting departures in human decision making from rational norms, and alternative theoretical approaches to explaining this behavior grounded based upon psychological enrichments of standard rational actor model. Topics include paradox of choice, loss aversion, time inconsistent preferences, and social preferences.

**Requisites:** (ECON 301 or 311) and ECON 310; or graduate/professional standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ECON 458 – INDUSTRIAL STRUCTURE AND COMPETITIVE STRATEGY**

3 credits.

Analysis of competition among firms and its effect on industrial structure. Theoretical models and case studies are used. Topics include: entry barriers, price competition dynamics, entry and exit strategies, and competitive tactics such as product differentiation, advertising, and technological change.

**Requisites:** ECON 301 or 311**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ECON 460 – ECONOMIC FORECASTING**

3-4 credits.

Introduction to econometric time series analysis, forecasting methods, and forecast evaluation. Covers theoretical, methodological, and applied topics, and much of the work will be hands-on data analysis.

**Requisites:** ECON 400, 410, or graduate/professional standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. explain and use linear time-series econometric models

Audience: Both Grad &amp; Undergrad

2. describe and use economic time-series data and data sources

Audience: Both Grad &amp; Undergrad

3. formulate, estimate, and evaluate models for economic forecasting

Audience: Both Grad &amp; Undergrad

4. make point forecasts, interval forecasts and fan charts

Audience: Both Grad &amp; Undergrad

5. select and use conditioning information

Audience: Both Grad &amp; Undergrad

6. use model selection and combination methods

Audience: Both Grad &amp; Undergrad

7. be a "fox" rather than a "hedgehog"

Audience: Both Grad &amp; Undergrad

8. explain, formulate, and use Vector Autoregressive time-series models

Audience: Graduate

9. explain, formulate, and use multivariate time-series forecasting models

Audience: Graduate

**ECON 461 – INTERNATIONAL MACROECONOMICS**

3-4 credits.

International macroeconomics, focusing on the international exchange of financial instruments – currencies, bonds, equities, derivatives, and more – and how decisions and policies made in one country spill over into other markets.

**Requisites:** ECON 302 or 312**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how foreign exchange markets work and use interest and purchasing power parity theories to describe how changes in the economic environment affect exchange rates.

Audience: Undergraduate

2. Connect unbalanced trade in goods to trade in financial assets and understand the link between trade deficits/surpluses and a country's net international investment position.

Audience: Undergraduate

3. Access and analyze data on cross-country asset flows and exchange rates.

Audience: Undergraduate

4. Use economic theory to interpret policies such as the Bretton Woods agreement, the Euro, and Argentina's fixed exchange rate regime.

Audience: Undergraduate

**ECON/A A E/INTL BUS 462 – LATIN AMERICAN ECONOMIC DEVELOPMENT**

3 credits.

A historico-institutional analysis of development problems in the principal Latin American countries, with attention to differentiation of national growth patterns and alternative development strategies.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate mastery of the language of international development economics

Audience: Undergraduate

2. Develop proficiency in an array of concepts from primary product exports to conditional cash transfers to migration and remittances to corruption and civil conflict.

Audience: Undergraduate

3. Examine how markets and distinct development strategies and processes provide different opportunities and returns for the rich and the poor, urban and rural, latino and indigenous peoples, large and small countries, and so on.

Audience: Undergraduate

4. Explain the strengths and weaknesses of contending theories of economic development.

Audience: Undergraduate

5. Apply contending theories to markets, state policies, social initiatives, and historical experiences in Latin American countries.

Audience: Undergraduate

**ECON 464 – INTERNATIONAL TRADE**

3-4 credits.

Contemporary theory of International Trade, focusing on why nations trade and what do they trade, and in what sense international trade is beneficial to trading countries. Current policy issues will be examined to demonstrate the usefulness as well as the limitations of the theory.

**Requisites:** ECON 301 or 311. Not open to students with credit for ECON 364.

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the reasons of why countries trade

Audience: Undergraduate

2. Apply economic analysis to evaluate effects of opening to trade on welfare of different groups

Audience: Undergraduate

3. Identify effects of tariffs and other trade policy tools on consumer, producers and the government

Audience: Undergraduate

4. Apply economic analysis to evaluate current and proposed international trade agreements

Audience: Undergraduate

**ECON 465 – THE AMERICAN ECONOMY TO 1865**

3-4 credits.

Survey of the forces underlying American economic development and the distribution of income; rise of regional economies; origins of manufacturing; effects of slavery; influence of government and politics on growth.

**Requisites:** ECON 101 or 111

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**ECON/HISTORY 466 – THE AMERICAN ECONOMY SINCE 1865**

3-4 credits.

Emergence of the large corporation; growth and instability since the mid-nineteenth century; increasing government participation in the economy; the impact of war, depression, discrimination, and international responsibilities.

**Requisites:** ECON 101 or 111

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**ECON 467 – INTERNATIONAL INDUSTRIAL ORGANIZATIONS**

3-4 credits.

Focuses on the behavior of international firms and the public policies that affect them. Study theoretical models of strategic competition, evaluate the effects of government policies, review aggregate empirical evidence and learn from case studies.

**Requisites:** ECON 301 or 311

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Explain and compare models of competition among firms in international environments

Audience: Undergraduate

2. Extrapolate the effects of various government policies on firms, consumers and government finances

Audience: Undergraduate

3. Apply various theoretical frameworks to understand the behavior of specific firms and governments

Audience: Undergraduate

4. Characterize how economists use data and theory to arrive to specific conclusions

Audience: Undergraduate

**ECON 468 – INDUSTRIAL ORGANIZATION AND IMPERFECT COMPETITION**

3-4 credits.

An overview of the theory of industrial organization, including the study of oligopolistic behavior, monopolistic competition, product differentiation and the dynamic behavior of competitive industries under uncertainty.

**Requisites:** (ECON 301 or 311) and (MATH 217 or 221)

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON/A A E 473 – ECONOMIC GROWTH AND DEVELOPMENT IN SOUTHEAST ASIA**

3 credits.

Evaluates economic development strategies in Southeast Asia and their implications for growth, distribution and environment. Students learn trade and development theory as well as specific knowledge of Southeast Asian economic development.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Demonstrate basic economic and statistical literacy relevant to the study of economic development.

Audience: Both Grad & Undergrad

2. Understand basic models of international trade and economic growth.

Audience: Both Grad & Undergrad

3. Demonstrate a working knowledge of available data on the economies of Southeast Asia.

Audience: Both Grad & Undergrad

4. Identify and analyze problems of economic development in Southeast Asia.

Audience: Undergraduate

5. Identify and analyze problems of economic development in Southeast Asia using formal methods of economic theory and evidence.

Audience: Graduate

**ECON/A A E 474 – ECONOMIC PROBLEMS OF DEVELOPING AREAS**

3 credits.

Analyzes aggregate growth, income distribution and poverty in lower income economies. Uses microeconomics of imperfect labor, capital and insurance markets to explore why some individuals advance economically as their economies grow and others fall behind. Considers implications of aggregate and micro analysis for national and international economic policy.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of current research in development economics to explain cases and identify areas that policy can influence.

Audience: Undergraduate

2. Calculate basic measures of poverty, inequality and economic development.

Audience: Undergraduate

3. Differentiate empirical methods used to analyze poverty and poverty alleviation.

Audience: Undergraduate

4. Use economic models and empirical methods to evaluate development policy.

Audience: Undergraduate

**ECON 475 – ECONOMICS OF GROWTH**

3-4 credits.

Theoretical analysis of issues in growth and development. Models will be motivated by country experiences. Topics include: factors affecting saving, investment and cross-country differentials on per capita income; the role of government institutions, market regulation, technology and trade.

**Requisites:** (ECON 301 or ECON 311), (ECON 302 or ECON 312) and (MATH 217 or 221); or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **ECON/A A E 477 – AGRICULTURAL AND ECONOMIC DEVELOPMENT IN AFRICA**

3 credits.

Composition, organization, and techniques of agricultural production; economic change and development of agriculture, economic policies, special problems of developing African agriculture.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Explain the economic problems of African nations including economic history, different sectors of the economy, economic development, and economic growth.

Audience: Both Grad & Undergrad

2. Use empirical evidence to evaluate an economic argument, including interpreting and explaining economic data.

Audience: Both Grad & Undergrad

3. Apply the tools of economic analysis (both theoretical and empirical tools) to evaluate specific policy proposals, especially as they relate to contemporary issues in African development.

Audience: Graduate

4. Communicate effectively in written and graphical form about issues in African development.

Audience: Both Grad & Undergrad

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of development of African nations.

Audience: Both Grad & Undergrad

6. Analyze the causes of and solutions for the sustainability challenge of generating agricultural and economic development of African countries.

Audience: Both Grad & Undergrad

### **ECON/FINANCE 503 – MARKETS WITH FRICTIONS**

3 credits.

Search theory provides framework for understanding markets and is used to study questions in monetary, public, financial economics. Develop theoretical tools used to introduce frictions in formal models and address the role of frictions in several applied scenarios.

**Requisites:** (FINANCE 305, 325, 330, and ECON/FINANCE 320), (ECON 301, 302, 311, or 312), or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine new issues related to frictional markets by looking at old issues in new ways.

Audience: Both Grad & Undergrad

2. Demonstrate economic reasoning about the economy at a micro and macro level by applying the foundations of mainstream economics.

Audience: Both Grad & Undergrad

3. Explain credit market rationing and its impact on markets for housing, small business loans and other investments.

Audience: Both Grad & Undergrad

4. Articulate the contributing factors of bubbles and crashes in asset prices.

Audience: Both Grad & Undergrad

5. Articulate the role of money and banking in the inter-temporal allocation of resources.

Audience: Both Grad & Undergrad

6. Articulate your perspectives on fundamental questions like: Why we use money? What is a bank? How do organizations (like firms or families) form?

Audience: Both Grad & Undergrad

7. Construct and analyze the three generations of money search models and apply this framework appropriately to real-world economic and financial issues.

Audience: Graduate

**ECON 521 – GAME THEORY AND ECONOMIC ANALYSIS**

3-4 credits.

The study of multi-agent, interactive decision problems, with emphasis on questions of coordination, cooperation and conflict. Applications include relations between countries, competition between firms, bargaining between unions and firms, and contests between political candidates.

**Requisites:** (ECON 301 or 311) and MATH 222; or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 522 – LAW AND ECONOMICS**

3-4 credits.

Economic analysis of legal rules and institutions with emphases on how different areas of law influence individual incentives. Specific topics include: (1) property, (2) contracts, (3) torts, (4) legal procedure and (5) criminal law.

**Requisites:** ECON 301 or 311

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ECON/PHILOS 524 – PHILOSOPHY AND ECONOMICS**

3 credits.

Economics examined from the viewpoint of the philosophy of science. Normative and positive aspects of economic theory. Deterministic and statistical explanation. Arrow impossibility theorem. Radical economics.

**Requisites:** Sophomore standing and 3 credits of PHILOS or ECON

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON/A A E 526 – QUANTITATIVE METHODS IN AGRICULTURAL AND APPLIED ECONOMICS**

4 credits.

Use of quantitative methods (mathematics, statistics, and optimization) to analyze problems faced by decision makers in natural resources and agriculture. Extensive homework requiring use of quantitative methods via spreadsheet tools to solve problems from an applied decision context.

**Requisites:** (MATH 211 or 221), ECON 301, and STAT 301, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Develop an understanding of the use of calibrated economic models to study economic policy and the underlying applied price theory.

Audience: Both Grad & Undergrad

2. Gain expertise in the formulation of numerical economic equilibrium models with application to trade, public finance, climate and energy policy applications.

Audience: Both Grad & Undergrad

3. Describe data sources for sectoral and economy-wide policy applications of calibrated economic equilibrium models.

Audience: Both Grad & Undergrad

4. Use GAMS, Excel and other visualization tools to analyze and interpret large, multi-dimensional datasets and models.

Audience: Both Grad & Undergrad

5. Demonstrate competence in writing about economic issues on the basis of evidence-based analysis of economic policy proposals.

Audience: Both Grad & Undergrad

6. Learn equivalent formulations of partial and general economic equilibrium models in primal, dual and complementarity formats.

Audience: Graduate

### **ECON/RMI 530 – INSURING LIFE'S RISKS: HEALTH, AGING, AND POLICY**

3 credits.

Covers risks related to health and aging, rationales for social insurance programs to protect against these risks, and costs and benefits of these programs. Broad topics include health insurance, disability insurance, and Social Security and pension policy.

**Requisites:** (ECON 301 or 311) and ECON 310; or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and interpret models of risk and insurance

Audience: Undergraduate

2. Identify and interpret the basic features (and rationales) of major US social insurance programs related to health and aging

Audience: Undergraduate

3. Apply knowledge from Learning Outcomes 1 and 2 to be able to critique and evaluate the merits of recent research articles

Audience: Undergraduate

### **ECON/A&E/F&W ECOL 531 – NATURAL RESOURCE ECONOMICS**

3 credits.

Economic concepts and tools relating to management and use of natural resources, including pricing principles, cost-benefit analysis, equity, externalities, economic rent, renewable and nonrenewable resources, and resource policy issues.

**Requisites:** ECON 301 or 311 or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Employ appropriate concepts in order to correctly define the economic benefits accrued from different natural resources.

Audience: Both Grad & Undergrad

2. Apply appropriate methodologies and tools to demonstrate the conditions under which the benefits are likely to be captured or dissipated by real world actors.

Audience: Both Grad & Undergrad

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of maintaining healthy supplies of forests, biodiversity, fish and wildlife, and freshwater.

Audience: Both Grad & Undergrad

4. Analyze the causes of and solutions for the sustainability challenges of maintaining healthy supplies of forests, biodiversity, fish and wildlife, and freshwater.

Audience: Both Grad & Undergrad

5. Apply academic principles of natural resource economics to a real-world policy problem.

Audience: Graduate

**ECON 535 – EXPERIMENTAL ECONOMICS**

3 credits.

An examination of the use of laboratory or field experiments to examine questions of interest to economists. How to design economic experiments and understand their results. Understanding answers to key questions about economic policy, development economics, learning in uncertain situations, behavior in markets, market design, auctions, finance, altruism and selfishness, bargaining, and many other topics, as well as the processes that produced these answers, using principles from statistical models, survey design, game theory, understanding of incentives, and behavioral economics.

**Requisites:** (ECON 301 or 311) and ECON 310**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe what experimental economics is and is not.

Audience: Undergraduate

2. Discuss the fundamental statistical tools and issues relating to experimental methods in economics.

Audience: Undergraduate

3. Design, carry out, and evaluate the results of basic economic experiments using concepts from survey design, applied statistics, game theory, and behavioral economics.

Audience: Undergraduate

4. Explain important economic models, experiments, games, and experimental results in the development and application of experimental economics.

Audience: Undergraduate

**ECON/POP HLTH/PUB AFFR 548 – THE ECONOMICS OF HEALTH CARE**

3–4 credits.

Analysis of the health care industry. Markets for hospitals and physicians' care, markets for health manpower, and the role of health insurance.

**Requisites:** ECON 301, ECON 311, or PUB AFFR 880**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ECON 570 – FUNDAMENTALS OF DATA ANALYTICS FOR ECONOMISTS**

3–4 credits.

Introduction to the data that underlies quantitative economic analysis. Learn how to formulate a research question, access economic data sources, conduct preliminary and formal analysis, and report findings in a professional manner.

**Requisites:** [ECON 310, (STAT 240 and 340), or (STAT 303 and 333)], and (ECON 301 or 311)**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Understand the economist's research process: formulating a question; preliminary and formal analysis; and communicating results.

Audience: Undergraduate

2. Effectively communicate quantitative economic ideas through figures.

Audience: Undergraduate

3. Access and analyze panel datasets, such as the Panel Study of Income Dynamics, and time series datasets, such as the National Income and Product Accounts.

Audience: Undergraduate

4. Use modern tools to effectively manage data and perform analysis.

Audience: Undergraduate

**ECON 580 – HONORS TUTORIAL IN RESEARCH PROJECT DESIGN**

3 credits.

Students will be required to criticize research by others, to draft a research proposal and to complete a project that requires original research.

**Requisites:** (ECON 301 or 311), (ECON 302 or 312), and ECON 410**Course Designation:** Gen Ed – Communication Part B

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ECON 581 – HONORS THESIS**

3 credits.

Students will work on their honor thesis.

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**ECON 621 – MARKETS AND MODELS**

3-4 credits.

An investigation into the various ways that markets determine the allocation of scarce resources: via a single market-clearing price, waiting in line or other forms of rationing, search, a centralized matching algorithm, an auction, or a contest. We will examine real-world examples of each type of market, and introduce and solve a formal theoretical model of each to see what insights it leads to.

**Requisites:** (ECON 301 or 311) and (MATH 217 or 221), or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Explain general principles of why some markets work well (and others do not), and demonstrate why the precise details matter

Audience: Both Grad & Undergrad

2. Discuss details of how particular real-world markets operate

Audience: Both Grad & Undergrad

3. Construct theoretical economic models to match key features of real-world markets, and apply mathematical tools to analyze these models

Audience: Both Grad & Undergrad

4. Understand and explain advanced theoretical results and their proofs; modify and apply these techniques to prove closely-related results

Audience: Graduate

**ECON 623 – POPULATION ECONOMICS**

3-4 credits.

Examination of economic determinants of population change and demographic behavior including household formation, marriage, child bearing and rearing, mortality (especially infant) and key forms of human capital investments including schooling and migration.

**Requisites:** (ECON 301 or 311) and ECON 310; or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 661 – ISSUES IN INTERNATIONAL MACROECONOMICS**

3-4 credits.

Examines the macroeconomics of open economies (countries that can trade goods and assets with other countries). Takes a systematic approach to building and examining macroeconomic models of the open economy, to try to understand the determination of output and employment, trade balance, capital flows, the foreign currency exchange rate, international prices, and the role of uncertainty and asset choice.

**Requisites:** (ECON 302 or 312), ECON 310, and (MATH 217 or 221), or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify how international economic models help us to understand real world data such as exchange rates, output in open economies and the trade balance (inquiry and analysis)

Audience: Both Grad & Undergrad

2. Build and apply general equilibrium models of the international economy (critical and creative thinking)

Audience: Both Grad & Undergrad

3. Practice mathematical skills through homework and exams (quantitative literacy)

Audience: Both Grad & Undergrad

4. Examine how macroeconomic institutions vary across countries and how those influence macroeconomic outcomes

Audience: Both Grad & Undergrad

5. Program and numerically solve a dynamic economic model

Audience: Graduate

6. Identify a research topic and develop a detailed paper proposal

Audience: Graduate

**ECON 664 – ISSUES IN INTERNATIONAL TRADE**

3–4 credits.

Covers advanced topics in international trade and investment, including foreign direct investment, dynamic models of trade, and models of firm-level heterogeneity.

**Requisites:** ECON 464, 310, and (MATH 217 or 221); or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the motives for multinational production: theories of horizontal, vertical, and export platform foreign direct investment.

Audience: Both Grad & Undergrad

2. Evaluate the potential benefits and costs of hosting a multinational corporation.

Audience: Both Grad & Undergrad

3. Access and analyze data on international trade and production.

Audience: Both Grad & Undergrad

4. Apply boundary-of-the-firm theories to determine what factors influence outsourcing decisions.

Audience: Both Grad & Undergrad

5. Demonstrate an understanding of models of investment under uncertainty

Audience: Graduate

6. Write computer programs to solve multinational decision problems and use the models to analyze the ways that optimal behavior depends on parameter values

Audience: Graduate

**ECON 666 – ISSUES IN INTERNATIONAL FINANCE**

3–4 credits.

Modern institutions, history, and controversies of international financial relations. Foreign exchange market, the Euro-currency banking system, and central bank intervention in both.

**Requisites:** (ECON 301 or 311), (ECON 302 or 312), (ECON 310, STAT 302, or 311), and MATH 221; or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**ECON/A A E/ENVIR ST/URB R PL 671 – ENERGY ECONOMICS**

3 credits.

The method, application, and limitations of traditional economic approaches to the study of energy problems. Topics include microeconomic foundations of energy demand and supply; optimal pricing and allocation of energy resources; energy market structure, conduct, and performance; macro linkages of energy and the economy; and the economics of regulatory and other public policy approaches to the social control of energy.

**Requisites:** Graduate/professional standing or (senior standing and ECON 101, 111, A A E 101, or 215 prior to Fall 2024)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Understand fundamentals of energy sources and technologies.

Audience: Both Grad & Undergrad

2. Be familiar with microeconomic theory with applications to energy industries and markets.

Audience: Both Grad & Undergrad

3. Build analytical skills in economic analysis and be able to apply the economic thinking to historical and contemporary energy-related issues.

Audience: Graduate

4. Analyze the causes of and solutions for the sustainability challenge of affordable and clean energy.

Audience: Both Grad & Undergrad

5. Apply sustainability principles and/or frameworks to addressing the challenge of affordable and clean energy.

Audience: Both Grad & Undergrad

**ECON 681 – SENIOR HONORS THESIS**

3 credits.

Faculty guided honors level original research.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ECON 682 – SENIOR HONORS THESIS**

3 credits.

Faculty guided honors level original research.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ECON 690 – TOPICS IN ECONOMICS**

2-4 credits.

Topics in economic theory and policy.

**Requisites:** ECON 301 or 311 or graduate/professional standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ECON 691 – SENIOR THESIS**

1-3 credits.

Faculty guided original research.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ECON 692 – SENIOR THESIS**

1-3 credits.

Faculty guided original research.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ECON 695 – TOPICS IN ECONOMIC DATA ANALYSIS**

3-4 credits.

Various advanced topics on the use of data to answer important economic questions.

**Requisites:** ECON 310, (STAT 240 and 340), or (STAT 303 and 333)**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. interpret, evaluate and critique empirical economic papers

Audience: Undergraduate

2. use specific economic or econometric methodologies to analyze real data

Audience: Undergraduate

**ECON 698 – DIRECTED STUDY**

1-4 credits.

Study of topics or research at an advanced undergraduate as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2022**ECON 699 – DIRECTED STUDY**

1-4 credits.

Study of topics or research at an advanced undergraduate as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ECON 700 – MATHEMATICS FOR ECONOMISTS**

3 credits.

Mathematical techniques used in economics analysis at a Master level.

Topics include: proof techniques, optimization, introductory topology, functional analysis, linear algebra for microeconomists and differential equations. It is expected that students will have completed three semesters calculus (such as MATH 234) and linear algebra (such as MATH 340).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ECON 701 – MICROECONOMICS I**

3 credits.

First course in a two-semester sequence covering: consumer theory, producer theory, and markets under partial and general equilibrium, and with externalities or market power. The sequence will include an introduction to decision theory and game theory, and applications to auction theory and partially informed trade. It is expected that students will have completed three semesters calculus (such as MATH 234) and linear algebra (such as MATH 340).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ECON 702 – MACROECONOMICS I**

3 credits.

A mathematical approach to the study of aggregate output determination, including analysis of consumption, labor markets, economic growth, and business cycles. Analysis of fiscal and monetary policies and their interactions. It is expected that students will have completed three semesters calculus (such as MATH 234) and linear algebra (such as MATH 340).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ECON 703 – MATHEMATICAL ECONOMICS I**

3–4 credits.

A survey of mathematical techniques used in economic analysis. Linear algebra and optimization techniques are emphasized.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 704 – ECONOMETRICS I**

3 credits.

Econometric methods, theory, and applications. Matrix algebra will be used. Topics include linear regression, least-squares estimation, inference, and hypothesis testing. Primarily for Master's level students. It is expected that students will have completed three semesters calculus (such as MATH 234) and linear algebra (such as MATH 340).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 705 – ECONOMETRICS II**

3 credits.

Econometric methods, theory, and applications. Topics include instrumental variables, GMM, panel data, limited dependent variables, time series, and vector autoregressions.

**Requisites:** ECON 704

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 706 – ECONOMETRICS III**

3 credits.

Focus on using econometric methods to address empirical questions, conduct empirical research, and write empirical papers in economics.

**Requisites:** ECON 705

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 707 – CAUSAL ESTIMATION IN ECONOMICS**

3 credits.

Most empirical work in economics focuses on estimation of causal effects, including causal effects of an economic policy, a program, or a person's decision. Discussion of the basic causality issue and contemporary methods in econometrics for identifying and estimating causal effects.

**Requisites:** ECON 704

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the concept of causality

Audience: Graduate

2. Identify and evaluate empirical methods used in papers in microeconomics that estimate causal effects

Audience: Graduate

3. Evaluate and critique empirical papers estimating causal effects - understand the crucial assumptions behind the results, and judge the consequences of these assumptions on the estimates

Audience: Graduate

**ECON 708 – MICROECONOMICS II**

3 credits.

Second course in a two-semester sequence covering: consumer theory, producer theory, and markets under partial and general equilibrium, and with externalities or market power. The sequence will include an introduction to decision theory and game theory, and applications to auction theory and partially informed trade.

**Requisites:** ECON 701

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 709 – ECONOMIC STATISTICS AND ECONOMETRICS I**

3–4 credits.

Probability distributions, statistical inference; multiple linear regression; introduction to econometric methods. It is expected that students will have completed three semesters calculus (such as MATH 234) and linear algebra (such as MATH 340).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 710 – ECONOMIC STATISTICS AND ECONOMETRICS II**

3–4 credits.

Extensions of the linear regression model; introduction to multiple equation models.

**Requisites:** ECON 709

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 711 – ECONOMIC THEORY-MICROECONOMICS SEQUENCE**

3 credits.

First course in a two-semester sequence: theories of firms, consumers, and markets; or partial and general equilibria in market and centralized economies; topics in welfare economics. It is expected that students will have completed three semesters calculus (such as MATH 234) and linear algebra (such as MATH 340).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ECON 712 – ECONOMIC THEORY-MACROECONOMICS SEQUENCE**

3 credits.

First course in a two semester sequence: commodity, money and labor markets, their components and general equilibrium; intertemporal optimization and growth theory. It is expected that students will have completed three semesters calculus (such as MATH 234) and linear algebra (such as MATH 340).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ECON 713 – ECONOMIC THEORY: MICROECONOMICS SEQUENCE**

3 credits.

Second course in a two-semester sequence: the theory of market, their efficiency properties, externalities, and the role of prices, and an introduction to the economics of information, including moral hazard and adverse selection.

**Requisites:** ECON 711**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ECON 714 – ECONOMIC THEORY; MACROECONOMICS SEQUENCE**

3 credits.

Second course in a two-semester sequence. Topics include: asset pricing; fiscal and monetary policy; mechanism design, estimation and calibration of business cycle models.

**Requisites:** ECON 712**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ECON 715 – ECONOMETRIC METHODS**

3 credits.

Nonlinear econometric theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ECON 716 – ECONOMETRIC METHODS**

3 credits.

Advanced econometric theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ECON 717 – APPLIED ECONOMETRICS**

3 credits.

Applied cross section and panel methods.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ECON 718 – TOPICS IN APPLIED ECONOMETRICS**

3 credits.

Applied time series methods.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2019

**ECON 721 – FINANCIAL MICROECONOMICS**

3 credits.

The contemporary theory of financial markets, portfolio choice, and asset pricing.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Formulate the classic consumption-based framework and financial equilibrium

Audience: Graduate

2. Derive the predictions for portfolio choice, asset pricing, and social efficiency

Audience: Graduate

3. Recover Fisher prices for YTM of treasury bonds and use these prices to value fixed income assets (bonds, mortgages)

Audience: Graduate

4. Recover Stochastic Discount Factor (SDF) from option prices and value risky assets (stocks, options)

Audience: Graduate

5. Understand the implication of SDF for a risk premium

Audience: Graduate

6. Model financial markets with default and collateral and systemic risk

Audience: Graduate

7. Model thin markets with institutional investors and insider's trading

Audience: Graduate

**ECON 724 – FINANCIAL ECONOMETRICS**

3 credits.

Introduction to econometric analysis of financial time series. Covers linear econometric time series models, multivariate time series, volatility estimation, and estimating and testing financial econometric models.

**Requisites:** ECON 704

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate an understanding of the major theories of financial pricing

Audience: Graduate

2. Use the theory of efficient markets to understand asset pricing

Audience: Graduate

3. Use linear time-series econometric models for financial forecasting

Audience: Graduate

4. Use volatility models to identify financial uncertainty

Audience: Graduate

5. Formulate and estimate asset pricing models

Audience: Graduate

6. Work with real financial data sets

Audience: Graduate

7. Build models for portfolio optimization

Audience: Graduate

**ECON 725 – MACHINE LEARNING FOR ECONOMISTS**

3 credits.

Introduction to the use of Machine Learning (ML) in economic analysis. Covers basic techniques of ML, much attention will be devoted to evaluating the use of these tools in economics. Learn how economists are integrating the tools of ML with econometric techniques in current empirical research. Gain hands on experience in using these techniques to answer traditional questions of interest to economists. Topics include (i) an in-depth discussion of the differences and similarities in goals, empirical settings and tools between ML and econometrics, (ii) supervised learning methods for regression and classification, unsupervised learning methods, large data analysis and data mining, (iii) recent methods at the intersection of ML and econometrics, designed for causal inference, optimal policy estimation, estimation of counterfactual effects. The methods are taught with an emphasis on practical application.

**Requisites:** Declared in an Economics graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize the basic concepts of machine learning from an economist's perspective, and how these tools complement the econometrics toolkit

Audience: Graduate

2. Classify differences and similarities between econometrics and machine learning

Audience: Graduate

3. Implement new methods at the intersection of machine learning and econometrics that can be used to answer economic questions

Audience: Graduate

4. Apply machine learning to datasets in economics

Audience: Graduate

5. Develop and enhance analytic skills

Audience: Graduate

6. Write functional code in R

Audience: Graduate

**ECON 726 – APPLICATIONS OF MACHINE LEARNING IN ECONOMICS**

3 credits.

Techniques of Machine Learning (ML) and the use of these tools in economics. Exploration of how economists are integrating ML tools with econometric techniques in current empirical research. Hands on experience in using these techniques to answer traditional questions of interest to economists. Topics include (i) an in-depth discussion of the differences and similarities in goals, empirical settings and tools between ML and econometrics, (ii) supervised learning methods for regression and classification, unsupervised learning methods, large data analysis and data mining, (iii) recent methods at the intersection of ML and econometrics, designed for causal inference, optimal policy estimation, estimation of counterfactual effects. The methods are taught with an emphasis on practical application.

**Requisites:** ECON 725

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Summarize the basic concepts of machine learning from an economist's perspective, and how these tools complement the econometrics toolkit

Audience: Graduate

2. Apply machine learning methods to real economic data

Audience: Graduate

3. Evaluate the advantages and disadvantages of alternative machine learning algorithms in economic applications

Audience: Graduate

**ECON 730 – INTERNATIONAL FINANCIAL ECONOMICS**

3 credits.

Examines the economics of international financial markets, and how international considerations affect financial economic models. It provides an introduction to foreign exchange markets and risk; it investigates international parity conditions and foreign exchange rate determination; it studies international capital markets; it looks at the basics of international corporate finance; and, it discusses foreign currency derivatives.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify how international financial models help us to understand real world data such as exchange rates, interest rates, forward rates, and other international financial variables

Audience: Graduate

2. Build and apply general equilibrium models of risk and return in the global economy

Audience: Graduate

3. Practice mathematical skills through homework and exams

Audience: Graduate

4. Examine how financial institutions vary across countries and how those influence outcomes such as systemic risk to the financial system

Audience: Graduate

**ECON/PUB AFFR/URB R PL 734 – REGIONAL ECONOMIC PROBLEM ANALYSIS**

3 credits.

Examination of major theories of regional economic development, with special emphasis upon the evolution and amelioration of regional economic problems. Selected techniques of regional analysis, including economic base multipliers, input/output models, and shift-share analysis are used in the context of setting regional development goals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**ECON 735 – MONETARY AND FINANCIAL THEORY**

3 credits.

Advanced appraisal of theory and institutions of the financial system, monetary theory, the credit system and financial intermediaries.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 736 – MACROECONOMIC POLICY**

3 credits.

Theoretical, empirical, and institutional aspects of the use of monetary, fiscal, and income policies to affect inflation, unemployment, and other policy goals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 741 – THEORY OF PUBLIC FINANCE AND FISCAL POLICY**

3 credits.

Theoretical development of the functions of government in a mixed economy; welfare criteria for efficient government expenditures and taxation; nature of public goods and of redistribution activities of governments. Program budgeting and theoretical issues in cost-benefit analysis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 742 – THEORY OF PUBLIC FINANCE AND FISCAL POLICY**

3 credits.

Incidence of tax burdens and expenditure benefits on relative incomes; effect of taxation on microeconomic decisions relating to work effort, investment, and consumption; analysis of the stabilization, growth, and debt management policies in the context of the economy as a whole; problems in international taxation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON/A A E 747 – FRONTIERS IN AGRICULTURAL ECONOMICS 2**

3 credits.

Organization, design, and performance of food and agricultural markets. Industrial organization; firm boundaries, contracting, and collective action; spatial, temporal, and quality dimensions of market design.

**Requisites:** ECON 709 and 711

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Describe the general state and history of the American agricultural sector, agricultural policy, and the major subfields of agricultural economics.

Audience: Graduate

2. Apply and extend economic models in agricultural contexts to evaluate or predict economic behavior or outcomes.

Audience: Graduate

3. Conduct and interpret econometric analyses motivated by economic theory.

Audience: Graduate

4. Synthesize and summarize research in the field of agricultural economics through clear writing.

Audience: Graduate

5. Generate interesting and relevant research questions informed by the economic literature.

Audience: Graduate

**ECON 750 – LABOR ECONOMICS**

3 credits.

Theoretical and empirical analysis of labor markets, labor mobility, the determination of earnings and employment, and labor supply of the household unit; emphasizes recent research on current issues in public policy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 751 – SURVEY OF INSTITUTIONAL ASPECTS OF LABOR ECONOMICS**

3 credits.

Taught on a modular basis: Labor Theories and Labor History; Union Political Activities; Collective Bargaining and Public Policy. For use in analysis of problems in areas of labor markets, wages and human resources.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 761 – INDUSTRIAL ORGANIZATION THEORY**

3 credits.

A review of theories of the firm, oligopoly, and imperfect competition. Includes applications of economic theory and game theory to agency theory, product diversity, technological change, and strategic behavior by firms--among other problems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 762 – EMPIRICAL ANALYSIS OF INDUSTRIAL ORGANIZATION AND PUBLIC POLICY**

3 credits.

A study of measurement in industrial organization and a survey of empirical tests of hypotheses in the field. The theory and practice of antitrust is also covered. Each student will produce an original piece of research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 770 – DATA ANALYTICS FOR ECONOMISTS**

3 credits.

Use core economic datasets such as the Panel Study on Income Dynamics, Consumer Expenditure Survey, National Income and Product Accounts, and the American Community Survey for quantitative economic research. Learn to clean and manipulate data to create datasets usable for economic research and to implement theory-based and atheoretic econometric models.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Be familiar with core data sets often used in microeconomics, macroeconomics, industrial organization, and finance

Audience: Graduate

2. Assemble manipulate economic data into datasets that can be used to conduct economic research

Audience: Graduate

3. Recognize the organization of economic data into cross-section, panel, and time series datasets

Audience: Graduate

4. Use python and pandas to efficiently manipulate and analyze economic data

Audience: Graduate

5. Identify the strengths and weaknesses of theory-based and atheoretic econometric models

Audience: Graduate

**ECON 771 – ADVANCES IN ARTIFICIAL INTELLIGENCE FOR ECONOMISTS**

3 credits.

Introduction to the basic concepts of artificial intelligence and its use in economics. Covers general principles and specific economic applications. Discusses implementing these approaches using economic data.

**Requisites:** ECON 725**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Explain basic Artificial Intelligence methods and how they are commonly applied to economic data

Audience: Graduate

2. Classify differences and similarities between econometrics and AI methods

Audience: Graduate

3. Evaluate advantages and disadvantages of different econometrics and AI methods

Audience: Graduate

4. Apply AI tools and methods to economic data

Audience: Graduate

**ECON/GEN BUS/STAT 775 – BAYESIAN STATISTICS**

3 credits.

Introduces the theory, methods, and computational procedures needed to perform advanced Bayesian data analyses. Predictive and decision-theoretic motivations including subjective probability, risk, admissibility, and exchangeability; highlights key components of Bayesian analysis (i.e., prior, likelihood, posterior, and predictive distributions) within standard parametric models and advanced hierarchical and multilevel models; demonstrates the iterative process of model specification, implementation, criticism, and revision with applied case studies; implements computational techniques (e.g., Markov chain Monte Carlo, variational inference) in modern probabilistic programming languages.

**Requisites:** STAT 609, 610, 611, STAT/MATH 709, ECON 709, POLI SCI 818, or COMP SCI/E C E 761**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Justify the use of probability for coherent uncertainty quantification

Audience: Graduate

2. Explain how Bayesian updating occurs in conjugate models and hierarchical models

Audience: Graduate

3. Compare and contrast the conceptual and practical benefits and challenges of different posterior approximation strategies like MCMC and variational inference

Audience: Graduate

4. Implement posterior approximation algorithms in modern statistical and probabilistic programming languages such as R or Stan

Audience: Graduate

5. Specify, fit, criticize, and revise Bayesian models in practice

Audience: Graduate

**ECON 805 – ADVANCED MICROECONOMIC THEORY I**

3 credits.

Economic behavior under uncertainty; measure of risk, information structure, stock market and asset pricing, insurance theory, asymmetric information and incentive mechanisms.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**ECON 806 – ADVANCED MICROECONOMIC THEORY II**

3 credits.

General equilibrium analysis existence and computation of fixed points and competitive equilibrium, regular economics, core, non-competitive approach to perfect competition and monopolistic competition.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**ECON 809 – TOPICS IN MICROECONOMIC THEORY**

1-3 credits.

Topics in microeconomic theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ECON 810 – ADVANCED MACROECONOMIC THEORY**

3 credits.

Topics in macroeconomic research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ECON/URB R PL 845 – ADVANCED TOPICS IN PUBLIC FINANCE**

1-4 credits.

Advanced public finance problems and literature, research; subject changes each semester; may be repeated. Modules.

**Requisites:** ECON 713 and 714

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**ECON/POP HLTH 848 – HEALTH ECONOMICS**

1-3 credits.

Health economics issues including demand, supply and pricing, market structure, medical malpractice, technological change, value of life, role of insurance, and other aspects of uncertainty.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the breadth of themes in health economics, organized under three main topic areas (the production of health; the value of health and health care; and the use of evidence to make decisions in health and healthcare contexts), and to develop appropriate analytical and methodological skills

Audience: Graduate

2. Enhance analytical and writing skills by producing several short papers

Audience: Graduate

3. Enhance scholarly oral presentation skills

Audience: Graduate

**ECON 871 – ADVANCED INTERNATIONAL ECONOMICS**

3 credits.

General equilibrium algebraic and geometric modeling of open economies with balanced trade, and the welfare economics of international exchange and barriers thereto.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ECON 872 – ADVANCED INTERNATIONAL ECONOMICS**

3 credits.

Algebraic and geometric modeling of open macroeconomics with unbalanced trade and payments, focussing analytically on the foreign exchange market and the determinants of the exchange rate.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ECON 880 – TOPICS IN COMPUTATIONAL ECONOMICS**

3 credits.

Covers techniques to compute and estimate structural models. Transition from formal Econometrics, Macroeconomics and Theory training to applications.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply numerical methods to solve dynamic programming problems (including parallel computing)

Audience: Graduate

2. Solve and simulate dynamic equilibrium models with heterogeneous agents to understand such issues as wealth inequality and the firm size distribution

Audience: Graduate

3. Use simulated method of moments to calibrate dynamic models with heterogeneous agents

Audience: Graduate

4. Solve and estimate static and dynamic discrete choice models to understand such issues as demand for differentiated products, residential sorting, investment decisions

Audience: Graduate

5. Solve dynamic Markov games with strategic interactions to understand such issues as strategic investments and the evolution of the firm size distribution

Audience: Graduate

**ECON 899 – RECENT ADVANCES IN ECONOMICS**

1-3 credits.

Selections from all fields of economic research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ECON 901 – WORKSHOP IN MATHEMATICAL ECONOMIC THEORY**

1-7 credits.

First in a two seminar sequence on critical discussion of topics in the field of economic theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ECON 902 – WORKSHOP IN ECONOMIC THEORY**

1-7 credits.

Critical discussion of topics in the field of economic theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ECON 903 – WORKSHOP ON INDUSTRIAL ORGANIZATION**

1-7 credits.

Current research on the operation of markets in which individuals and firms act with imperfect information, are limited in their responses, may purchase heterogeneous commodities or factor services, and are concerned with conflicting goals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ECON 904 – WORKSHOP ON INDUSTRIAL ORGANIZATION**

1-7 credits.

Second in a two seminar sequence on current research on the operation of markets in which individuals and firms act with imperfect information, are limited in their responses, may purchase heterogeneous commodities or factor services, and are concerned with conflicting goals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ECON 913 – WORKSHOP IN ECONOMETRICS**

1-7 credits.

Current research in econometric model building, estimation and inference in econometrics

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ECON 914 – WORKSHOP IN ECONOMETRICS**

1-7 credits.

Second in a two seminar sequence on current research in econometric model building, estimation and inference in econometrics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **ECON/ANTHRO/C&E SOC/SOC 925 – SEMINAR: SOCIO-ECONOMIC CHANGE IN UNDERDEVELOPED AREAS**

2-3 credits.

Social and economic factors relating to stability, growth, and change in the non-Western areas of the contemporary world.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **ECON 955 – WORKSHOP IN LABOR ECONOMICS**

1-7 credits.

Analysis of current research in wage determination and the functioning of labor markets.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **ECON 956 – WORKSHOP IN LABOR ECONOMICS**

1-7 credits.

Second in a two seminar sequence on the analysis of current research in wage determination and the functioning of labor markets.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **ECON 965 – WORKSHOP ON QUANTITATIVE MACRO-ECONOMIC ANALYSIS**

1-7 credits.

Current research on macroeconomic models, monetary theory and policy, the theory of portfolio selection, and the allocative and distributive performance of capital markets.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **ECON 966 – WORKSHOP ON QUANTITATIVE MACRO-ECONOMIC ANALYSIS**

1-7 credits.

Second in a two seminar sequence on current research on macroeconomic models, monetary theory and policy, the theory of portfolio selection, and the allocative and distributive performance of capital markets.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **ECON 968 – WORKSHOP ON PUBLIC ECONOMICS**

1-7 credits.

Individual research and group discussion of public expenditure programs with attention to investment in human capital, education, training, health information, and welfare programs. Reports on research in progress by students, staff, visiting scholars.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **ECON 969 – WORKSHOP ON PUBLIC ECONOMICS**

1-7 credits.

Second in a two seminar sequence on individual research and group discussion of public expenditure programs with attention to investment in human capital, education, training, health information, and welfare programs. Reports on research in progress by students, staff, visiting scholars.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **ECON 977 – WORKSHOP IN INTERNATIONAL ECONOMICS**

1-7 credits.

Current research in international trade; a wide range of topics in theory, quantitative analysis, statistics, and policy. For graduate students in their second or later years when working on theses.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **ECON 978 – WORKSHOP IN INTERNATIONAL ECONOMICS**

1-7 credits.

Second in a two seminar sequence on the current research in international trade; a wide range of topics in theory, quantitative analysis, statistics, and policy. For graduate students in their second or later years when working on theses.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ECON/AFRICAN/ANTHRO/GEORG/HISTORY/POLI SCI 983 – INTERDEPARTMENTAL SEMINAR IN AFRICAN STUDIES TOPICS**  
3 credits.

Interdisciplinary inquiry in African societies and cultures.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop in-depth knowledge in a sub-field of specialization within African studies

Audience: Graduate

2. Acquire and demonstrate understanding of major theories, approaches, concepts, currently informing African studies

Audience: Graduate

3. Understand your process of learning and possess the capacity to intentionally seek, evaluate, and learn from information, and to recognize and reduce bias in thinking.

Audience: Graduate

4. Gain firm knowledge of existing research in African studies

Audience: Graduate

5. Develop and improve speaking, readings, listening, and writing skills

Audience: Graduate

6. Write and speak across disciplinary boundaries

Audience: Graduate

7. Analyze texts from various theoretical and critical perspectives

Audience: Graduate

**ECON 990 – THESIS**

2-9 credits.

Independent research and writing for graduate students under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ECON 999 – INDEPENDENT WORK**

2-9 credits.

Directed study projects for graduate students as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## EDUCATIONAL LEADERSHIP AND POLICY ANALYSIS (ELPA)

**ELPA/LEGAL ST 442 – CIVIL RIGHTS LAWS, THE COURTS, AND PUBLIC EDUCATION**

3 credits.

Examines several legal issues confronting students and educators within the U.S. education system with a particular focus on race discrimination. Examines how civil rights laws and constitutional provisions can help create more equitable schooling experiences for students and educators from historically marginalized populations. Identifies pragmatic approaches to the law, and explores issues of the democratic underpinnings of education.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze the U.S. constitutional provisions and civil rights laws in the U.S. that impact U.S. public education, demonstrating an awareness of history's impact on the past and present.

Audience: Both Grad & Undergrad

2. Describe various legal documents related to education, recognizing how assumptions about minoritized populations may play out in school policy.

Audience: Both Grad & Undergrad

3. Explain and engage in discussions about racial injustice through the discussion of case law, demonstrating a consciousness or awareness of how the issue impacts themselves and others in a public school setting.

Audience: Both Grad & Undergrad

4. Identify ways to become more effective participants in a multiracial society through the examination of current issues and social movements rooted in education law and policy.

Audience: Both Grad & Undergrad

5. Examine issues in civil rights law in education using peer-reviewed research

Audience: Graduate

## **ELPA 502 – WORKSHOP IN EDUCATIONAL LEADERSHIP AND POLICY ANALYSIS**

1-3 credits.

Practical problems derived from student interests and needs.

**Requisites:** Junior standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

## **ELPA/ED POL/LEGAL ST 542 – LAW AND PUBLIC EDUCATION**

3 credits.

Examines the legal issues related to the policy decisions and delivery of public education (elementary and secondary) in the United States. Learn how law impacts both curriculum development and curricular delivery, explore current legal controversies, constitutional issues, and learn about legal reasoning and analysis. Examines how both legislation and litigation affects public education. Particular attention is paid to law as public policy and the analysis of the same.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify various analytic frameworks that guide legal analysis.

Audience: Both Grad & Undergrad

2. Analyze the use of principles and/or frameworks to a situation or issue.

Audience: Both Grad & Undergrad

3. Understand the role of analytic frameworks in the development and implementation of law and policy.

Audience: Both Grad & Undergrad

4. Describe the many legal issues inherent in daily school practice.

Audience: Undergraduate

5. Discuss various legal principles.

Audience: Undergraduate

6. Examine the sources of law and the various interests that the law seeks to balance.

Audience: Undergraduate

7. Recognize and identify independently the many legal issues inherent in daily school practice.

Audience: Graduate

8. Explore and apply various legal practices and their application.

Audience: Graduate

9. Examine the sources of law and the various interests that the law seeks to balance, provide varying arguments in written form.

Audience: Graduate

10. Find and understand primary sources of legal authority (e.g. actual cases, statutes, and administrative rules).

Audience: Graduate

**ELPA 600 – COOPERATIVE PROGRAM OFF-CAMPUS TERM**

0 credits.

For participants in M.S. cooperative program to maintain UW-Madison status during terms when taking courses from partner institution.

**Requisites:** Declared in Educational Leadership and Policy Analysis: Cooperative Program with UW Whitewater MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ELPA 640 – LEGAL RIGHTS AND RESPONSIBILITIES FOR TEACHERS**

1-3 credits.

Examines the legal issues confronting the classroom teacher on a daily basis. An emphasis will be placed on understanding legal analysis in order to empower teachers to better balance the multiple interests confronting them. Also, understanding of how law can further the development of a democratic classroom. Specific topics to be examined include: curricular control, teachers' academic freedom, religion in the curriculum, equity in programming, special education, student records, student discipline, teacher contracts, teacher discipline, and negligence.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Examine the legal issues confronting an educational professional on a daily basis

Audience: Graduate

2. Learn how the law impacts both curriculum development and curricular delivery

Audience: Graduate

3. Understand legal analysis in order to empower educators to better balance the multiple interests confronting them

Audience: Graduate

4. Understand how the law can further the development of a democratic classroom

Audience: Graduate

**ELPA 662 – EXPEDITIONS IN EVIDENCE-BASED TEACHING AND LEARNING**

2 credits.

Use experiential learning to explore evidence-based and inclusive teaching approaches within different higher education learning contexts.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explore and engage with educational practices and learning environments that are aligned with principles of inclusive and evidence-based teaching and learning.

Audience: Graduate

2. Consider how teaching approaches may be applied across different learning contexts at the college level

Audience: Graduate

3. Observe and critically reflect on teaching practices and outcomes for higher education learners.

Audience: Graduate

4. Describe effective models for developing inclusive learning communities and engaging diverse groups of learners.

Audience: Graduate

5. Begin to identify how to integrate evidence-based teaching approaches with your own disciplinary content knowledge to create inclusive learning experiences.

Audience: Graduate

**ELPA 663 – CAPSTONE SEMINAR IN TEACHING AND LEARNING**

1 credit.

Synthesize experiences in teaching, mentoring, and educational development into materials for use in next career stage(s) as future faculty.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate your philosophy as an educator, drawing upon evidence-based and inclusive pedagogies relevant to higher education learning environments.

Audience: Graduate

2. Design portfolio materials that integrate your experiences with teaching, mentoring, and educational development, and that align with your career(s) of interest.

Audience: Graduate

3. Develop professional goals that include a continuing practice of reflective growth as an educator.

Audience: Graduate

**ELPA 700 – FIELD EXPERIENCE IN EDUCATIONAL LEADERSHIP**

3 credits.

Supervised field experience: elementary, secondary, vocational, technical, higher, and/or special education at local, state, or national level.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ELPA 701 – INTRODUCTION TO HIGHER AND POST-SECONDARY EDUCATION**

3 credits.

Examines the history and philosophy of higher and postsecondary education; the major participants; curriculum; governance and leadership; relations with state and federal government; and current issues.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ELPA 702 – INTRODUCTION TO EDUCATIONAL LEADERSHIP**

3 credits.

Examine leadership in K12 schools for more equitable outcomes. Delve into key social justice concepts, principal leadership, teacher leadership, the interplay between principals and informal/formal teacher leaders, and how a more robust, encompassing view of leadership can contribute to more equitable student learning outcomes.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

**Learning Outcomes:** 1. Examine the multi-dimensional complexities of school-level leadership

Audience: Graduate

2. Examine how one's identities and personal experiences shape assumptions and perspectives related to leadership development.

Audience: Graduate

3. Examine how effective school-level leaders and teacher leaders impact equity, diversity, and inclusion in K12 school settings.

Audience: Graduate

4. Analyze the interplay between school-level leaders and teacher leaders for more equitable organizational improvement.

Audience: Graduate

5. Examine (critically) and use current research in educational leadership

Audience: Graduate

**ELPA 703 – EVALUATING AND SUPPORTING QUALITY CLASSROOM TEACHING**

3 credits.

Evaluate teaching practices and recognize and support quality classroom teaching in K-12 settings. Application of established evaluation frameworks to video cases of classroom practice.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ELPA 710 – INTRODUCTION TO INTERCOLLEGIATE ATHLETICS ADMINISTRATION**

3 credits.

Examine the administration of intercollegiate athletics in higher education institutions with particular emphasis on providing practical and theoretical approaches.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ELPA 715 – GOVERNANCE AND ADMINISTRATION OF COLLEGES AND UNIVERSITIES**

3 credits.

Functions, organization, and administrative practices of colleges and universities; role of governing boards, administrators, faculty members, and students in policy making.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ELPA/COUN PSY/CURRIC/ED POL/ED PSYCH/RP & SE 719 – INTRODUCTION TO QUALITATIVE RESEARCH**

3 credits.

Provides an overview of qualitative inquiry, examining assumptions, standards, and methods for generating and communicating interpretations. Methodological and theoretical works illustrate case study, ethnography, narrative, and action research. Does not include a field method component.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ELPA 725 – RESEARCH METHODS AND PROCEDURES IN EDUCATIONAL ADMINISTRATION**

3 credits.

Role of theory and hypothesis testing in research. Introduction to research problems, questions, hypotheses, variables, constructs, definitions, measurement, research and experimental designs, sampling, descriptive statistics, proposal writing, types of research and statistical computing. Critical analysis of published research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ELPA 726 – DATA-DRIVEN LEADERSHIP FOR EDUCATIONAL EQUITY AND SYSTEMIC SCHOOL IMPROVEMENT**

3 credits.

Engages educational leaders in data-driven decision-making from a system-wide perspective, and developing basic data analysis skills.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2017

**Learning Outcomes:** 1. Evaluate existing improvement processes, use research and data to develop an improvement process, and develop an implementation plan to support the improvement process.

Audience: Graduate

2. Evaluate ethical dimensions of issues, analyze decisions in terms of established ethical frameworks, and develop a communication plan to advocate for ethical decisions.

Audience: Graduate

3. Interpret data from formative and summative assessments for use in educational planning and engage faculty in gathering, synthesizing, and using data to evaluate the quality, coordination, and coherence of the school's curriculum, instruction, and assessment practices.

Audience: Graduate

4. Master principles of systems management and continuous improvement.

Audience: Graduate

**ELPA 735 – LEADERSHIP FOR EQUITY AND DIVERSITY**

3 credits.

Coordinating and effective utilization of school-based special services in the context of student diversity with attention to values, theory, and research underlying curriculum, instruction and policy, in terms of social class, gender, sexual orientation, disability, and race.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ELPA 736 – ADMINISTRATION OF STUDENT SERVICES IN HIGHER EDUCATION**

3 credits.

Organization and administration of student services in higher education including philosophy, current issues, student development, program planning, financial aid, auxiliary services, housing, counseling, advising, social and health services, student organizations, legal aspects, and special populations.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ELPA 750 – COACHING ATHLETICS 1: EVERYDAY PRACTICES OF TOP LEADERS**

3 credits.

Employs an everyday practices conceptual framework. Core tenets: brokering, embedding, experimenting, targeting high doses, zeal. Examines complexities of coaching practice, including individual, organizational, and contextual variables. Draws from research on leadership. Uses research-driven framework to analyze coaching practice across five domains. Highlights processes that guide successful coaches at multiple levels. Encourages reflection upon coaching aspirations and trajectories.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Deepen understandings of the multi-dimensional complexities of coaching practice.

Audience: Graduate

2. Understand how diverse settings and conditions shape coaching practice.

Audience: Graduate

3. Identify effective coaching and leadership strategies.

Audience: Graduate

4. Articulate processes and outcomes that underlie successful systems of coaching.

Audience: Graduate

5. Identify models and practices of coaching that fit with our personal characteristics and situations.

Audience: Graduate

6. Discern how coaching fits into our aspired futures as athletes, teachers, leaders, parents, and/or community members.

Audience: Graduate

**ELPA 751 – LEADERSHIP AND JUSTICE IN SPORTS**

3 credits.

Examines the broad landscape of athletics, focusing on matters of human, social, economic, and cultural capital. Draws from prominent books, articles, documentaries, and other sources to develop expanded perspectives and nuanced understandings of leadership and social justice in sports. Specific learning foci include the social, cultural, and historical roles of sports and the traditional and emerging roles of athletes and coaches. Particular attention paid to matters of race, poverty, activism, youth sports, college sports reform, and the leadership that unfolds in these settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Cultivate critical reflection on the systems and structures that underlie athletics in the US.

Audience: Graduate

2. Deepen historical understandings of the multi-level ways that justice has been contested in and through sports.

Audience: Graduate

3. Identify key practices and conditions that cultivate life opportunities in and through sports.

Audience: Graduate

4. Articulate processes and models that promote justice in and through sports.

Audience: Graduate

5. Promote justice-centered leadership roles and possibilities in sports.

Audience: Graduate

6. Build capacity for positively transforming lives, organizations, communities, and perspectives in sports and beyond.

Audience: Graduate

**ELPA 752 – COACH AS TEACHER: MASTERING INSTRUCTIONAL PRACTICE ON AND OFF THE FIELD**

3 credits.

Provides opportunities to learn about the theory and practice of instruction in athletics settings. Identifies the hallmarks of excellent teaching and learning. Synthesizes the characteristics and practices of teachers who achieve mastery. Considers how particular contexts (e.g., sport, developmental stage, physical environment) shape teaching and learning. Explores team curriculum. Examines methods of leading and evaluating teaching and learning in sport. Also addresses: practice planning, skills-teaching, feedback, technology, learning targets, on-field instruction, and film room instruction.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand ecological development theories and their applicability to sports

Audience: Graduate

2. Understand how race, class, gender, age and other variables relate to teaching and learning in sports

Audience: Graduate

3. Identify and describe the hallmarks of excellent teaching and learning in a sport setting

Audience: Graduate

4. Assemble a "tool kit" of effective sport and developmentally appropriate teaching strategies

Audience: Graduate

5. Develop instructional leadership plans for sport settings

Audience: Graduate

6. Synthesize and apply research-supported evaluation practices

Audience: Graduate

7. Deepen understandings of how coaches can cultivate learning cultures

Audience: Graduate

**ELPA 753 – PSYCHOLOGY AND COACHING IN SPORTS**

3 credits.

Examines key principles of psychology relating to athletics. Addresses psychological aspects of leading. Examines research on psychology in competition. Considers how attention to psychology improves processes and outcomes. Supports coaches' and leaders' holistic development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the basic aspects of sport psychology and its place in both the broader field of psychology and in the field of coaching.

Audience: Graduate

2. Identify and critique several psychological constructs that are often addressed in sport settings.

Audience: Graduate

3. Describe the interrelation of psychological constructs in coaching.

Audience: Graduate

4. Evaluate psychological constructs across diverse sports settings, including differences in developmental stages, sports, race, gender, culture, and geography.

Audience: Graduate

5. Synthesize best practices relating to their own area of coaching interest.

Audience: Graduate

6. Develop key strategies to be utilized in their own coaching settings, including identifying team members' signs of risk, how to best coordinate with key collaborators, how to manage one's own stress, etc.

Audience: Graduate

**ELPA 754 – RUNNING A CHAMPIONSHIP SYSTEM: THE BADGER SPORTS LEADERSHIP ROAD COURSE**

3 credits.

Examines core components of championships sports programs. Uses case study design to examine how leadership unfolds across multiple levels within one setting. Draws from distributed leadership analytic framework. Considers how matters such as talent, culture, commitment, leadership, intelligence, organization, resilience, teamwork, integrity, health, resources, and opportunities intersect in a successful system.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Build capacity for identifying, describing, and applying key tenets of the distributed leadership perspective to a sports program

Audience: Graduate

2. Build capacity for employing case study methodology toward team/organizational improvement

Audience: Graduate

3. Deepen understandings of how multiple components of a sports program interact contributing to competitive success

Audience: Graduate

4. Identify and articulate promising coaching and leadership practices within a larger school, university, and/or professional team organization.

Audience: Graduate

**ELPA 755 – COACHING ATHLETICS 2: A BELL COW WAY**

3 credits.

Provides opportunities to learn from specific models of coaching practice. Utilizes Bell Cow method. Articulates processes underlying successful coaching systems. Attends to personal characteristics and unique settings of coaching. Draws from leadership theory.

**Requisites:** ELPA 750**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Deepen understandings of the multi-dimensional complexities of coaching practice.

Audience: Graduate

2. Understand how diverse settings and conditions shape coaching practice.

Audience: Graduate

3. Identify effective coaching and leadership strategies.

Audience: Graduate

4. Articulate processes and outcomes that underlie successful systems of coaching.

Audience: Graduate

5. Identify models and practices of coaching that fit with our personal characteristics and situations.

Audience: Graduate

6. Discern how coaching fits into our aspired futures as athletes, teachers, leaders, parents, and/or community members.

Audience: Graduate

**ELPA/ED POL/PUB AFFR 765 – ISSUES IN EDUCATIONAL POLICY ANALYSIS**

3 credits.

Theory, research, and practical experience in educational policy analysis, including the social construction of policy problems in education; the design, implementation, and evaluation of policy responses; and the practical and ethical dilemmas of the policy analyst.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**ELPA/INTER-HE 770 – COMMUNITY, OPPORTUNITY, AND JUSTICE**

3 credits.

Critical examination of school-community engagement and collaboration. Examines theory and practice of mutually beneficial collaboration in diverse education settings, including leadership issues in collaborative settings, and facilitators and inhibitors to effective collaboration.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**ELPA 777 – HIGHER AND POST-SECONDARY EDUCATION CAPSTONE SEMINAR**

3 credits.

Provides an opportunity to use concepts and theories learned in previous coursework to analyze professional issues facing higher education administrators. Assists with career transitions and provides a culminating experience for the master's program.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**ELPA/ED PSYCH 780 – TEACHER LEADERSHIP AND LEARNING COMMUNITIES**

3-4 credits.

Focuses on knowledge and skills teachers need to be leaders in their schools in facilitating the development of strong learning communities that include students, teachers, families, administrators, and other educators. Understand key concepts, theories, and models used in building and sustaining effective learning communities; develop skills in creating practices that contribute to effective teacher leadership; and identify and strengthen skills needed to lead schools to build learning communities that promote student learning.

**Requisites:** Declared in Educational Psychology: Professional Educator (MSPE)**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2020**ELPA/COUN PSY/CURRIC/ED POL/ED PSYCH/RP & SE 788 – QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD METHODS I**

3 credits.

Introductory field methods experience in qualitative research. Learn to define good research questions, determine which methods of data collection and analysis are useful for addressing those questions, engage in these methods, reflect on their utility in education research.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 719**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ELPA/COUN PSY/CURRIC/ED POL/ED PSYCH/RP & SE 789  
– QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD  
METHODS II**

3 credits.

Focus on data analysis and translation of finds and implications. Gain theoretical and practical knowledge and skills regarding coding and analysis techniques, use of qualitative analytic tools, strategies for sharing findings with audiences beyond research team.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 788

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ELPA 810 – DOCTORAL INQUIRY IN EDUCATIONAL LEADERSHIP  
AND POLICY ANALYSIS**

3 credits.

Introduction to inquiry in the field of educational leadership and policy analysis for first semester doctoral students. Provides an introduction to research through engagement with ideas, including identifying and crystallizing meaningful problems, fundamentals of research design, and key challenges in conducting disciplined inquiry.

**Requisites:** Declared in Educational Leadership and Policy Analysis PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ELPA 812 – LITERATURE REVIEW IN EDUCATIONAL LEADERSHIP  
AND POLICY ANALYSIS**

3 credits.

Develop, organize, and write a comprehensive literature review focused on a specific research area of individual interest. Learn strategies for effectively researching, synthesizing, and critically evaluating existing scholarship to build a strong foundation for research projects.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Use appropriate techniques for identifying, organizing, and synthesizing relevant literature.

Audience: Graduate

2. Explore how power and privilege shape educational research and knowledge dissemination.

Audience: Graduate

3. Identify useful technological and software tools that support research and writing.

Audience: Graduate

4. Complete an annotated bibliography.

Audience: Graduate

5. Learn valuable peer review techniques.

Audience: Graduate

6. Produce a draft document that serves as a foundation for the Preliminary Exam.

Audience: Graduate

**ELPA 815 – PROBLEMS IN COLLEGE AND UNIVERSITY  
ADMINISTRATION**

3 credits.

Theory and research applied to the study of policy issues and problems in college and university administration.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2019

**ELPA/ED PSYCH 822 – INTRODUCTION TO QUANTITATIVE  
INQUIRY IN EDUCATION**

3 credits.

Utilize the concepts and methods of quantitative social science research to conduct research on education issues. Topics include hypothesis testing, statistical inference, point estimates, graphic and numerical data displays, correlation and regression.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ELPA 823 – DATA MANAGEMENT FOR EDUCATION POLICY ANALYSIS

3 credits.

Focuses on the knowledge and skills required to support rigorous quantitative inquiry. Acquire and import data; combine (merge/append) multiple data sets; organize directories and files for optimal workflow; clean data; document data manipulations for reproducibility and transparency; write code to facilitate collaboration; and summarize data in visual (graph, chart, map) and tabular forms.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Import, merge, and append multiple data sources

Audience: Graduate

2. Structure directories and files to support collaborative inquiry

Audience: Graduate

3. Organize a dataset through the systematic assignment of variable names, variable labels, and value labels

Audience: Graduate

4. Generate and manipulate string and numeric data

Audience: Graduate

5. Clean and troubleshoot data, including the imputation of missing values

Audience: Graduate

6. Collapse and reshape your dataset

Audience: Graduate

7. Generate summary statistics, in tabular and graphic form

Audience: Graduate

8. Use coding strategies, such as loops, logical expressions, locals, and macros, to program efficiently

Audience: Graduate

9. Document data preparation and structure

Audience: Graduate

10. Acquire publicly available data from multiple formats

Audience: Graduate

### ELPA 824 – FIELD RESEARCH DESIGNS & METHODOLOGIES IN EDUCATIONAL ADMINISTRATION

3 credits.

Focuses on research design, the major qualitative methods and techniques used in field research, data analysis, communicating field research, ethical challenges, and trustworthiness in conducting qualitative research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ELPA 825 – ADVANCED RESEARCH METHODS IN EDUCATIONAL ADMINISTRATION

3 credits.

Research designs for problems in educational administration including role of theory and hypothesis testing; variable definition and measurement; correlational, survey, experimental and non-experimental, factorial and single-subject designs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### ELPA/ED PSYCH 827 – SURVEYS AND OTHER QUANTITATIVE DATA COLLECTION STRATEGIES

3 credits.

Methods and concepts of survey research methods as they are commonly used in education research. Strategies include surveys (phone, mail, electronic, in person), logs/diaries, and experience sampling instruments. Emphasis is given to self-administered surveys, including periodic surveys, since these strategies are the most common in education research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### ELPA 831 – FINANCING POSTSECONDARY EDUCATION

3 credits.

Contemporary bases for collecting and distributing funds for postsecondary education provided by two-year institutions, colleges and universities; problems and issues in financing postsecondary institutions; economic aspects of expenditures for postsecondary education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ELPA 832 – RESOURCE ALLOCATION FOR EQUITY AND SOCIAL JUSTICE**

3 credits.

School finance and resource allocation for educational leaders, with an emphasis on educational adequacy, equity and efficiency. Includes an emphasis on the strategic deployment of human and material resources to address inequality and promote educational opportunity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ELPA/RP & SE 835 – LEADERSHIP FOR INCLUSIVE SCHOOLING**

3 credits.

Examines historical and organizational context of special education administration at the federal, state and local levels. Includes policy implementation, constituency management, coordination, communication, and current issues.

**Requisites:** ELPA 735

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ELPA 840 – PUBLIC SCHOOL LAW**

3 credits.

Legal aspects of public K-12 education. Legal structure; employee rights; employee discipline; curriculum; students' rights; student discipline, special education; torts; contracts, religion. Impact of federal and state constitutions, statutes, and court decisions on education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ELPA 841 – LEGAL ASPECTS OF HIGHER EDUCATION**

3 credits.

Legal structure of higher education, including historical evolution as well as current legal problems. Attempts to assess the impact of legal decisions, statutes, and regulations upon higher education and to discuss the implications of the interaction of the legal system and university governance for the practicing administrator.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ELPA/ED POL/ED PSYCH/RP & SE 842 – LEGAL FOUNDATIONS OF SPECIAL EDUCATION AND PUPIL SERVICES**

3 credits.

Legal requirements and issues relative to special education and pupil services programs; special education, juvenile justice, programs for English language learners, programs for children who are homeless; examination of applicable federal and state statutes and case law.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe various legal issues and identify those issues inherent in the delivery of pupil services.

Audience: Graduate

2. Explain the foundation created by federal disability law (Section 504, ADA, IDEA).

Audience: Graduate

3. Describe the relationship between state and federal law in the delivery of special education.

Audience: Graduate

4. Apply legal principles to a set of facts.

Audience: Graduate

5. Explain the relationship between statutory and regulatory requirements and practice.

Audience: Graduate

6. Identify various analytic frameworks that guide legal analysis.

Audience: Graduate

7. Apply principles and/or frameworks to a situation or issue.

Audience: Graduate

8. Analyze existing policies and practice from a legal perspective.

Audience: Graduate

9. Explain the dynamic nature of this branch of school law and will identify tools and resources available to help them remain current.

Audience: Graduate

**ELPA 844 – TECHNOLOGY AND SCHOOL LEADERSHIP**

3 credits.

Investigates how school leaders develop and use technological tools and systems to improve student learning and effect change in schools.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ELPA 845 – SCHOOL-LEVEL LEADERSHIP**

3 credits.

Dimensions of school-level leadership includes a focus on dimensions of the principal's leadership role, leadership tasks needed to advance equity and excellence in student learning, and distributed leadership.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ELPA 846 – THE SCHOOL SUPERINTENDENCY**

3 credits.

Investigation of leadership and political theories, professional competencies, and the personal commitment involved in the role of the school superintendent. Covers the evolution of theoretical and practical perspectives of the school superintendence, including internship experiences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ELPA 847 – INSTRUCTIONAL LEADERSHIP AND TEACHER CAPACITY**

3 credits.

Learn to create and sustain successful teaching and learning environments. Designed to provide teachers, learning specialists, principals, and other administrators with the foundations of research, theory, and best practices of instructional leadership to enhance teachers' capacity for equity and excellence in student learning.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ELPA 848 – PROFESSIONAL DEVELOPMENT AND ORGANIZATIONAL LEARNING**

3 credits.

Examines educators' professional learning in organizations and its contributions to organizational change, learning, and renewal.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**ELPA 856 – MOBILITY AND INCLUSION IN GLOBAL HIGHER EDUCATION**

3 credits.

Connects the discussion on diversity, equity, and inclusion (DEI) with student mobility in the context of internationalization of higher education. Delve into inquiries on why and how promoting mobility in international education and advancing DEI in higher education can benefit and enhance each other. Primarily serves as a venue to develop knowledge, expertise, and research skills in developing and implementing policies, programs, and strategies aiming at promoting international mobility in higher education through the lens of social justice. Strives for diversity, equity, and inclusion in the context of internationalization of higher education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop awareness of positionality, bias, and privileges and how they may affect international student mobility, experience, and educational outcomes.

Audience: Graduate

2. Describe issues, trends, and challenges concerning diversity, equity, and inclusion in international higher education.

Audience: Graduate

3. Identify and analyze issues and challenges pertaining to international higher education through the lens of equity and inclusion.

Audience: Graduate

4. Outline the current trends and focuses surrounding research on mobility and inclusion in international higher education.

Audience: Graduate

5. Design inclusive, equity-driven, asset-based international education programming or research projects.

Audience: Graduate

6. Develop competence of self-reflection, self-assessment, and self-care.

Audience: Graduate

**ELPA 860 – ORGANIZATIONAL THEORY AND BEHAVIOR IN EDUCATION**

3 credits.

Theoretical constructs and empirical research relating to administering organizations in education. Emphasis on administrative behavior with special attention to planning and organizational improvement.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ELPA 863 – RACE, CLASS AND EDUCATIONAL INEQUALITY**

3 credits.

Critically examines race and class inequality in education, including the importance of race and class at multiple levels of analysis, including the classroom and school, as well as the family, neighborhood, and community.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ELPA 870 – THE POLITICS OF EDUCATION**

3 credits.

Policy development in education as a political process; community power, state and national politics in educational decision making; role of leadership and pressure groups, particularly the educational lobbies, in the shaping of educational policy at local, state, and national levels.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ELPA 875 – THEORY AND PRACTICE OF EDUCATIONAL PLANNING**

3 credits.

Theory, research and practice in advanced program planning and evaluation involving elementary, secondary and higher and post-secondary education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ELPA 878 – THE AMERICAN COMMUNITY COLLEGE**

3 credits.

Addresses policies, trends, and debates in the evolution of the American community college from the beginning of the 20th century to the present, as well as current research on the community college and the diverse body of students it serves. Topics include, but are not limited to, governance and administration, faculty and advising, credential completion and transfer, enrollment patterns, developmental education, complexities surrounding students' goals and aspirations, and the cooling-out versus warming-up effect of the community college. Through class discussions and the culminating course project (research study or policy proposal), course participants will engage in a critical, scholarly examination of the American community college, considering its strengths and weaknesses, as well as opportunities and challenges within the broader context of education.

**Requisites:** Graduate Students Only

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Understand the history of community colleges and their missions, policies, and programs

Audience: Graduate

2. Develop a strong knowledge base of a broad range of contemporary topics and pressing questions concerning the community college and its students

Audience: Graduate

3. Identify and elaborate on policies, trends, and issues that influence current community college education and discuss their impact on future policies and practices

Audience: Graduate

4. Enhance expertise in one or two current research/policy topics on the community college

Audience: Graduate

5. Cultivate the capacity to critically evaluate existing empirical evidence and to plan and conduct original research or develop a policy proposal grounded within sound evidence

Audience: Graduate

**ELPA 880 – ACADEMIC PROGRAMS IN COLLEGES AND UNIVERSITIES**

3 credits.

Explores higher education curriculum including academic program philosophy and design, planning and development, program innovations, liberal education, academic majors, graduate and professional education, program review and evaluation.

**Requisites:** ELPA 715

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **ELPA 881 – IDEAS OF THE UNIVERSITY: IMAGES OF HIGHER LEARNING FOR THE 21ST CENTURY**

3 credits.

Explores alternative images and models to guide universities in the twenty-first century by engaging a diverse range of voices representing multiple stakeholders.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **ELPA 882 – MINORITY-SERVING INSTITUTIONS OF HIGHER EDUCATION**

3 credits.

Examines the origins, contemporary landscape, structures, and stakeholders of minority-serving institutions (MSIs) -- historically black colleges and universities (HBCUs), Hispanic-serving institutions (HSIs), and tribal colleges and universities (TCUs) -- including related challenges and opportunities for research and practice.

**Requisites:** ELPA 701

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2022

### **ELPA 883 – PERSPECTIVES ON COLLEGE STUDENT IDENTITY AND DEVELOPMENT**

3 credits.

An introduction to identity and college student development theory that can either be applied to higher education administration practice or to research in higher education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ELPA 885 – LEADERSHIP FOR STUDY ABROAD PROGRAMS AND INTERNATIONAL STUDENT SERVICES**

3 credits.

A comprehensive understanding of leadership and administration of higher education study abroad programs and international student services.

Delving into the latest discussion and debates on this subject from both researchers' and practitioners' points of view, serves as a venue to develop knowledge and expertise in developing and implementing policies, programs, and strategies for optimizing leadership for study abroad programs, international student services, and international enrollment management.

**Requisites:** Declared in Educational Leadership and Policy Analysis: Global Higher Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Outline current trends, issues, and research surrounding education abroad programs and international student services

Audience: Graduate

2. Understand various aspects for developing, managing, and evaluating study abroad programs

Audience: Graduate

3. Identify and analyze issues and challenges pertaining to a higher education institution's engagement with its international student population and international recruitment

Audience: Graduate

4. Design proposals aiming to solve a practical issue in education abroad programs, international student services, and international enrollment management

Audience: Graduate

5. Engage with faculty development, curriculum design, and classroom teaching in a diverse, global context for advancing the missions of study abroad programs and international student services

Audience: Graduate

### **ELPA 886 – INTERNATIONALIZATION OF HIGHER EDUCATION**

3 credits.

Close look at issues, trends, and challenges concerning internationalization in higher education in both the U.S. and foreign countries. Focus includes internationalizing teaching and learning, international partnerships and collaborations, international student recruitment and advising, study abroad etc.

**Requisites:** Declared in Educational Leadership and Policy Analysis: Global Higher Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ELPA 887 – DIVERSITY AND INEQUALITY IN HIGHER EDUCATION**

3 credits.

Survey of equity issues related to higher education access, admissions, transitions, persistence, and success. Focuses on the role of inequities across categories such as race, class, sex, gender, sexual orientation, language, nationality, or religion in higher education alongside considerations as to how researchers and practitioners can better communicate with one another about diversity issues.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ELPA 888 – ASSESSMENT IN HIGHER EDUCATION**

3 credits.

An overview of the key concepts, tools, and practices of assessment in academic and student services settings. A theoretical and practical basis for choosing, designing and using assessment and evaluation tools will also be provided.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ELPA 890 – APPLIED RESEARCH IN EDUCATIONAL ADMINISTRATION**

3 credits.

Supervised research on topics in the administration of elementary and secondary education.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ELPA 900 – INTERNSHIP IN EDUCATIONAL ADMINISTRATION**

1-3 credits.

Internship completed in a school setting. Provides the opportunity to practice the application of knowledge gained in the academic program, examine administrative practice, and use reflection to improve practice.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage in opportunities wherein aspiring building leaders see the work of the school and its staff through the primary lens of social justice and equity.

Audience: Graduate

2. Analyze and reflect on the direct application in practice of the principles of social justice gained through the course work in the Master's Degree in Social Justice Leadership Program.

Audience: Graduate

3. Complete the requirements of the Internship and field experiences in order to gain experience and understanding of the school principal.

Audience: Graduate

4. Understand and begin to develop fundamental leadership skills as a future school leader.

Audience: Graduate

5. Share and discuss experiences as both an observer and practitioner of equity-based leadership.

Audience: Graduate

6. Complete the activities, summaries, and reflections in the Field Experience Journal.

Audience: Graduate

**ELPA 910 – SEMINAR IN EDUCATIONAL LAW**

3 credits.

Interpretation and critique of legal authority impacting education. Topics may include education and religion, students' rights, teachers' rights, and federal involvement in education.

**Requisites:** ELPA 840 or 841

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ELPA 911 – AUTHENTIC PEDAGOGY AND ACHIEVEMENT**

3 credits.

Concentrates on a specific formulation of authentic intellectual work that has a compelling research base. Critical analysis of some of the roots of authentic pedagogy, its research base, its connections to other formulations (critical pedagogy, culturally relevant pedagogy), as well as theoretical perspectives and empirical studies on pedagogy's role in the reproduction of inequality and its possibilities for social justice. Read seminal works on pedagogy and assessment, in the sociology of education, and in critical/post-structural theory applied to teaching, and relate them to both current assessment practices/policies and education leadership.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2023**Learning Outcomes:** 1. Identify and apply knowledge, understanding and skills of instructional leadership to enhance teachers' capacity in K-12 schools for equity and excellence in student learning.

Audience: Graduate

2. Demonstrate doctoral-level inquiry skills related to the theoretical and empirical literature on pedagogy and equitable student achievement.

Audience: Graduate

3. Analyze seminal works on pedagogy and assessment, the sociology of education, and critical/post-structural theory applied to teaching, and communicate in written and oral work how their analysis applies to both current assessment practices/policies and education leadership.

Audience: Graduate

**ELPA 940 – SPECIAL TOPICS SEMINAR IN EDUCATIONAL LEADERSHIP**

1-3 credits.

Research on and/or discussion of selected topics in educational leadership and policy analysis.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ELPA 960 – SEMINAR IN EDUCATIONAL FINANCE**

3 credits.

Problems of financing education; school financial management; and related research.

**Requisites:** ELPA 832**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**ELPA 961 – CRITICAL ISSUES IN EDUCATIONAL POLICY**

3 credits.

Orients contemporary policy issues in education by connecting education policy to rigorous research evidence, using a theoretically motivated and disciplinary-based approach to understand educational policies, processes, and outcomes. Considers current efforts to "translate" key research findings to practitioners, policymakers, and laypersons in schools and communities, where the results can help improve educational practice and results. Discusses how research evidence from a range of disciplines - including psychology, sociology, social work, and economics - has been, is being, and could be applied to educational practice and education policy.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and summarize how American education policy has (or has not) evolved over the past 50 years.

Audience: Graduate

2. Demonstrate knowledge about the significance (or lack thereof) of research evidence in developing American education policy practice by writing a paper summarizing current evidence on a policy or practice and how that evidence has or has not inspired practical changes in the schools.

Audience: Graduate

3. Demonstrate knowledge, through class participation and preparation of a final paper, of how rigorous research evidence can inform policy and practice.

Audience: Graduate

4. Articulate, through class participation and preparation of a final paper, how research evidence can be effectively "translated" to impact policy and practice.

Audience: Graduate

**ELPA 990 – RESEARCH OR THESIS**

1-12 credits.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ELPA 999 – INDEPENDENT READING**

1-3 credits.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

## EDUCATIONAL POLICY STUDIES (ED POL)

### ED POL/HISTORY 107 – THE HISTORY OF THE UNIVERSITY IN THE WEST

3 credits.

Traces the development of higher education and, specifically, the institution known as the "university," in the United States and Europe since the Middle Ages. Concentrates on the intellectual, political, and social history of higher education, focusing particularly on the history of the "university" as an IDEA, an INSTITUTION, and as a community of PEOPLE, including students and faculty.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate your knowledge and explain—in essays, exams, and online and face-to-face discussions—the significance of key actors, events, themes, and ideas relating to the history of American education.

Audience: Undergraduate

2. Interpret and contextualize a range of primary historical sources.

Audience: Undergraduate

3. Identify and evaluate historical arguments in secondary scholarly works.

Audience: Undergraduate

4. Develop and support your own historical interpretations based on primary and secondary sources.

Audience: Undergraduate

5. Engage in open and respectful dialogue while reflecting upon and acknowledging your own biases.

Audience: Undergraduate

6. Connect your academic work to contemporary public debates, to consider diverse perspectives, and to develop, revise, and support your own ideas about the world.

Audience: Undergraduate

### ED POL 112 – GLOBAL EDUCATION THROUGH FILM

3 credits.

Introduces global educational issues, policies, and practices through films. Considers education in context, thinking critically about the role of education in the world. Compares across issues, places, policies, and practices. Examines the diversity of global educational spaces and practices, both in and out the classroom, and the purposes of education in society, including how political socialization, economic development, social mobility, and social solidarity are often in conflict.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the diversity of education and educational practices, in and beyond formal classroom spaces, and in different parts of the world.

Audience: Undergraduate

2. Demonstrate an understanding of education as it shapes and is shaped by social, cultural, and historical contexts and relationships (indigeneity, community, race, gender, religion, geography, poverty, class, etc.).

Audience: Undergraduate

3. Compare their own educational experiences and aspirations to educational processes and practices in other spaces, places, and times.

Audience: Undergraduate

4. Employ various approaches to interpreting film.

Audience: Undergraduate

5. Demonstrate an appreciation of the complexities of the interpretative process within historical and cultural contexts.

Audience: Undergraduate

6. Apply critical approaches to the works and alternative ways of considering them.

Audience: Undergraduate

**ED POL 123 – EDUCATION, TECHNOLOGY, AND SOCIETY: AI, BIG DATA, AND THE DIGITAL DIVIDE**

3 credits.

Introduction to the relationship between education, technology, and society. Consider issues related to educational technology and society in both domestic and global contexts. Critically examine how different types of educational technology interact with a variety of sociopolitical factors viewed through various stakeholder perspectives.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe the historical development of modern technology use in K12 and higher education

Audience: Undergraduate

2. Explain how core technologies have shaped K12 and higher educational systems

Audience: Undergraduate

3. Debate the role of specific types of technologies in the context of higher education and/or K12 education

Audience: Undergraduate

4. Analyze sociopolitical forces that govern adoption and use of emerging trends in educational technology

Audience: Undergraduate

5. Propose solutions for sociopolitical issues that arise from the use of educational technology in K12 and higher education

Audience: Undergraduate

**ED POL 134 – MEDIA LITERACY AND MISINFORMATION IN EDUCATION**

3 credits.

Examines claims in education stories, the various forms of bias that surround them, and how our changing media landscape impacts what stories are told, who tells them and how they impact education policy and practice.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Compare the concepts of individual, structural, and institutional bias and how these biases shape and have shaped stories in media and scholarship on the topic of education

Audience: Undergraduate

2. Analyze texts related to education for message, audience, and intention

Audience: Undergraduate

3. Compare how data and truth are presented in education stories and how information about education is deployed in media

Audience: Undergraduate

4. Relate digital citizenship and information literacy to the practice of democracy as it pertains to education

Audience: Undergraduate

5. Demonstrate improved summarizing, synthesizing, and analytical skills in academic speaking and writing across a range of writing genres

Audience: Undergraduate

**ED POL 140 – INTRODUCTION TO EDUCATION**

3 credits.

An introduction to fundamental educational questions, concepts, perspectives and ideas, designed to enable thoughtful examination and assessment of proposed and existing educational policies and practices.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify various perspectives on the purposes of education

Audience: Undergraduate

2. Describe how communities over time and around the world understand education

Audience: Undergraduate

3. Analyze the impact of poverty, race, gender, and socio-economic status on children globally

Audience: Undergraduate

4. Explicate the relationship between schooling and other life outcomes.

Audience: Undergraduate

**ED POL/HISTORY 143 – HISTORY OF RACE AND INEQUALITY IN URBAN AMERICA**

3 credits.

Examine the historical relationships between metropolitan change, economic transformation, and the construction of race and how those processes have shaped mass incarceration, educational, housing, and income inequality, and the experiences of racial/ethnic minorities who have been marginalized or discriminated against. Key questions include: What is the historical nature of inequality and opportunity in metropolitan America? What policies and ideas have historically promoted inequality, and how have those policies and ideas shifted over time? How have marginalized people responded to inequality, and what impacts have various modes of resistance had? Lastly, what is "race," how has its meaning changed over time, and how has it historically shaped inequality and opportunity?

**Requisites:** None

**Course Designation:** Gen Ed – Communication Part B

Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate their awareness of History's Impact on the Present

Audience: Undergraduate

2. Recognize and Question Assumptions

Audience: Undergraduate

3. Demonstrate their consciousness of Self and Others

Audience: Undergraduate

4. Demonstrate their capacity for Effective Participation in a Multicultural Society

Audience: Undergraduate

5. Identify and discuss the significance of key actors, events, themes, and ideas relating to the history of race and inequality in the metropolitan United States

Audience: Undergraduate

6. Identify and evaluate historical arguments in secondary scholarly works

Audience: Undergraduate

7. Interpret, analyze, and contextualize primary historical sources

Audience: Undergraduate

8. Use library resources in order to locate relevant primary and secondary source materials

Audience: Undergraduate

9. Synthesize information from primary and secondary sources in order to develop and support their own evidence-based historical interpretations

Audience: Undergraduate

**ED POL 145 – INTRODUCTION TO EDUCATION POLICY**

3 credits.

Introduction to K-12 education policy, policy processes, and school governance in the United States. Examines the multiple and sometimes conflicting goals that animate education debates; the discourses and representations of schools, students, and education policies that shape policy and politics; research on education and education policy; and the various lenses and conceptual tools that can help us understand education policy. Includes original policy texts, empirical and conceptual research, current events, and film. Considers how key themes may be useful (or not) for thinking about early childhood education, higher education, and K-12 education in historical and contemporary, US and and global, contexts.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically analyze the multiple purposes, complex governance and politics, contested discourses, and major problems and policies in education.

Audience: Undergraduate

2. Demonstrate familiarity with and ability to discern between competing perspectives on education policy.

Audience: Undergraduate

3. Apply concepts and knowledge from the course to analyzing new policies, reform proposals, and current events

Audience: Undergraduate

4. Utilize the skills developed in this class, combined with values and experiences, to develop and defend policy positions.

Audience: Undergraduate

**ED POL 147 – ETHICS AND EDUCATION**

3 credits.

Examines a variety of ethical questions in education, including: What justifies educating people, in the first place? What does equity in education require? Who has the proper authority to make decisions about education? Introduces analytic tools that educational ethicists use to investigate foundational and applied questions. Understand and evaluate major views on a range of such foundational and applied issues in educational ethics.

**Requisites:** None**Course Designation:** Gen Ed - Communication Part B

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Define the ethical and political context of formal and/or informal education in the US and/or in a global context—that is, how considerations of ethics and justice bear on educational policy and practice

Audience: Undergraduate

2. Relate educational justice to broader conceptions and theories of social justice, both in the liberal tradition and its critics, and to issues of contemporary controversy in educational theory and practice

Audience: Undergraduate

3. Describe how various kinds of educational inequalities are unjust and why

Audience: Undergraduate

4. Formulate and communicate research-based arguments on topics in ethics and education.

Audience: Undergraduate

5. Use library resources in order to locate relevant academic source materials.

Audience: Undergraduate

6. Synthesize and articulate ethical questions in education, and improve written and oral communication of such questions to public audiences

Audience: Undergraduate

**ED POL 150 – EDUCATION AND PUBLIC POLICY**

1-3 credits.

Examines a variety of topics related to educational policies, practices, and issues in social, cultural, historical, and political economic contexts in the U.S. and around the world.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define the social, cultural, and/or historical context surrounding formal and/or informal education in the US and/or in a global context.

Audience: Undergraduate

2. Relate educational policy in a national and/or global context.

Audience: Undergraduate

3. Examine the causes and consequences of educational inequality related to race, class, gender, and/or other dimensions.

Audience: Undergraduate

**ED POL/GEN&WS 160 – GENDER, SEXUALITY, AND EDUCATION POLICY**

3 credits.

Explores how gender, sexuality, and gender identity are conceptualized, practiced, protected, and policed in K-12 schools and in out-of-school contexts in the United States and globally. Examines how gender, sexuality, and gender identity intersect with race, class, language, nationality, and religion to shape the experiences of school-age children and youth.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain how gender, sexuality, and gender identity, as separate and intersected identities, have become situated as normal, natural, and static concepts, and the role that schooling plays in those processes

Audience: Undergraduate

2. Identify and summarize how students are racialized and gendered within educational settings and by educational policies and practices, and how class, religion, language, national status, and other factors intersect with gender, sexuality, and gender identity to shape different educational outcomes and experiences for students

Audience: Undergraduate

3. Analyze the effects of an intersectional approach to understanding gender, sexuality, and gender identity within students' educational experiences, in the US and globally

Audience: Undergraduate

**ED POL 180 – EDUCATION AND WHITE SUPREMACY**

3 credits.

Provides an overview of the construction of racialized identity in the US and around the world. Examines the relationship between race, ethnicity, and white supremacy as social constructions and connects this to historical and current models of schooling. Explores the concept of settler colonialism and introduces its history in the US and in Wisconsin. Fosters understanding of white supremacy and of formal schooling as national systems that often work to reinforce one another, and of alternative approaches to schooling and society that can foster equity and justice.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Become familiar with the histories and current lives of people who are considered racial, ethnic, religious, linguistic, geographic, cultural, etc. minorities; and in so doing, demonstrate self-awareness and empathy towards the cultural perspectives and experiences of minoritized people.

Audience: Undergraduate

2. Understand the historical underpinnings of white supremacy, colonialism, and racism, and how these concepts shape past and present racialized knowledge claims and cultural assumptions, and shape present-day schooling in the U.S. and around the world.

Audience: Undergraduate

3. Interrogate the question of how to respond effectively to dismantling white supremacy, particularly in schools.

Audience: Undergraduate

**ED POL 197 – LISTENING TO THE LAND**

3 credits.

What if our best teacher is all around us, even under our feet? For Indigenous peoples, whose worldviews, languages, and lifeways emerge from, and sustain, reciprocal relations to place, land is always teaching. Reflect on "land as first teacher" by considering Indigenous approaches to learning, Indigenous languages in relation to land, and the current environmental health of land. Seeks to live the principles of Indigenous learning through Indigenous foodways and experiential, place-based learning activities. Together, develop a personal relationship to Teejop (Four Lakes, or the Madison region), and explore generational responsibilities to Teejop. What does the land teach? And how do people learn to listen?

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Create relationships with each other, instructors, and the land

Audience: Undergraduate

2. Understand how indigenous peoples value knowledge and how you, as a student, can ask for and seek knowledge

Audience: Undergraduate

3. Begin your own personal relationship - mentally, emotionally, physically, spiritually - with Teejop, and to see (and feel) the importance of this place beyond the classrooms and buildings

Audience: Undergraduate

4. Critically analyze settler colonialism in higher education, including the cultural norms that it promulgates

Audience: Undergraduate

5. Demonstrate an understanding of the history, culture, and perspectives of Native American Nations in the Upper Midwest in relation to place and education; and the particular historical and present-day impacts of settler colonialism on US-tribal relations and the racialization of indigenous people

Audience: Undergraduate

6. Research, analyze, discuss, reflect, and present on the history and use of a particular plant or animal. In doing so, demonstrate self-awareness and empathy towards human and non-human people

Audience: Undergraduate

7. Reflect on and synthesize hands on learning activities and share with others

Audience: Undergraduate

8. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of settler colonialism

Audience: Undergraduate

9. Explain the social, economic, and environmental dimensions of the sustainability challenges of settler colonialism and its undermining of tribal communities' sovereignty

Audience: Undergraduate

10. Use sustainability principles for developing personal goals and professional values.

**ED POL 200 – RACE, ETHNICITY, AND INEQUALITY IN AMERICAN EDUCATION**

3 credits.

Explores the complex relationships among race, ethnicity and inequality in U.S. public education through theoretical, historical, social, and cultural frameworks and perspectives. Specifically, examine how schools serve as sites where racial/ethnic inequality is produced, reproduced, and resisted through institutional structures and the "everyday" practices of teachers, students, parents, and community members. Examine how race and ethnicity intersect with other identities (e.g. gender, social class, sexual orientation, etc.). It is centrally focused on K-12 education and working in multicultural contexts.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate an understanding of the relationship between race, ethnicity, and inequality in U.S. public education

Audience: Undergraduate

2. Critically analyze and contextualize U.S. public educational policies through theoretical, historical, social, and cultural frameworks and perspectives

Audience: Undergraduate

3. Analyze education policies using diverse perspectives related to race, ethnicity, gender, social class, and/or other social differences

Audience: Undergraduate

**ED POL 202 – CAREERS IN EDUCATION**

3 credits.

Explores the meaning, value, and potential of an education/social sciences major for a variety of education-related careers in the contemporary workplace. Includes a review of theories of the relationships among education, work, skills and society, analyses of contextual forces shaping education and the labor market (the Covid-19 pandemic, inequality and racism, and climate change), individual and collaborative assignments focused on developing key competencies (e.g., oral and written communication, critical thinking), and hands-on activities to provide practical tools for succeeding in college and the 21st century workplace (e.g., writing a cover letter, conducting literature reviews).

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed – Communication Part B

Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand basic concepts of career development theory and apply them to your own academic and career goals;

Audience: Undergraduate

2. Understand, evaluate, and communicate social science concepts about the nature of work in contemporary society, with respect to the role of educational credentials, skills and salient contextual forces; and,  
Audience: Undergraduate

3. Synthesize information about three key contextual forces impacting society;  
Audience: Undergraduate

4. Learn about the specific jobs and occupations that are available for someone with an education and/or social sciences degree;  
Audience: Undergraduate

5. Investigate and learn about a specific “career community” or occupational sector, an organization within that sector, and what it would take to be competitive for a job in that organization;  
Audience: Undergraduate

6. Develop and communicate a compelling personal career narrative about the student’s path through an undergraduate education and beyond, with respect to a specific target career community  
Audience: Undergraduate

7. Understand key steps in the job-search process, and begin establishing a professional online presence and professional contacts.  
Audience: Undergraduate

8. Develop and sharpen oral and written communication skills via presentations, discussion (in-person and online), and report and paper writing.  
Audience: Undergraduate

9. Develop and sharpen skills in conducting technical academic research and writing that includes collecting and summarizing information, preparing outlines, and writing and revising manuscripts.  
Audience: Undergraduate

**ED POL 203 – INTERNSHIP IN EDUCATION, ARTS, OR HEALTH**

1-3 credits.

Provides the opportunity to reflect and critically analyze workplace experience in the field of education, arts, and/or health and enhance career opportunities through the exposure to the nexus of career development theory and practice.

**Requisites:** None

**Course Designation:** Workplace – Workplace Experience Course

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Improve skills relevant to exploring, preparing for, and experiencing opportunities in the fields of education, art, or health including develop resume, conduct an informational interview, communicate unique skills and qualities to an employer.

Audience: Undergraduate

2. Learn about and reflect on workplace expectations, norms, and skills  
Audience: Undergraduate

3. Understand the work and future progression of a particular career pathway  
Audience: Undergraduate

4. Through facilitated reflection, develop a career action plan to apply what is learned in the internship to future career goals  
Audience: Undergraduate

**ED POL 205 – LANGUAGE AND SOCIAL INEQUALITY**

3 credits.

Examine cultural and language politics, policies, and practices in education. Read in the fields of anthropology, sociolinguistics, and language policy to consider how language policies, politics, and practices either reinforce or reduce educational and social inequality.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Consider how language policies, practices, and pedagogies contribute to or interrupt inequality in their own lives, on campus, and in local communities.

Audience: Undergraduate

2. Analyze how linguistic inequality is often reinforced but can be addressed more equitably through education.

Audience: Undergraduate

3. Compare language policies and their impact on equity efforts across a range of locations.

Audience: Undergraduate

4. Learn about key concepts in the study of language, culture, and social inequality.

Audience: Undergraduate

5. Analyze how language constructs inequalities in texts, media and everyday interactions.

Audience: Undergraduate

6. Develop academic speaking and writing skills

Audience: Undergraduate

**ED POL 209 – INTRODUCTION TO QUANTITATIVE METHODS IN EDUCATION POLICY**

3 credits.

Introduction to how quantitative inference is used in education policy. Focuses on the use of quantitative reasoning as a tool to analyze and interpret data. Activities support understanding the basics of generating and interpreting data in both visual and numerical form. Includes a practical component that provides opportunities to practice interpreting and writing about data.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement**Course Designation:** Gen Ed – Quantitative Reasoning Part B

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply quantitative reasoning to educational topics

Audience: Undergraduate

2. Explain how inferences are made using quantitative data in educational contexts

Audience: Undergraduate

3. Interpret data in popular press and research articles

Audience: Undergraduate

4. Produce and interpret education policy questions using data

Audience: Undergraduate

**ED POL 210 – YOUTH, EDUCATION, AND SOCIETY**

3 credits.

Explores the study of youth through theoretical, historical, social, and cultural perspectives with a focus on Minoritized Youth; interrogates the concept of "youth" as a socially constructed category; examines how "youth" have been positioned within educational, political, economic, and social contexts; analyzes how youth's racialized experiences intersect with other social identities: social class, gender, and sexuality. Themes explored: conceptions of youth as a social category, education and schooling, race, gender, sexuality, politics and activism, community-based learning, criminal justice, media, and popular culture. Uses historical and contemporary "texts" and current events to study the lived experiences of young people within diverse racial, cultural, gendered, sexualized and classed contexts. Reflect on own experiences as "youth," their relationship to education and other social institutions, and how it informs understanding of society, educational theory and practice.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify how the category of "youth" is conceptualized over space and time  
Audience: Undergraduate

2. Analyze issues, ideas and concepts central to understanding the social and political factors that shape youth's experience and educational outcomes in the US – and how these experiences vary across race, ethnicity, class, gender, sexuality and context.  
Audience: Undergraduate

3. Apply critical thinking skills to myriad significant racial and socio-cultural issues in and around educational communities for youth of color in marginalized contexts  
Audience: Undergraduate

4. Deconstruct the framing of youth within education, research, media, and popular discourses  
Audience: Undergraduate

5. Contextualize personal beliefs and understanding of social forces (i.e. race, class, gender, sexuality, power, etc.) and how these beliefs shape their own social identities  
Audience: Undergraduate

6. Develop an awareness of the worldviews of others and the varied realities of youths' educational and social experiences  
Audience: Undergraduate

7. Engage in/and think critically about political and social events that impact the lives of young people as it relates to the current moment (social movements, youth uprisings, campus conflict/climate, etc.)  
Audience: Undergraduate

**ED POL 212 – EDUCATION FOR SOCIAL JUSTICE**

3 credits.

Learn theories and practices of educating for social justice, a pedagogical-political approach based on participatory methodologies that is committed to positive social change. Discuss popular education, peace and human rights education, critical pedagogy, and related approaches. Engage in theoretical debates, focusing on the ideas of transformative educators such as Paulo Freire and bell hooks, and learn about radical educator collectives and transformative education efforts in districts, schools, classrooms, community associations, and NGOs from around the world.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define and consider social justice fully  
Audience: Undergraduate

2. Explore politically engaged education efforts  
Audience: Undergraduate

3. Examine contemporary theories that orient praxis in popular education, social justice education, and participatory action research  
Audience: Undergraduate

4. Make links between theory and practice, including through reflection on their own experiences  
Audience: Undergraduate

5. Improve critical reading, research, oral presentation, and academic literacy skills  
Audience: Undergraduate

**ED POL 215 – DISABILITY AND EDUCATION POLICY**

3 credits.

Examines how policies shape the educational experiences of students with disabilities in education and the broader educational landscape.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe how constructions of dis/ability inform the content and enactment of education policy  
Audience: Undergraduate

2. Identify the sociopolitical forces and actors grounding present iterations of disability-focused education policy  
Audience: Undergraduate

3. Explain how education policies intersect to shape the schooling experiences of students with disabilities  
Audience: Undergraduate

**ED POL/INTL ST 220 – HUMAN RIGHTS AND EDUCATION**

3 credits.

Explores questions related to human rights and education, from the individual to the global level; from the abstract to the practical: What does it mean to be human? How do we learn to be human? What rights mark a human being? Do all human have rights? If they have a right to education, do they have a right to a particular kind of education? Can one global education and human rights model best meet the needs of our incredibly diverse global population? Can the global human rights framework improve current educational, national, social, and economic inequities? How so? How does education as a human right relate to human rights education? and who should decide the answers to these questions, and how? Investigates the tensions and boundaries of the human rights framework to reduce social inequality through methodological inquiries in educational case studies, including: educational inequality; victims of the war on drugs; working children's rights; and climate change.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Develop awareness of the diversity of historical, political-economic, social and cultural meanings of 'human,' including the ethical imperatives and the exclusionary practices underlying them.

Audience: Undergraduate

2. Be familiar with global Human Rights frameworks and institutions, and develop a critical appreciation of their potential as well as limitations in particular sociocultural contexts.

Audience: Undergraduate

3. Develop a critical understanding of educational experiences in terms of Human Rights.

Audience: Undergraduate

4. Read and produce academic texts; more specifically: summaries, personal narratives, expository texts, and persuasive papers.

Audience: Undergraduate

**ED POL 222 – INDIGENOUS EDUCATION POLICY AND PRACTICE**

3 credits.

Examines concepts of sovereignty and educational policy formation for First Nations Peoples in the U.S. and key educational policies, practices, and contexts that have shaped American Indian education. Explores the 11 federally recognized tribes of Wisconsin, their sovereignty, and educational issues facing them and other tribal nations. Examines Wisconsin's Act 31, the contexts leading up to its creation, and its implementation. Considers the educational policy implications of state curriculum policy and common instructional materials for First Nations Peoples, land-grant universities, and broader society.

**Requisites:** None**Course Designation:** Breadth – Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe Wisconsin's educational policy, "Act 31," as codified in statute and rule, and its creation and enactment in K-12 schools.

Audience: Undergraduate

2. Analyze complex historical, legal, and policy issues pertaining to the formation of educational policy for First Nations Peoples in the U.S, including the roles that treaties play in the formation of educational policy.

Audience: Undergraduate

3. Describe the history of Wisconsin state interference with the exercise of usufructuary rights and the Ojibwe Peoples' efforts to have them restored.

Audience: Undergraduate

4. Examine the role that curriculum policy has played in shaping public understanding of Native Peoples and contemporary issues.

Audience: Undergraduate

5. Describe how stereotypes create educational inequalities in K-12 and higher education settings and their implications for First Nations Peoples and broader society.

Audience: Undergraduate

6. Evaluate instructional materials regarding Native Peoples in K-12 settings, both historical and current.

Audience: Undergraduate

**ED POL 237 – WEALTH, POVERTY AND INEQUALITY:  
TRANSNATIONAL PERSPECTIVES ON POLICY AND PRACTICE IN  
EDUCATION**

3 credits.

Examines poverty, inequality, and education from a theoretical, historical, and practical perspective through an introduction to historical and contemporary debates on wealth, poverty, and inequality. Interrogates these debates in relation to policies, practice, and institutions of education.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the social, cultural, and/or historical contexts of education policy, particularly as it is related to poverty and inequality.

Audience: Undergraduate

2. Evaluate educational policies related to poverty and inequality from multiple theoretical perspectives (e.g., historical, ethical/philosophical, economic/political, etc.).

Audience: Undergraduate

3. Analyze education policy issues related to poverty and inequality from diverse perspectives related to race, class, and/or gender, and other forms of social difference.

Audience: Undergraduate

4. Recognize and apply principles of socially responsible and ethical research.

Audience: Undergraduate

**ED POL 240 – COMPARATIVE EDUCATION**

3 credits.

Examines the socio-cultural, political and economic forces that shape education around the world, including in the U.S. Explores a series of essential questions about the means and ends of education, including: the purposes of schooling in different locations; the role of schooling in producing inequality or supporting social change, particularly in relation to class, race, gender, migration, language, and abilities; global educational reform; global educational assessments; curriculum and pedagogy; and teacher education.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the various norms, perspectives, traditions, structures, and purposes of education around the world.

Audience: Undergraduate

2. Examine the impact of socio-economic status, race, gender, migration status, language, and ability on students in various regions of the world

Audience: Undergraduate

3. Evaluate global educational reforms

Audience: Undergraduate

4. Analyze a variety of arguments and policies to improve educational quality and access

Audience: Undergraduate

**ED POL 245 – EDUCATION IN EAST ASIA**

3 credits.

An overview and discussion on the values, histories, systems, policies, problems, and reforms of education in East Asian societies. Examines extended issues in comparative education, including education and its relation to economic development, social inequality and stratification, gender and family, ethnicity and migration, identity formation, and student movements.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate knowledge of the history of education and current education systems in East Asian societies.

Audience: Undergraduate

2. Define and compare the social, cultural, and historical context surrounding formal and informal education in East Asian societies.

Audience: Undergraduate

3. Critically examine the causes and consequences of educational inequality and stratification related to race, class, gender, and other dimensions in East Asian societies.

Audience: Undergraduate

4. Relate education systems, policies, problems, and reforms in East Asian societies in a national and global context.

Audience: Undergraduate

5. Develop skills in critical reading, the use of appropriate style and disciplinary convention and the productive use of core library resources.

Audience: Undergraduate

**ED POL/CURRIC/LEGAL ST 250 – INCARCERATION AND EDUCATION**

3 credits.

Investigates how the systems of incarceration and education operate alongside, within, around and through one another. Provides a historical examination of how education and incarceration have interacted. Examines how prisons operate as 'teaching institutions,' what it teaches all of us impacted by it, and what interventions have been designed to facilitate particular kinds of learning. Presents firsthand accounts of those who work and live in the carceral system currently.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Analyze the relationship between schooling and incarceration including issues related to discipline, gender, and disability

Audience: Undergraduate

2. Articulate and evaluate your understanding of experiences of incarceration including the sources, assumptions, and implications behind your understanding

Audience: Undergraduate

3. Synthesize the lived experiences of diverse individuals impacted by incarceration to understand the range of forms learning takes place inside carceral facilities;

Audience: Undergraduate

4. Evaluate different policies and practices that operate at the intersections of education and incarceration.

Audience: Undergraduate

## ED POL 260 – INTRODUCTION TO INTERNATIONAL EDUCATION DEVELOPMENT

3 credits.

Examines theories, institutions, and issues in international educational development.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the economic, social, cultural, and political dimensions of educational development.

Audience: Undergraduate

2. Critically compare and contrast theoretical approaches that have shaped international educational development.

Audience: Undergraduate

3. Describe current issues in international educational development

Audience: Undergraduate

4. Identify and compare the assumptions, benefits, and limitations of different educational policy and planning approaches.

Audience: Undergraduate

5. Discuss and critique prevailing assumptions about education and development.

Audience: Undergraduate

6. Demonstrate critical thinking skills as well as academic speaking and writing skills.

Audience: Undergraduate

## ED POL 274 – EDUCATION STUDIES--STUDY ABROAD/GLOBAL EDUCATION

1-3 credits.

Topics vary reflecting the specializations, expertise, and curricula of study-abroad programs.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Gain a deeper knowledge and understanding of other cultures and their environments.

Audience: Undergraduate

2. Develop greater cultural self-awareness and intercultural competence.

Audience: Undergraduate

3. Develop different economic, political, social, and educational perspectives on global issues.

Audience: Undergraduate

4. Increase their capacity to analyze issues with appreciation for disparate viewpoints

Audience: Undergraduate

5. Develop career readiness and gain leadership skills that are relevant for a global world.

Audience: Undergraduate

6. Communicate appropriately and effectively with diverse individuals and groups.

Audience: Undergraduate

7. Examine their own actions in terms of personal responsibility and ethical, social and environmental consequences.

Audience: Undergraduate

8. Develop a better understanding of the diversity of the host society and better understand the diversity in their own society.

Audience: Undergraduate

**ED POL 300 – SCHOOL AND SOCIETY**

3 credits.

Focuses on the interplay between schools and society by examining societal and cultural influences on school processes, policies, practices, and pedagogy; or, how society shapes schooling, and conversely, the ways in which schools assist in shaping society. Reflect on the purposes of schools and how these purposes have shifted over time. Examines how assumptions regarding the purposes of schooling interact with debates over how we teach, what we teach, and how we evaluate schools, teachers, and students. Identify the foundations of education in the United States and critically examine the ways in which educational practices and policies impact the lives of students.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate an understanding of the social, cultural, and/or historical contexts of education policy.

Audience: Undergraduate

2. Analyze education policy from multiple theoretical perspectives (e.g., historical, ethical/philosophical, economic/political, etc.).

Audience: Undergraduate

3. Demonstrate analysis on education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference.

Audience: Undergraduate

4. Recognize and apply principles of socially responsible and ethical research.

Audience: Undergraduate

**ED POL 305 – DEMOCRACY AND EDUCATION**

3 credits.

Explores both the form(s) of education in democracies and the controversies that shape education in the contemporary U.S. context. Examines the history of elements of mass schooling in the U.S., analyzes the competing values at play in contemporary issues, and explores some of the human stories behind some of the most enduring problems in U.S. education. Discusses the necessity of education for democratic life, the challenges inherent in mass schooling in the U.S., and the varying positions that animate contemporary educational debates. Evaluates a variety of educational issues on the basis of democratic criteria such as equality, liberty, and justice.

**Requisites:** None**Course Designation:** Gen Ed - Communication Part B

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Describe the unique relationship between democratic government and education

Audience: Undergraduate

2. Describe the values and perspectives inherent in opposing positions in controversies about education in America

Audience: Undergraduate

3. Utilize evidence to evaluate opposing positions using common democratic values as criteria

Audience: Undergraduate

4. Synthesize and articulate personal views, and improve written and oral communication of such views to public audiences

Audience: Undergraduate

**ED POL 308 – INTRODUCTION TO QUALITATIVE RESEARCH METHODS IN EDUCATION**

3 credits.

Examines qualitative research methods for educational research – specifically, the role of theory, how to develop a research question, how to design a study, interviewing, conducting observations, doing initial data analysis, and presenting an original qualitative research project. Complete a series of "stepping stone" assignments (practica) and peer feedback activities designed to scaffold the research experience in an organized, supportive, informed, and meaningful way.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Understand how ontology and epistemology shape research design and methods

Audience: Undergraduate

2. Develop research questions appropriate to qualitative research

Audience: Undergraduate

3. Develop a conceptual framework

Audience: Undergraduate

4. Design and initiate a qualitative research project

Audience: Undergraduate

5. Practice research, including observations and interviews

Audience: Undergraduate

6. Give informed feedback on qualitative research projects

Audience: Undergraduate

7. Analyze qualitative data

Audience: Undergraduate

8. Exercise their academic skills in oral presentations and writing

Audience: Undergraduate

**ED POL 309 – APPLIED QUANTITATIVE EDUCATION RESEARCH**

3 credits.

Introduces how quantitative research methods are applied in empirical education research. Focused on data exploration, manipulation, visualization, and simple analyses with secondary datasets and R or other programming language.

**Requisites:** ED POL 209**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Apply basic quantitative research methods to education research

Audience: Undergraduate

2. Employ statistical software to import, manage, transform, visualize and analyze education data and research.

Audience: Undergraduate

3. Develop skills necessary to interpret secondary datasets in education research using appropriate quantitative methods.

Audience: Undergraduate

**ED POL/CHICLA 310 – LATINE STUDENTS IN THE U.S. HIGHER EDUCATION SYSTEM**

3 credits.

Develop a deeper understanding of U.S. higher education by examining connections between historical and present-day circumstances for a group of students often called the key to the sector's future. Latine students are the fastest growing population in postsecondary education today. Why did this growth happen? How has it impacted colleges and universities? How are Latine college students dealing with varying levels of institutional support? And what strengths do they bring to their education and future careers? By studying research from sociologists, historians, and education scholars, develop informed critiques of higher education and reimagine a better system for all.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Identify the major players in the U.S. higher education system, along with their relationships to one another.

Audience: Undergraduate

2. Summarize the development of this system - especially its early treatment of People of Color - and identify the historical roots of modern educational trends.

Audience: Undergraduate

3. Describe the strengths Latine students bring to their own educational trajectories and list their contributions to American colleges and universities.

Audience: Undergraduate

4. Apply social science theories and methods to understanding inequality in college enrollment, experiences, and outcomes for underrepresented minority students, especially Latines.

Audience: Undergraduate

5. Evaluate new ideas for improving the productivity, diversity, stability, and/or innovativeness of the higher education system.

Audience: Undergraduate

6. Assess and synthesize existing education research to formulate new arguments about the U.S. higher education system.

Audience: Undergraduate

7. Participate in informed and respectful conversations about higher education with a variety of people - taking into consideration the cultural perspectives and worldview of others.

Audience: Undergraduate

**ED POL 320 – CLIMATE CHANGE, SUSTAINABILITY, AND EDUCATION**

3 credits.

Provides an overview of diverse theories and models of human-earth relations, and the causes and consequences of climate and environmental crisis. Centering a global ecological justice lens, develops a critical approach to examining how different people around the world learn about and experience the climate crisis. Provides a range of tools to use in responding to the climate crisis, including learning about and engaging with Teejop and Traditional Ecological Knowledge frameworks, exploring how increased diversity can sustain human survival, and examining the concept of sustainability.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Social Science or Natural Science Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Develop an understanding of various conceptualizations of human-earth relations, and the consequences of these understandings on human actions and educational responses

Audience: Undergraduate

2. Utilize existing scientific evidence to recognize the shape and scope of anthropogenic climate change and its extensive impacts on human and planetary health.

Audience: Undergraduate

3. Examine educational and knowledge-generation approaches that appear to hold promise for a more sustaining global future.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of addressing climate change and justice through education.

Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenges of educating for sustainable development.

Audience: Undergraduate

6. Describe the social, economic, and environmental dimensions of climate change and environmental justice and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

**ED POL/INTL ST 335 – GLOBALIZATION AND EDUCATION**

3 credits.

Discuss the ways education is inextricably linked to global political, economic, and social contexts. Reflect on both scholarly research and popular conceptions of market, society and schools in different geographic and cultural contexts. Approach globalization from a context-sensitive, place-based approach, rather than abstract, predictive method through interdisciplinary analysis. Explore the concept of globalization across disciplinary frameworks including anthropology, geography, and history. Provides critical analysis to understand the challenges facing education in a globalization era, to build stronger commitment to helping address those challenges, and a set of skills for researching and writing about them. Examine the following "problem-spaces": globalization and migration; globalization and race; global testing and assessment; marketization of education; global city development and higher education; youth culture and globalization.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. demonstrate an understanding of the social, cultural, and/or historical contexts of education policy

Audience: Undergraduate

2. examine education policy from multiple theoretical perspectives (e.g., historical, ethical/philosophical, economic/political, etc.)

Audience: Undergraduate

3. analyze education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference

Audience: Undergraduate

4. Recognize and apply principles of socially responsible and ethical research

Audience: Undergraduate

**ED POL/CHICLA/LACIS 342 – EDUCATION ACROSS THE AMERICAS: EMPIRE, CAPITALISM, AND RESISTANCE**

3 credits.

Examines educational inequality across the Americas through the lens of imperialism, different forms of colonialism, and capitalism. By exploring the logics and actions of different education stakeholders, critically examine how educational policy across the hemisphere has a shared history of oppression and contestation.

**Requisites:** ED POL 300**Course Designation:** Gen Ed - Communication Part B

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Draw from different sources to evaluate the transnational contexts of education policy and pose relevant questions about hemispheric educational issues

Audience: Undergraduate

2. Use clear understandings of terms such as imperialism, colonialism, capitalism, racism, and transnationalism to explain unequal educational processes

Audience: Undergraduate

3. Formulate and communicate research-based arguments on topics in education policy using academic literature, including primary and secondary sources

Audience: Undergraduate

4. Produce expository and argumentative texts and draw from this work to produce a podcast

Audience: Undergraduate

**ED POL 345 – ECONOMICS OF EDUCATION**

3 credits.

Engages with contemporary issues in the economics of education across the K-12 and postsecondary policy arenas in the US and beyond. With foundations in human capital and the education production function, covers a wide variety of topics, including teacher labor markets and teacher quality, school choice, K-12 and higher education finance, and the individual and collective returns to education. Discuss, present, and critique education policy issues through the lens of economics and apply course content to current issues in education policy, including creation and dissemination of recommendations for education policy and practice.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Demonstrate a strong degree of economic literacy and articulate economic perspectives

Audience: Undergraduate

2. Discuss the production, costs, and financing of K-12 and higher education systems

Audience: Undergraduate

3. Describe economic aspects of teachers, teacher quality, and teacher labor markets;

Audience: Undergraduate

4. Differentiate broad K-12 and higher education markets, choices, and incentives through an economic lens

Audience: Undergraduate

5. Review, synthesize, and critique economic literature on a variety of education policy issues

Audience: Undergraduate

6. Practice critical reading, logical thinking, and use of evidence within the economics discipline

Audience: Undergraduate

7. Demonstrate skilled written and verbal communication on multiple points of view across topics

Audience: Undergraduate

8. Generate and communicate recommendations for policy and practice by synthesizing theory and contexts

Audience: Undergraduate

**ED POL 350 – TOPICS IN EDUCATION STUDIES**

3 credits.

Examines contemporary topics and debates in education studies; develops research, analytical, and other skills to work in education careers.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Formulate research-based arguments on topics in education using academic literature, including both primary and secondary sources

Audience: Undergraduate

2. Demonstrate an understanding of the social, cultural, and historical contexts of education policy and practice

Audience: Undergraduate

3. Examine education policy from multiple theoretical perspectives

Audience: Undergraduate

4. Examine different historical and social-science methods to answer major questions in education research, both contemporary and enduring

Audience: Undergraduate

5. Analyze education policy issues from diverse perspectives related to race, class, and gender, and other forms of social difference

Audience: Undergraduate

**ED POL 355 – THE POLITICS OF EDUCATION INJUSTICE IN THE US**

3 credits.

Public education in the United States is an inherently political site that offers an important institution to understand politics, power, and injustice broadly. Explore these themes from multiple angles: (a) the layered histories of injustice at the intersection of race, class, gender, and more in historical and present cases; (b) the power of ideas in shaping policy possibilities; (c) shifting levels of governance and questions of injustice; and (c) perspectives of key actors, interests, and stakeholders. Consider the politics of education in relation to broader social, spatial, historical, and political economic contexts. Develop critical analytic and conceptual tools to deeply understand and analyze how power and politics are impacting contemporary educational policy events. By drawing from grassroots and subjugated perspectives, cultivate a policy imagination towards more just educational possibilities, and explore the necessary policy infrastructure and movements to sustain them.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the historical development of the U.S. public education system in relationship to injustice at the intersection of race, class, gender, and other axes of inequality

Audience: Undergraduate

2. Critically analyze contemporary educational policy and politics through a justice lens based on foundational knowledge of the history of public education and theories of power and politics

Audience: Undergraduate

3. Evaluate how power and authority is distributed across various political institutions responsible for education policy decision-making, and how various actors work to create change in ways that expand and contract justice

Audience: Undergraduate

4. Develop analytic tools to identify how power and politics are impacting contemporary educational policy events that reflect critical engagement with the worldviews and experiences of others

Audience: Undergraduate

5. Reflect on personal experiences (as situated in broader contexts) and question knowledge claims related to injustice at the intersection of race, class, gender, and other axes of inequality

Audience: Undergraduate

6. Cultivate critical reasoning capacity to apply course concepts related to power, politics, and injustice to their lives outside the classroom and mobilize this capacity to respectfully participate in a multicultural society

Audience: Undergraduate

**ED POL 399 – INDEPENDENT READING**

1-3 credits.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ED POL/HISTORY 412 – HISTORY OF AMERICAN EDUCATION**

3 credits.

Examines the history of education in America from the colonization of North America to the present to consider education in its broadest sense - as a process of individual development and cultural transmission. Explores such topics as the rise of common schools in the urban North; the education of Native Americans, immigrants, slaves, and free blacks; the evolution of teacher training (primarily for women); various philosophies of "progressive" school reform; the politics of desegregation, bilingual education, and special education; the articulation between high school and college work; and the evolving federal role in American education.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. demonstrate their knowledge and explain the significance of key actors, events, themes, and ideas relating to the history of American education

Audience: Both Grad &amp; Undergrad

2. interpret and contextualize primary historical sources

Audience: Both Grad &amp; Undergrad

3. identify and evaluate historical arguments in secondary scholarly works

Audience: Both Grad &amp; Undergrad

4. locate, synthesize, and evaluate information from primary and/or secondary sources in order to develop and support their own evidence-based historical interpretations

Audience: Undergraduate

5. locate, synthesize, and evaluate relevant primary historical sources in order to construct evidence-based historical interpretations.

Audience: Graduate

**ED POL 423 – EDUCATION FOR GLOBAL CHANGE**

3 credits.

How do people conceptualize and utilize education to (attempt to) create individual, familial, community, institutional, national, and global change? Push collective understanding about the diverse ways that people have conceptualized change, its goals, and the mechanisms through which to produce change around the world. Explore a diverse range of educational approaches (including formal, informal, non-formal, and "traditional" educational models) to transforming the world. Draw on a range of disciplinary and sectoral approaches, including education, public health, and public policy; and a broad range of change models, including individual and peer behavior change, social marketing, social movements, chaos theory, and liberation theory.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Examine the diverse ways that people have conceptualized change and the educational mechanisms that drive it across disciplines, research methodologies, and epistemologies.

Audience: Undergraduate

2. Analyze how theories of change conceptualize human growth and development, national and international development, and global sustainability; and integrate new information about international development, education, and their own positionality into their existing frame of knowledge.

Audience: Both Grad &amp; Undergrad

3. Describe and analyze how different theories of change could be applied to key international development problems that require global educational solutions (e.g., HIV/AIDS and climate change); produce a final project that proposes a new international development education project to at least one group of stakeholders in international development arenas.

Audience: Both Grad &amp; Undergrad

4. Determine for themselves what theories of change most appeal to them and why; recognize the voice, resource, and power dynamics in each change approach; and decide how they might move their understanding of a theory of change into practicable action, in part through reflection on their sources, and in part through reflection on their own positionality.

Audience: Both Grad &amp; Undergrad

5. Synthesize and analyze information arising from multiple disciplinary, methodological, and epistemological literatures on theories of change, and situate international development education within these traditions.

Audience: Graduate

6. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of international development paradigms, and the sustainability challenges posed by current international development efforts.

Audience: Both Grad &amp; Undergrad

7. Analyze the causes of and solutions for the sustainability challenges of international development and international education.

Audience: Both Grad &amp; Undergrad

8. Describe the social, economic, political, and environmental dimensions of international development education efforts and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course.

**ED POL 435 – EDUCATION IN EMERGENCIES**

3 credits.

The United Nations High Commissioner for Refugees (UNHCR) estimates that more than 82.4 million individuals have been forcibly displaced from their homes. More than a third of them are refugees, and more than 13 million are under the age of 18. In contrast to the portrayals of children wandering among the iconic UNHCR white tents in refugee camps, new images of refugee boys and girls attending public schools raise questions about the role of humanitarianism and education across the world. What are the causes of forced migration? Who counts as a refugee today? What do camp refugees and urban refugees have in common? How do we guarantee access to school for these populations? What would a high-quality curriculum look like for these students?

**Requisites:** Sophomore standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and interrupt assumptions (including stereotypes and prejudices) about migrants, particularly refugees.

Audience: Both Grad &amp; Undergrad

2. Critically examine the links between the modern state, borders, security, and forced migration.

Audience: Undergraduate

3. Differentiate the foundations and evolution of the field of education in emergencies in relation to refugee issues and adopt a critical stance on refugee education.

Audience: Both Grad &amp; Undergrad

4. Analyze how educators in formal and nonformal settings can offer rich learning experiences to children and youth with refugee status.

Audience: Undergraduate

5. Exercise your academic skills in oral presentations and writing.

Audience: Undergraduate

6. Develop the conceptual tools to trace and follow conversations about the modern state, borders, security, and forced migration.

Audience: Graduate

7. Critically assess academic literature in the fields of refugee studies and education in emergencies.

Audience: Graduate

8. Draw from key concepts to analyze how educators in formal and nonformal settings shape the learning experiences of children and youth with refugee status.

Audience: Graduate

9. Write an argument-driven paper and exercise your academic skills in oral presentations.

Audience: Graduate

**ED POL 450 – RETHINKING "AFTER-SCHOOL" EDUCATION**

3 credits.

Provides an opportunity to engage with and discuss historical, ideological, and contemporary issues within community-based after school programs at large and within the Madison context. Examine the social and political context of after school programs to better understand the ways in which they have the potential to meet important needs.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate an understanding of the history of and the political and social influences on afterschool programs

Audience: Undergraduate

2. Identify types of community-based after school programs and key issues within them

Audience: Undergraduate

3. Identify the roles, challenges, and experiences of leaders, afterschool educators, youth workers, and diverse youth participants in community-based afterschool programs

Audience: Undergraduate

4. Analyze how afterschool programs relate to broader social forces and education discourses

Audience: Undergraduate

**ED POL 460 – IMMIGRATION, EDUCATION, AND EQUITY**

3 credits.

Examines policy issues surrounding the education of children from immigrant families in K-16 educational settings in the U.S. Explores the economic, social, political, and ideological contexts of immigration and education, as well as school factors and home-school relations through readings, discussions, and assignments. Considers the impact of various policy and pedagogical approaches. Course readings draw from relevant literature in educational anthropology, sociology of education, educational policy, sociolinguistics, and language pedagogy.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the economic, political, and social contexts of immigration in the US.

Audience: Undergraduate

2. Describe the scope, breadth and diversity of immigrant flows to the US and how they have changed over time in relation to immigration policy.

Audience: Undergraduate

3. Examine questions about educational quality and access, language and culture, immigration, educational policy, community and family engagement, and other topics pertinent to the education of immigrants in the US.

Audience: Undergraduate

4. Analyze the critical academic, linguistic, and social supports schools must provide to immigrant students, including an assets-based approach.

Audience: Undergraduate

### ED POL/HISTORY 478 – COMPARATIVE HISTORY OF CHILDHOOD AND ADOLESCENCE

3 credits.

Examines the growth of modern childhood and adolescent sub-cultures, class differences, literary and pictorial representations, legal and demographic developments, and the growth of educational theories and institutions.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Demonstrate their knowledge and explain the significance of key actors, events, themes, and ideas related to the history of childhood and adolescence

Audience: Both Grad & Undergrad

2. Interpret and contextualize primary historical sources

Audience: Both Grad & Undergrad

3. Identify and evaluate information from primary and/or secondary sources in order to develop and locate, synthesize, and evaluate information from primary and/or secondary sources in order to develop and support their own evidence-based historical interpretations

Audience: Undergraduate

4. Locate, synthesize, and evaluate primary historical sources in order to construct evidence-based historical interpretations

Audience: Graduate

### ED POL 500 – TOPICS ON SOCIAL ISSUES AND EDUCATION

3 credits.

Explore contemporary social issues or problems and their significance for educational purposes and practices. Designed for various special topics on social issues and education.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify contemporary social issues or problems and their significance for educational purposes and practices.

Audience: Both Grad & Undergrad

2. Critically analyze educational policies and social issues using various qualitative theories and methodologies.

Audience: Graduate

3. Demonstrate knowledge and reflective responses about specific social issues or problems discussed in the course.

Audience: Both Grad & Undergrad

### ED POL 505 – ISSUES IN URBAN EDUCATION IN THE U.S.

3 credits.

Explore urban education in the United States and its relationship to broader political, social, and economic contexts; focuses on contemporary urban educational issues and students' experiences in school and community settings, the experiences of students and families of color and the relationship between race, class, gender, and inequality in urban education.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Articulate the relationship between urban education and broader political, social, and economic contexts

Audience: Both Grad & Undergrad

2. Critically analyze the role that urban educational policy, school structures, and school actors play in causing, ameliorating, or exacerbating educational inequities that impact the lives and learning of students and families of color and students and families living in poverty

Audience: Both Grad & Undergrad

3. Critically analyze the role that out-of-school factors (e.g. home, community, and broader economic and political contexts and conditions) play in causing, ameliorating, or exacerbating educational inequities

Audience: Both Grad & Undergrad

4. Read and evaluate scholarly research on urban education and connect it to community-based learning experiences

Audience: Both Grad & Undergrad

5. Critically reflect on their educational experiences in relation to the course themes

Audience: Both Grad & Undergrad

6. Effectively communicate what they learned about urban educational issues both orally and in writing, to both academic and non-academic audiences

Audience: Both Grad & Undergrad

7. Develop their research and communication skills via a final research paper and class presentation

Audience: Graduate

**ED POL 510 – URBAN SCHOOL POLICY**

3 credits.

Examines the following questions focusing on: goals and values for urban schools, framings of "the problem" of K-12 urban schooling in the United States, evidence of the complexities and research evidence on contemporary policies for improving urban schools, and theories of urban school politics, policy, and equity-oriented school reform. Focuses on system-level educational problems, politics, and policies.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Develop knowledge about how urban school problems are framed, a variety of prominent policies aimed at improving urban schools, and explanations for the difficulty of changing urban school districts

Audience: Undergraduate

2. Critically reflect on contemporary and enduring debates about urban school problems, policies, and the politics of school system change.

Audience: Undergraduate

3. Apply concepts and lessons from the course to analyze new issues and pressing concerns related to urban school policy.

Audience: Undergraduate

**ED POL/CURRIC/HISTORY/JEWISH 515 – HOLOCAUST: HISTORY, MEMORY AND EDUCATION**

3 credits.

Explores the ways in which Holocaust history, memory and education are mutually entangled, politically charged and morally complex. Using primarily American sites of memory, critically analyze a variety of representations of the Shoah--in literature, films, memoirs, monuments, museums and classrooms.

**Requisites:** Junior standing

**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Examine and question cultural assumptions and knowledge claims about race, ethnicity, and religion

Audience: Both Grad & Undergrad

2. Improve written and oral communication skills by engaging in critical conversations, making presentations, practicing group projects and writing papers

Audience: Both Grad & Undergrad

3. Demonstrate self-awareness and empathy to other worldviews and cultural differences and apply course concepts outside of the classroom by engaging in respectful conversations about race, ethnicity, and religion in our multi-cultural society

Audience: Both Grad & Undergrad

4. Construct and develop a meaningful project around a topic that interests you

Audience: Both Grad & Undergrad

5. Articulate answers to and pose complex questions regarding ethical issues, connecting historical events to present circumstances regarding racial inequalities

Audience: Undergraduate

6. Develop your academic writing by thinking carefully through your ideas and editing your work and your peers'

Audience: Undergraduate

7. Pose and answer complex historical and ethical questions regarding the Holocaust, genocide, their representations and political uses, connecting historical events to present circumstances regarding racial inequalities

Audience: Graduate

8. Develop interpersonal academic skills by editing peers' work

Audience: Graduate

**ED POL/CURRIC/RELIG ST 516 – RELIGION AND PUBLIC EDUCATION**

3 credits.

Examines theories and practices related to the role of religion in public schooling and its accompanying tensions: political and philosophical, practical and personal.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**ED POL 518 – INTRODUCTION TO DEBATES IN HIGHER EDUCATION POLICY**

3 credits.

Critical examination of debates in contemporary higher education policy. Explores the sociocultural tensions among key policy goals such as quality, equity, and efficiency, and the results (including unintended consequences) of those tensions. Examines the theory and research brought to bear on policy debates, and how they are used-or not used-to shape policy agendas.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Critically reflect about an array of higher education policies

Audience: Both Grad & Undergrad

2. Communicate effectively about perspective and viewpoints on higher education policy issues with others

Audience: Both Grad & Undergrad

3. Analyze higher education policies and convey ideas clearly in writing

Audience: Both Grad & Undergrad

4. Utilize various research theory and methodologies to concisely articulate and analyze debates about higher education

Audience: Graduate

**ED POL 525 – IS COLLEGE POSSIBLE? COLLEGE ACCESS AND ADMISSIONS IN THE US**

3 credits.

Survey of the college access landscape in the US with particular attention to historical and contemporary social, economic, and political contexts from the individual to federal level. Specifically focus on students' transitions from K12 to higher education, including policy aspects of college-going affecting college preparation, search, application, choice, and enrollment. Review, discuss, and apply evidence-based perspectives on related issues, including affordability and postsecondary sectors, with an emphasis on interventions seeking to reduce social and economic inequality in access to college.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the economic, political, and social contexts surrounding access to higher education in the US

Audience: Both Grad & Undergrad

2. Summarize different pathways and pitfalls to equitable access with particular attention to differences across individual (student, family) and systems (community/institutional/government) contexts

Audience: Both Grad & Undergrad

3. Critique and synthesize evidence examining various strategies and interventions to increase access

Audience: Both Grad & Undergrad

4. Apply multi-disciplinary perspectives to novel issues in college access and generate policy solutions

Audience: Both Grad & Undergrad

5. Communicate evidence-based recommendations to diverse stakeholders using various methods

Audience: Both Grad & Undergrad

6. Formulate novel research questions on contemporary college access issues drawing from prior work

Audience: Graduate

7. Conduct high-quality empirical research on college access leveraging disciplinary norms and methods

Audience: Graduate

**ED POL/PHILOS 540 – EGALITARIANISM AND EDUCATIONAL JUSTICE**

3 credits.

Examines significant disagreements about educational justice—about the very concept of educational justice; about the most plausible substantive account of educational justice and the way that an ideal of equality bears on it; and about what kinds of policies the most plausible account of educational justice would require in circumstances like our own. Introduces tools that contemporary moral and political philosophers use to investigate those questions. Understand and evaluate efforts to resolve those questions.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the structure of, and the differences among, major accounts of educational justice that have been defended in the literature on the philosophy of education

Audience: Both Grad & Undergrad

2. Examine the educational policies that different accounts of educational justice would favor, and evaluate existing educational policies by the standards of different accounts of educational justice

Audience: Both Grad & Undergrad

3. Construct and evaluate complex normative—moral and political—arguments about the concept of educational justice, the most plausible account of educational justice, and the practical implications of accounts of educational justice

Audience: Both Grad & Undergrad

4. Construct and defend novel versions, objections, and assessments of egalitarian theories of educational justice for educational policy and practice by conducting original philosophical research.

Audience: Graduate

**ED POL/ELPA/LEGAL ST 542 – LAW AND PUBLIC EDUCATION**

3 credits.

Examines the legal issues related to the policy decisions and delivery of public education (elementary and secondary) in the United States. Learn how law impacts both curriculum development and curricular delivery, explore current legal controversies, constitutional issues, and learn about legal reasoning and analysis. Examines how both legislation and litigation affects public education. Particular attention is paid to law as public policy and the analysis of the same.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify various analytic frameworks that guide legal analysis.

Audience: Both Grad & Undergrad

2. Analyze the use of principles and/or frameworks to a situation or issue.

Audience: Both Grad & Undergrad

3. Understand the role of analytic frameworks in the development and implementation of law and policy.

Audience: Both Grad & Undergrad

4. Describe the many legal issues inherent in daily school practice.

Audience: Undergraduate

5. Discuss various legal principles.

Audience: Undergraduate

6. Examine the sources of law and the various interests that the law seeks to balance.

Audience: Undergraduate

7. Recognize and identify independently the many legal issues inherent in daily school practice.

Audience: Graduate

8. Explore and apply various legal practices and their application.

Audience: Graduate

9. Examine the sources of law and the various interests that the law seeks to balance, provide varying arguments in written form.

Audience: Graduate

10. Find and understand primary sources of legal authority (e.g. actual cases, statutes, and administrative rules).

Audience: Graduate

### **ED POL/PHILOS 545 – PHILOSOPHICAL CONCEPTIONS OF TEACHING AND LEARNING**

3 credits.

Examination and analysis of conceptions of teaching and learning in classical philosophical works and in contemporary literature in the philosophy of education.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **ED POL/PHILOS 550 – PHILOSOPHY OF MORAL EDUCATION**

3 credits.

Critical examination of classical and contemporary conceptions of moral education.

**Requisites:** Junior standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ED POL/GEN&WS 560 – GENDER AND EDUCATION**

3 credits.

Examines the relationship between gender and education and explores notions of gender as socially constructed categories and identities. Identify the ways schools (re)produce and mediate gender identities and explore the experiences of students. Draws on critical and feminist perspectives to analyze the ways gender intersects with understandings of identity performance and expression such as masculinity and femininity, as well as at the intersection of race, ethnicity, class, and sexuality in schooling processes.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the role schools and education play in enhancing or reproducing gender inequality

Audience: Both Grad & Undergrad

2. Explain theories on the social construction of gender and sexuality

Audience: Both Grad & Undergrad

3. Describe and reflect on the history of the gender equity movement in education

Audience: Both Grad & Undergrad

4. Read, discuss, and write about research on students with diverse gender and sexual identities

Audience: Both Grad & Undergrad

5. Develop analytical skills necessary to think about intersectional identities how they are tied to students' experiences in education

Audience: Both Grad & Undergrad

6. Explain and analyze pedagogical approaches and school policies' effects on learners of diverse gender and sexual identities

Audience: Both Grad & Undergrad

7. Analyze the role that educational research, policies and practices play in causing, ameliorating, or exacerbating gender inequities

Audience: Both Grad & Undergrad

8. Build the skills necessary to apply these concepts and approaches to our own final research project on a gender related topic

Audience: Both Grad & Undergrad

9. Read and evaluate scholarly research in the fields of education, sociology, feminist studies, anthropology, etc

Audience: Graduate

**ED POL/AFROAMER 567 – HISTORY OF AFRICAN AMERICAN EDUCATION**

3 credits.

An examination of the social, economic, political, and cultural issues influencing the education of Black Americans from the early nineteenth century to the 1960s.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ED POL/ANTHRO 570 – ANTHROPOLOGY AND EDUCATION**

3 credits.

An exploration of the foundational concepts and methods of educational anthropology. Examines anthropological inquiry on educational research with particular reference to cultural perspectives on education and educational systems, learning as cultural transmission, and application of anthropological knowledge to curriculum.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate an understanding of the social, cultural, and/or historical contexts of education policy.

Audience: Both Grad & Undergrad

2. Analyze education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference.

Audience: Both Grad & Undergrad

3. Write clearly and compellingly for diverse audiences about complex topics in educational policy.

Audience: Both Grad & Undergrad

4. Utilize social and cultural research theories and methodologies to articulate perspectives and viewpoints

Audience: Graduate

**ED POL 575 – EDUCATION POLICY AND PRACTICE**

3 credits.

Examines teachers' and administrators' practice through research on teachers and teaching as an occupation, the everyday realities of classrooms, and a variety of frameworks for understanding the relationship between policy and educators' daily work. Considers teachers and administrators as implementers of local, state, and federal policies, while simultaneously designing and creating policies and practices themselves.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop knowledge about research and theory on teaching as an occupation, teachers' work, and policy implementation or policy appropriation.

Audience: Both Grad & Undergrad

2. Critically reflect on the relationship between policy and practice.

Audience: Both Grad & Undergrad

3. Apply concepts and lessons from the course to analyze "real world" examples of teaching (or administrative) practice and explain how policy is or is not practiced in schools.

Audience: Both Grad & Undergrad

4. Concisely articulate research-based evidence and reflections about education policy and practices

Audience: Graduate

### ED POL 580 – PARTICIPATORY AND COMMUNITY-BASED RESEARCH AND EVALUATION

3 credits.

Teaches the goals, purposes and methods associated with community-engaged, participatory research and evaluation, including the following: 1) the political and philosophical underpinnings of the approach, and specifically of participatory action research (PAR); 2) qualitative research methods; 3) examples of community-engaged, participatory studies.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the specific tenets of community-engaged, participatory research and evaluation

Audience: Both Grad & Undergrad

2. Demonstrate an understanding of qualitative social science theories, epistemologies, and methodologies related to education research

Audience: Both Grad & Undergrad

3. Collect and analyze data

Audience: Both Grad & Undergrad

4. Demonstrate professional standards for conducting scholarship ethically and responsibly

Audience: Both Grad & Undergrad

5. Design a participatory, community-engaged study

Audience: Graduate

### ED POL 585 – FAMILY AND COMMUNITY ENGAGEMENT IN EDUCATION

3 credits.

Examines how and why different families and communities engage in education, with an emphasis on issues of power and equity. Focuses on social science approaches to understanding family and community engagement in K-12 schooling in the U.S. Opportunity to explore historical and philosophical approaches, and family and community engagement in international, higher education, and other contexts.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze range of perspectives on family and community engagement in education

Audience: Both Grad & Undergrad

2. Explain how family and community engagement are shaped by historical, social, cultural, and political contexts

Audience: Both Grad & Undergrad

3. Connect course content to personal experiences and apply a growing understanding of family and community engagement to one's past, current, and future roles as an education stakeholder

Audience: Both Grad & Undergrad

4. Improve critical reading, research, writing, oral presentation, and other academic literacy skills

Audience: Both Grad & Undergrad

5. Utilize theoretical and methodological approaches to studying family and community engagement in education

Audience: Graduate

**ED POL 595 – LANGUAGE POLITICS AND EDUCATION**

3 credits.

Overview of language politics, policies, and practices in global perspective; draws on the work of anthropologists, sociolinguists, and language policy scholars to examine how language choices in and regarding schooling interact with ethnic and linguistic diversity. Consider the following questions: How and under what conditions do language policies, practices, and pedagogies redress or exacerbate inequalities? How people at the local level, including educators, negotiate language and literacy policies and politics. Uses a global lens to expand local understandings and practices.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Compare language policies and their impact on equity efforts across a range of locations

Audience: Both Grad &amp; Undergrad

2. Identify key concepts in the study of language.

Audience: Both Grad &amp; Undergrad

3. Compare a range of approaches to studying language and education.

Audience: Both Grad &amp; Undergrad

4. Critically analyze how language functions to construct inequalities in texts, media and everyday interactions.

Audience: Both Grad &amp; Undergrad

5. Develop critical media literacy skills by connecting contemporary events with theories and debates we discuss in class.

Audience: Both Grad &amp; Undergrad

6. Develop academic speaking and writing skills.

Audience: Both Grad &amp; Undergrad

7. Critically reflect on language politics in own field of study and research interests

Audience: Graduate

**ED POL 600 – PROBLEMS IN EDUCATIONAL POLICY**

3 credits.

Examines various debates in the field of education policy specific to special topic identified by instructor/faculty. Policy area and faculty vary each semester.

**Requisites:** Junior standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate an understanding of diverse historical and qualitative social-science theories, epistemologies, and methodologies related to education research and evaluation.

Audience: Both Grad &amp; Undergrad

2. Develop a researchable question and design an historical or qualitative social-science research or evaluation project on some aspect of education policy, past or present.

Audience: Undergraduate

3. Develop a researchable question and design an historical or qualitative social-science research or evaluation project on some aspect of education policy, past or present -- design research or evaluation specific to area of studies.

Audience: Graduate

4. Gain experience conducting a field-based and/or archival research project and presenting their research or evaluation in a thesis.

Audience: Both Grad &amp; Undergrad

5. Write clearly and compellingly for diverse audiences about complex topics in educational history and policy.

Audience: Both Grad &amp; Undergrad

6. Understand professional standards for conducting scholarship ethically and responsibly.

Audience: Both Grad &amp; Undergrad

**ED POL 601 – RESEARCH AND EVALUATION FOR EQUITY**

3 credits.

How can research and evaluation serve as mechanisms for advancing equity and justice? Interdisciplinary approach to foundational understanding of educational research and program evaluation. Explores common types of program evaluation and examine how equity-oriented frameworks can inform research and evaluation projects. Considers how politics shape who evaluates, for what reasons, and with what consequences. Engage in systematic inquiry using evaluation research methods, including data collection, analysis, and interpretation.

**Requisites:** Junior standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate an understanding of diverse historical and qualitative social-science theories, epistemologies, and methodologies related to education research and evaluation

Audience: Graduate

2. Develop an understanding of the role of power and inequity in shaping project, program, and policy intended and unintended consequences

Audience: Graduate

3. Develop a researchable question and design an evaluation project

Audience: Both Grad &amp; Undergrad

4. Develop skills of collecting and analyzing data for an evaluation project

Audience: Both Grad &amp; Undergrad

5. Develop skills of writing clearly and compellingly for diverse audiences about complex topics in educational history and policy

Audience: Both Grad &amp; Undergrad

6. Follow professional standards for conducting scholarship ethically and responsibly in pursuit of equity

Audience: Both Grad &amp; Undergrad

7. Consider the issues of equity, diversity, and inclusion in educational policies and practices

Audience: Both Grad &amp; Undergrad

**ED POL 602 – STATISTICS FOR RESEARCH AND EVALUATION**

3 credits.

An introduction to statistical analysis for research and evaluation. Draw on current events and policy debates when possible. Describe data and distributions; internal/external validity; sampling, inference, and evaluation designs (RCT, regression, DiD). Expect to use real data and computer software to complete assignments.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe data and distributions

Audience: Graduate

2. Identify relationships between variables

Audience: Graduate

3. Explain the relationship between internal and external validity

Audience: Graduate

4. Demonstrate knowledge of inferential statistics through a final exam

Audience: Graduate

5. Use computer software to analyze data

Audience: Graduate

**ED POL 603 – RESEARCH AND EVALUATION DESIGN AND METHODS**

3 credits.

Examines applied research and evaluation design. Explains the basic components of the research process: conceptualization and measurement, sample selection, and techniques for data generation. Explores and practices research techniques, including survey, focus groups, interviews, etc. Entails a developmental sequence of assignments culminating in a research proposal.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Become familiar with the concepts, language, methods, and applications of research and evaluation

Audience: Graduate

2. Formulate clear research questions

Audience: Graduate

3. Identify an appropriate research design to answer research questions and contribute to generalizable knowledge

Audience: Graduate

4. Assess the strengths and weaknesses of the research design in any given study

Audience: Graduate

5. Learn and practice a range of research techniques

Audience: Graduate

6. Incorporate anti-oppression practice into research studies

Audience: Graduate

7. Write a detailed, feasible, and rigorous research proposal

Audience: Graduate

**ED POL 605 – USING SECONDARY DATA: APPLIED QUANTITATIVE ANALYSIS**

3 credits.

Introduce methods for managing secondary data or data not collected for specific research purposes and analyzing it to address educational policies. Focus on quantitative techniques. Use secondary data and statistical software to complete assignments

**Requisites:** ED POL 209 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze existing data to answer research questions about educational policy.

Audience: Both Grad & Undergrad

2. Explain data management and variable creation for quantitative research in educational policy.

Audience: Both Grad & Undergrad

3. Identify and employ methods for secondary analysis through a final project on the topic of educational policy.

Audience: Both Grad & Undergrad

4. Use computer software to analyze educational data.

Audience: Both Grad & Undergrad

5. Critically evaluate the strengths and limitations of quantitative research methods and findings in educational research.

Audience: Graduate

**ED POL 606 – RESEARCH AND EVALUATION PLANNING AND MANAGEMENT**

3 credits.

Focuses on the role of research and evaluation in program development. Design, plan, and manage research and program evaluations. Includes discussion and debate regarding a series of case studies. Asks how, and under what conditions, research and evaluation contribute to equity goals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate an understanding of diverse historical and qualitative social-science theories, epistemologies, and methodologies related to education research and evaluation.

Audience: Graduate

2. Define different evaluation paradigms, purposes, designs, and stakeholders

Audience: Graduate

3. Develop basic skills of evaluation work, such as aligning aims and methods, writing research questions and hypotheses, and identifying data measures

Audience: Graduate

4. Develop skills to plan and manage an evaluation project

Audience: Graduate

5. Understand professional standards for conducting research and evaluation ethically and responsibly

Audience: Graduate

**ED POL/HISTORY 612 – HISTORY OF STUDENT ACTIVISM FROM THE POPULAR FRONT TO BLACK LIVES MATTER**

3 credits.

Explore the history of student activism in the United States, with an emphasis on the experiences racial/ethnic minority youths who have been marginalized or discriminated against. What motivated students to become politically active, and what forms did their activism take? How did student activism vary across time and space and from one group of activists to another? Why did some students become activists while others did not? What role did education and educational institutions play in their activism? What impact have student activists had, and what do their histories reveal about the capacity and mechanisms for achieving racial equity in particular and for affecting social, political, and economic change more broadly?

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an awareness of History's Impact on the Present

Audience: Both Grad & Undergrad

2. Develop an ability to Recognize and Question Assumptions

Audience: Both Grad & Undergrad

3. Develop consciousness of Self and Other

Audience: Both Grad & Undergrad

4. Develop capacity for Effective Participation in a Multicultural Society

Audience: Both Grad & Undergrad

5. Identify and discuss the significance of key actors, events, themes, and historiographical debates relating to the history of student activism in the modern United States

Audience: Both Grad & Undergrad

6. Identify and evaluate historical arguments in secondary scholarly works

Audience: Both Grad & Undergrad

7. Interpret and contextualize primary historical sources

Audience: Both Grad & Undergrad

8. Synthesize information from primary and secondary sources in order to develop and support their own evidence-based historical interpretations.

Audience: Both Grad & Undergrad

9. Synthesize information from secondary sources in order to develop and support evidence-based historical interpretations and historiographical analyses.

Audience: Graduate

**ED POL 618 – ADVANCED QUALITATIVE RESEARCH METHODS IN EDUCATION**

3 credits.

Advanced qualitative methods for educational research taught through an apprenticeship in the research process, from developing the idea and questions to collecting and analyzing data to disseminating results. Presents specialized qualitative approaches.

**Requisites:** ED POL 308

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Review the fundamentals of the social science research process in educational policy.

Audience: Undergraduate

2. Apply a range of research tools and methods relevant to social science research in educational policy.

Audience: Undergraduate

3. Discuss ethical dilemmas in human subjects research in educational policy.

Audience: Undergraduate

4. Develop research questions appropriate to qualitative research in educational policy.

Audience: Undergraduate

5. Collect, manage, and analyze educational research data.

Audience: Undergraduate

6. Present educational research findings to a broad audience.

Audience: Undergraduate

7. Reflect on the research process in educational policy.

Audience: Undergraduate

8. Learn about different types of graduate programs and careers involving educational research skills.

Audience: Undergraduate

**ED POL/HISTORY 622 – HISTORY OF RADICAL AND EXPERIMENTAL EDUCATION IN THE US AND UK**

3 credits.

Examines the comparative history of radical and experimental education in the United States and United Kingdom since 1800. It focuses on the social, cultural, and intellectual history of diverse educational experiments, including experiments related to socialism, abolitionism, anarchism, and religious fundamentalism.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Demonstrate understanding of the course content: both the broad themes and specific cases we'll study in the history of radical and experimental education in the US and UK.

Audience: Both Grad & Undergrad

2. Demonstrate the ability to think historically: to determine historical significance; to evaluate evidence; to identify continuity and change; to assess cause and consequence; to demonstrate understanding of contextualization and periodization; to take historical perspectives; and to critically assess the moral dimensions of history.

Audience: Both Grad & Undergrad

3. Identify, analyze, and critique historical arguments (as presented by our authors and classmates).

Audience: Both Grad & Undergrad

4. Develop original historical arguments using primary and secondary sources (in class discussion and in our informal and formal writing assignments).

Audience: Graduate

5. Communicate historical knowledge, interpretations, and arguments clearly in writing, discussion, and oral presentations.

Audience: Both Grad & Undergrad

**ED POL/SOC 648 – SOCIOLOGY OF EDUCATION**

3 credits.

Utilizes a sociological lens to examine American schools and schooling, with a particular focus on social inequality in the U.S. and how class, race, and gender intersect in the experiences of students. Examine how schools and schooling relate to broader social structures, institutions, and practices with a focus on inequality in public education.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Articulate the relationship between education and social inequality in the U.S. along various dimensions

Audience: Both Grad & Undergrad

2. Apply critical thinking skills to your understanding of educational institutions and individual educational experiences

Audience: Both Grad & Undergrad

3. Effectively communicate what you learned about the sociology of education both orally and in writing

Audience: Both Grad & Undergrad

4. Read and evaluate sociological research on education and schooling

Audience: Undergraduate

5. Read and evaluate sociological research on education and schooling and relate to own methodological and theoretical backgrounds

Audience: Graduate

**ED POL/HISTORY 665 – HISTORY OF THE FEDERAL ROLE IN AMERICAN EDUCATION**

3 credits.

Examines the history of federal aid to education from 1776 to the present, with heavy emphasis on the post-World War II period. Explores the federal role in public education in the Early Republic and during Reconstruction; Traces the evolution of federal policies concerning racial desegregation, compensatory education for low-income students, bilingual education, and special education for the disabled. Critically reflect on the tradition of "local control," policy implementation and evaluation, accountability, block grants, interest groups and lobbies; nationally standardized testing, and the different goals assigned to public schooling in the United States (e.g., social integration/inclusion, individual academic achievement, etc.).

**Requisites:** Junior standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**Learning Outcomes:** 1. Demonstrate an understanding of diverse historical and qualitative social-science theories, epistemologies, and methodologies related to education research.

Audience: Both Grad & Undergrad

2. Develop a researchable question and design an historical or qualitative social-science research project on some aspect of education policy, past or present.

Audience: Both Grad & Undergrad

3. Gain experience conducting a field-based and/or archival research project and presenting their research in a thesis.

Audience: Both Grad & Undergrad

4. Write clearly and compellingly for diverse audiences about complex topics in educational history and policy.

Audience: Both Grad & Undergrad

5. Understand professional standards for conducting scholarship ethically and responsibly.

Audience: Undergraduate

6. Understand professional standards for conducting scholarship ethically and responsibly and conducting historical research related to their specific research inquiry and project.

Audience: Graduate

**ED POL 675 – INTRODUCTION TO COMPARATIVE AND INTERNATIONAL EDUCATION**

3 credits.

Introduction to the origins and development of the field of comparative and international education (CIE) and to explore how scholars engage some of the theoretical, ideological, methodological, and topical debates that characterize research in the field of CIE policy.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Critically compare and contrast theoretical approaches that have shaped the field of comparative international education.

Audience: Both Grad & Undergrad

2. Identify and compare the assumptions, benefits, and limitations of different educational policy and planning approaches on comparative international education.

Audience: Both Grad & Undergrad

3. Utilize concepts and lessons from the course to analyze new issues and pressing concerns related to comparative international education

Audience: Both Grad & Undergrad

4. Apply various research methods to analyze data and research related to the comparative international education

Audience: Graduate

**ED POL 680 – EDUCATIONAL POLICY STUDIES HONORS CAPSTONE**

3 credits.

Develop a capstone project reflecting expertise in existing research on an issue or question of interest. Engage in interdisciplinary conversations, consider pressing issues in education, explore potential professional and academic trajectories, and prepare for future careers and graduate education. Requires declaration in Educational Policy Studies BS Honors in the Major.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Synthesize previous course work and themes through discussion of pressing issues in education.

Audience: Undergraduate

2. Explore fellow honors students epistemologically, methodologically, and topically diverse research interests.

Audience: Undergraduate

3. Develop, through a series of scaffolded assignments, a rigorously researched capstone project such as literature review paper or policy brief that reviews relevant research.

Audience: Undergraduate

4. Write a personal statement describing your learning and future directions in education.

Audience: Undergraduate

### ED POL 688 – INTRODUCTION TO SURVEY METHODS FOR EDUCATION RESEARCH

3 credits.

Introduction to conceptual and practical tools for planning, designing, and conducting survey research on education-related issues. Provides an overview of principles in survey methods and relevant issues, including data collection modes, sampling methods, questionnaires and measurement design, possible sources of bias and errors, non-response, and other extended topics. Provides a substantial experience with practical research skills.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate knowledge of basic concepts, principles, tools, and common challenges in survey methods in education research

Audience: Both Grad & Undergrad

2. Critically examine the causes and sources of biases in survey methods and demonstrate knowledge in approaches to address these biases

Audience: Both Grad & Undergrad

3. Apply principles in sampling to draw and document a survey sample

Audience: Both Grad & Undergrad

4. Apply principles of question design in developing survey questions and instruments

Audience: Both Grad & Undergrad

5. Critically evaluate survey design, instruments, and research based on survey data

Audience: Graduate

6. Develop a professionally written proposal for an education research project with a survey component

Audience: Graduate

### ED POL 699 – INDEPENDENT READING

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ED POL 701 – INTRODUCTION TO EDUCATIONAL POLICY STUDIES

3 credits.

An introduction to diverse scholarly perspectives in educational policy studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply resources and strategies for enhancing your life and well-being as a doctoral student

Audience: Graduate

2. Meet faculty and fellow students in the department and learn about their epistemologically, methodologically, and topically diverse research

Audience: Graduate

3. Learn, through a series of scaffolded assignments, to write a robust literature review

Audience: Graduate

### ED POL/AFROAMER/HISTORY 712 – EDUCATION AND THE CIVIL RIGHTS MOVEMENT

3 credits.

Explores the historical relationship between education and the African American freedom struggle from the early twentieth century to the present. Topics include school segregation, desegregation, and resegregation; high school and college student activism; Black Power; civil rights protest strategies and tactics, and the role of the federal government.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### ED POL/HISTORY 713 – HISTORY OF HIGHER EDUCATION IN EUROPE AND AMERICA

3 credits.

Development of colleges, universities, and higher learning in Europe and America.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Demonstrate an understanding of diverse historical theories, epistemologies, and methodologies related to education research

Audience: Graduate

2. Develop a researchable question and design an historical research project on some aspect of education policy, past or present

Audience: Graduate

3. Gain experience conducting an archival research project and presenting their research in a thesis

Audience: Graduate

4. Write clearly and compellingly for diverse audiences about complex topics in educational history

Audience: Graduate

5. Apply professional standards for conducting scholarship ethically and responsibly

Audience: Graduate

### ED POL/COUN PSY/CURRIC/ED PSYCH/ELPA/RP & SE 719 – INTRODUCTION TO QUALITATIVE RESEARCH

3 credits.

Provides an overview of qualitative inquiry, examining assumptions, standards, and methods for generating and communicating interpretations. Methodological and theoretical works illustrate case study, ethnography, narrative, and action research. Does not include a field method component.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ED POL 743 – COST-EFFECTIVENESS & BENEFIT-COST ANALYSIS IN EDUCATION

3 credits.

Introduction and application of methods of economic evaluation in education focusing on the use of cost, cost-effectiveness, and benefit-cost analyses. Topics include collecting inputs; pricing; estimating costs; adjusting for inflation, amortization, and units; sensitivity analyses; measuring effectiveness; quantifying benefits; computing rates of return; and communicating results. Lecture and project based with focus on real-world application, data collection, replication, and peer review.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Develop and articulate a clear understanding of economic evaluations in education

Audience: Graduate

2. Discuss and write about concepts in economic evaluation

Audience: Graduate

3. Assess empirical work for strengths and weaknesses of rigor of evidence

Audience: Graduate

4. Distinguish cost analyses, cost-feasibility studies, benefit-cost analyses, and cost-effectiveness studies

Audience: Graduate

5. Articulate the strengths and weaknesses of each approach, including what settings facilitate which type

Audience: Graduate

6. Design and peer-review research employing economic evaluation in education

Audience: Graduate

7. Conduct research proposal applying methods covered in class to contribute to the field

Audience: Graduate

**ED POL 745 – POLITICAL ECONOMY AND EDUCATION**

3 credits.

Seeks to provide an introduction to political economy in the field of education from a theoretical, historical, and comparative perspective.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify political and economic influences on education policy.

Audience: Graduate

2. Compare and contrast various theories of political economy.

Audience: Graduate

3. Understand education as a site of struggle among different groups and ideologies in society.

Audience: Graduate

4. Examine theories and practices of neoliberalism and related concepts (e.g., late liberalism, racial capitalism).

Audience: Graduate

5. Explore linkages among shifting political and economic trends and educational agendas

Audience: Graduate

6. Determine how neoliberalism (and attendant theories) influence educational policies and practices, including through the interrelated processes of globalization, privatization, marketization, and corporatization.

Audience: Graduate

7. Critically assess claims and arguments about what kind of educational reforms are needed and their potential implications

Audience: Graduate

8. Describe intersectional (e.g., gendered, raced, classed) dimensions of labor, globalization, capital, and education

Audience: Graduate

9. Critically reflect on assumptions about education and the possibilities of social and educational change

Audience: Graduate

**ED POL 750 – AFRICAN EDUCATION: PAST, PRESENT AND FUTURE**

3 credits.

Survey of indigenous and introduced forms of African education, formal and informal, in comparative format. The impact of Islam and Christianity on traditional educational styles. The struggle for modernity and cultural autonomy within the context of imperialism and international rivalries. Problems of nation-building, popular participation, and human resource development; educational planning and international cooperation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2015

**Learning Outcomes:** 1. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) facing African educators, policymakers, and communities

Audience: Graduate

2. Apply sustainability principles and/or frameworks to addressing the challenges facing African schools, communities, and states

Audience: Graduate

**ED POL/C&E SOC/SOC 755 – METHODS OF QUALITATIVE RESEARCH**

3 credits.

Introduces qualitative, or ethnographic, research methods, emphasizing those suitable for educational and other organizational settings. Considers strengths and limitations of qualitative approaches in relation to varied research problems. Explores methodological procedures from entry into the field through writing.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ED POL 760 – CRITICAL DEVELOPMENT STUDIES AND EDUCATION**

3 credits.

Presents a comprehensive and critical understanding of the international educational development (IED) arena; the paradigms and theories that shape the field; the relationships among major actors and institutions; and themes and issues that have arisen in international educational development over the past decades.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Examine various theories about the relationship between economic, social and political development education

Audience: Graduate

2. Consider how different disciplines have shaped the field of comparative and international education (CIE) over time

Audience: Graduate

3. Discuss the relationships among major actors and institutions in the field of comparative and international education (CIE)

Audience: Graduate

4. Write a publishable academic book review

Audience: Graduate

5. Write an argument-driven academic literature review to inform their own research project

Audience: Graduate

**ED POL 761 – MIGRATION AND EDUCATION**

3 credits.

Addresses political economic issues related to migration and education. Drawing on the anthropology of globalization and sociology of immigration, the course reviews major theories of immigrant incorporation and exclusion processes, examines case studies of im/migrants, refugees, and displaced persons and their adaptation processes in countries in the Global North and the Global South, and considers educational practices and policies that develop to address mobility in diverse contexts. The course examines how cultural, social, political, and economic factors influence im/migrant incorporation, and how educators can facilitate im/migrant students' opportunities for learning through changes in policies, pedagogies, and curricula.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Explain the social, economic, and political dimensions of migration

Audience: Graduate

2. Explain and describe the relationship between migration and education

Audience: Graduate

3. Write clearly and compellingly for diverse audiences, including scholars, policy makers and the public

Audience: Graduate

**ED POL/ELPA/PUB AFFR 765 – ISSUES IN EDUCATIONAL POLICY ANALYSIS**

3 credits.

Theory, research, and practical experience in educational policy analysis, including the social construction of policy problems in education; the design, implementation, and evaluation of policy responses; and the practical and ethical dilemmas of the policy analyst.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ED POL 780 – SPECIAL TOPICS IN EDUCATIONAL POLICY STUDIES**

3 credits.

Topics vary each semester.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ED POL/COUN PSY/CURRIC/ED PSYCH/ELPA/RP & SE 788  
– QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD  
METHODS I**

3 credits.

Introductory field methods experience in qualitative research. Learn to define good research questions, determine which methods of data collection and analysis are useful for addressing those questions, engage in these methods, reflect on their utility in education research.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 719

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ED POL/COUN PSY/CURRIC/ED PSYCH/ELPA/RP & SE 789  
– QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD  
METHODS II**

3 credits.

Focus on data analysis and translation of finds and implications. Gain theoretical and practical knowledge and skills regarding coding and analysis techniques, use of qualitative analytic tools, strategies for sharing findings with audiences beyond research team.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 788

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ED POL/GEN&WS/PUB AFFR 805 – GENDER ISSUES IN  
INTERNATIONAL EDUCATIONAL POLICY**

3 credits.

Exploration and analysis of recent debates related to gender issues in international educational policy, including the intersection of education and demographic processes, the play of history and culture, and the social construction of gender.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ED POL 810 – EDUCATION AND RESISTANCE IN COMMUNITY-  
BASED SPACES**

3 credits.

Engage with and discuss the historical, ideological, and contemporary issues surrounding community-based spaces and programs serving youth. Topics will include: grassroots organizing and activism, pedagogies of the home, academic outcomes and access to higher education, full-service community-schools/school-community partnerships, social identity, funding and philanthropy, neoliberalism and education privatization, and after school and out-of-school time education. Examine the social and political context of community-based educational efforts in order to understand how they can be nurturing spaces of resistance for youth, as well as spaces of conflict and social reproduction.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the political and social context of community-based spaces engaging youth

Audience: Graduate

2. Disrupt and redefine static notions of "community," "education," and "educator"

Audience: Graduate

3. Understand the heterogeneity of community-based spaces engaging youth

Audience: Graduate

4. Examine the relationships of power undergirding community-based spaces

Audience: Graduate

5. Explore the role, challenges, and experiences of community-based leaders, educators, and youth workers

Audience: Graduate

6. Explore the experiences of diverse youth participants in community-based programs

Audience: Graduate

7. Understand the relationship between community-based educational spaces and traditional school contexts

Audience: Graduate

8. Engage in critical dialogue about the role of "youth work" and community-based spaces in broader education discourse and reform

Audience: Graduate

**ED POL/ED PSYCH/ELPA/RP & SE 842 – LEGAL FOUNDATIONS OF SPECIAL EDUCATION AND PUPIL SERVICES**

3 credits.

Legal requirements and issues relative to special education and pupil services programs; special education, juvenile justice, programs for English language learners, programs for children who are homeless; examination of applicable federal and state statutes and case law.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe various legal issues and identify those issues inherent in the delivery of pupil services.

Audience: Graduate

2. Explain the foundation created by federal disability law (Section 504, ADA, IDEA).

Audience: Graduate

3. Describe the relationship between state and federal law in the delivery of special education.

Audience: Graduate

4. Apply legal principles to a set of facts.

Audience: Graduate

5. Explain the relationship between statutory and regulatory requirements and practice.

Audience: Graduate

6. Identify various analytic frameworks that guide legal analysis.

Audience: Graduate

7. Apply principles and/or frameworks to a situation or issue.

Audience: Graduate

8. Analyze existing policies and practice from a legal perspective.

Audience: Graduate

9. Explain the dynamic nature of this branch of school law and will identify tools and resources available to help them remain current.

Audience: Graduate

**ED POL 860 – PROSEMINAR: THEORY AND METHOD IN COMPARATIVE EDUCATION**

3 credits.

Critical analysis of theories, methods, and intellectual perspectives that have been employed in comparative studies of education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Compare and contrast major theoretical and disciplinary approaches to educational research

Audience: Graduate

2. Compare and critique comparative research methods

Audience: Graduate

3. Analyze the cultural, economic, and political forces that influence educational policy and practice around the world

Audience: Graduate

4. Discuss current debates in the field and to develop your own informed opinion about them

Audience: Graduate

5. Hone critical reading and writing skills and demonstrate these skills in class discussions, oral presentations, and written papers

Audience: Graduate

**ED POL 870 – THEORIES OF SOCIAL AND EDUCATIONAL CHANGE**  
3 credits.

Analysis of several social theories emphasizing the explanation of social change, the role of education in the change process, and the implications for educational policy in contemporary society.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Map central theoretical traditions and contemporary innovations in the field of education

Audience: Graduate

2. Apply, analyze, and evaluate the key concepts from these traditions

Audience: Graduate

3. Compare and contrast social theories

Audience: Graduate

4. Connect theoretical arguments and empirical education research

Audience: Graduate

5. Engage diverse theoretical perspectives to analyze relationships between education and society

Audience: Graduate

6. Analyze education policies and practices from diverse theoretical perspectives

Audience: Graduate

7. Develop specific skills in theoretical discourse, including in writing

Audience: Graduate

**ED POL/HISTORY 903 – HISTORY OF EDUCATION OF MULTICULTURAL AMERICA**  
3 credits.

Selected topics, issues and themes concerning the history of education of various groups of people of color in the United States, as well as selected issues, topics and themes focusing on immigration and ethnicity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Identify and discuss the significance of key actors, events, themes, and historiographical debates relating to the history of education in multicultural America

Audience: Graduate

2. Identify, analyze, and evaluate historical arguments in secondary scholarly works

Audience: Graduate

3. Interpret and contextualize primary historical sources

Audience: Graduate

4. Locate synthesize, and evaluate information from secondary sources and/or primary sources in order to develop and support evidence-based historical and historiographical interpretations

Audience: Graduate

**ED POL/HISTORY 906 – PROSEMINAR ON THE HISTORY OF EDUCATION**

3 credits.

Reading in European or American educational history.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate an understanding of diverse historical theories, epistemologies, and methodologies relevant to historical research.

Audience: Graduate

2. Develop a researchable question and design a project on some aspect of the history of childhood/adolescence.

Audience: Graduate

3. Gain experience using primary and secondary sources in historical research.

Audience: Graduate

4. Write clearly and compellingly for diverse audiences.

Audience: Graduate

5. Demonstrate understanding of professional standards for conducting scholarship ethically and responsibly.

Audience: Graduate

**ED POL/HISTORY 907 – SEMINAR-HISTORY OF EDUCATION**

1-3 credits.

Studies in European and American educational history.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2022**Learning Outcomes:** 1. Identify and discuss the significance of key actors, events, themes, and historiographical debates pertaining to the history of education

Audience: Graduate

2. Identify, analyze, and evaluate historical arguments in secondary scholarly works

Audience: Graduate

3. Interpret and contextualize primary historical sources

Audience: Graduate

4. Locate, synthesize, and evaluate information from primary and secondary sources in order to develop and support evidence-based historical and historiographical interpretations

Audience: Graduate

**ED POL/SOC 908 – SEMINAR-SOCIOLOGY OF EDUCATION**

3 credits.

Selected topics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ED POL 911 – SEMINAR IN URBAN EDUCATION**

3 credits.

Historical and contemporary urban educational issues and policies. Emphasis on the relationship between educational issues in U.S. cities and other issues in cities and metropolitan regions (e.g. housing, poverty, gentrification, community development), as well as the policies and practices that seek to address these issues.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**Learning Outcomes:** 1. Analyze and articulate the relationship between urban education and broader political, social, and economic contexts.

Audience: Graduate

2. Critically analyze the role that urban educational policy, school structures, and school actors play in causing, ameliorating, or exacerbating educational inequities .

Audience: Graduate

3. Critically analyze the role that out-of-school factors (e.g. home, community, and broader economic and political contexts and conditions) play in causing, ameliorating, or exacerbating educational inequities.

Audience: Graduate

4. Evaluate research and policy on urban educational issues .

Audience: Graduate

5. Effectively communicate what they learned about urban educational issues both orally and in writing, to both academic and non-academic audiences.

Audience: Graduate

**ED POL/SOC 955 – SEMINAR-QUALITATIVE METHODOLOGY**

3 credits.

An intensive, practice-oriented exploration of one qualitative research method such as participant-observation, interviewing, narrative analysis, oral history or ethnography. Treatment of the method includes: logics of inquiry, analysis of data obtained through the method, and uses of the method.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

### **ED POL 962 – SEMINAR IN CROSS NATIONAL STUDIES OF EDUCATIONAL PROBLEMS**

3 credits.

Topics vary. Examples: education and the formation of elites; education and socio-economic development; the social functions of examinations; comparative studies in church-state-school relationships; the status of teachers; American overseas programs in educational modernization.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate an understanding of diverse social theories, epistemologies, and methodologies related to education , globally, cross-nationally, and comparatively

Audience: Graduate

2. Develop a researchable question that engages with the social theories explored in class

Audience: Graduate

3. Write clearly and compellingly for diverse audiences about complex education topics

Audience: Graduate

4. Apply professional standards for conducting scholarship ethically and responsibly

Audience: Graduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of education

Audience: Graduate

6. Apply sustainability principles and/or frameworks to addressing the challenge of educational problems

Audience: Graduate

7. Describe the social, economic, and environmental dimensions of education and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course

Audience: Graduate

### **ED POL/ANTHRO 970 – SEMINAR IN ANTHROPOLOGY AND EDUCATION**

3 credits.

Anthropological theory, methodology, and field techniques with specific reference to school ethnography and cross-cultural studies of socialization and education. Topics vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

### **ED POL 990 – RESEARCH OR THESIS**

1-12 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **ED POL 999 – INDEPENDENT READING**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## EDUCATIONAL PSYCHOLOGY (ED PSYCH)

### ED PSYCH/ASIAN/COUN PSY/PSYCH 120 – THE ART AND SCIENCE OF HUMAN FLOURISHING

3 credits.

Explore perspectives related to human flourishing from the sciences and humanities; investigate themes such as transformation, resilience, compassion, diversity, gratitude, community; expand self-awareness, enhanced social connectivity, and ability to change; formulate a sense of what it means to lead a flourishing life that sustains meaningful and fulfilling engagement with studies, relationships, community, and career.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and describe the relevant concepts and theories on the nature and cultivation of human flourishing from multiple intellectual fields including psychology, neuroscience, anthropology, philosophy, and religious studies.

Audience: Undergraduate

2. Describe and engage with the many dimensions of flourishing, and the various extrinsic and intrinsic factors influencing them.

Audience: Undergraduate

3. Formulate an account of human flourishing.

Audience: Undergraduate

4. Employ contemplative practices in an inquiry that cultivates qualities of human flourishing from within.

Audience: Undergraduate

5. Integrate contemplative practice and knowledge of course materials in order to establish a foundation for flourishing in your life and the communities in which you live.

Audience: Undergraduate

### ED PSYCH 215 – PROBABLY CORRECT: HOW TO THINK WITH STATISTICS AND DATA

3 credits.

Introduces concepts and tools of statistical thinking and analysis, coordinated with activities designed to develop statistical literacy and decision-making skills in real-world problem contexts.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed – Quantitative Reasoning Part B Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate their understanding of basic concepts that underlie statistics and data analysis

Audience: Undergraduate

2. Use these concepts to make sense of new situations.

Audience: Undergraduate

3. Apply their knowledge to do basic data manipulation and visualization

Audience: Undergraduate

4. Apply their knowledge to identify research questions, formulate hypotheses, conduct data analysis and write a coherent report of what they did and what they learned.

Audience: Undergraduate

**ED PSYCH 301 – HOW PEOPLE LEARN**

3 credits.

Introduction to theories of learning in formal and informal settings, including theories related to memory, learning, and intelligence; cognitive, social, and affective aspects of learning; the influence of context on learning, including learning with psychological tools, such as language and technological resources; individual differences that may affect learning; and practical applications of learning theory.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Acquire a strong foundation in current and past psychological theories of learning

Audience: Undergraduate

2. Recognize and synthesize multiple perspectives on knowledge, learning, and cognition

Audience: Undergraduate

3. Apply fundamental theories and multiple perspectives to everyday learning environments.

Audience: Undergraduate

4. Communicate effectively in collaborative work, so students may share their knowledge, wisdom, and values with others across social and professional settings

Audience: Undergraduate

5. Understand and evaluate their own learning processes

Audience: Undergraduate

6. Conduct research, analyze, and interpret resulting data; and create clear and concise reports of their research

Audience: Undergraduate

7. Demonstrate a knowledge of and sensitivity to human diversity in terms of individual abilities and orientations and sociocultural backgrounds.

Audience: Undergraduate

**ED PSYCH 320 – HUMAN DEVELOPMENT IN INFANCY AND CHILDHOOD**

2-3 credits.

Normative processes and individual differences in physical, mental, social and emotional development and behavior from infancy through late childhood.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Summarize and recall scientific studies with infant and child participants

Audience: Undergraduate

2. Differentiate and recall broad theories of infant and child development

Audience: Undergraduate

**ED PSYCH 321 – HUMAN DEVELOPMENT IN ADOLESCENCE**

2-3 credits.

Physiological, social, and cognitive changes which characterize the transition from childhood to adult life.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and summarize the major developmental milestones of adolescence

Audience: Undergraduate

2. Differentiate and evaluate the theory and methods used to study adolescence

Audience: Undergraduate

**ED PSYCH 322 – THE PSYCHOLOGY AND MORAL DEVELOPMENT OF FORGIVENESS**

3 credits.

Introduction to the psychology of forgiveness, including development and variations in appropriation of forgiveness, consequences of forgiving, and separating ideas of reconciliation and forgiveness.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Learn what forgiveness is and is not and be able to apply this knowledge as appropriate in situations of injustice

Audience: Undergraduate

2. Acquire knowledge about how forgiveness develops in adults and in children, including empirically-verified studies showing these advances;  
Audience: Undergraduate

3. Think critically about forgiveness and address philosophical and psychological objections to forgiveness  
Audience: Undergraduate

4. Examine the questions which researchers ask regarding the psychology of forgiveness (basic research questions and applied-psychology questions and empirical results)  
Audience: Undergraduate

5. Become familiar with the variations in people's appropriation of forgiveness in different cultures;  
Audience: Undergraduate

6. Learn what the consequences of forgiving are for individuals, relationships, and communities, based on the peer-reviewed and published scientific studies;  
Audience: Undergraduate

7. Gain proficiency in knowing what forgiveness education is for children and adolescents, including the scientific studies examining the outcomes of such education for the students.  
Audience: Undergraduate

**ED PSYCH 326 – MIND, BRAIN AND EDUCATION**

3 credits.

Provides an overview of methods and findings at the interface between education and neuroscience. Findings on brain development from birth to adolescence, brain changes in response to learning and how individual differences in brains relate to individual differences in learning. Educationally relevant domains including language acquisition and bilingualism, the brain basis of reading and mathematics and executive functions like memory, attention and emotion will be highlighted.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Summarize and apply research that bridges neuroscience and education.

Audience: Undergraduate

2. Demonstrate ability to work in cross-disciplinary student teams  
Audience: Undergraduate

**ED PSYCH 331 – HUMAN DEVELOPMENT FROM CHILDHOOD THROUGH ADOLESCENCE**

3 credits.

Social and psychological aspects of human development from early childhood through adolescence; implications for education.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate basic knowledge of how children learn and grow from early childhood through adolescence

Audience: Undergraduate

2. Describe major theories of human development, with attention to physical, cognitive, social, and emotional maturational processes, as well as various factors that affect development. This course provides opportunities for students to reflect through group discussions and written assignments.  
Audience: Undergraduate

3. Link theories about cognitive and social development to educational and parenting practices both orally and in writing  
Audience: Undergraduate

4. Summarize and critique scientific journal articles about human development  
Audience: Undergraduate

**ED PSYCH 470 – RESEARCH EXPERIENCE IN EDUCATIONAL PSYCHOLOGY**

1-6 credits.

Research experience under the supervision of a faculty member in Educational Psychology. Develop an understanding of research in a topic area and participate in team-based research. Reading includes published research studies relevant to the selected topic, and evaluation includes presentations in group meetings or a paper based on the research conducted.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ED PSYCH 501 – THINKING AND LEARNING**

3-4 credits.

Designed to explore the psychological principles that are relevant to learning, knowing, and teaching. Focuses on ideas, questions, and contextual applications. Reflect on personal approaches to learning, knowing, and teaching, and think about past, present, and future experiences through a variety of different lenses.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Identify foundational theories of learning

Audience: Graduate

2. Demonstrate ability to make connections to perspectives on knowing

Audience: Graduate

3. Analyze types and implications of cognition

Audience: Graduate

4. Identify relationships between theory and application

Audience: Graduate

5. Design learning environments

Audience: Graduate

**ED PSYCH 505 – FUNDAMENTAL STATISTICS IN LEARNING ANALYTICS**

1 credit.

Logic and methods of statistics used in the field of learning analytics. Emphasizes concepts and application rather than computational details to build fundamentals in the areas of inferential statistics. Reliability and validity, scalability, and the implications of inference in applied statistical methodology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Explore the foundations and practical use of statistics in learning analytics practice and research

Audience: Graduate

2. Understand how to apply quantitative reasoning to learning analytics topics

Audience: Graduate

3. Practice working with introductory descriptive statistics, probability, and statistical inference

Audience: Graduate

4. Acquire a working fluency with statistical theories, concepts, and terminology in learning analytics

Audience: Graduate

**ED PSYCH 506 – CONTEMPORARY ISSUES IN EDUCATIONAL PSYCHOLOGY**

3 credits.

Influence of educational psychology upon issues and innovations in education.

**Requisites:** Junior standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**ED PSYCH 509 – EMBODIED COGNITION & EDUCATION**

3 credits.

Theories of embodied cognition, and related theories of enacted, extended, and embedded cognition, have had increasing influence on general theories of cognition and philosophy of mind, and therefore have importance for education. Featuring interdisciplinary work, with readings and topics drawn from scholarly literature from several fields, including: neuroscience, psychology, philosophy, robotics and artificial intelligence, phenomenology, linguistics, and anthropology. Develop familiarity with the prevailing theories, empirical findings, and methodologies used to investigate ways that the body and body-based processes (such as perception) influence and constitute cognition, and the implications and applications of embodied cognition for education, including learning, assessment, and teaching practices. Apply these theories to research and design projects.

**Requisites:** Junior standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate through Thought Papers and class discussion an understanding of theories of cognition and research designs from various perspectives; and assess causal claims.

Audience: Both Grad &amp; Undergrad

2. Express in the Thought Papers and Major Paper a developing knowledge of and sensitivity to the influences of culture, environment, and physical abilities on cognitive behaviors.

Audience: Both Grad &amp; Undergrad

3. Demonstrate through Thought Papers and class discussion facility with the relevant theories and research methods.

Audience: Both Grad &amp; Undergrad

4. Demonstrate in Thought Papers, class discussions, and Major Paper and Paper Presentation the relation among research questions, research designs, and conclusions.

Audience: Both Grad &amp; Undergrad

5. Produce a Major Paper and Paper Presentation based on student's independent intellectual work.

Audience: Graduate

6. Communicate one's own thinking and questions as a Discussion Leader and in class discussions, Thought Papers and Major Paper.

Audience: Both Grad &amp; Undergrad

7. Produce a research paper and presentation based on student's intellectual contributions, supported by the instructor.

Audience: Undergraduate

8. Demonstrate ethical conduct and research standards, including proper documentation of outside sources and presentation of one's own ideas in the Major Paper and Paper Presentation.

Audience: Both Grad &amp; Undergrad

**ED PSYCH 525 – LEARNING ANALYTICS THEORY AND PRACTICE**

5-6 credits.

Application of data mining techniques to large educational datasets to gain important insights into how people learn. Examines the spectrum of prevalent learning analytics methods and applications, from institutional effectiveness, to classroom-level interventions, to standardized assessments, and beyond.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the fundamentals of machine learning and database interventions

Audience: Graduate

2. Analyze data ethics, regulations, and privacy issues

Audience: Graduate

3. Utilize prediction methods

Audience: Graduate

4. Engage in structure discovery

Audience: Graduate

5. Demonstrate understanding of relationship mining

Audience: Graduate

**ED PSYCH 533 – THINKING, FEELING, & LEARNING**

3 credits.

Covers the cognitive and emotional foundations of behavior with special reference to processes of learning and change. How does the science of thinking and feeling inform interventions such as teaching, counseling, or parenting? Topics covered include: dual-systems theories, neural and behavioral aspects of emotion and cognitive control, intuition, and expertise. Focus on the relation between unconscious, automatic processes and deliberate, effortful processes guiding behavior.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024**ED PSYCH 540 – INTRODUCTION TO PROFESSIONAL SCHOOL PSYCHOLOGY**

2 credits.

Introduction to the professional roles and functions of school psychologists; historical development; legal and ethical issues; overview of assessment, intervention, and consultation for children and adolescents at risk for, or with, academic, behavioral, emotional, and social difficulties; applied research in school psychology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**ED PSYCH 541 – APPLIED BEHAVIOR ANALYSIS IN CLASSROOMS**

3 credits.

Application of behavioral analysis to educational situations for both exceptional and normal children and adolescents.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Utilize theory and principles of applied behavior analysis to manage student behavior within the context of instructional environments.

Audience: Graduate

2. Describe and apply a positive behavior support assessment and intervention model

Audience: Both Grad & Undergrad

3. Create operationally-defined behavioral definitions of student behavior.

Audience: Both Grad & Undergrad

4. Outline direct and indirect methods for gathering information about student behavior.

Audience: Both Grad & Undergrad

5. Hypothesize the functions of student behavior and effectively apply a competing behavior pathway model. Learn about experimental methods to confirm hypothesized functions of challenging behavior.

Audience: Both Grad & Undergrad

6. Link behavioral assessment findings to intervention goals and behavioral objectives

Audience: Both Grad & Undergrad

7. Describe and apply strategies related to the components of comprehensive behavior intervention plans

Audience: Both Grad & Undergrad

8. Address critical issues regarding intervention implementation, student outcome monitoring, and evaluation of intervention effectiveness.

Audience: Both Grad & Undergrad

9. Understand the complexities and challenges that school-based settings contribute towards implicit bias and identify how anti-racist practices can be used regarding the identification of and referral for challenging behavior.

Audience: Both Grad & Undergrad

**ED PSYCH 542 – THE BIOLOGICAL BASIS OF BEHAVIOR**

3 credits.

Focuses on neuroscience foundational concepts relevant to clinical mental health practice, neuroanatomy, neurophysiology, psychopharmacology, disease states; ontological and phylogenic neurodevelopment. Provides an overview of ethical/cultural implications of these scientific advances. Ethical/Cultural/Economic Applications.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the structures and functions of the central nervous system.

Audience: Both Grad & Undergrad

2. Describe the development of the central nervous system across the life span.

Audience: Both Grad & Undergrad

3. Describe the relationship between neuroanatomy structure and function.

Audience: Both Grad & Undergrad

4. Define the clinical significance and application of neuroanatomy.

Audience: Graduate

5. Describe the relationship between the central nervous system and disabilities and disorders.

Audience: Both Grad & Undergrad

6. Describe techniques in imaging and psychophysiology.

Audience: Both Grad & Undergrad

**ED PSYCH 551 – QUANTITATIVE ETHNOGRAPHY**

3–4 credits.

Explores the theoretical foundations and practical use of quantitative ethnography, focusing on new insights in the field of cognitive modeling and automated coding and their use in applied fields such as anthropology, education, market research, product development, assessment, and training.

**Requisites:** ED PSYCH 301 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explore the foundations and practical use of quantitative ethnography

Audience: Both Grad & Undergrad

2. Discuss the unification of quantitative and qualitative methodologies in a quantitative ethnographic framework

Audience: Both Grad & Undergrad

3. Analyze the validity and reliability of learning analytics

Audience: Both Grad & Undergrad

4. Conduct quantitative ethnographic analyses of their own data including cognitive modeling, automated coding, writing research memos, and writing up their quantitative ethnographic study

Audience: Both Grad & Undergrad

5. Apply peer review commentary and write a final quantitative ethnography analysis

Audience: Graduate

**ED PSYCH 560 – FOUNDATIONS OF QUANTITATIVE AND QUALITATIVE RESEARCH METHODS**

6 credits.

Presents introductory research procedures in the social sciences, including the exploration of theoretical foundations and practical use of basic tools and programs needed for quantitative and qualitative data analysis.

Examines how different methodologies can complement or compete with the other, and showcases how pertinent quantitative and qualitative methods are applied in the field of learning analytics with particular emphasis on data about - and therefore issues in - learning environments such as classrooms, online courses, apprenticeships and internships, museum exhibits, after school programs, and other formal and informal educational contexts.

**Requisites:** Satisfied Quantitative Reasoning (QR) B requirement or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Draw connections via discovery and analysis of foundational quantitative, qualitative, and mixed methods approaches.

Audience: Both Grad & Undergrad

2. Discover the theoretical foundations of regression analysis as well as apply it to real datasets.

Audience: Both Grad & Undergrad

3. Analyze data and draw meaningful conclusions with regard to research questions.

Audience: Both Grad & Undergrad

4. Critically read and evaluate social science publications that use regression models as analytic tools.

Audience: Both Grad & Undergrad

5. Collect and qualitatively analyze thick collections of data.

Audience: Both Grad & Undergrad

6. Engage in a rigorous process of documenting methods, assumptions, and conclusions.

Audience: Graduate

7. Apply methods to a variety of learning analytics research via written memos and projects.

Audience: Graduate

### ED PSYCH 570 – FOUNDATIONS OF EDUCATIONAL MEASUREMENT

3 credits.

Theory of mental measurement, types of scales, reliability, validity, psychometric evaluation of published tests.

**Requisites:** Declared in Educational Psychology: Professional Educator (MSPE)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### ED PSYCH 575 – INSTRUCTIONAL DESIGN FOR LEARNING ANALYTICS

3 credits.

Explores the theoretical foundations and practical use of learning analytics for instructional design. Preparation for professional practice with hands-on experience designing learning environments modeled to predict success and retention. Focuses on understanding the ways in which learning analytics can be used to develop experiences and environments that support strategic learning outcomes.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply a variety of models to learning experience design problems

Audience: Graduate

2. Evaluate and select learning analytics tools and methods to answer pedagogical questions

Audience: Graduate

3. Iteratively improve learning design and facilitation practices using learning analytics data

Audience: Graduate

4. Discuss practices, issues, challenges, and opportunities surrounding the use of learning analytics in instructional design

Audience: Graduate

### ED PSYCH 615 – CONVERSATIONS AND VISUALIZATIONS

3 credits.

Introduction to communication methods using learning analytics data. Presentation modes include verbal conversations and visual representations. Addresses questions including: What data is consumable? How can we make this data meaningful for a client? Etc. Practice with stakeholder reports and presentations allows engagement in meaningful and effective communication strategies to enhance understanding of learning analytics data.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the benefits of data visualization for learning analytics

Audience: Graduate

2. Evaluate and select visualizations that are appropriate for a given data story, context, and audience

Audience: Graduate

3. Code and create new information visualizations

Audience: Graduate

4. Discuss practices, issues, challenges, and opportunities surrounding the use of learning analytics visualizations

Audience: Graduate

5. Identify and use appropriate accessibility strategies for visualizations

Audience: Graduate

### ED PSYCH 621 – ADOLESCENT DEVELOPMENT IN EDUCATIONAL CONTEXTS

2 credits.

Overview of physical, cognitive, emotional, and social development during adolescence as these factors influence and are influenced by young people's experiences in educational institutions.

**Requisites:** Declared in Curriculum and Instruction MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and summarize basic features of physical, cognitive, social, and psychological development during the middle and high school years

Audience: Graduate

2. Summarize why and how educational programs can foster healthy individual development and learning in adolescence

Audience: Graduate

**ED PSYCH/COM ARTS 626 – YOUTH DEVELOPMENT AND SOCIAL MEDIA: INTERDISCIPLINARY TRAINING SEMINAR**

1 credit.

Advanced level seminar that involves critical analysis of conceptual and methodological issues underlying empirical research on how social media affect and are affected by adolescent development, provides a venue for feedback on design of research studies involving youth and social media, and fosters interdisciplinary approaches to studying connections between youth development and social media use.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Become familiar with conceptual and methodological approaches to studying youth development and social media use

Audience: Graduate

2. Sharpen the ability to read, understand, and critique research studies in the social sciences, through sustained readings and class discussion

Audience: Graduate

3. Learn how to formulate an original and theoretically meaningful research proposal in the area of social media, youth, and well-being

Audience: Graduate

4. Become clear and confident public speakers in an academic group setting

Audience: Graduate

**ED PSYCH 631 – SUPERVISION OF SCHOOL PERSONNEL**

1 credit.

An introduction to principles and techniques used in the supervision of school personnel, including pre-service candidates and professional school staff. A range of supervisory strategies aimed at enhancing teaching and learning in the classroom will be examined. Gain knowledge in clinical supervision, adult learning theory, and evaluation systems used to improve teaching and learning.

**Requisites:** Declared in Educational Psychology: Professional Educator (MSPE)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Gain knowledge of models, principles and techniques used in the supervision of school personnel.

Audience: Graduate

2. Gain knowledge in clinical supervision, adult learning theory, and evaluation systems used to improve teaching and learning.

Audience: Graduate

3. Identify interpersonal skills necessary for effective supervision of school personnel

Audience: Graduate

4. Develop strategies for effectively supervising others in school settings.

Audience: Graduate

**ED PSYCH 632 – PRACTICUM IN SUPERVISION OF SCHOOL PERSONNEL**

1 credit.

Designed to enhance the practical application of principles and techniques used in the supervision of school personnel covered in Supervision of School Personnel. A variety of interactive exercises and activities are incorporated into the course to assist in the development of practical skills. Apply principles covered in the course in school settings and with supervisees.

**Requisites:** Declared in Educational Psychology: Professional Educator (MSPE)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Apply principle and techniques used in the supervision of school personnel.

Audience: Graduate

2. Work effectively with supervisees in school settings to enhance student learning and instruction.

Audience: Graduate

3. Identify a personal model of supervision for use in school settings.

Audience: Graduate

4. Develop professional development activities appropriate for school personnel.

Audience: Graduate

**ED PSYCH 633 – SUPPORTING STUDENTS' SOCIAL/EMOTIONAL WELL-BEING**

3 credits.

Examines promotion, prevention, and intervention approaches and strategies relating to how to best address students' social, emotional, and behavioral needs within the school setting. Examine ways to promote positive development within students. Evaluate prevention programs and approaches and how to implement these in school settings. Explore systematic approaches for addressing social, emotional, and behavioral needs once they are present. Explore these strategies at each level of K-12 education (i.e., elementary, middle, and high).

**Requisites:** Declared in Educational Psychology: Professional Educator (MSPE) MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify, explain, and apply the core foundational concepts within the field of prevention science, including promotive and protective factors, risk factors, models of prevention and early intervention, implementation issues, and an understanding of the role that research plays within prevention and corresponding implementation of programs.

Audience: Graduate

2. Define, understand, and explore the connections between social/emotional/behavioral functioning and academic achievement and general well-being.

Audience: Graduate

3. Be familiar with the principles and criteria of evidence-based research and practice; be able to apply these criteria to describe the strengths, weaknesses and supporting evidence for diverse social, emotional, and behavioral interventions.

Audience: Graduate

4. Identify, examine, and become knowledgeable about school-wide interventions for supporting educationally positive learner environments.

Audience: Graduate

**ED PSYCH 640 – FOUNDATIONS OF INSTRUCTIONAL COACHING**

3 credits.

As instructional leaders, coaches play an important role in building the capacity and collective efficacy of school teams. Begin to explore the strategies at the heart of this process by engaging in discussions about the role of the instructional coach, the various models of instructional coaching, and the diverse ways instructional coaches collaborate with teachers and school leaders in and out of the classroom to support students as learners. Explore effective questioning techniques, coaching conversations, facilitation strategies, working with adult learners, navigating conflict, and verbal and nonverbal communication skills. While instructional coaches provide confidential, non-evaluative, job-embedded professional learning for fellow educators, they must also advocate for their own ongoing needs as learners, build trusting relationships with colleagues, and garner support from administration.

**Requisites:** Declared in MS Educational Psychology: Professional Education (MSPE) Program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the philosophy and core practices for Instructional Coaching.

Audience: Graduate

2. Examine the the core practices for implementing Instructional Coaching.

Audience: Graduate

3. Plan coaching cycles in a way that establishes a culture of collective efficacy in your school or district.

Audience: Graduate

4. Develop strategies for evaluating the impact of coaching on student and teacher learning.

Audience: Graduate

**ED PSYCH 641 – ORGANIZATIONAL CHANGE AND INSTRUCTIONAL COACHING**

3 credits.

Designed to support coaches and coaching supervisors in leadership, management, and the design of educational organizations. Explore how to build collective knowledge, effective systemic processes, and progress monitoring capacity across an organization. Includes designing and leveraging coaching roles so that they can advance organizational and student learning outcomes.

**Requisites:** ED PSYCH 640

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2022

**Learning Outcomes:** 1. Develop a clear understanding of organizational change issues as they relate to instructional coaching.

Audience: Graduate

2. Analyze and critique structural and cultural features of organizations that impede and support coaching efforts.

Audience: Graduate

3. Apply organizational theory to develop strategies to utilize coaching as an organizational change mechanism operating at the individual, school, and system levels.

Audience: Graduate

**ED PSYCH 642 – ASSESSMENT ANALYSIS AND INSTRUCTIONAL DECISION-MAKING**

3 credits.

Learn about and explore multiple types of assessments and sets of data to conduct analysis that informs instructional practice and instructional adjustments. Focus on how to engage in productive coaching conversations with teachers and other instructional leaders about effectively designing and using assessment data to enhance student learning outcomes.

**Requisites:** ED PSYCH 640

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the purpose and cycle length of multiple forms of assessments and how they can best be utilized for student learning and success.

Audience: Graduate

2. Become assessment literate.

Audience: Graduate

3. Engage in discussion and collaboration with peers through online Professional Learning Communities (PLCs) as a means of reflecting, analyzing, understanding, and contextualizing course content.

Audience: Graduate

4. Analyze data gathered from different assessments (individually and in PLCs) to better understand how data can be used as an effective coaching tool.

Audience: Graduate

5. Develop a series of coaching conversations.

Audience: Graduate

6. Evaluate your own progress as a coach.

Audience: Graduate

7. Examine and disrupt the historical and institutional biases and inequities in common assessments.

Audience: Graduate

**ED PSYCH 643 – PRACTICUM FOR INSTRUCTIONAL COACHING**

2 credits.

Designed to integrate and apply concepts and practices from the previous coaching courses, engage in discussions and readings to think critically and reflect on coaching practices. Engage in coaching activities at the individual and/or team level and take an active role in the online Instructional Coaching Professional Learning Community at UW-Madison. Provides additional opportunities to engage in collaborative inquiry into coaching practices that account for sociocultural and student-centered instructional practices, attention to components of adult learning theory, and analysis of coaching roles through language use and norms of facilitation.

**Requisites:** ED PSYCH 642

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement Instructional Coaching cycles to hone your craft through reflective analysis.

Audience: Graduate

2. Engage a critical lens to foster the development of responsive instruction in the classroom (including attention to individual students by designing culturally relevant pedagogy, differentiating instruction for learning needs, providing explicit support for English Language Learners, etc.)

Audience: Graduate

3. Articulate and refine your coaching beliefs by drawing on research and examining your own practice.

Audience: Graduate

**ED PSYCH 695 – CAPSTONE IN LEARNING ANALYTICS**

5-6 credits.

Introduces guest speakers who specialize in applying learning analytics in a variety of professional environments and to a variety of time-sensitive topics (spanning between the student-level within a classroom, institutional effectiveness at a university, educational technology development, national standardized assessments, and beyond). Engage in a comprehensive consulting project that pairs student teams with a learning organization of their choice to design and produce a consulting report to be presented to key stakeholders. Builds on knowledge and skills learned in prior courses and requires application of program concepts in authentic contexts.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Connect and apply learning analytics theories, concepts, methods, and practices to projects and assignments

Audience: Graduate

2. Explore a variety of learning analytics issues, contexts and careers via guest speaker presentations and interviews

Audience: Graduate

3. Ascertain client needs and collaborate with peers on a professional consulting project

Audience: Graduate

4. Employ analyses and present findings and recommendations for portfolio-worthy capstone project

Audience: Graduate

**ED PSYCH 699 – INDEPENDENT READING UNDERGRAD**

1-6 credits.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ED PSYCH 709 – SEMINAR IN RESEARCH IN EDUCATIONAL PSYCHOLOGY I**

3 credits.

Areas of research in field, emphasis on logic of inquiry and development of strategies for investigating particular problems.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ED PSYCH 710 – SEMINAR IN RESEARCH IN EDUCATIONAL PSYCHOLOGY II**

3 credits.

Planning and conducting empirical research project, with assistance from faculty advisor and course faculty.

**Requisites:** ED PSYCH 709**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ED PSYCH 711 – CURRENT TOPICS IN EDUCATIONAL PSYCHOLOGY**

1-3 credits.

Current issues in educational psychology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ED PSYCH 712 – EDUCATIONAL PSYCHOLOGY DIVERSITY SEMINAR**

1 credit.

Applies principles of educational psychology to the study of various aspects of diversity in human learning and development. Course readings and participation in diversity events sponsored by the department or other university organizations form the basis for class discussions of how diversity impacts the study of educational psychology.

**Requisites:** Declared in Educational Psychology PhD or School Psychology PhD program.**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Acquire a strong foundation in current and past theories, research findings, and methodologies in student's program area.

Audience: Graduate

2. Use critical thinking skills to synthesize existing knowledge, evaluate strengths and limitations in existing theory and research, and identify issues in need of additional inquiry.

Audience: Graduate

3. Demonstrate a knowledge of and sensitivity to human diversity in terms of individual abilities and orientations and sociocultural backgrounds.

Audience: Graduate

### **ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 719 – INTRODUCTION TO QUALITATIVE RESEARCH**

3 credits.

Provides an overview of qualitative inquiry, examining assumptions, standards, and methods for generating and communicating interpretations. Methodological and theoretical works illustrate case study, ethnography, narrative, and action research. Does not include a field method component.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ED PSYCH 720 – CHILD DEVELOPMENT**

3 credits.

Individual development in infancy and childhood. Individual differences in and contextual influences on physical, cognitive, social, and personality development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **ED PSYCH 721 – ADOLESCENT DEVELOPMENT**

3 credits.

Individual differences in and contextual influences on physical, cognitive, social, and personality development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ED PSYCH/COUN PSY 723 – DEVELOPMENTAL PROCESSES ACROSS THE LIFE SPAN**

3 credits.

Life-span perspective on studying individual development from conception to death. Emphasis on multidisciplinary, multidirectional, and contextual approaches to physical, psychological, social, and intellectual developmental processes.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ED PSYCH/HDFS 725 – THEORY AND ISSUES IN HUMAN DEVELOPMENT**

3 credits.

This course covers both classic and contemporary theories, providing students with a firm grounding in the theoretical perspectives that have shaped and are shaping understandings of human development across the life-span. The course explores the historical roots of contemporary perspectives and examines the development of theoretical conceptualizations both within and across theoretical perspectives.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **ED PSYCH/COUN PSY/HDFS 726 – ETHNIC AND RACIAL DIVERSITY IN SOCIAL DEVELOPMENT**

3 credits.

Review of empirical and theoretical research on ethnic/racial diversity in social development across childhood, adolescence and early adulthood with emphasis on implications for counseling and school psychology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **ED PSYCH/COUN PSY/RP & SE 736 – SEMINAR IN PSYCHOLOGY OF INDIVIDUAL DIFFERENCES**

3 credits.

Seminar in the psychology of individual differences, providing broad and general coverage of theory and research related to individual and cultural differences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **ED PSYCH/COUN PSY/RP & SE 737 – SEMINAR IN HISTORY AND SYSTEMS OF PSYCHOLOGY**

3 credits.

Seminar in the history of psychology, providing broad and general coverage of the development of psychology as a scientific discipline. Includes coverage of philosophy of science and systems of psychological inquiry, with applications to current research in psychology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ED PSYCH 740 – COGNITIVE ASSESSMENT OF CHILDREN IN THE SCHOOLS**

3 credits.

Theories of intelligence and intelligence testing, construction and validation of the Binet and Wechsler tests, administration of tests, interpretation of test results and report writing, recent research in intelligence testing.

**Requisites:** ED PSYCH 760**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ED PSYCH 741 – SOCIAL, EMOTIONAL, AND BEHAVIORAL ASSESSMENT**

3 credits.

Knowledge and skills necessary to conduct comprehensive assessments of social, emotional, and behavioral difficulties in children and adolescents; theoretical foundations; assessment procedures and instruments; diagnostic and eligibility criteria; early identification and intervention.

**Requisites:** ED PSYCH 740**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ED PSYCH 742 – ASSESSMENT AND INTERVENTION FOR ACADEMIC SKILL PROBLEMS**

3 credits.

Assessment methods and intervention strategies for children with academic skill problems in educational settings; practice in application of assessment and intervention approaches to case studies.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ED PSYCH 743 – DESIGN AND ANALYSIS OF SINGLE-CASE RESEARCH**

3 credits.

Increases the capacity of graduate students to conduct high-quality single-case intervention research, by improving the scientific credibility of both the methodology; and the visual and statistical analysis of their studies. Equip skills and knowledge to critically analyze published intervention research and to implement quality intervention research studies.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ED PSYCH 745 – DESIGNING AND MANAGING THE LEARNING ENVIRONMENT**

2 credits.

Provides knowledge and skills necessary to effectively and efficiently engage with students and manage the classroom environment. Ability to support the academic and social-emotional growth of children enhanced through knowledge gained regarding children's self-regulation, motivation, school climate, multi-tiered behavioral interventions, and school wide positive behavior support.

**Requisites:** Declared in Educational Psychology: Professional Educator (MSPE)**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe several models of classroom management and identify those that will guide your teaching practices.

Audience: Graduate

2. Identify variables, in particular teacher practices, which affect classroom climate and strategies to facilitate a positive climate.

Audience: Graduate

3. Effectively structure the learning environment and activities.

Audience: Graduate

4. Identify factors that influence students' motivation to achieve in school and identify means to increase student motivation.

Audience: Graduate

5. Identify and teach the skills students need to become self-regulated learners.

Audience: Graduate

6. Analyze challenging behavior in the classroom and apply positive behavioral strategies and supports in class-wide and individual interventions with students.

Audience: Graduate

7. Identify strategies for working effectively with students' families in order to facilitate student development and achievement.

Audience: Graduate

8. Identify school/district policies and procedures that impact classroom management.

Audience: Graduate

**ED PSYCH 752 – ENGAGING WITH EDUCATION RESEARCH**

3 credits.

An introduction to issues in consuming and conducting education research. Focus on research paradigms and methods frequently used in education research.

**Requisites:** Declared in Educational Psychology: Professional Educator (MSPE), MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe several approaches to educational research and identify them in research articles

Audience: Graduate

2. Review the literature in education and develop research questions  
Audience: Graduate

3. Critically evaluate the quality of a research article and identify the limitations of a study  
Audience: Graduate

4. Identify issues related to research ethics  
Audience: Graduate

5. Prepare a literature review using APA citation and format style  
Audience: Graduate

6. Connect research literature to issues of policy and practice  
Audience: Graduate

**ED PSYCH 760 – STATISTICAL METHODS APPLIED TO EDUCATION I**

3 credits.

Introductory descriptive statistics and statistical inference; measures of central tendency and variability, confidence intervals, theory of hypothesis testing, correlation techniques.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ED PSYCH 761 – STATISTICAL METHODS APPLIED TO EDUCATION II**

3 credits.

Analysis of variance and covariance, multiple linear regression; chi-square and various nonparametric techniques.

**Requisites:** ED PSYCH 760

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ED PSYCH 762 – INTRODUCTION TO THE DESIGN OF EDUCATIONAL EXPERIMENTS**

3 credits.

Classical experimental designs and their application to educational research, factorial treatment arrangements, confounding, repeated measures design, and related topics.

**Requisites:** ED PSYCH 761

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ED PSYCH 763 – REGRESSION MODELS IN EDUCATION**

3 credits.

An applied introduction to regression techniques is given, covering nonparametric regression, multiple linear regression and logistic regression. All applied analyses are done in the statistical programming language R.

**Requisites:** ED PSYCH 761

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ED PSYCH/COMP SCI/PSYCH 770 – HUMAN-COMPUTER INTERACTION**

3 credits.

Principles of human-computer interaction (HCI); human subjects research methods and procedures, qualitative and quantitative data analysis; and semester-long research project situated in critical domains of HCI, including applications in ubiquitous, affective, assistive, social, and embodied computing.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ED PSYCH 771 – TEST CONSTRUCTION**

3 credits.

Procedures for development and analysis of educational tests and questionnaires; strategies for measurement of achievement, attitude, and interests; procedures for item analysis and assessment of reliability and validity.

**Requisites:** ED PSYCH 760

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ED PSYCH 773 – FACTOR ANALYSIS, MULTIDIMENSIONAL SCALING AND CLUSTER ANALYSIS**

3 credits.

Major types of factor models, nonmetric multidimensional scaling methods and clustering procedures. Methods of data collection, mathematical algorithms, estimating the number of factors, transformation and identification of factors.

**Requisites:** ED PSYCH 761**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ED PSYCH/ELPA 780 – TEACHER LEADERSHIP AND LEARNING COMMUNITIES**

3-4 credits.

Focuses on knowledge and skills teachers need to be leaders in their schools in facilitating the development of strong learning communities that include students, teachers, families, administrators, and other educators. Understand key concepts, theories, and models used in building and sustaining effective learning communities; develop skills in creating practices that contribute to effective teacher leadership; and identify and strengthen skills needed to lead schools to build learning communities that promote student learning.

**Requisites:** Declared in Educational Psychology: Professional Educator (MSPE)**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2020**ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 788 – QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD METHODS I**

3 credits.

Introductory field methods experience in qualitative research. Learn to define good research questions, determine which methods of data collection and analysis are useful for addressing those questions, engage in these methods, reflect on their utility in education research.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 719**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 789 – QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD METHODS II**

3 credits.

Focus on data analysis and translation of finds and implications. Gain theoretical and practical knowledge and skills regarding coding and analysis techniques, use of qualitative analytic tools, strategies for sharing findings with audiences beyond research team.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 788**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ED PSYCH 791 – MASTER OF SCIENCE FOR PROFESSIONAL EDUCATORS CAPSTONE**

1-4 credits.

Culminating project that must be completed successfully to qualify to earn the degree. Integrates knowledge, skills, and experiential learning to demonstrate a broad mastery of learning across the program curriculum.

**Requisites:** Declared in Educational Psychology: Professional Educator (MSPE)**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate the application of knowledge from the courses taken in the MSPE program by completing a personalized thesis project, either using evidence-based or researched-based practices.

Audience: Graduate

2. Compile evidence of mastery of evidence-based practices, and information resources to engage and challenge all learners that lead to content knowledge, critical thinking, creativity, self-evaluation, and self-directed learning.

Audience: Graduate

3. Develop and provide a presentation that incorporates reflection of knowledge and skills gained during engagement in the MSPE program.

Audience: Graduate

**ED PSYCH 795 – INTRODUCTION TO LEARNING SCIENCES I**

3 credits.

Survey of major theories and elementary cognitive and social processes in learning.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**ED PSYCH 796 – INTRODUCTION TO THE LEARNING SCIENCES II**

3 credits.

Principles of learning emphasizing higher order cognitive and social processes.

**Requisites:** ED PSYCH 795

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ED PSYCH/CURRIC/L I S 803 – COMPUTATIONAL RESEARCH METHODS**

3 credits.

Provides a broad overview of ways of formulating and investigating novel questions with tools from educational data mining and learning analytics including social network analysis, natural language processing, Markov modeling, Bayesian inference, and agent-based modeling.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ED PSYCH/CURRIC 821 – CONSTRUCTIONISM**

3 credits.

Survey of constructionist theory, research, and tools. Develop a deeper understanding of the history, theories, philosophies, tools, research, and technologies of constructionism and its children.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ED PSYCH/ELPA 822 – INTRODUCTION TO QUANTITATIVE INQUIRY IN EDUCATION**

3 credits.

Utilize the concepts and methods of quantitative social science research to conduct research on education issues. Topics include hypothesis testing, statistical inference, point estimates, graphic and numerical data displays, correlation and regression.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ED PSYCH/ELPA 827 – SURVEYS AND OTHER QUANTITATIVE DATA COLLECTION STRATEGIES**

3 credits.

Methods and concepts of survey research methods as they are commonly used in education research. Strategies include surveys (phone, mail, electronic, in person), logs/diaries, and experience sampling instruments. Emphasis is given to self-administered surveys, including periodic surveys, since these strategies are the most common in education research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ED PSYCH 828 – BEGINNING PRACTICUM IN SCHOOL PSYCHOLOGY**

1 credit.

Develop foundational competencies in the practice of professional psychology, including professional values and attitudes, individual and cultural diversity; ethical standards and policy; reflective practice/self-care; relationships; scientific knowledge and method; and research/evaluation. Develop professional identities as psychologists and emerging clinical skills.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop knowledge related to basic ethical principles that guide the field of school psychology and apply these to school-based practice.

Audience: Graduate

2. Gain understanding of the purpose of supervision in the field of school psychology and develop knowledge of the developmental model of supervision used in the UW-Madison school psychology program.

Audience: Graduate

3. Acquire knowledge of several introductory clinical skills (i.e., building a therapeutic alliance, listening, influencing responses).

Audience: Graduate

4. Apply developing clinical skills in mock and introductory micro-skill activities.

Audience: Graduate

5. Acquire knowledge of school psychology practice through the observation of a school psychologist.

Audience: Graduate

**ED PSYCH 829 – CLINIC PRACTICUM IN SCHOOL PSYCHOLOGY**

3 credits.

Develop competence in broad areas of school psychological practice, including assessment, consultation, and intervention. Deliver a wide range of psychological and educational services to clients including individual and group interventions; academic, social, emotional, and behavioral assessments; and parent and/or teacher consultation.

**Requisites:** ED PSYCH 828

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply foundational skills in clinical supervision and reflective practice to enhance school psychological practice.

Audience: Graduate

2. Develop professional identity and establish professional behaviors necessary to work with a diverse range of clients, including children, adolescents, university students, and families and engage in anti-racist and socially just school psychological practice.

Audience: Graduate

3. Apply skills in psychological assessment, intervention, consultation, supervision, and evaluation through activities and casework in a clinic setting.

Audience: Graduate

4. Identify and apply theoretical foundations relevant to psychological work and articulate case conceptualization applied within casework.

Audience: Graduate

5. Apply diagnostic and classification systems as part of psychoeducational evaluation to identify whether children, adolescents, and university students meet criteria for a range of disabilities and disorders

Audience: Graduate

**ED PSYCH 830 – FIELD PRACTICUM IN SCHOOL PSYCHOLOGY**

6 credits.

Develop competence in delivering school psychological services in a school or other applied setting under the supervision of a practicing psychologist. Provide assessment, consultation, and intervention with increasing independence under the direct supervision of field supervisors and the university coordinator.

**Requisites:** ED PSYCH 829

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply skills in psychological assessment, consultation, intervention, supervision, and evaluation in schools or other field settings under supervision

Audience: Graduate

2. Acquire new skills in psychological assessment, consultation, intervention, supervision, and evaluation through interaction with other professionals in the field and with peers in other field settings

Audience: Graduate

3. Receive constructive feedback about professional skills and behavior from supervisors

Audience: Graduate

4. Acquire knowledge about ethics and law in school psychology through readings, class discussions, and applied experiences

Audience: Graduate

5. Apply knowledge about ethical and legal issues in field settings

Audience: Graduate

6. Gain experience with students in special education settings

Audience: Graduate

7. Analyze the culture, climate, organization, and policies of field settings

Audience: Graduate

8. Examine challenging issues confronting psychologists practicing in schools today

Audience: Graduate

9. Identify models of supervision and factors that influence supervision effectiveness

Audience: Graduate

10. Accrue evidence of applied competencies for inclusion in the School Psychology Portfolio

Audience: Graduate

**ED PSYCH 840 – ADVANCED PRACTICUM IN SCHOOL PSYCHOLOGY**

1 credit.

Expand competence in delivering a range of psychological services in a variety of health service psychology settings. Specific experiences will be individualized and may allow for specialization in a specific area of practice or provide training to enhance foundational skills.

**Requisites:** ED PSYCH 830

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Utilize effective supervisory strategies as a supervisee within a developmental model of supervision.

Audience: Graduate

2. Identify elements of the supervisory relationship that contribute to success as a supervisee.

Audience: Graduate

3. Engage in group supervision with peers in community and university-based advanced practicum sites.

Audience: Graduate

4. Participate in individual supervision with a university-based licensed psychologist.

Audience: Graduate

5. Identify supervision and professional consultation opportunities in the post-doctoral practice.

Audience: Graduate

**ED PSYCH/ED POL/ELPA/RP & SE 842 – LEGAL FOUNDATIONS OF SPECIAL EDUCATION AND PUPIL SERVICES**

3 credits.

Legal requirements and issues relative to special education and pupil services programs; special education, juvenile justice, programs for English language learners, programs for children who are homeless; examination of applicable federal and state statutes and case law.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe various legal issues and identify those issues inherent in the delivery of pupil services.

Audience: Graduate

2. Explain the foundation created by federal disability law (Section 504, ADA, IDEA).

Audience: Graduate

3. Describe the relationship between state and federal law in the delivery of special education.

Audience: Graduate

4. Apply legal principles to a set of facts.

Audience: Graduate

5. Explain the relationship between statutory and regulatory requirements and practice.

Audience: Graduate

6. Identify various analytic frameworks that guide legal analysis.

Audience: Graduate

7. Apply principles and/or frameworks to a situation or issue.

Audience: Graduate

8. Analyze existing policies and practice from a legal perspective.

Audience: Graduate

9. Explain the dynamic nature of this branch of school law and will identify tools and resources available to help them remain current.

Audience: Graduate

**ED PSYCH 844 – CHILDHOOD AND ADOLESCENT PSYCHOPATHOLOGY IN SCHOOLS**

3 credits.

Reviews major psychological disorders of childhood and adolescence as relevant to schools; examines etiology and developmental course, documenting major characteristics and behavior correlates of disorders; provides a comparison of major diagnostic and classification systems for childhood psychopathology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ED PSYCH 845 – PSYCHOPHARMACOLOGICAL TREATMENTS FOR CHILDREN AND ADOLESCENTS**

3 credits.

Provides an overview of psychopharmacological treatments of childhood and adolescent disorders in educational settings. Topics covered include basic biological principles of drugs and drug treatment, specific drug classifications and their biological actions, drug treatments for childhood disorders, and professional issues.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**ED PSYCH 871 – TEST THEORY II**

3 credits.

Theory underlying validity, scoring procedures, prediction and classification, normal, binomial, Poisson and logistic model, including item response theory models.

**Requisites:** ED PSYCH 761**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2020**ED PSYCH/HDFS/NURSING/SOC WORK 880 – PREVENTION SCIENCE**

3 credits.

Theoretical, empirical and practical foundation for prevention science as it relates to the prevention of human social problems. Research and evaluation methods, program design strategies, best practices and policy as they relate to the field of prevention are also examined.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ED PSYCH/HDFS/NURSING/SOC WORK 881 – CAPSTONE SEMINAR IN PREVENTION SCIENCE**

1 credit.

An opportunity to meet with prevention professionals and scholars from across campus and the community to explore current and emerging issues of prevention research and professional practice. Students must complete HDFS/ED PSYCH/NURSING/SOC WORK 880 before taking this course.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**ED PSYCH 921 – SEMINAR IN ADOLESCENT DEVELOPMENT**

2-3 credits.

Selected aspects of intellectual, emotional, physiological, personality and social development in adolescence. Understanding adolescent behavior in educational settings.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2020**ED PSYCH 925 – ADVANCED SEMINAR IN HUMAN DEVELOPMENT**

2-3 credits.

Provides an in-depth review and analysis of specific areas of human development, such as cognitive, moral, language, neurological, social, and personality development.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**ED PSYCH 942 – SYSTEMS OF CONSULTATION IN SCHOOL PSYCHOLOGY**

2-3 credits.

Mental health, behavioral and organization development models of consultation in school psychology. Overview of evidence-based prevention and intervention programs as implemented in a consultation problem-solving process.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ED PSYCH 943 – INTERNSHIP IN SCHOOL PSYCHOLOGY**

1-12 credits.

Supervised individualized placements in appropriate schools, institutions, and community agencies; controlled exposure to job demands of school psychologists; experience in dealing with problem children, adolescents, and their families.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ED PSYCH/SOC WORK 945 – EVALUATION RESEARCH**

3 credits.

A comprehensive introduction to practice of program evaluation research in social welfare and human development. Developments in descriptive, experimental, quasi-experimental, theory-driven, and naturalistic evaluations detailed. Topics include assessment, evaluation design, monitoring, outcome evaluation, selection bias, program theory, meta-analysis and utilization.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ED PSYCH 946 – ADVANCED ASSESSMENT AND INTERVENTION TECHNIQUES**

3 credits.

Advanced assessment practices and the corresponding link to intervention; intervention strategies and programs designed to improve the academic, emotional, behavioral and social functioning of children and adolescents.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ED PSYCH 947 – EVIDENCED-BASED CHILD AND ADOLESCENT PSYCHOTHERAPY**

3 credits.

Critical review of various psychotherapeutic approaches (cognitive, behavioral, psychodynamic) with special emphasis on identifying and implementing evidence-based assessment and interventions for a variety of behavioral and emotional problems experienced by children and adolescents.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ED PSYCH 948 – RESEARCH AND MEASUREMENT SEMINAR IN SCHOOL PSYCHOLOGY**

3 credits.

Focus on research and measurement methods, special topics, technical writing, and ethical principles in conducting research in school psychology. Emphasis on skills needed to design and complete individual research projects.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ED PSYCH 960 – STRUCTURAL EQUATION MODELING**

3 credits.

Introduction to the theory and practice of structural equation modeling in the educational and social sciences, including path analysis, confirmatory factor analysis and hybrid models.

**Requisites:** ED PSYCH 763

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ED PSYCH 963 – DESIGN & ANALYSIS OF QUASI-EXPERIMENTS FOR CAUSAL INFERENCE**

3 credits.

An applied introduction to causal inference with regression discontinuity designs, interrupted time series designs, non-equivalent control group designs (matching designs), and instrumental variable designs is given.

**Requisites:** ED PSYCH 762 and 763

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ED PSYCH 964 – HIERARCHICAL LINEAR MODELING**

3 credits.

Introduction to the statistical methodology of hierarchical linear modeling, including random intercept and random slope and intercept models; models for longitudinal data; and multilevel generalized linear models.

**Requisites:** ED PSYCH 763

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the properties of clustered data and explain statistical treatments of multilevel data

Audience: Graduate

2. Summarize and visualize multilevel data within and across levels

Audience: Graduate

3. Select and apply multilevel models that are appropriate for various forms of clustered data

Audience: Graduate

4. Interpret multilevel analysis results and communicate statistical findings

Audience: Graduate

5. Write a project report for multilevel analysis including program code

Audience: Graduate

**ED PSYCH 965 – APPLIED BAYESIAN STATISTICS FOR EDUCATION RESEARCH**

3 credits.

Covers the basic elements of Bayesian statistics through lecture, discussion and practice. Focuses on why the Bayesian perspective provides a powerful alternative to the frequentist perspective. Topics to be covered include; Bayes' theorem, Markov chain Monte Carlo sampling and the "rjags" program, Bayesian hypothesis testing, Bayesian model building and evaluation, Bayesian approaches to missing data, Bayesian model averaging, Bayesian multilevel models and latent variable models, and philosophical debates within the Bayesian paradigm of statistics.

**Requisites:** ED PSYCH 763

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand, analyze and write up an empirical study using methods of Bayesian statistical inference.

Audience: Graduate

2. Analyze and properly interpret data from a Bayesian perspective.

Audience: Graduate

**ED PSYCH 967 – META-ANALYSIS**

3 credits.

Meta-analysis is the set of statistical methods and practices for synthesizing evidence collected from multiple sources, such as multiple studies on the same topic. Often conducted as part of a systematic literature review, meta-analyses play an increasingly prominent role in education research, psychology, and many other areas of social and behavior science. Covers the stages of the research synthesis process and the statistical methods used for conducting quantitative syntheses of social-scientific research. Focus on practical application and interpretation of meta-analytic methods, enriched with discussion of underlying statistical theory. Major topics include the scope of research syntheses, systematic search and screening procedures, effect size calculations, summary meta-analysis, meta-regression, dependent effect sizes, selective reporting and publication bias analysis.

**Requisites:** ED PSYCH 763

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Conduct a systematic, replicable search of literature databases for purposes of identifying studies eligible for a meta-analysis.

Audience: Graduate

2. Extract data and calculate effect sizes and associated information from primary study reports.

Audience: Graduate

3. Analyze meta-analytic databases using appropriate statistical techniques.

Audience: Graduate

4. Interpret and critically evaluate the results of summary meta-analyses, meta-regression analyses, and publication bias analyses.

Audience: Graduate

5. Identify limitations and threats to the validity of meta-analytic findings.

Audience: Graduate

**ED PSYCH 971 – ADVANCED SEMINAR IN EDUCATIONAL MEASUREMENT AND STATISTICS**

1-2 credits.

Discuss a different current article from the educational statistics and measurement literature. Explore a variety of subjects in which one might like to eventually conduct research.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**ED PSYCH 990 – RESEARCH OR THESIS**

1-12 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ED PSYCH/COUN PSY/PSYCH/RP & SE 995 – PREDOCTORAL INTERNSHIP**

0 credits.

Registration for Ph.D. students who have successfully defended the dissertation and are in the process of completing the required predoctoral internship.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ED PSYCH 999 – INDEPENDENT READING**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

# ELECTRICAL AND COMPUTER ENGINEERING (E C E)

**E C E 1 – COOPERATIVE EDUCATION PROGRAM**

1 credit.

Work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career.

**Requisites:** Sophomore standing or member of Engineering Guest Students

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Undergraduate

**E C E 203 – SIGNALS, INFORMATION, AND COMPUTATION**

3 credits.

Introduction to the signals, information, and computational techniques in electrical engineering.

**Requisites:** (MATH 211, 217, or 221) or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Manipulate complex numbers in the context of representing sinusoids

Audience: Undergraduate

2. Represent periodic continuous-time signals using the Fourier series

Audience: Undergraduate

3. Represent finite-duration discrete-time signals using the discrete Fourier transform

Audience: Undergraduate

4. Determine sampling parameters for analog-to-digital conversion of signals

Audience: Undergraduate

5. Apply digital filters to discrete-time signals

Audience: Undergraduate

6. Write code using numerical computing software to manipulate signals

Audience: Undergraduate

**E C E 204 – DATA SCIENCE & ENGINEERING**

3 credits.

A hands-on introduction to Data Science using the Python programming language. Data-centric and computational thinking. Describe, analyze, and make predictions using data from real-world phenomena. Programming in Python. Importing, manipulating, summarizing, and visualizing data of various types. Notions of bias, fairness, and ethics in data science.

**Requisites:** MATH 112, 114, 171, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Write working code in Python to import, manipulate, analyze, visualize, and otherwise interact with datasets of various types.

Audience: Undergraduate

2. Perform descriptive analyses to extract, summarize, and interpret salient features from datasets.

Audience: Undergraduate

3. Perform predictive analyses to model trends and make predictions from datasets.

Audience: Undergraduate

4. Apply techniques to identify and clean data that contains missing entries, outliers, or other forms of noise or uncertainty.

Audience: Undergraduate

5. Recognize and evaluate potential issues pertaining to bias, fairness, privacy, and ethics in applying data science techniques.

Audience: Undergraduate

### **E C E 210 – INTRODUCTORY EXPERIENCE IN ELECTRICAL ENGINEERING**

2 credits.

An introduction to electrical and electronic devices, circuits and systems including software and hardware focusing on a real-world project.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Create and read electrical circuit schematics and systematically assemble them on a breadboard using discrete components

Audience: Undergraduate

2. Verify operation of electrical circuits using electrical measuring instruments such as multimeters and oscilloscopes

Audience: Undergraduate

3. Use a microcontroller with computer coding to read digital/analog signals, and provide digital/analog outputs that perform simple electrical functions

Audience: Undergraduate

4. Communicate test results from electrical measurements using tables and charts

Audience: Undergraduate

5. Perform simple electrical circuit calculations on quantities such as power, energy, voltage, current, frequency and time

Audience: Undergraduate

### **E C E 219 – ANALYTICAL METHODS FOR ELECTROMAGNETICS ENGINEERING**

2 credits.

Reviews basic calculations in electromagnetic engineering upon which all higher level concepts and physical model construction are based. It emphasizes quantitative calculation mastery in three spatial dimensions.

Applies analysis tools from vector calculus to the calculation and prediction of electrical system properties. Examples include calculating electric and magnetic fields, electric potentials, total electric charge, and electric flux from charge or current sources.

**Requisites:** MATH 234 or 376, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Describe infinitesimal increments (length, area, volume) using cartesian, cylindrical, and spherical coordinates

Audience: Undergraduate

2. Compute partial derivatives, gradient, divergence, and curl using cartesian, cylindrical, and spherical coordinates, applied to basic electrostatics and magnetostatics problems

Audience: Undergraduate

3. Compute flux integrals, line integrals, and circulation using cartesian, cylindrical, and spherical coordinates, applied to basic electrostatics and magnetostatics problems

Audience: Undergraduate

4. Calculate total electric charge from specified charge distributions

Audience: Undergraduate

5. Calculate electric fields from specified charge distributions (Coulomb's Law)

Audience: Undergraduate

6. Calculate electric fields from electrostatic potentials

Audience: Undergraduate

7. Calculate electrostatic potentials from electric fields

Audience: Undergraduate

**E C E 220 – ELECTRODYNAMICS I**

3 credits.

Potential theory; static and dynamic electric and magnetic fields; macroscopic theory of dielectric and magnetic materials; Maxwell's equations; boundary conditions; wave equation; introduction to transmission lines.

**Requisites:** (PHYSICS 202, 208, or 248) and E C E 219, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Calculate static electric and magnetic fields from charge and current distributions

Audience: Undergraduate

2. Use concepts of electric and magnetic fields to calculate forces, work, and energy

Audience: Undergraduate

3. Develop expressions for macroscopic electric circuit lumped parameters such as inductance and capacitance by applying principles of electric and magnetic fields

Audience: Undergraduate

4. Use boundary conditions on electric and magnetic fields to compute field changes at material discontinuities

Audience: Undergraduate

5. Apply bounce diagrams to calculate time and space distribution of currents and voltages on transmission lines

Audience: Undergraduate

**E C E 222 – ELECTRODYNAMICS I**

4 credits.

Vector calculus application to electrodynamics problems; potential theory; static and dynamic electric and magnetic fields; macroscopic theory of dielectric and magnetic materials; Maxwell's equations; boundary conditions; wave equation; introduction to transmission lines.

**Requisites:** (PHYSICS 202, 208, or 248) and (MATH 234 or 376) or member of Engineering Guest Students. Not open to students with credit in E C E 220.

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply concepts from single-variable and vector calculus to solve electrodynamics problems

Audience: Undergraduate

2. Calculate static electric and magnetic fields from charge and current distributions

Audience: Undergraduate

3. Use concepts of electric and magnetic fields to calculate forces, work, and energy

Audience: Undergraduate

4. Use boundary conditions on electric and magnetic fields to compute field changes at interfaces between materials

Audience: Undergraduate

5. Develop expressions for macroscopic electric circuit lumped parameters such as inductance and capacitance by applying principles of electric and magnetic fields

Audience: Undergraduate

6. Apply bounce diagrams to calculate time and space distribution of currents and voltages on transmission lines

Audience: Undergraduate

**E C E 230 – CIRCUIT ANALYSIS**

4 credits.

Ohm's law, Kirchhoff's laws, resistive circuits, nodal and mesh analysis, superposition, equivalent circuits using Thevenin-Norton theories, op amps and op amp circuits, first-order circuits, second-order circuits, sinusoidal steady state, phasors, RMS value, complex power, power factor, mutual inductance, linear and ideal transformers, ideal filters and transfer functions.

**Requisites:** MATH 222 and (PHYSICS 202, 208, or 248), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Solve DC electric circuits composed of resistors, voltage and current sources using Kirchhoff's laws, employing node-voltage and mesh-current analysis along with Thevenin and Norton equivalent circuits

Audience: Undergraduate

2. Analyze circuits employing op amps

Audience: Undergraduate

3. Formulate transient response of first-order and second-order electric circuits incorporating resistors, inductors, capacitors and sources that are switched

Audience: Undergraduate

4. Determine AC steady-state response of electric circuits utilizing phasors and calculation with complex numbers

Audience: Undergraduate

5. Characterize the complex power transferred to and from electric circuits

Audience: Undergraduate

6. Conduct AC analysis of circuits with transformers

Audience: Undergraduate

**E C E/PHYSICS 235 – INTRODUCTION TO SOLID STATE ELECTRONICS**

3 credits.

An introduction to the physical principles underlying solid-state electronic and photonic devices, including elements of quantum mechanics, crystal structure, semiconductor band theory, carrier statistics, and band diagrams. Offers examples of modern semiconductor structures. Prior experience with MATLAB [such as E C E 203] is strongly encouraged but not required.

**Requisites:** MATH 222 and (PHYSICS 202, 208, or 248), or member of Engineering Guest Students

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E C E/COMP SCI 252 – INTRODUCTION TO COMPUTER ENGINEERING**

3 credits.

Logic components built with transistors, rudimentary Boolean algebra, basic combinational logic design, basic synchronous sequential logic design, basic computer organization and design, introductory machine- and assembly-language programming.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Perform basic operations on binary representations for data

Audience: Undergraduate

2. Analyze simple combinational and sequential digital logic and memory systems

Audience: Undergraduate

3. Identify the components and operation of an instruction set processor and write programs using assembly language

Audience: Undergraduate

4. Recognize and analyze ethical and professional responsibilities in engineering contexts

Audience: Undergraduate

**E C E 270 – CIRCUITS LABORATORY I**

1 credit.

Experiments cover Kirchhoff's laws, inductors, basic operational amplifier circuits, and frequency response.

**Requisites:** E C E 210 and (E C E 230 or concurrent enrollment), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Compare physical electronic circuit functionality to simulated functionality using computer models

Audience: Undergraduate

2. Create and read electronic circuit schematics and systematically assemble them on a breadboard using discrete components

Audience: Undergraduate

3. Identify electronic components using electronic instruments such as multi-meters, signal generators and oscilloscopes

Audience: Undergraduate

4. Operate electronic circuits with electrical sources such as power supplies and signal generators

Audience: Undergraduate

5. Verify operation of electrical circuits using electronic measuring instruments such as multi-meters and oscilloscopes

Audience: Undergraduate

6. Perform simple electronic circuit calculations on quantities such as voltage, current, power, frequency and time

Audience: Undergraduate

7. Communicate test results from electrical measurements using tables, equations and charts

Audience: Undergraduate

**E C E 271 – CIRCUITS LABORATORY II**

1 credit.

Experiments cover electronic device characteristics, limitations and applications of operational amplifiers, and feedback circuits.

**Requisites:** E C E 270 and (E C E 340 or concurrent enrollment), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Predict electronic circuit outcomes using equations and simulations

Audience: Undergraduate

2. Compare physical electronic circuit functionality to predicted functionality using computer models

Audience: Undergraduate

3. Specify analog circuits to perform linear signal processing with passive and active components such as resistors, capacitors, inductors, transistors and op-amps

Audience: Undergraduate

4. Specify analog circuits to perform non-linear signal processing with passive and active components such as diodes, transistors and op-amps

Audience: Undergraduate

5. Construct circuits to implement linear signal processing such as gain

Audience: Undergraduate

6. Construct circuits to implement non-linear signal processing such as converting AC to DC and boosting DC voltages

Audience: Undergraduate

7. Communicate test results from electrical measurements using tables, equations and charts

Audience: Undergraduate

**E C E 303 – INTRODUCTION TO REAL-TIME DIGITAL SIGNAL PROCESSING**

2 credits.

Emphasizes the implementation of DSP algorithms on a digital signal processor in "real-time." Many of the signal processing algorithms that were used in E C E 203 will be reviewed in MATLAB and then will be implemented on a floating point signal processor in "real-time" using the C programming language. Explore many basic digital signal processing processes in real-time. Gain the ability to create and develop your own Digital Signal Processing projects for a modern digital signal processor using an Integrated Development Environment. Lab hardware will be provided.

**Requisites:** E C E 203 or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define what it means for a system to be real-time  
Audience: Undergraduate

2. Implement a real-time signal processing platform for real-time system evaluation  
Audience: Undergraduate

3. Operate a signal processing system to evaluate real-time software performance  
Audience: Undergraduate

4. Analyze the performance of real-time software  
Audience: Undergraduate

5. Optimize the software performance of a real-time system  
Audience: Undergraduate

6. Verify the software performance of a real-time system  
Audience: Undergraduate

7. Communicate results from real-time systems using tables, equations and graphs  
Audience: Undergraduate

**E C E 304 – ELECTRIC MACHINES LABORATORY**

1 credit.

Terminal characteristics of electric machines, elements of speed control, voltage regulation, and applications in systems. Emphasis on the experimental approach to the solution of complex physical problems.

**Requisites:** (E C E 355, 356, or concurrent enrollment) or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the performance characteristics of electric machines, including dc, induction, and synchronous machines  
Audience: Undergraduate

2. Use laboratory instrumentation and techniques to take accurate measurements of the performance characteristics of ac machines and their drives  
Audience: Undergraduate

3. Prepare high-quality lab reports that accurately and clearly present the results of the experimental tests with explanations of the rationale for the test results, including discussion of discrepancies  
Audience: Undergraduate

4. Follow laboratory safety procedures for safely working with ac machines and drives when making experimental measurements  
Audience: Undergraduate

**E C E 305 – SEMICONDUCTOR PROPERTIES LABORATORY**

1 credit.

Introduction to some fundamental properties of semiconductor materials and devices through the use of characterization techniques common in modern electronic industry. These concepts include: charge carriers; energy bands; space charge regions; carrier drift, diffusion and recombination; light emission; and lattice vibrations.

**Requisites:** E C E 271 and (E C E 335 or concurrent enrollment), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the relationship between semiconductor material properties and semiconductor device properties, such as mobility, capacitance, and spontaneous/stimulated light emission  
Audience: Undergraduate

2. Perform electrical and optical characterization measurements using laboratory instruments  
Audience: Undergraduate

3. Write technical reports based on experimental results  
Audience: Undergraduate

**E C E 313 – OPTOELECTRONICS LAB**

1 credit.

Light detection using photovoltaic and photoconductive detectors and phototransistors. Light generation using light emitting diodes and laser diodes. Light transmission using optical fibers. Optoisolators and optical switches. Light emitting diode and liquid crystal displays.

**Requisites:** E C E 271 and 340, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the relationship between the light emission/detection properties of semiconductors, and the operation of optoelectronic devices, such as light emitting diodes (LEDs), lasers and optical fibers

Audience: Undergraduate

2. Perform optical characterization measurements using laboratory instruments

Audience: Undergraduate

3. Write technical reports based on experimental results

Audience: Undergraduate

**E C E 315 – INTRODUCTORY MICROPROCESSOR LABORATORY**

1 credit.

Software and hardware experiments with a microcomputer system. Assembly language programming, simple input/output interfacing, and interrupt processing in microcomputer systems.

**Requisites:** E C E 353 or concurrent enrollment, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a schematic design using CAD tools for an embedded system

Audience: Undergraduate

2. Design a printed circuit board (PCB) for an embedded system using CAD tools

Audience: Undergraduate

3. Assemble an embedded system on a printed circuit board (PCB)

Audience: Undergraduate

4. Write firmware used to control an embedded system

Audience: Undergraduate

**E C E 317 – SENSORS LABORATORY**

1 credit.

A hands-on introduction to a variety of different sensor types. Labs incorporate implementation concerns involving interference, isolation, linearity, amplification, and grounding.

**Requisites:** E C E 271 and (E C E 340 or concurrent enrollment), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Predict electronic circuit outcomes using equations and simulations

Audience: Undergraduate

2. Compare physical electronic circuit functionality to predicted functionality

Audience: Undergraduate

3. Specify the analog signal processing required to generate usable sensor signals

Audience: Undergraduate

4. Design electronic circuits with the necessary signal processing to convert sensor signals to usable electronic signals

Audience: Undergraduate

5. Construct electronic circuits to process sensors signals

Audience: Undergraduate

6. Verify operation of sensor signal processing circuits using electronic measuring instruments such as multi-meters, oscilloscopes and spectrum analyzers

Audience: Undergraduate

7. Communicate test results from electrical measurements using tables, equations and graphs

Audience: Undergraduate

**E C E 320 – ELECTRODYNAMICS II**

3 credits.

Static and dynamic electromagnetic fields; forces and work in electromechanical systems; magnetic circuits; plane wave propagation; reflection of plane waves; generalized transmission line equations; current and voltage on transmission lines; impedance transformation and matching; Smith charts.

**Requisites:** E C E 220, 222, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply Faraday's law to calculate emf induced by time changing magnetic fields

Audience: Undergraduate

2. Use Maxwell's equations to develop the wave equation for electromagnetic fields

Audience: Undergraduate

3. Calculate propagation of plane waves in various media and reflection and refraction at media discontinuities

Audience: Undergraduate

4. Compute voltages and currents on transmission lines under time harmonic excitation

Audience: Undergraduate

5. Use matching techniques to eliminate reflections from mismatched loads on transmission lines

Audience: Undergraduate

**E C E 330 – SIGNALS AND SYSTEMS**

3 credits.

Time-domain response and convolution; frequency-domain response using Fourier series, Fourier transform, Laplace transform; discrete Fourier series and transform; sampling; z-transform; relationships between time and frequency descriptions of discrete and continuous signals and systems.

**Requisites:** E C E 203 or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Determine whether a system is linear, time-invariant, stable, and/or causal

Audience: Undergraduate

2. Convert between time-domain and frequency-domain representations of signals

Audience: Undergraduate

3. Analyze the behavior of continuous-time and discrete-time systems using time-domain and frequency-domain techniques

Audience: Undergraduate

4. Compute and evaluate single-input single-output transfer functions from differential and difference equations

Audience: Undergraduate

5. Perform discrete-time processing of continuous-time signals using sampling, filtering, and reconstruction

Audience: Undergraduate

**E C E 331 – INTRODUCTION TO RANDOM SIGNAL ANALYSIS AND STATISTICS**

3 credits.

Introduction to probability, random variables, and random processes. Confidence intervals, introduction to experimental design and hypothesis testing. Statistical averages, correlation, and spectral analysis for wide sense stationary processes. Random signals and noise in linear systems.

**Requisites:** (E C E 203 or 330) or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a working knowledge of the basic axioms and identities of probability theory

Audience: Undergraduate

2. Determine probability distributions for different random variables

Audience: Undergraduate

3. Apply properties of expectation and variance to functions of random variables

Audience: Undergraduate

4. Apply basic statistical methods for parameter estimation

Audience: Undergraduate

5. Apply the methods of probability to everyday problems

Audience: Undergraduate

**E C E 332 – FEEDBACK CONTROL SYSTEMS**

3 credits.

Modeling of continuous systems; computer-aided solutions to systems problems; feedback control systems; stability, frequency response and transient response using root locus, frequency domain and state variable methods.

**Requisites:** E C E 330 or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply Laplace Transforms to problems in control

Audience: Undergraduate

2. Employ symbolic computations and apply numerical methods to the simulation and analysis of control systems

Audience: Undergraduate

3. Design control systems using frequency response methods and Bode Diagrams

Audience: Undergraduate

4. Formulate and manipulate signal flow graphs and block diagrams to characterize systems

Audience: Undergraduate

5. Evaluate stability of systems

Audience: Undergraduate

**E C E 334 – STATE SPACE SYSTEMS ANALYSIS**

3 credits.

Analysis of systems using matrix methods to write and solve state-variable differential equations. Additional topics include stability, controllability, observability, state feedback, observers, and dynamic output feedback.

**Requisites:** E C E 330, MATH 319, 320, 376, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate state-space models of engineering systems

Audience: Undergraduate

2. Understand solutions of ordinary differential equations (ODE) and visualize them using vector fields and phase portraits

Audience: Undergraduate

3. Linearize nonlinear state-space models and understand the limitations of linear systems analysis

Audience: Undergraduate

4. Solve a system of linear differential equations using matrix exponentials, diagonalizations, and Jordan normal forms

Audience: Undergraduate

5. Systematically analyze linear state-space systems using matrix methods

Audience: Undergraduate

6. Understand and fluently use concepts such as: time-invariance, stability, controllability, and observability

Audience: Undergraduate

7. Design linear state-feedback controllers and observers

Audience: Undergraduate

**E C E 335 – MICROELECTRONIC DEVICES**

3 credits.

Characteristics of semiconductors; study of physical mechanisms and circuit modeling of solid state electronic and photonic devices; principles of microelectronic processing and examples of integrated circuits.

**Requisites:** (E C E 220 or 222), E C E 230, and PHYSICS/E C E 235, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the physical operation of microelectronic devices, such as diodes, bipolar junction transistors, and field-effect transistors

Audience: Undergraduate

2. Identify design tradeoffs for electronic devices

Audience: Undergraduate

3. Identify, evaluate and explain basic microelectronic processing techniques for device fabrication

Audience: Undergraduate

4. Summarize basic semiconductor materials and their properties and implement them to examine new and emerging materials

Audience: Undergraduate

**E C E 340 – ELECTRONIC CIRCUITS I**

3 credits.

A first course in modeling, characterization, and application of semiconductor devices and integrated circuits. Development of appropriate models for circuit-level behavior of diodes, bi-polar and field effect transistors, and non-ideal op-amps. Application in analysis and design of linear amplifiers. Frequency domain characterization of transistor circuits.

**Requisites:** (E C E 203 and 230) or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze functions and DC and AC operations of diodes, metal-oxide-semiconductor field transistors, and bipolar junction transistors

Audience: Undergraduate

2. Utilize large and small signal models of diodes, metal-oxide-semiconductor field transistors and bipolar junction transistors in analysis of analog circuits

Audience: Undergraduate

3. Analyze and design single stage analog amplifiers

Audience: Undergraduate

4. Analyze and design basic differential amplifiers and multistage amplifiers

Audience: Undergraduate

5. Analyze basic operational amplifier circuits

Audience: Undergraduate

**E C E 342 – ELECTRONIC CIRCUITS II**

3 credits.

A second course in modeling and application of semiconductor devices and integrated circuits. Advanced transistor amplifier analysis, including feedback effects. Design for power amplifiers, op-amps, analog filters, oscillators, A/D and D/A converters, and power converters. Introduction to transistor level design of CMOS digital circuits.

**Requisites:** E C E 340 or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the topologies of feedback amplifiers

Audience: Undergraduate

2. Describe the uses of different feedback amplifier topologies

Audience: Undergraduate

3. Describe the input and output impedances associated with each topology

Audience: Undergraduate

4. Calculate the gain and input and output impedances of feedback amplifiers

Audience: Undergraduate

5. Design feedback amplifiers for specific applications

Audience: Undergraduate

6. Calculate frequency response and stability of feedback amplifiers

Audience: Undergraduate

**E C E/COMP SCI 352 – DIGITAL SYSTEM FUNDAMENTALS**

3 credits.

Logic components, Boolean algebra, combinational logic analysis and synthesis, synchronous and asynchronous sequential logic analysis and design, digital subsystems, computer organization and design.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and E C E/COMP SCI 252

**Course Designation:** Gen Ed – Quantitative Reasoning Part B

Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform operations on signed and unsigned numbers, including evaluating overflow

Audience: Undergraduate

2. Implement Boolean logic circuits, use Boolean identities to perform algebraic manipulations, use Karnaugh maps to implement any function of 4 variables, use DeMorgans's Theorem, implement any function as SOP or POS

Audience: Undergraduate

3. Design datapath circuits, decoders, muxes, priority encoders, tri-states, understand hierarchy and how to build up larger datapaths from blocks, design ALUs and other digital circuits using rudimentary HDL constructs

Audience: Undergraduate

4. Design sequential circuits, analyze synchronous vs. asynchronous designs and flip-flops vs. latches, trace the behavior of a sequential circuit, design state machines for control Logic

Audience: Undergraduate

5. Analyze basic processor architecture, define a control word and analyze operation of the datapath in relation to it, describe the basic operation of a single-cycle stored program computer

Audience: Undergraduate

**E C E 353 – INTRODUCTION TO MICROPROCESSOR SYSTEMS**

3 credits.

Introduction to architecture, operation, and application of microprocessors; microprocessor programming; address decoding; system timing; parallel, serial, and analog I/O; interrupts and direct memory access; interfacing to static and dynamic RAM; microcontrollers.

**Requisites:** E C E/COMP SCI 252 and COMP SCI 300, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Program a microcontroller to meet functional requirements of an embedded system

Audience: Undergraduate

2. Write, debug, and optimize programs for an efficient embedded system

Audience: Undergraduate

3. Interface a microcontroller to various on-chip and off-chip peripherals

Audience: Undergraduate

4. Design and implement a microcontroller-based embedded system

Audience: Undergraduate

5. Interpret technical documents related to embedded system components

Audience: Undergraduate

**E C E/COMP SCI 354 – MACHINE ORGANIZATION AND PROGRAMMING**

3 credits.

An introduction to fundamental structures of computer systems and the C programming language with a focus on the low-level interrelationships and impacts on performance. Topics include the virtual address space and virtual memory, the heap and dynamic memory management, the memory hierarchy and caching, assembly language and the stack, communication and interrupts/signals, compiling and assemblers/linkers.

**Requisites:** E C E/COMP SCI 252 and (COMP SCI 300 or 302) or graduate/professional standing or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**E C E 355 – ELECTROMECHANICAL ENERGY CONVERSION**

3 credits.

Energy storage and conversion, force and emf production, coupled circuit analysis of systems with both electrical and mechanical inputs. Applications to electric motors and generators and other electromechanical transducers.

**Requisites:** E C E 230 or 376, graduate/professional standing, member of Engineering Guest Students, or declared in Capstone Certificate in Power Conversion and Control

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the theory underlying energy conversion between electrical and mechanical systems

Audience: Undergraduate

2. Apply analysis techniques for analyzing electric power flow for single and three phase systems including the effects of harmonics

Audience: Undergraduate

3. Apply knowledge of magnetics concepts for use in transformers, actuators and electromechanical energy conversion devices

Audience: Undergraduate

4. Explain fundamental understanding of Lorentz force machines including dc, induction and synchronous types

Audience: Undergraduate

5. Define and specify power converters and supply systems for application circuits and systems

Audience: Undergraduate

6. Identify operational and design features of electric utility power systems

Audience: Undergraduate

**E C E 356 – ELECTRIC POWER PROCESSING FOR ALTERNATIVE ENERGY SYSTEMS**

3 credits.

Introduction to electrical power processing technologies that are necessary to convert energy from alternative sources into useful electrical forms. Several specific alternative energy sources are examined, providing platforms for introducing basic concepts in power electronics, electric machines, and adjustable-speed drives.

**Requisites:** (E C E 230 or 376) or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Analyze and design small-scale solar electric systems

Audience: Undergraduate

2. Analyze and design small-scale wind turbine electric systems

Audience: Undergraduate

3. Analyze and design small-scale electric energy storage systems

Audience: Undergraduate

4. Analyze simple electric transportation drivetrains

Audience: Undergraduate

5. Analyze sustainability practices in electrical energy systems

Audience: Undergraduate

**E C E 370 – ADVANCED LABORATORY**

2 credits.

Experiments related to the required core material.

**Requisites:** E C E 271 and (E C E 340 or concurrent enrollment), or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Predict electronic circuit outcomes using equations and simulations

Audience: Undergraduate

2. Build functional electronic sub-systems

Audience: Undergraduate

3. Compare electronic circuit functionality to predicted functionality

Audience: Undergraduate

4. Debug non-functional electronic sub-systems using prediction and measurement tools

Audience: Undergraduate

5. Repair non-functional electronic sub-systems using hardware corrective techniques

Audience: Undergraduate

6. Combine electronic sub-systems into an electronic control system

Audience: Undergraduate

7. Verify electronic system performance utilizing multi-meters, signal generators, and oscilloscopes

Audience: Undergraduate

**E C E 376 – ELECTRICAL AND ELECTRONIC CIRCUITS**

3 credits.

Ohm's law, Kirchhoff's laws, resistive circuits, nodal and mesh analysis, superposition, equivalent circuits using Thevenin and Norton Theorems, op amps and op amp circuits, capacitors and inductors in first-order circuits, sinusoidal steady state, phasors, RMS value, complex power, power factor, mutual inductance, linear and ideal transformers.

**Requisites:** MATH 222 and (PHYSICS 202, 208, or 248), or member of Engineering Guest Students. Not open to students with credit for E C E 230.

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Solve DC electric circuits composed of resistors, voltage and current sources

Audience: Undergraduate

2. Analyze electrical behavior of circuits containing inductors, capacitors and transformers

Audience: Undergraduate

3. Formulate transient response of electric circuits incorporating resistors, inductors, capacitors and sources that are switched

Audience: Undergraduate

4. Determine AC steady-state response of electric circuits utilizing phasors and calculation with complex numbers

Audience: Undergraduate

5. Characterize the complex power transferred to and from electric circuits

Audience: Undergraduate

**E C E 377 – FUNDAMENTALS OF ELECTRICAL AND ELECTRO-MECHANICAL POWER CONVERSION**

3 credits.

Fundamentals of electromagnetic induction and application to transformers and induction heating; Lorentz forces with a focus on the operation and control of DC and AC motors and linear actuators; electrical power conversion using power electronics for motor drives and direct power converters.

**Requisites:** (MATH 234 or 376), (PHYSICS 202, 208, or 248), and E C E 376, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate theory underlying energy conversion between electrical and mechanical systems

Audience: Undergraduate

2. Determine physical laws for electromagnetic actuators and motors

Audience: Undergraduate

3. Utilize magnetic concepts including magnetic equivalent circuit analysis to model transformers, actuators and electromechanical energy conversion devices

Audience: Undergraduate

4. Evaluate power electronics circuits used for actuators, motors and power supplies

Audience: Undergraduate

**E C E 379 – SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING**

1-4 credits.

Topics of special interest to undergrads in electrical and computer engineering.

**Requisites:** Sophomore standing or member of Engineering Guest Students

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**E C E 399 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**E C E 401 – ELECTRO-ACOUSTICAL ENGINEERING**

3 credits.

Principles of plane and spherical sound waves; acoustical, mechanical, and electrical analogies; electroacoustic transducer materials and techniques; specific types of transducers such as microphones and loudspeakers.

**Requisites:** E C E 203, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the generation and propagation of plane and spherical sound waves

Audience: Undergraduate

2. Analyze acoustic wave transmission and reflection at flat boundaries of different media

Audience: Undergraduate

3. Describe working principles of different types of transducers such as microphones and loudspeakers

Audience: Undergraduate

4. Use computer-based tools to process acoustic signals

Audience: Undergraduate

5. Describe the working mechanism of acoustic beamforming

Audience: Undergraduate

**E C E 411 – INTRODUCTION TO ELECTRIC DRIVE SYSTEMS**

3 credits.

Basic concepts of electric drive systems. Emphasis on system analysis and application. Topics include: dc machine control, variable frequency operation of induction and synchronous machines, unbalanced operation, scaling laws, adjustable speed drives, adjustable torque drives, coupled circuit modeling of ac machines.

**Requisites:** (E C E 355, 356, or 377), graduate/professional standing, or member of Engineering Guest Students, or declared in Power Conversion and Control Capstone Certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Predict the steady-state torque, speed, voltage, current, and power relationships of DC, AC-induction and AC-synchronous (including permanent magnet) electric motors and generators for constant-speed and adjustable-speed operation given equivalent circuit parameters.

Audience: Both Grad & Undergrad

2. Identify the impact of second order effects such as temperature, armature reaction magnetic fields, and magnetic circuit saturation on the predicted steady state performance of electric motors and generators for constant-speed and adjustable speed operation.

Audience: Both Grad & Undergrad

3. Determine the power electronics circuit layout for power conversion circuits that are used to adjust input voltage and/or frequency for adjustable-speed electric motor and generator systems.

Audience: Both Grad & Undergrad

4. Describe the basic concepts of torque and speed control of DC and AC electric motors including field-oriented control of AC induction and synchronous motors.

Audience: Both Grad & Undergrad

5. Predict the steady state behavior of a motor drive system composed of a machine, drive and basic control.

Audience: Graduate

**E C E 412 – POWER ELECTRONIC CIRCUITS**

3 credits.

Operating characteristics of power semiconductor devices such as Bipolar Junction Transistors, IGBTs, MOSFETs and Thyristors. Fundamentals of power converter circuits including dc/dc converters, phase controlled ac/dc rectifiers and dc/ac inverters. Practical issues in the design and operation of converters.

**Requisites:** E C E 342, graduate/professional standing, member of Engineering Guest Students, or declared in Capstone Certificate in Power Conversion and Control

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze, derive operating principles, and sketch transient voltage and current waveforms for common power electronic circuits (dc-dc, dc-ac, and ac-dc converters)

Audience: Both Grad & Undergrad

2. Dimension and select key components in power electronic circuits in order to meet a design specification

Audience: Both Grad & Undergrad

3. Analyze the performance and conduct basic design steps for closed loop regulation of power electronic circuits

Audience: Both Grad & Undergrad

4. Communicate how power conversion technology is utilized in real-world applications

Audience: Graduate

**E C E 420 – ELECTROMAGNETIC WAVE TRANSMISSION**

3 credits.

Transmission lines: frequency domain analysis of radio frequency and microwave transmission circuits including power relations and graphical and computer methods. Electromagnetic waves: planar optical components, pulse dispersion, phase front considerations for optical components, conducting waveguides, dielectric waveguides. Radiation: retarded potentials, elemental dipoles, radiating antenna characterization, receiving mode.

**Requisites:** E C E 320, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Compute transmission line voltages, currents, impedances, and reflection coefficients in transient and harmonic circuits

Audience: Both Grad & Undergrad

2. Design matching networks utilizing a Smith chart

Audience: Both Grad & Undergrad

3. Compute reflection and transmission of plane waves at an interface

Audience: Both Grad & Undergrad

4. Use the Friis transmission equation for link budget analysis in antenna communication systems

Audience: Both Grad & Undergrad

5. Analyze TM and TE modes of circular and rectangular waveguides

Audience: Graduate

### **E C E 427 – ELECTRIC POWER SYSTEMS**

3 credits.

The electric power industry, operation of power systems, load flow, fault calculations, economic dispatch, general technical problems of electric power networks.

**Requisites:** E C E 330, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Calculate basic quantities in three-phase power systems, including instantaneous, active and reactive power

Audience: Undergraduate

2. Construct and solve the power flow equations for steady-state operation of power systems using single-phase equivalent systems and per unit analysis

Audience: Undergraduate

3. Use the method of symmetric components to analyze fault conditions

Audience: Undergraduate

4. With a team, complete a power system design project on sustainable energy systems and effectively communicate the results

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of affordable and clean energy

Audience: Undergraduate

6. Analyze sustainability issues and/or practices using a systems-based approach

Audience: Undergraduate

### **E C E 431 – DIGITAL SIGNAL PROCESSING**

3 credits.

Sampling continuous-time signals and reconstruction of continuous-time signals from samples; spectral analysis of signals using the discrete Fourier transform; the fast Fourier transform and fast convolution methods; z-transforms; finite and infinite impulse response filter design techniques; signal flow graphs and introduction to filter implementation.

**Requisites:** E C E 330, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Choose filter characteristics and parameters for sampling and interpolating signals

Audience: Undergraduate

2. Relate pole and zero locations to system properties

Audience: Undergraduate

3. Design discrete-time filters

Audience: Undergraduate

4. Perform spectral analysis of signals

Audience: Undergraduate

5. Perform signal processing operations using an engineering software package

Audience: Undergraduate

**E C E 432 – DIGITAL SIGNAL PROCESSING LABORATORY**

3 credits.

Implementation of digital signal processing algorithms on special-purpose and general-purpose hardware. Use of assembly and high-level languages, and simulator to develop and test IIR, FIR filters and the FFT for modern DSP chips. Scaling for fixed point arithmetic. Use of high level languages to implement real time, object oriented component based DSP systems in general purpose computers. DSP applications, including data and voice communication systems.

**Requisites:** E C E 330 and COMP SCI 300, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Take specifications for a signal processing system and select an appropriate type of digital filter meeting required behavior

Audience: Both Grad & Undergrad

2. Apply discrete-time linear-system theory to design a filter

Audience: Both Grad & Undergrad

3. Code the filter in an algorithmic computer programming language using paradigms that allow embedding in a large software system

Audience: Both Grad & Undergrad

4. Apply the theory of time-domain and Fourier-domain representations of signals and linear systems operating on those signals to interpret and verify the behavior of the coded filter

Audience: Both Grad & Undergrad

5. Effectively communicate these steps in written documents

Audience: Both Grad & Undergrad

6. Quantify the relative performance of digital filters in different computing environments

Audience: Graduate

**E C E 434 – PHOTONICS**

3 credits.

Introduction to ray optics, physical optics and interference, applications of Fourier optics, absorption, dispersion, and polarization of light. Light sources, including lasers (gas, solid state, and semiconductor), modulation and detection of light.

**Requisites:** PHYSICS/E C E 235 and (E C E 320, PHYSICS 322, or concurrent enrollment in either one), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply Maxwell's equations to explain optical propagation, loss, and gain in free space, dielectrics, semiconductors, and metals

Audience: Both Grad & Undergrad

2. Calculate reflectance and transmittance of light at interfaces under a variety of conditions

Audience: Both Grad & Undergrad

3. Explain the principles of interference and the functionality of interferometers and spectrometers

Audience: Both Grad & Undergrad

4. Explain the differences between various light sources, including different types of lasers

Audience: Both Grad & Undergrad

5. Calculate the behavior of rays using ray matrices, especially for imaging

Audience: Both Grad & Undergrad

6. Review and assess current literature in the field of photonics

Audience: Graduate

**E C E/COMP SCI/MATH 435 – INTRODUCTION TO CRYPTOGRAPHY**

3 credits.

Cryptography is the art and science of transmitting digital information in a secure manner. Provides an introduction to its technical aspects.

**Requisites:** (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**E C E 436 – COMMUNICATION SYSTEMS I**

3 credits.

Amplitude, frequency, pulse, and pulse-code modulation. Narrow-band noise representation and signal-to-noise ratios for various modulation schemes. Pulse shaping, timing recovery, carrier synchronization, and equalization. Sampling, quantization and coding.

**Requisites:** (E C E 203 or 330), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Characterize the energy and power of signals occurring in analog communication systems using the theory of inner products and properties of the Fourier series and the Fourier transform  
Audience: Undergraduate

2. Apply the theory of the narrowband representation of signals to the modulation and recovery of signals using the linear analog modulation techniques  
Audience: Undergraduate

3. Design phase and frequency modulation systems based on parameters of non-linear modulation  
Audience: Undergraduate

4. Apply random process theory to characterize the behavior of analog modulation systems in the presence of interference  
Audience: Undergraduate

5. Implement analog communication systems in discrete-time (software-defined radio)  
Audience: Undergraduate

6. Design and conduct experiments to confirm the performance of analog modulation systems in the presence of interfering noise  
Audience: Undergraduate

**E C E 437 – COMMUNICATION SYSTEMS II**

3 credits.

Statistical analysis of information transmission systems. Probability of error, design of receivers for digital transmission through additive white Gaussian noise channels and bandlimited channels. Spread spectrum communication systems. Channel capacity, source and error control coding.

**Requisites:** (E C E 203 or 330), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate baseband and carrier-modulated waveforms for digital communication including PAM, PSK, QAM and OFDM  
Audience: Undergraduate

2. Apply inner product space concepts and the theory of optimal receivers to map waveforms to signal constellations  
Audience: Undergraduate

3. Determine performance resulting from sub-optimal receivers  
Audience: Undergraduate

4. Calculate exact and upper-bounded probability of error of a digital communication system from a signal constellation  
Audience: Undergraduate

5. Quantify inter-symbol interference in a band-limited digital communication system  
Audience: Undergraduate

6. Evaluate the performance of a forward error correction code  
Audience: Undergraduate

**E C E/M E 439 – INTRODUCTION TO ROBOTICS**

3 credits.

Hands-on introduction to key concepts and tools underpinning robotic systems in use and development today. Intended to give students the tools to understand robotic systems, to explore robotics for their own purposes, and to pursue advanced study in the field. Students are expected to have familiarity with a high level programming language such as Python (recommended), MATLAB, Java or Julia.

**Requisites:** Senior standing or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Predict and control the behavior of common mechatronic actuators  
Audience: Undergraduate

2. Predict and interpret the response of common sensors in relation to their environment  
Audience: Undergraduate

3. Apply standard algorithms to predict and control the behavior of robotic manipulators  
Audience: Undergraduate

4. Interpret the operation of a robot control system and add new functionality to it  
Audience: Undergraduate

5. Specify a simple task for a robot, and implement sensors, actuators and a control system to accomplish it  
Audience: Undergraduate

6. Analyze the ethical challenges presented by specific robotic applications  
Audience: Undergraduate

**E C E/M E 441 – KINEMATICS, DYNAMICS, AND CONTROL OF ROBOTIC MANIPULATORS**

3 credits.

Robotics analysis and design, focusing on the analytical fundamentals specific to robotic manipulators. Serial chain robotic manipulator forward and inverse kinematics, differential kinematics, dynamics, trajectory generation, and controls. Builds on knowledge of high-level computational programming language such as Matlab.

**Requisites:** M E 340 and (MATH 320, 340, 341, or 375), graduate/professional standing, or member of Engineering Guest Students. Not open to students with credit for E C E 739 prior to fall 2024.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and design serial chain robotic manipulator kinematics  
Audience: Both Grad & Undergrad

2. Simulate the dynamic motion of serial chain robotic manipulators  
Audience: Both Grad & Undergrad

3. Form the equations of motion for robotic manipulators  
Audience: Both Grad & Undergrad

4. Use feedback control for tracking and regulation of robotic manipulators for position, force, and hybrid control  
Audience: Both Grad & Undergrad

5. Use trajectory generation methods to design robotic manipulator motion and force trajectories  
Audience: Both Grad & Undergrad

6. Analyze the kinematics and controls of more complex serial chain manipulators  
Audience: Graduate

7. Design the kinematics of serial chain manipulators using kinematic and dynamics analysis methods  
Audience: Graduate

**E C E 445 – SEMICONDUCTOR PHYSICS AND DEVICES**

3 credits.

Physics and properties of semiconductors, p-n junctions, metal-semiconductor contacts, homojunction and heterojunction bipolar transistor and physics, metal-oxide-semiconductor and heterostructure field-effect transistor and physics, thin-film resistors, memory devices, quantum devices.

**Requisites:** E C E 335, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Describe basic semiconductor materials and physics, including band structure, charge carriers and transport, phonon, optical and thermal properties, and heterojunctions

Audience: Both Grad & Undergrad

2. Describe semiconductor building blocks and devices, including PN junction, metal-semiconductor contact, metal-oxide-semiconductor capacitor, bipolar junction transistor, metal-oxide-semiconductor field-effect transistor, memory devices

Audience: Both Grad & Undergrad

3. Analyze and design homojunction semiconductor devices

Audience: Graduate

4. Describe basic semiconductor device operation principles, including heterojunction bipolar transistor, meta-semiconductor field-effect transistor, modulation-doped field-effect transistor, high-electron-mobility transistor, and thin-film transistor

Audience: Graduate

5. Critique a paper in the current literature in the field of semiconductor physics

Audience: Graduate

**E C E 447 – APPLIED COMMUNICATIONS SYSTEMS**

3 credits.

Analysis with design problems of electronic communications circuits. Emphasis on the nonlinear effects of large-signal operation of active devices. Complete design of r.f. oscillator, amplifier, and mixer circuits.

**Requisites:** E C E 320 and 340, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply high-frequency transmission line theory to modeling microwave networks

Audience: Both Grad & Undergrad

2. Use ideal and real transmission lines to design and execute impedance matching networks

Audience: Both Grad & Undergrad

3. Use scattering and noise parameters to design for trade-offs among gain, noise figure, bandwidth, and reflection coefficients in amplifiers

Audience: Both Grad & Undergrad

4. Apply lumped and distributed elements in transistor amplifier design, including design of bias networks

Audience: Both Grad & Undergrad

5. Design and execute filters using microstrip transmission line elements

Audience: Both Grad & Undergrad

6. Apply mixers and directional couplers to microwave measurement principles

Audience: Both Grad & Undergrad

7. Apply negative-resistance amplifier concepts to oscillator design

Audience: Graduate

**E C E 453 – EMBEDDED MICROPROCESSOR SYSTEM DESIGN**

4 credits.

Hardware and software design for modern microprocessor-based embedded systems; study of the design process; emphasis on major team design project.

**Requisites:** (E C E 315 and COMP SCI 300) or graduate/professional standing. Not open to special students or students with credit for E C E 454, 455, or 554.

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Design an embedded system that utilizes a commercially available microprocessor

Audience: Undergraduate

2. Incorporate sensors and integrated circuits to solve an engineering problem

Audience: Undergraduate

3. Architect firmware/software solutions used to control embedded systems

Audience: Undergraduate

4. Fabricate a prototype using a printed circuit board (PCB)

Audience: Undergraduate

5. Identify functional requirements and appropriate solutions of an embedded system

Audience: Undergraduate

**E C E 454 – MOBILE COMPUTING LABORATORY**

4 credits.

End-to-end project management; teamwork; fundamentals of disciplined development practices; introduction to mobile computing platforms and systems; design, implementation, and deployment of mobile systems and applications.

**Requisites:** COMP SCI 400 or graduate/professional standing. Not open to special students or students with credit for E C E 453, 455, or 554.

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use a contemporary development environment and programming language to develop mobile applications

Audience: Undergraduate

2. Program the typical functionalities of modern smartphones (e.g., motion sensors, audio/video interface, GPS, and wireless networking modules)

Audience: Undergraduate

3. Work effectively as a member of a team to complete a large programming project while utilizing modern collaboration tools

Audience: Undergraduate

4. Communicate effectively through written reports, oral presentations and discussion

Audience: Undergraduate

5. Review and discuss recent technological advancements in the growing mobile application domain

Audience: Undergraduate

### **E C E 455 – CAPSTONE DESIGN IN ELECTRICAL AND COMPUTER ENGINEERING**

4 credits.

Apply electrical and computer engineering knowledge and skills acquired to real-world electrical and computer engineering design projects.

**Requisites:** COMP SCI 300, E C E 340, (E C E 303, 304, 305, 313, 315, or 317), senior standing, and declared in Electrical Engineering BS or Computer Engineering BS. Not open to students with credit for E C E 453, 454, or 554.

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate effectively through written reports, oral presentations and discussion

Audience: Undergraduate

2. Review and discuss recent technological advancements in the growing electrical and computer engineering domain

Audience: Undergraduate

3. Work effectively as a member of a team

Audience: Undergraduate

4. Integrate and apply the knowledge gained in prior coursework into a real-world design environment

Audience: Undergraduate

5. Use contemporary commercial design tools

Audience: Undergraduate

6. Realize and demonstrate a hardware prototype

Audience: Undergraduate

### **E C E/B M E 462 – MEDICAL INSTRUMENTATION**

3 credits.

Design and application of electrodes, biopotential amplifiers, biosensors, therapeutic devices. Medical imaging. Electrical safety. Measurement of ventilation, blood pressure and flow.

**Requisites:** E C E 340, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Solve complicated mathematical problems for electrical and electronic circuits

Audience: Both Grad & Undergrad

2. Employ simulation tools to test and analyze electronic circuits for measuring physiological signals

Audience: Both Grad & Undergrad

3. Design electronic schematics for advanced instrumentation system using software tools

Audience: Both Grad & Undergrad

4. Solder and build advanced instrumentation system for measuring physiological signals

Audience: Both Grad & Undergrad

5. Program a microcontroller to acquire and process physiological signals

Audience: Both Grad & Undergrad

6. Perform experiments using the instrumentation system, analyze data and draw conclusions

Audience: Both Grad & Undergrad

7. Demonstrate an ability to formulate, analyze and, independently design and build instrumentation system to measure physiological signals

Audience: Graduate

**E C E/B M E 463 – COMPUTERS IN MEDICINE**

3 credits.

Study of microprocessor-based medical instrumentation. Emphasis on real-time analysis of electrocardiograms. Labs and programming project involve design of biomedical digital signal processing algorithms. Knowledge of computer programming language like C, C++ or Java, strongly encouraged.

**Requisites:** E C E 330 and (COMP SCI 200, 220, 300, 301, or placement into COMP SCI 300), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Solve complicated mathematical problems with design of digital filters for biomedical signals

Audience: Both Grad & Undergrad

2. Build electrocardiogram (ECG) instrumentation system to view their ECG and use it as an input to a microcontroller for signal analysis

Audience: Both Grad & Undergrad

3. Employ simulation tools to design and test a variety of linear digital filters

Audience: Both Grad & Undergrad

4. Perform experiments, analyze and interpret the performance of digital filters on a database of ECGs

Audience: Both Grad & Undergrad

5. Write microcontroller code for real-time processing of biomedical signals, particularly the ECG, to attenuate diverse noise sources and find clinically-significant features

Audience: Both Grad & Undergrad

6. Demonstrate an ability to formulate and, independently design and implement digital filters and algorithm to process biomedical signals

Audience: Graduate

**E C E 466 – ELECTRONICS OF SOLIDS**

3 credits.

Electronic, optical and thermal properties of crystalline solids. Energy-momentum dispersion of fundamental particles and excitations in solids leading to microscopic theories of conductivity, polarizability and permeability. Influence of materials characteristics on the performance of electronic and photonic devices.

**Requisites:** (E C E 305 or 335), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Construct analytical models to elucidate the physical operation of heterostructure-based devices, including transistors and resonant tunneling diodes

Audience: Both Grad & Undergrad

2. Apply design tradeoffs to electronic device design

Audience: Both Grad & Undergrad

3. Determine the relationship between heterojunction properties and device operation

Audience: Both Grad & Undergrad

4. Determine the relationship between semiconductor material transport properties and device operation

Audience: Both Grad & Undergrad

5. Apply design principles to analyze technical articles related to current device/materials related literature

Audience: Graduate

**E C E 489 – HONORS IN RESEARCH**

1-3 credits.

Undergraduate honors research projects supervised by faculty members.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**E C E 491 – SENIOR DESIGN PROJECT**

3 credits.

Engineering design projects supervised by faculty members.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**E C E 504 – ELECTRIC MACHINE & DRIVE SYSTEM LABORATORY**

3 credits.

Steady state and dynamic performance of electric machines in combination with power electronic converters. Measurement of electric machine parameters, evaluation of synchronization techniques and inverter drive properties, realization of drive operation via real time embedded control system, implementation and comparative evaluation of advanced machine control techniques.

**Requisites:** E C E 411, or graduate/professional standing, or declared in Capstone Certificate in Power Conversion and Control

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use safe laboratory procedures to study high voltage electric machines

Audience: Both Grad & Undergrad

2. Use dynamometers, power analyzers and electrical measurements to characterize electric machines

Audience: Both Grad & Undergrad

3. Characterize operation of an inverter and its impact on drive performance

Audience: Both Grad & Undergrad

4. Determine the operating parameters of a motor-generator dynamometer given input and output constraints

Audience: Both Grad & Undergrad

5. Integrate and debug electric drive subsystems to control the torque and/or speed of a motor-generator dynamometer

Audience: Both Grad & Undergrad

6. Interpret and apply techniques from recent research papers on electric drive systems

Audience: Graduate

**E C E/COMP SCI 506 – SOFTWARE ENGINEERING**

3 credits.

Ideas and techniques for designing, developing, and modifying large software systems. Topics include software engineering processes; requirements and specifications; project team organization and management; software architectures; design patterns; testing and debugging; and cost and quality metrics and estimation. Students will work in large teams on a substantial programming project.

**Requisites:** (COMP SCI 367 or 400) and (COMP SCI 407, 536, 537, 545, 559, 564, 570, 679 or E C E/COMP SCI 552) or graduate/professional standing, or declared in the Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E C E 511 – THEORY AND CONTROL OF SYNCHRONOUS MACHINES**

3 credits.

The idealized three phase synchronous machine time domain model including saliency, time invariant form using Park's transformation, sudden short circuits and other transient conditions, reduced order models, excitation system and turbine/governor control, dynamics of multiple machine systems, transient stability and subsynchronous resonance.

**Requisites:** E C E 411 and 427, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Use equivalent circuit models of synchronous machines for studying their performance

Audience: Both Grad & Undergrad

2. Apply computer simulations of synchronous machines to verify the performance characteristics

Audience: Both Grad & Undergrad

3. Develop torque and speed regulator systems for synchronous machines

Audience: Both Grad & Undergrad

4. Analyze the performance of synchronous machines as generators

Audience: Both Grad & Undergrad

5. Predict the behavior of synchronous machines during external faults

Audience: Graduate

**E C E 512 – POWER ELECTRONICS LABORATORY**

3 credits.

This laboratory introduces the student to measurement and simulation of important operating characteristics of power electronic circuits and power semiconductor devices. Emphasis is on devices, circuits, gating methods and power quality.

**Requisites:** E C E 412, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Construct and test hardware prototype of power electronic circuits

Audience: Both Grad & Undergrad

2. Develop and test software controllers for power electronic circuits

Audience: Both Grad & Undergrad

3. Design, layout, fabricate board, procure components, assemble and test a power electronic circuit prototype

Audience: Both Grad & Undergrad

4. Design a power electronic system including start-up, scheduling and housekeeping functions

Audience: Graduate

**E C E/COMP SCI/I SY E 524 – INTRODUCTION TO OPTIMIZATION**

3 credits.

Introduction to mathematical optimization from a modeling and solution perspective. Formulation of applications as discrete and continuous optimization problems and equilibrium models. Survey and appropriate usage of basic algorithms, data and software tools, including modeling languages and subroutine libraries.

**Requisites:** (COMP SCI 200, 220, 300, 301, 302, 310, or placement into COMP SCI 300) and (MATH 320, 340, 341, or 375) or graduate/professional standing

**Course Designation:** Breadth - Natural Science  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Engage in topics about "optimization in practice".  
Audience: Undergraduate

2. Use and analyze the results of state of the art optimization software.

Audience: Undergraduate

3. Use the GAMS modeling system and Jupyter notebooks (in conjunction with elementary Python) or Julia and JUMP.

Audience: Undergraduate

4. Design good models for realistic applications in engineering and the sciences.

Audience: Undergraduate

5. Develop a "commercial strength" application of optimization technology.

Audience: Undergraduate

**E C E/N E/PHYSICS 525 – INTRODUCTION TO PLASMAS**

3 credits.

Basic description of plasmas: collective phenomena and sheaths, collisional processes, single particle motions, fluid models, equilibria, waves, electromagnetic properties, instabilities, and introduction to kinetic theory and nonlinear processes. Examples from fusion, astrophysical and materials processing plasmas.

**Requisites:** (E C E 320 or PHYSICS 322), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E C E/N E/PHYSICS 527 – PLASMA CONFINEMENT AND HEATING**  
3 credits.

Principles of magnetic confinement and heating of plasmas for controlled thermonuclear fusion: magnetic field structures, single particle orbits, equilibrium, stability, collisions, transport, heating, modeling and diagnostics. Discussion of current leading confinement concepts: tokamaks, tandem mirrors, stellarators, reversed field pinches, etc.

**Requisites:** E C E/N E/PHYSICS 525, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E C E/N E 528 – PLASMA PROCESSING AND TECHNOLOGY**  
3 credits.

Introduction to basic understanding and techniques. Plasma processing of materials for semiconductors, polymers, plasma spray coatings, ion implantation, etching, arcs, extractive metallurgy and welding. Plasma and materials diagnostics.

**Requisites:** PHYSICS 322 or E C E 320, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**E C E/COMP SCI/M E 532 – MATRIX METHODS IN MACHINE LEARNING**  
3 credits.

Linear algebraic foundations of machine learning featuring real-world applications of matrix methods from classification and clustering to denoising and data analysis. Mathematical topics include: linear equations, regression, regularization, the singular value decomposition, and iterative algorithms. Machine learning topics include: the lasso, support vector machines, kernel methods, clustering, dictionary learning, neural networks, and deep learning. Previous exposure to numerical computing (e.g. Matlab, Python, Julia, R) required.

**Requisites:** (MATH 234, 320, 340, 341, or 375) and (E C E 203, COMP SCI 200, 220, 300, 301, 302, 310, 320, or placement into COMP SCI 300), graduate/professional standing, or declared in Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use matrices and vectors to formulate classification, prediction and matrix completion problems using techniques such as least squares, regularized least squares, the singular value decomposition, subspace methods, support vector machines, neural networks and kernel methods.

Audience: Both Grad & Undergrad

2. Implement machine learning techniques for classification, prediction and matrix completion problems in software, and validate their performance on datasets using cross validation.

Audience: Both Grad & Undergrad

3. Apply advanced techniques to formulate and prove optimality of various matrix based techniques in machine learning.

Audience: Graduate

**E C E/COMP SCI 533 – IMAGE PROCESSING**

3 credits.

Mathematical representation of continuous and digital images; models of image degradation; picture enhancement, restoration, segmentation, and coding; pattern recognition, tomography.

**Requisites:** E C E 330 and (MATH 320 or 340), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Process digital images using available engineering software

Audience: Both Grad & Undergrad

2. Use time-domain and frequency-domain methods to analyze images and their properties

Audience: Both Grad & Undergrad

3. Apply nonlinear filters to images such as morphological operations, edge-preserving nonlinearities, and optimization-based filters

Audience: Both Grad & Undergrad

4. Segment images using both small-scale and large-scale techniques

Audience: Both Grad & Undergrad

5. Apply classification techniques to image recognition

Audience: Both Grad & Undergrad

6. Extract features from images and apply to tasks such as registration and super-resolution

Audience: Both Grad & Undergrad

7. Lead team in meeting objectives of image processing operations

Audience: Graduate

**E C E 535 – INTRODUCTION TO QUANTUM SENSING**

3 credits.

Operating principles and applications of quantum sensing and metrology.

Topics include light-matter interactions with atoms and solid-state emitters, atom spectroscopy, electron microscopy, quantum electric-field sensors and magnetometers, microwave and optical clocks, laser and matter-wave interferometry, single-photon emission and detection.

**Requisites:** (E C E 220, PHYSICS 202, or 208) and (PHYSICS/E C E 235 or PHYSICS 241), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain critical concepts in quantum mechanics, including Schrodinger's equation, the uncertainty principle, and wave-particle duality, and relate these concepts to observed phenomena in atoms and atom-like quantum systems.

Audience: Both Grad & Undergrad

2. Identify quantum material platforms (such as neutral atoms, ions, and solid-state systems) and describe their defining characteristics relevant to sensing

Audience: Both Grad & Undergrad

3. Formulate operational principles of quantum sensing of physical quantities such as electromagnetic fields, inertial forces, temperature, pressure, etc.

Audience: Both Grad & Undergrad

4. Effectively communicate the benefits and challenges of various quantum sensing technologies

Audience: Both Grad & Undergrad

5. Numerically model quantum sensing systems in order to analyze their performance.

Audience: Graduate

### **E C E 536 – INTEGRATED OPTICS AND OPTOELECTRONICS**

3 credits.

Characteristics of semiconductors; study of physical mechanisms and modeling of solid state electronic and photonic devices; principles of optoelectronic processing and examples of integrated optoelectronics.

**Requisites:** E C E 335 and (E C E 420 or 434), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Evaluate and analyze the physical operation of optoelectronic devices, such as waveguides, lasers, and photodetectors  
Audience: Both Grad & Undergrad

2. Apply the design tradeoffs to optoelectronic devices  
Audience: Both Grad & Undergrad

3. Evaluate the basic optoelectronic processing techniques for device fabrication  
Audience: Both Grad & Undergrad

4. Evaluate basic compound semiconductor materials and their properties  
Audience: Both Grad & Undergrad

5. Review and assess current literature in the field of optoelectronics  
Audience: Graduate

### **E C E 537 – COMMUNICATION NETWORKS**

3 credits.

Study of communication networks with focus on performance analysis. Layered network structure. Basic protocol functions such as addressing, multiplexing, routing, forwarding, flow control, error control, and congestion response. Overview of transport, network, and link layer protocol standards. Introduction to wireless and mobile networks.

**Requisites:** E C E 203 and COMP SCI 400, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the components of present-day communication networks  
Audience: Undergraduate

2. Characterize the components and the corresponding functions of Internet infrastructure  
Audience: Undergraduate

3. Determine how information is transferred from one end to the other reliably and efficiently and re-create the same  
Audience: Undergraduate

4. Analyze and evaluate the underlying algorithms and protocols in a communication network  
Audience: Undergraduate

### **E C E/COMP SCI/M E 539 – INTRODUCTION TO ARTIFICIAL NEURAL NETWORKS**

3 credits.

Theory and applications of artificial neural networks: multi-layer perceptron, self-organization map, deep neural network, convolutional neural network, recurrent network, support vector machines, genetic algorithm, and evolution computing. Applications to control, pattern recognition, prediction, and object detection and tracking.

**Requisites:** COMP SCI 200, 220, 300, 301, 302, 310, placement into COMP SCI 300, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify if a given data analysis task is a pattern classification problem or a model approximation problem.  
Audience: Undergraduate

2. Apply multi-layer perceptron neural network training algorithm to develop artificial neural network (ANN) based pattern classifiers and data predictors.  
Audience: Undergraduate

3. Apply deep learning network for pattern classification  
Audience: Undergraduate

4. Apply support vector machine (SVM) to develop pattern classifiers.  
Audience: Undergraduate

5. Apply self-organization map and k-means to perform clustering operations of a given data set.  
Audience: Undergraduate

6. Apply stochastic optimization methods, including simulated annealing, genetic algorithm and random search to solve a discrete optimization problem.  
Audience: Undergraduate

**E C E 541 – ANALOG MOS INTEGRATED CIRCUIT DESIGN**

3 credits.

Analysis, design and applications of modern analog circuits using integrated bipolar and field-effect transistor technologies. Develop a working knowledge of the basic circuits used in modern analog integrated circuits and techniques for analysis and design.

**Requisites:** E C E 340, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2017

**Learning Outcomes:** 1. Master the functions and DC and AC operations of metal-oxide-semiconductor field transistors and bipolar junction transistors for analog integrated circuits

Audience: Both Grad & Undergrad

2. Analyze, design and simulate single stage and multiple stage analog amplifiers

Audience: Both Grad & Undergrad

3. Analyze, design and simulate current references, voltage references, and output stages for analog amplifiers

Audience: Both Grad & Undergrad

4. Analyze, design and simulate basic operational amplifiers

Audience: Both Grad & Undergrad

5. Analyze, design and simulate analog amplifiers utilizing negative feedback

Audience: Both Grad & Undergrad

6. Analyze, design and simulate analog amplifiers considering frequency response and stability

Audience: Both Grad & Undergrad

7. Extract target metrics for analog circuit operation given specific end application

Audience: Graduate

**E C E 542 – INTRODUCTION TO MICROELECTROMECHANICAL SYSTEMS**

3 credits.

Introduction to MEMS technology, devices and systems. Fundamentals of MEMS in fabrication, process integration, material mechanics of MEMS structures, sensors and actuators. Main topics in MEMS - microfluidics, optical MEMS, RF MEMS, BioMEMS, packaging, and CAD.

**Requisites:** (E C E 335 or 340), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Master fundamental fabrication techniques in integrated circuits and microelectromechanical systems (MEMS)

Audience: Both Grad & Undergrad

2. Analyze and construct fabrication process flows for MEMS

Audience: Both Grad & Undergrad

3. Analyze and design mechanical structures for MEMS

Audience: Both Grad & Undergrad

4. Analyze and design mechanical sensors and actuators

Audience: Both Grad & Undergrad

5. Analyze thermal and magnetic transducers, microfluidics, lab on chips, optical MEMS devices and radio frequency MEMS devices

Audience: Both Grad & Undergrad

6. Design systems integrating MEMS devices with integrated circuits

Audience: Graduate

**E C E 545 – ADVANCED MICROWAVE MEASUREMENTS FOR COMMUNICATIONS**

3 credits.

Measurements at VHF and microwave frequencies; characteristics of microwave generators, amplifiers, passive devices and detection systems; measurement of frequency, noise and simple antenna patterns; time domain reflectometry, swept frequency network and spectrum analyzer techniques; lecture and lab.

**Requisites:** (E C E 440 or 447), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **E C E 547 – ADVANCED COMMUNICATIONS CIRCUIT DESIGN**

3 credits.

Principles underlying the design of r.f. and microwave communications circuits. Analysis and design of wideband nonlinear power amplifiers, S-parameter techniques for r.f. active circuit design, computer aided design techniques, r.f. integrated circuits, fundamentals of low noise r.f. design.

**Requisites:** (E C E 420 or 447), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **E C E 548 – INTEGRATED CIRCUIT DESIGN**

3 credits.

Bipolar and MOS devices in monolithic circuits. Device physics, fabrication technology. IC-design for linear and nonlinear circuitry.

**Requisites:** E C E 335, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Solve problems related to operation and fabrication of semiconductor devices (diodes, BJTs, MOSFETs)

Audience: Undergraduate

2. Draw semiconductor band diagrams and apply these drawings to explain effects that appear at interfaces between materials such as differently doped semiconductors, semiconductor-metal interface

Audience: Undergraduate

3. Analyze advanced effects that appear in MOSFETs when their size is reduced to nanometer scale

Audience: Undergraduate

4. Develop and design device physics models using simulation platform such as TCAD

Audience: Undergraduate

### **E C E 549 – INTEGRATED CIRCUIT FABRICATION LABORATORY**

4 credits.

Monolithic integrated circuit fabrication; mask making, photolithography, oxidation, diffusion, junction evaluation, metallization, packaging, and testing.

**Requisites:** (E C E 335 or 548), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze, design and execute process flow used during semiconductor device fabrication

Audience: Both Grad & Undergrad

2. Perform simple electrical measurements of MOSFET transistors

Audience: Both Grad & Undergrad

3. Explain operating principles of clean room tools such as mask aligner, plasma etcher, metal deposition sputterer, etc.

Audience: Both Grad & Undergrad

4. Perform silicon processing steps in the clean room such as lithography, wet and dry etching, and metal deposition

Audience: Both Grad & Undergrad

5. Solve engineering problems related to silicon processing

Audience: Both Grad & Undergrad

6. Design and perform advanced electrical measurements of MOSFET devices

Audience: Graduate

**E C E 551 – DIGITAL SYSTEM DESIGN AND SYNTHESIS**

3 credits.

Introduction to the use of hardware description languages and automated synthesis in design. Advanced design principles. Verilog and VHDL description languages. Synthesis from hardware description languages. Timing-oriented synthesis. Relation of integrated circuit layout to timing-oriented design. Design for reuse.

**Requisites:** E C E/COMP SCI 352, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe a digital design using a Hardware Description Language (HDL) such that it will synthesize efficiently using the intended mix of sequential and combinational cells. Demonstrate proficiency in coding in both dataflow and behavioral HDL styles  
Audience: Undergraduate

2. Write a thorough testbench to validate a digital design. This includes consideration of corner test cases and ensuring testbench is self-checking

Audience: Undergraduate

3. Simulate and debug a digital design using a HDL simulator

Audience: Undergraduate

4. Constrain and Synthesize a digital design targeting a standard cell library. Explore options and methods to optimize synthesis results for speed/power/area. Interpret static timing reports generated by synthesis tool

Audience: Undergraduate

5. Partition and complete the implementation (design/validation/synthesis) of a complex digital system as a member of a project team

Audience: Undergraduate

**E C E/COMP SCI 552 – INTRODUCTION TO COMPUTER ARCHITECTURE**

3 credits.

The design of computer systems and components. Processor design, instruction set design, and addressing; control structures and microprogramming; memory management, caches, and memory hierarchies; and interrupts and I/O structures. E C E 551 or knowledge of Verilog is recommended.

**Requisites:** (E C E/COMP SCI 352 and E C E/COMP SCI 354) or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use standard performance metrics to compare performance of different digital systems

Audience: Undergraduate

2. Design a pipelined data path for a RISC (reduced instruction set computer) instruction set and identify concepts of data dependence, pipelined hazards and out of order execution

Audience: Undergraduate

3. Design basic data and control cache subsystems and be able to operate basic memory systems

Audience: Undergraduate

4. Design a pipelined RISC micro-processor system with data cache using computer aided design tool and validate the correctness of the design using logic simulation

Audience: Undergraduate

**E C E 553 – TESTING AND TESTABLE DESIGN OF DIGITAL SYSTEMS**

3 credits.

Faults and fault modeling, test equipment, test generation for combinational and sequential circuits, fault simulation, memory and microprocessor testing, design for testability, built-in self-test techniques, and fault location.

**Requisites:** COMP SCI/E C E 352 and COMP SCI 300, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify factors that impact economics of testing of integrated circuits

Audience: Both Grad & Undergrad

2. Model and simulate faults that can occur in integrated circuits

Audience: Both Grad & Undergrad

3. Apply state-of-the-art test generation algorithms

Audience: Both Grad & Undergrad

4. Utilize design for testability and built-in self-test techniques

Audience: Both Grad & Undergrad

5. Generate tests to detect path delay faults

Audience: Graduate

**E C E 554 – DIGITAL ENGINEERING LABORATORY**

4 credits.

Practical aspects of computer system design. Design, construction, and testing of significant digital subsystems. Design, construction, and programming of pipelined digital computers.

**Requisites:** E C E 551 and E C E/COMP SCI 552. Not open to special students or students with credit for E C E 453, 454 or 455.

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Specify a novel instruction set architecture (ISA)

Audience: Undergraduate

2. Specify the design of a processor that implements a novel ISA

Audience: Undergraduate

3. Develop, verify, and demonstrate a working prototype of a processor

Audience: Undergraduate

4. Collaborate effectively as a member of a moderate-sized team

Audience: Undergraduate

5. Communicate project status and results effectively both orally and in writing

Audience: Undergraduate

**E C E 555 – DIGITAL CIRCUITS AND COMPONENTS**

3 credits.

Principles and characterization of logic circuits. Design and analysis techniques for applied logic circuits. Transmission lines in digital applications. Families of circuit logic currently in use and their characteristics.

**Requisites:** (E C E/COMP SCI 352 and E C E 340), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Summarize theory of advanced MOS devices and operations

Audience: Undergraduate

2. Identify challenges and solutions in scaling of CMOS devices

Audience: Undergraduate

3. Analyze power, performance, area metrics for CMOS logic families

Audience: Undergraduate

4. Analyze design of sequential circuits with timing constraints

Audience: Undergraduate

5. Produce circuit schematic and layout in CAD tools

Audience: Undergraduate

6. Test transient behavior of circuits in simulation tools

Audience: Undergraduate

7. Describe operation of VLSI memory and identify critical components

Audience: Undergraduate

**E C E 556 – DESIGN AUTOMATION OF DIGITAL SYSTEMS**

3 credits.

Use of digital computers to simulate, partition, place and interconnect digital electronic systems.

**Requisites:** E C E/COMP SCI 352 and COMP SCI 300, graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify different steps of the design flow of integrated circuits

Audience: Undergraduate

2. Map a high-level netlist in Verilog to a gate-level logic circuit using a standard-cell library

Audience: Undergraduate

3. Identify different steps of layout design including placement, global, and detailed routing

Audience: Undergraduate

4. Perform static timing analysis in a combinational logic circuit

Audience: Undergraduate

5. Identify and apply physical-synthesis techniques in integrated circuits such as gate sizing and logic restructuring

Audience: Undergraduate

**E C E/COMP SCI 561 – PROBABILITY AND INFORMATION THEORY IN MACHINE LEARNING**

3 credits.

Probabilistic tools for machine learning and analysis of real-world datasets. Introductory topics include classification, regression, probability theory, decision theory and quantifying information with entropy, relative entropy and mutual information. Additional topics include naive Bayes, probabilistic graphical models, discriminant analysis, logistic regression, expectation maximization, source coding and variational inference.

**Requisites:** (MATH 320, 340, 341, 375, or M E/COMP SCI/E C E 532 or concurrent enrollment) and (E C E 331, STAT/MATH 309, 431, STAT 311, 324, M E/STAT 424 or MATH 531) or grad/profsnl standing or declared in Capstone Certificate in Computer Sciences for Professionals

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify how ambiguity and noise leads to the need for probabilistic methods in machine learning

Audience: Both Grad & Undergrad

2. Implement classification, prediction and generative algorithms using a variety of techniques based in probability, information theory and machine learning

Audience: Both Grad & Undergrad

3. Prove optimality of a variety of algorithms and demonstrate understanding of sample complexity bounds

Audience: Graduate

**E C E/ISY E 570 – ETHICS OF DATA FOR ENGINEERS**

3 credits.

Introduction to ethical issues in data engineering and principled solutions. Algorithmic fairness (individual fairness, group fairness, counterfactual fairness), differential privacy and its applications, and robustness.

**Requisites:** (ISY E 521, 562, ME/COMP SCI/E C E 532, or 539) and (E C E 331, MATH/STAT 309, STAT 311, MATH 331, or STAT/MATH 431), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the importance of ethical data science/engineering

Audience: Both Grad & Undergrad

2. Identify challenges of trustworthy data use in engineering such as fairness, privacy, and robustness

Audience: Both Grad & Undergrad

3. Apply the definitions of trustworthy data engineering to real-world datasets

Audience: Both Grad & Undergrad

4. Analyze the data analysis pipelines and evaluate the trustworthiness of their outcomes

Audience: Both Grad & Undergrad

5. Create proper data analysis pipelines with ethical considerations

Audience: Both Grad & Undergrad

6. Implement cutting-edge techniques to enhance the fairness, privacy, and robustness of data analysis processes

Audience: Graduate

7. Conduct independent research on emerging challenges in ethical data engineering

Audience: Graduate

**E C E/ME 576 – PRINTED AND FLEXIBLE ELECTRONICS: MANUFACTURING, DEVICES, AND APPLICATIONS**

3 credits.

Exploration of additive fabrication of thin-film electronics. Various techniques, materials, and applications of printable electronics with a key focus on mechanically flexible electronic devices. Identify the appropriate printing technology and materials to achieve desired device performance.

**Requisites:** E C E 230 or 376, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define the broad field of printed/thin-film electronics

Audience: Both Grad & Undergrad

2. Describe the multiple techniques for printing electronics

Audience: Both Grad & Undergrad

3. Identify the appropriate technique for specific target applications

Audience: Both Grad & Undergrad

4. Describe applications of materials for insulating, conducting, and semiconducting, required for advanced thin-film electronics

Audience: Both Grad & Undergrad

5. Benchmark printed devices including sensors and thin-film transistors

Audience: Both Grad & Undergrad

6. Design printable electronic sensors to desired specifications

Audience: Graduate

7. Describe the current challenges of the field of printable electronics

Audience: Graduate

**E C E/ME 577 – AUTOMATIC CONTROLS LABORATORY**

4 credits.

Control theory is reduced to engineering practice through the analysis and design of actual systems in the laboratory. Experiments are conducted with modern servo systems using both analog and digital control. Systems identification and modern controls design are applied to motion and torque control.

**Requisites:** ME 346 or E C E 332, or graduate/professional standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**E C E 601 – SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING**

1-4 credits.

Advanced topics of special interest to students in various areas of Electrical and Computer Engineering.

**Requisites:** Junior standing or member of Engineering Guest Students

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**E C E 610 – SEMINAR IN ELECTRICAL AND COMPUTER ENGINEERING**

1 credit.

Survey of topics within the department of electrical and computer engineering that introduce students to the materials/techniques to assist them in being successful graduate students. Faculty seminars spanning energy and power systems, applied physics, electromagnetic fields, plasmas, communications and signal processing, controls, photonics, solid state, and computers will be given. Additionally, students will participate in weekly group exercises to enhance their skills in engineering/technical communications, writing, ethics, and project management.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**E C E 611 – INTRODUCTION TO DOCTORAL RESEARCH IN ELECTRICAL & COMPUTER ENGINEERING**

2 credits.

A focus on topics within the department of electrical and computer engineering that introduce students to the materials/techniques that will assist them in being successful graduate students. Faculty seminars spanning energy and power systems, applied physics, electromagnetic fields, plasmas, communications and signal processing, controls, photonics, solid state, and computers will be given. Additionally, students will participate in weekly group exercises to enhance their skills in engineering/technical communications, writing, ethics, and project management. Graded homework and a final project are assigned.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E C E 697 – CAPSTONE PROJECT IN MACHINE LEARNING AND SIGNAL PROCESSING**

5 credits.

Individual or team project to gain hands-on-experience applying machine learning and signal processing concepts.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Identify a real-world problem that can be addressed and answered using techniques in machine learning and signal processing

Audience: Graduate

2. Think critically about the end-to-end formulation of a real-world machine learning and signal processing task

Audience: Graduate

3. Apply MLSP concepts to a real-world machine learning and signal processing task

Audience: Graduate

4. Ask and answer deep and driving questions about a machine learning and signal processing project

Audience: Graduate

5. Gain, sharpen, and showcase skills in teamwork, problem solving, reflection, and communication

Audience: Graduate

**E C E 699 – ADVANCED INDEPENDENT STUDY**

1-6 credits.

Directed study projects as arranged with instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**E C E 702 – GRADUATE COOPERATIVE EDUCATION PROGRAM**

1-2 credits.

Work experience that combines classroom theory with practical knowledge of operations to provide students with a background on which to develop and enhance a professional career. The work experience is tailored for MS students from within the U.S. as well as eligible international students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Graduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Graduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Graduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Graduate

**E C E/COMP SCI 707 – MOBILE AND WIRELESS NETWORKING**

3 credits.

Design and implementation of protocols, systems, and applications for mobile and wireless networking, particularly at the media access control, network, transport, and application layers. Focus is on the unique problems and challenges presented by the properties of wireless transmission, various device constraints such as limited battery power, and node mobility. Knower of computer networking is strongly encouraged, such as from COMP SCI 640 or E C E 537.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**E C E 711 – DYNAMICS AND CONTROL OF AC DRIVES**

3 credits.

Principles of power converters, two axis models of AC machines and AC drives, simulation of drive systems, analytical modeling of drives, dynamic behavior of induction and synchronous motors and drive systems. Knowledge of Simulink required.

**Requisites:** E C E 411 and (graduate/professional standing or declared in Capstone Certificate in Power Conversion and Control)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Develop coupled circuit model of ac machines, including induction and synchronous machines

Audience: Graduate

2. Develop complex variable model of induction machines

Audience: Graduate

3. Perform digital simulation of electric machines and drives

Audience: Graduate

4. Develop DQ models for power converters and current regulation

Audience: Graduate

5. Develop field orientation control, vector control, and direct torque control

Audience: Graduate

6. Develop small-signal dynamic response of electric machines

Audience: Graduate

**E C E 712 – SOLID STATE POWER CONVERSION**

3 credits.

Advanced course in power electronics which provides an understanding of switching power converters. Included are DC-to-DC, AC-to-DC, DC-to-AC, and AC-to-AC converters, commutation techniques, converter control, interfacing converters with real sources and loads.

**Requisites:** E C E 412 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E C E 713 – ELECTROMAGNETIC DESIGN OF AC MACHINES**

3 credits.

Electromagnetic design concepts and application to AC machines, magnetic circuit concepts, calculation of equivalent circuit parameters of induction, synchronous and permanent magnet machines from geometric data, copper and iron loss calculations, theory and application of finite elements to electromagnetic devices.

**Requisites:** (E C E 411 or 511) and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E C E 714 – UTILITY APPLICATION OF POWER ELECTRONICS**

3 credits.

Power electronic application to utility systems is a rapidly growing field with major impact on the industry. Covers material on HVDC transmission, energy storage systems, renewable sources, static compensators, and flexible ac transmission systems.

**Requisites:** E C E 412, 427, and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**E C E 717 – LINEAR SYSTEMS**

3 credits.

Equilibrium points and linearization; natural and forced response of state equations; system equivalence and Jordan form; Lyapunov, asymptotic, and BIBO stability; controllability and duality; control-theoretic concepts such as pole-placement, stabilization, observers, dynamic compensation, and the separation principle. Knowledge of linear algebra [such as MATH 340] required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**E C E/B M I/COMP SCI/MED PHYS 722 – COMPUTATIONAL OPTICS AND IMAGING**

3 credits.

Computational imaging includes all imaging methods that produce images as a result of computation on collected signals. Learn the tools to design new computational imaging methods to solve specific imaging problems. Provides an understanding of the physics of light propagation and measurement, and the computational tools to model it, including wave propagation, ray tracing, the radon transform, and linear algebra using matrix and integral operators and the computational tools to reconstruct an image, including linear inverse problems, neural networks, convex optimization, and filtered back-projection. Covers a variety of example computational imaging techniques and their applications including coded apertures, structured illumination, digital holography, computed tomography, imaging through scattering media, compressed sensing, and non-line-of-sight imaging.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply ray and wave based light propagation models

Audience: Graduate

2. Explain the process of image formation in conventional imaging systems using theory and computational models

Audience: Graduate

3. Select and combine the different components required in an imaging system to perform light manipulation, collection, and image reconstruction

Audience: Graduate

4. Apply the linear matrix and integral operators that model light propagation

Audience: Graduate

5. Apply the linear inverse algorithms that allow an imaging system to reconstruct properties of the scene from collected data

Audience: Graduate

6. Simulate different computational imaging systems and perform computation on simulated datasets

Audience: Graduate

7. Understand the most common computational imaging techniques and be able to use and adapt them for their own applications

Audience: Graduate

**E C E 723 – ON-LINE CONTROL OF POWER SYSTEMS**

3 credits.

State estimation based on line-flow measurements. Detection and correction of incorrect on-line measurements. Reduction techniques. Network security evaluation. On-line contingency studies and contingency remedial action. Calculation of penalty factors and optimal power dispatch strategies. On-line stability determination. Parallel processors for on-line studies. Knowledge of basic probability analysis [such as E C E 331, STAT/MATH 431, or STAT 311] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**E C E/N E/PHYSICS 724 – WAVES AND INSTABILITIES IN PLASMAS**

3 credits.

Waves in a cold plasma, wave-plasma interactions, waves in a hot plasma, Landau damping, cyclotron damping, magneto-hydrodynamic equilibria and instabilities, microinstabilities, introduction to nonlinear processes, and experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**E C E/N E/PHYSICS 725 – PLASMA KINETIC THEORY AND RADIATION PROCESSES**

3 credits.

Coulomb Collisions, Boltzmann equation, Fokker-Planck methods, dynamical friction, neoclassical diffusion, collision operators radiation processes and experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**E C E/N E/PHYSICS 726 – PLASMA MAGNETOHYDRODYNAMICS**

3 credits.

MHD equations and validity in hot plasmas; magnetic structure and magnetic flux coordinates; equilibrium in various configurations; stability formulation, energy principle, classification of instabilities; ideal and resistive instability in various configurations, evolution of nonlinear tearing modes; force-free equilibria, helicity, MHD dynamo; experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**E C E 729 – INFORMATION THEORY**

3 credits.

Definition of measures of information and their properties, capacity of discrete and continuous channels with noise, source and channel coding theorems, fundamentals of channel coding, noiseless source coding, and source coding with a fidelity criterion. Knowledge of basic probability analysis [such as E C E 331, STAT/MATH 431, or STAT 311] required.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Calculate the entropy of a random variable from its distribution, the mutual information between two random variables from their joint distribution, the Kullback-Leibler divergence between two probability distributions, and the entropy rate of a Markov process  
Audience: Graduate

2. Construct source codes such as the Huffman code, the Shannon code, and the Elias-Fano code for a given probability distribution of the source  
Audience: Graduate

3. Define channel capacity and apply Shannon's channel coding theorem to Calculate the channel capacities of discrete channels such as the binary symmetric channel and the binary erasure channel, and continuous channels such as the additive Gaussian noise channel  
Audience: Graduate

**E C E 730 – PROBABILITY AND RANDOM PROCESSES**

3 credits.

Review of basic probability. Advanced probability concepts. Random vectors; linear filtering of random processes; stationarity; power spectral densities; estimation; convergence; Markov chains; Poisson process; Wiener process. Knowledge of basic probability analysis [such as E C E 331, STAT/MATH 431, or STAT 311] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Compute probabilities and expectations using probability mass functions and densities together with the laws of total probability and substitution, along with the property of independence when applicable  
Audience: Graduate

2. Work with Gaussian random vectors, joint densities, and characteristic functions  
Audience: Graduate

3. Determine in what sense(s) a sequence of random variables converges  
Audience: Graduate

4. Perform calculations using properties of the Poisson process and the Wiener process  
Audience: Graduate

**E C E 731 – ADVANCED POWER SYSTEM ANALYSIS**

3 credits.

Electrical transients due to faults and switching. Effect on power system design and operation. Traveling waves and surge protection. Computerized analysis of power transients.

**Requisites:** E C E 427 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**E C E/M E 732 – DYNAMICS OF CONTROLLED SYSTEMS**

3 credits.

Emphasis on obtaining equations which define the behavior of physical systems frequently subjected to control; mechanical processing, fluid power, and thermal systems; analytical, experimental, and computer techniques. Knowledge of Automatic Controls [such as M E 446 or E C E 322] is required.

**Requisites:** Graduate/professional standing. Not open to students with credit for M E 746.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe how physical state feedback affects dynamic stiffness of a control system

Audience: Graduate

2. Analyze the sensitivity of the system with eigenvalue migration analysis  
Audience: Graduate

3. Develop improved control systems by implementing active state feedback which mimics the physical system and augments the system performance  
Audience: Graduate

4. Differentiate command tracking from disturbance rejection. The student will characterize the necessary command feedforward structure in order to achieve optimal command tracking.  
Audience: Graduate

5. Manipulate observer inputs and state feedback inputs to achieve zero-lag properties  
Audience: Graduate

6. Draw the block diagram of physical systems identifying the appropriate inputs required for a properly formed observer  
Audience: Graduate

7. Implement observers for state estimation in multi-variable control systems  
Audience: Graduate

**E C E/M E 733 – ADVANCED COMPUTER CONTROL OF MACHINES AND PROCESSES**

3 credits.

Digital control theory, design methodology, and techniques for controller implementation on digital computers. Advanced single and multi-axis motion generation algorithms. Multiple processor control systems. Multiple objective control systems for machinery guidance and manufacturing processes. Precision control. Knowledge of continuous and discrete time control [such as M E 447 or E C E 332] is required.

**Requisites:** Graduate/professional standing. Not open to students with credit for M E 747.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain and apply physics-based discrete time system modeling

Audience: Graduate

2. Analyze and design in both the continuous and discrete domains  
Audience: Graduate

3. Analyze and design control systems using tools such as Matlab and Simulink  
Audience: Graduate

4. Describe physics-based control structures for computer control systems  
Audience: Graduate

**E C E 734 – VLSI ARRAY STRUCTURES FOR DIGITAL SIGNAL PROCESSING**

3 credits.

An overview of the architectures and design methodologies of VLSI array processors for digital signal processing. Emphasis is placed on the techniques of mapping algorithms onto array structures for real time signal processing. Knowledge of digital signal processing [such as E C E 431] and computer architecture [such as E C E/COMP SCI 552] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**E C E 735 – SIGNAL SYNTHESIS AND RECOVERY TECHNIQUES**

3 credits.

Signals and their representation. Signal synthesis subject to constraints on peak voltage, energy, duration-bandwidth product. The theory of alternating projections onto convex sets and applications to inverse problems in signal processing: signal recovery using incomplete data, image recovery in tomography using limited views, phase retrieval in optical astronomy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**E C E 736 – WIRELESS COMMUNICATIONS**

3 credits.

Theory, design and analysis of mobile wireless communication systems from a signal processing perspective. Emphasis on code-division multiple-access (CDMA) systems employing direct-sequence spread-spectrum (DS-SS) signaling. Topics include characterization of mobile wireless channels, demodulation of DS-SS signals, diversity techniques, interference suppression methods, and low-complexity adaptive receivers. Knowledge of probability [such as E C E 730] and digital communication [such as E C E 437] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**E C E 738 – ADVANCED DIGITAL IMAGE PROCESSING**

3 credits.

Deterministic and stochastic spatio-temporal image models, transform domain processing, Markov random fields and anisotropic diffusion; MAP parameter estimation, ill-posed inverse problems, robust statistics and non-linear digital filtering in image processing. Applications to image restoration, motion estimation, (video) image compression (MPEG, JPEG) and tomography. Knowledge of image processing [such as E C E/COMP SCI 533] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**E C E 740 – ELECTROMAGNETIC THEORY**

3 credits.

Time harmonic fields and waves in linear media with applications to radiation, guiding and scattering; wave and surface impedance and admittance concepts; duality, uniqueness, image theory, equivalence principle, induction and compensation theorems, reciprocity, Green's functions, wave functions, potential and transform theory. Knowledge of electromagnetics [such as E C E 420] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**E C E 741 – SEMICONDUCTOR DIODE LASERS AND OTHER OPTOELECTRONIC DEVICES**

3 credits.

An overview of modern photonic technology and an introduction to key parameters and concepts; the basic mechanisms determining the relationship between optical gain and current density, and quantum-well laser structures; physics of high-power phase-locked laser arrays or other optoelectronics devices. Knowledge of electromagnetics [such as E C E 320] and solid-state electronics [such as E C E 335] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Apply simulation tools to characterize the physical operation of semiconductor lasers

Audience: Graduate

2. Construct analytical models to evaluate semiconductor laser performance

Audience: Graduate

3. Apply design tradeoffs to semiconductor laser design

Audience: Graduate

4. Determine the relationship between compound semiconductor material properties and semiconductor laser operation

Audience: Graduate

**E C E 742 – COMPUTATIONAL METHODS IN ELECTROMAGNETICS**

3 credits.

Computational techniques for solving differential and integral equations that govern static, frequency-domain, and time-domain electromagnetic field phenomena. Applications of the finite-difference time-domain method, finite-element method, and method of moments to practical electromagnetics engineering problems. Knowledge of high-level programming language like MATLAB strongly encouraged. Knowledge of electromagnetics [such as E C E 320] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**E C E 743 – HIGH-POWER DIODE LASERS AND AMPLIFIERS**

3 credits.

Single-mode diode lasers and amplifiers and their applications; an in-depth treatment of the four basic types of high-power coherent diodes: phase-locked arrays, master-oscillator power amplifiers, unstable resonators, and external-cavity-controlled resonators. Knowledge of electromagnetics [such as E C E 320] and solid-state electronics [such as E C E 335] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2020**Learning Outcomes:** 1. Apply simulation tools to characterize the physical operation of high-power semiconductor lasers

Audience: Graduate

2. Construct analytical models to evaluate high-power semiconductor laser performance

Audience: Graduate

3. Apply design tradeoffs to high-power semiconductor laser and amplifier design

Audience: Graduate

4. Determine the photonic-crystal laser equivalence to phase-locked array of semiconductor lasers

Audience: Graduate

**E C E 744 – THEORY OF MICROWAVE CIRCUITS AND DEVICES**

3 credits.

Scattering matrices; symmetrical junctions; impedance and ABCD matrices; equivalent circuits. Wave propagation in periodic structures and anisotropic media; Floquet's theorem; Brillouin diagrams; Hartree harmonics; tensor permeability, conductivity, and permittivity; coupled wave equations; normal modes; applications in ferrite devices. Knowledge of advanced engineering electromagnetics [such as E C E 740] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**E C E 745 – SOLID STATE ELECTRONICS**

3 credits.

Physical principles underlying the action of semiconductor devices, chemical bonding and energy band structure, Boltzmann transport theory, optical and high frequency effects, diffusion and drift, interfaces, properties of elemental and compound semiconductors.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**E C E/PHYSICS 746 – QUANTUM ELECTRONICS**

3 credits.

Elementary aspects of Lagrange theory of fields and field quantization; Bose, Fermi and Pauli operators; interaction of fields; quantum theory of damping and fluctuations; applications to lasers, nonlinear optics, and quantum optics. Knowledge of lasers [such as PHYSICS 546] and graduate-level electromagnetics [such as E C E 740 or PHYSICS 721] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**E C E 747 – NANOPHOTONICS**

3 credits.

Optics/photonics at nanometer and micrometer length scales, including EM waves in dielectrics and metals, computational electromagnetics, waveguides and waveguide coupling, optical resonators, basic nanofabrication techniques, thin-film interference, surface-plasmon polaritons, localized surface-plasmon resonances, applications of plasmonics, super-resolution imaging, photonic crystals, composite materials and metamaterials, metasurfaces. Knowledge of Maxwell's equation and basic ray/wave optics, as would typically be obtained from junior-level or higher electromagnetics or optics courses [such as E C E 320 or E C E 434], is strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate an understanding of electromagnetic waves in various media, at boundaries and interfaces, and in various types of waveguides

Audience: Graduate

2. Carry out a variety of two-dimensional (and, depending on the project, three-dimensional) simulations using the finite-difference time-domain method

Audience: Graduate

3. Recall, summarize, and evaluate basic nanofabrication concepts as they relate to nanophotonic structures

Audience: Graduate

4. Identify, formulate, and solve problems describing localized and propagating surface plasmons in various geometries

Audience: Graduate

5. Demonstrate awareness and understanding of various applications of nanophotonics and plasmonics, especially in the areas of sensing and biomedical applications

Audience: Graduate

6. Recall the similarities and differences between composite materials, metamaterials, metasurfaces, and related photonic structures

Audience: Graduate

**E C E/PHYSICS 748 – LINEAR WAVES**

3 credits.

General considerations of linear wave phenomena; one dimensional waves; two and three dimensional waves; wave equations with constant coefficients; inhomogeneous media; random media. Lagrangian and Hamiltonian formulations; asymptotic methods. Knowledge of electromagnetics [such as E C E 320 or PHYSICS 321], mechanics [such as M E 340], or vibrations [such as M E 440] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**E C E/N E/PHYSICS 749 – COHERENT GENERATION AND PARTICLE BEAMS**

3 credits.

Fundamental theory and recent advances in coherent radiation charged particle beam sources (microwave to X-ray wavelengths) including free electron lasers, wiggler/wave-particle dynamics, Cerenkov masers, gyrotrons, coherent gain and efficiency, spontaneous emission, beam sources and quality, related accelerator concepts experimental results and applications.

**Requisites:** E C E 740**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**E C E/COMP SCI 750 – REAL-TIME COMPUTING SYSTEMS**

3 credits.

Introduction to the unique issues in the design and analysis of computer systems for real-time applications. Hardware and software support for guaranteeing timeliness with and without failures. Resource management, time-constrained communication, scheduling and imprecise computations, real-time kernels and case studies. Students are strongly encouraged to have knowledge of computer architecture (e.g., E C E/COMP SCI 552) and operating system functions (e.g., COMP SCI 537)

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**E C E 751 – EMBEDDED COMPUTING SYSTEMS**

3 credits.

Embedded applications, embedded processors and multiprocessors, embedded system design and simulation, configurable/reconfigurable embedded systems, embedded compilers and tool chains, run-time systems, application design and customization, hardware and software co-design, low-power design. Knowledge of computer architecture [such as E C E 552] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023

### **E C E/COMP SCI 752 – ADVANCED COMPUTER ARCHITECTURE I** 3 credits.

Processor design, computer arithmetic, pipelining, multi-operation processors, vector processors, control units, precise interrupts, main memory, cache memories, instruction set design, stack machines, busses and I/O, protection and security. Students are strongly encouraged to have knowledge of computer architecture (e.g., E C E/COMP SCI 552).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **E C E 753 – FAULT-TOLERANT COMPUTING** 3 credits.

Fault modeling, redundancy techniques and reliability evaluation, error detecting and correcting codes, self-checking circuits, fault diagnosis, software fault tolerance, and case studies. Knowledge of probability [such as E C E 431] and computer architecture [such as E C E/COMP SCI 552] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **E C E/COMP SCI 755 – VLSI SYSTEMS DESIGN** 3 credits.

Overview of MOS devices and circuits; introduction to integrated circuit fabrication; topological design of data flow and control; interactive graphics layout; circuit simulation; system timing; organizational and architectural considerations; alternative implementation approaches; design project. E C E 555 or equivalent experience is strongly recommended.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **E C E/COMP SCI 756 – COMPUTER-AIDED DESIGN FOR VLSI** 3 credits.

Broad introduction to computer-aided design tools for VLSI, emphasizing implementation algorithms and data structures. Topics covered: design styles, layout editors, symbolic compaction, module generators, placement and routing, automatic synthesis, design-rule checking, circuit extraction, simulation and verification. Students are strongly encourage to have programming skills and to have taken a course in Digital System Fundamentals such as E C E/COMP SCI 352.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **E C E/COMP SCI 757 – ADVANCED COMPUTER ARCHITECTURE II** 3 credits.

Parallel algorithms, principles of parallelism detection and vectorizing compilers, interconnection networks, MIMD machines, processor synchronization, data coherence, multis, dataflow machines, special purpose processors. Students are strongly encouraged to have knowledge of computer architecture (e.g., E C E/COMP SCI 552).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **E C E/COMP SCI/E M A/E P/M E 759 – HIGH PERFORMANCE COMPUTING FOR APPLICATIONS IN ENGINEERING** 3 credits.

An overview of hardware and software solutions that enable the use of advanced computing in tackling computationally intensive Engineering problems. Hands-on learning promoted through programming assignments that leverage emerging hardware architectures and use parallel computing programming languages. Students are strongly encourage to have completed COMP SCI 367 or COMP SCI 400 or to have equivalent experience.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E C E/COMP SCI 760 – MACHINE LEARNING**

3 credits.

Computational approaches to learning: including inductive inference, explanation-based learning, analogical learning, connectionism, and formal models. What it means to learn. Algorithms for learning. Comparison and evaluation of learning algorithms. Cognitive modeling and relevant psychological results.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify different aspects of machine learning, including supervised learning, unsupervised learning, and reinforcement learning

Audience: Graduate

2. Implement and analyze a variety of supervised models for classification and regression, including decision trees, instance-based models, naive Bayes, support vector machines, a variety of neural networks, linear and logistic regression, and others

Audience: Graduate

3. Implement and analyze neural network models, starting with the perceptron, and continuing to multilayer perceptrons, convolutional neural networks, recurrent neural networks, along with deep generative models

Audience: Graduate

4. Identify various types of regularization techniques and their properties

Audience: Graduate

5. Implement optimization techniques used in modern machine learning, including gradient descent and stochastic gradient descent

Audience: Graduate

6. Apply various concepts and metrics involved in evaluating models: accuracy, F measures, ROC, and precision/recall curves, and implement cross-validation

Audience: Graduate

7. Analyze unsupervised learning techniques for clustering, dimensionality reduction, and latent models

Audience: Graduate

8. Identify classical and modern techniques to improve models or deal with dearth of data: ensemble methods, semi-supervised learning, weak supervision

Audience: Graduate

**E C E/COMP SCI 761 – MATHEMATICAL FOUNDATIONS OF MACHINE LEARNING**

3 credits.

Mathematical foundations of machine learning theory and algorithms. Probabilistic, algebraic, and geometric models and representations of data, mathematical analysis of state-of-the-art learning algorithms and optimization methods, and applications of machine learning. Knowledge of probability [such as MATH/STAT 431 or COMP SCI/E C E 561] and linear algebra [such as MATH 341 or M E/COMP SCI/E C E 532] is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Derive and apply mathematical tools for machine learning from probability, statistics, linear algebra, and optimization

Audience: Graduate

2. Perform mathematical analysis and characterization of generative and discriminative models

Audience: Graduate

3. Perform mathematical analysis of machine learning algorithms

Audience: Graduate

4. Perform derivation of basic machine learning error bounds and related performance analysis

Audience: Graduate

5. Read and understand theoretical papers from machine learning conferences

Audience: Graduate

**E C E/COMP SCI 763 – TRUSTWORTHY ARTIFICIAL INTELLIGENCE**

3 credits.

Explore security and privacy aspects of trustworthy artificial intelligence. Three core subjects will be considered: differential privacy and algorithmic fairness; adversarial machine learning; and end-to-end trustworthy systems. A selection of more advanced topics may be covered such as additional notions of privacy, language-based security, and robust optimization. Knowledge of probability/statistics (such as MATH 431), cryptography (such as MATH 435), security (such as COMP SCI 642), and modern machine learning (such as M E/COMP SCI/E C E 539 or 540) is required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Evaluate machine learning and AI systems from an adversarial, security and privacy mindset.

Audience: Graduate

2. Identify common pitfalls and problems in ensuring security and privacy for AI.

Audience: Graduate

3. Summarize the commonalities and differences between notions of security and privacy (e.g., the difference between privacy and cryptographic security).

Audience: Graduate

4. Explain the strengths and limitations of candidate definitions of robustness, security, privacy, and fairness properties in AI.

Audience: Graduate

5. Apply useful primitives from end-to-end trustworthiness to machine learning and AI systems.

Audience: Graduate

6. Use modern tools to design attacks and implement defensive measures.

Audience: Graduate

**E C E/COMP SCI 766 – COMPUTER VISION**

3 credits.

Fundamentals of image analysis and computer vision; image acquisition and geometry; image enhancement; recovery of physical scene characteristics; shape-from techniques; segmentation and perceptual organization; representation and description of two-dimensional objects; shape analysis; texture analysis; goal-directed and model-based systems; parallel algorithms and special-purpose architectures. Students are strongly encouraged to have basic proficiency in calculus and linear algebra, such as MATH 340, and basic programming such as COMP SCI 300.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Develop basic computer vision applications using a programming environment

Audience: Graduate

2. Formulate computer vision research problems motivated from real-world applications

Audience: Graduate

3. Evaluate and compare existing solutions to a computer vision problem

Audience: Graduate

4. Design approaches for solving computer vision problems based on a broad range of fundamental concepts in 2D and 3D computer vision, sensing and recognition

Audience: Graduate

5. Communicate solutions verbally and in writing to justify choices while designing solutions

Audience: Graduate

**E C E/B M E/MED PHYS 778 – MACHINE LEARNING IN ULTRASOUND IMAGING**

3 credits.

Concepts and machine learning techniques for ultrasound beamforming for image formation and reconstruction to image analysis and interpretation will be presented. Key machine learning and deep learning concepts applied to beamforming, compressed sampling, speckle reduction, segmentation, photoacoustics, and elasticity imaging will be evaluated utilizing current peer-reviewed publications.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically read and evaluate peer-reviewed journal papers describing machine learning applications in ultrasound imaging.  
Audience: Graduate

2. Apply, implement and expand upon ideas from these publications to applications in ultrasound imaging.  
Audience: Graduate

3. Present the results of their critical evaluation and implementation to the class.  
Audience: Graduate

4. Write a research paper based on their findings suitable for publication.  
Audience: Graduate

**E C E/COMP SCI 782 – ADVANCED COMPUTER SECURITY AND PRIVACY**

3 credits.

Security and privacy issues in software, networks, and hardware systems. Security vulnerabilities, privacy threats, threats modeling, and mitigation strategies. Privacy issues related to user interaction with devices, online systems, and networks. In addition, a selection of more advanced topics will be covered. Possible examples include applied cryptography in the context of systems, security and privacy policies, user authentication, and cyber-physical systems. Builds on prior experiences with one or more of the following: networking, security, modern machine learning, embedded systems, and mobile computing.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify contemporary research problems related to the security and privacy of modern computer systems  
Audience: Graduate

2. Implement known security attacks to identify weaknesses that led to those attacks and evaluate defense strategies  
Audience: Graduate

3. Differentiate among the different dimensions involved in protecting users' security and privacy as they relate to effectiveness, practicality, and usability  
Audience: Graduate

4. Analyze, interpret, and critique research papers from top-tier security conferences by identifying their strengths and weaknesses  
Audience: Graduate

5. Propose original research by defining a problem, outlining a plan, performing the original research, and designing, implementing, and evaluating the proposed solution  
Audience: Graduate

6. Work effectively in teams to complete a research project  
Audience: Graduate

7. Communicate effectively through written reports, oral presentations, and discussion  
Audience: Graduate

**E C E 790 – MASTER'S RESEARCH**

1-9 credits.

Independent work on master's research overseen by a qualified instructor.

**Requisites:** Declared in Electrical Engineering: Research, M.S. or Electrical Engineering: Power Engineering, M.S.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate an ability to formulate, analyze, and independently solve advanced engineering problems

Audience: Graduate

2. Communicate research results orally and in writing

Audience: Graduate

**E C E 817 – NONLINEAR SYSTEMS**

3 credits.

Modelling nonlinear systems, linearization, equilibria, solution concepts, phase plane analysis, stability concepts, Lyapunov methods, oscillations, vector space methods, control system nonlinearities and design. Selected topics from the following: input-output methods, switching and variable structure systems, feedback linearization, and Lyapunov robustness. Knowledge of linear systems [such as E C E 717] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**E C E 821 – OPTIMAL CONTROL AND VARIATIONAL METHODS**

3 credits.

Variational principles in optimization and optimal control, constrained control and reachability analysis, stability of optimal control, data-driven methods for optimal control. Knowledge of linear systems [such as E C E 717] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify appropriate notions of optimality for controls in autonomous systems

Audience: Graduate

2. Formulate optimal control problems in a rigorous mathematical framework

Audience: Graduate

3. Use systematic design procedures for optimal controls

Audience: Graduate

4. Use data driven optimal control for dynamical systems

Audience: Graduate

**E C E 826 – THEORETICAL FOUNDATIONS OF LARGE-SCALE MACHINE LEARNING**

3 credits.

Mathematical foundations of large-scale machine learning and optimization. Focus on recent texts in machine learning, optimization, and randomized algorithms, focused on tradeoffs that are driving algorithmic design in this new discipline. These trade-offs revolve around speed of convergence, statistical accuracy, robustness, scalability, algorithmic complexity, and implementation.

**Requisites:** COMP SCI/E C E 761

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Prove convergence rates for stochastic optimization algorithms

Audience: Graduate

2. Describe systems tradeoffs that drive algorithmic design in large-scale machine learning

Audience: Graduate

3. Summarize recent literature in large-scale optimization and machine learning

Audience: Graduate

4. Design, tune, or tailor a given machine learning algorithm for a new system

Audience: Graduate

5. Evaluate statements about parallelizability, generalization, convergence of optimization algorithms

Audience: Graduate

**E C E 830 – ESTIMATION AND DECISION THEORY**

3 credits.

Estimation and decision theory applied to random processes and signals in noise: Bayesian, maximum likelihood, and least squares estimation; the Kalman filter; maximum likelihood and maximum a posteriori detection; adaptive receivers for channels with unknown parameters or dispersive, fading characteristics; the RAKE receiver; detection systems with learning features.

**Requisites:** E C E 730

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**E C E 835 – LIGHT INTERACTIONS WITH QUANTUM MATERIALS**

3 credits.

Light-matter interactions with quantum systems and their applications in quantum computing, communications, and sensing. Brief review of quantum mechanics and derivation of quantum structure of atoms. Deeper exploration of concepts and applications of quantum optics (such as use of nonclassical light, entangled photons) and experimental techniques on how to control and measure quantum systems with photons (including atom cooling and trapping, coherent interactions, putting atoms in cavities). Knowledge of introductory-level classical electromagnetism (such as E C E 220 or PHYSICS 202) and modern physics (such as PHYSICS/E C E 235 or PHYSICS 241) required.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Explain concepts in the interactions of light with quantum systems, such as absorption and emission processes, Rabi oscillations, and cavity quantum electrodynamics

Audience: Graduate

2. Formulate techniques to prepare, manipulate, and detect quantum states using common light sources and optical components

Audience: Graduate

3. Apply numerical methods to model and analyze interactions in quantum systems

Audience: Graduate

4. Identify critical differences between classical and non-classical light sources and recognize experimental approaches to generate, characterize, and utilize these light sources in quantum measurements

Audience: Graduate

5. Analyze and effectively communicate the use of atom-photon interactions in state-of-the-art quantum computing, communication, and sensing experiments

Audience: Graduate

**E C E 841 – ANTENNAS**

3 credits.

Applications of Maxwell's field equations to radiation problems; transmission of radio waves; radiation and impedance characteristics of various antennas and arrays. Analysis of complete antenna systems.

**Requisites:** E C E 740**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Perform wireless system analysis, including link budget calculation for wireless communications and radar systems

Audience: Graduate

2. Use Maxwell's equations to solve basic radiation problems from electric and magnetic current distributions in space

Audience: Graduate

3. Analyze and design basic types of wire antennas, including dipole and loop antennas, and aperture antennas, including horn, reflector, patch, slot, lens, and reflectarray antennas

Audience: Graduate

4. Analyze and design basic types of antenna arrays, including linear and planar arrays

Audience: Graduate

5. Synthesize antennas and antenna arrays to achieve a given desired radiation pattern in the far field

Audience: Graduate

6. Demonstrate a fundamental understanding of antenna measurement techniques including common techniques used to measure the radiation pattern, gain, directivity, polarization, and bandwidth of an antenna under test

Audience: Graduate

7. Determine a suitable antenna to use for a given application from the system level performance metrics desired including, bandwidth, gain, radiation pattern, frequency of operation, etc.

Audience: Graduate

**E C E/MATH 842 – TOPICS IN APPLIED ALGEBRA**

3 credits.

Applied topics with emphasis on algebraic constructions and structures. Examples include: algebraic coding theory; codes (algebraic-geometric, convolutional, low-density-parity-check, space-time); curve and lattice based cryptography; watermarking; computer vision (face recognition, multiview geometry).

**Requisites:** Graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**E C E 845 – TRANSPORT IN SEMICONDUCTOR DEVICES**

3 credits.

Transport of carriers in electronic devices, starting from the Boltzmann equation and the quantum mechanical treatment of scattering, and covering applications to devices; transport in 2D structures; modeling of transport; experiments and devices involving hot electrons.

**Requisites:** E C E 745**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**E C E/PHYSICS 848 – NONLINEAR WAVES**

3 credits.

General considerations of nonlinear wave phenomena; nonlinear hyperbolic waves; nonlinear dispersion; nonlinear geometrical optics; Whitham's variational theory; nonlinear and parametric instabilities; solitary waves; inverse scattering method. Knowledge of electromagnetics [such as E C E 320 or PHYSICS 321] or mechanics [such as M E 340] encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**E C E/COMP SCI/STAT 861 – THEORETICAL FOUNDATIONS OF MACHINE LEARNING**

3 credits.

Advanced mathematical theory and methods of machine learning. Statistical learning theory, Vapnik-Chevronenkis Theory, model selection, high-dimensional models, nonparametric methods, probabilistic analysis, optimization, learning paradigms.

**Requisites:** E C E/COMP SCI 761 or E C E 830**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**E C E/MATH/STAT 888 – TOPICS IN MATHEMATICAL DATA SCIENCE**

1-3 credits.

Advanced topics in the mathematical foundations of data science

**Requisites:** Graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Apply advanced mathematical concepts to solve a variety of data science problems

Audience: Graduate

2. Analyze rigorously the mathematical properties of methods used in data science

Audience: Graduate

**E C E 890 – PRE-DISSERTATOR'S RESEARCH**

1-9 credits.

Independent work on doctoral research overseen by a qualified instructor.

**Requisites:** Declared in Electrical Engineering PhD**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate an ability to formulate, analyze, and independently solve advanced engineering problems

Audience: Graduate

2. Communicate research results in writing and seminars

Audience: Graduate

**E C E 901 – SPECIAL TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING**

1-3 credits.

Special advanced topics across Electrical and Computer Engineering. The topics covered, instructors, and prerequisites all vary with semester and with section. Particular topics typically reflect state-of-the-art ideas and research.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**E C E/N E/PHYSICS 922 – SEMINAR IN PLASMA PHYSICS**

0-1 credits.

Current topics in plasma physics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**E C E 990 – DISSERTATOR'S RESEARCH**

1-12 credits.

Independent work on dissertation overseen by a qualified instructor.

**Requisites:** Declared in Electrical Engineering PhD**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate an ability to formulate, analyze, and independently solve advanced engineering problems

Audience: Graduate

2. Communicate research results in writing and seminars

Audience: Graduate

### E C E 999 – ADVANCED INDEPENDENT STUDY

1-3 credits.

Directed study projects as arranged with instructor.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## EMERGENCY MEDICINE (EMER MED)

### EMER MED 699 – INDEPENDENT STUDY

1-4 credits.

Offers undergraduates majoring in related fields an opportunity to participate in basic emergency medicine research. Assists in the preparation for graduate or medical school coursework.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply concepts learned in coursework to real life situations

Audience: Undergraduate

2. Read and effectively search scientific literature

Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

4. Critically review emergency medicine research protocols

Audience: Undergraduate

### EMER MED 909 – EMERGENCY MEDICINE INTERNSHIP PREP COURSE

1 credit.

Designed to highlight, review, and allow practice of key concepts in Emergency Medicine. Practice with case simulation, case discussion, didactics, panel discussions, and procedural skills to prepare for success in the first few weeks of an Emergency Medicine residency. Will lead and participate in simulations. Explore critical interplay between medical care and communication. Discuss common challenges encountered early in residency and throughout an EM career, and develop individualized plans to address these challenges.

**Requisites:** MED SC-M 810, 811, 812, 813, and EMER MED 961

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Diagnose and manage common and critical medical conditions

Audience: Graduate

2. Practice initial orders for acute situations

Audience: Graduate

3. Develop competency as a potential first responder to urgent or emergent patient care situations

Audience: Graduate

4. Accurately interpret and apply laboratory information to clinical scenarios

Audience: Graduate

5. Demonstrate effective communication with peers, patients, families and all members of the healthcare team

Audience: Graduate

6. Develop competency in providing meaningful feedback to peers in clinical environment

Audience: Graduate

7. Develop strategies to address the stresses of transitioning to internship during residency and throughout medical career

Audience: Graduate

8. Develop a framework for performing basic procedures in the Emergency Department

Audience: Graduate

9. Develop ultrasound skills that can be used to aid in stabilization and diagnosis of critically ill patients

Audience: Graduate

10. Develop an approach to evaluating and stabilizing ill pediatric patients

Audience: Graduate

11. Demonstrate familiarity with basic procedures commonly performed in the Emergency Department (intubation, central venous catheter placement, etc.)

Audience: Graduate

12. Demonstrate familiarity with the medications that are utilized during procedural sedation and Rapid Sequence Intubation (RSI) in the Emergency Department

Audience: Graduate

### EMER MED 911 – INTRODUCTION TO PREHOSPITAL MEDICINE AND DETERMINANTS OF UTILIZATION OF THE PREHOSPITAL SYSTEM

2 credits.

Provides a unique opportunity for fourth year medical students to gain experience in the prehospital system while utilizing their public health knowledge to determine factors that lead to patient utilization of this system. During this course, students will gain understanding of the prehospital system through first-hand experience with prehospital providers while appreciating the environment in which their patients live and work. Students will be asked to observe patient care, conduct posttransport interviews in the emergency department, and examine the social and environmental determinants that led to activation of the prehospital system.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### EMER MED 912 – GUATEMALA HEALTH ADVANCED ELECTIVE

2 credits.

Builds on the skills students developed during the Guatemala Service Learning experience in their first-year. The Service Learning trip partners with the San Lucas Mission to provide traveling health clinics around the southern/eastern sides of Lake Atitlan. In this selective, students will take a leadership role in the Service Learning Trip. Course is intended for M4 or Phase 3 medical students who have participated in the Guatemala Service Learning Experience. Students should have intermediate Spanish-language skills. Exceptions to these requirements will be considered on a case-by-case basis by Clerkship Director.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### EMER MED 913 – GUATEMALA PUBLIC HEALTH FIELD PROJECT

2 credits.

Design and implement a public health field project in the community of San Lucas Tolimán, Guatemala. This project will fulfill the field project for students on the path of distinction in public health or the dual MD-MPH program. In participating in the Guatemala service learning experience, students will have provided traveling health clinics to indigenous Mayan populations in rural Guatemala, collaborating with the San Lucas Mission. Course is intended for M4 or Phase 3 medical students who have participated in the Guatemala Service Learning Experience. Students should have intermediate Spanish-language skills. Exceptions to these requirements will be considered on a case-by-case basis by Clerkship Director.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

### EMER MED 914 – WILDERNESS MEDICINE

2 credits.

Complete an Advanced Wilderness Life Support Course, which will cover topics such as Altitude Illnesses, Hyper- and Hypothermia, Toxicology, Envenomations, general trauma, and more, through lectures, skills sessions, and simulation. Focus on medical decision-making that can be executed early in disease or injury processes, in austere environments, with a focus on acute stabilization and evacuation to appropriate medical care. Learn foundational backcountry skills such as land navigation; fire and stove operation; water and waste management; and Leave-No-Trace principles. Technical workshops and field experiences give participants the opportunity to learn from experienced kayakers and climbers from the area, to apply backcountry skills on a self-supported backpacking trip, and to continue exploring wilderness medicine through interactive sessions.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. DEMONSTRATE an appreciation of "Leave No Trace" principles in the backcountry, and how these ethics guide not only an individual's approach to outdoor stewardship, but also how the first principle – "Plan Ahead and Prepare" – informs a medical provider's approach to wilderness medicine.

Audience: Graduate

2. UTILIZE basic backcountry knowledge, skills, and materials – such as navigation and emergency communication skills, water management, fire construction, waste management and sanitation – not only to illness and injury, but also to prevent illness and injury in resource-limited settings.

Audience: Graduate

3. DISPLAY appropriate decision-making, risk-management, and leadership qualities when addressing environmental hazards such as extremes of temperature, precipitation, storms, altitude, wildlife, and dangerous moving water conditions.

Audience: Graduate

4. PRACTICE basic backcountry skills that are foundational to safe enjoyment of the outdoors, such as land navigation using a map and compass, water treatment, stove operation, fire building, river crossings, knot tying, and gear maintenance.

Audience: Graduate

5. APPLY knowledge from didactic and hands-on topics, specifically trauma topics, hypothermia, drowning and submersion, to common water hazards in a pool session led by a team of experienced whitewater kayakers and a rope session led by a team of experienced climbers.

Audience: Graduate

6. APPROACH the injured patient safely in a backcountry setting using a standardized algorithm, the Patient Assessment System, paying attention to scene safety concerns, as well as standard primary and secondary surveys, care plan development, and frequent reassessment.

Audience: Graduate

7. MANAGE a patient with multisystem trauma with standard and improvised means, including spinal trauma with manual and improvised spinal immobilization, blunt chest injuries with needle decompression and occlusive dressings, pelvic injuries with improvised pelvic binding, and orthopedic injuries with improvised splinting, particularly traction splinting of the femur.

Audience: Graduate

8. DIFFERENTIATE high altitude illnesses, specifically acute mountain

**EMER MED 919 – INDIVIDUALIZED PHASE 3 CLINICAL ELECTIVE IN EMERGENCY MEDICINE**

2-4 credits.

Care for emergency medicine patients in the Emergency Department. Participate in multidisciplinary work to transition patients to the next level of care. Evaluate and manage patients requiring collaboration with consulting specialties. Complete other patient care related learning activities as assigned by instructors (e.g., literature reviews, presentations on specific topics); these are dependent on the individual student, attending physician, and clinical site.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis, diagnostic and treatment plans.

Audience: Graduate

3. Adapt differential diagnosis and plans to changing patient circumstances and data

Audience: Graduate

4. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

5. Review, interpret and present current literature to support patient care.

Audience: Graduate

6. Develop clinically relevant questions to advance learning.

Audience: Graduate

7. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

8. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

**EMER MED 920 – ART AND SCIENCE OF RESUSCITATION**

2 credits.

Gain comfort with necessary skills in leadership and communication to effectively run a resuscitation and to review the basic science, which guide the principles of resuscitation of a variety of critical-illness disease states. Students will first attain ACLS certification via AHA approved curriculum, followed by in-depth reviews of skills and underlying basic science behind the creation of ACLS guidelines. In addition to hands-on skills such as CPR, BVM respiration, I/O access, and airway management, simulation will be utilized to teach advanced skills in leadership, teamwork, and communication, which are integral to success in running ACLS-based resuscitation's. Crisis-Resource Management skills will be introduced and practiced in a variety simulated resuscitation scenarios, with students having the opportunity to practice various roles, including leading a code team.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and understand ACLS resuscitation protocols and resuscitation skills

Audience: Graduate

2. Demonstrate an understanding of the principles of Teamwork and Communication using the Crisis Resource Management model

Audience: Graduate

3. Through hands on simulation scenarios, identify physiology, pharmacology, and pathophysiology of common causes of cardiac arrest

Audience: Graduate

4. Through hands on simulation scenarios, articulate the scientific basis of ACLS protocols

Audience: Graduate

5. Through review of the primary literature, develop an understanding of the scientific basis of modern resuscitation algorithms.

Audience: Graduate

6. Demonstrate how to successfully lead a simulated resuscitation scenario

Audience: Graduate

**EMER MED 930 – WILDERNESS MEDICINE**

1 credit.

Introduces students to the epidemiology, pathophysiology and clinical practice of Wilderness Medicine: the care of patients in remote environments lacking typical health care resources, often under harsh conditions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**EMER MED 940 – PEDIATRIC EMERGENCY MEDICINE ELECTIVE**

2 credits.

Clinical experience in the Pediatric Emergency Department setting. With guidance and supervision, provide primary and autonomous evaluation and care for the full spectrum of ED pediatric. Pediatric bronchiolitis, asthma, croup, appendicitis, orthopedic injuries, lacerations, and other common presentations.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify the path and options for a career in pediatric emergency medicine.

Audience: Graduate

2. Help plan and deliver the treatment of acutely ill pediatric patients in an emergency department setting.

Audience: Graduate

3. Perform a hypothesis-driven history and complete a targeted exam.

Audience: Graduate

4. Develop and present a weighted differential diagnosis with an emphasis on pediatric diagnoses

Audience: Graduate

5. Present a diagnostic plan, including laboratory and imaging modalities.

Audience: Graduate

6. Present a treatment plan, including symptom management, disease modification, and disposition.

Audience: Graduate

7. Interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

8. Complete written documentation in a comprehensive, concise, accurate, and timely manner.

Audience: Graduate

9. Review, interpret, and present current literature to support patient care.

Audience: Graduate

10. Develop clinically relevant questions to advance learning.

Audience: Graduate

11. Communicate effectively with patients, families, physicians, and non-physician team members.

Audience: Graduate

12. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

13. Engage families in shared decision-making regarding tests, orders and procedures.

Audience: Graduate

14. Identify the problems associated with medical jargon and use commonly understood language when communicating with patients and families.

Audience: Graduate

**EMER MED 958 – INTRODUCTION TO BEDSIDE ULTRASOUND ELECTIVE**

2 credits.

Focus on learning and practicing skills in clinical ultrasound (US) in the Emergency Department setting, under direct supervision by Emergency Medicine faculty. Receive teaching in core clinical US skills including evaluation of the aorta, echocardiography, gallbladder, renal, inferior vena cava, female pelvis, FAST, deep vein thrombosis, ocular, and lung exams. Complete hands-on scanning with ultrasound-trained faculty focusing on the above areas of expertise.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Correctly interpret ultrasound images with regards to pathology vs normal.

Audience: Graduate

2. Correctly acquire the appropriate views for the above listed Clinical US areas of interest.

Audience: Graduate

3. Explain the limitations of Clinical US.

Audience: Graduate

4. Describe how Clinical US is applicable in bedside evaluation and applications in clinical decision-making.

Audience: Graduate

**EMER MED 959 – EMERGENCY MEDICINE REGIONAL SITE**

2-4 credits.

Learn and gain clinical experience in the Emergency Department setting.

Evaluate and care for the full spectrum of Emergency Department patients under the guidance and supervision of Emergency Medicine attending physicians.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain experience in the treatment of acutely ill patients in an Emergency Department setting.

Audience: Graduate

2. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

3. Develop and present a weighted differential diagnosis.

Audience: Graduate

4. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

5. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

6. Present a treatment plan including symptom management, disease modification, and disposition.

Audience: Graduate

7. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

8. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

9. Review, interpret and present current literature to support patient care.

Audience: Graduate

10. Develop clinically relevant questions to advance learning.

Audience: Graduate

11. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

12. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

13. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

14. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

15. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**EMER MED 960 – BASIC EMERGENCY MEDICINE (EM) ELECTIVE**

2 credits.

Learn and gain clinical experience in the Emergency Department setting.

Evaluate and care for the full spectrum of Emergency Department patients primarily and autonomously under the guidance and supervision of Emergency Medicine Attendings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain experience in the treatment of acutely ill patients in an Emergency Department setting.

Audience: Graduate

2. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

3. Develop and present a weighted differential diagnosis.

Audience: Graduate

4. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

5. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

6. Present a treatment plan including symptom management, disease modification, and disposition.

Audience: Graduate

7. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

8. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

9. Review, interpret and present current literature to support patient care.

Audience: Graduate

10. Develop clinically relevant questions to advance learning.

Audience: Graduate

11. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

12. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

13. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

14. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

15. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**EMER MED 961 – ADVANCED EM ELECTIVE**

4 credits.

Learn and gain clinical experience in the Emergency Department setting. Evaluate and care for the full spectrum of Emergency Department patients primarily and autonomously under the guidance and supervision of Emergency Medicine Attendings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain experience in the treatment of acutely ill patients in an Emergency Department setting.

Audience: Graduate

2. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

3. Develop and present a weighted differential diagnosis.

Audience: Graduate

4. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

5. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

6. Present a treatment plan including symptom management, disease modification, and disposition.

Audience: Graduate

7. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

8. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

9. Review, interpret and present current literature to support patient care.

Audience: Graduate

10. Develop clinically relevant questions to advance learning.

Audience: Graduate

11. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

12. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

13. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

14. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

15. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**EMER MED 970 – TEACHING IN EMERGENCY MEDICINE**

2-4 credits.

Develop clinical education skills and knowledge by teaching junior (Phase 2) medical students in a clinical setting. Learn effective teaching techniques. Become familiar with using and adept at researching the primary literature in health professions education. Understand effective approaches to providing feedback while spending clinical time advising and mentoring junior (Phase 2) students who are on their Acute Care Block (ACB) rotations in the Emergency Department (ED). Develop novel instructional, curricular, and interpersonal skills as an educator and use this knowledge to improve the clinical learning environment for future junior (Phase 2) students. Effectively assist junior (Phase 2) students with their approaches to undifferentiated patients in the ED, including developing an initial diagnostic and treatment plan, navigating a complex healthcare system, and setting personal learning goals in a clinical environment.

**Requisites:** EMER MED 961

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and implement evidence-based teaching methods in health professions education

Audience: Graduate

2. Assist junior medical students with approaching ED patients in a real-life clinical setting

Audience: Graduate

3. Provide specific and actionable feedback to other students based on their performance

Audience: Graduate

4. Create brief educational didactic for an audience of junior medical students

Audience: Graduate

5. Provide appropriate guidance and coaching for a junior medical student working in the ED regarding the diagnosis and treatment of undifferentiated ED patients presenting with a variety of common chief complaints.

Audience: Graduate

6. Assess a junior medical student's performance and give effective (e.g., specific, actionable) feedback

Audience: Graduate

7. Implement a variety of instructional methods available in a real-life clinical setting.

Audience: Graduate

8. Facilitate simulated ED patient encounters and subsequent debriefing for Phase II medical students.

Audience: Graduate

9. Identify effective strategies for creating and giving educational content (e.g., blog posts, presentations)

Audience: Graduate

10. Understand career pathways involving health professions education and academic medicine

Audience: Graduate

**EMER MED 990 – INDEPENDENT READING AND RESEARCH IN EMERGENCY MEDICINE**

2-8 credits.

Individual Master or PhD student interests and research provide the opportunity to work with faculty members. Tailored to each specific student research proposal/project.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Engage in clinical research through an apprenticeship-style learning experience with a physician-scientist mentor.

Audience: Graduate

2. Understand clinical research design by writing or contributing to a research proposal.

Audience: Graduate

3. Develop skills in the analysis of clinical research data.

Audience: Graduate

4. Develop a plan for communicating the results of the clinical research project.

Audience: Graduate

5. Improve verbal and written communication skills by preparing findings to be able to present clinical research experience and results.

Audience: Graduate

6. Formulate a hypothesis or specific objective if the study does not involve hypothesis generating research.

Audience: Graduate

7. Conduct a thorough literature review of the specific research question.

Audience: Graduate

8. Select and apply statistical methodologies appropriate for the proposed analyses.

Audience: Graduate

9. Interpret results correctly and in context of previous findings from literature review.

Audience: Graduate

**EMER MED 998 – INDEPENDENT STUDY**

1-8 credits.

Offers MD students interested in emergency medicine an opportunity to participate in advanced and translational research. Expands basic research knowledge and exposes MD students to current advanced research.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop practical research skills that can be used across multiple disciplines.

Audience: Graduate

2. Read and effectively search scientific literature

Audience: Graduate

3. Understand and adhere to ethical standards of research conduct

Audience: Graduate

4. Assist with data reviewing and analysis

Audience: Graduate

5. Critically review emergency medicine research protocols

Audience: Graduate

# ENGINEERING MECHANICS AND AEROSPACE ENGINEERING (E M A)

## E M A 1 – COOPERATIVE EDUCATION PROGRAM

1 credit.

Work experience which combines classroom theory with practical knowledge of operations to provide students with a background upon which to base a professional career in industry.

**Requisites:** Sophomore standing only

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work

Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work

Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise

Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information

Audience: Undergraduate

## E M A 103 – PRINCIPLES OF ENGINEERING FROM THE RENAISSANCE TO MODERN TIMES

3 credits.

Engineering achievements of the Renaissance period and their relation to modern engineering practice, key principles developed, and errors in understanding of that time. Innovative work of notable figures such as Galileo Galilei and Leonardo da Vinci and their contributions to fundamental mechanics principles of engineering, traced through modern engineering practice and current engineering applications. Introduction to concepts of stress, strain, tension, compression, deflection of beams, flaws, and fracture. Not for engineering majors.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate a working understanding of basic concepts in engineering mechanics.

Audience: Undergraduate

2. Use experiments to produce a model and draw conclusions about material behavior under different loading situations.

Audience: Undergraduate

3. Interpret experimental data to test a hypothesis and/or compare to theoretical prediction.

Audience: Undergraduate

4. Explain how concepts in engineering mechanics were understood in the Renaissance compared to modern times.

Audience: Undergraduate

**E M A 105 – INTRODUCTION TO UNMANNED AIRCRAFT SYSTEMS**

3 credits.

Prepares students to operate Unmanned Aircraft Systems (UAS) for commercial purposes. Focuses on remote sensing, automation / artificial intelligence, data analytics and business applications / opportunities for UAS. Teaches all applicable subjects and provides hands-on experience necessary to 1) safely, legally and ethically operate UAS for commercial purposes; 2) effectively apply UAS to solve business problems and 3) manage, process and analyze data collected via UAS. Optional Federal Aviation Administration exam for a remote pilot-in-command (RPIC) certification. Group projects involving real-world drone flights to collect data and produce commercially viable products.

**Requisites:** None**Repeatable for Credit:** No

**Learning Outcomes:** 1. Recall the following topics: UAS structure, remote sensing, automation, artificial intelligence and performance; UAS data management, processing and analytics; UAS regulations, airspace, flight planning and weather; and UAS business types, markets and opportunities  
Audience: Undergraduate

2. Gain experience managing UAS-related projects to solve real-world business problems  
Audience: Undergraduate

3. Apply photogrammetry techniques to process drone imagery into geo-rectified 3D models  
Audience: Undergraduate

4. Apply different sensors such as visible imagery cameras, thermal cameras, multi-spectral cameras and lidar sensors to solve various engineering / business problems  
Audience: Undergraduate

**E M A 200 – INTRODUCTION TO MECHANICS AND AEROSPACE**

3 credits.

An introduction to the fields of mechanics and aerospace engineering. Fundamental concepts in engineering, including modeling, analysis, design, fabrication and experimental testing. Career paths, engineering ethics, shop safety, and oral and written technical communication.

**Requisites:** Declared in Biomedical, Biological Systems, Chemical, Civil, Computer, Electrical, Environmental, Geological, Industrial, Mechanical, or Nuclear Engineering, Materials Science and Engineering, Engineering Physics, or Engineering Mechanics BS

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use the COE makerspace and shop for prototype fabrication and as needed in future coursework  
Audience: Undergraduate

2. Utilize the fundamentals of the engineering design process and apply them in a laboratory setting  
Audience: Undergraduate

3. Implement individual learning and cooperative teamwork skills through independent research and collaborative problem solving  
Audience: Undergraduate

4. Utilize technical written and oral communication skills including making plots and formatting figures, creating parts and technical drawings, and writing concisely and clearly to communicate ideas  
Audience: Undergraduate

5. Utilize engineering software that is required in upper-level engineering courses  
Audience: Undergraduate

**E M A 201 – STATICS**

3 credits.

Principles of mechanics, force systems, equilibrium, structures, distributed forces, moments of inertia of areas, and friction.

**Requisites:** (MATH 222 or concurrent enrollment) or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Interpret a given engineering schematic in the context of equilibrium

Audience: Undergraduate

2. Determine the need for free body diagram(s) or appropriate sketch(es)

Audience: Undergraduate

3. Draw the free body diagram(s) with appropriate annotations

Audience: Undergraduate

4. Generate the governing equations informed by the free body diagram(s)

Audience: Undergraduate

5. Solve the governing equations

Audience: Undergraduate

6. Critically review results to ensure answers are realistic

Audience: Undergraduate

**E M A 202 – DYNAMICS**

3 credits.

Kinematics, force-mass-acceleration relations, work and energy, impulse and momentum, moments of inertia and mass.

**Requisites:** E M A 201 or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Derive kinematic relationships among position, velocity and acceleration for systems of particles and rigid bodies

Audience: Undergraduate

2. Apply and solve Newton-Euler equations to analyze the motion of systems of particles and rigid bodies

Audience: Undergraduate

3. Apply and solve work-energy equations to analyze the motion of systems of particles and rigid bodies

Audience: Undergraduate

4. Apply and solve momentum equations to analyze the motion of systems of particles and rigid bodies

Audience: Undergraduate

**E M A 303 – MECHANICS OF MATERIALS**

3 credits.

Stress and strain, torsion, bending of beams, shearing stresses in beams, compound stresses, principal stresses, deflections of beams, statically indeterminate members, columns. For civil engineers.

**Requisites:** E M A 201 and MATH 222, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Compute stresses, strains, and deformations for structures experiencing tension, compression, torsion, bending, and thermal loads

Audience: Undergraduate

2. Combine analyses for different types of loading

Audience: Undergraduate

3. Analyze engineering structures for failure by yield and buckling

Audience: Undergraduate

### **E M A/M E 307 – MECHANICS OF MATERIALS LAB**

1 credit.

Data processing, tension/compression tests, creep stress concentrations, fatigue, fracture, composite materials, combined stress, beam flexure, dynamic loads, buckling.

**Requisites:** (M E 306, E M A 303 or concurrent enrollment) or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Perform a tensile test

Audience: Undergraduate

2. Calculate material properties from tensile test data

Audience: Undergraduate

3. Compare experimentally determined values to theoretical values

Audience: Undergraduate

4. Plot experimental data in an efficient and effective manner

Audience: Undergraduate

5. Identify sources of error and uncertainty in mechanical tests

Audience: Undergraduate

### **E M A/CIV ENGR 395 – MATERIALS FOR CONSTRUCTED FACILITIES**

3 credits.

Properties and tests of materials used in the initial construction or repair of facilities (including buildings, transportation systems, utility systems, and reinforced earth). Introduction to laboratory and field measurement techniques to assess material performance capabilities. Technical report preparation.

**Requisites:** (E M A 303 or M E 306), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use knowledge of construction materials behavior to select and specify materials for construction of civil engineering facilities

Audience: Undergraduate

2. Use knowledge of construction materials behavior to monitor construction of civil engineering facilities

Audience: Undergraduate

3. Conduct experiments with standardized testing protocols, interpret test results, and communicate results and interpretation in technical reports

Audience: Undergraduate

4. Design and conduct forensic studies to determine the role of material properties or construction methods in facility failures

Audience: Undergraduate

5. Use teamwork and communication skills relevant to the selection, specification, monitoring, and testing of construction materials

Audience: Undergraduate

**E M A 405 – PRACTICUM IN FINITE ELEMENTS**

3 credits.

Use of finite elements (FE) for solving practical problems in mechanics. Elementary theory of FE is discussed. A commercial computer program is used for applications. Major emphasis is on behavior of FE, modeling, and evaluation of results for correctness.

**Requisites:** (E M A 303 or M E 306), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the nature of an engineering problem and devise a simplified model that estimates expected behavior

Audience: Undergraduate

2. Perform various types of finite element analyses such as static structural, thermal, modal, harmonic, transient, random vibration, nonlinear materials, nonlinear contact, and buckling analyses

Audience: Undergraduate

3. Qualitatively and quantitatively verify the results using visual observations, a variety of simplified calculations, preliminary analysis, tabulated results, and numerical techniques

Audience: Undergraduate

4. Prepare and present informative reports on finite element modeling results

Audience: Undergraduate

**E M A 469 – DESIGN PROBLEMS IN ENGINEERING**

3 credits.

The design philosophy is presented. Students will be required to apply their knowledge of elementary mechanics, engineering and basic science to arrive at acceptable solutions to a variety of design problems.

**Requisites:** Declared in Engineering Mechanics and (E M A 303 or M E 306)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Navigate the mechanical design process through a group design project to include defining the problem, generating concepts, analyzing the design, and defining the manufacturing methods

Audience: Undergraduate

2. Apply fundamentals from their Engineering Mechanics coursework to analyze, guide, and modify their designs

Audience: Undergraduate

3. Gain proficiency in Computer Aided Drafting software and a familiarity with tools in the machine shop

Audience: Undergraduate

4. Demonstrate a professional level of communication (written, graphical/drawing and verbal) and presentation skills with clients, instructors, and peers

Audience: Undergraduate

**E M A/E P 471 – INTERMEDIATE PROBLEM SOLVING FOR ENGINEERS**

3 credits.

Use of computational tools for the solution of problems encountered in engineering physics applications. Topics covered include orbital mechanics, structural vibrations, beam and plate deformations, heat transfer, neutron diffusion, and criticality. Emphasis will be on modeling, choice of appropriate algorithms, and model validation.

**Requisites:** (E P 271 or COMP SCI 220) and (MATH 319, 320, 376 or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Numerically solve systems of ordinary differential equations (ODEs)

Audience: Undergraduate

2. Numerically solve 1-D boundary value problems

Audience: Undergraduate

3. Numerically solve eigenvalue problems

Audience: Undergraduate

4. Apply the basic techniques of Monte Carlo methods

Audience: Undergraduate

5. Apply the basic techniques of numerically solving partial differential equations (PDEs)

Audience: Undergraduate

6. Apply techniques from outcomes 1-5 to multi-step engineering problems

Audience: Undergraduate

**E M A/E P 476 – INTRODUCTION TO SCIENTIFIC COMPUTING FOR ENGINEERING PHYSICS**

3 credits.

Background for professional numerical computation in Linux environments begins with shell scripting and software archiving. Programming skills in a compiled language are then developed through scientific and engineering examples. Engineering problem-solving skills are reinforced through applications that require numerical solutions to systems of differential and/or integral equations, while motivating progressively more advanced computational methods.

**Requisites:** (E P 271, COMP SCI 300, or 310) and (MATH 319, 320, or 375), or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Create UNIX or Linux shell scripts to aid workflow in scientific computing

Audience: Undergraduate

2. Formulate physical problems in mathematical and computational terms

Audience: Undergraduate

3. Identify software needs for solving numerical models of science and engineering applications

Audience: Undergraduate

4. Write and modify computer programs in a compiled programming language

Audience: Undergraduate

5. Estimate the accuracy of computed results

Audience: Undergraduate

**E M A 489 – HONORS IN RESEARCH**

1-3 credits.

Undergraduate research and senior honors thesis in engineering mechanics and astronautics.

**Requisites:** Declared in Engineering Mechanics Honors in Research

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply basic physical and mathematical principles to engineering research problems

Audience: Undergraduate

2. Apply basic mechanics principles to engineering research problems

Audience: Undergraduate

3. Communicate technical concepts to a diverse audience via verbal or written media

Audience: Undergraduate

**E M A 506 – ADVANCED MECHANICS OF MATERIALS I**

3 credits.

Analysis and design of load-carrying members, shear center, unsymmetrical bending, curved beams, beams on elastic foundations, energy methods, theories of failure, thick-walled cylinders, stress concentrations, design to prevent failure by excessive elastic deformation, plastic deformation and fracture.

**Requisites:** (E M A 303 or M E 306), graduate/professional standing, or member of Engineering Guest Students

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Idealize and analyze practical problems in solid mechanics, complicated by geometric and material complexity

Audience: Undergraduate

2. Identify the assumptions required to solve a solid mechanics problem and judge whether those assumptions are reasonable

Audience: Undergraduate

3. Recognize the potential for structural and material failure and apply theories of failure appropriately for analysis and design

Audience: Undergraduate

**E M A/CIV ENGR/M E 508 – COMPOSITE MATERIALS**

3 credits.

Physical properties and mechanical behavior of polymer, metal, ceramic, cementitious, cellulosic and biological composite systems; micro- and macro-mechanics; lamination and strength analyses; static and transient loading; fabrication; recycling; design; analytical-experimental correlation; applications.

**Requisites:** (E M A 303 or M E 306), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. List the different types of composite materials and describe their manufacturing processes

Audience: Both Grad & Undergrad

2. Describe the mechanical behavior of various composite materials under different types of loading conditions

Audience: Both Grad & Undergrad

3. Derive mathematical models and solve them for engineering stresses and deformations in a composite structure

Audience: Both Grad & Undergrad

4. Describe special theories for heterogeneous and non-isotropic materials and solve boundary value problems associated with composite structures

Audience: Both Grad & Undergrad

5. Use the knowledge acquired in this class to design and conduct a complex analysis, design, and/or experiment to address key challenges relevant to composite materials

Audience: Graduate

### **E M A 519 – FRACTURE MECHANICS**

3 credits.

Introduction to the mechanics of fracture of linear and nonlinear materials. Crack stress and deformation fields; stress intensity factors; crack tip plastic zone; fracture toughness testing; energy release rate; J-integral. Criteria for crack growth initiation/stability; application to design.

**Requisites:** (E M A 303 or M E 306), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe mechanisms for initiation and growth of flaws in materials

Audience: Both Grad & Undergrad

2. Derive the fields of stresses, strains, and displacements near a crack

Audience: Both Grad & Undergrad

3. Predict crack growth using concepts of energy release rate and stress intensity factors

Audience: Both Grad & Undergrad

4. Analyze the effects of plasticity and nonlinearity on crack propagation

Audience: Both Grad & Undergrad

5. Evaluate the use of fracture mechanics concepts and equations in a research manuscript

Audience: Graduate

### **E M A 521 – AERODYNAMICS**

3 credits.

Potential flow theory; stream functions; vortex filaments and sheets.

Two- and three-dimensional wing theory. Doublet and panels methods.

Propeller theory.

**Requisites:** MATH 321, (E M A 202, M E 240, or PHYSICS 311), and (CIV ENGR 310 or M E 363), or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Solve potential flow problems in the context of aerodynamics

Audience: Undergraduate

2. Model and solve for the potential flow over airfoils using two-dimensional panel methods

Audience: Undergraduate

3. Analyze the performance characteristics of two- and three-dimensional lifting surfaces, including interpreting data and computing lift and drag polars

Audience: Undergraduate

4. Solve aerodynamics problems and interpret solutions using the appropriate non-dimensional parameters

Audience: Undergraduate

**E M A 522 – AERODYNAMICS LAB**

3 credits.

Experimental methods for aerodynamic measurements: wind tunnel tests with 6-component sting balance, pitot probe, hot wire anemometer; flow visualization with smoke generator and laser sheet; digital data acquisition; practical considerations for experimental design. Methods for comparing theoretical predictions to experimental measurements and computational simulations.

**Requisites:** E M A 521, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Plan a comprehensive campaign of wind tunnel testing

Audience: Both Grad & Undergrad

2. Utilize state-of-the art instrumentation to measure aerodynamic loads on 2D and 3D models

Audience: Both Grad & Undergrad

3. Perform a comprehensive uncertainty analysis of all the measurements

Audience: Both Grad & Undergrad

4. Perform numerical simulations of the flow past 2D and 3D object using state-of-the art commercially available software

Audience: Both Grad & Undergrad

5. Report the results in a professional format, using appropriate normalizations, scientific notation, graphics, and tables

Audience: Both Grad & Undergrad

6. Perform a grid resolution convergence study

Audience: Graduate

**E M A 523 – FLIGHT DYNAMICS AND CONTROL**

3 credits.

Aircraft longitudinal and lateral static stability. Aircraft equations of motion. Stability derivatives. Longitudinal and lateral dynamic stability of uncontrolled motion. Open-loop aircraft control. Closed-loop aircraft control.

**Requisites:** E M A 521 and 542, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Determine the static and dynamic stability characteristics of an aircraft based on its geometrical and inertial properties

Audience: Both Grad & Undergrad

2. Use the formalism of control theory to describe an aircraft's open-loop and closed-loop control schemes

Audience: Both Grad & Undergrad

3. Utilize appropriate software to describe an aircraft's response to basic control inputs

Audience: Both Grad & Undergrad

4. Experiment with analysis software to study "what if?" scenarios

Audience: Graduate

**E M A 524 – ROCKET PROPULSION**

3 credits.

Rocket performance. One dimensional gasdynamics. Thrust chambers, nozzle design criteria. Fundamentals of combustion. Rocket configurations.

**Requisites:** M E 363, CIV ENGR 310, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the quantitative relationship between thrust and stagnation and exit conditions

Audience: Both Grad & Undergrad

2. Optimize a rocket's mass distribution

Audience: Both Grad & Undergrad

3. Apply basic one-dimensional gasdynamics and combustion fundamentals to predict a rocket's thrust

Audience: Both Grad & Undergrad

4. Report in written form their understanding of rocket-related issues not covered in class

Audience: Graduate

**E M A/M E 540 – EXPERIMENTAL VIBRATION AND DYNAMIC SYSTEM ANALYSIS**

3 credits.

Application of digital data acquisition to the investigation of mechanical components, structures and systems using time histories, transforms and response functions to characterize free, forced and transient inputs. Introduction to sensors, instrumentation and methods appropriate for dynamic system response.

**Requisites:** (M E 440, E M A 545, or concurrent enrollment) or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply common laboratory techniques to measure dynamic system responses

Audience: Both Grad & Undergrad

2. Demonstrate knowledge of instrumentation, data acquisition, signal processing, and results display for dynamic systems

Audience: Both Grad & Undergrad

3. Formulate analytical models with parameters identified from measured signals

Audience: Graduate

**E M A/M S & E 541 – HETEROGENEOUS AND MULTIPHASE MATERIALS**

3 credits.

Principles of the mechanics of solid multiphase systems. Role of heterogeneity and anisotropy in determining physical properties including elastic, dielectric and piezoelectric properties. Applications in lightweight structures, ultrastrong materials, materials for protection of the body, and materials for the replacement of human tissues. Materials with fibrous, lamellar, particular, and cellular structures. Heterogeneous materials of biological origin. Biomimetic and bio-inspired materials.

**Requisites:** E M A 303, M E 306, or M S & E 441, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**E M A 542 – ADVANCED DYNAMICS**

3 credits.

Kinematics and kinetics of plane and three-dimensional motion, Coriolis acceleration, general methods of linear and angular momentum, central force motion, gyro dynamics, generalized coordinates. Lagrange's equations.

**Requisites:** (E M A 202, M E 240, or PHYSICS 311), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Formulate and solve problems using various coordinate systems to describe the motion of systems of particles and rigid bodies

Audience: Undergraduate

2. Formulate and solve problems using impulse-momentum principles to generate equations of motion for systems of particles and rigid bodies

Audience: Undergraduate

3. Formulate and solve problems by applying Euler's equations to gyroscopic systems

Audience: Undergraduate

4. Employ appropriate numerical methods to advance equations of motion for systems of particles and rigid bodies

Audience: Undergraduate

**E M A 545 – MECHANICAL VIBRATIONS**

3 credits.

General theory of free, forced, and transient vibrations; vibration transmission, isolation, and measurement; normal modes and generalized coordinates; method of matrix equation formulation and solution. The application of theory and methods to the analysis, measurement and design of dynamic systems.

**Requisites:** (E M A 202, M E 240, or PHYSICS 311), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Convert practical problems/systems into suitable mathematical models

Audience: Undergraduate

2. Develop the analytical vibratory response of a structure subjected to various types of excitation

Audience: Undergraduate

3. Apply computational methods to explore mathematical models of the vibratory response of structures subjected to various types of excitation

Audience: Undergraduate

**E M A/E P 547 – ENGINEERING ANALYSIS I**

3 credits.

Methods of higher mathematics; stress on problem solving rather than rigorous proofs; linear algebra, calculus of variations, Green's function.

**Requisites:** MATH 321, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Solve ordinary differential equations in the form of initial-value and boundary-value problems through substitution, integrating factors, and Laplace and Fourier transforms

Audience: Both Grad & Undergrad

2. Apply methods of undetermined coefficients, variation of parameters, and Green's functions to solve inhomogeneous ordinary differential equations

Audience: Both Grad & Undergrad

3. Identify whether linear algebraic systems have a unique solution, no solution, or an infinite number of solutions and apply methods for solving algebraic systems

Audience: Both Grad & Undergrad

4. Determine eigenvalues and eigenvectors of algebraic eigenvalue problems

Audience: Both Grad & Undergrad

5. Determine whether a function is analytic in the neighborhood of some point in the complex plane and apply contour integration to evaluate integrals

Audience: Both Grad & Undergrad

6. Identify appropriate combinations of methods for solving problems arising in engineering and scientific applications

Audience: Graduate

### **E M A/E P 548 – ENGINEERING ANALYSIS II**

3 credits.

Function of complex variable, series solution of differential equations, partial differential equations. A year of math beyond calculus

**Requisites:** (MATH 322 and 320), (MATH 322 and E P/E M A 547), or (MATH 322, 319, and 340), or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply local analysis and asymptotic methods to distinguish analytical and singular behavior of ordinary differential equations to approximate their solutions

Audience: Both Grad & Undergrad

2. Apply asymptotic methods to estimate the values of integrals

Audience: Both Grad & Undergrad

3. Use perturbative methods such as boundary-layer theory, WKB theory, and multi-scale analysis to analyze ordinary differential equations

Audience: Both Grad & Undergrad

4. Apply the method of characteristics and separation of variables to solve partial differential equations

Audience: Both Grad & Undergrad

5. Identify appropriate combinations of methods for solving problems arising in engineering and scientific applications

Audience: Graduate

### **E M A/ASTRON 550 – ASTRODYNAMICS**

3 credits.

Coordinate system transformations, central force motion, two body problem, three and n-body problem, theory of orbital perturbations, artificial satellites, elementary transfer orbits, and elementary rocket dynamics.

**Requisites:** (E M A 202, M E 240, or PHYSICS 311, or concurrent enrollment), or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **E M A 569 – SENIOR DESIGN PROJECT**

3 credits.

Students will select specific engineering design projects. These projects will be student team efforts supervised by individual faculty members.

**Requisites:** E M A 469 and (have completed or be concurrently enrolled in two of E M A 506, 519, 521, 542, 545)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Navigate the mechanical design process through a group design project focused on the aerospace industry

Audience: Undergraduate

2. Apply fundamentals from their base Engineering Mechanics coursework to analyze, guide, and modify their designs

Audience: Undergraduate

3. Apply fundamentals from the aeronautics and astronautics coursework to a design problem

Audience: Undergraduate

4. Demonstrate a professional level of communication (written, graphical/ drawing and verbal) and presentation skills with clients, instructors, and peers

Audience: Undergraduate

**E M A/M E 570 – EXPERIMENTAL MECHANICS**

3 credits.

Experimental methods for design and analysis of mechanical components, structures and materials. Electrically and optically recorded stress, strain and deformation data; computer acquisition/reduction/presentation techniques; applications to static and transient events, sensors, transducer design, NDT, fracture and residual stresses.

**Requisites:** Senior standing and (M E 306, E M A 303 or 304) or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Apply knowledge of experimental techniques and measurement systems for mechanical components, structures and materials

Audience: Both Grad & Undergrad

2. Work in groups in the formulation of analytical models, configuration of measurement systems, interpretation of experimental and theoretical results, and presentation of conclusions

Audience: Both Grad & Undergrad

3. Use digital data acquisition systems, computer aided data reduction and display, and commercial software packages for modeling and data analysis

Audience: Both Grad & Undergrad

4. Evaluate clarity and/or accuracy of written work

Audience: Graduate

**E M A 599 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply physical and mathematical principles to engineering research problems

Audience: Undergraduate

2. Apply mechanics principles to engineering research problems

Audience: Undergraduate

3. Communicate technical concepts to a diverse audience via verbal or written media

Audience: Undergraduate

**E M A 601 – SPECIAL TOPICS IN ENGINEERING MECHANICS**

1-3 credits.

Selected topics in such areas as structural mechanics, dynamics, experimental mechanics, vibrations, engineering materials, soil mechanics, engineering analysis, rheology, etc.

**Requisites:** Graduate/professional standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods in a special topic of Engineering Mechanics

Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in a special topic of Engineering Mechanics, using appropriate tools, processes, and/or software

Audience: Both Grad & Undergrad

3. Apply, Analyze or evaluate advanced theories, concepts, or methods in a special topic of Engineering Mechanics

Audience: Graduate

**E M A 605 – INTRODUCTION TO FINITE ELEMENTS**

3 credits.

A first course in finite elements, with theory and applications in stress analysis and in areas related to structural mechanics. Practice in the use and/or development of computer programs.

**Requisites:** (E M A 303 or M E 306), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Motivate variational treatment of free energy to obtain governing equations

Audience: Both Grad & Undergrad

2. Formulate finite element approximations to linear partial differential equations

Audience: Both Grad & Undergrad

3. Choose appropriate approximation space (mesh, basis, quadrature) for a given application

Audience: Both Grad & Undergrad

4. Assess stability and accuracy of linear finite element computations

Audience: Graduate

**E M A 610 – STRUCTURAL FINITE ELEMENT MODEL VALIDATION**

3 credits.

An introduction to test-based validation of finite element models for the design and analysis of dynamic structures.

**Requisites:** E M A 545 or M E 440, or graduate/professional standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Demonstrate knowledge of the use and limitations of finite element models in structural analysis

Audience: Both Grad & Undergrad

2. Formulate and document results using common dissemination methods such as technical report writing and/or oral presentations

Audience: Both Grad & Undergrad

3. Apply common methods of finite element validation including vibration test design, test and analysis correlation, and model calibration

Audience: Graduate

**E M A 611 – ADVANCED MECHANICAL TESTING OF MATERIALS**

3 credits.

Theory and use of servo-controlled, electro-hydraulic equipment for research of mechanical properties of engineering materials. Measurement of stress, strain, hysteresis energy, and material properties during deformation and at fracture. Analysis of four significant components of total strain.

**Requisites:** (E M A/M E 307 or M E/E M A 307) and (E M A 506 or concurrent enrollment), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform experiments to measure mechanics quantities of interest

Audience: Both Grad & Undergrad

2. Measure mechanical properties of materials

Audience: Both Grad & Undergrad

3. Analyze experimental data in the context of theoretical solutions and experimental error

Audience: Both Grad & Undergrad

4. Communicate methods, results, and analysis through written reports and/or oral presentations

Audience: Both Grad & Undergrad

5. Evaluate clarity and/or accuracy of written work

Audience: Graduate

**E M A/E P 615 – MICRO- AND NANOSCALE MECHANICS**

3 credits.

An introduction to micro- and nanoscale science and engineering with a focus on the role of mechanics. A variety of micro- and nanoscale phenomena and applications covered, drawing connections to both established and new mechanics approaches.

**Requisites:** Graduate/professional standing or E M A 303 or M E 306

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Describe the current state and potential future impact of micro and nanotechnology

Audience: Both Grad & Undergrad

2. Explain how mechanics enters a new regime at the micro and nano scales where surfaces, interfaces, defects, material property variations, and quantum effects play more dominant roles

Audience: Both Grad & Undergrad

3. Use or adapt engineering mechanics concepts to describe behavior at the micro and nano scale

Audience: Both Grad & Undergrad

4. Describe cross-disciplinary intersections and how mechanics is integrated with the fields of materials science, chemistry, physics, and biology at the micro/nano scale

Audience: Graduate

**E M A 630 – VISCOELASTIC SOLIDS**

3 credits.

Linear theory of viscoelasticity; non-aging materials; Boltzmann superposition principle; time-temperature superposition boundary value problems. Applications: vibration damping, relaxation of stress, creep, droop, and sag in structural members, sound absorption, creep buckling, settlement of foundations, tire mechanics, and shock attenuation.

**Requisites:** M E 306 or E M A 303, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Describe, qualitatively and quantitatively, the response of viscoelastic materials in creep, relaxation, and cyclic loading  
Audience: Both Grad & Undergrad

2. Demonstrate proficiency in solving problems related to viscoelasticity  
Audience: Both Grad & Undergrad

3. Describe underlying mechanisms for viscoelastic behavior  
Audience: Both Grad & Undergrad

4. Apply concepts of viscoelasticity in an open-ended project  
Audience: Graduate

**E M A 642 – SATELLITE DYNAMICS**

3 credits.

Review of Euler's equations, torque-free motion, stability of rotation, energy dissipation effects, gyroscopic instruments, gyrodynamics of the Earth, gravity gradient stabilized satellites, spin stabilized satellites, dual spin satellites, tethered satellites, mass movement techniques, space vehicle motion and rocket dynamics.

**Requisites:** E M A 542 or PHYSICS 311, or graduate/professional standing or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate and solve problems using attitude parameterizations to describe the motion of aerospace systems  
Audience: Both Grad & Undergrad

2. Formulate and solve problems using linear and angular momentum to generate equations of motion for spacecraft  
Audience: Both Grad & Undergrad

3. Formulate and solve problems using energy methods to predict the attitude motion of spacecraft  
Audience: Both Grad & Undergrad

4. Demonstrate knowledge of spacecraft stability and control theory to assess and enforce spacecraft attitude  
Audience: Graduate

**E M A 700 – THEORY OF ELASTICITY**

3 credits.

Equations of elasticity in curvilinear and rectangular coordinates; two dimensional problems; problems of prismatic bars; variational methods and energy principles; complex variable and numerical methods; thermal stress problems. Knowledge of advanced mechanics of materials [such as E M A 506] and vector calculus [such as MATH 321] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E M A 702 – GRADUATE COOPERATIVE EDUCATION PROGRAM**

1-2 credits.

Work experience that combines classroom theory with practical knowledge of operations to provide students with a background on which to develop and enhance a professional career. The work experience is tailored for MS students from within the U.S. as well as eligible international students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work  
Audience: Graduate

2. Synthesize and apply appropriate technical education to real world technical work  
Audience: Graduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise  
Audience: Graduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information  
Audience: Graduate

**E M A/M E 703 – PLASTICITY THEORY AND PHYSICS**

3 credits.

Physical foundations of plasticity as a basis for choices made in the formulation of theories representing plastic deformation and their limitation. Motion of dislocations and formation and growth of deformation twins. Experimental results in the context of plasticity models. Traditional and research topics of plasticity and theories for rate-independent, rate-dependent, single and polycrystal descriptions. Numerical solution of equations and computational plasticity. Knowledge of mechanics of materials [such as E M A 303 or M E 306] and continuum mechanics [such as E M A 622] required.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Identify the physical sources of plastic deformation in materials

Audience: Graduate

2. Explain and apply traditional and advanced theories of plasticity

Audience: Graduate

3. Execute a computational study of plasticity with a common engineering material

Audience: Graduate

4. Given a material model, know how to evaluate the material parameters in the model

Audience: Graduate

5. Provide critical assessment of seminal and modern plasticity literature

Audience: Graduate

**E M A 705 – ADVANCED TOPICS IN FINITE ELEMENTS**

3 credits.

Finite element methods for problems with linear and nonlinear media. Stress analysis, heat transfer, and fluid dynamics. Vibration and transient analysis. Weighted residual methods. Material and geometric nonlinearity. Nonlinear iteration methods. Instructor may also select additional material. Knowledge of finite element theory [such as E M A 605] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Identify the principal attributes of the finite element method

Audience: Graduate

2. Explain and apply all components of the finite element method including strengths and weaknesses of approaches

Audience: Graduate

3. Execute a computational development project by deriving a method and coding within a solver

Audience: Graduate

4. Derive finite element formulations of general order

Audience: Graduate

5. Demonstrate clear proficiency in all aspects of the finite element method

Audience: Graduate

**E M A/M E 708 – ADVANCED COMPOSITE MATERIALS**

3 credits.

Contemporary topics in composite materials, including innovations in sandwich structures, textile composites, and architected materials; fracture mechanics; durability and damage tolerance; experimental techniques; transient, micro, nonlinear, inelastic and environmental effects; advanced manufacturing methods: repair and applications. Knowledge of basic composite materials [such as CIV ENGR/E M A/M E 508] is strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2016

**Learning Outcomes:** 1. Describe different types of advanced composites and manufacturing processes

Audience: Graduate

2. Describe the mechanical behavior of various composite materials under different types of loading conditions

Audience: Graduate

3. Mathematically model and solve for engineering stresses and deformations in a composite structure

Audience: Graduate

4. Assess the key challenges and impact of technical work being conducted in the area of composite materials

Audience: Graduate

**E M A 710 – MECHANICS OF CONTINUA**

3 credits.

Tensor analysis; analysis of stress, strain and rate of strain; application of Newtonian mechanics to deformable media; mechanical constitutive equations; field equations of fluid mechanics and elasticity. Knowledge of linear algebra [such as MATH 340] required.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recall many important identities used in vector and tensor algebra

Audience: Graduate

2. Understand and use basic kinematics principles used in many fields of study

Audience: Graduate

3. Describe the breadth of conservation principles commonly employed for use in more advanced applications

Audience: Graduate

4. Employ thermodynamic relationships readily with fundamentals of continuum mechanics

Audience: Graduate

5. Acquire skills in rigorous continuum mechanics principles

Audience: Graduate

**E M A/M E 722 – INTRODUCTION TO POLYMER RHEOLOGY**

3 credits.

Formulation of constitutive equations using embedded base vectors. Viscosity, normal stress differences, stress relaxation, elastic recoil. Polymer rheology; homogeneous strain history. Knowledge of differential equations [such as MATH 320] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2023

**E M A 742 – THEORY AND APPLICATIONS IN ADVANCED DYNAMICS**

3 credits.

Dynamical systems theory, advanced rigid body attitude dynamics, Lagrange's equations of motion, conservation laws, quasi-coordinates, Routh's method for ignorable coordinates, Hamilton's equations of motion, dynamic stability, Liapunov stability methods, angular momentum methods for systems of rigid bodies, modeling of rotating elastic systems, Kane's equations of motion, deterministic chaos. Knowledge of advanced three-dimensional dynamics [such as E M A 542 or PHYSICS 311] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2015**E M A 745 – ADVANCED METHODS IN STRUCTURAL DYNAMICS**

3 credits.

Emphasis is placed on techniques used to analyze aerospace structures. Variational principles, Hamilton's extended principle, Lagrange's equations, mathematical models for continuous systems, natural modes of vibrations, dynamic response using mode superposition, mode acceleration, residual flexibility, vibration analysis using finite element methods, advanced substructure representations, component mode synthesis, systems with rigid body modes for aeronautical and astronautical systems. Knowledge of vibrations [such as E M A 545 or M E 440] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**E M A 747 – NONLINEAR AND RANDOM MECHANICAL VIBRATIONS**

3 credits.

Exact solutions and sectorial linearization; free and forced vibration of mechanical systems with nonlinear restoring force; self-excited mechanical vibrations and relaxation vibrations; subharmonic responses; nonlinear vibration of mechanical systems with more than one degree of freedom; nonlinear vibration of bounded continuous media; random excitation and random response, random vibrations of mechanical systems and structures; random vibrations of nonlinear mechanical systems; failure of materials under random vibrations.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**E M A/COMP SCI/E C E/E P/M E 759 – HIGH PERFORMANCE COMPUTING FOR APPLICATIONS IN ENGINEERING**

3 credits.

An overview of hardware and software solutions that enable the use of advanced computing in tackling computationally intensive Engineering problems. Hands-on learning promoted through programming assignments that leverage emerging hardware architectures and use parallel computing programming languages. Students are strongly encourage to have completed COMP SCI 367 or COMP SCI 400 or to have equivalent experience.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**E M A/CIV ENGR/M E 775 – TURBULENT HEAT AND MOMENTUM TRANSFER**

3 credits.

Stochastic methods in turbulent heat and momentum transfer; fully developed turbulence; numerical methods including model applications to boundary layers, reacting flows, mass transfer, and unsteady flows; linear and non-linear stability and transition; emphasis on applications of interest to Mechanical, Aerospace, and Environmental Engineers. Knowledge of fluid mechanics [such as M E 363 or CBE 320] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe the physics and mathematics of turbulence theory and modeling

Audience: Graduate

2. Describe general features of turbulence

Audience: Graduate

3. Use analysis tools to solve problems and process data related to turbulence

Audience: Graduate

4. Use turbulence concepts to understand and explain turbulent behavior in more complex systems

Audience: Graduate

**E M A 790 – MASTER'S RESEARCH AND THESIS**

1-9 credits.

Directed study projects as arranged with instructor.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

**E M A 890 – PRE-DISSERTATOR RESEARCH**

1-9 credits.

Directed study projects as arranged with instructor.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**E M A 990 – RESEARCH AND THESIS**

1-12 credits.

Directed study projects as arranged with instructor.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ENGINEERING PHYSICS (E P)****E P 271 – ENGINEERING PROBLEM SOLVING I**

3 credits.

Solution of engineering problems using commercially-available software tools (spreadsheets, symbolic manipulators, and equation solvers). The emphasis will be on nuclear engineering problems, including radioactive decay, nuclear cross sections, scattering, and criticality.

**Requisites:** MATH 222 and (E M A 201, PHYSICS 201, 207, 247, or concurrent enrollment) or member of Engineering Guest Students**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Apply mathematical models to describe engineering problems across an array of disciplines

Audience: Undergraduate

2. Implement computational solutions of mathematical models that represent engineering problems

Audience: Undergraduate

3. Combine multiple computational problem solving steps for complex problems

Audience: Undergraduate

4. Demonstrate a fundamental understanding of data, conditional execution, and loops for basic programming

Audience: Undergraduate

**E P 418 – SUSTAINABLE ENERGY CHALLENGES AND SOLUTIONS**

1 credit.

Interdisciplinary survey of energy research topics. Understand how sustainable energy challenges are being studied and solved by different disciplines, from science and engineering to social sciences and humanities. Analyze energy sustainability using a multi-disciplinary, systems-based approach.

**Requisites:** Declared in the Certificate in Engineering for Energy Sustainability or Engineering: Sustainable Systems Engineering, MEng**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Analyze the causes of and solutions for the sustainability challenge of affordable and clean energy

Audience: Undergraduate

2. Analyze sustainability issues and/or practices using a systems-based approach

Audience: Undergraduate

3. Describe the technical, social, economic, and environmental dimensions of affordable and clean energy and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course

Audience: Undergraduate

**E P 468 – INTRODUCTION TO ENGINEERING RESEARCH**

1 credit.

An introduction to the conduct of engineering research: the scientific method, ethics in research, documentation and treatment of research data, publication practices, and the structure of the broader research community are covered.

**Requisites:** Declared in Engineering Physics**Course Designation:** Honors - Accelerated Honors (!)**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Develop an introductory understanding of research practices involving documentation and treatment of research data and publication practices in research

Audience: Undergraduate

2. Demonstrate knowledge of professional and ethical standards and a basic understanding of research safety

Audience: Undergraduate

3. Demonstrate skills associated with finding and citing relevant technical literature

Audience: Undergraduate

4. Identify a campus research project and research mentor for further engagement during the remainder of the research sequence courses

Audience: Undergraduate

**E P 469 – RESEARCH PROPOSAL IN ENGINEERING PHYSICS**

1 credit.

An introduction to current research topics in engineering physics.

Development of an undergraduate research proposal supervised by faculty members.

**Requisites:** E P 468 and declared in Engineering Physics

**Course Designation:** Honors - Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Design a research project with clear milestones and a detailed timeline in collaboration with a research mentor

Audience: Undergraduate

2. Establish deeper understanding of the literature in the research project area, including the ability to analyze and interpret relevant techniques and data

Audience: Undergraduate

3. Demonstrate technical writing skills

Audience: Undergraduate

4. Demonstrate technical presentation skills

Audience: Undergraduate

5. Demonstrate the ability to critique the research and technical writing of others

Audience: Undergraduate

6. Develop and present a research proposal in both written and oral form

Audience: Undergraduate

**E P/E M A 471 – INTERMEDIATE PROBLEM SOLVING FOR ENGINEERS**

3 credits.

Use of computational tools for the solution of problems encountered in engineering physics applications. Topics covered include orbital mechanics, structural vibrations, beam and plate deformations, heat transfer, neutron diffusion, and criticality. Emphasis will be on modeling, choice of appropriate algorithms, and model validation.

**Requisites:** (E P 271 or COMP SCI 220) and (MATH 319, 320, 376 or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Numerically solve systems of ordinary differential equations (ODEs)

Audience: Undergraduate

2. Numerically solve 1-D boundary value problems

Audience: Undergraduate

3. Numerically solve eigenvalue problems

Audience: Undergraduate

4. Apply the basic techniques of Monte Carlo methods

Audience: Undergraduate

5. Apply the basic techniques of numerically solving partial differential equations (PDEs)

Audience: Undergraduate

6. Apply techniques from outcomes 1-5 to multi-step engineering problems

Audience: Undergraduate

### **E P/E M A 476 – INTRODUCTION TO SCIENTIFIC COMPUTING FOR ENGINEERING PHYSICS**

3 credits.

Background for professional numerical computation in Linux environments begins with shell scripting and software archiving. Programming skills in a compiled language are then developed through scientific and engineering examples. Engineering problem-solving skills are reinforced through applications that require numerical solutions to systems of differential and/or integral equations, while motivating progressively more advanced computational methods.

**Requisites:** (E P 271, COMP SCI 300, or 310) and (MATH 319, 320, or 375), or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Create UNIX or Linux shell scripts to aid workflow in scientific computing

Audience: Undergraduate

2. Formulate physical problems in mathematical and computational terms  
Audience: Undergraduate

3. Identify software needs for solving numerical models of science and engineering applications  
Audience: Undergraduate

4. Write and modify computer programs in a compiled programming language  
Audience: Undergraduate

5. Estimate the accuracy of computed results  
Audience: Undergraduate

### **E P/E M A 547 – ENGINEERING ANALYSIS I**

3 credits.

Methods of higher mathematics; stress on problem solving rather than rigorous proofs; linear algebra, calculus of variations, Green's function.

**Requisites:** MATH 321, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Solve ordinary differential equations in the form of initial-value and boundary-value problems through substitution, integrating factors, and Laplace and Fourier transforms  
Audience: Both Grad & Undergrad

2. Apply methods of undetermined coefficients, variation of parameters, and Green's functions to solve inhomogeneous ordinary differential equations  
Audience: Both Grad & Undergrad

3. Identify whether linear algebraic systems have a unique solution, no solution, or an infinite number of solutions and apply methods for solving algebraic systems  
Audience: Both Grad & Undergrad

4. Determine eigenvalues and eigenvectors of algebraic eigenvalue problems  
Audience: Both Grad & Undergrad

5. Determine whether a function is analytic in the neighborhood of some point in the complex plane and apply contour integration to evaluate integrals  
Audience: Both Grad & Undergrad

6. Identify appropriate combinations of methods for solving problems arising in engineering and scientific applications  
Audience: Graduate

**E P/E M A 548 – ENGINEERING ANALYSIS II**

3 credits.

Function of complex variable, series solution of differential equations, partial differential equations. A year of math beyond calculus

**Requisites:** (MATH 322 and 320), (MATH 322 and E P/E M A 547), or (MATH 322, 319, and 340), or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply local analysis and asymptotic methods to distinguish analytical and singular behavior of ordinary differential equations to approximate their solutions

Audience: Both Grad & Undergrad

2. Apply asymptotic methods to estimate the values of integrals

Audience: Both Grad & Undergrad

3. Use perturbative methods such as boundary-layer theory, WKB theory, and multi-scale analysis to analyze ordinary differential equations

Audience: Both Grad & Undergrad

4. Apply the method of characteristics and separation of variables to solve partial differential equations

Audience: Both Grad & Undergrad

5. Identify appropriate combinations of methods for solving problems arising in engineering and scientific applications

Audience: Graduate

**E P/M E 566 – CRYOGENICS**

3 credits.

Applications of cryogenics, material properties at low temperatures, refrigeration and liquefaction systems, measurement techniques, insulation, storage and transfer of cryogenics, safety and handling.

**Requisites:** (M E 361 or PHYSICS 415) and (CBE 320 or M E 364), or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Describe the similarities and distinctions between the cryogens

Audience: Both Grad & Undergrad

2. Characterize the operation and performance of large scale cryogenic refrigerators and liquefiers

Audience: Both Grad & Undergrad

3. Characterize the operation and performance of recuperative and regenerative cryocoolers

Audience: Both Grad & Undergrad

4. Select appropriate instrumentation to measure temperature, pressure, flow, and level in cryogenic systems

Audience: Both Grad & Undergrad

5. Determine the cooldown time for a cryogenic system including temperature dependent material properties, heat transfer, and refrigeration characteristics

Audience: Both Grad & Undergrad

6. Design a cryogenic system accounting for strength, insulation, fluid flow, and electrical characteristics

Audience: Graduate

**E P 568 – RESEARCH PRACTICUM IN ENGINEERING PHYSICS I**

3 credits.

Undergraduate research projects supervised by faculty members.

**Requisites:** E P 469 and declared in Engineering Physics**Course Designation:** Honors - Accelerated Honors (!)**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Acquire new and apply existing knowledge of mathematics, science and engineering to research

Audience: Undergraduate

2. Use techniques, skills and modern engineering tools for engineering research in collaboration with a research mentor

Audience: Undergraduate

3. Conduct a research project, using applicable experimental, theoretical, and computational methods

Audience: Undergraduate

4. Function effectively in a diverse research environment

Audience: Undergraduate

5. Demonstrate technical writing skills

Audience: Undergraduate

6. Demonstrate technical presentation skills

Audience: Undergraduate

7. Adjust to research obstacles by adapting technical approach, milestones, and/or timeline

Audience: Undergraduate

**E P 569 – RESEARCH PRACTICUM IN ENGINEERING PHYSICS II**

3 credits.

Undergraduate research projects supervised by faculty members. Senior thesis.

**Requisites:** E P 568 and declared in Engineering Physics**Course Designation:** Honors - Accelerated Honors (!)**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Acquire new and apply existing knowledge of mathematics, science and engineering to research

Audience: Undergraduate

2. Use techniques, skills and modern engineering tools for engineering research in collaboration with a research mentor

Audience: Undergraduate

3. Conduct a research project, including analyzing and interpreting data

Audience: Undergraduate

4. Function effectively in a diverse research environment

Audience: Undergraduate

5. Communicate technical information effectively

Audience: Undergraduate

6. Complete a research thesis project and present it in both written and oral form

Audience: Undergraduate

**E P 602 – SPECIAL TOPICS IN ENGINEERING PHYSICS**

1-3 credits.

Subject matter, credits and prerequisites vary.

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2022

**E P/E M A 615 – MICRO- AND NANOSCALE MECHANICS**

3 credits.

An introduction to micro- and nanoscale science and engineering with a focus on the role of mechanics. A variety of micro- and nanoscale phenomena and applications covered, drawing connections to both established and new mechanics approaches.

**Requisites:** Graduate/professional standing or E M A 303 or M E 306

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Describe the current state and potential future impact of micro and nanotechnology

Audience: Both Grad & Undergrad

2. Explain how mechanics enters a new regime at the micro and nano scales where surfaces, interfaces, defects, material property variations, and quantum effects play more dominant roles

Audience: Both Grad & Undergrad

3. Use or adapt engineering mechanics concepts to describe behavior at the micro and nano scale

Audience: Both Grad & Undergrad

4. Describe cross-disciplinary intersections and how mechanics is integrated with the fields of materials science, chemistry, physics, and biology at the micro/nano scale

Audience: Graduate

**E P/COMP SCI/E C E/E M A/M E 759 – HIGH PERFORMANCE COMPUTING FOR APPLICATIONS IN ENGINEERING**

3 credits.

An overview of hardware and software solutions that enable the use of advanced computing in tackling computationally intensive Engineering problems. Hands-on learning promoted through programming assignments that leverage emerging hardware architectures and use parallel computing programming languages. Students are strongly encourage to have completed COMP SCI 367 or COMP SCI 400 or to have equivalent experience.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**E P/M E 777 – VACUUM TECHNOLOGY**

3 credits.

Topics defining modern vacuum technology, including the kinetic theory of gases, conductance, pumping systems, pump technologies, pressure measurement, gas-surface interactions, sealing technologies, leak detection, and residual gas analysis will be addressed through a combination of lectures, laboratory activities, problem solving, and group discussions. Knowledge of fluid mechanics [such as M E 363 or B M E 320] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Use kinetic theory to determine key characteristics of a rarified gas such as the mean free path length, molecular flux and the average velocity

Audience: Graduate

2. Calculate the conductance of a vacuum system for molecular, viscous, and transitional flow regimes

Audience: Graduate

3. Calculate the time dependent pump down behavior of a vacuum system

Audience: Graduate

4. Repair a rotary vane vacuum pump

Audience: Graduate

5. Characterize the operation, advantages and disadvantages of low, medium, and high vacuum pumps

Audience: Graduate

6. Characterize the operation, advantages and disadvantages of low and high vacuum gauges

Audience: Graduate

7. Define and utilize appropriate leak detection methods for small, medium, and large leak rates

Audience: Graduate

**E P 920 – ENGINEERING PHYSICS GRADUATE SEMINAR**

0-1 credits.

Students will be able to enroll for credit more than once because the topics of the course will differ substantially from semester to semester. Our MS requirements permit up to 3 credits within the 30-credit minimum for the degree.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate curiosity for topics within their broader field but outside of their specific specialty

Audience: Graduate

## ENGINEERING PROFESSIONAL DEVELOPMENT (E P D)

**E P D 361 – FUNDAMENTALS OF ENGINE THERMODYNAMICS**

2 credits.

Theory and application of energy methods in engineering; conservation of mass and energy; energy transfer by heat, work and mass; thermodynamic properties; analysis of open and closed systems; the second law of thermodynamics and entropy; vapor and gas power cycles.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Summer 2023

**Learning Outcomes:** 1. Recognize and apply the methodology of thermodynamics

Audience: Undergraduate

2. Use properties to analyze a thermodynamic system undergoing a process or cycle

Audience: Undergraduate

3. Recognize and evaluate closed and open systems

Audience: Undergraduate

4. Analyze and evaluate cycles

Audience: Undergraduate

**E P D 398 – TECHNICAL COMMUNICATIONS INTERNSHIP**

1 credit.

Internship with local corporation, industry, government agency, or educational unit. Includes classroom components: use and misuse of social media; managing workplace-related conflicts; communicating technical information to colleagues; identifying and resolving engineering ethics challenges; practicing group discussion and presentation skills.

**Requisites:** INTEREGR 397 and declared in Certificate in Technical Communication

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**E P D 416 – ENGINEERING APPLICATIONS OF STATISTICS**

3 credits.

Provides knowledge and skills to apply statistics to many types of engineering problems. Focuses on developing statistically-based experimental techniques and tests for measures of validity, application of computer-based statistical tools, and approaches to distillation of data.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Artificial Intelligence for Engineering Data Analytics

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply statistical thinking, regression analysis, and descriptive analytics to evaluate data and assess process or product performance

Audience: Graduate

2. Evaluate process performance against output requirements and identify improvement opportunities using process capability evaluation and design of experiments

Audience: Graduate

3. Detect changes in process signals with noise and address factors impacting performance

Audience: Graduate

4. Design and implement experiments to identify and model input-output relationships and optimize performance

Audience: Graduate

5. Build traditional and artificial intelligence (AI) models to enhance process capability and develop actionable plans to drive measurable improvements

Audience: Graduate

**E P D 455 – PYTHON FOR APPLICATIONS IN ENGINEERING**

1 credit.

Introduction to Python's concepts of objects and reference; classes and nested objects. Elements of object-oriented programming in Python. Container types: lists, dictionaries, and tuples. Installing Python packages and managing environments. Scientific computing with Numpy and SciPy. Applications of Python to Data Analysis. Applications of Python to Machine Learning. Applications of Python to embedded systems/robotics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Perform computations typically encountered in Engineering (data reading/writing, solving linear systems, perform regressions, etc.) using Python scripts with hundreds to thousands of lines of code

Audience: Graduate

2. Produce a software design solution that can be subsequently implemented in Python to solve a task/practical problem that draws on a computing component

Audience: Graduate

3. Increase their productivity in tasks that require Python programming by taking advantages of 3rd party Python packages

Audience: Graduate

4. Justify the rationale behind using Python in Engineering; explain how this programming language provides support of numerical analysis, statistical analysis, robotics, machine learning, data visualization, computer vision, and AI

Audience: Graduate

**E P D 499 – SENIOR INDEPENDENT STUDY**

1-3 credits.

Under faculty supervision.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**E P D 518 – QUALITY ENGINEERING AND QUALITY MANAGEMENT**

3 credits.

Enhances the learners' basic business and decision-making skills related to quality systems and process improvement.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Work effectively on a team-based experiential project focused on process design, analysis, and resource management and integrating the concepts of continual improvement, customer focus, and teamwork

Audience: Graduate

2. Apply problem solving and management/planning tools for effectively defining problems, feasible alternative solutions, and measurable goals in a real-world environment

Audience: Graduate

3. Demonstrate ability to lead an industry-based team project integrating contemporary change management frameworks and considering organizational culture

Audience: Graduate

4. Describe how and when to use statistical techniques for process improvement and control

Audience: Graduate

5. Understand and identify the impact of organizational and cultural influences on the planning and implementation of change

Audience: Graduate

**E P D 522 – GENERATIVE ARTIFICIAL INTELLIGENCE FOR ENGINEERING APPLICATIONS**

3 credits.

Comprehensive coverage of AI-powered chatbots, from understanding generative AI fundamentals to developing sophisticated chatbot applications. Hands-on experience with generative AI tools. Explore retrieval-augmented generation (RAG) techniques. Examine critical aspects such as security, privacy, and memory models. Knowledge of Python [such as COMP SCI 220 or E P D 455] strongly recommended.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Artificial Intelligence for Engineering Data Analytics

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Design and develop a fully functional Generative AI-based chatbot application that can be personalized to the user  
Audience: Graduate

2. Implement and optimize Retrieval-Augmented Generation (RAG) to enhance chatbot responses  
Audience: Graduate

3. Integrate memory management systems to improve context retention in chatbot interactions  
Audience: Graduate

4. Utilize agents to perform specialized tasks within the chatbot framework  
Audience: Graduate

5. Demonstrate the ability to deploy, test, and maintain chatbot applications in a production environment  
Audience: Graduate

**E P D 605 – FUNDAMENTALS OF TECHNICAL PROJECT MANAGEMENT**

1 credit.

Learn techniques to plan, execute, and deliver projects with desired scope on time and on budget. Document clear project objectives and goals, accurately estimate project time and costs, schedule and allocate time-critical resources, and establish feedback systems for optimal project control. Best paired with a work experience, such as an internship or co-op, where you can apply these project management skills.

**Requisites:** Junior standing or declared in Capstone Certificate in Applied Engineering Management

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Plan and manage successful engineering projects using appropriate methods, tools, and techniques  
Audience: Both Grad & Undergrad

2. Estimate project costs, resources, and schedules  
Audience: Both Grad & Undergrad

3. Immediately apply project management principles regarding the five major project stages: initiate, plan, execute, control, and close  
Audience: Both Grad & Undergrad

4. Apply or customize the project management framework to engineering organizational needs  
Audience: Both Grad & Undergrad

5. Assess and improve the current project management system  
Audience: Graduate

**E P D 606 – LEADING AND MANAGING TECHNICAL TEAMS**

1 credit.

Key team management concepts, principles, and practices. Team dynamics, team roles, leading and facilitating teamwork, and managing team conflict in the context of STEM (science, technology, engineering, and mathematics)-related work.

**Requisites:** Junior standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe team dynamics, roles, and expectations that influence a STEM team's performance

Audience: Both Grad & Undergrad

2. Identify and effectively deploy specific team member strengths relevant for technical projects / deliverables

Audience: Both Grad & Undergrad

3. Plan, lead and facilitate productive team meetings

Audience: Both Grad & Undergrad

4. Identify and manage team conflict more effectively and constructively

Audience: Both Grad & Undergrad

5. Assess and improve their current STEM team leadership methods and practices

Audience: Graduate

**E P D 610 – ENGINEERING ANALYSIS FOR DECISION MAKING**

3 credits.

Quantitative and qualitative analysis and visualization tools. Structured decision-making methodology for engineering applications such as variations in materials and production, process control, forecasting and executive decision making. Facilitate persuasive problem-solving and decision making in engineering applications. Builds on foundational knowledge of statistics.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply foundational quantitative and qualitative analysis tools and data visualization techniques to engineering applications

Audience: Graduate

2. Apply a structured decision-making methodology to identify, evaluate and recommend the most suitable solution to engineering applications

Audience: Graduate

3. Present an analysis and proposed solutions in a structured written and/or presentation format designed to facilitate persuasive problem-solving and decision making in engineering applications

Audience: Graduate

**E P D 611 – ENGINEERING ECONOMICS AND MANAGEMENT**

3 credits.

Addresses principles and practices of interpreting financial information and performing engineering-related economic analyses. Focuses on the practical use of economic information for decision-making.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform financial statement analysis using financial ratios, vertical analysis, and horizontal analysis for comparison within a company and across companies

Audience: Graduate

2. Evaluate advantages and disadvantages of alternative costing methods, including alternative ways of charging overhead to products

Audience: Graduate

3. Apply techniques in using budgeting and performance-evaluation systems to enhance operational control and lead to improved organizational performance

Audience: Graduate

4. Develop skills to evaluate the nuances of financial decision making and capital budgeting using cost data and the time value of money

Audience: Graduate

**E P D 612 – TECHNICAL PROJECT MANAGEMENT**

3 credits.

Learn key principles and tools of project management applicable to a broad range of engineering projects. Covers techniques for project planning, scheduling, resource allocation, and project tracking, as well as the interface between projects and the organizations within which they are executed.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Assess project goals and desired outcomes to ensure alignment with organizational strategic goals/objectives  
Audience: Graduate

2. Apply project management knowledge, skills, tools, and practices to complex workplace challenges and teams  
Audience: Graduate

3. Manage constrained resources within a project plan under conditions of change/uncertainty  
Audience: Graduate

4. Develop and implement an actionable learning plan for professional and career development of project management competencies  
Audience: Graduate

5. Demonstrate the critical role that ethics, culture, and context plays in effective project management  
Audience: Graduate

**E P D 613 – INTERNATIONAL ENGINEERING STRATEGIES AND PRACTICES**

3 credits.

Provides a deeper understanding of various elements of culture related to business, avoiding the pitfalls, and finding the complementary strengths that will benefit the business. International strategy and the managerial implications such as product, country, location, and organization choices for a multinational engineering operation will be assessed, analyzed and applied. Further discussion will be focused on multi-cultural organization issues and exploring best practices.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and analyze their assumptions, attitudes, and practices that may inhibit effective working relationship with people (peers, clients/customers, suppliers) from differing cultures and create a plan to address opportunities for improvement  
Audience: Graduate

2. Identify a set of strategies and best practices to draw from when interacting with individuals of differing cultural backgrounds  
Audience: Graduate

3. Lay out a framework for developing and applying an international strategy that creates value for the engineering organization and corporation  
Audience: Graduate

4. Apply an analytic process to assess the managerial implications of international strategy, including product, country, location, and organization choices for a multinational engineering operation  
Audience: Graduate

**E P D 614 – MARKETING FOR TECHNICAL PROFESSIONALS**

3 credits.

Role and contribution of marketing and product management to overall operations; target marketing and market segmentation; product lifecycle positioning; develop product and marketing plan as part of balanced marketing effort; technical perspective on social, ethical, environmental, and sustainability of marketing and product management decisions.

**Requisites:** Graduate/professional standing. Not open to students declared in Business: Marketing, MBA.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the role and contribution of marketing and product management to overall business operations and the technical contributions required

Audience: Graduate

2. Describe the structure and content of a Marketing Plan, the elements of the marketing mix, and a balanced marketing effort across the marketing and technical teams

Audience: Graduate

3. Apply target marketing, market segmentation, target market product or service positioning, and how technical information is required to add accuracy and specificity to achieve market success

Audience: Graduate

4. Assist marketing and product management teams on competitive offerings, product comparisons, product life-cycle positioning, and innovation possibilities

Audience: Graduate

5. Develop and present a comprehensive product and marketing plan for a product that delivers a value proposition to the customer

Audience: Graduate

6. Provide the technical perspective on the social, ethical, environmental, and sustainability implications of marketing and product management decisions

Audience: Graduate

**E P D 616 – ENGINEERING LAW**

2 credits.

Addresses important legal issues especially relevant to the practice of engineering. Gain awareness and ability to properly address patents, trade secrets, contracts, employment and non-disclosure agreements, as well as product and professional liability. Learn to avoid legal problems that often affect engineering projects and organizations.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply the basics of patent law including how to obtain patents, how to analyze patent claims, how patents are infringed or infringement can be avoided, how to recognize and capture patentable innovation, how to approach international patents, and the differentiation between trade secrets and patents.

Audience: Graduate

2. Appraise the innovation IP infrastructure at their organization in order to become more effective in interacting with it.

Audience: Graduate

3. Apply the basics of contract law including some key contract terms and often-encountered agreements such as Non-Disclosure Agreements (NDAs) and Employment Agreements.

Audience: Graduate

4. Engage the legal contractual infrastructure within their organization in order to become more effective in proactively interacting with it.

Audience: Graduate

5. Gain an improved ability to avoid legal liabilities by identifying commonly-occurring legal issues that may give rise to liability, and how to address them.

Audience: Graduate

**E P D 617 – COMMUNICATING TECHNICAL INFORMATION**

3 credits.

Develops skills necessary for engineering professionals to communicate technical and managerial information. Covers approaches for communicating to diverse audiences and for action-oriented purposes. Emphasizes communication problem solving and communication efficiency. Includes individual and collaborative projects using oral, written, and electronic media.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Differentiate and use key aspects of rhetoric and communication ethics

Audience: Graduate

2. Distinguish communication needs in a variety of contexts and for a variety of audiences

Audience: Graduate

3. Write and edit technical documents that reflect the 5 Cs of writing: correctness, clarity, conciseness, coherence, and cogency

Audience: Graduate

4. Craft and deliver technical presentations that are persuasive and easy to understand

Audience: Graduate

5. Collaborate with others to accomplish communication goals

Audience: Graduate

**E P D 618 – APPLIED LEADERSHIP AND MANAGEMENT OF ENGINEERING ORGANIZATIONS**

3 credits.

Addresses strategies, models, and practices for leading and managing engineering organizations in a context directly relevant to practicing engineers. Engage in self-reflection about styles, beliefs, and past experiences with leadership and management. Course project of direct relevance to student's organization will integrate theory, models, case studies, and real-time experiences from student's workplace. Gain broad exposure to diverse approaches to leadership and management, and a deeper understanding of how to put what is being learned into effective action.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply knowledge of individual, team, and organizational dynamics to improve organizational effectiveness through continuous improvement of engineering processes

Audience: Graduate

2. Apply tools and techniques to motivate and develop employees to improve performance

Audience: Graduate

3. Articulate the value and methods to proactively engage human resources for management issues

Audience: Graduate

4. Identify and prioritize key issues in personal and professional life to help navigate changing circumstances and mediate stress

Audience: Graduate

5. Interpret how the business case for diversity, equity, and inclusion (DEI) pertains to effectively managing engineering teams and organizations

Audience: Graduate

**E P D 619 – FOSTERING AND LEADING INNOVATION**

3 credits.

Learn to develop vision, culture, and practices that value and drive innovation within engineering and technical organizations. Grow your ability to build an enterprise that values, pursues, and delivers innovative technical services and products.

**Requisites:** Declared in Master of Engineering: Engineering Management, Data Analytics, Engine Systems, Manufacturing Systems Engineering, or Sustainable Systems Engineering

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Evaluate whether a technological solution is a business opportunity.

Audience: Graduate

2. Understand and discuss the process of commercializing technology and the challenges associated with each phase of that process.

Audience: Graduate

3. Identify and develop the skills and resources required for successfully managing technologies and innovative processes.

Audience: Graduate

4. Assess and present the commercial potential of a technological solution.

Audience: Graduate

5. Cultivate the leadership characteristics of technical organizations that successfully foster and sustain a culture of innovation.

Audience: Graduate

**E P D 620 – ELECTRIFIED POWERTRAIN SYSTEMS**

2 credits.

Micro, mild, full, and plug-in electrical powertrain systems, their components and the interactions between them, with special attention paid to generators, motors, and inverters. Learn about key metrics for sizing and matching components based on performance.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Powertrain Electrification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify, and select class of hybrid to match their use case.

Audience: Graduate

2. Distinguish working principles of all components in electrified powertrain systems.

Audience: Graduate

3. Use modeling and simulation to analyze and size components.

Audience: Graduate

4. Construct control systems for electrified powertrain systems.

Audience: Graduate

**E P D 621 – BATTERIES FOR ELECTRIFIED VEHICLES**

2 credits.

Concepts of vehicle hybridization levels; battery accessories, components, and materials; battery life and management; as well as various failure modes of batteries. Development of equivalent circuit models (ECM) for cells that can be used for real time control and diagnostics.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Powertrain Electrification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the basic aspects of lead acid, nickel metal hydride, and lithium ion cells

Audience: Graduate

2. Compare and Contrast how cells are connected to make modules and packs for power and energy applications

Audience: Graduate

3. Value USABC battery test procedures for PHEV targets

Audience: Graduate

4. Describe and evaluate battery management systems

Audience: Graduate

**E P D 622 – ENGINE DESIGN I**

3 credits.

Provides an understanding of engine applications, customer need assessment, and engineering product planning.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Engine Design

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Estimate engine displacement requirements and assess trade-offs between displacement and supercharging

Audience: Graduate

2. Assess the trade-offs between various engine configurations and relate them to the specific needs of your application

Audience: Graduate

3. Evaluate the work of product planners and market researchers in determining new product opportunities and requirements

Audience: Graduate

4. Comparatively assess the various materials and processing choices for cylinder block and head design and make design decisions based on weight, durability, and cost requirements for particular engine applications

Audience: Graduate

5. Create a design for an overall engine system layout including package dimensions, durability, cost, and installation

Audience: Graduate

6. Evaluate reliability analysis and accelerated testing and the considerations that determine the required durability development effort for a new engine

Audience: Graduate

**E P D 623 – ENGINE DESIGN II**

3 credits.

Provides an advanced understanding of internal combustion engine design.

**Requisites:** E P D 622

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify the major steps and resource requirements for a new engine development project

Audience: Graduate

2. Develop a basic engine layout utilizing input from this course and Engine Design I

Audience: Graduate

3. Document the design with sufficient depth (calculation, assumptions, base dimensions) that the concept engine could be assigned to a design team to begin detail design

Audience: Graduate

4. Integrate the learning, knowledge, and skills from the various disciplines of engine development to the total engine design process

Audience: Graduate

5. Develop methods for making the necessary compromises and trade-offs during the concept/initial design layout stages of the engine

Audience: Graduate

**E P D 624 – ENGINE PERFORMANCE AND COMBUSTION**

3 credits.

Provides a physically based understanding of combustion, efficiency, and exhaust emission formation and control in internal combustion engines.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain theoretical and practical limits of maximum engine performance

Audience: Graduate

2. Analyze engine combustion phenomena from a fundamental thermo-chemical perspective, including effects of mixture preparation strategy, in-cylinder gas composition, and in-cylinder charge motion

Audience: Graduate

3. Identify coupling between a single control input and the remainder of the engine system

Audience: Graduate

4. Compare and contrast mixture preparation strategies and alternative energy conversion strategies

Audience: Graduate

### **E P D 625 – ENGINE GAS DYNAMICS**

3 credits.

Provides a physically based understanding of gas dynamics with applications to internal combustion engines.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the major physical processes that occur in gas dynamic flows within internal combustion engines.

Audience: Graduate

2. Evaluate the performance and design of the principal air-handling systems in engine combustion.

Audience: Graduate

3. Apply control volume analysis to solve fluid mechanics problems, for fluids at rest and in movement

Audience: Graduate

4. Use the equations of fluid mechanics to solve realistic engineering problems involving fluids by making appropriate assumptions

Audience: Graduate

5. Develop a mathematical working knowledge of the common manipulations that are performed for three dimensional time-dependent flows

Audience: Graduate

6. Implement numerical solutions to selected fluid problems

Audience: Graduate

### **E P D 627 – PERSPECTIVES ON ENGINE MODELING SEMINAR**

1 credit.

Problem definition and planning, tool selection, model construction, calibration, application and data presentation in order to integrate the most appropriate modeling tools into an engine design and development project.

**Requisites:** Graduate/professional standing, declared in Capstone Certificate in Engine Design, or declared in Capstone Certificate in Powertrain Electrification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Define an effective framework for using and assessing computer modeling tools and procedures.

Audience: Graduate

2. Select the analytical tools most appropriate for any given engine design/development project.

Audience: Graduate

3. Evaluate the capability, application, and limitations of the various classes of engine analysis tools and describe how experiment and analysis complement those tools.

Audience: Graduate

**E P D 628 – ANALYSIS OF TRENDS IN ENGINES**

1 credit.

Scientifically-based look at trends in energy availability, emission control and regulation, and technological advances to make an assessment of the future of engines and powertrain systems for vehicles throughout the world. Emphasis on trends for sustainable mobility solutions.

**Requisites:** Graduate/professional standing, declared in Capstone Certificate in Engine Design, or declared in Capstone Certificate in Powertrain Electrification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Use past and present regulatory drivers to assess the impact of future regulatory trends on engine developments  
Audience: Graduate

2. Determine the market-by-market availability and development of non-petroleum fuels and assess how those developments can impact engine design and marketing both at the macro and the micro scale  
Audience: Graduate

3. Evaluate technology developments that achieve compliance with regulatory demands and support customer performance and efficiency requirements  
Audience: Graduate

4. Formulate a framework for selecting technology related to powertrain architectures, sub-systems, and components for specific applications  
Audience: Graduate

5. Evaluate market requirements for powertrain configurations and features, generating a family of engine variants to satisfy customer needs over a range of applications and sectors  
Audience: Graduate

6. Generate a coherent powertrain production lifecycle plan that balances the drivers and constraints of the multi-objective criteria covered by the course  
Audience: Graduate

**E P D 629 – POWERTRAIN SYSTEMS AND CONTROLS**

3 credits.

Explore fundamental control concepts for development and analysis, modeling requirements and considerations related to control and diagnostics, and the application of these tools to powertrain systems.

**Requisites:** Declared in Engineering: Engine Systems ME or Capstone Certificate in Powertrain Electrification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop powertrain system dynamic models.  
Audience: Graduate

2. Develop powertrain system controls.  
Audience: Graduate

3. Test controls in simulation using MATLAB and Simulink.  
Audience: Graduate

**E P D 630 – ENGINE DESIGN III**

3 credits.

Builds further experience in engine development project organization; materials and processes; and engine validation. Project organization lessons emphasizing the phases of engine development and the importance of a design freeze with increased scrutiny of design modifications as the engine progresses toward production. Additional engine system components and processes such as forging, plastic molding, and billet machining. Reliability validation expanded to component and system-level validation through rig and engine testing. Test plans calibrated to engine volumes and cost in order to develop an appropriate mechanical development and reliability plan.

**Requisites:** E P D 623

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Create engine development projects and their key design points, incorporating resource estimates and justification.  
Audience: Graduate

2. Use flexible tooling approaches for machining major engine components, identifying the advantages and disadvantages and other key variables.  
Audience: Graduate

3. Select any component or sub-system within a particular engine and create and justify a design validation test sequence appropriate to the selection for that engine.  
Audience: Graduate

**E P D 631 – ELECTRIFIED VEHICLE-LEVEL MODELING**

2 credits.

Development of hybrid and electric vehicle powertrain and sub-system mathematical models. Simulations of drive cycles for evaluating component, sub-system, or package performance in the vehicle for fuel economy and emissions.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Powertrain Electrification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Evaluate vehicle losses, efficiencies, and opportunities for improvements.

Audience: Graduate

2. Analyze opportunities for fuel economy improvement for certain technologies.

Audience: Graduate

3. Defend how government and regulators calculate fuel economy and CO<sub>2</sub> emissions and assess CO<sub>2</sub> credits.

Audience: Graduate

**E P D 633 – ENGINE BOOSTING**

2 credits.

Application of fundamental fluid dynamics and thermodynamics principles to intake air boosting for internal combustion engines. Turbocharger and Supercharger design and operating principles, applications to engine system design. Includes both simple, single-stage systems, and multi-stage systems (series, series-sequential, parallel-sequential). Pulse conservation and exhaust gas recirculation will be addressed. Includes advanced considerations including the Miller Cycle, turbocompounding, and e-boosting.

**Requisites:** E P D 625 or concurrent enrollment

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Design a turbocharger compressor for a specific engine and speed range. Demonstrate how the match is impacted by charge air cooling and exhaust gas recirculation

Audience: Graduate

2. Analyze and evaluate a turbocharger match for margin against surge, choke and overspeed.

Audience: Graduate

3. Break down control points for compressor switching and turbine bypass for a given engine and turbocharger maps lay out the operation of a two-stage, series-sequential system.

Audience: Graduate

4. Evaluate the impact of Miller Cycle application at constant BMEP and as a means on increasing BMEP.

Audience: Graduate

**E P D 635 – EXHAUST AFTERTREATMENT SYSTEMS**

2 credits.

Fundamental development of the science and engineering underlying the design of exhaust aftertreatment (catalyst) systems for automotive (internal combustion engine containing) systems. Emphasis is on gasoline and diesel, spark-ignition and compression-ignition combustion engines, though the same fundamentals may be applied to other fuels or combustion types. Introductory material is included on aspects that are related to emissions, including regulatory standards, gasoline and diesel engine basics, fuels, lubricants, combustion, instrumentation, and formation of pollutants. Several causes of emissions and pollutants are intertwined throughout the various topics and the control and treatment of specific emissions species are discussed by device type.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Explain the process that drive emissions formation, know what a catalyst is, and be familiar with the ever-changing landscape of regulations.

Audience: Graduate

2. Compare/contrast emissions testing protocols and emissions measurement equipment to be able to choose the ones best suited to their needs

Audience: Graduate

3. Explain the purpose of the Exhaust Aftertreatment System (EAS) and its reliance on On-Board Diagnostics (OBD) for operations and warranty issues

Audience: Graduate

4. Analyze and describe the operations of the Oxidation Catalysts (OCs) and describe the operations of the Three-Way Catalyst (TWC)

Audience: Graduate

5. Analyze and describe the operations of the Particulate Filters

Audience: Graduate

6. Analyze and describe the operations of the Selective Catalytic Reduction (SCR) catalyst and include Ammonia Slip Catalysts

Audience: Graduate

**E P D 636 – INTRODUCTION TO POLYMERS**

3 credits.

Introduction to the chemistry and physics of polymeric materials. Concepts of polymer synthesis as well as physical properties are introduced, including molecular weight, chain conformation, step growth and chain growth kinetics, basic rheology and viscoelasticity as well as glass transition and crystallinity.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Polymer Processing & Manufacturing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the common synthetic strategies for the fabrication of polymers.

Audience: Graduate

2. Analyze outcomes of polymer materials based on properties such as viscoelasticity.

Audience: Graduate

3. Evaluate issues in manufacture and processing to make a material or compound.

Audience: Graduate

**E P D 637 – POLYMER CHARACTERIZATION**

3 credits.

Basic principles used for both quantitative and qualitative characterization of polymeric materials, including both assessment of their synthesis and of their structural features at different length scales. Discussion of techniques such as NMR (Nuclear Magnetic Resonance) and GPC (Gel Permeation Chromatography), thermal characterization, rheological characterization, as well as scattering of various types of electromagnetic radiation. Introduction to characterization methods used in industry and polymer crystallography.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Polymer Processing & Manufacturing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the chemical composition of an unknown polymeric sample.

Audience: Graduate

2. Evaluate the molecular weight of an unknown material through multiple methods.

Audience: Graduate

3. Quantify characteristics such as percent crystallinity or orientation in order to relate processing conditions to mechanical properties.

Audience: Graduate

**E P D 638 – POLYMER COATINGS**

3 credits.

Introduction to coatings, especially focusing on the polymer science and chemistry in these coatings. Chemistry behind these coatings, physical science such as film formation, and the role of various additives used in common formulations.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Polymer Processing & Manufacturing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain the purpose of additives included in various paints and coatings systems.

Audience: Graduate

2. Design a formulation for an appropriate system for a given type of paint or coating.

Audience: Graduate

3. Design a hypothetical smart coating system.

Audience: Graduate

**E P D 639 – PLASTICS RECYCLING AND SUSTAINABILITY**

3 credits.

Sustainability and recycling aspects in the life cycles of plastics and polymeric materials. Chemistries that can be used to make polymers from sustainable or renewable sources and biodegradable polymers. Current recycling practices and their limitations including polymer-based materials such as composites and layered packaging. Textile recycling and plastic pollution including microplastics are covered.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Polymer Processing & Manufacturing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the life cycle of a plastic product and the related causes of and solutions for recycling and sustainability issues.

Audience: Graduate

2. Assess benefits and costs of sustainability planning in the public and private sectors.

Audience: Graduate

3. Explain the environmental dimensions of the sustainability challenges associated with plastics manufacture, use and disposal.

Audience: Graduate

4. Apply sustainability principles to address the challenges of plastics disposal, especially in developing countries.

Audience: Graduate

**E P D 640 – INTRODUCTORY POLYMER RHEOLOGY**

3 credits.

Introduction to polymer rheology. Concepts of continuum mechanics are introduced, specifically the fluid dynamics of non-Newtonian and linear viscoelastic fluids. Material functions, constitutive equations and rheometry and experimental methods for measuring material functions (rheometry) are discussed. Knowledge of linear differential equations [such as MATH 319 or 320] and fluid mechanics [such as ME 363] or momentum transfer [such as CBE 320] required.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Polymer Processing & Manufacturing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Differentiate between Newtonian and Non-Newtonian Fluids

Audience: Graduate

2. Explain and apply the mathematics of continuum mechanics

Audience: Graduate

3. Apply constitutive equations to analyze non-Newtonian phenomena exhibited by polymeric fluids

Audience: Graduate

4. Analyze real flow processes involving polymer solutions or melts

Audience: Graduate

5. Recommend solutions to problems using data from rheological properties of polymer fluids and melts

Audience: Graduate

**E P D 642 – THERMODYNAMICS OF ENGINE SYSTEMS**

3 credits.

Use the 1st and 2nd laws of thermodynamics in the analysis of engines. Use ideal gas mixtures, thermodynamics and combustion principles to determine adiabatic flame temperature and chemical equilibrium - with focus on Engine Systems

**Requisites:** Declared in Engineering: Engine Systems MEng

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply thermodynamic equations, equations of state, and the energy equation

Audience: Graduate

2. Calculate thermodynamic properties of reactants and products, enthalpies of reaction, adiabatic flame temperature, and equilibrium species concentration, with application to simple reactions

Audience: Graduate

3. Apply thermodynamic analysis to IC Engines

Audience: Graduate

**E P D 645 – ELECTRIC MACHINES FOR TRACTION APPLICATIONS**

2 credits.

Reviews the physics of electric machines. Covers electric machine operation used both in motoring and generating modes necessary in traction applications. The fundamentals of brush DC, PM synchronous, reluctance, and induction machines are explored. Begins with the basics of DC machines and extends to the concept of field orientation in AC machines.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Powertrain Electrification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the physics of DC and AC machines

Audience: Graduate

2. Develop techniques to control the electromagnetic torque of the machine using our understanding of physics

Audience: Graduate

3. Compare various forms of control of electric machines

Audience: Graduate

4. Apply the knowledge from IEEE publications on this topic

Audience: Graduate

5. Provide specific application examples of motors used in traction applications

Audience: Graduate

**E P D 646 – ELECTRIC DRIVES FOR TRACTION APPLICATIONS**

2 credits.

Electric drives operation used both in motoring and generating modes necessary in traction applications. The fundamental drives of brush DC, PM synchronous, reluctance, and induction machines are explored. Begins with the basics of drives and extends to the device physics of power electronics used in drives.

**Requisites:** E P D 645 or declared in Capstone Certificate in Powertrain Electrification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the basics of DC and AC electric drives  
Audience: Graduate

2. Develop techniques to control the electromagnetic torque of the machine with drives  
Audience: Graduate

3. Compare various forms of control of electric machines  
Audience: Graduate

4. Gain background to apply technical publications on this topic  
Audience: Graduate

5. Provide specific application examples of drives used in traction applications  
Audience: Graduate

**E P D 647 – TRENDS IN ELECTRIFICATION SEMINAR**

1 credit.

Discussion of major trends in the automotive and transportation industry, focused on electrification for hybrids, fuel cells, and fully electric vehicles.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Powertrain Electrification

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Discuss key electrification trends and developments in the automotive and transportation industries  
Audience: Graduate

2. Assess the impact of regulatory trends on electrification developments  
Audience: Graduate

3. Evaluate technology developments for compliance with regulations, performance, and energy efficiency requirements  
Audience: Graduate

4. Formulate a framework for selecting technology related to powertrain architectures, sub-systems, and components for specific applications  
Audience: Graduate

5. Generate a coherent powertrain production lifecycle plan that balances the drivers and constraints of performance and customer demands  
Audience: Graduate

**E P D 650 – INTRODUCTION TO POLYMERS PROCESSING**

3 credits.

Introduction to the principles of polymer processing. Review of the basic techniques primarily in use by industry as well as foundational principles of polymer physics, viscoelasticity and rheology. Focus on understanding how design of process is used to achieve desired structure and properties. Includes introduction to topics such as 3-d printing and recycling of polymer waste in the context of reprocessing such materials.

**Requisites:** E P D 636 and (E P D 640 or CHEM/M S & E 421, or concurrent enrollment), or declared in Capstone Certificate in Polymer Processing Manufacturing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. State the differences between the various processing techniques used to convert polymers to useful products including those, for example, for automotive, aerospace, energy, consumer, and medical applications.

Audience: Graduate

2. Apply the concepts of transport phenomena (i.e. fluid, heat, and mass transfer) to the design of polymer processing operations and add topics typically not covered in undergraduate courses (e.g. non-Newtonian fluid mechanics, radiation heating, self-diffusion).

Audience: Graduate

3. Describe the connection between polymer molecular structure and polymer flow by using basic concepts in polymer rheology.

Audience: Graduate

4. Analyze the connection between properties of the product (e.g. strength, stiffness, degree of crystallinity, degree of molecular orientation) and processing conditions (e.g. stress generated during flow, heat transfer conditions).

Audience: Graduate

5. Theorize as to requirements for the design of recycling schemes for polymers.

Audience: Graduate

6. Compare what is possible via traditional processing methods vs. modern methods such as 3-D printing.

Audience: Graduate

**E P D 654 – TEACHING IN SCIENCE AND ENGINEERING**

2-3 credits.

Introduction to teaching and learning in science and engineering at the college level. Includes exploration of the learning process, teaching methodology, assessment strategies, course design, teaching philosophies, and careers in education, science, and engineering.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**E P D 660 – CORE COMPETENCIES OF SUSTAINABILITY**

3 credits.

Introduces real-world pragmatic skills and applications in sustainability competencies. Content reaches across engineering expertise, from chemical engineering to buildings to product design and energy. Modules cover ecological footprinting, lifecycle assessment, resource use and integrated engineering practice.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Calculate and analyze carbon and ecological footprints

Audience: Graduate

2. Compare and evaluate different sustainability frameworks

Audience: Graduate

3. Analyze sustainability issues and/or practices using a systems-based approach, utilizing life-cycle thinking and assessment

Audience: Graduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of resource consumption, and how sustainable development can fuel innovation

Audience: Graduate

5. Characterize sustainability as a global challenge associated with social inequity and requiring engineering/science leadership, multiple perspectives and solutions

Audience: Graduate

6. Synthesize course lessons as they relate to engineering applications and decision making

Audience: Graduate

7. Assess the relevant professional competencies and how sustainability could affect those choices

Audience: Graduate

**E P D 669 – SUSTAINABLE SYSTEMS ENGINEERING CAPSTONE**

3 credits.

Provides the opportunity to demonstrate ability to think globally, sustainably, and creatively. Gain real-world experience by applying theory, tools, and research to conceptualize, analyze, and design a solution to a real-world problem within a social and environmental context. Showcase the knowledge and analytical skills acquired, and integrate tools, science, and communication to address a community or industry need. Work with an industry mentor and customer throughout your project.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Pose a problem effectively

Audience: Graduate

2. Apply sustainability principles and/or frameworks to address the challenge of the selected problem, and balance structure and flexibility in problem-solving approaches

Audience: Graduate

3. Analyze sustainability issues and/or practices using a systems-based approach, and creatively consider alternative solutions

Audience: Graduate

4. Perform a targeted literature/document review

Audience: Graduate

5. Integrate sustainable engineering knowledge and tools into social contexts

Audience: Graduate

6. Design a solution to the problem statement, and account for the perspectives of various stakeholders

Audience: Graduate

7. Document and present context, proposed solutions, analysis, results and conclusions

Audience: Graduate

**E P D 678 – SUPPLY CHAIN MANAGEMENT FOR ENGINEERS**

3 credits.

Examines concepts, management techniques, and current trends in the field of supply chain management with emphasis on topics relevant to engineers. Topics include global logistics, logistics engineering techniques, new product introduction process, purchasing strategy, managing transportation providers, distribution center technology and operations, outsourcing supply chain functions, and an introduction to supply chain information systems.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Analyze supply chain concepts and principles and show fluency in the language used in supply chain management.

Audience: Graduate

2. Apply logistics engineering techniques to plan and optimize transportation routes and costs across multiple modes of transportation using actual data from large businesses.

Audience: Graduate

3. Implement recent technology and business practices adopted by supply chain participants to improve efficiency and environmental sustainability.

Audience: Graduate

4. Design inventory management systems prioritizing manufacturing capacity, inventory investment, and product availability.

Audience: Graduate

5. Demonstrate use of ERP systems to execute supply chain processes including purchasing, receiving, manufacturing planning, inventory control, and logistics functions.

Audience: Graduate

**E P D 690 – SPECIAL TOPICS IN ENGINEERING PROFESSIONAL DEVELOPMENT**

1-3 credits.

Topics vary.

**Requisites:** None**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**E P D 699 – INDEPENDENT STUDY**

1-3 credits.

Under faculty supervision.

**Requisites:** Graduate/professional standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

## E P D 701 – WRITING FOR PROFESSIONALS

1 credit.

Preparation to produce effective written communication that is suitable for inter-professional and inter-disciplinary audiences in a variety of workplaces. Apply these strategies and tools.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Differentiate and use key aspects of rhetoric and communication ethics

Audience: Graduate

2. Distinguish communication needs in a variety of contexts and for a variety of audiences

Audience: Graduate

3. Write and edit technical documents that reflect the 5 Cs of writing: correctness, clarity, conciseness, coherence, and cogency

Audience: Graduate

4. Craft and deliver technical presentations that are persuasive and easy to understand

Audience: Graduate

5. Collaborate with others to accomplish communication goals

Audience: Graduate

## E P D 702 – PROFESSIONAL PRESENTATIONS

1 credit.

Sharpen your ability to create, edit, review, and present information in an efficient, clear, and effective way for your audiences. Develop your presentation skills through a series of presentations related to your professional interests and work.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze audience needs in a variety of situations

Audience: Graduate

2. Construct content that is easily understood by stakeholders

Audience: Graduate

3. Craft more effective slides that persuade, engage, and inform their audience

Audience: Graduate

4. Exhibit confidence while presenting

Audience: Graduate

5. Apply the lessons learned from this course to academic work and professional careers

Audience: Graduate

## **E P D 704 – ORGANIZATIONAL COMMUNICATION AND PROBLEM SOLVING**

1 credit.

Improve your problem solving within complex organizations, with a special emphasis on case studies and improving communication, using cross-disciplinary sources.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Foundations of Professional Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Summarize the biases that affect decision making

Audience: Graduate

2. Influence others to make better decisions

Audience: Graduate

3. Design your decisions and solve your problems using a better process based on empirical social science

Audience: Graduate

4. Design your teams and groups to maximize performance and innovation based on principles from social science

Audience: Graduate

5. Apply strategies to increase open communication and strategically use conflict in organizations to increase productivity and decision quality

Audience: Graduate

6. Create environments and situations that nudge ethical decisions in organization

Audience: Graduate

7. Identify blind spots that lead to unethical decisions

Audience: Graduate

## **E P D 706 – CHANGE MANAGEMENT**

1 credit.

Provides emerging and practicing professionals foundational knowledge to develop a change management strategy and implement it using proven processes and tools. Become better prepared to deliver effective organizational performance. Applies contemporary concepts and methods in change management through student-selected projects.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Foundations of Professional Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. List and describe and evaluate three change management frameworks

Audience: Graduate

2. Describe elements necessary to successfully initiate organizational change

Audience: Graduate

3. Plan organizational change using components of one or more change management frameworks

Audience: Graduate

4. Identify challenges inherent in change management and leadership and list methods for addressing these challenges

Audience: Graduate

5. Describe approaches for sustaining change and change benefits

Audience: Graduate

6. Apply methods for influencing stakeholders in affecting outcomes of change initiatives

Audience: Graduate

### **E P D 708 – CREATING BREAKTHROUGH INNOVATIONS**

1 credit.

Explore innovation and how design thinking is a driver of innovation. Learn to use various design thinking methods and tools for analysis and decision-making.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Foundations of Professional Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Express what innovation is and how innovation is driven by design thinking

Audience: Graduate

2. Plan and conduct design research

Audience: Graduate

3. Synthesize themes, patterns, and insights from qualitative design research data

Audience: Graduate

4. Plan, structure, and facilitate ideation and concepting sessions

Audience: Graduate

5. Use design thinking tools to frame, plan and execute a challenge relevant to their work, community or personal

Audience: Graduate

### **E P D 710 – FOUNDATIONS OF ENGINEERING LEADERSHIP**

2 credits.

Build the foundations for developing, refining, and strengthening your effectiveness as a leader of engineering teams, projects, and organizations. Enhance your understanding of how to match your leadership style to a team's focus, organization, and culture. Grow your understanding of your strengths and weaknesses as a leader using proven assessment tools. Develop a plan for growing your leadership competency.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop a clear understanding of strengths and developmental needs as a manager and leader

Audience: Graduate

2. Create a development plan to intentionally grow foundational management and leadership qualities

Audience: Graduate

3. Manage both engineers and engineering processes with confidence

Audience: Graduate

4. Enhance the ability to strategically adapt leadership styles to the unique context of an engineering setting

Audience: Graduate

**E P D 712 – ETHICS FOR PROFESSIONALS**

1 credit.

Explores how our actions affect others and influence the choices we make within the workplace. Enhance ethical competencies by providing opportunities to discuss challenges to behavior and decision-making in different professional contexts.

**Requisites:** Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify when a decision has ethical dimensions, articulate what professional ethical behavior means, and explain why it matters

Audience: Graduate

2. Apply ethical decision-making strategies and relevant codes of ethics to explore, analyze, and effectively resolve workplace and profession-specific ethical challenges

Audience: Graduate

3. Apply behavioral science concepts to explore the role of self-interest in our decision making and to explain why good people sometimes behave unethically

Audience: Graduate

4. Identify and explain the diverse social, global, and cultural frameworks that play a role in some ethical challenges

Audience: Graduate

**E P D 720 – ENGINE NOISE AND VIBRATION**

2 credits.

Introduces the engineer to fundamental NVH (Noise, Vibration, and Harshness) concepts with an emphasis on how NVH can be integrated throughout the engine development process from initial concept inception through to validation testing for production.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2020

**Learning Outcomes:** 1. Analyze how changes to emissions and noise legislation can impact the powertrain architecture

Audience: Graduate

2. Identify sources of NVH in the vehicle and be able to cascade vehicle level metrics down to system level targets

Audience: Graduate

3. Quantify fundamental source mechanisms excitation relating to gas pressure torque and inertia loading

Audience: Graduate

4. Analyze key transmission NVH challenges and the impact of changes to the micro/macro geometry of gears

Audience: Graduate

5. Apply the principles of pipe acoustics towards the design of intake and exhaust systems

Audience: Graduate

6. Explain the role of the mounting system and evaluate the ideal mount configuration

Audience: Graduate

**E P D 730 – SUSTAINABLE FACILITIES**

3 credits.

Explore the environmental impacts of commercial and residential buildings, including energy, water, materials, transportation, waste, human health, and land use. All phases of a building's life cycle will be considered, along with relevant case studies, benchmarking tools, public policies and emerging concepts.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the environmental impacts of residential and commercial buildings

Audience: Graduate

2. Explain the stages of the building life-cycle, identify the decision-makers, and analyze how the environmental impacts and opportunities change in each stage

Audience: Graduate

3. Evaluate improvement strategies appropriate to each life-cycle stage of a building

Audience: Graduate

4. Utilize benchmarking and analysis tools used in the building sector for environmental and energy performance

Audience: Graduate

5. Compare and justify policies used to influence the building sector, and critique their effectiveness

Audience: Graduate

6. Create and deliver a presentation on a selected green building strategy, citing resources and case studies

Audience: Graduate

**E P D 731 – ENERGY EFFICIENCY IN BUILDINGS**

3 credits.

Core principles of energy use and efficiency in the building sector (residential, commercial, institutional buildings.) Factors that influence energy demand (design, equipment, controls, operation, maintenance). Review of engineering fundamentals of heat transfer, heating and cooling loads, psychrometrics. Topics include building envelope principles (climate, orientation, materials, massing), heating and cooling systems, ventilation indoor air quality, plumbing water heating, lighting daylighting, and internal energy uses (plug loads, equipment). Zero energy building concepts, energy modeling, and energy benchmarking are also covered. Applications include existing building operation and improvement, and new building design and planning.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify energy end-uses in commercial and residential buildings

Audience: Graduate

2. Describe the purpose and operation of energy-using building systems

Audience: Graduate

3. Create an energy model to simulate building energy performance

Audience: Graduate

4. Calculate the impact of energy efficiency options

Audience: Graduate

5. Use energy benchmarking tools such as Energy Star Target Finder

Audience: Graduate

6. Analyze the causes of and solutions for the sustainability challenge of excessive energy use in commercial and residential buildings

Audience: Graduate

7. Analyze sustainability issues and/or practices using a systems-based approach to identify opportunities for energy efficiency while maintaining human health

Audience: Graduate

## **E P D/ACCT I S/GEN BUS 781 – FINANCIAL AND BUSINESS ACUMEN**

1 credit.

This course is designed with a keen awareness for the needs of the non-financial student or professional. For this class, no previous financial training is required. The intent is to equip you with the essential concepts used to develop financial literacy. Content will cover basic financial terms and reports, analytical tools to help interpret financial data and using financial data in budgets and forecasts.

**Requisites:** Graduate/professional standing. Not open to students declared in an MBA program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply the language and foundational tools of finance to analyze how a company's economic activity is reflected in its financial reports

Audience: Graduate

2. Perform high-level financial statement analysis to identify important information from financial reports

Audience: Graduate

3. Apply basic financial concepts of valuation, capital budgeting, and financial decision making

Audience: Graduate

## **E P D/GEN BUS/MARKETNG 782 – MARKETING FOR NON-MARKETING PROFESSIONALS**

1 credit.

An overview of marketing's role within an organization, the key elements of a marketing plan, and how the plan is implemented. Students will learn about buyer demographic, psychographic and purchasing decision behavior. A thorough understanding of the customer enables students to develop a coordinated marketing mix (product, price promotion and place) that will satisfy the customer better than the competition and at the required margin. Students will leave the course understanding the degree to which all company functions must be coordinated and focused on the customer. This course will not apply toward fulfilling the MBA degree requirements.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Explain how the marketing function impacts an organization's business operations

Audience: Graduate

2. Identify and use marketing terminology and concept

Audience: Graduate

3. Use both demographic and psychographic information to segment markets and select a target market

Audience: Graduate

4. Research and create a basic marketing plan that aligns customer expectations with organizational marketing activities and the organization's resources

Audience: Graduate

5. Coordinate consistency between product, price, promotion, and place (distribution)

Audience: Graduate

6. Relate and utilize the product life cycle concept to product and service offerings

Audience: Graduate

**E P D/GEN BUS/M H R 783 – LEADING TEAMS**

1 credit.

Students will gain the knowledge and skills to continuously enhance their own team performance and productivity as well as the teams they are involved with. They will also be in a much better position to lead teams effectively.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe team dynamics, roles, and expectations that influence a STEM team's performance

Audience: Graduate

2. Identify and effectively deploy specific team member strengths relevant for technical projects

Audience: Graduate

3. Plan, lead, and facilitate productive team meetings

Audience: Graduate

4. Identify and manage team conflict more effectively and constructively

Audience: Graduate

5. Assess and improve their current STEM team leadership methods and practices

Audience: Graduate

**E P D/GEN BUS/OTM 784 – PROJECT MANAGEMENT ESSENTIALS**

1 credit.

Techniques that will help to plan, execute, and deliver projects with desired scope on time and on budget. Learn to document clear project objectives and goals, accurately estimate project time and costs, schedule and allocate time-critical resources, and establish feedback systems for optimal project control.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2023

**Learning Outcomes:** 1. Plan and manage successful engineering projects using appropriate methods, tools, and techniques

Audience: Graduate

2. Estimate project costs, resources, and schedules

Audience: Graduate

3. Immediately apply project management principles regarding the five major project stages: initiate, plan, execute, control, and close

Audience: Graduate

4. Apply or customize the project management framework to engineering organizational needs

Audience: Graduate

5. Assess and improve the current project management system

Audience: Graduate

## **E P D/GEN BUS/M H R 785 – EFFECTIVE NEGOTIATION STRATEGIES**

1 credit.

Improves students' negotiating skills, doing so by providing a theoretical underpinning that will help them to understand the sources of effective and ineffective approaches to negotiations.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe game theory and distinguish between distributive and integrative bargaining, recognizing appropriate tactics  
Audience: Graduate

2. Identify bargaining styles, set goals, improve relationships, and leverage interests effectively  
Audience: Graduate

3. Analyze ethical issues in negotiations and create mutual gain through value creation  
Audience: Graduate

4. Demonstrate thorough preparation for negotiations, use individual and team techniques, and evaluate post-negotiation strengths and areas for improvement  
Audience: Graduate

## **ENGLISH (ENGL)**

### **ENGL 100 – INTRODUCTION TO COLLEGE COMPOSITION**

3 credits.

Focuses on development of rhetorical reading, listening, and writing abilities; provides practice in written and spoken communication (emphasis on writing); develops information literacy; provides a foundation for a variety of college course work and post-college careers.

**Requisites:** Students required to take the MSN ESLAT cannot enroll until the ESL 118 requirement is satisfied

**Course Designation:** Gen Ed - Communication Part A  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## **ENGL/THEATRE 120 – INTRODUCTION TO THEATRE AND DRAMATIC LITERATURE**

3-4 credits.

Reading important plays, attending stage productions, writing and thinking critically about theatre and drama. Emphasis on developing analytic skills in dramatic literature and theatre production.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ENGL 140 – COMM B TOPICS IN ENGLISH LITERATURE**

4 credits.

A course on literature written in English that satisfies the Comm B requirement. Topic will vary by semester.

**Requisites:** None

**Course Designation:** Gen Ed - Communication Part B  
Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **ENGL 141 – SCIENCE FICTION AND FANTASY**

3 credits.

An introduction to the literature of science fiction and fantasy; specific topics will vary.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **ENGL/GEN&WS 144 – WOMEN'S WRITING**

3 credits.

An introduction to literature in English written by women in various periods and places; specific topics will vary.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 145 – AMERICAN DREAMERS**

3 credits.

A study of novels, plays, poems, and films that focus on individuals who strive to achieve success and security in America.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ENGL/ASIAN AM 150 – LITERATURE & CULTURE OF ASIAN AMERICA**

3 credits.

Since the 19th century, "America" has often been defined by its relationship with "Asia," through cultural influence, immigration, imperialism, and war. Traces the role of Asia and Asians in American literature and culture, from the Chinese and Japanese cultural influences that helped shape literary modernism to the rise of a distinctive culture produced by Asian immigrants to America and their descendants.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL/ENVIR ST 153 – LITERATURE AND THE ENVIRONMENT**

3 credits.

An introduction to literature in English about the natural world and humankind's relationship with it; specific topics will vary.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 155 – MYTH AND LITERATURE**

3 credits.

Introduction to concepts of myth and mythology, myth-making and the modern study of myth in relation to myths and legends common in English and American literature.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 156 – LITERATURE AND MEDICINE**

3 credits.

Exploration of literature as both a source of knowledge about medicine and as a catalyst for reflection about medical concepts and practices, including health, illness, dying, and disability. Students will consider ways that literature can serve as a resource for patients and healthcare practitioners.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL/LEGAL ST 160 – TRUTH AND CRIME**

3 credits.

Examines the development, scope, and effects of the "True Crime" genre in the United States. Using literary analysis and legal studies methods, explore various areas of the genre (written, podcasts, documentaries, etc.) and try to find answer as to why we are so compelled by true crime narratives and what true crime's "truth" is. Untangle the complex relationship between law and narrative (background on each will be provided) and the various epistemological systems it combines, including the role of science and technology. Gain a detailed understanding of what our culture's relationship to "real life" crime narratives tells us about the fundamental and complex role criminality plays in defining us as a society.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify the fundamentals of legal narrative and its relationship to criminal law functions (what are the elements of a crime, and what is "evidence"?)

Audience: Undergraduate

2. Identify the ways the legal system is subject to human, social, and literary construction—not only in a theoretical sense but through actual cases.

Audience: Undergraduate

3. Analyze the various ways in which media "tells" crime stories and what the potential motivation for these stories might be.

Audience: Undergraduate

4. Develop a nuanced understanding of the true crime genre through a close examination of exemplary representations of the genre (literature, podcasts, documentaries, etc.)

Audience: Undergraduate

**ENGL 162 – SHAKESPEARE**

3 credits.

Introduction to several of Shakespeare's most popular plays and their relation to other works of English and American literature.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ENGL 167 – BRITISH AND AMERICAN WRITERS**

3 credits.

An introduction to British and American literature through particular writers and themes.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ENGL 168 – MODERN LITERATURE**

3 credits.

A thematic introduction to literary works in a variety of genres written in English from the turn of the twentieth century to the present day. Emphasis may vary between writers from the U.S., Britain, Ireland, and other Anglophone nations.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ENGL 169 – MODERN AMERICAN LITERATURE**

3 credits.

An introduction to selected fiction, prose, drama and poetry written by Americans from the early twentieth century to the present day.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ENGL/AMER IND 172 – LITERATURES OF NATIVE AMERICA**

3 credits.

Introduction to the oral and written literatures of the peoples of native North America. An engagement with texts across historical periods, tribal groups, and regions to examine forms such as oratory, sermon, testimony, autobiography, and contemporary poetry and novels.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL 173 – ETHNIC AND MULTICULTURAL LITERATURE**

3 credits.

Introduction to literature that reflects the writing and experience of minority and ethnic groups. Texts will focus on a theme or problem.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ENGL 174 – LITERATURE AND SOCIAL JUSTICE**

3 credits.

An introduction to the multiple ways writers have used literary texts to engage with pressing questions about class, race, gender, equality, immigration, and other issues of social justice. Specific topics will vary.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ENGL 175 – LITERATURE AND THE OTHER DISCIPLINES**

3 credits.

The depiction and valuation of other academic disciplines and intellectual work in selected works of British and American literature and the intellectual influences of other disciplines on selected works and movements of British and American literature.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ENGL 176 – TOPICS IN LITERATURE AND FILM**

3 credits.

An introduction to the interplay of literature and film in English, with a focus on the analysis of novels, stories, poems and other writings and their representation and transformation in and through film; specific topics will vary.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ENGL 177 – LITERATURE AND POPULAR CULTURE**

3 credits.

A selected topic studying the intersection of literature and popular culture in various forms and media.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ENGL 178 – DIGITAL MEDIA, LITERATURE, AND CULTURE**

3 credits.

An introduction to the intersection of ever-evolving digital technologies with the production and reception of literature. Examine the role of digital media in structuring the knowledge and experience of literary works; and provides an opportunity for critical and potentially creative practice.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ENGL 179 – INTRODUCTION TO LANGUAGE AND IDEOLOGY**

3 credits.

Explores myths and ideologies about English language usage in the US (present and past) from a linguistic perspective. Discusses how common perceptions towards language use and language varieties, especially those associated with ethnic or racial minorities, are socially (not linguistically) constructed. Addresses questions like: Where do linguistic myths, especially those regarding varieties of American English used by persistently marginalized groups, come from and how does one check if there is a factual basis for them? Who gets to decide which words are entered into a dictionary or what constitutes 'proper' English? What perceptions do people have about 'good' and 'bad' dialects and accents? Who benefits and who is harmed by such perceptions? Approaches these and related questions within an anti-racist framework, showing that perceptions towards certain English varieties are often not grounded in linguistic facts but rather in bias against certain demographic groups.

**Requisites:** None**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Either Humanities or Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Describe relationships between varieties of American English and society that underly the construction of language ideologies

Audience: Undergraduate

2. Outline how socio-historical factors have contributed to the development of ethnically or racially affiliated varieties of English in the US

Audience: Undergraduate

3. Evaluate social perceptions about ethnically or racially affiliated varieties of American English using data-based methods

Audience: Undergraduate

4. Develop awareness of biases against speakers from historically marginalized groups

Audience: Undergraduate

5. Demonstrate self-awareness and empathy towards the cultural perspectives, lived experiences, and worldviews of others

Audience: Undergraduate

6. Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society

Audience: Undergraduate

**ENGL 181 – FIRST-YEAR HONORS SEMINAR**

3 credits.

Honors literature seminar for first year students. Topic and materials will vary.

**Requisites:** First Year students only and declared in an Honors program

**Course Designation:** Gen Ed - Communication Part B

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ENGL 182 – INTRODUCTION TO LITERATURE FOR HONORS**

3 credits.

Introductory honors course in discussion format. Topic and materials will vary.

**Requisites:** Declared in an Honors program

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 200 – WRITING STUDIO**

1 credit.

The focus is on students' own writing in this workshop-oriented course for writers in any discipline. Theoretical and practical foundations for drafting, revising, and reviewing a range of academic genres and approaches.

Students should be enrolled concurrently in another course where academic writing is assigned.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 201 – INTERMEDIATE COMPOSITION**

3 credits.

Provides practice in persuasive writing in various modes, styles, and genres; develops an understanding of the different contexts of writing, both scholarly and public; provides opportunities for exploring the relation between writing and speaking; and provides critical tools for the rhetorical analysis of expository prose. Not open to auditors

**Requisites:** Satisfied Communications A requirement and sophomore standing

**Course Designation:** Gen Ed - Communication Part B

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 204 – INTRODUCTION TO RHETORIC AND WRITING STUDIES**

3 credits.

What does writing do? How? For whom? How and why do writers and readers compose texts that have an impact? Approaches these enduring questions of English studies from the perspective of Composition Rhetoric, one of English's subfields. Emphasizing critical reading and writing and built around a central theme that varies by semester, the course prepares students to analyze historical and/or contemporary examples of how writing creates communities, influences beliefs, and shapes knowledge.

**Requisites:** Satisfied Communications A requirement and sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Analyze and evaluate public discourse

Audience: Undergraduate

2. Learn about and use conceptual tools and theories to aid analysis and evaluation

Audience: Undergraduate

3. Consume and produce rhetoric

Audience: Undergraduate

4. Be familiar with key questions, methods, and ideas in the field of composition and rhetoric

Audience: Undergraduate

5. Critically examine, from multiple perspectives, how public discourse affects you and means to respond

Audience: Undergraduate

6. Understand historical and contemporary contexts when rhetoric had consequences for the public

Audience: Undergraduate

7. Learn about and use tools for working with and drawing insights from writing in all forms

Audience: Undergraduate

**ENGL 207 – INTRODUCTION TO CREATIVE WRITING: FICTION AND POETRY WORKSHOP**

3 credits.

Fiction writing and poetry writing, with readings of writers as models.

**Requisites:** First Year, freshman or sophomore standing only

**Course Designation:** Gen Ed - Communication Part B

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 214 – THE ENGLISH LANGUAGE**

3 credits.

An overview of the structure, use, and development of the English language and its varieties.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 220 – SHAKESPEAREAN DRAMA**

3 credits.

A survey covering most of the plays after 1600.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**ENGL/LITTRANS 223 – VLADIMIR NABOKOV: RUSSIAN AND AMERICAN WRITINGS**

3 credits.

The major novels of Vladimir Nabokov studied in the context of Russian and American literatures. Nabokov as a quintessential artist in exile, whose work explores loss of language, country and home.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 224 – INTRODUCTION TO POETRY**

3 credits.

A survey of elements and styles of poetic form. Readings will be selected from British and American literature written in English.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENGL 236 – BASCOM COURSE**

3 credits.

A low-enrollment course developing skills in critical reading, logical thinking, use of evidence, and use of library resources. Emphasis on writing in the conventions of specific fields.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed - Communication Part B

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 241 – LITERATURE AND CULTURE I: TO THE 18TH CENTURY**

3 credits.

What is a person, a home, a nation, a world? What we now call "English literature" begins with these questions, imagining a cosmos filled with gods and heroes, liars and thieves, angels and demons, dragons and dungeons, whores and witches, drunken stupor and religious ecstasy. Authors crafted answers to these questions using technologies of writing from parchment to the printing press, and genres old and new, from epic and romance to drama and the sonnet. Develops skills of critical reading and writing that are essential to majors and non-majors alike.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 242 – LITERATURE AND CULTURE II: FROM THE 18TH CENTURY TO THE PRESENT**

3 credits.

Considers a period of unparalleled tumult: a time of vast world empires and startling new technologies, revolutions that radically redefined self and community, two cataclysmic world wars, the emergence of ideas of human rights, and the first truly global feelings of interconnectedness. How has literature captured and contributed to these dramatic upheavals? Some writers worldwide have struggled to invent new forms, new words, and new genres to do justice to a world in crisis, while others have reached back in time, seeking continuity with the past. Explore enduring traditions of poetry and drama and think about experiments in the new, globally popular genre of the novel. Develops skills of critical reading and writing that are essential to majors and non-majors alike.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 243 – AMERICAN LITERARY CULTURES**

3 credits.

Is America a new world, a city on a hill, an imperial power? Are American literatures revolutionary, nationalist, countercultural? Explores how writers have wrestled with such questions for several hundred years. We will encounter literary figures from white whales to red wheelbarrows, focusing on the diverse geographies, cultural practices, and political mythologies that compose the Americas, and interrogating what is meant by American literature and what it means to be American. We will consider the ways that genres from Native stories to slave narratives to postmodern novels have contributed to social, intellectual, and political currents of American cultures. Develops skills of critical reading and writing that are essential to majors and non-majors alike.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**ENGL 245 – SEMINAR IN THE MAJOR**

3 credits.

Offers close instruction in the principles and practices of informed, engaged, critical reading and writing. While the texts and topics vary, each seminar will reinforce fundamental skills taught across the English major, strengthening students' capacities to write and speak powerfully and to build convincing, original, well-organized arguments that persuade audiences of their significance.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL/AMER IND 246 – LITERATURE BY AMERICAN INDIAN WOMEN**

3 credits.

Presents a broad range of literatures from diverse Native traditions and eras, to provide students with a basic knowledge of major issues affecting and best-known texts by American Indian women authors.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL/GEN&WS 248 – WOMEN IN ETHNIC AMERICAN LITERATURE**

3 credits.

American literature by and about women, written by authors from ethnic groups.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL/ASIAN AM 270 – A SURVEY OF ASIAN AMERICAN LITERATURE**

3 credits.

Survey of Asian American literature from 1880 to present.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2022**ENGL 279 – TOPICS IN ENGLISH, STUDY ABROAD - LITERATURE**

1-6 credits.

Provides an equivalency for intermediate-level English literature courses taken on a UW-Madison study abroad program.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2001

**ENGL 304 – HISTORY AND THEORY OF RHETORIC AND WRITING STUDIES**

3 credits.

Surveys the study of writing and rhetoric, and covers major theories, practices, and research areas in the field of Rhetoric and Composition, with attention to their importance both inside and outside the University.

**Requisites:** Satisfied Communications A requirement and sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the purpose (and limitations) of the teaching and learning of writing in the US

Audience: Undergraduate

2. Effectively employ at least one conventional research method in Composition and Rhetoric

Audience: Undergraduate

3. Evaluate the effectiveness of various writing pedagogies in the history of Composition and Rhetoric according to modern understandings of learning science and educational equity.

Audience: Undergraduate

4. Read and write with rhetorical awareness

Audience: Undergraduate

**ENGL/ENVIR ST 305 – RHETORIC, SCIENCE, AND PUBLIC ENGAGEMENT**

3 credits.

Focuses on theoretical and practical aspects of public engagement with scientific research, policy, and management, with an emphasis on writing, rhetoric, and scientific discourse.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**ENGL 307 – CREATIVE WRITING: FICTION AND POETRY WORKSHOP**

3 credits.

Writing of literary fiction and poetry, reading selected contemporary writers as models.

**Requisites:** Junior standing or ENGL 207. Students may not be concurrently enrolled with ENGL 407, 408, 409, 410, 469, 508, 509, or 695

**Course Designation:** Gen Ed - Communication Part B

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 314 – STRUCTURE OF ENGLISH**

3 credits.

Linguistic methods of analysis and description of English syntax and morphology.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 315 – ENGLISH PHONOLOGY**

3 credits.

Basic principles of phonetics and phonology applied to the description of English and other languages.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify basic acoustic features of human language sounds

Audience: Both Grad & Undergrad

2. Identify basic articulatory descriptions of human language sounds

Audience: Both Grad & Undergrad

3. Observe and describe the distribution of sounds in human languages

Audience: Both Grad & Undergrad

4. Understand different levels of representation in the speech chain

Audience: Both Grad & Undergrad

5. Develop language specific materials to support acoustic phonetic and phonological analysis

Audience: Graduate

**ENGL 316 – ENGLISH LANGUAGE VARIATION IN THE U.S.**

3 credits.

Description and analysis of geographical and social variation in English in the United States.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 318 – SECOND LANGUAGE ACQUISITION**

3 credits.

Systematic study of how people learn ESL and other second languages. An interdisciplinary survey emphasizing research in linguistics, psychology, education, and sociology into the phenomenon of second language acquisition.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL 319 – LANGUAGE, RACE, AND IDENTITY**

3 credits.

Relation of culture and genetics to formal properties of human language; consideration of American English dialects and language disorders. Topics include: biological basis of language disorders; racial affiliation and social identity; maintenance of social boundaries; politics of education, speech therapy.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Biological Science or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ENGL 320 – LINGUISTIC THEORY AND CHILD LANGUAGE**

3 credits.

An introduction to the linguistic study of child language within the generative theory. According to this theory, humans are born with genetically determined linguistic knowledge called Universal Grammar, which guides children in learning language. Learn the basic concepts of the generative theory and learn to apply them to the study of child language. Topics include universal linguistic principles that govern children's acquisition of syntax and semantics and cross-linguistic influence in children acquiring more than one language from birth or early childhood. Discuss empirical research studies testing the Universal Grammar theory of language acquisition.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Explain main characteristics of first language acquisition (how children learn words, grammar, etc.)

Audience: Undergraduate

2. Apply the current linguistic theory to explain child language

Audience: Undergraduate

3. Be able to explain how language acquisition is underpinned by innate linguistic principles by drawing on concrete research findings

Audience: Undergraduate

4. Critically evaluate and analyze research studies on first language

Audience: Undergraduate

5. Demonstrate knowledge of current experimental methods on language acquisition

Audience: Undergraduate

6. Interpret statistical data analysis of quantitative data

Audience: Undergraduate

**ENGL 328 – THE SIXTEENTH CENTURY**

3 credits.

Literature and culture of Britain in the sixteenth century.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ENGL 334 – EIGHTEENTH CENTURY LITERATURE AND CULTURE**

3 credits.

Eighteenth-century literature and culture, including such writers as Dryden, Defoe, Swift, and Pope.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 335 – STAGE AND PAGE IN THE LONG EIGHTEENTH CENTURY**

3 credits.

What happens to English drama after Shakespeare's death? Public theaters closed, considered too racy for the moral health of the population. When they reopened in 1660, sex took center stage in productions of plays both old and new. Women acted on stages in London for the first time, both in roles originally written for cross-dressing boys and in new ones designed for female actors. Female playwrights entered the scene as well, writing for financial profit alongside their male counterparts. Read a sampling of plays and theatrical entertainments performed during the Restoration and eighteenth century as well as publications surrounding the world of the theater to gain a sense of drama on the page and on the stage.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 336 – EIGHTEENTH-CENTURY NOVEL**

3 credits.

Study of 18th-Century English novel.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ENGL 340 – ROMANTIC LITERATURE AND CULTURE**

3 credits.

Literature of the Romantic age in relation to philosophical, cultural, historical, artistic or scientific backgrounds and contexts.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2015

**ENGL 345 – NINETEENTH-CENTURY NOVEL**

3 credits.

Nineteenth-century novel. The century begins with Jane Austen, includes some of the great realist novelists, such as George Eliot and Charles Dickens, and ends with experiments in novel-writing by Oscar Wilde and Joseph Conrad.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL/GEN&WS 350 – SPECIAL TOPICS IN GENDER & LITERATURE**

3 credits.

Investigation of some specific topic in gender and women's studies related to gender and literature. Topic differs each semester.

**Requisites:** GEN&WS 101, 102, 103, or SOC/GEN&WS 200

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ENGL 351 – MODERNIST NOVEL**

3 credits.

Modernist novelists such as Virginia Woolf, James Joyce, and E. M. Forster.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 352 – MODERNIST POETRY**

3 credits.

Exploration of British, Irish, and Anglophone poets working in the early twentieth century, such as W. B. Yeats, T. S. Eliot, Gertrude Stein, and Ezra Pound.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ENGL 353 – BRITISH LITERATURE SINCE 1900**

3 credits.

Survey of twentieth-century British literature including fiction, poetry, and drama.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**ENGL/GEN&WS 359 – VISIONARY AND SPECULATIVE FICTION: SOCIAL JUSTICE APPROACHES**

3 credits.

Explores the genre of visionary fiction – speculative fiction written for social justice purposes – as a means to create, build and maintain new worlds. Examines the political potential of literature and multiple examples of visionary fiction.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Understand the social and political potential of literature to impart knowledge about gender, sexuality, race, and other intersectional social issues

Audience: Undergraduate

2. Develop interdisciplinary techniques to blend research with creative expression

Audience: Undergraduate

3. Develop critical thinking and creative writing skills

Audience: Undergraduate

**ENGL/HISTORY/RELIG ST 360 – EARLY MEDIEVAL ENGLAND**

3 credits.

Introduction to the peoples and cultures of Early Medieval England (c450–c1100), with primary emphasis on texts written in Old English and Latin. Interdisciplinary approach including history, literature, religion, and material culture. Attention to literary genres ranging from elegy to riddles; the development of Christianity; encounters with Romans, Vikings, and Normans; and other political and social concerns. All readings in translation.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recognize and discuss major forms, techniques, social conditions, values, and genres that have shaped the history of English literature, language, and culture.

Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods related to Early Medieval England.

Audience: Undergraduate

3. Write original, coherent, and compelling arguments about assigned texts and/or objects that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness.

Audience: Undergraduate

**ENGL 361 – MODERN AND CONTEMPORARY AMERICAN LITERATURE**

3 credits.

Survey of modern and contemporary American literature including fiction, poetry, drama, and criticism.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ENGL/CHICLA 368 – CHICANA/O AND LATINA/O LITERATURES**

3 credits.

Historical, political, and aesthetic roots and directions of Latin@ and Chican@ short stories, novels, poetry, music, plays, films, and essays.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. History of literature and language: Recognize and demonstrate knowledge of major forms, techniques, social conditions, values, genres, as well as cultural, aesthetic, philosophical and ideological factors that are relevant to the history of Chicanx and Latinx literatures.

Audience: Undergraduate

2. Awareness of history's impact on the present: Appraise and contrast literary approaches to depicting a variety of social, cultural, and historical events and experiences.

Audience: Undergraduate

3. Critical thinking / Ability to recognize and question assumptions: Assess textual evidence leading to interpretation and discern multiple (and even contradictory) interpretations while querying textual meaning and significance.

Audience: Undergraduate

4. Creativity: Generate original ideas and texts, experimenting and taking risks, solving problems, and answering questions in a range of genres and media.

Audience: Undergraduate

5. Critical writing and communication: Write and present original, coherent, and compelling arguments that push beyond summary to analysis; are grounded in textual evidence; and offer independent and original thinking clear prose that meets expectations for grammatical correctness.

Audience: Undergraduate

6. Citizenship/ A consciousness of self and other: Develop empathy by learning about the experiences of others and develop self-awareness of one's own positionality and views, and employ this consciousness in participating with others in the classroom while also creating productive patterns of study and work for yourself based on this growing self-awareness.

Audience: Undergraduate

**ENGL/JEWISH 370 – JEWISH HUMOR**

3-4 credits.

What is humor? Why and when do people tell jokes? And what do we make of the fact that a certain form of humor has come to be labeled "Jewish"? Examine the notion of "Jewish humor" by reading a variety of texts (jokes, short stories, films, websites, conceptual art, and cultural kitsch). Begin by considering theoretical explorations of humor and "Jewish humor." Then trace techniques of Jewish humor from eastern Europe to central Europe to North America, paying specific attention to Jewish American humor. Themes to be examined include: in-group vs. out-group humor; humor and ethnicity; performance and "Jewface"; Jewish-Christian difference; humor and the Holocaust; gender and ethnicity; the notion of self-hatred; American popular culture; and the relationship between humor, repetition, and innovation. The general goal is to answer the question: Is there such a thing as "Jewish humor"? (Hint: The answer may be "no.")

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods

Audience: Undergraduate

2. Demonstrate close-reading skills with which to analyze humor and American ethnicity, question assumptions about the popular representation of Jewish identity, and explore how humor manages and mobilizes questions of race, ethnicity, and religion

Audience: Undergraduate

3. Engage in reflective writing practices, respond critically to feedback, and assess one's own communicative strengths

Audience: Undergraduate

4. Engage in deep discussion with peers in a respectful and empathetic manner, ask each other constructive questions, develop a shared vocabulary with which to speak about Jewish humor, and, in doing so, explore preconceived notions about identities "inside" and "outside" students' social circles

Audience: Undergraduate

**ENGL 373 – CONTEMPORARY POETRY**

3 credits.

Study of significant recent poetry written in English.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ENGL 374 – AFRICAN AND AFRICAN DIASPORA LITERATURE AND CULTURE

3 credits.

Explore classic literary and cultural texts from three regions: Africa, the Caribbean, and African America. Consider the origins and evolution of the African diaspora, and the many forms of its expression. Consider how the African diaspora has shaped US society today, exploring significant themes such as slavery and colonialism, race and cultural identity; intra-racial/cultural and cross-continental alliances and antagonisms; gender and genre; and the paradoxical fate so far-cultural visibility but peripheral political and economic power- of global Afro-cultures. Think about how African-American writers have been influenced by the experience of the African diaspora, and also about the ways that cultural expression from around the world has shaped US culture.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### ENGL 375 – LITERATURES OF MIGRATION AND DIASPORA

3 credits.

Literature by or about people who leave homes and homelands by choice or compulsion.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### ENGL 376 – LITERATURE AND ANIMAL STUDIES

3 credits.

How does literature help us understand animals and our relation to them?

We address this question by exploring two types of representation: representation as depiction (the attempt to describe animals in literature) and representation as a legal or political act (the attempt to speak or act on behalf of animals). Organized around familiar animal categories - dogs, cats, horses, apes, birds, insects - we examine the representation of animals in modern literature as a way to give an account of the cultural history of human-animal relations and, in doing so, to make us reflect upon the social, political, and environmental consequences of this history at a time when animal species are disappearing at an alarming rate.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods (Critical Thinking).

Audience: Undergraduate

2. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness (Critical Writing).

Audience: Undergraduate

### ENGL 379 – POSTCOLONIAL AND WORLD LITERATURE

3 credits.

English language literatures of former colonies, primarily in Africa and South Asia. While scrutinizing the concept of the "postcolonial" and evaluating its many meanings, class will read some of the significant writers of the postcolonial world and attend to the literary traditions that produced them.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### ENGL 400 – ADVANCED COMPOSITION

3 credits.

Focuses on developing complex understandings of rhetorical, ethical, and literary strategies for writing. Practice in writing a range of nonfiction genres with attention to varieties of style, context, critical standards, and conventions. Designed for students with a strong interest in writing. May include multi-modal assignments.

**Requisites:** Satisfied Communications A requirement and junior standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL/GEN&WS 401 – RACE, SEX, AND TEXTS (HOW TO DO THINGS WITH WRITING)**

3 credits.

Uses writing in many forms and genres to help students explore how race, gender, and sexuality intersect with language and inform textual experiences. From marriage licenses, passports, and don't ask, don't tell policies to literacy requirements and gag rules, written texts have played major roles in enforcing expectations about race and sex in the United States. At the same time, anti-slavery petitions, letters to the editor, wheat-pasted posters, and hashtag activism all also harness the power of writing to challenge and revise those expectations. In light of that active textual production and negotiation, this class traces public debates and daily experiences where people write or talk about race and sex in order to make a difference. Ultimately, the class takes on the power of words to break bones and heal wounds. Through reading and writing informed by scholarship in writing studies and rhetoric, students in this class will examine historical and contemporary interconnections among race, sexuality, gender, and texts in the United States, developing analytical tools for understanding how language works on and in their world.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL 403 – SEMINAR ON TUTORING WRITING ACROSS THE CURRICULUM**

3 credits.

Explores current theory and research on the writing process and analyzes disciplinary genres and conventions. Teaches strategies for helping writers revise their work. As Undergraduate Writing Fellows, students will help their peers improve their writing in courses across the curriculum. For students accepted into the Writing Fellows Program. For students accepted into the Writing Fellows program

**Requisites:** Consent of instructor**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Accelerated Honors (!)

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ENGL 407 – CREATIVE WRITING: NONFICTION WORKSHOP**

3 credits.

Explores a variety of non-fictional prose writing forms including (at the instructor's discretion) personal essay, memoir, travel writing, opinion pieces, investigative journalism, public science writing, and natural history writing. Covers theory and technique, reading the work of established writers and some short writing exercises. Focuses on student writing, both in the classroom and in individual conferences.

**Requisites:** ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing. Students may not be concurrently enrolled with ENGL 307, 408, 409, 410, 469, 508, 509, or 695**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ENGL 408 – CREATIVE WRITING: FICTION WORKSHOP**

3 credits.

Writing literary fiction.

**Requisites:** ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing. Students may not be concurrently enrolled with ENGL 307, 407, 409, 410, 411, 469, 508, 509, or 695**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**ENGL 409 – CREATIVE WRITING: POETRY WORKSHOP**

3 credits.

Writing literary poetry.

**Requisites:** ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing. Students may not be concurrently enrolled with ENGL 307, 407, 408, 410, 411, 469, 508, 509, or 695**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ENGL 410 – CREATIVE WRITING: PLAYWRITING WORKSHOP**

3 credits.

Explores the art and craft of writing for the stage. Examines strategies that writers can use to tell stories and communicate ideas both theatrically and dramatically. Covers theory and technique, reading the work of established writers and some short writing exercises. Focuses on student writing, both in the classroom and in individual conferences.

**Requisites:** ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing. Students may not be concurrently enrolled with ENGL 307, 407, 408, 409, 411, 469, 508, 509, or 695**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**ENGL 411 – CREATIVE WRITING: SPECIAL TOPICS WORKSHOP**

3 credits.

Variable topics including: the informal essay, the long poem, the novel, the novella, genre fiction (detective, juvenile, humor, science fiction, etc.), experimental prose and poetry, etc. Students will read models and write their own exercise and full-length pieces.

**Requisites:** ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

Honors – Accelerated Honors (!)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ENGL 412 – BAD GRAMMAR AND METALINGUISTIC AWARENESS**

3 credits.

Explores the relationship between descriptive and prescriptive grammar. Examines the role of prescriptivism in linguistics from a disciplinary view (why are linguists against it when the public is so clearly interested in singling out some constructions as 'bad grammar'). Provides a historical view (the tradition of grammar writing -- who gets to decide what is 'correct') and a variationist view (corpus-based studies on phenomena like preposition stranding, split infinitives, the distinction of who/whom etc.) of grammar writing. Covers the historical and cultural roots of beliefs about what constitutes 'good' and 'bad' grammar. Introduces linguistic tools and methods to check claims about grammar.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. understand the difference between prescriptive and descriptive approaches to grammar

Audience: Both Grad & Undergrad

2. formulate and test hypotheses about English grammar with data-based tools and methods

Audience: Both Grad & Undergrad

3. design and present a research project on grammar variation and change

Audience: Graduate

**ENGL 413 – ENGLISH WORDS: GRAMMAR, CULTURE, MIND**

3 credits.

Words and rules of combination (grammar) are the two basic building blocks of language. Looks at English words from different linguistic perspectives: As objects of grammar, words follow certain rules of combination (you wouldn't say "these dog "), but they also have internal structure. For example, a word like "hopefulness is fine, while "hopenessful" does not exist. From a psycholinguistic perspective examine how children learn these formal properties as well as the meaning of words. Study how words are stored in the mind and what one can learn from situations in which one cannot access the mental dictionary properly (for example, when one feels a word is on "the tip of one's tongue "). From a sociolinguistic perspective, look at historical and current influences on English vocabulary, including the role of dictionaries and spelling as a source of standardization. Does not require previous knowledge of linguistics.

**Requisites:** Sophomore standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 414 – GLOBAL SPREAD OF ENGLISH**

3 credits.

Examination of the linguistic, social, and political impact of the spread of English around the world. Analysis of geographical, social, and stylistic variation in English in diverse world contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 415 – INTRODUCTION TO TESOL METHODS**

3 credits.

Teaching of English to speakers of other languages. Exploration of the contexts in which English is taught, and methods and materials used to teach it.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 416 – ENGLISH IN SOCIETY**

3 credits.

Social and public uses of English; relationships of English structure, lexicon, and discourse to race, gender, class, education, ethnicity, age, and identity; the role of English in public policy.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**ENGL 417 – HISTORY OF THE ENGLISH LANGUAGE**

3 credits.

Linguistic and sociolinguistic change in English from its beginnings to the present.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**ENGL 420 – TOPICS IN ENGLISH LANGUAGE AND LINGUISTICS**

3 credits.

Study of a topic in English language and linguistics.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 422 – OUTSTANDING FIGURE(S) IN LITERATURE BEFORE 1800**

3 credits.

Study of major figure or figures in literature written before 1800.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ENGL/MEDIEVAL 423 – TOPIC IN MEDIEVAL LITERATURE AND CULTURE**

3 credits.

Study of a topic in medieval literature.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ENGL/MEDIEVAL 424 – MEDIEVAL DRAMA**

3 credits.

Dramatic traditions of medieval England, from early church rituals performed inside quiet monasteries in the tenth century to the elaborate and often raucous urban guild cycles and morality plays of the fifteenth, and with special attention to the significance of spirituality, work, and play in medieval culture.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ENGL/MEDIEVAL 425 – MEDIEVAL ROMANCE**

3 credits.

Important early form of narrative fiction, covering tales of adventure, magic, courtly love, and King Arthur from the twelfth through the fifteenth century.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ENGL/MEDIEVAL 426 – CHAUCERS COURTLY POETRY**

3 credits.

Poetry of the most famous and influential medieval English poet, from his short lyrics on love through his dream visions of talking birds and castles built on ice to the historical romance Troilus and Criseyde. Readings will be in the original Middle English; no prior experience with the language is required.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENGL/MEDIEVAL 427 – CHAUCER'S CANTERBURY TALES**

3 credits.

Study of the most famous and influential medieval English poet through his best-known work and its playful and profound responses to some of the most pressing literary, social, political, and spiritual issues of his time. Readings will be in the original Middle English; no prior experience with the language is required.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**ENGL 430 – TOPIC IN EARLY MODERN LITERATURE AND CULTURE**

3 credits.

Study of a topic in Early Modern literature.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2022**ENGL 431 – EARLY WORKS OF SHAKESPEARE**

3 credits.

Study of four Shakespeare plays through 1600, with the reading of several others.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ENGL 432 – LATER WORKS OF SHAKESPEARE**

3 credits.

Study of four Shakespeare plays after 1600 with the reading of several others.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2022**ENGL 433 – SPENSER**

3 credits.

Study of Edmund Spenser's major poems.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**ENGL/RELIG ST 434 – MILTON**

3 credits.

Study of John Milton's poems and selected prose.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL 438 – TOPIC IN EIGHTEENTH-CENTURY LITERATURE AND CULTURE**

3 credits.

Study of a topic in 18th-Century literature.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**ENGL 456 – TOPIC IN NINETEENTH-CENTURY AMERICAN LITERATURE AND CULTURE**

3 credits.

Study of a topic in 19th-Century American literature.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**ENGL 457 – TOPIC IN AMERICAN LITERATURE AND CULTURE SINCE 1900**

3 credits.

Study of a topic in American literature.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ENGL 458 – MAJOR AMERICAN WRITER OR WRITERS**

3 credits.

Study of major American writer(s).

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2023**ENGL 459 – THREE AMERICAN NOVELISTS**

3 credits.

Concentrated study of US novelists.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ENGL/CHICLA 460 – BLACK AND LATINX IN LITERATURE AND VISUAL CULTURE**

3 credits.

Chicanxs and Latinxs are frequently imagined in ways that erase the history, presence, and influence of African-descended peoples within these groups. However, this anti-Blackness does not go unanswered in Chicanx and Latinx cultural production. Covers literature, life-writing/ autoethnography, visual culture, philosophy/theory, and history that takes up Black Latinx experience and/or that comparatively explores the African American and Latinx convergences, exploring a rich vein of thought and representation in U.S. literatures that is often more transamerican than American and that offers new definitions of both Latinx and Black. Readings on racial paradigms in the Americas, paying attention to the differences between US and Latin American contexts, as well readings on decoloniality, intersectional feminisms, borderlands, and diaspora.

**Requisites:** Declared in Chicana/o and Latina/o Studies (major or certificate) or English major, and sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Know major forms, techniques, social conditions, values, genres, as well as cultural, aesthetic, philosophical and ideological factors that have shaped the history of Black and Latinx literatures.

Audience: Undergraduate

2. Appraise and contrast literary approaches to depicting a variety of social, cultural, and historical events and experiences.

Audience: Undergraduate

3. Understand multiple interpretations, question textual meanings and significance, discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods.

Audience: Undergraduate

4. Generate original ideas and texts, conduct thought experiments, and answer critical questions about and in a range of genres and media.

Audience: Undergraduate

5. Write original, coherent, and compelling arguments that push beyond summary to analysis that is grounded in textual evidence and offer independent and critical thinking in clear prose that meets expectations for grammatical correctness.

Audience: Undergraduate

6. Develop empathy by learning about the experiences of others and develop self-awareness of one's own positionality and views, and to employ this consciousness in participating with others in the classroom. Create productive patterns of study and work for yourself based on this growing self-awareness.

Audience: Undergraduate

**ENGL 461 – TOPICS IN ETHNIC AND MULTICULTURAL LITERATURE**

3 credits.

Literature in English by authors whose work reflects the experience of ethnic and minority groups.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL/ASIAN AM 462 – TOPIC IN ASIAN AMERICAN LITERATURE**

3 credits.

Topics will vary. All topics will emphasize the following learning outcomes: awareness of history's impact on the present, ability to recognize and question assumptions, development of critical thinking skills, awareness of relations between self and others, and effective participation in a multicultural society.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL/ASIAN AM 465 – ASIAN AMERICAN POETRY**

3 credits.

Throughout the history of Asian America, poetry has been a vehicle for the creation and exploration of an Asian American voice; in poetry we can see the continuing struggle over what form Asian American expression will take. Will it follow Asian or European models? Will it employ traditional forms, or experiment in search of new styles? Will it be individual or collective, introspective or political? We will explore these questions through a study of a wide range of Asian American poets from a variety of historical periods and ethnicities, including Janice Mirikitani, Lawson Fusao Inada, Li-Young Lee, John Yau, Myung Mi Kim, and Linh Dinh.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENGL 469 – INTERDISCIPLINARY STUDIES IN THE ARTS**

1-4 credits.

Guest artists will offer interdisciplinary courses on topics appropriate to their specializations. Students may not be concurrently enrolled with ENGL 307, 407, 409, 408, 410, 411, 508, 509, or 695

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**ENGL 473 – TOPIC IN POSTCOLONIAL OR WORLD LITERATURE**

3 credits.

Study of a theme or question in literature that crosses national boundaries, inviting students to think about forces of imperialism and globalization. Specific focus will vary.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**ENGL 474 – TOPIC IN CONTEMPORARY LITERATURE**

3 credits.

Study of recent literature written in English. Specific topic will vary.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ENGL 475 – COMEDY AS GENRE**

3 credits.

Survey of the genre of comedy from antiquity to the present.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Engage with the history and development of comedy as a form from its beginnings in Greek and Roman antiquity up to the twentieth century through reading, discussion and work on a research paper.

Audience: Undergraduate

2. Improve skills in analyzing and researching literary texts.

Audience: Undergraduate

3. Develop writing and critical thinking skills.

Audience: Undergraduate

**ENGL/THEATRE 477 – DIASPORA AND THEATRE**

3 credits.

Study of the drama and theatre of a variety of immigrant communities in three Western locations: Britain, the United States, and Canada. Focuses on current theories of diaspora and transnationalism, the place of theatre in diasporic writing, and the literary, performative, and material dimensions of the genre.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2018**ENGL/ASIAN 478 – INDIAN WRITERS ABROAD: LITERATURE, DIASPORA AND GLOBALIZATION**

3 credits.

Study of literature, drama, and film produced by authors of South Asian origin in Europe, North America, and the Caribbean. Course considers theories of diaspora, changing patterns of subcontinental migration, and relation of diasporic forms to the cultures of origin and adoption. Not open to students with credit for LCA 478 prior to Fall 2019.

**Requisites:** Junior standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

Honors - Accelerated Honors (!)

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023

### ENGL 509 – CREATIVE WRITING: ADVANCED POETRY WORKSHOP

3 credits.

Intensive poetry workshop. Write original poetry and see it through drafting and revision, to final form; read and give detailed feedback on the work of peers; study published poetry to analyze craft elements for use in original work.

**Requisites:** ENGL 409 or graduate/professional standing. Students may not be concurrently enrolled in ENGL 307, 407, 408, 409, 410, 411, 469, 508, or 695

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Know how to develop the creative and technical skills necessary to conceive, execute, and revise original literary work in poetry.

Audience: Undergraduate

2. Demonstrate sensitivity to language and style on both the artistic and technical levels.

Audience: Undergraduate

3. Develop the critical, analytical, and editing skills necessary to evaluate literary works in progress, both the student's own work in progress and that of the student's peers.

Audience: Undergraduate

4. Develop the ability to read literary works not only for their social, historical, intellectual, formal, and interpretive value, but for their capacity to inspire and generate new work, and to see in a finished work the process of its being made.

Audience: Undergraduate

5. Develop the critical and analytical skills necessary to evaluate literary works in progress, to guide classroom discussion, and to convey concepts of craft to undergraduate students

Audience: Graduate

6. Demonstrate sensitivity to language and style on both the artistic and technical levels.

Audience: Graduate

### ENGL 514 – ENGLISH SYNTAX

3 credits.

Syntactic theory as applied to the analysis of English sentences.

**Requisites:** ENGL 314 or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### ENGL 515 – TECHNIQUES AND MATERIALS FOR TESOL

3 credits.

Supervised practice in the use of current techniques and materials in the teaching of English to speakers of other languages, including peer and community teaching with videotaped sessions.

**Requisites:** ENGL 415

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ENGL 516 – ENGLISH GRAMMAR IN USE

3 credits.

Functions of English grammar, covering use in a variety of contexts and text types. Involves analysis of spoken and written English across genres and settings.

**Requisites:** ENGL 314 or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ENGL/MEDIEVAL 520 – OLD ENGLISH

3 credits.

The elements of Old English grammar with selected readings.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Honors - Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ENGL/MEDIEVAL 521 – ADVANCED OLD ENGLISH LITERATURE

3 credits.

An intensive study of a major work or works of Old English, usually focusing on either Beowulf or the poems of a single manuscript. Line-by-line translation of the text will be supplemented by discussion of related issues (whether linguistic, thematic, or contextual) as well as by readings from relevant critical literature. Primary texts will be read in Old English.

**Requisites:** MEDIEVAL/ENGL 520

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Honors - Accelerated Honors (!)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**ENGL/HIST SCI/MED HIST 525 – HEALTH AND THE HUMANITIES**  
 3 credits.

Explores how a humanistic perspective can broaden our understanding of health and medicine. Specifically, we will examine the role of language and culture in the creation and circulation of biomedical knowledge; our lived experiences with illness (physical and mental); the intricate intersections of race, gender, sexuality, disability and medicine; the political dimensions of diagnosis, disease, and epidemics, and the role that fiction, creative non-fiction, comics, and film play in shaping our experiences with health and medicine as health care providers and as patients. The course does not assume any background in science or medicine. One of our recurrent topics, in fact, will be to consider how non-experts interact with medicine and its technical vocabularies. Although the primary objective of the course is to understand the cultural, social, and political dimensions of health and medicine, a secondary objective is for students to become more savvy patients and, for the few students who might emerge on the other side of the stethoscope one day, more well rounded health care professionals.

**Requisites:** Declared in the Health and the Humanities certificate

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ENGL/ENVIR ST 533 – TOPIC IN LITERATURE AND THE ENVIRONMENT**  
 3 credits.

Explores the ways that literary texts represent, imagine, and re-imagine the environment.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL/JEWISH 539 – JEWISH LITERATURES IN DIASPORA**  
 3 credits.

An exploration of Jewish literature in English and in Anglophone contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**ENGL 543 – DISCOURSES OF DISABILITY, ANTIQUITY TO 1800**  
 3 credits.

Concepts of physical disability from antiquity to the Renaissance. Literary theory, philosophy, and history will help frame thinking about how disability is produced. Along with considering how canonical texts represent disabled figures, class will investigate the generic, social, and spatial contexts from which these representations arise.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 546 – TOPIC IN TRAVEL WRITING BEFORE 1800**  
 3 credits.

Examination of aspects of travel literature before 1800. It will pay attention to texts written by travelers of many stripes - pilgrims, missionaries, crusaders, counselors, merchants, and dreamers. It will explore how writers narrate relations between the familiar and the strange, the near and far. And it will ask students to consider the relationship of geography to conceptions of personal and collective identity. How do travel writers represent "us" and "them," "self" and "other"? Who claims space, who characterizes it, and on what grounds?

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 548 – TOPIC IN LITERATURE AND POLITICS**  
 3 credits.

Study of a topic in literature and politics.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**ENGL 559 – TOPIC IN LITERARY OR CULTURAL THEORY**  
 3 credits.

An exploration of the methods and principles of criticism; generally an experiment in the application of a particular critical method or a group of related critical presuppositions to an appropriate body of English and American literature. Content varies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ENGL/THEATRE 575 – BRITISH DRAMA, 1914 TO PRESENT**

3 credits.

Plays and playwrights from the first World War to the present, including movements leading to the "revolt" of 1956 and subsequent proletarian and absurdist drama. Plays by Shaw, O'Casey, Maugham, Coward, Eliot, Osborne, Beckett, Pinter, Stoppard, Arden, Wesker, Bond, Churchill and others.

**Requisites:** Junior standing**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2021**ENGL/THEATRE 576 – SURVEY: THEORIES OF DRAMA**

3 credits.

Selected major critical and theoretical sources, from Aristotle to the present day; the influences of theories upon playwriting and modes of theatrical production.

**Requisites:** Junior standing**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ENGL/THEATRE 577 – POSTCOLONIAL THEATRE: DRAMA, THEORY AND PERFORMANCE IN THE GLOBAL SOUTH**

3 credits.

Study of drama, dramatic theory and theatrical practices in postcolonial cultures, primarily in Asia, Africa and the Caribbean. Considers status of drama/theatre in postcolonial studies and focuses on issues of form, language, intertextuality, trans-culturation, material organization and reception.

**Requisites:** Junior standing**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ENGL/THEATRE 578 – MODERN AMERICAN DRAMA AND THEATRE**

3 credits.

Representative twentieth-century plays from Glaspell and O'Neill to the present considered within contemporary cultural, theatrical and academic context.

**Requisites:** Junior standing**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2020**ENGL/HIST SCI/MED HIST 599 – DIRECTED STUDY IN HEALTH AND THE HUMANITIES**

1 credit.

Offers students enrolled in the Health and the Humanities certificate an opportunity to conduct independent research under the guidance of a faculty member. It allows students who have enrolled in or completed a Health and the Humanities Capstone an opportunity to go into greater depth on a topic covered in the capstone course. In consultation with a faculty member, students will design a project that builds on lessons learned or work completed as part of their capstone experience.

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2020**Learning Outcomes:** 1. Design scholarly research questions based on their knowledge of the existing literature

Audience: Undergraduate

2. Conduct original primary research by identifying, accessing, and interpreting appropriate sources

Audience: Undergraduate

3. Effectively convey the results of their research through writing or other creative media

Audience: Undergraduate

4. Work independently and manage a large project through to completion

Audience: Undergraduate

**ENGL 613 – TESOL: PEDAGOGICAL GRAMMAR I**

1 credit.

A focus on understanding English grammar from a pedagogical perspective for the purpose of teaching English as a second or foreign language.

**Requisites:** ENGL 415**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**ENGL 614 – TESOL: PEDAGOGICAL GRAMMAR II**

1 credit.

A focus on understanding English grammar from a pedagogical perspective for the purpose of teaching English as a second or foreign language. The emphasis is on theory and techniques applicable to teaching English grammar.

**Requisites:** ENGL 415**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ENGL 615 – TESOL: TEACHING LISTENING AND SPEAKING**

1 credit.

An overview of listening and speaking skills and how to teach them.

**Requisites:** ENGL 415**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ENGL 616 – TESOL: TEACHING OF READING**

1 credit.

An overview of reading and vocabulary skills and how to teach them.

**Requisites:** ENGL 415**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL 617 – TESOL: TEACHING OF WRITING**

1 credit.

Practical modular workshop on key aspects of language teaching, stressing the application of techniques and theory to classroom needs.

**Requisites:** ENGL 415**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL 618 – TESOL: TEACHING PRONUNCIATION**

1 credit.

An overview of the features of English pronunciation and how to teach them.

**Requisites:** ENGL 415**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL 622 – TOPICS IN ENGLISH: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison Study Abroad Program which has no equivalent on this campus. Current enrollment in a UW-Madison study abroad program

**Requisites:** None**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2001**ENGL 651 – SPECIAL TOPICS IN THEATRE AND PERFORMANCE STUDIES RESEARCH**

3 credits.

Specialized subjects relevant to the study of the theory, history and criticism of theatre and performance studies.

**Requisites:** Junior standing**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Advanced understanding of course topic through reading, analysis and discussion of key primary and secondary readings

Audience: Both Grad &amp; Undergrad

2. Improved research and writing skills through completion of presentations, short essays and longer research papers

Audience: Both Grad &amp; Undergrad

3. Improved analytical ability by performing research transcending traditional disciplinary boundaries

Audience: Both Grad &amp; Undergrad

4. Improved presentation and teaching skills through opportunities to lead briefly course discussions, presentations or projects

Audience: Graduate

**ENGL 653 – APPLIED THEATRE**

3 credits.

Theory and practice of using applied theatre in educational settings to engage audiences (usually students) in important social or cultural issues. Includes readings, research, discussion and the devising, production and performance of a play by the students in the course for community audiences.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. be able to understand the historic relationship between TIE and other forms of product and process oriented theatre by, with and for youth;

Audience: Both Grad & Undergrad

2. be able to analyze critically applied scripts and descriptions of programs and discuss how these programs structure young people's experiences;

Audience: Both Grad & Undergrad

3. be able to identify and apply the basic terms, skills, philosophies, and methodologies for devising an applied program, with a focus on Theatre in Education approaches

Audience: Both Grad & Undergrad

4. be able to understand and engage in the process of creative collaboration, the job of an actor-teacher, and the crucial role of research in devising, revising, and evaluating a TIE program;

Audience: Both Grad & Undergrad

5. be able to demonstrate and apply effective devising, facilitating, and acting/teaching techniques.

Audience: Both Grad & Undergrad

6. be able to apply theories and practices studied in this course in their scholarly research and creative activities at a postgraduate level

Audience: Graduate

**ENGL 654 – DRAMATURGY IN THEORY AND PRACTICE**

3 credits.

Study of the historical, theoretical and practical approaches to theatre and performance dramaturgy. Read and discuss scholarship about the field, and produce dramaturgical research education, production and outreach tasks through diverse written assignments and practical exercises.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Gain an understanding of the history of dramaturgy, a dramaturg's role in different institutional and creative contexts, and the theoretical principles that ground the practice

Audience: Both Grad & Undergrad

2. Learn about different tasks dramaturgs encounter, including working within different institutions, glossing texts, working with and selecting adaptations and translations, and developing educational materials

Audience: Both Grad & Undergrad

3. Create a dramaturg's production casebook and complete other assignments that will give you experience trying out the dramaturg's work

Audience: Both Grad & Undergrad

4. Discover the creative potential of dramaturgical thinking in broader areas of theatre and performance practice and scholarship

Audience: Both Grad & Undergrad

5. Develop more experience and expertise in presenting dramaturgical research orally and in written form.

Audience: Graduate

6. Develop a more confident style of writing about process and production as a mode of theatre and performance research

Audience: Graduate

### ENGL 656 – THEATRE OF THE AVANT-GARDE, 1850-1950

3 credits.

The development of realistic and post realistic forms in modern and postmodern drama, from Zola, Ibsen, Strindberg and Chekhov through futurism, expressionism, Dada, surrealism, epic theatre, there of the absurd, and contemporary theatre and performance avant-garde works.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Be able to recognize and analyze significant historical and contemporary avant-garde movements

Audience: Both Grad & Undergrad

2. Be able to analyze literature in the context of other disciplinary approaches, including visual culture, science, theatre design/technology

Audience: Both Grad & Undergrad

3. Develop reading, analytical, presentation and writing skills through in-class participation and written assignments.

Audience: Both Grad & Undergrad

4. Be able to analyze literature in the context of other disciplinary approaches, including visual culture, science, theatre design/technology

Audience: Graduate

5. Develop a stronger academic writing style by writing a significant research paper for the course

Audience: Graduate

### ENGL/AFROAMER 672 – SELECTED TOPICS IN AFRO-AMERICAN LITERATURE

3 credits.

An intensive analysis of specific themes in the Afro-American experience.

Subjects vary with instructor.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ENGL 680 – HONORS PROJECT

3 credits.

For further information, consult the department's Honors Coordinator or Undergraduate Advisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ENGL 681 – SENIOR HONORS THESIS IN THE MAJOR

3 credits.

Mentored individual study for students completing honors theses.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### ENGL 682 – SENIOR HONORS THESIS IN THE MAJOR

3 credits.

Mentored individual study for students completing honors theses.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ENGL 691 – SENIOR THESIS

3 credits.

Mentored individual study for students completing theses.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### ENGL 692 – SENIOR THESIS

3 credits.

Mentored individual study for students completing theses.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ENGL 695 – DIRECTED CREATIVE WRITING**

3 credits.

Individually directed writing of a poetry or fiction manuscript.

**Requisites:** Complete 9 credits from ENGL 307, 407, 408, 409, 410, 411, 508, or 509

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction)  
Audience: Undergraduate

2. Demonstrate sensitivity to language and style on both the artistic and technical levels

Audience: Undergraduate

3. Develop the critical, analytical, and editing skills necessary to evaluate literary works in progress, both the student's own work in progress and that of the student's peers.

Audience: Undergraduate

4. Develop the ability to read literary works not only for their social, historical, intellectual, formal, and interpretive value, but for their capacity to inspire and generate new work, and to see in a finished work the process of its being made.

Audience: Undergraduate

**ENGL 699 – DIRECTED STUDY**

1-3 credits.

Intended for students with Junior or Senior standing who have undertaken previous or concurrent work at intermediate level in same subject. Junior or Senior standing; previous or concurrent work at intermediate level in same subject. Students should consult with the English department's academic advisor before enrolling.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ENGL 700 – INTRODUCTION TO COMPOSITION STUDIES**

3 credits.

Rhetorical, linguistic, psychological, and social foundations of writing; implications for instruction.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 701 – WRITING AND LEARNING**

3 credits.

Historical, critical and philosophical perspectives on the relationship between writing and learning. In addition to reviewing current research, students will have the opportunity to carry out their own investigation designed to study possible relationships between writing and learning.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENGL 702 – PERSPECTIVES ON LITERACY**

3 credits.

Social, historical, and educational perspectives on literacy and literacy learning.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 703 – RESEARCH METHODS IN COMPOSITION STUDIES**

3 credits.

Introduction to quantitative and qualitative research methods in composition studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ENGL 705 – INTELLECTUAL SOURCES OF CONTEMPORARY COMPOSITION THEORY II-MODERN**

3 credits.

Historical, critical, and philosophical perspectives on the development of composition studies during the modern era, with special emphasis on the 20th Century.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 706 – SPECIAL TOPICS IN COMPOSITION THEORY**

3 credits.

In-depth treatment of specific problems, questions, themes, authors, texts, or historical periods in composition and rhetoric. Subject will differ each year.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ENGL 709 – ADVANCED ENGLISH PHONOLOGY**

3 credits.

Problems of English segmental and suprasegmental phonology, including morphophonemic alterations and stress assignment.

**Requisites:** ENGL 315

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 711 – RESEARCH METHODS IN APPLIED LINGUISTICS**

3 credits.

An introduction to various research paradigms in applied linguistics and second language acquisition. A preparation for critically evaluating published research in applied linguistics and second language acquisition.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 713 – TOPICS IN CONTEMPORARY ENGLISH LINGUISTICS**

3 credits.

Study of a topic in contemporary English linguistics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ENGL 715 – ADVANCED SECOND LANGUAGE ACQUISITION**

3 credits.

An examination of linguistic, psychological, and sociological theories of second language acquisition and their application to research in syntax, phonology, lexicon, or pragmatics of a second language.

**Requisites:** ENGL 318

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENGL 719 – SUMMER WRITING WORKSHOP**

1-3 credits.

A workshop intended for high school teachers or other post-baccalaureate students. Intended for University Special Students, the class generally does not satisfy requirements for any graduate or undergraduate major in English.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ENGL 720 – SEMINAR IN EARLY MODERN STUDIES**

2 credits.

Provides an overview of recent scholarly debates in the study of early modernity. Considers two key challenges involved in the study of early modernity: first, what (and when) constitutes early modernity; second, the study of early modernity is necessarily cross-disciplinary. Beginning with the question of what constitutes the "early modern," approach the topic of early modernity from a variety of disciplinary and thematic lenses. The themes include periodization, early modern legal and state formation, women in early modernity, race and early modernity, religion in early modernity, and global early modernities.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Communicate effectively, in both speech and writing, concepts, theories, and arguments related to the study of early modernity.

Audience: Graduate

2. Develop a familiarity with methods and approaches to the study of early modernity from a variety of disciplines.

Audience: Graduate

3. Develop the capacity to critique and analyze, in both speech and writing, studies of early modernity from a variety of disciplines.

Audience: Graduate

**ENGL 722 – COMPOSITION AND CRITICAL THEORIES**

3 credits.

Study of the relationship between composition and critical theories.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**ENGL/THEATRE 731 – ADVANCED THEATRE HISTORY 500 BC TO 1700**

3 credits.

Problems of scholarship in the dramatic, performance and staging practices of major traditions of world theatre history between 500 BCE and 1700 including the theatres of ancient Greece and Rome; medieval, Renaissance and early modern Europe; and the Muromachi and Tokugawa eras in Japan.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**ENGL/THEATRE 732 – ADVANCED THEATRE HISTORY 1700 TO PRESENT**

3 credits.

Problems of scholarship in the dramatic, performance and staging practices of major traditions of world theatre history since 1700, including melodrama, naturalism, the avant-garde, and other movements that helped shaped contemporary theatre.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL/GEN&WS 737 – FEMINIST THEORY AND CRITICISM**

3 credits.

Feminist theory, with an emphasis on literary and cultural theory and criticism in English.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 780 – CREATIVE WRITING: GRADUATE WORKSHOP**

3 credits.

Professional training in the writing of fiction, poetry, or creative non-fiction. The topic will vary from semester to semester.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**ENGL 781 – GRADUATE FICTION WORKSHOP**

3 credits.

Students write short stories and novel chapters, critique the work of fellow students and read contemporary fiction.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 782 – GRADUATE POETRY WORKSHOP**

3 credits.

Students write poems, critique the work of fellow students and read contemporary poetry.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ENGL 783 – CREATIVE WRITING PEDAGOGY SEMINAR**

3 credits.

Creative writing pedagogy for MFA in creative writing students.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 785 – MFA THESIS**

3-6 credits.

Thesis hours for MFA creative writing students. Students work to complete a book of short stories, poems or a novel.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 790 – PROSEMINAR IN THE TEACHING OF WRITING**

1 credit.

Introduction to the teaching of writing; guides first-time and prospective teachers in teaching and evaluating a first-year writing class.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENGL 795 – ONE-CREDIT SEMINAR**

1 credit.

Study of a topic in English language and literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ENGL 799 – INDEPENDENT READING**

1-6 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ENGL 800 – CRITICAL METHODS IN LITERARY STUDIES**

3 credits.

A gateway course that introduces students to theories and methods that are important to literary studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### ENGL/MEDIEVAL 803 – TOPICS IN MEDIEVAL LITERATURE

3 credits.

Study of a topic in Medieval literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

### ENGL 804 – TOPICS IN EARLY MODERN LITERATURE

3 credits.

Study of a topic in Early modern literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### ENGL 805 – TOPICS IN EIGHTEENTH-CENTURY LITERATURE

3 credits.

Selected works, with an emphasis on literary and cultural background.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ENGL 806 – TOPICS IN ROMANTICISM

3 credits.

Study of a topic in Romanticism.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

### ENGL 807 – TOPICS IN VICTORIAN LITERATURE AND CULTURE

3 credits.

Study of a topic in Victorian literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

### ENGL 808 – TOPICS IN MODERNISM

3 credits.

Study of a topic in Modernism.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ENGL 810 – TOPICS IN EARLY AMERICAN LITERATURE

3 credits.

Study of a topic in Early American literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

### ENGL 811 – TOPICS IN NINETEENTH-CENTURY AMERICAN LITERATURE AND CULTURE

3 credits.

Study of a topic in 19th-Century American literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### ENGL 812 – TOPICS IN AMERICAN LITERATURE SINCE 1900

3 credits.

Study of a topic in American literature since 1900.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

### ENGL 813 – WORLD AND/OR POSTCOLONIAL LITERATURE IN ENGLISH

3 credits.

Literatures in English with origins outside Britain and the United States; theories and/or histories in postcolonial, Anglophone, and/or world literatures in English. Topics will vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### ENGL 814 – TOPICS IN CONTEMPORARY LITERATURE

3 credits.

Study of a topic in contemporary literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### ENGL 816 – TOPICS IN ETHNIC AND MULTICULTURAL LITERATURE

3 credits.

Study of a topic in ethnic and multicultural literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENGL 817 – SEMINAR-AMERICAN LITERATURE**

3 credits.

Study of a theme in American literature.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2021**ENGL 820 – TOPICS IN POETRY**

3 credits.

Study of a topic in poetry.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2019**ENGL 822 – TOPICS IN LITERARY AND CULTURAL THEORY**

3 credits.

Study of a topic in literary theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**ENGL 825 – TOPICS IN LITERATURE AND THE ENVIRONMENT**

3 credits.

Study of a topic in literature and the environment.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ENGL 829 – TOPICS IN MIGRATION AND DIASPORA**

3 credits.

Study of a topic in migration diaspora as they relate to literature.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**ENGL 850 – PROSEMINAR IN THEATRE RESEARCH**

2 credits.

Provides a foundation for postgraduate theatre and performance research by examining the methods used in the study of theatre and performance. Consider how criticism, theory, historiography and other methods have been employed in analysis of performance. Discuss professional issues around working in theatre and performance studies as a teacher, scholar, dramaturge or applied theatre practitioner.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Recognize current theatre research methodologies and theories by reading and discussing a range of relevant texts

Audience: Graduate

2. Employ advanced research and archival skills by learning about available books, journals and archives available on campus, online and in other locations

Audience: Graduate

3. Practice advanced critical writing and presentation skills by writing weekly responses to course readings, make a class presentation, and a write a performance review

Audience: Graduate

**ENGL 851 – ADVANCED STUDIES IN THEATRE AND PERFORMANCE STUDIES RESEARCH**

3 credits.

Specialized subjects relevant to the graduate-level study of the theory, history, criticism and literature of theatre and performance studies.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2021**Learning Outcomes:** 1. Advanced understanding of course topic through reading, analysis and discussion of key primary and secondary readings

Audience: Graduate

2. Improved research and writing skills through completion of presentations, short essays and longer research papers

Audience: Graduate

3. Improved analytical ability by performing research transcending traditional disciplinary boundaries

Audience: Graduate

4. Improved presentation and teaching skills through opportunities to present or lead class discussion briefly as part of the course

Audience: Graduate

**ENGL 859 – SEMINAR-INTERDISCIPLINARY THEATRE STUDIES**

2-3 credits.

Topics related to advanced research in theatre and performance studies.  
Topics vary by semester.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENGL 879 – ADVANCED SEMINAR IN LITERARY STUDIES**

3 credits.

Study of a topic or theme in literature.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**ENGL 890 – PRE-DISSERTATOR PRELIMINARY EXAM RESEARCH**

1-12 credits.

Mentored reading and research for pre-dissertator students.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Develop and/or refine Preliminary Examination lists according to established fields

Audience: Graduate

2. Read, study and assess primary, secondary and critical sources on these lists

Audience: Graduate

3. When appropriate, develop and draft required materials: i.e. exam lists, list rationales and/or final research statements

Audience: Graduate

**ENGL 905 – SEMINAR-TOPICS IN APPLIED ENGLISH LINGUISTICS**

3 credits.

Study of a topic in applied English linguistics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ENGL 906 – SEMINAR-THE ENGLISH LANGUAGE**

3 credits.

Study of a theme in the English language.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**ENGL 990 – DISSERTATION RESEARCH IN ENGLISH**

1-12 credits.

In connection with the doctoral thesis. Consult graduate advisor.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

## ENGLISH AS A SECOND LANGUAGE (ESL)

**ESL 110 – INTENSIVE ENGLISH AS A SECOND LANGUAGE**

4-6 credits.

Listening, speaking, reading, and writing skills for nonnative speakers of English; academically oriented. Not open to auditors

**Requisites:** Consent of instructor**Repeatable for Credit:** No**Last Taught:** Spring 2020**ESL 113 – ESSENTIALS OF ACADEMIC READING AND WRITING**

3 credits.

Improvement of listening, speaking, reading, writing and grammar skills that are essential in an academic setting. Introduction to the expectations for an undergraduate at a U.S. university.

**Requisites:** Enrolled in the International Student Summer Institute**Repeatable for Credit:** No**Last Taught:** Summer 2022

**ESL 114 – INTERMEDIATE ENGLISH LANGUAGE SKILLS**

3 credits.

Semi-intensive course in intermediate English language skills. A multi-skills focus on reading, writing, and communication skills essential in an academic setting. Not open to auditors

**Requisites:** Placement into ESL 114

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Heighten their awareness of correct usage of English grammar in writing and speaking

Audience: Undergraduate

2. Improve their speaking ability in English both in terms of fluency and comprehensibility

Audience: Undergraduate

3. Improve oral presentation skills.

Audience: Undergraduate

4. Increase their reading speed and comprehension of academic articles

Audience: Undergraduate

5. Develop efficient note-taking skills

Audience: Undergraduate

6. Improve their reading fluency skills through extensive reading

Audience: Undergraduate

7. Enlarge their vocabulary by keeping a vocabulary journal

Audience: Undergraduate

8. Strengthen their ability to write academic papers, essays and summaries using the process approach.

Audience: Undergraduate

**ESL 115 – GRAMMAR FOR ACADEMIC USE**

3 credits.

A review of English grammar through intensive written and oral practice to promote accurate and appropriate language use for students who have already studied grammar extensively and need to refine the ability to produce acceptable academic English. Not open to auditors

**Requisites:** ESL 114 or placement into ESL 115

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Improve their accuracy and fluency in producing and understanding spoken and written English.

Audience: Undergraduate

2. Review the grammatical forms of English and the use of these forms in specific communicative contexts, which include: class activities, homework assignments, reading of texts and writing

Audience: Undergraduate

3. Attain and enhance competence in the four modes of literacy: writing, speaking, reading and listening

Audience: Undergraduate

4. Develop their ability as critical readers and writers

Audience: Undergraduate

5. Produce a short research paper using the drafting process

Audience: Undergraduate

### ESL 116 – ACADEMIC READING AND VOCABULARY SKILLS

3 credits.

Reading strategies for academic work; reading with increased comprehension and speed, vocabulary expansion, and summary writing. Not open to auditors.

**Requisites:** ESL 115 or placement into ESL 116

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Become a more competent, efficient, and perceptive academic reader who is able to communicate to others through writing and speaking the contents and main ideas of what is read.

Audience: Undergraduate

2. Develop reading skills and reading speed

Audience: Undergraduate

3. Read university texts and expand their vocabulary

Audience: Undergraduate

4. Read for intensive information retrieval and interpretation required by university studies

Audience: Undergraduate

5. Develop abilities as critical thinkers, readers and writers

Audience: Undergraduate

6. Attain and enhance competence in the four modes of literacy: writing, speaking, reading & listening

Audience: Undergraduate

7. Write three summaries in which they will communicate appropriately, accurately and effectively what has been read

Audience: Undergraduate

### ESL 117 – ACADEMIC WRITING I

3 credits.

Basic elements of academic writing, emphasizing improved fluency and accuracy, paragraph structure, summarizing and paraphrasing, short essays, and a final research project. Not open to auditors.

**Requisites:** ESL 116 or placement into ESL 117

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop skills that enable them to communicate effectively in writing. They will learn to present ideas clearly and logically to achieve a specific purpose and to be appropriate for an intended audience.

Audience: Undergraduate

2. Paraphrase information from outside sources effectively and accurately

Audience: Undergraduate

3. Summarize information from academic sources, distinguishing between main ideas and details

Audience: Undergraduate

4. Use online library databases to locate appropriate academic sources

Audience: Undergraduate

5. Write two academic essays in which they demonstrate their understanding of writing as a series of tasks, including finding, evaluating, analyzing and synthesizing sources and as a process that involves planning, drafting, revising and editing

Audience: Undergraduate

6. Learn the conventions of APA documentation and how to avoid plagiarism

Audience: Undergraduate

**ESL 118 – ACADEMIC WRITING II**

3 credits.

Academic writing, critical reading and argumentation, documentation, and style and organization of research papers; oral communication skills for effective class participation and presentations. Not open to auditors.

**Requisites:** ESL 117 or placement into ESL 118

**Course Designation:** Gen Ed - Communication Part A

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Practice writing through assignments that ask you to plan, draft, revise and edit your essays over time.

Audience: Undergraduate

2. Produce three substantial essays that you can be proud of: clear, organized, sophisticated, well-researched, and polished.

Audience: Undergraduate

3. Develop your abilities as a critical reader and writer.

Audience: Undergraduate

4. Understand the demands of academic research at UW-Madison, which means learning about our libraries and the print and electronic sources there and learning to develop good questions, find relevant sources, evaluate those sources and integrate them thoughtfully, responsibly, and ethically in your own writing.

Audience: Undergraduate

5. Develop your public speaking abilities by giving you opportunities to speak in class, both informally and formally.

Audience: Undergraduate

6. Increase your self-awareness about the English language and the culturally-bound conventions of American academic writing.

Audience: Undergraduate

**ESL 200 – ACADEMIC AND PROFESSIONAL SPEAKING SKILLS FOR ENGLISH LANGUAGE LEARNERS**

2 credits.

Practice in informal and formal English communication skills essential in academic and professional settings, including formal presentations, discussions, and interviews.

**Requisites:** ESL 118

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate effective verbal (volume, pace, pronunciation) and nonverbal (gestures, eye contact, posture) communication skills.

Audience: Undergraduate

2. Prepare and deliver organized, engaging presentations.

Audience: Undergraduate

3. Effectively utilize verbal and cultural strategies for participating in both formal and informal discussions.

Audience: Undergraduate

4. Improve pronunciation, intonation and general fluency through continued self-monitoring and practice.

Audience: Undergraduate

5. Develop confidence, as well as skills and techniques useful for participating in interviews.

Audience: Undergraduate

**ESL 328 – ACADEMIC SKILLS WORKSHOPS**

1-3 credits.

Academic skills for ESL students; workshops on skills required for effective academic communication; topics vary, but include general and discipline-specific academic skills. Intended for graduate students. Not open to auditors

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ESL 343 – ORAL COMMUNICATION SKILLS**

3 credits.

Practice in formal and informal communication skills, including listening comprehension, pronunciation, and conversational and presentation skills useful in an academic setting. Not open to auditors

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ESL 344 – ACADEMIC PRESENTATIONS AND DISCUSSION**

2-3 credits.

Oral communication and presentation skills essential for participation in seminars, conferences, and other academic and professional settings. Not open to auditors

**Requisites:** None**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ESL 345 – AMERICAN ENGLISH PRONUNCIATION**

1 credit.

Techniques for improvement of the pronunciation of American English for non-native speakers of English. Not open to auditors

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**ESL 349 – ACADEMIC WRITING FOR GRADUATE STUDENTS**

2-3 credits.

Aspects of research writing, including data presentation, literature review, summarizing, critical summarizing, and discussion. Grammar and editing skills are also emphasized. Not open to auditors

**Requisites:** Graduate/professional standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ESL 350 – PROFESSIONAL AND ACADEMIC WRITING SKILLS**

2-3 credits.

Workshop approached to writing students' fields, including dissertations, articles and research reports. Also covers general writing skills, documentation and genre-specific styles. Not open to auditors

**Requisites:** Graduate/professional standing**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ESL 352 – ENGLISH FOR LAWYERS**

3 credits.

Opportunities to express ideas through oral presentations and formal written work. Focus on specific topics in law. Not open to auditors

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2020**ESL 370 – INTERNATIONAL TA TRAINING**

0-2 credits.

Focuses on the communication skills, classroom culture, and teaching strategies essential for effective classroom teaching at an American university. Not open to auditors

**Requisites:** Graduate/professional standing**Repeatable for Credit:** No**Last Taught:** Summer 2025**ENTOMOLOGY (ENTOM)****ENTOM/AGROECOL/C&E SOC/ENVIR ST 103 – AGROECOLOGY: AN INTRODUCTION TO THE ECOLOGY OF FOOD AND AGRICULTURE**

3 credits.

Agroecology has blossomed across the world in recent decades as not only a science, but also a practice, and a movement. Employ the multiple disciplines and perspectives that Agroecology affords to analyze our agricultural and food systems within a broader context of dynamic social and ecological relationships.

**Requisites:** None**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain and analyze basic biophysical processes of agricultural ecosystems and the challenges and benefits of various management systems

Audience: Undergraduate

2. Interrogate social, economic, and political structures underlying agriculture at local, regional, national, and global scales

Audience: Undergraduate

3. Describe how they personally connect to local to global agricultural landscape as humans, ecological actors, food and fuel consumers, and thoughtful citizens

Audience: Undergraduate

**ENTOM/ENVIR ST 201 – INSECTS AND HUMAN CULTURE-A SURVEY COURSE IN ENTOMOLOGY**

3 credits.

Importance of insects in the environment, emphasizing beneficial insects, disease carriers, and agricultural pests that interfere with the food supply. Environmental problems due to insect control agents.

**Requisites:** None**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**ENTOM/NUTR SCI 203 – INTRODUCTION TO GLOBAL HEALTH**

3 credits.

Introduces students to global health concepts through multidisciplinary speakers dedicated to improving health through their unique training. It targets students with an interest in public health and those who wish to learn how their field impacts their global issues.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Define global health and identify major global health trends and metrics

Audience: Undergraduate

2. Recognize the “determinants of health” that contribute to health disparities/inequities

Audience: Undergraduate

3. Examine global health through the lens of agriculture, food, and nutrition

Audience: Undergraduate

4. Describe the role of ecology and the changing environment in global health

Audience: Undergraduate

5. Explain the importance of collaborative and interdisciplinary approaches in global health

Audience: Undergraduate

6. Discuss a variety of global health careers and areas of specialty through guest speakers and connections with their area of interest

Audience: Undergraduate

**ENTOM/ENVIR ST 205 – OUR PLANET, OUR HEALTH**

3 credits.

An introduction to the multiple determinants of health, global disease burden and disparities, foundational global health principles, and the overlap between ecosystem stability, planetary boundaries, and human health. Explore the core fundamentals of global health scholarship, including but not limited to infectious disease, sanitation, and mental health, and also consider ecological perspectives on these issues through the lens of planetary boundaries. Attention is placed on how human-mediated global change (e.g. climate change, biodiversity loss, land-use patterns, geochemical cycling, agricultural practice) impacts human health and the ecosystem services we depend on. An overview of pertinent issues in sustainability science and planetary health discourse, including the 'Anthropocene' and resilience to understand and critically assess global trends.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Use a local to global perspective to assess the historical, current and future trends in human health and well-being

Audience: Undergraduate

2. Describe the use of planetary boundaries to measure Earth system sustainability and the potential impacts of instability in these systems on global health and human well being

Audience: Undergraduate

3. Describe current primary global health challenges, their distribution, and prevention strategies

Audience: Undergraduate

4. Analyze global health disparities through a social justice and human rights lens

Audience: Undergraduate

5. Demonstrate a basic understanding of contemporary issues, problems, and controversies in global health through an interdisciplinary perspective that recognizes the complex relationships between social, economic, political, and environmental systems.

Audience: Undergraduate

6. Analyze ecological perspectives on the connections among human health and well being, animal health, and ecosystem health

Audience: Undergraduate

7. Assess and reflect on the successes and failures of global health interventions and become familiar with current events and current literature that describes these efforts

Audience: Undergraduate

8. Reflect on personal goals, objectives, and role as a global citizen and future professional or researcher

Audience: Undergraduate

**ENTOM 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area of Entomology. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2005

**ENTOM 299 – INDEPENDENT STUDY**

1-3 credits.

Research work for students under direct guidance of a faculty member in an area of Entomology. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENTOM/ZOOLOGY 302 – INTRODUCTION TO ENTOMOLOGY**

4 credits.

Principles including morphology and classification.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 381

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENTOM 321 – PHYSIOLOGY OF INSECTS**

3 credits.

Anatomy, histology and basic physiology of organ systems in insects.

**Requisites:** ZOOLOGY/ENTOM 302 or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**ENTOM 331 – TAXONOMY OF MATURE INSECTS**

4 credits.

Principles of taxonomy, identification and taxonomic morphology of adult insects.

**Requisites:** ZOOLOGY/ENTOM 302 or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENTOM 344 – FROM FLOWERS TO FOOD: POLLINATOR ECOLOGY AND CONSERVATION**

3 credits.

Explores the vital roles that pollinators play in ecosystems and agriculture. Dives into the biology, diversity, and ecology of pollinators, examining plant-pollinator interactions, co-evolution, and pollinator foraging behaviors. Examines pollinator decline and the stressors that affect pollinators, such as climate change, land-use changes, pesticides, and pathogens, as well as conservation strategies. Offers opportunities to directly observe pollinators and apply pollinator ecology.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), BOTANY/BIOLOGY 130, (ZOOLOGY/BIOLOGY/BOTANY 151 and 152), or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the breadth of animal pollinator taxa and the role of pollinators in both natural and agricultural systems

Audience: Both Grad & Undergrad

2. Explain basic concepts of pollination ecology and apply these concepts to real-world phenomena in ecosystems

Audience: Both Grad & Undergrad

3. Evaluate factors affecting pollinator populations and compare their consequences on pollinator decline

Audience: Both Grad & Undergrad

4. Analyze, interpret and critique scientific literature

Audience: Both Grad & Undergrad

5. Create an educational piece to teach pollinator ecology concepts to peers

Audience: Both Grad & Undergrad

6. Communicate scientific concepts related to pollinator ecology and conservation in written and oral formats

Audience: Both Grad & Undergrad

7. Develop a research proposal related to pollinator ecology

Audience: Graduate

**ENTOM/M M & I/PATH-BIO/ZOOLOGY 350 – PARASITOLOGY**

3 credits.

The biology of water-borne, food-borne, soil-borne and vector-borne parasites of animals including humans. Parasites are explored in the context of transmission, associated disease, diagnosis and treatment options, and environmental, cultural and socioeconomic drivers of disease epidemiology.

**Requisites:** ZOOLOGY/BIOLOGY 101 and 102, or ZOOLOGY/BIOLOGY/BOTANY 152 or ZOOLOGY 153, or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Be conversant in terminology used in the field of Parasitology.

Audience: Undergraduate

2. Recall scientific and common names for parasites and hosts, and the name of the resulting disease in humans or animals.

Audience: Undergraduate

3. Attribute parasite behavior and characteristics to specific disease features in the host.

Audience: Undergraduate

4. Identify appropriate means to diagnose infections with parasites.

Audience: Undergraduate

5. Describe and identify factors that determine when, where, and why parasitic diseases exist.

Audience: Undergraduate

6. Integrate terminology, scientific nomenclature, diagnostic features and demographics to solve case studies where the parasitic culprit is unknown.

Audience: Undergraduate

7. Compare and contrast commonalities in parasite life cycles to demonstrate how flexibility in those life cycles has resulted in many different potential means of transmission.

Audience: Undergraduate

8. Deconstruct the impact of parasitic diseases on human and animal health, from disease symptoms and pathology in an individual, to socioeconomics in communities and countries.

Audience: Undergraduate

9. Identify reliable resources (primarily internet-based) available for researching the biology and epidemiology parasitic diseases.

Audience: Undergraduate

**ENTOM 351 – PRINCIPLES OF ECONOMIC ENTOMOLOGY**

3 credits.

Major economic insects: identification, life histories, bionomics, distribution, control; procedures in fundamental and practical inquiry.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, ZOOLOGY 153, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENTOM/ZOOLOGY 371 – MEDICAL ENTOMOLOGY: BIOLOGY OF VECTOR AND VECTOR-BORNE DISEASES**

3-4 credits.

Explore the biological and molecular adaptations of parasitic arthropods that allow them to feed on vertebrate host and facilitate the transmission of vector-borne pathogens. Examines how anthropogenic activities, behaviors, and effects on climate affect the biology of vectors, the pathogens they transmit, and the emergence of vector-borne epidemics in the world. Emphasis on the molecular and physiological interaction between pathogens, their vector, and the vertebrate host and the fundamentals on how vectors and vector-borne pathogens cause disease in humans. Evaluate real control programs deployed globally for the control of vector-borne diseases.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383, ZOOLOGY 153, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify vector-borne pathogens of public health importance and their respective vectors.

Audience: Both Grad & Undergrad

2. Distinguish how biological and physiological adaptations facilitate the relationship between vectors and particular pathogens.

Audience: Both Grad & Undergrad

3. Apply information on disease epidemiology, vector ecology, vector distribution, and disease manifestation to solve hypothetical scenarios of vector-borne disease transmission.

Audience: Both Grad & Undergrad

4. Discuss current issues delaying the development of diagnostics, prevention, treatment, and control of vector-borne diseases.

Audience: Both Grad & Undergrad

5. Evaluate vector control programs currently deployed internationally based on knowledge of vector biology.

Audience: Both Grad & Undergrad

6. Design project proposals to study different aspects of vector physiology, biology, ecology, and pathogen-vector interactions.

Audience: Graduate

**ENTOM 375 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest to undergraduate students.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ENTOM 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Entomology and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2017

**ENTOM 400 – STUDY ABROAD IN ENTOMOLOGY**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Current enrollment in a UW-Madison study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**ENTOM 432 – TAXONOMY AND BIONOMICS OF IMMATURE INSECTS**

4 credits.

Covers anatomy/morphology, taxonomy, and bionomics of immature insects (ordinal and familial levels). Identification of insects (order and family) using taxonomic keys.

**Requisites:** ZOOLOGY/ENTOM 302 or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENTOM 450 – BASIC AND APPLIED INSECT ECOLOGY**

3 credits.

Covers population and community ecology, plant-insect interactions, insect biodiversity and biogeography, and applied ecology. Weaves basic ecological theory and principles with their application to entomological problems such as conservation, biological control, agriculture, and insect-vectored diseases of plants and humans. Uses current entomological and ecological scientific literature and draws on examples from a broad range of natural and managed ecosystems. Broadens from pairwise species interactions (e.g., a predator and its prey) to the entire community of organisms and their physical environment. Emphasizes the theoretical principles and historical background underlying the various topics with a link to potential applications in agriculture, conservation, pest management, and/or invasion biology.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 152, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENTOM 468 – STUDIES IN FIELD ENTOMOLOGY**

3 credits.

Concentration on structural, behavioral adaptations of insects to diverse habitats; dynamic relations between insects and plants, other animals and other insects.

**Requisites:** ZOOLOGY/ENTOM 302

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ENTOM/BOTANY/ZOOLOGY 473 – PLANT-INSECT INTERACTIONS**

3 credits.

Multiple ways in which arthropods exploit plants, plant traits that deter or augment insects, environmental mediation of these interactions, effects on population dynamics, community ecology and co-evolution, and implications to natural resource management, environmental quality, and sustainable development.

**Requisites:** F&W ECOL/BOTANY/ZOOLOGY 460, FW ECOL 500, ENTOM/BOTANY/PL PATH 505, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ENTOM 490 – BIODIVERSITY AND GLOBAL CHANGE**

3 credits.

Explores the impact of global environmental change on biodiversity and the subsequent consequences for ecosystem function and human well-being. Examines species response to these environmental changes, such as migration, adaptation, and extinction, and the implications for the delivery of ecosystem services and planetary health. Applies ecological principles to identify and evaluate practical solutions to pressing environmental challenges.

**Requisites:** (BIOLOGY/ZOOLOGY 101, BOTANY/BIOLOGY/ZOOLOGY 151, BOTANY/BIOLOGY 130, ZOOLOGY 153, BIOCORE 381, GEOSCI/ATM OCN/ENVIR ST 102, ILS/ENVIR ST 126, GEOG/ENVIR ST 120, 127, or 139) and (MATH 112, 114, 171, or placement into MATH 221) or grad/prof standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify key aspects of climate change and other human-driven environmental changes across the globe in the Anthropocene

Audience: Both Grad & Undergrad

2. Evaluate the impacts of these changes on biological systems across scales of organization, including individual organisms, populations, communities, and ecosystems

Audience: Both Grad & Undergrad

3. Explain the importance of feedbacks, interactions, non-linear responses, and irreversible changes in driving ecosystem responses to global change

Audience: Both Grad & Undergrad

4. Compare and contrast the values and services provided by biological diversity

Audience: Both Grad & Undergrad

5. Evaluate the role of biodiversity in mitigating or exacerbating the impacts of global environmental change, and in supporting human health and wellbeing

Audience: Both Grad & Undergrad

6. Critically interpret data and results from primary literature and apply this interpretation to supporting scientific arguments

Audience: Both Grad & Undergrad

7. Synthesize and critically evaluate scientific claims and hypotheses in global change biology using quantitative data analysis

Audience: Graduate

**ENTOM/BOTANY/PL PATH 505 – PLANT-MICROBE INTERACTIONS: MOLECULAR AND ECOLOGICAL ASPECTS**

3 credits.

Molecular and ecological aspects of the interactions between plants and microorganisms. Explores many of the themes, from genetic to integrative, of modern biology, and illustrates how study of plant-microbe interactions contributes to understanding of fundamental plant science.

**Requisites:** MICROBIO 303, GENETICS 466, 468, BIOCHEM 501, 508, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENTOM/ZOOLOGY 540 – THEORETICAL ECOLOGY**

3 credits.

Introduction to theoretical ecology, including hands-on experience in computer modeling.

**Requisites:** STAT/F&W ECOL 571

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENTOM 570 – SYSTEMS THINKING IN GLOBAL HEALTH**

3 credits.

A systems approach to examination of the multiple determinants of health and well-being. Case studies and group projects explore complex issues including, but not limited to, the root causes of infectious and noncommunicable disease, health inequities in the context of global change, and trade-offs in addressing global and planetary health problems, particularly where information is incomplete, projections about future states are uncertain, or social equity concerns must be taken into account as scientific knowledge is applied. Group projects emphasize systems thinking to critically assess global issues. Teamwork and communication skills are required for case study analysis and project management.

**Requisites:** ENVIR ST/ENTOM 205

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze place-based case studies to understand the complex relationships and connections between human health and the preservation and restoration of our environment. Analysis will link to global and planetary health precepts.

Audience: Undergraduate

2. Work within groups to identify and describe complex problems from different and multiple disciplinary perspectives.

Audience: Undergraduate

3. Identify and practice methods for designing interventions and making decisions that are informed by systems thinking, understanding of complexity and uncertainty, and planetary health principles.

Audience: Undergraduate

4. Work in groups to develop reports and presentations that apply a systems thinking lens to questions related to human health and well-being from multiple perspectives.

Audience: Undergraduate

5. Communicate about working strategy/directions, and find and share reliable and appropriate information for the audience indicated (specialists, members of the public, children, etc.)

Audience: Undergraduate

6. Reflect on and specify personal goals, values, and ethics as a global (and local) citizen and future professional or researcher, describe how your thinking has evolved over time in your study of global and planetary health.

Audience: Undergraduate

**ENTOM/GENETICS/ZOOLOGY 624 – MOLECULAR ECOLOGY**

3 credits.

Basic principles of molecular ecology. Lecture topics include population genetics, molecular phylogenetics, rates and patterns of evolution, genome evolution, and molecular ecology.

**Requisites:** GENETICS 466, 467, BIOCORE 383, or graduate student standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe common molecular genetic techniques.

Audience: Both Grad & Undergrad

2. Demonstrate knowledge about the significance of genetic diversity in species biology.

Audience: Both Grad & Undergrad

3. Differentiate how ecological and evolutionary processes shape genetic variation.

Audience: Both Grad & Undergrad

4. Analyze genetic data and communicate the results.

Audience: Both Grad & Undergrad

5. Evaluate whether genetic data are appropriate for answering scientific questions.

Audience: Both Grad & Undergrad

6. Summarize and critique the primary literature in the field of Molecular Ecology.

Audience: Graduate

**ENTOM 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for undergraduate students in an Honors program completing a thesis in the area of Entomology, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ENTOM 682 – SENIOR HONORS THESIS**

2-4 credits.

Second semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Entomology, as arranged with a faculty member. ENTOM 681

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ENTOM 691 – SENIOR THESIS**

2 credits.

Individual study for undergraduate students completing a thesis in the area of Entomology, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENTOM 692 – SENIOR THESIS**

1-3 credits.

Individual study for undergraduate students completing a thesis in the area of Entomology, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem

Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses

Audience: Undergraduate

3. Carry out analysis of data related to the testable hypotheses

Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience

Audience: Undergraduate

5. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work

Audience: Undergraduate

**ENTOM 699 – SPECIAL PROBLEMS**

1-4 credits.

Individual advanced work in an area of Entomology under the direct guidance of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENTOM 701 – ADVANCED TAXONOMY**

3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ENTOM/F&W ECOL 711 – MULTIVARIATE ANALYSIS OF ECOLOGICAL AND COMMUNITY DATA**

2 credits.

Examines common methods of multivariate data analysis in ecology and environmental science. Covers methods for the analysis of complex, multidimensional datasets that are collected in the study of plant, invertebrate, fish, and bird communities. Addresses the concurrent analysis of the environmental factors that may drive community distributions. Provides the basis for predictive modeling of distributions across landscapes. General methods covered include ordination (PCA, DCA, NMDS, CCA), clustering (or classification), and other comparative analyses of data matrices (ANOSIM, Mantel tests). Includes an applied, "hands-on" approach on how to use these tools, and the circumstances under which their uses are either appropriate or inappropriate.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENTOM 799 – PRACTICUM IN ENTOMOLOGY TEACHING**

1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENTOM 801 – COLLOQUIUM**

1 credit.

Provides exposure to current research in Entomology. Weekly speakers represent diverse career backgrounds.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENTOM/BOTANY/GENETICS/ZOOLOGY 820 – FOUNDATIONS OF EVOLUTION**

2 credits.

Explore some of the most important themes and debates that have permeated evolutionary biology over the last 50 years. Read key papers related to each controversial topic, debate the pros and cons of competing viewpoints, and reflect on the relevance of the issue to contemporary evolutionary biology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**ENTOM/BOTANY/F&W ECOL/ZOOLOGY 821 – FOUNDATIONS OF ECOLOGY**

2 credits.

Foundational ideas in the field of ecology. Discussion topics trace the development of ecology as a discipline, and the roots of modern ecological thought, as well as the research approaches in ecology.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and describe key debates in the history of ecology and ongoing controversies in the field.

Audience: Graduate

2. Differentiate ecological processes and how they sustain ecological systems.

Audience: Graduate

3. Moderate and participate in discussions about the significance of important ecological concepts.

Audience: Graduate

4. Summarize, interpret, and synthesize conceptual theories of ecology orally and in writing.

Audience: Graduate

5. Evaluate peer work and provide constructive, professional feedback.

Audience: Graduate

**ENTOM 875 – SPECIAL TOPICS**

1-4 credits.

Specialized subject matter of current interest to graduate students.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**ENTOM 901 – SEMINAR IN ORGANISMAL ENTOMOLOGY**

1 credit.

Presentations from the original literature on developments in natural products chemistry, biochemistry, physiology, developmental biology and/or ultrastructure of insects.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**ENTOM/AGROECOL/ATM OCN/BOTANY/ENVIR ST/F&W ECOL/  
GEOG/ZOOLOGY 953 – INTRODUCTION TO ECOLOGY  
RESEARCH AT UW-MADISON**

1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison  
Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison  
Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology  
Audience: Graduate

4. Develop appropriate expectations for advisors and advisees  
Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics  
Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science  
Audience: Graduate

**ENTOM 990 – GRADUATE RESEARCH AND THESIS**

1-12 credits.

Independent laboratory research in preparation of a graduate thesis under supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## ENVIRONMENTAL STUDIES - GAYLORD NELSON INSTITUTE (ENVIR ST)

**ENVIR ST/F&W ECOL 100 – FORESTS OF THE WORLD**

3 credits.

Ecology and conservation of a wide range of forests, from tropical rain and dry forests, boreal forests, to temperate forests, outside of the USA. The main threats to forests, and different strategies to solve conservation and sustainable management issues in international forestry. Trade-offs in forest conservation and management, resulting from different values that people place on forests, issues in equity and equality in access to forest resources. The role of forests in climate change and extinction of species.

**Requisites:** None

**Course Designation:** Breadth – Either Biological Science or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify relevant stakeholders in forest landscapes across the world  
Audience: Undergraduate

2. Give examples of conservation threats to forests in countries other than the USA and relevant solutions  
Audience: Undergraduate

3. Communicate about evidence on forest conservation and threats rigorously, correctly, and under different formats  
Audience: Undergraduate

4. Demonstrate, on specific examples, how trade-offs in forest conservation originate and work  
Audience: Undergraduate

5. Explain the role of forests in solutions to climate change and species extinctions  
Audience: Undergraduate

**ENVIR ST/SOIL SCI 101 – FORUM ON THE ENVIRONMENT**

1-2 credits.

Lectures and discussions about environmental issues. Historical and contemporary environmental impacts of humans on the biosphere. Global futures: population, technology, societal values, resources and prospects for sustainable management.

**Requisites:** None**Course Designation:** Breadth – Either Social Science or Natural Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe the breadth of the environmental sciences field

Audience: Undergraduate

2. Explain how research contributes to understanding of contemporary environmental issues

Audience: Undergraduate

3. Provide examples of the relationships between science, issues, and solutions in environmental topics

Audience: Undergraduate

4. Apply critical reading skills to understand issues and evaluate reliability of information sources

Audience: Undergraduate

5. Communicate and collaborate with a team of peers

Audience: Undergraduate

6. Explain how to pursue interests in environmental issues within and outside of the classroom

Audience:

**ENVIR ST/ATM OCN/GEOSCI 102 – CLIMATE AND CLIMATE CHANGE**

3 credits.

Describes the basic climate principles governing the climate system. It describes the climate and climate variability at present, climate evolution in the past, and the projected climate change into the future. The scientific principles underlying the natural and anthropogenic greenhouse effect and climate model forecasts are elucidated.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ENVIR ST/AGROECOL/C&E SOC/ENTOM 103 – AGROECOLOGY: AN INTRODUCTION TO THE ECOLOGY OF FOOD AND AGRICULTURE**

3 credits.

Agroecology has blossomed across the world in recent decades as not only a science, but also a practice, and a movement. Employ the multiple disciplines and perspectives that Agroecology affords to analyze our agricultural and food systems within a broader context of dynamic social and ecological relationships.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Explain and analyze basic biophysical processes of agricultural ecosystems and the challenges and benefits of various management systems

Audience: Undergraduate

2. Interrogate social, economic, and political structures underlying agriculture at local, regional, national, and global scales

Audience: Undergraduate

3. Describe how they personally connect to local to global agricultural landscape as humans, ecological actors, food and fuel consumers, and thoughtful citizens

Audience: Undergraduate

**ENVIR ST/GEOSCI 106 – ENVIRONMENTAL GEOLOGY**

3 credits.

Application of geology to problems resulting from the ever more intense use of the earth and its resources.

**Requisites:** Not open to students with credit for GEOSCI 100**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

## ENVIR ST 112 – ENVIRONMENTAL STUDIES: SOCIAL SCIENCE PERSPECTIVES

3 credits.

Explores different social science approaches to interpreting the relationship between environment and society at various scales, from the local to the global. Traces the social origins of environmental concerns, their social impacts, and the different responses they engender.

**Requisites:** Not open to students with credit for GEOG/ENVIR ST 337

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify different social science approaches that can be used to understand environment-society relations

Audience: Undergraduate

2. Analyze and explain how social, economic, and political conditions affect the environment and environmental issues

Audience: Undergraduate

3. Explain the social, economic and/or environmental dimensions of the sustainability challenges of population growth, natural resource consumption, and market economies

Audience: Undergraduate

4. Analyze objects, ideas, and current events using an environment and society perspective

Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of issues like climate change and environmental justice and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course

Audience: Undergraduate

6. Demonstrate writing that shows mastery of evidence-based critical thinking

Audience: Undergraduate

## ENVIR ST 113 – ENVIRONMENTAL STUDIES: ENVIRONMENTAL HUMANITIES

3 credits.

What do we really mean when we use the word, environment, in interdisciplinary Environmental Studies, and how important is it to have our environment be meaningful? Considers five popular understandings, while also offering a global perspective on environmental humanities. Introduction to key American texts (Carson, Kimmerer, Leopold, etc.) and key concepts (like sustainability and the Anthropocene), along with core skills from fields like philosophy, ethics, literature, fine arts, history, politics and anthropology. Cases in environmental experience and expression range from Wisconsin to Asia, and across biotic and abiotic environments. Through discussions and assignments, answer fundamental questions about science, nature, environmental problems and crisis, and how to relate to others in our world as human beings.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Master core concepts in Environmental Studies

Audience: Undergraduate

2. Understand human-environmental systems

Audience: Undergraduate

3. Demonstrate competence in humanistic study and disciplines

Audience: Undergraduate

4. Achieve excellent writing in Environmental Studies

Audience: Undergraduate

5. Develop oral/aural and collaborative academic skills

Audience: Undergraduate

## ENVIR ST/GEOG 120 – INTRODUCTION TO THE EARTH SYSTEM

3 credits.

Introduction to how the Earth system works and what makes Earth livable. Gain appreciation for how the atmosphere, oceans, life, and earth's surface interact to shape our local, regional and global landscapes.

**Requisites:** Not open to students with credit for ENVIR ST/GEOG 127

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENVIR ST/HIST SCI/HISTORY 125 – GREEN SCREEN:  
ENVIRONMENTAL PERSPECTIVES THROUGH FILM**

3 credits.

From Teddy Roosevelt's 1909 African safari to the Hollywood blockbuster King Kong, from the world of Walt Disney to The March of the Penguins, cinema has been a powerful force in shaping public and scientific understanding of nature throughout the twentieth and twenty-first century. How can film shed light on changing environmental ideas and beliefs in American thought, politics, and culture? And how can we come to see and appreciate contested issues of race, class, and gender in nature on screen? Explore such questions and come to understand the role of film in helping to define the contours of past, present, and future environmental visions in the United States, and their impact on the real world struggles of people and wildlife throughout the world.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science  
Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENVIR ST/ILS 126 – PRINCIPLES OF ENVIRONMENTAL SCIENCE**

4 credits.

Relates principles of environmental science to our daily activities, with an eye to sustainability, conservation, and systems thinking. Introduces science as a process of inquiry and discovery rather than just a pre-established set of facts. Topics relate to energy, water, and land use, and include food, electric power, materials, buildings, transportation, and waste.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural  
Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Apply foundational principles of Environmental  
Science to practices such as sustainability, conservation, and systems  
thinking

Audience: Undergraduate

2. Practice science as a process of inquiry and discovery, using the UW-  
Madison campus as a living laboratory

Audience: Undergraduate

3. Connect campus systems to wider environmental issues relating to  
energy, water, land use, and waste

Audience: Undergraduate

4. Analyze sustainability issues and practices using a systems-based  
approach

Audience: Undergraduate

5. Explain the social, economic, and environmental dimensions of the  
sustainability challenges of operating a large public research institution

Audience: Undergraduate

**ENVIR ST/GEOG 127 – PHYSICAL SYSTEMS OF THE  
ENVIRONMENT**

4 credits.

An introduction to natural environmental systems, emphasizing the interconnections between the systems of the solid earth (minerals, rocks, soils), the hydrosphere (water in all its forms), the biosphere, and the atmosphere. Emphasizes connections between basic concepts and specific environmental issues through hands-on case studies, lab projects, and field trips to collect samples and observations for lab projects.

**Requisites:** Not open to students with credit for ENVIR ST/GEOG 120**Course Designation:** Breadth – Physical Sci. Counts toward the Natural  
Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe at a basic level the most important  
processes of the Earth system, including formation and weathering of  
rocks and minerals, soil development and erosion, atmospheric circulation,  
and the global cycles of water and carbon.

Audience: Undergraduate

2. Apply concepts from this course to understand environmental issues  
such as global climate change and the sustainability of agriculture, and  
natural hazards such as earthquakes and floods, and make informed  
contributions to public debate and decision-making on how to address  
these issues and hazards.

Audience: Undergraduate

3. Identify important research methods, through case studies and labs,  
that are the basis of modern Earth system science.

Audience: Undergraduate

**ENVIR ST/GEOG 139 – GLOBAL ENVIRONMENTAL ISSUES**

3 credits.

Explores the global and local nature of environmental problems, including issues of climate change, food, energy, globalization, deforestation, biodiversity loss, resource access, environmental justice, and population. Considers how we should analyze and act on environmental problems as we confront the apparently daunting scale of such issues. What appear to be single global environmental issues are actually composed of many smaller, context-specific, and place-dependent problems or conflicts. Through an interdisciplinary and geographic perspective, these issues can be understood and addressed at the scale of our lived lives.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the scientific basis of climate change, population growth, desertification, deforestation, water quality and quantity impairments, and the environmental challenges of agriculture and energy production.

Audience: Undergraduate

2. Critically assess the causal factors and drivers associated with global environmental issues.

Audience: Undergraduate

3. Explain the political context in which environmental issues are framed as global problems.

Audience: Undergraduate

4. Identify potential solutions to global environmental issues, and obstacles to their implementation.

Audience: Undergraduate

5. Describe your own relationship to global environmental issues and how global environmental issues manifest locally.

Audience: Undergraduate

**ENVIR ST/ENGL 153 – LITERATURE AND THE ENVIRONMENT**

3 credits.

An introduction to literature in English about the natural world and humankind's relationship with it; specific topics will vary.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ENVIR ST/ATM OCN 171 – GLOBAL CHANGE: ATMOSPHERIC ISSUES AND PROBLEMS**

2-3 credits.

Atmospheric problems of global significance. Greenhouse warming, ozone layer, acid rain, climate change. Study based on elementary principles of atmospheric science. Systems approach applied to changing atmospheric composition. Interactions among geochemical cycles, anthropogenic inputs and other parts of the environment.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENVIR ST 199 – DIRECTED STUDY**

1-3 credits.

Independent work in environmental studies overseen by a qualified instructor.

**Requisites:** Consent of instructor**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Conduct and report on independent environmental studies research under the guidance of a qualified instructor

Audience: Undergraduate

2. Appropriately utilize online and library resources

Audience: Undergraduate

**ENVIR ST/ENTOM 201 – INSECTS AND HUMAN CULTURE-A SURVEY COURSE IN ENTOMOLOGY**

3 credits.

Importance of insects in the environment, emphasizing beneficial insects, disease carriers, and agricultural pests that interfere with the food supply. Environmental problems due to insect control agents.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**ENVIR ST 202 – CAREERS IN THE ENVIRONMENT**

2 credits.

Explores the varied career opportunities for environmental professionals. Features discussions with environmental professionals, supplemented with in-class training on job hunting and professional preparation.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate your own unique skills and strengths as they relate to professional development

Audience: Undergraduate

2. Compare and distinguish diverse career opportunities related to the environment and sustainability

Audience: Undergraduate

3. Identify the core concepts, courses, and areas of training that are required in differing environmental sectors and jobs

Audience: Undergraduate

4. Communicate and present your training and abilities in a professional manner

Audience: Undergraduate

**ENVIR ST 203 – SPECIAL TOPICS IN ENVIRONMENTAL STUDIES**

1-3 credits.

Specific topics will vary, within the scope of environmental studies.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain concepts fundamental to environmental studies

Audience: Undergraduate

2. Recognize interdisciplinary perspectives in environmental studies

Audience: Undergraduate

3. Demonstrate reading, writing, and communication skills

Audience: Undergraduate

**ENVIR ST/ENTOM 205 – OUR PLANET, OUR HEALTH**

3 credits.

An introduction to the multiple determinants of health, global disease burden and disparities, foundational global health principles, and the overlap between ecosystem stability, planetary boundaries, and human health. Explore the core fundamentals of global health scholarship, including but not limited to infectious disease, sanitation, and mental health, and also consider ecological perspectives on these issues through the lens of planetary boundaries. Attention is placed on how human-mediated global change (e.g. climate change, biodiversity loss, land-use patterns, geochemical cycling, agricultural practice) impacts human health and the ecosystem services we depend on. An overview of pertinent issues in sustainability science and planetary health discourse, including the 'Anthropocene' and resilience to understand and critically assess global trends.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use a local to global perspective to assess the historical, current and future trends in human health and well-being

Audience: Undergraduate

2. Describe the use of planetary boundaries to measure Earth system sustainability and the potential impacts of instability in these systems on global health and human well being

Audience: Undergraduate

3. Describe current primary global health challenges, their distribution, and prevention strategies

Audience: Undergraduate

4. Analyze global health disparities through a social justice and human rights lens

Audience: Undergraduate

5. Demonstrate a basic understanding of contemporary issues, problems, and controversies in global health through an interdisciplinary perspective that recognizes the complex relationships between social, economic, political, and environmental systems.

Audience: Undergraduate

6. Analyze ecological perspectives on the connections among human health and well being, animal health, and ecosystem health

Audience: Undergraduate

7. Assess and reflect on the successes and failures of global health interventions and become familiar with current events and current literature that describes these efforts

Audience: Undergraduate

8. Reflect on personal goals, objectives, and role as a global citizen and future professional or researcher

Audience: Undergraduate

### ENVIR ST/GNS 210 – CULTURES OF SUSTAINABILITY: CENTRAL, EASTERN, AND NORTHERN EUROPE

3 credits.

Exploration of the ideals and realities of sustainability in Central, Northern and East European contexts. Cultural, historical, environmental and other perspectives on sustainability on a local and global scale.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of culture in Central, Eastern and North (CEN) European by demonstrating a humanistic understanding of sustainability.

Audience: Undergraduate

2. Apply sustainability principles and/or frameworks to addressing the challenge of working respectfully with stakeholders from different cultural, geographic, and political backgrounds to sustain culture in Central, Eastern and North (CEN) European contexts

Audience: Undergraduate

3. Analyze the causes of and solutions for the sustainability challenge of culture in Central, Eastern and North (CEN) European contexts.

Audience: Undergraduate

4. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of culture in Central, Eastern and North (CEN) European contexts using a humanistic approach and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

6. Use sustainability principles for developing personal goals and professional values.

Audience: Undergraduate

### ENVIR ST/HIST SCI 213 – GLOBAL ENVIRONMENTAL HEALTH: AN INTERDISCIPLINARY INTRODUCTION

3 credits.

Provides an introduction to the intersections of health and environment on a global scale. Exposes students to a range of problems in global environmental health, including climate change, disease ecology, and the globalization of disease.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the utility of humanistic methods for the study of global environmental health

Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis

Audience: Undergraduate

3. Understand essential developments in the evolving relationship between the environment and public health on a global scale.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of global health issues in developing and industrialized countries

Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of climate change, agriculture, and the built environment and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

**ENVIR ST 215 – SUSTAINABILITY**

3 credits.

An introduction to the dynamic and emerging transdisciplinary field of sustainability. A broad survey of the global sustainability science challenges and their potential solutions using an integrated social-environmental systems approach. Applies a sustainability and systems thinking lens to various topics, such as complexity, resilience, ecological literacy, global climate change, economics, food systems, energy, sustainable development, and social equity. Facilitates the exploration of complex interrelationships among contemporary environmental, social, and economic problems and the solutions to support more sustainable systems. Focuses on the skills, knowledge, and attitudes to implement sustainable practices and to enact sustainable development through sustainability science and education.

**Requisites:** None**Course Designation:** Breadth – Either Social Science or Natural Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Define sustainability as it relates to science and education.

Audience: Undergraduate

2. Learn about the economic, social, and environmental aspects of sustainability and some frameworks for defining and measuring progress toward more sustainable systems.

Audience: Undergraduate

3. Be knowledgeable about the major sustainability challenges and opportunities in local and global systems.

Audience: Undergraduate

4. Gain an understanding of systems thinking and how we can use systems thinking to help solve sustainability problems.

Audience: Undergraduate

5. Review sustainable development goals and strategies to support best practices in sustainability initiatives.

Audience: Undergraduate

6. Identify and apply sustainability principles to assess natural, social, and physical systems.

Audience: Undergraduate

**ENVIR ST/GEOG/SOIL SCI 230 – SOIL: ECOSYSTEM AND RESOURCE**

3 credits.

Soils are fundamental to ecosystem science. A systems approach is used to investigate how soils look and function. Topics investigated include soil structure, biology, water, fertility, and taxonomy as well as the human impact on the soil environment.

**Requisites:** Not open to students with credit for SOIL SCI 301**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe the significance of soil and its properties

Audience: Undergraduate

2. Identify and describe key components of soil solids and pores

Audience: Undergraduate

3. Explain and predict the interaction of water with soil

Audience: Undergraduate

4. Interpret basic nomenclature used in soil science

Audience: Undergraduate

5. Analyze that causes and solutions for sustainability of soil resources

Audience: Undergraduate

6. Quantify the interaction of clay surfaces with a soil solution

Audience: Undergraduate

7. Describe the role of soils in many different ecosystems

Audience: Undergraduate

8. Link soil orders with biomes and describe soil's edaphic character

Audience: Undergraduate

9. Analyze sustainability issues using a systems-based approach

Audience: Undergraduate

### ENVR ST/ART HIST/GEOG/HISTORY/LAND ARC 239 – MAKING THE AMERICAN LANDSCAPE

3-4 credits.

Traces the history and evolution of the American cultural landscape from precolonial times to present. Explores how class, ethnic, and racial inequality have shaped the appearance of the American landscape over time, and how that landscape in turn has affected relationships between people and groups through the present day. Examines extraordinary things (civic structures (like our State Capitol), National Parks, War Memorials) and more ordinary kinds of places (mining towns, cotton plantations, sites of recreation and leisure, and suburban tract housing) to stimulate critical thinking about how these places have served people and groups unequally and disproportionately over time and across space. Considers complex meanings of American spaces and places to different people and groups, stimulating empathy and encouraging participation in a multicultural society.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and interpret the American landscape as a richly layered historical document mediated by complex relationships between people and groups

Audience: Undergraduate

2. Explain how the American cultural landscape has affected present day circumstances regarding ethnicity and race as well as racial and ethnic inequalities

Audience: Undergraduate

3. Articulate ways in which historical change manifest in buildings, enclosed spaces, and other elements of the American landscape reveal racial, ethnic, class and gender dynamics between and among people and groups over time

Audience: Undergraduate

4. Enlist forms of historical evidence – maps (current and historic), photographs (aerial and otherwise), historical newspapers, census records, deeds and land records – to interpret landscapes and landscape change

Audience: Undergraduate

5. Explain the American landscape as a product of competing interests, which will demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others

Audience: Undergraduate

### ENVR ST/A A E 244 – THE ENVIRONMENT AND THE GLOBAL ECONOMY

4 credits.

The "economic way of thinking" about global and regional environmental issues. Topics include climate change, biodiversity preservation, ocean fisheries, environmental impacts of international trade, poverty and the environment, and sustainability.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of economic concepts to think critically about relationships between economic activity and global environmental challenges ranging from climate change to biodiversity loss.

Audience: Undergraduate

2. Use appropriate tools to analyze how governmental policies affect the use and conservation of natural resources.

Audience: Undergraduate

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of balancing healthy global economies with environmental quality.

Audience: Undergraduate

4. Analyze the causes of and solutions for the sustainability challenges of maintaining environmental quality and healthy economies.

Audience: Undergraduate

**ENVIR ST 251 – ECOLOGY AND THE GLOBAL ENVIRONMENT**

3 credits.

Ecology is the study of relationships in the natural world, many of which are increasingly being altered by human activities. These disruptions modify the environment on a global scale, affecting populations and communities of plants, animals, and other organisms, and making Earth increasingly inhospitable for life, including for humans. Explore the natural world and humans' role within it, as both instigators and managers of global environmental change.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Articulate the fundamental ideas and concepts underlying the field of ecology

Audience: Undergraduate

2. Understand the causes, consequences, and outlook of the major global environmental issues in the context of ecological science

Audience: Undergraduate

3. Appreciate the role of science, politics, economics, and community engagement in the practice of environmental management and conservation

Audience: Undergraduate

4. Explain the environmental dimensions of the sustainability challenge of food production in the face of increasing habitat loss and degradation

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of worldwide biodiversity declines

Audience: Undergraduate

**ENVIR ST/ILS 255 – INTRODUCTION TO SUSTAINABILITY SCIENCE**

4 credits.

Explore the foundations of sustainability using the UW-Madison campus as a living laboratory. Ground your feet on the UW-Madison campus and ask questions about the energy we use, the food we eat, the air we breathe, the land we occupy, the goods we purchase, and the waste we create. A blend of environmental sciences and studies. Use principles of chemistry, physics, and biology to understand the dynamics of our human and earth systems, but also explore societal issues like public health and social justice, all through the context of sustainability and the UW-Madison campus community.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify drivers of climate change and describe effects both locally and globally

Audience: Undergraduate

2. Explain sustainability as depicted in models of the Triple Bottom Line

Audience: Undergraduate

3. Explain the sustainability challenges of operating a large public research institution, making connections from local to national and global contexts

Audience: Undergraduate

4. Analyze top-down versus bottom-up approaches to addressing sustainability issues on our campus and in the wider world

Audience: Undergraduate

5. Describe the intersection of sustainability goals with issues relating to communities of color and First Nations communities, particularly in Dane County and Wisconsin

Audience: Undergraduate

6. Value the human and natural capital necessary to sustain our life support systems on this planet

Audience: Undergraduate

**ENVIR ST/BOTANY/ZOOLOGY 260 – INTRODUCTORY ECOLOGY**

3 credits.

The relationships of organisms and the environment. Population dynamics and community organization, human-environment relationships, action programs.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**ENVIR ST/RELIG ST 270 – THE ENVIRONMENT: RELIGION & ETHICS**

3-4 credits.

What are sources on which members of religious communities draw in order to understand and address environmental change? Explores how religious persons and communities confront global environmental questions and challenges today, with case studies drawn from culturally and religiously plural societies such as India and Indonesia. Introducing diverse varieties of Christianity, Islam, and Hindu and Buddhist systems, gives overview of some approaches in the environmental humanities related to philosophy, history, sociology and anthropology, and ethics.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ENVIR ST/ENGL 305 – RHETORIC, SCIENCE, AND PUBLIC ENGAGEMENT**

3 credits.

Focuses on theoretical and practical aspects of public engagement with scientific research, policy, and management, with an emphasis on writing, rhetoric, and scientific discourse.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023**ENVIR ST/AMER IND 306 – INDIGENOUS PEOPLES AND THE ENVIRONMENT**

3 credits.

Indigenous peoples often have very close relationships to ancestral homelands, species and natural resources. However, definitions of "indigenous" can be controversial and highly politicized. Diverse outlooks on identities, worldviews and environmental governance clarify the complex meanings of indigeneity in the US. Highlights American Indian perspectives, conservation practices, and policy environments through consideration of US and international case studies. American Indian experiences shed light on pressing issues of resource sustainability and sovereignty, and demonstrate linkages to global Indigenous environmental issues and strategies.

**Requisites:** Sophomore standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Identify diverse Indigenous experiences of and relationships to landscapes

Audience: Undergraduate

2. Recognize that American Indian and Global Indigenous identities are inextricably linked with the environment

Audience: Undergraduate

3. Analyze how American Indian and Global Indigenous histories and epistemologies have been marginalized

Audience: Undergraduate

4. Evaluate relationships between local Wisconsin and global Indigenous environmental issues

Audience: Undergraduate

5. Reflect on personal, family, and cultural identity

Audience: Undergraduate

6. Explore outside of cultural and academic comfort zones

Audience: Undergraduate

7. Practice global citizenry skills, i.e. cultural communications and protocols

Audience: Undergraduate

8. Critique American Indian stereotypes, exploring subtle versus overt racism

Audience: Undergraduate

9. Synthesize diverse approaches to addressing global environmental issues

Audience: Undergraduate

10. Demonstrate skills in articulating these concepts in multi-media formats

Audience: Undergraduate

11. Recognize contributions of indigenous perspectives and actions to environmental resource protection and management

Audience: Undergraduate

12. Articulate different perspectives on how indigenous identities are defined in academia and lived in indigenous communities

### ENVIR ST 307 – LITERATURE OF THE ENVIRONMENT: SPEAKING FOR NATURE

3 credits.

19th and 20th century British and American literature.

**Requisites:** Sophomore, junior, or senior standing only

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### ENVIR ST 308 – OUTDOORS FOR ALL: INEQUITIES IN ENVIRONMENTALISM

3 credits.

National parks, wilderness, and monuments that are set aside for recreational enjoyment are disproportionately underutilized by African Americans, Hispanics, Asians and Native Americans for reasons that are inextricably linked to past and present racial discrimination. Broadening access and participation in outdoor recreation requires a clear understanding of this history, as well as an appreciation of the continuing efforts by people of color to reassert their right to the outdoors. Gain a clear understanding of the sociocultural circumstances that have created disparities among the U.S. population in citizens' ability to access and enjoy public land and the efforts that aim to address them.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize the racial divide between those who spend time in nature for their personal enjoyment and edification and those who do not

Audience: Undergraduate

2. Describe and explain the historic policies, legislation and customs that created an environment of systematic racial discrimination that prevented people of color in the United States of America from creating substantive relationships with the natural world equal to their white counterparts

Audience: Undergraduate

3. Describe and discuss the experiences of specific people of color over the past 100 years of American history who, despite the circumstances of racial discrimination at the time, excelled at creating adventurous experiences and lifestyles

Audience: Undergraduate

4. Recognize, summarize, and analyze the ways that institutions and organizations have prevented under represented members of our society from enjoying experiences in the outdoors and contributing to the long-term preservation of the natural world, as well as the ways they can be used to encourage and support broader access and participation

Audience: Undergraduate

5. Based on their understanding of past discriminatory practices, be able to analyze, formulate, and defend improved policies and social systems that will encourage diversity, equity and inclusion in the management of public land and the interpretation of our shared natural history

Audience: Undergraduate

**ENVIR ST/GEOG 309 – PEOPLE, LAND AND FOOD:  
COMPARATIVE STUDY OF AGRICULTURE SYSTEMS**

3 credits.

Introduction to how and why humans have transformed natural landscapes around the world, including tropical deforestation. Exploration of different agricultural systems, and topics such as food security, land scarcity, bioenergy and the impacts of food production on the environment.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENVIR ST/ZOOLOGY 315 – LIMNOLOGY-CONSERVATION OF  
AQUATIC RESOURCES**

2 credits.

General limnology. Physical, chemical and biological characteristics and processes of lakes. Environmental problems and rehabilitation of lakes.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381 or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENVIR ST 317 – COMMUNITY ENVIRONMENTAL SCHOLARS  
PROGRAM SEMINAR**

1 credit.

Provides opportunities for students in the Community Environmental Scholars Program to analyze the connections among environmental issues and community engagement. Requires work with community-based environmental and/or sustainability-related organizations. Student cohorts design and lead classes and projects and have opportunities to host guest speakers and environmental leaders. Emphasizes the professional skills needed to work effectively individually, in teams, in internships, and in professional positions.

**Requisites:** Junior or senior standing only

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply environmental knowledge from outside course work and assigned course reading to develop and lead in-class activities appropriate for classmates from interdisciplinary backgrounds.  
Audience: Undergraduate

2. Utilize community engagement literature as a resource for current and future professional practice.  
Audience: Undergraduate

3. Document, analyze and reflect on your personal contributions to environmental-related volunteer work, service learning project, and personal actions.  
Audience: Undergraduate

4. Demonstrate professional communication skills useful in applying for employment or graduate school.  
Audience: Undergraduate

5. Demonstrate interpersonal and professional skills in collaboration and organization while working in classroom teams and in service projects in the community.  
Audience: Undergraduate

### ENVIR ST/ATM OCN/GEOG 322 – POLAR REGIONS AND THEIR IMPORTANCE IN THE GLOBAL ENVIRONMENT

3 credits.

Reviews the past, present, and future of the Arctic and Antarctic regions. Covers the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and future state of the Arctic and Antarctica as projected by earth system models. Also explores the role of the polar regions in the earth's system and associated global climatic feedbacks.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and the future state of the Arctic and Antarctic Regions.

Audience: Both Grad & Undergrad

2. Explain the major theories and concepts of the Arctic and Antarctic regions.

Audience: Both Grad & Undergrad

3. Identify how interactions occur between the major components of each polar region and their influence on global processes and climate.

Audience: Both Grad & Undergrad

4. Recognize the need for multi-disciplinary research to further our understanding of the polar regions and their role in the global system.

Audience: Both Grad & Undergrad

5. Integrate thesis or dissertation research directly or indirectly with polar processes research, thereby gaining better insight into Arctic and Antarctic regions.

Audience: Graduate

### ENVIR ST/SOIL SCI 324 – SOILS AND ENVIRONMENTAL QUALITY

3 credits.

Interaction of soils with environmental contaminants and the role of soils in pollution control.

**Requisites:** CHEM 104, 109, 116, or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain and illustrate the functions of soil resources in food production

Audience: Both Grad & Undergrad

2. Identify, and summarize the connections between the soil resource and the water cycle, with special attention to its roles in water quality control, groundwater recharge, and flood buffering

Audience: Both Grad & Undergrad

3. Identify and summarize the role of soils in carbon sequestration and waste management

Audience: Both Grad & Undergrad

4. Integrate and analyze the effect of human activities on soil properties and its functions in the agricultural system, water cycling, carbon sequestration, and waste management

Audience: Both Grad & Undergrad

5. Identify, monitor and revise the policies, programs, projects, and other activities intended to protect and bolster the functions of the soil resource

Audience: Both Grad & Undergrad

6. Develop critical reading skills to understand environmental issues and design/plan effective management practices

Audience: Graduate

### **ENVIR ST 326 – SUSTAINABILITY TOOLS: SYSTEMS THINKING & LIFE CYCLE ASSESSMENT**

3 credits.

Explores fundamentals of systems thinking and how to apply a systems-based approach to understanding and addressing sustainability issues ranging from climate change to environmental racism. Systems content is complemented with foundational skills in life cycle assessment (LCA), an inherently systems-based application of sustainability science that considers the full measure of resources used and waste created throughout the cradle-to-grave supply chain of a product or process. Life cycle and systems-based approaches are used to characterize both human and natural systems in local and global contexts. These approaches also will be integrated with sustainability concepts including the triple bottom line, industrial ecology, and the circular economy. Concepts include: life cycle stages, supply chains, stocks, flows, feedback loops, and unintended consequences.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Undergraduate

2. Use sustainability principles for developing personal goals and professional values.

Audience: Undergraduate

3. Explain life cycle and systems thinking approaches to addressing sustainability issues while evaluating their utility compared with alternative or traditional approaches to problem solving.

Audience: Undergraduate

4. Apply systems thinking concepts such as stocks, flows, and feedback loops to specific contexts ranging from local campus systems to global systems.

Audience: Undergraduate

5. Characterize the life cycle stages for a product system or process and quantify the relevant inputs and outputs at each stage.

Audience: Undergraduate

6. Determine the goal, scope, and relevant functional unit for a life cycle assessment and evaluate the environmental sustainability of a system by interpreting a life cycle assessment on a product or process.

Audience: Undergraduate

7. Connect the sustainability-related aspects of campus-based systems to local, national, and global contexts.

Audience: Undergraduate

8. Evaluate the role that life cycle assessment and systems thinking can have in addressing sustainability concepts such as (1) the triple bottom line, (2) industrial ecology, and (3) the circular economy.

Audience: Undergraduate

### **ENVIR ST/HISTORY 328 – ENVIRONMENTAL HISTORY OF EUROPE**

3 credits.

Explores a new approach to a part of the world with a very old history, but one that is now as 'modern' as any. The changing, complex relations between Europeans and their environments from antiquity to the twenty-first century offer instructive comparison with American and current global environmental concerns. Approaching Mediterranean and Western civilizations from an environmental viewpoint also offers fresh perspective on these enduring cultures.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **ENVIR ST/ATM OCN/GEOG 332 – GLOBAL WARMING: SCIENCE AND IMPACTS**

3 credits.

Offers a fundamental understanding of how and why global warming is happening and what to expect in the future. Investigate and discuss the evidence for change, the science that explains these observations, predicted impacts on humans and ecosystems, and the societal debate over proposed solutions.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENVIR ST/GEOG 333 – GREEN URBANISM**

3 credits.

Over half of the world's population now lives in urban areas, with an expected increase of 2.5 billion people in the next 30 years. As urbanization (broadly defined as the conversion of previously undeveloped lands into urbanized uses) continues and intensifies, we are faced with a number of environmental issues, for instance, fragmentation and destruction of habitats, and decreased air and water quality. Explore how urbanization impacts ecological processes and resulting environmental outcomes, strategies for "designing with nature," and behavioral, planning, and policy responses to urban environmental problems.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe ecological processes as they relate to urbanization

Audience: Undergraduate

2. Describe the social, economic, and environmental dimensions of sustainable communities and identify potential trade-offs and interrelationships among these dimensions

Audience: Undergraduate

3. Analyze the causes of and solutions for the sustainability challenge of sustainable cities and communities

Audience: Undergraduate

4. Analyze local plans for sustainability strategies

Audience: Undergraduate

5. Identify strategies that cities can employ in preparing for the effects of the changing climate

Audience: Undergraduate

**ENVIR ST/ATM OCN/GEOG/GEOSCI 335 – CLIMATIC ENVIRONMENTS OF THE PAST**

3 credits.

Climate change at timescales from the last several million years to the last 100 years, with emphasis on more recent timescales. Examines how climate variability arises from interplay between external forcings, feedbacks within the earth system, and (more recently) human activity.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe the major climatic events and trends during the Quaternary, spanning timescales from the last 50,000,000 years to the last 100 years.

Audience: Undergraduate

2. Identify the physical processes controlling the behavior of the earth system and its components (atmosphere, oceans, cryosphere, biosphere, etc.).

Audience: Undergraduate

3. Discuss how climatic variability results from a combination of external forcings and internal dynamics within the earth system.

Audience: Undergraduate

4. Recognize how paleoclimatologists collect, date, and analyze a staggering variety of paleoclimatic records, including ocean and lake sediment cores, ice cores, tree rings, corals, and speleothems.

Audience: Undergraduate

5. Analyze and critically evaluate climate experiments that are simulated by earth system models.

Audience: Undergraduate

6. Think and write critically, with particular attention to critically reading the scientific literature and critically employing the climate proxies and models used by paleoclimatologists.

Audience: Undergraduate

**ENVIR ST/GEOG 337 – NATURE, POWER AND SOCIETY**

3 credits.

Explores the links between nature, power and society in today's world. Considers the complex relationships between humans and the earth's resources, including food, energy, physical materials, water, biota, and landscapes. Examines issues linked to population and scarcity, resource tenure, green consumerism, political economy, environmental ethics, risks and hazards, political ecology, and environmental justice.

**Requisites:** Sophomore standing. Not open to students with credit for ENVIR ST 112**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ENVIR ST/GEORG 339 – ENVIRONMENTAL CONSERVATION**

4 credits.

Examines major environmental conservation approaches in the U.S. and developing countries and how they are influenced by sociopolitical factors, cultural values and scientific understandings of nature. Historical and contemporary cases are explored with emphasis on biodiversity and climate change issues.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENVIR ST/AMER IND 341 – INDIGENOUS ENVIRONMENTAL COMMUNICATORS**

3 credits.

Native Nations show leadership globally in addressing major environmental issues. Indigenous languages describe deep relationships with the natural world, including information on environmental stewardship – harvesting, caretaking and reciprocity. Indigenous scholars contribute crucial perspectives to conversations about human relationships to the Earth – cultural relationships to wildlife and plants, and the ethical and practical roles of humans in socio-ecological systems. Focuses on indigenous environmental scholarship, including the ongoing legacy of oral traditions, developing research, writing, and public speaking skills.

**Requisites:** Satisfied Communications A requirement and sophomore standing, or graduate/professional standing

**Course Designation:** Gen Ed – Communication Part B

Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Engage in protocols for learning with Tribes, including Elder epistemology and active listening

Audience: Undergraduate

2. Identify styles of indigenous environmental writing and communications from throughout the US and the world

Audience: Undergraduate

3. Summarize major theories and research findings in the field of environmental writing

Audience: Undergraduate

4. Demonstrate skills in articulating Indigenous environmental concepts in multimedia formats

Audience: Undergraduate

5. Engage in critical reading and the use of evidence

Audience: Undergraduate

6. Apply appropriate style and disciplinary conventions in writing and speaking

Audience: Undergraduate

7. Use core library resources specific to indigenous studies, environmental studies, and environmental communications

Audience: Undergraduate

8. Hone writing, public speaking, and library research skills

Audience: Undergraduate

9. Analyze how Native American and Global Indigenous histories and epistemologies have been marginalized

Audience: Undergraduate

10. Critique Native American stereotypes, exploring subtle versus overt racism

Audience: Undergraduate

11. Articulate different perspectives on how indigenous identities are defined in academia and lived in indigenous communities

Audience: Undergraduate

12. Engage in effective and respectful thinking and expression

Audience: Undergraduate

**ENVIR ST/A A E/ECON 343 – ENVIRONMENTAL ECONOMICS**

3-4 credits.

Microeconomic principles underlying the use of natural resources such as air, water, forests, fisheries, minerals and energy. These principles are applied in the examination of pollution control, preservation vs. development, deforestation, and other environmental issues.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, or 111

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand why environmental problems occur in a market-based economy.

Audience: Undergraduate

2. Identify market-based environmental policies to address market failures.

Audience: Undergraduate

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of pollution control.

Audience: Undergraduate

4. Apply sustainability principles and/or frameworks to addressing the challenge of optimizing the use of scarce resources over time.

Audience: Undergraduate

**ENVIR ST/AMER IND/GEOG 345 – CARING FOR NATURE IN NATIVE NORTH AMERICA**

3 credits.

Surveys the concepts, practices, and issues associated with caring for nature in American Indian communities.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Interpret the diverse arrangements for tribal sovereignty, indigenous land tenure, and claims to natural resources and the environment.

Audience: Undergraduate

2. Illustrate natural resource and environmental issues important to both American Indians and Wisconsin Indians.

Audience: Undergraduate

3. Identify similarities and differences between indigenous knowledge systems and Western Science.

Audience: Undergraduate

4. Discuss the marked cultural and natural diversity across native North America.

Audience: Undergraduate

5. Recall the many different conceptions of place, nature, and development in native North America.

Audience: Undergraduate

6. Describe the diversity of American Indian experiences and their varied responses to assorted histories of exclusion and marginalization.

Audience: Undergraduate

7. Demonstrate an awareness of history's impact on the present.

Audience: Undergraduate

**ENVIR ST 349 – CLIMATE CHANGE GOVERNANCE**

3 credits.

Climate change is being felt, and addressed, at every level of society, from the individual to the global scale. Examine efforts to mitigate climate change. Learn about initiatives that are being implemented through international treaties; national, state, and municipal government policies; corporate programs; and individual behavior. Examine the advantages and disadvantages of each approach, their successes, and the obstacles they have faced. Evaluate various forms of climate activism as a means of pushing for meaningful action on climate change.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ENVIR ST/ATM OCN 355 – INTRODUCTION TO AIR QUALITY**

3 credits.

Links chemistry and meteorology to engineering, law, policy, and public health. Presents key ideas in air quality, with focus on reactive pollutants in the outdoor environment, especially gas and particle phase chemicals that react with human tissue to cause sickness and death. Discusses environmental impacts of these pollutants and regulatory approaches for their control in the U.S. and around the world. Indoor air quality will be included. Non-reactive pollutants, especially carbon dioxide, will be compared and contrasted with reactive air pollutants.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Build basic understanding of atmospheric pollutants affecting health, visibility, ecosystems, climate, and the ozone hold.

Audience: Undergraduate

2. Develop skills in analyzing air pollution data and related information, with a focus on evaluating and presenting original research on an air pollution episode of choice.

Audience: Undergraduate

3. Consider a single issue – air quality – from multiple disciplinary perspectives, including atmospheric science, engineering, policy, economics, and chemistry.

Audience: Undergraduate

**ENVIR ST/F&W ECOL/ZOOLOGY 360 – EXTINCTION OF SPECIES**

3 credits.

A comprehensive treatment of the ecology, causes, and consequences of species extinction. Ecology and problems of individual species, habitat alteration and degradation, socio-economic pressures and conservation techniques and strategies.

**Requisites:** Sophomore standing and ZOOLOGY/BIOLOGY/ BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), BIOLOGY/ BOTANY 130, or (BIOCORE 381 and 382)**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**ENVIR ST/LAND ARC 361 – WETLANDS ECOLOGY**

3 credits.

Types, origins, settings, and structure of wetlands. Physical, biological, and cultural values, uses and assessments. Physical and biological characteristics and dynamics. Protection, management and restoration.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/ BOTANY 152, ZOOLOGY 153, (BIOCORE 381 and 382), BIOLOGY/ BOTANY 130, or graduate/professional standing**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ENVIR ST 365 – SYSTEMS THINKING**

3 credits.

Focuses on the concepts and practices used to define systems while providing opportunities to build competencies with systems thinking to describe, assess, understand, and manage complexity from local to global scales. Considers a range of topics, including systems science, complexity, behavior of adaptive systems, networks, emergence, and patterns of organization. Develops skills to analyze how the design and implementation of integrated systems can contribute to solutions for pressing societal challenges. Examines social, physical, and natural systems, the rise of complexity, and achieving resilience in social-ecological systems. Examines the components of systems and analyzes how different ecological and social contexts influence system behavior. Explores and analyzes how decisions ramify to influence processes and outcomes at different levels of complexity.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Define a system and explain the structure, behavior, and functionality of systems, including the characteristics and interconnections among environmental, social, and economic systems.

Audience: Undergraduate

2. Define and identify common patterns of systems.

Audience: Undergraduate

3. Use a variety of systems thinking tools to model various natural, physical, and social systems.

Audience: Undergraduate

4. Explain sustainability in terms of design and systems.

Audience: Undergraduate

5. Value the importance of understanding causality in problem solving and strategic thinking.

Audience: Undergraduate

6. Use a holistic approach and systems thinking tools to diagnose complex problems in natural and physical systems.

Audience: Undergraduate

7. Identify biotic and abiotic aspects of systems as stocks and flows of energy and matter within and between organizational levels.

Audience: Undergraduate

8. Explain and analyze how the management of natural and physical systems influences ecological and social processes.

Audience: Undergraduate

9. Solve systemic problems using logic and reasoning by identifying and differentiating the strength and value of information, evidence, and approaches related to the management and sustainability of social, physical, and natural systems.

Audience: Undergraduate

**ENVIR ST/BSE 367 – RENEWABLE ENERGY SYSTEMS**

3 credits.

Learn about the state-of-the-art in renewable energy applications including biomass for heat, electric power and liquid fuels as well as geo-energy sources such as wind, solar, and hydro power. Practice engineering calculations of power and energy availability of renewable energy sources and learn about requirements for integrating renewable energy sources into production, distribution and end-use systems.

**Requisites:** MATH 112, 114, 217, placement into MATH 221, or graduate/professional standing**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Calculate energy and power production for renewable energy systems

Audience: Both Grad &amp; Undergrad

2. Determine renewable resource availability and impact on energy infrastructure

Audience: Both Grad &amp; Undergrad

3. Design and assess the technical and economic feasibility of renewable energy systems

Audience: Both Grad &amp; Undergrad

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of renewable energy systems.

Audience: Both Grad &amp; Undergrad

5. Produce comprehensive renewable energy project analysis.

Audience: Graduate

**ENVIR ST/HISTORY 369 – THINKING THROUGH HISTORY WITH ANIMALS**

3-4 credits.

Explores the history of human relationships with animals around the world with focus on agriculture and hunting, political economic development, human identity, and biological science and conservation.

**Requisites:** Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST**Course Designation:** Breadth - Either Humanities or Social Science  
Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2019

### **ENVIR ST/F&W ECOL/G L E/GEOG/GEOSCI/LAND ARC 371 – INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING**

3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.

**Requisites:** (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ENVIR ST 375 – FIELD ECOLOGY WORKSHOP**

3 credits.

Hands-on field study for intensive study of behavior of plants and animals and their relationship to environments and human impacts. Individual and group observations, measurements, interpretation, reports, typing personal experience with specifics to basic principles.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2023

### **ENVIR ST/CIV ENGR/GEOG 377 – AN INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS**

4 credits.

Design, implementation and use of automated procedures for storage, analysis and display of spatial information. Covers data bases, information manipulation and display techniques, software systems and management issues. Case studies.

**Requisites:** Sophomore standing, member of Engineering Guest Students, or declared in Capstone Certificate in GIS Fundamentals

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ENVIR ST 398 – INDEPENDENT STUDY: SUSTAINABILITY COMMUNITY ENGAGEMENT**

1 credit.

Provides an opportunity to learn about community engagement and link sustainability concepts to working with a community organization. Declared in the Sustainability Certificate or Environmental Studies Major.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply knowledge of sustainability through volunteering within a local, national, or international community  
Audience: Undergraduate

2. Understand the role of civic engagement in furthering sustainability  
Audience: Undergraduate

### **ENVIR ST 399 – DIRECTED STUDY**

1-3 credits.

Independent work in environmental studies overseen by a qualified instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct and report on independent environmental studies research under the guidance of a qualified instructor  
Audience: Undergraduate

2. Develop researchable Environmental Studies questions  
Audience: Undergraduate

3. Appropriately utilize online and library resources  
Audience: Undergraduate

### **ENVIR ST 400 – SPECIAL TOPICS IN THE ENVIRONMENT: BIOLOGICAL ASPECTS OF ENVIR ST**

1-4 credits.

Topics covered within the scope of the environmental biological sciences, such as conservation biology, environmental ecology, issues in ethnobotany and tropical ecology, environmental health, ecotoxicology, biodiversity, endangered resources, biological systems analysis, and field studies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ENVIR ST 401 – SPECIAL TOPICS: ENVIRONMENTAL PERSPECTIVES IN THE PHYSICAL SCIENCES

1-4 credits.

Topics covered within the scope of the physical environmental sciences, such as issues in energy resources, environmental measurement and analysis, modeling, remote sensing and GIS, environmental engineering and transportation, air and water resources, and global climate change.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ENVIR ST 402 – SPECIAL TOPICS: SOCIAL PERSPECTIVES IN ENVIRONMENTAL STUDIES

1-4 credits.

Topics covered within the scope of environmental social sciences, such as issues in environmental policy, law, economics, land use, sustainability, food systems, energy policy, conflict resolution, environmental justice, and international development.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### ENVIR ST 403 – SPECIAL TOPICS IN ENVIRONMENTAL STUDIES

1-3 credits.

Specific topics will vary, within the scope of environmental studies.

**Requisites:** Sophomore standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain concepts related to the environment.

Audience: Undergraduate

2. Apply interdisciplinary perspectives to the study of environmental issues.

Audience: Undergraduate

3. Demonstrate reading, writing, communication, and research skills.

Audience: Undergraduate

### ENVIR ST 404 – SPECIAL TOPICS IN ENVIRONMENTAL HUMANITIES

1-3 credits.

Topics covered within the scope of environmental humanities, such as themes in environmental ethics, literature, art, film, aesthetics and design, history, and indigenous knowledge.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain social and historical processes that impact our current environments. Interpret the meanings, values, and aesthetics that are created, shaped, and revealed as humans interact with and modify the environments they inhabit.

Audience: Undergraduate

### ENVIR ST/C&E SOC/CURRIC 405 – EDUCATION FOR SUSTAINABLE COMMUNITIES

3 credits.

How can education – for children and adults, in school and out – help to address crucial environmental and social sustainability challenges? What ideas and strategies have guided environmental and sustainability education over the years? What can individual people do to address environmental challenges, and what can only be accomplished by people working together? What does sustainability have to do with justice – and vice versa? Examine the principles behind behavior change and empowerment, community action and whole-scale social reform. Drawing on research and theory from across the social sciences, we will explore the uncertain relationship between education and advocacy, seeking the means by which education can have the greatest impact without compromising the core ideals of a democratic society.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### ENVIR ST/GEOSCI 411 – ENERGY RESOURCES

3 credits.

A critical examination of the full spectrum of renewable and nonrenewable energy options, from the unifying perspective of the Earth systems that govern their use. Energy conversion and efficiency, consumption patterns and trends, and environmental consequences of energy production and use.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ENVIR ST 413 – PRESERVING NATURE**

3 credits.

Understand the theory and practice the skills of effective, scientific, ethical, and legitimate preservation of nature (biodiversity, the atmosphere, water, etc.). Learn from global lessons in how to intervene against threats to nature, and the roles of ethics, law, and research in preserving nature. Gain mastery of terminology and usage so as to communicate professionally about nature preservation.

**Requisites:** Sophomore standing or ZOOLOGY/BOTANY/ENVIR ST 260

**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate understanding of the environmental provisions in national constitutions and U.S. co-sovereign federal-state-tribal governance as these relate to environmental protection.

Audience: Undergraduate

2. Display mastery of the fundamentals of biodiversity and the atmosphere, and what human activities threaten extinction, climate change, and water quality.

Audience: Undergraduate

3. Summarize the ethical and legal roles – of the public, civil society activist organizations, legislatures, executive branches, the judiciary, and public scholars – in preserving and impairing nature.

Audience: Undergraduate

4. Communicate professionally about effective conservation practice and scientific integrity.

Audience: Undergraduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of preserving nature for future generations.

Audience: Undergraduate

6. Analyze the causes of and solutions for the sustainability challenge of preserving nature for future generations.

Audience: Undergraduate

**ENVIR ST 417 – SUSTAINABILITY SCIENCE, TECHNOLOGY AND POLICY**

1 credit.

Analyze the concept of sustainability through current trends, including energy, air and water resources, agriculture, environmental measurement and analysis, modeling, remote sensing, Geographic Information Systems, the built environment, transportation, ecology, conservation and global climate change.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Natural Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply a simple physical model to evaluate sustainability claims from a wide range of sectors, including agriculture, energy, water, land use and conservation.

Audience: Undergraduate

2. Explain how economic, social and cultural factors that don't explicitly involve matter or energy can also affect environmental sustainability.

Audience: Undergraduate

3. Produce thoughtful written work that integrates guest lectures, readings, other texts and/or current events related to environmental sustainability.

Audience: Undergraduate

4. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Undergraduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of climate change, water scarcity, land and water degradation, energy use and biodiversity loss.

Audience: Undergraduate

**ENVIR ST/HISTORY/LEGAL ST 430 – LAW AND ENVIRONMENT: HISTORICAL AND CONTEMPORARY PERSPECTIVES**

3 credits.

Explores environmental studies through a focus on law and legal history. Although its main concentration is on U.S. environmental law, the course will begin and end with broader historical and global perspectives.

Topics include a survey of English, European, and early American legal approaches to land use, natural resources, and pollution through World War II as well as an examination of the development and practice of contemporary U.S. environmental law and consideration of the recent emergence of international environmental law.

**Requisites:** Sophomore standing

**Course Designation:** Gen Ed – Communication Part B

Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and articulate their own arguments about how social, political, and cultural phenomena shape law and legal systems.

Audience: Both Grad & Undergrad

2. Analyze and articulate their own arguments about the social, political, and cultural impacts of law at the societal and individual levels.

Audience: Both Grad & Undergrad

3. Demonstrate knowledge about how legal ideas and ideologies have changed over time and have shaped law and legal systems.

Audience: Both Grad & Undergrad

4. Demonstrate their abilities to find, interpret, and utilize resources relevant to law and society.

Audience: Both Grad & Undergrad

5. Demonstrate their abilities to analyze information, to write clearly and persuasively, and to construct original arguments.

Audience: Both Grad & Undergrad

6. Analyze the causes of and solutions for the sustainability challenge of the conservation of natural resources, especially insofar as their governance involves and impacts local stakeholders.

Audience: Both Grad & Undergrad

7. Analyze the social, economic, legal, political, and environmental dimensions of the sustainability challenge of regulating and governing biodiversity, clean air and water, and other, larger earth systems (such as climate).

Audience: Both Grad & Undergrad

8. Demonstrate an advanced understanding of the historiography or other scholarly debates that have shaped the study of conservation and environmental law.

Audience: Graduate

**ENVIR ST/C&E SOC/GEOG 434 – PEOPLE, WILDLIFE AND LANDSCAPES**

3 credits.

Explores the relationship between humans and wildlife amid diverse landscapes, both historic and contemporary, tropical and temperate. Investigates how humans shape wild animal populations by modifying physical environments, and by hunting, domesticating and introducing species.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENVIR ST/GEOG 439 – US ENVIRONMENTAL POLICY AND REGULATION**

3-4 credits.

Covers a broad cross-section of American environmental policy by focusing on specific statutes and policy arenas. Surveys the basic elements of American environmental policy and regulation with a particular focus on the specific people, sites and scales at which environmental decision-making happens through primary-source case material. Maintains a dual focus on (a) the legal and regulatory aspects of environmental regulation and (b) the specific geographic and social features of actual cases in which regulations and policy are used. Understanding environmental outcomes in a complex society depends on observing both the structure of regulations and the geographic and social context in which such regulations emerge.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENVIR ST/PHILOS 441 – ENVIRONMENTAL ETHICS**

3-4 credits.

Adequacy of ethical theories in handling such wrongs as harm to the land, to posterity, to endangered species, and to the ecosystem itself. Exploration of the view that not all moral wrongs involve harm to humans. Inquiry into the notion of the quality of life and the ethics of the "lifeboat" situation.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ENVIR ST/CIV ENGR/G L E/GEOSCI 444 – PRACTICAL APPLICATIONS OF GPS SURVEYING**

2 credits.

Global positioning system surveying for field applications. Signals. Coordinate systems. Datums. Cartographic projections. Satellite orbits. Choosing hardware. Strategies for data collection and analysis. Assessing uncertainty. Geocoding satellite images. Integrating data with Geographic Information Systems. Emerging technologies.

**Requisites:** MATH 211, 217, 221, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **ENVIR ST/SPANISH 445 – CULTURE AND THE ENVIRONMENT IN THE LUSO-HISPANIC WORLD**

3 credits.

Investigates how economy and culture work together, consuming and/or restoring their environments in divergent scenarios of the Hispanic World.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. State the interconnectedness of culture, environment, and economy in the Hispanic world.

Audience: Undergraduate

2. Recognize various socio-environmental conflicts in Latin America.

Audience: Undergraduate

3. Examine various new socio-economic visions emerging aimed at improving human relationships with the environment in the Hispanic World.

Audience: Undergraduate

4. Describe how Latin American indigenous knowledges and values could help us rethink our culture and economy.

Audience: Undergraduate

### **ENVIR ST/ECON/POLI SCI/URB R PL 449 – GOVERNMENT AND NATURAL RESOURCES**

3-4 credits.

Problems of public policy and administration for development and use of natural resources.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ENVIR ST/GEOG/HISTORY 460 – AMERICAN ENVIRONMENTAL HISTORY**

4 credits.

Survey of interactions among people and natural environments from before European colonization to present. Equal attention to problems of ecological change, human ideas, and uses of nature and history of conservation and environmental public policy.

**Requisites:** Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **ENVIR ST/HISTORY 465 – GLOBAL ENVIRONMENTAL HISTORY**

3-4 credits.

Explores the history of human relationships with the environment on a global scale through analysis of long-term changes, from early civilizations, to the beginnings of global trade, the Industrial Revolution, urbanization, and 20th century technological developments. Offers first-hand historiographical research experience and training in writing for public web audiences.

**Requisites:** Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## ENVIR ST/POP HLTH 471 – INTRODUCTION TO ENVIRONMENTAL HEALTH

3 credits.

Impact of environmental problems on human health; biological hazards to human health from air and water pollution; radiation; pesticides; noise; problems related to food, occupation and environment of the work place; accidents. Physical and chemical factors involved.

**Requisites:** Junior standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the principles and practice of environmental health.

Audience: Undergraduate

2. Describe environmental health and its history as a crucial aspect of the history of public health

Audience: Undergraduate

3. Describe the U.S. and world health status and issues as background framework to environmental health.

Audience: Undergraduate

4. Describe a brief introduction to the public health research methodologies including epidemiology and toxicology.

Audience: Undergraduate

5. Describe crucial infectious and non-infectious disease principles as necessary to understand issues in environmental health.

Audience: Undergraduate

## ENVIR ST/CLASSICS 488 – GREEKS, ROMANS AND THE NATURAL ENVIRONMENT

3 credits.

Examine ways in which the ancient Greeks and Romans interacted with their Mediterranean environments and the various conceptions of the natural world that they developed in poetry, prose and visual art. Explore a number of general topics that will underpin the course as a whole: the characteristics of the Mediterranean environment, the effect of nature on humankind, and the impact of humankind on nature. Study aspects of Greek and Roman engagements with nature, such as agriculture, hunting, sacrifice, the contested relationship between the natural and the civilized, and representations of human beings using terms drawn from the natural world ("bears" of Artemis, cannibalistic "wolves"). Consider how these aspects of the ancient world relate to modern treatments of such themes. (NB: All Greek and Latin texts will be read in English translation.)

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of Classical societies and cultures.

Audience: Both Grad & Undergrad

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Both Grad & Undergrad

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Both Grad & Undergrad

4. Carry out and present the results of in-depth research into aspects of the modern and ancient worlds.

Audience: Graduate

5. Develop an extended scholarly argument in written form.

Audience: Graduate

6. Reflect on modern environmental issues in light of ancient experiences and thought.

Audience: Both Grad & Undergrad

7. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of the over-exploitation of natural resources.

Audience: Both Grad & Undergrad

8. Analyze the causes of and solutions for the sustainability challenges of human-caused climate change, pollution and other forms of environmental harm.

Audience: Both Grad & Undergrad

**ENVIR ST/POP HLTH 502 – AIR POLLUTION AND HUMAN HEALTH**  
3 credits.

Toxicologic, controlled and epidemiologic studies on major air pollutants. Overview of study methods, lung physiology and pathology; air pollution sources, types, meteorology, sampling methods, controls and regulations.

**Requisites:** Junior standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the health science of air pollution's effect on human health.

Audience: Both Grad & Undergrad

2. Describe air pollution and its history as a crucial aspect of the history of environmental health.

Audience: Both Grad & Undergrad

3. Describe the U.S. and world health status and issues from air pollution.

Audience: Both Grad & Undergrad

4. Describe a brief introduction to the public health research methodologies and science including epidemiology and toxicology, risk assessment and the lungs.

Audience: Both Grad & Undergrad

5. Describe the detailed scientific and policy information on indoor and outdoor air pollutants.

Audience: Both Grad & Undergrad

6. Describe the science and policy solutions for air pollution and human health issues.

Audience: Graduate

**ENVIR ST 506 – MODELING AND ANALYSIS OF ENVIRONMENTAL SYSTEMS**

3 credits.

Systems modeling; applications to environmental problems; systems methods.

**Requisites:** Senior standing

**Course Designation:** Breadth – Natural Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**ENVIR ST/ZOOLOGY 510 – ECOLOGY OF FISHES**  
3 credits.

Interactions of fishes with their physical, chemical, and biotic environment; physiological ecology, community ecology and fisheries sciences. Lake Mendota perch fishery and Shedd Aquarium field trips.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use facts to guide conceptual thinking and hypothesis tests about ecological systems.

Audience: Undergraduate

2. Draw upon aspects of fish evolution, ecology, and conservation to produce an integrated perspective.

Audience: Undergraduate

3. Summarize the diversity of fishes on Earth, including phylogenetic and geographic patterns.

Audience: Undergraduate

4. Analyze the relationship between form and function of individual fish.

Audience: Undergraduate

5. Place fish in the context of the broader food web and ecological community.

Audience: Undergraduate

6. Describe the management and use of fish by human society.

Audience: Undergraduate

7. Describe the conservation challenges faced by fish now and in the future.

Audience: Undergraduate

8. Write clear, concise scientific reports both individually and in teams.

Audience: Undergraduate

9. Present effective, informative, and persuasive arguments in writing and orally.

Audience: Undergraduate

**ENVIR ST/ZOOLOGY 511 – ECOLOGY OF FISHES LAB**

2 credits.

Anatomy and taxonomy of Wisconsin fishes and projects in fish ecology.

**Requisites:** ZOOLOGY/ENVIR ST 510 or concurrent enrollment

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENVIR ST/F&W ECOL 515 – NATURAL RESOURCES POLICY**

3 credits.

Examine natural resources policy and law in the United States relating to forests, wildlife, and other natural resources. Investigates the policy-making process and the role of science, values, property, economics, and justice in the development of federal and state resources policy. Practice professional written and oral communication and ethical engagement in resources policy and administration.

**Requisites:** Satisfied Communications A requirement or graduate/professional standing

**Course Designation:** Gen Ed - Communication Part B

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENVIR ST/BOTANY/F&W ECOL/ZOOLOGY 516 – CONSERVATION BIOLOGY**

3 credits.

Investigate the science behind the protection of nature and preservation of biodiversity by focusing on both the biological and socioeconomic factors that underlie the challenges to and the impacts of conservation efforts. Explore the theory, research, and application of biological conservation from an interdisciplinary, international, solutions-focused perspective. Learn about the many threats to Earth's biodiversity but also examine in-depth and apply approaches to overcome them.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Distinguish conservation biology from other scientific disciplines and describe its over-arching principles.

Audience: Both Grad & Undergrad

2. Articulate many reasons why the conservation of biological diversity (at many levels) is important.

Audience: Both Grad & Undergrad

3. Quantify biodiversity at the individual, population, and species level by applying various commonly used models and indices.

Audience: Both Grad & Undergrad

4. Explain orally and in writing the principal threats to biodiversity, to both scientific and layperson audiences (habitat loss and fragmentation; industrial agriculture; climate change; overexploitation; invasive species; pollution) and the specific biological effects of these threats.

Audience: Both Grad & Undergrad

5. Outline strategies to implement at the personal, local, and global scales for solving the biodiversity crisis.

Audience: Both Grad & Undergrad

6. Critically analyze, apply, and communicate recommendations for changing personal behaviors to mitigate the biodiversity and climate crises.

Audience: Both Grad & Undergrad

7. Assess the strengths and weaknesses of various conservation strategies or policy approaches.

Audience: Both Grad & Undergrad

8. Synthesize multiple investigations of conservation strategies to assess trade-offs and synergies among them.

Audience: Graduate

9. Make science-based recommendations for the appropriate conservation approach or strategy for a given situation.

Audience: Graduate

10. Manipulate quantitative data using multi-step arguments to evaluate, interpret, and express solutions to problems in biodiversity estimation, population monitoring, and genetics in the context of conservation.

Audience: Both Grad & Undergrad

**ENVIR ST/ATM OCN 520 – BIOCLIMATOLOGY**

3 credits.

How climate systems and biological organisms operate and interact at the global scale and the implications of this for climate change, ecosystem ecology and human land use.

**Requisites:** (ATM OCN 101, ENVIR ST/ATM OCN 171, or GEOG 323), (ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 102, BIOCORE 381, or 485), and junior standing, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ENVIR ST/PHILOS 523 – PHILOSOPHICAL PROBLEMS OF THE BIOLOGICAL SCIENCES**

3 credits.

Problems raised by genetics, evolutionary theory, and taxonomy: patterns of explanatory force and dispensability of teleology; objectivity of taxonomy.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth - Either Humanities or Social Science Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**ENVIR ST/GEOG/LAND ARC/URB R PL 532 – APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN PLANNING**

3 credits.

Explores planning-related Geographic Information System (GIS) data, applications, analytical tools, and implementation issues.

**Requisites:** GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing

**Course Designation:** Breadth - Social Science Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify how planning agencies use GIS.

Audience: Both Grad & Undergrad

2. Explain the nature, characteristics, and possible ways of analyzing spatial data in a planning context.

Audience: Both Grad & Undergrad

3. Communicate geospatial data and analyses effectively.

Audience: Both Grad & Undergrad

4. Obtain and analyze geospatial data using a range of spatial analysis tools for a number of planning practices.

Audience: Both Grad & Undergrad

5. Conduct site-selection and land-suitability analysis.

Audience: Both Grad & Undergrad

6. Identify ethical issues surrounding access to and use of geospatial data.

Audience: Both Grad & Undergrad

7. Analyze and provide written feedback on undergraduate student presentations.

Audience: Graduate

8. Produce a memo on land-suitability analysis.

Audience: Graduate

**ENVIR ST/ENGL 533 – TOPIC IN LITERATURE AND THE ENVIRONMENT**

3 credits.

Explores the ways that literary texts represent, imagine, and re-imagine the environment.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENVIR ST/GEOG 534 – ENVIRONMENTAL GOVERNANCE: MARKETS, STATES AND NATURE**

3 credits.

Covers real-world questions of how the environment is managed and governed through state policy, economics, and social institutions. Includes strategies within and outside of the formal institutions of government, and extends the discussion to the commodification of nature and the use of science to understand and govern the environment. Also includes case studies of environmental governance in water, carbon, species, and urban sustainability.

**Requisites:** Sophomore standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2022**ENVIR ST/GEOG 537 – CULTURE AND ENVIRONMENT**

4 credits.

Geographic approaches to culture-nature relationships, including human perception of, use of, and adaptation to the physical environment, with emphasis on traditional subsistence systems; selected topics from contemporary and historical sources.

**Requisites:** GEOG 359, ENVIR ST/GEOG 337, 339, 439, AMER IND/ ENVIR ST/GEOG 345, or graduate/professional standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2023**ENVIR ST/C&E SOC/SOC 540 – SOCIOLOGY OF INTERNATIONAL DEVELOPMENT, ENVIRONMENT, AND SUSTAINABILITY**

3 credits.

Sociological analysis of relationships among economic growth, environmental sustainability and social justice in the developing world. Considers frameworks for understanding poverty, hunger, educational and technological inequality, and the impact of globalization on prospects for socially and ecologically sustainable development.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, or 211**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ENVIR ST/CIV ENGR/LAND ARC 556 – REMOTE SENSING DIGITAL IMAGE PROCESSING**

3 credits.

Techniques of enhancement and quantification of remote sensing imagery. Emphasis on processing and analyzing data gathered by airborne and satellite sensors. Techniques to quantitatively analyze data from photography, electro-optical scanners, satellite systems, and radar and passive microwave systems. Applications to: agriculture and forestry, geology and soils, water quality, and urban and regional planning.

**Requisites:** LAND ARC/ENVIR ST/F&W ECOL/G L E/GEOG/ GEOSCI 371, graduate/professional standing, or member of Engineering Guest Students**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ENVIR ST/GEOG 557 – DEVELOPMENT AND ENVIRONMENT IN SOUTHEAST ASIA**

3 credits.

Examines the political, socio-cultural, economic and ecological aspects of contemporary development and human-environment relations in mainland Southeast Asia, applying a critical and theoretically informed perspective, and focusing largely on rural issues.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ENVIR ST/A A E/CIV ENGR/URB R PL 561 – ENERGY MARKETS**

3 credits.

Energy resources are an essential element of the world's business, political, technical and environmental landscape. Analytic tools provided by the discipline of economics expands our understanding of this critical issue. Energy supply markets reviewed include both fossil fuels and renewable resources. Energy demand sectors include residential, commercial, industrial and transportation. Electricity represents an intermediate energy market. The interactions among these markets participants indicate how scarce resources are allocated among competing needs in the world economy.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**ENVIR ST/SOIL SCI 575 – ASSESSMENT OF ENVIRONMENTAL IMPACT**

3 credits.

Overview of methods for collecting and analyzing information about environmental impacts on agricultural and natural resources, including monitoring the physical environment and relating impacts to people and society.

**Requisites:** Junior standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe various methods used for environmental assessment, particularly in the context of land use, resource extraction, and environmental pollution

Audience: Both Grad & Undergrad

2. Measure and evaluate environmental impacts and the effects of human activities on physical and biological resources, including soil, water, air, and biota

Audience: Both Grad & Undergrad

3. Explain the role of environmental impact statement laws and regulations in decision-making processes

Audience: Both Grad & Undergrad

4. Organize, analyze, and visualize environmental data spatially

Audience: Both Grad & Undergrad

5. Use models to understand complex interactions between natural systems and human activities

Audience: Both Grad & Undergrad

6. Analyze how environmental changes affect communities, health, and well-being

Audience: Both Grad & Undergrad

7. Evaluate the role of environmental assessment in policy-making, enforcement, and information dissemination

Audience: Both Grad & Undergrad

8. Analyze environmental data for trends and patterns

Audience: Graduate

9. Integrate data from multiple databases

Audience: Graduate

10. Critically evaluate environmental impact assessment methodologies

Audience: Graduate

**ENVIR ST/LAND ARC 581 – PRESCRIBED FIRE: ECOLOGY AND IMPLEMENTATION**

3 credits.

Covers the use of live fire in land management and provides a background in fire ecology, fire behavior, fire effects, and the prediction of fire behavior for wetland, prairie and savanna fuels. Instruction includes field training with live fire exercises and the use of fire management equipment. Participate in prescribed burns outside of scheduled class times. Confers certificates of completion that qualify an individual to participate on prescribed fire crews with public and private sector organizations.

**Requisites:** Junior standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand fire ecology, the role that fires play in shaping fire-adapted ecosystems, and the use of prescribed fire for land management.

Audience: Both Grad & Undergrad

2. Qualify for working on any prescribed burn or fire suppression crew located anywhere in the U.S., and become familiar with organizations providing experiences using prescribed fire.

Audience: Both Grad & Undergrad

3. Become familiar with the restoration history, including the role of fire, for the UW Arboretum.

Audience: Both Grad & Undergrad

4. Demonstrate safe and appropriate use of Protective Personal Equipment (PPE) for fire.

Audience: Both Grad & Undergrad

5. Demonstrate proficient knowledge of national standards for participating in prescribed burn or fire suppression crews anywhere in the U.S.

Audience: Both Grad & Undergrad

6. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of fire for land management.

Audience: Both Grad & Undergrad

7. Apply sustainability principles and/or frameworks to addressing the challenge and fundamental concepts related to fire ecology in the Upper Midwest.

Audience: Both Grad & Undergrad

8. Gain enhanced knowledge and skills for fire management leadership.

Audience: Graduate

9. Demonstrate applied knowledge of fire ecology and the effects of fire on plant, fungi or animal communities.

Audience: Graduate

## ENVIR ST 600 – ENVIRONMENTAL STUDIES CAPSTONE

3 credits.

Interdisciplinary investigation with an emphasis on real world challenges. Examine environmental issues and apply, often in a team context, a variety of academic perspectives and methodologies, and cultivate academic and professional abilities such as establishing connections within the larger community, developing strategies for analyzing and addressing problems, developing field skills in ecosystems, and working with others trained in fields different from one's own.

**Requisites:** Junior or senior standing only

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Research environmental studies questions, both independently and in groups.

Audience: Undergraduate

2. Synthesize information across several environmental studies disciplines.

Audience: Undergraduate

3. Connect their research to broader aspects of environmental studies.

Audience: Undergraduate

## ENVIR ST 613 – REPRODUCIBILITY CRISES AND OPEN SCIENCE IN ENVIRONMENTAL STUDIES

3 credits.

Why trust science? Examine critically the strengths and weaknesses of Western science in light of new efforts at overcoming the reproducibility crisis. Examine successes and failures in fostering open science focusing on ecological research in its broadest sense, although relevant to many fields of inquiry. In line with the mission of the Nelson Institute for Environmental Studies, take an interdisciplinary look at reproducibility and scientific integrity. Find out why and why not to rely on the scientific communications of individual researchers and interest groups that showcase their preferred evidence.

**Requisites:** Junior standing

**Course Designation:** Breadth – Natural Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Master the principles of open science and reproducibility for biological and social sciences.

Audience: Both Grad & Undergrad

2. Practice the concepts of open science in preparation for a career in research or research administration.

Audience: Graduate

3. Gain and practice skills in critical thinking about research design and scientific communication.

Audience: Both Grad & Undergrad

4. Integrate methods and ways of knowing from two or more fields of inquiry in social sciences and ecology.

Audience: Both Grad & Undergrad

5. Communicate professionally about effective open science practices, reproducibility, and scientific integrity.

Audience: Both Grad & Undergrad

6. Gain familiarity with retraction processes in scientific publication.

Audience: Both Grad & Undergrad

7. Practice critical close reading of scientific methods for the identification of bias or irreproducible methods

Audience: Graduate

8. Disentangle value-based from evidence-based reasoning.

Audience: Both Grad & Undergrad

**ENVIR ST/A A E/ECON/URB R PL 671 – ENERGY ECONOMICS**

3 credits.

The method, application, and limitations of traditional economic approaches to the study of energy problems. Topics include microeconomic foundations of energy demand and supply; optimal pricing and allocation of energy resources; energy market structure, conduct, and performance; macro linkages of energy and the economy; and the economics of regulatory and other public policy approaches to the social control of energy.

**Requisites:** Graduate/professional standing or (senior standing and ECON 101, 111, A A E 101, or 215 prior to Fall 2024)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Understand fundamentals of energy sources and technologies.

Audience: Both Grad & Undergrad

2. Be familiar with microeconomic theory with applications to energy industries and markets.

Audience: Both Grad & Undergrad

3. Build analytical skills in economic analysis and be able to apply the economic thinking to historical and contemporary energy-related issues.

Audience: Graduate

4. Analyze the causes of and solutions for the sustainability challenge of affordable and clean energy.

Audience: Both Grad & Undergrad

5. Apply sustainability principles and/or frameworks to addressing the challenge of affordable and clean energy.

Audience: Both Grad & Undergrad

**ENVIR ST 681 – SENIOR HONORS THESIS**

3 credits.

Independent study for undergraduate students completing an Honors thesis in Environmental Studies.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ENVIR ST 682 – SENIOR HONORS THESIS**

3 credits.

Independent study for undergraduate students completing an Honors thesis in Environmental Studies.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ENVIR ST 691 – SENIOR THESIS**

1-3 credits.

Independent study for undergraduate students completing a thesis in Environmental Studies.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**ENVIR ST 692 – SENIOR THESIS**

1-3 credits.

Independent study for undergraduate students completing a thesis in Environmental Studies.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### ENVIR ST/LAND ARC/SOIL SCI 695 – APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCES

3 credits.

Modern GIS desktop and web-based workflows, analyses, and visualizations related to natural resource and environmental planning issues and communication. Guest lectures from agency and industry professionals.

**Requisites:** LAND ARC 311, ENVIR ST/CIV ENGR/GEOG 377, or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop and apply appropriate geospatial analysis workflows related to the study and conservation of natural resources.

Audience: Both Grad & Undergrad

2. Identify and evaluate sources of primary and secondary geospatial data.

Audience: Both Grad & Undergrad

3. Develop methods for collecting primary geospatial data

Audience: Both Grad & Undergrad

4. Communicate analytical results in visual and graphical forms.

Audience: Both Grad & Undergrad

5. Evaluate literature related to geospatial technologies in environmental science and natural resource issues.

Audience: Graduate

### ENVIR ST 699 – DIRECTED STUDY

1-3 credits.

Independent work in environmental studies overseen by a qualified instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### ENVIR ST/CIV ENGR/URB R PL 717 – WATER RESOURCES MANAGEMENT PRACTICUM PLANNING SEMINAR I

1 credit.

The first of two seminars for planning the activities of the practicum.

**Requisites:** Declared in Water Resources Management MS or Doctoral Minor

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### ENVIR ST/CIV ENGR/URB R PL 718 – WATER RESOURCES MANAGEMENT PRACTICUM PLANNING SEMINAR II

2 credits.

The second of two seminars for planning the field work, analysis, and reporting of the practicum.

**Requisites:** Declared in Water Resources Management MS or Doctoral Minor

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ENVIR ST/CIV ENGR/URB R PL 719 – WATER RESOURCES MANAGEMENT SUMMER PRACTICUM

4 credits.

Interdisciplinary team of students and staff working with agency personnel, citizen groups, and/or private sector representatives on the analysis of a contemporary, problem-oriented water resource issue. Physical, biological, economic and social aspects of the issue analyzed. Comprehensive written report results, practicum's findings and management recommendations.

**Requisites:** URB R PL/CIV ENGR/ENVIR ST 718

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## ENVIR ST/AGROECOL 724 – AGROECOSYSTEMS AND GLOBAL CHANGE

3 credits.

Impacts of global change drivers (climate change, atmospheric chemistry, bioenergy, urbanization, policy) on agroecosystems and their associated goods and services; environmental impacts of agricultural land use and feedbacks to climate; modeling approaches; critical review of current scientific literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Explain key physical, biological, and social drivers of change to agroecosystems on planet Earth

Audience: Graduate

2. Apply important biophysical and biological concepts to describe how a changing climate and changes in atmospheric composition impact agricultural systems

Audience: Graduate

3. Describe how agricultural land management impacts the Earth's climate system through changing biogeochemical cycling

Audience: Graduate

4. Discuss how agricultural land management impacts Earth's climate system through biogeophysical processes that effect energy and water balance in the soil-plant-atmosphere system

Audience: Graduate

5. Identify and summarize ecosystem services that are impacted by agroecosystems and land management decision-making, and how this effects global environmental sustainability

Audience: Graduate

## ENVIR ST/POP HLTH 739 – CLIMATE CHANGE, HUMAN AND PLANETARY HEALTH

2 credits.

Provide tools to identify and address real-world global environmental health issues, stemming from climate change, habitat destruction leading to disease spillover events, food insecurity, and urban design.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize unique environmental public health challenges posed by climate change.

Audience: Graduate

2. Define the planetary boundaries and describe their links to human health.

Audience: Graduate

3. Define and Understand the Planetary Health framework and principles for systems-based approaches to risk management and health promotion.

Audience: Graduate

4. Learn and apply a Health in All Policies strategy to demonstrate the value of more comprehensive, cross-sector disease prevention programs.

Audience: Graduate

5. Critically analyze the linkages between physical and ecological conditions with human health and well-being, as well as exposure pathways through which impacts occur.

Audience: Graduate

6. Develop and exhibit effective risk and/or science communication strategies related to environmental health.

Audience: Graduate

## ENVIR ST/ATM OCN 745 – METEOROLOGICAL SATELLITE APPLICATIONS

2-3 credits.

Use of satellite imagery and measurements in meteorological research and operations; orbital characteristics; navigation; instrumentation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**ENVIR ST/ATM OCN/GEOSCI/ZOOLOGY 750 – PROBLEMS IN OCEANOGRAPHY**

3 credits.

Introduction to techniques used in the study of the biology, chemistry, geology, and physics of the marine environment.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENVIR ST/PUB AFFR/URB R PL 809 – INTRODUCTION TO ENERGY ANALYSIS AND POLICY**

3 credits.

Strategy and policy problems in energy policy, both national and international.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ENVIR ST/PUB AFFR/URB R PL 810 – ENERGY ANALYSIS AND POLICY CAPSTONE**

3 credits.

Interdisciplinary application of energy knowledge to an analysis project for a real-world client. Integrate and apply technical, economic, political, and social factors in energy decision-making.

**Requisites:** Declared in Energy Analysis and Policy Graduate/Professional Certificate or Doctoral Minor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct an original analysis by collecting and interpreting data on an energy-related issue for areal-world client.

Audience: Graduate

2. Integrate and apply multiple disciplinary perspectives such as technical, economic, socio-political, and environmental factors in the context of complex energy problems.

Audience: Graduate

3. Prepare for energy-related careers by: planning and managing a project over multiple months; interacting professionally with client; working effectively in multidisciplinary teams; and producing professional-quality deliverables such as presentations and reports in accordance with scope of work.

Audience: Graduate

4. Analyze the causes and solutions for the sustainability challenge of affordable and clean energy.

Audience: Graduate

5. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Graduate

**ENVIR ST/JOURN/LSC 823 – SCIENCE AND ENVIRONMENT COMMUNICATION**

3 credits.

Tracks the evolution of mass media coverage of science and the environment. Emphasis on how journalists utilize evidence, the influence of scientific and journalistic norms on stories, and the effects of mass media on science and environment messages to the public.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Describe theoretical perspectives relating to science and environmental communication, including a sampling of recent findings and current theoretical model

Audience: Graduate

2. Combine theory and methods to develop and evaluation science and environmental communication efforts

Audience: Graduate

3. Apply research theories and findings to contemporary problems in environmental and science communication

Audience: Graduate

4. Communicate complex environmental and science concepts with scientific and general audiences in oral and written forms

Audience: Graduate

**ENVIR ST/URB R PL 843 – LAND USE POLICY AND PLANNING**

3 credits.

Critical evaluation and analysis of land use policies and programs in relation to comprehensive planning and growth management issues in the U.S. The role of legislative and judicial processes and emerging public land use social values and philosophies in the development, regulation, and effectuation of innovative land use policies. Alternative land policy and growth guidance systems of select European countries.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ENVIR ST/URB R PL 865 – WATER RESOURCES INSTITUTIONS AND POLICIES**

3 credits.

Governmental processes and policies for water resources management: major substantive problems and issues; political processes of decision making; problems of governmental organization and intergovernmental arrangements.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENVIR ST/POLI SCI/PUB AFFR 866 – GLOBAL ENVIRONMENTAL GOVERNANCE**

3 credits.

In-depth examination of the political and policy challenges posed by global environmental degradation. Analysis of international institutions for managing the global environment.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ENVIR ST/A A E/POP HLTH/PUB AFFR 881 – BENEFIT-COST ANALYSIS**

3 credits.

Presents the welfare economics underpinnings for evaluating the social benefits and costs of government activities. Issues such as uncertainty, the social discount rate, and welfare weights will be discussed; case studies from the environmental, social policy, and agricultural areas will be studied.

**Requisites:** Graduate/professional standing and (PUB AFFR 818 and 880), or POP HLTH/I SY E 875, or A A E 635

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the basic mechanics of performing a Cost Benefit Analysis, including methods for valuing costs and benefits, aggregating over time, and analyzing uncertainties.

Audience: Graduate

2. Evaluate the strengths and weaknesses of different CBAs and propose strategies to address any shortcomings.

Audience: Graduate

3. Debate the advantages and limitations of CBA for public policy and compare it to other approaches.

Audience: Graduate

4. Create a CBA for a real-world client from beginning to end, including scoping, background research, valuation of costs and benefits, uncertainty analysis, and interpretation.

Audience: Graduate

**ENVIR ST 900 – SEMINAR**

1-3 credits.

Special topics selected with each offering.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENVIR ST 901 – GRADUATE ORIENTATION SEMINAR**

1 credit.

Introduction to the organizational structure, policies and practices of the Nelson Institute, with an emphasis on the opportunities and challenges of being a student in a cross-campus interdisciplinary program.

**Requisites:** Declared in the Environment and Resources or Water Resources Management graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENVIR ST 909 – PROFESSIONAL SKILLS IN ENERGY ANALYSIS AND POLICY**

1 credit.

Discussion of professional skills important to interdisciplinary professionals in energy analysis and policy. Exploration of diverse career pathways and personal career development goals. Includes presentations from practitioners in public, private, and non-profit sectors.

**Requisites:** Declared in the Energy Analysis and Policy graduate/professional certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Build understanding of personal career path.

Audience: Graduate

2. Gain awareness of careers in a variety of disciplines within the energy sector.

Audience: Graduate

3. Develop professional skills applicable to energy and environmental careers.

Audience: Graduate

4. Practice professional networking through informational interviews and expert visits.

Audience: Graduate

**ENVIR ST/ATM OCN/BOTANY/CIV ENGR/GEOSCI/ZOOLOGY 911 – LIMNOLOGY AND MARINE SCIENCE SEMINAR**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENVIR ST/URB R PL 917 – PUBLIC PARTICIPATION FOR PLANNING AND POLICY MAKING**

3 credits.

Examines public participation for planning and policymaking in both urban and natural environments; considers different types of participation from agency consultation to negotiation; designing, conducting, and evaluating citizen participation are major features.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENVIR ST 922 – HISTORICAL AND CULTURAL METHODS IN ENVIRONMENTAL RESEARCH**

3 credits.

Introduction to other disciplinary and interdisciplinary methods studying past environmental change and the human cultural contexts within which such change occurs. Explore the disparate forms of evidence that can be used to reconstruct past environmental changes and their human meanings. Build a strong sense of community among graduate students and faculty members at UW-Madison who share an interest in past environmental change by creating a context within which students from different programs can work together.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENVIR ST/ATM OCN 925 – SEMINAR-CLIMATOLOGY**

1-2 credits.

Historical climatology with emphasis on the last few centuries.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**ENVIR ST 931 – REMOTE SENSING FOR INTERNATIONAL DEVELOPMENT**

3 credits.

Explore the ways remote sensing data are being used within an international development context, broadly defined. Provides a unique focus on understanding how projects were completed with satellite data, what data sources were necessary, how expert local knowledge was incorporated, and how various challenges were faced and overcome. Discover how the application of remote sensing data helped change policy in different countries across the globe.

**Requisites:** LAND ARC/ENVIR ST/F&W ECOL/G L E/GEOG/GEOSCI 371 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### ENVIR ST/CURRIC 932 – FOUNDATIONS OF ENVIRONMENTAL AND SUSTAINABILITY EDUCATION

3 credits.

Education is often portrayed as a critical part of the solution to the intertwined problems of environment and society. Examines environmental education and related traditions such as nature study, conservation education, and outdoor education, as well as more recent movements such as place-based education and education for sustainability. Grounds discussions in concrete examples of educational practice, considers historical and contemporary critiques of environmental education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### ENVIR ST 950 – ENVIRONMENTAL MONITORING SEMINAR

1-2 credits.

A discussion and exploration of the social, economic and legal interactions of geospatial and environmental information technologies with society.

**Requisites:** Declared in Environmental Conservation: Environmental Observation and Informatics MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize the social, economic, and legal considerations of working with environmental monitoring data

Audience: Graduate

2. Implement the steps for effective project collaborations

Audience: Graduate

3. Gain hands on experience working with data that has relevance for a conservation issue

Audience: Graduate

### ENVIR ST 951 – CONSERVATION OF BIODIVERSITY

3 credits.

Surveys the scientific knowledge, concepts, and models that are the basis for the applied practice for the conservation of biodiversity. Study interactions of humans with nature, and how conservation science is used to formulate policy and guide conservation actions.

**Requisites:** Declared in Environmental Conservation: Environmental Conservation MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### ENVIR ST/AGROECOL/ATM OCN/BOTANY/ENTOM/F&W ECOL/ GEOG/ZOOLOGY 953 – INTRODUCTION TO ECOLOGY RESEARCH AT UW-MADISON

1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison

Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison

Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology

Audience: Graduate

4. Develop appropriate expectations for advisors and advisees

Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics

Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science

Audience: Graduate

**ENVIR ST 956 – ADVANCED ENVIRONMENTAL REMOTE SENSING**  
3 credits.

Focuses on the fundamental physical principles of terrestrial remote sensing, followed by an examination of advanced topics in earth observation and digital image processing. Topics include radiation interaction with the atmosphere and the surface; radiative transfer theory; land surface characteristics including energy balance; thermal sensing; atmospheric and radiometric correction of image data; automated cloud detection and removal. Applications of remote sensing data for environmental problems will be explored in depth, including biophysical remote sensing with 3D modeling of vegetation canopies, dense time series analysis, data mining techniques, data fusion, as well as object vs. per-pixel approaches to pattern recognition. Explores all major data types, including optical, RADAR, LiDAR, and hyperspectral data, and provide instruction in hands-on image processing using open source software.

**Requisites:** LAND ARC/ENVIR ST/F&W ECOL/G L E/GEOG/GEOSCI 371 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of major theories, approaches, concepts, and methods in remote sensing science.

Audience: Graduate

2. Apply knowledge of the nature and properties of electromagnetic radiation and how it is affected by interactions with the atmosphere and the Earth's surface, including transmission, absorption, reflectance, refraction, and scatter.

Audience: Graduate

3. Outline several historical models used to explain the nature of light (e.g. wave, particle), describe phenomena associated with each model, and discuss the principle of complementarity.

Audience: Graduate

4. Recall the basic physical principles of radiation laws derived from Planck, Wien, and Stefan-Boltzmann, and describe how these principles make remote sensing possible.

Audience: Graduate

5. Differentiate the effects of atmospheric scatter (Rayleigh, Mie, and non-selective scatter) on Earth observation imagery, and determine how to remove atmospheric effects (or differences) across images.

Audience: Graduate

6. Understand the fundamental laws of radiative transfer, such as heating and cooling of the surface and atmospheric layers, and its effects in both clear and cloudy conditions.

Audience: Graduate

7. Illustrate the inverse methodologies used to derive geophysical parameters from remote measurements.

Audience: Graduate

8. Use this knowledge to interpret complex multispectral radiance data sets to derive geophysical information for environmental applications.

Audience: Graduate

9. Describe the differences between heat, thermal energy, and emissivity, distinguish how the amount of energy stored determines the temperature, and determine how these properties affect thermal remote sensing image analysis.

Audience: Graduate

**ENVIR ST 971 – ENVIRONMENTAL SENSING TECHNOLOGIES**  
3 credits.

Many diverse technologies for monitoring the environment have become available in recent years, including traditional remote sensing data sources: aerial photography and satellite imagery, hyper-spectral data, imagery on demand, RADAR and LiDAR. Other new data sources are quite unconventional, with many emerging relatively recently: unmanned aerial vehicles (UAVs or drones), social media, smartphones as sources of crowd-sourced data, and more. Sophisticated data management, analytics, and presentation technology are required to effectively leverage both the spatial (including 3D) and temporal dimensions of these often untapped data sources. Intended to survey and explore these newly developing technologies, and provide direct experience to the student to understand and interact with the data and methods (geocomputing, coding, cloud-based platforms), and to learn to plan, manage, and utilize them effectively.

**Requisites:** LAND ARC/ENVIR ST/F&W ECOL/G L E/GEOG/GEOSCI 371 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate their understanding of major theories, approaches, concepts, and methods in remote sensing science.

Audience: Graduate

2. Apply knowledge of the nature and properties of electromagnetic radiation and how it is affected by interactions with the atmosphere and the Earth's surface.

Audience: Graduate

3. Identify the techniques, skills, and modern tools necessary for monitoring environmental phenomena with earth observation data.

Audience: Graduate

4. Identify and appropriately utilize data types from the optical, thermal, and microwave portions of the electromagnetic spectrum, and from a wide range of airborne, satellite and unmanned aerial platforms, including high (greater than 5 m), medium (10-30 m), and coarse (250-1000 m) spatial resolution imagery.

Audience: Graduate

5. Illustrate the utility of machine learning for big data applications in remote sensing, and apply machine learning theories and tools in practice.

Audience: Graduate

6. Apply traditional and new forms of data fusion using earth observation imagery and a wide range of geophysical, social, and economic sources.

Audience: Graduate

7. Identify real-world issues that could benefit from the application of hyper-spectral and hyper-temporal data, and illustrate effective ways to apply these data for each.

Audience: Graduate

8. Analyze and interpret LiDAR point data clouds and LiDAR data derivatives for applications ranging from forestry to urban sustainability.

Audience: Graduate

9. Integrate new sources of data from unmanned aerial vehicles (UAVs) for monitoring biodiversity and conservation, and illustrate ways to influence policy with these findings.

Audience: Graduate

10. Apply a wide range of image processing tools using cloud computing

**ENVIR ST 972 – CONSERVATION PLANNING**

4 credits.

Prepare to plan, monitor and evaluate the effectiveness of conservation projects and programs. Learn systematic and adaptive processes of conservation planning.

**Requisites:** Declared in Environmental Conservation: Environmental Conservation MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ENVIR ST 974 – ENVIRONMENTAL CONSERVATION COHORT SEMINAR**

1 credit.

Introduction to professional development and important aspects of communication, collaboration, and professional practice as they relate to Environmental Conservation.

**Requisites:** Declared in Environmental Conservation MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ENVIR ST 975 – ENVIRONMENTAL CONSERVATION LEADERSHIP SEMINAR**

1 credit.

Introduction to important aspects of communication, negotiation, and cross-cultural professional practice as they relate to Environmental Conservation.

**Requisites:** Declared in Environmental Conservation: Environmental Conservation MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ENVIR ST 976 – THE PRACTICE OF CONSERVATION BIOLOGY AND SUSTAINABLE DEVELOPMENT**

1 credit.

A weekly series of presentations by persons who have direct experience in the practice of conservation biology and sustainable development. Presenters may be students, faculty staff or agency persons.

**Requisites:** Declared in Environmental Conservation MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ENVIR ST 977 – SUSTAINABLE DEVELOPMENT - INTEGRAL PERSPECTIVE**

3 credits.

Review core concepts and history of sustainable development. Introduction to innovative frameworks to sustainable development, including integral framework, institutional analysis, and the often overlooked cultural, philosophical and psychological underpinnings of environmental decision-making. Analyze case studies and examples through the lens of the frameworks presented. Serves as a forum to present your research interests and examples regarding sustainable development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**ENVIR ST 978 – ENVIRONMENTAL CONSERVATION TOOLS MODULES**

1 credit.

Modules provide training in specific tools and methods related to environmental conservation. Topics may include GIS, conservation finance, conservation governance institutions, biodiversity monitoring, and science communication environmental mediating.

**Requisites:** Declared in Environmental Conservation MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ENVIR ST 979 – ENVIRONMENTAL CONSERVATION PROFESSIONAL PRACTICE**

3 credits.

Provides an online environment for the development and practice of the skills needed to be an environmental conservation professional and leader. Analyze options and make good professional conservation judgments in complex and uncertain environmental, political, and economic settings. Provides the tools needed to assess and revise those judgments. Includes exercises on the politics of environmental decisions, internal and external communication strategies, and program development and assessment strategies.

**Requisites:** Declared in Environmental Conservation: Environmental Conservation MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ENVIR ST/ATM OCN/BOTANY/F&W ECOL/GEOG/GEOSCI/  
ZOOLOGY 980 – EARTH SYSTEM SCIENCE SEMINAR**

1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ENVIR ST 990 – RESEARCH**

1-12 credits.

Independent research and writing towards thesis or dissertation requirement.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ENVIR ST 999 – ADVANCED INDEPENDENT STUDY**

1-5 credits.

Independent work in environmental studies overseen by a qualified instructor.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct and report on independent environmental studies research under the guidance of a qualified instructor

Audience: Graduate

2. Independently develop researchable Environmental Studies questions  
Audience: Graduate

3. Appropriately utilize online and library resources  
Audience: Graduate

4. Connect their research clearly to other research in their field of study  
Audience: Graduate

**FAMILY MEDICINE (FAM  
MED)****FAM MED 699 – DIRECTED STUDY**

1-5 credits.

Directed study projects as arranged with faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and synthesize scientific literature surrounding their scientific question.

Audience: Undergraduate

**FAM MED 711 – THE HEALER'S ART**

1 credit.

Explores relationship-centered care in the medical profession. Topics include the importance of holistic self-care, methods of sharing, processing and responding to grief and the concepts of service and calling in medicine.

**Requisites:** Declared in Medicine program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**FAM MED 712 – HEALTH CARE IN DIVERSE COMMUNITIES**

1 credit.

Introduction to issues in health care provided in diverse communities. Topics include cultural issues in medicine, health disparities, cross-cultural communication, culture and resiliency, historical background and ethics, civil rights in practice and minority health care professionals.

**Requisites:** Declared in Medicine program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**FAM MED 790 – RURAL PUBLIC HEALTH AND COMMUNITY  
PROJECTS FOR PHASE 3 WARM STUDENTS**

2 credits.

Opportunity for students to continue or enhance work on their longitudinal community projects through a self-directed learning experience.

**Requisites:** MED SC-M 810, 811, 812, and 813 and declared in Medicine:Wisconsin Academy for Rural Medicine or Medicine:Wisconsin Academy for Rural Medicine excellence in Rural Residencies.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 1 number of completions

**Last Taught:** Spring 2025

## **FAM MED 909 – FAMILY MEDICINE INTERNSHIP PREPARATION ELECTIVE**

1 credit.

Review and reinforce baseline skills you will need for internship training in Family Medicine. Inpatient topics include hospital admission and discharge workflows, ICU basics, Chest pain, Acute respiratory symptoms, OB triage, Communication with patients and families. Outpatient topics include Common pediatric presentations, Common family medicine outpatient procedures, Telemedicine-based care. Additional topics include Common imaging and cardiopulmonary evaluations: Radiograph interpretation, Cardiac evaluations; Non-invasive respiratory support approaches; Shock management; Acute Coronary Syndrome management; Initial approach to and management of common, severe, infectious conditions; Procedural skills; Communication skills with health care providers; Written clinical documentation. Verbal communication with patients and families; Teaching skills.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate familiarity with the use and appropriate ordering criteria for various Radiology modalities including xrays, Magnetic Resonance Imaging (MRI) & Computerized Axial Tomography (CAT) Scans, and ultrasound

Audience: Graduate

2. Review electrocardiogram (EKG) interpretation and identify common clinical findings

Audience: Graduate

3. Identify and discuss treatment of clinically significant arrhythmias

Audience: Graduate

4. Determine appropriate cardiac stress testing

Audience: Graduate

5. Discuss appropriate use of laboratory studies and interpretation related to shock

Audience: Graduate

6. Review diagnosis and treatment of urgent/emergent and acute situations including hypotension, sinus tachycardia, deep vein thrombosis/pulmonary embolism (DVT/PE), chest pain, abdominal pain, fever, and dyspnea

Audience: Graduate

7. Describe appropriate antibiotics for common infectious diseases

Audience: Graduate

8. Identify approach to common procedures including: dermatologic procedures, suturing/knot tying, gynecologic procedures and contraceptive care, circumcision

Audience: Graduate

9. Appropriately approach difficult conversations including delivering bad news, medical errors, death/autopsy request, and other clinically challenging situations

Audience: Graduate

10. Identify appropriate communication strategies for dealing with conflict, appropriate communication with colleagues and patients, written and verbal communication, and teaching skills

Audience: Graduate

## **FAM MED 910 – RESEARCH AND INDEPENDENT STUDY ELECTIVE IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of research in Family Medicine and primary care or to enable students who have already become involved in research in Family Medicine to complete or extend their work. Working with a faculty mentor, examine both the content and process of primary care research. Refine research questions, interview research participants, complete computer-based literature searches and complete critical literature reviews. Demonstrate understanding of research ethics, design, development, computer database management, statistical analysis and oral and written presentation.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research.

Audience: Graduate

2. Conduct a thorough literature review as it pertains to the specific scholarly project.

Audience: Graduate

3. Select and apply, and/or understand statistical methodologies as appropriate for the proposed scholarly project.

Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review.

Audience: Graduate

**FAM MED 911 – EVIDENCE-BASED HERBAL MEDICINE SAFETY AND EFFICACY SELECTIVE IN FAMILY MEDICINE**

2 credits.

Gain a basic understanding of the pharmacology, mechanism of action, phytochemistry and botany (plant identification) of common plants used for healing in the United States. Analyze herbalpharmaceutical interactions and liver detoxification systems, extremely important skills in the practice of clinical medicine for any specialty. Prepare simple herbal treatments in the Learning Kitchen at the American Center and discuss practical applications in the clinical setting.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the physiological effects of the top 20 commonly used herbal medicines in the United States.

Audience: Graduate

2. List characteristics of a high-quality herbal medicine.

Audience: Graduate

3. Describe how to prepare an infusion, decoction, tincture, and herbal salve.

Audience: Graduate

4. From a list of dietary supplements and pharmaceuticals, identify adverse interactions using validated sources.

Audience: Graduate

5. Explain, in detail, how to undertake a risk-benefit analysis when trying to decide about the appropriateness of using an herbal medicine for treatment in a clinical scenario.

Audience: Graduate

6. Critically evaluate the herbal medicine literature, explaining the characteristics of a high-quality herbal medicine journal article using the 15-point supplemental CONSORT approach.

Audience: Graduate

**FAM MED 919 – INDIVIDUALIZED FAMILY MEDICINE ELECTIVE**

2-8 credits.

In-depth exposure to the principles of Family Medicine, emphasizing continuing and comprehensive care. Under direct faculty supervision, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, covers the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning.

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

14. Recognize limitations and seek assistance as appropriate.

**FAM MED 920 – CLINICAL ELECTIVE IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

14. Recognize limitations and seek assistance as appropriate.

**FAM MED 924 – CORRECTIONAL SYSTEM HEALTHCARE ELECTIVE IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of Family Medicine as it relates to the Correctional System Healthcare of the incarcerated, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis will be placed on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans as related to the correctional system.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning.

Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.

Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

**FAM MED 926 – NATIVE AMERICAN CLINICAL ELECTIVE IN FAMILY MEDICINE**

2-8 credits.

In-depth exposure to the principles of Family Medicine in the Native American community, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.

Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.

Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Develop and implement effective patient management plans.

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

8. Review, interpret and present current literature to support patient care.

Audience: Graduate

9. Develop clinically relevant questions to advance learning.

Audience: Graduate
