Develop critical, non-medical skills needed to excel in today's demanding clinical veterinary environment. Emphasizing a strong foundation in areas that complement veterinary medical expertise, fostering a more rewarding career, improving patient care, and creating a positive work environment for the veterinary healthcare team. Through a structured approach comprising various modules, including career, communication, ethics, financial, individual and team awareness, leadership, legal, mentorship, practice management, and wellbeing/wellness, delve into essential professional skills for future veterinarians. Explore mental and emotional well-being impacts, including ethical dilemmas, and interpersonal interaction with colleagues and clients. Discuss strategies for finding and building a mentor network. Explore worldview and value differences. Refine and practice communication strategies. Focus on giving and receiving feedback and develop a feedback action plan.
Requisites: Declared in Doctor of Veterinary Medicine DVM with first year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Reflect on and respond to factors, including ethical dilemmas in veterinary medicine, that impact wellbeing of veterinarians.
Audience: Graduate

2. Reflect on your worldview and ethical boundaries, how it may differ from others', and how this affects your decision making and interpersonal relationships.
Audience: Graduate

3. Demonstrate strategies for building teams and finding a mentor.
Audience: Graduate

4. Describe and demonstrate strategies for communicating with colleagues and clients.
Audience: Graduate

5. Give, receive, and develop a plan of action based on feedback as part of a team.
Audience: Graduate

MED SC-V 749 – VETERINARY PROFESSIONAL SKILLS IV
1 credit.

Develop critical, non-medical skills essential for excelling in today's clinical veterinary environment emphasizing the refinement of professional strategies that complement veterinary medical expertise. Advance ability to navigate complex clinical scenarios, such as: communication, leadership, ethics, financial planning, legal documentation, mentorship, practice management, and wellbeing/wellness. Key areas of focus include revisiting and refining personal and professional goals, leadership skill development, and effective client communication, particularly in documenting balanced and equitable medical records. Deepen understanding of the veterinarian-client-patient relationship (VCPR) and be introduced to the intricacies of educating clients on medical care. Emphasizing practical skills such as writing discharge summaries and documenting virtual and phone communications.
Requisites: Declared in Doctor of Veterinary Medicine
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Apply leadership skills and strategies in clinical and professional contexts.
Audience: Graduate

2. Refine personal and professional goals, including revising a personalized mission statement and financial plan for veterinary school and career.
Audience: Graduate

3. Demonstrate effective communication by documenting client interactions, including virtual and phone communications, in a balanced and equitable manner.
Audience: Graduate

4. Write accurate discharge summaries and educate clients on treatment plans and medication administration.
Audience: Graduate

5. Understand the veterinarian-client-patient relationship (VCPR) and its ethical and legal responsibilities.
Audience: Graduate

6. Recognize personal bias in medical documentation and work to mitigate its influence in client records.
Audience: Graduate

7. Develop professional tools, including a resume and cover letter, to support career development.
Audience: Graduate

MED SC-V 775 – EXTERNSHIP
1-12 credits.

Offers opportunities for faculty coordinated experience in the veterinary medical profession outside School of Veterinary Medicine.
Requisites: Declared in Doctor of Veterinary Medicine with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Understand real-world applications of foundational veterinary medical knowledge and skills
Audience: Graduate

2. Apply foundational veterinary knowledge and critical thinking to solve real-world problems
Audience: Graduate

3. Perform select techniques and procedures to develop various skills professional in veterinary medicine
Audience: Graduate

MEDICINE (MEDICINE)

MEDICINE/NURSING/PHM PRAC/SOC WORK 467 – INTERPROFESSIONAL COLLABORATIVE PRACTICE IN HIV CARE
1 credit.

Gain foundational knowledge and skills in interprofessional collaborative practice and HIV care. Explore the roles of medicine, nursing, pharmacy, and social work in the HIV care continuum. Discuss quality team-based care as a member of an interprofessional student team.
Requisites: Declared in Nursing BSN (Traditional, Collaborative, Accelerated), Social Work BSW, Medicine MD, Pharmacy PharmD, or Social Work MSW.
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the history and epidemiology of the HIV epidemic.
Audience: Both Grad & Undergrad

2. Define Interprofessional Collaborative Practice (ICP) and describe the characteristics of effective ICP.
Audience: Both Grad & Undergrad

3. Describe the natural history of HIV disease with and without antiretroviral therapy (ART).
Audience: Both Grad & Undergrad

4. Discuss US Dept of Health and Human Services guidelines and recommendations for prevention, screening, diagnosis, treatment, and management of HIV infection and HIV-related diseases in the United States.
Audience: Both Grad & Undergrad

5. Describe the HIV care continuum including testing, entry and retention in care, and treatment including associated stigma and discrimination as barriers.
Audience: Both Grad & Undergrad

6. Discuss dimensions of wellness (emotional, environmental, financial, intellectual, occupational, physical, social and spiritual).
Audience: Both Grad & Undergrad

7. Identify potential co-morbid conditions in the HIV infected population.
Audience: Both Grad & Undergrad

8. Discuss stigma and discrimination as barriers to prevention, care, and treatment.
Audience: Both Grad & Undergrad

9. Discuss the history of the Ryan White Care Act and other federal and state policies and their current importance in HIV prevention and HIV care.
Audience: Both Grad & Undergrad

10. Identify HIV care needs and common health issues among high risk and vulnerable populations.
Audience: Both Grad & Undergrad

11. Develop a plan of care for an HIV positive individual as part of an interprofessional team.
Audience: Both Grad & Undergrad

12. Develop skills working with mixed teams including undergraduate

MEDICINE 699 – INDEPENDENT STUDY
1-5 credits.

Self-directed work under the supervision and guidance of an Instructor and often in conjunction with a day-to-day mentor that is a graduate student, postdoc researcher or directly with the faculty. Students normally participate in aspects of ongoing research projects.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Undergraduate

2. Read and effectively search scientific literature
Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

MEDICINE 700 – INTRODUCTION TO CLINICAL AND HEALTH INFORMATICS
3 credits.

Overview of the field of applied clinical and health informatics will provide foundational knowledge of the core concepts of clinical and health informatics and how those principles are used to improve health and health care delivery.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the foundational principles and challenges of clinical and health informatics
Audience: Graduate

2. Summarize the use of health records in health care delivery, and practical challenges of their use
Audience: Graduate

3. Illustrate focus areas in informatics, such as public health, population medicine, and consumer informatics
Audience: Graduate

4. Identify emerging technologies in clinical and health informatics
Audience: Graduate

5. Apply health equity principles in evaluation of clinical and health information system and their delivery
Audience: Graduate

MEDICINE/CRB 701 – CELL SIGNALING AND HUMAN DISEASE
1 credit.

Landmark discoveries, as well as current knowledge and controversies in human health, with an emphasis on cancer biology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Critically evaluate the primary literature underlying medical knowledge.
Audience: Graduate

2. Practice presentation and leading discussion of primary literature.
Audience: Graduate

3. Read the basic evidence underlying landmark discoveries and controversies in cancer biology.
Audience: Graduate

4. Understand how grant proposals are written and evaluated.
Audience: Graduate

MEDICINE 702 – CLINICAL AND HEALTH INFORMATION SYSTEMS
3 credits.

Clinical and health information and communication systems form the backbone of our health care delivery system and public health infrastructure. Overview of the core systems used in health care delivery to explore the processes used to analyze, design, implement and evaluate these systems.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the role of information systems in health and health care delivery
Audience: Graduate

2. Summarize the various needs that information systems fill in health care delivery, including clinical, revenue cycle, and population health uses.
Audience: Graduate

3. Identify the steps for analysis, design, implementation, and evaluation of information and communication systems.
Audience: Graduate

4. Understand barriers to effective utilization of information and communication systems.
Audience: Graduate

5. Illustrate key features of clinical decision support and effective clinical documentation.
Audience: Graduate

MEDICINE/NURSING/POP HLTH 705 – SEMINAR IN INTERDISCIPLINARY CLINICAL RESEARCH EVIDENCE
2-3 credits.

Exploration of interdisciplinary clinical research questions including strategies for assessing the evidence and methodology for conducting various types of literature reviews. Emphasizes an interdisciplinary perspective.
Requisites: SOC/POP HLTH 797 and STAT/B M I 542
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop an answerable clinical research question.
Audience: Graduate

2. Search relevant scientific literature using several electronic databases and other sources of evidence (published and unpublished) across disciplines.
Audience: Graduate

3. Manage sources of evidence with reference management software.
Audience: Graduate

4. Critically review published clinical research on a chosen topic.
Audience: Graduate

5. Develop a search strategy and conduct a systematic review or other form of evidence review.
Audience: Graduate

6. Present a planned or actual evidence review to interdisciplinary peers.
Audience: Graduate

7. Describe the implications for translation of the proposed evidence review from an interdisciplinary perspective.
Audience: Graduate

MEDICINE 710 – IMPROVISATIONAL THEATRE FOR SCIENTISTS
1 credit.

Improvisers are experts in storytelling, spontaneity, and using observation skills to adjust to their audiences and team members accordingly. Among other skills, this 5-week course will teach you how to (1) effectively communicate your work to different audiences, (2) adjust your behavior in real time to respond to audience feedback, and (3) manipulate your vocal and physical presence to communicate more effectively.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Effectively communicate your work to different audiences
Audience: Graduate

2. Adjust your behavior in real time to respond to audience feedback
Audience: Graduate

3. Manipulate your vocal and physical presence to communicate more effectively
Audience: Graduate

MEDICINE 720 – ENDOCRINOLOGY AND METABOLISM
3 credits.

Provides a broad grounding in endocrinology and metabolism with an emphasis on human and human-related disorders wherever possible. Explores further the physiological and molecular mechanisms by which the endocrine regulation of metabolism acts to preserve mammalian health, and how dysfunction in these mechanisms leads to disease, with an emphasis on diabetes, obesity and hypertension.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop knowledge of how endocrinology and metabolism act to promote health at the physiological and molecular level, with an emphasis on humans wherever possible.
Audience: Graduate

2. Learn common mechanisms by which endocrine and metabolic dysfunction contribute to the pathophysiology of disease, including diabetes, obesity, and hypertension.
Audience: Graduate

3. Develop knowledge of cutting-edge research findings and common approaches to developing new treatments for metabolic disease and endocrine disorders.
Audience: Graduate

4. Evaluate primary research articles and demonstrate critical reasoning with regards to methods and conclusions.
Audience: Graduate

5. Demonstrate critical thinking with regards to course material through in-class interactive discussion with peers and faculty.
Audience: Graduate

6. Integrate instruction material and personally-researched scientific texts to formulate individual thoughts on topics not directly covered in lecture.
Audience: Graduate

MEDICINE 725 – PERCEPTIONS OF AGING
1 credit.

Designed to provide a broad understanding of how aging and the science of aging is perceived by the public, with an emphasis on the critical examination of movies in which aging is a major theme. Discussion topics will include the perception of aging and age-related diseases as a positive or negative theme; the biological plausibility of pro- or anti-aging mechanisms; the accuracy of aging science in media; and the clinical, cultural, and personal perceptions of end-of-life care, death, and bereavement.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Develop knowledge of how aging as well as the science of aging is perceived by the public.
Audience: Graduate

2. Develop knowledge novel techniques and approaches at the cutting edge of aging research.
Audience: Graduate

3. Demonstrate critical reasoning with regards to methods and conclusions drawn in popular media.
Audience: Graduate

4. Demonstrate critical thinking with regards to course material through in-class interactive discussion with peers and faculty.
Audience: Graduate

5. Integrate instruction material and personally-researched scientific texts to formulate individual thoughts on topics not directly covered in lecture.
Audience: Graduate

MEDICINE 750 – CAPSTONE PROJECT IN CLINICAL AND HEALTH INFORMATICS
3 credits.

Collective application of all other Clinical and Health Informatics graduate degree coursework. Addresses all ten American Medical Informatics Association (AMIA) competencies through a summative project to demonstrate the knowledge, skills, and attributes necessary for successfully working in health care informatics.
Requisites: Declared in Clinical and Health Informatics MS program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Effectively analyze, design, implement and evaluate an information or communication solution for a health care organization.
Audience: Graduate

2. Effectively formulate and communicate a project plan.
Audience: Graduate

3. Understand how the stakeholders, processes and culture of an organization impacts an informatics project.
Audience: Graduate

4. Apply leadership and organizational theories to an informatics project.
Audience: Graduate

5. Understand and navigate the unique aspects of a clinical/health informatics project (ex. security, privacy).
Audience: Graduate

6. Evaluate the success of an informatics project using an analytical approach to outcomes data.
Audience: Graduate

MEDICINE 809 – INTERSECTION OF HEALTH CARE AND INCARCERATION
2 credits.

Introduction to mass incarceration, health care systems in carceral settings, incarceration-related health disparities, race-related health disparities, social determinants of health, conducting research within carceral facilities, career pathways in correctional health.
Requisites: Declared in Medicine MD, Physical Therapy DPT, Physician Assistant MPAS, Genetic Counselor Studies MGCS, or Public Health MPH
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how the criminal legal system in Wisconsin and the United States impacts the health of incarcerated people, including mental health and community health concerns.
Audience: Graduate

2. Identify individual and community health challenges for a person once they are released from incarceration, and propose ways to mitigate these challenges.
Audience: Graduate

3. Interpret clinical guidelines for ethical care of incarcerated individuals
Audience: Graduate

4. Recognize ethical conflicts that exist in delivering care in carceral facilities, as well as issues surrounding access or lack of access to relevant research.
Audience: Graduate

5. Develop concepts/best practices for system-wide improvements in the health care of incarcerated and formerly incarcerated individuals.
Audience: Graduate

MEDICINE 880 – THE BODY ELECTRIC: INTERSECTION OF CELLULAR ELECTROPHYSIOLOGY WITH CLINICAL ELECTROCARDIOGRAPHY
2 credits.

Mapping of cellular and conduction perturbations to observed changes on the surface ECG recording for inherited arrhythmia syndromes (e.g., long QT syndrome, Brugada syndrome), drug toxicities (Class IC and III antiarrhythmics, digoxin excess), cardiac arrest, electrolyte disturbances, and metabolic disturbances; Selection of appropriate therapies, including antiarrhythmics and device therapies, and how they affect cardiac electrophysiology and the clinical ECG.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Interpret and integrate ECG manifestations of metabolic causes of cardiac arrest and the non-shockable rhythms.
Audience: Graduate

2. Summarize the fundamental mechanisms of cardiac electrophysiology.
Audience: Graduate

3. Relate electrical signaling and neurohormonal regulation to cardiac function.
Audience: Graduate

4. Interpret and integrate ECG manifestations of basic mechanisms of cardiac arrhythmias.
Audience: Graduate

5. Interpret and integrate ECG manifestations of inherited arrhythmia syndromes.
Audience: Graduate

6. Compare and contrast basic mechanisms and ECG manifestations of inherited arrhythmia syndromes.
Audience: Graduate

7. Correlate the mechanisms of antiarrhythmic drugs with their effect on cardiac action potential.
Audience: Graduate

8. Interpret and integrate ECG manifestations of antiarrhythmic toxicity.
Audience: Graduate

9. Articulate the basic underpinnings and indications for catheter ablation.

Audience: Graduate

10. Articulate the basic underpinnings, indications for, and ECG manifestations of cardiac pacemakers and implantable cardioverter-defibrillators.
Audience: Graduate

11. Evaluate arrhythmias and therapeutic modalities of patients in the presenting to electrophysiology clinic.
Audience: Graduate

12. Research how arrhythmias are studied in the basic science setting.
Audience: Graduate

13. Categorize antiarrhythmic medications according to their appropriate use.
Audience: Graduate

MEDICINE 902 – CLINICAL & TRANSLATIONAL RESEARCH ELECTIVE
2-6 credits.

Unique opportunity for fourth year medical students in the PhD program to integrate clinical work with a clinical or translational research project, thus providing early exposure and hands-on experience with clinically-oriented research and the integrated career of a physician-scientist in the students' chosen clinical specialty. Course components construct the experience of six weeks in the life of a practicing physician-scientist, balancing clinical practice, research on a project relevant to community public health, study design, manuscript preparation, regulatory meetings, and public outreach - all under the guidance of a dedicated physician-scientist mentor. Intended for MSTP students in Phase 3 of ForWard curriculum
Requisites: Declared in Doctor of Medicine program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of clinical research design
Audience: Graduate

2. Conduct clinical research project
Audience: Graduate

3. Demonstrate ability to integrate clinical medicine and research investigations
Audience: Graduate

4. Apply and adapt knowledge of the research regulatory process
Audience: Graduate

5. Describe the public health needs of the community and state of Wisconsin as they relate to the clinical research project and determine the impact of the research project on those concerns
Audience: Graduate

6. Assess public opinion (community members and constituents) of clinical research
Audience: Graduate

7. Exhibit skills in the analysis of clinical research data
Audience: Graduate

8. Communicate the outcomes and impact of a clinical research project to general public
Audience: Graduate

9. Communicate the results of a clinical research project to an academic audience
Audience: Graduate

MEDICINE 903 – MSTP LONGITUDINAL CLINICAL CLERKSHIP IN GRADUATE SCHOOL
1-12 credits.

This is a required clinical elective for MSTP students during their graduate years. During PhD training, all students are required to participate in a scholarly continuity clinical experience in their fields of interest. Each student will complete and certify 10 half-day sessions or equivalent with an academic clinical mentor and present in the MSTP seminar.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Take effective patient history
Audience: Graduate

2. Perform appropriate physical exam
Audience: Graduate

3. Synthesize acquired basic science knowledge and clinical skills to create differential diagnoses
Audience: Graduate

4. Generate and manage treatment plan
Audience: Graduate

5. Exhibit knowledge of disease and pathophysiology
Audience: Graduate

6. Demonstrate ability to balance medicine and research efforts
Audience: Graduate

7. Apply evidence-based medicine to clinical practice
Audience: Graduate

8. Analyze clinical/translational research literature in field of interest
Audience: Graduate

MEDICINE 905 – THE APPLIED PHYSIOLOGY OF MECHANICAL VENTILATION
2 credits.

Focus on the intersection between the physiology of the respiratory system and the mechanical engineering of ventilators, with particular attention to patient-ventilator interactions. Investigate the important physiologic trade-offs inherent in various strategies of mechanical ventilation. Apply these principles to patients with and without underlying pulmonary disease. Finally, evaluate a landmark study on tidal volume in ARDS, with particular attention to the scientific and ethical controversies that surround the trial. This course involves a modicum of physics and math.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of respiratory system physiology and mechanics
Audience: Graduate

2. Demonstrate familiarity with how ventilators have been engineered
Audience: Graduate

3. Compare and contrast how patients and ventilators interact with each other in a variety of modes of mechanical ventilation and in a variety of disease states
Audience: Graduate

4. Apply understanding of mechanical ventilation to appraise lessons from ARDSNet trial
Audience: Graduate

5. Describe ethical and scientific challenges in establishing an appropriate control group for a clinical trial
Audience: Graduate

MEDICINE 906 – ACE ACUTE CARE FOR ELDERLY CONSULTATION SERVICES ELECTIVE
2 credits.

Working directly as part of the inpatient consult team at the UW Hospital, an opportunity to practice and improve inpatient care skills for hospitalized elders. Learn to use basic assessment tools to diagnose and care for patients with common geriatric syndromes, such as delirium, cognitive impairment, depression, and falls. Learn to use prescription techniques better suitable for elderly patients, expand understanding of how medical decision-making capacity is assessed, and adopt multi-disciplinary strategies to manage patients' long-term care goals.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Use basic capacity evaluation and diagnostic tools to assess elders for common geriatric syndromes.
Audience: Graduate

2. Practice inpatient management of these syndromes, and strategies for improving care transitions.
Audience: Graduate

3. Recognize and address polypharmacy and learn prescribing techniques that are appropriate for the patient's age.
Audience: Graduate

4. Develop basic strategies for holding goals of care conversations, and how to structure a multi-disciplinary plan of care.
Audience: Graduate

5. Become familiar with how medical decision-making capacity is assessed and the diagnostic tools used to determine capacity.
Audience: Graduate

6. Develop skills to improve the functional trajectory of the older patient through a collaborative, interdisciplinary approach.
Audience: Graduate

MEDICINE 907 – INPATIENT ENDOCRINOLOGY/DIABETES CONSULTS ELECTIVE
2 credits.

Involves patient care in the hospital, working in the role of a consultant. Improve knowledge and inpatient care management skills of common endocrine conditions, diabetes and thyroid disorders. Discusses other, less common, endocrinopathies as they present, including pituitary, adrenal and thyroid disorders.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Improve knowledge of inpatient and diabetes management in the acute care setting.
Audience: Graduate

2. Perform a hypothesis driven history
Audience: Graduate

3. Complete a targeted exam
Audience: Graduate

4. Develop and present a weighted differential diagnosis
Audience: Graduate

5. Using clinical evidence, select a working diagnosis
Audience: Graduate

6. Present diagnostic plan including laboratory and imaging modalities
Audience: Graduate

7. Present initial patient evaluation including assessments and plans
Audience: Graduate

8. Practice communicating effectively with interprofessional team members
Audience: Graduate

MEDICINE 908 – MY STORY:TECHNIQUES FOR INTERVIEWING PATIENTS
2 credits.

Teaches students My Life, My Story interviewing and writing techniques. My Life, My Story is a novel healthcare intervention developed at the Madison VA hospital. Program staff and trained community volunteer interview Veterans about their life stories and write up a short story based on the interview. These stories are then reviewed by the veteran and (with veteran approval) added to the VA medical record to be shared with the veteran's inpatient and primary care teams. The veteran also receives printed copies of the story for his/her family. The goal of the project is to foster a closer connection between VA providers and Veterans in their care.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate patient centered interviewing skills including nonjudgmental verbal and non-verbal communication
Audience: Graduate

2. Translate a patient story into a written summary while respecting human dignity and diversity
Audience: Graduate

3. Demonstrate efficient use of time when interviewing patients, and both writing and presenting patient stories
Audience: Graduate

MEDICINE 909 – INFECTIOUS DISEASE TRANSPLANT SERVICE ELECTIVE
2 credits.

Infectious disease management skills with a focus on transplant patients. Interaction occurs on the inpatient infectious disease transplant consult service at UW Hospital. In addition to extensive knowledge of infectious diseases in transplant patients, there is also an emphasis on major toxicities and drug interactions between antimicrobial agents, understanding the "net state of immunosuppression," and honing skills as a consultant in the hospital.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop and apply knowledge and skills in the practice of inpatient clinical infectious disease management with a focus on transplant patients.
Audience: Graduate

2. Discuss the “net state of immunosuppression.”
Audience: Graduate

3. Recognize major toxicities and drug interactions between antimicrobial agents.
Audience: Graduate

4. Demonstrate understanding of the role of consultants in the hospital.
Audience: Graduate

5. Perform a hypothesis driven history.
Audience: Graduate

6. Complete a targeted exam.
Audience: Graduate

7. Develop and present a weighted differential diagnosis.
Audience: Graduate

8. Using clinical evidence, select a working diagnosis.
Audience: Graduate

9. Present diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

10. Interpret imaging and laboratory findings in the context of patient presentation.
Audience: Graduate

MEDICINE 910 – PHASE 3 INDEPENDENT READING AND RESEARCH IN MEDICINE
2-8 credits.

Independent research under the direct supervision of Medicine faculty. Each student's research project is individualized to meet student research goals within the context of faculty research needs.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Engage in clinical research through an apprenticeship-style learning experience with a physician-scientist mentor.

Audience: Graduate

2. Understand clinical research design by writing or contributing to a research proposal.
Audience: Graduate

3. Develop skills in the analysis of clinical research data.
Audience: Graduate

4. Develop a plan for communicating the results of the clinical research project.
Audience: Graduate

5. Improve verbal and written communication skills by preparing findings to be able to present clinical research experience and results.
Audience: Graduate

6. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research.
Audience: Graduate

7. Conduct a thorough literature review of the specific research question.
Audience: Graduate

8. Select and apply statistical methodologies appropriate for the proposed analyses.
Audience: Graduate

9. Interpret results correctly and in context of previous findings from literature review.
Audience: Graduate

MEDICINE 911 – ADVANCED APPLIED CLINICAL INFORMATICS (APPLIED CLINICAL INFORMATICS PRACTICUM)
2 credits.

Clinical Informatics and the role of informaticians. Hands-on experience in Clinical Informatics within UW Health's Information Services and Physician Informatics infrastructure. Population health informatics. The principles of usability, human-computer interaction, and the Five Rights of clinical decision support. The components of implementing novel informatics tools in a large health system. The usability and impact of new Electronic Health Records (EHR) features on various users and populations and the various factors involved in decisions to approve or deny EHR requests.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the field of Clinical Informatics and the skills of an informatician.
Audience: Graduate

2. Appraise new EHR features for their usability and impact on patients, providers, the health system, and entire population.
Audience: Graduate

3. Define population health informatics.
Audience: Graduate

4. Explain to non-informaticist colleagues why certain EHR requests may get approved or denied based on workload, budget, operational considerations, and technical feasibility.
Audience: Graduate

5. Interpret and evaluate clinical informatics literature.
Audience: Graduate

6. Apply principles of usability, human computer interaction, and the “Five Rights” of clinical decision support to promote or refute new EHR requests or features.
Audience: Graduate

7. Discuss the necessary components for implementing novel informatics tools in a large health system.
Audience: Graduate

8. Demonstrate professionalism in evaluating and discussing Clinical Informatics topics and technology.
Audience: Graduate

MEDICINE 912 – TRANSPLANTATION, IMMUNOLOGY AND NEPHROLOGY ELECTIVE
2-4 credits.

Evaluate and treat patients on inpatient and outpatient transplant nephrology services. Common conditions include evaluation of transplant patients with AKI and immunology related problems. Learn the basic principles of immunosuppressant management and rejection management. Review biopsies daily with a pathologist and attend surgical transplant Grand Rounds.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop a differential diagnosis for native and transplanted kidney acute kidney injury (AKI).
Audience: Graduate

2. Describe the renal pathology in a transplanted kidney.
Audience: Graduate

3. Perform a hypothesis driven history.
Audience: Graduate

4. Complete a targeted exam.
Audience: Graduate

5. Develop and present a weighted differential diagnosis.
Audience: Graduate

6. Using clinical evidence, select a working diagnosis.
Audience: Graduate

7. Interpret imaging and laboratory findings in the context of patient presentation.
Audience: Graduate

8. Present current literature to support patient care.
Audience: Graduate

9. Communicate effectively with interprofessional team members.
Audience: Graduate

10. Write daily progress notes including assessments and plans using standard format.
Audience: Graduate

11. Present initial and follow up patient evaluations including assessments and plans.
Audience: Graduate

MEDICINE 913 – THE SCIENCE OF CLINICAL THERAPEUTICS
2 credits.

Enhance understanding of clinical therapies and evidence-based best practice in the acute care setting. Apply this knowledge to understand clinical interventions for diseases that are seen commonly in residency: Describe the multiple common diseases and conditions; discuss their molecular biology, physiology, pathophysiology, and pharmacology; choose appropriate pharmacologic and non-pharmacologic therapies; and apply molecular biology, physiology, pathophysiology, and pharmacology to decisions about therapeutic treatment. Appraise published basic science literature and clinical guidelines, and apply knowledge to clinical case scenarios.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe multiple common diseases and conditions
Audience: Graduate

2. Discuss molecular biology, physiology, pathophysiology and pharmacology of these diseases
Audience: Graduate

3. Choose appropriate pharmacologic and non-pharmacologic therapies for these diseases
Audience: Graduate

4. Apply molecular biology, physiology, pathophysiology and pharmacology to decisions about therapeutic treatment of these diseases
Audience: Graduate

5. Appraise published basic science literature and clinical guidelines
Audience: Graduate

6. Apply knowledge to clinical case scenarios
Audience: Graduate

MEDICINE 914 – DATA ANALYTICS FOR POPULATION HEALTH
2 credits.

The main concepts and challenges in medical data gathering and analysis. Identification of aspects of data gathering and measurement, including emerging data sources. Informatics concepts used in population health. Use of a self-reporting tools in an electronic health record to answer population health questions, including those surrounding health equity. Formulation of a population medicine-based clinical question, and development of a reporting strategy to answer the question. Communication of a population medicine issue, including a potential path for improvement and a description of the measurement of any impact of proposed change.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the main concepts and challenges in data gathering and analysis.
Audience: Graduate

2. Identify aspects of data gathering and measurement, including emerging data sources.
Audience: Graduate

3. Understand the informatics concepts used in population health.
Audience: Graduate

4. Learn to use self-reporting tools in an electronic health record to answer population health questions, including those surrounding health equity.
Audience: Graduate

5. Formulate a population medicine based clinical question and develop a reporting strategy to answer the question.
Audience: Graduate

6. Communicate a population medicine issue, propose a potential path for improvement, and describe how any impact of change could be measured.
Audience: Graduate

MEDICINE 916 – PALLIATIVE CARE ELECTIVE
2 credits.

Participating with the care of patients in the Palliative Care Unit, on the Palliative Care Consult Service, and through home visits or outpatient care opportunities, experience and understanding will be gained of fundamental palliative care concepts. Management of common symptoms, such as pain, dyspnea, and anxiety, while practicing and improving specificcommunication skills, such as delivering bad news, determining goals of care, or running a family meeting. Expand understanding of goals of care and decision-making for patients with serious illness, DNR orders, medical decision-making capacity, surrogate-decision-making, care of the patient at end of life, as well as psychosocial issues related to loss, grief, and bereavement.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate understanding of palliative medicine/hospice approach toward patients with serious or life-threatening illness.
Audience: Graduate

2. Experience the consultative and inpatient practice of palliative care and home hospice
Audience: Graduate

3. Improve confidence and skill in the appropriate delivery of bad news and discussing end-of-life issues with patients and families
Audience: Graduate

4. Practice working with interdisciplinary team (physician, nurse, social worker, chaplain) management of patients with serious illness
Audience: Graduate

5. Describe best practice in the appropriate use of opioids and other medical treatment to improve quality of life for palliative care patients
Audience: Graduate

MEDICINE 917 – SMOKING CESSATION: PUTTING EVIDENCE INTO PRACTICE ELECTIVE
2 credits.

Training in use of evidence-based smoking cessation treatments and application of smoking cessation research in order to be able to interpret such evidence throughout your career. A special emphasis will be placed on working with underserved and specific subgroups of smokers (e.g., low-income, racial minorities, mental health status) through specific treatment plans, pharmacotherapy, counseling, including motivational interviewing, and community-based interventions such as quit lines. We will also look at how to use health systems, such as electronic health records in conducting community-participatory research in subpopulations of smokers.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Attain proficiency in selecting and delivering evidence-based smoking cessation treatments.
Audience: Graduate

2. Examine the evidence-base for the 2008 Public Health Service recommendations for treating tobacco dependence.
Audience: Graduate

3. Develop an in-depth understanding of tobacco and tobacco dependence treatment in specific sub-populations (e.g., low-income, racial minorities, mental health status).
Audience: Graduate

4. Explore how systems-level changes, such as changes to electronic health records or accreditation standards, can influence health care and delivery of tobacco dependence treatment.
Audience: Graduate

5. Describe strategies for engagement in community participatory research.
Audience: Graduate

MEDICINE/B M I 918 – HEALTH INFORMATICS FOR MEDICAL STUDENTS ELECTIVE
2 credits.

Biomedical Informatics is an interdisciplinary field that combines knowledge of information sciences and medical sciences to optimize the use and application of biomedical data across the spectrum from molecules to individuals to populations. Offers an overview of the field of health informatics by providing students with the fundamental knowledge of the concepts of health informatics and how technology can be used in the delivery of health care.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe main concepts and challenges in health informatics.
Audience: Graduate

2. Identify the different aspects of electronic health records.
Audience: Graduate

3. Recognize medical safety issues related to chart maintenance and poor systems.
Audience: Graduate

4. Instruct patients in proper use of a personal health record (PHR).
Audience: Graduate

5. Compare and contrast the concept of learning health systems that is patient-centered, population-based, and promotes learning from data.
Audience: Graduate

6. Define population-based care and the informatics underlying it.
Audience: Graduate

7. Recognize different types of clinical decision support.
Audience: Graduate

8. Describe the area of quality measurement and improvement.
Audience: Graduate

9. Formulate how the area of quality measurement and improvement applies to clinical practice.
Audience: Graduate

10. Recognize the types and limitations of different types of quality measures.
Audience: Graduate

11. Formulate a clinical question as an answerable one, and then be able to select the appropriate resource and make optional use of it.
Audience: Graduate

12. Recognize growing role of genomics and personalized medicine in care.

Audience: Graduate

13. Describe and manage ethical issues in privacy and security.
Audience: Graduate

MEDICINE 919 – INDIVIDUALIZED PHASE 3 CLINICAL ELECTIVE IN MEDICINE
2-4 credits.

Care for hospitalized patients on general medicine or hospital medicine services. Admit new patients, round on previously admitted patients, participate in multidisciplinary rounds, and work to transition patients to the next level of care. Evaluate and manage both patients with common inpatient conditions and medically complex patients requiring collaboration with consulting specialties. Complete other patient care related learning activities as assigned by instructors (e.g., literature reviews, presentations on specific topics); these are dependent on the individual student, attending physician, and clinical site.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis, diagnostic and treatment plans.
Audience: Graduate

3. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

4. Review, interpret and present current literature to support patient care.
Audience: Graduate

5. Develop clinically relevant questions to advance learning.
Audience: Graduate

6. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

7. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

MEDICINE 920 – ADVANCED INPATIENT GENERAL MEDICINE ELECTIVE
2-4 credits.

Direct patient care involving a spectrum of acute medical conditions on inpatient hospital units with appropriate supervision from residents and attendings. Generate a weighted differential diagnosis, initial work-up and management for acute medical conditions. Review, interpret, and present current literature pertinent on patient care in primary care setting.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Improve acute inpatient care skills for taking care of adult patients on hospital units.
Audience: Graduate

2. Develop and present a weighted differential diagnosis
Audience: Graduate

3. Review, interpret clinical evidence, and justify the working diagnosis
Audience: Graduate

4. Complete written documentation in a comprehensive, concise, accurate and timely manner
Audience: Graduate

5. Demonstrate techniques of shared decision making with patients about acute medical problems and underlying chronic medical conditions, including possible lifestyle changes to promote improved health.
Audience: Graduate

6. Learn the principles of transitions of care to safely return patients to nursing home or outpatient clinics.
Audience: Graduate

7. Develop clinically relevant questions to advance learning
Audience: Graduate

MEDICINE 921 – AMBULATORY MEDICINE ELECTIVE-STUDENT HEALTH
2-4 credits.

Learn to care for young adults with general medicine problems on the university campus during the academic year. Participate in history taking, diagnosis and treatment plans for patients. Direct supervision by house staff and attending physicians. Attend regularly scheduled supervisor-student meetings, which involve some or all of the following: participating in scheduled procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions, completing problem sets, and preparing for direct patient care as needed. Complete other patient care related learning activities as assigned by instructors (e.g., literature reviews, presentations on specific topics); these are dependent on the individual student, the patients under the student's care, and the location.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022
Learning Outcomes: 1. Manage common ambulatory illnesses and injuries among adolescents and young adults.
Audience: Graduate

2. Apply principles of preventive medicine to clinical services in primary care.
Audience: Graduate

3. Integrate developmental and behavioral stages while assessing and managing health risks.
Audience: Graduate

4. Participate collaboratively in a multidisciplinary primary health care system.
Audience: Graduate

MEDICINE 922 – AMBULATORY GENERAL INTERNAL MEDICINE ADVANCED ELECTIVE
2-4 credits.

Focuses on fundamental aspects of adult patient health important to all physicians in internal medicine. Work with academic faculty in adult patient health in the ambulatory setting to refine clinical knowledge and skills essential for providing excellent health care. Will have the opportunity to provide supervised preventative care to adults of all ages, and includes common diseases such as asthma, migraine headache, dyslipidemia, diabetes mellitus, musculoskeletal concerns and heart disease.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Improve ambulatory care skills for taking care of adult patients.
Audience: Graduate

2. Identify and address comment adult health problems and concerns.
Audience: Graduate

3. Build skills as an outpatient practitioner.
Audience: Graduate

4. Develop and present a weighted differential diagnosis.
Audience: Graduate

5. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

MEDICINE 923 – APPLICATIONS OF EPISTEMIC PRINCIPLES IN MEDICAL SCIENCE
2 credits.

Explore the intellectual framework upon which medical science is built. Epistemology is the science and theory of knowing. It asks, "When is belief justified?" Gain an understanding of the foundational principles of epistemology, including rationalism and empiricism, and apply them to the development of medical knowledge. Assess the validity of claims, including the relative value of competing claims in the context of medical controversies. Uncover the epistemic blunders that led to mistaken beliefs in the medical profession and develop habits to resist repeating such mistakes in the present and future. Consider how our epistemological beliefs affected our responses to the Covid-19 pandemic.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Compare and contrast the promises and pitfalls of empiricism and rationalism in the context of medical science.
Audience: Graduate

2. Describe how the Evidence-Based Medicine movement fits in a historical context.
Audience: Graduate

3. Evaluate studies on the grounds of internal and external validity.
Audience: Graduate

4. Judge the validity of competing claims in a scientific controversy.
Audience: Graduate

5. Identify early warning signs of epistemic blunders and build mental habits to protect against them.
Audience: Graduate

6. Anticipate the epistemic challenges posed by novel or rapidly changing circumstances.
Audience: Graduate

MEDICINE 924 – CLINICAL TEACHING IN INTERNAL MEDICINE ELECTIVE
2 credits.

Resident-level experience in clinical teaching. Teach, coach, and provide feedback to Phase 2 medical students in the clinical setting of Acute Care. Assist in case-based learning and present your own didactics. Develop as a future educator and contribute to quality improvement of the Acute Care curriculum.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Hone evidence-based coaching skills when observing and providing feedback.
Audience: Graduate

2. Develop curriculum to teach students about common acute medical conditions.
Audience: Graduate

3. Effectively facilitate small group discussions.
Audience: Graduate

4. Assess feedback given by faculty mentor.
Audience: Graduate

5. Develop goals for future teaching.
Audience: Graduate

6. Evaluate the Acute Care Block activities and recommend changes
Audience: Graduate

MEDICINE 925 – HIV FUNDAMENTALS
2 credits.

Understanding of HIV global and local epidemiology, disease pathogenesis and treatment. Clinical skills through direct patient care. HIV treatment, side effects, and monitoring for response. Social determinants of health relative to AIDS.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe epidemiology of HIV/AIDS in the USA and globally.
Audience: Graduate

2. Formulate prevention and elimination strategies and describe their limitations.
Audience: Graduate

3. Summarize the pathophysiology of HIV infection.
Audience: Graduate

4. Identify different diagnostic and follow-up tests for HIV/AIDS.
Audience: Graduate

5. Recognize, diagnose, and treat acute HIV infection.
Audience: Graduate

6. Summarize the guidelines on whom to treat, when to treat, and which antiretroviral treatment to choose.
Audience: Graduate

7. Identify the different classes of HIV medications and their mechanisms of action.
Audience: Graduate

8. List the principles of HAART resistance, tests, and alternate treatments.

Audience: Graduate

9. Identify the clinical presentation, diagnoses, and management of common opportunistic infections.
Audience: Graduate

10. Manage HIV-HCV and HIV-HBV co-infections.
Audience: Graduate

11. Perform a history and physical examination of HIV patients.
Audience: Graduate

12. Summarize the team approach to management for HIV patients and the critical importance of ancillary health care professionals in the care of HIV/AIDS patients.
Audience: Graduate

13. Coordinate care with HIV pharmacists, nurses, social workers, and other health care professionals.
Audience: Graduate

MEDICINE 927 – COGNITIVE DECLINE IN LATINOS: THE INTERSECTION OF POLICIES, COMMUNITIES, AND HEALTHCARE
2 credits.

Introduces the diagnosis, treatment and management of cognitive decline in Spanish-Speaking populations, including the socioecological evaluations and coordination of care with community agencies after a diagnosis is made. Explore the intersections of health, culture and environment and delves into how public policies, healthcare processes and organizational factors affect the quality of care delivered to Spanish-Speaking individuals, and the availability and use of resources in the community.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify at least three (3) cultural factors, policies, practices and systems that impact healthcare delivery within Latino communities and the potential approaches to incorporate in practice to improve the care.
Audience: Graduate

2. Simulate communication strategies for culturally sensitive interactions with Latino patients and their primary family caregivers.
Audience: Graduate

3. Synthesize the processes and assessments required to diagnose and manage cognitive decline in Spanish-speaking Latino patients.
Audience: Graduate

MEDICINE 928 – INTERNAL MEDICINE INTERNSHIP PREP COURSE (IPC) ELECTIVE
1 credit.

Review and reinforce baseline skills needed for internship training in Internal Medicine. Lead and participate in simulations. Explore the interplay between medical care and communication. Discuss common challenges encountered early in residency and throughout a medical career and develop individualized plans to address these challenges. Major topics include acute illness, mock paging, cardiology/pulmonary, urgent and emergent situations, procedural skills, and communication.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop and practice an approach to initial assessment and management of various acute medical problems seen during Internal Medicine residency, with an emphasis on acute decompensation.
Audience: Graduate

2. Lead complex conversations on bad news, adverse events, and continuity of care in supervised simulations.
Audience: Graduate

3. Rapidly interpret diagnostic studies like EKGs, labs, and radiographs through frequent simulation.
Audience: Graduate

MEDICINE 930 – WOMEN'S HEALTH IN PRIMARY CARE ELECTIVE
2-4 credits.

Focuses on fundamental aspects of women's health important to all physicians in internal medicine. Work with academic faculty in women's health in the ambulatory setting to refine clinical knowledge and skills essential for providing excellent health care to women. Will have the opportunity to provide supervised preventative care to women of all ages, and includes common diseases such as asthma, migraine headache, dyslipidemia, diabetes mellitus, and heart disease - many have manifestations, risk factors or interventions which are different in women.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2019
Learning Outcomes: 1. Improve ambulatory care skills for taking care of women patients.
Audience: Graduate

2. Identify and address comment women health problems and concerns.
Audience: Graduate

3. Build skills as an outpatient practitioner.
Audience: Graduate

4. Develop and present a weighted differential diagnosis.
Audience: Graduate

5. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

MEDICINE 931 – COMMUNITY, CULTURE & HEALING: ADDRESSING SUBSTANCE USE IN AMERICAN INDIAN/ALASKA NATIVE POPULATIONS
2 credits.

Explore the intersection of historical trauma, public health, and addiction treatment within American Indian and Alaska Native (AN) communities. Examine how historical and intergenerational trauma contribute to disparities in substance use and inform approaches to culturally responsive care. Review epidemiological data and public health strategies used to address opioid use disorder (OUD) as a key priority in the Indian Health Service and Tribal health systems. Evidence-based prevention, treatment, recovery, and harm reduction approaches will be evaluated in the context of Tribal communities. Emphasis is placed on the importance of interdisciplinary collaboration and the integration of traditional AN healing practices and community-based approaches in addiction treatment.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Analyze the historical and intergenerational trauma that contributes to addiction disparities among American Indian/Alaska Native (AI/AN) populations and explain how these legacies inform culturally responsive care.
Audience: Graduate

2. Interpret and apply epidemiological data and public health strategies to address opioid use disorder (OUD) as a priority within the Indian Health Service and Tribal health systems.
Audience: Graduate

3. Evaluate evidence and practice-based strategies for opioid use disorder (OUD) prevention, treatment, recovery and hard reduction, highlighting community led initiatives by Tribal governments and organizations.
Audience: Graduate

4. Summarize the importance of interdisciplinary collaboration in addiction treatment.
Audience: Graduate

5. Integrate Indigenous traditional healing as evidence and practice-based approaches to care.
Audience: Graduate

MEDICINE 932 – BIOLOGY OF AGING AND AGE-RELATED DISEASES
2 credits.

Examine the biology of aging and related clinical aspects in geriatric care. Designed for medical students interested in understanding the biology of aging and how it relates to translational biomedical and clinical research as well as clinical practice. Aging and age-related diseases are examined via the combined expertise of basic scientists and clinicians in blocks of two lectures. Case studies and clinical research study design workshops provide the means to integrate didactic content in real world application. Additional materials include video vignettes focused on aging biology and on pharmacological interventions for the most common geriatric conditions.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate understanding of biology of aging and age-related diseases and disorders (KP1)
Audience: Graduate

2. Integrate scientific evidence into clinical practice concepts (KP1, KP2)
Audience: Graduate

3. Effectively communicate basic science concepts related to aging and age-related diseases and disorders (PL3, IC3)
Audience: Graduate

4. Demonstrate the ability to critically evaluate both basic science and clinical literature and use them to make decisions (KP2, PL1)
Audience: Graduate

5. Develop basic clinical research design plans utilizing integrated knowledge from modules and scientific literature
Audience: Graduate

6. Demonstrate conceptual proficiency in fundamental biology of aging with translational focus
Audience: Graduate

7. Demonstrate conceptual proficiency in mechanisms of disease or therapeutics in geriatric diseases and disorders
Audience: Graduate

8. Demonstrate basic clinical research design proficiency
Audience: Graduate

9. Show development of critical thinking skills including critical appraisal of medical literature
Audience: Graduate

10. Demonstrate understanding of evolution of clinical medicine with regard to incorporation of aging biology concepts into diagnosis and treatment in a geriatric setting
Audience: Graduate

MEDICINE 933 – GERIATRIC ELECTIVE
2-4 credits.

Exposure to patients in outpatient clinic and on the inpatient consult service. Other exposure to patients may occur in a nursing home setting. Learn diagnostic tools to assess elders for common geriatric syndromes including cognitive impairment, depression, and falls. Gain knowledge to recognize and address poly-pharmacy, learn prescribing techniques that are appropriate for the patient's age, and recommend age-appropriate treatment plans. Active role on the inpatient consult team focusing on the care of hospitalized elders.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Improve ambulatory care skills for taking care of older adults.
Audience: Graduate

2. Identify and address commons problems for hospitalized elders.
Audience: Graduate

3. Build skill as an inpatient consultant
Audience: Graduate

4. Develop skills to care for older adults in long-term care settings, such as nursing homes.
Audience: Graduate

MEDICINE 935 – HEMATOLOGY/ONCOLOGY ELECTIVE
2-4 credits.

Exposure to patients in outpatient hematology and oncology clinics and on the inpatient consultation service. Oncology-focused rotation topics include staging and prognosis of different malignancies, basics of chemotherapy classes, and indications for chemotherapy. Hematology content includes the diagnostic approach to clotting disorders, anemia, and/or abnormal blood counts. Different chemotherapy treatments for hematologic malignancy may be included in this course. Independent reading is expected; didactic conferences are site-specific.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop a diagnostic and therapeutic approach to patients with solid tumors and hematologic disorders.
Audience: Graduate

2. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

3. Develop and present a weighted differential diagnosis.
Audience: Graduate

4. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

5. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

6. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

14. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

MEDICINE 938 – INPATIENT ACTING INTERNSHIP-INTERNAL MEDICINE
4 credits.

As an inpatient medicine acting intern (AI), you will have primary responsibility for patients actionable in four domains: 1. Management: As an AI, you will develop actionable management and treatment plans based on your history, physical exam and targeted data. 2. Communication: AIs will communicate with colleagues, primary care providers and consultants. AIs will demonstrate thorough patient hand-offs and write concise discharge summaries that will be integral to patient care. 3. Learning: Patient care issues will be the central guide for learning, directing reading, consultation and research. AIs will formulate questions based upon clinical dilemmas, research the appropriate literature and databases to find the answers, and apply findings to the care of individual patients. 4. Organization: As the primary inpatient provider for patients, AIs will develop efficiency in accomplishing the day to day tasks necessary for the coordination and management of patient care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history
Audience: Graduate

2. Complete a targeted exam
Audience: Graduate

3. Develop and present a weighted differential diagnosis (EPA 2)
Audience: Graduate

4. Using clinical evidence, select a working diagnosis (EPA 2)
Audience: Graduate

5. Present diagnostic plan including laboratory and imaging modalities
Audience: Graduate

6. Interpret imaging and laboratory findings in the context of patient presentation
Audience: Graduate

7. Write admitting and daily orders (EPA 4)
Audience: Graduate

8. Justify orders based upon working diagnosis and cost-effectiveness (EPA 4)
Audience: Graduate

9. Complete written patient evaluation using standard format
Audience: Graduate

10. Write daily progress notes including assessments and plans using standard format
Audience: Graduate

11. Present initial patient evaluation including assessments and plans
Audience: Graduate

12. Based on case load, develop clinically relevant questions to further individual and team learning
Audience: Graduate

13. Give and receive patient handovers (EPA 8)
Audience: Graduate

MEDICINE 940 – ALLERGY AND CLINICAL IMMUNOLOGY ELECTIVE
2-4 credits.

Exposure to patients in an outpatient clinic setting with an attending physician and staff, to learn how to address common allergic disorders, such as allergic rhinitis, asthma, urticaria, drug and insect allergy. Focuses on skills in allergy-related history-taking, procedures used in the evaluation of allergy, and the importance of patient education and preventive management of allergic conditions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Improve knowledge of diagnosis and management of allergic and immunologic disorders.
Audience: Graduate

2. Apply basic science knowledge in the clinical setting.
Audience: Graduate

3. Obtain patient's allergy history.
Audience: Graduate

4. Demonstrate understanding of procedures used in the evaluation of allergy.
Audience: Graduate

5. Provide appropriate patient education and preventive management.
Audience: Graduate

MEDICINE 942 – CLINICAL ELECTROPHYSIOLOGY ELECTIVE
4 credits.

Develop skills in basic electrocardiogram (EKG) and arrhythmia interpretation, pharmacologic management of arrhythmia, cardiac anatomy and use of electrophysiologic testing. Participate in the evaluation of patients referred for electrophysiology studies, focusing on the diagnosis and management of cardiac rhythm disturbances.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop skills in basic electrocardiogram (EKG) and arrhythmia interpretation.
Audience: Graduate

2. Become familiar with pharmacologic management of arrhythmia, cardiac anatomy.
Audience: Graduate

3. Use electrophysiologic testing to diagnose and manage cardiac rhythm disturbances.
Audience: Graduate

MEDICINE 943 – CARDIOLOGY CONSULTATION SERVICE ELECTIVE
2-4 credits.

Opportunities to learn the process involving the evaluation and management of a full spectrum of acute and chronic cardiovascular diseases, as well as preoperative consultation for hospitalized adult patients. Become familiar with the principles of effective consultation and how to operationalize this role, through evaluating patients, presenting relevant data, providing effective cardiac consultation as an integral member of a fast-paced inpatient team. Essential skills are taught, including: interpreting 12-lead electrocardiograms (ECGs) and cardiac rhythm data from telemetry with assistance, observing select cardiac diagnostic tests and reading studies with faculty or fellows. Attendance at weekly Cardiovascular Medicine Grand Rounds is required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Become familiar with the evaluation and management of acute and chronic, often complex, cardiovascular conditions such as arrhythmias, MI, heart failure, valvular disease and shock that occur in adult patients hospitalized for other illnesses, traumatic injuries or surgery.
Audience: Graduate

2. Assess preoperative risk for non-cardiac surgery.
Audience: Graduate

3. Learn the indications for and data provided by common cardiac diagnostic tests including electrocardiogram (ECG), echo, stress tests, and coronary angiography.
Audience: Graduate

4. Learn the principles of consultation and how to function effectively in this role.
Audience: Graduate

5. Demonstrate competency in the performance of cardiovascular history and physical examinations.
Audience: Graduate

6. Accurately read and interpret normal ECGs with common abnormalities.

Audience: Graduate

7. Correlate cardiac laboratory information, such as: diagnostic coronary angiography, hemodynamic monitoring, and results in electrophysiological testing.
Audience: Graduate

8. Recognize the major signs and symptoms of cardiac disease.
Audience: Graduate

9. Evaluate and recommend appropriate diagnostic testing for common cardiovascular conditions.
Audience: Graduate

10. Witness cardiac catheterizations, various types of stress testing, and echocardiograms.
Audience: Graduate

11. Accurately interpret the results of various cardiovascular diagnostic tools.
Audience: Graduate

MEDICINE 945 – INPATIENT CARDIOLOGY
2-4 credits.

Supervised by house staff and attending physicians activities include: rounding on service patients, participating in scheduled procedures, presenting cases and teaching topics, and discussing patient cases. On an inpatient cardiology rotation, evaluate and manage a full spectrum of patients with acute and chronic cardiovascular problems and may provide perioperative consultations for hospitalized adult patients. Care for patients with chest pain, arrhythmias, MI, heart failure, valvular disease and shock. Learn the indications for and data provided by common cardiac diagnostic tests including ECG, echo, stress tests, bedside ultrasound and coronary angiography.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

MEDICINE 949 – ADULT INPATIENT/OUTPATIENT CARDIOVASCULAR DISEASES ELECTIVE
2-4 credits.

Exposure to both outpatient and inpatient settings, such as ward rounds, cardiac catheterization and electrophysiology labs, as well as operating rooms, to learn how to obtain an accurate history, perform a thorough cardiovascular examination, interpret patient's treadmill, nuclear, cardiology and echocardiogram performance, formulate an assessment and plan for further evaluation and treatment. Participate in the writing of orders and progress notes on in-patients for whom they are responsible and perform appropriate procedures under the direct supervision of staff. Submit input on patients' management plans, which will be closely supervised by an attending cardiologist.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop skills in diagnosis and management of cardiac patients with congenital and acquired cardiac disorders.
Audience: Graduate

2. Develop skills in the combined medical and surgical approach to cardiovascular disease.
Audience: Graduate

3. Use the appropriate technology and laboratory in the evaluation of patients with known or suspected cardiac disease.
Audience: Graduate

MEDICINE 951 – AMBULATORY CARDIOLOGY ELECTIVE
2-4 credits.

Provide a broad introduction to the cardiovascular syndromes and diseases that constitute a large part of the practice of adult medicine. This experience has been particularly useful for three groups: those who plan to enter an adult primary care discipline, those entering residency in emergency medicine, and those with an interest in adult cardiology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Refine skills in obtaining and interpreting the history provided by patients with chest pain, syncope, heart failure, and palpitations.
Audience: Graduate

2. Perform and interpret the cardiovascular physical exam.
Audience: Graduate

3. Improve ability to define, diagnose and begin the initial management of heart failure, acute coronary syndromes, stable ischemic heart disease, resistant hypertension, atrial fibrillation, and hyperlipidemia.
Audience: Graduate

4. Become familiar with resources for self-study for chest X-ray and electrocardiogram (EKG) interpretation.
Audience: Graduate

5. Develop expertise in the prediction of an individual patient’s cardiovascular risk as well as guideline directed mitigation of that risk.
Audience: Graduate

6. Become familiar with the use of Baye’s Theorem.
Audience: Graduate

MEDICINE 955 – HEPATOLOGY ELECTIVE
2 credits.

Exposure to inpatient and outpatient hepatology practice, focusing on functioning effectively as a consultant. The majority time is spent evaluating new and follow-up consultations in the outpatient and inpatient settings. Oral presentations and effective communication with the patient and the primary service are an essential part of this rotation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the most common causes of chronic hepatitis and cirrhosis seen in the outpatient clinic.
Audience: Graduate

2. List a differential diagnosis, diagnostic and management plans for both new onset liver and decompensated end-liver stage disease.
Audience: Graduate

3. Perform effective and comprehensive evaluation of a patient with liver disease in clinic and the inpatient setting.
Audience: Graduate

4. Perform portions of the role of consulting MD in the inpatient and outpatient settings.
Audience: Graduate

MEDICINE 962 – ENDOCRINOLOGY ELECTIVE
2-4 credits.

Evaluation and management of inpatient and outpatient adult endocrine disorders. Common endocrine conditions include diabetes and thyroid disorders. Other endocrinopathies as they present.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the historical and physical exam features of common endocrine disorders.
Audience: Graduate

2. Perform a hypothesis driven history
Audience: Graduate

3. Complete a targeted exam
Audience: Graduate

4. Develop and present a weighted differential diagnosis
Audience: Graduate

5. Using clinical evidence, select a working diagnosis
Audience: Graduate

6. Complete written patient evaluation using standard format
Audience: Graduate

7. Write daily progress notes including assessments and plans using standard format
Audience: Graduate

8. Present initial patient evaluation including assessments and plans
Audience: Graduate

9. Communicate effectively with interprofessional team members
Audience: Graduate

MEDICINE 965 – GASTROENTEROLOGY CLINICAL ELECTIVE
2-4 credits.

Observe routine and advanced therapeutic endoscopic procedures in the Ambulatory Procedure Center and potentially in the Intensive Care Unit. Participate in the outpatient gastrointestinal (GI) clinics approximately one half day a week, which will include exposure to Inflammatory Bowel Disease, functional GI disorders, hereditary GI cancers, esophageal disorders, and pancreas and biliary disorders.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a focused history and exam and develop an assessment and plan for the most common disorders seen in an outpatient gastrointestinal (GI) practice: irritable bowel syndrome (IBS), inflammatory bowel disease (IBD), gastroesophageal reflux disease (GERD).
Audience: Graduate

2. Identify recommendations for colon cancer screening in patients at average risk and those with a family history of colon cancer.
Audience: Graduate

3. Identify the appearance of common gastrointestinal (GI) pathology on endoscopy.
Audience: Graduate

4. Summarize the appropriate risk stratification strategies and appropriate management of gastrointestinal (GI) hemorrhage.
Audience: Graduate

5. Develop a differential diagnosis for acute)gastrointestinal (GI) bleeding.
Audience: Graduate

MEDICINE 970 – INPATIENT-OUTPATIENT GASTROENTEROLOGY/HEPATOLOGY CONSULT SERVICE ELECTIVE
2-4 credits.

Inpatient consultative gastroenterology emphasize outpatient evaluation care of pts with gastrointestinal (GI) diseases, providing knowledge that nearly any clinical field can use. Develop the necessary problem solving skills and knowledge to efficiently safely evaluate manage common GI disorders other diseases which may also occur in pts with chronic intestinal diseases. Be able to recall the characteristic sign/symptoms test finding in the common GI syndromes. These disorders include: neoplasms of colon, stomach and esophagus; infectious diarrhea; malabsorption syndromes; viral drug-induced hepatitis; other primary secondary gastrointestinal diseases. Evaluation of inpts admissions, ambulatory outpts consults EM consults of the Sect. of GI. These include consultations in general GI hepatology, assisting in the endoscopic procedures on pts to provide a correlation between symptoms/signs endoscopic findings understanding the appropriate use of endoscopy.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Recall the characteristic signs/symptoms and test findings in the common gastrointestinal (GI) disorders of acid-peptic disease; inflammatory bowel disease; irritable bowel syndrome; neoplasms of colon, stomach, and esophagus; infectious diarrhea; malabsorption syndrome; viral and drug inducted hepatitis; and other common primary and secondary gastrointestinal diseases.
Audience: Graduate

2. Evaluate and develop a diagnostic plan for common gastrointestinal and liver diseases.
Audience: Graduate

3. Correlate symptoms with endoscopic and pathologic findings.
Audience: Graduate

4. Efficiently and safely evaluate and manage common gastrointestinal disorders.
Audience: Graduate

5. Recall the major indications, complications, and relative costs of the common gastroenterologic procedures including esophagogastroduodenscopoy, sigmoidoscopy, colonoscopy, and endoscopic retrograde cholangio-pancreatography (ERCP).
Audience: Graduate

MEDICINE 971 – INFECTIOUS DISEASE ELECTIVE
2-4 credits.

Inpatient clinical infectious disease management. Diagnostic approaches to infectious presentations, appropriate use of antimicrobials for treatment and prophylaxis. Role of consultants in the hospital via participation in consult team. Common conditions include cellulitis, line infections, osteomyelitis, septic arthritis, intra-abdominal infections, HIV, neutropenic fever and other infectious conditions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop diagnostic approaches to patients with common infectious presentations.
Audience: Graduate

2. Identify appropriate use of antimicrobials for treatment and prophylaxis.

Audience: Graduate

3. Identify characteristics of an effective consultant and use these through direct participation in the consult team.
Audience: Graduate

4. Perform a hypothesis driven history.
Audience: Graduate

5. Complete a targeted exam.
Audience: Graduate

6. Develop and present a weighted differential diagnosis.
Audience: Graduate

7. Using clinical evidence, select a working diagnosis.
Audience: Graduate

8. Complete written patient evaluation using standard format.
Audience: Graduate

9. Write daily progress notes including assessments and plans using standard format.
Audience: Graduate

10. Present initial patient evaluation including assessments and plans.
Audience: Graduate

11. Communicate effectively with interprofessional team members.
Audience: Graduate

MEDICINE 972 – SURGICAL INFECTIOUS DISEASE ELECTIVE
2-4 credits.

Direct patient care involving a spectrum of surgical infectious diseases on an inpatient consultation service. Applying infectious disease principles in treatment of surgical site infections. Using diagnostic tools available for surgical infectious diseases across different surgical specialties. Reviewing and applying principles of antimicrobial therapy.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize the varied spectrum of surgical infectious diseases across different surgical specialties as well as within the same specialty.
Audience: Graduate

2. Describe infectious disease principles in the context of treatment of surgical site infections.
Audience: Graduate

3. Identify preventive measures of surgical site infections.
Audience: Graduate

4. Recognize the diagnostic tools (microbiologic, radiologic) available for surgical infectious diseases.
Audience: Graduate

5. Review and summarize the principles of outpatient antimicrobial therapy.
Audience: Graduate

6. Identify the practices and values that foster belongingness in partnership with a diverse health care team and patient population (e.g., authenticity, respect, support).
Audience: Graduate

MEDICINE 976 – CLINICAL NEPHROLOGY ELECTIVE
2-4 credits.

Evaluation of patients on inpatient and outpatient adult nephrology services. Common conditions include recognizing and diagnosing the cause of acute kidney injury (AKI), assessing factors that can alter the course of chronic kidney disease (CKD), and knowing the steps to hemodialysis initiation. Diagnosis and management of nephrology patients along with opportunities to see patients pre or post renal transplant.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Refine skills in obtaining and interpreting the history provided by patients with acute and chronic kidney diseases.
Audience: Graduate

2. Complete a targeted exam.
Audience: Graduate

3. Define, diagnose and begin initial management for patients with common acute and chronic kidney diseases.
Audience: Graduate

4. Develop and present a weighted differential diagnosis.
Audience: Graduate

5. Using clinical evidence, select a working diagnosis.
Audience: Graduate

6. Interpret imaging and laboratory findings in the context of patient presentation.
Audience: Graduate

7. Present current literature to support patient care.
Audience: Graduate

8. Communicate effectively with interprofessional team members.
Audience: Graduate

9. Write daily progress notes including assessments and plans using standard format.
Audience: Graduate

10. Present initial and follow up patient evaluations including assessments and plans.
Audience: Graduate

MEDICINE 981 – PULMONARY DISEASE CLINIC / CONSULTS ELECTIVE
2-4 credits.

Focuses on the evaluation and management of patients with pulmonary complaints and complex pulmonary disorders both in the inpatient and outpatient settings. Common conditions include sarcoidosis, obstructive lung disease, interstitial lung disease, pulmonary infections and pleural disease. Learn the indications for and data derived from common pulmonary tests/diagnostic procedures including, pulmonary function tests, radiographic imaging, thoracentesis and fiberopticbronchoscopy withbronchoalveolar lavage and transbronchial biopsy. Indications and management of both non-invasive and invasive mechanical ventilation will also be a focus of this rotation. Finally, learn the principles of consultation and how to function effectively in this role.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Refine skills in obtaining and interpreting the history provided by patients with acute and chronic pulmonary diseases.
Audience: Graduate

2. Complete a targeted exam.
Audience: Graduate

3. Define, diagnose and begin initial management for patients with common acute and chronic pulmonary diseases.
Audience: Graduate

4. Develop and present a weighted differential diagnosis.
Audience: Graduate

5. Using clinical evidence, select a working diagnosis.
Audience: Graduate

6. Interpret imaging, laboratory and procedure findings in the context of patient presentation.
Audience: Graduate

7. Present current literature to support patient care.
Audience: Graduate

8. Write daily progress notes including assessments and plans using standard format.
Audience: Graduate

9. Present initial and follow up patient evaluations including assessments and plans.
Audience: Graduate

10. Learn the indications for, and data derived from common pulmonary tests/diagnostic procedures.
Audience: Graduate

11. Learn the indications and management of both non-invasive and invasive mechanical ventilation.
Audience: Graduate

12. Communicate effectively with interprofessional team members.
Audience: Graduate

13. Learn the principles of consultation and how to function effectively in this role.
Audience: Graduate

MEDICINE 985 – CRITICAL CARE MEDICINE ELECTIVE
2-4 credits.

Perform direct patient care in the ICU with appropriate supervision from residents, fellows, and attendings. Independent and guided evaluation of patient will occur daily; the ability to synthesize, distill and present large amounts of information are a key skill practiced during this course. Furthermore, critical care medicine involves many medical professions; effective inter-professional teamwork is emphasized. Independent reading is expected; didactic conferences are site-specific. Topics commonly addressed in critical care medicine include pulmonary and cardiovascular physiology and pathology, ventilator support, nutritional support, renal failure, fluids and electrolytes in critical illness, and hemodynamic monitoring.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Improved knowledge of diagnostic and therapeutic approach to critically-ill patients with respiratory failure, shock, sepsis, multi-organ failure and/or other life-threatening medical conditions.
Audience: Graduate

2. Perform a hypothesis driven history.
Audience: Graduate

3. Complete a targeted exam.
Audience: Graduate

4. Develop and present a weighted differential diagnosis.
Audience: Graduate

5. Using clinical evidence, select a working diagnosis.
Audience: Graduate

6. Present diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

7. Interpret imaging and laboratory findings in the context of patient presentation.
Audience: Graduate

8. Write admitting and daily orders.
Audience: Graduate

9. Write daily progress notes including assessments and plans using standard format.
Audience: Graduate

10. Present initial patient evaluation including assessments and plans.
Audience: Graduate

11. Summarize patient's hospital course during rounds and manage day to day care.
Audience: Graduate

12. Give and receive patient handovers.
Audience: Graduate

13. Write transfer notes and/or discharge summaries.
Audience: Graduate

14. Communicate effectively with interprofessional team members.
Audience: Graduate

MEDICINE 988 – CLINICAL RHEUMATOLOGY ELECTIVE
2-4 credits.

Exposure to patients in both outpatient rheumatology clinics and seeing patient as consultants in the inpatient setting. Commonly encountered rheumatologic conditions include: osteoarthritis, rheumatoid arthritis, lupus, systemic sclerosis, polyarteritis nodosa, ankylosing spondylitis, gout, pseudogout, dermatomyositis, low back pain and shoulder pain. Involves independent evaluation of patients, and then presenting to an attending. Independent reading is expected; didactic conferences are site-specific.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Improved knowledge and interpretation of clinical and laboratory presentations of rheumatic diseases, including differential diagnosis, diagnostic approach and testing, and planning appropriate therapies.
Audience: Graduate

2. Complete a targeted exam.
Audience: Graduate

3. Present diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

4. Present initial patient evaluation including assessments and plans.
Audience: Graduate

5. Present current literature to support patient care.
Audience: Graduate

6. Communicate effectively with interprofessional team members.
Audience: Graduate

MEDICINE 989 – FROM CYTOKINES TO CARE PLANS: BRIDGING BASIC SCIENCE AND ADULT RHEUMATOLOGIC PRACTICE
2 credits.

Gain an in-depth understanding of foundational and advanced basic science concepts underlying rheumatic diseases. Patient counseling, reinforcing the integration of scientific principles with patient care. Exposure to emerging insights in the field of contemporary research. Apply core scientific concepts to refine mental models of rheumatic disease pathophysiology, diagnosis, and management.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe the basic science principles underpinning foundational rheumatologic processes including Raynaud's phenomenon, Synovitis, and Vasculitis
Audience: Graduate

2. Describe the basic science principles related to advanced rheumatologic concepts including acrocyanosis, mucosal ulcerations, antiphospholipid antibody syndrome, AA amyloidosis, C5 in ANCA-associated vasculitis, BAFF, IL-17, and TNF receptor
Audience: Graduate

3. Summarize common rheumatic tests including ESR, C-reactive protein, ferritin, ANA, rheumatoid factor, ANCA, and antiphospholipid antibodies
Audience: Graduate

4. Explain the above disease mechanisms and diagnostic tests to patients in layman's terms
Audience: Graduate

5. Identify and analyze common patient misconceptions related to rheumatic diseases
Audience: Graduate

6. Summarize effective counseling strategies to address and correct these misconceptions in clinical practice
Audience: Graduate

7. Describe the scientific method used in a clinical and translational research study
Audience: Graduate

8. Describe the application of scientific research to patient care
Audience: Graduate

9. Describe how clinical and translational research findings are discussed with patients
Audience: Graduate

MEDICINE 990 – RESEARCH
1-12 credits.

Independent research under the direct supervision of Medicine faculty. Each student's research project is individualized to meet student research goals within the context of faculty research needs.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Engage in clinical research through apprenticeship-style learning experience with a physician-scientist mentor

Audience: Graduate

2. Understand clinical research design by writing or contributing to a research proposal
Audience: Graduate

3. Develop skills in the analysis of clinical research data
Audience: Graduate

4. Develop a plan for communicating the results of the clinical research project
Audience: Graduate

5. Improve verbal and written communication skills by preparing findings to be able to present clinical research experience and results
Audience: Graduate

6. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research
Audience: Graduate

7. Conduct a thorough literature review of the specific research question
Audience: Graduate

8. Select and apply statistical methodologies appropriate for the proposed analyses
Audience: Graduate

9. Interpret results correctly and in context of previous findings from literature review
Audience: Graduate

MEDIEVAL STUDIES (MEDIEVAL)

MEDIEVAL/FOLKLORE/SCAND ST 235 – THE WORLD OF SAGAS
3 credits.

The Icelandic sagas viewed in their social, cultural, and literary contexts. An introduction to one of the greatest bodies of vernacular literature of the early Middle Ages.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize, describe and analyze shifting geographic, cultural, and ethnic/racial factors in the Northern European region during the Viking Age, and put it into context
Audience: Undergraduate

2. Identify and distinguish between different types of sources used in the study of the Nordic region during the Viking Age
Audience: Undergraduate

3. Demonstrate a general understanding of major scholarly approaches, concepts and current research findings concerning the Nordic region during the Viking Age
Audience: Undergraduate

4. Synthesize information, engage in discussion and research, and argue persuasively about key topics in the Nordic region during the Viking Age
Audience: Undergraduate

5. Analyze the connections between images of the Vikings Age and the wider workings of modern culture
Audience: Undergraduate

6. Guide, mentor and support peers to achieve excellence in practice of the discipline
Audience: Undergraduate

7. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view
Audience: Undergraduate

MEDIEVAL/LITTRANS/RELIG ST 253 – OF DEMONS AND ANGELS. DANTE'S DIVINE COMEDY
3 credits.

Have you ever wondered about human nature? What is our place in this world? Through readings, videos, and original images, explore and discuss Dante's answers from one of the greatest world literary classics, his Divine Comedy. From Hell, through Purgatory to Paradise, we will travel together with Dante in a universal tale of the journey of the human soul. Along the way, learn about Dante, his life and his works, development of literary history, historical and socio-political context of medieval Europe, the Mediterranean and the Middle East. Make connections that cross today's geographic and cultural lines in an exploration of literary topics, the history of ideas, and shared history, pondering universal concepts and patterns in the development of civilization that can still be observed today.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Learn about Dante Alighieri, his life, and works
Audience: Undergraduate

2. Understand medieval civilization and its human culture(s)
Audience: Undergraduate

3. Describe literary, historical, cultural concepts and phenomena
Audience: Undergraduate

4. Analyze from multiple perspectives a text, a situation, a context
Audience: Undergraduate

5. Synthesize information acquired from primary and secondary sources
Audience: Undergraduate

6. Learn the dangers of anachronism
Audience: Undergraduate

MEDIEVAL/LITTRANS 255 – BLACK DEATH AND MEDIEVAL LIFE THROUGH BOCCACCIO'S DECAMERON
3 credits.

Have you ever wondered what it was like to live during the Black Death? Were our medieval and early-modern ancestors different from us, or are we challenged with similar problems? What can we learn from their lives? And, if we could, what could we teach each other? Discuss these topics while reading one of the world's greatest literary classics, Giovanni Boccaccio's Decameron, a text that will make us both laugh and cry. Through reading the Decameron, investigate medicine, art, culture, music, politics, religion, interpersonal and transcultural relations, warfare, fashion, gender and gender roles, as well as everyday life in the Middle Ages and early modernity. Also examines medieval written documents, twentieth-century feminist responses to the Decameron and filmic renditions of it, medieval frescoes, historical descriptions of the plague, and modern descriptions of, and reactions to, the COVID-19 pandemic.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Learn about Giovanni Boccaccio and his Decameron, medieval civilization and its human culture(s)
Audience: Undergraduate

2. Acquire intercultural knowledge and competence and apply them to past and current issues
Audience: Undergraduate

3. Analyze a text, a situation, a context
Audience: Undergraduate

4. Synthesize information acquired from primary and secondary sources
Audience: Undergraduate

5. Learn the dangers of anachronism
Audience: Undergraduate

6. Engage in problem solving
Audience: Undergraduate

7. Develop critical and creative thinking skills
Audience: Undergraduate

8. Engage in effective teamwork
Audience: Undergraduate

9. Design and construct new content based on skills acquired throughout the semester
Audience: Undergraduate

MEDIEVAL/HISTORY/RELIG ST 309 – THE CRUSADES: CHRISTIANITY AND ISLAM
3-4 credits.

An examination of the Crusades from both Christian and Islamic perspectives; the historical, social, and religious context and significance of the Crusades for both Christians and Muslims.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss crusades, interfaith, and cross-cultural relations during the period of crusades and religious violence.
Audience: Both Grad & Undergrad

2. Analyze critically a variety of primary and secondary sources, both orally and in writing.
Audience: Both Grad & Undergrad

3. Interpret critically modern representations and uses of the medieval past.
Audience: Both Grad & Undergrad

4. Assess significant work in the historiography of the medieval period.
Audience: Graduate

MEDIEVAL/FOLKLORE/RELIG ST/SCAND ST 342 — NORDIC MYTHOLOGY
3 credits.

Mythology, literature, ritual, traditions, medieval folklore, and religion from Nordic areas and Scandinavia.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize, describe and analyze cultural phenomena, specifically pre-Christian Nordic Religion, and put it into context.
Audience: Undergraduate

2. Demonstrate an understanding of the major theories, approaches, concepts and current research findings concerning medieval Nordic mythology and religion.
Audience: Undergraduate

3. Synthesize the written and material information and use insight and creativity to demonstrate an understanding of the knowledge base from the field.
Audience: Undergraduate

4. Communicate effectively through written essays, oral presentations and discussion.
Audience: Undergraduate

5. Retrieve, analyze, and interpret the professional and lay literature providing information to both professionals and public.
Audience: Undergraduate

6. Guide, mentor and support peers to achieve excellence in practice of the discipline.
Audience: Undergraduate

7. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view
Audience: Undergraduate

MEDIEVAL/FOLKLORE/LITTRANS/SCAND ST 345 — THE NORDIC STORYTELLER
3 credits.

Exploring the oral nature and performance traditions of folklore, ethnography, tales and ballads, literature and culture from Nordic areas and Scandinavia.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Recognize, describe and analyze cultural phenomena, specifically Nordic Narrative, and put it into context.
Audience: Undergraduate

2. Demonstrate an understanding of the major theories, approaches, concepts and current research findings concerning Nordic Narrative and folklore studies.
Audience: Undergraduate

3. Synthesize the written and material information and use insight and creativity to demonstrate an understanding of the knowledge base from the field.
Audience: Undergraduate

4. Communicate effectively through written essays, oral presentations and discussion.
Audience: Undergraduate

5. Retrieve, analyze, and interpret the professional and lay literature providing information to both professionals and public.
Audience: Undergraduate

6. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view.
Audience: Undergraduate

MEDIEVAL/SCAND ST 407 – INTRODUCTORY OLD NORSE
3 credits.

Designed with a linguistic purpose: to obtain a reading knowledge of Old Norse-Icelandic through the study of Old Icelandic grammar and selections of Old Norse-Icelandic texts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Demonstrate a basic understanding of Old Norse-Icelandic phonology and grammar with a focus on nominal and verbal inflection.
Audience: Undergraduate

2. Read and understand basic Old Norse-Icelandic texts in normalized editions and access more challenging texts with the help of a dictionary.
Audience: Undergraduate

3. Identify the characteristic features of the various genres of Old Norse-Icelandic texts.
Audience: Undergraduate

MEDIEVAL/SCAND ST 408 – INTERMEDIATE OLD NORSE
3 credits.

Designed with a linguistic purpose: to obtain a reading knowledge of Old Norse-Icelandic through the study of Old Icelandic grammar and selections of Old Norse-Icelandic texts.
Requisites: SCAND ST/MEDIEVAL 407
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate sufficient knowledge of Old Norse-Icelandic grammar and vocabulary to read Old Norse- Icelandic texts.
Audience: Undergraduate

2. Read and understand basic Old Norse-Icelandic texts in normalized editions and access more challenging texts with the help of a dictionary.
Audience: Undergraduate

MEDIEVAL/SCAND ST 409 – SURVEY OF OLD NORSE-ICELANDIC LITERATURE
3 credits.

Eddic and skaldic poetry; homilies and saints' lives, kings' sagas, sagas of the Icelanders; mythical-heroic sagas and romances; rimur.
Requisites: MEDIEVAL/SCAND ST 407 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Illustrate knowledge of the major genres of Old Norse-Icelandic literature, including eddic poetry, skaldic poetry, sagas, and mythological texts.
Audience: Both Grad & Undergrad

2. Identify key themes, motifs, and narrative structures within Old Norse literary traditions and place them in their cultural and historical contexts.
Audience: Both Grad & Undergrad

3. Analyze the role of oral tradition, manuscript transmission, and textual preservation in shaping the corpus of Old Norse literature.
Audience: Both Grad & Undergrad

4. Develop skills in close reading, comparative analysis, and critical writing applicable to the study of premodern literature.
Audience: Both Grad & Undergrad

5. Evaluate scholarly interpretations of Old Norse texts and engage with critical debates in the field of medieval Scandinavian studies.
Audience: Graduate

MEDIEVAL/SPANISH 414 – LITERATURE OF THE CASTILIAN MIDDLE AGE (XII-XV CENTURIES)
3 credits.

The study of a particular author, work, topic, or literary genre of the Middle Ages and/or Early Renaissance (through the 15th century): Poema de mio Cid, mester de juglaria, Libro de buen amor, mester de clerecia, El conde Lucanor, La Celestina, etc.
Requisites: (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023
Learning Outcomes: 1. Analyze Castilian medieval literary texts (12th to 15th century).
Audience: Undergraduate

2. Describe the historical, political, social, and cultural context of medieval Castile.
Audience: Undergraduate

3. Apply communication skills in reading, speaking, listening, and writing in Spanish to analyze the form and content of Medieval texts.
Audience: Undergraduate

MEDIEVAL/ART HIST 415 – TOPICS IN MEDIEVAL ART
3 credits.

Advanced topics in Medieval art. Topics may include: "Death and the Afterlife in Medieval Art"; "Civic Art and Architecture and Public Space in Medieval Italy"; "Rome in the Middle Ages"; "Pilgrimage the Cult of the Saints in Medieval Byzantine Art."
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025

MEDIEVAL/ENGL 423 – TOPIC IN MEDIEVAL LITERATURE AND CULTURE
3 credits.

Study of a topic in medieval literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique a particular author, period, genre or issue within the field of medieval literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

MEDIEVAL/ENGL 424 – MEDIEVAL DRAMA
3 credits.

Dramatic traditions of medieval England, from early church rituals performed inside quiet monasteries in the tenth century to the elaborate and often raucous urban guild cycles and morality plays of the fifteenth, and with special attention to the significance of spirituality, work, and play in medieval culture.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify and critique the historical and critical issues surrounding the writing and performing of plays in medieval England.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

MEDIEVAL/ENGL 425 – MEDIEVAL ROMANCE
3 credits.

Important early form of narrative fiction, covering tales of adventure, magic, courtly love, and King Arthur from the twelfth through the fifteenth century.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Identify and critique critical themes in the Medieval Romance genre.
Audience: Undergraduate

2. Identify the importance of this genre in its own time and its influence on later writers.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

MEDIEVAL/ENGL 426 – CHAUCERS COURTLY POETRY
3 credits.

Poetry of the most famous and influential medieval English poet, from his short lyrics on love through his dream visions of talking birds and castles built on ice to the historical romance Troilus and Criseyde. Readings will be in the original Middle English; no prior experience with the language is required.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify and critique critical issues surrounding Geoffrey Chaucer's courtly poetry.
Audience: Undergraduate

2. Develop ability reading texts written in Medieval English.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

MEDIEVAL/ENGL 427 – CHAUCER'S CANTERBURY TALES
3 credits.

Study of the most famous and influential medieval English poet through his best-known work and its playful and profound responses to some of the most pressing literary, social, political, and spiritual issues of his time. Readings will be in the original Middle English; no prior experience with the language is required.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique content, style, and critical issues in Chaucer's Canterbury Tales.
Audience: Undergraduate

2. Recognize the work's relation to key cultural and historical issues in its own time.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

MEDIEVAL/SCAND ST 430 – THE VIKINGS
4 credits.

Within a historical framework, a thorough introduction to the culture, literature, and religion of the Vikings.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

MEDIEVAL/ITALIAN/RELIG ST 440 – POVERTY, ECOLOGY AND THE ARTS: ST. FRANCIS OF ASSISI
3 credits.

Focuses on literature about Francis of Assisi, from medieval accounts to contemporary literature, and related artistic portrayals of St. Francis as a religious symbol and model for economic, political and environmental justice.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Articulate the significance of Francis of Assisi as a multi-faceted historical, literary and symbolic figure, especially in relation to economic and environmental justice and reform.
Audience: Both Grad & Undergrad

2. Read and assess critically a range of literary genres that employ and depict Francis.
Audience: Both Grad & Undergrad

3. Compare interpretive models of Francis in literature and related artistic media over time and contexts.
Audience: Both Grad & Undergrad

4. Craft cogent written analysis of a literary and religious model such as Francis via selected interdisciplinary methods from religious studies, literary and historical scholarship.
Audience: Both Grad & Undergrad

5. Produce a research paper on a critical aspect of the presentation of Francis in selected works, employing one or more disciplinary approaches covered in the course.
Audience: Graduate

MEDIEVAL/SCAND ST 444 – KALEVALA AND FINNISH FOLK-LORE
4 credits.

Kalevala - the national epic of Finaland - and the oral literature of Finland.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Describe the methods and productions folklorists employ in their work by looking at the pioneering work of the early folklorist Elias Lönnrot and by examining the work and products of contemporary folklorists working on topics of Finnish and Finnish-American folklore.
Audience: Both Grad & Undergrad

2. Analyze the connections between expressive performances and the wider workings of culture, as illustrated by the lively interplay between folklore, literature, and popular culture in Finland.
Audience: Both Grad & Undergrad

3. Compare how this Finnish "case study" fits in the global context of folklore and its relation to personal, communal and national identities.
Audience: Both Grad & Undergrad

4. Foster appreciation of the pre-modern and medieval culture of Finland and its manifestations in contemporary popular culture.
Audience: Both Grad & Undergrad

5. Produce well-researched scholarly work that integrates primary materials with critical analysis and secondary scholarship.
Audience: Graduate

MEDIEVAL/FOLKLORE/SCAND ST 446 – CELTIC-SCANDINAVIAN CULTURAL INTERRELATIONS
3 credits.

Examination of shared traditions and historical connections between the North and Northwest of Europe. Readings of medieval and pre-modern Scandinavian, Scottish, Welsh and Irish sagas, histories, talkes. Discussion of the role of folklore in modern Celtic and Scandinavian societies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Interpret medieval Celtic and Scandinavian texts surveyed in the course.
Audience: Undergraduate

2. Recognize and analyze the agendas that medieval and post-medieval writers/creators may have had in creating the works surveyed in this course.
Audience: Undergraduate

3. Distinguish between the verifiable realities of the medieval past and the imaginative renderings these receive in medieval or post-medieval works, applying critical approaches.
Audience: Undergraduate

4. Practice the research, writing, and presentation skills associated with professional scholarship in the fields of Scandinavian Studies, Medieval Studies, and Folklore Studies.
Audience: Graduate

MEDIEVAL/AFRICAN/JEWISH/RELIG ST 462 – MUSLIMS AND JEWS
3 credits.

Explores the historical relationship between Muslims and Jews in a variety of contexts from the seventh century to the present. Surveys literary and cultural exchanges against the background of shifting political and social conditions across the Middle East, Europe, and the United States. Considers also the parallel legacies of anti-Semitism, Orientalism, and Islamophobia. Major themes include comparative religion, secularization, migration, and colonialism, as well as the politics of history and cultural memory. Introduces readings in English translation of medieval and modern texts originally written across languages, and especially in Hebrew and Arabic.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate contextual knowledge of major historical events, figures, social conditions, religious communities, and geographies of Muslim Iberia (al-Andalus) from the eighth to sixteenth centuries
Audience: Undergraduate

2. Situate al-Andalus in relation to wider developments in politics, culture, and religion of the Middle East and North Africa, from the eighth century to the present
Audience: Undergraduate

3. Understand the terms and conditions that have shaped Muslim-Jewish relations from the seventh century until the present, including frameworks of theology, lived religious experience, and Orientalist representation
Audience: Undergraduate

4. Integrate relevant theoretical frameworks, debates, and conversations regarding the distinction between historical writing and cultural memory
Audience: Undergraduate

5. Discern divergent and contradictory representations of the history of al-Andalus in contemporary memory culture
Audience: Undergraduate

6. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in written and visual materials across genres (philosophy, literature, religion, film) as well as in primary and secondary historical sources
Audience: Undergraduate

7. Generate original ideas and texts, through coherent writing and compelling argumentation, by experimenting and taking risks, solving problems, and answering questions in a range of media
Audience: Undergraduate

MEDIEVAL/ENGL 520 – OLD ENGLISH
3 credits.

The elements of Old English grammar with selected readings.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Honors - Accelerated Honors (!)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique the elements of Old English grammar.
Audience: Both Grad & Undergrad

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Both Grad & Undergrad

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

MEDIEVAL/ENGL 521 – ADVANCED OLD ENGLISH LITERATURE
3 credits.

An intensive study of a major work or works of Old English, usually focusing on either Beowulf or the poems of a single manuscript. Line-by-line translation of the text will be supplemented by discussion of related issues (whether linguistic, thematic, or contextual) as well as by readings from relevant critical literature. Primary texts will be read in Old English.
Requisites: MEDIEVAL/ENGL 520
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Honors - Accelerated Honors (!)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020
Learning Outcomes: 1. Critique one or more major works of Old English through intensive close reading and translation.
Audience: Both Grad & Undergrad

2. Explore related linguistic, thematic or contextual issues.
Audience: Both Grad & Undergrad

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Both Grad & Undergrad

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

MEDIEVAL/SPANISH 541 – OLD SPANISH
3 credits.

Historical Spanish phonology, morphology, and syntax, with application to theories of language variation and change.
Requisites: Graduate/professional standing
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2018

MEDIEVAL/LATIN 563 – MEDIAEVAL LATIN
3 credits.

Introduction to chronological, geographical, and generic range of post-classical Latin, including not only the "medieval" period but the late antique, Renaissance, and beyond.
Requisites: LATIN 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Analyze ancient classical Latin texts.
Audience: Undergraduate

2. Interpret ancient classical Latin texts.
Audience: Undergraduate

3. Evaluate ancient classical Latin texts.
Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

MEDIEVAL/GERMAN 651 – INTRODUCTION TO MIDDLE HIGH GERMAN
3 credits.

Middle High German grammar and vocabulary with the goals of fluency and accuracy in reading medieval texts. Covers topics in phonology, morphology, syntax, and lexicon.
Requisites: (GERMAN 249, 258, and 262), (GERMAN 249 and 285), or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

MEDIEVAL/ITALIAN 659 – DANTE'S DIVINA COMMEDIA
3 credits.

Lectures on Dante's life and times, reading Divine Comedy.
Requisites: ITALIAN 321, 322, or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Articulate knowledge of Dante's life and work.
Audience: Undergraduate

2. Master methods of literary and cultural analysis through analyzing and explaining texts.
Audience: Undergraduate

3. Retain a critical understanding of the works studied, synthesize and define a field of inquiry in a persuasive and coherent manner.
Audience: Undergraduate

4. Undertake advanced bibliographical research: identify, select, retrieve, and make effective use of primary and secondary sources.
Audience: Undergraduate

5. Write a competent critical and analytical essay.
Audience: Undergraduate

6. Lead a well-informed discussion of medieval literature and culture utilizing an adequate proficiency of Italian and English.
Audience: Undergraduate

7. Communicate and defend complex ideas in a clear and understandable manner, in both Italian and English.
Audience: Undergraduate

8. Retain a critical understanding of the works studied, synthesize and define a field of inquiry in a persuasive and coherent manner.
Audience: Graduate

9. Undertake advanced bibliographical research: identify, select, retrieve, and make effective use of primary and secondary sources.
Audience: Graduate

10. Demonstrate originality of thinking and insight that reaches beyond the current boundaries of knowledge in the field.
Audience: Graduate

MEDIEVAL/ITALIAN 671 – THE 13TH CENTURY
3 credits.

Systematic study of the earliest literary texts in Italy; the rise of the love lyric among the Sicilian poets; representative narrative works. The development of the lyric from Guittoe d'Arezzo to the poets of the Dolce Stil Nuovo.
Requisites: ITALIAN 321, 322, or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Articulate knowledge of Dante's life and work.
Audience: Undergraduate

2. Master methods of literary and cultural analysis through analyzing and explaining texts.
Audience: Undergraduate

3. Write a competent critical and analytical essay.
Audience: Undergraduate

4. Lead a well-informed discussion of medieval literature and culture utilizing an adequate proficiency of Italian and English.
Audience: Undergraduate

5. Communicate and defend complex ideas in a clear and understandable manner, in both Italian and English.
Audience: Undergraduate

6. Retain a critical understanding of the works studied, synthesize and define a field of inquiry in a persuasive and coherent manner.
Audience: Both Grad & Undergrad

7. Undertake advanced bibliographical research: identify, select, retrieve, and make effective use of primary and secondary sources.
Audience: Both Grad & Undergrad

8. Demonstrate originality of thinking and insight that reaches beyond the current boundaries of knowledge in the field.
Audience: Graduate

MEDIEVAL 699 – DIRECTED STUDY
1-3 credits.

Advanced directed study projects as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2012

MEDIEVAL/GERMAN 755 – OLD GERMANIC LANGUAGES
3 credits.

Old High German, Old Saxon, and Gothic on a rotating basis.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

MEDIEVAL/ENGL 803 – TOPICS IN MEDIEVAL LITERATURE
3 credits.

Study of a topic in Medieval literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MEDIEVAL/SPANISH 842 – SEMINAR-MEDIEVAL LITERATURE
3 credits.

Seminar focusing on literary, textual criticism or theoretical topics relevant to Medieval Spanish literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022

MICROBIOLOGY (MICROBIO)

MICROBIO 100 – THE MICROBIAL WORLD
3 credits.

Primarily for non-science majors. Roles of microorganisms and viruses in nature, health, agriculture, pollution control and ecology. Principles of disease production, epidemiology and body defense mechanisms. Biotechnology and the genetic engineering revolution.
Requisites: Not open to students with credit for MICROBIO 101 or 303.
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand, analyze, and evaluate information effectively.
Audience: Undergraduate

2. Describe what makes up a microorganism. How is the make up different between a microorganism and a human being?
Audience: Undergraduate

3. Define a disease. Describe how your body, your doctor, and the government fight disease.
Audience: Undergraduate

4. Understand where we came from. Analyze the various theories of how life originated and express an opinion on which is most plausible.
Audience: Undergraduate

5. Articulate the positive impacts microbes have on your health, the well-being of their host organisms, the cycling of important elements, and the environment.
Audience: Undergraduate

MICROBIO 101 – GENERAL MICROBIOLOGY
3 credits.

Survey of microorganisms and their activities; emphasis on structure, function, ecology, nutrition, physiology, genetics. Survey of applied microbiology--medical, agricultural, food and industrial microbiology. Intended to satisfy any curriculum which requires introductory level microbiology.
Requisites: CHEM 103, 108, 109, or 115. Not open to students with credit for MICROBIO 303
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the three Domains of the phylogenetic tree of life and draw inferences about evolutionary processes based on phylogenetic trees.
Audience: Undergraduate

2. Describe the basic cell structure of cells (bacteria, archaea, eukarya) and the structure of viruses and explain how this affects microbial function.
Audience: Undergraduate

3. Understand the impact of environmental conditions on microbial growth and how this impacts the abundance and distribution of microbes on Earth.
Audience: Undergraduate

4. Describe how microbes obtain nutrients and energy from the environment and how this is important to food production, waste treatment, sustainability and global ecosystems.
Audience: Undergraduate

5. Describe the flow and exchange of information in microbial cells and populations and understand how this affects microbial diversity and evolution.
Audience: Undergraduate

6. Compare different methods of microbial growth control and their impact on microbes.
Audience: Undergraduate

7. Compare and contrast the different ways in which microbes interact with their human hosts and the impacts on global health and disease.
Audience: Undergraduate

8. Describe the human immune response to microbes.
Audience: Undergraduate

MICROBIO 102 – GENERAL MICROBIOLOGY LABORATORY
2 credits.

Covers techniques and procedures used in general microbiology, including cultivation, enumeration, aseptic techniques, physiology and selected applications.
Requisites: MICROBIO 101, 303 or concurrent enrollment. Not open to students with credit for MICROBIO 304.
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate competencies in microbiological laboratory techniques.
Audience: Undergraduate

2. Isolate and identify bacteria.
Audience: Undergraduate

3. Keep careful records of observations.
Audience: Undergraduate

4. Develop hypotheses, and think critically and make valid conclusions about them.
Audience: Undergraduate

5. Assess the credibility of scientific sources.
Audience: Undergraduate

6. Communicate scientific findings and ideas effectively through writing.
Audience: Undergraduate

MICROBIO 150 – MICROBIOMES AND MICROBIOLOGY - FIRST-YEAR SEMINAR
1 credit.

Introduction to major questions related to the study of the microbiome. Acquire foundational research skills necessary for success as a microbiology or life sciences major. Engage with faculty and their cutting-edge research related to Microbiology. Explore department and campus resources and career options available in the field of microbiology.
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the academic skills and practical steps required to succeed as a microbiology major
Audience: Undergraduate

2. Discuss the research and teaching interests of department faculty
Audience: Undergraduate

3. Describe the variety of career opportunities available to individuals with microbiology and life science backgrounds
Audience: Undergraduate

4. Identify university, college, and department resources that support success at UW-Madison
Audience: Undergraduate

5. Identify credible sources of information related to microbiome research
Audience: Undergraduate

6. Discuss the major research questions in the study of the microbiome
Audience: Undergraduate

MICROBIO 299 – INDEPENDENT STUDY
1-3 credits.

Research work for students under direct guidance of a faculty member in an area encompassing Microbiology. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Investigate a science topic in conjunction with other investigators to develop a deep understanding of a research problem.
Audience: Undergraduate

2. Identify a research problem and develop a series of experiments to test a hypothesis related to the problem under investigation.
Audience: Undergraduate

3. Carry out designed experiments and collect data related to the research problem under investigation.
Audience: Undergraduate

4. Analyze the results of experiments and use them to test the validity of the developed hypothesis.
Audience: Undergraduate

5. Communicate the results of investigations via written and/or oral means to an appropriate audience.
Audience: Undergraduate

MICROBIO 303 – BIOLOGY OF MICROORGANISMS
3 credits.

Basic biology of microorganisms, including structure, function, physiology, genetics, ecology, diversity, and evolution.
Requisites: (ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383, or BIOLOGY/BOTANY 130) and (CHEM 104 or 109) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain the historical context of microbiology from a human and evolutionary perspective.
Audience: Undergraduate

2. Compare different microbial cell structures and predict behaviors based upon those structures.
Audience: Undergraduate

3. Explain how mutations occur in cells, the mechanisms organisms have to combat these changes, and how these changes relate to the evolution of species.
Audience: Undergraduate

4. Predict the modes of growth of microbes based upon the enzymes they contain and the metabolic breakdown of substrates.
Audience: Undergraduate

5. Describe the regulatory paradigms in microbes and predict the changes in behavior that occur when these pathways are disrupted.
Audience: Undergraduate

6. Explain the symbiotic and dysbiotic state in a host-microbe interaction and list factors that can affect this relationship.
Audience: Undergraduate

7. Compare common virulence factors and explain their effect on symbiotic relationships and how these virulence factors contribute to disease.
Audience: Undergraduate

MICROBIO 304 – BIOLOGY OF MICROORGANISMS LABORATORY
2 credits.

Introduction to modern laboratory techniques used to study the distribution and properties of microorganisms.
Requisites: MICROBIO 303 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate proficiency in microscopy, media preparation, aseptic technique, and microbiological measurements.
Audience: Undergraduate

2. Identify representative groups of microorganisms. Those that are important in: antibiotic production, sewage treatment, disease, food manufacturing, and the local environment.
Audience: Undergraduate

3. Characterize microbial isolates from nature and describe their taxonomy.
Audience: Undergraduate

4. Create detailed lab notes that describe accurately the experiments performed.
Audience: Undergraduate

5. Develop hypotheses, design experiments, perform experiments, collect data, analyse data critically, report data to others clearly and accurately, and communicate about scientific topics in a precise manner.
Audience: Undergraduate

MICROBIO 305 – CRITICAL ANALYSES IN MICROBIOLOGY
1 credit.

Train students to become scientific problem-solvers, to critically analyze data, and to comprehend the principles of microbiological research via active discussion of a combination of scholarly papers and contemporary, hot topics in our field.
Requisites: MICROBIO 303 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the breadth of the field of microbiology and nature of the science.
Audience: Undergraduate

2. Describe the scientific method used in presented material.
Audience: Undergraduate

3. Demonstrate critical thinking and problem solving skills through an exploration of seminal papers and cutting-edge research in the field of microbiology.
Audience: Undergraduate

4. Critique primary scientific papers by identifying the hypothesis, analyzing the data being presented, and proposing future experiments or directions for a particular study.
Audience: Undergraduate

5. Communicate analysis of primary literature to others.
Audience: Undergraduate

MICROBIO/FOOD SCI 324 – FOOD MICROBIOLOGY LABORATORY
2 credits.

Lab exercises dealing with food preservation, spoilage, and food poisoning. Isolation, identification and quantification of specific microbes occurring in foods, and food fermentations by bacteria and yeast.
Requisites: (MICROBIO 102 or MICROBIO 304) and FOOD SCI/ MICROBIO 325 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Utilize laboratory techniques to identify microorganisms in food.
Audience: Undergraduate

2. Describe the principles involving food preservation via fermentation processes.
Audience: Undergraduate

3. Demonstrate understanding of the role and significance of microbial inactivation, adaptation, and environmental factors (i.e., water activity, pH, temperature) on growth and response of microorganisms in various environments.
Audience: Undergraduate

4. Identify the conditions, including sanitation practices, under which important pathogens and spoilage microorganisms are commonly inactivated, killed, or made harmless in foods.
Audience: Undergraduate

MICROBIO/FOOD SCI 325 – FOOD MICROBIOLOGY
3 credits.

Principles of food preservation, epidemiology of foodborne illness, agents of foodborne illness, food fermentations and biotechnology.
Requisites: MICROBIO 101, 303, or M M & I 301 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and summarize the impacts of intrinsic and extrinsic factors on microorganisms.
Audience: Undergraduate

2. Calculate and apply thermal processing parameters to reductions in microbial numbers.
Audience: Undergraduate

3. Apply Hazard Analysis Critical Control Point (HACCP) concepts and principles to food production processes.
Audience: Undergraduate

4. Demonstrate knowledge of foodborne microbial pathogens.
Audience: Undergraduate

5. Describe methods and principles of sampling and testing food for microorganisms.
Audience: Undergraduate

6. Compare and contrast the principles, practices, and pathways of food fermentations.
Audience: Undergraduate

7. Analyze and use microbiological data sets.
Audience: Undergraduate

8. Evaluate the benefits and hazards of modern food production, organic foods, and genetically-engineered foods.
Audience: Undergraduate

MICROBIO/BOTANY 335 – THE MICROBIOME OF PLANTS, ANIMALS, AND HUMANS
3 credits.

Examination of the structure and function of microbial communities that live inside and on host organisms (plants, animals, and humans). Introduction to general concepts of the microbiome and microbiota, and their relationship to host nutrition, health, and disease.
Requisites: MICROBIO 101 or 303 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how microorganisms interact with plant and animal (including human) hosts in beneficial, neutral or detrimental ways.
Audience: Undergraduate

2. Express how the environment affects these host-microbe interactions.
Audience: Undergraduate

3. Summarize new molecular and bioinformatic methods that allow for the study of microbial communities.
Audience: Undergraduate

4. Describe how microbial communities are essential for life as we know it, and the processes that support life.
Audience: Undergraduate

5. Articulate several ways in which microbial communities are essential to plant and animal (including human) health.
Audience: Undergraduate

6. Explain our current knowledge about the diversity of microbial life and why its effects and potential benefits have not been fully explored.
Audience: Undergraduate

MICROBIO 345 – INTRODUCTION TO DISEASE BIOLOGY
3 credits.

Introduces the rich biology of infectious disease and how it impacts the biology of humans and other organisms, through the lens of global health. Steps beyond a narrow focus on the biological dimensions of disease to also cover the social, political, and cultural factors that shape the spread and persistence of disease in natural populations. Includes a survey of the various types of pathogens and the science behind infection, transmission, evolution, and virulence.
Requisites: ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe different types of parasites/pathogens and their modes of transmission
Audience: Undergraduate

2. Summarize the function of the human immune system in protecting against disease and in causing some of the damages associated with disease
Audience: Undergraduate

3. Read and analyze data on the health status of populations
Audience: Undergraduate

4. Assess environmental, medical and political strategies for controlling infectious diseases
Audience: Undergraduate

5. Identify the evolutionary processes that lead to adaptation and biological diversity
Audience: Undergraduate

6. Describe the genetic and behavioral reasons why there are increasing numbers of antibiotic resistant infections
Audience: Undergraduate

7. Evaluate global progress toward reaching MD6—to reduce the burden of HIV, TB, Malaria and other diseases
Audience: Undergraduate

8. Critically evaluate and effectively use textbooks, current research literature, online information, as well as information related to scientific and biological issues in the popular press
Audience: Undergraduate

MICROBIO 357 – GENERAL BIOINFORMATICS FOR MICROBIOLOGISTS
3 credits.

Provides foundational introduction to bioinformatics for microbiologists. Emphasis on the basic understanding of bioinformatics tools, analysis, and databases and their applications (e.g. Sequence alignment, Phylogenetic trees, Genome analyses). Topics include: command line manipulation, sequence alignment, file formats, phylogenetic trees, standard genome and protein databases, interpretation of microbial and viral genomes, and basic scientific computer programming.
Requisites: MICROBIO 303, BIOCHEM 501, 507, or graduate/professional standing
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform basic command line operations to navigate through an operating system
Audience: Undergraduate

2. Recognize basic sequence data formats, access them through publicly available datasets, and utilize them in bioinformatics applications
Audience: Undergraduate

3. Use sequence analysis programs by downloading and installing them locally on their own computers
Audience: Undergraduate

4. Use publicly available bioinformatics databases
Audience: Undergraduate

5. Create programs in a scientific programming language to conduct basic bioinformatics analyses
Audience: Undergraduate

6. Demonstrate mastery of basic bioinformatics skills by completing a hands-on final project focused on the recovery and analyses of microbial genomes from public databases
Audience: Undergraduate

MICROBIO 375 – SPECIAL TOPICS
1-4 credits.

Specialized subject matter of current interest to undergraduate students.
Requisites: None
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MICROBIO 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in the Bacteriology department and a internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2013
Learning Outcomes: 1. Perform assigned responsibilities in a professional setting for 80 hrs/credit/semester.
Audience: Undergraduate

2. Identify and employ standards of professionalism at work site.
Audience: Undergraduate

3. Articulate through discussion with faculty mentor how concepts learned in microbiology relate to real work situations.
Audience: Undergraduate

4. Synthesize and apply knowledge from the microbiology curriculum and broader coursework to solve problems on the worksite.
Audience: Undergraduate

5. Create and submit a progress report to a faculty mentor, twice during the semester, one at mid-semester and one at the end of the semester.
Audience: Undergraduate

MICROBIO 400 – STUDY ABROAD IN MICROBIOLOGY
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

MICROBIO/SOIL SCI 425 – ENVIRONMENTAL MICROBIOLOGY
3 credits.

Microbial interactions in soils, water, extreme environments and biofilms. Modern methods for studying microbial ecology. role of microbes in nutrient cycles and biogeochemistry. Use of microbes for mitigating manmade environmental problems of industrial, agricultural, and domestic origin.
Requisites: MICROBIO 303 and (CHEM 341 or 343), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Build intuition and an ability to predict which kinds of organisms will be found in different ecosystems using quantitative reasoning when possible.
Audience: Undergraduate

2. Gain familiarity with research tools and applications in environmental microbiology, along with an appreciation for their limitations.
Audience: Undergraduate

3. Critically evaluate published research carried out in the field and think creatively about new potential research questions and applications.
Audience: Undergraduate

4. Work collaboratively in a team to enhance learning and solve complex problems.
Audience: Undergraduate

MICROBIO 430 – MICROBIAL PATHOGENS
3 credits.

Analysis of the interactions between pathogenic microbes and their human hosts. The focus is on the biology of these interactions and the microbial virulence strategies for colonization, invasion, pathogenesis, and resistance to host defenses.
Requisites: MICROBIO 303 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe the basic functions of the human immune system, especially in the context of microbe-human interactions.
Audience: Both Grad & Undergrad

2. Describe the pathogenesis of common infectious diseases, including the disease cycle and molecular mechanisms required for pathogenesis.
Audience: Both Grad & Undergrad

3. Identify approaches for prevention, treatment, and control of infectious diseases.
Audience: Both Grad & Undergrad

4. Explain how antibiotics control microbial growth and how microbes become resistant to them.
Audience: Both Grad & Undergrad

5. Integrate and synthesize information from the primary literature on microbial pathogenesis
Audience: Graduate

MICROBIO 450 – DIVERSITY, ECOLOGY AND EVOLUTION OF MICROORGANISMS
3 credits.

Fundamental concepts relating to the phylogenetic diversity, ecology and evolution of microbes. Active learning methods applying these concepts will promote a deeper understanding of microbiology.
Requisites: MICROBIO 303 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define the foundational principles of phylogenetics.
Audience: Undergraduate

2. Compare the major phyla within bacteria, archaea and eukaryotic microbes.
Audience: Undergraduate

3. Recognize general properties of viruses and the issues with their phylogenetic classification.
Audience: Undergraduate

4. Define ecology, its domains and distinguish it from other closely related fields.
Audience: Undergraduate

5. Develop a deeper understanding of methods available to characterize microbial communities.
Audience: Undergraduate

6. Explain Darwin's Theory of Natural Selection and the four postulates of natural selection.
Audience: Undergraduate

7. Describe the concept of adaptation and how over the history of science this concept has changed.
Audience: Undergraduate

8. Identify the major events in the history of microbial life.
Audience: Undergraduate

9. Develop an evolutionary understanding of the 3 domains of life.
Audience: Undergraduate

MICROBIO 470 – MICROBIAL GENETICS & MOLECULAR MACHINES
3 credits.

Examines modern microbial genetics and molecular processes. Emphasis on the use of eubacterial and eukaryotic microbes to elucidate cellular function. Discussion of experimental approaches to study microbes and their use in biotechnology, bioremediation, and medicine.
Requisites: MICROBIO 303 or concurrent enrollment or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use correct nomenclature to describe microbial genetic and molecular processes and experimental approaches.
Audience: Undergraduate

2. Recognize and apply concepts of genetics.
Audience: Undergraduate

3. Describe how the molecular machines in bacterial gene expression function and, how they contribute to final gene-encoded activities.
Audience: Undergraduate

4. Explain the mechanisms by which these molecular machines are regulated.
Audience: Undergraduate

5. Interpret molecular and genetic data in regard to specific experimental questions.
Audience: Undergraduate

6. Apply understanding of microbial genetics and molecular machines to design experimental approaches test research hypotheses.
Audience: Undergraduate

MICROBIO 520 – PLANETARY MICROBIOLOGY: WHAT LIFE HERE TELLS US ABOUT LIFE OUT THERE
3 credits.

Connects the molecular underpinnings of life with corresponding planetary scale changes in geochemistry. Focuses on the dynamics between life and environment over planet Earth's history from a microbial and molecular perspective, including the origins of life, and emergence of essential metabolisms and their evolution across billions of years of planetary evolution. Discusses how innovations such as translation machinery and carbon and nitrogen fixation were impacted by significant changes in the environment. Examines how understanding the origins of life on Earth may allow for the recognition of life elsewhere in the universe by exploring, assessing, and discussing various signs of life and the processes that expands life to planetary scale.
Requisites: MICROBIO 101 or 303 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate the reliability of sources of information about biology
Audience: Both Grad & Undergrad

2. Synthesize key topics/concepts of planetary microbiology, astrobiology, and the molecular history of life
Audience: Both Grad & Undergrad

3. Describe the environments in which life on Earth might have originated, emerged, and persisted over billions of years
Audience: Both Grad & Undergrad

4. Analyze and describe the significant molecular innovations that impacted life on Earth
Audience: Both Grad & Undergrad

5. Describe the current origins of life scenarios on Earth and planetary conditions that may give rise to life elsewhere in the universe
Audience: Both Grad & Undergrad

6. Formulate an original hypothesis to guide future research based on a synthesis of current research into the connections between the origins, evolution, and molecular underpinnings of life and corresponding planetary scale changed
Audience: Graduate

MICROBIO/SOIL SCI 523 – SOIL MICROBIOLOGY AND BIOCHEMISTRY
3 credits.

Transformations of nutrients and contaminants in soils and groundwater by microorganisms: emphasis on enzymatic mechanisms and metabolic pathways. Approaches for analyzing microbial populations and activities including molecular techniques. Applications of microbial activities for bioremediation of contaminated soils and groundwater. Students should have completed one course in either Soil Science or Microbiology to feel comfortable with the course content.
Requisites: Senior standing, (CHEM 104, 109, or 116) and (ZOOLOGY/BIOLOGY 102, BOTANY/BIOLOGY 130, or ZOOLOGY/BIOLOGY/BOTANY 151), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the soil environment from the perspective of a microbe
Audience: Both Grad & Undergrad

2. Explain the importance of soil microbes for globally important issues such as climate change, nutrient cycling, and biodiversity
Audience: Both Grad & Undergrad

3. Describe key methods used to study soil microbes and explain their limitations
Audience: Both Grad & Undergrad

4. Analyze microbial community data to answer the question, are the organisms in these communities different, and how
Audience: Both Grad & Undergrad

5. Discuss and critically evaluate scientific papers in soil microbiology at an advanced undergraduate level
Audience: Undergraduate

6. Conduct, analyze, and interpret a research project
Audience: Undergraduate

7. Discuss and critically evaluate scientific papers in soil microbiology at a graduate level
Audience: Graduate

8. Design, conduct, analyze, and interpret a research project, drawing on the broader literature
Audience: Graduate

MICROBIO 525 – FIELD STUDIES OF PLANETARY MICROBIOLOGY AND LIFE IN THE UNIVERSE
3 credits.

Explores the origins, early evolution, and most common traces left by our planet's form of microbial life. Discovery and interpretation of microbial biosignatures in the context of a simulated surface lander mission through travel to field sites. Introduction to microbial biosignatures as inferred through satellite and drone imagery interpretation, portable XRF elemental analysis, UV-VIS-IR spectrophotometry, body and trace fossil analysis and interpretation, and metagenome sequencing. Explore evidence and methods of detection of life on other planets.
Requisites: MICROBIO 520 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Define basic categories and modes of biosignature production and preservation.
Audience: Both Grad & Undergrad

2. Describe the environmental and ecological attributes that enable biosignature preservation.
Audience: Both Grad & Undergrad

3. Articulate how different microenvironments can be present in an extreme environment (i.e., a salt flat), and how different instruments are required to explore these microenvironments at different scales of observation.
Audience: Both Grad & Undergrad

4. Explain the basic chemical drivers of life that exist in different microenvironments.
Audience: Both Grad & Undergrad

5. Hypothesize planetary and stellar conditions likely to lead to the long-term persistence of life on a planet.
Audience: Both Grad & Undergrad

6. Operate each of the main instruments that compose the payload package of the simulated spacecraft, organized in order of scale: Drone/imaging data (km-m); Outcrop scale detection/field microscope and hand lens (m-dm); Molecular characterization/spectrophotometer (mm-nm); Atomic characterization/XRD (nm-fm).
Audience: Both Grad & Undergrad

7. Formulate an original hypothesis to guide future research based on a synthesis of findings from the field experience with current understandings of the origins, evolution and molecular underpinnings of life and corresponding planetary scale changes.
Audience: Graduate

MICROBIO 526 – PHYSIOLOGY OF MICROORGANISMS
3 credits.

Biochemistry of microbial processes.
Requisites: (BIOCHEM 501 or 507 or concurrent enrollment) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the chemical logic and fundamental regulatory principles of central metabolism.
Audience: Undergraduate

2. Describe how the fundamental concepts in metabolism relate to real-world problems in areas such as microbiology, biotechnology, and human health.
Audience: Undergraduate

3. Recognize that the same fundamental principles that help us understand microbial metabolism also apply to higher organisms.
Audience: Undergraduate

4. Describe the interconnected nature of metabolism, where pathways work in concert by feeding, draining, and regulating each other.
Audience: Undergraduate

5. Describe the core mechanisms of energy generation in biology and how they impact the diversity of microbial life.
Audience: Undergraduate

MICROBIO 527 – ADVANCED LABORATORY TECHNIQUES IN MICROBIOLOGY
2 credits.

Provides a foundation in modern methods of research in the biomedical sciences. Coaching and practice in hypothesis-driven scientific questions, critical data analysis, and scientific writing.
Requisites: Declared in Microbiology and MICROBIO 304
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the conceptual design of an experiment.
Audience: Undergraduate

2. Given an experimental question, design and effectively execute an experiment that answers a scientific question.
Audience: Undergraduate

3. Find, and use correctly, information in the primary literature relevant to experiments being carried out.
Audience: Undergraduate

4. Properly and critically interpret data including understanding experimental limitations and controls.
Audience: Undergraduate

5. Effectively communicate their scientific findings through writing as well as present data/results clearly and effectively in a professional manner.
Audience: Undergraduate

6. Take complete, effective and detailed lab notes.
Audience: Undergraduate

MICROBIO/ONCOLOGY 545 – TOPICS IN BIOTECHNOLOGY
1 credit.

Seminars on current topics in agricultural, medical, and industrial biotechnology such as: microbiological production of food, drink, biopharmaceuticals; production methods, genetic engineering (vectors, recombination cloning), continuous fermentation; bioconversion processes and production of chemicals from biomass; plant biotechnology; transgenic animals.
Requisites: (ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383, or BIOLOGY/BOTANY 130) and (CHEM 104 or 109) or graduate/professional standing
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Attend all lectures on a diverse range of speakers from the Biotechnology sector and related topics.
Audience: Undergraduate

2. Demonstrate an understanding of lectures though lecture evaluation sheets.
Audience: Undergraduate

3. Choose a current topic in Biotechnology and formulate an opinion paper on the challenges and potential utility.
Audience: Undergraduate

MICROBIO 551 – CAPSTONE RESEARCH PROJECT IN MICROBIOLOGY
2 credits.

Hands-on experience conducting microbiology research in a lab. Addresses elements of microbiological research including experimental design, troubleshooting, communication of research findings, and research ethics.
Requisites: MICROBIO 527
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate proficiency in bacterial culturing, PCR, gel electrophoresis, Sanger sequencing, DNA quantitation, analytical micropipetting, and BLAST analysis.
Audience: Undergraduate

2. Complete a next-generation or genomics sequencing project on an under-study microbial environment and use bioinformatics tools to analyze large datasets of DNA and/or RNA sequences.
Audience: Undergraduate

3. Design and troubleshoot experiments, isolate targeted microbes, or microbial groups, from a given environment.
Audience: Undergraduate

4. Cultivate the ability to work in teams by designing and troubleshooting a team experiment and presenting their progress and findings throughout the semester.
Audience: Undergraduate

5. Improve scientific writing by preparing and revising drafts of a research proposal.
Audience: Undergraduate

6. Improve oral scientific communication by presenting powerpoint and poster presentations on scientific research.
Audience: Undergraduate

7. Explore ethical dilemmas in science through writing, discussion, and case studies.
Audience: Undergraduate

MICROBIO/BIOCHEM/GENETICS 612 – PROKARYOTIC MOLECULAR BIOLOGY
3 credits.

Molecular basis of bacterial physiology and genetics with emphasis on molecular mechanisms; topics include nucleic acid-protein interactions, transcription, translation, replication, recombination, regulation of gene expression.
Requisites: (BIOCHEM 501 or 507) and (MICROBIO 470, GENETICS 466 or 468) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Access and evaluate original research literature.
Audience: Undergraduate

2. Demonstrate problem solving practices.
Audience: Undergraduate

3. Identify enzyme mechanisms responsible for transcription, translation, gene regulation, and replication in bacteria.
Audience: Graduate

4. Compare the structural bases for the mechanisms.
Audience: Graduate

5. Evaluate the experiments that led to our understanding of theses mechanisms.
Audience: Graduate

6. Deconstruct how these enzymes respond to nutritional and environmental signals in cells.
Audience: Graduate

7. Outline the evolutionary basis and selection pressure for these mechanisms in vivo.
Audience: Graduate

MICROBIO 626 – MICROBIAL AND CELLULAR METABOLOMICS
3 credits.

Provides an in-depth exploration of the use of mass spectrometry-based metabolomic approaches for the quantitative investigation of microbial and mammalian cellular metabolic processes. Using recent examples from primary literature, highlights the application of metabolomics, lipidomics, and metabolic flux analysis to diverse areas, including rational engineering of metabolic pathways, microbial biofuel production, discovery and characterization of new biochemical pathways, metabolic interactions within microbial communities, biochemical capabilities of the human gut microbiome, and mammalian cell metabolism.
Requisites: (BIOLOGY/ZOOLOGY 101, BOTANY/BIOLOGY/ZOOLOGY 151, BIOCORE 383, or BOTANY/BIOLOGY 130), (CHEM 341 or 343), and (BIOCHEM 301, 501, or 507), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the instrumentation and analytical approaches commonly used in mass spectrometry-based metabolomics, lipidomics, and metabolic flux analysis studies.
Audience: Both Grad & Undergrad

2. Explain how isotope tracers are used to measure metabolic flux, elucidate metabolic network structure, and investigate pathway thermodynamics.
Audience: Both Grad & Undergrad

3. Critically evaluate primary scientific literature that utilizes metabolomics, lipidomics, or isotope tracer studies as a key research component.
Audience: Both Grad & Undergrad

4. Argue how fundamental concepts in cellular metabolism relate to real-world problems in areas such as microbiology, biotechnology, and human health.
Audience: Both Grad & Undergrad

5. Analyze and interpret published or unpublished metabolomics and lipidomics data to generate biological insights on microbial and/or cellular metabolism.
Audience: Both Grad & Undergrad

6. Analyze and interpret published or unpublished data from isotope-tracer studies to make inferences on pathway activity and metabolic network structure in microbial and/or mammalian cellular systems.
Audience: Both Grad & Undergrad

7. Formulate experimental designs that incorporate metabolomics and isotope tracers to test specific hypothesis related to cellular metabolism.
Audience: Graduate

MICROBIO 657 – BIOINFORMATICS FOR MICROBIOLOGISTS
3 credits.

Provides a practical and fundamental introduction to sequence-based analysis focused on microbial systems. Emphasis on gaining a basic understanding of the principles of both classical and newer algorithms useful for bioinformatic analysis. Topics include: BLAST; RNA-seq analysis; transcriptional binding prediction; genome sequence assembly, analysis and annotation; and comparative genomics. Note that this course requires that each student have access to a laptop that runs a linux/unix Operating System such as a Mac or a ChromeBook. PC Laptops running a VM are also acceptable. No prior knowledge of computational biology is required.
Requisites: MICROBIO 303, BIOCHEM 501, GENETICS 466, or 467 or graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate use of the Unix/Linux-based operating system using command line.
Audience: Both Grad & Undergrad

2. Download and install sequence analysis programs locally on a computer.

Audience: Both Grad & Undergrad

3. Evaluate the outcomes of sequence data analysis and determine if an analysis is statistically relevant and robust.
Audience: Both Grad & Undergrad

4. Code complex and advanced programs in python that not only facilitate pipeline construction, but also more in-depth parsing of tool output.
Audience: Both Grad & Undergrad

5. Utilize bioinformatics tools to enable comparative genomics analysis that extend the standard use of those tools.
Audience: Both Grad & Undergrad

6. Evaluate primary literature and determine what available tools are most appropriate for solving a specific analysis problem.
Audience: Both Grad & Undergrad

7. Utilize advanced parameters in BLAST to facilitate complex comparisons across sequence data types.
Audience: Graduate

8. Demonstrate the ability to compile a program from source code so as to leverage local environmental variables for installation.
Audience: Graduate

MICROBIO/BMOLCHEM 668 – MICROBIOLOGY AT ATOMIC RESOLUTION
3 credits.

Three-dimensional protein structures form the basis for discussions of high resolution microbiology; how particular problems are solved with given protein architectures and chemistries and how themes of protein structure are modified and recycled.
Requisites: (BIOCHEM 501 or 507) and (MICROBIO 470 or 612) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate proficient use of PyMol software for visualizing 3D structures.
Audience: Both Grad & Undergrad

2. Evaluate the quality of published structural models for biological macromolecules.
Audience: Both Grad & Undergrad

3. Identify common themes in structural biology which are used when addressing structural biology research questions.
Audience: Both Grad & Undergrad

4. Design and deliver a presentation to communicate scientific results to an audience of their peers.
Audience: Graduate

MICROBIO 681 – SENIOR HONORS THESIS
2-3 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Investigate a science topic in conjunction with other investigators to develop a deep understanding of a research problem.
Audience: Undergraduate

2. Identify a research problem and develop a series of experiments to test a hypothesis related to the problem under investigation.
Audience: Undergraduate

3. Carry out designed experiments and collect data related to the research problem under investigation.
Audience: Undergraduate

4. Analyze the results of experiments and use them to test the validity of the developed hypothesis.
Audience: Undergraduate

5. Communicate the results of investigations via written and/or oral means to an appropriate audience.
Audience: Undergraduate

6. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work.
Audience: Undergraduate

MICROBIO 682 – SENIOR HONORS THESIS
2-4 credits.

Second semester of individual study for majors completing theses for Honors degrees as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Investigate a science topic in conjunction with other investigators to develop a deep understanding of a research problem.
Audience: Undergraduate

2. Identify a research problem and develop a series of experiments to test a hypothesis related to the problem under investigation.
Audience: Undergraduate

3. Carry out designed experiments and collect data related to the research problem under investigation.
Audience: Undergraduate

4. Analyze the results of experiments and use them to test the validity of the developed hypothesis.
Audience: Undergraduate

5. Communicate the results of investigations via written and/or oral means to an appropriate audience.
Audience: Undergraduate

6. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work.
Audience: Undergraduate

MICROBIO 691 – SENIOR THESIS
2 credits.

Individual study for majors completing theses as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Investigate a science topic in conjunction with other investigators to develop a deep understanding of a research problem.
Audience: Undergraduate

2. Identify a research problem and develop a series of experiments to test a hypothesis related to the problem under investigation.
Audience: Undergraduate

3. Carry out designed experiments and collect data related to the research problem under investigation.
Audience: Undergraduate

4. Analyze the results of experiments and use them to test the validity of the developed hypothesis.
Audience: Undergraduate

5. Communicate the results of investigations via written and/or oral means to an appropriate audience.
Audience: Undergraduate

6. Write a thesis that contextualizes the work, presents the research question, describes the experiments performed to answer the question, and analyzes the results.
Audience: Undergraduate

MICROBIO 692 – SENIOR THESIS
2 credits.

Second semester of individual study for majors completing theses as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Investigate a science topic in conjunction with other investigators to develop a deep understanding of a research problem.
Audience: Undergraduate

2. Identify a research problem and develop a series of experiments to test a hypothesis related to the problem under investigation.
Audience: Undergraduate

3. Carry out designed experiments and collect data related to the research problem under investigation.
Audience: Undergraduate

4. Analyze the results of experiments and use them to test the validity of the developed hypothesis.
Audience: Undergraduate

5. Communicate the results of investigations via written and/or oral means to an appropriate audience.
Audience: Undergraduate

6. Write a thesis that contextualizes the work, presents the research question, describes the experiments performed to answer the question, and analyzes the results.
Audience: Undergraduate

MICROBIO 699 – SPECIAL PROBLEMS
1-4 credits.

Individual advanced work in an area of Microbiology under the direct guidance of a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Investigate a science topic in conjunction with other investigators to develop a deep understanding of a research problem.
Audience: Undergraduate

2. Identify a research problem and develop a series of experiments to test a hypothesis related to the problem under investigation.
Audience: Undergraduate

3. Carry out designed experiments and collect data related to the research problem under investigation.
Audience: Undergraduate

4. Analyze the results of experiments and use them to test the validity of the developed hypothesis.
Audience: Undergraduate

5. Communicate the results of investigations via written and/or oral means to an appropriate audience.
Audience: Undergraduate

MICROBIO 710 – MICROBIAL SYMBIOSIS
3 credits.

Covers the themes and diversity of plant and animal associations with microbes with an emphasis on beneficial relationships. Examples will be drawn from recent literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

MICROBIO 731 – SEMINAR
1 credit.

Reviews of microbiological subjects, and reports on research work.
Requisites: Declared in Microbiology doctoral program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MICROBIO 810 – CURRENT ISSUES IN MICROBIOLOGY
1 credit.

Explores the diversity of scientific topics comprising the field of contemporary microbiology.
Requisites: Declared in Microbiology doctoral program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

MICROBIO 811 – ADVANCED PROBLEMS IN MICROBIOLOGY
1 credit.

Explores the diversity of scientific topics comprising the field of contemporary microbiology.
Requisites: Declared in Microbiology doctoral program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

MICROBIO 812 – BACTERIOLOGY CAREER SEMINAR
1 credit.

Practical skill development for career and professional success in the field of microbiology. Covers topics such as education, science practice, ethics, career pathways, professional development, and science communication.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Identify potential careers and resources for career advancement in microbiology.
Audience: Graduate

2. Discuss the scientific process - including research methods, ethics, and the process of scientific publication.
Audience: Graduate

3. Communicate with a professional audience in oral and written form.
Audience: Graduate

4. Describe the resources available for professional development in microbiology.
Audience: Graduate

MICROBIO 875 – SPECIAL TOPICS
1-4 credits.

Specialized subject matter of current interest to graduate students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MICROBIO 899 – INDEPENDENT STUDY
1-9 credits.

Independent study or research under the direction of a faculty member in the area of biological science.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify a research problem and develop a series of experiments to test a hypothesis related to the problem under investigation.
Audience: Graduate

2. Carry out designed experiments and collect data related to the research problem under investigation.
Audience: Graduate

3. Analyze the results of experiments and use them to test the validity of the developed hypothesis.
Audience: Graduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.
Audience: Graduate

MICROBIO/BIOCHEM 917 – REGULATION OF GENE EXPRESSION (ADVANCED SEMINAR)
1 credit.

Analysis of recent literature in topics related to prokaryotic and eukaryotic gene regulation, including regulation of transcription, translation, and genome organization.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss state-of-the-art research in gene expression and regulation
Audience: Graduate

2. Communicate and critically evaluate experimental results
Audience: Graduate

MICROBIO 990 – RESEARCH
1-9 credits.

Full lab and literature review of a problem in microbiology. Leads to preparation of thesis and publication.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

MILITARY SCIENCE (MIL SCI)

MIL SCI 101 – FOUNDATIONS OF OFFICERSHIP
1 credit.

Introduction to life as a commissioned officer. Establishes fundamentals of leadership, Army values and skills required of a successful Army officer.
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2025

MIL SCI 102 – BASIC LEADERSHIP
1 credit.

Establishes foundation of basic leadership fundamentals such as problem solving, communications, briefing and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling.
Requisites: None
Course Designation: Core GenEd - Communication & Literacy
Repeatable for Credit: No
Last Taught: Spring 2026

MIL SCI 110 – LEADERSHIP LAB 1A
1 credit.

Develop proficiency with hands-on experience in a field environment. Specific activities include military navigation, employment of communications and weapon systems, rappelling, and small unit tactics.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025

MIL SCI 111 – LEADERSHIP LAB 1B
1 credit.

Continuation of MIL SCI 110
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026

MIL SCI 201 – INDIVIDUAL LEADERSHIP STUDIES
2 credits.

Identify successful leadership characteristics through observation of others and self through experiential learning exercises. Record observed traits (good and bad) in a dimensional leadership journal and discuss observations in small group settings. Learn map reading and land navigation skills, including conversion of magnetic and grid azimuths and resection.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Fall 2025

MIL SCI 202 – LEADERSHIP AND TEAMWORK
2 credits.

Study examines how to build successful teams, various methods for influencing action, effective communication in setting and achieving goals, the importance of timing the decision, creativity in the problem solving process and obtaining team buy-in through immediate feedback.
Requisites: None
Course Designation: Core GenEd - Communication & Literacy
Repeatable for Credit: No
Last Taught: Spring 2026

MIL SCI 210 – LEADERSHIP LAB 2A
1 credit.

Implement small unit tactical training, learnArmy methods for approaching and reacting to tactical situations. Covers land navigation skills, information processing skills, and Army leadership principles.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025

MIL SCI 211 – LEADERSHIP LAB 2B
1 credit.

Army organization and planning methods, and the opportunity to practice and implement these methods in practical exercises.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026

MIL SCI 301 – LEADERSHIP AND PROBLEM SOLVING
2 credits.

Conduct self-assessment of leadership style, develop personal fitness regimen, and learn to plan and conduct individual/small unit tactical training while testing reasoning and problem solving techniques. Receive direct feedback on leadership abilities.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025

MIL SCI 302 – LEADERSHIP AND ETHICS
2 credits.

Examines the role communications, values and ethics play in effective leadership. Topics include ethical decision-making, consideration of others and survey Army leadership doctrine. Emphasis is on improving oral and written communication abilities, and increasing small unit tactics skills.
Requisites: Consent of instructor
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Spring 2026

MIL SCI 310 – LEADERSHIP LAB 3A
1 credit.

Small unit tactical troop leading procedures are taught and practiced. Hand signals, operations orders, and land navigation skills are perfected for preparation for national advanced leadership camp.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025

MIL SCI 311 – LEADERSHIP LAB 3B
1 credit.

Learn in-depth leadership procedures, and practice the Army planning process for groups of 30 personnel. Learn how to conduct Army training and classes in order to teach other cadets based on prior knowledge.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026

MIL SCI 401 – LEADERSHIP AND MANAGEMENT
2 credits.

Develop proficiency in planning and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Explore training management methods of effective staff collaboration, and developmental counseling techniques.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025

MIL SCI 402 – OFFICERSHIP
2 credits.

Includes fundamentals of military law, administrative and logistics procedures and practical exercises on establishing an ethical command climate. Presentations, briefings and leadership positions are used to train and evaluate.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026

MIL SCI 410 – LEADERSHIP LAB 4A
1 credit.

Learn how to allocate resources and time to adequately train large groups of people. Practice creating training plans, and bringing together all of the elements necessary to complete training. Opportunities to aid in the evaluation of others leadership, which gives them the ability to better review their own leadership.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025

MIL SCI 411 – LEADERSHIP LAB 4B
1 credit.

Learn the final elements of an Army officer's job. Mentor and plan training, as well as monitor the effectiveness of others. Learn fine points of improving others performance and getting the most out of subordinates.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026

MOLECULAR AND ENVIRONMENTAL TOXICOLOGY CENTER (M&ENVTOX)

M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M/POP HLTH 625 – TOXICOLOGY I
3 credits.

Basic principles of toxicology and biochemical mechanisms of toxicity in mammalian species and man. Correlation between morphological and functional changes caused by toxicants in different organs of the body.
Requisites: (BIOCHEM 501 or 508) and (ANAT&PHY 335, 435, or (BIOCORE 485 and 486)) and PATH 404; or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the physiology and pathology of toxicology, understanding the basicfundamentals of toxicology and toxic agents
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and breakdown of toxicants using a given dataset
Audience: Both Grad & Undergrad

3. Recognize various experimental models to obtain scientific results
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one’s own research
Audience: Both Grad & Undergrad

5. Critique an example of toxicology in media and develop a presentation of this example
Audience: Both Grad & Undergrad

6. Explore new areas to assist in career development via journal club
Audience: Graduate

M&ENVTOX/PATH/PHM SCI/PHMCOL-M/POP HLTH 626 – TOXICOLOGY II
3 credits.

Survey of the basic methods and fundamental biochemical mechanisms of toxicity. Toxicity in mammalian organ systems, techniques for evaluating toxicity, as well as mechanisms of species specificity, and environmental interactions (with toxicant examples) are presented.
Requisites: POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain and identify the effects of toxicants on specific organs within the human body
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and reactions of toxicants within organ systems using a given dataset
Audience: Both Grad & Undergrad

3. Classify different means of risk assessment and the conceptual rationale behind these methods
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research
Audience: Both Grad & Undergrad

5. Relate specific organ concepts with conceptual examples from M&ENVTOX 625 to enhance scientific understanding
Audience: Undergraduate

6. Appraise concepts to research to identify future research concepts.
Audience: Graduate

M&ENVTOX/CIV ENGR/SOIL SCI 631 – TOXICANTS IN THE ENVIRONMENT: SOURCES, DISTRIBUTION, FATE, & EFFECTS
3 credits.

Nature, sources, distribution, and fate of contaminants in air, water, soil, and food and potential for harmful exposure.
Requisites: (CHEM 104, 109, or 116) and (MATH 211, 217, or 221) and (PHYSICS 104, 202, 208, or 248), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how the physicochemical properties of an organic chemical and equilibrium and kinetic principles influence the distribution of the chemical in the environment
Audience: Both Grad & Undergrad

2. Estimate the physico-chemical properties of organic compounds using linear free energy relationships
Audience: Both Grad & Undergrad

3. Predict the behavior of hazardous organic chemicals in the environment

Audience: Both Grad & Undergrad

4. Derive and use equilibrium and kinetic box models for determining the fate of organic pollutants in the environment
Audience: Graduate

M&ENVTOX 699 – SPECIAL PROBLEMS
1-3 credits.

Directed study projects as arranged with instructor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2022
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Undergraduate

2. Read and effectively search scientific literature
Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

M&ENVTOX 800 – SEMINAR
1 credit.

Current research in environmental toxicology and pathology and other topics of interest and importance to environmental toxicologists.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Design, develop, and present research to audiences of peers within and outside of research area.
Audience: Graduate

2. Evaluate data and appraise presentations.
Audience: Graduate

3. Recognize opportunities in research tools and professional development to further career trajectory.
Audience: Graduate

4. Synthesize data from others to apply towards own research.
Audience: Graduate

M&ENVTOX 801 – SCIENTIFIC COMMUNICATION IN MOLECULAR & ENVIRONMENTAL TOXICOLOGY
2 credits.

Provides an overview of scientific communication, covering methods such as articles, proposals, presentations, lectures, and posters. Explores strategies and best practices for each method, with emphasis on distinguishing strong examples from weak ones. Focuses on developing proficiency in scientific communication across multiple formats, including articles, proposals, presentations, and posters. Emphasizes understanding the principles that distinguish effective communication, evaluating strengths and weaknesses in scientific writing and presentations, and applying these concepts to produce clear, persuasive, and professional scientific materials.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify best practices when communicating science in multiple forms
Audience: Graduate

2. Synthesize data to create a coherent hypothesis for research question
Audience: Graduate

3. Analyze sources and approaches necessary for a scientific literature review
Audience: Graduate

4. Integrate knowledge to critique a scientific publication that is under review
Audience: Graduate

5. Produce preliminary sections for use in a scientific manuscript
Audience: Graduate

6. Evaluate how to critique scientific proposals and compose meaningful feedback
Audience: Graduate

7. Produce a document for use as a preliminary exam and / or fellowship proposal
Audience: Graduate

8. Organize preliminary data generated in mentored laboratory into a research poster that is both appealing and informative
Audience: Graduate

9. Create a PowerPoint presentation, which will teach students and classmates about a scientific tool or otherwise professional development topic, whose knowledge will be beneficial to students as they advance their careers
Audience: Graduate

10. Produce a Teaching Philosophy statement to start a professional teaching portfolio
Audience: Graduate

M&ENVTOX 990 – RESEARCH
1-9 credits.

Independent research and writing for graduate students under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Exhibit a broad understanding of general toxicology principles
Audience: Graduate

2. Conduct independent research using a variety of approaches
Audience: Graduate

3. Think critically to address research challenges
Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research
Audience: Graduate

5. Collaborate with other investigators within or outside of the thesis lab
Audience: Graduate

MOLECULAR BIOLOGY (MOL BIOL)

MOL BIOL 681 – SENIOR HONORS THESIS
3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member. Must be declared in an honors program.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MOL BIOL 682 – SENIOR HONORS THESIS
3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member. Must have completed MOL BIO 681 and declared in an honors program.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MOL BIOL 686 – SENIOR HONORS SEMINAR IN MOLECULAR BIOLOGY
1 credit.

A seminar on the origins, present frontiers, and future prospects of molecular biology.
Requisites: Senior standing and declared in an Honors program
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Prepare a rubric that allows objective evaluation of scientific presentations.
Audience: Undergraduate

2. Develop impactful slides and other presentation materials for scientific presentations.
Audience: Undergraduate

3. Develop effective speaker dynamics for scientific presentations.
Audience: Undergraduate

MOL BIOL 691 – SENIOR THESIS
3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MOL BIOL 692 – SENIOR THESIS
3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member. Must have completed MOL BIOL 691.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MOL BIOL 699 – DIRECTED STUDIES IN MOLECULAR BIOLOGY
1-4 credits.

Individual research projects conducted under professorial supervision.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUSIC (MUSIC)

MUSIC 34 – STUDY ABROAD: MUSIC PERFORMANCE ENSEMBLE
1 credit.

A study abroad equivalency for music performing ensemble that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

MUSIC 40 – WIND ENSEMBLE
1 credit.

Rehearsal and performance of music from wind ensemble and band literature. Audition required.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply and adapt individual instrumental skills and techniques in a chamber and large ensemble performance settings
Audience: Undergraduate

2. Perform expressively a varied repertoire of music, learning the parts thoroughly and performing them accurately.
Audience: Undergraduate

3. Utilize standard musical terminology to describe musical elements reflective of a practical advanced knowledge of the band repertoire
Audience: Undergraduate

4. Utilize problem-solving skills to identify and correct problems within the ensemble rehearsal setting in a professional and ethical manner
Audience: Undergraduate

MUSIC 41 – CONCERT BAND
1 credit.

Rehearsal and performance of music from wind ensemble and band literature. Requires audition for placement.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply and adapt individual instrumental skills and techniques in a chamber and large ensemble performance settings
Audience: Undergraduate

2. Perform expressively a varied repertoire of music, learning the parts thoroughly and performing them accurately
Audience: Undergraduate

3. Utilize standard musical terminology to describe musical elements reflective of a practical advanced knowledge of the band repertoire
Audience: Undergraduate

4. Utilize problem-solving skills to identify and correct problems within the ensemble rehearsal setting in a professional and ethical manner
Audience: Undergraduate

MUSIC 42 – VARSITY BAND
1 credit.

Rehearsal and performance of music for athletic events. Audition required.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop, apply and adapt individual instrumental skills and techniques in marching band and other ensemble performance settings.
Audience: Undergraduate

2. Improve sight-reading, memorization, and embouchure skills.
Audience: Undergraduate

3. Apply essential elements of music while refining the links between kinesthetic movement and music.
Audience: Undergraduate

MUSIC 43 – UNIVERSITY BAND
1 credit.

Exploration and performance of standard and contemporary band literature.
Requisites: None
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Exhibit accurate individual, sectional, and ensemble skills and advanced instrumental techniques while performing a varied repertoire of music
Audience: Undergraduate

2. Perform expressively a varied repertoire of music
Audience: Undergraduate

3. Utilize standard musical terminology to describe musical elements
Audience: Undergraduate

4. Utilize problem-solving skills to identify and correct problems within a rehearsal setting
Audience: Undergraduate

MUSIC 50 – CONCERT CHOIR
1 credit.

Choral vocal training, study and performance of concert literature. Audition required.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Prepare and perform quality choral literature that encompasses diverse musical expressions that represent a variety of historical and cultural perspectives.
Audience: Undergraduate

2. Perform expressively a varied repertoire of music, learning the parts thoroughly and performing them accurately.
Audience: Undergraduate

3. Exhibit improved music literacy, including sight singing, pitch and rhythmic accuracy, and aural skills.
Audience: Undergraduate

4. Utilize problem-solving skills to identify and correct problems within the ensemble rehearsal setting in a professional and ethical manner.
Audience: Undergraduate

MUSIC 52 – TREBLE CHOIR
1 credit.

Explore, rehearse, study, and perform choral repertoire for treble voices.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Prepare and perform quality choral literature that encompasses diverse musical expressions that represent a variety of historical and cultural perspectives.
Audience: Undergraduate

2. Perform expressively a varied repertoire of music, learning the parts thoroughly and performing them accurately.
Audience: Undergraduate

3. Exhibit improved music literacy, including sight singing, pitch and rhythmic accuracy, and aural skills.
Audience: Undergraduate

4. Utilize problem-solving skills to identify and correct problems within the ensemble rehearsal setting in a professional and ethical manner.
Audience: Undergraduate

MUSIC 53 – CHORAL UNION
1 credit.

Choral vocal training, study and performance. Audition required.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

MUSIC 55 – MASTERS' SINGERS
1 credit.

Choral vocal training, study and performance of concert literature. Students will audition for placement prior to the beginning of the semester
Requisites: Undergraduate students only (excludes Grad, Pharm, Law, Med, Vet Med, Guest, Special students)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

MUSIC 56 – CHORALE
1 credit.

Choral vocal training, study and performance of concert literature. Audition required.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Prepare and perform quality choral literature that encompasses diverse musical expressions that represent a variety of historical and cultural perspectives.
Audience: Undergraduate

2. Perform expressively a varied repertoire of music, learning the parts thoroughly and performing them accurately.
Audience: Undergraduate

3. Exhibit improved music literacy, including sight singing, pitch and rhythmic accuracy, and aural skills.
Audience: Undergraduate

4. Utilize problem-solving skills to identify and correct problems within the ensemble rehearsal setting in a professional and ethical manner.
Audience: Undergraduate

MUSIC 58 – MADRIGAL SINGERS
1 credit.

Ensemble specializing in 16th- and 17th-century secular music. Audition required.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

MUSIC 59 – UNIVERSITY CHORUS
1 credit.

Exploration and performance of standard choral literature.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUSIC 60 – ALL-UNIVERSITY STRING ORCHESTRA
1 credit.

Rehearsal and study of string orchestra literature at the introductory level.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUSIC 62 – UNIVERSITY SYMPHONY ORCHESTRA
1 credit.

Playing and public performance of music from symphonic repertoire. Audition required.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply and adapt individual instrumental skills and techniques in a chamber and large ensemble performance settings
Audience: Undergraduate

2. Perform expressively a varied repertoire of music, learning the parts thoroughly and performing them accurately
Audience: Undergraduate

3. Utilize standard musical terminology to describe musical elements reflective of a practical advanced knowledge of the symphonic and operatic repertoire
Audience: Undergraduate

4. Utilize problem-solving skills to identify and correct problems within the ensemble rehearsal setting in a professional and ethical manner
Audience: Undergraduate

MUSIC 101 – THE MUSICAL EXPERIENCE
3 credits.

Musical genres -- songs, opera and musical theater, chamber and orchestral music, and jazz -- in the context of social and cultural history.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe what they hear in music using basic technical terminology.
Audience: Undergraduate

2. Recognize and contextualize several genres of music.
Audience: Undergraduate

3. Reflect on personal daily relationship to music and sound in general.
Audience: Undergraduate

4. Explore the ways that music, sound, and society interact in our daily lives.
Audience: Undergraduate

MUSIC 102 – JAZZ IN 20TH-CENTURY AMERICA
3 credits.

Examines cultural influences on the development of jazz. Explores historical and ethnographic works by scholars in ethnomusicology, history, anthropology, and communication in order to understand cultural influences of traditional and contemporary genres of jazz. Major topics include syncretism, nationalism, modernity, ethnicity, gender, colonialism, and globalization of modern America. Emphasis on cross-cultural understanding and interdisciplinarity in jazz performance.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recognize how past racial, gender and ethnic discrimination have constrained economic and artistic opportunities for jazz musicians. Identify how musicians challenged these discriminations to shape contemporary musical practices.
Audience: Undergraduate

2. Explain how different musical practices developed by different African diasporic communities since 1900 have contributed to shaping the sound of jazz.
Audience: Undergraduate

3. Demonstrate understanding of different musical practices developed by different African diasporic communities since 1900.
Audience: Undergraduate

4. Develop critical listening skills and the ability to evaluate historically significant recordings.
Audience: Undergraduate

5. Explain how political movements in America shaped critical responses to jazz music and how jazz musicians reacted to contemporary political events.
Audience: Undergraduate

6. Identify how race has shaped the political economy of music in the United States.
Audience: Undergraduate

7. Recognize how the evolution of musical technologies have shaped the aesthetic development of music.
Audience: Undergraduate

8. Develop tools to conduct ethnographic research on jazz-influenced musical phenomena.
Audience: Undergraduate

9. Practice forming opinions and creating arguments based on scholarship, and communicating opinions and arguments effectively.
Audience: Undergraduate

MUSIC/FOLKLORE 103 – INTRODUCTION TO MUSIC CULTURES OF THE WORLD
3 credits.

An introductory ethnomusicology course providing a variety of ways to approach musics typically not covered in music history courses. Active engagement with these musics within their larger world contexts.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Engage with various musics on students' own terms
Audience: Undergraduate

2. Speak and write clearly about what is heard.
Audience: Undergraduate

3. Recognize and contextualize the several genres of music that represent each cultural area selected for study in the course
Audience: Undergraduate

4. Think rigorously about how positionality, including your own, affects listening and knowledge practices
Audience: Undergraduate

5. Have learned something about yourself -- strengths, weaknesses, biases, desires, tendencies, curiosities
Audience: Undergraduate

MUSIC 104 – STUDY ABROAD: ELEMENTARY MUSIC APPRECIATION/THEORY/HISTORY
1-3 credits.

A study abroad equivalency for elementary music appreciation, theory, or history that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

MUSIC 105 – STORYTELLING ON STAGE: INTRODUCTION TO MUSICAL THEATER AND OPERA
3 credits.

Introduction to musical theater and opera in Europe and America, with emphasis on the ways creators tell their stories through the interaction of music and drama. Topics include the histories and formations of the genres and their relationships to culture and society; principal creators and performers; distinctive features of representative works; relationships to film and other media; and treatments of race, class, gender, and other issues in selected examples of each genre.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. observe the interdependent relationship between musical composers, performers, and audiences that has shaped the histories of musical theater and opera
Audience: Undergraduate

2. promote critical thinking skills by linking course content with personal experiences and observations
Audience: Undergraduate

3. strengthen communication skills through written assignments and discussion
Audience: Undergraduate

4. identify representative passages from works studied
Audience: Undergraduate

5. understand the historical and social conditions under which opera and musical theater was produced in different times and places
Audience: Undergraduate

6. acquire vocabulary for identifying and describing features of selected works
Audience: Undergraduate

MUSIC 106 – THE SYMPHONY
3 credits.

Orchestral music from Haydn to present, relation to other arts.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2022

MUSIC 107 – MUSIC & FILM
3 credits.

A survey of film music by the major film composers. Will include study of film scores by, among others, Alfred Newman, Max Steiner, Bernard Herrmann, and Ennio Morricone, as well as a discussion of current trends and film composers. In addition, there will be discussion of the contributions of composers such as Aaron Copland, Serge Prokofiev and Leonard Bernstein. The techniques and styles of film music will be explored through lectures, required listening, readings and viewing of relevant films.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Investigate the central history of Film Music from the "Golden Era" of film music, from Korngold through Max Steiner, and Bernard Herrmann through analysis of film scores.
Audience: Undergraduate

2. Critically analyze and synthesize the elements of each of the major film composer's styles, to understand which elements are used to telegraph deeper meaning and emotions in their film scores.
Audience: Undergraduate

3. Identify scores with an exam that tests aural skills as well as historical knowledge.
Audience: Undergraduate

MUSIC 108 – MUSIC AND TECHNOLOGY FROM EDISON TO THE PRESENT
3 credits.

How has modern technology shaped the composition, performance, and reception of music? In turn, how has music influenced technology? And what sorts of anxieties arose from these cultural currents? Evaluate the changing relationships between music and technology from the late Romantic era to the present day. Considering broader political, cultural, and aesthetic contexts, explore both popular and art music alongside important developments in instrument design, compositional techniques, media, and recording. Consider what it means for something to be considered a "technology" and the social, cultural, and environmental ramifications therein. Musicians to be studied include Bela Bartok, Karlheinz Stockhausen, Gyorgy Ligeti, Donna Summer, Grandmaster Flash, Afrika Bambaataa, Beyonce, and more. Gain a better understanding of the cultural and social constructions of technologies like the wax cylinder, radio, gramophone, microphone, synthesizer, and internet.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Describe what you hear in music using basic technical terminology.
Audience: Undergraduate

2. Recognize and contextualize several genres of music.
Audience: Undergraduate

3. Discuss musical meaning in relation to its social, political, and cultural contexts.
Audience: Undergraduate

4. Examine your relationship to music and sound in general.
Audience: Undergraduate

5. Express understanding of and appreciation for the ways that music, sound, and technology interact in our daily lives.
Audience: Undergraduate

MUSIC 113 – MUSIC IN PERFORMANCE
1 credit.

Descriptive lectures on chamber music with performances by instructor and others.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Observe and reflect on outstanding musical performances.
Audience: Undergraduate

2. Recognize music of various styles, genres and historical periods.
Audience: Undergraduate

3. Discuss the relationship between music and its historical contexts.
Audience: Undergraduate

MUSIC 121 – MUSICA PRACTICA 1
3 credits.

Strategies for composing, understanding, and writing about music.
Requisites: Declared in Music, Music: Performance or Music: Education
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify chords and intervals, identify chord function in a progression, and locate and analyze basic harmonic cadences.
Audience: Undergraduate

2. Identify key signatures, play at the piano and sing major and minor scales, understand basic elements of music notation, and apply that knowledge to singing and playing basic melodies.
Audience: Undergraduate

3. Understand Roman-numeral analysis and figured-bass symbols, and how to apply both to analyze a piece of diatonic, tonal music.
Audience: Undergraduate

4. Describe the basic elements of species counterpoint and be able to apply that knowledge to compose based on the principles of first- through fifth-species counterpoint.
Audience: Undergraduate

MUSIC 122 – MUSICA PRACTICA 2
3 credits.

Continuation of strategies for composing, understanding, and writing about music.
Requisites: MUSIC 121 and 171 and concurrent enrollment in MUSIC 172
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Sing (and play) melodies solo.
Audience: Undergraduate

2. Hold our own in singing either part in a duet with a colleague.
Audience: Undergraduate

3. Play all twenty-four major and minor scales on the piano (two octaves, hands together).
Audience: Undergraduate

4. Transcribe outer voices (treble and bass) in passages from both vocal and instrumental music.
Audience: Undergraduate

5. Rehearse and conduct a chorale with a choir of our peers.
Audience: Undergraduate

6. Follow a simple, two-part piece without a score.
Audience: Undergraduate

MUSIC 151 – BASIC CONCEPTS OF MUSIC THEORY
3 credits.

Basic tools of music theory and compositional forms. Explores development of music through general survey of musical styles. Practical application of concepts includes listening maps and simple composition projects. Includes performance opportunities in simulated real world settings.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use a complete set of tools provided for a lifelong knowledge and interest in music, and having transformed as a student from a passive to active listener.
Audience: Undergraduate

2. Discuss the evolution of music and music theory and relate this to where music is today.
Audience: Undergraduate

3. Create original compositions applying concepts learned.
Audience: Undergraduate

MUSIC 171 – MUSICA PRACTICA: AURAL SKILLS 1
1 credit.

Intoductory istruction in aural skills.
Requisites: Concurrent enrollment in MUSIC 121
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Perform and dictate simple diatonic melodies, using the fixed-DO solfege syllables.
Audience: Undergraduate

2. Sing melodies in simple and compound meters while conducting the patterns associated with them.
Audience: Undergraduate

3. Play a simple accompaniment at the keyboard while singing a melody using the solfege syllables.
Audience: Undergraduate

4. Read melodies written in alto clef.
Audience: Undergraduate

MUSIC 172 — MUSICA PRACTICA: AURAL SKILLS 2
1 credit.

Continuation of introductory instruction in aural skills.
Requisites: MUSIC 171 and concurrent enrollment in MUSIC 122
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Advance skills in performing and dictating diatonic melodies, using the fixed-DO solfege syllables.
Audience: Undergraduate

2. Explore melodies with chromaticism.
Audience: Undergraduate

3. Read tenor clef.
Audience: Undergraduate

4. Perform and dictate melodies with syncopations.
Audience: Undergraduate

MUSIC 202 — DELTA BLUES
3 credits.

Traces the history of the blues in America's racial history. Begins by examining the living conditions that produced the blues in rural Mississippi (sharecropping, the cotton industry, the Great Flood of 1927). Continues by detailing the emergence of blues in the early recording industry (Paramount, OKeh), including the earliest examples (W.C. Handy, Mamie Smith), as well as the singers emerging in the 1920s (Blind Lemon Jefferson, Charley Patton, Robert Johnson). Follows migrations northward to Memphis (jug bands) and Chicago (electric blues), tracing the emerging importance of radio and live performance (King Biscuit Time, WDIA, the Chittlin' Circuit), living conditions in Chicago (Maxwell Street). Tracks early marketing of blues to white audiences (Josh White, Lead Belly). Ends with the reemergence of the blues as '60s folk music (Son House, Sonny Boy Williamson II) and British Invasion (Yardbirds). Supplemented with extensive musical selections, documentary footage of interviews.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify representative styles, performers, and formal patterns relating to Delta blues.
Audience: Undergraduate

2. Identify major historical developments in the evolution of Delta blues.
Audience: Undergraduate

3. Understand blues performers in terms of their personal and social lives, and distinguish between these individual lives and the mythologizing narratives offered in their place.
Audience: Undergraduate

4. Describe and explain elements of blues and blues history verbally.
Audience: Undergraduate

5. Construct knowledge about musical repertories by researching them online and directly listening to them.
Audience: Undergraduate

MUSIC 203 – AMERICAN ETHNICITIES AND POPULAR SONG
3 credits.

Examination of the role played by popular song in the formation of ethnic and racial identities in the United States with particular emphasis placed on both music's role in the perpetuation of racism and its use as a form of protest and anti-racist activism.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2022
Learning Outcomes: 1. define race and ethnicity and commonly used terms and concepts related to them
Audience: Undergraduate

2. recognize ethnic and racial stereotypes and caricatures and analyze the effects of their use in American popular song
Audience: Undergraduate

3. explain the cultural power inherent in names and the act of naming and the use of popular song to amplify or diminish that power with respect to racially defined groups
Audience: Undergraduate

4. identify ways in which popular song contributes to the creation and maintenance of racially defined American spaces and places
Audience: Undergraduate

5. describe and critique the process of cultural appropriation in American popular music
Audience: Undergraduate

6. recall key events in the history of American protest music and apply knowledge of that history to the evaluation of current anti-racism initiatives
Audience: Undergraduate

MUSIC 204 – STUDY ABROAD: INTERMEDIATE MUSIC THEORY OR HISTORY
1-3 credits.

A study abroad equivalency for elementary music appreciation, theory, or history that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

MUSIC 211 – SURVEY OF THE HISTORY OF WESTERN MUSIC
3 credits.

Introduction to development of music in the European tradition, before 1750.
Requisites: MUSIC 122 and 172
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and describe important styles and features of music from the Middle Ages, Renaissance, and Baroque era.
Audience: Undergraduate

2. Describe how musickers in previous centuries participated in the various forms of musicking through cultural context and technology.
Audience: Undergraduate

3. Describe how major cultural events impacted historical musicking.
Audience: Undergraduate

4. Recognize the ways in which historical musicking is similar and dissimilar to modern musicking.
Audience: Undergraduate

MUSIC 212 – SURVEY OF THE HISTORY OF WESTERN MUSIC
3 credits.

Introduction to development of music in the European tradition, 1750 to the present.
Requisites: MUSIC 122 and 172
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe principal repertory in the western music canon for the period from 1750 up to about 1960.
Audience: Undergraduate

2. Differentiate the principal musical styles in the western music canon for the period from 1750 up to about 1960.
Audience: Undergraduate

3. Articulate and apply key terms related to the western music canon for the period from 1750 up to about 1960.
Audience: Undergraduate

4. Recognize and identify the large-scale historical trends for the period from 1750 up to about 1960.
Audience: Undergraduate

MUSIC 218 – UNDERSTANDING ROCK
3 credits.

Explore the long history and contemporary life of rock music. Examine the genre's history within the broader cultural context that shaped its production and reception. Study the historical roots of rock music (such as Delta Blues, Rhythm Blues, and Doo-wop) and the association of rock music with youth counterculture throughout the 1960s. Delve into the evolution of rock styles beginning in the 1970s - such as Punk, Heavy Metal, Glam, Grunge, and Nu Metal. Consider how rock participates in the articulation of identity - such as race, gender, and sexuality - as well as themes of capitalism, political liberation, and creativity.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Discuss the history of rock and its critical reception.
Audience: Undergraduate

2. Interpret and apply academic texts in conversation and writing.
Audience: Undergraduate

3. Pose a research question, identify relevant resources, and make evidence-based arguments in writing.
Audience: Undergraduate

4. Practice effective listening and inquiry skills in discussion.
Audience: Undergraduate

5. Demonstrate critical insight into the political economy of popular music genres.
Audience: Undergraduate

MUSIC 219 – INTRODUCTION TO ETHNOMUSICOLOGY
3 credits.

Introduces the intellectual history, methodology, and theoretical concerns of the field of ethnomusicology. Examines how knowledge about music is formed, then explores how music becomes entangled with and productive of social identities and processes. Explores variety of musical styles and aesthetics from multiple social and geographic contexts through the lens of ethnomusicology. Not intended as a broad survey of musical styles around the world.
Requisites: Sophomore standing, declared in Music: BA/BS, Music: Education BM, or Music: Performance BM
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Summarize the broad history and methods of ethnomusicology as a discipline and approach to understanding music.
Audience: Undergraduate

2. Interpret unfamiliar music with increased thoughtfulness.
Audience: Undergraduate

3. Interrogate how broad social forces such as modernity, colonialism, and the production of identity come to influence musical production and value.

Audience: Undergraduate

4. Explore the relationship between musical aesthetics, meanings, and contexts.
Audience: Undergraduate

5. Integrate concepts explored in class with individual musical interests.
Audience: Undergraduate

6. Write and speak about music with increased clarity and precision.
Audience: Undergraduate

MUSIC 221 – MUSICA PRACTICA 3
3 credits.

Advanced strategies for composing, understanding, and writing about music.
Requisites: MUSIC 122 and 172
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and explain several conventions of chromatic harmony such as modal mixture, modulating sequences, diminished-seventh chords, Neapolitan and augmented-sixth chords, etc.
Audience: Undergraduate

2. Produce written and oral analysis of short pieces, regarding surface and deeper-level structures.
Audience: Undergraduate

3. Examine text settings and the relationship among poetry, phrasing, and form, considering some artistic developments of Romanticism.
Audience: Undergraduate

4. Begin to apply some techniques of Neo-Riemannian theories (NRT) to nineteenth-century repertoire.
Audience: Undergraduate

MUSIC 222 – MUSICA PRACTICA 4
3 credits.

Advanced strategies for composing, understanding, and writing about music.
Requisites: MUSIC 221 and concurrent enrollment in MUSIC 272
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Write and harmonize short melodies using chords of the upper partials.
Audience: Undergraduate

2. Describe the character and function of different scales and modes used by some composers of the 20th century.
Audience: Undergraduate

3. Analyze atonal music using set theory.
Audience: Undergraduate

4. Describe the experience of listening to electronic music in light of their increasing knowledge of its construction.
Audience: Undergraduate

5. Compose short pop songs.
Audience: Undergraduate

MUSIC 229 – JAZZ THEORY & COMPOSITION
3 credits.

Introduction to the applied theory of functional tonal and modal jazz harmony; analysis of song forms from the standard jazz repertoire; study of reharmonization techniques, chord substitution, and types of chord voicings; principles of melodic writing and motivic development, jazz counterpoint, and voice-leading considerations; and writing for common instruments in jazz ensembles. Students will analyze compositions from the standard jazz repertoire and apply the principles studied to create their own compositions for small jazz ensemble.
Requisites: MUSIC 122 and 172
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. In tonal lead-sheet jazz compositions, identify primary and secondary chords, mode mixture, tritone substitution, special function dominants and blues chords in relation to the underlying key centers.
Audience: Undergraduate

2. Employ descriptive analysis for modal and non-functional harmonic progressions from the standard jazz repertoire.
Audience: Undergraduate

3. Recognize and employ common devices for melody construction, such as chord tones, types of non-chord tones, and motivic development.
Audience: Undergraduate

4. Create idiomatically appropriate lead-sheet jazz composition that include reharmonizations and two-part jazz counterpoint.
Audience: Undergraduate

MUSIC 236 – BASCOM COURSE
3 credits.

A low-enrollment course developing skills in critical reading, logical thinking, use of evidence, and use of library resources. Emphasis on writing in the conventions of specific fields.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2022

MUSIC 240 – INTERPLAY BETWEEN MUSIC, ART, AND SOCIETY
3 credits.

Explore the relationships between the arts as they intersect with aspects of society, historically and in the present day, through various visual, auditory, and text-based expressive forms. Examine personal life experiences and ideas along with current issues related to music and art, and practice self-expression through the arts. No previous experience in any art form is necessary.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discover and/or explore individual artistic and musical abilities
Audience: Undergraduate

2. Transform from passive to active music listener and from consumer to creator of art
Audience: Undergraduate

3. Explore societal issues and their relationship to the arts through written reflection assignments
Audience: Undergraduate

4. Examine the roles that the arts play in society and relate that to their own lives and communities.
Audience: Undergraduate

5. Create artistic works individually, and in groups, in order to foster curiosity, empathy, and community
Audience: Undergraduate

MUSIC 252 – INTRODUCTION TO CONDUCTING AND PEDAGOGY
2 credits.

Introduction to the basic elements in conducting. Students will learn elementary conducting skills including technique, score study, rehearsal preparation, rehearsal structure, private studio construction, teaching techniques, and professional marketing.
Requisites: MUSIC 212, 221, and 271
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate elementary conducting skills and techniques.
Audience: Undergraduate

2. Apply effective score study methods.
Audience: Undergraduate

3. Prepare and structure rehearsals effectively.
Audience: Undergraduate

4. Utilize effective teaching techniques in a conducting context.
Audience: Undergraduate

5. Implement professional marketing skills for a music career.
Audience: Undergraduate

6. Communicate musical ideas and expression to an ensemble using non-verbal communication from the podium.
Audience: Undergraduate

MUSIC 253 – CONDUCTING
2 credits.

Conducting techniques, emphasis on practical application to vocal and instrumental groups.
Requisites: MUSIC 212, 221, and 271
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the function of conducting and the various roles of the conductor throughout and rehearsal/performance process.
Audience: Undergraduate

2. Demonstrate the basic conducting patters/gestures associated with the range of musical meters and styles.
Audience: Undergraduate

3. Demonstrate the alterations to the conducting gestures needed to show/change dynamics, tempo, articulations, accents, and phrasing.
Audience: Undergraduate

4. Demonstrate the ability to initiate a proper breath, to start or stop a musical phrase, show internal cues and cut- offs, and choose and conduct the three fermata types.
Audience: Undergraduate

5. Exhibit a developing mastery over use of the left hand (or right hand) in conducting, choosing when and how best to employ it.
Audience: Undergraduate

6. Determine the range of possible conducting choices for any given piece of music.
Audience: Undergraduate

7. Analyze a piece of music, prepare a score study, and determine how this would affect the rehearsing and performance of that piece.
Audience: Undergraduate

MUSIC 254 – CONDUCTING
2 credits.

Continuation of conducting techniques, emphasis on practical application to vocal and instrumental groups.
Requisites: MUSIC 253
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop language to communicate musical ideas to an ensemble
Audience: Undergraduate

2. Demonstrate effective use of Cues
Audience: Undergraduate

3. Demonstrate effective use of Dynamics
Audience: Undergraduate

4. Demonstrate effective use of Fermatas & releases
Audience: Undergraduate

5. Demonstrate effective use of Subdivisions
Audience: Undergraduate

6. Demonstrate effective use of Accelerando and ritardando
Audience: Undergraduate

7. Demonstrate effective use of Asymmetrical meter
Audience: Undergraduate

8. Demonstrate effective use of Mixed-meter
Audience: Undergraduate

9. Demonstrate skill with Hand independence
Audience: Undergraduate

MUSIC 256 – UNIVERSITY OPERA
1-2 credits.

Opera role: preparation, rehearsal and performance in University opera production. Contact School of Music for audition information
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply practice methods and time management skills to efficiently learn and rehearse operatic and musical theater material.
Audience: Undergraduate

2. Synthesize singing, language, musicality, style, and acting values to effectively perform material from the operatic and musical theater repertoire.
Audience: Undergraduate

3. Demonstrate stagecraft skills in general as well as those particular to opera and musical theater.
Audience: Undergraduate

4. Integrate research as part of role preparation.
Audience: Undergraduate

5. Demonstrate collaboration and communication skills that foster a sense of ensemble within both in-person and virtual performance situations.
Audience: Undergraduate

6. Support colleagues' work and receive their support in return.
Audience: Undergraduate

MUSIC 257 – OPERA WORKSHOP
2 credits.

Performance of scenes from standard operas, including singing, accompanying, and dramatic action; instruction in voice projection, posture, and gesture; problems of staging, lighting, costuming, and scenery. Contact School of Music for audition information.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Efficiently learn operatic and musical theater material in English and other languages
Audience: Undergraduate

2. Synthesize singing, language, musicality, style, and acting values to effectively perform an excerpt from an operatic or musical theater role
Audience: Undergraduate

3. Exhibit performance stagecraft skills including those particular to opera and musical theater
Audience: Undergraduate

4. Fluidly work back and forth between foreign language texts and their English translations, arriving at a sense of "owning the text"
Audience: Undergraduate

5. Apply character-specific research to role preparation
Audience: Undergraduate

MUSIC 260 – GLOBAL HAND DRUMMING ENSEMBLE: SURVEY OF SELECTED GLOBAL HAND DRUMMING TRADITIONS
1 credit.

Exploration of a variety of global drumming traditions culminating in group performance opportunities. Learn specific techniques and rhythms as well as skills required to facilitate drum circles for all levels of players.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Study and perform music from various global cultures.
Audience: Undergraduate

2. Learn techniques and information required to facilitate community and school drumming groups.
Audience: Undergraduate

3. Illustrate competency in basic procedures for tuning and maintaining the instruments required for such an ensemble.
Audience: Undergraduate

4. Demonstrate a discerning ear and requisite skills for musical comparisons and analysis.
Audience: Undergraduate

5. Recognize nuances of musical style and rhythm in the context of drumming.
Audience: Undergraduate

MUSIC 262 – JAZZ ENSEMBLE
1 credit.

Assignments in performing ensemble literature. Audition and instructor consent required for students enrolling the first time
Requisites: MUSIC 262
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Rehearse and competently perform in multiple live settings a range of classic jazz repertoire.
Audience: Undergraduate

2. Perform jazz music with technical accuracy, stylistic authenticity and individual creativity.
Audience: Undergraduate

3. Contextualize the repertoire in its culture and history.
Audience: Undergraduate

4. Make continual improvements in the areas of individual tone production, music reading, and improvisation, and develop and enhance ensemble communication and interaction.
Audience: Undergraduate

MUSIC 265 – ENSEMBLE-WOODWIND
1 credit.

Assignments in performing ensemble literature. Audition and instructor consent required for students enrolling the first time
Requisites: MUSIC 265
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate essential skills involved in performing music in a small ensemble without a conductor.
Audience: Undergraduate

2. Show rigorous individual preparation.
Audience: Undergraduate

3. Listen attentively to others involved.
Audience: Undergraduate

4. Demonstrate the self-discipline indispensable to a collective activity.
Audience: Undergraduate

5. Exhibit strengthened personal interactive skills that are the premise of any successful and enjoyable music-making.
Audience: Undergraduate

MUSIC 266 – RESISTANCE MUSIC ENSEMBLE
1 credit.

Assignments in performing ensemble literature. Explore a variety of musical styles created from social movements and generational and cultural identity, through rehearsals and performance. Styles to be covered, studied, and performed include, but are not limited to Hip Hop, Reggae, Jazz, and Cumbia. Audition and instructor consent required for students enrolling the first time
Requisites: MUSIC 266
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Rehearse and competently perform in multiple live settings repertoire composed and recorded by marginalized groups and inspired by resistance to its given hegemony
Audience: Undergraduate

2. Perform music composed and/or recorded by the artist(s) studied with technical accuracy, stylistic authenticity and individual creativity
Audience: Undergraduate

3. Contextualize the repertoire in its culture and history
Audience: Undergraduate

4. Internalize the rhythmic concepts associated by the indicated musical style
Audience: Undergraduate

5. Make continual improvements in the areas of individual tone production, music reading, and improvisation, and develop and enhance ensemble communication and interaction
Audience: Undergraduate

MUSIC 267 – ENSEMBLE-BRASS
1 credit.

Assignments in performing ensemble literature. Audition and instructor consent required for students enrolling the first time
Requisites: MUSIC 267
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate a reasonable level of preparation, accuracy and consistency when playing and performing brass chamber repertoire.
Audience: Undergraduate

2. Demonstrate musical and technical proficiency and stylistic awareness of brass chamber repertoire.
Audience: Undergraduate

3. Study a music score and utilize music scores in rehearsal.
Audience: Undergraduate

4. Exhibit critical listening skills and expand awareness of brass recordings significant to the genre.
Audience: Undergraduate

5. Demonstrate stage presence and performance techniques relevant to live performance.
Audience: Undergraduate

6. Arrange, transcribe and/or compose music for brass ensembles.
Audience: Undergraduate

7. Conduct a brass ensemble in rehearsal and performance.
Audience: Undergraduate

MUSIC 268 – ENSEMBLE-PERCUSSION
1 credit.

Assignments in performing ensemble literature. Audition and instructor consent required for students enrolling the first time
Requisites: MUSIC 268
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Show improved chamber music skills, including; gesture, cuing, group breath, etc.
Audience: Undergraduate

2. Exhibit improved rehearsal protocol and professional interaction.
Audience: Undergraduate

3. Practice rehearsal preparation and score study.
Audience: Undergraduate

4. Practice percussive problem solving in practical and musical settings.
Audience: Undergraduate

5. Practice appropriate techniques on all instruments studied.
Audience: Undergraduate

6. Place cultural and musical traditions in appropriate musical contexts.
Audience: Undergraduate

7. Engage in a variety of musical styles, repertoire and performance settings.
Audience: Undergraduate

MUSIC 269 – ENSEMBLE-STRING
1 credit.

Assignments in performing ensemble literature. Audition and instructor consent required for students enrolling the first time
Requisites: MUSIC 269
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Show improved skills in instrumental technique.
Audience: Undergraduate

2. Demonstrate broader stylistic awareness, theoretical understanding.
Audience: Undergraduate

3. Practice score study, and general performance abilities.
Audience: Undergraduate

4. Exhibit collaboration skills to positively impact ensemble musicianship.
Audience: Undergraduate

5. Apply time management and communication skills for rehearsal efficiency.
Audience: Undergraduate

6. Discuss musical ideas with colleagues.
Audience: Undergraduate

7. Enhance individual practice skills.
Audience: Undergraduate

8. Perform a chamber work with musical understanding.
Audience: Undergraduate

MUSIC 270 – ENSEMBLE-GUITAR
1 credit.

Rehearsal, coaching and preparing guitar literature for performance of duos, trios, and quartets. Audition and instructor consent required for students enrolling the first time. Musicians other than guitarists are permitted to enroll and be incorporated into the ensembles.
Requisites: MUSIC 270
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Improve ensemble performance skills.
Audience: Undergraduate

2. Develop proficiency in a varied repertoire of guitar ensemble music, and chamber music with guitar.
Audience: Undergraduate

3. Practice music reading and ensemble coordination.
Audience: Undergraduate

MUSIC 271 – MUSICA PRACTICA: AURAL SKILLS 3
1 credit.

Intermediate aural skills instruction.
Requisites: MUSIC 122 and concurrent enrollment in MUSIC 221
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate proficiency in fixed-do solfege, including the ability to accurately perform chromatic passages.
Audience: Undergraduate

2. Demonstrate score reading skills at the piano, up to three staves.
Audience: Undergraduate

3. Ready and perform music in tenor clef.
Audience: Undergraduate

4. Improve dictation skills, accurately transcribing up to two lines of music.
Audience: Undergraduate

5. Memorize cadences and harmonic sequences, demonstrating their use in various musical contexts.
Audience: Undergraduate

MUSIC 272 – MUSICA PRACTICA: AURAL SKILLS 4
1 credit.

Intermediate aural skills instruction.
Requisites: MUSIC 221 and concurrent enrollment in MUSIC 222
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate advanced solfege skills, including proficiency in atonal sight singing using the Modus Novus technique.
Audience: Undergraduate

2. Demonstrate ability to read music written on up to four staves and transposing for B-flat instruments.
Audience: Undergraduate

3. Develop rhythmic proficiency, including the ability to perform polyrhythms and irregular meters.
Audience: Undergraduate

4. Apply harmonic dictation skills to accurately transcribe bass lines and identify harmonic progressions using Roman numerals.
Audience: Undergraduate

5. Articulate the qualities of 20th and 21st-century music, using appropriate descriptive terminology.
Audience: Undergraduate

MUSIC 297 – SPECIAL TOPICS IN MUSIC
1-3 credits.

Exploration of wide-ranging topics in music history, music performance, music theory or music education.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop and apply foundational concepts of musical study in performance, theory, history, or pedagogy.
Audience: Undergraduate

2. Develop the ability to learn independently and to integrate knowledge across domains of research and applied studies.
Audience: Undergraduate

3. Communicate musical ideas and concepts verbally, in writing, or through public performance.
Audience: Undergraduate

4. Develop skill in working collaboratively and professionally in applied and academic settings.
Audience: Undergraduate

MUSIC/CURRIC 300 – PRINCIPLES OF MUSIC EDUCATION
2 credits.

Principles of music education, including philosophy, history, and current practices and curricular trends. Survey of music education in and out of schools as situated within diverse, pluralistic communities.
Requisites: Declared in Music: Education BM and sophomore standing
Course Designation: Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain why music and music education are important, valuable, and meaningful.
Audience: Undergraduate

2. Demonstrate understandings of and dispositions toward music learning and teaching that are mindful, inclusive, respectful, empathic, relevant, and responsive to human difference.
Audience: Undergraduate

3. Develop and demonstrate awareness, sensitivity, and honor for human differences, including gender, sexuality, race, ethnicity, nationality, culture, class, language, religion, and ability.
Audience: Undergraduate

4. Demonstrate developing awareness of the connection between how you think about music learning and teaching and how those beliefs play out in all decisions that you make regarding your music classroom.
Audience: Undergraduate

5. Develop awareness of your own unique musical experiences and personality traits.
Audience: Undergraduate

6. Identify traits of successful music educators and the professional characteristics, expectations, sensitivity, and interpersonal skills required of music educators.
Audience: Undergraduate

MUSIC/CURRIC 301 – MUSIC LEARNING AND TEACHING 1
2 credits.

The learning and teaching of music at the elementary and middle school levels.
Requisites: MUSIC/CURRIC 300 and concurrently enrolled in MUSIC/CURRIC 337 and declared in Music: Education
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss critical perspectives on contemporary and historical issues in music learning and teaching.
Audience: Undergraduate

2. Identify values and meanings of music education and how they shape music learning and teaching.
Audience: Undergraduate

3. Critically interrogate issues, power, identity, and difference (including, but not limited to race, ethnicity, gender, LGBTQ+ identities, class, and disability) in music education inside and outside of schools.
Audience: Undergraduate

4. Design and teach lesson plans/units/projects for a variety of learners in a variety of contexts.
Audience: Undergraduate

5. Develop context- and learner-specific pedagogies that foster mindful, inclusive, respectful, empathetic, relevant, responsive, and sustaining learning.
Audience: Undergraduate

6. Curate and critique appropriate texts, repertoire, and other materials to support learners in and out of schools.
Audience: Undergraduate

7. Use and critically examine instruments, technologies, and tools to support learning in and out of schools.
Audience: Undergraduate

8. Model knowledge and skills as a reflective practitioner.
Audience: Undergraduate

MUSIC/CURRIC 302 – MUSIC LEARNING AND TEACHING 2
2 credits.

The learning and teaching of music at the high school level.
Requisites: MUSIC/CURRIC 301 and MUSIC/CURRIC 337
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss critical perspectives on contemporary and historical issues in music learning and teaching.
Audience: Undergraduate

2. Identify values and meanings of music education and how they shape music learning and teaching.
Audience: Undergraduate

3. Critically interrogate issues, power, identity, and difference (including, but not limited to race, ethnicity, gender, LGBTQ+ identities, class, and disability) in music education inside and outside of schools.
Audience: Undergraduate

4. Design and teach lesson plans/units/projects for a variety of learners in a variety of contexts.
Audience: Undergraduate

5. Develop context- and learner-specific pedagogies that foster mindful, inclusive, respectful, empathetic, relevant, responsive, and sustaining learning.
Audience: Undergraduate

6. Curate and critique appropriate texts, repertoire, and other materials to support learners in and out of schools.
Audience: Undergraduate

7. Develop competency to use and critically examine instruments, technologies, and tools to support learning in and out of schools.
Audience: Undergraduate

8. Improve knowledge and skills as a reflective practitioner.
Audience: Undergraduate

MUSIC/CURRIC 304 – COMPOSITION, ARRANGEMENT, AND ORCHESTRATION FOR THE MUSIC TEACHER
2 credits.

Introduction to the teaching of musical composition, arrangement, and orchestration. Special emphasis on how music technologies interact with conceptions of composition, arrangement, and orchestration; implications for music learning and teaching.
Requisites: MUS PERF 104
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss critical perspectives on contemporary and historical issues in music learning and teaching.
Audience: Undergraduate

2. Identify values and meanings of music education and how they shape music learning and teaching.
Audience: Undergraduate

3. Critically interrogate issues, power, identity, and difference (including, but not limited to race, ethnicity, gender, LGBTQ+ identities, class, and disability) in music education inside and outside of schools.
Audience: Undergraduate

4. Design and teach lesson plans/units/projects for a variety of learners in a variety of contexts.
Audience: Undergraduate

5. Develop context- and learner-specific pedagogies that foster mindful, inclusive, respectful, empathetic, relevant, responsive, and sustaining learning.
Audience: Undergraduate

6. Curate and critique appropriate texts, repertoire, and other materials to support learners in and out of schools.
Audience: Undergraduate

7. Develop competency to use and critically examine instruments, technologies, and tools to support learning in and out of schools.
Audience: Undergraduate

8. Improve knowledge and skills as a reflective practitioner.
Audience: Undergraduate

MUSIC 317 – MUSICAL WOMEN IN EUROPE AND AMERICA: CREATIVITY, PERFORMANCE, AND IDENTITY
3 credits.

Explores women's musical activities and issues related to them by focusing on composers, performers, and audiences in a wide range of contexts, from Europe in the Medieval Era through 21st-century America; no reading knowledge of music is required.
Requisites: Sophomore standing and declared in an Honors program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. understand cultural processes that have privileged and rewarded the achievement of certain individuals and groups over that of others throughout history
Audience: Undergraduate

2. observe the interdependent relationship between musical composers, performers, and audiences that has shaped music's history, focusing on gender differences
Audience: Undergraduate

3. promote critical thinking skills by asking students to link course content with personal experiences and observations and understand the interconnectedness of various forms of art and culture through the implications of gender-related concerns on music's development
Audience: Undergraduate

4. strengthen written and oral communication skills through oral and written assignments, discussion, and presentations on related topics
Audience: Undergraduate

MUSIC/AFROAMER/DANCE 318 – CULTURAL CROSS CURRENTS: WEST AFRICAN DANCE/MUSIC IN THE AMERICAS
3 credits.

The influence of traditional West African dance/music heritage in historical, artistic, social contexts in the development of new hybrid forms of music/dance created by cross-pollination of cultures of Africans, Europeans and indigenous peoples in the New World.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

MUSIC 319 – TOPICS IN MUSIC AND ETHNICITY IN THE UNITED STATES
3 credits.

Explores music of ethnic groups in the U.S., including that of marginalized minorities, in its cultural context. Topics may include the music of African American, Asian American, Native American and Jewish communities.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Identify and analyze how music contributes to the construction of ethnic identity.
Audience: Undergraduate

2. Collaborate with others to analyze complex texts dealing with social and cultural theory.
Audience: Undergraduate

3. Analyze the different historical experiences and social forces that contribute to the social construction of ethnicity, and how these forces change over time.
Audience: Undergraduate

4. Integrate insights from academic discourse with personal observations or lived experience.
Audience: Undergraduate

5. Distinguish different perspectives and methods of academic inquiry regarding culture and music.
Audience: Undergraduate

6. Conduct creative research that integrates insights gained through critical engagement with course material.
Audience: Undergraduate

MUSIC 329 – JAZZ ARRANGING
3 credits.

Survey of standard musical techniques and devices for arranging lead-sheet-based jazz compositions for medium and large jazz ensembles through score study, musical exercises, and arranging projects for live ensembles. Topics include jazz counterpoint and melody writing; preparing arrangements through outlines and condensed scores; chord substitutions and reharmonization; ranges, timbres, notational and technical considerations of standard jazz instruments; motivic development; voicing techniques, including mechanical, spreads, upper structure triads, and voicings in 4ths, 5ths and clusters; and orchestration techniques, including couplings and concerted writing.
Requisites: MUSIC 229
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. read, comprehend, and analyze scores for medium and large jazz ensemble
Audience: Undergraduate

2. compose for all common jazz instruments
Audience: Undergraduate

3. compose contrapuntal melodies in a jazz idiom
Audience: Undergraduate

4. arrange for medium and large jazz ensemble using common voicing and orchestration techniques
Audience: Undergraduate

MUSIC 331 – JAZZ IMPROVISATION
3 credits.

Theoretical concepts, development of aural skills, and analysis procedures related to the jazz idiom. Audition required.
Requisites: Consent of instructor
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify (visually and aurally) chord structures, scales and modes in the Major, Harmonic Minor, the Blues, Minor and Major Pentatonic, and Bebop scales.
Audience: Both Grad & Undergrad

2. Formulate and perform spontaneous melodies over song progressions and song forms.
Audience: Both Grad & Undergrad

3. Solve rhythmic placement of their improvisation within a steady pulse.
Audience: Both Grad & Undergrad

4. Apply historical and contemporary concepts of musical styles and forms, and research approaches specific to their instrument.
Audience: Both Grad & Undergrad

5. Apply melodic, harmonic, and rhythmic devices for improvisation over a chord and song form.
Audience: Both Grad & Undergrad

6. Describe and analyze improvisation by themselves, their peers, and from recordings.
Audience: Both Grad & Undergrad

7. Synthesize knowledge with insights and creativity to demonstrate self-understanding and improved performance practice and improvisation.
Audience: Graduate

MUSIC 332 – JAZZ IMPROVISATION
3 credits.

More advanced theoretical concepts, development of aural skills, and analysis procedures related to the jazz idiom.
Requisites: MUSIC 331
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify (visually and aurally) chord structures, scales and modes in the Major, Harmonic Minor, the Blues, Minor and Major Pentatonic, and Bebop scales.
Audience: Both Grad & Undergrad

2. Formulate and perform spontaneous melodies over song progressions and song forms.
Audience: Both Grad & Undergrad

3. Solve rhythmic placement of their improvisation within a steady pulse.
Audience: Both Grad & Undergrad

4. Apply historical and contemporary concepts of musical styles and forms, and research approaches specific to their instrument.
Audience: Both Grad & Undergrad

5. Apply melodic, harmonic, and rhythmic devices for improvisation over a chord and song form.
Audience: Both Grad & Undergrad

6. Describe and analyze improvisation by themselves, their peers, and from recordings.
Audience: Both Grad & Undergrad

7. Synthesize knowledge with insights and creativity to demonstrate self-understanding and improved performance practice and improvisation.
Audience: Graduate

MUSIC/CURRIC 337 – PRACTICUM IN TEACHING MUSIC
1 credit.

Observation and participation in K-12 music education settings.
Requisites: Declared in Music: Education and concurrent enrollment in MUSIC/CURRIC 301 or 302
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss critical perspectives on contemporary and historical issues in music learning and teaching.
Audience: Undergraduate

2. Identify values and meanings of music education and how they shape music learning and teaching.
Audience: Undergraduate

3. Critically interrogate issues, power, identity, and difference (including, but not limited to race, ethnicity, gender, LGBTQ+ identities, class, and disability) in music education inside and outside of schools.
Audience: Undergraduate

4. Design and teach lesson plans/units/projects for a variety of learners in a variety of contexts.
Audience: Undergraduate

5. Develop context- and learner-specific pedagogies that foster mindful, inclusive, respectful, empathetic, relevant, responsive, and sustaining learning.
Audience: Undergraduate

6. Curate and critique appropriate texts, repertoire, and other materials to support learners in and out of schools.
Audience: Undergraduate

7. Develop competency to use and critically examine instruments, technologies, and tools to support learning in and out of schools.
Audience: Undergraduate

8. Improve knowledge and skills as a reflective practitioner.
Audience: Undergraduate

MUSIC 340 – PEDAGOGY
1-2 credits.

Pedagogical methods for applied music offered on all instruments and voice by appropriate applied staff. Survey of music, methods, and materials.
Requisites: MUS PERF 401, 402, 403, 405, 407, 409, 411, 413, 415, 417, 419, 421, 423, 425, 427, 431, 433, 435, 437, 439, or 440
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Examine existing beliefs and values about teaching and learning.
Audience: Undergraduate

2. Explore selected teaching materials and resources appropriate for beginning and intermediate-level students.
Audience: Undergraduate

3. Examine musical and interpretive issues (such as tone, phrasing, dynamics, articulation, style) through a pedagogical lens.
Audience: Undergraduate

4. Develop holistic approach to scaffolding development of technique for the elementary and intermediate students, including diagnostic skills.
Audience: Undergraduate

5. Engage in mock-teaching, observations, peer and self-reflections for applied study at the beginning through intermediate levels of study.
Audience: Undergraduate

6. Conduct pedagogical research in areas of interest.
Audience: Undergraduate

MUSIC 346 – REPERTOIRE
1-2 credits.

A comprehensive study of sources, analysis, and style of repertoire for a particular instrument(s) or voice(s).
Requisites: MUS PERF 401, 402, 403, 405, 407, 409, 411, 413, 415, 417, 419, 421, 423, 425, 427, 431, 433, 435, 437, 439, or 440
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss a range of repertoire, including works by historically marginalized and underrepresented composers.
Audience: Both Grad & Undergrad

2. Interpret representative works in the literature, through aural and score analysis.
Audience: Both Grad & Undergrad

3. Apply historical and and socio-cultural contexts for repertoire, using a variety of approaches and a diversity of perspectives.
Audience: Both Grad & Undergrad

4. Describe the stylistic approach and compositional features of relevant composers.
Audience: Both Grad & Undergrad

5. Write and/or present effectively about style, analysis, and historical context of selected repertoire.
Audience: Both Grad & Undergrad

6. Format, write program notes, and present programs for academic and public performance.
Audience: Graduate

MUSIC 405 – SEMINAR: CULTURAL STUDY OF MUSIC
3 credits.

Explores various topics in music research from the perspective of contemporary cultural theory and history. Develops skills in critical analysis of music and culture, drawing from literatures in postcolonial studies, critical race theory, studies of empire, colonialism, and capitalism.
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022
Learning Outcomes: 1. Analyze and describe critical theoretical approaches to the study of music and sound.
Audience: Both Grad & Undergrad

2. Articulate how music contributes to the creation of cultural meaning.
Audience: Both Grad & Undergrad

3. Evaluate different modes and methods of academic inquiry regarding culture and music by analyzing approaches from multiple disciplinary perspectives.
Audience: Both Grad & Undergrad

4. Lead discussions on complex texts or topics.
Audience: Both Grad & Undergrad

5. Integrate insights from academic discourse with individual observations or lived experience.
Audience: Both Grad & Undergrad

6. Design and carry out research that implements critical understanding of the course topic.
Audience: Undergraduate

7. Conduct original research that meets disciplinary standards and might serve the basis for a larger project in the student's area of specialization.
Audience: Graduate

MUSIC/CURRIC 409 – STUDENT TEACHING IN GENERAL AND VOCAL MUSIC
6-12 credits.

Supervised student teaching in general and vocal K-12 settings.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss critical perspectives on contemporary and historical issues in music learning and teaching.
Audience: Undergraduate

2. Identify values and meanings of music education and how they shape music learning and teaching.
Audience: Undergraduate

3. Critically interrogate issues, power, identity, and difference (including, but not limited to race, ethnicity, gender, LGBTQ+ identities, class, and disability) in music education inside and outside of schools.
Audience: Undergraduate

4. Design and teach lesson plans/units/projects for a variety of learners in a variety of contexts.
Audience: Undergraduate

5. Develop context- and learner-specific pedagogies that foster mindful, inclusive, respectful, empathetic, relevant, responsive, and sustaining learning.
Audience: Undergraduate

6. Curate and critique appropriate texts, repertoire, and other materials to support learners in and out of schools.
Audience: Undergraduate

7. Develop competency to use and critically examine instruments, technologies, and tools to support learning in and out of schools.
Audience: Undergraduate

8. Improve knowledge and skills as a reflective practitioner.
Audience: Undergraduate

MUSIC/CURRIC 410 – STUDENT TEACHING IN GENERAL AND INSTRUMENTAL MUSIC
6-12 credits.

Supervised student teaching in general and instrumental K-12 settings.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss critical perspectives on contemporary and historical issues in music learning and teaching.
Audience: Undergraduate

2. Identify values and meanings of music education and how they shape music learning and teaching.
Audience: Undergraduate

3. Critically interrogate issues, power, identity, and difference (including, but not limited to race, ethnicity, gender, LGBTQ+ identities, class, and disability) in music education inside and outside of schools.
Audience: Undergraduate

4. Design and teach lesson plans/units/projects for a variety of learners in a variety of contexts.
Audience: Undergraduate

5. Develop context- and learner-specific pedagogies that foster mindful, inclusive, respectful, empathetic, relevant, responsive, and sustaining learning.
Audience: Undergraduate

6. Curate and critique appropriate texts, repertoire, and other materials to support learners in and out of schools.
Audience: Undergraduate

7. Develop competency to use and critically examine instruments, technologies, and tools to support learning in and out of schools.
Audience: Undergraduate

8. Improve knowledge and skills as a reflective practitioner.
Audience: Undergraduate

MUSIC 411 – SURVEY OF MUSIC IN THE MIDDLE AGES
3 credits.

Major genres and composers of monophonic and polyphonic music, sacred and secular in Western Europe and England (ca. 7th-14th centuries).
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Review traditional approaches to the study of medieval music and understand the resources available for learning medieval music through those approaches.
Audience: Both Grad & Undergrad

2. Explore the relevance and value of studying medieval music in the modern music curriculum.
Audience: Both Grad & Undergrad

3. Describe how expressions of power and music practices were linked in the Middle Ages and continue today.
Audience: Both Grad & Undergrad

4. Explore the current state of research in music (from the Middle Ages and beyond) by reading and discussing articles, book chapter, etc.
Audience: Both Grad & Undergrad

5. Complete a creative research project of a length, depth, and scope that meets graduate-level expectations and that might serve as the basis for a larger project in the student's area of study (thesis or other document).
Audience: Graduate

MUSIC 412 – SURVEY OF MUSIC IN THE RENAISSANCE
3 credits.

Major genres and composers of sacred and secular music (ca. 15th-16th centuries).
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Review traditional approaches to the study of Renaissance music and understand the resources available for learning Renaissance music through those approaches.
Audience: Both Grad & Undergrad

2. Discuss the relevance and value of studying Renaissance in the modern music curriculum.
Audience: Both Grad & Undergrad

3. Explore the current state of research in music (from the Renaissance and beyond) by reading and discussing articles, book chapters, etc.
Audience: Both Grad & Undergrad

4. Investigate materiality as it directly relates to the study and practice of music in both contemporary and Renaissance culture.
Audience: Both Grad & Undergrad

5. Complete a creative research project of a length, depth, and scope that meets graduate-level expectations and that might serve as the basis for a larger project in the student's area of study (thesis or other document).
Audience: Graduate

MUSIC 413 – SURVEY OF MUSIC IN THE BAROQUE ERA
3 credits.

Major genres and composers of sacred and secular music in Western Europe (ca. 1600-1750).
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Identify principles and distinguishing features of Baroque-era musical genres.
Audience: Both Grad & Undergrad

2. Explain the relevance of the topics in the course units.
Audience: Both Grad & Undergrad

3. Identify the interdependent relationship between composers, performers, other creative personnel, and audiences that has shaped the history of music in this era.
Audience: Both Grad & Undergrad

4. Link content with personal experiences and observations.
Audience: Both Grad & Undergrad

5. Effectively discuss, present, and write about a related topic.
Audience: Both Grad & Undergrad

6. Conduct original research that meets disciplinary standards and might serve the basis for a larger project in the student's area of specialization.
Audience: Graduate

MUSIC 414 – SURVEY OF MUSIC IN THE CLASSIC ERA
3 credits.

Major genres and composers in Western Europe (ca. 1750-1827).
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify principles and distinguishing features of Classical-era musical genres.
Audience: Both Grad & Undergrad

2. Explain the relevance of the topics in the course units.
Audience: Both Grad & Undergrad

3. Identify the interdependent relationship between composers, performers, other creative personnel, and audiences that has shaped eighteenth-century music's history.
Audience: Both Grad & Undergrad

4. Link content with personal experiences and observations.
Audience: Both Grad & Undergrad

5. Effectively discuss, present, and write about a related topic.
Audience: Both Grad & Undergrad

6. Conduct original research that meets disciplinary standards and might serve the basis for a larger project in the student's area of specialization.
Audience: Graduate

MUSIC 415 – SURVEY OF MUSIC IN THE ROMANTIC ERA
3 credits.

Major genres and composers in Europe (ca. 1820-1910).
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify principles and distinguishing features of Romantic-era musical genres.
Audience: Both Grad & Undergrad

2. Explain the relevance of the topics in the course units.
Audience: Both Grad & Undergrad

3. Identify the interdependent relationship between composers, performers, other creative personnel, and audiences that has shaped the history of music in this era.
Audience: Both Grad & Undergrad

4. Link content with personal experiences and observations.
Audience: Both Grad & Undergrad

5. Effectively discuss, present, and write about a related topic.
Audience: Both Grad & Undergrad

6. Conduct original research that meets disciplinary standards and might serve the basis for a larger project in the student's area of specialization.
Audience: Graduate

MUSIC 416 – SURVEY OF MUSIC IN THE TWENTIETH CENTURY
3 credits.

Major genres and composers in Europe and the United States.
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Summarize scholarship on twentieth century music.
Audience: Both Grad & Undergrad

2. Identify and discuss the historical significance of music from throughout the twentieth century.
Audience: Both Grad & Undergrad

3. Distinguish between the principal musical styles in art and popular musics during the twentieth century.
Audience: Both Grad & Undergrad

4. Apply key terms and concepts in discussions of the history of music in the twentieth century.
Audience: Both Grad & Undergrad

5. Describe the large-scale historical and cultural trends relating to the performance and discussion of Western music throughout the twentieth century.
Audience: Both Grad & Undergrad

6. Conduct original research that meets disciplinary standards and might serve the basis for a larger project in the student’s area of specialization.
Audience: Graduate

MUSIC 417 – JAZZ HISTORIES
3 credits.

Examination of jazz history with an emphasis on scholarship, criticism, and fictional representations of jazz culture especially as they relate to the African American diaspora. Emphasis on relationship between the history of racial inequality in the United States and the development of jazz and jazz scholarship.
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate familiarity with jazz scholarship by scholars and critics
Audience: Undergraduate

2. Describe the historical significance of prominent scholars and jazz figures as they relate to the history of African American communities the United States
Audience: Undergraduate

3. Analyze the role of oral history (especially by African American artists) in disrupting the knowledge base established by written histories
Audience: Undergraduate

4. Engage with a respected jazz artist by engaging with a class guest
Audience: Undergraduate

5. Demonstrate familiarity with key terms and concepts in discussions of jazz and jazz history
Audience: Undergraduate

6. Describe the large-scale historical and cultural trends relating to the performance and discussion of jazz from approximately 1900 to the present
Audience: Undergraduate

7. Communicate informed opinions based on primary source materials and oral histories, based on knowledge from scholarly materials
Audience: Undergraduate

MUSIC 418 – MUSIC AND THE CITY
3 credits.

Examine the relationship between music and urban space, broadly conceived. Consider the proposition that music is central to how we understand the social life of cities. Examine the entanglements of space, meaning, and aesthetics in cities across history and geography. Explore concepts of "music scenes," urban planning and creative cities, the production of regional "sounds," and how music produces senses of place.
Requisites: MUSIC 212 or declared in Music MA, Music MM, Music PhD, Music: Performance DMA, or Doctoral Minor in Music
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Discuss the literature and conceptual repertoire of music sociology, human geography, and urban studies.
Audience: Both Grad & Undergrad

2. Interpret and apply difficult texts in conversation and writing.
Audience: Both Grad & Undergrad

3. Pose a research question, identify relevant resources, and make evidence-based arguments.
Audience: Both Grad & Undergrad

4. Set discussion goals, manage time, and ask good questions for effective discussion facilitation.
Audience: Both Grad & Undergrad

5. Track key terms across several bodies of academic literature and across geographic and temporal contexts.
Audience: Both Grad & Undergrad

6. Complete an original research paper akin to an academic journal article that meets rigorous standards and may serve as the basis for a larger project in the student's area of specialization.
Audience: Graduate

MUSIC 419 – MUSIC IN THE UNITED STATES
3 credits.

Explores a variety of genres within their social and historical contexts including folk songs and ballads, the Native American Pow Wow, New England psalmody, popular song repertories, musical theater and opera, concert music, blues and jazz.
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify principles and distinguishing features of select American musical genres.
Audience: Both Grad & Undergrad

2. Explain the relevance of a genre in relation to American culture and society and its role in national identity, values, attitudes, and norms.
Audience: Both Grad & Undergrad

3. Identify the interdependent relationship between composers, performers, other creative personnel, and audiences that has shaped the works listed in the course units.
Audience: Both Grad & Undergrad

4. Link content with personal experiences and observations.
Audience: Both Grad & Undergrad

5. Effectively discuss, present, and write about a related topic.
Audience: Both Grad & Undergrad

6. Conduct original research that meets disciplinary standards and might serve the basis for a larger project in the student's area of specialization.
Audience: Graduate

MUSIC/CURRIC 420 – TEACHING POPULAR INSTRUMENTAL MUSIC 1
1 credit.

Development of critical perspectives, musical knowledge, and pedagogical skills needed to teach instrumental popular music. Focus on popular string instruments, their electronic counterparts, and emerging technologies for the performance and production of popular music.
Requisites: Declared in Music: Education BM and sophomore standing
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop basic skills necessary for teaching and learning various popular music styles on the guitar, bass, and drum set.
Audience: Undergraduate

2. Develop a series of instructional strategies for teaching, focusing on lesson plans and curricular units that incorporate instruments commonly used in popular music.
Audience: Undergraduate

3. Develop critical perspectives on popular music by exploring the intersection of popular music with issues of identity, technology, and globalization.
Audience: Undergraduate

MUSIC/CURRIC 421 – TEACHING POPULAR INSTRUMENTAL MUSIC 2
1 credit.

Development of critical perspectives, musical knowledge, and pedagogical skills needed to teach instrumental popular music. Focus on popular percussion instruments, their electronic counterparts, and emerging technologies for the performance and production of popular music.
Requisites: Declared in Music: Education BM and sophomore standing
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop skills associated with digital audio workstations (DAWS), including inputting MIDI, manipulating audio files, and recording.
Audience: Undergraduate

2. Examine and implement pedagogies of popular music associated with DAWs.
Audience: Undergraduate

3. Critically interrogate issues of power and identity (including race, gender, class, and ability) in music education and schooling through popular music.
Audience: Undergraduate

MUSIC 422 – FUNDAMENTALS OF MUSIC PRODUCTION
3 credits.

Introduction to the theory and practices of digital audio recording and editing. Covers basic background knowledge of signal flow, culminating in hands-on operation of a digital audio workstation. Introduction to industry standard software and hardware. Related equipment, including microphones, virtual instruments, and outboard processors are covered. Ear Training terms and skills, studio definitions and nomenclature for equipment, and terminology used in the current professional environment. Learn how to make music "in the box" using only a computer, then transition to working with real musicians.
Requisites: Sophomore standing
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the science of sound, including concepts like the Nyquist Theorem, how we perceive pitch and amplitude, resonance, and how audio becomes digitized.
Audience: Undergraduate

2. Practice all phases of a recording project from pre-production to recording, editing, and mixing.
Audience: Undergraduate

3. Record high-quality audio applying various stereo and mono recording techniques.
Audience: Undergraduate

4. Use recording industry standard software and virtual instruments to create musical compositions.
Audience: Undergraduate

MUSIC 423 – CONTEMPORARY ISSUES IN POPULAR MUSIC STUDIES
3 credits.

Explore contemporary discussions in the academic study of popular musics. Emphasis on foundations of critical and social theory, rather than music analysis. Discuss influential theories regarding mass media, music commodities, and the social construction of musical meaning as well as emerging discourses and concerns. Explore research themes related to a variety of genres, such as jazz, K-Pop, rap, and more.
Requisites: MUSIC 212 or declared in Music MA, Music MM, Music PhD, Music: Performance DMA, or Doctoral Minor in Music
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Discuss the literature and conceptual repertoire of popular music studies.
Audience: Both Grad & Undergrad

2. Interpret and apply difficult texts in conversation and writing.
Audience: Both Grad & Undergrad

3. Integrate contemporary academic conversations with personal research interests.
Audience: Both Grad & Undergrad

4. Pose a research question, identify relevant resources, and make evidence-based arguments.
Audience: Both Grad & Undergrad

5. Set discussion goals, manage time, and ask good questions to facilitate discussion effectively.
Audience: Both Grad & Undergrad

6. Track key terms across several bodies of academic literatures and across geographic and temporal contexts.
Audience: Both Grad & Undergrad

7. Demonstrate advanced research, analysis, and writing skills to a rigorous standard appropriate to graduate-level work.
Audience: Graduate

MUSIC 424 – TOPICS IN VOCAL CHAMBER MUSIC
1 credit.

Perform vocal chamber music from various music traditions, styles, and eras. Audition or permission of instructor required.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Exhibit advancement in music reading and/or aural skills as appropriate to the repertoire being taught.
Audience: Both Grad & Undergrad

2. Exhibit improved flexibility of vocal technique, including variation of air pressure, tone quality, vibrato and vocal color.
Audience: Both Grad & Undergrad

3. Perform expressively, applying ensemble skills and musical interpretation, including the ability to listen across the ensemble and make adjustments in phrasing, vibrato, balance, and intonation.
Audience: Both Grad & Undergrad

4. Apply knowledge of fine details regarding vocal styles, historical performance practices, and languages.
Audience: Both Grad & Undergrad

5. Collaborate effectively with peers, learning how to share leadership, and give constructive feedback.
Audience: Both Grad & Undergrad

6. Practice professional standards and techniques that support individual responsibility for vocal health.
Audience: Both Grad & Undergrad

MUSIC 461 – COLLEGIUM MUSICUM
1 credit.

Early Music Ensemble specializing in performance of instrumental and vocal early music, using the school's collection of replicas of early instruments. Audition required.
Requisites: Consent of instructor
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and perform music from the Medieval, Renaissance, Baroque, and Classical eras, applying historically informed knowledge to bring the repertoire to life.
Audience: Both Grad & Undergrad

2. Develop essential performance skills in historically informed performance by examining musical intent and applying historical techniques.
Audience: Both Grad & Undergrad

3. Integrate scholarly research and artistic intuition to perform music with historical integrity, contemporary relevance, and personal expression.
Audience: Both Grad & Undergrad

4. Cultivate and enhance leadership qualities through coaching, demonstrating techniques, and leading within ensembles.
Audience: Graduate

MUSIC 463 – ACTING FOR SINGERS
1 credit.

Acting and stagecraft skills, including text-targeted work, with a focus on the dramatic aspects of the operatic craft. Text work in will involve a step-by-step process designed to facilitate the assimilation of English and foreign-language texts in rehearsal and performance. Work in these areas will be applied to arias and scenes from the operatic and theatrical repertoire.
Requisites: MUS PERF 144, 205, 505 or concurrent enrollment in MUS PERF 505, or 705 or concurrent enrollment in MUS PERF 705
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Develop stagecraft skills, particularly those specific to opera
Audience: Both Grad & Undergrad

2. Establish a methodological approach to acting operatic material through attention to texts, individual emotional preparation, personalization, and moment-to-moment work
Audience: Both Grad & Undergrad

3. Work fluidly back and forth between foreign-language texts and their English translations (using literal, word-for-word translations as well as vernacular English language paraphrasing) arriving at a sense of "owning the text"
Audience: Both Grad & Undergrad

4. Incorporate the fundamentals of Stanislavsky and/or Chekhov acting technique methodologies into rehearsal and performance
Audience: Both Grad & Undergrad

5. Cultivate a sense of ensemble within both small and large groups, fostering a true understanding of collaboration
Audience: Both Grad & Undergrad

6. Support colleagues' work and receive their support in return
Audience: Undergraduate

7. Develop intermediate-level stagecraft skills, particularly those specific to opera
Audience: Undergraduate

8. Expand the understanding of the symbiotic relationship between acting and singing in operatic performance
Audience: Graduate

9. Integrate other areas of music and voice study (music history, music theory, foreign language diction) into stagework
Audience: Graduate

10. Improve the performer's effectiveness in audition and performance
Audience: Both Grad & Undergrad

11. Communicate verbally and in writing concepts concerning acting techniques for classical singers
Audience: Both Grad & Undergrad

MUSIC 465 – MARCHING BAND TECHNIQUES
1 credit.

Exploration of methods and materials related to marching band teaching, philosophy, and performance.
Requisites: MUSIC 42 or declared in Music, Music: Education, or Music: Performance
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Understand methods and materials related to secondary school marching band design and administration
Audience: Undergraduate

2. Design a marching band show, including creating charts with computer-assisted drill-writing software
Audience: Undergraduate

3. Connect fundamental musical knowledge to visual concepts in creating imagery and explain the reasoning behind design choices
Audience: Undergraduate

4. Establish a methodical approach for teaching within a marching band setting
Audience: Undergraduate

5. Identify marching band performance practice trends by exploring a concise history of the art form
Audience: Undergraduate

6. Evaluate, discuss, and support the work of peers
Audience: Undergraduate

7. Communicate verbally and in writing concepts related to Marching Band Techniques
Audience: Undergraduate

MUSIC 466 – DICTION FOR SINGERS
2 credits.

Italian, German, and French diction as related to vocal music; transcription into the International Phonetic Alphabet (IPA).
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Reinforce lyric diction skills in Italian, German, and French.
Audience: Both Grad & Undergrad

2. Apply the International Phonetic Alphabet (IPA) system in Italian, German, and French.
Audience: Both Grad & Undergrad

3. Explore the rules that guide the non-native speaker's understanding of the target language pronunciation and features that distinguish spoken and sung diction.
Audience: Both Grad & Undergrad

4. Demonstrate accurate and stylistic pronunciation both in and out of the context of a song or aria.
Audience: Both Grad & Undergrad

5. Apply diction technique and proper use of articulators for classical singing.
Audience: Both Grad & Undergrad

6. Train your ear to recognize accurate and inaccurate diction in your own and others' singing and identify strategies for correcting pronunciation according to the underlying problem.
Audience: Both Grad & Undergrad

7. Demonstrate accurate and stylistic pronunciation in the assigned foreign language.
Audience: Graduate

8. Apply accurate International Phonetic Alphabet (IPA) transcription of the text.
Audience: Graduate

MUSIC 467 – LANGUAGE DICTION FOR SINGING I
2 credits.

English, German, Italian, and French diction as related to vocal music.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Reinforce lyric diction skills in French and English.
Audience: Both Grad & Undergrad

2. Apply the International Phonetic Alphabet (IPA) system in French and English.
Audience: Both Grad & Undergrad

3. Explore the rules that guide the non-native speaker's understanding of the target language's pronunciation and the features that distinguish spoken and sung diction.
Audience: Both Grad & Undergrad

4. Perform accurate and stylistic pronunciation both in and out of the context of a song or aria.
Audience: Both Grad & Undergrad

5. Train your ear to recognize accurate and inaccurate diction in your own and others' singing and identify strategies for correcting pronunciation according to the underlying problem.
Audience: Both Grad & Undergrad

6. Demonstrate accurate and stylistic pronunciation in the assigned foreign language.
Audience: Graduate

7. Apply accurate International Phonetic Alphabet (IPA) transcription of the text.
Audience: Graduate

MUSIC 468 – LANGUAGE DICTION FOR SINGING II
2 credits.

Continuation of English, German, Italian, and French diction as related to vocal music.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Reinforce lyric diction skills in French and English.
Audience: Both Grad & Undergrad

2. Apply the International Phonetic Alphabet (IPA) system in French and English.
Audience: Both Grad & Undergrad

3. Explore the rules that guide the non-native speaker's understanding of the target language's pronunciation and the features that distinguish spoken and sung diction.
Audience: Both Grad & Undergrad

4. Perform accurate and stylistic pronunciation both in and out of the context of a song or aria.
Audience: Both Grad & Undergrad

5. Train your ear to recognize accurate and inaccurate diction in your own and others' singing and identify strategies for correcting pronunciation according to the underlying problem.
Audience: Both Grad & Undergrad

6. Demonstrate accurate and stylistic pronunciation in the assigned foreign language.
Audience: Graduate

7. Apply accurate International Phonetic Alphabet (IPA) transcription of the text.
Audience: Graduate

MUSIC 497 – SPECIAL TOPICS IN MUSIC
1-3 credits.

Exploration of wide-ranging topics in music history, music theory or music education.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop and apply intermediate and advanced concepts of musical study in performance, theory, history, or pedagogy.
Audience: Both Grad & Undergrad

2. Integrate knowledge across domains of research and applied studies.
Audience: Both Grad & Undergrad

3. Communicate musical ideas and concepts verbally, in writing, or through public performance.
Audience: Both Grad & Undergrad

4. Develop skill in working collaboratively and professionally in applied and academic settings.
Audience: Both Grad & Undergrad

5. Conduct research in an area of interest related to the course topic.
Audience: Graduate

MUSIC 499 – DIRECTED STUDY
1-3 credits.

Individual research and projects with faculty. Students must have project and instructor assignment approved by department
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUSIC 502 – FIGURED BASS AND BASSO CONTINUO
3 credits.

Study of theory and practice of 17th and 18th-century figured bass and basso continuo realization and performance. Participants develop extemporized and written realizations that emulate the discipline, style traits, and musical vitality suggested in historical sources.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021

MUSIC 511 – HISTORICAL PERFORMANCE PRACTICES
3 credits.

Examination of historical evidence for performance practice and its relevance to modern performances of the music of earlier eras.
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Examine the historical performance movement and trace its evolution through modern history.
Audience: Both Grad & Undergrad

2. Consider the relevance and value of ideas such as the work, authority, and authenticity and its place in contemporary discussions of music and performance.
Audience: Both Grad & Undergrad

3. Explore theoretical and/or musicological research directly related to issues in historically informed performance.
Audience: Both Grad & Undergrad

4. Investigate topics necessary for the performance of music in a historically informed style, focusing on the music of the baroque.
Audience: Both Grad & Undergrad

5. Complete a creative research project of a length, depth, and scope that meets graduate-level expectations and that might serve as the basis for a larger project in the student's area of study (thesis or other document).
Audience: Graduate

MUSIC 513 – SURVEY OF OPERA
3 credits.

Historical development of opera; investigation of main stylistic features of representative masterworks.
Requisites: MUSIC 212 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Identify principles and distinguishing features of select operatic genres.
Audience: Both Grad & Undergrad

2. Describe the interdependent relationship between composers, performers, other creative personnel, and audiences that has shaped the history of opera.
Audience: Both Grad & Undergrad

3. Critically analyze link between content and personal experiences and observations.
Audience: Both Grad & Undergrad

4. Demonstrate written and oral communication skills through oral and written assignments, discussion, and presentations on related topics.
Audience: Both Grad & Undergrad

5. Complete a creative research project of a length, depth, and scope that meets graduate-level expectations and that might serve as the basis for a larger project in the student's area of study (thesis or other document).
Audience: Graduate

MUSIC/FOLKLORE 515 – PROSEMINAR IN ETHNOMUSICOLOGY
3 credits.

Introduction to ethnomusicology, including historical survey of major works in the field, classification of musical instruments, measurement of tuning systems and concepts of scale, mode and rhythm in non-Western music.
Requisites: Graduate/professional standing
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine a body of (ethno)musicological literature.
Audience: Both Grad & Undergrad

2. Decipher and explicate difficult texts with increased confidence.
Audience: Both Grad & Undergrad

3. Describe the histories and trajectories of the discipline.
Audience: Both Grad & Undergrad

4. Facilitate discussions effectively.
Audience: Both Grad & Undergrad

5. Complete a meticulous and thorough research project that integrates and analyzes ethnomusicological perspectives on a topic.
Audience: Graduate

MUSIC/FOLKLORE 516 – ETHNOGRAPHIC METHODS FOR MUSIC AND SOUND
3 credits.

Focuses on the tools (material, methodological, and ethical) for doing ethnographic fieldwork in musical contexts.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate familiarity with a body of (ethno)musicological and anthropological literature on ethnographic methods.
Audience: Graduate

2. Decipher and explicate difficult texts with increased confidence.
Audience: Graduate

3. Design and carry out ethnographic research projects.
Audience: Graduate

4. Demonstrate an awareness of power dynamics and your own position as researcher.
Audience: Graduate

5. Facilitate discussions effectively.
Audience: Graduate

6. Track key terms across (ethno)musicological and anthropological literature, describing how ethnographers' relationships with these have changed over time.
Audience: Graduate

MUSIC 517 – PROSEMINAR IN MUSIC THEORY
3 credits.

Consider the meaning of the words "analysis" and "theory," specifically as they have been applied to the study of music. Gain an overview of music theory in higher education: the origin of contemporary analytical praxis, as well as critiques of that model. Take a deeper dive into current trends in analysis, focusing on non-conforming, ecumenical, and otherwise "non-theoretical" ways of talking and writing about music, including narrative, semiotics, hermeneutics, performance-based schemata, and others.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Articulate important trends in music analysis
Audience: Graduate

2. Examine and debate the role of music theory and analysis within academia
Audience: Graduate

3. Hone critical writing and research skills essential for graduate study
Audience: Graduate

4. Actively participate in vibrant seminar discussions
Audience: Graduate

5. Imagine and implement original analytical techniques
Audience: Graduate

MUSIC 523 – ORCHESTRATION I
3 credits.

History of orchestration and arranging; study of representative works by means of scores, recordings, and attendance at rehearsals of University organizations; scoring for band, chorus, and orchestra.
Requisites: MUSIC 222 or declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Study the mechanisms and idiomatic treatment of each instrument of the orchestra, through observance and instrumental demonstrations.
Audience: Both Grad & Undergrad

2. Critically analyze how these instruments function within the choir for which they belong, ie winds, brass, percussion and strings.
Audience: Both Grad & Undergrad

3. Describe instrumental interaction within an orchestral setting.
Audience: Both Grad & Undergrad

4. Hone the skills needed to fully orchestrate a piano work that reflects the complexity of "super-instruments", and "composite textures", in a comprehensive and creative manner.
Audience: Graduate

MUSIC 529 – JAZZ ARRANGING
3 credits.

Survey of standard musical techniques and devices for arranging lead-sheet-based jazz compositions for medium and large jazz ensemble through score study, musical exercises, and arranging projects for live ensembles. Topics include jazz counterpoint and melody writing; preparing arrangements through outlines and condensed scores; chord substitutions and reharmonization; ranges, timbres, notational and technical considerations of standard jazz instruments; motivic development; voicing techniques, including mechanical, spreads, upper structure triads, and voicings in 4ths, 5ths and clusters; and orchestration techniques, including couplings and concerted writing.
Requisites: Declared in Music: MA, Music: Performance DMA, or Music: Performance MM
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Read, comprehend, and analyze scores for medium and large jazz ensemble
Audience: Graduate

2. Compose for all common jazz instruments
Audience: Graduate

3. Demonstrate sophisticated skill-level in composing contrapuntal melodies in a jazz idiom
Audience: Graduate

4. Demonstrate mature ability to arrange for medium and large jazz ensemble using an advanced range of voicing and orchestration techniques
Audience: Graduate

MUSIC 531 – ADVANCED JAZZ IMPROVISATION
3 credits.

Examine musical improvisation from performers and select repertoire primarily from the Jazz Canon. Explore harmonic, melodic, rhythmic, and cultural expansion into the 20th and 21st centuries of improvisational performance practice. Learn elements needed to transform from a performer into a viable and competent improvisor. Emphasis on cross-cultural understanding and interdisciplinarity.
Requisites: (MUSIC 331 and 332) or MUS PERF 541
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify (literally and aurally) chord structures, scales and modes in the Major, Harmonic Minor, Melodic Minor, Harmonic Major, and Melodic Minor #5 structures.
Audience: Graduate

2. Formulate and perform spontaneous melodies over song progressions and song forms.
Audience: Graduate

3. Solve rhythmic placement of their improvisation within a steady pulse.
Audience: Graduate

4. Demonstrate understanding of music theory and the application to improvisation.
Audience: Graduate

5. Apply historical and contemporary concepts of musical styles and forms, and research approaches specific to the given instrument.
Audience: Graduate

6. Demonstrate performance practice in real time, processing melodies spontaneously within a consistent pulse over a song form.
Audience: Graduate

7. Demonstrate understanding of melodic, harmonic, and rhythmic devices for improvisation over a chord and song form.
Audience: Graduate

8. Utilize techniques, skills, and modern approaches to performance practice
Audience: Graduate

9. Demonstrate decorum and community responsibility when performing with others
Audience: Graduate

10. Identify, describe, and analyze improvisation of themselves, their peers, and from recordings
Audience: Graduate

11. Examine technical literature and resolve ambiguities in the nomenclature
Audience: Graduate

12. Synthesize knowledge using insights and creativity to better understand themselves and improve their performance practice and improvisation.
Audience: Graduate

MUSIC 540 – ADVANCED PEDAGOGY
2 credits.

Advanced pedagogical methods for performance.
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine existing beliefs and values about teaching and learning.
Audience: Both Grad & Undergrad

2. Establish criteria for evaluating music teaching materials and selecting appropriate repertoire for intermediate and advanced students.
Audience: Both Grad & Undergrad

3. Develop holistic approach to scaffolding development of musical technique, including diagnostic skills.
Audience: Both Grad & Undergrad

4. Conduct pedagogical research in an area of interest.
Audience: Both Grad & Undergrad

5. Explore applications of culturally relevant music pedagogy and inclusive teaching practices.
Audience: Both Grad & Undergrad

6. Devise effective strategies for implementing and evaluating teaching.
Audience: Both Grad & Undergrad

7. Develop a holistic curriculum for intermediate and advanced students.
Audience: Graduate

MUSIC 541 – SEMINAR IN CHORAL LITERATURE
2 credits.

Seminar in Choral Literature from Renaissance to the Present.
Requisites: Graduate/professional standing
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize composer stylistic characteristics and exemplary works.
Audience: Both Grad & Undergrad

2. Relate the composer and works contextually to the body of choral literature and parallel developments in music, literature, art, and/or social history.
Audience: Graduate

3. Articulate the meaning, context, and importance of choral literature studied.
Audience: Graduate

MUSIC 542 – CHORAL LITERATURE AND PERFORMANCE PRACTICES OF TODAY
2 credits.

Seminar in Choral Literature from Renaissance to the Present.
Requisites: Graduate/professional standing
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Accurately describe composer stylistic characteristics and exemplary works.
Audience: Both Grad & Undergrad

2. Relate the composer and works contextually to the body of choral literature and parallel developments in music, literature, art, and/or social history.
Audience: Graduate

3. Articulate the meaning, context, and importance of choral literature studied.
Audience: Graduate

MUSIC 543 – ADVANCED STRING PEDAGOGY
2 credits.

Survey of contemporary and historical string pedagogy with implications for multiple teaching settings and applied research.
Requisites: Graduate/professional standing
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe and demonstrate the physical aspects of violin and viola playing.
Audience: Both Grad & Undergrad

2. Identify technical problems in different levels of playing.
Audience: Graduate

3. Examine and evaluate important pedagogies.
Audience: Graduate

4. Document personal observations about teaching and learning of string instruments.
Audience: Graduate

MUSIC 544 – ADVANCED STRING PEDAGOGY
2 credits.

Survey of contemporary and historical string pedagogy with implications for multiple teaching settings and applied research, with an emphasis on individual projects and applied research.
Requisites: MUSIC 543
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate an understanding of the physical and application aspects of violin/viola playing.
Audience: Both Grad & Undergrad

2. Identify problems in different levels of violin/viola playing.
Audience: Graduate

3. Examine and evaluate important pedagogies.
Audience: Graduate

4. Document personal observations.
Audience: Graduate

MUSIC 546 – STRING LITERATURE
2 credits.

Relationship of string solo, ensemble and orchestral literature to history, style, form, genre, and performance practice. Emphasis on bibliographic sources; research project required.
Requisites: Senior standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe stylistic differences between the four main periods of Classical orchestral works.
Audience: Both Grad & Undergrad

2. Identify and replicate traditional performance practices of the standard orchestral excerpts.
Audience: Both Grad & Undergrad

3. Correlate the studies of form and tonal harmony with musical choices in the performance of standard orchestral repertoire.
Audience: Both Grad & Undergrad

4. Express knowledge and familiarity with major orchestral works.
Audience: Both Grad & Undergrad

5. Possess the necessary skills to be competitive in most professional orchestra auditions.
Audience: Graduate

MUSIC 550 – PERCUSSION LITERATURE
2 credits.

Examines a select body of Western art music composed for percussion during the twentieth and twenty-first Centuries. Important compositional styles and repertoire will be presented and discussed with an emphasis on historical perspective and compositional technique.
Requisites: Senior standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Explore historical and musical context of significant solo percussion repertoire.
Audience: Both Grad & Undergrad

2. Examine historical and musical context of significant chamber percussion repertoire.
Audience: Both Grad & Undergrad

3. Communicate in writing, advanced musical concepts in the academic tradition.
Audience: Both Grad & Undergrad

4. Communicate verbally, advanced musical concepts in the academic tradition.
Audience: Both Grad & Undergrad

5. Demonstrate deep understanding of the percussion repertoire and its historical context.
Audience: Both Grad & Undergrad

6. Articulate aesthetic distinctions between various significant composers and compositional trends.
Audience: Graduate

MUSIC 551 – CLASS PIANO PEDAGOGY
3 credits.

Techniques for teaching older beginners or adults in class or individual instruction, piano literature sources and references, evaluation of repertoire and analysis of methods and structure.
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Articulate rationale/philosophy/curriculum for group piano for the college music major.
Audience: Both Grad & Undergrad

2. Evaluate group piano teaching resources in a variety of styles and genres and in consideration of diverse student needs.
Audience: Graduate

3. Develop instructional strategies for the group piano class including collaborative/cooperative learning processes, teaching through technology, culturally relevant pedagogy, and student-centered teaching.
Audience: Graduate

4. Assess and reflect on teaching effectiveness through self and peer observations, and written assessments.
Audience: Graduate

5. Develop curriculum for group piano course(s) that considers how piano can be an effective tool for musicians and their professional development.
Audience: Graduate

6. Conduct research on pedagogical methods or practices related to group piano.
Audience: Graduate

MUSIC 553 – ADVANCED CONDUCTING SEMINAR
2 credits.

Study/analysis of conducting techniques; score reading/interpretation of masterpieces from standard repertoire.
Requisites: Declared in Music, Music: Education, or Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Increase knowledge of choral repertory in each historical period and to gain insight into performance practices appropriate for each period.
Audience: Both Grad & Undergrad

2. Develop fundamental skills and vocabulary as a conductor - to develop clear, effective, communicative gestures in order to immediately express the music.
Audience: Graduate

3. Improve communication of expression with economy of gesture and minimal verbal communication.
Audience: Graduate

4. Improve their ability to listen, rehearse, and implement changes.
Audience: Graduate

5. Develop a body of source materials directly related to choral conducting and the teaching of choral music.
Audience: Graduate

6. Develop practices that further the expansion of the choral canon.
Audience: Graduate

7. Establish both critical and philosophical purposes for conducting-creating and furthering a mental-aural image of the score.
Audience: Graduate

MUSIC 554 – ADVANCED CONDUCTING
2 credits.

Continuation of study and analysis of conducting techniques and score reading.
Requisites: MUSIC 553
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

MUSIC 556 – UNIVERSITY OPERA
1-2 credits.

Opera role: preparation, rehearsal and performance in University opera production.
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop skills with which to efficiently learn and rehearse operatic and musical theater material.
Audience: Both Grad & Undergrad

2. Synthesize singing, language, musicality, style, and acting values to effectively perform material from the operatic and musical theater repertoire.
Audience: Graduate

3. Develop stagecraft skills in general as well as those particular to opera and musical theater.
Audience: Graduate

4. Cultivate a sense of ensemble within both in-person and virtual performance situations.
Audience: Graduate

5. Expand the scope of historical and cultural research involved in advanced role preparation.
Audience: Graduate

6. Develop oral and written skills used to express dramaturgical and interpretive concepts in opera and musical theater.
Audience: Graduate

7. Integrate other areas of music and voice study (music history, music theory, period vocal style) into stage work.
Audience: Graduate

8. Explore the symbiotic relationship between acting and singing in operatic and musical theater performance.
Audience: Graduate

MUSIC 557 – OPERA WORKSHOP
2 credits.

Performance of scenes from standard operas or of whole operas; singing, accompanying, and dramatic action; instruction in voice projection, posture and movement; problems of staging, lighting, costume and scenery. Audition required.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop skills with which to efficiently learn operatic and musical theater material in various languages.
Audience: Both Grad & Undergrad

2. Synthesize singing, language, musicality, style, and acting values to effectively perform an excerpt from an operatic or musical theater role.
Audience: Graduate

3. Develop stagecraft skills in general as well as those particular to opera and musical theater.
Audience: Graduate

4. Fluidly work back and forth between non-English language texts and their English translations, arriving at a sense of "owning the text".
Audience: Graduate

5. Integrate historical and cultural research into role preparation.
Audience: Graduate

6. Apply character-specific research to role preparation.
Audience: Graduate

7. Integrate other areas of music and voice study (music history, music theory, period vocal style) into role preparation.
Audience: Graduate

8. Describe symbiotic relationship between acting and singing in operatic and musical theater performance.
Audience: Graduate

MUSIC 558 – MADRIGAL SINGERS
1 credit.

Ensemble specializing in 16th and 17th century secular music. Audition required.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

MUSIC 559 – GRADUATE CHORAL UNION
1 credit.

Weekly rehearsals in preparation of public performance of a masterwork for chorus and orchestra at end of semester. Audition required.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

MUSIC 560 – PRACTICUM IN ADVANCED STUDIO TEACHING-PIANO
1 credit.

Observation and teaching of an advanced undergraduate student under the direct supervision of a studio professor.
Requisites: MUSIC 548
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Choose appropriately scaffolded repertoire and technical studies for the advanced student tailored to each student's experience and needs.
Audience: Graduate

2. Evaluate effective teaching methods for the advanced student that emphasize multiple modalities.
Audience: Graduate

3. Assess recorded teaching segments with written self- reflection and feedback from instructor.
Audience: Graduate

4. Apply principles of culturally relevant pedagogy in teaching the advanced pianist.
Audience: Graduate

5. Survey repertoire by underrepresented and historically marginalized composers who are often left out of pedagogical materials.
Audience: Graduate

MUSIC 562 – JAZZ ENSEMBLE
1 credit.

Assignments in performing ensemble literature. Students enrolling for the first time should contact the School of Music for audition information
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Rehearse and competently perform in multiple live settings a range of classic jazz repertoire.
Audience: Both Grad & Undergrad

2. Perform music composed and/or recorded by the artist(s) studied with technical accuracy, stylistic authenticity and individual creativity.
Audience: Graduate

3. Contextualize the repertoire in its culture and history.
Audience: Graduate

4. Make continual improvements in the areas of individual tone production, music reading, and improvisation, and develop and enhance ensemble communication and interaction.
Audience: Graduate

5. Mentor undergraduate ensemble students within instrument sections and throughout the ensemble.
Audience: Graduate

MUSIC 565 – ADVANCED ENSEMBLE-WOODWIND
1 credit.

Assignments in performing ensemble literature. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate advanced skills involved in performing music in a small ensemble without a conductor.
Audience: Both Grad & Undergrad

2. Model rigorous individual preparation.
Audience: Graduate

3. Listen attentively to others involved.
Audience: Graduate

4. Exhibit the self-discipline and professionalism indispensable to a collective activity.
Audience: Graduate

5. Exhibit strengthened personal interactive skills that are the premise of any successful and enjoyable music-making.
Audience: Graduate

6. Initiate and schedule outreach activities.
Audience: Graduate

MUSIC 567 – ADVANCED ENSEMBLE-BRASS
1 credit.

Assignments in performing ensemble literature. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate a reasonable level of preparation, accuracy and consistency when playing and performing brass chamber repertoire.
Audience: Both Grad & Undergrad

2. Demonstrate musical and technical proficiency and stylistic awareness of brass chamber repertoire.
Audience: Graduate

3. Study a music score and utilize music scores in rehearsal.
Audience: Graduate

4. Develop critical listening skills and expand awareness of brass recordings significant to the genre.
Audience: Graduate

5. Demonstrate stage presence and performance techniques relevant to live performance.
Audience: Graduate

6. Arrange, transcribe and/or compose music for brass ensembles.
Audience: Graduate

7. Conduct a brass ensemble in rehearsal and performance.
Audience: Graduate

8. Coordinate ensemble logistic, such as scheduling, programming, booking and promotion.
Audience: Graduate

MUSIC 568 – ADVANCED ENSEMBLE-PERCUSSION
1 credit.

Assignments in performing ensemble literature. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop advanced chamber music skills, including; gesture, cuing, group breath, etc.
Audience: Both Grad & Undergrad

2. Develop advanced rehearsal protocol and professional interaction.
Audience: Graduate

3. Apply advanced knowledge of rehearsal preparation as well as score and style study.
Audience: Graduate

4. Demonstrate advanced techniques on all instruments studied.
Audience: Graduate

5. Demonstrate advanced understanding of cultural and musical traditions studied.
Audience: Graduate

6. Engage with myriad musical styles, repertoire and performance settings.
Audience: Graduate

MUSIC 569 – ADVANCED ENSEMBLE-STRING
1 credit.

Assignments in performing ensemble literature. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Show improved mastery of instrumental technique.
Audience: Both Grad & Undergrad

2. Demonstrate broad stylistic awareness, theoretical understanding.
Audience: Graduate

3. Practice score study, and general performance abilities.
Audience: Graduate

4. Exhibit collaboration skills to positively impact ensemble musicianship.
Audience: Graduate

5. Apply time management and communication skills for rehearsal efficiency.
Audience: Graduate

6. Discuss musical ideas with colleagues.
Audience: Graduate

MUSIC 570 – UNIVERSITY SYMPHONY ORCHESTRA
1 credit.

Performance plus additional study of performance practice and orchestral literature. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop, apply and adapt individual instrumental skills and techniques in a chamber and large ensemble performance settings.
Audience: Both Grad & Undergrad

2. Acquire a comprehensive musical discernment by learning the parts thoroughly and perform them accurately.
Audience: Graduate

3. Develop practical advanced knowledge of the symphonic and operatic repertoire.
Audience: Graduate

4. Demonstrate professional and ethical responsibility within the ensemble experience.
Audience: Graduate

5. Cultivate and enhance leadership abilities within the ensemble.
Audience: Graduate

MUSIC 572 – ADVANCED ENSEMBLE-CLASSICAL GUITAR
1 credit.

Rehearsal, coaching and preparing guitar literature for performance of duos, trios, and quartets. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate advanced ensemble performance skills.
Audience: Both Grad & Undergrad

2. Expand proficiency in a varied repertoire of guitar ensemble music, and chamber music with guitar.
Audience: Graduate

3. Demonstrate proficiency in music reading and ensemble coordination.
Audience: Graduate

4. Cultivate and enhance leadership abilities within the ensemble.
Audience: Graduate

MUSIC 573 – CONTEMPORARY CHAMBER ENSEMBLE
1 credit.

Assignments in performing ensemble literature. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2021
Learning Outcomes: 1. Explore and perform works of 20th and 21st century contemporary classical music as a collective-style ensemble.
Audience: Both Grad & Undergrad

2. Collaborate with composers on new works for select performances.
Audience: Graduate

3. Perform medium to large chamber works unconducted, a model found in professional chamber ensembles in the field.
Audience: Graduate

4. Expand knowledge and awareness of active composers and performers from the 20th and 21st centuries.
Audience: Graduate

5. Play a leadership role as principal players on repertoire selections.
Audience: Graduate

MUSIC 574 – WIND ENSEMBLE
1 credit.

Limited instrumentation for students having attained exceptional level of performance ability. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply and adapt advanced instrumental skills and techniques in a chamber and large ensemble performance settings.
Audience: Both Grad & Undergrad

2. Perform expressively a varied repertoire of music, learning the parts thoroughly and performing them accurately.
Audience: Graduate

3. Utilize standard musical terminology to describe musical elements reflective of a practical advanced knowledge of the band repertoire.
Audience: Graduate

4. Apply problem-solving skills to identify and correct problems within the ensemble rehearsal setting in a professional and ethical manner.
Audience: Graduate

5. Cultivate and enhance leadership abilities within the ensemble.
Audience: Graduate

MUSIC 576 – CONCERT BAND
1 credit.

Rehearsal and performance from band literature; additional study of performance practice. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop, apply and adapt individual instrumental skills and techniques in a chamber and large ensemble performance settings.
Audience: Both Grad & Undergrad

2. Acquire a comprehensive musical discernment by learning the parts thoroughly and perform them accurately.
Audience: Graduate

3. Develop practical advanced knowledge of the symphonic repertoire.
Audience: Graduate

4. Demonstrate professional and ethical responsibility within the ensemble experience.
Audience: Graduate

5. Cultivate and enhance leadership abilities within the ensemble.
Audience: Graduate

MUSIC 577 – CHORALE
1 credit.

Performance and study of choral chamber music. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Prepare and perform quality choral literature that encompasses diverse musical expressions that represent a variety of historical and cultural perspectives.
Audience: Graduate

2. Perform expressively a varied repertoire of music, learning the parts thoroughly and performing them accurately.
Audience: Graduate

3. Exhibit improved music literacy, including sight singing, pitch and rhythmic accuracy, and aural skills.
Audience: Graduate

4. Assist all members of the ensemble in the development of their vocal instruments and talents beyond their singing.
Audience: Graduate

5. Utilize problem-solving skills to identify and correct problems within the ensemble rehearsal setting in a professional and ethical manner.
Audience: Graduate

6. Cultivate and enhance leadership abilities within the ensemble.
Audience: Graduate

MUSIC 578 – CONCERT CHOIR
1 credit.

Performance plus additional study of performance practice and choir literature. Students will audition for placement prior to the beginning of the semester
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Prepare and perform quality choral literature that encompasses diverse musical expressions that represent a variety of historical and cultural perspectives.
Audience: Both Grad & Undergrad

2. Share passion for choral singing by communicating the meaning of this great literature to our audiences.
Audience: Graduate

3. Develop and improve music literacy, including sight singing, pitch and rhythmic accuracy, and aural skills.
Audience: Graduate

4. Assist all members of the ensemble in the development of their vocal instruments and talents beyond their singing.
Audience: Graduate

5. Establish meaningful relationships, build community, and advance their treatment of other human beings.
Audience: Graduate

6. Represent and maintain the University of Wisconsin-Madison's long tradition of choral excellence.
Audience: Graduate

7. Cultivate and enhance leadership abilities within the ensemble.
Audience: Graduate

MUSIC 591 – ORGAN LITERATURE AND DESIGN
2 credits.

Survey of organ literature with parallel study of organ design and construction.
Requisites: Senior standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020

MUSIC 608 – MUSIC COMMUNITY ENGAGEMENT
2-3 credits.

Actively participate in a diverse exploration of community. Create collaborative music engagement projects and evaluate the impact of the project's implementation. Opportunity to increase self-awareness, enhance creative capacity, and cultivate music career aspirations.
Requisites: Declared in Music, MA, PhD, Music: Performance, MM, DMA, or Music: Education MM
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Describe current music community engagement initiatives occurring within one's area of expertise.
Audience: Graduate

2. Develop personal and artistic skills through the design, implementation, and evaluation of music community engagement projects.
Audience: Graduate

3. Support the mission of social service agencies and non-profit organizations through music community engagement collaborations.
Audience: Graduate

4. Articulate one's music career vision through a lens of creativity, quality, and a spirit of generosity.
Audience: Graduate

MUSIC/L I S 619 – MUSIC RESEARCH METHODS AND MATERIALS
3 credits.

Historical and contemporary bibliography resources for musical scholarship; general reference tools of scholarly work and specific musicological works.
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify, describe, and appraise musical scholarship resources in multiple formats.
Audience: Both Grad & Undergrad

2. Refine research topic through collaboration with faculty, librarians, and peers.
Audience: Graduate

3. Narrow and define scope of research questions through exploratory and iterative search methods.
Audience: Graduate

4. Conduct efficient and structured searches using bibliographic research tools.
Audience: Graduate

5. Critically evaluate sources for authority, audience, credibility, coverage, and bias.
Audience: Graduate

6. Compare and critique academic perspectives on a topic.
Audience: Graduate

7. Design and carry out an original written musicological research project which integrates contemporary academic conversations with personal research interests.
Audience: Graduate

MUSIC 621 – RENAISSANCE POLYPHONY
3 credits.

Analysis and stylistic composition.
Requisites: Senior standing
Course Designation: Core GenEd - Humanities & Arts Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Write short (10–16 mm.) species counterpoint exercises in a variety of modes.
Audience: Both Grad & Undergrad

2. Identify and systematically explain the stylistic characteristics of European Renaissance polyphonic music.
Audience: Both Grad & Undergrad

3. Analyze, synthesize, and discuss (in oral and written formats) contrapuntal techniques in a variety of music, primarily vocal, from the 15th and 16th centuries.
Audience: Both Grad & Undergrad

4. Elaborate on the role of canon and imitation in the composition of music in this style.
Audience: Both Grad & Undergrad

5. Apply characteristics of Renaissance polyphonic repertoire to an original composition for three (3) voices.
Audience: Both Grad & Undergrad

6. Research and present on lesser-known composers from the 15th and 16th centuries.
Audience: Graduate

MUSIC 622 – BAROQUE COUNTERPOINT
3 credits.

Analysis and stylistic composition.
Requisites: Senior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Analyze and apply compositional techniques of the 17th and 18th centuries, with a particular focus on counterpoint.
Audience: Both Grad & Undergrad

2. Improvise and create short points of imitation.
Audience: Both Grad & Undergrad

3. Demonstrate proficiency in figured bass accompaniment procedures.
Audience: Both Grad & Undergrad

4. Critically examine and discuss 18th-century music pedagogy, particularly the "stile antico".
Audience: Both Grad & Undergrad

5. Compose and analyze fugues, demonstrating an understanding of their structure and stylistic elements.
Audience: Both Grad & Undergrad

6. Research and present on lesser-known composers from the 17th and 18th centuries.
Audience: Graduate

MUSIC 623 – FORM AND ANALYSIS
2-3 credits.

Study of modern analytical techniques; practice in analysis of representative works.
Requisites: Senior standing
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

MUSIC 624 – FORM AND ANALYSIS II
2-3 credits.

Continuation of study of modern analytical techniques; practice in analysis of representative works.
Requisites: Senior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

MUSIC 629 – JAZZ THEORY AND ANALYSIS
3 credits.

Introduction to contemporary research into jazz theory through analysis of lead sheet jazz compositions, analysis of large ensemble jazz compositions and improvised solos, and critical readings of jazz theory publications.
Requisites: Declared in Music MA, Music: Performance DMA, or Music: Performance MM
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. analyze jazz lead sheets, large ensemble compositions, and improvisations with an emphasis on both syntax and music-historical and theoretical contexts
Audience: Graduate

2. develop a critical framework engage contemporary research into jazz theory and analysis
Audience: Graduate

3. critically examine issues of history, culture, authenticity, and law and authorship that inform jazz recordings and performances
Audience: Graduate

MUSIC 632 – GRADUATE INSTRUMENTAL CONDUCTING LABORATORY
1 credit.

Develop conducting skills through experience leading an ad hoc ensemble of 9-20 musicians in rehearsal and performance on a range of orchestral and wind ensemble repertoire.
Requisites: Concurrent enrollment in MUS PERF 532, 732, 990, or 999
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate effective and refined gestural vocabulary on the podium
Audience: Graduate

2. Demonstrate knowledge of broad repertoire in instrumental ensemble repertoire
Audience: Graduate

3. Implement score study skills as they apply to conducting a live instrumental ensemble
Audience: Graduate

4. Model rehearsal techniques before live musicians
Audience: Graduate

5. Employ self-reflection in identifying the quality of one's own work
Audience: Graduate

6. Demonstrate skills in a performance setting
Audience: Graduate

7. Assess other colleagues' conducting, creating a safe community for learning and development
Audience: Graduate

MUSIC 681 – SENIOR HONORS THESIS
3 credits.

Mentored individual study and research for students in the major writing an honors thesis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2014

MUSIC 682 – SENIOR HONORS THESIS
3 credits.

Mentored individual study and research for students in the major writing an honors thesis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2015

MUSIC 720 – MUSIC AND THE ACADEMIC PROFESSION
1 credit.

Examines music in higher education as a career pathway. Provides preparation for the academic job market to be competitive to enter the higher education workforce after graduation. Topics and activities include higher education program development and planning, basics of higher education budgeting and finance, organizational structures, explorations of the various types of positions in higher education, recruiting in the arts in higher education, mock interviews, introduction to pedagogical structures and methods, and others.
Requisites: Declared in Music MA, Music MM, Music PhD, Music: Performance DMA, or Doctoral Minor in Music
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Delineate the various ways music programs are situated and structured within various higher education contexts (community college, four-year universities, private, public).
Audience: Graduate

2. Describe basic funding mechanisms for higher education, and apply these mechanisms to the idiosyncrasies of music programs within higher education.
Audience: Graduate

3. Develop and polish professional materials, including a basic professional website, headshot, curriculum vitae, sample cover letters, etc.
Audience: Graduate

4. Refine professional presentation, interviewing, and written skills.
Audience: Graduate

5. Describe basic music higher education accreditation (National Association of Schools of Music and the regional accreditation bodies) and the application of accreditation to the operations of a music unit.
Audience: Graduate

MUSIC 749 – SEMINAR IN VOCAL TECHNIQUES
2 credits.

Study and analysis of various vocal techniques: pedagogical and historical viewpoints.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Demonstrate knowledge of the anatomy and physiology of the vocal tract.
Audience: Graduate

2. Teach healthy approaches to respiration, phonation, resonation, registration, and articulation.
Audience: Graduate

3. Recognize various aspects of the voice and build appropriate exercises to strengthen them.
Audience: Graduate

4. Encourage communication and musicality in students' performance.
Audience: Graduate

5. Evaluate repertoire for level of difficulty in order to choose appropriate selections for students' study.
Audience: Graduate

MUSIC 751 – SEMINAR IN PIANO PEDAGOGY
3 credits.

Interpretive and technical approaches to advanced keyboard performance.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Examine current pedagogical trends and approaches and relevance to teaching piano pedagogy at the undergraduate level.
Audience: Graduate

2. Develop a curriculum for a two-semester introductory piano pedagogy sequence at the undergraduate level.
Audience: Graduate

3. Develop criteria for evaluating teaching methods and materials.
Audience: Graduate

4. Explain relevant research and teaching resources in detail.
Audience: Graduate

5. Explore applications of culturally relevant pedagogy and inclusive teaching practices.
Audience: Graduate

6. Devise effective strategies for implementing and assessing student teaching in both group and private settings at the elementary level (with reference to intermediate levels).
Audience: Graduate

MUSIC 752 – PIANO PEDAGOGY WORKSHOP
1 credit.

Designed to assist the DMA student in piano performance and pedagogy in developing a pedagogical workshop for piano teachers. The project will culminate in a public workshop which may address any approved area of keyboard pedagogy.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop a coherent research presentation in piano pedagogy suitable for professional conferences and meetings and geared towards a targeted audience.
Audience: Graduate

2. Present pedagogical workshop either on campus or at a professional meeting.
Audience: Graduate

3. Create and submit abstracts and proposals for relevant conferences and meetings.
Audience: Graduate

4. Assess and reflect on efficacy of presentation through written reflection and self assessment.
Audience: Graduate

5. Develop personal approach to piano pedagogy practice and presentation that align with teaching philosophy and core values.
Audience: Graduate

MUSIC 791 – SEMINAR IN PIANO LITERATURE
3 credits.

Applied piano literature including representative works from all periods.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Fluently describe the style and aesthetics of the focused topic as relates to keyboard compositions and literature, keyboard technique, and keyboard performance.
Audience: Graduate

2. Prepare and present excerpts from relevant repertoire for class discussion that outlines significant features and contribution to keyboard repertoire.
Audience: Graduate

3. Design and carry out an original research project related to keyboard literature and performance.
Audience: Graduate

4. Survey and assess available texts and resources related to keyboard literature and performance.
Audience: Graduate

5. Consider historically marginalized and underrepresented composers and works for keyboard and the implications for the future of the discipline.
Audience: Graduate

6. Apply historical and theoretical principles to keyboard practice and performance.
Audience: Graduate

MUSIC 792 – SEMINAR IN VOCAL LITERATURE
3 credits.

Comprehensive study of vocal literature including representative works from various periods.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Format, write program notes, and present programs for academic and public performance.
Audience: Graduate

2. Collect and compile repertoire for use as a performer and teacher.
Audience: Graduate

3. Contextualize examples of vocal literature within their historical background and historical performance practices.
Audience: Graduate

4. Evaluate personal strengths and preferences as a performance programmer.
Audience: Graduate

5. Provide language translations to enhance the audience experience and understanding.
Audience: Graduate

6. Introduce new music and composers to audiences.
Audience: Graduate

MUSIC 796 – SEMINAR IN DUO SONATA LITERATURE
3 credits.

Comprehensive study of major works for single instrument and piano with primary focus on interpretive and technical issues for the collaborative musician.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Accurately describe duo chamber music repertoire for piano and strings.
Audience: Graduate

2. Articulate critical opinions about duo chamber music performances, live and recorded, in both writing and discussions.
Audience: Graduate

3. Describe the musical output of many composers, both living and deceased, that fall outside of the traditional classical music canon.
Audience: Graduate

4. Create thoughtful recital programs which combine historical understanding with personal expression.
Audience: Graduate

MUSIC 798 – SEMINAR-INSTRUMENTAL LITERATURE
2 credits.

Comprehensive study of major works for specific instruments with primary focus on interpretive and technical issues for the advance musician.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUSIC 799 – INDEPENDENT WORK
1-3 credits.

Faculty-mentored individual study and research.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUSIC 821 – HISTORICAL MUSIC THEORIES 1
3 credits.

The development of musical concepts and issues in music-theoretical discourse from antiquity through the 17th century.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Describe the history of music theory, including its origins, parameters, challenges, and its impact on recent musicological thought.
Audience: Graduate

2. Summarize central texts in music scholarship and formulate insightful, probing questions.
Audience: Graduate

3. Explain the relationships between historiography, cultural studies, and epistemology, and their relevance to music theory.
Audience: Graduate

4. Lead and contribute to discussion of complex texts, fostering meaningful academic dialogue.
Audience: Graduate

5. Apply research and writing skills essential for successful graduate-level study.
Audience: Graduate

MUSIC 822 – HISTORICAL MUSIC THEORIES 2
3 credits.

The development of musical concepts and issues in music-theoretical discourse from the 17th century through the present.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the history of music theory, including its origins, parameters, challenges, and its impact on recent musicological thought.
Audience: Graduate

2. Summarize central texts in music scholarship and formulate insightful, probing questions.
Audience: Graduate

3. Explain the relationships among historiography, cultural studies, and epistemology, and their relevance to music theory.
Audience: Graduate

4. Lead and contribute to discussion of complex texts, fostering meaningful academic dialogue.
Audience: Graduate

5. Apply research and writing skills essential for successful graduate-level study.
Audience: Graduate

MUSIC 823 – SCHENKERIAN ANALYSIS
3 credits.

Studies in the theoretical concepts and analytical methods of Heinrich Schenker.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

MUSIC 911 – SEMINAR IN MUSICOLOGY
3 credits.

Topics in musicology, dealing primarily with an important aspect or genre or music or segment of a stylistic period.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Review a specialized body of academic literature on a contemporary musicological topic.
Audience: Graduate

2. Identify, describe, and appraise musicology research methodologies.
Audience: Graduate

3. Lead discussion of complex texts across multiple fields.
Audience: Graduate

4. Compare and critique academic perspectives on a topic.
Audience: Graduate

5. Design and carry out an original musicological research project which integrates contemporary academic conversations with personal research interests.
Audience: Graduate

6. Complete an original research paper akin to an academic journal article that meets rigorous standards and might serve the basis for a larger project in the student's area of specialization.
Audience: Graduate

MUSIC/FOLKLORE 915 – SEMINAR IN ETHNOMUSICOLOGY
3 credits.

Topics in ethnomusicology within a cross-cultural framework; melodic typology, scale and tuning systems, mode, rhythm, ornamentation, improvisation techniques, oral and written traditions of composition, notation systems, and function of music society.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Review a specialized body of academic literature on a contemporary ethnomusicological topic.
Audience: Graduate

2. Identify, describe, and appraise ethnomusicology research methodologies.
Audience: Graduate

3. Lead discussion of complex texts across multiple fields.
Audience: Graduate

4. Compare and critique academic perspectives on a topic.
Audience: Graduate

5. Design and carry out an original ethnomusicological research project which integrates contemporary academic conversations with personal research interests.
Audience: Graduate

6. Complete an original research paper akin to an academic journal article that meets rigorous standards and might serve as the basis for a larger project in the student's area of specialization.
Audience: Graduate

MUSIC 921 – CURRENT ISSUES IN MUSICAL THOUGHT 1
3 credits.

Topics of current theoretical or compositional concern and in-depth discussions of recent publications.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Summarize central texts and formulate probing questions to deepen understanding and engagement.
Audience: Graduate

2. Develop and refine skills as effective discussion leaders and active respondents.
Audience: Graduate

3. Demonstrate skill in critical analysis and synthesis of information in writing.
Audience: Graduate

4. Foster collaborative learning through active participation in discussions.

Audience: Graduate

MUSIC 925 – FORM AND ANALYSIS SEMINAR
3 credits.

Explore musical analysis, using different techniques to study various types of music. Engage with music's structure and meaning, with an emphasis on performance and listening skills.
Requisites: Declared in Music: Performance MM or DMA, Music: Education MM, Music MA, PHD, or doctoral minor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Explore different ways to analyze and apply these methods to various types of music.
Audience: Graduate

2. Create new ideas based on traditional music theory.
Audience: Graduate

3. Engage in a detailed and thoughtful analysis of music's structure and meaning.
Audience: Graduate

4. Apply insights to making deliberate interpretative choices in performance, using clear and well-argued writing to complement analysis.
Audience: Graduate

MUSIC 927 – SEMINAR IN COMPOSITION
3 credits.

Topics directly related to composition, including musical forms, contemporary performance practice, electronic music, intermedia.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Critically analyze and synthesize the elements of each composer's styles studied to understand which elements are used for what effect in the works studied.
Audience: Graduate

2. Develop and refine technical understanding of the stylistic practices of the works studied.
Audience: Graduate

3. Write about, and discuss the relevant issues in the music studied.
Audience: Graduate

MUSIC/CURRIC 942 – SPECIAL TOPICS IN CONTEMPORARY MUSIC EDUCATION
2 credits.

An exploration of wide-ranging topics in contemporary approaches to music learning, music making, and music teaching. Investigate approaches to teaching, curriculum design, performance, and scholarship to expand your perspectives and pedagogy.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Demonstrate the capacity to facilitate learning experiences focused on themes from within the special topic.
Audience: Graduate

2. Analyze, critique, and discuss contemporary music learning and teaching scholarship.
Audience: Graduate

3. Identify and describe different approaches to music making, considering their implication in one's own practice.
Audience: Graduate

4. Design new experiences and practices for one's own teaching and discuss how to implement them.
Audience: Graduate

MUSIC/CURRIC 944 – THINKING WITH SOCIAL THEORY IN MUSIC EDUCATION
3 credits.

Focus on investigating and applying social theory to contemporary issues impacting music learning and music teaching in a playful and engaging manner. Develop a "theory toolkit" you can use to understand and consider curriculum planning and experience design, teaching and pedagogy, music making and performance, creating, listening, and investigating interdisciplinary connections. Identify and address a pressing phenomenon or issue related to music making, music learning, and music teaching. Application of social theories to critically consider the phenomenon, and identification of future research and pedagogical practices. Overview of concepts and theories from philosophy and sociology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Identify social theorists and theories and discuss their uses in interrogating issues related to music learning, music teaching, and music making.
Audience: Graduate

2. Research and present important facets and implications of theories to one's peers.
Audience: Graduate

3. Describe similarities and differences among and between theories.
Audience: Graduate

4. Exhibit capacity to read, analyze, critique, and discuss scholarly articles.

Audience: Graduate

5. Demonstrate increased skill in outlining, drafting, writing, and revising scholarly texts.
Audience: Graduate

6. Describe the role(s) social theory could play in one's professional life.
Audience: Graduate

MUSIC/CURRIC 945 – HUMAN SUBJECTS RESEARCH IN MUSIC
3 credits.

Overview of methodological, ethical, and philosophical considerations pertinent for research engaging with human subjects in, through, or around music. Rooted in a commitment toward engaging in ethical and community-conscious scholarship through methodological bricolage. Develop knowledge and skills by identifying research problems, selecting from and/or combining research methodologies, generating data, and analyzing data. Survey of research genres (qualitative, quantitative, mixed methods, arts-based, and action research paradigms), to develop an expansive understanding of music scholarship. Continue to hone your research-based skills as readers, writers, musicians, and teachers. Explore ethical concerns related to human subjects research, including navigating the Institutional Review Board (IRB) approval process.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Identify and discuss the ethical dimensions of research studies.
Audience: Graduate

2. Identify and describe similarities and differences among and between different genres of research such as quantitative, qualitative, mixed methods, arts-based, and action research.
Audience: Graduate

3. Differentiate common components of research scholarship, including review of literature, purpose statement, research questions, theoretical frameworks, methods, findings, analysis, and discussion/implications.
Audience: Graduate

4. Pose research questions, read, analyze, critique, and discuss research articles.
Audience: Graduate

5. Craft and present a research proposal, addressing each aspect of an Institutional Review Board (IRB) form.
Audience: Graduate

6. Describe the role(s) research could play in one's professional life.
Audience: Graduate

MUSIC/CURRIC 946 – PAST PERSPECTIVES ON MUSIC EDUCATION
3 credits.

Focus on analysis of music education in primary and secondary schools via examination of historical, philosophical, and psychological sources. Explore ideas that have shaped the field in the past and investigate the influence of these ideas on current thinking and practice.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the history of music education
Audience: Graduate

2. Articulate the concept of interest convergence and how it can apply to the history of music education
Audience: Graduate

3. Demonstrate ability to connect theory and practice in music educational approaches
Audience: Graduate

MUSIC/CURRIC 948 – CULTURES OF IMPROVISATION
3 credits.

Explore multiple improvisation techniques while learning about diversity issues within multiple music teaching contexts. Learn about diverse musical pedagogies and begin (or expand) your improvisation journey.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Explore multiple approaches and cultures of improvisation.
Audience: Graduate

2. Identify select diversity issues within the music teaching context.
Audience: Graduate

3. Broadly describe main principles of critical race theory and how they relate to diversity issues in music teaching.
Audience: Graduate

4. Create playful improvisatory-based music that connects to multiple teaching contexts.
Audience: Graduate

5. Connect theory and practice in music educational approaches.
Audience: Graduate

MUSIC 990 – MASTERS THESIS
1-4 credits.

Individual research study with faculty mentor for writing thesis.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUSIC 999 – PHD DISS/DMA PROJECT
1-3 credits.

Individual research study with faculty mentor.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

MUSIC-PERFORMANCE (MUS PERF)

MUS PERF 21 – BRASS FUNDAMENTALS
1 credit.

Prepares music educators for teaching brass instruments (horn, trumpet trombone, euphonium, and tuba) in K-12 school settings.
Requisites: Declared in Music: Education BM
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain and demonstrate proper care and maintenance of brass instruments.
Audience: Undergraduate

2. Demonstrate fundamental technical playing proficiency on trumpet, horn,trombone, euphonium, and tuba.
Audience: Undergraduate

3. Explain and demonstrate the function of the embouchure, tongue, and oral cavity in tone production.
Audience: Undergraduate

4. Demonstrate proper breathing and explain its impact on brass performance.
Audience: Undergraduate

5. Demonstrate knowledge of intonation issues and fixes.
Audience: Undergraduate

6. Demonstrate an understanding of trumpet and horn transpositions.
Audience: Undergraduate

7. Demonstrate an understanding of the clefs most often used in trombone writing.
Audience: Undergraduate

8. Explain the harmonic series and function of the valves and slide.
Audience: Undergraduate

9. Demonstrate the ability to diagnose and solve the common problems of beginning brass students.
Audience: Undergraduate

10. Demonstrate knowledge of method books, etude books, and appropriate solo repertory.
Audience: Undergraduate

11. Demonstrate knowledge of recommended makes and models of brass instruments and accessories.
Audience: Undergraduate

12. Demonstrate knowledge of relevant and important brass instrument performers in all genres.
Audience: Undergraduate

13. Play each brass instrument with a proper setup and an understanding for how to identify and produce a characteristic sound.
Audience: Undergraduate

MUS PERF 22 – STRINGS FUNDAMENTALS
1 credit.

Prepares music educators for teaching orchestral string instruments (violin, viola, violoncello, and double bass) in K-12 school settings.
Requisites: Declared in Music: Education BM
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain and demonstrate proper care and maintenance of orchestral string instruments.
Audience: Undergraduate

2. Demonstrate fundamental technical playing proficiency on violin, viola, violoncello, and double bass.
Audience: Undergraduate

3. Explain and demonstrate the function of the left hand, bow arm, and vibrato in tone production.
Audience: Undergraduate

4. Demonstrate knowledge of intonation issues and fixes.
Audience: Undergraduate

5. Demonstrate an understanding of strings transpositions.
Audience: Undergraduate

6. Demonstrate an understanding of the clefs most often used in viola, violoncello, and double bass compositions.
Audience: Undergraduate

7. Demonstrate the ability to diagnose and solve the common problems of beginning strings students.
Audience: Undergraduate

8. Demonstrate knowledge of method books, etude books, and appropriate solo repertory.
Audience: Undergraduate

9. Demonstrate knowledge of recommended makes and models of string instruments and accessories, including instrument sizing to match students' physical size.
Audience: Undergraduate

10. Demonstrate knowledge of how to select and replace strings.
Audience: Undergraduate

11. Demonstrate knowledge of relevant and important string instrument performers.
Audience: Undergraduate

12. Play each string instrument with appropriate posture and a characteristic sound.
Audience: Undergraduate

MUS PERF 23 – WOODWIND FUNDAMENTALS
1 credit.

Prepares music educators for teaching woodwind instruments (flute, clarinet, saxophone, oboe, and bassoon) in K-12 school settings.
Requisites: Declared in Music: Education BM
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain and demonstrate basic care and maintenance of woodwind instruments.
Audience: Undergraduate

2. Demonstrate basic playing proficiency on flute, clarinet, saxophone, oboe, and bassoon.
Audience: Undergraduate

3. Explain and demonstrate the function of the embouchure and proper air support.
Audience: Undergraduate

4. Demonstrate knowledge of most common intonation issues and fixes.
Audience: Undergraduate

5. Demonstrate the ability to diagnose and solve some of the most common problems of beginning woodwind students.
Audience: Undergraduate

6. Demonstrate basic knowledge of method books, etude books, and appropriate solo repertory.
Audience: Undergraduate

7. Demonstrate knowledge of recommended manufacturers and models of woodwind instruments and accessories.
Audience: Undergraduate

MUS PERF 27 – FUNDAMENTALS-PERCUSSION
1 credit.

Exploration of the fundamentals of the percussion.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate basic performance techniques on all standard western percussion instruments.
Audience: Undergraduate

2. Perform and teach percussion in a variety of contexts.
Audience: Undergraduate

3. Model skills and pedagogy techniques on all standard western percussion instruments.
Audience: Undergraduate

4. Properly care for and handle percussion instruments.
Audience: Undergraduate

5. Explore and evaluate a variety of percussion repertoire.
Audience: Undergraduate

6. Demonstrate several performance styles as they relate to percussion performance and pedagogy.
Audience: Undergraduate

MUS PERF 44 – STUDY ABROAD: BEGINNING INSTRUCTION IN MUSIC PERFORMANCE
1 credit.

A study abroad equivalency for beginning music instruction that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

MUS PERF 51 – BASIC CLARINET
1-2 credits.

Individual instruction in clarinet performance at the basic level. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 51
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022

MUS PERF 65 – BASIC TUBA
1-2 credits.

Individual instruction in tuba performance at the basic level. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 65
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

MUS PERF 76 – BASIC GUITAR
1-2 credits.

Individual instruction in guitar performance at the basic level. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 76
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

MUS PERF 77 – BASIC STRING BASS
1-2 credits.

Individual instruction in string bass performance at the basic level. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 77
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

MUS PERF 101 – BEGINNING CLASS PIANO
2 credits.

Group instruction in beginning piano.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate basic keyboard skills and technical facility at the keyboard.
Audience: Undergraduate

2. Demonstrate basic sight-reading skills in diverse styles, musical textures, keys, and genres in order to become a more independent musician.
Audience: Undergraduate

3. Apply music theory concepts to piano performance.
Audience: Undergraduate

4. Apply principles of harmonization and transposition.
Audience: Undergraduate

5. Employ basic skills in improvisation and composition at the keyboard.
Audience: Undergraduate

MUS PERF 102 – BEGINNING CLASS PIANO
2 credits.

Continuation of group instruction in beginning piano.
Requisites: MUS PERF 101 or placement into MUS PERF 102 and declared in Music, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate developing keyboard skills and technical facility at the keyboard.
Audience: Undergraduate

2. Demonstrate developing sight-reading skills in diverse styles, musical textures, keys, and genres in order to become a more independent musician.
Audience: Undergraduate

3. Apply music theory concepts to piano performance.
Audience: Undergraduate

4. Apply principles of harmonization and transposition.
Audience: Undergraduate

5. Employ developing skills in improvisation and composition at the keyboard.
Audience: Undergraduate

MUS PERF 103 – ELEMENTARY CLASS PIANO
2 credits.

Group instruction in elementary piano.
Requisites: MUS PERF 102 or placement into MUS PERF 103 and declared in Music, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate developing keyboard skills and technical facility at the keyboard.
Audience: Undergraduate

2. Demonstrate developing sight-reading skills in diverse styles, musical textures, keys, and genres in order to become a more independent musician.
Audience: Undergraduate

3. Apply music theory concepts to piano performance.
Audience: Undergraduate

4. Apply principles of harmonization and transposition.
Audience: Undergraduate

5. Employ developing skills in improvisation and composition at the keyboard.
Audience: Undergraduate

MUS PERF 104 – INTERMEDIATE CLASS PIANO
2 credits.

Group instruction in intermediate piano.
Requisites: MUS PERF 103 or placement into MUS PERF 104 and declared in Music, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate more advanced keyboard skills and technical facility at the keyboard.
Audience: Undergraduate

2. Demonstrate more advanced sight-reading skills in diverse styles, musical textures, keys, and genres in order to become a more independent musician.
Audience: Undergraduate

3. Apply music theory concepts to piano performance.
Audience: Undergraduate

4. Apply principles of harmonization and transposition.
Audience: Undergraduate

5. Employ more advanced skills in improvisation and composition at the keyboard.
Audience: Undergraduate

MUS PERF 108 – JAZZ CLASS PIANO
2 credits.

Development of basic jazz piano skills for solo, accompaniment, and ensemble playing; discussion of the role of the piano in various jazz ensemble formats; introduction to chord symbols, jazz voicings, melodic improvisation, and bass lines; continued development of sound technical skills for the piano. Students will apply these concepts to the performance of lead sheets from the standard jazz repertoire.
Requisites: MUS PERF 102 or placement into MUS PERF 103 and declared in Music, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explore the role of the piano in the jazz ensemble and its relationship to other instruments.
Audience: Undergraduate

2. Construct idiomatically appropriate jazz chord voicings and walking bass lines from chord symbols supplied in a lead sheet format.
Audience: Undergraduate

3. Perform stylistically appropriate melodies and accompaniments in medium swing, jazz ballad, Bossa Nova, and jazz waltz styles.
Audience: Undergraduate

4. Perform two independent parts (two of: bass line, chord comping, and melody/improvisation) simultaneously (one in each hand), and include rudimentary improvisation in their performance.
Audience: Undergraduate

5. Continue their development of sound technical skills for the piano through their work with scales, arpeggios, and repertoire.
Audience: Undergraduate

MUS PERF 143 – INTRODUCTION TO PERFORMANCE: VOICE
1 credit.

Voice for the non-music major beginning voice student; basic concepts of vocal technique, tone production, breathing, and diction for singing; basic musicianship; singing in class by the student individually and in small groups.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Practice effective vocal technique.
Audience: Undergraduate

2. Apply basic vocal technique concepts to exercises and songs.
Audience: Undergraduate

3. Analyze effectiveness of technique and areas for improvement in other singers.
Audience: Undergraduate

4. Demonstrate basic musicianship skills and improve sight-singing.
Audience: Undergraduate

5. Plan a series of vocal warm-ups.
Audience: Undergraduate

6. Propose constructive feedback to other singers.
Audience: Undergraduate

MUS PERF 144 – VOCAL INSTRUCTION FOR NON-VOICE MAJORS
1-2 credits.

Vocal instruction for the non-voice major. Basics of classical vocal technique; however, repertoire may include other musical styles, such as musical theater or jazz, as approved by instructor.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 146 – MUSIC LESSONS FOR NON-MAJORS
1-2 credits.

Private applied music performance instruction for non-music majors and for music majors seeking study on a secondary instrument. Not for keyboard or vocal performance study. Opportunity for study with a faculty member may be limited. Audition is required.
Requisites: Consent of instructor
Repeatable for Credit: Yes, for 8 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Accomplish measurable progress in instrumental performance proficiency
Audience: Undergraduate

2. Growth in understanding of elements of music and application of this understanding to interpretation and performance
Audience: Undergraduate

3. Demonstration of effective learning strategies
Audience: Undergraduate

MUS PERF 148 – FIRST YEAR COMPOSITION
3 credits.

Continuation of instruction in music composition at the beginning level.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025

MUS PERF 200 – ELEMENTARY/INTERMEDIATE PIANO FOR NON-PIANO MAJORS
2 credits.

Individual piano instruction for non-piano majors.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Nurture individual creative growth as a pianist.
Audience: Undergraduate

2. Gain musical and technical proficiency in piano performance.
Audience: Undergraduate

3. Develop creative and efficient practice strategies.
Audience: Undergraduate

4. Develop skills in phrasing, stylistic interpretation and musical understanding.
Audience: Undergraduate

5. Enhance critical listening skills and ear-training skills.
Audience: Undergraduate

6. Improve sense of keyboard topography through relevant technical exercises and repertoire study.
Audience: Undergraduate

7. Deepen understanding of keyboard repertoire (duo and/or collaborative works).
Audience: Undergraduate

8. Explore strategies for optimal performance and healthful biomechanics.

Audience: Undergraduate

MUS PERF 201 – ELEMENTARY/INTERMEDIATE PIANO
2-4 credits.

Individual piano instruction for piano majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate growth as an artist in pursuit of an independent, authentic musical voice.
Audience: Undergraduate

2. Exhibit musical and technical proficiency in piano performance.
Audience: Undergraduate

3. Apply creative and efficient practice strategies.
Audience: Undergraduate

4. Improve skills in phrasing, stylistic interpretation, and musical understanding and expression.
Audience: Undergraduate

5. Strengthen critical listening and ear-training skills.
Audience: Undergraduate

6. Explore keyboard topography through relevant technical exercises and repertoire study.
Audience: Undergraduate

7. Explore strategies for optimal performance and healthful biomechanics.
Audience: Undergraduate

MUS PERF 203 – ELEMENTARY/INTERMEDIATE ORGAN
2-4 credits.

Individual organ instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

MUS PERF 205 – ELEMENTARY/INTERMEDIATE VOICE
2-4 credits.

Individual voice instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop aural skills necessary to listen to and critique one's own singing objectively.
Audience: Undergraduate

2. Refine personal voice expressed through your tone and music-making.
Audience: Undergraduate

3. Exhibit ability to play in different musical styles of the assigned repertoire.
Audience: Undergraduate

4. Acquire and strengthen technique necessary to sing the assigned repertoire.
Audience: Undergraduate

5. Apply understanding of interval, harmony, rhythm, form, and style in order to analyze and interpret assigned repertoire.
Audience: Undergraduate

6. Acquire and employ various practice methods for efficient and effective practicing.
Audience: Undergraduate

7. Identify and correct counterproductive physical and aural habits.
Audience: Undergraduate

8. Prepare for performances and manage performance anxiety.
Audience: Undergraduate

9. Communicate expressively with collaborative partners and with the audience.
Audience: Undergraduate

10. Practice professionalism in the art of giving and receiving constructive criticism.
Audience: Undergraduate

11. Demonstrate familiarity with a wide range of vocal repertoire.
Audience: Undergraduate

MUS PERF 207 – ELEMENTARY/INTERMEDIATE FLUTE
2-4 credits.

Individual flute instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Exhibit musical and technical proficiency in flute performance.
Audience: Undergraduate

2. Demonstrate developing skill in flute pedagogy.
Audience: Undergraduate

3. Demonstrate growth as an artist in pursuit of an independent, authentic musical voice.
Audience: Undergraduate

4. Apply creative and efficient practice strategies.
Audience: Undergraduate

5. Improve technique in phrasing, stylistic interpretation, and musical understanding and expression.
Audience: Undergraduate

6. Strengthen critical listening and ear-training skills.
Audience: Undergraduate

7. Improve technique through exercises and repertoire study.
Audience: Undergraduate

8. Explore strategies for optimal performance and healthful biomechanics.

Audience: Undergraduate

MUS PERF 209 – ELEMENTARY/INTERMEDIATE OBOE
2-4 credits.

Individual oboe instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Exhibit musical and technical proficiency in oboe performance.
Audience: Undergraduate

2. Improve reed-making skills.
Audience: Undergraduate

3. Demonstrate growth as an artist in pursuit of an independent, authentic musical voice.
Audience: Undergraduate

4. Apply creative and efficient practice strategies.
Audience: Undergraduate

5. Improve technique in phrasing, stylistic interpretation, and musical understanding and expression.
Audience: Undergraduate

6. Strengthen critical listening and ear-training skills.
Audience: Undergraduate

7. Improve technique through exercises and repertoire study.
Audience: Undergraduate

8. Explore physical and mental strategies for optimal performance and health.
Audience: Undergraduate

MUS PERF 211 – ELEMENTARY/INTERMEDIATE CLARINET
2-4 credits.

Individual clarinet instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Exhibit musical and technical proficiency in clarinet performance, including using air and support, embouchure and tongue position, and fundamentals of long tones, scales, and etudes.
Audience: Undergraduate

2. Assess and diagnose technical issues.
Audience: Undergraduate

3. Demonstrate expanding knowledge of standard and non-traditional clarinet repertoire.
Audience: Undergraduate

4. Identify meaning and personal relevance in assigned repertoire.
Audience: Undergraduate

5. Strengthen critical listening and ear-training skills.
Audience: Undergraduate

6. Apply creative and efficient practice strategies.
Audience: Undergraduate

7. Explore strategies for optimal performance and healthful biomechanics.
Audience: Undergraduate

MUS PERF 213 – ELEMENTARY/INTERMEDIATE SAXOPHONE
2-4 credits.

Individual saxophone instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Exhibit proficiency in the fundamentals of saxophone playing, including but not limited to technical proficiency, tone quality, intonation, and rhythmic precision.
Audience: Undergraduate

2. Assess and diagnose technical issues.
Audience: Undergraduate

3. Demonstrate knowledge of standard saxophone and jazz literature. This includes professional performance level, knowledge of historical context and importance, and pedagogical aptitude related to each work performed.
Audience: Undergraduate

4. Strengthen critical listening and ear-training skills.
Audience: Undergraduate

5. Exhibit versatility and ability to adapt to a variety of musical situations.
Audience: Undergraduate

6. Apply efficient and productive practice techniques.
Audience: Undergraduate

7. Make informed musical decisions that reconcile acquired knowledge with intuition.
Audience: Undergraduate

MUS PERF 215 – ELEMENTARY/INTERMEDIATE BASSOON
2-4 credits.

Individual bassoon instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate developing musicianship, technical fluency and artistic voice on the bassoon.
Audience: Undergraduate

2. Build strong reed-making and adjusting skills, enabling students to make reeds that respond reliably, play in tune, and support expressive performance.
Audience: Undergraduate

3. Address specific physical, mental, and technical challenges that may limit musical growth, with an emphasis on sustainable playing and healthy habits.
Audience: Undergraduate

4. Refine ability to listen critically, evaluate their playing, and set clear goals for improvement.
Audience: Undergraduate

5. Strengthen core musical skills, including tone production, intonation, rhythmic precision, and stylistic interpretation.
Audience: Undergraduate

6. Exhibit deepened understanding of the historical and analytical context of the music you study and perform.
Audience: Undergraduate

7. Demonstrate familiarity with the principles of music pedagogy and develop your ability to communicate effectively about the bassoon and the broader art of music.
Audience: Undergraduate

8. Practice leadership, collaboration, and responsibility as artists both within the studio and the wider musical community.
Audience: Undergraduate

9. Set entrepreneurial goals and develop a professionally viable portfolio of musical projects, recordings, programs, and repertoire.
Audience: Undergraduate

MUS PERF 217 – ELEMENTARY/INTERMEDIATE HORN
2-4 credits.

Individual horn instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Construct and carry out an efficient and effective practice session.
Audience: Undergraduate

2. Improve technical proficiency in the following areas: Tone, Accuracy, Intonation, Articulation, Dynamic Control.
Audience: Undergraduate

3. Improve control of tempo and groove.
Audience: Undergraduate

4. Demonstrate a deepened understanding of musical styles from different periods.
Audience: Undergraduate

5. Demonstrate and execute a deepened understanding of musicianship, including phrasing, singing quality, and the relationship of technique to musicality.
Audience: Undergraduate

6. Explore strategies for optimal performance and healthful biomechanics.

Audience: Undergraduate

7. Strengthen critical listening and ear-training skills.
Audience: Undergraduate

8. Curate recital programs that reflect student goals and interests.
Audience: Undergraduate

MUS PERF 219 – ELEMENTARY/INTERMEDIATE TRUMPET
2-4 credits.

Individual trumpet instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 221 – ELEMENTARY/INTERMEDIATE TROMBONE
2-4 credits.

Individual trombone instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 223 – ELEMENTARY/INTERMEDIATE EUPHONIUM
2-4 credits.

Individual euphonium instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 225 – ELEMENTARY/INTERMEDIATE TUBA
2-4 credits.

Individual tuba instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 227 – ELEMENTARY/INTERMEDIATE PERCUSSION
2-4 credits.

Individual percussion instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Improve musical and technical proficiency on designated percussion instruments
Audience: Undergraduate

2. Improve skills in phrasing, style interpretation, nuance, intonation, improvisation, implement selection, mallet construction and analytical method
Audience: Undergraduate

3. Apply the individual nuances of technique on each percussion instrument studied
Audience: Undergraduate

4. Practice critical listening and ear-training skills
Audience: Undergraduate

5. Apply theoretical understanding of music to percussion instruments
Audience: Undergraduate

6. Explore the percussion repertoire in a wide variety of musical traditions
Audience: Undergraduate

7. Perform and teach percussion for the twenty-first century
Audience: Undergraduate

MUS PERF 231 – ELEMENTARY/INTERMEDIATE VIOLIN
2-4 credits.

Individual violin instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 233 – ELEMENTARY/INTERMEDIATE VIOLA
2-4 credits.

Individual viola instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 235 – ELEMENTARY/INTERMEDIATE CELLO
2-4 credits.

Individual cello instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 237 – ELEMENTARY/INTERMEDIATE DOUBLE BASS
2-4 credits.

Individual instruction in double bass performance.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate ability to diagnose performance deficiencies
Audience: Undergraduate

2. Employ developing aural skills in investigating sound and intonation
Audience: Undergraduate

3. Show foundational technical performance skills (arco and pizzicato)
Audience: Undergraduate

4. Demonstrate developing strength for stamina and physical longevity
Audience: Undergraduate

5. Demonstrate knowledge of performance practices appropriate to the music studied
Audience: Undergraduate

6. Show basic technical proficiency on the instrument in jury performance
Audience: Undergraduate

7. Describe instruments and musical tone succinctly, both verbally and in writing
Audience: Undergraduate

MUS PERF 239 – ELEMENTARY/INTERMEDIATE HARP
2-4 credits.

Individual harp instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 240 – ELEMENTARY/INTERMEDIATE GUITAR
2-4 credits.

Individual guitar instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 241 – ELEMENTARY/INTERMEDIATE JAZZ STUDIO INSTRUCTION
2-4 credits.

Individual studio instruction in jazz performance.
Requisites: Concurrent enrollment in MUSIC 262 and declared in Music, Music: Education BM, or Music: Performance BM
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, for 8 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate technical proficiency with the instrument or voice.
Audience: Undergraduate

2. Show competency and fluency in core improvisation, accompaniment, solo, and ensemble performance techniques common to the jazz genre.
Audience: Undergraduate

3. Interpret and improvise jazz in a performance practice appropriate to the idiom.
Audience: Undergraduate

4. Demonstrate a knowledge of the standard jazz repertoire.
Audience: Undergraduate

5. Contextualize the performance of jazz and related musics in history and culture.
Audience: Undergraduate

MUS PERF 242 – ACCOMPANYING
2 credits.

Individual instruction in collaborative musical performance.
Requisites: MUS PERF 201 or 203
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize different types of two-person collaborative piano repertoire and different steps of preparations needed for them.
Audience: Undergraduate

2. Thoughtfully reflect on collaborative playing to improve personal and peer playing and collaboration or similar.
Audience: Undergraduate

3. Connect with musical partners through empathy and clear communication.
Audience: Undergraduate

4. Efficiently plan and prepare for the rehearsals and collaborative performances.
Audience: Undergraduate

5. Sightread faster than at the beginning of the semester, and know how to practice independently to improve further.
Audience: Undergraduate

MUS PERF 247 – SECOND YEAR COMPOSITION
3 credits.

Individual instruction in music composition.
Requisites: MUS PERF 148
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

MUS PERF 248 – SECOND YEAR COMPOSITION
3 credits.

Continuation of individual instruction in music composition.
Requisites: MUS PERF 247
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

MUS PERF 249 – ELEMENTARY/INTERMEDIATE COMPOSITION
2-4 credits.

Individual composition instruction for majors.
Requisites: Declared in the undergraduate Music program, Music: Performance BM, or Music: Education BM
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop ability to express musical ideas in a coherent and effective manner
Audience: Undergraduate

2. Demonstrate basics of melodic construction, harmonic voicing, counterpoint, and other compositional skills
Audience: Undergraduate

3. Develop ability to express oneself in various musical textures (monophonic, homophonic, heterophonic, contrapuntal)
Audience: Undergraduate

4. Practice composing musical threads that are held together in successful rhythmic composites, using a variety of rhythms
Audience: Undergraduate

MUS PERF 251 – KEYBOARD SKILLS
2 credits.

Keyboard skills for the piano major.
Requisites: Concurrent enrollment in MUS PERF 201 or 203
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Critically evaluate playing.
Audience: Undergraduate

2. Identify problems in music and make improvements.
Audience: Undergraduate

3. Demonstrate the fundamentals of accompanying.
Audience: Undergraduate

4. Show greater competency with musical collaboration through on-going musical partnerships.
Audience: Undergraduate

5. Demonstrate knowledge of and familiarity with various styles of collaborative repertoire.
Audience: Undergraduate

MUS PERF 339 – ADVANCED TECHNIQUES: HARP
1-2 credits.

Performance study topics as assigned for harp.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

MUS PERF 342 – PIANO ACCOMPANYING LAB
1 credit.

Laboratory in piano accompanying for piano emphasis majors and doctoral minors.
Requisites: MUS PERF 201
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Critically evaluate playing.
Audience: Undergraduate

2. Identify problems in music and make improvements.
Audience: Undergraduate

3. Demonstrate the fundamentals of accompanying.
Audience: Undergraduate

4. Show greater competency with musical collaboration through on-going musical partnerships.
Audience: Undergraduate

5. Show expanded knowledge of and familiarity with various styles of collaborative repertoire.
Audience: Undergraduate

MUS PERF 347 – THIRD YEAR COMPOSITION
3 credits.

Individual instruction in music composition.
Requisites: MUS PERF 248
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

MUS PERF 348 – THIRD YEAR COMPOSITION
3 credits.

Continuation of individual instruction in music composition.
Requisites: MUS PERF 347
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

MUS PERF 401 – ADVANCED PIANO
2-4 credits.

Individual piano instruction for undergrad piano majors and doctoral minors. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 401
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate growth as an artist in pursuit of an independent, authentic musical voice.
Audience: Both Grad & Undergrad

2. Exhibit musical and technical proficiency in piano performance.
Audience: Both Grad & Undergrad

3. Apply creative and efficient practice strategies.
Audience: Both Grad & Undergrad

4. Improve skills in phrasing, stylistic interpretation, and musical understanding and expression.
Audience: Both Grad & Undergrad

5. Strengthen critical listening and ear-training skills.
Audience: Both Grad & Undergrad

6. Explore keyboard topography through relevant technical exercises and repertoire study.
Audience: Both Grad & Undergrad

7. Explore strategies for optimal performance and healthful biomechanics.
Audience: Both Grad & Undergrad

8. Exhibit understanding of diverse keyboard repertoire and styles.
Audience: Both Grad & Undergrad

9. Curate recital programs that reflect student goals and interests (special emphasis on historically marginalized composers and living composers).
Audience: Graduate

10. Investigate options for performing/teaching in the twenty-first century.
Audience: Graduate

MUS PERF 402 – ADVANCED HARPSICHORD
2-4 credits.

Upper-level harpsichord study of advanced repertoire and basso continuo; for harpsichordists who have mastery of basic technique and repertoire. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 402
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

MUS PERF 403 – ADVANCED ORGAN
2-4 credits.

Advanced individual organ instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 403
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

MUS PERF 405 – ADVANCED VOICE
2-4 credits.

Advanced individual voice instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 405
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop aural skills necessary to listen to and critique one's own singing objectively.
Audience: Both Grad & Undergrad

2. Refine personal voice expressed through your tone and music-making.
Audience: Both Grad & Undergrad

3. Exhibit ability to play in different musical styles of the assigned repertoire.
Audience: Both Grad & Undergrad

4. Acquire and strengthen technique necessary to sing the assigned repertoire.
Audience: Both Grad & Undergrad

5. Apply understanding of interval, harmony, rhythm, form, and style in order to analyze and interpret assigned repertoire.
Audience: Both Grad & Undergrad

6. Acquire and employ various practice methods for efficient and effective practicing.
Audience: Both Grad & Undergrad

7. Identify and correct counterproductive physical and aural habits.
Audience: Both Grad & Undergrad

8. Prepare for performances and manage performance anxiety.
Audience: Both Grad & Undergrad

9. Communicate expressively with collaborative partners and with the audience.
Audience: Both Grad & Undergrad

10. Practice professionalism in the art of giving and receiving constructive criticism.
Audience: Both Grad & Undergrad

11. Demonstrate familiarity with a wide range of vocal repertoire.
Audience: Both Grad & Undergrad

12. Contextualize vocal performance using reference to current and past practices.
Audience: Graduate

MUS PERF 407 – ADVANCED FLUTE
2-4 credits.

Advanced individual flute instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 407
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Exhibit musical and technical proficiency in flute performance.
Audience: Both Grad & Undergrad

2. Demonstrate developing skill in flute pedagogy.
Audience: Both Grad & Undergrad

3. Demonstrate growth as an artist in pursuit of an independent, authentic musical voice.
Audience: Both Grad & Undergrad

4. Apply creative and efficient practice strategies.
Audience: Both Grad & Undergrad

5. Improve technique in phrasing, stylistic interpretation, and musical understanding and expression.
Audience: Both Grad & Undergrad

6. Strengthen critical listening and ear-training skills.
Audience: Both Grad & Undergrad

7. Improve technique through exercises, scales, etudes, excerpts, and repertoire study.
Audience: Both Grad & Undergrad

8. Explore strategies for optimal performance and healthful biomechanics.

Audience: Both Grad & Undergrad

9. Contextualize flute fundamentals and repertoire using reference to current and past practices .
Audience: Graduate

MUS PERF 409 – ADVANCED OBOE
2-4 credits.

Advanced individual oboe instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 409
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 411 – ADVANCED CLARINET
2-4 credits.

Advanced individual clarinet instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 411
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 413 – ADVANCED SAXOPHONE
2-4 credits.

Advanced individual saxophone instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 413
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 415 – ADVANCED BASSOON
2-4 credits.

Advanced individual bassoon instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 415
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 417 – ADVANCED HORN
2-4 credits.

Advanced individual horn instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 417
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 419 – ADVANCED TRUMPET
2-4 credits.

Advanced individual trumpet instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 419
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 421 – ADVANCED TROMBONE
2-4 credits.

Advanced individual trombone instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 421
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 423 – ADVANCED EUPHONIUM
2-4 credits.

Advanced individual instruction in euphonium. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 423
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 425 – ADVANCED TUBA
2-4 credits.

Advanced individual tuba instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 425
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 427 – ADVANCED PERCUSSION
2-4 credits.

Advanced individual percussion instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 427
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 431 – ADVANCED VIOLIN
2-4 credits.

Advanced individual violin instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 431
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 433 – ADVANCED VIOLA
2-4 credits.

Advanced individual viola instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 433
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 435 – ADVANCED CELLO
2-4 credits.

Advanced individual cello instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 435
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 437 – ADVANCED DOUBLE BASS
2-4 credits.

Advanced instruction in double bass performance.
Requisites: MUS PERF 437
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate ability to identify and strategically address performance deficiencies
Audience: Undergraduate

2. Employ developing aural skills in investigating sound and intonation
Audience: Undergraduate

3. Show technical performance skills (arco and pizzicato)
Audience: Undergraduate

4. Demonstrate developing strength for stamina and physical longevity
Audience: Undergraduate

5. Demonstrate knowledge of performance practices appropriate to the music studied
Audience: Undergraduate

6. Show technical proficiency on the instrument in performance
Audience: Undergraduate

7. Contextualize double bass performance using reference to current and past practices
Audience: Undergraduate

8. Describe instruments and musical tone succinctly, both verbally and in writing
Audience: Undergraduate

MUS PERF 439 – ADVANCED HARP
2-4 credits.

Advanced individual harp instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 439
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 440 – ADVANCED GUITAR
2-4 credits.

Advanced individual classical guitar instruction. Instructor consent is required for students enrolling for the first time.
Requisites: MUS PERF 440
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 441 – ADVANCED JAZZ STUDIO INSTRUCTION
2-4 credits.

Individual applied music performance instruction in jazz.
Requisites: MUS PERF 441 and concurrent enrollment in MUSIC 262.
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, for 8 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate high technical proficiency with the instrument or voice.
Audience: Undergraduate

2. Show comprehensive competency and fluency in core improvisation, accompaniment, solo, and ensemble performance techniques common to the jazz genre.
Audience: Undergraduate

3. Interpret and improvise jazz in a performance practice appropriate to the idiom.
Audience: Undergraduate

4. Demonstrate a thorough knowledge of the standard jazz repertoire
Audience: Undergraduate

5. Contextualize the performance of jazz and related musics in history and culture.
Audience: Undergraduate

6. Synthesize musical abilities with skills for leading a jazz ensemble.
Audience: Undergraduate

MUS PERF 447 – FOURTH YEAR COMPOSITION
3 credits.

Advanced individual instruction in music composition.
Requisites: MUS PERF 348
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

MUS PERF 448 – FOURTH YEAR COMPOSITION
3 credits.

Continuation of advanced individual instruction in music composition.
Requisites: MUS PERF 447
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

MUS PERF 449 – ADVANCED COMPOSITION
2-4 credits.

Individual composition instruction for majors.
Requisites: MUS PERF 449
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop ability to express musical ideas in a coherent and effective manner
Audience: Undergraduate

2. Demonstrate grasp of melodic construction, harmonic voicing, counterpoint, and other compositional skills
Audience: Undergraduate

3. Develop ability to express oneself in various musical textures (monophonic, homophonic, heterophonic, contrapuntal)
Audience: Undergraduate

4. Practice composing musical threads that are held together in successful rhythmic composites, using a variety of rhythms
Audience: Undergraduate

5. Demonstrate progressing ambition in the creation of your compositions in length and size of ensemble, focusing on skills needed to compose orchestral compositions and large choral works, or extended digital audio workstation (DAW) works of longer lengths
Audience: Undergraduate

MUS PERF 457 – JAZZ COMPOSITION AND ARRANGING
3 credits.

Study of music composition and arranging in the jazz idiom. Requires audition.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

MUS PERF 498 – COMPOSITION CAPSTONE PROJECT
2 credits.

Individually directed creation and presentation of original musical work. Requires concurrent enrollment in MUS PERF 449.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. develop and apply deeper knowledge of compositional techniques
Audience: Undergraduate

2. apply skills for managing the logistics in presentation of their work, including speaking to an audience
Audience: Undergraduate

3. exhibit understanding and expression of their own "voice" in composing
Audience: Undergraduate

MUS PERF 499 – SENIOR RECITAL
2 credits.

Preparation and public performance of a senior-level recital.
Requisites: 6 credits from: MUS PERF 401, 402, 403, 405, 407, 409, 411, 413, 415, 417, 419, 421, 423, 425, 427, 431, 433, 435, 437, 439, or 440
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

MUS PERF 501 – MASTERS LEVEL-PIANO
4 credits.

Masters level individual piano instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MUS PERF 505 – MASTERS LEVEL-VOICE
4 credits.

Masters level individual voice instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 507 – MASTERS LEVEL-FLUTE
4 credits.

Masters level individual flute instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 509 – MASTERS LEVEL-OBOE
4 credits.

Masters level individual oboe instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

MUS PERF 511 – MASTERS LEVEL-CLARINET
4 credits.

Masters level individual clarinet instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MUS PERF 513 – MASTERS LEVEL-SAXOPHONE
4 credits.

Masters level individual saxophone instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 515 – MASTERS LEVEL-BASSOON
4 credits.

Masters level individual bassoon instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2021

MUS PERF 517 – MASTERS LEVEL-HORN
4 credits.

Masters level individual horn instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023

MUS PERF 519 – MASTERS LEVEL-TRUMPET
4 credits.

Masters level individual trumpet instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MUS PERF 521 – MASTERS LEVEL-TROMBONE
4 credits.

Masters level individual trombone instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MUS PERF 523 – MASTERS LEVEL-EUPHONIUM
4 credits.

Masters level individual euphonium instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022

MUS PERF 525 – MASTERS LEVEL-TUBA
4 credits.

Masters level individual tuba instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 527 – MASTERS LEVEL-PERCUSSION
4 credits.

Masters level individual percussion instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MUS PERF 531 – MASTERS LEVEL-VIOLIN
4 credits.

Masters level individual violin instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 532 – ADVANCED CONDUCTING
2 credits.

Master's level individual conducting instruction.
Requisites: Declared in Music: Performance MM
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Broaden practical knowledge of standard orchestral repertoire
Audience: Graduate

2. Develop and integrate score study skills and strategies
Audience: Graduate

3. Identify and demonstrate off-podium skills necessary as a conductor
Audience: Graduate

4. Explore conducting techniques in order to acquire an effective and refined gestural vocabulary on the podium
Audience: Graduate

5. Assess the conducting profession
Audience: Graduate

MUS PERF 533 – MASTERS LEVEL-VIOLA
4 credits.

Masters level individual viola instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023

MUS PERF 535 – MASTERS LEVEL-CELLO
4 credits.

Masters level individual individual cello instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MUS PERF 537 – MASTER'S LEVEL DOUBLE BASS
4 credits.

Individual instruction in double bass at the Master's level.
Requisites: Declared in Music: Performance MM
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate ability to identify and strategically address performance deficiencies
Audience: Graduate

2. Employ advanced aural skills in investigating sound and intonation
Audience: Graduate

3. Show technical performance skills (arco and pizzicato) across a range of musical styles
Audience: Graduate

4. Use holistic strength for stamina and physical longevity
Audience: Graduate

5. Demonstrate knowledge of performance practices across a range of musical styles
Audience: Graduate

6. Articulate attributes of past and current practitioners of double bass performance
Audience: Graduate

7. Use historical resources in speaking and writing about double bass performance
Audience: Graduate

8. Describe instruments and musical tone succinctly, both verbally and in writing
Audience: Graduate

MUS PERF 539 – MASTER'S LEVEL HARP
4 credits.

Individual instruction in harp at the Master's level.
Requisites: Declared in Music: Performance MM
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and strategically address technical issues related to hand and body positioning.
Audience: Graduate

2. Apply technique to achieve evenness, warm tone, rhythmic integrity, facility and clean playing.
Audience: Graduate

3. Interpret and execute accurate fingerings, pedaling, muffling, extended techniques, articulation and dynamic scope.
Audience: Graduate

4. Show contextual understanding of repertoire studied, including composer background, historical context, and musical analysis.
Audience: Graduate

5. Employ a variety of practice techniques to improve creative problem-solving.
Audience: Graduate

6. Mitigate performance anxiety using breath, positive self-talk, mock performances, mindfulness, visualization and thorough preparation.
Audience: Graduate

7. Demonstrate wide ranges of character, atmosphere, and musical phrasing that produce sound appropriate for the emotional content of the music.
Audience: Graduate

MUS PERF 540 – MASTERS LEVEL-GUITAR
4 credits.

Masters level individual classical guitar instruction.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

MUS PERF 541 – MASTERS LEVEL JAZZ STUDIO INSTRUCTION
4 credits.

Individual studio instruction in jazz performance.
Requisites: Declared in Music: Performance MM or DMA
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate high technical proficiency of instrument performance
Audience: Graduate

2. Show comprehensive competency and fluency in core improvisation, accompaniment, solo, and ensemble performance techniques commonly used in the jazz genre
Audience: Graduate

3. Develop and deepen a personal artistic voice through critical engagement with the jazz idiom
Audience: Graduate

4. Interpret and improvise jazz in a performance practice appropriate to the idiom
Audience: Graduate

5. Develop a personal repertoire based on a thorough knowledge of composition and arranging techniques and familiarity with the standard jazz repertoire
Audience: Graduate

6. Contextualize the performance of jazz and related musics in history and culture
Audience: Graduate

MUS PERF 542 – MASTERS LEVEL COLLABORATIVE PIANO
2-3 credits.

Individual instruction in collaborative musical performance.
Requisites: Declared in Music: Performance MM
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify personal strengths and weaknesses as a collaborative artist and develop strategies to address problems
Audience: Graduate

2. Employ advanced aural skills in investigating sound and balance with musical partners
Audience: Graduate

3. Improve piano technique, stylistic awareness, interpretive decision-making and listening skills.
Audience: Graduate

4. Describe performance practices across a range of musical styles
Audience: Graduate

5. Improve sight-reading proficiency
Audience: Graduate

6. Manage multiple musical assignments simultaneously
Audience: Graduate

7. Demonstrate excellent communication skills in rehearsals, lessons and performance – both verbal and musical – with partners and faculty
Audience: Graduate

MUS PERF 547 – MASTERS LEVEL COMPOSITION
3 credits.

Private composition at the master's degree level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 561 – ORGAN IMPROVISATION AND LITURGY
2 credits.

Development of organ improvisation skills; survey of liturgical practices and styles.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021

MUS PERF 562 – ORGAN IMPROVISATION AND LITURGY
2 credits.

Continued development of organ improvisation skills.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022

MUS PERF 701 – DOCTORAL LEVEL-PIANO
4 credits.

Individual piano instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 703 – DOCTORAL LEVEL-ORGAN
4 credits.

Individual organ instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2021

MUS PERF 705 – DOCTORAL LEVEL-VOICE
4 credits.

Individual voice instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 707 – DOCTORAL LEVEL-FLUTE
4 credits.

Individual flute instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

MUS PERF 709 – DOCTORAL LEVEL-OBOE
4 credits.

Individual oboe instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 711 – DOCTORAL LEVEL-CLARINET
4 credits.

Individual clarinet instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

MUS PERF 713 – DOCTORAL LEVEL-SAXOPHONE
4 credits.

Individual saxophone instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 715 – DOCTORAL LEVEL-BASSOON
4 credits.

Individual bassoon instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 717 – DOCTORAL LEVEL-HORN
4 credits.

Individual horn instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 719 – DOCTORAL LEVEL-TRUMPET
4 credits.

Individual trumpet instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

MUS PERF 721 – DOCTORAL LEVEL-TROMBONE
4 credits.

Individual trombone instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 723 – DOCTORAL LEVEL EUPHONIUM
4 credits.

Individual euphonium instruction at the doctoral level.
Requisites: Declared in Music: Performance DMA
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate musicianship through solo repertoire, etudes, and orchestral/band excerpts
Audience: Graduate

2. Demonstrate mastery of advanced euphonium techniques
Audience: Graduate

3. Apply advanced practice skills
Audience: Graduate

4. Demonstrate professionalism in performance and/or music education settings
Audience: Graduate

5. Describe and demonstrate diverse styles, periods, and genres of music
Audience: Graduate

6. Apply advanced euphonium pedagogical techniques and approaches
Audience: Graduate

MUS PERF 725 – DOCTORAL LEVEL TUBA
4 credits.

Individual tuba instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 727 – DOCTORAL LEVEL PERCUSSION
4 credits.

Individual percussion instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 731 – DOCTORAL LEVEL-VIOLIN
4 credits.

Individual violin instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 732 – DOCTORAL LEVEL CONDUCTING
2 credits.

Individual conducting instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 733 – DOCTORAL LEVEL-VIOLA
4 credits.

Individual viola instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 735 – DOCTORAL LEVEL-CELLO
4 credits.

Individual cello instruction at the doctoral level.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 737 – DOCTORAL LEVEL DOUBLE BASS
4 credits.

Individual instruction in double bass at the doctoral level.
Requisites: Declared in Music: Performance DMA
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate originality, artistry, and creativity through performance
Audience: Graduate

2. Demonstrate ability to identify and strategically address performance deficiencies
Audience: Graduate

3. Employ advanced aural skills in investigating sound and intonation
Audience: Graduate

4. Show technical performance skills (arco and pizzicato) across a range of musical styles
Audience: Graduate

5. Use holistic development of strength for stamina and physical longevity

Audience: Graduate

6. Demonstrate knowledge of performance practices across a range of musical styles
Audience: Graduate

7. Articulate attributes of past and current practitioners of double bass performance
Audience: Graduate

8. Use historical resources in speaking and writing about double bass performance
Audience: Graduate

9. Describe instruments and musical tone succinctly, both verbally and in writing
Audience: Graduate

MUS PERF 740 – DOCTORAL LEVEL-GUITAR
4 credits.

Individual guitar instruction at the doctoral level.
Requisites: Declared in Music: Performance, DMA and concurrent enrollment in MUSIC 572
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Develop a refined classical guitar technique applicable to a broad range of musical styles.
Audience: Graduate

2. Demonstrate comprehensive knowledge of classical guitar repertoire.
Audience: Graduate

3. Communicate a high level of individual artistry and creativity through performance.
Audience: Graduate

MUS PERF 742 – DOCTORAL LEVEL COLLABORATIVE PIANO
2 credits.

Individual instruction in collaborative piano performance. Designed to deepen and continue development as a collaborative artist.
Requisites: Declared in Music: Performance DMA
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify personal strengths and weaknesses as a collaborative artist and develop strategies to address problems
Audience: Graduate

2. Employ advanced aural skills in investigating sound and balance with musical partners
Audience: Graduate

3. Improve piano technique, stylistic awareness, interpretive decision-making and listening skills
Audience: Graduate

4. Describe performance practices across a range of musical styles
Audience: Graduate

5. Improve sight-reading proficiency
Audience: Graduate

6. Manage multiple musical assignments simultaneously
Audience: Graduate

7. Demonstrate excellent communication skills in rehearsals, lessons and performance – both verbal and musical – with partners and faculty
Audience: Graduate

MUS PERF 747 – DOCTORAL LEVEL COMPOSITION
3 credits.

Doctoral level composition.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 990 – MASTERS RECITAL
1-4 credits.

Preparation and public performance of a Masters Recital.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

MUS PERF 999 – DMA RECITAL
1 credit.

Preparation and public performance of a Doctoral Recital that comprises a portion of the degree requirements for all Doctor of Musical Arts degrees.
Requisites: Declared in Music: Performance graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

NAVAL SCIENCE (NAV SCI)

NAV SCI 101 – INTRODUCTION TO NAVAL SCIENCE
2 credits.

Introduction to the naval profession emphasizing the missions, organization, and components of the Navy and Marine Corps. Topics include terminology, military justice, job specialties, seapower, and naval leadership. Includes lab. Intended for first year Naval ROTC students.
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2025

NAV SCI 102 – SEAPOWER-MARITIME AFFAIRS
3 credits.

Historical survey of the U.S. Navy and American concepts of seapower from 1775 to the present. Includes the evolution of maritime strategy in support of U.S. National Strategy. Current issues in maritime affairs. Includes lab. Open to non-ROTC students on a space available basis, with consent of instructor.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023

NAV SCI 175 – INTRODUCTORY NAVAL LABORATORY I
1 credit.

Laboratory class covering officer education in naval orientation and other topics dealing with the professional development of future naval officers. Intended for freshman NROTC students.
Requisites: Enrolled in Naval ROTC program
Repeatable for Credit: No
Last Taught: Fall 2025

NAV SCI 176 – INTRODUCTORY NAVAL LABORATORY II
1 credit.

Laboratory class covering officer education in naval sea power and other topics dealing with the professional development of future naval officers. Intended for freshman NROTC students.
Requisites: Enrolled in Naval ROTC program
Repeatable for Credit: No
Last Taught: Spring 2026

NAV SCI 201 – NAVAL LEADERSHIP AND MANAGEMENT
3 credits.

A study of organizational behavior and management within the context of the naval organization. Topics include a survey of managerial functions and a study of behavioral aspects of organizations with emphasis on motivation and leadership. Includes lab. Open to non-ROTC students on a space available basis, with consent of instructor.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

NAV SCI 202 – NAVIGATION
3 credits.

Introduction to concepts and techniques used to navigate U.S. Navy and civilian ships. Charts and publications, compasses, tides and currents, dead reckoning, piloting, celestial and electronic navigation; day's work in navigation and Nautical Rules of the Road. Includes lab. Open to non-ROTC students on a space available basis, with consent of instructor.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

NAV SCI 275 – ELEMENTARY NAVAL LABORATORY I
1 credit.

Laboratory class covering officer education in naval engineering and other topics dealing with the professional development of future naval officers. Intended for sophomore NROTC students.
Requisites: Enrolled in Naval ROTC program
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025

NAV SCI 276 – ELEMENTARY NAVAL LABORATORY II
1 credit.

Laboratory class covering officer education in naval weapons and other topics dealing with the professional development of future naval officers. Intended for sophomore NROTC students.
Requisites: Enrolled in Naval ROTC program
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026

NAV SCI 301 – NAVAL ENGINEERING
3 credits.

The basic principles and components of ship propulsion systems including steam, diesel, gas turbine, and nuclear power plants. Other topics include ship construction, buoyancy and stability, damage control, electrical distribution, and air conditioning/ refrigeration. Includes lab. Open to non-ROTC students on a space available basis, with consent of instructor.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

NAV SCI 302 – NAVAL WEAPONS
3 credits.

Introduction to the properties and behavior of electronic, electromagnetic, and mechanical systems used in naval weapons systems. Topics and concepts include wide range of academic disciplines, all of which are applied to the maritime uses of radar, sonar, communications, electro-optics, computers, missile, and electronic warfare systems. Open to non-ROTC students on a space available basis, with consent of instructor.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

NAV SCI 350 – FUNDAMENTALS OF MANEUVER WARFARE
3 credits.

History of maneuver warfare and the development of the concepts, principles, and doctrine of military operations through study of selected examples from modern history. Open to non-ROTC students on a space available basis, with consent of instructor
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

NAV SCI 351 – LAND CAMPAIGNS
3 credits.

Evolution of weapons, strategy, tactics and material; the classic principles of war by study of selected battles and campaigns; survey of military and foreign policy, basic strategic concepts, and principles of warfare. Includes lab. Open to non-ROTC students on a space available basis, with consent of instructor.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025

NAV SCI 375 – INTERMEDIATE NAVAL LABORATORY I
1 credit.

Laboratory class covering officer education in naval navigation and other topics dealing with the professional development of future naval officers. Intended for junior NROTC students.
Requisites: Enrolled in Naval ROTC program
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025

NAV SCI 376 – INTERMEDIATE NAVAL LABORATORY II
1 credit.

Laboratory class covering officer education in naval operations and other topics dealing with the professional development of future naval officers. Intended for junior NROTC students.
Requisites: Enrolled in Naval ROTC program
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026

NAV SCI 401 – NAVAL OPERATIONS
3 credits.

In depth study of the professional and efficient operation of U.S. Navy ships. Fleet communications, tactical employment, relative motion plotting, seamanship, and a lecture series on Joint Warfare and the Employment of Naval Forces as an element of National Security Strategy. Open to non-ROTC students on a space available basis, with consent of instructor.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

NAV SCI 402 – NAVAL LEADERSHIP AND ETHICS
3 credits.

Capstone course. Integrates an exploration of Western moral traditions and ethical philosophy with military leadership, professional ethics, and the Uniform Code of Military Justice. Includes lab. Intended for Senior NROTC students. Open to non-ROTC students on a space available basis, with consent of instructor.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

NAV SCI 475 – ADVANCED NAVAL LABORATORY I
1 credit.

Laboratory class covering officer education in naval management and other topics dealing with the professional development of future naval officers. Intended for senior NROTC students.
Requisites: Enrolled in Naval ROTC program
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025

NAV SCI 476 – ADVANCED NAVAL LABORATORY II
1 credit.

Laboratory class covering officer education in naval leadership and other topics dealing with the professional development of future naval officers. Intended for senior NROTC students.
Requisites: Enrolled in Naval ROTC program
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026

NAV SCI 575 – PROFESSIONAL NAVAL LABORATORY I
1 credit.

Laboratory class covering officer education in naval orientation and other topics dealing with the professional development of future naval officers. Intended for senior NROTC students.
Requisites: Enrolled in Naval ROTC program
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025

NAV SCI 576 – PROFESSIONAL NAVAL LABORATORY II
1 credit.

Laboratory class covering officer education in naval orientation and other topics dealing with the professional development of future naval officers. Intended for senior NROTC students.
Requisites: Enrolled in Naval ROTC program
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2021

NEUROLOGICAL SURGERY (NEURSURG)

NEURSURG 699 – NEUROSURGERY: DIRECTED IN STUDY IN RESEARCH
1-3 credits.

Offers undergraduates majoring in an area of the biological sciences, and interested in preparing for advanced coursework in graduate or medical school, an opportunity to participate in neurological surgery research.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

NEURSURG 919 – INDIVIDUALIZED NEUROLOGICAL SURGERY ELECTIVE
2-4 credits.

Individually scheduled clinical elective, directly supervised by Neurological Surgery senior residents and attending physicians. Regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, participating in sub-specialty clinics, presenting cases and teaching topics, and discussing patient cases. Independent activities include reading about patient conditions and preparing for direct patient care as needed. Other patient care-related learning activities as assigned by instructors, dependent on the individual student, the patients under the student's care, and the location.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis, and demonstrate an understanding of the surgical anatomy
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members
Audience: Graduate

6. Develop and implement effective patient management plans
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner
Audience: Graduate

8. Review, interpret, and present current literature to support patient care
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care
Audience: Graduate

11. Engage patients in shared decision-making regarding tests, orders, and procedures
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate
Audience: Graduate

NEURSURG 921 – INPATIENT NEURO ICU ELECTIVE
1-12 credits.

Direct supervision by Neurocritical Care attending physicians. Regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, observing procedures in the unit, presenting cases and teaching topics, and discussing patient cases. Independent activities, including reading about patient conditions and preparing for direct patient care, as needed. Other patient care related learning activities as assigned by instructors: these are dependent on the individual student and the patients under the student's care.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam
Audience: Graduate

2. Develop and present a weighted differential diagnosis
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner
Audience: Graduate

7. Review, interpret and present current literature to support patient care
Audience: Graduate

8. Develop clinically relevant questions to advance learning
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care
Audience: Graduate

11. Engage patients in shared decision-making regarding tests, orders and procedures
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate
Audience: Graduate

NEURSURG 938 – INPATIENT ACTING INTERNSHIP IN NEUROLOGICAL SURGERY
4 credits.

An acting internship with hands-on, in-depth exposure to inpatient and operative management of neurological surgery patients. Direct patient care under the supervision of a senior resident, fellows, and faculty. Function at the intern level and involve managing pre-operative evaluations, comorbidities, and post-operative care and complications as well as assisting with surgeries.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Develop an evidenced-based understanding of the pathophysiology and appropriate management options for common neurological surgical disorders.
Audience: Graduate

2. Discuss the surgical anatomy, common procedural indications, comorbidities, and prophylactic strategies to reduce post-operative complications.
Audience: Graduate

3. Demonstrate basic knowledge regarding common post-operative complications and the appropriate management of each.
Audience: Graduate

4. Describe indications and list the appropriate preoperative evaluations including lab tests, radiographic imaging, and EEG.
Audience: Graduate

5. Identify and describe use of common instruments used in neurological surgery.
Audience: Graduate

6. Summarize common intraoperative complications associated with procedures and the appropriate management of each.
Audience: Graduate

NEUROLOGY (NEUROL)

NEUROL 699 – DIRECTED RESEARCH IN NEUROLOGY
1-3 credits.

Offers the undergraduate student majoring in the life sciences (including biology, chemistry psychology, or related fields) and with interest in preparing for advanced coursework in graduate or medical school, an opportunity to participate in basic and translation research in neuroscience and neurological disorders.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Develop a clear research question or problem and formulate a hypothesis.
Audience: Undergraduate

2. Deliver an "elevator pitch" describing your research.
Audience: Undergraduate

3. Conduct research using methods employed by your lab and under the supervision of your PI and senior laboratory personnel.
Audience: Undergraduate

NEUROL 735 – NEUROBIOLOGY OF DISEASE
2 credits.

Overview of the major categories of human neurological and opthalmological disease to fundamental topics in neurobiology.
Requisites: Graduate/professional standing and NTP/NEURODPT 610
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the clinical aspects (diagnosis and available treatments) for a number of neurological diseases
Audience: Graduate

2. Critically discuss current papers in the neurobiology of disease literature
Audience: Graduate

3. Demonstrate understanding of the latest findings and treatments for a number of neurological disorders
Audience: Graduate

4. Sharpen communication skills by presenting scientific papers and leading discussions
Audience: Graduate

NEUROL 910 – INDEPENDENT READING AND RESEARCH FOR FOURTH YEAR MEDICAL STUDENTS
1-12 credits.

Independent research under the direct supervision of Neurology faculty. Each project is individualized to meet the research goals of the student within the context of the faculty's research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Graduate

2. Read and effectively search scientific literature
Audience: Graduate

3. Develop critical, analytical, and independent thinking skills
Audience: Graduate

NEUROL 913 – COGNITION AND NEUROANATOMY
2 credits.

Basic science concepts will be integrated to examine the relationship between neuroanatomy and cognition (e.g., learning and memory, executive function, visual perceptual abilities, etc.). Utilize stroke, epilepsy, dementia and other neurodegenerative disorders from clinical practice to demonstrate the connection between brain structure and cognitive function. Hands on experience in neuropsychological test administration and interpretation will be integrated into learning. Brain imaging correlates for clinical cases will be presented by a clinical neurologist.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Differentiate cognitive profiles and neuroanatomical correlates of dementia
Audience: Graduate

2. Differentiate cognitive profiles and neuroanatomical correlates of stroke
Audience: Graduate

3. Differentiate cognitive profiles and neuroanatomical correlates of epilepsy
Audience: Graduate

4. Understand factors needed to determine cognitive capacity
Audience: Graduate

5. Learn to administer and interpret MOCA, SLUMS, and MMSE accurately
Audience: Graduate

NEUROL 914 – NEUROLOGY, ADULT NEUROLOGICAL DISORDERS & DIET
2 credits.

Gain insight into the role of diet and nutrition in adult neurological diseases while utilizing analytical and evidence-based medicine research skills. Learn the role of diet and nutrition in the exacerbation and the treatment of adult neurological disorders (e.g., epilepsy, Alzheimer's disease, multiple sclerosis, chronic pain).
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize the fundamental associations between diet and adult neurological disorders under study (e.g., Epilepsy, Alzheimer's disease, Multiple Sclerosis, Chronic Pain).
Audience: Graduate

2. Identify and critically evaluate landmark articles in field.
Audience: Graduate

3. Apply evidence from research, readings, and discussions to interpretation of case studies
Audience: Graduate

4. Identify a question or topic of interest and prepare a written (book review, case report, mini review) or oral presentation (PowerPoint) in the area of diet/nutrition and an adult brain disorders.
Audience: Graduate

5. Give and receive feedback through a peer-review process.
Audience: Graduate

6. Analyze the scientific method used in a clinical and translational research study.
Audience: Graduate

7. Summarize the application of scientific research to patient care.
Audience: Graduate

8. Describe how clinical and translational research findings are discussed with patients.
Audience: Graduate

NEUROL 915 – NEUROLOGY, PEDIATRIC NEUROLOGICAL DISORDERS & DIET
2 credits.

Explore the role of diet and nutrition in pediatric neurological diseases while utilizing your analytical and evidence-based medicine research skills. Gain understanding of the role of diet and nutrition in the exacerbation and the treatment of pediatric neurological disorders (e.g., autism, Fragile X Syndrome, phenylketonuria [PKU], spina bifida).
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize the fundamental associations between diet and pediatric neurological disorders under study (e.g., Autism, Fragile X Syndrome, Phenylketonuria (PKU), Spina Bifida).
Audience: Graduate

2. Identify and critically evaluate landmark articles in the field.
Audience: Graduate

3. Apply evidence from research, readings, and discussions to interpretation of case studies.
Audience: Graduate

4. Identify a question or topic of interest and prepare a written (book review, case report, mini review) or oral presentation (PowerPoint) in the area of diet/nutrition and a pediatric brain disorder.
Audience: Graduate

5. Give and receive feedback through a peer-review process.
Audience: Graduate

6. Analyze the scientific method used in a clinical and translational research study.
Audience: Graduate

7. Summarize the application of scientific research to patient care
Audience: Graduate

8. Describe how clinical and translational research findings are discussed with patients
Audience: Graduate

NEUROL 919 – NEUROLOGY INDIVIDUALIZED CLINICAL ELECTIVE
1-12 credits.

Individually scheduled clinical elective, directly supervised by Neurology senior residents and attending physicians. Regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, observing procedures in the unit or clinic, examination of patients in an ambulatory setting, presenting cases and teaching topics, and discussing patient cases. Independent activities, including reading about patient conditions and preparing for direct patient care, as needed. Other patient care related learning activities as assigned by instructors: these are dependent on the individual student and the patients under the student's care.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision-making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

NEUROSCIENCE (NEURODPT)

NEURODPT/NTP 610 – CELLULAR AND MOLECULAR NEUROSCIENCE
4 credits.

Study of original papers leading to an understanding of the molecular basis of electrical activity in neurons. Topics include voltage-sensitive currents, molecular biology of neuronal receptorrs, synaptic transmission and sensory transduction.
Requisites: ZOOLOGY/PSYCH 523 and (PHYSICS 202, 208, or 248), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the major anatomical parts of a neuron and summarize their functions
Audience: Both Grad & Undergrad

2. Name the major classes of voltage-gated ion channels responsible for the resting potential and action potential. Describe their functional roles in generating those potentials, with respect to concepts such as voltage-dependence, activation, inactivation and propagation. Identify the structural motifs in these proteins that permit their function
Audience: Both Grad & Undergrad

3. Summarize the sequence of events in the presynaptic terminal that lead from depolarization to neurotransmitter release, including the role of calcium. Explain the quantal hypothesis of neurotransmitter release and the experimental evidence that supports it. Describe the exocytosis/endocytosis cycle
Audience: Both Grad & Undergrad

4. Summarize basic principles of ligand/receptor interactions. Interpret the meaning of quantities such as the dissociation constant (Kd) and the maximum response (Vmax). Explain the experimental evidence that led to the equations (e.g., Hill Equation) that describe these principles
Audience: Both Grad & Undergrad

5. Name the major classes of ligand-gated ion channels that support fast synaptic transmission and differentiate their functions with respect to excitation versus inhibition. Identify the structural motifs in these proteins that permit their specific functions. Solve equations that describe the behavior of simple chemical and electrical systems as a function of time
Audience: Both Grad & Undergrad

6. Explain what second messengers and signaling cascades are and how they participate in regulating neuronal function. Describe the major processes leading from DNA to RNA to the production of proteins and explain how these processes are regulated with respect to the structure of chromatin and the action of transcriptional activators and repressors
Audience: Both Grad & Undergrad

7. Define the concept of sensory transduction. Describe the key components of transduction and their interactions in the following systems: vision, olfaction, touch and hearing. Explain how sensory cells can be "tuned" to respond to specific aspects of a stimulus (e.g., color, frequency, etc)
Audience: Both Grad & Undergrad

NEURODPT/NTP/PSYCH 611 – SYSTEMS NEUROSCIENCE
4 credits.

Introduction to the anatomy and physiology of the mammalian nervous system. Lectures will cover the neuroanatomy of the major subdivisions of the human brain, the major sensory and motor systems, and higher order functions. Lab/discussion sections will emphasize readings from the primary literature and hands-on dissections.
Requisites: NEURODPT/NTP 610 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the organization and structure of mammalian nervous system, including the spinal cord, brainstem, thalamus, cerebral cortex, cerebellum, basal ganglia, limbic system, and their interconnections on a systems leve
Audience: Both Grad & Undergrad

2. Demonstrate a solid understanding of the functions of the sensory and motor systems that underlie perception and action
Audience: Both Grad & Undergrad

3. Demonstrate a solid understanding of higher brain functions and behavior, including learning and memory and executive function
Audience: Both Grad & Undergrad

4. Demonstrate knowledge about approaches of modern neuroscience research including neuroanatomy, neurophysiology, functional brain imaging, behavioral assays, and quantitative data analysis methods
Audience: Both Grad & Undergrad

5. Develop and apply critical thinking to evaluate original neuroscience research
Audience: Graduate

6. Develop ability to formulate hypotheses and to apply knowledge learned from the course to design experiments for hypothesis testing
Audience: Graduate

NEURODPT 629 – MOLECULAR AND CELLULAR MECHANISMS OF MEMORY
3 credits.

Focuses on the cell signaling and the resulting structural changes that occur at neuronal synapses during memory formation. The aim is to understand how the synaptic changes underlying memory occur.
Requisites: Graduate/professional standing or ANAT&PHY 335, 435, PHYSIOL 335, 435 or ZOOLOGY/PSYCH 523
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe how the neural activity at the synapse which occurs during a memory-inducing event (a memorable event) leads to the ability to recall that event, when the animal or person does recall that event, either spontaneously or by prompting.
Audience: Both Grad & Undergrad

2. Apply a variety of biological techniques to understand the biochemical processes that are involved in memory. Learn the principles of these advanced techniqes and apply them appropriately to work out mechanisms.
Audience: Both Grad & Undergrad

3. Formulate why alterations in synaptic strength between neurons in an autoassociative network lead to the ability to recall an event which involved the activation of neurons in that network. This is the concept of pattern completion, which is the core of memory formation and is an incredibly important overall concept.
Audience: Both Grad & Undergrad

4. Succinctly present research proposals that are students' extensions of work that has been published, including a strong component of originality on the part of the student.
Audience: Both Grad & Undergrad

5. Formulate the basics of synaptic transmission mechanisms including presynaptic release of neurotransmitter and effects of neurotransmitter interactions with the post synaptic membrane on biochemistry and electrophysiology of the dendritic spine. These include unique properties of the dendritic spine including anatomy,biochemical composition.
Audience: Both Grad & Undergrad

6. Formulate the concept of neural plasticity, the strengthening and weakening of transmission between presynaptic terminals and post synaptic dendritic spines. The realization that this occurs as the result of interaction between a large number of proteins. Describe the structure of the synapse in detail that includes the roles played by structural proteins and protein kinases and phosphatases in affecting synaptic strength.
Audience: Both Grad & Undergrad

7. Describe the application of the use of advanced optical approaches such as FRET (fluorescence resonance energy transfer) and several others. Formulate how they reveal detailed information about the movements and alterations in properties of the key macromolecules that comprise the synaptic region. Formulate how information is derived from these measurements to explain events of synaptic plasticity.
Audience: Both Grad & Undergrad

8. Formulate an approach using one or more of these techniques to answer an unresolved question regarding the mechanisms of plasticity.
Audience: Graduate

NEURODPT/NTP 640 – COMPUTATIONAL NEUROSCIENCE: FROM SINGLE CELLS TO WHOLE BRAIN MODELS
3 credits.

Theory and application of methods in computational neuroscience across various levels of organization from single cells to global brain dynamics and cognition. Computational neuroscience is an approach to understanding the development and function of nervous systems in mechanistic terms at many different structural scales. Topics include biophysical properties of neurons and synapses, neural plasticity, sensory systems, neural circuits, whole brain analysis and modeling, and different views on brain function. Includes primers on relevant computational techniques (ICA, information theoretical approaches, dynamical systems) and a computational problem set. Starts with an introduction to MATLAB (used for problem sets).
Requisites: PSYCH/ZOOLOGY 523, PSYCH 454, MATH 221, and (PHYSICS 104, 202, 208, or 248); or graduate/professional standing and NEURODPT/NTP 610 and PSYCH/NEURODPT/NTP 611
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the basic functioning of a neuron in biophysical terms (including how action potentials are generated, the role of dendrites, and postsynaptic integration).
Audience: Both Grad & Undergrad

2. Summarize the computational properties of sensory neurons reacting to sensory stimuli (tuning curves, receptive fields, feature selectivity).
Audience: Both Grad & Undergrad

3. Demonstrate technical familiarity in evaluating the statistical and information theoretical properties of neuronal activity (basics of signal detection theory, spike train statistics, firing rate models, PCA/ICA analysis).
Audience: Both Grad & Undergrad

4. Name various types of neural circuit models and their areas of application.
Audience: Both Grad & Undergrad

5. List the main differences between artificial neural networks as developed in computer science and computational models of biological neural networks.
Audience: Both Grad & Undergrad

6. Demonstrate how to characterize the dynamical properties of neurons and neural networks.
Audience: Both Grad & Undergrad

7. Summarize the hierarchical organization of the brain in computational terms (canonical microcircuit, mini-columns, functional brain networks).
Audience: Both Grad & Undergrad

8. Distinguish between anatomical, functional, and effective cortical connectivity.
Audience: Both Grad & Undergrad

9. Summarize main theoretical approaches to understanding brain functioning (graph theory, dynamical systems, information processing, decoding, whole-brain computational models).
Audience: Both Grad & Undergrad

10. Run and adapt MATLAB scripts for building and simulating neural

NEURODPT/GENETICS 650 – FUNCTIONAL GENOMICS OF BRAIN DISORDERS
3 credits.

Functional genomics methods (RNA-seq, ATAC-seq, Hi-C, ChIP-seq, Tag, etc.) and their applications in the study of molecular and cellular mechanisms governing brain development, evolution, and neurodevelopmental and neuropsychiatric disorders. Overview of relevant aspects of Genetics and Neuroscience, including genomic approaches for gene discovery for human disorders and key properties of brain cells and circuit development. Bioinformatic approaches for analyzing genome-scale data sets. Critical consideration of experimental design and analysis strategies through reading and discussion of primary research literature and the development of an original research proposal. Emphasis will be placed upon how to effectively communicate science (written and oral).
Requisites: GENETICS 466, 468, BIOCORE 383, PSYCH/ZOOLOGY 523, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize potential strengths, limitations, and assumptions of published scientific studies.
Audience: Undergraduate

2. Describe the genomics tools used to study brain development and disorders, including how these tools are run and how to interpret the results they generate.
Audience: Both Grad & Undergrad

3. Summarize current studies in genomics, brain development, evolution, and neurodevelopmental and neuropsychiatric disorders from primary scientific literature.
Audience: Both Grad & Undergrad

4. Design a research project that utilizes functional genomics approaches to interrogate fundamental questions of brain disorders, development, evolution, and function.
Audience: Both Grad & Undergrad

5. Evaluate the strengths, limitations, and assumptions of published and proposed research studies, including methods, results, conclusions, and context of the field.
Audience: Graduate

6. Critique study design and interpretation and communicate critiques in a constructive manner.
Audience: Graduate

NEURODPT/PSYCH/ZOOLOGY 674 – BEHAVIORAL NEUROENDOCRINOLOGY SEMINAR
2 credits.

Behavior results from a complex interplay among hormones, the brain, and environmental factors. Behaviors and their underlying neural substrates have evolved in response to specific environmental conditions, resulting in vast species diversity in behavioral and neuroendocrine solutions to environmental problems. Designed to explore the primary literature on the neuroendocrine underpinnings of behavior spanning from feeding to sex differences in complex social behaviors. A range of taxonomic groups will be discussed, including (but not limited to) mammals, birds, and fish.
Requisites: ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify how behaviors and their underlying neural substrates have evolved in response to specific environmental conditions
Audience: Both Grad & Undergrad

2. Discuss and explore the primary literature on the neuroendocrine underpinnings of behavior spanning from feeding to sex differences in complex social behaviors
Audience: Both Grad & Undergrad

3. Identify and discuss hormones, the brain, and environmental factors as they relate to behavioral evolution and biological diversity
Audience: Both Grad & Undergrad

4. Develop and apply critical thinking to evaluate neuroendocrinological research
Audience: Graduate

5. Communicate effectively about concepts, theories and approaches of neuroendocrinology and behavioral research
Audience: Graduate

NEURODPT 675 – SELECTED TOPICS IN PHYSIOLOGY
1-3 credits.

Topics include: advanced cardiovascular physiology, advanced respiratory physiology, advanced endocrinology, membrane transport physiology and neurobiology.
Requisites: None
Course Designation: Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2019
Learning Outcomes: 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in Neuroscience and Physiology, including but not limited to: ion channels, advanced cardiovascular physiology, advanced respiratory physiology, advanced endocrinology, membrane transport physiology and neurobiology
Audience: Both Grad & Undergrad

2. Identify and describe key theories, concepts, and methods in Physiology and Neuroscience, including but not limited to: ion channels, advanced cardiovascular physiology, advanced respiratory physiology, advanced endocrinology, membrane transport physiology and neurobiology and apply the knowledge gained to research in the field
Audience: Graduate

NEURODPT 699 – DIRECTED STUDY
1-4 credits.

Independent work.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Undergraduate

2. Read and effectively search scientific literature
Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

NEURODPT 747 – SENSORY AND MOTOR SYSTEMS
2 credits.

Overview of the basic science principles of sensory and motor systems in the central and peripheral nervous system, with clinicians providing complementary presentations on their relevant experiences in the clinic. Topics include Somatosensory pathways in spinal cord, brainstem and cerebrum, Motor neurons in spinal cord and brainstem and the descending systems that control them, Blood Supply of the CNS and affiliated vascular syndromes, Cerebellum, Basal Ganglia and associated pathways, Eye Movement control, Vestibular, Auditory, and Visual systems and organization of Cerebral Cortex.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and summarize the main sensory and motor structures within the nervous system.
Audience: Graduate

2. Explain how elements in the nervous system interact to enable specific sensory and motor functions.
Audience: Graduate

3. Describe how pathology in specific neural pathways leads to particular clinical neurological signs and symptoms (e.g., ischemic stroke syndromes).
Audience: Graduate

4. Predict the location of damage in the nervous system based on symptoms and signs.
Audience: Graduate

NEURODPT/ZOOLOGY 765 – DEVELOPMENTAL NEUROSCIENCE
3 credits.

Analysis of neural development with emphasis on experimental approaches. Combination of lectures and discussions of primary literature. Topics include neural induction, patterning, mechanisms of axon guidance, neural crest cell migration and differentiation, cortical development, and synapse formation and elimination.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Gain an extensive understanding of mechanisms of neural development
Audience: Graduate

2. Acquire the ability to critically analyze current studies in neural development
Audience: Graduate

NEURODPT 990 – RESEARCH AND THESIS
1-9 credits.

Research supervised by individual faculty members.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Exhibit a broad understanding of general Neuroscience principles
Audience: Graduate

2. Conduct independent research using a variety of approaches
Audience: Graduate

3. Think critically to address research challenges
Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research
Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab
Audience: Graduate

NEUROSCIENCE TRAINING PROGRAM (NTP)

NTP/NEURODPT 610 – CELLULAR AND MOLECULAR NEUROSCIENCE
4 credits.

Study of original papers leading to an understanding of the molecular basis of electrical activity in neurons. Topics include voltage-sensitive currents, molecular biology of neuronal receptorrs, synaptic transmission and sensory transduction.
Requisites: ZOOLOGY/PSYCH 523 and (PHYSICS 202, 208, or 248), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the major anatomical parts of a neuron and summarize their functions
Audience: Both Grad & Undergrad

2. Name the major classes of voltage-gated ion channels responsible for the resting potential and action potential. Describe their functional roles in generating those potentials, with respect to concepts such as voltage-dependence, activation, inactivation and propagation. Identify the structural motifs in these proteins that permit their function
Audience: Both Grad & Undergrad

3. Summarize the sequence of events in the presynaptic terminal that lead from depolarization to neurotransmitter release, including the role of calcium. Explain the quantal hypothesis of neurotransmitter release and the experimental evidence that supports it. Describe the exocytosis/endocytosis cycle
Audience: Both Grad & Undergrad

4. Summarize basic principles of ligand/receptor interactions. Interpret the meaning of quantities such as the dissociation constant (Kd) and the maximum response (Vmax). Explain the experimental evidence that led to the equations (e.g., Hill Equation) that describe these principles
Audience: Both Grad & Undergrad

5. Name the major classes of ligand-gated ion channels that support fast synaptic transmission and differentiate their functions with respect to excitation versus inhibition. Identify the structural motifs in these proteins that permit their specific functions. Solve equations that describe the behavior of simple chemical and electrical systems as a function of time
Audience: Both Grad & Undergrad

6. Explain what second messengers and signaling cascades are and how they participate in regulating neuronal function. Describe the major processes leading from DNA to RNA to the production of proteins and explain how these processes are regulated with respect to the structure of chromatin and the action of transcriptional activators and repressors
Audience: Both Grad & Undergrad

7. Define the concept of sensory transduction. Describe the key components of transduction and their interactions in the following systems: vision, olfaction, touch and hearing. Explain how sensory cells can be "tuned" to respond to specific aspects of a stimulus (e.g., color, frequency, etc)
Audience: Both Grad & Undergrad

NTP/NEURODPT/PSYCH 611 – SYSTEMS NEUROSCIENCE
4 credits.

Introduction to the anatomy and physiology of the mammalian nervous system. Lectures will cover the neuroanatomy of the major subdivisions of the human brain, the major sensory and motor systems, and higher order functions. Lab/discussion sections will emphasize readings from the primary literature and hands-on dissections.
Requisites: NEURODPT/NTP 610 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the organization and structure of mammalian nervous system, including the spinal cord, brainstem, thalamus, cerebral cortex, cerebellum, basal ganglia, limbic system, and their interconnections on a systems leve
Audience: Both Grad & Undergrad

2. Demonstrate a solid understanding of the functions of the sensory and motor systems that underlie perception and action
Audience: Both Grad & Undergrad

3. Demonstrate a solid understanding of higher brain functions and behavior, including learning and memory and executive function
Audience: Both Grad & Undergrad

4. Demonstrate knowledge about approaches of modern neuroscience research including neuroanatomy, neurophysiology, functional brain imaging, behavioral assays, and quantitative data analysis methods
Audience: Both Grad & Undergrad

5. Develop and apply critical thinking to evaluate original neuroscience research
Audience: Graduate

6. Develop ability to formulate hypotheses and to apply knowledge learned from the course to design experiments for hypothesis testing
Audience: Graduate

NTP/NEURODPT 640 – COMPUTATIONAL NEUROSCIENCE: FROM SINGLE CELLS TO WHOLE BRAIN MODELS
3 credits.

Theory and application of methods in computational neuroscience across various levels of organization from single cells to global brain dynamics and cognition. Computational neuroscience is an approach to understanding the development and function of nervous systems in mechanistic terms at many different structural scales. Topics include biophysical properties of neurons and synapses, neural plasticity, sensory systems, neural circuits, whole brain analysis and modeling, and different views on brain function. Includes primers on relevant computational techniques (ICA, information theoretical approaches, dynamical systems) and a computational problem set. Starts with an introduction to MATLAB (used for problem sets).
Requisites: PSYCH/ZOOLOGY 523, PSYCH 454, MATH 221, and (PHYSICS 104, 202, 208, or 248); or graduate/professional standing and NEURODPT/NTP 610 and PSYCH/NEURODPT/NTP 611
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the basic functioning of a neuron in biophysical terms (including how action potentials are generated, the role of dendrites, and postsynaptic integration).
Audience: Both Grad & Undergrad

2. Summarize the computational properties of sensory neurons reacting to sensory stimuli (tuning curves, receptive fields, feature selectivity).
Audience: Both Grad & Undergrad

3. Demonstrate technical familiarity in evaluating the statistical and information theoretical properties of neuronal activity (basics of signal detection theory, spike train statistics, firing rate models, PCA/ICA analysis).
Audience: Both Grad & Undergrad

4. Name various types of neural circuit models and their areas of application.
Audience: Both Grad & Undergrad

5. List the main differences between artificial neural networks as developed in computer science and computational models of biological neural networks.
Audience: Both Grad & Undergrad

6. Demonstrate how to characterize the dynamical properties of neurons and neural networks.
Audience: Both Grad & Undergrad

7. Summarize the hierarchical organization of the brain in computational terms (canonical microcircuit, mini-columns, functional brain networks).
Audience: Both Grad & Undergrad

8. Distinguish between anatomical, functional, and effective cortical connectivity.
Audience: Both Grad & Undergrad

9. Summarize main theoretical approaches to understanding brain functioning (graph theory, dynamical systems, information processing, decoding, whole-brain computational models).
Audience: Both Grad & Undergrad

10. Run and adapt MATLAB scripts for building and simulating neural

NTP 660 – NEUROSCIENCE & PUBLIC POLICY SEMINAR
1-2 credits.

Covers various topics in neuroscience and in the related sciences that demonstrate the interaction between science and public policy.
Requisites: BIOCORE 485, ZOOLOGY/PSYCH 523, PSYCH/NEURODPT/NTP 611, or declared in Neuroscience graduate program
Course Designation: Core GenEd - Natural Science & Wellness
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Integrate knowledge from multiple sources and reflect on how science informs policies and society, and how policies impact the conduct of science
Audience: Both Grad & Undergrad

2. Demonstrate ability to consider multiple viewpoints on complex topics and engage in respectful and enriching discussion
Audience: Both Grad & Undergrad

3. Summarize content knowledge on current topics in policy, law, and neuroscience
Audience: Both Grad & Undergrad

4. Develop critical thinking skills to identify and dissect societal issues that are informed by science and reflect on potential solutions and next steps
Audience: Both Grad & Undergrad

5. Demonstrate knowledge of career paths at the intersection of science and policy (e.g. academic, non-profit, industry, government)
Audience: Both Grad & Undergrad

6. Demonstrate ability to lead an inclusive discussion on topics at the intersection of science and policy
Audience: Graduate

NTP 666 – NEUROSCIENCE OF CONSCIOUSNESS AND ITS DISORDERS
3 credits.

Outlines contemporary strategies to study consciousness and current knowledge of the neural correlates of consciousness and their alterations during sleep, parasomnia, anesthesia, coma, stroke, seizures, meditative and psychedelic states. Reviews recent work studying the neural correlates of conscious contents and their interactions with cognitive processes. Outlines contemporary theories of consciousness, illustrate how they can be empirically tested, and discuss their implications for the presence vs. absence of consciousness in artificial intelligent systems.
Requisites: (PSYCH 454 and ZOOLOGY/PSYCH 523) or graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand approaches used to distinguish between consciousness and its pre-requisites or consequences, and the importance of arousal systems for enabling consciousness.
Audience: Both Grad & Undergrad

2. Describe current knowledge about cortical structures involved in specific conscious contents.
Audience: Both Grad & Undergrad

3. Understand the complementarity of animal vs. human models to study consciousness.
Audience: Both Grad & Undergrad

4. Describe the spectrum of alterations of consciousness present during sleep, parasomnia, anesthesia, coma, seizures, stroke, meditative and psychedelic states, and their neural correlates.
Audience: Both Grad & Undergrad

5. Understand possible interactions and dissociations between consciousness, attention and memory.
Audience: Both Grad & Undergrad

6. Describe the variety of current theoretical approaches to consciousness and their relevance to infer the presence of consciousness in artificial intelligent systems.
Audience: Both Grad & Undergrad

7. Discuss a selection of recent studies - identified shortly before class as providing significant advances and/or reflecting current directions in the consciousness research field – and learn to critically analyze the methodological strengths and limitations of these studies.
Audience: Graduate

8. Understand how to design an experiment probing the neural correlates of consciousness while accounting for its pre-requisites and consequences.
Audience: Graduate

NTP 675 – SPECIAL TOPICS
1-3 credits.

Requisites: None
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in neuroscience and neurobiology
Audience: Both Grad & Undergrad

2. Identify and describe key theories, concepts, and methods in neurobiology
Audience: Both Grad & Undergrad

3. Explore a new phenomenon or modality in the neuroscience area and apply the knowledge gained to research in the field
Audience: Graduate

NTP 677 – BASIC SLEEP MECHANISMS AND SLEEP DISORDERS: FROM NEUROBIOLOGY TO SLEEP MEDICINE
3 credits.

Sleep occupies a third of our life, is found in all animal species carefully studied so far, and loss of sleep has both acute and long- term negative consequences on the brain and the body. Still, why we sleep remains unclear, and hypotheses on the role of sleep for synaptic homeostasis, learning and memory are being tested. Focuses on the neurobiology of sleep, with detailed review of the brain structures involved in controlling wake and sleep, as well as the circadian and homeostatic regulation of sleep. Other topics include changes in sleep need with age, animal models to study sleep, sleep disorders, and genetics of sleep.
Requisites: PSYCH 454 and ZOOLOGY/PSYCH 523 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Outline the physiology and definitions used to define sleep and wake
Audience: Both Grad & Undergrad

2. Detail the brain structures and systems involved in the control of sleep and wake
Audience: Both Grad & Undergrad

3. Describe circadian and homeostatic regulation of sleep and wakefulness
Audience: Both Grad & Undergrad

4. Describe recent evidence linking sleep, memory, and synaptic plasticity
Audience: Both Grad & Undergrad

5. Describe animal models used to study sleep
Audience: Both Grad & Undergrad

6. Describe molecular and genetic approaches to the study of sleep
Audience: Both Grad & Undergrad

7. Recognize how sleep changes across the lifespan
Audience: Both Grad & Undergrad

8. Explain how sleep affects endocrine, metabolic, and cognitive functions

Audience: Both Grad & Undergrad

9. Outline the importance of sleep for the individual and society, including negative consequences of sleep deprivation and sleep disorders
Audience: Both Grad & Undergrad

10. List the symptoms, pathological mechanisms, epidemiology, and treatments of sleep disorders (including insomnia, sleep apnea, central nervous system hypersomnias, circadian rhythm disorders, parasomnias, and sleep-related movement disorders)
Audience: Both Grad & Undergrad

11. Discuss additional very recent studies on sleep topics and learn how to recognize strengths and limitations of these studies relative to prior knowledge on sleep research
Audience: Graduate

12. Describe how to design a sleep experiment and recognize the many confounding factors often associated with sleep studies

NTP 700 – PROFESSIONAL DEVELOPMENT FOR BIOMEDICAL GRADUATE STUDENTS
1 credit.

Provides graduate students with the skills and knowledge necessary to succeed in science. Topics which are covered include choosing a thesis advisor, grant writing, preparing a seminar presentation, etc.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Define the concepts of mentorship, mentor-mentee relationships and choosing a thesis advisor, mentor, and thesis committee members
Audience: Graduate

2. Write compelling publications for peer-reviewed journals, authorship responsibilities
Audience: Graduate

3. Critically evaluate a peer-reviewed scientific article
Audience: Graduate

4. Demonstrate knowledge of the concepts of grant writing, specific aims, preparing a seminar presentation, etc.
Audience: Graduate

5. Participate in various types of research collaborations, team science
Audience: Graduate

6. Provide instruction in the responsible conduct of research (RCR) for students; animal and human subject research and ethics
Audience: Graduate

NTP 701 – EXPERIMENTAL DESIGN AND STATISTICAL METHODOLOGY
1 credit.

Application of the scientific method and experimental design, with a focus on experimental neuroscience. Topics include best practices that underlie robust and unbiased experimental approaches, methods, analyses, data interpretation and transparent reporting of results.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify appropriate experimental designs relevant to contemporary neuroscience research
Audience: Graduate

2. Recognize well-designed, well-controlled experiments
Audience: Graduate

3. Consider experimental design and analysis principles in their own research
Audience: Graduate

4. Describe appropriate quantitative approaches used in a variety of experimental systems
Audience: Graduate

5. Recognize (in)appropriate uses of statistics in neuroscience data analysis, interpreting results, and forming appropriate conclusions
Audience: Graduate

6. Select appropriate application of statistics to neuroscience data in different experimental paradigms
Audience: Graduate

NTP 900 – NEUROSCIENCE SEMINAR: CURRENT TOPICS IN NEUROBIOLOGY
1 credit.

Critical review of selected topics in neurobiology.
Requisites: Declared in Neuroscience graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the breadth of Neuroscience.
Audience: Graduate

2. Present neuroscience research in a seminar setting.
Audience: Graduate

3. Demonstrate ability to critically analyze specific aspects of the topic area.
Audience: Graduate

NTP 990 – RESEARCH AND THESIS
1-12 credits.

Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Exhibit a broad understanding of general Neuroscience principles
Audience: Graduate

2. Conduct independent research using a variety of approaches
Audience: Graduate

3. Demonstrate knowledge by critically addressing research challenges
Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research
Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab
Audience: Graduate

NUCLEAR ENGINEERING (N E)

N E 1 – COOPERATIVE EDUCATION PROGRAM
1 credit.

Apply classroom theory and practical knowledge of engineering-related operations and functions in a professional setting. Full-time workplace experience.
Requisites: Sophomore standing
Course Designation: Workplace - Workplace Experience
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work
Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work
Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise
Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information
Audience: Undergraduate

N E 231 – INTRODUCTION TO NUCLEAR ENGINEERING
3 credits.

Nuclear fission/fusion, medical applications of radiation, radiation safety. Socio-economic topics including environmental justice, community engagement, nuclear policy. Brief history of and controversies in nuclear engineering. Career paths and ethics in engineering, and introduction to professional communication.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how nuclear science and technology are used in our world today
Audience: Undergraduate

2. Identify different career paths in nuclear engineering
Audience: Undergraduate

3. Distinguish the technological and socio-economic context and challenges of nuclear engineering
Audience: Undergraduate

4. Analyze problems in nuclear engineering ethics and arrive at defensible actions
Audience: Undergraduate

5. Produce a deliverable relevant to the class curriculum, designed by a team
Audience: Undergraduate

N E 234 – PRINCIPLES AND PRACTICE OF NUCLEAR REACTOR OPERATIONS
4 credits.

Presents the theoretical and practical information required to understand operation of nuclear reactors. Content includes all subjects which must be known by a person seeking an operating license for the university reactor. Instructors integrate information on similar operations and systems in a nuclear power plant.
Requisites: Declared in Nuclear Engineering
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Solve problems involving radioactive decay, radiation attenuation, neutron activation and the time dependent behavior of reactors
Audience: Undergraduate

2. Describe the units and methods of detecting ionizing radiation, the principles of radiation protection and applicable federal regulations
Audience: Undergraduate

3. Describe reactor components and systems and their relevance to reactor operations
Audience: Undergraduate

4. Manipulate the reactivity controls of a reactor
Audience: Undergraduate

N E 305 – FUNDAMENTALS OF NUCLEAR ENGINEERING
3 credits.

Properties of nuclei, nuclear structure, radioactivity, nuclear reactions, fission, resonance reactions, moderation of neutrons.
Requisites: PHYSICS 205, 241, 244, or 249, or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Solve steady wave mechanics problems beginning from the appropriate form of Schrodinger's equation
Audience: Undergraduate

2. Describe the Semi Empirical Mass Formula as well as the features of the "binding energy/nucleon" curve
Audience: Undergraduate

3. Explain why the "magic numbers" of nuclear physics differ from those of atomic physics
Audience: Undergraduate

4. Explain the correlation between the half-lives for alpha-decay and the Q-value
Audience: Undergraduate

5. Describe the energy spectrum of beta-decay
Audience: Undergraduate

6. List the different absorption mechanism of gamma-rays
Audience: Undergraduate

7. Compare the kinematics of elastic scattering with that of charged particle scattering
Audience: Undergraduate

N E 405 – NUCLEAR REACTOR THEORY
3 credits.

The neutronics behavior of fission reactors, primarily from a theoretical, one-speed perspective. Criticality, fission product poisoning, reactivity control, reactor stability and introductory concepts in fuel management, followed by slowing down and one-speed diffusion theory.
Requisites: N E 305 and (MATH 319, 320, 321, or 375), or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Write neutron balance conditions describing the temporal, spectral and spatial behavior of (neutron) multiplying systems
Audience: Undergraduate

2. Explain how stability issues manifest themselves in choices of reactor design and operation in light water reactors
Audience: Undergraduate

3. Assess whether or not a system containing fissile material is critical
Audience: Undergraduate

4. Estimate the lifetime of a core based on the initial excess reactivity; prescribe control materials for maintaining criticality over the core lifetime
Audience: Undergraduate

5. Solve simple temporal reactor kinetics problems and explain the shape of the reactor power curve
Audience: Undergraduate

6. Solve simple spectral problems and explain the shape of the neutron spectrum in a light water reactor
Audience: Undergraduate

7. Find the spatial neutron distribution and associated power distribution for a given combination of constituent materials using one-group and two-group diffusion theory
Audience: Undergraduate

N E 408 – IONIZING RADIATION
3 credits.

Sources, interactions, and detection of ionizing radiation. Biological effects, shielding, standards of radiation protection.
Requisites: N E 305, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the modes by which uncharged radiation (photons and neutrons) interacts with matter
Audience: Undergraduate

2. Describe how heavy and light charged particles interact with matter
Audience: Undergraduate

3. Determine radiological quantities associated with radiation protection (e.g., exposure, absorbed dose, and dose equivalent) for external sources of radiation (unshielded and shielded)
Audience: Undergraduate

4. Determine committed doses for internal sources of radiation
Audience: Undergraduate

5. Design a shield to protect occupational workers from radiation exposure due to simple photon and neutron sources
Audience: Undergraduate

N E 411 – NUCLEAR REACTOR ENGINEERING
3 credits.

Reactor heat generation and removal; steady- and unsteady-state conduction in reactor elements; single phase, two-phase, and liquid metal cooling, core thermal design.
Requisites: N E 305, M E 361, and (M E 363 and M E 364 or CBE 320) or graduate/professional standing, or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Solve steady-state, coupled conduction and convection heat transfer problems in geometric configurations relevant to nuclear reactors
Audience: Undergraduate

2. Describe the temperature excursion experienced by the fuel during an uncontrolled accident sequence using relevant approximations
Audience: Undergraduate

3. Perform mass, momentum, and energy balances on different reactor components
Audience: Undergraduate

4. Assess the safety margin of different reactor components during normal and off-normal conditions, with reference to the concept of "defense-in-depth"
Audience: Undergraduate

N E 412 – NUCLEAR REACTOR DESIGN
5 credits.

Reactor design projects, reactor hazards, economics.
Requisites: N E 405 and (E P 271 or COMP SCI 300, 302, or 310), or graduate/professional standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply nuclear engineering technical skills in the context of design
Audience: Undergraduate

2. Apply design thinking methodology within engineering design
Audience: Undergraduate

3. Practice quality assurance and documentation
Audience: Undergraduate

4. Build and work within a team, practicing leadership and project management
Audience: Undergraduate

5. Practice managing uncertainty in decision-making. "How do you take risks?"
Audience: Undergraduate

N E/M S & E 423 – NUCLEAR ENGINEERING MATERIALS
3 credits.

Fundamentals of fuel and cladding behavior in terms of thermal properties, chemical behavior and radiation damage.
Requisites: M S & E 350 or 351, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply material science and engineering principles to analyze mass transport, heat transport, corrosion, and mechanical behavior in nuclear fuels and materials
Audience: Undergraduate

2. Assess irradiation induced microstructural change and mechanical property degradation in nuclear materials
Audience: Undergraduate

3. Apply material science and engineering principles to identify material challenges in current and advanced nuclear reactors
Audience: Undergraduate

4. Identify mechanisms and mitigation strategies for critical materials issues in current and advanced nuclear reactors
Audience: Undergraduate

N E 424 – NUCLEAR MATERIALS LABORATORY
1 credit.

Practical application of materials issues for nuclear systems including welding, non-destructive examination, optical microscopy, electron microscopy, to understand radiation damage and corrosion.
Requisites: M S & E 350 or 351, graduate/professional standing, or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Conduct metallographic sample preparation and follow it up with optical and scanning electron microscopy for microstructural characterization and analysis
Audience: Undergraduate

2. Perform hardness and tensile and impact toughness testing of materials to assess their mechanical behavior
Audience: Undergraduate

3. Use the x-ray diffraction technique to determine the crystal structure of materials, identify the phases present, and measure residual stresses
Audience: Undergraduate

4. Perform simulations of ion-material interaction to determine the penetration depth of ions as a function of ion energy, type, and substrate material
Audience: Undergraduate

5. Comprehend the various components and work of the ion beam accelerator
Audience: Undergraduate

6. Describe the operational issues of a nuclear reactor and some of its inner workings
Audience: Undergraduate

7. Identify and address the challenges of radioactive sample handling and characterization
Audience: Undergraduate

N E 427 – NUCLEAR INSTRUMENTATION LABORATORY
2 credits.

Experiments on nuclear instrumentation, counting, data analysis.
Requisites: N E 305 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the operational principles of nuclear radiation detectors in the context of how radiation interacts with matter
Audience: Undergraduate

2. Identify the best choice of detector for a given type of radiation and its limitations
Audience: Undergraduate

3. Operate basic nuclear counting instrumentation: gas-ionized and solid-state detectors, nuclear instrumentation module, power supplies, signal amplifiers, oscilloscopes, and single- and multi-channel analyzers
Audience: Undergraduate

4. Estimate experimental uncertainties in counting measurements and calculate errors associated with quantities derived from such measurements
Audience: Undergraduate

5. Take laboratory notes and prepare clearly written experimental reports
Audience: Undergraduate

N E 428 – NUCLEAR REACTOR LABORATORY
2 credits.

Experiments on reactor operation, flux measurement, measurements of reactor parameters, using pool type reactor.
Requisites: N E 405 and 427, or graduate/professional standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze, through experiment, the time-dependent behavior of reactors in the subcritical state, the critical state and the supercritical state
Audience: Undergraduate

2. Analyze, through experiment, the spatial shape and energy spectrum of neutron fluxes
Audience: Undergraduate

3. Measure neutron and reactor parameters
Audience: Undergraduate

4. Describe the extent to which theory and experiment agree, and what approximations or uncertainty result in deviations between the two
Audience: Undergraduate

N E/M S & E 433 – PRINCIPLES OF CORROSION
3 credits.

Thermodynamics and kinetics of metallic corrosion. The common forms of corrosion and corrosion susceptibility tests. Electrochemical measurement of corrosion rates. Corrosion prevention, economic considerations. High temperature oxidation and sulphidation. Corrosion case histories.
Requisites: M S & E 330, or graduate/professional standing, or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Characterize various modes of corrosion
Audience: Undergraduate

2. Investigate the societal impact of corrosion
Audience: Undergraduate

3. Explore methods of corrosion prevention
Audience: Undergraduate

4. Interpret the thermodynamic and electrochemical basis of corrosion
Audience: Undergraduate

5. Analyze corrosion kinetics using Tafel equations
Audience: Undergraduate

6. Explain principles of high temperature corrosion
Audience: Undergraduate

7. Apply concepts of corrosion to specific technology sectors
Audience: Undergraduate

N E 489 – HONORS IN RESEARCH
1-3 credits.

Undergraduate research and senior honors thesis in nuclear engineering.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2014

N E 505 – NUCLEAR REACTOR ANALYSIS
3 credits.

The neutronics behavior of fission reactors, both from a theoretical and computational multi-group perspective. Multi-group diffusion theory, finite-difference and nodal methods, core heterogeneous effects, pin power reconstruction, thermal neutron spectra, fine group whole spectrum calculations and coarse group constant generation.
Requisites: N E 405, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze the performance of a nuclear fuel assembly throughout its lifetime
Audience: Both Grad & Undergrad

2. Explain and demonstrate the changes in nuclear fuel assembly performance as operational parameters vary
Audience: Both Grad & Undergrad

3. Use an industry-relevant software package to perform lattice calculations for analysis and design of a nuclear fuel assembly
Audience: Both Grad & Undergrad

4. Explain and demonstrate the changes in nuclear fuel assembly performance as design parameters vary
Audience: Both Grad & Undergrad

5. Compare different forms of analysis for the same application
Audience: Graduate

N E/MED PHYS 506 – MONTE CARLO RADIATION TRANSPORT
3 credits.

Use of Monte Carlo technique for applications in nuclear engineering and medical physics. Major theory of Monte Carlo neutral particle transport is discussed. Standard Monte Carlo transport software is used for exercises and projects. Major emphasis is on analysis of real-world problems.
Requisites: N E 305 and (N E 405, N E 408, PHYSICS/B M E/H ONCOL/MED PHYS 501 or N E/MED PHYS 569) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use an industry-relevant software package to perform Monte Carlo radiation transport simulations for analysis of fixed source and/or multiplying systems
Audience: Both Grad & Undergrad

2. Explain how random processes are used to simulate a single particle transport history through an engineering system, including source, streaming and collisions
Audience: Both Grad & Undergrad

3. Explain how the paths of many particle transport histories are combined to provide estimates of engineering results
Audience: Both Grad & Undergrad

4. Analyze the statistical performance of a simulation and suggest ways to improve that performance
Audience: Both Grad & Undergrad

5. Apply Monte Carlo radiation transport to a problem related to your research
Audience: Graduate

N E/M E 520 – TWO-PHASE FLOW AND HEAT TRANSFER
3 credits.

Two-phase flow and heat transfer in engineering systems. Pool boiling and flow boiling. Phenomenological modeling.
Requisites: M E 361 and (M E 364 or CBE 320), or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply physical principles to model two-phase flows, boiling heat transfer, and condensation using analytic and computational techniques
Audience: Both Grad & Undergrad

2. Calculate the critical heat flux on heated surfaces
Audience: Both Grad & Undergrad

3. Calculate the two phase flow pressure drop in pipes
Audience: Both Grad & Undergrad

4. Critically review scientific literature in multiphase flow and heat transfer
Audience: Graduate

N E/E C E/PHYSICS 525 – INTRODUCTION TO PLASMAS
3 credits.

Basic description of plasmas: collective phenomena and sheaths, collisional processes, single particle motions, fluid models, equilibria, waves, electromagnetic properties, instabilities, and introduction to kinetic theory and nonlinear processes. Examples from fusion, astrophysical and materials processing processing plasmas.
Requisites: (E C E 320 or PHYSICS 322), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define the fundamental properties of a plasma and analyze single-particle dynamics.
Audience: Both Grad & Undergrad

2. Formulate and distinguish between fluid models (e.g., two-fluid, Magnetohydrodynamics - MHD) to describe collective plasma behavior.
Audience: Both Grad & Undergrad

3. Analyze plasma waves, equilibria, and instabilities using fluid models.
Audience: Both Grad & Undergrad

4. Apply the kinetic equation for a plasma and explain its relationship to the hierarchy of fluid models.
Audience: Both Grad & Undergrad

5. Select an appropriate physical model to analyze and solve problems in plasma applications.
Audience: Graduate

N E 526 – LABORATORY COURSE IN PLASMAS
3 credits.

Provides a background in the techniques for creating, exciting, and measuring the properties of lab plasmas and using the associated apparatus.
Requisites: PHYSICS/E C E/N E 525 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. List the necessary hardware to generate and measure ultra-high vacuum conditions
Audience: Both Grad & Undergrad

2. Describe the plasma formation process when using a biased electrode or wave-heating
Audience: Both Grad & Undergrad

3. Explain the working principle of Langmuir plasma diagnostics
Audience: Both Grad & Undergrad

4. Perform data analysis in the framework of self-driven and independent research
Audience: Both Grad & Undergrad

5. Prepare a clearly written experimental report
Audience: Both Grad & Undergrad

6. Interpret experimental data based on comparisons with theory and modelling results
Audience: Graduate

N E/E C E/PHYSICS 527 – PLASMA CONFINEMENT AND HEATING
3 credits.

Principles of magnetic confinement and heating of plasmas for controlled thermonuclear fusion: magnetic field structures, single particle orbits, equilibrium, stability, collisions, transport, heating, modeling and diagnostics. Discussion of current leading confinement concepts: tokamaks, tandem mirrors, stellarators, reversed field pinches, etc.
Requisites: E C E/N E/PHYSICS 525, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

N E/E C E 528 – PLASMA PROCESSING AND TECHNOLOGY
3 credits.

Introduction to basic understanding and techniques. Plasma processing of materials for semiconductors, polymers, plasma spray coatings, ion implantation, etching, arcs, extractive metallurgy and welding. Plasma and materials diagnostics.
Requisites: PHYSICS 322 or E C E 320, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021

N E 536 – FEASIBILITY OF FUSION POWER PLANTS BASED ON CONTROLLED NUCLEAR FUSION
3 credits.

Introduction to the main aspects of fusion power plants and the underlying plasma physics. Key design considerations will be summarized related to fusion fuels, resources, plasma physics, plasma-facing materials, magnets, neutronics, shielding, tritium breeding blankets, structural materials, activation, radiation damage, neutral beams, wave heating current drive, safety, and environmental concerns. Focus on magnetic confinement fusion and its near-term and longer-term prospects.
Requisites: N E 305, M S & E 331, E C E 330, M E 364, CBE 320, PHYSICS 322, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Evaluate and compare important characteristics of magnetic fusion energy systems under different configurations
Audience: Both Grad & Undergrad

2. Evaluate the technological performance challenges to the key components of a magnetic fusion energy system
Audience: Both Grad & Undergrad

3. Describe the challenges to the feasibility of magnetic fusion energy
Audience: Both Grad & Undergrad

4. Discuss the role of fusion energy as part of future energy systems, including its economic viability
Audience: Both Grad & Undergrad

5. Evaluate and compare the important characteristics of inertial fusion energy and aneutronic fusion
Audience: Graduate

N E 541 – RADIATION DAMAGE IN METALS
3 credits.

A survey of the nature of point defects, how these defects are produced, how the defects migrate and cluster, and what effects point defects and defect clusters have on the physical and mechanical properties of metals.
Requisites: M S & E 350 or 351, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

N E 545 – MATERIALS DEGRADATION IN ADVANCED NUCLEAR REACTOR ENVIRONMENTS
3 credits.

Overview of materials (cladding and structural materials) used in advanced reactor systems and the associated degradation. Interactions between the advanced nuclear reactor environment and materials. Surface degradation, corrosion, oxidation, dissolution, vaporization, mass transfer, diffusion, and hands-on examples related to advanced reactors.
Requisites: M S & E 350, 351, or 352, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the effects of environmental degradation on structural integrity of material used in advanced nuclear reactors
Audience: Both Grad & Undergrad

2. Identify and describe the mitigation strategies to prevent such degradation
Audience: Both Grad & Undergrad

3. Solve complex problems related to materials degradation using analytical and numerical techniques
Audience: Graduate

N E 550 – ADVANCED NUCLEAR POWER ENGINEERING
3 credits.

Analysis of nuclear systems for the production of useful power. Emphasis: thermodynamic cycles, reactor types, coupling of reactor and power plant, design synthesis, and plant economics.
Requisites: N E 405 and (N E 411 or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify the key features of a range of advanced reactor technologies
Audience: Undergraduate

2. Analyze advanced reactors using theory applicable to multiple technologies
Audience: Undergraduate

3. Describe the design philosophy of advanced reactor technologies and be able to discuss the extent to which each of the reactor design types embodies those principles
Audience: Undergraduate

4. Identify the drivers and goals for advanced reactors and assess critically whether they meet these goals
Audience: Undergraduate

5. Synthesize information from multiple sources to make informed judgements about the relative merits and challenges of the various advanced reactor technologies
Audience: Graduate

N E 555 – NUCLEAR REACTOR DYNAMICS
3 credits.

Basic equations and physical parameters of point reactor kinetics without feedback effects; the nuclear reactor as a total system; reactor excursions, Fuchs-Nordheim and Bethe-Tait models; space-time reactor dynamics; synthesis methods.
Requisites: N E 405, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Determine the behavior of the reactor power due to control element movement in the PRKE 1 group and 6 group models
Audience: Both Grad & Undergrad

2. Examine the behavior of the reactor in the presence of reactivity feedback effects (Resonance behavior, Doppler Broadening, density effects)
Audience: Both Grad & Undergrad

3. Analyze the power and temperature level behaviors due to the rapid injection and sinusoidal inputs of reactivity using the Nordheim-Fuchs models
Audience: Both Grad & Undergrad

4. Analyze the stability of a reactor using the Routh and Nyquist stability criterion and the singe and two temperature models
Audience: Both Grad & Undergrad

5. Examine numerical methods for the solution of the PRKEs and the reactor dynamics equations with feedback
Audience: Both Grad & Undergrad

6. Apply the reactor dynamics equations with feedback to a reactor design
Audience: Graduate

N E/M E 565 – POWER PLANT TECHNOLOGY
3 credits.

Design and performance of power plants for the generation of electric power; fossil, solar, wind, hydro and nuclear fuels, cycle analysis, component design and performance, plant operation, control, economics and environmental impact.
Requisites: M E 361, CBE 310, 320, or CIV ENGR 324, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe how electricity is produced in a power plant
Audience: Both Grad & Undergrad

2. Apply physical principles to model power plants including power output and efficiency
Audience: Both Grad & Undergrad

3. Observe and collect data on current issues and designs associated to power generation
Audience: Both Grad & Undergrad

4. Describe codes and regulations associated with power production, and how power is sold on the market and transmitted to the customer
Audience: Both Grad & Undergrad

5. Critically review scientific literature pertaining to power plant design
Audience: Both Grad & Undergrad

6. Effectively present detailed information regarding operation and maintenance of power plant components
Audience: Graduate

N E/MED PHYS 569 – HEALTH PHYSICS AND BIOLOGICAL EFFECTS
3-4 credits.

Physical and biological aspects of the use of ionizing radiation in industrial and academic institutions; physical principles underlying shielding instrumentation, waste disposal; biological effects of low levels of ionizing radiation.
Requisites: MATH 234 and (PHYSICS 241 or 249), graduate/professional standing, or declared in Medical Physics VISP
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Investigate theoretical concepts that are used in radiation safety practice.
Audience: Both Grad & Undergrad

2. Evaluate the effectiveness of radiation safety practice considering theoretical, economic, political, and societal perspectives.
Audience: Both Grad & Undergrad

3. Consider the ethical consequences of radiation safety regulations.
Audience: Both Grad & Undergrad

4. Integrate knowledge into research and/or clinical work
Audience: Graduate

N E 571 – ECONOMIC AND ENVIRONMENTAL ASPECTS OF NUCLEAR ENERGY
3 credits.

Economics of the nuclear fuel cycle. Economic and environmental impact of the nuclear fuel cycle. Impact on design, plant siting and regulation.
Requisites: N E 405, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize and describe the relationships between different sectors of the nuclear energy industry and nuclear fuel cycle
Audience: Both Grad & Undergrad

2. Perform economic and/or environmental analysis of energy systems
Audience: Both Grad & Undergrad

3. Communicate the results of economic and/or environmental analyses to an audience of peers
Audience: Both Grad & Undergrad

4. Describe the social, economic, and environmental dimensions of nuclear energy
Audience: Both Grad & Undergrad

5. Analyze potential tradeoffs and interrelationships among the social, economic, and environmental dimensions of nuclear energy
Audience: Both Grad & Undergrad

6. Communicate the results of economic and/or environmental analyses to policy-makers
Audience: Graduate

N E/I SY E 574 – METHODS FOR PROBABILISTIC RISK ANALYSIS OF NUCLEAR POWER PLANTS
3 credits.

Methods for risk and reliability analysis of engineered systems, particularly as applied in the nuclear power industry. Fault trees and event trees, Bayesian data analysis, probabilistic risk management. Some familiarity with nuclear plant safety systems is helpful, but not required.
Requisites: (STAT/MATH 309, STAT 311, 224, 324, or STAT/MATH 431), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Correctly apply methods of fault tree, event-tree, data, and uncertainty analysis to evaluate potential risks of engineering systems
Audience: Both Grad & Undergrad

2. Recognize, formulate, and analyze risks of engineered systems
Audience: Both Grad & Undergrad

3. Explain the results of risk analysis to managers and other non-specialist decision-makers
Audience: Graduate

N E 602 – SPECIAL TOPICS IN REACTOR ENGINEERING
0-3 credits.

Special Topics in Reactor Engineering.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

N E 699 – ADVANCED INDEPENDENT STUDY
0-3 credits.

Directed study projects as arranged with instructor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

N E 705 – ADVANCED REACTOR THEORY
3 credits.

The neutron transport equation and its application to the analysis of nuclear reactors. Numerical solution methods, including the multi-group model, one-group equations, energy-averaged constants, discrete ordinates, and Monte Carlo methods. Perturbation theory and variational techniques for practical problems. Knowledge of Nuclear Reactor Theory [such as N E 405] required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Derive and examine the Neutral Particle Transport Equation in the one- group and multi-group approximations
Audience: Graduate

2. Apply the Spherical Harmonics expansion and explain how it leads to the Legendre Polynomial expansion in one-dimension. Examine the P1 approximation and it leads to Diffusion theory. Program the P1 and P3 approximations
Audience: Graduate

3. Derive the Discrete Ordinates numerical approximation in one-dimensional slab coordinates, incorporate the boundary conditions and program the S2 and S8 discrete ordinates approximations. Work through the curvilinear Coordinates
Audience: Graduate

4. Derive the Integral Neutral Particle Transport Equation. Examine the numerical methods for the solution of the discrete integral transport (IT) method and the collision probability (IT) method. Program an IT method
Audience: Graduate

5. Derive and interpret the Adjoint Equation to the Transport Equation
Audience: Graduate

6. Discuss and examine the direct integration method
Audience: Graduate

7. Present a numerical IT method or write a multi-dimensional code based on a method examined and discussed in the course
Audience: Graduate

N E/C&E SOC/I SY E/SOC 708 – SOCIETAL RISK MANAGEMENT OF TECHNOLOGICAL HAZARDS
3 credits.

Issues involved in decision-making regarding technological risks and risk management in areas such as nuclear power, hazardous waste disposal, and pollution control. Risk perception and cognitive biases; risk analysis and decision analysis; political issues in risk management; regulatory mechanisms; and risk communication. Selected case studies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

N E/E C E/PHYSICS 724 – WAVES AND INSTABILITIES IN PLASMAS
3 credits.

Waves in a cold plasma, wave-plasma interactions, waves in a hot plasma, Landau damping, cyclotron damping, magneto-hydrodynamic equilibria and instabilities, microinstabilities, introduction to nonlinear processes, and experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

N E/E C E/PHYSICS 725 – PLASMA KINETIC THEORY AND RADIATION PROCESSES
3 credits.

Coulomb Collisions, Boltzmann equation, Fokker-Planck methods, dynamical friction, neoclassical diffusion, collision operators radiation processes and experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

N E/E C E/PHYSICS 726 – PLASMA MAGNETOHYDRODYNAMICS
3 credits.

MHD equations and validity in hot plasmas; magnetic structure and magnetic flux coordinates; equilibrium in various configurations; stability formulation, energy principle, classification of instabilities; ideal and resistive instability in various configurations, evolution of nonlinear tearing modes; force-free equilibria, helicity, MHD dynamo; experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

N E/E C E/PHYSICS 749 – COHERENT GENERATION AND PARTICLE BEAMS
3 credits.

Fundamental theory and recent advances in coherent radiation charged particle beam sources (microwave to X-ray wavelengths) including free electron lasers, wiggler/wave-particle dynamics, Cerenkov masers, gyrotrons, coherent gain and efficiency, spontaneous emission, beam sources and quality, related accelerator concepts experimental results and applications.
Requisites: E C E 740
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

N E 790 – MASTER'S RESEARCH AND THESIS
1-9 credits.

Directed study projects as arranged with instructor.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

N E 890 – PRE-DISSERTATOR'S RESEARCH
1-9 credits.

Research by the Ph.D. students prior to becoming dissertators.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

N E 903 – SPECIAL TOPICS-PLASMA PHYSICS
0-3 credits.

Special Topics in Plasma Physics. Knowledge of Plasma Physics [such as PHYSICS/E C E/N E 525] required
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

N E/E C E/PHYSICS 922 – SEMINAR IN PLASMA PHYSICS
0-1 credits.

Current topics in plasma physics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

N E 990 – RESEARCH AND THESIS
1-6 credits.

Directed study projects as arranged with instructor.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

N E 999 – ADVANCED INDEPENDENT STUDY
1-3 credits.

Directed study projects as arranged with instructor.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024

NURSING (NURSING)

NURSING/SOC WORK 105 – HEALTH CARE SYSTEMS: INTERDISCIPLINARY APPROACH
2 credits.

Introduction to health care systems. Factors affecting health and the value placed on health, the delivery of health care in different settings, the roles of various health workers, and the sociological and economic aspects of health care.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Discuss selected contemporary problems, issues, and trends in health care services for individuals, groups, and populations from local, regional, and global perspectives.
Audience: Undergraduate

2. Describe and compare the impact of health and medical services, including environmental, behavioral, genetic, and biological factors, on personal and public health.
Audience: Undergraduate

3. Discuss the influences of technological, social, cultural, economic, and political forces on the organization of health care systems and delivery of health care services.
Audience: Undergraduate

4. Critically evaluate similarities and differences in health care systems and service conceptualization, organization, and delivery from national and international perspectives.
Audience: Undergraduate

NURSING 125 – INTRODUCTION TO NURSING
1 credit.

Develop academic and interpersonal skills for success. Introduction to the breadth of careers and educational pathways in the nursing profession.
Requisites: Classified as Pre-Nursing BSN
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and use academic, personal, and professional resources to transition to college
Audience: Undergraduate

2. Analyze the multiple dimensions of social identity and how those dimensions impact one's own and others' experience at UW-Madison and within systems
Audience: Undergraduate

3. Assess skills, interests, and values to make the most of the Pre-Nursing experience and further personal and career goals
Audience: Undergraduate

4. Understand the varied educational paths in nursing and the relationship of nursing to other on-campus majors
Audience: Undergraduate

5. Explore the breadth of nursing career options that may include clinical practice, research, teaching, leadership, and/or policy-making
Audience: Undergraduate

NURSING 299 – INDEPENDENT READING
1-3 credits.

Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

NURSING 313 – FOUNDATIONS OF NURSING PRACTICE
3-4 credits.

Introduces foundational nursing concepts and skills necessary for providing safe, person-centered care across diverse patient populations. Develop proficiency in the nursing process, clinical assessment, and introductory nursing skills. Emphasis is placed on enhancing clinical judgment, critical thinking, and communication skills to ensure effective care delivery. Build confidence in applying skills through hands-on practice.
Requisites: Declared in Nursing (Accelerated or Traditional program) BSN
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate competence in foundational nursing skills.
Audience: Undergraduate

2. Demonstrate competence in performing a clinically relevant, holistic health assessment within a simulated clinical environment.
Audience: Undergraduate

3. Develop clinical judgment by integrating health assessment findings with evidence-based nursing interventions to make informed, patient-centered decisions.
Audience: Undergraduate

4. Understand evidence-based practices and protocols that ensure safety and reduce potential harm to patients.
Audience: Undergraduate

NURSING 314 – ESSENTIALS OF HEALTH PROMOTION, PREVENTION, AND WELLNESS IN PERSON-CENTERED CARE
3 credits.

Introduce foundational concepts in health promotion, prevention, and wellness through the lens of person-centered care. Explore theoretical frameworks and learning methodologies to support clinical decision-making and effective patient engagement. Examine health literacy, social determinants of health, and health disparities, prepare to educate individuals and families in self-care management strategies across the lifespan. Use evidence-based strategies to develop skills in assessing health information literacy, applying multimedia tools in patient education, and fostering personal wellness and resiliency
Requisites: Declared in Nursing (Accelerated or Traditional program) BSN
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Integrate relevant theoretical frameworks and models to guide clinical decision making.
Audience: Undergraduate

2. Describe how theories and methodologies of learning as well as principles of health literacy support self-care and self-management in individuals and families.
Audience: Undergraduate

3. Describe appropriate use of health information literacy assessments and utilize evidence-based strategies to improve patient education and engagement.
Audience: Undergraduate

4. Apply clinical judgment within the nursing process to promote health and prevent disease in partnership with individuals and families.
Audience: Undergraduate

5. Recognize the impact of health disparities and social determinates of health on patient outcomes and health planning.
Audience: Undergraduate

6. Demonstrate a commitment to personal and professional well-being by engaging in healthy self-care behaviors to foster resilience and promote wellness.
Audience: Undergraduate

NURSING 315 – PROFESSIONALISM IN NURSING PRACTICE
1-2 credits.

Focus on professional nursing attributes and interactions essential to professional competence. Study concepts on providing care unique to an individual, family, community, and systems, and to the context in which they live. Concepts related to the health care system are included to provide a foundation for beginning nursing practice. Knowledge from sciences, social studies, and humanities education is integrated into nursing practice and builds foundational knowledge of the science of nursing.
Requisites: Declared in Nursing (Accelerated or Traditional program) BSN
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the historical foundations of nursing and integrate concepts from nursing theories and other disciplines in order to differentiate nursing practice and understand the relationship between the nurse and the individual.
Audience: Undergraduate

2. Develop the foundation for a professional identity, role socialization, and personal values for decision-making in nursing practice.
Audience: Undergraduate

3. Describe principles of advocacy, empathy, and therapeutic relationships to provide patient-centered care and advance health equity.
Audience: Undergraduate

4. Explain how professional communication can foster collaborative relationships among healthcare team members to maintain a culture of civility while informing person-centered care and decision-making.
Audience: Undergraduate

5. Recognize the influence of scope and standards of practice, ethics, and healthcare policies and laws on nursing practice.
Audience: Undergraduate

6. Discuss the nurse's role in evaluating system effectiveness and decision-making to improve healthcare quality and safety, and health outcomes in the delivery of patient care across the continuum of care using evidence and clinical judgment.
Audience: Undergraduate

NURSING 316 – FOUNDATIONS OF NURSING PRACTICE: EXPERIENTIAL LEARNING
3-4 credits.

Delve deeper into psychomotor and assessment skills necessary to provide person-centered, evidence-based nursing care. Experience opportunities to promote wellness and respond to health problems by participating in direct client care in long-term care, community, and acute care settings. Develop confidence with the application of skills and clinical judgment in a simulation lab and through concept-based learning experiences in care settings.
Requisites: NURSING 313 or concurrent enrollment
Course Designation: Workplace - Workplace Experience
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate effective communication and client interviewing skills.
Audience: Undergraduate

2. Integrate basic nursing and assessment skills that are developmentally and culturally appropriate.
Audience: Undergraduate

3. Apply nursing concepts central to practice to establish a caring relationship with the individual and family.
Audience: Undergraduate

4. Understand and begin to apply the clinical judgment model and the nursing process in various settings.
Audience: Undergraduate

5. Demonstrate strategies to promote safe, therapeutic care across practice settings.
Audience: Undergraduate

6. Recognize nursing's unique role and how it connects with other fields, while considering best evidence to build a strong foundation for nursing practice.
Audience: Undergraduate

7. Demonstrate effective use of technology in various practice settings.
Audience: Undergraduate

NURSING 317 – PHARMACOLOGY ESSENTIALS FOR NURSING PRACTICE
2-3 credits.

Introduces the foundational concepts of pharmacology, drug therapy, actions and interactions, and their therapeutic and adverse effects. Major drug classes are paired with health and illness concepts while considering the appropriate client-centered nursing interventions for disease states as they relate to retaining, attaining, or maintaining patients' health status across the lifespan.
Requisites: Declared in Nursing (Accelerated or Traditional program) BSN
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify drug nomenclature, drug classification and their relationship to drug administration and patient safety.
Audience: Undergraduate

2. Demonstrate understanding of the pharmacodynamics, and pharmacokinetics of the of drug classifications used to treat health and illness across the lifespan.
Audience: Undergraduate

3. Identify the legal and ethical guidelines associated with administration of medications in relation to Standards of Nursing Professional Practice.
Audience: Undergraduate

4. Identify relevant assessment data, appropriate goals and plans, and outcome data related to drug therapy for individuals across the lifespan.
Audience: Undergraduate

5. Demonstrate competency in drug dosage calculation and measurement.
Audience: Undergraduate

6. Formulate a teaching plan related to drug administration and desired patient outcomes based on the holistic learning needs of patients, in selected situations.
Audience: Undergraduate

NURSING 318 – PATHOPHYSIOLOGY ESSENTIALS FOR NURSING PRACTICE
3 credits.

Promotes the understanding of altered physiological processes underlying illness and disease. General concepts including etiology, pathogenesis, morphologic changes, and clinical significance are explored from the genetic, molecular, cellular, organ, and systems-levels. Connections between patient symptoms, clinical signs, diagnostics, prognosis, and therapeutic considerations will form the basis for early exposure to clinical reasoning for common acute and chronic diseases across the lifespan.
Requisites: Declared in Nursing (Accelerated or Traditional program) BSN
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Define and apply a vocabulary of medical terms that are important to the language of health and illness.
Audience: Undergraduate

2. Explain the etiology, pathogenesis, morphology, and clinical significance of selected diseases/ disorders by system across the lifespan.
Audience: Undergraduate

3. Develop a foundation of clinical reasoning for illness and disease management by integrating pathophysiology concepts, physical examination findings and pharmacology principles across the lifespan.
Audience: Undergraduate

4. Identify individual choices and environmental exposures that influence disease.
Audience: Undergraduate

NURSING 323 – DEVELOPING CLINICAL JUDGMENT IN NURSING PRACTICE: HEALTH AND ILLNESS CONCEPTS
4 credits.

Introduces patient-centered, holistic nursing care for individuals and families across the lifespan with common health conditions. Using a clinical judgment framework, learn to analyze health data, relate concepts to safe, evidence-based care, and discuss strategies for collaboration with patients, families, and the interprofessional team to promote quality outcomes.
Requisites: NURSING 316
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe principles of holistic, patient-centered nursing care for individuals and families with common health conditions.
Audience: Undergraduate

2. Explain physiological concepts and analyze how their changes affect nursing priorities and evidenced based care.
Audience: Undergraduate

3. Differentiate normal and abnormal findings and link them to appropriate nursing actions.
Audience: Undergraduate

4. Apply clinical judgment to recognize cues, evaluate information, and begin to make nursing judgments about individuals and families with common health conditions.
Audience: Undergraduate

5. Discuss strategies for collaborating with patients, families, and the interprofessional team to promote safe, high-quality outcomes.
Audience: Undergraduate

NURSING 324 – MEETING THE PSYCHOSOCIAL HEALTH NEEDS OF INDIVIDUALS, FAMILIES, AND COMMUNITIES
3 credits.

Prepares to meet the psychosocial health needs of individuals, families, and communities across the lifespan. Explore psychosocial concepts of stress, coping, mood, cognition, and behavior across the health-illness continuum and across practice settings. The human experience of psychosocial health needs is explored in the context of personal attributes, such as genetics, and interpersonal dynamics, such as family and community. Acquire the knowledge, attitudes, and skills needed to collaborate in the treatment and care of client psychosocial health needs.
Requisites: NURSING 314
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Assess individual, family and community psychosocial health needs across the lifespan or developmental stage.
Audience: Undergraduate

2. Assess the impact of stress and coping strategies used by individuals and families across the lifespan in complex care environments and situations.
Audience: Undergraduate

3. Explain how emotional states can influence behaviors, health and illness conditions across the lifespan.
Audience: Undergraduate

4. Prioritize care for individuals and families with mental health conditions and cognitive alterations.
Audience: Undergraduate

5. Analyze maladaptive behavior and its impact on the individual, family and community.
Audience: Undergraduate

6. Formulate the nurse's role in collaboration with members of the health care team to promote optimal psychosocial health and to prevent diseases in individuals, families and communities.
Audience: Undergraduate

NURSING 325 – PROFESSIONALISM IN HEALTH CARE SETTINGS
2 credits.

Focuses on advancing knowledge of professional attributes and core competencies in the role of a nurse and how they are used in complex care settings. Gain an understanding of concepts of leadership, ethics, and advocacy. Broaden your understanding of nursing's role in the health care delivery system regarding quality improvement, care coordination, and palliation.
Requisites: NURSING 315
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Distinguish professional attributes of a nurse including elements of leadership, advocacy, ethics, and use of technology to advance nursing practice.
Audience: Undergraduate

2. Define ethical principles of professional nursing.
Audience: Undergraduate

3. Explain best practices when using technology for health informatics.
Audience: Undergraduate

4. Discuss quality improvement processes to improve health outcomes.
Audience: Undergraduate

5. Understand the nurse's role in care coordination.
Audience: Undergraduate

6. Explain the nurse's role in palliation in complex care settings.
Audience: Undergraduate

7. Discuss how cultural factors influence attitudes and practices of death and dying.
Audience: Undergraduate

NURSING 326 – FOUNDATIONS OF NURSING PRACTICE: EXPERIENTIAL LEARNING II
4 credits.

Builds on psychomotor and assessment skills necessary to provide direct care to individuals and families across the lifespan. Develop clinical judgment, knowledge, communication skills, and professional behavior while providing nursing care that is safe, evidence-based, and patient centered. Experiential learning takes place in simulated and clinical settings.
Requisites: NURSING 316, and NURSING 323 or concurrent enrollment
Course Designation: Workplace - Workplace Experience
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate effective communication and professionalism within the healthcare team.
Audience: Undergraduate

2. Reflect on and evaluate the care provided in clinical settings and identify areas of personal growth and development
Audience: Undergraduate

3. Apply the clinical judgment model and the nursing process to promote health equity and deliver culturally sensitive care in alignment with the needs, goals, and preferences of individuals and families.
Audience: Undergraduate

4. Demonstrate strategies to promote safe, therapeutic care across practice settings while maintaining ethical and professional standards.
Audience: Undergraduate

5. Recognize nursing's distinct role and interconnection with other disciplines while utilizing the best available evidence to improve care outcomes.
Audience: Undergraduate

6. Demonstrate effective use of technology in various practice settings.
Audience: Undergraduate

NURSING 346 – CLINICAL SKILLS PREPARATION: COMPREHENSIVE REVIEW
1-2 credits.

Review clinical skills previously learned and practice applying those skills to clinical scenarios to continue developing clinical judgment.
Requisites: Consent of instructor
Repeatable for Credit: No
Learning Outcomes: 1. Demonstrate competence in foundational nursing skills.
Audience: Undergraduate

2. Demonstrate competence in performing a clinically relevant, holistic health assessment within a simulated clinical environment.
Audience: Undergraduate

3. Develop clinical judgment by integrating health assessment findings with evidence-based nursing interventions to make informed, patient-centered decisions.
Audience: Undergraduate

4. Understand evidence-based practices and protocols that ensure safety and reduce potential harm to patients.
Audience: Undergraduate

5. Model beginning competencies related to professional nursing practice, including clinical judgment, knowledge, communication skills, and professional behavior.
Audience: Undergraduate

NURSING 400 – STUDY ABROAD IN NURSING
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Increase independence, adaptability, and flexibility
Audience: Undergraduate

2. Understand and navigate cultural and geographic differences
Audience: Undergraduate

3. Cultivate and reflect on personal values and assumptions
Audience: Undergraduate

4. Learn about and from the community in which you live and study
Audience: Undergraduate

5. Apply all you've learned abroad to your life at UW-Madison and beyond
Audience: Undergraduate

6. Serve as a cultural and academic ambassador of UW-Madison
Audience: Undergraduate

7. Prepare for success in a globalized, interconnected world
Audience: Undergraduate

8. Articulate how your experience abroad enriches your life and help you meet your goals
Audience: Undergraduate

NURSING 430 – PERINATAL NURSING
2 credits.

Perinatal period: reproductive health, preconception, pregnancy (antepartum), labor and birth (intrapartum), the first 6 weeks after birth (postpartum), and the newborn. Nursing care will focus on health promotion and management for low and high-risk (those with complications) populations. Emphasis on the application of the nursing process, the clinical judgment model, and related core competencies associated with perinatal nursing.
Requisites: NURSING 323 and 326
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Incorporate clinical judgment to identify altered health patterns that could affect reproductive health to determine prioritized nursing care.
Audience: Undergraduate

2. Distinguish between normal and abnormal health findings throughout the perinatal period as well as healthy and high-risk newborns.
Audience: Undergraduate

3. Identify actual or potential health problems during antepartum, intrapartum, postpartum and newborn periods.
Audience: Undergraduate

4. Utilize principles of family-centered care, health promotion, illness and injury prevention, health education, and anticipatory guidance with diverse patients throughout the perinatal phase.
Audience: Undergraduate

5. Explore cultural humility through values and beliefs, concept of time, religious beliefs and practices, family and gender roles and relationships, and beliefs and practices regarding health and illness, including those related to pregnancy and childbirth.
Audience: Undergraduate

6. Utilize evidence-based practice to implement practice changes that will improve perinatal nursing care.
Audience: Undergraduate

7. Examine basic safety design principles used by the interdisciplinary team to reduce the risk of harm to pregnant/birthing persons and newborn patients.
Audience: Undergraduate

8. Recognize the impact of health disparities and social determinants of health on care outcomes for pregnant/birthing persons and newborn patients.
Audience: Undergraduate

NURSING 431 – NURSING CARE OF CHILDREN & THEIR FAMILIES
2 credits.

Foundational knowledge needed to provide equitable, evidence-based nursing care for diverse children and their families. For each developmental level, holistically integrate health promotion, illness and injury prevention, health education, and anticipatory guidance and examines potential disparities, as key components of the nursing role. Emphasis on the application of the nursing process, the clinical judgment model, and related core competencies associated with understanding the pathophysiology of altered health patterns affecting children and the related management of nursing care.
Requisites: NURSING 323 and 326
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Incorporate developmental theories in the nursing care of children.
Audience: Undergraduate

2. Describe modifications to nursing care for different developmental levels for infants through adolescents, including communication, approaches to the history and physical examination, and pharmacotherapy safety.
Audience: Undergraduate

3. Utilize principles of health promotion, illness and injury prevention, health education, and anticipatory guidance and person-centered care with diverse pediatric populations and their families.
Audience: Undergraduate

4. Incorporate clinical judgment and knowledge of the pathophysiology of altered health patterns affecting children to determine prioritized nursing care.
Audience: Undergraduate

5. Integrate best evidence and principles of person- and family-centered care into the delivery of pediatric nursing care in primary, acute/ in-patient, emergency and community settings.
Audience: Undergraduate

6. Describe the roles of the inter#professional healthcare team that contribute to high quality pediatric outcomes.
Audience: Undergraduate

NURSING 432 – POPULATION HEALTH NURSING
2 credits.

Exploration of population health nursing principles and practices, public health partnerships, population health advocacy, community health assessment, and identification of health patterns in populations in local, national, and global settings.
Requisites: (NURSING 323 or concurrent enrollment) and (NURSING 326 or concurrent enrollment)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe principles and practices used by nurses to manage population health.
Audience: Undergraduate

2. Compare and contrast local, regional, national, and global benchmarks to identify health patterns across populations.
Audience: Undergraduate

3. Define a target population and assess its well-being priorities using population health data.
Audience: Undergraduate

4. Develop an action plan to meet a specific community's population health need.
Audience: Undergraduate

5. Identify socio-culturally responsive interventions that reflect and model relevant ethical principles.
Audience: Undergraduate

6. Develop a population health advocacy strategy that applies the clinical judgment model.
Audience: Undergraduate

NURSING 433 – NURSING CARE OF THE OLDER ADULT
2 credits.

Learn to provide high quality, person-centered nursing care to older adults, using current research, evidenced-based guidelines, and foundational content to assess, form nursing diagnoses, and manage the complex health needs of older adults by being able to differentiate between healthy and unhealthy aging, explore social determinants of health, provide for safety and well-being, and consider ethical clinical-decision making in geriatrics.
Requisites: Declared in Nursing or Nursing (Accelerated Program), NURSING 323 or concurrent enrollment, NURSING 326 or concurrent enrollment, and NURSING 327 or concurrent enrollment
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Employ the nursing process to recognize and respond to the complexity of the aging process and its impact on individuals from a biopsychosocial perspective.
Audience: Undergraduate

2. Identify social determinants of health for older adults and resources available to support the health and well-being of special populations that integrate cultural awareness and integrity.
Audience: Undergraduate

3. Synthesize assessment data to recognize and respond to complex geriatric health problems using evidence-based strategies.
Audience: Undergraduate

4. Apply principles of professional nursing ethics and human rights to facilitate shared decision-making based on patient values and goals of care.
Audience: Undergraduate

5. Use current guidelines and valid and reliable assessment tools to prevent problems common in older adults and promote health and well-being.
Audience: Undergraduate

6. Utilize evidence-based strategies to reduce risk and promote safety in the nursing care of older adults.
Audience: Undergraduate

7. Employ best-practices for clear, accurate, and inclusive communication to provide for safe and effective transitions of care across care settings.
Audience: Undergraduate

NURSING 434 – HEALTH AND ILLNESS CONCEPTS WITH INDIVIDUALS, FAMILIES, AND COMMUNITIES
4-5 credits.

Builds on health and illness concepts by focusing on individuals, families, and communities recognizing their unique attributes. Concepts included: acid-base balance, cellular regulation, intracranial regulation, genomics, sexuality and reproduction, and an introduction to the organization of the community/public health system. Other core nursing concepts are revisited as they apply to the community as client or in complex care situations. The nursing process frames learning activities that foster understanding the nursing role in providing evidence-based care to individuals, families across the lifespan, and to communities experiencing related health and illness concerns in collaboration with an interprofessional team.
Requisites: Declared in Nursing or Nursing (Accelerated Program), NURSING 323 or concurrent enrollment, NURSING 326 or concurrent enrollment, and NURSING 327 or concurrent enrollment
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Apply the nursing process to care of the client in community and to the client as a community.
Audience: Undergraduate

2. Understand the foundational features of the public and community health systems.
Audience: Undergraduate

3. Understand normal reproductive health across the lifespan.
Audience: Undergraduate

4. Examine the role of the nurse in caring for clients experiencing common complications of pregnancy and barriers to fertility.
Audience: Undergraduate

5. Evaluate the management of complex health alterations in individuals, families and the community for the concepts of allostasis such as acid base balance, cellular regulation, intracranial regulation, and nutrition.
Audience: Undergraduate

6. Examine the management of complex alterations related to oxygenation and hemostasis and protection and movement, integrating distinct client attributes of individuals, families and the community.
Audience: Undergraduate

NURSING 435 – EVIDENCE-BASED PRACTICE
1 credit.

Designed to develop skills in using evidence to improve nursing practice. Learn strategies to evaluate the quality of evidence and effectively integrate evidence into nursing practice. Learn how practice guidelines are developed, interpreted, and implemented in complex care settings. Learn the significance of engaging partners in evidence-based practice and identify processes to partner with others.
Requisites: NURSING 315 and 325
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Understand how practice guidelines are developed from various sources.
Audience: Undergraduate

2. Critique evidence-based practice guidelines by analyzing their development and applicability for clinical practice.
Audience: Undergraduate

3. Discuss effective approaches for fostering adoption of an evidence-based practice change in healthcare settings including engaging partners in the process.
Audience: Undergraduate

4. Describe how the strength and relevance of available evidence (a) influence the choice of interventions in the provision of patient-centered care and (b) challenge the rationale for routine approaches to care that result in less-than-desired outcomes or adverse events.
Audience: Undergraduate

NURSING 436 – ADVANCED EXPERIENTIAL LEARNING I
1-4 credits.

Provide nursing care for individuals across the lifespan, families, and communities from an evidence-based perspective at an increasingly independent level. Develop nursing clinical judgment through the application of the nursing process and the practice of reflection. Build on previous learning and experiences taught in the companion didactic courses.
Requisites: NURSING 323, 324 and 326
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate an understanding of clinical judgment, the nursing process, health and illness, and person-centered care in experiential practice settings.
Audience: Undergraduate

2. Reflect on the care provided in clinical settings and identify personal growth and development areas.
Audience: Undergraduate

3. Use strategies to promote health equity and culturally congruent care to develop a holistic perspective on caregiving.
Audience: Undergraduate

4. Foster open communication, mutual respect, and shared decision-making with patients, families, communities, and colleagues to enhance quality care and outcomes.
Audience: Undergraduate

5. Practice professionalism and ethical behavior with patients, families, communities, and colleagues through classroom interactions and the care provided.
Audience: Undergraduate

6. Apply acquired knowledge to practice safe patient care and contribute to a culture of patient safety across various settings while complying with healthcare policy and regulations.
Audience: Undergraduate

7. Integrate evidence-based practice (EBP) to inform clinical decision-making, interventions, and patient outcomes.
Audience: Undergraduate

8. Use technology effectively in various healthcare settings.
Audience: Undergraduate

NURSING 437 – SOCIAL JUSTICE IN LOCAL AND GLOBAL SETTINGS
2-3 credits.

Learn principles and practices of social justice related to nursing and health in local and global settings. Concepts include health determinants, diverse populations in complex care settings, health outcomes, and interventions for racial and other underrepresented minorities. Expand the understanding of global health by examining global health systems, health and illness concepts on a global level, partnerships enacted in global settings, and the scope of nursing practice in global health. Provides a facilitated forum to critically reflect on their socially constructed identities and the impact these identities have on health care systems. Designed to develop perspective related to global health and nurses as global health actors invested in improving health of the global population as a whole.
Requisites: NURSING 323
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify their socially constructed identities and how those identities affect their interactions and relationships with individuals, families, and communities across diverse populations.
Audience: Undergraduate

2. Describe and discuss concepts relevant to providing culturally competent and congruent care including health beliefs, social justice, power and privilege, cultural sensitivity, respect, safety, racism and discrimination, cultural conflict, health literacy, worldview, holding knowledge, subculture and vulnerable populations.
Audience: Undergraduate

3. Describe and critique the major constructs of nursing practice models/theories relative to social justice, global health, culturally congruent care, and intersectionality.
Audience: Undergraduate

4. Evaluate the impact of family, cultural, social, educational, economic, environmental, global and determinants on population health using a social ecological model.
Audience: Undergraduate

5. Analyze contemporary local, national, and global health trends and their impact on population health.
Audience: Undergraduate

6. Value principles of partnership when working toward social justice in health in local and global settings.
Audience: Undergraduate

NURSING 438 – INFORMATICS AND HEALTH TECHNOLOGIES FOR NURSING PRACTICE
1 credit.

Broad overview of how digital health, information, and communication technologies and informatics processes are used to provide care, gather data, form information for decision making, and support the expansion of knowledge for professional practice, with an emphasis on key considerations to ensure equitable, safe, high quality and efficient care across the care continuum.
Requisites: Declared in Nursing (Accelerated or Traditional program) BSN
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the variety of information and communication technologies used in the care of patients, communities, and populations
Audience: Undergraduate

2. Discuss how nurses can assess literacy and assist individuals and families to effectively use digital health technologies
Audience: Undergraduate

3. Explain how digital health technologies are used to gather data, create information, and generate knowledge for quality and safe nursing care
Audience: Undergraduate

4. Analyze the use of information, communication, and healthcare technologies in accordance with ethical, legal, professional, regulatory, and workplace policies in the delivery of care in an evolving healthcare landscape
Audience: Undergraduate

5. Explain the importance of nursing engagement in the planning, selection, and adoption of healthcare technologies
Audience: Undergraduate

NURSING 442 – HEALTH SYSTEMS, POLICY, AND ECONOMICS
2 credits.

Learning is centered on health systems, policy, and economics. Expand understanding of core nursing competencies such as safe therapeutic care, and health informatics by examining how these concepts operate at a systems-level to influence care and outcomes. Focus is given to emergency preparedness as enacted in a variety of systems. Key conceptual elements of the healthcare system, organization, policy, financing and law and quality improvement and their impact on care and outcomes are examined.
Requisites: NURSING 434, 435, 436, and 437
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Explain the structure and function of the health system at the local, state, national, and global level.
Audience: Undergraduate

2. Understand organizational theories, structures, and processes, and their applicability in the analysis of clinical care services within the healthcare delivery system.
Audience: Undergraduate

3. Explain principles and practices of emergency-preparedness in selected health systems.
Audience: Undergraduate

4. Outline the role of policy in regard to nurses' role and health outcomes and how nurses can affect policy.
Audience: Undergraduate

5. Identify key trends in the financing of healthcare at national and local levels.
Audience: Undergraduate

6. Explain principles and processes of quality improvement.
Audience: Undergraduate

NURSING 443 – ADVANCING CLINICAL JUDGMENT IN NURSING PRACTICE: COMPLEX HEALTH AND ILLNESS CONCEPTS
4 credits.

Emphasizes patient-centered, holistic nursing care for individuals experiencing complex health conditions in acute care settings. Further development towards mastery of clinical judgment by interpreting data, prioritizing care, and applying evidence-based interventions in collaboration with interprofessional teams to improve outcomes and safety.
Requisites: NURSING 436
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain nursing and scientific principles underlying holistic, patient-centered care for individuals with complex acute health conditions.
Audience: Undergraduate

2. Analyze assessment and diagnostic data to distinguish normal from abnormal findings and prioritize health concerns.
Audience: Undergraduate

3. Describe adaptations in care planning for patients with complex physiological changes, anticipate expected and adverse outcomes, and evaluate evidence-based interventions.
Audience: Undergraduate

4. Discuss strategies for interprofessional collaboration to promote safe, high-quality outcomes for patients in acute care settings.
Audience: Undergraduate

NURSING 444 – HEALTH SYSTEMS, POLICY, ECONOMICS, AND RESEARCH
3 credits.

Expand understanding of core nursing competencies such as safe therapeutic care and health informatics by examining how these concepts operate at a systems-level to influence care and outcomes. Focus is given to emergency preparedness as enacted in a variety of systems. Key conceptual elements of the healthcare system, organization, policy, financing and law, and quality improvement and their impact on care and outcomes are examined. Expand your understanding of scholarship and evidence-based practice by delving into the process of nursing research.
Requisites: NURSING 434, 435, 436, and 437
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Explain the structure and function of the health system at the local, state, national, and global level.
Audience: Undergraduate

2. Understand organizational theories, structures, and processes, and their applicability in the analysis of clinical care services within the healthcare delivery system.
Audience: Undergraduate

3. Explain principles and practices of emergency-preparedness in selected health systems.
Audience: Undergraduate

4. Outline the role of policy in regard to nurses' role and health outcomes and how nurses can affect policy.
Audience: Undergraduate

5. Identify key trends in the financing of healthcare at national and local levels.
Audience: Undergraduate

6. Explain principles and processes of quality improvement.
Audience: Undergraduate

7. Demonstrate knowledge of protection of human subjects in research, including issues related to subject rights, institutional, state, and federal regulations.
Audience: Undergraduate

8. Demonstrate understanding of the nursing research process.
Audience: Undergraduate

9. Demonstrate an understanding of dissemination and use of research for practice improvement.
Audience: Undergraduate

NURSING 445 – TRANSITION TO PRACTICE
1 credit.

Reflect on and synthesize learning across the program while preparing for the NCLEX-RN licensure examination. Demonstrate achievement of program competencies through a comprehensive capstone project that integrates experiences from clinical practice, coursework, and scholarly activities. Align reflections with the AACN Essentials Domains, showcasing readiness for transition to professional practice, forming a professional identity, and developing a personalized plan for lifelong learning and leadership. Ensure licensure exam readiness through targeted review sessions, practice questions, and application of clinical judgment frameworks.
Requisites: NURSING 446 or concurrent enrollment
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Reflect on and synthesize program knowledge and experiences for entry-level readiness to practice as they apply to the current AACN Essentials.
Audience: Undergraduate

2. Apply clinical judgment and critical thinking skills to successfully analyze and respond to NCLEX-style questions and case scenarios, demonstrating readiness for licensure and safe entry-level nursing practice.
Audience: Undergraduate

NURSING 446 – ADVANCED EXPERIENTIAL LEARNING II
4-5 credits.

Provide evidenced-based nursing care for individuals, families, and communities with increasing independence. Advance clinical judgment through the nursing process, critical thinking, and reflection. Develop leadership by fostering collaboration, prioritizing care, and promoting safe teamwork. Build on prior coursework and clinical experiences while integrating concepts from companion didactic courses.
Requisites: NURSING 436
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply clinical judgment, the nursing process, health and illness concepts, and person-centered care with increasing independence in diverse experiential practice settings.
Audience: Undergraduate

2. Analyze care provided in clinical settings to evaluate effectiveness, integrate feedback, and implement strategies for ongoing professional growth and development.
Audience: Undergraduate

3. Promote health equity and deliver culturally sensitive care in alignment with the needs, goals, and preferences of individuals and families.
Audience: Undergraduate

4. Foster open communication, mutual respect, and shared decision-making with patients, families, communities, and colleagues to enhance quality care and outcomes.
Audience: Undergraduate

5. Demonstrate professionalism, ethical behavior, and leadership in interactions with patients, families, communities, and colleagues through classroom and clinical practice.
Audience: Undergraduate

6. Use evidence-based knowledge and clinical judgment to provide safe patient care, support a culture of safety, and ensure compliance with healthcare policies and regulations.
Audience: Undergraduate

7. Integrate evidence-based practice to inform clinical decision-making, interventions, and patient outcomes across diverse settings.
Audience: Undergraduate

8. Use technology effectively in various care settings.
Audience: Undergraduate

NURSING 447 – SCHOLARSHIP FOR EVIDENCE-BASED PRACTICE
2 credits.

Develop skills in using evidence to improve nursing practice. Learn strategies to evaluate the quality of evidence and effectively integrate evidence into nursing practice. Provides knowledge in the research process to inform how nurses can have an impact on client care outcomes.
Requisites: Declared in Nursing (Accelerated or Traditional program) BSN
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of the nurses' role in scholarly practice, including conducting and collaborating on research.
Audience: Undergraduate

2. Evaluate research findings and demonstrate how the strength and relevance of available evidence influence the choice of interventions in the provision of patient-centered care.
Audience: Undergraduate

3. Demonstrate knowledge of protection of human participants in research, including issues related to participant rights, institutional, state and federal regulations.
Audience: Undergraduate

4. Discuss the implications of health equity in research and diversity of research participants.
Audience: Undergraduate

5. Demonstrate a basic understanding of the processes of conducting nursing research.
Audience: Undergraduate

6. Demonstrate an understanding of dissemination and use of research for practice improvement.
Audience: Undergraduate

7. Differentiate among research, evidence-based practice, and quality improvement.
Audience: Undergraduate

NURSING 448 – LEADERSHIP IN THE PROFESSION OF NURSING
2 credits.

Learning is centered on advancing knowledge of professional leadership necessary in healthcare settings. Expand the understanding of core concepts related to ethics and health equity at an organizational and systems level to influence care and outcomes. Broaden the understanding of nursing's leadership role in the healthcare delivery system, emergency preparedness, cost-effectiveness of care, and care coordination.
Requisites: NURSING 314, 323, 324, and 326
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop a capacity for leadership and demonstrate a spirit of inquiry that fosters flexibility and professional maturity.
Audience: Undergraduate

2. Examine the influence of organization-level mission, vision, philosophy, and values statements on the development of a professional nursing practice.
Audience: Undergraduate

3. Incorporate ethical comportment in one's practice that reflects nursing's mission to society and integrates diversity, equity, inclusion, and belonging as core to one's professional identity.
Audience: Undergraduate

4. Examine the nurses' leadership role in care coordination across the continuum of care.
Audience: Undergraduate

5. Explain the principles and practices of preparedness, focusing on the leadership role in care coordination to protect population health during disasters and public health emergencies.
Audience: Undergraduate

6. Appraise the internal and external healthcare system processes through consideration of cost-effectiveness of care.
Audience: Undergraduate

7. Outline the nurses' leadership role in identifying the best evidence to support policy development and proposing modifications based on population findings.
Audience: Undergraduate

NURSING/MEDICINE/PHM PRAC/SOC WORK 467 – INTERPROFESSIONAL COLLABORATIVE PRACTICE IN HIV CARE
1 credit.

Gain foundational knowledge and skills in interprofessional collaborative practice and HIV care. Explore the roles of medicine, nursing, pharmacy, and social work in the HIV care continuum. Discuss quality team-based care as a member of an interprofessional student team.
Requisites: Declared in Nursing BSN (Traditional, Collaborative, Accelerated), Social Work BSW, Medicine MD, Pharmacy PharmD, or Social Work MSW.
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the history and epidemiology of the HIV epidemic.
Audience: Both Grad & Undergrad

2. Define Interprofessional Collaborative Practice (ICP) and describe the characteristics of effective ICP.
Audience: Both Grad & Undergrad

3. Describe the natural history of HIV disease with and without antiretroviral therapy (ART).
Audience: Both Grad & Undergrad

4. Discuss US Dept of Health and Human Services guidelines and recommendations for prevention, screening, diagnosis, treatment, and management of HIV infection and HIV-related diseases in the United States.
Audience: Both Grad & Undergrad

5. Describe the HIV care continuum including testing, entry and retention in care, and treatment including associated stigma and discrimination as barriers.
Audience: Both Grad & Undergrad

6. Discuss dimensions of wellness (emotional, environmental, financial, intellectual, occupational, physical, social and spiritual).
Audience: Both Grad & Undergrad

7. Identify potential co-morbid conditions in the HIV infected population.
Audience: Both Grad & Undergrad

8. Discuss stigma and discrimination as barriers to prevention, care, and treatment.
Audience: Both Grad & Undergrad

9. Discuss the history of the Ryan White Care Act and other federal and state policies and their current importance in HIV prevention and HIV care.
Audience: Both Grad & Undergrad

10. Identify HIV care needs and common health issues among high risk and vulnerable populations.
Audience: Both Grad & Undergrad

11. Develop a plan of care for an HIV positive individual as part of an interprofessional team.
Audience: Both Grad & Undergrad

12. Develop skills working with mixed teams including undergraduate students
Audience: Graduate

13. Demonstrate higher level skills in identifying and resolving barriers to

NURSING 470 – SCHOOL NURSING IN THE CONTEXT OF COMMUNITY HEALTH PRACTICE
2-3 credits.

Theoretical foundation for community health nursing (CHN) applied to school nurse settings. Acquire the theoretical and practical foundations for establishing and maintaining school health nursing services. Content is drawn from nursing and public health sciences and includes topics of health promotion, disease prevention, epidemiology, evidence based practice, ethics, and the role of the CHN. The nursing process is applied with a focus of providing care at the individual through the population level. The ecological model is used to analyze the influence of socioeconomic, environmental, political, and cultural health determinants.
Requisites: Declared in Nursing BSN
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine nursing models, roles and responsibilities for community health nurses with school nursing as an exemplar.
Audience: Undergraduate

2. Apply epidemiological principles to describe and analyze population health issues as they occur in school communities.
Audience: Undergraduate

3. Explore models of community and aggregate assessment.
Audience: Undergraduate

4. Describe community health nursing interventions used at systems, community and individual, levels,focusing on individual health and emergency plans for the management of students' health problems in school settings.
Audience: Undergraduate

5. Analyze evidence-based practice guidelines for community health nursing and school settings.
Audience: Undergraduate

6. Articulate the impact of social, cultural, political, and environmental determinants on individual and population health in school settings.
Audience: Undergraduate

7. Describe the organization, financing, and policies affecting the delivery of community health nursing services as they occur in schools.
Audience: Undergraduate

NURSING 510 – CULTURALLY CONGRUENT PRACTICE
3 credits.

Builds self-awareness, increasing knowledge, and advancing clinical skills needed to provide culturally congruent, person-centered care to patients with diverse backgrounds.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify their socially constructed identities and how those identities affect their interactions and relationships with patients.
Audience: Undergraduate

2. Describe and discuss concepts relevant to providing culturally competent and congruent care including health beliefs, social justice, power and privilege, cultural sensitivity, respect, safety, racism and discrimination, cultural conflict, health literacy, worldview, holding knowledge, subculture and vulnerable populations.
Audience: Undergraduate

3. Describe and critique the major constructs of nursing practice models/theories relative to culturally congruent care.
Audience: Undergraduate

4. Apply constructs of culturally congruent care to clinical practice.
Audience: Undergraduate

NURSING 511 – COMMUNITY SUPPORTS FOR PEOPLE WITH DEMENTIA
2-3 credits.

Provides an introduction to Alzheimer's disease and other dementias, with a focus on community supports for people living with dementia. Work across disciplines to learn how different areas of society can become dementia friendly and how to integrate relevant approaches in their future careers. Participate in a service-learning opportunity where you will work with local dementia-friendly community groups to strengthen supports for people with dementia and their caregivers.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize normal neurobiological aging and neurobiological changes related to cognitive impairment and dementia.
Audience: Undergraduate

2. Apply appropriate skills for interacting with persons affected by dementia and their families/supports.
Audience: Undergraduate

3. Explain the importance of combatting the stigma surrounding dementia and the isolation often experienced by people with dementia and their family.
Audience: Undergraduate

4. Recommend community approaches to increase supports for persons living with dementia and their families/supports.
Audience: Undergraduate

NURSING 512 – FUNCTIONAL HEALTH AND LIFESTYLE PRACTICE
2 credits.

Introduction to the science behind and strategies for wellness based on a functional health approach. Viewing the body as a complex and integrated system and address the root cause of illness or disease rather than treating only presenting symptoms. Disease manifestation stemming from many factors such as genetics, lifestyle and environment. Lifestyle health practices and health coaching strategies for working with clients or patients. View health through a functional health lens, using several strategies to manage and prevent illness.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Describe what it means to view health through a "functional" lens and how this model of care differs from or compliments a more conventional approach to health care.
Audience: Both Grad & Undergrad

2. Evaluate how chronic disease and pain can be addressed using a functional approach to care using diet and lifestyle practices.
Audience: Both Grad & Undergrad

3. Identify and address lifestyle factors that impact health outcomes.
Audience: Both Grad & Undergrad

4. Integrate functional health principles and lifestyle practices into one's overall approach to health and wellness.
Audience: Both Grad & Undergrad

5. Explore health coaching strategies and tools used by practitioners to gather health information and create positive behavior change related to lifestyle practices.
Audience: Both Grad & Undergrad

6. Demonstrate the ability to apply knowledge of functional health principles, lifestyle practices, and health coaching strategies during a health coaching session.
Audience: Graduate

NURSING 513 – INTRODUCTION TO RELAXATION: MIND, BODY, & SPIRIT
2 credits.

Introduction to holistic relaxation concepts related to the body, mind spirit. Examination of the physiology of stress and relaxation, strategies for facilitating wellness and evidence for the same. Experience and reflect upon selected strategies for wellness.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Compare concepts of health promotion, self management, allostasis, and stress.
Audience: Both Grad & Undergrad

2. Describe and recognize common sources for stress, anxiety and anger as well as effective strategies to promote health and maximal function, manage responses to stress, and foster wellbeing: mind, body and spirit.
Audience: Both Grad & Undergrad

3. Implement selected strategies for ones' own wellbeing in body, mind, and spirit.
Audience: Both Grad & Undergrad

4. Appraise whether a change in health status has occurred.
Audience: Graduate

NURSING/L I S 517 – DIGITAL HEALTH: INFORMATION AND TECHNOLOGIES SUPPORTING CONSUMERS AND PATIENTS
3 credits.

Increases student understanding of appropriate and accurate materials for consumer health and family education; the ethical and organizational policy issues that arise when providing consumer and family health information in different settings; the role of the public media in disseminating health information; the health-related information needs and preferences of racial/ethnic minority populations. It also provides an introduction to health information technologies, from search engines to websites to apps, that put people in charge of managing their own health information.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

NURSING 564 – NURSING AND HEALTH INFORMATICS
3 credits.

Identification of computer and information technologies to support nursing in the diagnosis and treatment of human responses to health, illness, and development challenges. Examination of information systems used in clinical practice, information processing challenges and nurses' roles in the evaluation of informatics solutions. Ethical, legal and social issues related to informatics in patient care.
Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2022
Learning Outcomes: 1. Recognize, analyze, and pose solutions for information processing challenges as faced by nurses and other health professionals managing select patients, populations, or groups.
Audience: Undergraduate

2. Identify the current state of development of major areas within nursing and health informatics.
Audience: Undergraduate

3. Demonstrate the conceptual ability and technical skills to develop and execute an evaluation plan involving data extraction from practice information systems and databases.
Audience: Undergraduate

4. Consistent with ethical, legal, and social considerations, devise and evaluate biomedical informatics solutions to the information processing challenges identified.
Audience: Undergraduate

NURSING 590 – CONTEMPORARY PRACTICES IN NURSING
1-4 credits.

Health problems and their nursing management, e.g., critical care nursing, health promotion and prevention of disease, nursing of developmental disabilities.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

NURSING 601 – ADVANCED HEALTH ASSESSMENT
3 credits.

Focuses on developing advanced practice competencies in health assessment as relevant to a selected specialty and practice setting. Become grounded in the theoretical perspectives, empirical documentation, and practice skills necessary for advanced biopsychosocial and physical assessment, critical diagnostic reasoning, clinical decision-making, and communication. Interactions of developmental, biopsychosocial, and cultural contexts resulting in health effects. Demonstrate capacity to provide a full spectrum of healthcare services including health promotion, disease prevention, health protection, anticipatory guidance, counseling, and disease management. Provides a foundation for the advanced practice nurse to evaluate and address the health of individuals.
Requisites: NURSING 704
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Elicit an accurate focused and/or comprehensive health history with attention to the patient's unique perspective and experience.
Audience: Graduate

2. Perform a comprehensive, evidence-based assessment, incorporating all necessary components of physical evaluation. Assessments should be comprehensive but concise, culturally sensitive, and developmentally guided, while demonstrating compassion and accountability.
Audience: Graduate

3. Select basic laboratory and diagnostic testing options and interpret data to augment evidence-based assessment.
Audience: Graduate

4. Formulate a differential diagnosis, based on advanced clinical judgement and analysis of data collected from the health history and physical exam.
Audience: Graduate

5. Identify a probable primary diagnosis and create a patient-centered, evidence-based plan of care that may include diagnostic testing, collaboration, or referral.
Audience: Graduate

6. Document an accurate account of history, physical examination, differential diagnoses, integrative summary, and evidence-based plan of care using effective communication techniques specific to accepted terminology, format, and technology that adheres to the current standards of medical documentation.
Audience: Graduate

7. Develop an appropriate plan of care consistent with the advanced nurse role in the management of common symptoms seen across care settings. The plan of care for the client should incorporate physical, cultural, ethnic, developmental, and population-appropriate variations.
Audience: Graduate

8. Demonstrate professionalism in the advanced practice nursing role, including accountability, teamwork, initiative, self- appraisal, and integrity.
Audience: Graduate

9. Explore the image and role of advanced practice nursing as it integrates advanced assessment, diagnostic reasoning, primary care, rural healthcare, health promotion, and patient education.
Audience: Graduate

NURSING 605 – PHARMACOTHERAPEUTICS FOR ADVANCED PRACTICE NURSES
3 credits.

Pharmacotherapeutics content and application for advanced practice nursing. Emphasis on selection of appropriate therapeutics, development of clinical decision-making skills, and examination of legal, ethical, and safety issues in prescribing medications.
Requisites: Declared in a School of Nursing graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Select appropriate therapeutics for specific acute and chronic health conditions using an evidenced based approach.
Audience: Graduate

2. Develop the clinical decision making skills necessary to individualize prescribing to meet patient's needs and resources.
Audience: Graduate

3. Examine the appropriate rules for issuing safe prescriptions and minimize errors.
Audience: Graduate

4. Describe the legal and ethical ramifications of prescribing medications.
Audience: Graduate

NURSING 657 – CLINICAL PSYCHOPHARMACOLOGY
3 credits.

Examines the history, rationale and mechanism of action of drugs used in the treatment of mental health and behavioral disorders. Emphasis is placed on neurobiological processes underlying psychopathology and clinical application of evidence-based pharmacological interventions across the lifespan. In addition, focus on pharmacokinetics, pharmacodynamics, side-effects, drug interactions, therapeutic monitoring and variations in special populations. Finally, review prescriptive authority, the potential impact of the current mental health care service system and ethical decision making for health care professionals.
Requisites: Declared in Doctor of Nursing Practice or Capstone Certificate in Post-Graduate Psychiatric Nursing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate knowledge and apply principles of pharmacokinetics and pharmacodynamics, including mechanism of action, absorption, distribution, metabolism, and excretion across special populations in a cultural context.
Audience: Graduate

2. Analyze knowledge of basic neurobiology, neurotransmission, and targets of psychopharmacology drug action.
Audience: Graduate

3. Demonstrate knowledge in management of side-effects, drug-interactions, and therapeutic monitoring.
Audience: Graduate

4. Evaluate current research in psychopharmacology relevant to strategies for therapeutic intervention.
Audience: Graduate

5. Apply and appreciate complexity of legal and ethical decision making in application of prescribing practices.
Audience: Graduate

6. Discuss the importance of collaboration and psychoeducation between health care professionals, the patient, families, and community support in the management of pharmacological treatment.
Audience: Graduate

NURSING/PHM PRAC 674 – SEMINARS IN INTERPROFESSIONAL MENTAL HEALTH CARE
2 credits.

Addresses the team-based and patient-centered care of persons with mental health conditions. A special focus will be put on the management of psychotropic medication regimens. A combination of lecture, discussion, and small group work will be utilized.
Requisites: PHM PRAC 555
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Assess an individual person and his/her psychotropic medication regimen to identify potential and actual drug related problems
Audience: Undergraduate

2. Develop and recommend an appropriate therapeutic regimen consisting of both non-drug and drug therapy recommendations to facilitate optimal care and outcomes for an individual person
Audience: Undergraduate

3. Design an appropriate monitoring plan in collaboration with the person you are serving in order to appropriately evaluate the individual person's treatment plan
Audience: Undergraduate

4. Apply evidence-based care to practice by critically reviewing current published clinical research and guidelines
Audience: Undergraduate

5. Support persons in successfully navigating the wider mental health care system
Audience: Undergraduate

6. Apply ethical and legal concepts and processes in the analysis of clinical situations
Audience: Undergraduate

NURSING 679 – NURSING HONORS RESEARCH SEMINAR
2 credits.

Provides the opportunity to learn more about the generation of nursing knowledge and about School of Nursing faculty members' research projects. An introduction to the principles, methods, and ethics of nursing research, strategies to evaluate the quality of research, and the importance of research for improving clinical practice.
Requisites: Declared in the Nursing Honors program
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of protection of human subjects in research, including issues related to subject rights, institutional, state and federal regulations.
Audience: Undergraduate

2. Understand the implications of diversity of research participants/ samples.
Audience: Undergraduate

3. Demonstrate a basic understanding of the processes of conducting nursing research.
Audience: Undergraduate

4. Describe the methodologies used in qualitative and quantitative research.
Audience: Undergraduate

5. Demonstrate knowledge of nursing's role in collaborating and conducting research.
Audience: Undergraduate

6. Demonstrate an understanding of dissemination and use of research for practice improvement.
Audience: Undergraduate

7. Formulate a research question for mentored research project
Audience: Undergraduate

NURSING 681 – SENIOR HONORS THESIS
1-2 credits.

The senior honors thesis is directed experience with selected aspects of the research process. Declared in the Nursing Honors Program
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025

NURSING 682 – SENIOR HONORS THESIS
1-2 credits.

The senior honors thesis is a directed experience with selected aspects of the research process. Declared in the Nursing Honors Program
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

NURSING 698 – DIRECTED STUDY IN NURSING
1-6 credits.

Directed study offers the student an opportunity to work with a faculty member on an individual study program.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

NURSING 699 – DIRECTED STUDY IN NURSING
1-4 credits.

Directed study projects as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

NURSING 702 – HEALTH PROMOTION AND DISEASE PREVENTION IN DIVERSE COMMUNITIES
3 credits.

Best practice approaches to health promotion and disease prevention are explored from their theoretical foundations to clinical applications in diverse populations. Content focuses on the study and synthesis of epidemiologic evidence with emerging social, psychological, and biological science to critically examine and propose evidence-based strategies to improve health outcomes, mitigate risk, and reduce disparities at the population level. Epidemiological principles, levels of prevention, population health theory, infectious disease control, and considerations specific to health equity and ethical health promotion practice in populations will be addressed.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe current responsibilities and practice recommendations for advanced practice nurses and other providers as they relate to disease and injury prevention and health promotion.
Audience: Graduate

2. Interpret epidemiological data as foundational to the assessment of population health, design of interventions, and evaluation of outcomes, services, and care quality.
Audience: Graduate

3. Describe the complex mechanisms by which specific social, cultural, economic, political, and environmental determinants contribute to health outcomes, health-related behaviors, inequities, and disparate outcomes in vulnerable populations.
Audience: Graduate

4. Summarize the theoretical models that inform current understandings of health-related behaviors and health-promotion practice.
Audience: Graduate

5. Critically evaluate health communication for accessibility, accuracy, and cultural relevance.
Audience: Graduate

6. Critically evaluate health promotion and prevention strategies as applied to specific populations for potential effectiveness, unintentional harms or inequities, cultural congruence, and ethical implications.
Audience: Graduate

7. Propose culturally congruent, equitable, and evidence-based strategies to promote or protect the health of specific populations.
Audience: Graduate

NURSING 703 – HEALTH CARE AND PUBLIC POLICY
3 credits.

Provides a comprehensive overview of the U.S. healthcare system and policy-making process at the local, state, and federal levels, as well as an analysis of global health policies in other countries. Key policy issues covered include Medicare, Medicaid, the uninsured, public health, and healthcare reform. Addresses the role of key stakeholders, including policy-makers, interest groups, and the media on the development of health policy, as well as key forces involved in policy-making, including economics, innovation, social, ethical, and political factors. Examine the role and responsibility of nurse leaders and the impact of health policy on nursing practice at the individual, community, and population level.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Compare and contrast the U.S. health policy-making process and outcomes to other developed countries.
Audience: Graduate

2. Critically analyze health policies and related issues from the perspective of consumers, nursing, other health professions, and other stakeholders in policy and public forums.
Audience: Graduate

3. Understand how public policies influence healthcare delivery, including the practice of nursing at the individual, community, and population level.
Audience: Graduate

4. Understand how data and research influence policy decisions.
Audience: Graduate

5. Create advocacy materials and tools in order to promote social justice, equity, and ethical health policies.
Audience: Graduate

NURSING 704 – LEADERSHIP IN ADVANCED PRACTICE NURSING I
3 credits.

Transition and expansion of leadership role for advanced practice. Emphasis on the development of effective, ethical leadership styles; interpretation of legal and professional requirements and regulations; examination of the ethics, values, beliefs, and norms of decision-making in interdisciplinary, collaborative practice.
Requisites: Declared in a Nursing graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine the history of Advanced Practice Nursing within the context of the evolution of the United States health care delivery system, and from the perspective of both nursing and non-nursing professions.
Audience: Graduate

2. Compare and contrast current APRN roles and responsibilities.
Audience: Graduate

3. Explore barriers and opportunities associated with enacting present and future APRN roles, including definitions of scope of practice and legal and financial issues.
Audience: Graduate

4. Understand the major elements of moral philosophy and demonstrate skill in applying these lines of reason to professional situations.
Audience: Graduate

5. Articulate the leadership dimensions of vision, collaboration, advocacy, and activism within the APRN role.
Audience: Graduate

6. Explore and present an area of interest that may be explored as a potential Scholarly Project.
Audience: Graduate

NURSING/MEDICINE/POP HLTH 705 – SEMINAR IN INTERDISCIPLINARY CLINICAL RESEARCH EVIDENCE
2-3 credits.

Exploration of interdisciplinary clinical research questions including strategies for assessing the evidence and methodology for conducting various types of literature reviews. Emphasizes an interdisciplinary perspective.
Requisites: SOC/POP HLTH 797 and STAT/B M I 542
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop an answerable clinical research question.
Audience: Graduate

2. Search relevant scientific literature using several electronic databases and other sources of evidence (published and unpublished) across disciplines.
Audience: Graduate

3. Manage sources of evidence with reference management software.
Audience: Graduate

4. Critically review published clinical research on a chosen topic.
Audience: Graduate

5. Develop a search strategy and conduct a systematic review or other form of evidence review.
Audience: Graduate

6. Present a planned or actual evidence review to interdisciplinary peers.
Audience: Graduate

7. Describe the implications for translation of the proposed evidence review from an interdisciplinary perspective.
Audience: Graduate

NURSING 706 – NURSING RESEARCH
3 credits.

Examines a variety of research methods available to address health care problems and issues in general, and nursing in particular.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Compare and contrast quantitative and qualitative research methods and their utility in answering particular research questions.
Audience: Graduate

2. Demonstrate understanding of the interrelationships among theory, research, and practice in nursing and health science.
Audience: Graduate

3. Understand the research process as developed in both quantitative and qualitative research traditions including: problem identification and definition, review of literature, research methods and design, principles or data collection, issues in sampling, and analysis and interpretation of findings.
Audience: Graduate

4. Critically evaluate research findings from quantitative and qualitative studies in the health sciences.
Audience: Graduate

5. Apply ethical criteria for the protection of human subjects in research.
Audience: Graduate

NURSING 708 – ETHICS FOR ADVANCED PRACTICE IN HEALTH CARE
2 credits.

Emphasis on the exploration of ethical knowledge development with a focus on clarification, analysis and justification relevant to advanced nursing practice; examination and development of learners' moral understanding; and distinguishing between moral and other professional responsibilities.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Critically examine key ethical theories.
Audience: Graduate

2. Compare key assumptions, and engage in reflective thinking about advantages and disadvantages, as well as implications of alternative ethical theories.
Audience: Graduate

3. Apply ethical principles and systematic, sound reasoning to address ethical dilemmas in advanced nursing practice, complex settings, and varied populations.
Audience: Graduate

NURSING 709 – LEADERSHIP FOUNDATIONS: THE DISCIPLINE OF NURSING
2 credits.

Examination of the substantive foundations of the discipline of nursing from a broad range of perspectives and domains of knowledge. The emphasis is on the identification and analysis of phenomena of concern to nursing, scientific and theoretical underpinnings of the discipline, the centrality of health and environment, hallmarks of scholarliness, and nursing leadership and collaboration to actualize the goals of nursing. Provides a foundational knowledge, skills, and attitudes needed for nursing leadership and population health.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Compare and contrast the conceptual/philosophical, scientific, and ethical foundations of the discipline.
Audience: Graduate

2. Identify nursing phenomena of concern relevant to scholarship in advanced nursing practice in systems innovation and leadership or population health.
Audience: Graduate

3. Analyze theoretical foundations of nursing care.
Audience: Graduate

4. Evaluate definitions of scholarship, characteristics of scholars, and strategies for scholarliness in nursing.
Audience: Graduate

5. Identify the relevance of reflection, experience, and nursing leadership in collaboration with other health professions to meet the goals of nursing.
Audience: Graduate

6. Identify opportunities for DNP-educated advanced practice nurses prepared in systems innovations and leadership and population health to develop theoretically-informed practice approaches based on nursing's values and foundations.
Audience: Graduate

NURSING 711 – BUSINESS CONCEPTS IN HEALTHCARE
3 credits.

Designed to prepare nurse leaders to recognize, analyze, and respond to current business concepts (e.g., human resources, legal, regulatory, and accreditation), economic, and financial management topics in healthcare systems. Applies key financial and business concepts to healthcare and examines current issues and trends in healthcare finance, including accounting, budgeting, cost analysis, human resource management, and the regulatory environment. Opportunities to analyze and evaluate the revenue and costs associated with a specific healthcare delivery system at the program- or organizational-level. Utilizes case studies including financial and clinical data to effectively balance the administrative and clinical needs of today's healthcare environment.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand current and emerging concepts and trends in business, including basic accounting, human resource management (HRM), and legal and regulatory standards within healthcare organizations.
Audience: Graduate

2. Articulate the impact of state and federal laws on healthcare systems.
Audience: Graduate

3. Analyze current legal issues in healthcare.
Audience: Graduate

4. Assess the infrastructure and process to achieve regulatory and accreditation standards for a program, service, or healthcare system in area of students focus.
Audience: Graduate

5. Utilize an ethical framework to balance the administrative (economic) and clinical needs within an organization or program.
Audience: Graduate

NURSING 712 – HEALTH SYSTEMS LEADERSHIP AND INNOVATION PRACTICUM I
3 credits.

An opportunity to explore and analyze healthcare systems including practical skills in leading teams. An individualized planned practicum provides an opportunity to explore the leader roles (multiple settings) within the context of an administrative issues. Emphasis is on clinical engagement in management projects requiring critical assessment, design, planning, intervention, and evaluation activities using theoretical models and management tools. The focus is on the advanced systems analysis and design of programs and services within an organization/community setting.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Assess the culture and infrastructure of complex healthcare systems.
Audience: Graduate

2. Evaluate care delivery approaches that meet current and future needs of patient populations.
Audience: Graduate

3. Participate in an interdisciplinary team improving individual, team, and/or organizational outcomes.
Audience: Graduate

4. Apply knowledge of selected concepts, models, and theories from nursing and management sciences to the management of health care resources.
Audience: Graduate

5. Enhance understanding of healthcare systems and leader roles.
Audience: Graduate

6. Describe the standards of care, staffing and performance, and consumer satisfaction influence on leadership and management practices within an organization.
Audience: Graduate

NURSING 713 – HEALTH SYSTEMS LEADERSHIP AND INNOVATION PRACTICUM II
3 credits.

Continue the application of leadership and management skills and role development with a focus on leadership and innovation within complex health settings and across multisector partnerships. Emphasis on clinical engagement in management projects requiring critical assessment, design, planning, intervention, and evaluation activities using theoretical models and management tools to leverage technology and innovation. Focuses on leadership and innovation of programs and services within an organization/community-setting.
Requisites: NURSING 712
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply knowledge of selected concepts, models, and theories from nursing and management sciences to the management of healthcare resources.
Audience: Graduate

2. Critically analyze contemporary challenges and trends within a practice setting, healthcare organization, community, and/or target population.
Audience: Graduate

3. Apply evidence-based research findings from nursing, behavioral, public health, information, and the natural sciences to the management of health care resources for a selected problem or project.
Audience: Graduate

4. Analyze methods and practices of planning, organizing, and evaluating used by health system leaders.
Audience: Graduate

5. Co-lead an interdisciplinary improvement team.
Audience: Graduate

6. Provide leadership in the evaluation and resolution of ethical and legal issues within healthcare systems relating to the use of information, information technology, communication networks, and patient care technology.
Audience: Graduate

7. Apply financial skills in the management of human resource capital.
Audience: Graduate

NURSING 714 – ADVANCED HEALTH SYSTEMS LEADERSHIP AND INNOVATION
3 credits.

Focuses on health innovation and leadership, integrating systems thinking and relevant theories to advance innovation and achieve sustainable change in contemporary health settings. Leaders apply and synthesize theories of leadership, innovation, informatics, and business concepts to complex healthcare issues to improve outcomes. Utilizes current and emerging issues, theories, and case studies to explore attributes of innovative leaders, emerging models of care, innovation models, design and adoption, mergers and affiliations in healthcare, and entrepreneurship.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the importance of evidence-based innovation in healthcare.
Audience: Graduate

2. Compare and contrast leadership theories and models of innovation.
Audience: Graduate

3. Describe characteristics and skills of innovative leaders.
Audience: Graduate

4. Analyze an emerging innovation in healthcare.
Audience: Graduate

5. Analyze the culture and organizational design (infrastructure) of a healthcare system or department to support innovation and quality improvement.
Audience: Graduate

6. Identify strategies to increase the adoption of evidence-based healthcare innovations.
Audience: Graduate

7. Apply the principles of leadership, business, and healthcare economics in the development of a new innovative product, program, or service that will improve the quality of care delivery for a specific population, program, or system.
Audience: Graduate

NURSING 715 – EVALUATION OF HEALTH INFORMATICS SOLUTIONS
3 credits.

Evaluate and appraise health informatics and information technology in order to develop integrative approaches to the design, implementation and evaluation of health informatics solutions and problems. Application of standards, document architecture, decision support systems and heuristic rules and system life-cycle are key areas of focus. People and organization issues for system implementation and evaluation are applied to real data issues to examine privacy, data protection, and institutional responsibilities.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop integrative approaches to design, implementation, and evaluation of health informatics solutions consistent with legal, ethical, and privacy standards.
Audience: Graduate

2. Apply health informatics thinking and problem-solving to analysis, interpretation, and visualization of data.
Audience: Graduate

3. Demonstrate an understanding of how the platform, architecture, and system lifecycle are supported in heath informatics and information technology systems.
Audience: Graduate

4. Evaluate decision support systems and tools to improve clinical and organizational outcomes.
Audience: Graduate

5. Assess how data is processed and transformed to usable information and knowledge for informed decision-making to support clinical health care and systems involved in health care.
Audience: Graduate

NURSING 719 – INDEPENDENT FIELD STUDY IN CLINICAL NURSING
1-6 credits.

Concentrated study and field work in a selected area of clinical nursing.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

NURSING 720 – POPULATION HEALTH PRACTICUM I: WORKING IN THE AGGREGATE
3 credits.

Experiential learning focused on the application of foundational skills and perspectives of advanced population health nursing practice. Provides an opportunity to synthesize, integrate, and apply new knowledge and skills and gain professional experience in population health. Emphasis is on aggregate assessment and evidence-based planning, including critical appraisal of existent data, generation of primary data, community engagement, participatory solution-finding, and the identification of evidence-based strategies to promote and protect health and well-being.
Requisites: NURSING 702 or concurrent enrollment
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Define and describe a population, community, or aggregate as related to a specific health issue.
Audience: Graduate

2. Select appropriate conceptual models, theories, and sources of data to better understand select population health issues or assess the health and well-being of aggregate populations.
Audience: Graduate

3. Select appropriate theoretical models and epidemiological, biostatistical, environmental, and socioeconomic data to assess the health and well-being of specific aggregate populations or to more fully understand select population health issues.
Audience: Graduate

4. Conduct a focused health assessment of a community or complex systems-level health issue, incorporating considerations of equity, ethics, history, and culture. Assessments should include upstream determinants and socioecological contexts, including cultural and political dimensions, inequities, historical trends, and other theoretical concepts as applicable.
Audience: Graduate

5. Engage key stakeholders, prioritize issues, and propose solutions to promote health or address gaps in care through employing collaborative processes, assessment findings, and current evidence.
Audience: Graduate

6. Articulate the value and challenges of community engagement and participatory problem-solving in effective health promotion.
Audience: Graduate

7. Use aggregate assessment findings, collaborative processes, theory, and best practice resources to share findings, prioritize issues, and propose solutions that aim to promote health, prevent illness or injury, improve health behaviors, or address gaps in care.
Audience: Graduate

8. Consistently demonstrate professionalism, insight, clear and effective communication skills, curiosity, and respect for different values, beliefs and practices.
Audience: Graduate

NURSING 721 – POPULATION HEALTH PRACTICUM II: COMMUNITY ACTION AND COLLECTIVE IMPACT
3 credits.

Fosters advanced practice competencies and deeper understandings of collaborative practice in population health. Employ structured systems thinking, stakeholder engagement, and interdisciplinary leadership to investigate and address complex issues in population health. Advanced practice competencies to be developed include: structured approaches to systems thinking, community engagement, collaborative leadership, responsive communication, teamwork, multidisciplinary program planning, cross-sector collaboration, and collective impact.
Requisites: NURSING 720 and 723
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply structured systems thinking processes to complex population health issues and collaborative approaches to practice.
Audience: Graduate

2. Examine current models, frameworks, and principles of interprofessional and crosssector collaboration in population health practice.
Audience: Graduate

3. Employ principles of collaborative leadership, collective goal-setting, teamwork, and responsive communication in interdisciplinary and cross-sector efforts to promote population health.
Audience: Graduate

4. Use participatory planning strategies to prioritize the needs and experience of clients and respect the mission and resources of collaborative partners.
Audience: Graduate

5. Integrate ethical reasoning, empathic perspective-taking, and sensitivity to culture, historical context, and power in all aspects of population health practice.
Audience: Graduate

6. Consistently demonstrate professionalism, insight, clear and effective communication skills, curiosity, and respect for different values, beliefs and practices.
Audience: Graduate

NURSING 722 – ADVANCED PRACTICE NURSING THEORY: ADULTS AND OLDER ADULTS
3 credits.

Examine theoretical perspectives and evidence-based approaches to human responses to health and illness during adulthood and old age. Concepts and research from multiple disciplines will be examined as a framework for reflective practice with adults.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine diverse theoretical perspectives on health and illness in adulthood and old age.
Audience: Graduate

2. Analyze empirical evidence for selected theoretical perspectives related to health and illness in adults and examine age, gender, and cultural differences.
Audience: Graduate

3. Evaluate the theoretical and empirical underpinnings of nursing assessments and interventions with adults.
Audience: Graduate

4. Determine best evidence for advanced nursing practice in a selected area.
Audience: Graduate

NURSING 723 – POPULATION HEALTH THEORY AND METHODS SEMINAR I: CONTEMPORARY ISSUES & POPULATION HEALTH ETHICS
2 credits.

Introduction to the foundational concepts, core functions, and professional values of advanced population health nursing. Contemporary issues in population health will be used to explore and integrate the epidemiological science, theoretical constructs, ethical considerations, and best practice strategies that underlie sound practice.
Requisites: NURSING 702
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the unique perspectives, priorities, and conceptual frameworks and theories that guide advanced population health practice.
Audience: Graduate

2. Contrast ethical deliberations within biomedical research or individual healthcare practice with ethical decision-making in population health.
Audience: Graduate

3. Appraise the potential impacts, shortcomings, and ethical implications of typical approaches to population-level health promotion (health education, social marketing, clinical intervention, environmental or infrastructure changes, policy development and enforcement).
Audience: Graduate

4. Examine the social, historical, economic, environmental, and political forces, as well as the biological and cognitive processes, that shape individual behaviors and health outcomes, as well as the health and well-being of populations.
Audience: Graduate

5. Apply socioecological, physiological, behavioral, and developmental perspectives to select population health issues.
Audience: Graduate

6. Critically consider individual characteristics, upstream determinants, and other drivers of select population health issues to identify areas of opportunity and propose ethical strategies to mitigate risk, address inequities, and promote health and well-being.
Audience: Graduate

7. Discern common challenges to evidence-based practice and decision-making in population health.
Audience: Graduate

NURSING 724 – POP HEALTH THEORY & METHODS SEMINAR II: INTERDIS PRACTICE, COLLECTIVE IMPACT & COALITION BUILDING
2 credits.

Builds on existing practice knowledge and skills with concepts from systems thinking, complex problem-solving, interdisciplinary collaboration, community engagement, coalition-building, and collective impact. Explorations of "wicked" problems in population health will challenge you to consider novel partnerships, shared decision-making, and innovative, multifaceted approaches to practice.
Requisites: NURSING 721 or concurrent enrollment
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Appraise the advantages, shortcomings, and ethical implications of targeted, top-down, or bottom-up approaches to address complex problems in population health practice.
Audience: Graduate

2. Evaluate structured systems-thinking methods as strategies to better understand complex population health problems, as well as the diverse perspectives, priorities, and needs of impacted community members and interprofessional stakeholders.
Audience: Graduate

3. Engage in design-thinking with key stakeholders to learn from their perspective and propose community-centered solutions to complex challenges in population health.
Audience: Graduate

4. Identify basic concepts of effective teamwork, interprofessional ethics, and professionalism as an underpinning of collaborative population health practice.
Audience: Graduate

5. Anticipate potential ethical implications and unintended consequences of decision-making, policy-development, or resource allocation in addressing complex population health problems.
Audience: Graduate

6. Differentiate between collaboration, coalition-building, and collective impact as strategies to address complex population health challenges.
Audience: Graduate

NURSING 725 – POPULATION HEALTH THEORY AND METHODS SEMINAR III: EMERGING ISSUES AND SPECIALIZED ROLES
2 credits.

Explore specialized roles, emerging issues, and current priorities in advanced population health nursing. Analyze novel and emergent population health challenges within context, and consider the unique knowledge, skills, and philosophies that prepared nurses can bring to solution-seeking and interdisciplinary efforts to promote or safeguard population health.
Requisites: NURSING 724
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Investigate professional opportunities and organizations for nurses with advanced population health knowledge and skills.
Audience: Graduate

2. Examine socioecological, political, behavioral, environmental, structural, or biological trends that underlie emerging issues in population health and inform potential solutions.
Audience: Graduate

3. Apply an evidence-based and evaluative approach to examine current public health problems and formulate solutions.
Audience: Graduate

4. Explore emerging priorities and novel issues in population health and discuss the unique potential of advanced practice nurses in seeking solutions and promoting health.
Audience: Graduate

5. Appraise the relevance and value of advanced nursing knowledge, experience, and skills in interdisciplinary efforts to promote or safeguard the health of select populations.
Audience: Graduate

6. Propose innovative opportunities for advanced practice nurses to work independently or with others to promote population health across sectors and the health care continuum.
Audience: Graduate

NURSING 726 – FOUNDATIONS FOR APN CLINICAL PRACTICE I
3 credits.

Designed to advance knowledge for clinical decision making. Health promotion, illness prevention and common health conditions are emphasized.
Requisites: NURSING 601, 605 (or PHM PRAC 605 prior to Fall 2026), 811, and concurrent enrollment in NURSING 728
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Apply advanced assessment skills, risk analysis and reduction, screening, and disease detection strategies into the health management plan.
Audience: Graduate

2. Incorporate primary, secondary and tertiary prevention strategies in the clinical management of a patient's wellness and health care needs.
Audience: Graduate

3. Integrate and evaluate evidence-based interventions and clinical guidelines into patient health promotion, disease prevention, and illness management plans.
Audience: Graduate

4. Identify and use appropriate counseling and education strategies to promote positive lifestyle and behavior changes.
Audience: Graduate

5. Incorporate advanced physiological, pathophysiological, pharmacologic and psychosocial concepts and principles into the clinical management plan of common and complex health problems.
Audience: Graduate

6. Develop clinical management plans that are culturally congruent and reflect patients and family beliefs and value systems across the lifespan.
Audience: Graduate

NURSING 727 – FOUNDATIONS FOR APN CLINICAL PRACTICE II
3 credits.

Designed to advance knowledge for clinical decision-making. Complex and chronic health conditions are emphasized while continuing to promote health maintenance within the context of existing health problems.
Requisites: NURSING 726, 728, and concurrent enrollment in NURSING 729
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate strategies of risk analysis and reduction, screening and disease detection.
Audience: Graduate

2. Refine primary, secondary and tertiary prevention strategies into the clinical management of a patient's wellness and health care needs.
Audience: Graduate

3. Analyze and integrate evidence-based interventions and clinical guidelines in patient health promotion, disease prevention, and illness management plans.
Audience: Graduate

4. Initiate and evaluate appropriate counseling and patient education strategies to assist patients to make positive lifestyle and behavioral changes.
Audience: Graduate

5. Apply advanced physiological, pathophysiological, pharmacologic and psychosocial concepts and principles into the clinical management of common and complex health problems across a variety of settings.
Audience: Graduate

6. Collaborate with individuals and families to implement clinical management plans that are culturally congruent and reflect patient and family beliefs and value systems across the lifespan.
Audience: Graduate

7. Analyze patient data and develop individualized management plans based on current evidence and appropriate resources.
Audience: Graduate

NURSING 728 – ADVANCED PRACTICE CLINICAL APPLICATION AND ROLE DEVELOPMENT I
1-4 credits.

Supervised clinical practicum focuses on the continued development and application of advanced health promotion, assessment and clinical management skills within the context of chronic illness and complex health issues.
Requisites: Concurrent enrollment in NURSING 726
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Formulate initial conceptualization of the APN role within the context of clinical practice.
Audience: Graduate

2. Employ a comprehensive and systematic health assessment for common clinical situations, incorporating diverse and culturally congruent approaches.
Audience: Graduate

3. Utilize clinical decision making process to identify and prioritize client health issues.
Audience: Graduate

4. Demonstrate application of health promotion, disease prevention and health behavior change principles to provide education and health counseling to clients.
Audience: Graduate

5. Develop therapeutic relationships with clients and families and formulate inter-professional partnerships to facilitate optimal care and patient outcomes.
Audience: Graduate

6. Select and implement therapeutic interventions based on current evidence and appropriate practice guidelines.
Audience: Graduate

7. Demonstrate accurate documentation of client encounters.
Audience: Graduate

NURSING 729 – ADVANCED PRACTICE CLINICAL APPLICATION AND ROLE DEVELOPMENT II
1-4 credits.

Supervised clinical practicum focuses on the continued development and application of advanced health promotion, assessment and clinical management skills within the context of chronic illness and complex health issues.
Requisites: Concurrent enrollment in NURSING 727
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate developing Advanced Practice Nursing role within the context of health care systems.
Audience: Graduate

2. Employ a comprehensive and systematic health assessment for complex or chronic health conditions, incorporating diverse/culturally congruent approaches.
Audience: Graduate

3. Utilize clinical decision making process and clinical judgment to identify and prioritize client and population health issues.
Audience: Graduate

4. Tailor application of principles of health promotion, disease prevention, and health behavior change to provide education and health counseling to clients.
Audience: Graduate

5. Develop therapeutic relationships with clients and their families and utilize inter-professional partnerships to facilitate optimal care and patient outcomes.
Audience: Graduate

6. Initiate, evaluate, and modify evidence-based therapeutic interventions based on current evidence, appropriate practice guidelines, and client goals, lifestyle and cultural beliefs.
Audience: Graduate

7. Utilize advanced communication and documentation skills to enhance care delivery.
Audience: Graduate

NURSING 730 – CRITICAL SOCIAL THEORIES IN POPULATION HEALTH
2 credits.

Examines the application of critical social theories in population health promotion when intersectionality, bias, and social inequities are social determinants of population health disparities. Intended to provide an opportunity to apply critical social theories to long-standing population health disparities and contemporary social health problems such as despair, homelessness, and loneliness. Emphasis on the appraisal of intersectionality, bias, and inequities in previous, present, or potential population health promotion strategies to eliminate health disparities.
Requisites: NURSING 723 or concurrent enrollment
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply definitions and descriptions of population, community, and aggregate to specific social health determinants.
Audience: Graduate

2. Explain the value, limitations, and applicability of critical social theories in population health.
Audience: Graduate

3. Select and apply appropriate critical social theories to a specific population, population health promotion program, or population health promotion policy.
Audience: Graduate

4. Write a focused population health assessment of a community that includes the community's social ecology.
Audience: Graduate

5. Apply critical social theory in a policy or program proposal to eliminate a specific population health disparity.
Audience: Graduate

6. Consistently demonstrates professionalism, insight, clear and effective communication skills, curiosity, and respect for different values, beliefs, and practices.
Audience: Graduate

NURSING 736 – PEDIATRIC ASSESSMENT FOR MENTAL HEALTH ADVANCED PRACTICE NURSES
1 credit.

Advance students' knowledge of pediatric development to enhance clinical decision-making with emphasis on applying advanced assessment skills to the child and adolescent population.
Requisites: Declared Post-Graduate Psychiatric Mental Health Nursing Capstone Certificate or (NURSING 601, 605 or PHM PRAC 605 prior to Fall 2026, and 811)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2023
Learning Outcomes: 1. Apply advanced health assessment skills to the child and adolescent population
Audience: Graduate

2. Evaluate varied child development theories
Audience: Graduate

3. Identify how various types of trauma impact normative developmental processes in children and adolescents
Audience: Graduate

NURSING 741 – ADVANCED PRACTICE NURSING THEORY: FAMILY PROCESS & CHILD DEVELOPMENT
3 credits.

Analyzes selected family and child development theories and research that inform advanced practice nursing. Applies these concepts to assess child and family needs, enhance the parent-child relationship, and develop family-centered, culturally responsive interventions in health and illness.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the nature of a family-centered, culturally responsive approach to health care.
Audience: Graduate

2. Identify changing trends in family structure, parenting practices, and health-illness patterns as well as their implications for practice and research.
Audience: Graduate

3. Gain insights about family dynamics, the bidirectional influence of relationshipswithin families, and the impact of developmental transitions, culture and illness on these relationships.
Audience: Graduate

4. Analyze and apply family theories to practice and inform interventions that enhance the quality of parent-child relationships.
Audience: Graduate

5. Analyze theories of child development and related research, and the relevance ofthese to providing developmental guidance in the advanced practice of nursing with children/parents.
Audience: Graduate

6. Describe the contribution of individual differences, such as temperament and coping style, to family interactions and functioning.
Audience: Graduate

7. Evaluate specific child development and family research studies.
Audience: Graduate

8. Formulate a framework for child and family assessment for a specific family or population of families managing a normative or situational transition or a health/illness situation.
Audience: Graduate

NURSING/PHM PRAC/SOC WORK 746 – INTERDISCIPLINARY CARE OF CHILDREN WITH SPECIAL HEALTH CARE NEEDS
3 credits.

Interdisciplinary team care of children with special health care needs across the trajectory of illness presented within the context of family, culture, social determinants of health, community, and healthcare policy. Students introduced to interdisciplinary, collaborative, family-centered team care.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the interdisciplinary team approach to the care of the child with a chronic illness from the perspective of a child with a chronic illness and their family, community care providers, and each of the disciplines involved, including the student's own.
Audience: Graduate

2. Demonstrate an understanding of issues relating to larger social and cultural context for the care of children with chronic illness.
Audience: Graduate

3. Identify and assess healthcare delivery systems and financing for children with chronic illness.
Audience: Graduate

4. Describe ways to advocate for pediatric patients with chronic disease and their families at an individual level and a policy level.
Audience: Graduate

NURSING 751 – ADVANCED PRACTICE NURSING THEORY: PSYCHIATRIC MENTAL HEALTH
3 credits.

Analysis and integration of selected theories and models in psychotherapy, neuroscience, mental health, psychiatric disorders, and advanced psychiatric mental health nursing in complex care settings with diverse patients, communities, and populations.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Effectively analyze and integrate into practice major theories/models of psychotherapy, neuroscience, mental health care, psychiatric disorders, and advanced practice psychiatric mental health nursing.
Audience: Graduate

2. Analyze the implications of how implementation of various theoretical frameworks impact policies, programs, and practices on various populations (e.g. children/adolescents, women, survivors) living with psychiatric mental health disorders and/or psychosocial stress.
Audience: Graduate

3. Apply theory-based frameworks to guide advanced practice psychiatric mental health nursing practice.
Audience: Graduate

NURSING 761 – HEALTH PROGRAM PLANNING, EVALUATION, AND QUALITY IMPROVEMENT
3 credits.

Provides content in theory, concepts, and methods of program planning and evaluation in the context of health care and community health organizations. Provides basic concept related to designing and implementing health services quality improvement projects.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine the critical elements of quality process improvement history, methods, and practice.
Audience: Graduate

2. Apply basic quality improvement methodologies to a process in a health care or community health organization.
Audience: Graduate

3. Examine the critical elements of health program planning and evaluation models.
Audience: Graduate

4. Analyze strengths and weaknesses of proposed health programs.
Audience: Graduate

5. Construct a program plan that demonstrates ability to conduct needs assessment, create measurable objectives, design interventions, develop a budget, and conduct process and outcomes evaluation.
Audience: Graduate

6. Develop and apply strategies to work collaboratively in small groups.
Audience: Graduate

NURSING 764 – NURSING AND HEALTH INFORMATICS
3 credits.

Application of computer and information technologies to support nursing in the diagnosis and treatment of human responses to health, illness, and developmental challenges. Identification of information processing challenges and evaluation of informatics solutions. Ethical, legal and social issues related to informatics in patient care.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recognize, analyze, and pose solutions for information processing challenges as faced by nurses and other health professionals managing select patients, populations, or groups.
Audience: Graduate

2. Identify the current state of development of major areas within nursing and health informatics.
Audience: Graduate

3. Demonstrate the conceptual ability and technical skills to develop and execute an evaluation plan involving data extraction from practice information systems and databases.
Audience: Graduate

4. Consistent with ethical, legal, and social considerations, devise and evaluate biomedical informatics solutions to the information processing challenges identified.
Audience: Graduate

NURSING/LAW 768 – HEALTH JUSTICE CLINIC
1-7 credits.

Interdisciplinary health advocacy clinic providing broad individual and system advocacy for patients facing life changing health events. Advocacy topics include: medical decision-making, insurance, medical debt, disability and related policies and laws.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and describe personal values and beliefs related to patient advocacy.
Audience: Graduate

2. Identify how racism, sexism, homophobia, transphobia, ablism and other forms of oppression impact clients and the delivery of health care in the US.
Audience: Graduate

3. Communicate effectively in writing and in conversation to a range of audiences including patients.
Audience: Graduate

4. Recognize opportunities for advocacy in individual client situations.
Audience: Graduate

5. Design effective advocacy plans to address client needs.
Audience: Graduate

6. Recognize ethical dilemmas and develop informed plans for ethical practice.
Audience: Graduate

NURSING 772 – LEADERSHIP AND ORGANIZATIONAL DECISION-MAKING IN HEALTH CARE
3 credits.

Provides healthcare leaders with the knowledge, skills, and competencies to improve patient, organization and health system outcomes. Effective organizational and systems leadership will help to eliminate health disparities and promote patient safety and excellence in practice. Includes the analysis, integration, and application of principles of leadership and management to healthcare organizations and to population-based efforts across the healthcare delivery system including a basic introduction to finance. Emphasis is placed on the practical skills needed to succeed as leaders in today's complex environments.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Able to formulate and communicate a vision as a leader.
Audience: Graduate

2. Apply leadership and organizational theories to healthcare systems.
Audience: Graduate

3. Assess organizational culture and infrastructure of a healthcare organization or department.
Audience: Graduate

4. Utilize knowledge of organizational culture in planning and delivery of healthcare programs and services.
Audience: Graduate

5. Evaluate healthcare delivery systems to meet current and future needs of specified populations with a focus on process and outcomes.
Audience: Graduate

6. Discuss the principles of team science and team dynamics in healthcare.
Audience: Graduate

7. Demonstrate effective leadership communication incorporating interprofessional communication practices.
Audience: Graduate

8. Employ principles of accounting, finance, and strategic planning in the development of a business plan for a new program or service.
Audience: Graduate

NURSING 784 – TEACHING AND LEARNING STRATEGIES FOR CLINICAL AND SIMULATION ENVIRONMENTS IN HEALTHCARE PROFESSIONS
3 credits.

Integrates teaching and learning theories and evidence-based strategies for educating undergraduate and graduate health professions students in clinical and simulation environments. Provides principles, models, and processes to plan, implement and evaluate teaching and learning experiences through curated readings, activities, and self-reflection. Applies strategies such as the integration of personal attributes and teaching style, use of technology, and a student-centered approach to develop optimal teaching practices.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate understanding of selected teaching and learning theories and their applications to a diverse student body.
Audience: Graduate

2. Integrate technology, innovative active learning strategies, and interprofessional education to create student-centered learning activities in the clinical and simulation environment.
Audience: Graduate

3. Construct a plan for assessment of individual student learning outcomes related to clinical and simulation environments.
Audience: Graduate

4. Develop a plan for evaluation of aggregate student and course outcomes related to clinical and simulation-related experiences.
Audience: Graduate

5. Summarize best practices for creating an inclusive and supportive learning environment.
Audience: Graduate

6. Apply strategies to manage the learning environment and support individual student needs.
Audience: Graduate

NURSING 785 – FOUNDATIONS OF CURRICULUM DEVELOPMENT AND EVALUATION FOR HEALTHCARE PROFESSIONS
3 credits.

Develop an understanding of higher education curriculum rooted in the healthcare professions. Undergraduate and graduate level program structures are examined, including traditional and innovative designs. Processes of curriculum development, including needs assessment, implementation, evaluation, and outcomes assessment that provide the foundation for course scope and content inclusion. Guiding conceptual frameworks and underlying philosophical, political, and professional issues that impact curriculum development and change are examined. Current issues relevant to curriculum.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine the processes of curriculum development.
Audience: Graduate

2. Analyze the components of a curriculum.
Audience: Graduate

3. Assess the impact of current trends and themes in healthcare professions education, including professional and societal issues, and the impact on curriculum development and delivery.
Audience: Graduate

4. Compare and contrast undergraduate and graduate level program structures, both traditional and innovative, in healthcare professions and their implications for practice.
Audience: Graduate

5. Design key elements of a curriculum, including framework and outcomes.
Audience: Graduate

NURSING 786 – TEACHING AND LEARNING STRATEGIES FOR THE CLASSROOM AND ONLINE ENVIRONMENTS IN HEALTHCARE PROFESSIONS
3 credits.

Integrates teaching and learning theories and evidence-based strategies for educating undergraduate and graduate health professions students in classroom and online environments. Provides principles, models, and processes to plan, implement and evaluate teaching and learning experiences through curated readings, activities, and self-reflection. Apply strategies such as the integration of personal attributes and teaching style, use of technology, and a student-centered approach to develop optimal teaching practices.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate understanding of selected teaching and learning theories and their applications to a diverse student body.
Audience: Graduate

2. Integrate technology, innovative active learning strategies, and interprofessional education to create student-centered learning activities in the clinical and simulation environment.
Audience: Graduate

3. Construct a plan for assessment of individual student learning outcomes related to clinical and simulation environments.
Audience: Graduate

4. Develop a plan for evaluation of aggregate student and course outcomes related to clinical and simulation-related experiences.
Audience: Graduate

5. Summarize best practices for creating an inclusive and supportive learning environment.
Audience: Graduate

6. Apply strategies to manage the learning environment and support individual student needs
Audience: Graduate

NURSING 787 – TEACHING AND LEARNING IN HEALTHCARE PROFESSIONS PRACTICUM
3 credits.

Immersive and comprehensive experience designed to prepare healthcare professional students for roles as effective educators. Dynamic blend of theoretical coursework, experiential hands-on teaching, and educational experiences to grow expertise in curriculum development, inclusive instructional design, and assessment strategies. Through collaboration with experienced preceptors, refine pedagogical skills, fostering an understanding of diverse learning styles and effective communication in the healthcare education context. Emphasis will be placed on evidence-based teaching methods, utilization of the latest technologies and innovative approaches to enhance student engagement.
Requisites: NURSING 784, 785, or 786
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate innovative teaching strategies based on educational theory to enhance student engagement, motivation, and achieve learning outcomes.
Audience: Graduate

2. Utilize educational technologies and tools to support student learning.
Audience: Graduate

3. Apply evidence-based practices to design engaging learning activities that support various learning styles and student needs.
Audience: Graduate

4. Demonstrate the ability to create and maintain an inclusive and welcoming learning environment.
Audience: Graduate

5. Engage in ongoing professional role development by seeking feedback, participating in reflective practices, and staying informed about current trends and research in higher education teaching.
Audience: Graduate

NURSING 798 – MASTER'S RESEARCH PRACTICUM
3 credits.

Promotes learning of the research process in nursing through direct experience. Work closely with faculty to determine the nature, scope and design of the research experience. NURSING 700 or 701
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2014

NURSING 799 – INDEPENDENT STUDY
1-6 credits.

Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

NURSING 800 – HEALTH EQUITY IN NURSING AND HEALTH RESEARCH
2 credits.

Examination of key concepts in health disparities and health equity as they apply to nursing and related health research. Identification of structural and social determinants of equity that shape health at multiple levels, across the health and wellness continuum, in all health domains and throughout the life course. Emphasis on implications for the design, conduct, interpretation, and dissemination of nursing and health research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate concepts of health, health disparities, and health equity
Audience: Graduate

2. Discuss structural (e.g., laws, policies, systems, institutions), social (e.g., racism, ethnocentrism, sexism, socioeconomic deprivation, geography), and individual and community factors (e.g., resilience) that contribute to health equities / inequities and related implications for health research
Audience: Graduate

3. Appraise relevant theory and methodological approaches used in health equity research
Audience: Graduate

4. Critically analyze published research for social bias
Audience: Graduate

5. Design research that integrates structural and social determinants of health
Audience: Graduate

NURSING 801 – THEORY IN NURSING RESEARCH
2 credits.

Examination of middle-range theory, micro-theory, and conceptual frameworks and their application in nursing science, with emphasis on critique and selection of a theory and/or framework to guide the student's research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Discuss foundations of nursing theory, their structure and scope, and the importance of theory in nursing science
Audience: Graduate

2. Evaluate methods of theory development including positivistic and inductive approaches, and examples of extending and refining theory over time
Audience: Graduate

3. Critically analyze the utility of various theories, including the application and operationalizability of theory in research
Audience: Graduate

4. Appraise theory from nursing, biological, behavioral, and other sciences
Audience: Graduate

5. Select or adapt an existing theory or create a beginning conceptual framework to guide the student’s early research efforts
Audience: Graduate

NURSING 802 – ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
1 credit.

Ethical issues in the design, conduct and reporting of research are examined in the context of the nature of the scientific endeavor, the structure of the research community, and professional and federal guidelines for supporting scientific integrity and controlling misconduct. This course fulfills the National Institutes of Health responsible conduct of research requirements.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand ethical issues in the conduct of research.
Audience: Graduate

2. Recognize one's own ethical/moral biases in ethical decisions.
Audience: Graduate

3. Develop the conceptual tools to recognize ethical dilemmas.
Audience: Graduate

4. Identify and analyze options for action, and make appropriate decisions.

Audience: Graduate

NURSING 803 – QUANTITATIVE DESIGN AND METHODS
4 credits.

Focuses on the conduct of research primarily from empirical, analytical traditions. Address the integration of research paradigms, questions, designs, and methods for such research. Compare details, characteristics, strengths and limitations of alternative research designs and methods. Discuss issues and standards for preparing research proposals for different purposes (e.g., institutional review boards for human subjects, NIH) to advance the nursing discipline.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Gain understanding and skills in selected quantitative research designs and methods.
Audience: Graduate

2. Analyze advantages and limitations of different quantitative methods for studying phenomena relevant to nursing and/or health care broadly defined.
Audience: Graduate

3. Substantively critique published quantitative research and funding proposals on multiple dimensions (e.g., conceptual, theoretical, methodological, ethical, analytical, historical, practical).
Audience: Graduate

4. Demonstrate skills in integrating knowledge from empirical literature, logical arguments, theory, and research methods for writing quantitative research proposals to advance knowledge relevant to nursing and/or health care.
Audience: Graduate

NURSING 804 – QUALITATIVE DESIGN AND METHODS
3 credits.

Focuses on how to conduct qualitative research. Content addresses the philosophical underpinnings of various interpretive qualitative methodologies to assist in matching the best method to particular research questions. Engage in research procedures associated with various qualitative traditions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Gain an understanding and skills in a range of qualitative research designs and methods.
Audience: Graduate

2. Analyze the relationship between underlying philosophies and assumptions and the different qualitative approaches to nursing research.
Audience: Graduate

3. Critically examine the advantages, and limitations of different qualitative research methods in the context of clinical nursing phenomena.
Audience: Graduate

4. Demonstrate an ability to select the most appropriate qualitative approach for a specific research question.
Audience: Graduate

5. Critique published qualitative research and grant proposals, integrating the above knowledge.
Audience: Graduate

NURSING 805 – MEASUREMENT IN HEALTH RESEARCH
3 credits.

Major issues in developing, testing, and using research instruments, including links between concepts, variables, and measures; theories of measurement and scaling, including reliability and validity testing; and using measures in research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Explore theories of measurement and scaling and their application to instrument development.
Audience: Graduate

2. Identify and define the various properties of measurement tools in science and critique their application.
Audience: Graduate

3. Demonstrate skill in testing various forms of reliability of health research instruments.
Audience: Graduate

4. Demonstrate skill in testing various forms of validity of health research instruments.
Audience: Graduate

5. Demonstrate skill in evaluating health research instruments for practical feasibility, appropriateness for intended populations, generalizability, and sensitivity in detecting differences among groups or change over time.
Audience: Graduate

NURSING 806 – EVALUATION AND APPLICATION OF EVIDENCE-BASED PRACTICE
3 credits.

Evaluate collective evidence and apply it, as appropriate, as a basis for improving nursing practice, health care, and healthcare outcomes.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use principles of evidence-based practice (EBP) in understanding research, analyzing practice, and evaluating practice change.
Audience: Graduate

2. Describe how the hierarchy of evidence varies depending upon the type of clinical questions posed or areas of practice for which evidence is being sought.
Audience: Graduate

3. Evaluate the quality of evidence using established criteria, as indicated by the categories of recommendations.
Audience: Graduate

4. Synthesize collective evidence in their area of interest.
Audience: Graduate

5. Address issues related to applying EBP to their area of interest.
Audience: Graduate

6. Apply concepts of risk in evaluating patient outcomes.
Audience: Graduate

NURSING 807 – GROUNDED THEORY RESEARCH
3 credits.

A comprehensive understanding of the intellectual traditions that informed the development of grounded theory, variations of grounded theory (second generation), and to provide an opportunity for active participation in grounded theory research. Requires hands-on participation in a field-research project of the student's choice, engaging in data-collection and analysis, and in-depth readings in symbolic interaction and grounded theory method.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the conceptual underpinning of grounded theory.
Audience: Graduate

2. Identify the cannon and procedures for conducting a grounded theory study.
Audience: Graduate

3. Participate in data collection and analysis using grounded theory methodology.
Audience: Graduate

4. Describe approach and methods for publishing qualitative research.
Audience: Graduate

5. Describe various 2nd generation grounded theory approaches.
Audience: Graduate

NURSING 808 – ELICITING QUALITATIVE DATA: INTERVIEW SKILLS AND OTHER TECHNIQUES
2 credits.

Develop strategies to facilitate the collection of rich qualitative data from diverse study participants regarding a range of research questions across different settings. Explore and practice specific data collection techniques, including various types of interviews, focus groups, observation, visual elicitation techniques, and examine multiple modalities for data.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Identify the connections between qualitative data collection techniques and qualitative approaches.
Audience: Graduate

2. Compare, contrast, and match qualitative data collection techniques to specific research questions, contexts and populations.
Audience: Graduate

3. Create qualitative data collection tools and materials that can be used with diverse study participants across the lifespan and in a variety of settings
Audience: Graduate

4. Practice and analyze a range of qualitative data collection techniques.
Audience: Graduate

NURSING 811 – ADVANCED PATHOPHYSIOLOGY
3 credits.

In-depth study of selected physiological and pathophysiological concepts with application to advanced clinical practice across the lifespan.
Requisites: Declared in a Nursing graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine selected comprehensive physiological phenomena.
Audience: Graduate

2. Apply pathophysiological and physiological principles to selected clinical problems.
Audience: Graduate

3. Critique recent literature relevant to selected clinical problems.
Audience: Graduate

NURSING 815 – KNOWLEDGE DEVELOPMENT IN NURSING
3 credits.

Examination of the history of the discipline of nursing, with emphasis on the evolution of debates regarding what is known and how it is known.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze critically the development of scientific thinking.
Audience: Graduate

2. Debate about the nature, sources, and development of knowledge in nursing.
Audience: Graduate

3. Ability to analyze critically debates about the syntax (methodology) of the discipline.
Audience: Graduate

4. Conduct a systematic, written concept analysis relevant to nursing or healthcare.
Audience: Graduate

NURSING 816 – PROSEMINAR IN NURSING RESEARCH
1 credit.

Focus on professional development and socialization to the role of nurse scientist. Discussion emphasizes career development planning including traditional and alternative roles for PhD-prepared nurses, and current and emerging topics of importance to nursing science. The planned and ongoing research of graduate students and faculty in nursing will be featured as relevant.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Engage in individual development planning and socialization to the role of doctoral student and evolving role as nurse scholar / scientist.
Audience: Graduate

2. Analyze current and emerging topics of importance to nursing science, including relevance to the student's own program of research.
Audience: Graduate

3. Examine professional development issues including pre- and post-doc training goals, professional mentorship, funding, academic and alternative career paths, models of leadership in nursing, and nursing education.
Audience: Graduate

NURSING 818 – PATIENT-CENTERED RESEARCH
3 credits.

Addresses conceptual and methodological perspectives in how patient-centered research and family-centered care research is conducted, from the development through the testing and implementation of interventions. Attention is given to various conceptualizations of patient-centeredness, to the behavioral and physiological origins of patient-centered interventions, family-centered care interventions, and to the trajectory of testing such interventions, from descriptive studies to experimental trials.
Requisites: NURSING 815
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss the differences between patient-centered research and terms with similar concepts such as patient-centered care, patient-focused care, motivational interviewing.
Audience: Graduate

2. Discuss family-centered care research, and difference between similar concepts including family- centered research.
Audience: Graduate

3. Analyze one program of patient-centered research and one program of family-centered care research.
Audience: Graduate

4. Synthesize the issues involved in tailoring an intervention and research methodology to test feasibility, acceptability, and effectiveness of the tailored intervention.
Audience: Graduate

NURSING 819 – CLINICAL FIELD PRACTICUM - RESEARCH IN HEALTH CARE SETTINGS
3 credits.

A field experience in preparation for conducting clinical research in the health care setting that corresponds to the a chosen health problem, phenomenon, or population of interest. Engage as participants and observers in the care setting to deepen your knowledge of the selected health problem and to examine the application of theory and research in the care setting. Negotiate a field experience with a selected agency or institution. Includes discussion of instructional experiences and issues.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Synthesize the state of the science regarding the selected health problem or phenomenon as experienced in the care setting, including practice issues and research questions that could improve the health or patients/clients.
Audience: Graduate

2. Critically evaluate the application of relevant theories or physiologic models to the health problem as experienced in the selected care setting.
Audience: Graduate

3. Identify and analyze patient, provider, and system factors present in the care setting that may influence the formulation of research questions, study design and conduct, interpretation of findings and translation into practice.
Audience: Graduate

4. Describe operational procedures and issues for conducting research in the selected care setting.
Audience: Graduate

5. Demonstrate the ability to synthesize and communicate relevant research findings to practitioners and potential research collaborators in the care setting.
Audience: Graduate

NURSING 826 – FOUNDATIONS FOR APN CLINICAL PRACTICE III
3 credits.

Advance knowledge for clinical decision-making. Coordination of complex care across systems and settings will be emphasized.
Requisites: NURSING 727 and 729
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Refine clinical decision-making skills related to the care of patients with complex and co-existing health care needs.
Audience: Graduate

2. Coordinate care for patients or populations across settings.
Audience: Graduate

3. Collaborate with other healthcare professionals to improve the care of patients with complex or co-existing health problems.
Audience: Graduate

4. Utilize technology to facilitate care across systems and settings.
Audience: Graduate

5. Utilize integrative strategies to assist individuals and families in achieving optimal health and wellness.
Audience: Graduate

6. Evaluate models of care designed to reduce health disparities across systems and settings.
Audience: Graduate

7. Analyze and evaluate the links between clinical practice, organizational goals, and fiscal and policy issues.
Audience: Graduate

NURSING 828 – CLINICAL LEADERSHIP III
1-4 credits.

A supervised clinical practice to enhance clinical leadership skills within the role of an Advanced Practice Nurse. Collaborate with a faculty course professor and clinical preceptor to meet individualized learning objectives.
Requisites: NURSING 729
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate and maintain an advanced level of independent clinical judgment and systems thinking.
Audience: Graduate

2. Engage in the evaluation and translation of research into evidence-based care that improves patient/population outcomes.
Audience: Graduate

3. Support an active role in the mentorship and guidance of nurses in the clinical setting to promote excellence in nursing practice.
Audience: Graduate

4. Employ effective inter-professional communication and collaborative leadership skills in the application and evaluation of practice models.
Audience: Graduate

5. Assess the use of evidence-based practice guidelines and standards of care in the organizational setting and formulate recommendations for improvements.
Audience: Graduate

NURSING 829 – CLINICAL LEADERSHIP IV
1-4 credits.

A supervised clinical practice to enhance clinical leadership skills within the role of an Advanced Practice Nurse. Collaborate with a faculty course professor and clinical preceptor to meet individualized learning objectives.
Requisites: NURSING 828
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate increased independence in and integration of advanced levels of clinical judgment, systems thinking, and engagement in the evaluation and translation of research into evidence-based care that improves patient/population outcomes.
Audience: Graduate

2. Expand their leadership role to mentor and support members of the inter-professional patient care team to achieve excellence in and accountability for quality in care of patients or populations.
Audience: Graduate

3. Demonstrate the ability to implement, revise or improve inter-professional practice models in the clinical setting.
Audience: Graduate

4. Critically appraise the use of evidence-based practice guidelines and standards of care in the clinical setting, recommend improvements, and evaluate the outcome of recommended improvements.
Audience: Graduate

NURSING 830 – LEADERSHIP, ROLE DEVELOPMENT, AND RESOURCE STEWARDSHIP PRACTICUM
3 credits.

Expand and strengthen leadership skills, enhance understanding of specialized advanced practice role including strategic planning and resource stewardship. Collaborate with course faculty and designated preceptors to establish and achieve individualized learning goals that directly pertain to specialty roles in advanced nursing practice.
Requisites: NURSING 712, 713, and 847
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate advanced leadership skills, systems thinking, and strategic engagement.
Audience: Graduate

2. Mentor members of the interprofessional team to achieve excellence and accountability for quality management of populations and/or programs.
Audience: Graduate

3. Engage in strategic planning, partnership, resource development and stewardship.
Audience: Graduate

4. Analyze ethical and legal issues associated with health systems management practice.
Audience: Graduate

5. Engage in the structural, political and economic issues integral in the leadership role and system wide implications of decision making.
Audience: Graduate

6. Create a professional development plan for future role.
Audience: Graduate

NURSING 847 – HEALTH POLICY PRACTICUM
3 credits.

Provides a policy field experience that corresponds to a targeted focus area, phenomenon, or population of interest. Negotiate a policy experience with a selected agency or institution. Analyze relevant policies to your population of interest and actively influence the design, development, and implementation of a policy. Examine strategies to accelerate policy adoption and implementation.
Requisites: Declared in a Nursing graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Examine the role and translation of research and other types of evidence in developing and revising policies in the selected agency or institution.
Audience: Graduate

2. Critically appraise research and identify gaps related to the policies influencing the health problem, phenomenon, or population of interest.
Audience: Graduate

3. Demonstrate the ability to synthesize and communicate relevant research findings to individuals involved in policy-making, including key stakeholders.
Audience: Graduate

4. Effectively Influence policy-makers through active participation at the program level on committees, boards, and/or task forces, and at the institutional, local, state, regional, national, and/or international levels to improve healthcare delivery and outcomes.
Audience: Graduate

5. Demonstrate leadership in the design, development, implementation, and/or evaluation of program, institutional, local, state, federal, and/or international health policy as demonstrated in student practicum activities and deliverables.
Audience: Graduate

NURSING/ED PSYCH/HDFS/SOC WORK 880 – PREVENTION SCIENCE
3 credits.

Theoretical, empirical and practical foundation for prevention science as it relates to the prevention of human social problems. Research and evaluation methods, program design strategies, best practices and policy as they relate to the field of prevention are also examined.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

NURSING/ED PSYCH/HDFS/SOC WORK 881 – CAPSTONE SEMINAR IN PREVENTION SCIENCE
1 credit.

An opportunity to meet with prevention professionals and scholars from across campus and the community to explore current and emerging issues of prevention research and professional practice. Students must complete HDFS/ED PSYCH/NURSING/SOC WORK 880 before taking this course.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

NURSING 906 – SCHOLARLY PROJECT
1-4 credits.

Independent scholarly project involves a systematic, evidence-based approach to enhance health-related outcomes.
Requisites: NURSING 706 and 806
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Articulate the state of the science in identified area of inquiry.
Audience: Graduate

2. Apply methods of scholarly inquiry consistent with identified area of interest.
Audience: Graduate

3. Synthesize and disseminate results of inquiry in an oral presentation as well as a peer reviewed journal, book, government report, or other written venue.
Audience: Graduate

NURSING 990 – THESIS RESEARCH
1-9 credits.

Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

NURSING 999 – ADVANCED INDEPENDENT STUDY
1-9 credits.

Directed study as arranged with instructor.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Engage in directed study based on the student's research needs as arranged with the instructor.
Audience: Graduate

NUTRITIONAL SCIENCES (NUTR SCI)

NUTR SCI 100 – FUELING YOUR FUTURE WITH CAREERS IN NUTRITION
1 credit.

Overview of career paths related to human nutrition, a multidisciplinary domain that explores the complex relationship between dietary intake and health, encompassing diverse areas from scientific research, healthcare, education, product development, to policy and intervention.
Requisites: None
Repeatable for Credit: No
Learning Outcomes: 1. Identify and describe various career paths within the field of nutrition
Audience: Undergraduate

2. Explain the educational and professional requirements for different nutrition-related careers
Audience: Undergraduate

3. Discuss nutrition science literature
Audience: Undergraduate

4. Identify professional organizations, resources, and networking opportunities within the field of nutrition
Audience: Undergraduate

5. Locate resources available to students pursuing a degree in Nutritional Sciences at the UW – Madison
Audience: Undergraduate

NUTR SCI 132 – NUTRITION TODAY
3 credits.

Nutrition and its relationship to humans and their biological, social, and physical environment; current issues and concerns that affect the nutritional status of various population groups.
Requisites: Not open to students with credit for NUTR SCI 332
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Discuss the development of nutritional sciences knowledge and critically assess research findings.
Audience: Undergraduate

2. Describe the scientific method as it applies to nutritional sciences and analyze research methods in the field.
Audience: Undergraduate

3. Evaluate scientific research reports and apply findings to personal dietary choices, considering equity and inclusion in accessing and acquiring food.
Audience: Undergraduate

4. Investigate changes in human eating patterns over time and their impact on health, sustainability, diversity, and cultural traditions.
Audience: Undergraduate

5. Apply tools for assessing balanced eating patterns to personal food choices, specific populations or case studies while considering traditional and cultural dietary practices.
Audience: Undergraduate

6. Explain the mechanisms of digestive physiology and how they pertain to nutrient absorption and the generation and utilization of energy.
Audience: Undergraduate

7. Demonstrate a comprehensive understanding of basic nutritional concepts, including macronutrients, micronutrients, energy, and their sources, as well as their effects on health, while emphasizing diversity and an “all foods fit” approach.
Audience: Undergraduate

NUTR SCI 200 – PROFESSIONAL SKILLS IN DIETETICS
1 credit.

An overview of the nutrition and dietetics professions: career options; professional development; professional references and resources; credentialing; professional issues.
Requisites: Declared in Nutritional Sciences BS or BS-Nutrition and Dietetics and (NUTR SCI 631 or concurrent enrollment)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify career options available to individuals with a degree in nutrition and dietetics.
Audience: Undergraduate

2. Summarize the requirements and skills for becoming a Registered Dietitian.
Audience: Undergraduate

3. Describe individual skills, strengths, knowledge, and experience relevant to career goals.
Audience: Undergraduate

4. Discuss the importance and expectations of a professional in the workplace.
Audience: Undergraduate

5. Evaluate effective professional oral and written communication pertaining to the field of dietetics.
Audience: Undergraduate

NUTR SCI/ENTOM 203 – INTRODUCTION TO GLOBAL HEALTH
3 credits.

Introduces students to global health concepts through multidisciplinary speakers dedicated to improving health through their unique training. It targets students with an interest in public health and those who wish to learn how their field impacts their global issues.
Requisites: None
Course Designation: Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Define global health and identify major global health trends and metrics
Audience: Undergraduate

2. Recognize the "determinants of health" that contribute to health disparities/inequities
Audience: Undergraduate

3. Examine global health through the lens of agriculture, food, and nutrition
Audience: Undergraduate

4. Describe the role of ecology and the changing environment in global health
Audience: Undergraduate

5. Explain the importance of collaborative and interdisciplinary approaches in global health
Audience: Undergraduate

6. Discuss a variety of global health careers and areas of specialty through guest speakers and connections with their area of interest
Audience: Undergraduate

NUTR SCI 289 – HONORS INDEPENDENT STUDY
1-2 credits.

Research work under direct guidance of a Nutritional Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor. Intended for students in the CALS Honors Program.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2006
Learning Outcomes: 1. Develop critical, analytical and independent thinking skills through a scientific research project
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving in a scientific research project
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies through a research project
Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format
Audience: Undergraduate

NUTR SCI 299 – INDEPENDENT STUDY
1-3 credits.

Research work under direct guidance of a Nutritional Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Articulate a clear research question or problem and formulate a hypothesis
Audience: Undergraduate

2. Identify appropriate research methodologies and collect sound scientific data
Audience: Undergraduate

3. Apply critical thinking skills to interpret laboratory data and apply problem solving skills to constructively address research setbacks
Audience: Undergraduate

4. Practice research ethics and responsible conduct in research
Audience: Undergraduate

5. Communicate scientific ideas and results verbally and in written form effectively
Audience: Undergraduate

NUTR SCI/AN SCI/DY SCI 311 – COMPARATIVE ANIMAL NUTRITION
3 credits.

Nutrients and their assimilation, function, and interactions that affect metabolism in mammals. Differences among species will be used to emphasize unique digestive and physiological functions and how these differences affect metabolism of nutrients. Humans will be used in some comparisons. Follows physiological progression of nutrients, starting with an overview of the digestive tract followed by water and builds on specific roles of nutrients and substrates needed to provide basic processes required for maintenance, tissue accretion, and homeostatic regulation of nutrients.
Requisites: CHEM 341, 343, (BIOCHEM 301 or concurrent enrollment), or (BIOCHEM 501 or concurrent enrollment)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recall and summarize the cellular, tissue, and whole-body metabolism and function of nutrients
Audience: Undergraduate

2. Identify key elements of digestive anatomy that enable digestion and absorption of consumed nutrients
Audience: Undergraduate

3. Explain the physiological processes required for assimilation of consumed macro- and micro-nutrients
Audience: Undergraduate

4. Compare the similarities and differences in nutritional and metabolic strategies across species
Audience: Undergraduate

5. Evaluate the interactions between nutrients, animals, environment, physiological status, and functions and integrate these interactions to understand whole-animal nutrition
Audience: Undergraduate

NUTR SCI 332 – HUMAN NUTRITIONAL NEEDS
3 credits.

Biochemical and physiological basis of the nutritional requirements of humans.
Requisites: (CHEM 103, 109, or 115) and (ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY/BIOLOGY 101, or BIOCORE 381)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define and apply major principles and concepts of nutritional sciences.
Audience: Undergraduate

2. Compare and contrast common approaches used in biomedical research.
Audience: Undergraduate

3. Demonstrate knowledge of essential nutrients on their absorption, metabolism, functions/mechanisms of actions, and physiological manifestations of nutritional status.
Audience: Undergraduate

4. Describe key biochemical and physiological pathways that integrate the metabolism of energy-yielding nutrients.
Audience: Undergraduate

5. Demonstrate quantitative literacy relevant to nutritional sciences and dietetics.
Audience: Undergraduate

NUTR SCI/A A E 350 – WORLD HUNGER AND MALNUTRITION
3 credits.

Hunger and poverty in developing countries and the United States. Topics include: nutrition and health, population, food production and availability, and income distribution and employment.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate a basic understanding of the complex links between nutrition and malnutrition.
Audience: Undergraduate

2. Learn and apply the economic tools of supply and demand to solving/analyzing issues including income and population growth, income and population policies, and agricultural supply topics.
Audience: Undergraduate

3. Synthesize knowledge about the economics and nutritional aspects of world hunger to better understand solutions.
Audience: Undergraduate

4. Communicate effectively through written reports and online discussions.
Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenge of addressing issues of population growth, hunger and poverty.
Audience: Undergraduate

6. Describe the social, economic, and environmental dimensions of food, hunger and malnutrition. Identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Undergraduate

NUTR SCI 375 – SPECIAL TOPICS
1-4 credits.

Special topics on contemporary issues relevant to undergraduate students studying health and nutrition.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

NUTR SCI 377 – CULTURAL ASPECTS OF FOOD AND NUTRITION
3 credits.

Exploration of cultural competency and humility as a factor in reducing nutrition-related health disparities, and an opportunity to foster community resilience within the United States. Analysis of how personal cultural perspectives can shape biases and stereotypes that can widen the health disparity gap. Principles of food and culture utilized to compare cultural perspectives of health and well-being, including influences of spirituality and religiosity on food choice and dietary patterns. Includes content collaborators and guest speakers from a variety of communities, and identities.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the concept and significance of cultural competency and cultural humility in the context of food, health and well-being.
Audience: Undergraduate

2. Identify worldview and traditional and contemporary foodways common across ethnic communities in the U.S. disproportionately burdened by nutrition-related chronic disease.
Audience: Undergraduate

3. Interpret dietary laws and customs in the context of the U.S. health care delivery system.
Audience: Undergraduate

4. Critically examine how U.S. food policies can influence dietary choices at multiple levels, and how those dietary choices may influence the culture around food.
Audience: Undergraduate

NUTR SCI 379 – INTRODUCTION TO EPIDEMIOLOGY
3 credits.

Provides an interdisciplinary introduction to the field of epidemiology. As the "detectives of public health," epidemiologists investigate the causes of disease, track outbreaks, screen and monitor the health of populations, and design studies to track health over time. Epidemiological research is used to identify groups at-risk for disease, guide public health programs and policies and generate hypotheses about the causes of diseases which can inform further research. Also examines association and causality, study design, and limitations to epidemiological evidence, drawing from real examples, both current and historical.
Requisites: PSYCH 210, STAT 240, 301, 324 or 371
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Social Science or Natural Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe principles of epidemiology and its tools and methods
Audience: Undergraduate

2. Calculate and interpret basic epidemiological measures
Audience: Undergraduate

3. Describe major exposures, related health outcomes and the burden of disease
Audience: Undergraduate

4. Identify types of epidemiological studies and assess strengths and weaknesses of different study designs
Audience: Undergraduate

5. Interpret epidemiological evidence and identify threats to validity of epidemiology studies
Audience: Undergraduate

6. Connect epidemiology with its use in public and global health
Audience: Undergraduate

7. Explore how epidemiology is related to their field of interest or career path
Audience: Undergraduate

NUTR SCI 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

Internship under guidance of a Nutritional Sciences faculty or instructional academic staff member and internship site supervisor. Students are responsible for arranging the work and credits with the Nutritional Sciences faculty or instructional academic staff member and the internship site supervisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply concepts learned in coursework to authentic professional situations
Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry
Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations
Audience: Undergraduate

NUTR SCI 400 – STUDY ABROAD IN NUTRITIONAL SCIENCES
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

NUTR SCI/INTER-AG 421 – GLOBAL HEALTH FIELD EXPERIENCE
1-4 credits.

Specialized educational experiences that address a broad range of global health topics through interdisciplinary approaches to health and include participation in applied public health activities or service learning projects with communities and partner organizations.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Collaborate and communicate effectively with diverse colleagues and local partners.
Audience: Undergraduate

2. Respectfully engage with different cultures or populations.
Audience: Undergraduate

3. Articulate the importance of interdisciplinary approaches to global health and/or sustainable development.
Audience: Undergraduate

4. Demonstrate knowledge on a specific global health issue, community, and location.
Audience: Undergraduate

NUTR SCI 431 – NUTRITION IN THE LIFE SPAN
3 credits.

Influence of nutrition on growth and development; physiological basis of nutritional requirements throughout the life span, including the relationship of food habits and nutrition to selected chronic diseases; principles of nutritional intervention in community programs.
Requisites: Junior standing, grade of C in ANAT&PHY 335 and grade of C in NUTR SCI 332
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Utilize nutrient requirements and dietary standards in dietary assessment and planning
Audience: Undergraduate

2. Describe the physiological basis of nutritional requirements throughout the life cycle
Audience: Undergraduate

3. Describe eating patterns, nutritional problems, and their relationships to health conditions throughout the life cycle
Audience: Undergraduate

4. Apply appropriate nutrient and food recommendations to individuals based on the stage of the life cycle
Audience: Undergraduate

5. Explain the delivery of nutrition care in community programs
Audience: Undergraduate

NUTR SCI 500 – UNDERGRADUATE CAPSTONE SEMINAR LABORATORY
1 credit.

Current topics in Nutritional Sciences and undergraduate research presentations.
Requisites: NUTR SCI 431 or concurrent enrollment and NUTR SCI/BIOCHEM 510 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use database search techniques to identify research articles
Audience: Undergraduate

2. Describe requirements of rigorous and ethical research and publication
Audience: Undergraduate

3. Critically evaluate components of nutritional science research publications
Audience: Undergraduate

4. Prepare and submit an abstract for oral research presentations
Audience: Undergraduate

5. Prepare and present oral research presentations
Audience: Undergraduate

NUTR SCI/BIOCHEM 510 – NUTRITIONAL BIOCHEMISTRY AND METABOLISM
3 credits.

Lectures in nutrition with a substantial background in biochemistry. Emphasis on biochemical and physiological fundamentals of nutrition. Discussion of protein, fat, carbohydrate, energy, minerals and vitamins and their roles and interrelationships in nutrition and metabolism.
Requisites: BIOCHEM 301, 501, 507, BMOLCHEM 503, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand nutrient metabolism in normal and disease states
Audience: Both Grad & Undergrad

2. Integrate the regulation of metabolism of nutrients under normal and disease state conditions.
Audience: Both Grad & Undergrad

3. Understand the biochemical and molecular functions of nutrients we consume
Audience: Both Grad & Undergrad

4. Apply how nutrients affect pathogenesis and health
Audience: Graduate

5. Think critically about nutrient claims and fads using your knowledge of nutritional biochemistry.
Audience: Both Grad & Undergrad

6. Integrate current research in the area of metabolism and micronutrient function into existing knowledge and formulate new hypotheses to guide future research
Audience: Graduate

NUTR SCI/KINES 525 – NUTRITION IN PHYSICAL ACTIVITY AND HEALTH
3 credits.

Provides both scientific knowledge and application of nutrition related to exercise, health, and sports.
Requisites: ANAT&PHY 335
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify how nutritional and hydration demands vary by physical activity frequency, intensity, type, and time
Audience: Undergraduate

2. Outline dietary assessment techniques and common dietary strategies for both the healthy population and populations with additional dietary needs
Audience: Undergraduate

3. Apply the potential benefits of nutrient timing strategies to optimize performance and to promote tissue growth, recovery, and repair
Audience: Undergraduate

4. Synthesize and discuss nutrition research related physical activity and health
Audience: Undergraduate

5. Evaluate the safety and efficacy of common nutritional strategies, supplements, and ergogenic aids
Audience: Undergraduate

NUTR SCI 540 – COMMUNITY NUTRITION AND HEALTH EQUITY
3 credits.

The foundations and practice of community nutrition and health equity. Factors and resources affecting community nutrition programs and delivery of nutrition and education programs to diverse communities and vulnerable populations.
Requisites: NUTR SCI 431 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss the impact of health care policy and different health care delivery systems on food and nutrition services.
Audience: Undergraduate

2. Demonstrate cultural humility, an awareness of personal bias, social inequities, health disparities and discrimination.
Audience: Undergraduate

3. Describe contributing factors to health equity in nutrition and dietetics including structural bias, social inequities, health disparities and discrimination.
Audience: Undergraduate

4. Develop an education session or program/educational strategy for a target population.
Audience: Undergraduate

5. Demonstrate counseling and education methods to facilitate behavior change and enhance wellness for diverse individuals and groups.
Audience: Undergraduate

NUTR SCI 550 – NUTRITION AND COUNSELING FOR ATHLETIC PERFORMANCE
2 credits.

Presents foundational principles and evidenced based recommendations for fueling active bodies and how proper nutrition relates to weight management, muscle development, recovery and performance. Integrates counseling methods and techniques used for working with active populations through readings, learning activities and expert guest lecturers. Features reading and interpreting scientific studies related to sports nutrition and interdisciplinary guest speakers representing sport performance and wellness programs.
Requisites: NUTR SCI 332
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Discuss what sports nutrition is in the field of nutrition and dietetics.
Audience: Undergraduate

2. Understand nutrient requirements during the various types of exercise and sport, along with rationale for those requirements.
Audience: Undergraduate

3. Develop the ability to communicate information to athletes/active individuals or groups.
Audience: Undergraduate

4. Develop and apply counseling skills when communicating nutrition with athletes/active individuals to promote behavior change.
Audience: Undergraduate

5. Apply learned concepts to actual athletic situations and varied conditions and special populations.
Audience: Undergraduate

NUTR SCI/BIOCHEM 560 – PRINCIPLES OF HUMAN DISEASE AND BIOTECHNOLOGY
2 credits.

Covers basic and applied biochemical principles related to human disease. Topics such as: cancer, including cell cycle regulation, oncogenes and tumor suppressors, and cellular metabolism; metabolic disorders, including cardiovascular disease, metabolic syndrome, and diabetes; biotechnology, including metabolomics, CRISPR-based genetic screens, and experimental models of human disease.
Requisites: BIOCHEM 501, 507, NUTRI SCI 510, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Critically evaluate and accurately describe findings from primary research publications.
Audience: Both Grad & Undergrad

2. Analyze how genetic and cell cycle perturbations contribute to cancer progression.
Audience: Both Grad & Undergrad

3. Identify how genetic and environmental factors impact altered cellular metabolism in cancer.
Audience: Both Grad & Undergrad

4. Describe biochemical mechanisms that contribute to cardiovascular disease, metabolic syndrome, and diabetes.
Audience: Both Grad & Undergrad

5. Explain biochemical techniques, engineering strategies, and state-of-the-art technologies used in biomedical research.
Audience: Both Grad & Undergrad

6. Collaborate with peers in a small group.
Audience: Both Grad & Undergrad

7. Apply knowledge of biochemical principles and biotechnology to solve research and disease treatment related problems.
Audience: Both Grad & Undergrad

8. Execute written critical evaluation of primary research literature related to the molecular basis of human diseases and advances in biotechnology.
Audience: Graduate

NUTR SCI 600 – INTRODUCTORY SEMINAR IN NUTRITION
1 credit.

Presentation of reports from current journals of nutritional sciences.
Requisites: Graduate/professional standing
Course Designation: Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

NUTR SCI 618 – RESEARCH APPROACHES IN THE ERA OF PRECISION NUTRITION
3 credits.

Exploration of current challenges and research approaches related to the progress of nutritional sciences in the era of precision nutrition. Topics include limitations of population-based approaches to establishing dietary guidelines, hurdles to developing biomarkers for determining individual nutritional status, the impact of genetics, epigenetics, the microbiome, diet interactions, and other factors on nutritional and metabolic variability among people, and the ways in which precision nutrition can revolutionize how nutrition recommendations are devised and delivered to the public.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Critically evaluate current primary research literature in nutrition and metabolism
Audience: Graduate

2. Identify the limitations of population-based nutrition recommendations and the challenges facing development of biomarkers of individual status
Audience: Graduate

3. Distinguish the multitude of factors that create different nutritional needs among individuals and their metabolic heterogeneity
Audience: Graduate

4. Analyze how nutritional guidance is communicated to the public now and predict how it will be communicated in the future
Audience: Graduate

5. Explain state-of-the-art approaches to nutrition research and devise experiments, in the form of specific aims, for future research
Audience: Graduate

NUTR SCI/BIOCHEM 619 – ADVANCED NUTRITION: INTERMEDIARY METABOLISM OF MACRONUTRIENTS
3 credits.

Principles underlying the control of metabolism as it applies to macronutrients. Discusses advanced aspects of metabolic control. Metabolism of protein and amino acids, fat, and carbohydrate. Discusses fuel sensing and metabolism in disease.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe regulatory mechanisms at the organ, cellular and biochemical level controlling intermediary metabolism of carbohydrates, lipids and proteins
Audience: Graduate

2. Identify regulatory points in metabolic pathways and explain how they may change with metabolic state
Audience: Graduate

3. Detail the changes and mechanisms underlying such changes in protein, carbohydrate and fat metabolism in changing physiological state and also in health vs disease state
Audience: Graduate

4. Evaluate modern experimental approaches for studying metabolism
Audience: Graduate

NUTR SCI/POP HLTH 621 – INTRODUCTION TO NUTRITIONAL EPIDEMIOLOGY
1 credit.

Techniques used to evaluate relationships of diet to health and disease in human populations; integration of knowledge gained with results of animal and clinical studies toward understanding dietary risk or protective factors for disease. Includes advanced diet assessment and basic epidemiologic approaches.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

NUTR SCI 623 – ADVANCED NUTRITION: MINERALS
1 credit.

Topics discussed in regard to minerals are: metabolic roles; absorption, excretion, transport and cellular metabolism; nutritional and toxicological standards for humans and animal models; bioavailability; genetic interactions; and research methodologies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022

NUTR SCI 625 – ADVANCED NUTRITION: OBESITY AND DIABETES
1 credit.

Physiology, biochemistry and genetics of human obesity and diabetes. Critical review of current research on their etiology and treatment.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023

NUTR SCI/AN SCI 626 – EXPERIMENTAL DIET DESIGN
1 credit.

Discuss nutrient requirements, composition of ingredients used to meet requirements and the mathematical steps involved in diet formulation with emphasis on research animals and human subjects.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Develop an understanding of nutrient requirements, ingredients used to meet requirements, and the mathematical steps involved in diet formulation, with emphasis on research animals.
Audience: Both Grad & Undergrad

2. Develop skills required to formulate and prepare research diets
Audience: Both Grad & Undergrad

3. Develop an appreciation of nutrient requirements and the nutrient content of foods in development of healthy human diets.
Audience: Graduate

NUTR SCI 627 – ADVANCED NUTRITION: VITAMINS
1 credit.

Scientific knowledge of the metabolic functions, metabolism and nutritional requirements for some of the water soluble vitamins and all of the fat soluble vitamins.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023

NUTR SCI 631 – CLINICAL NUTRITION I
3 credits.

Introduction to the nutrition care process, including pathology, medical nutrition therapy, and nutrition support in relation to alterations in nutrition and metabolism that accompany disease states. Research related to therapeutic nutrition.
Requisites: NUTR SCI 332, 431, and (BIOCHEM 301 or 501)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize aspects of professional practice as a registered dietitian nutritionist
Audience: Undergraduate

2. Demonstrate understanding of the pathophysiology, as it relates to nutrition, for selected disease states/conditions
Audience: Undergraduate

3. Describe the medical nutrition therapy for selected disease states/conditions
Audience: Undergraduate

4. Translate nutrient recommendations into food recommendations
Audience: Undergraduate

5. Utilize the nutrition care process when providing medical nutrition therapy
Audience: Undergraduate

NUTR SCI 632 – CLINICAL NUTRITION II
3 credits.

Advanced topics surrounding pathology, medical nutrition therapy, and nutrition support in relation to alterations in nutrition and metabolism that accompany disease stated. Research related to therapeutic nutrition.
Requisites: NUTR SCI 631
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize aspects of professional practice as a registered dietitian nutritionist
Audience: Undergraduate

2. Demonstrate understanding of the pathophysiology, as it relates to nutrition, for selected disease states/conditions
Audience: Undergraduate

3. Describe the medical nutrition therapy for selected disease states/conditions
Audience: Undergraduate

4. Translate nutrient recommendations into food recommendations
Audience: Undergraduate

5. Utilize the nutrition care process when providing medical nutrition therapy
Audience: Undergraduate

NUTR SCI 641 – APPLICATIONS IN CLINICAL NUTRITION I
1 credit.

Clinical problem solving, assessing medical record data, evaluating food intake, planning modified diets, and reviewing medical and research literature related to certain diseases/conditions. Develops critical thinking, teamwork and communication skills needed by the dietetic intern and dietitian.
Requisites: Declared in Nutritional Science BS or BS-Dietetics and Nutrition and NUTR SCI 631 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Solve clinical case problems and case studies as part of a team using evidenced-based practice
Audience: Undergraduate

2. Summarize clinical cases for medical record using established documentation methods
Audience: Undergraduate

3. Use current information technologies to locate and apply evidence-based guidelines and protocols (KRDN 1.2)
Audience: Undergraduate

4. Demonstrate effective and professional oral and written communication and documentation (KRDN 2.1)
Audience: Undergraduate

5. Describe the regulation system related to billing and coding, what services are reimbursed by third party payers and how reimbursement may be obtained (KRDN 4.3)
Audience: Undergraduate

NUTR SCI 642 – APPLICATIONS IN CLINICAL NUTRITION II
1 credit.

Clinical problem solving, assessing medical record data, evaluating food intake, planning modified diets, and reviewing medical and research literature related to certain disease states/conditions. Develops critical thinking, teamwork and communication skills needed by the dietetic intern and dietitian.
Requisites: NUTR SCI 641, NUTR SCI 632 or concurrent enrollment, and declared in Nutritional Sciences BS or Nutritional Sciences BS-Nutrition and Dietetics
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Solve clinical case problems as part of a team using evidenced-based practice
Audience: Undergraduate

2. Summarize clinical cases for medical record using established documentation methods
Audience: Undergraduate

3. Demonstrate effective and professional oral and written communication and documentation (KRDN 2.1)
Audience: Undergraduate

4. Identify and describe the work of interprofessional teams and the roles of others with whom the registered dietitian nutritionist collaborates (KRDN 2.5)
Audience: Undergraduate

5. Use the Nutrition Care Process and clinical workflow elements to assess nutritional parameters, diagnose nutrition related problems, determine appropriate nutrition interventions and develop plans to monitor the effectiveness of these interventions (KRDN 3.1)
Audience: Undergraduate

6. Develop nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs (KRDN 3.6)
Audience: Undergraduate

7. Evaluate data to be used in decision-making for continuous quality improvement (KRDN 4.7)
Audience: Undergraduate

NUTR SCI/BIOCHEM 645 – MOLECULAR CONTROL OF METABOLISM AND METABOLIC DISEASE
3 credits.

Examination of various physiological states and how they affect metabolic pathways. Discussion of a number of special topics related to the unique roles of various tissues and to metabolic pathways in disease states, including adipocyte biology, beta-cell biology, epigenetics, inflammation, and aging related diseases.
Requisites: BIOCHEM 501, 508 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the mechanisms by which tissues maintain metabolic flexibility.
Audience: Undergraduate

2. Differentiate between how lipid metabolism regulates carbohydrate metabolism and vice versa.
Audience: Undergraduate

3. Describe the regulation of lipogenesis.
Audience: Undergraduate

4. Discuss how hormone secreting endocrine cells in the pancreas sense nutrients to regulate blood glucose.
Audience: Undergraduate

5. Explain the importance of intracellular lipid cycling for body temperature regulation.
Audience: Undergraduate

6. Discuss the manner in which mitochondrial metabolism is assessed.
Audience: Undergraduate

7. Examine hormonal regulation of circadian rhythms.
Audience: Undergraduate

8. Describe the basis for thermogenesis.
Audience: Undergraduate

9. Explain the pathways leading to inflammation.
Audience: Undergraduate

NUTR SCI 650 – ADVANCED CLINICAL NUTRITION: CRITICAL CARE AND NUTRITION SUPPORT
3 credits.

Advanced study of the metabolic demands of critical illness and how these alterations influence the nutritional needs of critical care patients in various disease states. Using an evidence-based medical approach, assess nutrient requirements and determine best methods of nutrient delivery in various disease states. Anthropometric measures and hematological indices will be incorporated to assess nutritional status and monitor response to nutritional therapies.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

NUTR SCI 651 – ADVANCED CLINICAL NUTRITION - PEDIATRICS
3 credits.

Pediatric nutritional requirements with emphasis on issues related to evidence-based medical nutrition therapy.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

NUTR SCI 652 – ADVANCED NUTRITION COUNSELING AND EDUCATION
3 credits.

Application of current theories and techniques of counseling and education to the field of nutrition and dietetics. Practical application of communication techniques, client-centered counseling methods, motivational interviewing, learning theories and behavior change techniques, and factors affecting eating patterns. Nutrition psychology and the psychoanalytic approach to nutrition counseling will be emphasized in the class. Principles of group counseling/facilitation and instructional material/media design.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

NUTR SCI 653 – CLINICAL NUTRITION RESEARCH
3 credits.

Research use and development as it applies to clinical nutrition practice: effective use of the literature in evidence based practice and research development, problem development, methodology, analysis and reporting of results and conclusions.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

NUTR SCI 655 – NUTRITION IN AGING
3 credits.

Interpret research relating to nutrition during the aging process. Gain an understanding of acute and chronic conditions in older persons, both in hospital and the community. Examine the impact of aging on organ systems and address the relationship among physiologic aging, nutrition, and disease.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Articulate how the physiologic changes of aging impact nutrition, distinguishing between natural physiologic changes of aging and those occurring from disease.
Audience: Graduate

2. List characteristics representative of the aging population.
Audience: Graduate

3. Describe how dietary recommendations for older adults differ from younger adults.
Audience: Graduate

4. Identify physiologic changes of aging that impact exercise capacity and describe the benefits of exercise for older adults.
Audience: Graduate

5. Examine, investigate, and summarize the essential components of a nutritional assessment for an older adult, including anthropometric, biochemical, clinical, and dietary factors.
Audience: Graduate

6. Describe the nutritional impact of diseases and conditions common in older adults.
Audience: Graduate

7. Explain the significance of nutrition in prevention and management of diseases frequently impacting older adults.
Audience: Graduate

8. Implement appropriate dietary and lifestyle interventions for the prevention of disease and conditions common among older adults.
Audience: Graduate

NUTR SCI 657 – MANAGEMENT IN DIETETICS
3 credits.

Evaluate research and apply management principles in dietetics practice. Enhance leadership and management skills for settings such as hospitals, long-term care facilities, schools, universities, prisons, and other locations where food and nutrition services are administered.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Apply professionalism and related topics to career development.
Audience: Graduate

2. Enhance critical thinking and decision-making skills.
Audience: Graduate

3. Apply leadership and management theories, especially useful for managing a professional staff.
Audience: Graduate

4. Develop a business plan for an area of advanced practice, including a logic model, marketing plan, implementation plan, budgeting system, and outcomes measurement.
Audience: Graduate

5. Apply a framework to assess, develop, implement and evaluate products, programs and services.
Audience: Graduate

6. Demonstrate leadership skills to guide practice
Audience: Graduate

7. Apply principles of organization management
Audience: Graduate

8. Apply project management principles to achieve project goals and objectives.
Audience: Graduate

9. Lead quality and performance improvement activities to measure, evaluate and improve a program's services, products and initiatives.
Audience: Graduate

10. Develop and lead implementation of risk management strategies and programs.
Audience: Graduate

NUTR SCI 660 – HUMAN ENERGY METABOLISM
2 credits.

Fundamentals in human macronutrient metabolism and its role in health and disease. Biochemistry and physiology of macronutrient digestion, anabolism, and catabolism. Disorders of energy metabolism (obesity, type 1 and type 2 diabetes, starvation). Metabolic effects of fiber and the microbiota. Body composition and energy assessment.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Articulate the biochemical pathways that are the foundation of macronutrient anabolism and catabolism, including carbohydrate, lipid, protein, and fiber metabolism.
Audience: Graduate

2. Articulate the physiological and biochemical mechanisms that regulate macronutrient fate.
Audience: Graduate

3. Integrate macronutrient biochemistry and physiology across organ systems.
Audience: Graduate

4. Articulate how disorders of macronutrient metabolism contribute to human disease.
Audience: Graduate

5. Articulate the basis for macronutrient recommendations across the life span and in disease states.
Audience: Graduate

NUTR SCI 661 – MICRONUTRIENTS: HUMAN PHYSIOLOGY AND DISEASE
3 credits.

Explores the regulatory and structural functions of vitamins and mineral nutrients from the biochemical and molecular perspective with emphasis on issues critical for clinical nutrition.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe in detail how the intake, absorption, transport, and utilization of vitamins and minerals help maintain human health throughout the lifespan.
Audience: Graduate

2. Explain and provide examples for why the dietary requirements of specific vitamins or minerals vary among individuals in the prevention and management of diseases.
Audience: Graduate

3. Evaluate clinical case studies and make predictions about how impaired micronutrient metabolism, micronutrient deficiency, and micronutrient toxicity contributes to the development of human disease.
Audience: Graduate

4. Recommend nutrition support for specific physiological and disease states based on the Nutrition Care Process as a team and as an individual in both oral and written forms.
Audience: Graduate

5. Demonstrate lifelong learning and critical thinking skills necessary for the collection, evaluation, and integration of micronutrient metabolism concepts important for clinical nutrition and patient care.
Audience: Graduate

6. Analyze environmental, molecular factors (e.g. genes, proteins, metabolites) and food in the development and management of disease.
Audience: Graduate

NUTR SCI 662 – ADVANCED COMMUNITY NUTRITION
1 credit.

Community nutrition as it applies to clinical nutrition practice: programs, resources and issues supporting clinical nutrition practice in the community.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the foundations of community nutrition practice.
Audience: Graduate

2. Describe the resources available to clients in the community that will support clinical nutrition needs.
Audience: Graduate

3. Describe requirements for culturally competent care.
Audience: Graduate

NUTR SCI 663 – ADVANCED SPORTS NUTRITION
2 credits.

Integration of foundational nutrition and exercise physiology principles with sports nutrition concepts from a clinical perspective. Evaluation of the unique nutritional requirements for athletes/active individuals on body composition, performance, and timing of nutrients and hydration related to pre-activity, during activity, and post-activity recovery. Application of these concepts with clinical conditions requiring specialized sports nutrition approaches such as diabetes, gastrointestinal disorders, eating disorders, micronutrients deficiencies and life cycle populations (youth/adolescent, pregnant and masters' athletes). Analysis of sports nutrition research to utilize evidenced-based practice and recommendations around ergogenic aids/supplements and other sports nutrition topics.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Expand and adapt foundational knowledge of macronutrient, micronutrient and fluid needs for exercise and activity along with rationale for requirements.
Audience: Graduate

2. Evaluate sports nutrition research on ergogenic aids/supplementation and translate research to practice.
Audience: Graduate

3. Integrate current knowledge of sports nutrition into individual's goals for performance.
Audience: Graduate

4. Apply sports nutrition and medical nutrition therapy concepts to unique athletic situations and varied conditions and special populations.
Audience: Graduate

NUTR SCI 670 – NUTRITION AND DIETETICS PRACTICUM I
3 credits.

The first of two supervised practice experiences in nutrition and dietetics at University of Wisconsin Hospital and Clinics and affiliated sites. Dietetic interns apply their academic training, furthering their competency in: clinical nutrition, food systems management, research, and community experiences.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Repeatable for Credit: No
Last Taught: Spring 2026

NUTR SCI 671 – NUTRITION AND DIETETICS PRACTICUM II
3 credits.

The second of two supervised practice experiences in nutrition and dietetics at University of Wisconsin Hospital and Clinics and affiliated sites. Dietetic interns apply their academic training, furthering their competency in: clinical nutrition, food systems management, research, and community experiences.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Repeatable for Credit: No
Last Taught: Summer 2026

NUTR SCI 675 – NUTRACEUTICALS FOR HEALTHCARE PROFESSIONALS
1 credit.

Overview of the principles and processes necessary to evaluate and utilize bioactive food components and dietary supplements in practice, including federal regulations. Current scientific evidence supporting or refuting the biochemical and physiological efficacy of select bioactive food components and dietary supplements will be addressed.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss current regulation of bioactive food components and dietary supplements
Audience: Graduate

2. Assess quality, purity and identity of dietary supplements
Audience: Graduate

3. Explain basic principles of functional nutrition and how bioactive food components and dietary supplements relate
Audience: Graduate

4. Utilize appropriate resources to obtain current information on bioactive food components and dietary supplements
Audience: Graduate

5. Critically evaluate the research to support or refute the use of selected bioactive food components and dietary supplements
Audience: Graduate

6. Apply knowledge of bioactive food components and dietary supplements to working with patients/clients
Audience: Graduate

7. Examine popular bioactive food components and dietary supplements used in various health conditions
Audience: Graduate

NUTR SCI 681 – SENIOR HONORS THESIS
2-4 credits.

Individual study and research for students completing theses under direct guidance of a Nutritional Science faculty or instructional academic staff member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2016
Learning Outcomes: 1. Review and analyze scientific literature.
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question.
Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research.
Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format.
Audience: Undergraduate

NUTR SCI 682 – SENIOR HONORS THESIS
2-4 credits.

Individual study and research for students completing theses under direct guidance of a Nutritional Science faculty or instructional academic staff member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2017
Learning Outcomes: 1. Review and analyze scientific literature.
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question.
Audience: Undergraduate

3. Write a thesis based on original research.
Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format.
Audience: Undergraduate

NUTR SCI 691 – SENIOR THESIS-NUTRITION
1-4 credits.

Individual study and research for students completing theses under direct guidance of a Nutritional Science faculty or instructional academic staff member.
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Review and analyze scientific literature.
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question.
Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research.
Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format.
Audience: Undergraduate

NUTR SCI 692 – SENIOR THESIS
1-4 credits.

Individual study and research for students completing theses under direct guidance of a Nutritional Science faculty or instructional academic staff member.
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Review and analyze scientific literature.
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question.
Audience: Undergraduate

3. Write a thesis based on original research
Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format.
Audience: Undergraduate

NUTR SCI 699 – SPECIAL PROBLEMS
1-3 credits.

Directed study under direct guidance of a Nutritional Science faculty member or instructional academic staff member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Articulate a clear research question or problem and formulate a hypothesis.
Audience: Undergraduate

2. Identify appropriate research methodologies and collect sound scientific data.
Audience: Undergraduate

3. Apply critical thinking skills to interpret laboratory data and apply problem solving skills to constructively address research setbacks.
Audience: Undergraduate

4. Practice research ethics and responsible conduct in research.
Audience: Undergraduate

5. Communicate scientific ideas and results verbally and in written form effectively
Audience: Undergraduate

NUTR SCI 711 – PERSONALIZED NUTRITION: GENETICS, GENOMICS, AND METAGENOMICS
1 credit.

Genetic factors that modulate the relationships between diet, health, and disease risks, including the effects of differences in our genetic makeup (Nutrigenetics), the regulation of gene expression by nutrients and dietary patterns (Nutrigenomics), and the interactions between diet, gut microbiome, and human hosts (Metagenomics).
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

NUTR SCI 720 – ADVANCED NUTRITION ASSESSMENT
1 credit.

Advanced skills and evolving methods of nutritional assessment. Measurement and interpretation of physical examination and laboratory parameters. Diagnosing malnutrition and nutrient deficiencies, including clinical characteristics used to identify and label the degree of malnutrition.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

NUTR SCI 721 – NUTRITION INFORMATICS
1 credit.

The emerging role of the electronic storage, retrieval and dissemination of food and nutrition related data and the effective use of information for problem solving and decision-making for the dietetics professional.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

NUTR SCI 726 – NUTRITIONAL MANAGEMENT OF GASTROINTESTINAL DISORDERS
3 credits.

Highlights the important interaction between nutrition and the human gastrointestinal tract (GI). Includes exploration of various gastrointestinal related disorders and diseases, and covers contemporary issues, current research, and real-life examples applicable to the field of nutrition, and nutrition providers. Includes instruction from content collaborators and GI nutrition experts. Apply the pathophysiology of GI disorders and disease, deconstruct differential diagnoses; and describe current medical management and dietary requirements of an individual and translate this into appropriate medical nutritional therapy.
Requisites: Declared in Clinical Nutrition MS or the Capstone Certificate in Clinical Nutrition
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Articulate the importance of the interaction between nutrition and the human gastrointestinal tract.
Audience: Graduate

2. Examine, investigate, and summarize the role, current trends and research of the gut microbiome, functional medicine, popular/fad diets and efficacy for treatment of common GI disorders and diseases.
Audience: Graduate

3. Apply the pathophysiology of GI disorders/diseases, deconstruct differential diagnosis', describe current medical management and dietary requirements of an individual-and translate this into appropriate medical nutritional therapy.
Audience: Graduate

4. Reflect on external and internal environment forces that can impact your nutritional recommendations to an individual or family, assess the effectiveness of recommendations, and be able to modify or adjust accordingly.
Audience: Graduate

NUTR SCI 731 – NUTRITION AND METABOLISM RESEARCH IN PROGRESS SEMINAR
1 credit.

Seminars on topics in metabolism and nutritional sciences of interest to bioscience PhD students and reports on graduate student research.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the attributes of an effective research presentation.
Audience: Graduate

2. Evaluate and provide constructive feedback and criticism of their peers' seminar presentations.
Audience: Graduate

3. Interact constructively with peers and other researchers in the field.
Audience: Graduate

4. Relate personal research interests to topics in the larger field of nutrition and metabolism.
Audience: Graduate

NUTR SCI 745 – GRANT WRITING FOR NUTRITIONAL SCIENCES RESEARCH
2 credits.

Interactively address the knowledge, approach, and professional skills (conceptual, technical, and writing) required to create a successful grant proposal and initiate a career in research. Format is focused on the planning and completion of NIH-style grant proposals. Lectures and workshops will address the development of long term goals, hypotheses, and specific aims, as well as research design and methodology. Basic guidelines and approaches to proposal review and scoring are also covered. Several key components of a grant proposal will be generated using an iterative and peer-supported process.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the components of an NIH grant and the content expected within each section during the review process.
Audience: Graduate

2. Succinctly analyze the current literature on a significant topic and identify gaps in knowledge that are worthy of further investigation.
Audience: Graduate

3. Generate overall objectives, hypotheses, and specific aims for projects that fill knowledge gaps.
Audience: Graduate

4. Construct a compelling research plan that describes the significance of completing a project's objectives, the methods to be used in the research, and potential problems and alternative strategies.
Audience: Graduate

5. Give and receive critical constructive feedback and revise research ideas in response.
Audience: Graduate

NUTR SCI 799 – PRACTICUM IN NUTRITIONAL SCIENCES TEACHING
1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

NUTR SCI 875 – SPECIAL TOPICS
1-4 credits.

Special topics on contemporary issues relevant to graduate students studying health and nutrition.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

NUTR SCI 881 – SEMINAR-TOPICS IN HUMAN AND CLINICAL NUTRITION
1 credit.

Varied topics in clinical and human nutrition.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

NUTR SCI/BIOCHEM 901 – SEMINAR-NUTRITION AND METABOLISM (ADVANCED)
1 credit.

Presentation of original research results; discussion of recent articles in animal metabolism and nutrition.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss state-of-the-art research in nutrients and genetic regulation of metabolism
Audience: Graduate

2. Communicate scientific research and critically evaluate experimental results
Audience: Graduate

NUTR SCI 931 – SEMINAR-NUTRITION
1 credit.

Seminar features expert presentations of current research and issue-based applications that represent the breadth of nutritional sciences; topics investigate problems "from molecules to communities".
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

NUTR SCI 991 – RESEARCH NUTRITION
1-12 credits.

Independent research with assigned instructor. Research projects determined by agreement between instructor and student.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

OBSTETRICS AND GYNECOLOGY (OBS&GYN)

OBS&GYN 699 – DIRECTED STUDY
1-5 credits.

Directed study projects as arranged with faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Undergraduate

2. Read and effectively search scientific literature
Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

OBS&GYN 710 – REPRODUCTIVE ENDOCRINE PHYSIOLOGY
3 credits.

A broad grounding in reproductive endocrine physiology at the graduate level, with an emphasis on human and human reproductive health wherever possible. Encompasses an overview of fundamental concepts in endocrinology, the hypothalamic-pituitary axis, steroidogenesis, early embryonic development, pregnancy and maternal-fetal adaptations, and pathologies associated with endocrine disruption and dysregulation. Provides more focus on pathologic pregnancies because such pregnancies lead to a higher risk of adult onset diseases including hypertension, obesity, and metabolic syndrome. Covers pregnancy and pathologic pregnancy in detail.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recall and summarize fundamental concepts in reproductive endocrinology and physiology, with an emphasis on human and human reproductive health.
Audience: Graduate

2. Gain insights into clinical perspectives of pathologies associated with reproductive endocrinology and physiology. Integrate fundamental concepts with clinical perspectives and apply to case studies.
Audience: Graduate

3. Evaluate primary research articles and demonstrate critical reasoning with regards to methods and conclusions.
Audience: Graduate

4. Demonstrate critical thinking with regards to course material through in-class interactive discussion with peers and faculty.
Audience: Graduate

5. Integrate instruction material and personally-researched scientific texts to formulate individual thoughts on topics not directly covered in lecture.
Audience: Graduate

OBS&GYN 711 – ADVANCED REPRODUCTIVE ENDOCRINE PHYSIOLOGY
2 credits.

Advanced learning opportunities in Endocrinology and Reproductive Physiology (ERP) areas, particularly reproduction, with an emphasis on human health whenever possible. Explore scientific questions core to the ERP graduate training program at research level with further in-depth instruction and a focus on cutting-edge knowledge and developments. Topics include pregnancy (ovulation through parturition); embryonic growth and development; lactation biology; and neuroendocrinology. Continuation of OBS&GYN 710. Intended for second- or third-year graduate students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Develop deep understanding of a reproduction topic.
Audience: Graduate

2. Evaluate primary research articles and demonstrate critical reasoning with regard to methods and conclusions.
Audience: Graduate

3. Demonstrate critical thinking with regard to course material through in-class interactive discussion with peers and faculty.
Audience: Graduate

4. Integrate instruction material and personally-researched scientific texts to formulate individual thoughts on topics not directly covered in lecture.
Audience: Graduate

OBS&GYN 712 – CRITICAL THINKING IN REPRODUCTIVE ENDOCRINE PHYSIOLOGY
2 credits.

Provides advanced learning opportunities in Endocrinology and Reproductive Physiology areas, particularly reproduction, emphasizing human health whenever possible. Explores scientific questions core to the ERP graduate training program and teaches how to communicate research findings as presentations. Skills developed include information discovery; organization of papers and identification of argument(s); and creation of documents/reports. Students are the driving force behind achievement of the learning objectives by undertaking learning activities, actively engaging in their peers' activities, and providing constructive feedback to their peers. Prior completion of OBS&GYN 710 recommended but not required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Incorporate knowledge of cutting-edge research in and related to one's research area to a specific research question.
Audience: Graduate

2. Effectively communicate scientific information to course participants through learning activities.
Audience: Graduate

3. Evaluate peer presentations and provide constructive feedback.
Audience: Graduate

4. Distill research knowledge and activities into a variety of scientific outputs.
Audience: Graduate

5. Develop and deliver effective scientific conference-style presentations.

Audience: Graduate

OBS&GYN 800 – CONCEPTS IN ENDOCRINOLOGY AND REPRODUCTIVE PHYSIOLOGY
1-3 credits.

Special topics in endocrinology and/or reproductive physiology. Topics may vary.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and describe key theories, concepts, or methods in endocrinology and/or reproductive physiology.
Audience: Graduate

2. Apply, analyze, or evaluate key theories, concepts, or methods in endocrinology and/or reproductive physiology.
Audience: Graduate

OBS&GYN 909 – OBSTETRICS & GYNECOLOGY INTERNSHIP PREP COURSE
1 credit.

Designed to highlight, review, and allow practice of key concepts in Obstetrics Gynecology. Practice with case simulation, case discussion, didactics, panel discussions, and procedural skills to prepare for success in the first few weeks of an Ob/Gyn residency. Participate in simulations and explore critical interplay between medical care and communication. Discuss common challenges encountered early in residency and throughout an Obstetrics Gynecology career. Taught by a team of faculty, inter-professional staff, residents, fellows, and course directors.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Diagnose and manage common and critical medical conditions
Audience: Graduate

2. Practice initial orders for acute medical/surgical situations
Audience: Graduate

3. Perform duties as first responder to urgent or emergent patient care situations
Audience: Graduate

4. Accurately interpret and apply laboratory information to clinical scenarios
Audience: Graduate

5. Demonstrate performing informed consent procedures
Audience: Graduate

6. Communicate effectively with patients, families and all members of the healthcare team
Audience: Graduate

7. Describe effective transitions of care and demonstrate in simulated environment
Audience: Graduate

8. Describe the essential role of each member of the healthcare team and strategies for maximizing teamwork
Audience: Graduate

9. Demonstrate self-awareness and recognize the importance of adaptability
Audience: Graduate

10. Identify strategies to address stress inherent in transitioning to internship, during residency, and throughout medical career
Audience: Graduate

OBS&GYN 910 – INDEPENDENT READING AND RESEARCH IN OB/GYN
2-8 credits.

Independent research under the direct supervision of Obstetric/Gynecology faculty. Each student's research project is individualized to meet student research goals within context of faculty research needs.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research.
Audience: Graduate

2. Conduct a thorough literature review of the specific research question.
Audience: Graduate

3. Select and apply statistical methodologies appropriate for the proposed analyses.
Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review.
Audience: Graduate

OBS&GYN 916 – ABORTION IN WISCONSIN AND BEYOND: EXPLORING MEDICAL, PUBLIC HEALTH, AND SOCIAL SCIENCE PERSPECTIVES
2 credits.

Contemporary issues surrounding abortion in the United States with an emphasis on the state of Wisconsin. Abortion-related terminology and clinical practice. Legal and structural barriers that shape inequities in access to abortion care. The relationships between access to abortion care and health and wellbeing, using multidisciplinary approaches. The evolution of pro-choice and reproductive justice movements in the United States and Wisconsin.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize contemporary abortion-related terminology and medical practice.
Audience: Graduate

2. Describe the evolution of abortion care in the United States and Wisconsin from the 19th-21st centuries.
Audience: Graduate

3. Identify legal and structural barriers to abortion care both before and after the Dobbs v. Jackson Women's Health U.S. Supreme Court decision.
Audience: Graduate

4. Describe racial/ethnic-, SES, nativity-, disability, and sexual/gender identity-based inequities in access to abortion care.
Audience: Graduate

5. Identify how population health and social scientists establish linkages between barriers to abortion care access and population health and wellbeing.
Audience: Graduate

6. Analyze the contemporary landscape of pro-choice and reproductive justice movements.
Audience: Graduate

OBS&GYN 917 – RACE IN AMERICAN OBSTETRICS & GYNECOLOGY
2 credits.

Survey the history of race in American obstetrics and gynecology. Gain understanding of how race and theories of racial difference informed the development of the field and justified the treatment of Black, indigenous and immigrant patients. Understand the vital contributions of Black enslaved women, other women of color, and Irish immigrants to obstetrics and gynecology. Make connections between racialized historical practices and contemporary norms in reproductive healthcare.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate understanding of how race informed the evolution of obstetrics and gynecology as a discipline
Audience: Graduate

2. Describe the symbiotic relationship between slavery and obstetrics and gynecology and the contributions of enslaved women to key advances in the discipline
Audience: Graduate

3. Discuss the contradictions between physicians' beliefs in racial inferiority of Black and Irish women and the use of their bodies as medical exemplars
Audience: Graduate

4. Describe how structural racism impacted disparities in reproductive health during the antebellum area and late 19th century
Audience: Graduate

5. Demonstrate understanding of how historical stereotyping and treatment of Black women has led to institutionalized stereotyping in present-day obstetrics and gynecology
Audience: Graduate

6. Describe the progression of racial/ethnic disparities in reproductive health from the antebellum era to the present day
Audience: Graduate

OBS&GYN 919 – INDIVIDUALIZED OBSTETRICS & GYNECOLOGY ELECTIVE
2-4 credits.

In-depth exposure to ambulatory gynecology, operative gynecology, normal and high-risk obstetrics and subspecialty clinics, working under the direct supervision of Obstetric/Gynecology faculty, residents, fellows, certified midwives, and advanced practice practitioneers. Individualized to meet each location's capacity and student preference.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members
Audience: Graduate

6. Develop and implement effective patient management plans
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner
Audience: Graduate

8. Review, interpret, and present current literature to support patient care
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care
Audience: Graduate

11. Engage patients in shared decision-making regarding tests, orders, and procedures
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate
Audience: Graduate

14. Understand the process of obtaining informed consent prior to surgical intervention
Audience: Graduate

15. Recognize perioperative conditions that determine patient level of care and interpret physiologic changes that require changing that level of care

OBS&GYN 921 – GYNECOLOGIC ONCOLOGY
2-4 credits.

In-depth exposure to outpatient care of the patient with gynecologic cancer. Occasional opportunities to provide inpatient care to patients students have examined or consulted with in clinic. Work under the direct supervision of the gynecologic oncology faculty, fellows, residents, and APPs. Function at the intern level and play an active role in the care of gynecologic oncology patients.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret, and present current literature to support patient care.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision-making regarding tests, orders, and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

14. Understand the process of obtaining informed consent prior to surgical intervention.
Audience: Graduate

15. Recognize perioperative conditions that determine patient level of care

OBS&GYN 934 – OBSTETRIC HOSPITALIST
4 credits.

In-depth exposure to inpatient care of patients on Labor and Delivery. Work under the direct supervision of the Obstetrics Hospitalist whose primary role is the general medical care of hospitalized patients. Help manage laboring patients, see patients in labor and delivery, triage, and assist with cesarean sections. Round on all patients for whom you are involved in care once patients are post-partum. Function as the residents do at night and assist with cross coverage of inpatient gynecology patients as well as see patients who arrive in the emergency department with obstetric or gynecologic concerns. You may assist in the operating room if the patients who present to the emergency room require immediate surgery.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members
Audience: Graduate

6. Develop and implement effective patient management plans
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner
Audience: Graduate

8. Review, interpret, and present current literature to support patient care
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care
Audience: Graduate

11. Engage patients in shared decision-making regarding tests, orders, and procedures
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate
Audience: Graduate

14. Understand the process of obtaining informed consent prior to surgical

OBS&GYN 935 – TEACHING IN THE CLINICAL SETTING
2 credits.

As Phase 3 students, apply teaching theories to the pursuit of improving the clinical learning environment for Phase 2 students. Unique opportunity for Phase 3 medical students to gain experience with clinical teaching in a capacity similar to how they will function as an intern without the demands and responsibilities of residency, with a focus on establishing good teaching practices. Spend time in the clinical setting advising and mentoring Phase 2 students. No direct participation in patient care. Prepare and deliver short teaching sessions for Phase 2 students from a standard curriculum of learning topics to help Phase 2 students achieve success on Labor Delivery. Develop innovative ways to guide Phase 2 students to effectively utilize clinical resources, navigate the basics of patient assessment, and engage with the patient care team.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the basic tenets of adult learning theory and how this applies to teaching medical students.
Audience: Graduate

2. Describe the difference between formative and summative feedback and be able to provide this feedback to Phase 2 students for both their written clinical documentation and their oral clinical presentations.
Audience: Graduate

3. Compare/contrast the different types of instructional methods available and be able to apply these in the clinical setting.
Audience: Graduate

4. Demonstrate how to give an effectivepresentationon at least 1 topic per week, chosen from a list of central concepts about labor and delivery.
Audience: Graduate

5. Utilize strategies to create a positive learning environment on labor and delivery.
Audience: Graduate

OBS&GYN 938 – OBSTETRICS & GYNECOLOGY INPATIENT ACTING INTERNSHIP
4 credits.

Provides an in-depth exposure to inpatient and operative management of complicated obstetric and gynecologic patients. Work under the direct supervision of a senior resident, fellows and the obstetrician-gynecology faculty. Provides an opportunity to function at the intern level and play an active role in inpatient management of obstetric and gynecologic patients.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the physiology of the female pelvic anatomy including arterial blood supply, venous and lymphatic drainage, neurologic innervation and anatomic relationship between the reproductive organs and the non-gynecologic abdominal viscera.
Audience: Graduate

2. Develop an evidenced-based understanding of the pathophysiology and appropriate management options for common gynecological disorders
Audience: Graduate

3. Explain the indications for and limitations of commonly used gynecological screening tests.
Audience: Graduate

4. Demonstrate basic knowledge regarding common post-operative complications (e.g. wound infection, urinary tract infection, thromboembolism, bleeding) and the appropriate management of each.
Audience: Graduate

5. Demonstrates an understanding of common non-reproductive medical disorders.
Audience: Graduate

6. Identify and explain common gynecological surgical procedures in terms of patient selection and the risks and benefits for each procedure .
Audience: Graduate

7. Describe indications and list the appropriate preoperative evaluations including lab tests, radiographic imaging, and ECG.
Audience: Graduate

8. Identify and describe use of common instruments used in gynecologic surgery.
Audience: Graduate

9. Discuss common intraoperative complications associated with common gynecologic procedures and the appropriate management of each.
Audience: Graduate

10. Discuss the surgical anatomy, common procedural indications, comorbidities, and prophylactic strategies to reduce post-operative complications with common gynecological surgeries.
Audience: Graduate

OBS&GYN/AN SCI/ZOOLOGY 954 – SEMINAR IN ENDOCRINOLOGY-REPRODUCTIVE PHYSIOLOGY
1 credit.

Promotes scientific and professional development. Presenters develop and deliver research presentations to a scientific audience, field questions, and receive critiques about their presentation style and scientific approach. Additional presentations include professional development, career advancement opportunities, and topics of interest to the endocrinology and reproduction community at large.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of cutting-edge research in and related to one's research area through the development and delivery of research presentations
Audience: Graduate

2. Communicate complex ideas in research presentations and questions in a clear and understandable manner
Audience: Graduate

3. Evaluate presentations and providing effective feedback
Audience: Graduate

OBS&GYN 955 – RESPONSIBLE CONDUCT OF RESEARCH FOR BIOMEDICAL GRADUATE STUDENTS
2 credits.

Meets the NIH Institutional Training Grant requirements of repeat/further instruction in the nine recommended areas (1) conflict of interest - personal, professional, and financial; (2) policies regarding human subjects, live vertebrate animal subjects in research, and safe laboratory practices; (3) mentor/mentee responsibilities and relationships; (4) collaborative research including collaborations with industry; (5) peer review; (6) data acquisition and laboratory tools, and management, sharing and ownership; (7) research misconduct and policies for handling misconduct; (8) responsible authorship and publication; (9) the scientist as a responsible member of society, contemporary ethical issues in biomedical research, and the environmental and societal impacts of scientific research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Be knowledgeable of the ethics and philosophies that shape our understandings of the responsible conduct of biomedical research
Audience: Graduate

2. Recognize and apply principles of ethical and professional conduct
Audience: Graduate

3. Be aware of mechanisms and processes available to UW-Madison graduate students to help ensure the practice of the responsible conduct of biomedical research
Audience: Graduate

OBS&GYN 956 – ADVANCED RESPONSIBLE CONDUCT OF RESEARCH FOR BIOMEDICAL STUDENTS
1 credit.

Meets the NIH Institutional Training Grant requirements of repeat/further instruction in the nine recommended areas (1) conflict of interest - personal, professional, and financial; (2) policies regarding human subjects, live vertebrate animal subjects in research, and safe laboratory practices; (3) mentor/mentee responsibilities and relationships; (4) collaborative research including collaborations with industry; (5) peer review; (6) data acquisition and laboratory tools, and management, sharing and ownership; (7) research misconduct and policies for handling misconduct; (8) responsible authorship and publication; (9) the scientist as a responsible member of society, contemporary ethical issues in biomedical research, and the environmental and societal impacts of scientific research. Provides advanced consideration of these topics and illustrates how to implement these responsible conduct and ethical considerations into actual grant- and career-related documents.
Requisites: OBS&GYN 955, PHARMACY 800, NURSING 802, MICROBIO 901, or COMP BIO/PATH-BIO 812 (or SURG SCI 812 prior to Spring 2025)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Be knowledgeable of the ethics and philosophies that shape our understandings of the responsible conduct of biomedical research
Audience: Graduate

2. Understand and utilize some best practices in the responsible conduct of biomedical research
Audience: Graduate

3. Be aware of mechanisms and processes available to UW-Madison graduate students to help ensure the practice of the responsible conduct of biomedical research
Audience: Graduate

4. Obtain a more comprehensive understanding of the responsibilities, requirements, monitoring, and reassurances involved in successful contemporary biomedical scientific research and how they are used in planning for or applying for grant support, as well as in reporting the progress made in grant-funded studies
Audience: Graduate

OBS&GYN 990 – RESEARCH
1-10 credits.

Research supervised by individual faculty members.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Exhibit a broad understanding of endocrinology and reproduction
Audience: Graduate

2. Conduct thesis-related research projects using a variety of approaches under the guidance of the primary faculty advisor
Audience: Graduate

3. Think critically to address research challenges
Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research
Audience: Graduate

OCCUPATIONAL THERAPY (DEPARTMENT OF KINESIOLOGY) (OCC THER)

OCC THER 100 – ORIENTATION TO OCCUPATIONAL THERAPY
1 credit.

An opportunity to explore occupational therapy as a potential career; introduction to the general concepts of human occupation and adaptation; survey of OT practice settings and clinical groups.
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the philosophical base of the profession of Occupational Therapy
Audience: Undergraduate

2. Define Occupational Therapy
Audience: Undergraduate

3. Identify the unique non-clinical and clinical roles of an occupational therapist
Audience: Undergraduate

4. Interpret meaning of occupation and its value to health and well-being
Audience: Undergraduate

5. Identify the domain and process of occupational therapy
Audience: Undergraduate

6. Identify professional behaviors essential to the practice of occupational therapy
Audience: Undergraduate

7. Describe the educational requirements and applicable national and state credentialing involved in becoming an occupational therapist
Audience: Undergraduate

8. Identify how evidence based research impacts occupational therapy
Audience: Undergraduate

9. Evaluate whether your personal goals and values align with the core tenets of occupational therapy and evaluate occupational therapy as a personal career choice
Audience: Undergraduate

OCC THER 630 – CLINICAL AND FUNCTIONAL ANATOMY FOR OCCUPATIONAL THERAPISTS
6 credits.

Highlights anatomical structures and biomechanical principles most relevant to the practice of occupational therapy. Areas of the body deemed most significant to the practice of Occupational Therapy (OT) will be given greater time and explored with greater depth. As critical thinking is an essential component of clinical practice, focus learning on function and thinking through how anatomy influences clinical care, daily occupations, and pathology.
Requisites: Declared in Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Find and name anatomical structures, regions, and systems critical in clinical practice.
Audience: Graduate

2. Integrate anatomical and biomechanical principles to explain occupational function and dysfunction.
Audience: Graduate

3. Predict symptomatic presentation given atypical anatomy.
Audience: Graduate

4. Assess signs and symptoms related to clinical presentations commonly observed by occupational therapists.
Audience: Graduate

5. Critically appraise clinical cases with the goal of forming and defending your opinion about function, pathology and occupational performance.
Audience: Graduate

6. Create a representation of anatomical structures, functions and networks that further the understanding of lay individuals
Audience: Graduate

OCC THER 640 – APPLIED NEUROANATOMY FOR ALLIED HEALTH PROFESSIONALS
3 credits.

Overview of neuroanatomical structures relevant for students in allied health professional training who work with clinical populations. The anatomical regions deemed most significant to practice, given current understandings of the brain and its function, will be explored. The primary focus is on the anatomical regions, neurophysiology, and resultant observable phenomenology related to human function as well as practical clinical application and current research findings.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

OCC THER 650 – ENABLING OCCUPATIONS: INTRODUCTION
2 credits.

Provides an introduction to theory development in occupational therapy, activity analysis, functional mobility and one model of occupational therapy practice. Application of knowledge of gross human anatomy to assess movement in the context of occupation.
Requisites: Declared in Occupational Therapy
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain the process of theory development in occupational therapy and its desired impact and influence on society
Audience: Graduate

2. Provide recommendations and training in techniques to enhance functional mobility, including physical transfers, wheelchair management, and mobility devices
Audience: Graduate

3. Recall primary characteristics of the Person-Environment-Occupation (PEO) model of occupational therapy
Audience: Graduate

4. Discuss activity analysis in the context of personal occupations.
Audience: Graduate

5. Identify how various functional movements relate to occupational performance.
Audience: Graduate

6. Recall various anatomical structures and medical terminology.
Audience: Graduate

7. Demonstrate introductory assessment, including palpatory skills, related to anatomical movements and structures.
Audience: Graduate

8. Appreciate the physical body as a diverse, self-healing mechanism and value the power of physical contact as a tool for healing
Audience: Graduate

OCC THER 651 – CLINICAL CONDITIONS I
1 credit.

An in-depth look at the most common clinical diagnoses relevant to occupational therapy practice with an adolescent and adult population. Covers diagnoses particularly found in physical disability contexts.
Requisites: Declared in Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize primary characteristics of various medical and surgical conditions relative to occupational therapy practice.
Audience: Graduate

2. Identify how different medical conditions impact occupational performance.
Audience: Graduate

3. Demonstrate sound judgment in regard to safety of self and others and adhere to safety regulations throughout the occupational therapy process as appropriate to the setting and scope of practice. This must include the ability to assess and monitor vital signs (e.g., blood pressure, heart rate, respiratory status, and temperature) to ensure that the client is stable for intervention.
Audience: Graduate

OCC THER 652 – CLINICAL CONDITIONS II
1 credit.

An in-depth look at the most common clinical diagnoses relevant to occupational therapy practice with a focus on pediatric and mental health practice settings.
Requisites: OCC THER 651
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recognize primary characteristics of various clinical and surgical conditions relative to occupational therapy practice in mental health and pediatric practice settings.
Audience: Graduate

2. Identify how different pediatric and mental health clinical conditions impact occupational performance.
Audience: Graduate

3. Demonstrate sound judgment in regard to safety of self and others and adhere to safety regulations throughout the occupational therapy process as appropriate to the setting and scope of practice. This must include the ability to assess and monitor vital signs (e.g., blood pressure, heart rate, respiratory status, and temperature) to ensure that the client is stable for intervention.
Audience: Graduate

OCC THER 662 – LEVEL II FIELDWORK A
6 credits.

Conduct evaluations and provide treatment under supervision for an assigned caseload in an approved practice setting to meet minimal competencies for independent practice.
Requisites: Declared in Occupational Therapy MS or Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate entry-level clinical reasoning, provide service that reflects the values and ethical beliefs of the profession, and perform professionally, safely and competently for general occupational therapy practice as evidenced by passing the AOTA Fieldwork Performance Evaluation for the Occupational Therapy Student (AOTA FWPE) by final
Audience: Graduate

2. Understand the influence of psychosocial factors on participation in occupation and therefore integrate client-centered, meaningful, occupation-based activities that provide optimal outcomes.
Audience: Graduate

3. Demonstrate understanding of health literacy while engaging with clients and stakeholders.
Audience: Graduate

4. Demonstrate ability to plan for discharge, in collaboration with the client, by reviewing the needs of the client, caregiver, family, and significant others; available resources, and discharge environment.
Audience: Graduate

5. Prepare, administer, and terminate appropriate evaluations and occupation-based treatment using appropriate safety regulations while providing appropriate documentation (progress note, evaluation, etc.) according to specific facility standards
Audience: Graduate

OCC THER 664 – LEVEL II FIELDWORK B
6 credits.

Conduct evaluations and provide treatment under supervision for an assigned caseload in an approved practice setting to meet minimal competencies for independent practice.
Requisites: Declared in Occupational Therapy MS or Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate entry-level clinical reasoning, provide service that reflects the values and ethical beliefs of the profession, and perform professionally, safely and competently for general occupational therapy practice.
Audience: Graduate

2. Understand the influence of psychosocial factors on participation in occupation and therefore integrate client-centered, meaningful, occupation-based activities that provide optimal outcomes.
Audience: Graduate

3. Demonstrate understanding of health literacy while engaging with clients and stakeholders.
Audience: Graduate

4. Demonstrate ability to plan for discharge, in collaboration with the client, by reviewing the needs of the client, caregiver, family, and significant others; available resources, and discharge environment.
Audience: Graduate

5. Prepare, administer, and terminate appropriate evaluations and occupation-based treatment using appropriate safety regulations while providing appropriate documentation (progress note, evaluation, etc.) according to specific facility standards.
Audience: Graduate

OCC THER 710 – PROFESSIONAL AND LEADERSHIP SKILLS 1: FOUNDATIONS
2 credits.

Addresses the foundations and basic tenets of occupational therapy; and explores the process, domain and parameters of practice. Topics include the history and development of the profession; occupational therapy organizations; certification and licensing; behaviors and responsibilities of occupational therapists; professional ethics; liability; and guidelines and laws governing practice. The Occupational Therapy Practice Framework and selected models, approaches and theoretical frames of reference are explored.
Requisites: Declared in Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the process of theory development in occupational therapy and its desired impact and influence on society.
Audience: Graduate

2. Apply, analyze, and evaluate the interaction of occupation and activity, including areas of occupation, performance skills, performance patterns, context(s) and environments, and client factors.
Audience: Graduate

3. Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context(s) and environments, and client factors to formulate the intervention plan.
Audience: Graduate

4. Demonstrate knowledge of the use of technology in practice, which must include, electronic documentation systems, virtual environments, and Telehealth technology.
Audience: Graduate

5. Demonstrate knowledge of the American Occupational Therapy Association (AOTA) Occupational Therapy Code of Ethics and AOTA Standards of Practice and use them as a guide for ethical decision making in professional interactions, client interventions, employment settings, and when confronted with personal and organizational ethical conflicts.
Audience: Graduate

6. Promote occupational therapy by educating other professionals, service providers, consumers, third-party payers, regulatory bodies, and the public.
Audience: Graduate

7. Apply, analyze, and evaluate scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
Audience: Graduate

8. Demonstrate clinical reasoning to evaluate, analyze, diagnose, and provide occupation- based interventions to address client factors, performance patterns, and performance skills.
Audience: Graduate

9. Analyze and evaluate occupational therapy history, philosophical base, theory, and sociopolitical climate and their importance in meeting society's current and future occupational needs as well as how these factors influence and are influenced by practice.
Audience: Graduate

OCC THER 711 – PROFESSIONAL AND LEADERSHIP SKILLS 2: EFFECTIVE INTERPROFESSIONAL RELATIONSHIPS
2 credits.

Covers respectful and effective communication with all stakeholders for occupational therapy service provision, including clients, caregivers, colleagues, community members and third party payers. Introduces team and group dynamics
Requisites: OCC THER 710
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of various reimbursement systems and funding mechanisms (e.g., federal, state, third party, private payer), appeals mechanisms, treatment/diagnosis codes (e.g., CPT®, ICD, DSM® codes), and coding and documentation requirements that affect consumers and the practice of occupational therapy. Documentation must effectively communicate the need and rationale for occupational therapy services.
Audience: Graduate

2. Demonstrate therapeutic use of self, including one's personality, insights, perceptions, and judgments, as part of the therapeutic process in both individual and group interaction.
Audience: Graduate

3. Identify occupational needs through effective communication with patients, families, communities, and members of the interprofessional team in a responsive and responsible manner that supports a team approach to the promotion of health and wellness.
Audience: Graduate

4. Demonstrate, evaluate, and utilize the principles of the teaching–learning process using educational methods and health literacy education approaches; to design activities and clinical training for persons, groups, and populations and to instruct and train the client, caregiver, family, significant others, and communities at the level of the audience.
Audience: Graduate

5. Demonstrate knowledge of the principles of interprofessional team dynamics to perform effectively in different team roles to plan, deliver, and evaluate patient- and population- centered care as well as population health programs and policies that are safe, timely, efficient, effective, and equitable.
Audience: Graduate

6. Demonstrate effective intraprofessional OT/OTA collaboration to identify the role of the occupational therapist and occupational therapy assistant in the screening and evaluation process and to demonstrate and identify techniques in skills of supervision and collaboration with occupational therapy assistants.
Audience: Graduate

7. Develop strategies for effective, competency-based legal and ethical supervision of occupational therapy and non–occupational therapy personnel. Analyze staff development and professional abilities and competencies of supervised staff as they relate to job responsibilities.
Audience: Graduate

OCC THER 712 – PROFESSIONAL AND LEADERSHIP SKILLS 3: MANAGEMENT
2 credits.

Covers business and management aspects of occupational therapy practice, including leadership skills needed for administrative roles and interprofessional leadership in a variety of settings.
Requisites: OCC THER 711
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate knowledge of and evaluate the business aspects of practice including, but not limited to, the development of business plans, financial management, program evaluation models, and strategic planning.
Audience: Graduate

2. Demonstrate leadership skills in the ability to plan, develop, organize, and market the delivery of services to include the determination of programmatic needs and service delivery options, and formulation and management of staffing for effective service provision.
Audience: Graduate

3. Demonstrate leadership skills in the ability to design ongoing processes for quality management and improvement (e.g., outcome studies analysis and client engagement surveys) and develop program changes as needed to demonstrate quality of services and direct administrative changes.
Audience: Graduate

4. Demonstrate knowledge of personal and professional responsibilities related to liability issues under current models of service provision and varied roles of the occupational therapist providing service on a contractual basis.
Audience: Graduate

OCC THER 722 – ENABLING OCCUPATIONS 1: ADULT FOCUS
4 credits.

Introduce clinical assessment and therapeutic intervention strategies to promote occupational participation and health among adult clients with a focus on orthopedics and medical considerations. Application of skills learned in real-world settings.
Requisites: Declared in Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the unique nature of adult occupations and the physical, mental, temporal and sociocultural factors that influence occupational participation for the person across settings.
Audience: Graduate

2. Assess clients' occupational performance and analyze results to create meaningful, measurable, occupation-based goals, evidence-based treatment strategies, and discharge plans.
Audience: Graduate

3. Demonstrate safe, relevant occupation-based treatment techniques and ability to grade or modify those techniques to accommodate changes in client functional performance as necessary to progress client toward goals.
Audience: Graduate

4. Demonstrate entry-level skill in oral and written communication necessary for effective occupational therapy practice in medical, educational or community-based settings.
Audience: Graduate

5. Develop resilience as a clinician and come to see oneself as a competent member of an interdisciplinary team supporting holistic wellness in the community.
Audience: Graduate

6. Utilize effective interpersonal communication to promote inclusivity of diverse perspectives and provision of culturally-relevant treatment
Audience: Graduate

OCC THER 723 – ENABLING OCCUPATIONS 2: ADULT FOCUS
4 credits.

Advance practice skills across the continuum of care among adult clients. Focus on clinical assessment, therapeutic intervention, and discharge planning to promote occupational participation and health. Application of skills learned in real-world settings.
Requisites: OCC THER 722
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the unique nature of adult occupations and the physical, mental, temporal and sociocultural factors that influence occupational participation for the person across settings
Audience: Graduate

2. Assess clients' occupational performance and analyze results to create meaningful, measurable, occupation-based goals, evidence-based treatment strategies, and discharge plans.
Audience: Graduate

3. Assess environmental and contextual factors for capacity to promote or restrict client participation, and advocate for relevant accessibility options
Audience: Graduate

4. Demonstrate safe, relevant occupation-based treatment techniques and ability to grade or modify those techniques to accommodate changes in client functional performance as necessary to progress client toward goals.
Audience: Graduate

5. Demonstrate entry-level skill in oral and written communication necessary for effective occupational therapy practice in medical, educational or community-based settings
Audience: Graduate

6. Develop resilience as a clinician and come to see oneself as a competent member of an interdisciplinary team supporting holistic wellness in the community
Audience: Graduate

7. Utilize effective interpersonal communication to promote inclusivity of diverse perspectives and provision of culturally-relevant treatment.
Audience: Graduate

OCC THER 724 – ENABLING OCCUPATIONS 3: MENTAL HEALTH ACROSS THE LIFE SPAN
3 credits.

Learn foundational skills necessary to promote, prevent and treat the mental health and psychosocial needs of clients, groups and populations. Topics include: Recovery, mental health and psychosocial assessments and treatments of common mental health disorders and health and wellness promotion.
Requisites: OCC THER 723
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze and evaluate the effects of disease processes including heritable diseases, genetic conditions, mental illness, disability, trauma, and injury on occupational performance.
Audience: Graduate

2. Utilize clinical reasoning to facilitate occupation-based interventions that address client factors. This must include interventions focused on promotion, compensation, adaptation, and prevention.
Audience: Graduate

3. Evaluate client(s)' occupational performance, including occupational profile, by analyzing and selecting standardized and non-standardized screenings and assessment tools to determine the need for occupational therapy intervention(s). Assessment methods must take into consideration cultural and contextual factors of the client. Interpret evaluation findings of occupational performance and participation deficits to develop occupation-based intervention plans and strategies. Intervention plans and strategies must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence.
Audience: Graduate

4. Demonstrate, evaluate, and plan the consultative process with persons, groups, programs, organizations, or communities in collaboration with inter- and intra-professional colleagues
Audience: Graduate

5. Evaluate and discuss mechanisms for referring clients to specialists both internal and external to the profession, including community agencies

Audience: Graduate

6. Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context(s) and environments, and client factors to formulate the intervention plan.
Audience: Graduate

7. Demonstrate clinical reasoning to evaluate, analyze, diagnose, and provide occupation-based interventions to address client factors, performance patterns, and performance skills.
Audience: Graduate

8. Select and apply assessment tools, considering client needs, and cultural and contextual factors. Administer selected standardized and non-standardized assessments using appropriate procedures and protocols. Interpret the results based on psychometric properties of tests considering factors that might bias assessment results (e.g., culture and disability status related to the person and context).
Audience: Graduate

9. Recommend and provide direct interventions and procedures to persons, groups, and populations to enhance safety, health and wellness, and performance in occupations. This must include the ability to select

OCC THER 725 – ENABLING OCCUPATIONS 4: PEDIATRICS
5 credits.

Foundations of pediatric occupational therapy practice including theory and core concepts; models of practice and service delivery; the assessment and treatment process; and alterations in performance components, skills, and participation for children and adolescents with various conditions will be discussed
Requisites: OCC THER 724
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze and evaluate the effects of disease processes including heritable diseases, genetic conditions, mental illness, disability, trauma, and injury on occupational performance.
Audience: Graduate

2. Evaluate client(s)' occupational performance, including occupational profile, by analyzing and selecting standardized and non-standardized screenings and assessment tools to determine the need for occupational therapy intervention(s). Assessment methods must take into consideration cultural and contextual factors of the client. Interpret evaluation findings of occupational performance and participation deficits to develop occupation-based intervention plans and strategies. Intervention plans and strategies must be client centered, culturally relevant, reflective of current occupational therapy practice, and based on available evidence
Audience: Graduate

3. Select and apply assessment tools, considering client needs, and cultural and contextual factors. Administer selected standardized and non-standardized assessments using appropriate procedures and protocols. Interpret the results based on psychometric properties of tests considering factors that might bias assessment results (e.g., culture and disability status related to the person and context)
Audience: Graduate

4. Evaluate and provide interventions for dysphagia and disorders of feeding and eating to enable performance, and train others in precautions and techniques while considering client and contextual factors
Audience: Graduate

5. Demonstrate, evaluate, and plan care coordination, case management, and transition services in traditional and emerging practice environments.
Audience: Graduate

6. Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context(s) and environments, and client factors to formulate the intervention plan.
Audience: Graduate

7. Demonstrate clinical reasoning to evaluate, analyze, diagnose, and provide occupation-based interventions to address client factors, performance patterns, and performance skills
Audience: Graduate

8. Utilize clinical reasoning to facilitate occupation-based interventions that address client factors. This must include interventions focused on promotion, compensation, adaptation, and prevention
Audience: Graduate

9. Recommend and provide direct interventions and procedures to persons, groups, and populations to enhance safety, health and wellness, and performance in occupations. This must include the ability to select and deliver occupations and activities, preparatory methods and tasks (including therapeutic exercise), education and training, and advocacy

OCC THER 726 – LEVEL 1 FIELDWORK A: ADULT PHYSICAL DISABILITIES
1 credit.

Exposure to clinical occupational therapy practice through observation, participation in guided evaluation and treatment procedures, data collection and organization, and communication with clients and other professionals while working in clinical setting under supervision of licensed occupational therapist.
Requisites: Concurrent enrollment in OCC THER 723 is required
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Interpret the evaluation data in relation to accepted terminology of the profession and explain the findings to the interprofessional team.
Audience: Graduate

2. Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context(s) and environments, and client factors to formulate the intervention plan.
Audience: Graduate

3. Monitor and reassess, in collaboration with the client, caregiver, family, and significant others, the effect of occupational therapy intervention and the need for continued or modified intervention.
Audience: Graduate

OCC THER 727 – LEVEL 1 FIELDWORK B: COMMUNITY-BASED MENTAL HEALTH
1 credit.

Exposure to community-based mental health OT practice through observation, participation in guided evaluation and treatment procedures, data collection and organization, and communication with clients and other professionals.
Requisites: OCC THER 726 and concurrent enrollment in OCC THER 724
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Provide care and programs that demonstrate knowledge of applicable national requirements for credentialing and requirements for licensure, certification, or registration consistent with federal and state laws.
Audience: Graduate

2. Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context(s) and environments, and client factors to formulate the intervention plan.
Audience: Graduate

3. Evaluate access to community resources, and design community or primary care programs to support occupational performance for persons, groups, and populations.
Audience: Graduate

OCC THER 728 – LEVEL 1 FIELDWORK C: PEDIATRICS
1 credit.

Exposure to pediatric OT practice through observation, participation in guided evaluation and treatment procedures, data collection and organization, and communication with clients and other professionals.
Requisites: OCC THER 727 and concurrent enrollment in OCC THER 725
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate professional work habits as indicated by receiving passing rating on the AOTA Level I FW Competency Evaluation.
Audience: Graduate

2. Demonstrate ability to establish therapeutic relationships with clients.
Audience: Graduate

3. Establish positive working relationships with individuals from other disciplines and develop an increased awareness of OT's role on an interprofessional team.
Audience: Graduate

4. Demonstrate mature judgment in seeking assistance and responding to feedback in an ethical and courteous manner with both clients and professions.
Audience: Graduate

5. Prepare and administer an evaluation or treatment intervention, formulate therapeutic goals, and develop proposed occupation-based treatment plan.
Audience: Graduate

6. Assist in the therapeutic process safely and effectively, if and when appropriate.
Audience: Graduate

7. Demonstrate activity analysis in areas of occupation, performance skills, performance patterns, context(s) and environments, and client factors to formulate the intervention plan.
Audience: Graduate

8. Demonstrate knowledge of various reimbursement systems and funding mechanisms (e.g., federal, state, third party, private payer), appeals mechanisms, treatment/diagnosis codes (e.g., CPT®, ICD, DSM® codes), and coding and documentation requirements that affect consumers and the practice of occupational therapy. Documentation must effectively communicate the need and rationale for occupational therapy services.
Audience: Graduate

OCC THER 731 – LIVING WELL: WELLNESS PROMOTION FOR GRADUATE STUDENTS
1 credit.

Promote students' wellness as they manage graduate school and its demands. Examines health and well-being related to students' time-use patterns; balance among daily activities; daily routines and habits; circadian rhythms; meaningful moments; sleep; and social connections.
Requisites: Declared in Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe wellness strategies for health and well being in student life
Audience: Graduate

2. Apply wellness concepts to a particular situation of graduate school
Audience: Graduate

3. Discuss the role of occupational therapy in health and wellness promotion.
Audience: Graduate

4. Identify and explain the role of outcome measures in assuring quality of OT services and efficacy of OT interventions across settings, populations and programs.
Audience: Graduate

OCC THER 732 – LIVING WELL: DESIGNING OCCUPATION-BASED WELLNESS PROMOTION
2 credits.

Gain a complex understanding of the form, function and meaning of daily occupations and the role they play in lifestyle change for wellness promotion. Learn the architecture of daily life including its biological and sociocultural foundations for patterning occupational rounds in order to promote and sustain motivation to change.
Requisites: Declared in Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the four occupation-based threshold concepts for lifestyle change.
Audience: Graduate

2. Articulate how the framework and core concepts of the Do/Live/Well framework apply as a theoretical foundation for wellness promotion
Audience: Graduate

3. Critically assess current theory and research examining occupational complexity
Audience: Graduate

4. Identify and explain the effectiveness of strategies for fostering and sustaining lifestyle change for wellness promotion.
Audience: Graduate

5. Apply motivational interviewing skills to coach a peer in lifestyle change.

Audience: Graduate

OCC THER 733 – PROMOTING HEALTH AND WELLNESS FOR POPULATIONS
3 credits.

Explores population-based intervention for occupational justice, health and wellness. Provides a basic set of competencies in the domains central to the field of public health including systems thinking, social determinants of health, and health care reform policy.
Requisites: Declared in Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe a systems thinking approach to guide occupational therapy's contribution to public health
Audience: Graduate

2. Explain the relationship between social determinants of health and health equity/inequity
Audience: Graduate

3. Identify public health concerns relevant to occupational therapy practice
Audience: Graduate

4. Investigate how your own health has been shaped by social determinants of health across the lifespan
Audience: Graduate

5. Synthesize evidence-based information using a systems thinking approach to support policy and program development and/or evaluation
Audience: Graduate

OCC THER 734 – LIVING WELL: OCCUPATION-BASED INTERVENTIONS PROMOTING HEALTH AND WELLNESS
2 credits.

Critically analyze the rigor and evidence supporting current occupation-based interventions for populations served by occupational therapists, create a professional presentation based on this research, and create materials to translate this information for consumer use. Understand key issues and current occupational science trends in fostering access to and equitable participation in occupations.
Requisites: Declared in Occupational Therapy: Entry-Level, OTD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe and critically analyze the research supporting current cutting-edge occupation-based interventions for clients/populations served by occupational therapy.
Audience: Graduate

2. Create professional presentations, and client-friendly materials describing these occupation-based interventions and the evidence supporting their use.
Audience: Graduate

3. Describe and critically analyze how our client's access to occupations and equitable participation in occupations are shaped, limited, and/or supported cultural, social and ecological factors
Audience: Graduate

4. Recognize and critically analyze key characteristics of collaborative relationship-focused practice in Lifestyle Change Interventions.
Audience: Graduate

5. Achieve competency in motivational interviewing skills for independent use with clients and partners in capstone projects
Audience: Graduate

OCC THER 770 – EVIDENCE BASED PRACTICE LAB PRACTICUM
2 credits.

Designed to provide an overview of the research happening within the OT program at UW-Madison and to provide hands-on, mentored experience with generating evidence for practice.
Requisites: OCC THER 771 or concurrent enrollment
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the research programs of UW OT faculty and how these relate to occupation and occupational therapy
Audience: Graduate

2. Gain hands-on research lab experience in one UW OT faculty's lab
Audience: Graduate

3. Critique quantitative and qualitative research in order to analyze and evaluate scholarly activities, which contribute to the development of a body of knowledge including level of evidence, validity of research studies, strength of the methodology, relevance to the profession of occupational therapy.
Audience: Graduate

4. Locate, select, analyze, and evaluate scholarly literature to make evidence-based decisions.
Audience: Graduate

5. Design and implement a scholarly study that aligns with current research priorities and advances knowledge translation, professional practice, service delivery, or professional issues (e.g., Scholarship of Integration, Scholarship of Application, Scholarship of Teaching and Learning).
Audience: Graduate

OCC THER 771 – EVIDENCE BASED PRACTICE 1: BASICS
3 credits.

Provides the opportunity to establish or advance understanding of evidence-based practice through critical exploration of research ethics and approaches. Critically review literature relevant to occupational therapy and determine how research findings can inform practice. First in the evidence-based practice sequence leading to the development of a proposal and completion of a scholarly study.
Requisites: Declared in Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate an understanding of how to design a scholarly proposal in regards to ethical policies and procedures necessary to conduct human-subject research, educational research, or research related to population health.
Audience: Graduate

2. Demonstrate the ability to use quantitative statistics and qualitative analysis to interpret tests and measurements for the purpose of establishing and delivering evidence-based practice.
Audience: Graduate

3. Collect, analyze, and report data in a systematic manner for evaluation of client and practice outcomes. Report evaluation results and modify practice as needed.
Audience: Graduate

4. Interpret criterion-referenced and norm-referenced standardized test scores on the basis of an understanding of sampling, normative data, standard and criterion scores, reliability, and validity.
Audience: Graduate

5. Critique quantitative and qualitative research in order to analyze and evaluate scholarly activities, which contribute to the development of a body of knowledge. This includes, level of evidence, validity of research studies, strength of the methodology, and relevance to the profession of occupational therapy
Audience: Graduate

6. Locate, select, analyze, and evaluate scholarly literature to make evidence based decisions.
Audience: Graduate

7. Design and implement a scholarly study that aligns with current research priorities and advances knowledge translation, professional practice, service delivery, or professional issues (e.g., Scholarship of Integration, Scholarship of Application, Scholarship of Teaching and Learning).
Audience: Graduate

OCC THER 772 – EVIDENCE BASED PRACTICE 2: RESEARCH DESIGN, METHODS, AND ANALYSIS
3 credits.

Supports the development of a research proposal and the skills needed to implement a research project. Develop a research proposal and analyze data to inform practice in occupational therapy. Second in the evidence-based practice sequence leading to the development of a proposal and completion of a scholarly study.
Requisites: OCC THER 771
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Select, apply, and interpret quantitative and qualitative methods for data analysis to include basic descriptive, correlational, and inferential quantitative statistics and analysis and synthesis of qualitative data.
Audience: Graduate

2. Critique quantitative and qualitative research in order to analyze and evaluate scholarly activities, which contribute to the development of a body of knowledge including level of evidence, validity of research studies, strength of the methodology, and relevance to the profession of occupational therapy.
Audience: Graduate

3. Locate, select, analyze, and evaluate scholarly literature to make evidence-based decisions.
Audience: Graduate

4. Design and implement a scholarly study that aligns with current research priorities and advances knowledge translation, professional practice, service delivery, or professional issues (e.g., Scholarship of Integration, Scholarship of Application, Scholarship of Teaching and Learning).
Audience: Graduate

5. Create scholarly reports appropriate for presentation or for publication in a peer reviewed journal that support skills of clinical practice. The reports must be made available to professional or public audiences.
Audience: Graduate

OCC THER 773 – EVIDENCE BASED PRACTICE 3: RESEARCH TRANSLATION
3 credits.

Supports the completion of a scholarly study and the skills needed to translate research to practice. Through a series of lectures, statistics/ writing consultations, and mentored research, students complete and publicly present their scholarly work.
Requisites: OCC THER 772
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Critique quantitative and qualitative research in order to analyze and evaluate scholarly activities, which contribute to the development of a body of knowledge including the level of evidence, validity of research studies, strength of the methodology, relevance to the profession of occupational therapy.
Audience: Graduate

2. Locate, select, analyze, and evaluate scholarly literature to make evidence-based decisions.
Audience: Graduate

3. Design and implement a scholarly study that aligns with current research priorities and advances knowledge translation, professional practice, service delivery, or professional issues (e.g., Scholarship of Integration, Scholarship of Application, Scholarship of Teaching and Learning).
Audience: Graduate

4. Create scholarly reports appropriate for presentation or for publication in a peer reviewed journal that support skills of clinical practice. The reports must be made available to professional or public audiences.
Audience: Graduate

5. Select, apply, and interpret quantitative and qualitative methods for data analysis to include basic descriptive, correlational, and inferential quantitative statistics and analysis and synthesis of qualitative data.
Audience: Graduate

6. Demonstrate an understanding of the process of locating and securing grants and how grants can serve as a fiscal resource for scholarly activities and program development. Create grant proposals to support scholarly activities and program development
Audience: Graduate

OCC THER 811 – APPLIED LEADERSHIP AND MANAGEMENT IN OT
3 credits.

Overview of the historical, theoretical and current practices of leadership, management and advocacy in health care, education and social service settings. Includes a reflective analysis of the student's own leadership and management style. Apply key principles of effective networking, collaboration and interdisciplinary practice to further develop leadership competencies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

OCC THER 812 – CURRENT TRENDS SHAPING OCCUPATIONAL THERAPY PRACTICE
3 credits.

Occupational therapy's role in the history and continuing evolution of health care, education, and social welfare. Discussion of the theoretical, evidence, and policy trends influencing occupational therapy practice across settings. Emphasizes development of leadership skills for shaping, advocating and guiding occupational therapy through a continually evolving practice landscape.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

OCC THER 813 – ADVANCED PRACTICE IN INTERPROFESSIONAL CONTEXTS
3 credits.

Differentiate and define the role of occupational therapy, other professions, and the client in inter-professional practice (IP). Describe models of IP collaborative practice, evaluate evidence supporting effective IP interventions, generate and implement strategies for an IP team to improve quality of services.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021

OCC THER 814 – COMMUNICATING OT TO INTERPROFESSIONAL AUDIENCES
2 credits.

Learn the necessary skills for effectively designing and implementing professional presentations in a variety of interprofessional contexts including educational settings, professional conferences, practice workshops, and scholarly contributions. Review and critique communication from various media.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Compare and contrast adult learning theories and their application in various interprofessional learning situations.
Audience: Graduate

2. State and apply key principles of effective communication to the presentation of information through oral, written, and interactive media.
Audience: Graduate

3. Choose effective communication tools and techniques, including information systems and communication technologies, to facilitate discussions and interactions that enhance effective communication in interprofessional settings.
Audience: Graduate

4. Prepare a professional manuscript for a relevant professional publication of academic journal on a topic related to current practice or capstone project using professional language and writing style to communicate information incorporating the specific publication format.
Audience: Graduate

5. Prepare and present a presentation using appropriate technology and style for targeted audience and demonstrate modifications necessary to the presentation for a different interprofessional audience.
Audience: Graduate

6. Critique the work of peers, providing constructive feedback on their interprofessional presentations and writing.
Audience: Graduate

OCC THER 821 – CASE SYNTHESIS 1
1 credit.

Synthesize learning from previous coursework and apply to cases in a comprehensive way using problem-based learning strategies with an assigned learning group.
Requisites: Declared in Occupational Therapy OTD: Entry Level
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply, analyze, and evaluate scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
Audience: Graduate

2. Demonstrate clinical reasoning to evaluate, analyze, diagnose, and provide occupation-based interventions to address client factors, performance patterns, and performance skills
Audience: Graduate

3. Utilize clinical reasoning to facilitate occupation-based interventions that address client factors. This must include interventions focused on promotion, compensation, adaptation, and prevention.
Audience: Graduate

4. Monitor and reassess, in collaboration with the client, caregiver, family, and significant others, the effect of occupational therapy intervention and the need for continued or modified intervention.
Audience: Graduate

5. Design and implement intervention strategies to remediate and/or compensate for functional cognitive deficits, visual deficits, and psychosocial and behavioral health deficits that affect occupational performance.
Audience: Graduate

6. Develop a plan for discharge from occupational therapy services in collaboration with the client and members of the interprofessional team by reviewing the needs of the client, caregiver, family, and significant others; available resources; and discharge environment.
Audience: Graduate

OCC THER 822 – CASE SYNTHESIS 2
2 credits.

Facilitate learning for peers around cases. Develop a learning case based on fieldwork experience. Synthesize learning from previous coursework with an emphasis on advocacy and population health and apply to cases in a comprehensive way using problem-based learning strategies with an assigned learning group.
Requisites: OCC THER 821
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply, analyze, and evaluate scientific evidence, theories, models of practice, and frames of reference that underlie the practice of occupational therapy to guide and inform interventions for persons, groups, and populations in a variety of practice contexts and environments.
Audience: Graduate

2. Demonstrate clinical reasoning to evaluate, analyze, diagnose, and provide occupation-based interventions to address client factors, performance patterns, and performance skills
Audience: Graduate

3. Utilize clinical reasoning to facilitate occupation-based interventions that address client factors. This must include interventions focused on promotion, compensation, adaptation, and prevention.
Audience: Graduate

4. Monitor and reassess, in collaboration with the client, caregiver, family, and significant others, the effect of occupational therapy intervention and the need for continued or modified intervention.
Audience: Graduate

5. Design and implement intervention strategies to remediate and/or compensate for functional cognitive deficits, visual deficits, and psychosocial and behavioral health deficits that affect occupational performance
Audience: Graduate

6. Develop a plan for discharge from occupational therapy services in collaboration with the client and members of the interprofessional team by reviewing the needs of the client, caregiver, family, and significant others; available resources; and discharge environment.
Audience: Graduate

7. Apply teaching methods to facilitation of group case-based learning process
Audience: Graduate

8. Identify opportunities for advocacy and population health interventions based on individual level cases.
Audience: Graduate

OCC THER 871 – APPLICATION OF OCCUPATIONAL THERAPY EVIDENCE IN THE PRACTICE ENVIRONMENT
2 credits.

Examine and apply to a specific intervention or topic that is relevant to professional development goals and/or capstone project. Leverage appropriate methodologies, analytic tools and procedural reasoning in support of recommendations regarding the application of the intervention or approach in the practice environment.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021

OCC THER 872 – USING INFORMATION TO OPTIMIZE PRACTICE
3 credits.

An introduction to application of informatics in practice including appropriate design, data management procedures and statistical analysis tools. Pursue a practice-relevant question which can be answered using available data.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022

OCC THER 873 – ADVANCED OUTCOME MEASUREMENT IN OCCUPATIONAL THERAPY
3 credits.

Explore quality assurance in OT service delivery (including consumer satisfaction) and objective and subjective functional and occupational performance measures of OT interventions. Includes review of principles of measurement (reliability, validity and clinical utility). Examines general themes and trends in healthcare outcomes measurement and research as well as issues germane to specific areas of OT practice. Learn strategies and skills for assessing the psychometric properties and clinical utility of a variety of outcomes measures.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2022
Learning Outcomes: 1. Identify and explain the role of outcome measures in assuring quality of OT services and efficacy of OT interventions across settings, populations and programs.
Audience: Graduate

2. Identify the domains of the World Health Organization ICF (International Classification of Function) most relevant for evaluating Occupational Therapy practice in context.
Audience: Graduate

3. Describe the conceptual similarities and differences in efficiency, effectiveness and efficacy.
Audience: Graduate

4. Describe the measurement properties of objective and subjective measures of learning outcomes, service provision, function, occupational performance and quality of life.
Audience: Graduate

5. Evaluate the reliability, validity and utility of objective and subjective measures of service provision, learning outcomes, function, occupational performance and quality of life.
Audience: Graduate

6. Develop an outcome measurement plan for a specific area of practice.
Audience: Graduate

7. Apply appropriate outcome measures for evaluating service quality and effectiveness of interventions in a specific area of practice.
Audience: Graduate

OCC THER 880 – INTRODUCTION TO CAPSTONE
1 credit.

Introduces capstone experience and project including providing a step-by-step guide for the development, planning, implementation and dissemination of the entry-level and post-professional occupational therapy doctoral capstone experience and project.
Requisites: Declared in Occupational Therapy
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Differentiate between various scholarly projects including capstone project, thesis, and dissertation.
Audience: Graduate

2. Identify a relevant clinical problem, gap in practice or specific need in the student's area of occupational therapy practice or desired professional development
Audience: Graduate

3. Develop a timeline for completion of the doctoral capstone project.
Audience: Graduate

4. Identify and initiate with potential sites to support a capstone project.
Audience: Graduate

OCC THER 881 – CAPSTONE PROJECT 1
3 credits.

Prepares for Capstone Project Proposal and learning plan for experiential setting connected to proposed project. Complete a problem statement, needs assessment, literature review and plans and implementation methods.
Requisites: OCC THER 880
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify a relevant clinical problem, gap in practice or specific need in the student's area of occupational therapy practice or desired professional development
Audience: Graduate

2. Complete a SWOT analysis and draft a preliminary conceptual model
Audience: Graduate

3. Conduct and summarize a comprehensive needs assessment, including literature review and collection of information from stakeholders
Audience: Graduate

4. Draft and defend a written proposal for an innovative project, program, intervention or approach to the identified problem
Audience: Graduate

5. Develop an evaluation plan for assessing outcomes
Audience: Graduate

OCC THER 882 – CAPSTONE PROJECT II
3 credits.

Complete implementation of individual Capstone Project, analyze the findings and prepare a written and oral presentation of the Capstone Project, as described and approved by the Primary Mentoring Committee.
Requisites: OCC THER 881
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Formulate systems to gather, analyze and interpret data from a practice setting.
Audience: Graduate

2. Translate evidence into best practice for the continued development of the profession.
Audience: Graduate

3. Demonstrate an understanding of the process for locating and securing grants and how grants can serve as a fiscal resource for scholarly and programmatic activities.
Audience: Graduate

4. Develop and implement an inter-professional, scholarly capstone project that addresses an identified service system, intervention or programmatic problem, relates theory to practice and demonstrates synthesis of advanced knowledge in a practice area.
Audience: Graduate

5. Evaluate the outcomes of the capstone project and communicate findings to an inter-professional audience in a clear, understandable manner through a peer-reviewed report or presentation.
Audience: Graduate

6. Empirically monitor client progress and treatment efficacy in practice.
Audience: Graduate

7. Identify and apply appropriate tools for measuring practice outcomes at the individual and systems level.
Audience: Graduate

8. Synthesize current knowledge, available evidence and responses to interventions to inform new approaches to practice problems.
Audience: Graduate

9. Demonstrate the skills necessary to lead and manage an inter-professional team.
Audience: Graduate

OCC THER 883 – DOCTORAL EXPERIENTIAL COMPONENT
6 credits.

An advanced placement that provides an opportunity for applied experiences within their concentration area.
Requisites: OCC THER 664
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate advanced synthesis of knowledge gained in a chosen area including research, policy, leadership, administration, entrepreneurshp, program development or advocacy through successful achieving of individually customized learning goals.
Audience: Graduate

2. Model professional and leadership skills needed to work with multiple stakeholders successfully
Audience: Graduate

3. Communicate effectively with others in a professional setting: a. Interact effectively with clients, colleagues, other professionals, and community members from diverse cultural and ethnic backgrounds on a one-on-one basis and within the context of groups and b. Communicate effectively with varied audiences for varied purposes
Audience: Graduate

4. Complete a Capstone Project connected to the DEC site which meets both the site needs as well as the student learning goals
Audience: Graduate

ONCOLOGY (ONCOLOGY)

ONCOLOGY 401 – INTRODUCTION TO EXPERIMENTAL ONCOLOGY
2 credits.

Biological processes associated with and characteristic of neoplasia.
Requisites: ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate fundamental knowledge and understanding of foundational concepts in the areas of cancer etiology, cancer biology, and cancer prevention and cancer treatment.
Audience: Undergraduate

2. Read and critically evaluate scientific literature.
Audience: Undergraduate

3. Synthesize scientific ideas based upon knowledge gained in the course
Audience: Undergraduate

4. Demonstrate breadth within their learning experiences.
Audience: Undergraduate

5. Communicate complex ideas in a clear and understandable manner.
Audience: Undergraduate

ONCOLOGY/MICROBIO 545 – TOPICS IN BIOTECHNOLOGY
1 credit.

Seminars on current topics in agricultural, medical, and industrial biotechnology such as: microbiological production of food, drink, biopharmaceuticals; production methods, genetic engineering (vectors, recombination cloning), continuous fermentation; bioconversion processes and production of chemicals from biomass; plant biotechnology; transgenic animals.
Requisites: (ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383, or BIOLOGY/BOTANY 130) and (CHEM 104 or 109) or graduate/professional standing
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Attend all lectures on a diverse range of speakers from the Biotechnology sector and related topics.
Audience: Undergraduate

2. Demonstrate an understanding of lectures though lecture evaluation sheets.
Audience: Undergraduate

3. Choose a current topic in Biotechnology and formulate an opinion paper on the challenges and potential utility.
Audience: Undergraduate

ONCOLOGY/M&ENVTOX/PHM SCI/PHMCOL-M/POP HLTH 625 – TOXICOLOGY I
3 credits.

Basic principles of toxicology and biochemical mechanisms of toxicity in mammalian species and man. Correlation between morphological and functional changes caused by toxicants in different organs of the body.
Requisites: (BIOCHEM 501 or 508) and (ANAT&PHY 335, 435, or (BIOCORE 485 and 486)) and PATH 404; or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the physiology and pathology of toxicology, understanding the basicfundamentals of toxicology and toxic agents
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and breakdown of toxicants using a given dataset
Audience: Both Grad & Undergrad

3. Recognize various experimental models to obtain scientific results
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research
Audience: Both Grad & Undergrad

5. Critique an example of toxicology in media and develop a presentation of this example
Audience: Both Grad & Undergrad

6. Explore new areas to assist in career development via journal club
Audience: Graduate

ONCOLOGY/M M & I/PL PATH 640 – GENERAL VIROLOGY-MULTIPLICATION OF VIRUSES
3 credits.

The structure, multiplication, genetics, pathology and control of animal and plant viruses.
Requisites: (GENETICS 466 or 467) and (BIOCHEM 501 or 508) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the major classes of viruses infecting animals and plants, and summarize their basic replication strategies.
Audience: Both Grad & Undergrad

2. Identify the major innate and adaptive antiviral immunity mechanisms of animals and plants, and examples of viral countermeasures against these.
Audience: Both Grad & Undergrad

3. Summarize the burdens and threats of viruses to public health, agriculture, etc.
Audience: Both Grad & Undergrad

4. Identify the major approaches and challenges to virus control at the single organism and host population levels, including why viruses are generally harder to control than bacteria, and major steps in developing new antiviral agents.
Audience: Both Grad & Undergrad

5. Illustrate beneficial uses of viruses and their genes in research, biotechnology and medicine.
Audience: Both Grad & Undergrad

6. Design and evaluate basic experiments to address specific questions in virology.
Audience: Both Grad & Undergrad

7. Read and evaluate primary literature papers in virology.
Audience: Graduate

ONCOLOGY 673 – PURIFICATION AND CHARACTERIZATION OF PROTEIN AND PROTEIN COMPLEXES
2 credits.

The theory and practice of protein purification. Topics covered include conventional and recent protein fractionation techniques; enzyme assays, handling, and characterization; purification strategy; and overproduction of cloned gene products. The emphasis is on micro and laboratory scale purifications.
Requisites: BIOCHEM 508, CHEM 511 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Demonstrate fundamental knowledge and understanding foundational concepts in the areas of protein purification, purification of recombinant proteins, and protein characterization and use.
Audience: Both Grad & Undergrad

2. Read and effectively evaluate current literature.
Audience: Both Grad & Undergrad

3. Actively engage in the latest scholarly research discussions.
Audience: Graduate

ONCOLOGY 675 – ADVANCED OR SPECIAL TOPICS IN CANCER RESEARCH
1-3 credits.

Examines special topics in cancer research. Topics and content will vary each semester and by section of the course.
Requisites: Consent of instructor
Course Designation: Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in Cancer Biology.
Audience: Both Grad & Undergrad

2. Identify and describe key theories, concepts, and methods in Cancer Biology.
Audience: Both Grad & Undergrad

3. Explore a new phenomenon or modality in the Cancer Biology area and apply the knowledge gained to research in the field (graduate student).
Audience: Graduate

ONCOLOGY 699 – SPECIAL RESEARCH PROBLEMS
1-3 credits.

Directed study projects as arranged with instructor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations.
Audience: Undergraduate

2. Read and effectively search scientific literature.
Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills.
Audience: Undergraduate

ONCOLOGY 703 – CARCINOGENESIS AND TUMOR CELL BIOLOGY
3 credits.

Viral, chemical, and physical factors involved in tumor formation in humans and experimental animals; biology and biochemistry of neoplasia, both in vivo and in vitro.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explore new conceptional and technological advancements in Cancer Biology and apply the knowledge gained to research in the field.
Audience: Graduate

2. Demonstrate fundamental knowledge and understanding of foundational concepts in Carcinogenesis and Tumor Cell Biology.
Audience: Graduate

3. Articulate research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of Carcinogenesis and Tumor Cell Biology.
Audience: Graduate

4. Communicate complex ideas in a clear and understandable manner.
Audience: Graduate

5. Read and effectively search scientific literature.
Audience: Graduate

ONCOLOGY 725 – READINGS IN CANCER BIOLOGY
2 credits.

A review and discussion of the current literature on topics related to cancer biology. The emphasis is on the development of skills in data analysis, critical interpretation, and clear writing.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Articulate research problems, potentials, and limits with respect to theory, knowledge, or practice within the field of Cancer Biology.
Audience: Graduate

2. Formulate ideas, concepts, designs, and/or techniques beyond the current boundaries of knowledge within the field of Cancer Biology.
Audience: Graduate

3. Demonstrate breadth within their learning experiences.
Audience: Graduate

4. Communicate complex ideas in a clear and understandable manner.
Audience: Graduate

5. Foster ethical and professional conduct.
Audience: Graduate

ONCOLOGY 735 – GRANT WRITING IN CANCER BIOLOGY
2 credits.

Scientific writing. Evaluation of exemplar fellowship applications. Creation of a research proposal with iterative, constructive feedback. Constructive, articulate feedback on classmates' writing.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the process of grant writing and review.
Audience: Graduate

2. Evaluate and articulate strengths and weaknesses of funding applications.
Audience: Graduate

3. Create a cogent and convincing written rationale for proposed experiments that provides the basis for the preliminary exam and an extramural funding proposal.
Audience: Graduate

4. Build resilience by responding to feedback on writing assignments.
Audience: Graduate

ONCOLOGY 745 – MODELING HUMAN DISEASE IN ANIMALS
1 credit.

Provides a background in the use of animals in the study of human disease and hands-on exposure to common techniques such as tissue collection and processing, surgeries, imaging, and other manipulations. Lectures by basic scientists and clinicians will provide background about each of the organ systems or diseases and the ethics of animal research. Prior to start of course, completion of online animal safety training. Instructions will be provided after enrollment.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe the rationale for choosing a model system for their research
Audience: Graduate

2. Perform procedures or dissections to collect tissues or organs for further investigation
Audience: Graduate

ONCOLOGY 778 – BIOINFORMATICS FOR BIOLOGISTS
3 credits.

Become familiar with bioinformatics theory and principles. Provides real-world experience that can be applied to your own work. Provides a foundation of knowledge that can be used to critically evaluate existing bioinformatics tools that can be used in your work, and in the absence of an appropriate tool, identify the analyses that demand the development of novel tools.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the appropriate analysis tools for common bioinformatics problems, format data, execute the analysis, and adjust necessary parameters.
Audience: Graduate

2. Interpret results of common bioinformatic analysis including their own results as well as the published works of others.
Audience: Graduate

3. Demonstrate competence in bioinformatic analysis by conducting an original analysis of primary data from their own lab or publicly available databases.
Audience: Graduate

4. Understand the assumptions and principles of bioinformatic pipelines and their implications for validity and statistical significance.
Audience: Graduate

ONCOLOGY 901 – SEMINAR
1 credit.

Critical review of selected topics in cancer research.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Organize and present a research presentation, which includes background information, data slides, conclusions, and future directions.
Audience: Graduate

2. Offer constructive feedback to peers on research presentation style and information delivery.
Audience: Graduate

ONCOLOGY 990 – RESEARCH
1-12 credits.

Independent research and writing for graduate students under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Conduct independent research using a variety of approaches.
Audience: Graduate

2. Think critically and independently to address research challenges.
Audience: Graduate

3. Exhibit and foster professional and ethical conduct in their research.
Audience: Graduate

4. Collaborate with other investigators within or outside the thesis lab.
Audience: Graduate

OPERATIONS AND TECHNOLOGY MANAGEMENT (OTM)

OTM 300 – OPERATIONS AND SUPPLY CHAIN MANAGEMENT
3 credits.

Managing operations and supply chains is about people, information, equipment, and materials and how these are combined to produce and/or deliver goods and services to customers. Emphasis is on how systems and processes can be designed, managed, and improved to achieve operations excellence and competitive advantage.
Requisites: Not open to graduate/professional students
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the basics of firm strategy and determine how to align operational and strategic decisions.
Audience: Undergraduate

2. Analyze a manufacturing or service process quantitatively and generate opportunities for improvement.
Audience: Undergraduate

3. Manage quality statistically and describe strategies for maintaining and improving quality.
Audience: Undergraduate

4. Determine effective inventory policies for various product and customer demand characteristics.
Audience: Undergraduate

5. Develop sourcing and design strategies to mitigate risk in supply chains.

Audience: Undergraduate

OTM 351 – BUSINESS PROCESS IMPROVEMENT
3 credits.

Introduction to the terminology, concepts, principles, and techniques for managing and improving business processes.
Requisites: OTM 300
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain how to use root cause analysis to deconstruct a complex problem.
Audience: Undergraduate

2. Identify and apply continuous improvement tools and techniques to production, administrative, distribution, and service-related functions.
Audience: Undergraduate

3. Demonstrate strategic thinking and project management methodologies to establish and measure multi-year improvement strategies to reach a desired future state.
Audience: Undergraduate

4. Create improvement loops to maximize value, eliminate waste and reach an ideal future state for cross-functional organizational activities.
Audience: Undergraduate

5. Analyze large and complex data sets to find patterns, identify key improvements, and substantiate improvement choices in process improvement projects.
Audience: Undergraduate

OTM 365 – CONTEMPORARY TOPICS
1-3 credits.

An exploration of subject areas possibly to be introduced into the business curriculum.
Requisites: Sophomore standing and OTM 300
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

OTM 370 – SUSTAINABLE APPROACHES TO SYSTEM IMPROVEMENT
3 credits.

Organizations employ a variety of improvement approaches to develop sustainable practices. Sustainability concerns such as natural capital, emission buildup, and base of the pyramid are directly addressed by examining innovative system-improvement concepts, while simultaneously strengthening mission-central concerns such as cost, quality, customer, market, revenue, profit, brand, reputation sourcing, and quality of work life.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Identify the forces in an organization's ecosystem that drive sustainability
Audience: Undergraduate

2. Determine the capabilities needed to utilize forces that drive sustainability
Audience: Undergraduate

3. Recommend sustainability improvements that strengthen the organization's core mission
Audience: Undergraduate

4. Apply sustainability principles and/or frameworks to address the challenge of improving an organization's core mission
Audience: Undergraduate

5. Analyze sustainability issues and/or practices using a systems-based approach to support organizational or societal sustainability strategies
Audience: Undergraduate

OTM 399 – READING AND RESEARCH-OPERATIONS AND INFORMATION MANAGEMENT
1-6 credits.

Individual work suited to the needs of undergraduate students may be arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022

OTM 401 – PRODUCT MANAGEMENT
3 credits.

Product management: theories, skills, and tools required to manage a product's lifecycle. Covers all elements of product development from initial ideation to customer use. Emphasis on applying product thinking to building solutions, bringing concepts to life through real-world situations.
Requisites: OTM 300 or declared in the Business Exchange program
Repeatable for Credit: No
Learning Outcomes: 1. Apply skills, templates, and tools for each step of the product management life cycle.
Audience: Undergraduate

2. Describe the terms, roles, responsibilities of a product manager.
Audience: Undergraduate

3. Apply different product management communication methods for key stakeholders across a company including designers and engineers.
Audience: Undergraduate

4. Analyze and compare different product management strategies.
Audience: Undergraduate

5. Describe how to manage product version cycles and multi-product cycles.
Audience: Undergraduate

6. Develop and present a complete product proposal including all elements of the product management lifecycle.
Audience: Undergraduate

OTM/MARKETNG 421 – FUNDAMENTALS OF SUPPLY CHAIN MANAGEMENT
3 credits.

Supply chain management (SCM) is a dynamic, cross-functional discipline that encompasses the areas of strategy, product development/innovation, marketing, finance, sourcing, production, logistics, and technology in both product and service industries. Companies must effectively coordinate these functions not only within the firm, but with business partners and customers around the world. Learn about these core functions in a strategic context. SCM is a strategic component of any business or organization.
Requisites: MARKETNG 300, OTM 300, or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the business purpose and primary functions of supply chain management and their cross-functional linkages/interdependencies across an organization.
Audience: Undergraduate

2. Apply supply chain management in strategic and tactical frameworks to optimize financial, operational, and customer objectives.
Audience: Undergraduate

3. Analyze the influence of supply chain management on business performance and its role in delivering competitive advantage to an organization.
Audience: Undergraduate

4. Identify and apply the economic, political, and business issues that impact how companies develop and execute supply chain strategy including globalization, sustainability, risk management, and ethics/society.
Audience: Undergraduate

OTM/MARKETNG 422 – LOGISTICS MANAGEMENT
3 credits.

Provides a management perspective on the fundamental activities, concepts, and current practices in logistics. Transportation management, order fulfillment, warehousing, global logistics, key performance indicators, outsourcing, and introduction to radio frequency identification and barcoding. Use of case studies and industry speakers.
Requisites: MARKETNG 300, OTM 300, and sophomore standing, or declared in undergraduate Business Exchange program
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate understanding of fundamental logistics principles and fluency in the language of logistics.
Audience: Undergraduate

2. Articulate key activities performed by the logistics function including distribution, transportation, global logistics and inventory control.
Audience: Undergraduate

3. Demonstrate understanding of order fulfillment processes and best practices utilized in supply chain operations.
Audience: Undergraduate

4. Analyze and utilize supply chain data to make business decisions and expand applied data analysis skills.
Audience: Undergraduate

OTM/MARKETNG 423 – PROCUREMENT AND SUPPLY MANAGEMENT
3 credits.

Procurement and supply management is the business function concerned with an organization's acquisition of required materials, services, and equipment. Explores the key aspects of modern supply management including the purchasing process, cost management, negotiation, sourcing strategies, supplier management, category management, acquisition methods for materials and services, and outsourcing.
Requisites: Sophomore standing and (MARKETNG 300 or OTM 300) or declared in undergraduate Business Exchange program
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the importance of supply management, its functions and impact within firms, and the managerial strategies and operational tactics required of entry-level professionals in supply change management.
Audience: Undergraduate

2. Analyze a scenario to determine the appropriate sourcing strategy, [and] propose the most effective supplier management processes.
Audience: Undergraduate

3. Apply, at a foundational level, the necessary legal and ethical considerations to the examination and implementation of supply management.
Audience: Undergraduate

4. Apply a proper process in evaluating a decision to outsource and utilize a rigorous approach to the development of service contracts.
Audience: Undergraduate

5. Assess which of the generic purchasing and P2P process steps add value, explain the basis for that assessment, and suggest possible improvement methods.
Audience: Undergraduate

6. Demonstrate how to operationalize cost management and use it to make decisions.
Audience: Undergraduate

7. Prepare a risk assessment utilizing the knowledge and tools acquired in class.
Audience: Undergraduate

OTM/MARKETNG 427 – INFORMATION TECHNOLOGY IN SUPPLY CHAINS
3 credits.

Explores the concepts and practices of using information technology to effectively manage and operate supply chains of businesses and other organizations. Topics include supply chain processes, enterprise resource planning (ERP) system implementation, and supply chain simulations using SAP software.
Requisites: MARKETNG 300, OTM 300, and sophomore standing, or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe key business processes related to supply chain management
Audience: Undergraduate

2. Effectively utilize an ERP system to execute key business processes related to supply chain management and have an intermediate level of ability to navigate within an ERP system
Audience: Undergraduate

3. Identify and analyze appropriate data and information from an ERP system as a means to making measurable improvements in the performance of a business
Audience: Undergraduate

4. Understand and recognize principles and best practices of implementing enterprise systems and have the ability to articulate common implementation mistakes
Audience: Undergraduate

OTM/MARKETNG 428 – SUPPLY CHAIN CAPITAL MANAGEMENT
3 credits.

Introduce the set of activities and solutions available to finance an organization's supply chain infrastructure. Define and study the related influencers. Investigate risks and mitigation techniques relative to associated metrics and strategies. Analyze multiple cases in group study work. Identify and recommend improvement opportunities.
Requisites: Junior standing and (MARKETNG 300 or OTM 300), or declared in the Business Exchange program
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze multiple aspects of a supply chain network and provide recommendations on how to improve operations and efficiency of a business.
Audience: Undergraduate

2. Recognize and compose appropriate business contract language.
Audience: Undergraduate

3. Recognize and interpret financial statements to understand the current financial state of the organization; identify improvement opportunities and develop solutions to improve the entity's performance.
Audience: Undergraduate

4. Construct specific actions to take to improve working capital efficiency and release.
Audience: Undergraduate

5. Articulate the impact of geopolitical and international issues on supply chains.
Audience: Undergraduate

OTM/MARKETNG 429 – GLOBAL EXPERIENCE: SUPPLY CHAIN MANAGEMENT
1-2 credits.

Companies and organizations operate globally - sourcing, producing, and distributing to/from markets around the world. For business leaders in this environment, political, economic, historical, and cultural frameworks are critical to understand and navigate. Learn and explore these themes via classroom and applied experiences in global supply chain management.
Requisites: Consent of instructor
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply supply chain management theory and practice in a global and industry-specific context
Audience: Undergraduate

2. Analyze how cultural, political, economic, and historical factors impact global business generally and industry-specific
Audience: Undergraduate

3. Develop cultural awareness and appreciation through interactions with students, faculty, and business professionals in the host country
Audience: Undergraduate

OTM 451 – SERVICE OPERATIONS MANAGEMENT
3 credits.

Application of operations management principles to the analysis of service-delivery systems in profit and nonprofit organizations. Topics include designing service-delivery systems, location and layout, operations planning and control, yield management, technology and information systems, and service quality management.
Requisites: OTM 300
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Utilize qualitative frameworks and quantitative tools to explain the tradeoffs involved in achieving a timely, high-quality, profitable service operations.
Audience: Undergraduate

2. Describe the function and importance of each element in the design of a service utilizing the Service Design Framework: Service Act, Strategic Priorities, Delivery System, Funding Mechanism.
Audience: Undergraduate

3. Evaluate service strategies and delivery systems in real companies utilizing the Service Design Framework, including identification of the service strategy being applied and explaining how facets of the service delivery system support or weaken this strategy.
Audience: Undergraduate

4. Recognize how to manage variability and uncertainty in delivery systems through appropriate capacity planning, queue design, and revenue management.
Audience: Undergraduate

OTM 452 – PROJECT MANAGEMENT
3 credits.

During their careers, managers spend a significant amount of time either participating in or leading projects. While every project is unique, some concepts and tools in project management apply to a wide range of projects. The aim of this course is to equip students with these concepts and tools, and to develop them into successful project managers (and team members). With that aim in mind, the course will emphasize quantitative aspects of project management while also discussing more qualitative aspects. Key topics include Project Initiation, Scheduling, Resource Management, Monitoring, Valuation, Rework, Agile Project Management, Project Management Analytics and Contracting.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate a project's benefits utilizing net present value and other analysis tools.
Audience: Undergraduate

2. Initiate a project including task breakdown and estimation, stakeholder analysis, resource allocation, and creating a project schedule.
Audience: Undergraduate

3. Monitor and track projects utilizing Earned Value Analysis and other project management tracking tools.
Audience: Undergraduate

4. Utilize and compare Agile and Waterfall project management methodologies.
Audience: Undergraduate

5. Demonstrate use of collaborative project management tools such as GANTT charts and related software tools (i.e. SmartSheet), and others for project tracking and resource planning.
Audience: Undergraduate

6. Collaborate in a team environment while applying various project management techniques to a real-world project.
Audience: Undergraduate

OTM 453 – OPERATIONS ANALYTICS
3 credits.

Focuses on the application of analytical methodologies to problems that arise in the context of a company's operations and supply chains. Touches on all three dimensions of analytics (descriptive, predictive, and prescriptive). Emphasis on data and real industry data collected from the university, alumni, and executive board members when possible. Explore, analyze, and utilize such data in a hands-on way, using a variety of software tools. Significantly driven by a set of case problems as opposed to systematic coverage of methodologies.
Requisites: OTM 300 and (GEN BUS 306, ECON 310, MATH 331, STAT/MATH 309, or 431), or declared in undergraduate Business Exchange program
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize patterns and relationships that provide insights into business problems.
Audience: Undergraduate

2. Choose and apply data-based forecasting methods, and evaluate the performance of such methods to inform operations decisions.
Audience: Undergraduate

3. Engineer spreadsheet models for decision-support leveraging optimization and simulation tools.
Audience: Undergraduate

4. Apply critical thinking to complex real-world problems by formulating appropriate questions, making implementable assumptions, and interpreting results of analyses.
Audience: Undergraduate

5. Work effectively in teams on analytics projects.
Audience: Undergraduate

6. Communicate analytics and insights through presentations and written reports.
Audience: Undergraduate

7. Develop basic skills using Tableau visualization software and the statistical software R.
Audience: Undergraduate

8. Develop intermediate skills using Excel.
Audience: Undergraduate

OTM/I SY E/MATH/STAT 632 – INTRODUCTION TO STOCHASTIC PROCESSES
3 credits.

Topics include discrete-time Markov chains, Poisson point processes, continuous-time Markov chains, and renewal processes. Applications to queueing, branching, and other models in science, engineering and business.
Requisites: (STAT/MATH 431, 309, STAT 311, or MATH 531) and (MATH 320, 340, 341, 345, 375, 421, or 531), graduate/professional standing, or declared in Mathematics VISP (undergraduate or graduate)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Natural Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recall and state the formal definitions of the mathematical objects and their properties for stochastic processes (e.g., discrete space Markov chains, Poisson processes, renewal processes, branching processes, etc.).
Audience: Both Grad & Undergrad

2. Use such definitions to argue that a mathematical object does or does not have the condition of being a particular type or having a particular property (e.g., irreducibility, aperiodicity, recurrence, transience, the Markov property, etc.).
Audience: Both Grad & Undergrad

3. Recall and state the standard theorems of stochastic processes. (e.g., laws of large numbers for Markov chains, existence of limiting/stationary distributions, law of large numbers for renewal processes, etc.) and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Both Grad & Undergrad

4. Construct mathematical arguments related to the above definitions, properties, and theorems, including the construction of examples and counterexamples.
Audience: Both Grad & Undergrad

5. Convey arguments in oral and written forms using English and appropriate mathematical terminology, notation and grammar.
Audience: Both Grad & Undergrad

6. Model simple real life situations by means of discrete-space stochastic processes and calculate probabilities associated with those processes.
Audience: Both Grad & Undergrad

7. Identify applications of course content in current areas of research.
Audience: Graduate

OTM 654 – PRODUCTION PLANNING AND CONTROL
2-3 credits.

The role of materials and capacity planning and control in business operations. Manufacturing Resource Planning Systems: aggregate planning, material requirements planning, capacity planning, operations scheduling. Procedures for cellular manufacturing systems. Costing issues in modern planning and control systems.
Requisites: Sophomore standing and OTM 300
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Recognize how inventory planning and replenishment, materials requirements planning, sales & operations planning, master scheduling, capacity resource planning and management, and scheduling execution activities work within a Supply Chain Management framework.
Audience: Undergraduate

2. Apply world class ERP software (SAP) to conduct Supply Chain Management.
Audience: Undergraduate

3. Identify the dynamics of Enterprise Resource Planning (ERP) systems that interface within a Supply Chain Management (SCM) framework.
Audience: Undergraduate

4. Explain MA5 ERP implementation methodology (visioning, planning, design, construction and delivery).
Audience: Undergraduate

5. Explain how to integrate various methodologies for replenishment planning.
Audience: Undergraduate

6. Analyze complex operations projects as a means to understand the strategic thinking framework for Supply Chain Management (SCM).
Audience: Undergraduate

7. Demonstrate how real Supply Chain Management is variable.
Audience: Undergraduate

OTM 700 – OPERATIONS AND SUPPLY CHAIN MANAGEMENT
2-3 credits.

Management of operations throughout an organization or supply chain. Emphasizes the coordination of resources to improve cost, quality, and customer service. Topics include capacity and materials management, operations strategy, and process improvement.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Assess the alignment of operational capabilities with firm strategy and decisions made in other parts of the organization, and articulate how operations can deliver value to customers and the firm.
Audience: Graduate

2. Understand key operations principles and tools, and how they can be used to support process improvement.
Audience: Graduate

3. Evaluate an organization's work processes to assess system capacity and responsiveness.
Audience: Graduate

4. Understand the impact that variability has on process performance, and choose appropriate capacity levels to manage this impact.
Audience: Graduate

5. Utilize appropriate models to identify good inventory ordering policies, and identify forces that drive inventory management decisions.
Audience: Graduate

6. Work effectively in a team to solve complex operational problems.
Audience: Graduate

OTM 701 – PRODUCT MANAGEMENT
2-3 credits.

Introduction to both the technical and interpersonal sides of developing and managing a product, from ideation to application and revision and launch. Key tools and frameworks including agile software development, product road mapping and design thinking are included.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the roles and responsibilities of product managers in high-tech businesses
Audience: Graduate

2. Apply key skills for managing all aspects of the product management life cycle
Audience: Graduate

3. Articulate key principles and concepts for comparative analysis of different product management strategies
Audience: Graduate

4. Apply concepts in decision-theoretic frameworks to enhance business efficacy
Audience: Graduate

5. Demonstrate how to effectively communicate product management strategies and plans to various stakeholders across a business enterprise
Audience: Graduate

OTM 702 – DIGITAL STRATEGY
2 credits.

Helps develop the critical thinking skills necessary to assess how digitization shapes business strategy, innovation, and operations in firms. Prepares students to analyze and evaluate business challenges for maximizing the impact of digitization on products, processes, and services in different settings.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define the digital economy and identify current and emerging technologies
Audience: Graduate

2. Summarize digitization and illustrate its influence on innovation, transformation, and disruption
Audience: Graduate

3. Describe the emerging models of competition and entrepreneurship in the digital economy
Audience: Graduate

4. Analyze digital investments and integrate them with other business processes and activities
Audience: Graduate

5. Apply managerial practices to leverage digital platforms effectively in organizations
Audience: Graduate

OTM 703 – COMPETING THROUGH ANALYTICS
2 credits.

Introduction to business analytics, machine learning and artificial intelligence from a managerial perspective. Covers identifying opportunities to capture data, learning about the current trends in and possibilities with data mining, converting analytics insights into action and evaluating your organization's readiness to compete with analytics.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe different types of analytics and their uses in relation to their industries: descriptive, predictive and prescriptive.
Audience: Graduate

2. Articulate the value of different types of structured and unstructured data from varying sources such as social media, CRM systems, IoT sensors, etc.
Audience: Graduate

3. Identify the strategic opportunities for improving efficiency, growth, and innovation using data and analytics.
Audience: Graduate

4. Explain the new-found challenges related to Ethical AI and Algorithmic Bias.
Audience: Graduate

OTM 714 – SUPPLY CHAIN ANALYTICS
2-3 credits.

The ability to extract information from data has become essential for companies that want to remain competitive - and therefore essential for students aspiring to become successful managers. Provides an understanding of various analytics methodologies and concepts, and the ability to apply these to business problems related to supply chain management and operations management. Key topics include Data Visualization, Time Series Forecasting, Linear Regression, Classification Methods, Association Rules, Cluster Analysis and Text Mining.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine data sets to recognize patterns and relationships in the data that provide insights into business problems
Audience: Graduate

2. Apply principles of data visualization and presentation to real business problems
Audience: Graduate

3. Develop basic skills using Tableau visualization software
Audience: Graduate

4. Apply methods of forecasting product demand and measure the performance of such methods
Audience: Graduate

5. Apply a variety of machine learning techniques (such as logistic regression, K nearest neighbors classification, association rules, cluster analysis, text mining) to perform analysis and/or make predictions and help solve business problems
Audience: Graduate

6. Develop basic skills using the statistical analysis language R
Audience: Graduate

OTM/MARKETNG 722 – LOGISTICS MANAGEMENT
2-3 credits.

A foundation in transportation, order fulfillment, warehousing, materials planning including MRP, demand planning, import/export fundamentals, ERP systems, supply chain metrics, and leading supply chain technologies such as RFID.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate an understanding of fundamental logistics principles and fluency in the language of logistics.
Audience: Graduate

2. Recognize the key activities performed by the logistics function including distribution, transportation, global logistics, and inventory control.
Audience: Graduate

3. Demonstrate an introductory level of understanding of information technology used in logistics operations.
Audience: Graduate

4. Analyze and use supply chain data to make business decisions in order to expand their applied data analysis skills.
Audience: Graduate

OTM/MARKETNG 724 – STRATEGIC GLOBAL SOURCING
2-3 credits.

Supply management (procurement) is widely recognized as one of the most critical elements in global supply chain management. The function plays a major role in maximizing the value and the integration of supply chain operations. Explores the key aspects of modern supply management including functional responsibilities and exemplary practices for major industry sectors.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the functions, strategies, tactics, and analytical tools utilized in the sourcing function.
Audience: Graduate

2. Analyze scenarios to determine appropriate sourcing strategies and the most effective supplier management processes.
Audience: Graduate

3. Explain and apply components of sourcing strategy including supplier collaboration, risk assessment, ethics, make or buy considerations, and cost-plus modeling.
Audience: Graduate

4. Evaluate outsourcing decisions and utilize a rigorous approach to the development of service contracts.
Audience: Graduate

5. Demonstrate how to operationalize cost management for sourcing decisions.
Audience: Graduate

OTM/MARKETNG 726 – SUPPLY CHAIN STRATEGY
3 credits.

Focuses on strategic issues and current theory and practice in supply chain management. Effective design and management of supply chain resources is a key source of competitive advantage for organizations. Supply chain management is a cross-functional discipline that concentrates on the management of goods, services, and information among all links in the value chain.
Requisites: (MARKETNG 300 and OTM 300) or (MARKETNG 700 and OTM 700) and graduate/professional standing, or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Summarize the current theory and practice of supply chain management (SCM)
Audience: Graduate

2. Describe the emergence of SCM as a management function and academic discipline in a global economy
Audience: Graduate

3. Recognize the role of supply chain management in emerging business models
Audience: Graduate

4. Identify supply chain networks and the drivers of supply chain design
Audience: Graduate

5. Describe the impact of product design and innovation on supply chain design and costs
Audience: Graduate

6. Apply the importance of internal coordination and external collaboration to firm performance
Audience: Graduate

7. Demonstrate understanding of the critical and integrative role of supply chain management in business and society
Audience: Graduate

OTM/MARKETNG 727 – INFORMATION TECHNOLOGY IN SUPPLY CHAINS
3 credits.

Explores the concepts and practices of using information technology to effectively manage and operate supply chains of businesses and other organizations. Topics include supply chain processes, enterprise resource planning (ERP) system implementation, and supply chain simulations using SAP software.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe key business processes related to supply chain management.
Audience: Graduate

2. Effectively utilize an ERP system to execute key business processes related to supply chain management and have an intermediate level of ability to navigate within an ERP system
Audience: Graduate

3. Identify and analyze appropriate data and information from an ERP system as a means to making measurable improvements in the performance of a business
Audience: Graduate

4. Understand and recognize principles and best practices of implementing enterprise systems and have the ability to articulate common implementation mistakes
Audience: Graduate

OTM/MARKETNG 728 – SUPPLY CHAIN CAPITAL MANAGEMENT
2-3 credits.

Supply chain capital management refers to the set of activities and solutions available to finance an organization's supply chain infrastructure. As supply chains become more extended and complicated a need has developed to both manage and fund the supply network. Define and study the various influencers on the supply chain capital structure. Investigate risks, mitigation techniques, metrics and themes relating to the topic.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze multiple aspects of a supply chain network and provide recommendations on how to improve operations and efficiency of a business.
Audience: Graduate

2. Recognize and compose appropriate business contract language.
Audience: Graduate

3. Recognize and interpret financial statements to understand the current financial state of the organization; identify improvement opportunities and develop solutions to improve the entity's performance.
Audience: Graduate

4. Construct specific actions to take to improve working capital efficiency and release.
Audience: Graduate

5. Articulate the impact of geopolitical and international issues on supply chains.
Audience: Graduate

OTM 737 – GLOBAL SUPPLY CHAIN
2 credits.

Strategies, techniques, and best practices of global supply chain management through the lens of recent supply chain disruptions. Topics include global logistics strategy, supply chain risk management, international transportation methods, international terms of commerce, outsourcing strategy, and supply chain IT systems.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate understanding of fundamental global supply chain principles and fluency in the language of supply chain management.
Audience: Graduate

2. Articulate business challenges related to recent supply chain disruptions and relate strategies and frameworks from the course to address these challenges.
Audience: Graduate

3. Describe key management functions performed by supply chain practitioners including establishing a global logistics strategy, setting supply chain metrics, assessing and building supplier resilience, managing global transportation systems, and establishing outsourcing relationships.
Audience: Graduate

4. Utilize an enterprise resource planning (ERP) system to execute global supply chain business processes while analyzing appropriate data and information as a means to make measurable improvements in the performance of a business.
Audience: Graduate

5. Identify country-specific aspects of this country’s supply chain infrastructure and logistics service providers.
Audience: Graduate

OTM 751 – SERVICE OPERATIONS MANAGEMENT
3 credits.

Application of operations management principles to the analysis of service-delivery systems in profit and nonprofit organizations. Topics include designing service-delivery systems, location and layout, operations planning and control, yield management, technology and information systems, and service quality management.
Requisites: OTM 700 and GEN BUS 704
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Utilize qualitative frameworks and quantitative tools to explain the tradeoffs involved in achieving a timely, high-quality, profitable service operations.
Audience: Graduate

2. Describe the function and importance of each element in the design of a service utilizing the Service Design Framework: Service Act, Strategic Priorities, Delivery System, Funding Mechanism.
Audience: Graduate

3. Evaluate service strategies and delivery systems in real companies utilizing the Service Design Framework, including identification of the service strategy being applied and explaining how facets of the service delivery system support or weaken this strategy.
Audience: Graduate

4. Recognize how to manage variability and uncertainty in delivery systems through appropriate capacity planning, queue design, and revenue management.
Audience: Graduate

OTM 752 – PROJECT MANAGEMENT
1-3 credits.

During their careers, managers spend a significant amount of time either participating in or leading projects. While every project is unique, some concepts and tools in project management apply to a wide range of projects. Equips students with these concepts and tools, and to develop them into successful project managers (and team members). Focuses on broadly applicable concepts and methods and will cover both qualitative and quantitative aspects of project management. Key topics include Project Initiation, Scheduling, Resource Management, Monitoring, Valuation, Risk Management, Agile Project Management, Project Portfolio Management and Contracting.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. How to manage time and resources in a project.
Audience: Graduate

2. How to develop a project charter.
Audience: Graduate

3. How to deal with risk and uncertainty in a project.
Audience: Graduate

4. How to monitor and control a schedule and budget.
Audience: Graduate

5. Differentiate between traditional and agile project management approaches.
Audience: Graduate

6. Understand the complexity and strategic nature of project portfolio decisions.
Audience: Graduate

7. Understand details of contracting in a project.
Audience: Graduate

OTM 753 – HEALTHCARE OPERATIONS MANAGEMENT
2-3 credits.

Healthcare delivery systems around the world struggle with three fundamental issues: patient access to care, quality and safety in the care process (including patient and staff satisfaction), and cost of care. These issues will be examined along with selected analysis and improvement approaches that the discipline of Operations Management can offer. Different types of both clinical and non-clinical processes in hospital settings are illustrated.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply common terminology and concepts as used in various healthcare delivery environments.
Audience: Graduate

2. Describe commonly recognized operational and financial problems with healthcare delivery systems.
Audience: Graduate

3. Explain different ways to design, organize, and manage healthcare delivery systems.
Audience: Graduate

4. Identify various key measures used to assess healthcare system performance.
Audience: Graduate

5. Explain various process types in healthcare delivery systems.
Audience: Graduate

6. Understand how to improve the success of sustaining and spreading healthcare system performance and practices.
Audience: Graduate

7. Map patient and information flows, analyze system capacity, and apply operational performance metrics.
Audience: Graduate

8. Analyze problems in healthcare delivery systems and apply A3 Thinking and selected operations management/Lean Tools in developing proposals for solution.
Audience: Graduate

9. Analyze delivery systems from an operational perspective, while also considering patient experience and staff satisfaction.
Audience: Graduate

10. Recognize managerial issues surrounding attempts to resolve problems in healthcare delivery and adapt solution implementations accordingly.
Audience: Graduate

OTM 758 – MANAGING TECHNOLOGICAL AND ORGANIZATIONAL CHANGE
3 credits.

Issues surrounding stretegic decisions to adopt new technologies and modern improvement philosophies, the impact these will have on the organization and its members, obstacles preventing successful implementations, and the effective management of change processes. Change triggered by process technologies, and models of change management, form the core of the course.
Requisites: OTM 700
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023

OTM 760 – MANAGING BY DESIGN
2-3 credits.

Exploration of design as a new practice in management that serves the need for identifying innovation opportunities in all types of organizations. Includes readings and cases in design/management and a set of creative projects that advance design skills in the context of management.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the relevance of design ideas to management practice – how to do more with less, to align and lead teams through a lean, efficient and vetted process for creative innovation.
Audience: Graduate

2. Describe the role and potential of digital technologies in delivering novel experiences.
Audience: Graduate

3. Describe how synthetic thinking complements analytic thinking.
Audience: Graduate

4. Practice considering the human experience of products, services, and systems.
Audience: Graduate

5. Explain how design can operate at all levels in an organization and is not limited to obvious domains, such as product development or communications department.
Audience: Graduate

6. Apply creative ideas and methods of design that develop management skills and techniques, i.e., make small bets fast, evaluate failure intelligently and harness breakthroughs to propel company growth or social good.
Audience: Graduate

7. Develop skills and perspectives on in-market experiments that save time and resources while revealing smarter outcomes.
Audience: Graduate

8. Reflect on how you can become a more innovative thinker and leader.
Audience: Graduate

OTM 765 – CONTEMPORARY TOPICS
1-4 credits.

Exploration of advanced subject areas possibly to be introduced into the business curriculum.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

OTM 770 – SUSTAINABLE APPROACHES TO SYSTEM IMPROVEMENT
4 credits.

Innovative system-improvement concepts and approaches that sustainably strengthen mission-central concerns such as quality, cost, customers, markets, revenue, profit, brand, reputation, sourcing, quality of work life, natural capital, buildup of concentrations and base of the pyramid.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021

OTM 777 – TECHNOLOGY STRATEGY AND PRODUCT MANAGEMENT APPLIED LEARNING
1 credit.

Exposure to emerging and current topics in Technology Strategy and Product Management (TSPM) through applied learning experiences that may include case studies, guest speakers, industry meetings, and career and leadership development exercises and workshops.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Expand professional network and reflect on interactions with industry professionals
Audience: Graduate

2. Identify career pathways and roles within TSPM (Technology Strategy and Product Management)
Audience: Graduate

3. Demonstrate professional skills, both written and verbal
Audience: Graduate

OTM/E P D/GEN BUS 784 – PROJECT MANAGEMENT ESSENTIALS
1 credit.

Techniques that will help to plan, execute, and deliver projects with desired scope on time and on budget. Learn to document clear project objectives and goals, accurately estimate project time and costs, schedule and allocate time-critical resources, and establish feedback systems for optimal project control.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2023
Learning Outcomes: 1. Plan and manage successful engineering projects using appropriate methods, tools, and techniques
Audience: Graduate

2. Estimate project costs, resources, and schedules
Audience: Graduate

3. Immediately apply project management principles regarding the five major project stages: initiate, plan, execute, control, and close
Audience: Graduate

4. Apply or customize the project management framework to engineering organizational needs
Audience: Graduate

5. Assess and improve the current project management system
Audience: Graduate

OTM 799 – READING AND RESEARCH-OPERATIONS AND INFORMATION MANAGEMENT
1-6 credits.

Individual work suited to the needs of graduate students.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

OTM 971 – FRONTIERS IN OPERATIONS MANAGEMENT RESEARCH
3 credits.

Examines foundational and emerging research in Operations Management (OM). Introduces influential papers and methodologies across analytical, behavioral, and empirical domains, including topics such as multichannel operations, workload and performance, behavioral decision making, and AI in operations. Critical evaluation of existing research and development of original ideas contributing to the OM literature.
Requisites: Declared in Business PhD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Critically evaluate research in Operations Management.
Audience: Graduate

2. Identify research gaps and formulate novel, high-impact research questions.
Audience: Graduate

3. Communicate complex research ideas effectively through written and oral presentations.
Audience: Graduate

4. Develop a coherent research proposal suitable for submission to a premier journal or conference.
Audience: Graduate

5. Assess and compare methodological approaches across analytical and empirical studies.
Audience: Graduate

OTM 972 – RESEARCH IN DIGITAL INNOVATION
3 credits.

Explores the frontiers of digital innovation, covers topics such as digital platforms, digital marketing, technology and digital strategy, as well as research methods used in these areas, including applied econometrics, lab and field experiments, analytical modeling, and other quantitative methods.
Requisites: Declared in Business PhD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Evaluate and synthesize emerging research topics and methodologies on digital innovation across business disciplines.
Audience: Graduate

2. Develop and articulate original research ideas that extend or challenge existing theories and methods.
Audience: Graduate

3. Develop academic professionalism in communicating research ideas effectively in written and oral forms.
Audience: Graduate

OTM 973 – EMERGING RESEARCH METHODS AND APPLICATIONS IN BUSINESS
3 credits.

Explores state-of-the-art, cutting-edge research methods and applications in business. Analysis of diverse methodological approaches and the development of skills to produce original research. Topics vary by offering and may include artificial intelligence, experiments, computational methods, and other evolving methodologies.
Requisites: Declared in Business PhD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Evaluate and synthesize emerging research across business and social science disciplines, identifying theoretical, methodological, and empirical contributions.
Audience: Graduate

2. Develop and articulate original research ideas that extend or challenge existing theories using emerging methodological approaches.
Audience: Graduate

3. Apply conceptual frameworks and empirical methods to design a rigorous research proposal suitable for submission to a premier business journal.
Audience: Graduate

4. Engage in scholarly discourse by constructively critiquing peers' ideas, integrating feedback, and contributing to collective understanding in academic discussions.
Audience: Graduate

5. Demonstrate academic professionalism by communicating research ideas effectively in written and oral forms, including weekly briefs, presentations, and a final research proposal.
Audience: Graduate

OTM 990 – OPERATIONS AND INFORMATION MANAGEMENT-INDEPENDENT RESEARCH PH.D. THESIS
1-12 credits.

Individual work to complete dissertation requirement of Ph.D. program.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

OTM 999 – READING AND RESEARCH-OPERATIONS AND INFORMATION MANAGEMENT PHD
1-6 credits.

Individual work suited to the needs of Ph.D. students may be arranged both during regular sessions and during the intersession periods.
Requisites: Declared in Business PHD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

OPHTHALMOLOGY AND VISUAL SCIENCES (OPHTHALM)

OPHTHALM 699 – DIRECTED STUDY
1-5 credits.

Directed study projects as arranged with faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Undergraduate

2. Read and effectively search scientific literature
Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

4. Gain research experience in an area of interest
Audience: Undergraduate

5. Develop/improve scientific writing skills.
Audience: Undergraduate

OPHTHALM 750 – OCULAR DISEASES OF THE MAMMALIAN VISION SYSTEM
3 credits.

An integrated approach to basic aspects of the mammalian visual system from anatomy and molecular/cellular biology to current and future therapeutic treatments of common ocular disorders. Seven general areas being covered include development and anatomy of the eye, physiology of the visual system, immunology and ocular surface diseases, retinal diseases, glaucoma, and translational approaches to vision research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the basic elements of ocular development, anatomy, and visual processing in mammals
Audience: Graduate

2. Apply basic knowledge of the visual system to understand pathologic mechanisms of common ocular diseases
Audience: Graduate

3. Understand how modern therapeutic interventions work
Audience: Graduate

4. Use the foundational knowledge in the first 3 outcomes to analyze and evaluate new therapeutic strategies
Audience: Graduate

OPHTHALM 910 – INDEPENDENT READING AND RESEARCH FOR FOURTH YEAR MEDICAL STUDENTS
2-8 credits.

Independent research under the direct supervision of Ophthalmology faculty. Each student's research project is individualized to meet student research goals within context of faculty research needs.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research
Audience: Graduate

2. Conduct a thorough literature review of the specific research question
Audience: Graduate

3. Select and apply statistical methodologies appropriate for the proposed research plan
Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review
Audience: Graduate

OPHTHALM 911 – INTRODUCTION TO THE VISUAL SYSTEM
4 credits.

Become familiar with the basic science within ophthalmology. Comprehensive analysis of four common ophthalmic diseases, including ocular surface infections and immunology, glaucoma, diabetic retinopathy, and age-related macular degeneration.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe fundamental principles of diabetic retinopathy.
Audience: Graduate

2. Demonstrate knowledge of fundamental principles of glaucoma.
Audience: Graduate

3. Demonstrate knowledge of fundamental principles age related macular degeneration.
Audience: Graduate

4. Demonstrate knowledge of ocular surface disease including corneal disease and uveitis.
Audience: Graduate

5. Be able to critically analyze and discuss research papers.
Audience: Graduate

6. Be able to complete one research project per week with a research mentor.
Audience: Graduate

OPHTHALM 919 – INDIVIDUALIZED PHASE 3 CLINICAL ELECTIVE IN OPHTHALMOLOGY
2-4 credits.

In-depth exposure to ambulatory ophthalmology, operative ophthalmology, subspecialty clinics, working under the direct supervision of Ophthalmology faculty, residents, fellows. Complete other patient care related learning activities as assigned by instructors (e.g., literature reviews, presentations on specific topics); these are dependent on the individual student, attending physician, and clinical site. Each student's schedule individualized to meet each location's capacity and student preference.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis, diagnostic and treatment plans.
Audience: Graduate

3. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

4. Review, interpret and present current literature to support patient care.
Audience: Graduate

5. Develop clinically relevant questions to advance learning.
Audience: Graduate

6. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

7. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

ORTHOPEDICS AND REHABILITATION (RHAB MED)

RHAB MED 699 – INDEPENDENT STUDY
1-5 credits.

Independent study projects as arranged with faculty or instructional staff.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

RHAB MED 910 – INDEPENDENT READING AND RESEARCH IN ORTHOPEDICS
2-8 credits.

Independent research under the direct supervision of Surgery, Orthopedics, or Urology faculty. Projects are individualized to meet research goals within the context of faculty research needs.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research.
Audience: Graduate

2. Conduct a thorough literature review of the specific research question
Audience: Graduate

3. Select and apply statistical knowledge methodologies appropriate for the proposed analyses
Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review
Audience: Graduate

RHAB MED 915 – INDIVIDUALIZED PHASE 3 CLINICAL ELECTIVE IN ORTHOPEDICS
2-4 credits.

Provide direct care for hospitalized orthopedic patients on general surgery or surgical specialty services under the supervision of house staff and attending physicians. Admit new patients, round on previously admitted patients, participate in multidisciplinary rounds, and work to transition patients to the next level of care. Evaluate and manage patient with both common inpatient conditions and medically complex patients requiring collaboration with consulting specialties. Participate in scheduled orthopedic operative procedures.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Perform a hypothesis-driven history and complete a targeted exam
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis
Audience: Graduate

4. Present a diagnostic plan, including laboratory and imaging modalities
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members
Audience: Graduate

6. Develop and implement effective patient management plans
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate, and timely manner
Audience: Graduate

8. Review, interpret, and present current literature to support patient care
Audience: Graduate

9. Communicate effectively with patients, families, physicians, and non-physicians team members
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures
Audience: Graduate

12. Communicate effectively with patients and families while avoiding medical jargon.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate
Audience: Graduate

14. Observe the process of obtaining informed consent prior to surgical intervention
Audience: Graduate

RHAB MED 919 – INDIVIDUALIZED FOURTH YEAR CLINICAL CLERKSHIP
1-12 credits.

Individually arranged fourth year clinical clerkships. (Student must have Fourth Year Committee approval to count for fourth year credit.)
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

RHAB MED 920 – REHABILITATION MEDICINE CLINICAL ELECTIVE
2-4 credits.

Inpatient hospital setting and outpatient clinical setting. Direct supervision by attending physicians and residents. Inpatient activities include rounding on rehabilitation medicine service patients, observing patient therapy sessions, discussing patient cases. Outpatient activities includes seeing clinic patients, participating in procedures like joint injections and fluoroscopic-guided spinal injections, performing electromyography (EMG), discussing patient cases. Evaluate and manage a full spectrum of patients with neurologic and musculoskeletal issues. Exposure to multiple disciplines involved in the rehabilitation process. Inpatient diagnoses commonly encountered include stroke, brain injury, spinal cord injury, orthopedic injuries, debility, amputations. Outpatient diagnoses commonly encountered include developmental disabilities, spine disorders, chronic pain, arthritis, myofascial pain and fibromyalgia, spasticity, and chronic conditions from prior neurologic injuries.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis-driven history and musculoskeletal and neurologic exams.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret, and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision-making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

RHAB MED 923 – PHYSICAL MEDICINE AND REHABILITATION-MARSHFIELD
2-12 credits.

Clinical elective for fourth year medical students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

RHAB MED 938 – INPATIENT ACTING INTERNSHIP - ORTHOPEDICS
4 credits.

This acting internship will provide medical students with an in-depth exposure to inpatient and operative management of complicated orthopedic surgical patients. The student will work under the direct supervision of a senior resident, fellows, and faculty. This rotation will provide the student with the opportunity to function at the intern level and play an active role in inpatient management of surgical patients.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform complete admission or pre-operative history and physicals, and document these in themedical chart.
Audience: Graduate

2. Formulate a differential diagnosis and develop a diagnostic plan, including laboratory and imaging modalities
Audience: Graduate

3. Analyze and interpret imaging and laboratory findings in context of patient presentation
Audience: Graduate

4. Present patients to healthcare team in a well-organized manner that highlights pertinent positives and negatives, gives justification to diagnostic plan, and provides interpretation of results.
Audience: Graduate

5. Write post-operative, admitting, and daily progress notes in the standard format on patients you are rounding on.
Audience: Graduate

6. Write and justify orders based on working diagnosis and cost-effectivenes
Audience: Graduate

7. Adjust home medications for preoperative and immediate post-operative situations.
Audience: Graduate

8. Summarize patient's hospital course during rounds and manage day-to-day care.
Audience: Graduate

9. Research and present current literature to support patient care.
Audience: Graduate

10. Conduct a detailed preoperative assessment of assigned patients
Audience: Graduate

11. Monitor and evaluate patients for common post-operative complications, develop treatment plansand present these to the team
Audience: Graduate

12. Based on case load, develop clinically relevant questions to further your and your colleagues' learning.
Audience: Graduate

13. Give and receive patient handovers.
Audience: Graduate

14. Write succinct yet thorough transfer notes and discharge summaries

RHAB MED 939 – ADULT ORTHOPEDICS FOR THE FUTURE ORTHOPEDIST ELECTIVE
2-4 credits.

Direct patient care involving a spectrum of orthopedic conditions in inpatient and ambulatory settings, with supervision by orthopedic surgery senior residents, fellows, and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. As needed, engage in independent reading about patient conditions and prepare for direct patient. Present a case of interest the student was involved in and a brief literature review on the treatment or condition. Other patient care-related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Perform a hypothesis-driven history and complete a targeted limb and spinal exam
Audience: Graduate

2. Develop and present a diagnosis and treatment plan and/or surgical indications for common orthopedic conditions/injuries
Audience: Graduate

3. Read and interpret plain radiographs of the limbs an spine
Audience: Graduate

4. Correctly interpret imaging and laboratory findings and communicate results to patients and team members
Audience: Graduate

5. Develop and implement effective patient management plans
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner
Audience: Graduate

7. Review, interpret, and present current literature to support patient care
Audience: Graduate

8. Communicate effectively with patients, families, physicians, and non-physician team members
Audience: Graduate

9. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care
Audience: Graduate

10. Engage patients in shared decision making regarding tests, orders, and procedures
Audience: Graduate

11. Avoid medical jargon when communicating with patients and families
Audience: Graduate

12. Recognize limitations and seek assistance as appropriate
Audience: Graduate

13. Understand the process of obtaining informed consent prior to surgical intervention

RHAB MED 940 – ADULT ORTHOPEDICS FOR THE NON-ORTHOPEDIST ELECTIVE
2-4 credits.

Direct patient care involving a spectrum of orthopedic conditions in an ambulatory setting with appropriate supervision by community orthopedic senior residents, fellows, and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Assess patients and generate weighted differential diagnoses, initial work-ups, and management plans. Independently read about patient conditions and prepare for direct patient care, as needed. Attend conferences associated with the assigned orthopedic surgery service. Complete other patient care-related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis-driven history and complete a targeted exam
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members
Audience: Graduate

6. Develop and implement effective patient management plans
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate, and timely manner
Audience: Graduate

8. Review, interpret, and present current literature to support patient care
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate

OTOLARYNGOLOGY - HEAD AND NECK SURGERY (OTOLARYN)

The subject OTOLARYN does not have any active courses at time of Guide publication.

PATHO-BIOLOGICAL SCIENCES (PATH-BIO)

PATH-BIO 150 – CONTEMPORARY TOPICS AND CAREERS IN THE VETERINARY SCIENCES
1 credit.

Topics of importance to the animal health field.
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Articulate multiple career paths that a person can take if interested in a career in animal health and veterinary medicine.
Audience: Undergraduate

2. Describe the requirements and process for applying to veterinary medical school.
Audience: Undergraduate

3. Understand how to engage in career exploration.
Audience: Undergraduate

PATH-BIO/PATH 210 – HIV: SEX, SOCIETY AND SCIENCE
3 credits.

HIV kills three million people per year, more than any other infectious disease. We will learn about the transmission, immunology, virology, vaccinology and societal impact of this virus. Six of the world's leading HIV scientists will give guest lectures.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Use science as a tool for understanding the world and solving problems.
Audience: Undergraduate

2. Understand how scientific data, social context, and political decisions impact prevention and treatment of infectious diseases in different community contexts.
Audience: Undergraduate

3. Identify obstacles to implementing effective disease interventions and understand ways to evaluate those interventions.
Audience: Undergraduate

4. Describe the steps of the HIV viral life cycle.
Audience: Undergraduate

5. Discuss how HIV's replication process leads to immune deficiency and AIDS.
Audience: Undergraduate

6. Describe immune responses against viral infection and list reasons why these responses fail to clear HIV infection.
Audience: Undergraduate

7. List reasons why it is challenging to cure HIV infection.
Audience: Undergraduate

8. Discuss approaches for making vaccines against other pathogens and list reasons why it is challenging to apply these approaches to HIV.
Audience: Undergraduate

9. Discuss and evaluate approaches for slowing the spread of HIV in the United States and other countries.
Audience: Undergraduate

10. Describe the processes by which HIV emerged to become a human pathogen.
Audience: Undergraduate

11. Discuss the sources of funding for the global response to HIV/AIDS and evaluate the efficacy of each in achieving its goals.
Audience: Undergraduate

12. Apply the concepts learned in relation to HIV to other emerging and re-emerging pathogens, such as Ebola virus, Zika virus, and/or SARS-CoV-2.
Audience: Undergraduate

PATH-BIO 299 – INDEPENDENT STUDY
1-3 credits.

Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize intellectual growth associated with independent study work through mentor discussion
Audience: Undergraduate

2. Identify diversity of viewpoints through critical thinking
Audience: Undergraduate

3. Illustrate growth in reading, writing, and communication skills
Audience: Undergraduate

PATH-BIO 307 – SUPERBUGS, SEX, & DRUGS: WHY MODERN MEDICINE NEEDS EVOLUTIONARY BIOLOGY
2 credits.

Explore the new frontier of evolutionary and ecological solutions to public health challenges through analyses and discussions. Evolution is often viewed as a purely historical topic disconnected from modern practical concerns. This view is incomplete: evolution plays a key role in many areas of modern life and underlies many public health challenges like drug resistance in bacteria and cancer, vaccine development, circadian medicine, and the 'spill-over' of pathogens from wildlife to humans (and vice versa). These issues, however, are intricately connected to social drivers like the use of antibiotics to treat viruses or as growth promoters in livestock. More evolutionary-guided solutions to understanding and addressing these challenges are critical for a sustainable and healthy future.
Requisites: (ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, 102, or BIOCORE 381) and sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Investigate the myriad ways in which a new (evolution-informed) way of looking at the world of veterinary and human medicine and public health is beneficial and necessary for modern medicine.
Audience: Undergraduate

2. Compare how goals of personal medicine and public health are similar and dissimilar.
Audience: Undergraduate

3. Evaluate case studies to compare how evolutionary principles can be used to improve standard approaches to treating cancer and drug resistant sexually transmitted infections, STIs.
Audience: Undergraduate

4. Articulate the consequences of pathogen evolution for disease outbreaks and control.
Audience: Undergraduate

5. Describe the genetic and behavioral reasons why there are increasing numbers of antibiotic resistant infections.
Audience: Undergraduate

6. Read and analyze data on the health status of populations.
Audience: Undergraduate

7. Critically evaluate and effectively use textbooks, current research literature, online information, as well as information related to scientific and biological issues in the popular press.
Audience: Undergraduate

PATH-BIO/ENTOM/M M & I/ZOOLOGY 350 – PARASITOLOGY
3 credits.

The biology of water-borne, food-borne, soil-borne and vector-borne parasites of animals including humans. Parasites are explored in the context of transmission, associated disease, diagnosis and treatment options, and environmental, cultural and socioeconomic drivers of disease epidemiology.
Requisites: ZOOLOGY/BIOLOGY 101 and 102, or ZOOLOGY/BIOLOGY/BOTANY 152 or ZOOLOGY 153, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Be conversant in terminology used in the field of Parasitology.
Audience: Undergraduate

2. Recall scientific and common names for parasites and hosts, and the name of the resulting disease in humans or animals.
Audience: Undergraduate

3. Attribute parasite behavior and characteristics to specific disease features in the host.
Audience: Undergraduate

4. Identify appropriate means to diagnose infections with parasites.
Audience: Undergraduate

5. Describe and identify factors that determine when, where, and why parasitic diseases exist.
Audience: Undergraduate

6. Integrate terminology, scientific nomenclature, diagnostic features and demographics to solve case studies where the parasitic culprit is unknown.
Audience: Undergraduate

7. Compare and contrast commonalities in parasite life cycles to demonstrate how flexibility in those life cycles has resulted in many different potential means of transmission.
Audience: Undergraduate

8. Deconstruct the impact of parasitic diseases on human and animal health, from disease symptoms and pathology in an individual, to socioeconomics in communities and countries.
Audience: Undergraduate

9. Identify reliable resources (primarily internet-based) available for researching the biology and epidemiology parasitic diseases.
Audience: Undergraduate

PATH-BIO/MED HIST 370 – ADDRESSING CONTROVERSY: THE SCIENCE, ETHICS, AND PUBLIC DISCUSSION OF ANIMAL RESEARCH
3 credits.

Addresses the science, ethics, history, and communication strategies associated with the use of animals in research. Seeks to identify and employ common ground among those with different perspectives to enable students to make good decisions about this contentious topic.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Social & Behavioral Science
Comm QR - Communication B
Breadth - Humanities or Natural Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify and employ communication practices that encourage tolerant and non-threatening discussion of controversial topics.
Audience: Undergraduate

2. Explain how scientific knowledge is acquired, with special reference to research with animals.
Audience: Undergraduate

3. Explain and compare ethical principles associated with animal use in research.
Audience: Undergraduate

4. Explore and apply principles of effective communication of complex and value-laden science.
Audience: Undergraduate

5. Describe the history and evaluate the present status of the animal research controversy.
Audience: Undergraduate

6. Construct and critique written and verbal presentations about animal research.
Audience: Undergraduate

7. Refine and defend your own position on animal research in a respectful and non-judgmental way that encourages additional dialog.
Audience: Undergraduate

8. Identify common ground among differing perspectives on animal research, and develop best practices for communicating this subject to diverse audiences.
Audience: Undergraduate

9. Practice critical reading, logical thinking, and the use of evidence.
Audience: Undergraduate

10. Employ appropriate style and disciplinary conventions in writing and speaking.
Audience: Undergraduate

11. Learn to use core library resources specific to the discipline.
Audience: Undergraduate

PATH-BIO 510 – VETERINARY IMMUNOLOGY
3 credits.

Current concepts in basic and clinical immunology with special emphasis on domesticated species and aspects of immunology.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss and apply how the immune system in a healthy animal protects its host from infection and neoplasia.
Audience: Graduate

2. Discuss and apply the mechanisms underlying the failure of the body's defenses to protect against infections and neoplasia.
Audience: Graduate

3. Discuss and apply the mechanisms and consequences of over-reactions of the immune system.
Audience: Graduate

4. Discuss and apply how immune system can be manipulated by vaccination to protect against infections and other strategies to combat transplant rejection and treat cancer.
Audience: Graduate

5. Discuss and apply the immunological principles of diagnostic tests and how to interpret the results
Audience: Graduate

PATH-BIO 512 – INTRODUCTION TO VETERINARY EPIDEMIOLOGY
2 credits.

Learn basic concepts and approaches to population problems in veterinary medicine. Methods appropriate to investigation of disease outbreaks, surveillance of animal disease and production and the design of epidemiological studies of the determinants of disease are presented.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply the principles of causal inference to health-related outcomes
Audience: Graduate

2. Recognize the effects of bias, confounding and interaction on medical research
Audience: Graduate

3. Assess and evaluate health-related risk
Audience: Graduate

4. Measure and analyze patterns of health-related outcomes in populations
Audience: Graduate

5. Interpret diagnostic test results
Audience: Graduate

6. Evaluate the validity of medical information
Audience: Graduate

7. Communicate medical and scientific information to clients and the public.
Audience: Graduate

PATH-BIO 513 – VETERINARY VIROLOGY
2 credits.

Introduction to basic concepts in virology and covers biology and pathogenesis of viral diseases of animals with an emphasis on viruses important to veterinary medicine.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply basic concepts of virology, including structure, replication strategies, pathogenesis, evolution, and antiviral therapy, to viral diseases
Audience: Graduate

2. Recall viral diseases and prion diseases of animals that are important in veterinary medicine and as zoonoses, describing clinical disease, prevention and control
Audience: Graduate

3. Integrate knowledge of pathogenesis to describe pathophysiology of viral diseases
Audience: Graduate

4. Apply concepts of diagnostic testing to diagnose viral diseases
Audience: Graduate

5. Analyze primary veterinary literature in the context of viral diseases
Audience: Graduate

6. Communicate concepts of viral diseases to a defined audience, such as clients, public health, or veterinary professionals
Audience: Graduate

7. Identify viral diseases that are considered foreign animal diseases
Audience: Graduate

PATH-BIO 514 – VETERINARY PARASITOLOGY
3 credits.

Basic veterinary parasitology with emphasis on biology, diagnosis, pathophysiology, treatment and management of parasitic infections of veterinary importance.
Requisites: Declared in Doctor of Veterinary Medicine with first year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Name and classify important veterinary parasite species by their scientific and/or common names, as appropriate.
Audience: Graduate

2. Recognize parasites based on the morphological features of different stages. Recognize the general size, shape, and diagnostic features of adults, larvae, eggs, cysts, etc.
Audience: Graduate

3. Identify how parasites of veterinary importance are transmitted. Describe salient features of the life cycles of these parasites, including as definitive hosts, intermediate hosts, paratenic hosts, infective parasite stages, prepatent and patent periods, etc.; other factors influencing transmission such as host environment, diet, season, etc.
Audience: Graduate

4. Discuss the effects of parasites on their hosts. Describe the conditions under which disease is produced, the clinical signs and characteristics of disease, the role of host immunity, pathogenic mechanisms, and parasite stages responsible for pathology.
Audience: Graduate

5. Explain how parasite infections are diagnosed, treated and controlled. Describe techniques of diagnosis, availability and efficacy of treatment, and the respective roles of different methods of control (e.g., vector control, management practices, chemotherapy).
Audience: Graduate

PATH-BIO 515 – REGULATORY VETERINARY MEDICINE AND PUBLIC HEALTH
2 credits.

Role and regulatory obligations of the veterinary profession in preventing zoonoses, understanding the need for judicious use of antibiotics, and promoting the safety of food of animal origin.
Requisites: Declared in Doctor of Veterinary Medicine with third year standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize and compare the clinical presentations of selected zoonotic diseases in both animals and humans.
Audience: Undergraduate

2. Explain at a technical level, and in a language appropriate for educating clients, the role(s) that animals play in disease transmission and the relative risks for human infections posed by contact with animals.
Audience: Undergraduate

3. Uphold the premise that "One Health" is an important framework for addressing important public health challenges and describe the ways that veterinarians are involved.
Audience: Undergraduate

4. Outline the roles and responsibilities of veterinarians and government agencies in animal importation, response to disasters, animal abuse, and the control of zoonotic and animal diseases.
Audience: Undergraduate

5. Outline the roles played by veterinarians in the safety of food of animal origin and how carcasses are processed and inspected.
Audience: Undergraduate

6. Explain ways that veterinarians work to decrease antibiotic and other drug residues in food products and stem the emergence of antibiotic resistance through careful stewardship of antibiotics.
Audience: Undergraduate

PATH-BIO 517 – VETERINARY BACTERIOLOGY AND MYCOLOGY
4 credits.

Emphasis on the pathogenesis of bacterial and fungal diseases of animals. Become familiar with the methods used to identify representative bacterial and fungal pathogens.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Construct a valid differential diagnosis list of bacterial or fungal organisms contributing to disease, given a patient signalment, presenting complaint, physical examination, and pertinent laboratory data.
Audience: Graduate

2. Describe methods for proper collection and transport of samples for bacterial or fungal culture and identification.
Audience: Graduate

3. Perform basic laboratory tests for identification of bacterial and fungal species (e.g. streak a bacterial culture plate, Gram stain, microscopic identification of bacterial and fungal organisms).
Audience: Graduate

4. Prepare an appropriate diagnostic plan and interpret diagnostic test results for bacterial and fungal organisms.
Audience: Graduate

5. Describe important features of treatment for bacterial and fungal diseases of veterinary species.
Audience: Graduate

6. Discuss the importance of proper disinfection techniques for prevention of bacterial and fungal diseases.
Audience: Graduate

PATH-BIO 525 – ACTIVE, INTEGRATED LEARNING I
1 credit.

Active Learning experience highlighting problem solving and critical thinking that horizontally and vertically integrates material from other veterinary medicine courses by using exercises constructed in the context of clinical cases or scenaria.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Create medical problem lists for individual animals and groups of animals using information collected from the signalment, history, physical examination, laboratory tests, diagnostic imaging, and additional ancillary tests and investigations.
Audience: Undergraduate

2. Develop a comprehensive differential diagnosis based on the presenting complaint, that is organized by body system or mechanisms of disease, and select relevant disorders for a ranked differential diagnosis based on collected evidence.
Audience: Undergraduate

3. Develop a diagnostic plan based on the ranked differential diagnosis.
Audience: Undergraduate

4. Prepare rounds presentations (short summaries), in an organized and succinct manner using medical terminology, that can be used for clinical presentations or with submissions for ancillary testing.
Audience: Undergraduate

5. Replicate these analytical problem-solving skills for diverse animal species that present with various complaints.
Audience: Undergraduate

6. Capitalize on the strengths of teams that are diverse in experience, interest, and problem-solving preference to explain and communicate complex clinical problems in a respectful and responsible manner.
Audience: Undergraduate

PATH-BIO 526 – ACTIVE, INTEGRATED LEARNING II
1 credit.

Active Learning experience highlighting problem solving and critical thinking that horizontally and vertically integrates material from other veterinary medicine courses by using exercises constructed in the context of clinical cases or scenaria.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Create medical problem lists for individual animals and groups of animals using information collected from the signalment, history, physical examination, laboratory tests, diagnostic imaging, and additional ancillary tests and investigations.
Audience: Undergraduate

2. Develop a comprehensive differential diagnosis based on the presenting complaint, that is organized by body system or mechanisms of disease, and select relevant disorders for a ranked differential diagnosis based on collected evidence.
Audience: Undergraduate

3. Develop a diagnostic plan based on the ranked differential diagnosis.
Audience: Undergraduate

4. Prepare rounds presentations (short summaries), in an organized and succinct manner using medical terminology, that can be used for clinical presentations or with submissions for ancillary testing.
Audience: Undergraduate

5. Replicate these analytical problem-solving skills for diverse animal species that present with various complaints.
Audience: Undergraduate

6. Capitalize on the strengths of teams that are diverse in experience, interest, and problem-solving preference to explain and communicate complex clinical problems in a respectful and responsible manner.
Audience: Undergraduate

PATH-BIO/M M & I 528 – IMMUNOLOGY
3 credits.

Development and functions of immune response in animals; a comprehensive study of experimental humoral and cellular immunity.
Requisites: (CHEM 104 or CHEM 109) and (ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151 or BIOCORE 383), or graduate/professional standing
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify lymphatic tissues and describe their functions
Audience: Undergraduate

2. Differentiate between innate and adaptive immune responses
Audience: Undergraduate

3. State the products of B and T cell activation in adaptive immunity
Audience: Undergraduate

4. Describe the steps in B and T cell activation and the immune mechanisms regulating their activity
Audience: Undergraduate

5. Explain how the adaptive immune system recognizes diverse antigens
Audience: Undergraduate

6. Summarize coordination of innate and adaptive immune responses in host defense against cancer and infectious diseases
Audience: Undergraduate

7. List examples of when the immune system goes awry (hypersensitivity, autoimmunity)
Audience: Undergraduate

8. Apply course concepts to design new therapies for cancer, infectious disease, or organ transplant
Audience: Undergraduate

PATH-BIO 559 – VETERINARY GENERAL PATHOLOGY
2 credits.

General mechanisms of disease at the cellular, tissue, organ, and organismal levels. Cell injury and cell death, neoplasia, inflammation, circulation, and genetics.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe gross and microscopic changes seen in tissues and organs and understand the underlying processes making them appear the way they do
Audience: Undergraduate

2. Identify tissues and organs and summarize the abnormalities present
Audience: Undergraduate

3. Interpret the gross and microscopic changes utilizing the language of pathology by formulating a morphologic diagnosis
Audience: Undergraduate

4. Apply important pathologic concepts and principles to draw conclusions about the pathogenesis of the changes they see
Audience: Undergraduate

5. Integrate clinical, historical, clinicopathologic, imaging results, and pathologic findings and draw conclusions relevant to the disease or process affecting the animal
Audience: Undergraduate

PATH-BIO 560 – VETERINARY SYSTEMIC PATHOLOGY I
2 credits.

Morphological manifestations of disease in animals. Diseases and disease processes will be discussed by organ system, stressing important diseases in domestic animals.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe gross and microscopic changes seen in tissues and organs and understand the underlying processes making them appear the way they do
Audience: Undergraduate

2. Identify tissues and organs and summarize the abnormalities present
Audience: Undergraduate

3. Interpret the gross and microscopic changes utilizing the language of pathology by formulating a morphologic diagnosis
Audience: Undergraduate

4. Apply important pathologic concepts and principles to draw conclusions about the pathogenesis of the changes they see
Audience: Undergraduate

5. Integrate clinical, historical, clinicopathologic, imaging results, and pathologic findings and draw conclusions relevant to the disease or process affecting the animal
Audience: Undergraduate

6. Identify what are common, usual, and typical aspects of pathology within each organ system
Audience: Undergraduate

7. Discuss common or important diseases and where appropriate identify specific etiologies associated with them
Audience: Undergraduate

PATH-BIO 561 – VETERINARY SYSTEMIC PATHOLOGY II
4 credits.

Morphological manifestations of disease in animals. Diseases and disease processes will be discussed by organ system, stressing important diseases in domestic animals.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe gross and microscopic changes seen in tissues and organs and understand the underlying processes making them appear the way they do
Audience: Undergraduate

2. Identify tissues and organs and summarize the abnormalities present
Audience: Undergraduate

3. Interpret the gross and microscopic changes utilizing the language of pathology by formulating a morphologic diagnosis
Audience: Undergraduate

4. Apply important pathologic concepts and principles to draw conclusions about the pathogenesis of the changes they see
Audience: Undergraduate

5. Integrate clinical, historical, clinicopathologic, imaging results, and pathologic findings and draw conclusions relevant to the disease or process affecting the animal
Audience: Undergraduate

6. Identify what are common, usual, and typical aspects of pathology within each organ system
Audience: Undergraduate

7. Discuss common or important diseases and where appropriate identify specific etiologies associated with them
Audience: Undergraduate

PATH-BIO 562 – VETERINARY CLINICAL PATHOLOGY
4 credits.

Concepts and techniques of clinical pathology with emphasis on those procedures that are important in the diagnosis of animal diseases.
Requisites: Declared in Doctor of Veterinary Medicine with second year standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the principles for routine laboratory tests in hematology, hemostasis, urinalysis, clinical chemistry, endocrinology, and cytology, including the principles of quality control and preanalytical, analytical, and post-analytical variables that may affect test results.
Audience: Undergraduate

2. Demonstrate technical skills in preparing a diagnostic blood smear, performing a complete urinalysis and microhematocrit centrifugation for the measurement of packed cell volume and total protein by refractometry, and microscopically evaluating peripheral blood smears, urine sediments, and cytologic specimens.
Audience: Undergraduate

3. Interpret test results, including microscopic findings, by integrating information from the signalment, history, and physical examination, and organize a complete, but succinct, problem list using correct medical terminology for animal patients.
Audience: Undergraduate

4. Based on the established problem list, identify relevant differential diagnosis(es) or conclusion(s) and suggest appropriate ancillary testing to gather evidence toward a final diagnosis.
Audience: Undergraduate

5. List the essential/supporting evidence for your diagnosis/conclusion and explain the relevant pathophysiologic mechanism(s) using appropriate medical terminology.
Audience: Undergraduate

6. Support the learning of your peers while clarifying and solidifying your own knowledge by working in teams within the laboratory and on course exercises.
Audience: Undergraduate

PATH-BIO 660 – VETERINARY NECROPSY ROTATION
2 credits.

Provides experience with necropsy procedures in all animal species and in developing interpretive skills by participating in the School of Veterinary Medicine/Veterinary Medical Teaching Hospital diagnostic anatomic pathology service under the guidance of the faculty.
Requisites: Declared in Doctor of Veterinary Medicine with fourth year standing
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Perform accurate and complete routine gross necropsy procedures, methods, and techniques.
Audience: Undergraduate

2. Describe and interpret gross morphologic lesions and clearly, concisely, and accurately record these in a written report.
Audience: Undergraduate

3. Select and sample tissues for histopathological examination using proper technique.
Audience: Undergraduate

4. Select and sample specimens for ancillary procedures (e.g., cytology, bacteriology, virology, etc.).
Audience: Undergraduate

5. Correlate pathologic changes with clinical, clinicopathological, imaging, and other findings, to better understand and explain disease pathogenesis.
Audience: Undergraduate

6. Differentiate between normal anatomy and anatomic differences (between individuals and between species), and postmortem autolysis, artifactual changes, and true pathological lesions.
Audience: Undergraduate

PATH-BIO 675 – SPECIAL TOPICS
1-5 credits.

Topics vary.
Requisites: Declared in Doctor of Veterinary Medicine
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Develop competence and professional skills in veterinary medicine
Audience: Undergraduate

2. Explore current topics and trends in veterinary medicine
Audience: Undergraduate

3. Developing breadths of experiences related to veterinary medicine
Audience: Undergraduate

PATH-BIO 681 – SENIOR HONORS THESIS I
2-4 credits.

Individual research and study in pathobiological sciences for completing an honors thesis as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Articulate a clear research question or problem and formulate a hypothesis
Audience: Undergraduate

2. Demonstrate technical mastery of a research methodology
Audience: Undergraduate

3. Define and use terminology and concepts specific to their research topic
Audience: Undergraduate

4. Demonstrate competence and confidence in searching for existing research relevant to their project
Audience: Undergraduate

5. Explain how their project adds to knowledge gaps in the field
Audience: Undergraduate

6. Apply problem solving skills to address research hurdles
Audience: Undergraduate

7. Work collaboratively with other researchers in the laboratory (including other trainees, staff and the PI)
Audience: Undergraduate

8. Demonstrate growth in working autonomously over the course of the 681/682 enrollment period
Audience: Undergraduate

9. Explain their research to others in the field and to broader audiences in research presentations
Audience: Undergraduate

10. Articulate the relevance of their research to their professional future and speak to project-specific learning outcomes established with their research instructor and mentor
Audience: Undergraduate

PATH-BIO 682 – SENIOR HONORS THESIS II
2-4 credits.

Individual research and study in pathobiological sciences for completing an honors thesis as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Learning Outcomes: 1. Articulate a clear research question or problem and formulate a hypothesis
Audience: Undergraduate

2. Demonstrate technical mastery of a research methodology
Audience: Undergraduate

3. Define and use terminology and concepts specific to their research topic
Audience: Undergraduate

4. Demonstrate competence and confidence in searching for existing research relevant to their project
Audience: Undergraduate

5. Explain how their project adds to knowledge gaps in the field
Audience: Undergraduate

6. Apply problem solving skills to address research hurdles
Audience: Undergraduate

7. Work collaboratively with other researchers in the laboratory (including other trainees, staff and the PI)
Audience: Undergraduate

8. Demonstrate growth in working autonomously over the course of the 681/682 enrollment period
Audience: Undergraduate

9. Explain their research to others in the field and to broader audiences in research presentations
Audience: Undergraduate

10. Articulate the relevance of their research to their professional future and speak to project-specific learning outcomes established with their research instructor and mentor
Audience: Undergraduate

PATH-BIO 699 – DIRECTED STUDY
1-5 credits.

Projects in the laboratory and/or through library work in specific subject area under the direct guidance of faculty member. Not open to students declared in Veterinary Medicine (DVM).
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Apply foundational veterinary knowledge and critical thinking to identify problems in veterinary medicine
Audience: Undergraduate

2. Develop professional veterinary medicine skills of interest by performing select techniques and procedures
Audience: Undergraduate

3. Communicate in written and/or verbal reports to veterinary colleagues and supervisors
Audience: Undergraduate

PATH-BIO/M M & I 750 – HOST-PARASITE RELATIONSHIPS IN VERTEBRATE VIRAL DISEASE
3 credits.

Detailed study of the pathogenesis of vertebrate viral disease, stressing viral invasion, dissemination, mechanisms of disease production, immune pathology, persistence, resistance, and transmission.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate understanding of mechanisms involved in pathogenesis of viral infections
Audience: Graduate

2. Obtain experience in critically reading scientific research
Audience: Graduate

3. Enhance scientific presentation skills
Audience: Graduate

4. Design and prepare funding applications for research projects in viral pathogenesis
Audience: Graduate

PATH-BIO 775 – EXTERNSHIP
1-12 credits.

Offers opportunities for faculty coordinated experience in the veterinary medical profession outside School of Veterinary Medicine.
Requisites: Declared in Doctor of Veterinary Medicine with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023
Learning Outcomes: 1. Understand real-world applications of foundational veterinary medical knowledge and skills
Audience: Graduate

2. Apply foundational veterinary knowledge and critical thinking to solve real-world problems
Audience: Graduate

3. Perform select techniques and procedures to develop various skills professional in veterinary medicine
Audience: Graduate

PATH-BIO/COMP BIO 812 – RESEARCH ETHICS AND CAREER DEVELOPMENT
2 credits.

Provides instruction in principles and concepts of research ethics through presentations and discussion of case studies. Topics pertinent to development of a successful career in research are also included.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze the complexities of ethical issues in research and the factors that can influence perceptions of ethical behavior.

Audience: Graduate

2. Develop a framework for making ethical decisions in research.
Audience: Graduate

3. Identify areas to apply best practices in responsible conduct of research to guide decision-making.
Audience: Graduate

4. Explain where to seek guidance for improving scientific communication skills.
Audience: Graduate

5. Develop the ability to effectively convey research results and findings.
Audience: Graduate

6. Recognize the importance of ethical conduct in research.
Audience: Graduate

7. Discuss the potential consequences of unethical behavior in research.
Audience: Graduate

8. Develop a sense of personal responsibility for maintaining ethical standards in research.
Audience: Graduate

9. Recognize the importance of safe research environments.
Audience: Graduate

PATH-BIO 930 — ADVANCED SEMINAR
1 credit.

Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Use mind mapping to create a hierarchal structure to contextualize the projects/aims in your thesis research and design an effective scientific presentation.
Audience: Graduate

2. Apply concepts for effective data display and presentation to create and give a clear and well-organized research seminar presentation.
Audience: Graduate

3. Prepare a graphical abstract that effectively communicates the significance, design, and take-home message of your study or proposed work.
Audience: Graduate

4. List 3 best practices for delivering an effective scientific presentation based on your peer evaluations of presentations delivered by classmates this semester.
Audience: Graduate

5. State 3 things that you do not want to do when giving a talk, based on your experience giving a presentation and your observations of the presentations by others.
Audience: Graduate

PATH-BIO 990 — RESEARCH
1-12 credits.

Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Exhibit a broad understanding of general pathobiological science principles
Audience: Graduate

2. Conduct independent research using a variety of approaches
Audience: Graduate

3. Think critically to address research challenges
Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research
Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab
Audience: Graduate

PATHOLOGY AND LABORATORY MEDICINE (PATH)

PATH/PATH-BIO 210 — HIV: SEX, SOCIETY AND SCIENCE
3 credits.

HIV kills three million people per year, more than any other infectious disease. We will learn about the transmission, immunology, virology, vaccinology and societal impact of this virus. Six of the world's leading HIV scientists will give guest lectures.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Use science as a tool for understanding the world and solving problems.
Audience: Undergraduate

2. Understand how scientific data, social context, and political decisions impact prevention and treatment of infectious diseases in different community contexts.
Audience: Undergraduate

3. Identify obstacles to implementing effective disease interventions and understand ways to evaluate those interventions.
Audience: Undergraduate

4. Describe the steps of the HIV viral life cycle.
Audience: Undergraduate

5. Discuss how HIV's replication process leads to immune deficiency and AIDS.
Audience: Undergraduate

6. Describe immune responses against viral infection and list reasons why these responses fail to clear HIV infection.
Audience: Undergraduate

7. List reasons why it is challenging to cure HIV infection.
Audience: Undergraduate

8. Discuss approaches for making vaccines against other pathogens and list reasons why it is challenging to apply these approaches to HIV.
Audience: Undergraduate

9. Discuss and evaluate approaches for slowing the spread of HIV in the United States and other countries.
Audience: Undergraduate

10. Describe the processes by which HIV emerged to become a human pathogen.
Audience: Undergraduate

11. Discuss the sources of funding for the global response to HIV/AIDS and evaluate the efficacy of each in achieving its goals.
Audience: Undergraduate

12. Apply the concepts learned in relation to HIV to other emerging and re-emerging pathogens, such as Ebola virus, Zika virus, and/or SARS-CoV-2.

PATH 399 – INDEPENDENT STUDY
1-4 credits.

Directed study projects for freshmen and sophomores.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify concepts learned in coursework begin to apply to real life situations
Audience: Undergraduate

2. Read and learn to effectively search scientific literature
Audience: Undergraduate

3. Begin to develop critical, analytical, and independent thinking skills
Audience: Undergraduate

PATH 404 – PATHOPHYSIOLOGIC PRINCIPLES OF HUMAN DISEASES
3 credits.

Provides a basic understanding of the causes, pathophysiology, pathology and clinical manifestations of disease states from a medical perspective.
Requisites: ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the pathophysiologic processes highlighted in the course.
Audience: Undergraduate

2. Explain how clinical manifestations, diagnosis, and prognosis of some common conditions are related to underlying pathophysiologic principles.
Audience: Undergraduate

3. Describe how treatments of some common conditions are based on these same pathophysiologic principles.
Audience: Undergraduate

4. Consider how severe consequences of diseases may be prevented by screening, early diagnosis, modification of risk factors, and mitigation of environmental/occupational exposures.
Audience: Undergraduate

5. Establish a vocabulary of medical terms used by healthcare professionals
Audience: Undergraduate

PATH 501 – TOPICS IN ENVIRONMENTAL VIRAL PATHOGEN SURVEILLANCE
3 credits.

Explore the methods for environmental pathogen surveillance used in research and public health. Includes an advanced discussion of molecular genetics, genomics, and sequencing technologies. Explores the implications for public health and pandemic preparedness.
Requisites: (BOTANY 101 and 102) or BIOLOGY/BOTANY/ZOOLOGY 152 and (GENETICS 466 or 468), BIOCORE 383, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how viral pathogen surveillance has been performed historically and propose how that will evolve as technologies improve
Audience: Undergraduate

2. Describe different ways molecularly characterize the presence of DNA and RNA from different sample sources
Audience: Undergraduate

3. Describe the molecular details of different DNA sequencing techniques

Audience: Undergraduate

4. Process metagenomic sequence data to characterize viruses present in a sample
Audience: Undergraduate

5. Compare and contrast the use of different types of environmental samples for viral pathogen surveillance
Audience: Undergraduate

6. Propose ways that viral pathogen surveillance data could be used by public health agencies to encourage behavioral changes
Audience: Undergraduate

7. Identify how viral pathogen surveillance data can provide information to local, national, and global communities
Audience: Undergraduate

PATH/M&ENVTOX/PHM SCI/PHMCOL-M/POP HLTH 626 – TOXICOLOGY II
3 credits.

Survey of the basic methods and fundamental biochemical mechanisms of toxicity. Toxicity in mammalian organ systems, techniques for evaluating toxicity, as well as mechanisms of species specificity, and environmental interactions (with toxicant examples) are presented.
Requisites: POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain and identify the effects of toxicants on specific organs within the human body
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and reactions of toxicants within organ systems using a given dataset
Audience: Both Grad & Undergrad

3. Classify different means of risk assessment and the conceptual rationale behind these methods
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research
Audience: Both Grad & Undergrad

5. Relate specific organ concepts with conceptual examples from M&ENVTOX 625 to enhance scientific understanding
Audience: Undergraduate

6. Appraise concepts to research to identify future research concepts.
Audience: Graduate

PATH 699 – INDEPENDENT STUDY
1-4 credits.

Directed study projects for juniors and seniors.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Undergraduate

2. Read and effectively search scientific literature
Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skill
Audience: Undergraduate

PATH 750 – CELLULAR AND MOLECULAR BIOLOGY/PATHOLOGY
2 credits.

Emphasizes current understanding of molecular and cellular mechanisms. Wherever possible, human diseases are used to illustrate the outcome at the organismal level of defects in these mechanisms. Focuses on different cell types and how cells function. We also discuss how cells talk to themselves and each other. Topics include mechanisms of cell survival and division. Provides an overview of a broad set of cell biology topics to demonstrate the breadth and diversity of cellular functions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain basic mechanisms of cell signaling
Audience: Graduate

2. Describe how vesicles traffic inside of cells
Audience: Graduate

3. Explain the parts of the cell cycle
Audience: Graduate

4. Explain how and why a cell dies by apoptosis
Audience: Graduate

5. Define cell adhesion receptors, lipid rafts, and phosphatases and explain their role in cellular mobility
Audience: Graduate

6. Explain the role of stem cells in cancer biology
Audience: Graduate

7. Describe B and T cell development pathways and the functions of these cells
Audience: Graduate

8. Describe the roles of B and T cells in defending a host from pathogens
Audience: Graduate

PATH 751 – BIOLOGY OF AGING
2 credits.

Examines the molecular, cellular, physiological, and clinical aspects of aging beyond basic biology in a biomedical/clinical research setting. Aging and age-related diseases are examined via the combined expertise of basic scientists and clinicians covering a range of topics directly relevant to biology of aging research, including the clinical perspective, the research perspective, and the integration of the two.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Understand the scope of aging research and become familiar with the numerous conditions and disorders for which age is a risk factor.
Audience: Graduate

2. Synthesize the biological and clinical aspects of diseases and disorders of aging.
Audience: Graduate

3. Integrate biology across aging diseases and conditions to identify common factors.
Audience: Graduate

4. Appreciate the novel techniques and approaches at the cutting edge of aging research.
Audience: Graduate

PATH 752 – CELLULAR AND MOLECULAR BIOLOGY/PATHOLOGY SEMINAR
1 credit.

The emphasis is on our current understanding of molecular and cellular mechanisms. Wherever possible, human diseases are used to illustrate the outcome at the organismal level of defects in these mechanisms. Discussions focus on immunology and cancer biology. Topics include mechanisms of cell survival, cell division, signal transduction, gene expression, vesicular transport, autophagy and cell death. Explore a broad set of cell biology topics, in greater detail such that they will have a better understanding of the breadth and diversity of cellular functions by the end of the semester. Learn how to critically evaluate the literature and the rigor of research.
Requisites: Concurrent enrollment in PATH 750
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain basic mechanisms of cell signaling
Audience: Graduate

2. Describe how vesicles traffic inside of cells
Audience: Graduate

3. Explain the parts of the cell cycle
Audience: Graduate

4. Explain how and why a cell dies by apoptosis
Audience: Graduate

5. Define cell adhesion receptors, lipid rafts, and phosphatases and explain their role in cellular mobility
Audience: Graduate

6. Explain the role of stem cells in cancer biology
Audience: Graduate

7. Describe B and T cell development pathways and the functions of these cells
Audience: Graduate

8. Describe the roles of B and T cells in defending a host from pathogens
Audience: Graduate

9. Learn how to critically evaluate papers for rigor
Audience: Graduate

10. Learn how to design an experiment
Audience: Graduate

PATH 755 – RESPONSIBLE CONDUCT IN RESEARCH: RESEARCH ETHICS, RIGOR, REPRODUCIBILITY AND TRANSPARENCY
2 credits.

Meets the NIH Institutional Training Grant requirements covering all ten of targeted areas in biomedical research. Subject matter incorporates the following topics for instruction: 1) Conflict of interest - personal, professional, and financial; 2) Policies regarding human subjects, and rigor and reproducibility in clinical research; 3) Policies regarding live vertebrate animal subjects, rigor and reproducibility and transparency in pre-clinical research, and safe laboratory practices; 4) Mentor and mentee responsibilities and relationships; 5) Collaborative research including collaborations with industry; 6) Peer review; 7) Data acquisition and laboratory tools (management, sharing and ownership); 8) Research misconduct and policies for handling misconduct; 9) Responsible authorship and publication; 10) The scientist as a responsible member of society, contemporary ethical issues in biomedical research, and the environmental and societal impacts of scientific research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate proficiency in the Federal, State of Wisconsin, and UW-Madison rules and regulations relevant to the performance of research in the sciences.
Audience: Graduate

2. Explain practices and approaches that can enhance the rigor and reproducibility of their work.
Audience: Graduate

3. Demonstrate problem-solving strategies and how to respond properly after witnessing research misconduct.
Audience: Graduate

PATH 802 – HISTOPATHOLOGY FOR TRANSLATIONAL SCIENTISTS
3 credits.

Introduces the pathogenesis of disease via integration of actual autopsy patient cases. Emphasis is placed on understanding the basic mechanisms of disease at the level of cell, organ, and body, as well as the morphologic expression patterns of selected common specific disease processes. Participate in autopsy gross organ conferences as well as microscopic review sessions. Concepts covered in lectures will be applied and reinforced in the interactive autopsy sessions. Observe at least one full autopsy, gaining a three-dimensional understanding of structure and disease.
Requisites: Declared in Cellular and Molecular Pathology graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Gain an appreciation of how disease processes directly impact patients
Audience: Graduate

2. Be able to distinguish the morphologic patterns of normal versus pathologic tissues
Audience: Graduate

3. Be familiar with the pathogenesis of selected common disease processes
Audience: Graduate

4. Recognize how basic laboratory research may be applied to specific disease processes
Audience: Graduate

PATH 803 – PATHOGENESIS OF MAJOR HUMAN DISEASES
3 credits.

Focus on disease pathogenesis and discussion of the leading disease research model. Combine expert clinicians, basic scientists, and literature review on specific major diseases.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop an understanding of the basic principles of pathology (inflammation, cell death and degeneration and neoplasia).
Audience: Graduate

2. Discuss clinical features of human diseases that are major causes of global death and disability.
Audience: Graduate

3. Define pathogenesis of human diseases that are major causes of global death and disability.
Audience: Graduate

4. Discuss leading disease in vitro and in vivo research models for major human diseases.
Audience: Graduate

5. Develop an understanding of cutting-edge research techniques to study major human diseases.
Audience: Graduate

PATH 807 – IMMUNOPATHOLOGY: THE IMMUNE SYSTEM IN HEALTH AND DISEASE
2 credits.

Gain fundamental knowledge of immunopathology and molecular immunology medicine, and have an in-depth research experience that combines pathobiological and translational immunology research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the development and function of the immune response in human disease.
Audience: Graduate

2. Understand malfunctions of immune system like immunodeficiency, autoimmunity & allergies.
Audience: Graduate

3. Learn basic mechanisms by which the immune system protects against infectious disease.
Audience: Graduate

4. Understand how the immune system may be manipulated to facilitate transplantation and treat cancer.
Audience: Graduate

PATH 809 – MOLECULAR MECHANISMS OF DISEASE
2 credits.

Focuses on molecular mechanisms of diseases. Includes: Neuroscience, cancer biology, growth factor/matrix biology, and immunology.
Requisites: Declared in Cellular and Molecular Pathology graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand how to write a proposal (Grant Workmanship).
Audience: Graduate

2. Develop the ability to critically evaluate research papers and grants (Peer Reviewing).
Audience: Graduate

3. Understand how to design an experiment to test a novel hypothesis.
Audience: Graduate

4. Understand and learn how to give a successful talk.
Audience: Graduate

PATH 900 – SEMINAR
0 credits.

Weekly Seminar for graduate students, professional students, medical professionals.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Gain overall breath of knowledge in disease pathogenesis.
Audience: Graduate

2. Provide a platform for student interaction with invited faculty from UW-Madison and other institutions.
Audience: Graduate

3. Develop skills for communicating complex ideas in a clear and understandable manner.
Audience: Graduate

PATH 901 – STUDENT SEMINAR / JOURNAL CLUB
1 credit.

Review of current publications on relevant topics selected by department faculty and trainer.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop skills to discuss research progress with peer group.
Audience: Graduate

2. Develop excellent presentation skills to communicate complex ideas in a clear and understandable manner.
Audience: Graduate

3. Learn how to provide constructive feedback to strengthen peer student's presentation.
Audience: Graduate

4. Articulate research problems, potentials, and limits within the field of study.
Audience: Graduate

5. Formulate ideas, concepts, designs, and techniques beyond the current boundaries of knowledge within the chosen field of study#
Audience: Graduate

PATH 913 – TECHNIQUES IN VIROLOGY
4 credits.

Culture-based methods for detecting and quantifying viruses. Describe concepts such as viral load, transmissibility, tissue tropism, host immune responses, and the effectiveness of various antiviral therapies. Perform multiple techniques for working with and quantifying viruses. Compare and contrast various methods of detecting and quantifying viruses.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Demonstrate training-level-appropriate understanding of viruses and host biology.
Audience: Graduate

2. Integrate scientific evidence into clinical practice concepts.
Audience: Graduate

3. Effectively communicate basic science concepts related to infectious diseases, immunology, and virology.
Audience: Graduate

4. Demonstrate the ability to evaluate basic science and clinical literature.
Audience: Graduate

5. Develop an understanding of how basic science experiments are conceived, planned, executed, analyzed, and interpreted.
Audience: Graduate

6. Describe how viruses are propagated and quantified.
Audience: Graduate

7. Describe how viral infections are diagnosed.
Audience: Graduate

8. Describe the nuances and caveats associated with different methods of diagnosis.
Audience: Graduate

PATH 914 – CLINICAL MICROBIOLOGY: PHENOTYPIC IDENTIFICATION OF COMMON ORGANISMS
2 credits.

Clinical microbiology lab practice, with a focus on identification of bacteria, fungi, and parasites. Learn techniques in specimen collection, staining, and plating. Gain an understanding of culture media, incubation, isolation, and microscopic and colony characteristics.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand different ways of collecting and transporting specimens
Audience: Graduate

2. List common stains used for direct specimen examination
Audience: Graduate

3. Recall different types of culture media and their uses
Audience: Graduate

4. Explain the purpose of varying incubation conditions
Audience: Graduate

5. Recognize common Gram-positive bacteria based on phenotypic characterisitcs
Audience: Graduate

6. Recognize common fungi based on phenotypic characteristics
Audience: Graduate

7. Recognize common parasites based on phenotypic characteristics
Audience: Graduate

8. Recognize common Gram-negative bacteria based on phenotypic characteristics
Audience: Graduate

PATH 915 – CLINICAL MICROBIOLOGY: OVERVIEW OF TECHNOLOGIES AND METHODOLOGIES
2 credits.

Learn the variety of techniques, methodologies, and instrumentation used in modern clinical microbiology laboratory practice. Gain an understanding of mass spectrometry, NAAT, PCR, sequencing, antigen/antibody detection, antimicrobial susceptibility testing, point-of-care testing, and biomarkers of infection.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Summarize microscopic and phenotypic techniques used for identification
Audience: Graduate

2. Understand MALDI-TOF MS uses, advantages, and limitations
Audience: Graduate

3. Describe NAAT technologies such as PCR and TMA
Audience: Graduate

4. Explain how DNA sequencing works and its role in diagnosis
Audience: Graduate

5. Recognize common uses for antigen and antibody tests
Audience: Graduate

6. List different methods for antimicrobial susceptibility testing
Audience: Graduate

7. Differentiate rapid and POC testing from lab-based testing
Audience: Graduate

8. Discuss methods used for public health and infection control
Audience: Graduate

PATH 916 – CLINICAL MICROBIOLOGY: ANTIMICROBIAL RESISTANCE AND EMERGING PATHOGENS
2 credits.

Understand the battle between humans and infectious diseases. Learn how microbes evade the immune system and develop resistance to antibiotics. Discuss emerging pathogens and multidrug resistant organisms and the techniques used to combat them.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how microorganisms evade the immune system
Audience: Graduate

2. List major antibiotic classes and resistance mechanisms
Audience: Graduate

3. Explain the significance of ESKAPE pathogens
Audience: Graduate

4. Recognize the importance of emerging pathogens
Audience: Graduate

5. Recall techniques used to identify resistant and emerging pathogens
Audience: Graduate

6. Understand the role and antimicrobial stewardship
Audience: Graduate

7. Understand the role of infection prevention and control
Audience: Graduate

8. Explain treatment and eradication strategies
Audience: Graduate

PATH 920 – GENERAL PATHOLOGY CLERKSHIP
2-4 credits.

Understand the central role that diagnostic pathology and laboratory testing play in medical care in all specialties. Review your course work in anatomic and clinical Pathology and add to your fund of knowledge. Familiarize yourself with the workings of a busy diagnostic tissue laboratory. Participate in daily "clinical-pathologist" discussions concerning the effects of various pathological conditions as they relate to specific clinical problems. Understand the role of anatomic and clinical pathology as they contribute to the understanding of disease processes.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the role of the pathology laboratories and pathologists in patient care
Audience: Graduate

2. Describe the specimen requirements, processing, and workup of patient samples in the pathology laboratory area in which they rotated
Audience: Graduate

3. Demonstrate increased facility with the underlying basic science knowledge required for these areas (eg histology, anatomy, molecular biology, microbiology, etc.)
Audience: Graduate

4. Independently assess patient materials and construct a differential diagnosis of the disease process involved
Audience: Graduate

5. Communicate and collaborate with consultants and/or primary clinical team and other providers to coordinate care
Audience: Graduate

6. Review, interpret and present current literature to support the diagnostic workup
Audience: Graduate

PATH 921 – TRANSFUSION MEDICINE CUSTOMIZED
2 credits.

Maximize preparedness for residency by correlating basic science concepts with practical decision-making in clinical transfusion medicine. Tested topics are customized based on the student's specialty interests. Topics include hemostasis, immunology of transfusions, transfusion reactions, red blood cell (RBC) antigens and antibodies, product modifications, lab tests, indications, therapeutic apheresis, blood donation, special patient populations and circumstances such as obstetrics or neonates, and massive transfusion in surgery and trauma.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the basic physiology of hemostasis and how it relates to lab testing and transfusion practice.
Audience: Graduate

2. Explain the basic immunology of red cell antigens, antibodies, and acute and delayed hemolysis.
Audience: Graduate

3. Explain the immunology of ABO blood-typing, antibody screen and identification, and direct antiglobulin test.
Audience: Graduate

4. Explain the pathophysiology and management of transfusion reactions.
Audience: Graduate

5. Explain the basic physiology of and indications for blood products and product modifications.
Audience: Graduate

6. Explain the pathophysiology and management of typical diseases treated by therapeutic apheresis.
Audience: Graduate

7. Explain the basic steps in blood donation and donor screening.
Audience: Graduate

8. Explain the pathophysiology and management of the alloimmunization of pregnancy.
Audience: Graduate

9. Explain the physiology of neonates that lead to special transfusion practices.
Audience: Graduate

10. Explain the pathophysiology of a massive transfusion and the coagulopathy of trauma.
Audience: Graduate

PATH 922 – LABORATORY MEDICINE CUSTOMIZED
2 credits.

Learn the basic science principles of common laboratory tests. Apply this knowledge to assignments in which you make clinical judgments and answer common patient questions about lab test interpretations. Customize the curriculum based on your specialty interests.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define and apply the concepts of sensitivity and specificity.
Audience: Graduate

2. Define and apply negative and positive predictive value. Explain how these values are influenced by the prevalence (prior probability) of disease in defined populations (Bayes theorem).
Audience: Graduate

3. Describe how reference intervals are derived and used and the different types of reference intervals including those derived from population distributions, from expert consensus recommendation, or from evidence-based determination of "threshold" values based on a test's predictive value in a clinical algorithm.
Audience: Graduate

4. Explain why 5% percent of laboratory test results from healthy individuals might fall outside a reference range.
Audience: Graduate

5. Explain the concept of variability in repeated measurements, as well as variability within and between individuals.
Audience: Graduate

6. Describe the contributors to analytical uncertainty (precision, accuracy, bias, coefficient of variation) and how the sources of variability relate to clinical interpretation of changes in test results.
Audience: Graduate

7. Discuss the consequences of ordering unnecessary testing.
Audience: Graduate

8. Explain the roles of preanalytical and postanalytical variables in affecting test results and thereby impacting patient care.
Audience: Graduate

9. List common sources of preanalytical errors.
Audience: Graduate

10. Describe the effects of blood-drawing technique on test results.
Audience: Graduate

11. Compare and contrast the use of specimen tubes with various colored tops, as well as other specimen containers, and why they cannot be used interchangeably.
Audience: Graduate

12. Describe the broad categories of situations that may result in test interference such as incomplete tube fill, hemolysis, lipemia, bilirubinemia, cross-reacting and interfering substances.
Audience: Graduate

13. List some important limitations and pitfalls of common lab tests.
Audience: Graduate

PATH 923 – SICKLE CELL DISEASE AND PUBLIC HEALTH
2 credits.

Patients with sickle cell disease can present to any medical specialty with manifestations or complications of the disease. Using a disease-focused biopsychosocial approach, the goal is the identification and understanding of barriers to health and the potential opportunities for improvement. The topics surveyed include: 1) clinical review, 2) community voices, 3) diversity, equity, and inclusion, 4) practical communication skills, 5) actionable examples of quality improvement, 6) health care systems, 7) economics, 8) global health, 9) ethics, and 10) advocacy via intellectual persuasion.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the basic epidemiology, genetics, pathophysiology, diagnosis, clinical manifestations, & treatments for sickle cell disease (SCD).
Audience: Graduate

2. Explain the common stigmas and misconceptions related to SCD, race, racism, pain, and addiction as well as their impacts on health care decision-making.
Audience: Graduate

3. Explain and apply some common practical written and oral communication skills in clinical settings involving the care of individuals with SCD that maximize respect and quality.
Audience: Graduate

4. Focusing patients and populations with SCD, describe how quality improvement tools can be incorporated into the clinical and community settings and how these translate across populations
Audience: Graduate

5. Explain 4 health care systems models of SCD care & how your future practice can contribute.
Audience: Graduate

6. Explain the economic burdens of SCD, reasons why there is a shortage of hematologists, the basic economics of price controls, and different economic policy views.
Audience: Graduate

7. Explain some challenges that affect patients with SCD in different countries, reasons why these challenges exist, and different views on opportunities for improvement.
Audience: Graduate

8. Describe the application of ethical frameworks in influencing policies that impact the health of patients and populations with SCD.
Audience: Graduate

9. Frame a persuasive policy advocacy message that seeks to positively impact health outcomes for individuals with SCD.
Audience: Graduate

PATH 924 – IMMUNOHEMATOLOGY
2 credits.

Utilize a case-based learning approach to interpret blood bank test results such as ABO typing data, antibody screens, antibody panels, and direct antiglobulin tests. Identify antibodies to red blood cell and platelet antigens. Demystify the inner workings of the blood bank clinical laboratory. Improve your ability to understand and communicate results from the blood bank.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of the basic science principles of pretransfusion testing including ABO/Rh testing, RBC antibody screen, and antibody identification.
Audience: Graduate

2. Identify RBC antibodies from an antibody panel.
Audience: Graduate

3. Demonstrate knowledge of alloimmunization of pregnancy.
Audience: Graduate

4. Demonstrate knowledge of refractoriness to platelet transfusions.
Audience: Graduate

5. Demonstrate knowledge of neonatal alloimmune thrombocytopenia.
Audience: Graduate

6. Communicate interpretations of these results to patients in layman's terms.
Audience: Graduate

PATH 926 – PATHOLOGY: CLINICAL MICROBIOLOGY-MARSHFIELD
2-12 credits.

Clinical elective for fourth year medical students.
Requisites: Declared in Medicine program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Explain the role of the clinical laboratory and microbiology section in diagnosing infectious diseases and guiding their treatment
Audience: Graduate

2. Describe various methods for identifying infectious agents including culture, mass spectroscopy, and genetic analyses
Audience: Graduate

3. Explain the role of the microbiology laboratory in maintaining antibiotic stewardship and the importance of this endeavor in public health
Audience: Graduate

PATH 949 – GENETICS THROUGH THE LIFE CYCLE
4 credits.

Examines the impact of the genome on health and disease from conception through aging. Provides an overview of clinical laboratory testing in medical genetics and public health, including prenatal genetics, newborn screening, testing across the lifespan, and oncology genetics. Covers genetics principles, interpretation of screening and diagnostic tests, and the limitations of genetic testing, with applications to public health and clinical practice.
Requisites: Declared in Medicine program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Demonstrate knowledge of fundamental principles of genetics
Audience: Graduate

2. Differentiate a screening test versus a diagnostic test
Audience: Graduate

3. Identify indications for genetic testing
Audience: Graduate

4. Assess the clinical utility of a genetic test
Audience: Graduate

5. State the limitations of genetic tests and clinical laboratory medicine
Audience: Graduate

PATH 950 – INFECTIOUS DISEASE DETECTIVES
2 credits.

In much of the world, infection remains the leading cause of disease and death. While medicine has made great strides in the diagnosis and treatment of infection, new and deadly pathogens continue to emerge, and antibiotic resistance continues to grow. No matter what a physician's specialty, understanding principals of infectious disease manifestations, diagnosis and treatment are key.
Requisites: Declared in the Medical program with 4th year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify characteristic gross/histologic features seen in various types of infectious disease
Audience: Graduate

2. Demonstrate understanding of the relative merits of various infectious disease diagnostic testing modalities
Audience: Graduate

3. Relate basic concepts of inflammation and mechanisms of infectious disease to potential clinical manifestations
Audience: Graduate

4. Demonstrate understanding of the collaborative relationship between the pathology department and treating physicians in cases of infectious disease
Audience: Graduate

PATH 960 – PATHOLOGY FOR SURGEONS
2 credits.

The surgeon-pathologist relationship is an integral aspect of the surgical care process. The intraoperative and postoperative findings of the pathologist confirm that the appropriate course of action was taken, and this information determines what the surgeon will tell the patient and his or her family about the disease entity, prognosis, and recommended next steps. In this basic science selective, future surgeons will have the opportunity to refresh their understanding of essential anatomy and histology, and deepen their knowledge of disease pathophysiology. They will also engage in multiple practical learning activities such as cutting a frozen section, working up a transfusion reaction, staining and interpreting an FNA cytology slide, assisting in prosecting (grossing) surgical pathology and autopsy specimens and following up on the diagnosis/molecular testing/tumor board discussion to enhance their understanding of the pathologist's critical role in managing surgical patients.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Reinforce knowledge of critical human anatomy and improve anatomic dissection skills
Audience: Graduate

2. Compare and contrast the indications, interpretative considerations, and relative merits of cytologic versus tissue diagnosis via core or open biopsy
Audience: Graduate

3. Develop familiarity with basic concepts of molecular testing and how it impacts disease diagnosis, prognosis and choice of targeted therapy
Audience: Graduate

4. Explain the pathophysiology of transfusion reactions and review other potential pitfalls of intraoperative blood product utilization
Audience: Graduate

5. Deepen understanding of disease features and the integral role pathologists play in management of surgical patients
Audience: Graduate

PATH 962 – THE MOLECULAR BASIS OF HEMATOLOGIC MALIGNANCIES
2 credits.

Understanding molecular mechanisms of hematologic disease, and developing a foundation in the principles of relevant molecular assays, is critical to providing appropriate patient care. Topics include bases of neoplastic disorders of the hematopoietic and lymphoid systems, how underlying molecular abnormalities contribute to the pathophysiology of these diseases, and the evolving spectrum of molecular and cytogenetic/FISH testing and other ancillary testing (such as flow cytometry), which are often utilized in the work-up of hematopoietic and lymphoid malignancies. Learn about strengths and weaknesses of these technologies, and how pathologists integrate results of molecular testing with the traditional histologic exam to produce accurate diagnoses and drive clinical decision making. Develop an understanding of how knowing the underlying molecular pathology of a hematopoietic or lymphoid malignancy can inform prognosis and guide therapy.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe basic processes underlying normal hematopoiesis and lymphocyte development.
Audience: Graduate

2. Apply basic principles, advantages, and limitations of the most common forms of ancillary testing in hematopathology, including flow cytometry, cytogenetics/FISH, and select molecular assays.
Audience: Graduate

3. Explain types of molecular abnormalities observed in neoplasia and how these abnormalities contribute to neoplastic growth via various cellular pathways.
Audience: Graduate

4. Describe the molecular basis, pathophysiology, and laboratory evaluation of known or suspected myeloid malignancies (including MDS, MPN, MDS/MPN, AML, and systemic mastocytosis)
Audience: Graduate

5. Describe the molecular basis and pathophysiology of clonal hematopoiesis of indeterminate potential (CHIP) and clonal cytopenia of uncertain significance (CCUS), and understand how these entities may complicate the molecular evaluation of suspected myeloid malignancies.
Audience: Graduate

6. Describe the molecular basis, pathophysiology, and laboratory testing of lymphoid malignancies, including lymphoblastic lymphomas/leukemias and B-cell and T-cell lymphomas.
Audience: Graduate

7. Describe the role of precision medicine and the utility of current and evolving targeted therapies in hematolymphoid disorders.
Audience: Graduate

PATH 963 – WOMEN'S GLOBAL HEALTH: A FOCUS ON WOMEN'S CANCERS AND PUBLIC HEALTH INTERVENTIONS
2 credits.

Unique opportunity for fourth year medical students to develop an intervention project focused on women's health and cancer prevention, diagnosis, treatment, or awareness globally and locally. Explore how women's health is influenced by both biological and sociocultural factors. Observe components of diagnosis of women's related cancers. Analyze molecular components of cancers used for diagnosis and treatment. Deconstruct the unique diseases that affect women throughout the life cycle and social factors that influence them.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Deconstruct differences in female biology that impact medical/public health research and health outcomes
Audience: Graduate

2. Describe the burden of cancers among women globally and locally
Audience: Graduate

3. Critique scientific literature to assess for inclusion of women’s specific issues and/or inclusion of women in outcome analysis
Audience: Graduate

4. Identify solutions to address unique women’s health challenges
Audience: Graduate

5. Propose public health interventions that address cancer-related women’s health challenges
Audience: Graduate

PATH 970 – GENOMICS, PROTEOMICS, AND METABOLOMICS: A DEEP DIVE INTO OMICS DATA ANALYSIS
2 credits.

Advances in medicine are increasingly driven by "big data" analyses, including proteomics, genomics, and metabolomics. Basic knowledge of analyzing these datasets enables the generation and testing of hypotheses with the potential to transform a field. Provides foundational instruction in "omics" methodologies, heritability studies, and analytical techniques, offering the skills needed to conduct future 'omics analyses and apply scientific inquiry to advance medical practice.
Requisites: MED SC-M 810, 811, 812 and 813; or Declared in Cellular and Molecular Pathology Graduate Program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine and critically evaluate databases for adequacy of data.
Audience: Graduate

2. Demonstrate understanding of biological variability, data scaling, and data normalization schemes
Audience: Graduate

3. Demonstrate a basic understanding of statistical associations using bioinformatics, such as hierarchical clustering and correlation matrices.
Audience: Graduate

4. Demonstrate a basic understanding of analyte pathways using bioinformatics databases such as Uniprot.
Audience: Graduate

5. Demonstrate appropriate consideration of false discovery.
Audience: Graduate

6. Develop hypothetical models of molecular interactions.
Audience: Graduate

7. Synthesize knowledge of molecular pathways and apply this knowledge to potential health and clinical factors.
Audience: Graduate

8. Prepare and defend a hypothetical model of molecular interactions.
Audience: Graduate

9. Demonstrate critical thinking skills and an understanding of the underlying science behind analytical methodologies
Audience: Graduate

PATH 980 – CLINICAL EXPERIENCES FOR RESEARCHERS
1 credit.

Structured observation experiences across various medical clinics, including hematology, oncology, infectious diseases, and surgical pathology settings. Bridge the gap between laboratory research and clinical practice; enhanced understanding of disease diagnosis, treatment planning, and patient care. Supplemental discussions and reflective assignments encourage critical thinking about how research can directly impact patient care.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop a comprehensive understanding of how translational research applies in the clinical setting
Audience: Graduate

2. Identify opportunities to bridge your research and clinical applications
Audience: Graduate

3. Enhance interdisciplinary communication between researchers and clinicians
Audience: Graduate

4. Understand practical barriers to translational applications of research to the clinic
Audience: Graduate

PATH 990 – RESEARCH
1-8 credits.

For Grad and medical students desiring advanced pathology; work done under the direction of a senior staff member.
Requisites: Declared in Medicine program or Cellular and Molecular Pathology graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Exhibit a broad understanding of general principles in the field of pathology and laboratory medicine.
Audience: Graduate

2. Conduct independent research using a variety of approaches.
Audience: Graduate

3. Think critically to address research challenges.
Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research.
Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab.
Audience: Graduate

PEDIATRICS (PEDIAT)

PEDIAT 699 – INDEPENDENT STUDY
1-5 credits.

Independent study projects as arranged with faculty or instructional staff.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

PEDIAT/MED PHYS 705 – WOMEN AND LEADERSHIP: SCIENCE, HEALTH AND ENGINEERING
2 credits.

Multiple professional and scientific groups have identified the underrepresentation and lack of advancement of women in academia as a national workforce problem. Review evolving perspectives of leadership and how unconscious assumptions about the behaviors and traits of men, women, and leaders impede women's advancement. Emphasizes the implications for women in the fields of science, health and engineering and explore the potential impact on the advancement of knowledge and improvements in health. Provides the opportunity to apply evidence-based perspectives using experiential methods.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Be conversant with several definitions and styles of leadership, as well as with research on how leadership and gender intersect/interact, particularly in an academic context.
Audience: Graduate

2. Reflect on personal leadership goals and skills based on readings, discussion, and online reflection assignments.
Audience: Graduate

3. Demonstrate knowledge of effective evidence-based leadership strategies.
Audience: Graduate

4. Consider the integral link between women leaders and the advancement of women's health.
Audience: Graduate

PEDIAT 909 – PEDIATRICS INTERNSHIP PREP COURSE (PIPC)
1 credit.

Use both didactics and simulations to cover high yield topics that a new Pediatric Intern should know to start a Pediatrics Residency. Working with a team of faculty, multi-disciplinary staff, residents, fellows and course directors, review topics such as intravenous fluid management, nutrition, vaccines, newborn care, fever and antibiotic therapy, developmental skills, hematology/oncology emergencies, dermatology, respiratory distress, endocrine emergencies, radiology, and informed consent. Participate in simulations to review medical knowledge, communication skills, and teamwork. Participate in difficult communication cases including obtaining informed consent or talking with parents of patients who choose to decline recommended management options. Practice common pediatric skills including IV placement, umbilical line placement, defibrilation, airway management, lumbar puncture, and suturing.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate effectively with patients, families, and all members of the healthcare team
Audience: Graduate

2. Diagnose and manage common and critical medical conditions
Audience: Graduate

3. Perform duties as first responder to urgent/emergent patient care situations
Audience: Graduate

4. Practice skills including placing PIV/IO, umbilical lines, performing lumbar puncture, suturing, defibrillation, and securing the pediatric airway
Audience: Graduate

5. Simulate difficult conversations with patients/families and variable pediatric scenarios that require teamwork and knowledge of basic resuscitation
Audience: Graduate

PEDIAT 910 – INDEPENDENT READING AND RESEARCH IN PEDIATRICS
1-8 credits.

Independent research under the direct supervision of department of pediatrics faculty. Each students research project is individualized to meet student research goals within context of faculty research needs.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research
Audience: Graduate

2. Conduct a thorough literature review of the specific research question
Audience: Graduate

3. Select and apply statistical methodologies appropriate for the proposed analyses
Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review
Audience: Graduate

PEDIAT 911 – ABLEISM IN HEALTHCARE: UNDERSTANDING THE PROBLEM TO IMPROVE CARE
2 credits.

Disability rights, disability identity, and access and inclusion factors leading to disparities in care. Build a conceptual framework of the problem and utilize this framework to identify and implement potential solutions.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the heterogenous definition of disability, the disability identity and how this relates to anti-ableism, and the intersectionality of disability with other identities.
Audience: Graduate

2. Examine the history of disability rights in the United States and how this applies to access to care, education and other services.
Audience: Graduate

3. Describe how current systems create inaccessibility in social interactions, education, employment, and healthcare for people with disabilities.
Audience: Graduate

4. Identify the various statewide organizations that can provide additional support for children and adults with disabilities.
Audience: Graduate

5. Illustrate ways to improve accessibility and inclusion for those with disabilities in the medical system (including disabilities knowledge in medical training).
Audience: Graduate

6. Implement strategies participants can use to improve their future care of individuals with disabilities.
Audience: Graduate

PEDIAT 919 – INDIVIDUALIZED CLINICAL ELECTIVE IN PEDIATRICS
1-4 credits.

Supervised activities include interacting with patients primarily in outpatient setting, participating in all clinical activities and other components of the individualized rotation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 921 – WISCONSIN LEADERSHIP EDUCATION IN NEURODEVELOPMENTAL AND RELATED DISABILITIES (LEND)
2 credits.

Participate in an interdisciplinary training program to learn foundational knowledge, skills, and attitudes related to the care of individuals with developmental disabilities. Covers neuromotor development, cognitive development, communication development, psychosocial development, physical health, quality of life, and other topics relevant to the care of individuals with developmental disabilities, as well as Lifecourse Story Team sessions that focus on a family-centered exploration of the experience of a child with a developmental disability and their family. Learn the role of different disciplines and the relevant systems of care for individuals with developmental disabilities. Explore impact of different legal and health policies on individuals with developmental disabilities and their families, as well as the concept of "ableism" and strategies to reduce this.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate knowledge of the process of diagnosis and management of common developmental disabilities
Audience: Graduate

2. Identify relevant systems of care for developmental services
Audience: Graduate

3. Discuss the role of interdisciplinary team in providing care for individuals with developmental disabilities
Audience: Graduate

4. Demonstrate knowledge of relevant legal and health policies which effect individuals with developmental disabilities
Audience: Graduate

5. Describe health disparities in individuals with developmental disabilities and strategies to mitigate them
Audience: Graduate

PEDIAT 930 – PEDIATRIC NEONATOLOGY ELECTIVE
2-4 credits.

Activities include attending deliveries of high-risk infants, admitting and managing a circumscribed select group of patients under the supervision of the attending neonatologist. Daily notes and orders are written and counter-signed by the neonatologist. Weekly rounds are made with social worker/discharge planner. Night call will be taken every fourth night. Attend appropriate perinatal conferences.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 931 – CHILD ABUSE PEDIATRICS ELECTIVE
2-4 credits.

Gain essential skills and knowledge to effectively recognize, diagnose, and treat cases of child maltreatment. Identify medical evidence that should raise reasonable suspicion of child abuse and neglect and become familiar with mandatory reporting requirements, including how to make a report to Child Protective Services and Law Enforcement. Collect special history, examination, laboratory, and imaging information necessary in cases of suspected child maltreatment. Develop skills to thoroughly document examination findings using written notes, drawings, and forensic photography. Practice communication skills when dealing with high-stress medical situations.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize, diagnose and treat cases of child maltreatment.
Audience: Graduate

2. Identify medical evidence that should create reasonable suspicion of child abuse.
Audience: Graduate

3. Summarize mandatory reporting requirements and how to make a report to Child Protective Services and Law Enforcement.
Audience: Graduate

4. Summarize the special history, examination, laboratory, and imaging information that should be collected in cases of suspected child maltreatment.
Audience: Graduate

5. Document thoroughly the results of an examination by using written notes, drawings, and forensic photography.
Audience: Graduate

6. Adapt and apply communication skills to high stress clinical situations.
Audience: Graduate

PEDIAT 935 – SURGICAL, NEUROLOGIC, & COMPLEX CARE OF THE NEONATE ELECTIVE
2-4 credits.

Supervised activities include inpatient management in an intensive care setting and attending all the neonatal division educational sessions, which may include; Neonatology journal club, Multidisciplinary discharge planning rounds, and Individual patient care conferences.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 938 – INPATIENT ACTING INTERNSHIP-PEDIATRICS
4 credits.

Pediatric acting interns will serve as the primary provider for pediatric patients in one of the offered inpatient settings. This includes responsibility for diagnosis and management; communication with patients, families, and other interdisciplinary care providers; and self-directed learning and application of evidence-based medicine. The student will work under the direct supervision of a senior resident, fellows and the pediatric faculty. This rotation will provide the student with the opportunity to function at the intern level and play an active role in inpatient management of inpatient pediatric patients.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history
Audience: Graduate

2. Complete a targeted exam
Audience: Graduate

3. Develop and present a weighted differential diagnosis (EPA 2)
Audience: Graduate

4. Using clinical evidence, select a working diagnosis (EPA 2)
Audience: Graduate

5. Present diagnostic plan including laboratory and imaging modalities
Audience: Graduate

6. Interpret imaging and laboratory findings in the context of patient presentation
Audience: Graduate

7. Write admitting and daily orders (EPA 4)
Audience: Graduate

8. Justify orders based upon working diagnosis and cost-effectiveness (EPA 4)
Audience: Graduate

9. Complete written patient evaluation using standard format
Audience: Graduate

10. Write daily progress notes including assessments and plans using standard format
Audience: Graduate

11. Present initial patient evaluation including assessments and plans
Audience: Graduate

12. Summarize patient's hospital course during rounds and manage day to day care
Audience: Graduate

13. Present current literature to support patient care
Audience: Graduate

14. Based on case load, develop clinically relevant questions to further individual and team learning
Audience: Graduate

15. Give and receive patient handovers (EPA 8)
Audience: Graduate

PEDIAT 940 – ADOLESCENT MEDICINE ELECTIVE
2-4 credits.

Supervised activities include interacting with patients in adolescent outpatient clinics, performing histories, physical examinations and managing patients with supervision by our staff. Give a didactic presentation at the end of the rotation on a topic of student's choice as well as write a blog for Writes of Passage. Customize clinic schedule from a menu of opportunities provided by the director.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 941 – PEDIATRIC ALLERGY/IMMUNOLOGY ELECTIVE
2-4 credits.

Supervised activities include seeing patients in outpatient clinics, observing procedures and attending weekly pediatric allergy conferences. Hands-on clerkship experience in this sub-specialty involves both very common and uncommon diseases in pediatrics in allergy and immunology. Specific topics that are covered include food allergy, asthma, allergic rhinitis, atopic dermatitis, and primary immune deficiency. As these diseases are increasing in prevalence and have broad impacts on child health, this experience is ideal preparation for careers in pediatric and medical specialties, or surgical specialties.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

14. Take an accurate exam and history pertaining to common allergic disorders (e.g. allergic rhinitis, drug allergy, food allergy) and asthma.
Audience: Graduate

PEDIAT 942 – PEDIATRIC COMPLEX CARE ELECTIVE
2-4 credits.

Under direct supervision by faculty, participate in medical co-management and care coordination for children with medical complexity. Multifaceted approach to learning about children with medical complexity, with focus on history and exam skills during scheduled maintenance and acute care visits. Pediatric ethics, organizing and maintaining accurate and up-to-date electronic medical records, documentation skills.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

14. Explore ambiguities in the ethics of caring for children with medical complexity.
Audience: Graduate

15. Demonstrate independent research skills and presentation abilities through a self-directed learning project.
Audience: Graduate

PEDIAT 943 – PEDIATRIC CARDIOLOGY ELECTIVE
2-4 credits.

Supervised by house staff and attending physicians activities include attending a variety of outpatient clinics with pediatric cardiologists, inpatient pediatric cardiology rounds and consults with the inpatient service team, observing various scheduled procedures (including echocardiography, ECG, cardiac catheterization, electrophysiology study), attending pediatric cardiology related conferences, presenting cases and teaching topics, and discussing patient cases.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret testing (i.e. ECG and echocardiogram) and communicate results to patients (once reviewed with cardiologist) and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 950 – PEDIATRIC ENDOCRINOLOGY AND DIABETES ELECTIVE
2-4 credits.

Supervised activities include interacting with patients primarily in outpatient (some inpatient) settings, performing histories and physical examinations and managing patients with supervision by our staff. Group and individual discussions concerning patients seen in both the outpatient and inpatient settings will occur.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 953 – CLINICAL GENETICS ELECTIVE
2-4 credits.

Supervised activities include interacting with patients primarily in outpatient setting, participating in all clinics, rounds, consults and other components of the service. Active participation in patient evaluations and patient management is another component of this rotation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 956 – PEDIATRIC HEMATOLOGY-ONCOLOGY ELECTIVE
2-4 credits.

Supervised activities include attending pediatric hematology/oncology clinics, evaluating patients in the clinics and attending the weekly pediatric hematology/oncology conferences.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 963 – PEDIATRIC NEPHROLOGY
2-4 credits.

Provides an in-depth introduction to a variety of kidney diseases, building skills in diagnosing and treating complex pediatric and adolescent patients. Includes rotations through inpatient nephrology service, outpatient nephrology clinic, and inpatient dialysis unit.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PEDIAT 966 – PRIMARY CARE SPORTS MEDICINE ELECTIVE
2-4 credits.

Supervised activities include interacting with patients and Licensed Athletic Trainers, residents and primary care sports medicine fellow in various outpatient settings and participating in assigned sports medicine clinics. Participating in patient evaluations, patient management and attending the weekly Friday morning sports medicine conference are additional components of this rotation. Other opportunities may include observing or evaluating patients in other clinical situations including the McClain Center UW athlete clinics, high school game coverage, PT clinics, other orthopedic clinics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 967 – PEDIATRIC PULMONOLOGY ELECTIVE
2-4 credits.

Supervised activities include: attending outpatient clinics, rounding with inpatient attendings, attending weekly didactic and clinical conferences, observation of flexible bronchoscopies and participating in one-on-one tutorials.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 970 – PEDIATRIC RHEUMATOLOGY ELECTIVE
2-4 credits.

Supervised activities include seeing patients in outpatient clinics, rounding with inpatient attendings, attending weekly pediatric rheumatology conferences, observing procedures and attending one-to-one tutorials.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis.
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

7. Review, interpret and present current literature to support patient care.
Audience: Graduate

8. Develop clinically relevant questions to advance learning.
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.
Audience: Graduate

PEDIAT 971 – PEDIATRIC INFECTIOUS DISEASES
2-4 credits.

Rounds as a member of the inpatient Pediatric Infectious Disease consult team, performing infectious disease-focused history and physical examinations and contributing to the development and communication of management recommendations. Includes attendance at outpatient infectious disease clinics, case conferences, microbiology rounds, and daily pediatric conferences such as morning report, problem conference, and grand rounds.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PEDIAT 973 – PEDIATRIC GASTROENTEROLOGY
2-4 credits.

Provides clinical experience in pediatric gastroenterology through participation in outpatient clinics, inpatient rounds, and specialty conferences. Includes attendance at pediatric conferences such as morning report, case conferences, and grand rounds, along with observation of procedures in the operating room.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PEDIAT 975 – DEVELOPMENTAL PEDIATRICS
2-4 credits.

An introduction to developmental pediatrics and the care of children with developmental disabilities. Includes rotations through a variety of clinics tailored to individual interests.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PEDIAT 990 – RESEARCH
1-12 credits.

Research and/or scholarly work (e.g. quality improvement, clinical case reports) supervised by faculty and/or staff member within the Department of Pediatrics with appropriate content expertise. Requires identifying a supervisor and project before enrollment.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

PHARMACEUTICAL SCIENCES (PHM SCI)

PHM SCI 254 — TINY EARTH GENOMICS - RESEARCHING UNCULTURED ANTIBIOTIC-PRODUCING MICROBES
3 credits.

Collaborate on a research project from the conception of research questions through data analysis and the effective communication of results. Explore the biosynthesis of antibiotics and other small molecules by uncultured bacteria through the analysis of culture-independent DNA sequencing (metagenomics) data, learning about bioinformatics and genomics along the way. Make new discoveries of microbial species and biochemical pathways.
Requisites: ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, MICROBIO 101, 303, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Navigate genomic databases to find required information and data
Audience: Undergraduate

2. Interpret results using available bioinformatic tools
Audience: Undergraduate

3. Formulate a research question and testable hypothesis
Audience: Undergraduate

4. Refute or support a hypothesis using evidence
Audience: Undergraduate

5. Interpret data and draw conclusions
Audience: Undergraduate

6. Communicate research design and results in written and oral forms
Audience: Undergraduate

PHM SCI 310 — DRUGS AND THEIR ACTIONS
2 credits.

Introduces students to the biological effects of drugs on human health. Emphasis on how drugs, especially those used in diseases of major human health significance, act in the body. Drugs that are abused also will be covered. This course is not intended for medical, nursing, pharmacy, and physician assistant students.
Requisites: Not open to students declared in the Nursing, Physician Assistant, or Doctor of Pharmacy programs
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Define basic principles of pharmacology including pharmacokinetics and pharmacodynamics
Audience: Undergraduate

2. Memorize examples of drugs, drug classes, and pharmacology of drugs used to treat various disease states including anxiety, depression, pain, schizophrenia, Alzheimer's disease, cancer, and infectious diseases
Audience: Undergraduate

3. Describe examples of drugs, drug classes, and pharmacology of drugs used for non-medical purposes including alcohol, caffeine, nicotine, barbiturates, amphetamine, marijuana, cocaine, and opiates
Audience: Undergraduate

4. Describe examples of drugs, drug classes, and pharmacology of drugs used as PEDs including anabolic steroids and blood doping drugs
Audience: Undergraduate

PHM SCI 420 – PHYSICOCHEMICAL PRINCIPLES OF DRUG FORMULATION AND DELIVERY
3 credits.

Applications of physicochemical principles to pharmaceutical systems.
Requisites: Declared in Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. State the major physical and chemical properties of drugs and excipients that influence the performance of drugs and dosage forms.
Audience: Graduate

2. Apply the different expressions for the concentrations and doses of drug products, and convert different expressions for concentrations and doses.
Audience: Graduate

3. Apply thermodynamic principles to important equilibria in pharmaceutical systems, including isotonicity, acid-base equilibrium, binding equilibrium, partition, hygroscopicity, and solubility.
Audience: Graduate

4. Propose procedures to prepare isotonic solutions and buffered solutions.
Audience: Graduate

5. Understand suspensions and colloids and their role in drug formulations
Audience: Graduate

6. Calculate the distribution of drugs between aqueous and lipid phases based on the principle of partition.
Audience: Graduate

7. Identify the different solid phases of the same drug and predict their impact on drug performance.
Audience: Graduate

8. Predict the aqueous solubility of drugs and its dependence on pH, common ions, and solid forms, and understand its impact on drug performance.
Audience: Graduate

9. Predict shelf life and suggest storage conditions from reaction rate constants and orders of reactions.
Audience: Graduate

10. State the major factors that influence the chemical stability of drugs (e.g., temperature, humidity, light, pH, oxygen, and free radicals) and the common reaction mechanisms (e.g., hydrolysis and oxidation), and propose approaches to stabilization and extending the expiration date of drug products (e.g., pH control, antioxidants, and packaging).
Audience: Graduate

PHM SCI 432 – BIOCHEMICAL PRINCIPLES OF DRUG TREATMENT
3 credits.

Basic biochemistry as the biochemical basis for drug action. Focus on biopolymers (proteins, nucleic acids) as intended and unintended targets of current drug therapy and the major biochemical pathways in which they operate. Review of protein structure, enzymatic activity, metabolic pathways, membrane biochemistry, mechanism of drug action, DNA mutation and repair.
Requisites: Declared in Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Deduce aspects of protein structure and catalysis from kinetics and other data
Audience: Graduate

2. Summarize how nucleic acids are used to store information in living organisms, including the molecular mechanisms for replication and protein expression
Audience: Graduate

3. Apply knowledge of the pathways by which energy is derived from fats and carbohydrates to both the clinical progression of diabetes and its treatment
Audience: Graduate

4. Differentiate between the different methods of biosignaling, in terms of whether energy is required and whether molecules are physically moved through membrane barriers
Audience: Graduate

5. Integrate understanding of biochemical systems and the ways that drugs are able to target them to therapeutic effect
Audience: Graduate

PHM SCI 490 – SELECTED TOPICS IN PHARMACEUTICAL SCIENCES
1-4 credits.

Specialized subject matter of current interest to undergraduate and professional students.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

PHM SCI 493 – SELECTED TOPICS IN PHARMACEUTICAL SCIENCES
1-4 credits.

Specialized subject matter of current interest to graduate students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHM SCI 510 – PHARMACOLOGY PRINCIPLES AND APPLICATIONS
2 credits.

Underlying science and pharmacological actions of drugs and the biological effects of drugs on human health. Covers drugs used to treat common illnesses and diseases as well as commonly abused drugs.
Requisites: Declared in Pharmacology and Toxicology BS. Not open to students with credit for PHM SCI 310.
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain principles of pharmacology
Audience: Undergraduate

2. Apply chemistry and biology knowledge to pharmacokinetics and pharmacodynamics
Audience: Undergraduate

3. Identify types of drugs used to treat various disease states
Audience: Undergraduate

PHM SCI 521 – PHARMACOLOGY I
3 credits.

Pharmacological actions of important drugs, including drugs that affect the peripheral and central nervous systems.
Requisites: Declared in the Doctor of Pharmacy program with second year standing; or declared in Pharmacology and Toxicology BS, BIOCHEM 508, PATH 404, and (ANAT&PHY 335, 435, or BIOCORE 486)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the neurotransmitters of the central and autonomic nervous systems including their physiologic role, distribution, location, synthesis, storage, release, receptor activation and transmitter inactivation which may serve as sites for drug action
Audience: Undergraduate

2. Describe and differentiate the drug pharmacology of drugs that act in the central and autonomic nervous systems
Audience: Undergraduate

PHM SCI/PHMCOL-M 522 – PHARMACOLOGY II
3-4 credits.

Pharmacological actions of important drugs, including hematopoietic, thrombolytic, antihyperlipidemic, immunopharmacologic, anticancer, anti-inflammatory, diuretic, antihypertensive, antianginal, and anti-arrhythmic agents, and agents used to treat congestive heart failure.
Requisites: PHM SCI 521
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recall the names of different drugs, and be able to link these drug names to not only specific uses, but also to more general concepts about physiology, disease, and drug mechanism of action
Audience: Undergraduate

2. Describe and differentiate the pharmacology of drugs that act on organ systems, including the endocrine, gastrointestinal, cardiovascular, renal, hematopoietic, and immune systems
Audience: Undergraduate

PHM SCI 531 – MEDICINAL CHEMISTRY I
3 credits.

Basic concepts in the chemistry of small molecule medicinal products. Structure activity of cholinergic, adrenergic, serotonergic and dopaminergic agents, antidepressant, antianxiety drugs, opioids, and antihistamines. Overview of drug metabolism and the clinical effects of metabolic drug interactions and genetic variability in drug metabolism genes.
Requisites: PHM SCI 432
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify drugs, their therapeutic use, and side effects based on drug name and structure
Audience: Undergraduate

2. Use pharmacophoric drug models to predict potency, metabolism, or side effects
Audience: Undergraduate

3. Apply mechanisms of drug/xenobiotic biotransformation to parent drugs
Audience: Undergraduate

4. Explain factors affecting drug/xenobiotic metabolism in humans, including both environmental and genetic effects and the resulting clinical implications
Audience: Undergraduate

PHM SCI 532 – MEDICINAL CHEMISTRY II
2 credits.

Chemistry of medicinal products, including antihyperlipidemics, glucocorticoids, estrogens, progestins, nonsteroidal anti-inflammatories, antitumor agents, and enzyme inhibitors.
Requisites: PHM SCI 531
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain basic chemical principles as they apply to drug SAR
Audience: Undergraduate

2. Identify drug classes and origin based in part on drug structures
Audience: Undergraduate

3. Recognize the mechanism of drugs that act via enzyme inhibition
Audience: Undergraduate

4. Explain the difficulty of drug design in light of side effects and complexity of possible drug targets
Audience: Undergraduate

5. Apply the knowledge of structural modifications to enhance drug delivery via increased solubility, metabolic stability and bioavailability
Audience: Undergraduate

PHM SCI 540 – DRUG DELIVERY SYSTEMS FOR PHARMACOTHERAPY
3 credits.

A series of lectures by experts covering: i) introductory drug development and delivery system development processes; ii) various drug delivery routes (oral, topical, rectal, vaginal, urethral, nasal, and pulmonary); iii) various delivery systems (conventional, ophthalmic, CNS, and recent advances); iv) delivery systems related to biofilms, infection, and vaccines.
Requisites: Declared in the Doctor of Pharmacy program with second year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe theories, approaches, concepts, and current research findings in the area of drug delivery.
Audience: Graduate

2. Apply knowledge of drug development, dissolution, and dosage forms to delivery systems.
Audience: Graduate

3. Identify the characteristics of various common dosage forms and describe/recognize/explain how composition impacts drug release, stability, and bioavailability.
Audience: Graduate

4. Demonstrate, using knowledge of mathematics, chemistry, and biology, concepts of solubility, stability, drug release, dissolution, diffusion, partitioning, dose, absorption, and disposition as related to pharmacology and pharmacokinetics.
Audience: Graduate

5. Demonstrate underlying principles of advanced drug delivery systems which are either entering clinical practice or on the advanced stage in clinical trials/development phase.
Audience: Graduate

6. Identify the rationale for therapeutic use, administration route, formulation, and manufacture of common dosage forms.
Audience: Graduate

7. Utilize proper techniques and skills to be able to advise patients and health care professionals on drug storage, handling, and administration, as well as be able to identify factors that influence bioavailability and related safety issues.
Audience: Graduate

8. Demonstrate professional and ethical responsibility.
Audience: Graduate

PHM SCI 541 – PHARMACEUTICAL CALCULATIONS, DISPENSING AND COMPOUNDING
3 credits.

Introductory laboratory course in compounding and dispensing of pharmaceutical dosage forms, including sterile products. Includes practice in interpretation of prescription orders, pharmaceutical calculations, compounding procedures, physical manipulation of drugs and dosage form components, and product packaging and labeling.
Requisites: PHM SCI 420
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Read and accurately interpret prescription and medication orders
Audience: Undergraduate

2. Correctly identify, interpret and utilize for calculation, the information presented in a written problem, a prescription or medication order, and directions taken from the labeling of a container
Audience: Undergraduate

3. Accurately calculate the quantities needed to compound a dosage form, the dosage of ingredients, and the amount of any drug source required to fulfill the dosing needs of the patient
Audience: Undergraduate

4. Know the dimensions or units of measurements for drugs and chemicals, expressions of quantity and concentration for drug products and preparations, and appropriate methods of expressing doses and dosing regimens for patients
Audience: Undergraduate

5. Perform the accepted techniques used for extemporaneous compounding of non-sterile drug products
Audience: Undergraduate

6. Identify the physical and chemical properties of drugs, pharmaceutical necessities, excipients, and dosage forms, and practice with handling and manipulating them
Audience: Undergraduate

7. Use a variety of pharmacy references for determining appropriate doses and dosage regimens, and drug delivery systems
Audience: Undergraduate

PHM SCI 542 – PARENTERAL THERAPY AND NUTRITION
3 credits.

An introduction to parenteral therapy and nutrition focusing on the fundamental properties, calculations involved and the methods to prepare safe and reliable injectable medications for patients.
Requisites: PHM SCI 541 and concurrent registration in PHM SCI 540
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Become proficient in solving mathematical problems for determining appropriate dosing of medications, for compounding prescription orders, and for providing safe and accurate drug therapy for patients
Audience: Undergraduate

2. Improve compounding skills and ability to critically analyze prescription and medication orders for compounded drug preparations
Audience: Undergraduate

3. Develop competence in aseptic processing and in dealing with intravenous solutions, IV admixtures, reconstitution of parenterals and total parenteral nutrition solutions
Audience: Undergraduate

4. Utilize pharmacy reference books to determine which references to use for specific problems or questions
Audience: Undergraduate

5. Illustrate practical aspects of compatibility and stability of compounded prescriptions and parenteral products, including the application of scientific principles, legal standards, and use of published literature in assigning beyond-use dates to drug preparations
Audience: Undergraduate

6. Explain the pharmacists' responsibility for handling and dispensing quality pharmaceutical drug products and preparations as promulgated in the USP
Audience: Undergraduate

PHM SCI 558 – LABORATORY TECHNIQUES IN PHARMACOLOGY AND TOXICOLOGY
2 credits.

Basic laboratory techniques employed in pharmacological and toxicological research.
Requisites: Declared in the Pharmacology and Toxicology undergraduate program
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate procedural knowledge of general laboratory skills
Audience: Undergraduate

2. Explain the processes and applications related to science subjects
Audience: Undergraduate

3. Handle basic scientific equipment carefully and correctly
Audience: Undergraduate

4. Demonstrate a scientific understanding of molecular biological concepts
Audience: Undergraduate

5. Coherently convey scientific data and results in a written report
Audience: Undergraduate

6. Define principles of evidence-based date interpretation and scientific integrity
Audience: Undergraduate

PHM SCI 563 – DRUG HISTORY: DANGEROUS DRUGS AND MAGIC BULLETS
2 credits.

A history of medicinal substances and dangerous drugs in wider context, with a focus on gender, race, class, business, and other analytical categories. "Medicines" and "drugs" change over time -- and concepts of risk, danger, legality, and even scientific evidence are elastic. Histories of laws, regulations, and key historical actors, as well as specific drug biographies, will be provided. Not open to students with credit for PHARMACY 563 prior to fall 2026.
Requisites: Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation or Capstone Certificate in Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Outline the key theoretical issues in history of medicine and drugs.
Audience: Graduate

2. Explain the relationship, including explanatory models of change, between specific medicines and drugs and society.
Audience: Graduate

3. Critically assess the historiographies of the history of medicine.
Audience: Graduate

4. Evaluate the reputations of specific medicines, medicinal substances and drugs.
Audience: Graduate

5. Effectively communicate conclusions regarding the history of medicines and drugs.
Audience: Graduate

6. Apply historical understandings to contemporary issues regarding drug regulation and political conflicts.
Audience: Graduate

PHM SCI 564 – PSYCHEDELIC HISTORY: SACRED PLANTS, SCIENCE & PSYCHOTHERAPY
3 credits.

A history of psychedelics in the U.S. and more globally. Read texts that were formative in the development of the history of psychopharmacology, pharmaceuticals, and the "war on drugs." Examine readings that represent different themes, subfields, or areas of research interest within the history of psychedelics (medicine science). Beyond biomedicine, types of analysis include: consumerism, class, ethnicity, gender, and military history. Histories of laws, regulations, and key historical actors, as well as specific drug biographies, will be provided. Not open to students with credit for PHARMACY 564 prior to fall 2026.
Requisites: Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Outline the key theoretical issues in the history and historiographical discussions relevant to psychedelics in biomedicine and society.
Audience: Graduate

2. Describe the role of the psychedelics in treatment settings and as part of indigenous and religious rituals.
Audience: Graduate

3. Analyze and present primary and lay literature; apply knowledge to present problems and situations.
Audience: Graduate

4. Critique and construct tools to help shape new understandings of psychedelic historiography.
Audience: Graduate

PHM SCI 581 – MOLECULAR AND CELLULAR PRINCIPLES IN PHARMACOLOGY
4 credits.

In-depth introduction to the molecular and cellular principles of pharmacology. Emphasis on the mechanisms of drug and small molecule action in cells, with a focus on downstream signaling pathways, second messenger systems, protein kinase cascades, and the regulation of gene transcription.
Requisites: Declared in Pharmacology and Toxicology BS, BIOCHEM 508, PATH 404, and (ANAT&PHY 335, 435, or BIOCORE 486)
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the fundamental principles of drug actions at their target sites (e.g. receptors, enzymes, etc.)
Audience: Undergraduate

2. Recognize the various mechanisms by which drugs can mediate their pharmacological effect.
Audience: Undergraduate

3. Describe how drugs mimic or modify physiological function, including the various actions and clinical uses.
Audience: Undergraduate

4. Describe the major classes of therapeutic drugs that affect the primary systems within the body.
Audience: Undergraduate

5. Choose a relevant experimental system to test experimental hypotheses (e.g. in vitro or in vivo; animal species, etc.)
Audience: Undergraduate

6. Design experiments which are properly controlled and which use appropriate statistical methods of data analysis.
Audience: Undergraduate

PHM SCI 612 – LEGAL STRUCTURES FOR CONTROLLED SUBSTANCES
1 credit.

Discusses federal statutes and regulations related to drug manufacturing, drug distribution, and drug use, with an emphasis on drug scheduling and controlled substances. Describes the governmental framework within which pharmaceutical development is regulated and practiced. Covers statues and regulations protecting human subjects' privacy and autonomy in research. Not open to students with credit for PHARMACY 612 prior to fall 2026.
Requisites: Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation or Capstone Certificate in Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and describe the major federal statutes and regulations affecting use of controlled substances
Audience: Graduate

2. Identify potential legal problems in use and handling of controlled substances before they may occur
Audience: Graduate

3. Apply knowledge of the statutes/regulations to various research settings
Audience: Graduate

4. Locate and identify reputable sources of legal information
Audience: Graduate

PHM SCI 623 – PHARMACOLOGY III
3 credits.

Pharmacological actions and underlying basic and clinical science of antimicrobial and antiviral drugs. Pharmacology of hormones and other drugs affecting the endocrine system.
Requisites: PHM SCI/PHMCOL-M 522
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Classify the physiologic and pathophysiologic features of the human endocrine system and the pancreas
Audience: Undergraduate

2. Connect the drugs/drug classes to the pharmacology of drugs used to manage diseases relating to the functions of the endocrine pancreas
Audience: Undergraduate

3. Classify physiologic and pathophysiologic features of the human thyroid gland
Audience: Undergraduate

4. Connect the drugs/drug classes to the pharmacology of drugs used to manage diseases relating to the functions of the thyroid gland
Audience: Undergraduate

5. Classify the physiologic and pathophysiologic features of endocrine sex hormones and human reproduction
Audience: Undergraduate

6. Connect the drugs/drug classes to the pharmacology of drugs used to manage diseases and/or functions of the human reproductive tract
Audience: Undergraduate

7. Describe the physiologic and pathophysiologic features of Calcium Homeostasis
Audience: Undergraduate

8. Connect the drugs/drug classes to the pharmacology of drugs used to manage diseases relating to imbalances of Calcium Homeostasis
Audience: Undergraduate

PHM SCI/M&ENVTOX/ONCOLOGY/PHMCOL-M/POP HLTH 625 – TOXICOLOGY I
3 credits.

Basic principles of toxicology and biochemical mechanisms of toxicity in mammalian species and man. Correlation between morphological and functional changes caused by toxicants in different organs of the body.
Requisites: (BIOCHEM 501 or 508) and (ANAT&PHY 335, 435, or (BIOCORE 485 and 486)) and PATH 404; or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the physiology and pathology of toxicology, understanding the basicfundamentals of toxicology and toxic agents
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and breakdown of toxicants using a given dataset
Audience: Both Grad & Undergrad

3. Recognize various experimental models to obtain scientific results
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one’s own research
Audience: Both Grad & Undergrad

5. Critique an example of toxicology in media and develop a presentation of this example
Audience: Both Grad & Undergrad

6. Explore new areas to assist in career development via journal club
Audience: Graduate

PHM SCI/M&ENVTOX/PATH/PHMCOL-M/POP HLTH 626 – TOXICOLOGY II
3 credits.

Survey of the basic methods and fundamental biochemical mechanisms of toxicity. Toxicity in mammalian organ systems, techniques for evaluating toxicity, as well as mechanisms of species specificity, and environmental interactions (with toxicant examples) are presented.
Requisites: POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain and identify the effects of toxicants on specific organs within the human body
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and reactions of toxicants within organ systems using a given dataset
Audience: Both Grad & Undergrad

3. Classify different means of risk assessment and the conceptual rationale behind these methods
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research
Audience: Both Grad & Undergrad

5. Relate specific organ concepts with conceptual examples from M&ENVTOX 625 to enhance scientific understanding
Audience: Undergraduate

6. Appraise concepts to research to identify future research concepts.
Audience: Graduate

PHM SCI 632 – NEUROSCIENCE OF PSYCHEDELICS
3 credits.

Explore the neural mechanisms of the therapeutic effects of serotonergic psychedelics, focusing on how the actions of these drugs at specific serotonin receptor subtypes might couple to cellular, network, and behavioral effects, and how these mechanisms intersect with current models of the neural basis of perception, cognition, and consciousness. Not open to students with credit for PHARMACY 632 prior to fall 2026.
Requisites: PSYCH/ZOOLOGY 523, PSYCH/NEURODPT/NTP 611, PHARMACY 770, PHM SCI 770, or graduate/professional standing. Not open to students with credit for NTP 632.
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe experimental techniques and measurements used to probe changes in neuronal activity and connectivity and identify the major limitations of each method and propose approaches to overcome those limitations
Audience: Graduate

2. Describe experimental techniques and measurements used to probe changes in neuronal activity and connectivity
Audience: Undergraduate

3. Identify the major known classical psychedelic agents in terms of their chemical structure, targets (receptors, cells, brain areas) in the brain, duration of action, and suitability for administration in a clinical setting
Audience: Undergraduate

4. Identify the major known classical psychedelic agents in terms of their chemical structure, targets (receptors, cells, brain areas) in the brain, duration of action, and suitability for administration in a clinical setting and also summarize the signaling pathways underlying cellular actions of psychedelic agents.
Audience: Graduate

5. Demonstrate knowledge of the cell types and brain areas most likely to mediate distinct behavioral effects of psychedelics, and of the experimental support for these hypotheses.
Audience: Undergraduate

6. Demonstrate knowledge of the cell types and brain areas most likely to mediate distinct behavioral effects of psychedelics, and of the experimental support for these hypotheses, and also demonstrate ability to identify gaps in experimental support for these hypotheses and to design experiments to fill those gaps
Audience: Graduate

7. Identify and summarize the major behavioral assays of the psychedelic experience and of psychiatric disorders (e.g. depression scales).
Audience: Undergraduate

8. Identify and summarize the major behavioral assays of the psychedelic experience and of psychiatric disorders (e.g. depression scales), and also identify and summarize the shortcomings of the major behavioral assays of the psychedelic experience and of psychiatric disorders (e.g. depression scales), and demonstrate ability to propose revisions of those scales to address those shortcomings.
Audience: Graduate

9. Identify and summarize clinical applications of psychedelics, and the

PHM SCI 640 – APPROPRIATE USE OF ABUSED DRUGS
2 credits.

Explores biological and pharmacological foundations of substance dependence and best practices for prescribing potentially addictive agents. Covers opioids for pain management, cannabinoids, psychedelics, amphetamines, and related substances. Includes therapeutic tapering, withdrawal management, overdose treatment, interpretation of urine drug tests, and use of prescription drug monitoring programs. Not open to students with credit for PHARMACY 640 prior to fall 2026.
Requisites: Declared in Doctor of Pharmacy program with second year standing or MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation or Capstone Certificate in Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the biological and pharmacological basis of substance dependence and the mechanisms of commonly abused drugs, including opioids, cannabinoids, psychedelics, amphetamines, and related agents
Audience: Graduate

2. Differentiate between substance use, misuse, abuse, and dependence, and analyze their public health implications
Audience: Graduate

3. Apply best practices for prescribing opioids for acute and chronic pain, including initiation, titration, tapering, and opioid-sparing strategies
Audience: Graduate

4. Develop evidence-based treatment strategies for opioid use disorder and withdrawal management
Audience: Graduate

5. Interpret urine drug tests and Prescription Drug Monitoring Program data to inform clinical decision-making
Audience: Graduate

6. Identify and manage toxicity and overdose from known and unknown substances of abuse
Audience: Graduate

7. Evaluate patterns of misuse in specific populations (e.g., athletes, students) and apply preventive strategies
Audience: Graduate

PHM SCI 671 – PSYCHEDELIC DRUGS IN SCIENCE AND SOCIETY
2 credits.

Overview of the science behind therapeutic use of psychedelic drugs such as psilocybin and LSD; basic medicinal chemistry of the tryptamine and phenethylamine psychedelics, as well as the neurochemistry and neuropharmacology of their action. Fundamentals of drug development and FDA approval process; Standards of screening and guiding individuals before and during a therapeutic psychedelic session contrasted with the recreational use of these drugs; Appraisal of current clinical research including an objective analysis of risk/benefit for indications such as depression and addiction. History of traditional, ceremonial use of psychedelics, as well as the relationship between recreational use and attempts to regulate and restrict their use. Role of psychedelics in indigenous cultures, impacts of psychedelic tourism and wild-crafting of plants and animals on indigenous peoples. Contrasts in psychedelic treatments to other therapeutic interventions such as mindfulness and meditation.
Requisites: Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation or Capstone Certificate in Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the roles of psychedelic compounds in the traditional rituals of indigenous peoples, and the impact of psychedelic tourism upon these native societies and their environment.
Audience: Graduate

2. Describe the history and rationale for the regulation and prohibition of these compounds in the past century.
Audience: Graduate

3. Describe the similarities between efforts to decriminalize cannabis and psychedelics, including pros and cons for each position.
Audience: Graduate

4. Describe the path by which psychedelic drugs may be proposed to the FDA for approval drugs, and rescheduled by the DEA.
Audience: Graduate

5. Identify the basic chemical structures of the most common psychedelic tryptamines and phenethylamines, and their usual pharmacologic targets in the brain.
Audience: Graduate

6. Describe and critique examples of the research literature on the human use of psilocybin and LSD for the treatment of diseases such as depression and substance abuse disorders, including proposed metrics of effect.
Audience: Graduate

7. Describe the usual screening, preparation, and care of a subject receiving psilocybin, and the expected skills, training, and role of the attending clinicians.
Audience: Graduate

8. Describe the relationship of psychedelic treatment to other methods of care such as meditation, mindfulness, and cognitive behavioral therapy.
Audience: Graduate

PHM SCI 672 – PRINCIPLES OF PHARMACEUTICAL SCIENCES
3 credits.

Learn about essential components of drug development and cutting-edge research in drug discovery, drug action, and drug delivery. Focus on useful and practical information and essential underpinnings in chemistry, biology, physical chemistry, and engineering.
Requisites: (BIOCHEM 508 and declared in Pharmacology and Toxicology BS) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate knowledge in a diverse range of drug discovery areas, both from academic and industry settings
Audience: Both Grad & Undergrad

2. Identify mechanisms of action for major drug targets, with emphasis on receptor proteins that constitute targets for a majority of FDA-approved drugs
Audience: Both Grad & Undergrad

3. Explain model systems and methods used for discovery of novel drug targets
Audience: Both Grad & Undergrad

4. Demonstrate knowledge of the basic principles of drug formulation and delivery
Audience: Both Grad & Undergrad

5. Demonstrate knowledge of the current research in drug delivery
Audience: Both Grad & Undergrad

6. Apply knowledge to solve related problems in drug discovery
Audience: Graduate

PHM SCI 674 – CANNABINOIDS IN SCIENCE AND SOCIETY
2 credits.

Provides an overview of the history, botany, and legal policies of cannabis and examines cannabinoid pharmacology and the most common therapeutic applications. Assessment of cannabinoid therapy with an emphasis on evaluating the risks and benefits of cannabinoid therapy for these conditions, product and dose regimen selection, monitoring and titration. Not open to students with credit for PHARMACY 674 prior to fall 2026.
Requisites: Graduate/professional standing or declared in Pyschoactive Pharmaceutical Investigation Capstone Certificate
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the role of the endocannabinoid system in human disease.
Audience: Graduate

2. Identify appropriate cannabinoid use in various disease states.
Audience: Graduate

3. Describe the mechanism of action of THC and CBD on several body systems and disease states.
Audience: Graduate

4. Explain the pharmacology of THC and CBD.
Audience: Graduate

5. Describe common / serious drug interactions and adverse effects of cannabis therapies and methods for preventing or minimizing their occurrence.
Audience: Graduate

6. Analyze and present primary and lay literature regarding cannabinoid therapy.
Audience: Graduate

PHM SCI 679 – PHARMACOLOGY AND TOXICOLOGY SEMINAR
1 credit.

Senior student presentations of independent research or of published papers on a specific topic approved by the course coordinator. Faculty-led seminars on selected topics regarding responsible conduct of research. The course also provides a venue for career talks by Pharmacology and Toxicology alumni and guests working in a variety of professional settings - research, industry (pharmaceutical; biotech; contract research; consumer products; etc.), a variety of healthcare professions, and law.
Requisites: Declared in the Pharmacology and Toxicology undergraduate program
Course Designation: Core GenEd - Communication & Literacy
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Design and give a verbal scientific presentation that explains the scientific method as it applies to a real-life research project
Audience: Undergraduate

2. Identify and appraise strengths and weaknesses of scientific presentations
Audience: Undergraduate

PHM SCI 691 – SENIOR THESIS
2 credits.

Individual study for seniors completing theses as arranged with a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Fall 2023

PHM SCI 692 – SENIOR THESIS
2 credits.

Individual study for seniors completing theses as arranged with a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Spring 2024

PHM SCI 699 – ADVANCED INDEPENDENT STUDY
1-6 credits.

Directed study projects as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Execute a hypothesis-driven research or scholarly project that integrates foundational and advanced concepts in pharmaceutical sciences
Audience: Undergraduate

2. Analyze and interpret experimental or computational data using appropriate scientific methodologies, tools, and ethical practices
Audience: Undergraduate

3. Communicate scientific findings effectively through written, oral, or visual formats tailored to academic, professional, or public audiences
Audience: Undergraduate

PHM SCI 741 – PHARMACEUTICAL SCIENCES GRANT WRITING
1 credit.

Develop a National Institutes of Health (NIH) F31-style predoctoral fellowship grant proposal in pharmaceutical sciences, suitable for external submission or a preliminary exam. Participate in peer review, small group collaboration, and proposal critique.
Requisites: Declared in Pharmaceutical Sciences PhD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize scientific logic and planned experiments through an abstract, narrative, and specific aims page
Audience: Graduate

2. Articulate background, significance, and innovation of proposed work
Audience: Graduate

3. Outline methodologies to address a specific set of research questions that include proper controls and analysis methods
Audience: Graduate

4. Describe the NIH grant review process
Audience: Graduate

5. Assess the scientific merit of a grant through preparing written and verbal feedback of peer proposals
Audience: Graduate

PHM SCI 748 – SKILLS FOR PROFESSIONAL SUCCESS
1 credit.

Explores strategies for navigating key phases of the graduate student experience: transitioning into graduate school, the formation of professional identity, and charting post-graduation career pathways within the pharmaceutical sciences. Builds skills needed for success in graduate-level coursework, as well as professional competencies valued in today's scientific workplace. Focuses on effective scientific communication, career development, collaboration skills, personal reflection, self-advocacy, metacognitive practices for learning, and commitment to personal integrity - and how each of these connect to the core concepts of the Wisconsin Experience.
Requisites: Declared in MS Pharmaceutical Sciences, Capstone Certificate in Applied Drug Development, or Capstone Certificate in Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Identify, access, and utilize program, campus, and professional resources to further academic and career-related goals.
Audience: Graduate

2. Generate effective job application materials and demonstrate interpersonal and scientific communication skills needed for academic and professional success.
Audience: Graduate

3. Classify common team dynamics and develop personal strategies for collaborating productively in academic and professional teams.
Audience: Graduate

4. Identify situational factors that impact academic and scientific integrity and develop personal strategies for maintaining integrity.
Audience: Graduate

PHM SCI 751 – INTRODUCTION TO REGULATORY PRACTICE
3 credits.

Identifies and examines the key regulatory agencies and practices that govern the highly regulated and diverse pharmaceutical industry. Highlights current and emerging FDA and ICH regulations and guidance documents to successfully navigate meeting with the agencies and to submit required documentation for successful product development.
Requisites: Declared in MS Pharmaceutical Sciences or Capstone Certificate in Applied Drug Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the laws and regulations associated with drugs, biologics, and medical devices in the United States.
Audience: Graduate

2. Justify the importance of regulatory affairs in Life Sciences.
Audience: Graduate

3. Develop a meeting and communication strategy for interacting with the FDA and submitting appropriate documentation
Audience: Graduate

4. Analyze the regulations that impact drug and biologics development, dietary supplements, medical devices, and diagnostics.
Audience: Graduate

5. Analyze and compare nonclinical and clinical product development.
Audience: Graduate

PHM SCI 752 – GXP (GOOD PRACTICE): WORKING IN A REGULATED ENVIRONMENT
3 credits.

The pharmaceutical and biopharmaceutical industries have strict documentation and production requirements. Prepares the learner to work in a regulated environment. Explains roles and responsibilities across multiple disciplines and proper documentation practices. Prepares learner for protocol, report creation and audit responses. Discusses specifications, guidances and root-cause analysis.
Requisites: Declared in MS Pharmaceutical Sciences or Capstone Certificate in Applied Drug Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the laws, processes, and regulations associated with drugs, biologics, and medical devices in the United States.
Audience: Graduate

2. Articulate and apply quality based systems in a GxP regulated environment.
Audience: Graduate

3. Explain and analyze when and how the GxP requirements are applied over the course of the product life cycle.
Audience: Graduate

4. Identify the key factors in GxP facility and equipment design, qualification, and maintenance.
Audience: Graduate

5. Identify the key elements required to operate a compliant control laboratory.
Audience: Graduate

PHM SCI 753 – PROJECT MANAGEMENT IN DRUG DEVELOPMENT
3 credits.

Key concepts and body of knowledge of Project Management (PM) applied to the specifics of the drug development process. PM theory and language. The life cycle of a project: Initiating, Planning, Executing, Monitoring and Control, and Closing. Predictive, adaptive and hybrid PM frameworks and tools. Project Charter, statement-of-work, scope of work, work-breakdown structure, project network and timelines. Critical path method and earned value analysis to adjust schedules, allocate resources, and implement corrective actions. Risk management in pharmaceutical projects. An overview of documents management and decision-making strategies.
Requisites: Declared in MS Pharmaceutical Sciences, Capstone Certificate in Applied Drug Development, or Capstone Certificate in Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the concepts, principles and language of PM and its impact and role in the pharmaceutical industry.
Audience: Graduate

2. Describe the functions of a Project Manager in general and within the drug development process (pre-clinical and clinical phases).
Audience: Graduate

3. Compare and contrast different frameworks and tools of PM to make informed decisions on tailoring the PM approach to suit the project needs.
Audience: Graduate

4. Develop a project charter, statement-of-work, scope of work, work-breakdown structure, a resource-loaded timeline, and a project plan.
Audience: Graduate

5. Apply the critical path method and earned-value analysis to track progress and forecast outcomes against a project's plan baseline.
Audience: Graduate

6. Weight proper corrective measures according to earned-value analysis forecast methods, to ensure a project's outcomes and deliverables.
Audience: Graduate

7. Implement risk identification, mitigation and management strategies during project planning (pre-mortem), life cycle, and project closeout (post-mortem).
Audience: Graduate

8. Consolidate the PM concepts and principles studied during the course by developing a Project Plan as Final Project.
Audience: Graduate

PHM SCI 754 – BUSINESS TOOLS FOR PHARMACEUTICAL SCIENTISTS
3 credits.

Explores business aspects of pharmaceutical product development and post-approval product maturation. Covers startup financing, risk management, intellectual property considerations, supply chain management, and strategic decision-making, as applied to both large and small pharmaceutical companies.
Requisites: Declared in Pharmaceutical Sciences MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the essential features of a well-constructed life cycle management plan for different types of pharmaceutical products (small molecules, biologics, in vitro diagnostics, and medical devices).
Audience: Graduate

2. Analyze the elements of business development for a novel therapeutic and contrast the differences between a startup effort vs. one from an established company.
Audience: Graduate

3. Describe the key business considerations involved in pharmaceutical product development.
Audience: Graduate

4. Justify strategies for mitigating scientific and business risks.
Audience: Graduate

5. Predict and evaluate how different market forces and business decisions impact supply chains.
Audience: Graduate

6. Explain the role of intellectual property during pharmaceutical product development and post-approval lifecycle.
Audience: Graduate

PHM SCI 755 – LABORATORY AND INSTRUMENTATION METHODS
3 credits.

Teaches the theory and application of many common laboratory techniques and instruments used in drug discovery and development. Includes a laboratory component to teach safety and basic techniques necessary for working in a lab. Instruction begins with basic techniques and builds upon these techniques to instruct in proper sample preparation and handling for analysis using a variety of analytical instrumentation.
Requisites: Declared in the MS Pharmaceutical Sciences: Applied Drug Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Practice good laboratory techniques including proper handling of instrumentation, aseptic methods, and record keeping
Audience: Graduate

2. Explain the fundamentals of DNA science and be able to isolate genomic DNA and perform allelic discrimination
Audience: Graduate

3. Describe the fundamentals of chromatography and be able to apply them to small molecule analysis
Audience: Graduate

4. Practice routine cell culture techniques including aseptic methods, passaging cells and performing routine toxicity assays
Audience: Graduate

5. Know the different methods to quantify and visualize protein and be able to quantify and visualize proteins in biological samples
Audience: Graduate

6. Recognize the basic mechanisms of cellular toxicity and be able to measure toxic effects of compounds on cells grown in culture
Audience: Graduate

7. Describe the fundamentals of mass spectrometry and be able to apply these to both small molecules and proteins
Audience: Graduate

PHM SCI 756 – INTRODUCTION TO DATA ANALYSES IN DRUG DEVELOPMENT
3 credits.

Provides a high-level overview of how data analysis techniques augment the drug discovery and development process. Focuses on project-based skills-building through the application of industry-standard software and use of public databases. Explores best practices for data processing and management to ensure experimental reproducibility. Develops troubleshooting skills through critical evaluation of data analysis results and root cause analysis.
Requisites: Declared in MS Pharmaceutical Sciences: Applied Drug Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify relevant software platforms, programming tools, and databases relevant to various drug development tasks.
Audience: Graduate

2. Apply best practices, critical thinking skills, and troubleshooting techniques to data analysis projects.
Audience: Graduate

3. Complete data analysis projects representative of those used in drug target characterization.
Audience: Graduate

4. Analyze large high throughput screening (HTS) datasets to confirm positive hits and identify common issues that arise in these datasets.
Audience: Graduate

5. Perform chemical similarity searches and hits triage by applying industry-standard tools and practices.
Audience: Graduate

6. Conduct physiologically-based pharmacokinetic (PBPK) modeling and simulation projects using industry-standard software packages.
Audience: Graduate

PHM SCI 757 – INTRODUCTION TO DRUG DEVELOPMENT
2 credits.

Scientific process of drug development from discovery through clinical trials. Brief history of drug development, along with an overview of drug discovery, preclinical, and clinical activities that take place during development. Application to real-world drug development scenarios and challenges, especially as they apply to development of drugs to treat neurological diseases.
Requisites: Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Provide historical context for the modern drug discovery and development process.
Audience: Graduate

2. Describe the high-level goals and activities that take place during discovery, preclinical development, and clinical development and the different functional areas that perform this work.
Audience: Graduate

3. Apply the knowledge learned throughout the course to address specific drug development scenarios.
Audience: Graduate

4. Propose novel strategies to address current drug development challenges.
Audience: Graduate

5. Evaluate scientific literature and regulatory documents to find important information about specific drugs.
Audience: Graduate

PHM SCI 758 – WORKING EFFECTIVELY IN A SCIENTIFIC ENVIRONMENT
1 credit.

Application of communication, interpersonal and cultural competency skills. Synthesis of knowledge, skills and abilities to demonstrate aptitude for careers in respective industries.
Requisites: Declared in MS Pharmaceutical Sciences
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Demonstrate critical knowledge and in-depth understanding of principles in pharmaceutical sciences and its application in drug development.
Audience: Graduate

2. Identify important research questions, formulate testable hypotheses, design experiments to test those hypotheses and use appropriate statistical methods for analyzing data.
Audience: Graduate

3. Communicate technical knowledge and research results effectively to a range of audiences.
Audience: Graduate

4. Apply ethical principles in all work in both independent and collaborative settings.
Audience: Graduate

5. Demonstrate comprehension of business principles and the ability to apply them to the pharmaceutical industry.
Audience: Graduate

PHM SCI 759 – CURRENT TRENDS IN DRUG DISCOVERY AND DEVELOPMENT
1 credit.

Provides the experience and skill to find, read and critically analyze scientific and regulatory literature in the field of drug discovery and development.
Requisites: Declared in MS Pharmaceutical Sciences or Capstone Certificate in Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Know where to search for appropriate primary literature and guidance documents associated with drug discovery and development
Audience: Graduate

2. Critically analyze primary research literature and guidance documents in the field of drug discovery and development and neuroscience
Audience: Graduate

3. Succinctly and accurately communicate the merits and limitations of primary drug discovery and development research publications and guidance documents
Audience: Graduate

PHM SCI 760 – SUMMATIVE RESEARCH INTERNSHIP
2-4 credits.

Summation of core coursework to a real-world project and/or internship experience. Synthesis of knowledge, skills and abilities to demonstrate aptitude for careers in respective industries.
Requisites: Declared in MS Pharmaceutical Sciences
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate critical knowledge and in-depth understanding of principles in pharmaceutical sciences and its application in drug development.
Audience: Graduate

2. Identify important research questions, formulate testable hypotheses, design experiments to test those hypotheses and use appropriate statistical methods for analyzing data.
Audience: Graduate

3. Conduct research that contributes to the student's field of study.
Audience: Graduate

4. Communicate technical knowledge and research results effectively to a range of audiences.
Audience: Graduate

5. Apply ethical principles in all work in both independent and collaborative settings.
Audience: Graduate

6. Demonstrate comprehension of business principles and the ability to apply them to the pharmaceutical industry.
Audience: Graduate

PHM SCI 761 – INTRODUCTION TO PHARMACOLOGY
1 credit.

Introduction to basic concepts of drug delivery and action, methods used to study drug action. Includes a brief survey of drugs acting on the cardiovascular system, the central nervous system and other drug targets.
Requisites: Declared in MS Pharmaceutical Sciences: Applied Drug Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how different dosage forms of drugs are used to deliver drugs to specific organs and sites of action and how drugs are removed from the body.
Audience: Graduate

2. Identify how drugs interact with specific target receptors to produce physiological responses, including desired and undesired effects.
Audience: Graduate

3. Analyze how microbes such as viruses and bacteria evade drug treatment.
Audience: Graduate

4. Specify how drugs are used to affect the cardiovascular system.
Audience: Graduate

5. Specify how drugs are used to treat disorders of the CNS.
Audience: Graduate

6. Explain how "drugable targets" have been used to create new drugs.
Audience: Graduate

PHM SCI 762 – THE DRUG DEVELOPMENT PROCESS FROM DISCOVERY TO INVESTIGATIONAL NEW DRUG APPLICATION (IND)
3 credits.

Overview of the drug development process from discovery to investigational new drug application (IND). Drug discovery (target identification, target validation, and hit-to-lead) preclinical CMC activities, and preclinical pharmacology, pharmacokinetic, and toxicology studies as they apply to both small and large molecule drugs.
Requisites: Declared in Pharmaceutical Sciences: Applied Drug Development MS or Capstone Certificate in Applied Drug Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the phases of drug development from target discovery to investigational new drug (IND) submission and the different functional areas involved.
Audience: Graduate

2. Explain how target pharmacology and drug safety are assessed using both in vitro and in vivo preclinical models.
Audience: Graduate

3. Explain the chemistry, manufacturing, and controls (CMC) activities that take place during discovery and preclinical development.
Audience: Graduate

4. Apply the knowledge learned throughout the course to address specific drug development challenges and propose novel solutions.
Audience: Graduate

5. Evaluate how preclinical development might differ between small molecule drugs and protein therapeutics.
Audience: Graduate

6. Create a preclinical drug development strategy for a specific drug modality and disease combination.
Audience: Graduate

PHM SCI 763 – THE DRUG DEVELOPMENT PROCESS FROM FIH TO BLA/NDA
3 credits.

Overview of the drug development process from first-in-human (FIH) to submission of a new drug application (NDA) or biologics license application (BLA). Phases of clinical development and the role of biomarkers, companion diagnostics, statistical analysis, and CMC in clinical trials. Both small molecule and protein therapeutics will be addressed.
Requisites: Declared in MS Pharmaceutical Sciences: Applied Drug Development or Capstone Certificate in Applied Drug Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the phases of drug development from first-in-human (FIH) studies to NDA/BLA submission and the different functional areas involved.
Audience: Graduate

2. Explain the goals, expectations, and objectives for the different phases of clinical development and describe innovative trial design
Audience: Graduate

3. Define a biomarker, a companion diagnostic, and a statistical analysis plan (SAP) and describe the important elements of all three.
Audience: Graduate

4. Explain the chemistry, manufacturing, and controls (CMC) activities that take place during clinical phases of drug development and pre-launch.

Audience: Graduate

5. Apply the knowledge learned throughout the course to address specific drug development challenges and propose novel solutions.
Audience: Graduate

6. Evaluate how clinical trial design and execution might differ between different therapeutic areas and between small molecule drugs and protein therapeutics.
Audience: Graduate

7. Create a clinical development strategy for a specific drug modality and disease combination.
Audience: Graduate

PHM SCI 764 – CASE STUDIES IN DRUG DEVELOPMENT
2 credits.

Explores the scientific, regulatory, and strategic considerations involved in modern drug development through case studies and real-world scenarios. Emphasis will be placed on solving complex and interdisciplinary challenges across the entire development pipeline and incorporating emerging technologies such as artificial intelligence and advanced delivery technologies into the drug development process.
Requisites: PHM SCI 751, 757, 762, or 763
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Articulate the current challenges across different drug development programs with a nuanced understanding of how drug modality, disease indication, and health care systems play a role.
Audience: Graduate

2. Analyze historical failures and success stories in drug development and describe what went wrong and what worked well.
Audience: Graduate

3. Assess the impact of emerging technologies such as artificial intelligence and advanced delivery technologies on modern drug development.
Audience: Graduate

PHM SCI 765 – PRINCIPLES OF ASSAY DEVELOPMENT
1 credit.

Biochemical and spectrophotometric basis of molecular target assays in drug development. Different types of in vitro and cellular assays - how to choose the best one for the problem at hand. On-target and off-target activity. Uses and limitations of biochemical assays, biomarkers, and animal models. Challenges of translating pre-clinical data into clinical assumptions. Biases on non-quantifiable data. Critical evaluation of case studies and experimental assays on infectious diseases, auto-immune diseases, and CNS disorders. Designing proper assays according to drug development projects hypotheses.
Requisites: PHM SCI 759 and (PHM SCI 757 or 762)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Explain and apply the concepts, principles, and applications of the most commonly used biochemical and spectrophotometric assays used in drug development to quantify the activity of molecular targets and their modulators.
Audience: Graduate

2. Recommend specific in vitro target assays based on the molecular target of choice and on the desired data output.
Audience: Graduate

3. Compare and contrast cellular models, their applications and limitations, and propose assays that directly measure on-target activity.
Audience: Graduate

4. Critique the use of various animal models when extrapolating pre-clinical data to clinical development.
Audience: Graduate

5. Synthesize knowledge of biochemical, in vitro, and cellular assays to evaluate the validity, applications, and future developments of New Approach Methods (NAMs), according to the current FDA guidelines for animal use in research.
Audience: Graduate

6. Analyze critically experimental approaches, assays outcomes, and their alignment to experimental hypothesis in drug development projects within the broad areas of infectious diseases, auto-immune diseases, and central nervous system (CNS) disorders.
Audience: Graduate

7. Propose adequate experimental assays to support drug development projects hypotheses, demonstrating the limitations and the actual output of different in vitro, cellular, and animal models' assays.
Audience: Graduate

PHM SCI/CHEM 766 – MOLECULAR RECOGNITION
3 credits.

Intermolecular interactions in chemistry and biology. Measurement of binding constants. Recognition between small molecules. Recognition of proteins and nucleic acids. Systems chemistry.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe and differentiate the fundamental principles and concepts related to molecular recognition.
Audience: Graduate

2. Integrate interdisciplinary knowledge to explore and explain molecular recognition and reactions in diverse contexts, including chemistry, biology, and materials science.
Audience: Graduate

3. Formulate a research proposal that identifies a novel question in molecular recognition, articulates a testable hypothesis, and outlines a scientifically sound experimental approach.
Audience: Graduate

PHM SCI 768 – PHARMACOKINETICS
3 credits.

Quantitative aspects of drug absorption, distribution, metabolism, and excretion. Philosophy and applications of pharmacokinetic modeling and its use in clinical practice.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze and interpret pharmacokinetic profiles following different routes of drug administration and differing dosing regimens
Audience: Graduate

2. Conduct a noncompartmental pharmacokinetic analysis and interpret resulting pharmacokinetic parameter data in context of fundamental pharmacokinetic principles learned
Audience: Graduate

3. Identify the key features of clinical pharmacology studies and how this data will be used to inform drug labeling
Audience: Graduate

4. Describe the importance of a statistical analysis plan and implement key information that should be included
Audience: Graduate

5. Demonstrate their understanding of pharmacokinetic concepts by application to review, analysis, interpretation and reporting from example clinical study data
Audience: Graduate

6. Utilize industry standard software (e.g. Phoenix, R) to review, analyze and report clinical study data
Audience: Graduate

7. Identify regulatory requirements for reporting pharmacokinetic data
Audience: Graduate

8. Describe population pharmacokinetics and physiologically based pharmacokinetic modeling and demonstrate how these approaches may be used in drug development
Audience: Graduate

PHM SCI 770 – CNS DRUG DESIGNS, ACTIONS, AND APPLICATIONS I
3 credits.

Explores how chemical properties influence molecular targets in the central nervous system (CNS), how altered signaling drives physiological changes, and how cholinergic and glutamatergic pharmaceuticals improve patient outcomes. Develops skills in primary literature analysis to enable conceptual integration of information across chemical, molecular, cellular, systems, and societal levels. Not open to students with credit for PHARMACY 770 prior to fall 2026.
Requisites: Declared in MS Pharmaceutical Sciences
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify CNS active drug classes and origins of cholinergic and glutamatergic drugs based in part on structural aspects of the molecule.
Audience: Graduate

2. List physicochemical properties of drugs, anatomical structures and molecular machinery that influence drug access to and efflux from the CNS.
Audience: Graduate

3. Describe the major neurotransmitters of the central nervous system, including their physiologic role, distribution, synthesis, storage, and release.
Audience: Graduate

4. Recall the principal mechanisms by which receptors affect cellular signaling in the Central Nervous System.
Audience: Graduate

5. Match psychiatric conditions and target symptoms of these conditions with appropriate cholinergic and glutamatergic pharmaceuticals.
Audience: Graduate

6. Describe common / serious adverse effects of cholinergic and glutamatergic pharmaceuticals and methods for preventing or minimizing their occurrence.
Audience: Graduate

PHM SCI 771 – CNS DRUG DESIGNS, ACTIONS, AND APPLICATIONS II
3 credits.

Applies knowledge regarding the molecular and anatomical factors that influence the actions of central nervous system active drugs to understand the medical applications of drugs acting on the GABAergic, adrenergic, dopaminergic, serotonergic, and opioid systems. Develops written communication skills regarding the integration of chemical, molecular, cellular, and systems information to explain the discovery, development, and applications of these compounds. Not open to students with credit for PHARMACY 771 prior to fall 2026.
Requisites: PHM SCI 770 or PHARMACY 770 prior to Fall 2026
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify GABAergic, adrenergic, dopaminergic, serotonergic, and opioid drug classes and drug origins based in part on structural aspects of the molecule.
Audience: Graduate

2. Compare and contrast the actions of GABAergic, adrenergic, dopaminergic, serotonergic, and opioid pharmaceuticals on chemical and electrical signaling within the Central Nervous System.
Audience: Graduate

3. Recognize the psychiatric conditions and target symptoms of these conditions that are commonly treated with GABAergic, adrenergic, dopaminergic, serotonergic, and opioid pharmaceuticals.
Audience: Graduate

4. Describe common / serious adverse effects of GABAergic, adrenergic, dopaminergic, serotonergic, and opioid pharmaceuticals and methods for preventing or minimizing their occurrence.
Audience: Graduate

5. Match GABAergic, adrenergic, dopaminergic, serotonergic, and opioid pharmaceutical agents to the psychiatric conditions they are commonly used to treat.
Audience: Graduate

6. Assess challenges to development and use of psychoactive pharmaceuticals that are either shared across major neurotransmitter systems or unique to specific classes of drugs.
Audience: Graduate

PHM SCI 773 – MOLECULAR SOLIDS
2-3 credits.

Science and technology of molecular solid materials with applications in medicine, food, energetic materials, and organic electronics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the molecules in molecular solids, including the active pharmaceutical ingredients
Audience: Graduate

2. Use molecular structures to predict solid-state properties
Audience: Graduate

3. Solve crystal structures and use the information to predict the properties of crystals
Audience: Graduate

4. Describe the elemental steps of crystallization and their distinct kinetics and use the information to control a crystallization process
Audience: Graduate

5. Identify, discover and predict crystal polymorphs and predict the effect of polymorphism on material properties, including dissolution and bioavailability
Audience: Graduate

6. Predict aqueous solubility and its dependence on pH, complexing agents, common ions, and solid forms, and understand its impact on drug performance
Audience: Graduate

7. Prevent crystallization and prepare amorphous solids and glasses and describe areas of applications where amorphous materials outperform crystalline materials
Audience: Graduate

8. Design strategies to stabilize molecular solid materials against physical and chemical changes
Audience: Graduate

PHM SCI 775 – POLYMERIC DRUG DELIVERY
3 credits.

Introduces synthetic and biological polymers applied for drug targeting and controlled drug release, focusing on injectable drugs, including biologics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Classify polymeric drug delivery systems.
Audience: Graduate

2. Differentiate bioconjugation, complexation and encapsulation.
Audience: Graduate

3. Describe major sterile product requirements.
Audience: Graduate

4. Differentiate major mechanisms of drug release.
Audience: Graduate

5. Relate physicochemical properties to biodistribution, metabolism, and clearance.
Audience: Graduate

6. Predict rates of drug absorption after SC injection.
Audience: Graduate

7. Describe peptide long-acting injectables.
Audience: Graduate

8. Describe antibody-drug conjugates.
Audience: Graduate

PHM SCI 786 – NATURAL PRODUCT SYNTHESIS, BIOSYNTHESIS AND DRUG DISCOVERY
3 credits.

Synthesis and biosynthesis of natural products in drug discovery. Topics include: natural products in drug discovery; biosynthetic pathways and synthetic strategies for major natural product classes; and basic bioorganic chemistry and enzyme mechanisms in biosynthesis.
Requisites: CHEM 345 and BIOCHEM 508
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

PHM SCI 801 – BIOETHICS AND SCIENTIFIC INTEGRITY
1 credit.

Explores basic ethical issues associated with biomedical science research and application, particularly as pertains to the development and marketing of drugs and emergent pharmaceutical therapies, such as psychoactive-assisted therapies in the context of regulatory, safety, and legal concerns. Not open to students with credit for PHARMACY 801 prior to fall 2026.
Requisites: Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation or Capstone Certificate in Psychoactive Pharmaceutical Investigation
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply Deontological and/or Utilitarian arguments to examine personal moral values and use personal experiences to evaluate positive and negative features of current Psychedelic research, access, and use.
Audience: Graduate

2. Explain how socially responsible scientific practices can be used in scientific and medical research, scientific communication, and intellectual property, and whether these practices address societal goals beyond advancing scientific knowledge.
Audience: Graduate

3. Describe elements of proper scientific conduct, the institutional oversight that regulates scientific conduct, and whether these elements are grounded in optimizing research outcomes or following Bioethics Principles.
Audience: Graduate

4. Identify best practices for clinical research by evaluating the costs and benefits of actions necessary to ensure patient safety, reliable data, and public benefit.
Audience: Graduate

5. Explain the elements of misconduct in scientific literature and publishing. Give examples of how this misconduct causes harm to both scientific reputations and public health.
Audience: Graduate

PHM SCI 931 – PHARMACEUTICAL SCIENCES SEMINAR
1 credit.

Weekly series that provides exposure to a diverse array of research topics. Students enroll in one of three sections, corresponding to their research core (Drug Action, Drug Discovery, or Drug Delivery). Students in their 2nd year and beyond present their research progress or review literature. The course includes talks from nationally and internationally recognized scientists from academia and industry.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Evaluate how important research questions are identified, hypotheses are formulated, and experiments are designed to test those hypotheses by attending the research presentations of fellow students and outside invited seminar speakers and will use this knowledge to shape their own research ideas
Audience: Graduate

2. Communicate scientific knowledge and research ideas, methodology, models, and results effectively to a range of audiences by presenting a seminar of their original research (in either 931 or 932) with relevant background information and by incorporating changes to their slide design and/or presentation style as they receive feedback from faculty and students
Audience: Graduate

3. Evaluate how existing principles in pharmaceutical sciences intersect with cutting edge research by asking seminar-specific questions and participating in discussions in civil, constructive ways
Audience: Graduate

PHM SCI 932 – PHARMACEUTICAL SCIENCES SEMINAR
1 credit.

Weekly series that provides exposure to a diverse array of research topics. Students enroll in one of three sections, corresponding to their research core (Drug Action, Drug Discovery, or Drug Delivery). Students in their 2nd-year and beyond present their research progress or review literature. The course includes talks from nationally and internationally recognized scientists from academia and industry.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate how important research questions are identified, hypotheses are formulated, and experiments are designed to test those hypotheses by attending the research presentations of fellow students and outside invited seminar speakers and will use this knowledge to shape their own research ideas
Audience: Graduate

2. Communicate scientific knowledge and research ideas, methodology, models, and results effectively to a range of audiences by presenting a seminar of their original research (in either 931 or 932) with relevant background information and by incorporating changes to their slide design and/or presentation style as they receive feedback from faculty and students
Audience: Graduate

3. Evaluate how existing principles in pharmaceutical sciences intersect with cutting edge research by asking seminar-specific questions and participating in discussions in civil, constructive ways
Audience: Graduate

PHM SCI 990 – RESEARCH
1-12 credits.

Independent research and writing for graduate and students under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

PHM SCI 999 – ADVANCED INDEPENDENT STUDY
1-12 credits.

Directed study projects for graduate students as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHARMACOLOGY (PHMCOL-M)

PHMCOL-M/PHM SCI 522 — PHARMACOLOGY II
3-4 credits.

Pharmacological actions of important drugs, including hematopoietic, thrombolytic, antihyperlipidemic, immunopharmacologic, anticancer, anti-inflammatory, diuretic, antihypertensive, antianginal, and anti-arrhythmic agents, and agents used to treat congestive heart failure.
Requisites: PHM SCI 521
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recall the names of different drugs, and be able to link these drug names to not only specific uses, but also to more general concepts about physiology, disease, and drug mechanism of action
Audience: Undergraduate

2. Describe and differentiate the pharmacology of drugs that act on organ systems, including the endocrine, gastrointestinal, cardiovascular, renal, hematopoietic, and immune systems
Audience: Undergraduate

PHMCOL-M/B M E/MED PHYS/PHYSICS/RADIOL 619 — MICROSCOPY OF LIFE
3 credits.

Survey of state of the art microscopic, cellular and molecular imaging techniques, beginning with subcellular microscopy and finishing with whole animal imaging.
Requisites: PHYSICS 104, 202, 208, or 248 or PHYSICS/MED PHYS 265
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHMCOL-M/M&ENVTOX/ONCOLOGY/PHM SCI/POP HLTH 625 — TOXICOLOGY I
3 credits.

Basic principles of toxicology and biochemical mechanisms of toxicity in mammalian species and man. Correlation between morphological and functional changes caused by toxicants in different organs of the body.
Requisites: (BIOCHEM 501 or 508) and (ANAT&PHY 335, 435, or (BIOCORE 485 and 486)) and PATH 404; or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the physiology and pathology of toxicology, understanding the basicfundamentals of toxicology and toxic agents
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and breakdown of toxicants using a given dataset
Audience: Both Grad & Undergrad

3. Recognize various experimental models to obtain scientific results
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research
Audience: Both Grad & Undergrad

5. Critique an example of toxicology in media and develop a presentation of this example
Audience: Both Grad & Undergrad

6. Explore new areas to assist in career development via journal club
Audience: Graduate

PHMCOL-M/M&ENVTOX/PATH/PHM SCI/POP HLTH 626 – TOXICOLOGY II
3 credits.

Survey of the basic methods and fundamental biochemical mechanisms of toxicity. Toxicity in mammalian organ systems, techniques for evaluating toxicity, as well as mechanisms of species specificity, and environmental interactions (with toxicant examples) are presented.
Requisites: POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain and identify the effects of toxicants on specific organs within the human body
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and reactions of toxicants within organ systems using a given dataset
Audience: Both Grad & Undergrad

3. Classify different means of risk assessment and the conceptual rationale behind these methods
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research
Audience: Both Grad & Undergrad

5. Relate specific organ concepts with conceptual examples from M&ENVTOX 625 to enhance scientific understanding
Audience: Undergraduate

6. Appraise concepts to research to identify future research concepts.
Audience: Graduate

PHMCOL-M 699 – INDEPENDENT STUDY
1-3 credits.

Directed study projects for juniors and seniors.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Undergraduate

2. Read and effectively search scientific literature
Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

PHMCOL-M 715 – GRANT WRITING
1 credit.

Develop a predoctoral fellowship application based on the student's proposed thesis project. Receive input on ideas and writing, both from the instructor and peers.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Write a cogent specific aims page for a grant proposal.
Audience: Graduate

2. Summarize background information in a coherent and concise manner, highlighting the significance of research being proposed.
Audience: Graduate

3. Outline methodologies to address a specific set of research questions.
Audience: Graduate

4. Read and critique grant proposals written by peers.
Audience: Graduate

5. Design experiments which are properly controlled and which use appropriate statistical methods of data analysis.
Audience: Graduate

PHMCOL-M 739 – RIGOR, REPRODUCIBILITY AND BECOMING AN EFFECTIVE RESEARCHER
1 credit.

Focuses on two of the cornerstones of science advancement, which are rigor in designing and performing scientific research and the ability to reproduce biomedical research findings. Emphasizes the application of rigor that ensures robust and unbiased experimental design, methodology, analysis, interpretation, and reporting of results. Highlights topics of particular importance to first year graduate students, including the development of effective presentation skills, communication in a professional setting, and a strong mentor-mentee relationship.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Select a well-controlled experimental design that is appropriate to answer a research question
Audience: Graduate

2. Consider all relevant biological variables to include in the experimental design
Audience: Graduate

3. Authenticate key biological and chemical resources used in experiments

Audience: Graduate

4. Perform statistical analyses appropriate for the experimental design
Audience: Graduate

5. Use transparency in reporting and publishing results, so that others may reproduce and extend the findings
Audience: Graduate

6. Develop skills to cope with the rigors of a graduate education in the pharmacological sciences
Audience: Graduate

PHMCOL-M 781 – MOLECULAR AND CELLULAR PRINCIPLES IN PHARMACOLOGY
4 credits.

Provides an in-depth introduction to the molecular and cellular principles of pharmacology. Emphasis is on the mechanisms of drug and small molecule action in cells, with a particular focus on downstream signaling pathways, second messenger systems, protein kinase cascades, and the regulation of gene transcription.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the fundamental principles of drug actions at their target sites (e.g. receptors, enzymes, etc)
Audience: Graduate

2. Understand the various mechanisms by which drugs can mediate their pharmacological effect
Audience: Graduate

3. Describe how drugs mimic or modify physiological function, including the various actions and clinical uses
Audience: Graduate

4. Describe the major classes of therapeutic drugs that affect the primary systems within the body
Audience: Graduate

5. Choose a relevant experimental system to test experimental hypotheses (e.g. in vitro or in vivo; animal species, etc)
Audience: Graduate

6. Design experiments which are properly controlled and which use appropriate statistical methods of data analysis
Audience: Graduate

PHMCOL-M 875 – SPECIAL TOPICS IN PHARMACOLOGY
1-3 credits.

Special topics in pharmacology. Topics may vary.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022
Learning Outcomes: 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in pharmacology
Audience: Graduate

PHMCOL-M 901 – SEMINAR AND JOURNAL CLUB
1-2 credits.

Students and staff present research reports of current interest.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Organize and present a research presentation, which includes background information, data slides, conclusions, and future directions
Audience: Graduate

2. Offer constructive feedback to peers on research presentation style and information delivery
Audience: Graduate

3. Design experimental approaches that are properly controlled and use appropriate statistical methods of data analysis
Audience: Graduate

4. Identify relevant experimental systems to test experimental hypotheses (e.g. in vitro or in vivo; animal species, etc)
Audience: Graduate

PHMCOL-M 990 – RESEARCH
1-12 credits.

Research facilities of the department available to qualified students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Exhibit a broad understanding of general pharmacology principles
Audience: Graduate

2. Conduct independent research using a variety of approaches
Audience: Graduate

3. Think critically to address research challenges
Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research
Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab
Audience: Graduate

PHARMACY (PHARMACY)

PHARMACY 125 – EXPLORING PHARMACY I
2 credits.

Provides opportunities to integrate and apply introductory concepts and content related to Pharmaceutical Sciences, Social Administrative Pharmacy, and Pharmacy Practice. Develop academic and interpersonal skills helpful for success.
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe roles, responsibilities, and training of pharmacists to provide care for patients and populations in a variety of practice settings
Audience: Undergraduate

2. Explain the roles of pharmacists related to public health, health literacy and health disparities
Audience: Undergraduate

3. Explain the process of gaining admission into and matriculating through a Doctor of Pharmacy program
Audience: Undergraduate

4. Create a holistic approach for successful transition from high school to college
Audience: Undergraduate

5. Develop connections to peers, student mentors, faculty and staff
Audience: Undergraduate

6. Identify common medical terms and medication names
Audience: Undergraduate

PHARMACY 126 – EXPLORING PHARMACY II
1 credit.

Expands upon the learning foundations provided in PHARMACY 125. Additional opportunities to develop pre-professional plans, explore unique pharmacy career opportunities and learn about pharmacy student co-curricular and professional development experiences. Prepare students to successfully participate in the pharmacy admissions process.
Requisites: PHARMACY 125
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the pharmacy school admissions process
Audience: Undergraduate

2. Create SMART goals regarding pharmacy admissions, pre-professional development, and unique opportunities in pharmacy practice and pharmacy student co-curricular opportunities
Audience: Undergraduate

3. Create a pharmacy admissions personal statement
Audience: Undergraduate

4. Construct reflections about guest speaker presentations, job shadow experiences, a mock interview, and cultural awareness as it relates to pharmacy careers and patient care
Audience: Undergraduate

5. Analyze a pharmacy organization or pharmacy-focused event
Audience: Undergraduate

6. Revise a pre-pharmacy resume originally developed in PHARMACY 125
Audience: Undergraduate

PHARMACY 225 – PHARMACY EXPLORATION SEMINAR
2 credits.

Provides opportunities to explore pharmacy career paths, develop pre-professional plans, learn about pharmacy student co-curricular and professional development experiences, and prepare to successfully participate in the pharmacy admissions process.
Requisites: Not open to students with credit for PHARMACY 125 or 126
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe roles, responsibilities, and training of pharmacists to provide care for patients and populations in a variety of practice settings
Audience: Undergraduate

2. Examine the roles of pharmacists related to public health, health literacy, and health disparities
Audience: Undergraduate

3. Explain the holistic student experience throughout the Doctor of Pharmacy program
Audience: Undergraduate

4. Assemble a competitive application for admission into the Doctor of Pharmacy program
Audience: Undergraduate

5. Develop connections to peers, student mentors, faculty and staff
Audience: Undergraduate

6. Identify common medical terms and medication names
Audience: Undergraduate

PHARMACY 411 – PHARMACY IN THE HEALTH CARE SYSTEM
3 credits.

Orientation to the US health care system and pharmacy's integral role within it. Address roles and responsibilities of different individuals and organizations involved in the provision of health care, issues of insurance coverage, reimbursement, and payment for health care services. Explore foundational leadership principles germane to the success of the modern-day pharmacist. Not open to students with credit for SA PHM 411 prior to fall 2026.
Requisites: Declared in Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the interactions amongst key players involved in the provision and financing of health care goods and services in the U.S. including payers, providers, patients, pharmacies, wholesalers, manufacturers and pharmacy benefit managers.
Audience: Graduate

2. Recognize various sources of insurance coverage for healthcare goods and services and reimbursement methods utilized by each source.
Audience: Graduate

3. Describe pharmacy operations, workflow, and drug reimbursement within the community, hospital, and ambulatory care practice setting.
Audience: Graduate

4. List foundational leadership concepts and discuss how they can be applied as a student pharmacist and in future careers.
Audience: Graduate

PHARMACY 423 – PHARMACY INTEGRATED LEARNING LABORATORY
1 credit.

Provides an interdivisional foundation to understand many aspects of pharmacy through a wide variety of activities. Delivers a broad understanding of the pharmacist's public health and patient advocacy role with opportunities to practice basic calculations related to drug formulations in the context of safety, drug stability, and patient care. Fosters development of communication skills with peers and patients and be introduced to patient counseling principles. Includes active participation in a longitudinal group experience with an assigned senior in the community to apply course content.
Requisites: Declared in the Doctor of Pharmacy Program with first year standing only
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop and enhance oral and written communication skills with patients/clients, peers, and pharmacists. (EO6)
Audience: Graduate

2. Employ interpersonal and intergroup behaviors in order to collaborate effectively in a variety of situations and reflect on teams and teamwork by: a) describing the process of team development and the roles and practices of effective teams and b) reflecting on individual and team performance for performance improvement. (EO7, IPEC TT1 & TT8)
Audience: Graduate

3. While applying the Pharmacists' Patient Care Process, discover aspects of patient-centered care by reflecting on the patient's/client's perspective on health, social, economic and psychological needs. (EO11, EO12, EO13)
Audience: Graduate

4. Apply social and behavioral principles and theories, including empathy, to patient communication. (EO8)
Audience: Graduate

5. Retrieve professional and lay literature in order to acquire information about therapeutic agents (i.e. evidence-based drug information) and to provide health information to patients and the public. (EO1)
Audience: Graduate

6. Identify the pharmacists' role in public health/health promotion activities while increasing awareness of community-based resources and identifying potential causes of health disparities. (EO12, EO13, EO14)
Audience: Graduate

7. Accurately measure and weigh drug products and complete calculations necessary for pharmaceutical preparations and pharmacy practice. (EO5)
Audience: Graduate

8. Complete drug dissolution and drug dilution activities and discuss how various drug properties (e.g. solubility, stability) can impact drug performance. (EO2)
Audience: Graduate

PHARMACY 426 – INTRODUCTORY PHARMACY PRACTICE EXPERIENCES I
1 credit.

Explore the role of the pharmacist and the many patient care opportunities that exist in and out of the community pharmacy practice setting. Observe pharmacists in a community pharmacy. Gain a broad understanding of the pharmacist's public health role.
Requisites: Declared in Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and discuss the various roles pharmacists assume in the health care system, especially their role in managing pharmacy operations and providing patient-centered care using the Pharmacists' Patient Care Process (PPCP).
Audience: Graduate

2. Observe and participate in public health/health promotion activities in the community pharmacy setting in order to increase awareness of community-based resources.
Audience: Graduate

3. Develop and enhance oral and written communication skills with patients, pharmacists, and other healthcare providers.
Audience: Graduate

4. Retrieve professional and lay literature in order to acquire information about therapeutic agents (i.e. Top Drugs) and to provide health information to patients and the public.
Audience: Graduate

5. Develop an understanding of the pharmacist's role on the healthcare team and the complexities involved in interprofessional communication.
Audience: Graduate

6. Display professional attitudes, habits, and values in accordance with ethical and social guidelines.
Audience: Graduate

PHARMACY 434 – PHARMACEUTICAL GENETICS AND IMMUNOLOGY
2 credits.

Facilitates the understanding and application of the principles of pharmaceutical genetics, immunology, and biotechnology.
Requisites: Declared in Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain how genotypes relate to human disease.
Audience: Graduate

2. Explain how model organism research underpins our knowledge of human genetic diseases.
Audience: Graduate

3. Describe how genetic/genomic technologies are used in research and can be applied to pharmacy.
Audience: Graduate

4. Explain how pharmacogenomics can identify and be used as markers for drug response.
Audience: Graduate

5. Describe how the immune system both causes and fights disease.
Audience: Graduate

6. Describe how biotechnology can be used to develop and produce drugs.
Audience: Graduate

PHARMACY 435 – PULMONARY SCIENCE AND THERAPEUTICS
2 credits.

Integration of pharmacologic knowledge and clinical decision-making to optimize patient management of pulmonary disease states and promote and support tobacco cessation. Emphasis on patient assessment and provision of evidence-based practices through application of pharmacotherapy principles, and drug monitoring to support person-centered care. Development of skills in gathering information, identifying and resolving medication-related problems, providing patient communication and education, and completing clinical documentation.
Requisites: Declared in Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Assess pulmonary health conditions by evaluating diagnostic criteria, risk factors, etiology, and treatment goals
Audience: Graduate

2. Differentiate among the therapeutic drug classes based on mechanisms of action, clinical use, adverse effects, contraindications, interactions, and dosage forms used for pulmonary conditions
Audience: Graduate

3. Describe why a drug is selected for a condition or person based on its properties
Audience: Graduate

4. Design a person-centered care plan consisting of both drug and non-drug elements appropriate for an individual with pulmonary conditions using evidence-based principles and guidelines
Audience: Graduate

5. Evaluate a person-centered care plan to optimize safety and efficacy, considering patient-specific factors, to improve therapeutic outcomes for pulmonary conditions
Audience: Graduate

6. Design a person-centered communication approach utilizing effective oral and written communication strategies
Audience: Graduate

PHARMACY 451 – MARGINALIZED POPULATIONS IN HEALTHCARE AND MEDIA
1 credit.

Provides opportunities for learning about healthcare barriers and facilitators: health disparities; and health outcomes using popular culture movies, and media that portray marginalized communities. Provides opportunities to discuss how their identities influence their view of the movie's theme and how bias may impact care provided in a healthcare setting.
Requisites: Declared in the Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Critique the portrayal of marginalized communities in the movies regarding health disparities and public health.
Audience: Graduate

2. Describe and differentiate how one's own identity influences the relationship to the community in the movie and how intrinsic biases may impact the care provided to marginalized communities.
Audience: Graduate

3. Analyze how the social determinants of health and systemic racism impact a character's health and wellbeing.
Audience: Graduate

4. Describe and differentiate attitudes and stereotypes concerning marginalized communities and how this may impact a person's individualized clinical and self-care.
Audience: Graduate

PHARMACY 462 – PROFESSIONAL DEVELOPMENT AND ENGAGEMENT 1: DEVELOPING YOUR PROFESSIONAL IDENTITY
1 credit.

Explore aspects of professional identity and how to become more engaged with the pharmacy profession. Explore personal values, skills, and strengths and identify their implications for patient care and professional practice. Engage in continuing professional and interprofessional development to promote quality patient care and advocacy.
Requisites: Declared in Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify personal and professional strengths and discuss the application of these strengths within contemporary pharmacy practice.
Audience: Graduate

2. Identify professional role within an interprofessional team and demonstrate effective team communication and collaboration skills.
Audience: Graduate

3. Describe how personal identity, beliefs, attitudes, and biases may impact patient care and professional practice and how continued experiences relate to professional identity formation.
Audience: Graduate

4. Identify areas of interest related to professional engagement and patient advocacy; complete related co-curricular activities and reflect on personal and professional growth.
Audience: Graduate

5. Apply the continuing professional development cycle to reflect and plan for academic and professional growth; create two SMART learning objectives for completion during spring semester.
Audience: Graduate

PHARMACY 490 – SELECTED TOPICS IN PHARMACY
1-2 credits.

Various topics related to the Pharmacy profession.
Requisites: Declared in Doctor of Pharmacy program
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHARMACY 535 – CIRCULATION SCIENCE AND THERAPEUTICS
3 credits.

Integration of pharmacologic knowledge and clinical decision-making to optimize patient management of cardiovascular diseases. Emphasis on patient assessment and provision of evidence-based practices through application of pharmacotherapy principles, and drug monitoring to support person-centered care.
Requisites: PHARMACY 435
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Assess circulatory health conditions by evaluating diagnostic criteria, risk factors, etiology, and treatment goals.
Audience: Graduate

2. Differentiate among the therapeutic drug classes used for cardiovascular conditions based on mechanisms of action, clinical use, adverse effects, contraindications, interactions, and dosage forms used for cardiovascular conditions.
Audience: Graduate

3. Explain why a drug is selected for a cardiovascular condition or person based on its properties.
Audience: Graduate

4. Design a person-centered care plan consisting of both drug and non-drug elements appropriate for an individual with cardiovascular conditions using evidence-based principles and guidelines.
Audience: Graduate

5. Evaluate a person-centered care plan to optimize safety and efficacy, considering patient-specific factors, to improve therapeutic outcomes for cardiovascular conditions.
Audience: Graduate

PHARMACY 536 – HEART SCIENCE AND THERAPEUTICS
3 credits.

Integration of pharmacologic knowledge and clinical decision-making to optimize patient management of heart diseases. Emphasis on patient assessment and provision of evidence-based practices through application of pharmacotherapy principles, and drug monitoring to support person-centered care.
Requisites: PHARMACY 435
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Assess heart conditions by evaluating diagnostic criteria, risk factors, etiology, and treatment goals.
Audience: Graduate

2. Differentiate among the therapeutic drug classes based on mechanisms of action, clinical use, adverse effects, contraindications, interactions, and dosage forms used for heart conditions.
Audience: Graduate

3. Explain why a drug is selected for a specific heart condition or person based on its properties.
Audience: Graduate

4. Design a person-centered care plan consisting of both drug and non-drug elements appropriate for an individual with heart disease using evidence-based principles and guidelines.
Audience: Graduate

5. Evaluate a person-centered care plan to optimize safety and efficacy, considering patient-specific factors, to improve therapeutic outcomes for heart conditions.
Audience: Graduate

PHARMACY 553 – APPLIED CLINICAL SKILLS I
1 credit.

Develop pharmacy practice skills needed to address drug-related problems and provide patient-centered care. Apply the Pharmacists' Patient Care Process to patient scenarios. Specific skills include patient communication through patient consultations, blood pressure and heart rate measurement, and clinical documentation utilizing the Subjective, Objective, Assessment and Plan (SOAP) note method. Not open to students with credit for PHM PRAC 553 prior to fall 2026.
Requisites: Declared in Doctor of Pharmacy program with second year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Use therapeutic decision-making skills and drug information to apply clinical knowledge to address drug-related problems and promote health improvement, wellness, and disease prevention in cooperation with individual patients.
Audience: Graduate

2. Perform steps of the pharmacists' patient care process (PPCP): collect, assess, plan, implement, and follow-up through documentation and communication in a patient-centered and efficient manner as consistent with the University of Wisconsin - Madison School of Pharmacy's technical standards.
Audience: Graduate

3. Demonstrate understanding of laboratory values and physical assessment, including accurate measurement and interpretation of vital signs such as blood pressure measurement, and integrate findings to identify normal and abnormal physiological states.
Audience: Graduate

4. Demonstrate professionalism by exhibiting behaviors and values that are consistent with the trust given to the profession by patients, other health care providers, and society (ACPE Standards 25).
Audience: Graduate

PHARMACY 562 – PROFESSIONAL DEVELOPMENT & ENGAGEMENT 2: CULTIVATING LEADERSHIP AND ADVOCACY WITHIN THE PROFESSION
1 credit.

Continue to develop professional identity and engage with the pharmacy profession through leadership and professional advocacy. Explore wellness; personal values, skills, and strengths; and identify their implications for leadership and professional advocacy within pharmacy practice. Engage in career, continuing professional, and interprofessional development to promote quality patient care.
Requisites: PHM PRAC 462 or PHARMACY 462
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Create a professional curriculum vitae, draft a letter of intent, and explore professional online networking and job search resources.
Audience: Graduate

2. Demonstrate effective communication skills with peers, faculty, preceptors, and employers to build professional relationships.
Audience: Graduate

3. Identify strategies to manage emotional stress and compassion fatigue as a health professional.
Audience: Graduate

4. Identify areas of interest related to leadership and professional advocacy at the local, state, and national levels and complete related leadership and professional advocacy co-curricular activities, reflecting on personal and professional growth.
Audience: Graduate

5. Work with individuals from other professions to maintain a climate of mutual respect and shared values while promoting the role of the pharmacist in the healthcare system.
Audience: Graduate

PHARMACY 608 – SAFETY AND QUALITY IN THE MEDICATION USE SYSTEM
3 credits.

Addresses the problems of medication errors and quality in health care, problem resolutions, methods of assessment, and intervention implementation and quality management.
Requisites: Declared in Doctor of Pharmacy program with third year standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize types, sources, and contributors to error within the medication use system.
Audience: Undergraduate

2. Explain the influence of work systems and human factors on the development of safe processes for improving safety within the medication use system.
Audience: Undergraduate

3. Apply tools for identifying, analyzing, and anticipating errors within the medication use system (e.g., error reporting systems, root cause analysis, failure modes and effects analysis) and use these to develop safer processes.
Audience: Undergraduate

4. Describe characteristics of healthcare settings that contribute to improved quality and how pharmacists can influence the characteristics.
Audience: Undergraduate

5. Explain how quality indicators are developed, measured, and monitored in the US healthcare system.
Audience: Undergraduate

6. Describe and apply economic evaluation and pharmacoeconomic principles to evaluate pharmacy programs and drug products.
Audience: Undergraduate

PHARMACY 621 – PHARMACOKINETICS
3 credits.

Introduction to pharmacokinetics. Fundamental principles and specific physical models are discussed. Absorption, distribution, metabolism, and excretion are thoroughly described including applications to pharmacotherapy mostly through a one body compartment model. Biopharmaceuticals and small molecule drugs are discussed based on their specific pharmacokinetics. All pharmacokinetics and pharmacodynamics principles and concepts are further described in depth in terms of their clinical applications with an emphasis on the role of the pharmacy professional.
Requisites: Declared in the Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply the one-compartment pharmacokinetic model as it relates to the IV bolus dose, extravascular dose, constant rate regimens and multiple dose regimens.
Audience: Graduate

2. Describe drug movement through membranes, drug absorption, distribution and elimination.
Audience: Graduate

3. Explain enzyme kinetics, protein binding, and blood flow influences on a drug's pharmacokinetics.
Audience: Graduate

4. Describe integration of drug kinetics with physiology.
Audience: Graduate

5. Discuss drug Pharmacodynamics and its relationship to drug pharmacokinetics.
Audience: Graduate

6. Develop a drug dosing regimen for a medication in a patient with kidney or liver impairment using only the FDA-approved labeling (prescribing information) for a medication.
Audience: Graduate

7. Apply pharmacokinetics and pharmacodynamics to drug regimen modifications based on therapeutic drug monitoring.
Audience: Graduate

PHARMACY 630 – RURAL PHARMACY PRACTICE
2 credits.

Explore how public health intersects with healthcare delivery in rural settings through direct engagement with rural communities, practitioners, and themes in rural practice. Apply therapeutic knowledge to fulfill unmet community needs, and thereby enhance delivery of healthcare in rural communities. Create a pharmacy-driven service with the goal of enhancing healthcare delivery in a rural area based on a community assessment, exploration of contemporary rural health care trends, and discussion with current rural health practitioners.
Requisites: Declared in the Doctor of Pharmacy Program with third year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the importance of a community-based assessment as a method for exploring community healthcare needs.
Audience: Graduate

2. Explain the essential role that community health departments play in supporting rural communities, as well as the opportunities for pharmacists and community health departments to collaborate in improving healthcare delivery.
Audience: Graduate

3. Identify opportunities to improve rural pharmacy practice through assessment of evidence based resources and literature.
Audience: Graduate

4. Identify challenges in rural healthcare and recommend potential pharmacy practice solutions through dialogue with rural health practitioners and patients.
Audience: Graduate

5. Explore service models and opportunities for interprofessional care in rural communities.
Audience: Graduate

6. Evaluate rural hospital and community pharmacy financial models to identify strategies to remaining financially solvent.
Audience: Graduate

7. Assess pharmacists' leadership opportunities in rural practice and how effective pharmacy leaders can shape the landscape of practice and service opportunities delivered in rural communities.
Audience: Graduate

8. Examine the interplay between public health and epidemiology to design healthcare services to match community needs.
Audience: Graduate

PHARMACY 658 – SPECIALTY PHARMACY IN A MODERN HEALTHCARE SETTING
2 credits.

Introduction to specialty pharmacy, a growing and important segment of the pharmaceutical marketplace. Importance of economic, business and management principles to develop, implement and evaluate specialty pharmacy services within health systems. Modern health system cases about implementation of specialty pharmacy services in clinic and in pharmacy departments to improve patient outcomes from specialty medications and increase volume of specialty medications dispensed.
Requisites: Declared in Doctor of Pharmacy program with third year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe the core fundamentals of specialty pharmacy including economics, market trends, contracting, and specialty pharmaceutical reimbursement
Audience: Graduate

2. Analyze data demonstrating the impact that specialty pharmacy has on health systems and patient outcomes
Audience: Graduate

3. Analyze case studies of specialty pharmacy topics in modern health care systems
Audience: Graduate

4. Describe current specialty pharmacy accreditation regulations and the application for accreditation status process
Audience: Graduate

5. Describe and analyze the process related to starting a specialty pharmacy program within a health system and the associated considerations
Audience: Graduate

PHARMACY 662 – PROFESSIONAL DEVELOPMENT AND ENGAGEMENT 3: EMBRACING CONTINUING PROFESSIONAL DEVELOPMENT
1 credit.

Become more engaged with the pharmacy profession through further development and refinement of professional identity and continuing professional development. Use appropriate published evidence to answer clinical questions and complete orientations to understand expectations and prepare for advanced pharmacy practice field experiences.
Requisites: PHM PRAC 464 or PHARMACY 562
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Retrieve and interpret primary, secondary, and tertiary sources to answer a clinical question.
Audience: Graduate

2. Identify areas of interest and complete co-curricular activities for continuing professional development and professional identity formation
Audience: Graduate

3. Reflect on your professional identity and create a professional philosophy statement.
Audience: Graduate

4. Demonstrate reflective behaviors and goal settings for academic and professional growth.
Audience: Graduate

5. Describe experiential requirements and course policies in preparation for advanced pharmacy practice experiences.
Audience: Graduate

PHARMACY 670 – VETERINARY THERAPEUTICS
1 credit.

Presentation and discussion of topics that involve the therapeutic management of disease states of companion, food, and exotic animals. Emphasis is placed upon the principles of drug regulations, drug therapy, toxicology, and available commercial products.
Requisites: Declared in Doctor of Pharmacy program with second year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify resources where accurate and reliable information can be found
Audience: Graduate

2. Identify laws and regulations affecting the practice of pharmacy (dispensing and compounding products)
Audience: Graduate

3. Identify state and federal laws affecting dispensing, filling, and compounding for animal patients
Audience: Graduate

4. Identify toxic/poisonous substances to cats and dogs
Audience: Graduate

5. Compare and contrast disease states in cats vs. dogs vs. humans
Audience: Graduate

6. Identify treatment options for each disease/disorder and the current accepted treatments
Audience: Graduate

7. Identify key counseling points, side effects, and clinical pearls for drugs commonly dispensed to pets
Audience: Graduate

8. Calculate the dose of a drug for an animal patient
Audience: Graduate

PHARMACY 699 – ADVANCED INDEPENDENT STUDY
1-3 credits.

Individually mentored learning experiences for Doctor of Pharmacy students as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Develop and apply a pharmacy practice-based, drug discovery, or drug development project that demonstrates initiative, problem-solving, and professional judgment
Audience: Graduate

2. Critically evaluate current literature and evidence-based guidelines to inform decision-making and support the development of a hypothesis-driven solution
Audience: Graduate

3. Communicate project findings effectively to diverse audiences that may include healthcare professionals, patients, and stakeholders
Audience: Graduate

PHARMACY 740 – ACUTE CARE ADVANCED PHARMACY PRACTICE EXPERIENCE
1-6 credits.

Integrate into the acute care pharmacy practice site to build knowledge and skills related to hospital pharmacy. Apply principles of the Pharmacists' Patient Care Process to perform direct patient care activities (patient profile review, documentation, medication histories, medication consults, pharmacokinetic drug monitoring, renal dosing, drug information). Develop critical thinking, communication, and interprofessional teamwork skills.
Requisites: Declared in Doctor of Pharmacy program with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Construct individualized plans using the Pharmacists' Patient Care Process (PPCP) for patients in the acute care setting.
Audience: Graduate

2. Prioritize patients' drug and medical-related problems.
Audience: Graduate

3. Actively participate in the interprofessional healthcare team in evidence-based therapeutic decision-making.
Audience: Graduate

4. Present a comprehensive overview of a disease state and associated pharmacotherapy occurring in the acute care setting.
Audience: Graduate

5. Analyze, interpret, and apply literature in the acute care setting.
Audience: Graduate

6. Assemble a comprehensive medication history to include prescription and non-prescription medications for patients in the acute care setting.
Audience: Graduate

7. Educate patients and caregivers on safe and effective use of medications in the acute care setting.
Audience: Graduate

8. Develop and modify medication dosage regimens based on pharmacokinetic data, plasma concentrations, and patient-specific factors.
Audience: Graduate

9. Apply clinical knowledge and institutional practices to ensure safe and accurate medication use.
Audience: Graduate

PHARMACY 741 – AMBULATORY CARE ADVANCED PHARMACY PRACTICE EXPERIENCE
1-6 credits.

Provide patient-centered care, manage medication use systems, promote health and wellness, and describe the influence of population-based care on patient-centered care. Solve problems, communicate with and advocate for patients, collaborate with others and practice cultural humility.
Requisites: Declared in Doctor of Pharmacy program with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Construct individualized plans using the Pharmacists Patient Care Process (PPCP) for ambulatory patients.
Audience: Graduate

2. Prioritize patients' drug and medical-related problems.
Audience: Graduate

3. Actively participate in the interprofessional healthcare team in evidence-based therapeutic decision-making.
Audience: Graduate

4. Provide equitable and quality care to a diverse patient population.
Audience: Graduate

5. Assemble a comprehensive medication history to include prescription and non-prescription medications for ambulatory patients.
Audience: Graduate

6. Perform medication teaching for ambulatory patients.
Audience: Graduate

7. Analyze, interpret, and apply literature to ambulatory patients.
Audience: Graduate

8. Present a comprehensive overview of a disease state and associated pharmacotherapy occurring in the acute care setting.
Audience: Graduate

PHARMACY 742 – HEALTH-SYSTEM ADVANCED PHARMACY PRACTICE EXPERIENCE
1-6 credits.

Integrate into the health-system pharmacy practice site to build knowledge and skills related to health-system pharmacy. Gain experience with pharmacy clinical support and administrative activities, and central pharmacy operations needed to support patient care. Develop critical thinking, communication, and project management skills.
Requisites: Declared in Doctor of Pharmacy program with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Comprehensively review key elements of the medication-use system in the hospital setting.
Audience: Graduate

2. Assess and actively participate in the safe and effective dispensing and distribution of medications in the hospital setting.
Audience: Graduate

3. Demonstrate project management, analytical, and communication skills to improve medication processes and patient care.
Audience: Graduate

4. Develop health-system pharmacy management and leadership skills.
Audience: Graduate

PHARMACY 743 – COMMUNITY ADVANCED PHARMACY PRACTICE EXPERIENCE
1-6 credits.

Provide patient-centered care, manage medication use systems, promote health and wellness, and describe the influence of population-based care on patient-centered care. Solve problems, communicate with and advocate for patients, collaborate with others and practice cultural humility.
Requisites: Declared in Doctor of Pharmacy program with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Evaluate the key elements of the medication-use system.
Audience: Graduate

2. Evaluate the dispensing and drug distribution systems.
Audience: Graduate

3. Examine the use of technologies to distribute and safely administer medications to patients.
Audience: Graduate

4. Provide medication counseling for prescription and over-the-counter medications.
Audience: Graduate

5. Triage patients requesting self-care help.
Audience: Graduate

6. Use state and national assessments to analyze and evaluate pharmacy operations.
Audience: Graduate

PHARMACY 760 – ELECTIVE ADVANCED PHARMACY PRACTICE EXPERIENCE
1-6 credits.

Integrate into various pharmacy practice sites to explore career paths. Perform direct and indirect patient care activities (direct patient care, drug information, policy development, administrative support, research, teaching). Develop communication and project management skills.
Requisites: Declared in Doctor of Pharmacy program with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Provide patient care in cooperation with patients and members of an interprofessional health care team based on sound therapeutic principles and evidence-based data, considering legal, ethical, social, cultural, economic and professional issues, emerging technologies and evolving biomedical, pharmaceutical, social/behavioral/administrative and clinical sciences that may impact therapeutic outcomes
Audience: Graduate

2. Manage and use resources of the health care system, in cooperation with patients, prescribers, other health care providers, and administrative and supportive personnel, to promote health; to provide, assess, and coordinate safe, accurate, and time-sensitive medication distribution; and to improve therapeutic outcomes of medication use
Audience: Graduate

3. Promote health improvement, wellness, and disease prevention in cooperation with patients, communities, at-risk populations, and other members of an interprofessional team
Audience: Graduate

PHARMACY 761 – INTERNATIONAL ADVANCED PHARMACY PRACTICE EXPERIENCE
1-6 credits.

Gain immersive pharmacy practice experience in a different country. Learn about global health, medication use, health systems, and pharmacy practice with a health equity lens.
Requisites: Declared in Doctor of Pharmacy program with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Describe social, political, environmental, and economic factors that may contribute to health and the burden of disease in the country the student is visiting (host country).
Audience: Graduate

2. Describe the prevalence of communicable and noncommunicable diseases in the host country and health disparities within the host country.
Audience: Graduate

3. Explain the medication-use system in the host country.
Audience: Graduate

4. Identify similarities and differences in pharmacy patient care services, interprofessional collaboration, and drug information resources in the host country compared to student's home country.
Audience: Graduate

5. Compare and contrast public (government) and private health systems and funding sources in the host country.
Audience: Graduate

6. Assess the strengths and opportunities for pharmacy patient care services in the host country.
Audience: Graduate

PHARMACY 764 – VETERINARY ADVANCED PHARMACY PRACTICE EXPERIENCE
1-6 credits.

Practical experience in a veterinary medicine environment with emphasis on the drug treatment of diseases in animals.
Requisites: Declared in Doctor of Pharmacy program with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Provide patient care collaborating with clients/ animal owners, veterinarians, veterinary technicians and other members of the veterinary healthcare team.
Audience: Graduate

2. Manage and use resources of the healthcare system to ensure appropriate medication therapy for veterinary patients.
Audience: Graduate

PHARMACY 769 – CLINICAL RESEARCH AND PHARMACY INVESTIGATION ADVANCED PHARMACY PRACTICE EXPERIENCE
1-6 credits.

Gain research experience in a mentored situation. Learn study design, laboratory techniques, statistical analysis, manuscript preparation, and ethical principles of research.
Requisites: Declared in Doctor of Pharmacy program with fourth year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop research skills as required for the project.

Audience: Graduate

2. Write an abstract describing the research findings.
Audience: Graduate

3. Write a manuscript for publication.
Audience: Graduate

PHARMACY 800 – RESEARCH ETHICS: SCIENTIFIC INTEGRITY AND THE RESPONSIBLE CONDUCT OF RESEARCH
2 credits.

Familiarizes graduate students with basic ethical issues associated with biomedical science research, taught via a case study approach. Content structured to meet NIH and NSF requirements for Responsible Conduct of Research (RCR) training. Students declared in the Pharmacology and Toxicology undergraduate program may enroll via consent of instructor.
Requisites: Declared in the Pharmaceutical Sciences PhD, Social and Administrative Sciences in Pharmacy PhD, or in the Pharmacy Master's program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: . Identify, analyze, and explain basic ethical issues and the responsible conduct of biomedical clinical and translational research on topics including but not limited to NIH mandated subjects
Audience: Graduate

. Communicate knowledge about ethical principles in scientific research effectively to a range of audiences
Audience: Graduate

PHARMACY PRACTICE (PHM PRAC)

PHM PRAC 305 – CONSUMER SELF-CARE AND OVER-THE-COUNTER DRUGS
2 credits.

Provides learners with information regarding self-care of common, minor health conditions. Emphasis on: illness prevention, health condition symptoms, guidelines for over-the-counter product use, adverse effects and alcohol/drug interactions of over-the-counter products, when to request professional care.
Requisites: Not open to students declared in the Nursing, Physician Assistant, or Doctor of Pharmacy programs
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe signs and symptoms of common health conditions
Audience: Undergraduate

2. Explain guidelines for self-treatment with over-the-counter products
Audience: Undergraduate

3. Describe basic drug action & common side effects of selected over-the-counter products
Audience: Undergraduate

4. Explain appropriate use of nonprescription treatments
Audience: Undergraduate

5. Identify drug and alcohol interactions with over-the-counter products
Audience: Undergraduate

6. Discuss precautions or contraindications (including pregnancy issues) and adverseeffects associated with over-the-counter treatments
Audience: Undergraduate

7. Illustrate when to request professional care
Audience: Undergraduate

8. Select appropriate measures to prevent health conditions
Audience: Undergraduate

PHM PRAC 438 – NONPRESCRIPTION MEDICATIONS AND SELF-CARE
2 credits.

Develop knowledge and skills needed to perform triage and make self-care and therapeutic recommendations for self-limiting health conditions commonly encountered in pharmacy practice.
Requisites: Declared in the Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss accessibility, affordability, trust, and empowerment regarding nonprescription products
Audience: Graduate

2. Employ the QuEST SCHOLAR-MAC triage process and the Pharmacists' Patient Care Process to self-care cases and consultations
Audience: Graduate

3. Recognize and respect patient experiences, cultural influences, health disparities, and social identity aspects during self-care cases and consultations
Audience: Graduate

4. Discuss laws and liability related to nonprescription products and self-care consultations
Audience: Graduate

5. Identify signs and symptoms of each health condition covered in this course
Audience: Graduate

6. Discuss exclusions for self-care related to each health condition covered in this course
Audience: Graduate

7. Differentiate self-care aspects given unique characteristics of the person being evaluated/advised (such as pediatrics, pregnancy & lactation, and older adults)
Audience: Graduate

8. Classify individual nonprescription medications into distinct medication classes based on therapeutic use
Audience: Graduate

9. Choose appropriate nonprescription medications and non-drug/general care measures for cases/situations
Audience: Graduate

10. Explain common adverse effects and drug interactions for nonprescription medications and methods for managing them
Audience: Graduate

11. Construct treatment plans, including key education points, for self-care of each health condition covered in this course
Audience: Graduate

PHM PRAC 461 – PATHWAYS IN PHARMACY PRACTICE
1 credit.

Introduction to, and exploration of, contemporary pharmacy practice settings and interprofessional practice, including opportunities for career advancement.
Requisites: Declared in Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe multiple pathways in contemporary pharmacy practice.
Audience: Graduate

2. Demonstrate knowledge of interprofessional teamwork and articulate its importance to pharmacy practice.
Audience: Graduate

3. Evaluate curricular options available to customize educational pathways.
Audience: Graduate

4. Evaluate co- and extra-curricular options available to advance post-graduation employment/training goals
Audience: Graduate

PHM PRAC/MEDICINE/NURSING/SOC WORK 467 – INTERPROFESSIONAL COLLABORATIVE PRACTICE IN HIV CARE
1 credit.

Gain foundational knowledge and skills in interprofessional collaborative practice and HIV care. Explore the roles of medicine, nursing, pharmacy, and social work in the HIV care continuum. Discuss quality team-based care as a member of an interprofessional student team.
Requisites: Declared in Nursing BSN (Traditional, Collaborative, Accelerated), Social Work BSW, Medicine MD, Pharmacy PharmD, or Social Work MSW.
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the history and epidemiology of the HIV epidemic.
Audience: Both Grad & Undergrad

2. Define Interprofessional Collaborative Practice (ICP) and describe the characteristics of effective ICP.
Audience: Both Grad & Undergrad

3. Describe the natural history of HIV disease with and without antiretroviral therapy (ART).
Audience: Both Grad & Undergrad

4. Discuss US Dept of Health and Human Services guidelines and recommendations for prevention, screening, diagnosis, treatment, and management of HIV infection and HIV-related diseases in the United States.
Audience: Both Grad & Undergrad

5. Describe the HIV care continuum including testing, entry and retention in care, and treatment including associated stigma and discrimination as barriers.
Audience: Both Grad & Undergrad

6. Discuss dimensions of wellness (emotional, environmental, financial, intellectual, occupational, physical, social and spiritual).
Audience: Both Grad & Undergrad

7. Identify potential co-morbid conditions in the HIV infected population.
Audience: Both Grad & Undergrad

8. Discuss stigma and discrimination as barriers to prevention, care, and treatment.
Audience: Both Grad & Undergrad

9. Discuss the history of the Ryan White Care Act and other federal and state policies and their current importance in HIV prevention and HIV care.
Audience: Both Grad & Undergrad

10. Identify HIV care needs and common health issues among high risk and vulnerable populations.
Audience: Both Grad & Undergrad

11. Develop a plan of care for an HIV positive individual as part of an interprofessional team.
Audience: Both Grad & Undergrad

12. Develop skills working with mixed teams including undergraduate students
Audience: Graduate

13. Demonstrate higher level skills in identifying and resolving barriers to

PHM PRAC 468 – INTRODUCTION TO PHARMACY INFORMATICS
1 credit.

Introduction to Pharmacy Informatics, the scientific field that utilizes a systems approach to medication-related data and information, including its acquisition, storage, analysis, and dissemination, in the delivery of optimal medication-related patient care and health outcomes.
Requisites: Declared in the Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define the basic terminology used in health informatics
Audience: Graduate

2. Describe the benefits and current constraints in using information and communication technology in healthcare
Audience: Graduate

3. Identify the reasons for the systemic processing of data, information, and knowledge in healthcare
Audience: Graduate

PHM PRAC 469 – HEALTH EQUITY & SOCIAL JUSTICE FOR HEALTHCARE PROVIDERS
2 credits.

Social justice seminar focusing on diversity, equity, inclusion, and leadership in the health professions. Focus on historical and contemporary issues in the healthcare system and equip students to develop the awareness, skills, and applied behaviors to impact healthcare inequities at the micro and macro level.
Requisites: Nursing BSN (Traditional, Accelerated or Collaborative), senior standing and declared in Health Promotion and Health Equity BS, or graduate/professional standing
Course Designation: Core GenEd - Civics & Perspectives
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate knowledge of social identities and cultural differences of self and others.
Audience: Both Grad & Undergrad

2. Gain intercultural competencies in personal and professional environments
Audience: Both Grad & Undergrad

3. Continue to develop and hone skills in critical thinking and interpersonal communication
Audience: Both Grad & Undergrad

4. Identify root causes of health disparities and develop skills and behaviors to help decrease them
Audience: Both Grad & Undergrad

5. Increase awareness of how social identities impact relationships to the healthcare system, access to health care, and patient/provider interactions

Audience: Both Grad & Undergrad

6. Integrate multiple definitions of health and health care into our professional philosophies
Audience: Both Grad & Undergrad

7. Reinforce leadership skills and develop opportunities for informal mentoring/support.
Audience: Graduate

PHM PRAC 471 – EXPLORING PHARMACY PEER MENTOR SEMINAR
1 credit.

A mentoring, leadership and facilitation class for pharmacy peer mentors assisting instructors of the Exploring Pharmacy courses.
Requisites: Declared in Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate familiarity with college student development theory and how it applies to pre-pharmacy students
Audience: Graduate

2. Develop group facilitation, leadership, and mentoring skills
Audience: Graduate

3. Describe how peer mentoring supports personal and professional development
Audience: Graduate

4. Employ effective interpersonal communication skills
Audience: Graduate

5. Demonstrate the ability to provide verbal and written feedback on student work
Audience: Graduate

PHM PRAC 490 – SELECTED TOPICS IN PHARMACY PRACTICE
1-4 credits.

Specialized Pharmacy subject matter of current interest to undergraduate and professional students.
Requisites: Declared in Doctor of Pharmacy program
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

PHM PRAC 526 – PHARMACY PRACTICE EXPERIENCES II
1 credit.

Provides opportunities to integrate learning from prior didactic experiences and a community IPPE into observation and discussion of the provision of patient care. Participate in a wide-variety of activities to expose them to the role of the pharmacist and patient care opportunities that exist in and out of the pharmacy practice setting. Focus on the provision of care in an institutional setting along with a variety of pharmacy practice settings which fall under an elective category. Continued exposure to the Pharmacist Patient Care Process (PPCP), which is a framework for providing patient care in a pharmacy practice setting.
Requisites: PHARMACY 426 (or PHM PRAC 426 prior to Spring 2026)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop and enhance oral and written communication skills with patients, pharmacists, and other healthcare providers.
Audience: Graduate

2. Retrieve professional and lay literature in order to acquire information about therapeutic agents and to provide health information to patients, other health professionals and the public.
Audience: Graduate

3. Explore sources of information that can lead to appropriate clinical decision making (i.e. medical records, laboratory reports, and institutional policies and procedures).
Audience: Graduate

4. Display professional attitudes, habits, and values in accordance with ethical and social guidelines.
Audience: Graduate

5. Identify examples of bias in the healthcare setting and how they contribute to the quality of care provided to a patient.
Audience: Graduate

6. Develop an understanding of the pharmacist's role on the healthcare team and the complexities involved in interdisciplinary communications.
Audience: Graduate

7. Identify and discuss the various roles pharmacists assume in the health care system, especially their role in providing patient-centered care using the Pharmacist Patient Care Process (PPCP).
Audience: Graduate

PHM PRAC 550 – FLUID AND ELECTROLYTE THERAPY
2 credits.

Clinical management of disorders of fluid, electrolytes, and acid-base in patients with normal and abnormal homeostatic mechanisms. Also included is parenteral nutritional support.
Requisites: Declared in Doctor of Pharmacy program with third year standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the physiological processes that normally maintain fluid and electrolyte homeostasis
Audience: Undergraduate

2. Explain how disease processes result in a failure of homeostasis, leading to fluid and electrolyte imbalances, and the clinical manifestations of the imbalances
Audience: Undergraduate

3. Connect how basic concepts from chemistry, biochemistry, physical chemistry, physiology, and pathophysiology can be applied directly to the management of fluid and electrolyte disorders
Audience: Undergraduate

4. Utilize information from a patient's history, symptoms, physical and laboratory findings to evaluate the type of imbalance, the magnitude of the imbalance, and the urgency of the problem
Audience: Undergraduate

5. Propose treatment strategies that will stabilize urgent problems, utilize homeostatic mechanisms, correct imbalances, and avoid complications
Audience: Undergraduate

6. Review primary literature and authoritative review articles to obtain the most current ideas regarding optimal treatment of the disorders
Audience: Undergraduate

PHM PRAC 554 – INTEGRATED PHARMACOTHERAPY SKILLS II
1 credit.

Learn pharmacotherapeutic skills necessary to develop competence as a pharmacist to assume the responsibility to improve therapeutic patient outcomes related to medication use. Skills will include patient and provider communication, identification and resolution of drug related problems, and documentation.
Requisites: PHARMACY 553 (or PHM PRAC 553 prior to Fall 2026) and PHM PRAC 555
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use therapeutic decision-making skills and drug information to apply clinical knowledge to address drug-related problems and promote health improvement, wellness, and disease prevention in cooperation withindividual patients
Audience: Undergraduate

2. Perform steps of the pharmacist patient care process (PPCP): collect, assess, plan, implement, and follow-up through collaboration, communication, and documentation in a patient-centered and efficientmanner as consistent with the University of Wisconsin – Madison School of Pharmacy's technical standards
Audience: Undergraduate

3. Acquire the necessary skills and experience to provide patient-centered care as a member of an interprofessional team
Audience: Undergraduate

4. Begin to develop skills and commitment for life-long learning in order to maintain professional competence
Audience: Undergraduate

5. Demonstrate professionalism by exhibiting behaviors and values that are consistent with the trust given to the profession by patients, other health care providers, and society
Audience: Undergraduate

PHM PRAC 555 – PHARMACOTHERAPY I
3 credits.

Clinical application of medications in the management of various neurologic and psychiatric disease states. Assessment and therapeutic monitoring of drug therapy with emphasis on the concepts of drug selection, monitoring of drug effect and titration of regimen. Also incorporates issues regarding pharmacokinetics/dynamics, drug interactions, pharmacy practice, and patient education.
Requisites: Declared in the Doctor of Pharmacy program with second year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize the target symptoms of mental health and neurologic conditions commonly encountered in pharmacy practice including epilepsy, headache, multiple sclerosis, Parkinson's disease, depression, anxiety, bipolar disorder, schizophrenia, sleep disorders, and dementia.
Audience: Graduate

2. Classify individual psychotropic and neurologic medications into distinct medication classes based on mechanism of action and therapeutic use (i.e. antiepileptic drugs, selective serotonin reuptake inhibitors, tricyclic antidepressants, second-generation antipsychotics, benzodiazepine, dopaminergic agents, etc).
Audience: Graduate

3. Devise key education points that should be communicated to a patient prescribed a psychotropic or neurologic medication (including indication, administration/dosing, monitoring for safety and efficacy, interactions).
Audience: Graduate

4. Describe common/serious adverse effects of psychotropic and neurologic medications and methods for preventing and/or minimizing occurrence.
Audience: Graduate

5. Identify clinically relevant interactions between psychotropic and neurologic medications and other medications, substances, foods, and disease states.
Audience: Graduate

6. Create a treatment plan to minimize an individual patient's risk of experiencing poor outcomes related to psychotropic and neurologic medication interactions.
Audience: Graduate

7. Select a first-line medication regimen (including specific agent, formulation, dose and frequency) for an individual patient, targeted at treating a specific mental health or neurologic condition.
Audience: Graduate

8. Develop a monitoring plan (including timeframe and monitoring parameters) for an individual patient newly starting or restarting a psychotropic or neurologic medication.
Audience: Graduate

9. Formulate key questions or strategies to assess psychotropic or neurologic medication response in an individual patient.
Audience: Graduate

10. Provide a recommendation to adjust a psychotropic or neurologic medication regimen based on individual patient response.
Audience: Graduate

PHM PRAC 556 – PHARMACOTHERAPY II
3 credits.

Clinical application of medications in the management of various disease states. Assessment and therapeutic monitoring of disease states and drug therapy using the concepts of pharmacokinetics/dynamics, drug interactions, pharmacy practice and patient counseling. Topics include cardiovascular and pulmonary therapeutics.
Requisites: PHARMACY 553 (or PHM PRAC 553 prior to Fall 2026) and PHM PRAC 555
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define the goals of treatment - both overall and related to individual patient cases
Audience: Undergraduate

2. Design a therapeutic regimen consisting of both non-drug and drug elements appropriate for individual patients. In selecting drug therapy, consider the patient's age, disease, clinical condition/severity of illness, concomitant diseases and medications
Audience: Undergraduate

3. Select the initial dosing regimen and plan a dose titration scheme not exceeding maximal recommended doses (unless such excess is warranted)

Audience: Undergraduate

4. Provide the patient and health care personnel with information on the nature, likelihood and management of relevant (likely or severe) adverse effects
Audience: Undergraduate

5. Design a treatment monitoring plan incorporating symptoms, physical assessment, diagnostic test and laboratory findings as needed to document patient response and possible drug-related problems. Identify monitoring parameters, including endpoints/goals, timing and follow-up
Audience: Undergraduate

6. Explain the disease process, purpose of drug therapy, and other information pertinent to patient education in lay terms
Audience: Undergraduate

PHM PRAC 559 – INTRODUCTION TO ANTIMICROBIAL PHARMACOTHERAPY
1 credit.

Preparation for antimicrobial exposure and monitoring during internships to ensure safe and effective patient use of antimicrobials. Exposure to antibiotic-related drug information questions in the community and institution settings and review of primary literature to respond to these questions.
Requisites: Declared in Doctor of Pharmacy program with second year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Assess an antibiotic prescription in outpatient and inpatient settings for safety and efficacy based on patient-specific criteria.
Audience: Graduate

2. Identify components of a safe and effective antibiotic patient consultation.
Audience: Graduate

3. Recognize when a patient with an infection should be referred to a provider for evaluation.
Audience: Graduate

4. Monitor a patient's response to an antimicrobial.
Audience: Graduate

5. Demonstrate understanding of common infections.
Audience: Graduate

6. Identify first-line antimicrobials for common infections.
Audience: Graduate

7. Demonstrate competence in utilization of antimicrobial resources available through responding to drug information questions in the inpatient out outpatient settings.
Audience: Graduate

PHM PRAC 560 – SEMINARS IN ANTIMICROBIAL STEWARDSHIP
2 credits.

Gain foundational knowledge of the societal implications of antimicrobial resistance and the basic tenets of antimicrobial stewardship in multiple practice settings. Apply these tenets by developing antimicrobial stewardship intervention(s) and design measurement of associated outcomes.
Requisites: Declared in the Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the benefits of antimicrobial stewardship
Audience: Graduate

2. Describe how antimicrobial use in humans, agriculture, and animals contribute to the development of antimicrobial resistance.
Audience: Graduate

3. Discuss strategies to improve antimicrobial prescribing in outpatient, inpatient, and long-term care settings
Audience: Graduate

4. Describe components of an Antimicrobial Stewardship Program.
Audience: Graduate

5. Discuss how technology such as rapid diagnostics and electronic decision support tools can support stewardship initiatives and improve patient care.
Audience: Graduate

6. Apply Centers for Disease Control and Prevention Core Elements for a Stewardship Program to propose the development of a program in an inpatient, outpatient, or long-term care setting.
Audience: Graduate

7. Identify state-, national-, and international initiatives to improve patient outcomes related to inappropriate antimicrobial use.
Audience: Graduate

8. Design an educational antimicrobial stewardship intervention and outcomes measurements as a part of a team.
Audience: Graduate

9. Present a proposed policy or procedure to a mock Pharmacy and Therapeutics Committee as a part of a team.
Audience: Graduate

PHM PRAC 570 – DRUG LITERATURE EVALUATION
3 credits.

Fundamentals of drug literature and statistical evaluation to enable students to make decisions regarding the clinical use of drugs in their practice.
Requisites: Declared in Doctor of Pharmacy program with second year standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Determine the strengths and weaknesses of clinical trials and observational research
Audience: Undergraduate

2. Analyze a guideline recommendation given a cited clinical trial
Audience: Undergraduate

3. Interpret the statistics presented in published literature
Audience: Undergraduate

4. Report the results of clinical trials in a coherent and articulate fashion using written communication
Audience: Undergraduate

PHM PRAC 610 – LEADERSHIP IN HEALTH-SYSTEM PHARMACY
2 credits.

Introduces personal leadership qualities essential for effective practice within an integrated health care delivery system and for advancing the profession of pharmacy. Provides a foundation for future pharmacy leaders by exploring the evolving role of pharmacy in the changing health care environment.
Requisites: Declared in Doctor of Pharmacy program with third year standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop personal and practice-related leadership skills
Audience: Undergraduate

2. Apply health system management techniques
Audience: Undergraduate

3. Utilize skills needed to create, promote, and market the pharmacist's role within integrated health systems
Audience: Undergraduate

4. Provide a foundation for students/practitioners to become future pharmacy leaders through an understanding of our profession's role in the evolving health care environment
Audience: Undergraduate

5. Expose personal leadership qualities essential to operate effectively within an integrated health care delivery system and advance the profession and practice of pharmacy
Audience: Undergraduate

6. Develop skills in the following areas: project management, decision making, productivity management, quality methodologies, organizational design and behavior, and strategic planning
Audience: Undergraduate

7. Develop administrative acumen within the principles of human resource management, financial management, and pharmacy/health care reimbursement
Audience: Undergraduate

PHM PRAC 611 – MEDICAL IMAGING FOR PHARMACISTS
2 credits.

An overview of the imaging modalities offered in a Hospital Radiology Department. Learn the concepts of radiation, how it is used, and some of the tests and medications a patient may encounter when in the Radiology Department of a hospital.
Requisites: Declared in Doctor of Pharmacy program
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the components of a nuclear pharmacy practice site
Audience: Undergraduate

2. Identify the most common types of radiation used in radiology and describe their physical characteristics
Audience: Undergraduate

3. Explain how radiation affects the human body and how regulatory agencies have set standards for protection
Audience: Undergraduate

4. Identify common imaging modalities in radiology
Audience: Undergraduate

5. Empathize with patients undergoing radiology procedures
Audience: Undergraduate

PHM PRAC 612 – RADIOPHARMACEUTICALS
2 credits.

A survey of the clinical diagnostic and therapeutic use of radioactive pharmaceuticals. Included is a review of nuclear physics, radiation biology, radiation chemistry, regulatory issues, and radiation safety, as these areas relate to the synthesis, formulation, dispensing, and administration of radiopharmaceuticals.
Requisites: PHM PRAC 611
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply the knowledge learned in Medical Imaging 611 to explain the biological effects of radiation used clinically with FDA approved radiopharmaceuticals
Audience: Undergraduate

2. Identify common production methods for common radionuclides
Audience: Undergraduate

3. Explain the common indications of FDA approved radiopharmaceuticals in clinical Radiology
Audience: Undergraduate

4. Describe the pharmacokinetics and biodistribution of common radiopharmaceuticals
Audience: Undergraduate

PHM PRAC 617 – HEALTH SYSTEM PHARMACY DATA ANALYSIS AND INFORMATICS
2 credits.

Pharmacy information systems and the use of data and data processing systems for decision support. Complete a data analysis and report project to drive a decision in the hospital.
Requisites: Graduate standing or declared in the Doctor of Pharmacy program with third year standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Articulate how EHR systems store data, and how they impact patient care
Audience: Undergraduate

2. Elaborate on medication use systems and core components of pharmacy informatics
Audience: Undergraduate

3. Design and present solutions using analytical tools to effectively analyze and visualize data
Audience: Undergraduate

4. Communicate effectively with informatics teams and healthcare providers
Audience: Undergraduate

PHM PRAC 625 – PHARMACY PRACTICE EXPERIENCES III
2 credits.

Integrates didactic learning with active participation in a wide-variety of patient-care activities under the supervision of a pharmacist preceptor including medication reconciliation, patient consultation, complex medication reviews, documentation, therapeutic drug monitoring and calculations. Continued exposure to the Pharmacist Patient Care Process (PPCP), which is a framework for providing patient care in a pharmacy practice setting.
Requisites: PHM PRAC 526
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop and enhance oral and written communication skills with patients, pharmacists, and other healthcare providers
Audience: Graduate

2. Retrieve and interpret primary, secondary, and tertiary sources to answer clinical questions encountered by patients and other healthcare providers
Audience: Graduate

3. Identify, assess, and provide recommendations to patients and other healthcare providers to resolve medication- and health-related problems using the Pharmacist Patient Care Process
Audience: Graduate

4. Design or modify dosage regimens using pharmacokinetic data, plasma concentration, and factors that alter them
Audience: Graduate

5. Educate patients and caregivers on the safe and effective use of medications while considering the patient's perspective on health, social, economic, and psychological needs
Audience: Graduate

6. Observe and participate in pharmacy operations including accurate dispensing and preparation of a medication
Audience: Graduate

7. Apply legal principles to perform professional activities as a pharmacy intern
Audience: Graduate

8. Display professional attitudes, habits, and values in accordance with ethical and social guidelines
Audience: Graduate

9. Develop individualized goals and reflect on experiences through structured learning activities and assignments
Audience: Graduate

PHM PRAC 626 – PHARMACY PRACTICE EXPERIENCES IV
2 credits.

Integrates didactic learning with active participation in a wide-variety of patient-care activities under the supervision of a pharmacist preceptor including medication reconciliation, patient consultation, complex medication reviews, documentation, therapeutic drug monitoring and calculations. Continued exposure to the Pharmacist Patient Care Process (PPCP), which is a framework for providing patient care in a pharmacy practice setting.
Requisites: PHM PRAC 625
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop and enhance oral and written communication skills with patients, pharmacists, and other healthcare providers
Audience: Graduate

2. Retrieve and interpret primary, secondary, and tertiary sources to answer clinical questions encountered by patients and other healthcare providers
Audience: Graduate

3. Identify, assess, and provide recommendations to patients and other healthcare providers to resolve medication- and health-related problems using the Pharmacist Patient Care Process
Audience: Graduate

4. Design or modify dosage regimens using pharmacokinetic data, plasma concentration, and factors that alter them
Audience: Graduate

5. Educate patients and caregivers on the safe and effective use of medications while considering the patient's perspective on health, social, economic, and psychological needs
Audience: Graduate

6. Observe and participate in public health activities in the community to address and promote health and wellness and increase awareness of community-based resources
Audience: Graduate

7. Select a marginalized population within the community and complete structured learning activity to identify factors that may impact the health of that population
Audience: Graduate

8. Observe and participate in pharmacy operations including accurate dispensing and preparation of a medication
Audience: Graduate

9. Apply legal principles to perform professional activities as a pharmacy intern
Audience: Graduate

10. Display professional attitudes, habits, and values in accordance with ethical and social guidelines
Audience: Graduate

11. Develop individualized goals and reflect on experiences through structured learning activities and assignments
Audience: Graduate

PHM PRAC 628 – PRACTICE INNOVATION I
1 credit.

Applies foundational project management knowledge to hands-on experiences in planning positive change within the health care system. Focuses on strategic thinking, critical problem assessment, solution identification, and implementation of change. Integrates concepts from a chosen practice area with project management skills.
Requisites: Declared in Doctor of Pharmacy program with third year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Serve as strategic decision makers able to effectively organize and prioritize needs within a health care organization to produce meaningful results
Audience: Graduate

2. Engage as agents for pharmacy practice advancement through successful project development, management, and assessment
Audience: Graduate

3. Articulate project management essentials inspired by the Project Management Institute, with application to unique areas of pharmacy practic
Audience: Graduate

4. Collaborate with project stakeholders to identify a problem in pharmacy practice, define end goals, and strategize solutions
Audience: Graduate

5. Utilize project management principles to develop a project plan, manage stakeholders, and lead meetings to develop, measure, and implement meaningful change
Audience: Graduate

PHM PRAC 629 – PRACTICE INNOVATION II
1 credit.

Promotes positive change within the health care system. Integrates concepts from a chosen practice area with project management skills, with emphasis on project implementation, measurement, and clear communication of results.
Requisites: PHM PRAC 628
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Serve as strategic decision makers able to effectively organize and prioritize needs within a health care organization to produce meaningful results
Audience: Graduate

2. Engage as agents for pharmacy practice advancement through successful project development, management, and assessment
Audience: Graduate

3. Articulate project management essentials inspired by the Project Management Institute, with application to unique areas of pharmacy practice
Audience: Graduate

4. Collaborate with project stakeholders to identify a problem in pharmacy practice, define end goals, and strategize solutions
Audience: Graduate

5. Utilize project management principles to develop a project plan, manage stakeholders, and lead meetings to develop, measure, and implement meaningful change
Audience: Graduate

PHM PRAC 650 – COMPREHENSIVE IMMUNIZATION DELIVERY
1 credit.

Addresses vaccine-preventable diseases and the implementation of pharmacy-based immunization delivery programs.
Requisites: Declared in the Doctor of Pharmacy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply the principles of immunization
Audience: Graduate

2. Recommend vaccinations for patients based on their ages, concurrent illnesses or conditions, and lifestyle
Audience: Graduate

3. Describe how to implement and maintain a pharmacy-based immunization service
Audience: Graduate

4. Develop vaccine administration skills
Audience: Graduate

PHM PRAC 653 – INTEGRATED PHARMACOTHERAPY SKILLS III
1 credit.

Learn and build upon pharmacotherapeutic skills necessary to develop competence as a pharmacist to assume the responsibility to improve therapeutic patient outcomes related to medication use. Skills will include patient and healthcare provider communication, identification and resolution of drug related problems, documentation, and complex problem solving skills.
Requisites: Declared in Doctor of Pharmacy program with third year standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Use therapeutic decision-making skills and drug information to apply clinical knowledge to address drug-related problems and promote health improvement, wellness, and disease prevention in cooperation with individual patients
Audience: Undergraduate

2. Perform steps of the pharmacists' patient care process (PPCP): collect, assess, plan, implement, and follow-up through documentation, communication, and collaboration in a patient-centered and efficient manner as consistent with the University of Wisconsin – Madison School of Pharmacy's technical standards
Audience: Undergraduate

3. Acquire the necessary skills and experience to provide patient care as a member of an interprofessional team
Audience: Undergraduate

4. Begin to develop skills and commitment for life-long learning in order to maintain professional competence
Audience: Undergraduate

5. Demonstrate professionalism by exhibiting behaviors and values that are consistent with the trust given to the profession by patients, other health care providers, and society
Audience: Undergraduate

PHM PRAC 654 – INTEGRATED PHARMACOTHERAPY SKILLS IV
1 credit.

Develops advanced pharmacotherapeutic skills to support competent medication management and improve patient outcomes. Emphasizes complex problem-solving through integrated patient cases, including communication, documentation, and evaluation, with additional focus on patient profile review and comprehensive medication assessment.
Requisites: PHM PRAC 653 and 655
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use therapeutic decision-making skills and drug information to apply clinical knowledge to address drug-related problems and promote health improvement, wellness, and disease prevention in cooperation with individual patients
Audience: Undergraduate

2. Perform steps of the pharmacists' patient care process (PPCP): collect, assess, plan, implement, and follow-up through documentation, communication, and collaboration in a patient-centered and efficient manner as consistent with the University of Wisconsin – Madison School of Pharmacy's technical standards
Audience: Undergraduate

3. Acquire the necessary skills and experience to provide patient care as a member of an interprofessional team
Audience: Undergraduate

4. Begin to develop skills and commitment for life-long learning in order to maintain professional competence
Audience: Undergraduate

5. Demonstrate professionalism by exhibiting behaviors and values that are consistent with the trust given to the profession by patients, other health care providers, and society
Audience: Undergraduate

PHM PRAC 655 – PHARMACOTHERAPY III
3 credits.

Clinical application of medications in the management of various disease states. Assessment and therapeutic monitoring of disease states and drug therapy using the concepts of pharmacokinetics/dynamics, drug interactions, pharmacy practice and patient counseling. Topics include various renal, endocrine, gastrointestinal, rheumatologic and immunologic disease therapeutics.
Requisites: PHM PRAC 554 and 556
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Define the goals of treatment - both overall and related to individual patient cases
Audience: Undergraduate

2. Design a therapeutic regimen consisting of both non-drug and drug elements appropriate for individual patients. In selecting drug therapy, consider the patient's age, disease, clinical condition/severity of illness, concomitant diseases and medications
Audience: Undergraduate

3. Select the initial dosing regimen and plan a dose titration scheme not exceeding maximal recommended doses (unless such excess is warranted)

Audience: Undergraduate

4. Provide the patient and health care personnel with information on the nature, likelihood and management of relevant (likely or severe) adverse effects
Audience: Undergraduate

5. Design a treatment monitoring plan incorporating symptoms, physical assessment, diagnostic test and laboratory findings as needed to document patient response and possible drug-related problems. Identify monitoring parameters, including endpoints/goals, timing and follow-up
Audience: Undergraduate

6. Explain the disease process, purpose of drug therapy, and other information pertinent to patient education in lay terms
Audience: Undergraduate

PHM PRAC 656 – PHARMACOTHERAPY IV
3-4 credits.

Clinical application of medications in the management of various disease states. Assessment and therapeutic monitoring of disease states and drug therapy using the concepts of pharmacokinetics/dynamics, drug interactions, pharmacy practice and patient counseling. Topics include various oncology and infectious disease therapeutics. A one credit elective option will be offered to students and involves academic leadership skill development. Student leaders will lead discussion activities which involve clinical cases, scientific literature review, oncology literature discussions.
Requisites: PHM PRAC 653, 655 and PHM SCI 623
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use patient and laboratory evidence to design initial regiments and tailor regiments based on patient monitoring and guidelines for specific infections
Audience: Undergraduate

2. Examine patients' antimicrobial regiments to minimize potential adverse events and drug-drug interactions
Audience: Undergraduate

3. Demonstrate the basic biology, microbiology and epidemiology of microorganism and antimicrobial spectra to apply to patients with infectious diseases
Audience: Undergraduate

4. Implement appropriate antimicrobial stewardship principles for safe and effective antimicrobial use in patients and populations
Audience: Undergraduate

5. Design a therapeutic regimen consisting of both non-drug and drug elements appropriate for individual cancer patients receiving a specified antineoplastic drug therapy regimen. In selecting drug therapy, consider the patient's age, disease, clinical condition/severity of illness, concomitant diseases and medications
Audience: Undergraduate

6. Describe current recommendations for decreasing the risk of developing cancer
Audience: Undergraduate

7. Describe current recommendations for cancer screening, including physical examinations, serology, and genetic screening
Audience: Undergraduate

8. Describe factors that affect the pharmacokinetics of antineoplastic chemotherapy, and the extent to which monitoring renal, hepatic, or drug concentrations can be used to titrate or empirically adjust the drug regimen
Audience: Undergraduate

9. Describe how cytotoxic medications should be prepared and how they should be safely disposed in the inpatient and outpatient environment
Audience: Undergraduate

10. Describe how reimbursement issues affect the selection of drug and administration of the drug in the outpatient and inpatient environment, and how pharmacy services can facilitate access to the intended therapy
Audience: Undergraduate

PHM PRAC 657 – SEMINARS IN PEDIATRIC PHARMACOTHERAPY
2 credits.

Addresses the selection, dosing, and monitoring of drugs in children from birth to adolescence. Drugs in pregnancy and lactation are also addressed.
Requisites: PHM PRAC 656 or concurrent enrollment
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the differences in development of drug distribution and elimination in children from birth to adulthood.
Audience: Undergraduate

2. Use the available literature to recommend a dose of drug for a child based upon age, weight, and organ function.
Audience: Undergraduate

3. Describe peri-partum diagnostic and therapeutic interventions to prevent or treat infections or to delay or stimulate delivery.
Audience: Undergraduate

4. Describe how the prevention and treatment of diabetes may differ between children and adults.
Audience: Undergraduate

5. Describe drugs and doses used for sedation and analgesia in children
Audience: Undergraduate

6. Describe risk factors and common treatment approaches for fluid and electrolyte repletion in children.
Audience: Undergraduate

7. Describe the nature of treatments for pediatric-predominant cancers, including ways in which chemotherapy or other treatment-related toxicities can be minimized.
Audience: Undergraduate

8. Interact with the faculty as an opportunity to learn more about pediatric pharmacy, and various pediatric residency opportunities (several of the presenters are pediatric specialty residents).
Audience: Undergraduate

PHM PRAC 659 – INFECTIOUS DISEASES PHARMACOTHERAPY IN THE ACUTE CARE SETTING
1 credit.

Antimicrobial Stewardship has emerged as an important component of patient care in both inpatient and outpatient settings. Pharmacists can play an essential role in Antimicrobial Stewardship through application of knowledge in pharmacology, therapeutics, pharmacokinetics, microbiology, and biotechnology, most often expressed in the acute care setting, where patient health status and therapeutic decision making are ongoing. Addresses the ever-changing skill set required for pharmacists to understand therapeutic options and make effective interventions in the care of infected patients. Emphasis is placed on new treatment modalities as well as challenging the status quo of conventional management principles.
Requisites: PHM PRAC 655
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply knowledge of concepts presented in the required Infectious Diseases Pharmacotherapy course to foster skills required in conducting an antimicrobial stewardship program.
Audience: Graduate

2. Apply principles of antimicrobial pharmacology and clinical management of diseases in patients treated in a hospital setting that are not covered in required coursework, at a point in the curriculum when students are near the start of clinical rotations.
Audience: Graduate

3. Recognize topics subject to dynamic changes and that may not be reflected in currently published guidelines.
Audience: Graduate

4. Enhance ability to evaluate published literature in infectious diseases.
Audience: Graduate

5. Apply algorithmic strategies to drug selection, dosing, and monitoring.
Audience: Graduate

6. Generate solutions for patient-specific care via case-based discussion.
Audience: Graduate

PHM PRAC 668 – SEMINARS IN CRITICAL CARE
2 credits.

Addresses the pharmacotherapeutic management of various critical care conditions. Guest lectures, primary literature review, patient case discussions, student-led presentations, and small group work will be utilized.
Requisites: PHM PRAC 550, 555, 556, and 655
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Critically evaluate published clinical research and apply evidence-based medicine to individual patients
Audience: Graduate

2. Design a therapeutic regimen consisting of both non-drug and drug therapy that is appropriate for an individual patient based on clinical condition (severity of illness), concomitant diseases and medications
Audience: Graduate

3. Analyze medication orders and determine appropriateness for an individual patient
Audience: Graduate

PHM PRAC 671 – INTRODUCTION TO ACADEMIC PHARMACY I
2 credits.

Introduction to pharmacy faculty responsibilities. Participate in a variety of activities to gain exposure to the role of the pharmacy educator.
Requisites: Declared in Doctor of Pharmacy program with third year standing
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Discuss a variety of remote and face-to-face instructional methodologies and assessment strategies
Audience: Undergraduate

2. Evaluate the merits and pitfalls of manuscripts in the area of teaching and learning
Audience: Undergraduate

3. Create and co-lead a group journal club discussion on an educational journal
Audience: Undergraduate

4. Develop and deliver an education-based topic discussion within the context of pharmacy education
Audience: Undergraduate

5. Design, evaluate, and/or analyze a pharmacy-related educational activity in conjunction with your mentor
Audience: Undergraduate

6. Report and critique a student-teaching interaction
Audience: Undergraduate

7. Demonstrate collaborative interpersonal and intergroup behaviors effective in various teaching situations
Audience: Undergraduate

PHM PRAC 673 – SEMINARS IN GLOBAL HEALTH PHARMACY
1 credit.

Explores the contribution of pharmacy and pharmacists to global health initiatives.
Requisites: Declared in Doctor of Pharmacy program
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Explain and interpret the Sustainable Development Goals from a healthcare professional/pharmacist perspective
Audience: Undergraduate

2. Explain the Global Pharmacy Practice Standards and compare these standards to actual practice around the world
Audience: Undergraduate

3. Identify ways that international organizations are working to improve pharmacy practice and education globally
Audience: Undergraduate

4. Compare and contrast issues raised in the classroom from an international and domestic perspective
Audience: Undergraduate

5. Identify and important topic related to this course, retrieve appropriate literature, post relevant readings in advance for class, and present a seminar (lecture and discussion) on the topic
Audience: Undergraduate

PHM PRAC/NURSING 674 – SEMINARS IN INTERPROFESSIONAL MENTAL HEALTH CARE
2 credits.

Addresses the team-based and patient-centered care of persons with mental health conditions. A special focus will be put on the management of psychotropic medication regimens. A combination of lecture, discussion, and small group work will be utilized.
Requisites: PHM PRAC 555
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Assess an individual person and his/her psychotropic medication regimen to identify potential and actual drug related problems
Audience: Undergraduate

2. Develop and recommend an appropriate therapeutic regimen consisting of both non-drug and drug therapy recommendations to facilitate optimal care and outcomes for an individual person
Audience: Undergraduate

3. Design an appropriate monitoring plan in collaboration with the person you are serving in order to appropriately evaluate the individual person's treatment plan
Audience: Undergraduate

4. Apply evidence-based care to practice by critically reviewing current published clinical research and guidelines
Audience: Undergraduate

5. Support persons in successfully navigating the wider mental health care system
Audience: Undergraduate

6. Apply ethical and legal concepts and processes in the analysis of clinical situations
Audience: Undergraduate

PHM PRAC 677 – SEMINARS IN CARDIOLOGY
2 credits.

Seminars, primary literature review, and patient case discussions on selected cardiovascular conditions, including: ACS, HF, valvular disease, cardiac devices, hemodynamic monitoring, heart transplantation, arrhythmias, ACLS, pulmonary arterial hypertension, stroke, and metabolic syndrome.
Requisites: Declared in Doctor of Pharmacy program with third year standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Critically review published clinical research so as to apply evidence based medicine principles to future practice
Audience: Undergraduate

2. Describe clinical applications of patient care from the perspectives of other disciplines
Audience: Undergraduate

3. Design a therapeutic regimen consisting of both non-drug and drug therapy that is appropriate for an individual patient based on clinical condition (severity of illness), concomitant diseases and medications
Audience: Undergraduate

PHM PRAC 678 – SEMINARS IN ONCOLOGY
1 credit.

Addresses practical issues surrounding the optimization of medication use in the treatment of patients with cancer. Practical solutions to the everyday challenges of providing exceptional clinical oncology care in a safe, fiscally responsible manner to optimize clinical outcomes of patients with cancer. Included subjects range across clinical, operational, and practice management issues that affect oncology pharmacy practice. These subjects include: pharmacogenomics, cell therapies, oncology research, survivorship, oral chemotherapy management, hazardous drug handling, value of cancer care, specialty pharmacy and Risk Evaluation and Mitigation Strategy (REMS) processes, and transitions of care. Although focused on oncology patients, offers practical exposure to issues confronting the care of patients with other types of diseases.
Requisites: Declared in the Doctor of Pharmacy Program with third year standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the steps needed to safely provide parenteral cytotoxic agents to an inpatient or outpatient (clinic) setting.
Audience: Graduate

2. Describe how to address patient access to oncology medications, including management of drug shortages.
Audience: Graduate

3. Describe how to seek financial or product support for patients prescribed expensive medications.
Audience: Graduate

4. Demonstrate how to converse and support patients and/or caregivers struggling with a diagnosis of incurable or terminal disease.
Audience: Graduate

5. Describe how to develop a de novo clinical pharmacy service in an oncology clinic.
Audience: Graduate

PHM PRAC 679 – ADVANCED DIABETES MANAGEMENT
2 credits.

Enhanced education on diabetes topics; current approaches to the medical management of patients with diabetes including the pharmacist's role in diabetes education and coaching/case management.
Requisites: PHM PRAC 655 or (NURSING 312 and NURSING 422)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe interprofessional roles and responsibilities of various health care providers in delivering care to people with diabetes
Audience: Undergraduate

2. Discuss economic, ethnic, racial and age diversity aspects related to health care for people living with diabetes
Audience: Undergraduate

3. Construct assessments and plans for diabetes case studies including lifestyle considerations, medications, medication delivery devices, and diabetes complications
Audience: Undergraduate

4. Discuss issues and experiences faced by people living with diabetes
Audience: Undergraduate

5. Critique media reports related to diabetes
Audience: Undergraduate

6. Communicate diabetes-related topics through oral presentation and discussion facilitation
Audience: Undergraduate

PHM PRAC 691 – SENIOR THESIS
2 credits.

Individual study for seniors completing theses as arranged with a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: No

PHM PRAC 692 – SENIOR THESIS
2 credits.

Individual study for seniors completing theses as arranged with a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: No

PHM PRAC 699 – ADVANCED INDEPENDENT STUDY
1-3 credits.

Directed study projects as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHM PRAC/NURSING/SOC WORK 746 – INTERDISCIPLINARY CARE OF CHILDREN WITH SPECIAL HEALTH CARE NEEDS
3 credits.

Interdisciplinary team care of children with special health care needs across the trajectory of illness presented within the context of family, culture, social determinants of health, community, and healthcare policy. Students introduced to interdisciplinary, collaborative, family-centered team care.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the interdisciplinary team approach to the care of the child with a chronic illness from the perspective of a child with a chronic illness and their family, community care providers, and each of the disciplines involved, including the student's own.
Audience: Graduate

2. Demonstrate an understanding of issues relating to larger social and cultural context for the care of children with chronic illness.
Audience: Graduate

3. Identify and assess healthcare delivery systems and financing for children with chronic illness.
Audience: Graduate

4. Describe ways to advocate for pediatric patients with chronic disease and their families at an individual level and a policy level.
Audience: Graduate

PHM PRAC 961 – GRADUATE SEMINAR IN HEALTH-SYSTEM PHARMACY
1 credit.

Specialized subject matter of current interest to graduate students in the MS Pharmacy Administration program.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHM PRAC 962 – GRADUATE SEMINAR IN HEALTH-SYSTEM PHARMACY
1 credit.

Specialized subject matter of current interest to graduate students in the MS Pharmacy Administration program.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHM PRAC 999 – ADVANCED INDEPENDENT STUDY
1-12 credits.

Directed study projects for graduate students as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOSOPHY (PHILOS)

PHILOS 101 – INTRODUCTION TO PHILOSOPHY
3-4 credits.

Introduction to various philosophical questions and to the strategies that philosophers use to address these.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe some of the key questions within philosophy.
Audience: Undergraduate

2. Explain some of the key positions that philosophers have defended.
Audience: Undergraduate

3. Appraise philosophical arguments with clarity and charity.
Audience: Undergraduate

PHILOS 104 – SPECIAL TOPICS IN PHILOSOPHY FOR FRESHMEN
3 credits.

Selected topics addressing various philosophical questions and to the strategies that philosophers use to address these.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

PHILOS 106 – STUDY ABROAD IN PHILOSOPHY
2-4 credits.

A study abroad equivalency for philosophy that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 1999

PHILOS 141 — THE MEANING OF LIFE
3-4 credits.

Introduces the subject of philosophy through a question that is familiar to nearly every person: What is the meaning of life? This question will be approached through reading both classical philosophical works and the works of contemporary philosophers.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Summarize various issues related to the concepts of meaning and purpose in human existence.
Audience: Undergraduate

2. Appraise philosophical arguments with clarity and charity.
Audience: Undergraduate

PHILOS 206 — STUDY ABROAD IN PHILOSOPHY
2-4 credits.

A study abroad equivalency for philosophy that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2001

PHILOS 210 — REASON IN COMMUNICATION
3-4 credits.

Argument in familiar contexts; emphasis upon developing critical skills in comprehending, evaluating, and engaging in contemporary forms of reasoning, with special attention to the uses of argument in mass communication media.
Requisites: MATH 96 or placement into MATH 141
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning A
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Evaluate the strength of arguments with an eye for recognizing fallacies and common errors of reasoning.
Audience: Undergraduate

2. Characterize complex arguments clearly.
Audience: Undergraduate

PHILOS 211 — ELEMENTARY LOGIC
3-4 credits.

The formal characteristics of logical truth and inference.
Requisites: Sophomore standing and satisfied Quantitative Reasoning (QR) A
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Ability to think critically about arguments.
Audience: Undergraduate

PHILOS 241 — INTRODUCTORY ETHICS
3-4 credits.

Nature of moral problems and of ethical theory, varieties of moral skepticism, practical ethics and the evaluation of social institutions.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe some of the key questions related to morality.
Audience: Undergraduate

2. Explain what some of the historical figures within moral philosophy have argued, why they are relevant and interesting, and be able to critically evaluate their arguments.
Audience: Undergraduate

PHILOS 243 – ETHICS IN BUSINESS
3-4 credits.

Case studies of moral issues in business; types or reasons appealed to for settlement.
Requisites: Sophomore standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe some of the key questions related to business ethics.
Audience: Undergraduate

2. Explain some of the positions that philosophers have defended related to business ethics.
Audience: Undergraduate

3. Incorporate insights from philosophy within one's life, as a person who faces moral challenges related to business every day.
Audience: Undergraduate

PHILOS 244 – INTRODUCTORY ARTIFICIAL INTELLIGENCE (AI) AND DATA ETHICS
3-4 credits.

Introduction to contemporary moral and political issues in Artificial Intelligence (AI) and Data Ethics, integrating urgent problems, controversies, and continuously updated case studies. Introduces basic technical concepts such as the bias/variance tradeoff, the reference class problem, and inductive risk. Covers topics such as data and privacy, the impacts of automation on society, and the use of algorithms in medicine and criminal law.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Critically evaluate ethical arguments in relation to data and artificial intelligence (AI).
Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically by identifying explicit and implicit background assumptions, and by understanding which conclusions necessarily follow from them.
Audience: Undergraduate

3. Discuss controversial ethical and social questions respectfully and with the aim of uncovering the truth.
Audience: Undergraduate

4. Identify and evaluate the ethical, legal, and political implications of artificial intelligence (AI), as well as their historical and societal context.
Audience: Undergraduate

PHILOS 304 – TOPICS IN PHILOSOPHY: HUMANITIES
3-4 credits.

Examination of selected topics in philosophy.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

PHILOS 320 – PHILOSOPHY OF SCIENCE
3-4 credits.

Focus on various central questions in philosophy of science, potentially including topics from the history of philosophy of science as well as topics important to contemporary philosophy of science. Topics might include: What is science? How does scientific explanation work? How do scientists generate and use evidence? What is the relationship between science and social or political values? What are the aims of science? May also include discussion of specific subdisciplines of philosophy of science, such as philosophy of biology, philosophy of physics, philosophy of medicine, and more.
Requisites: Sophomore standing. Not open to students with credit for PHILOS 220.
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Think critically about philosophical and scientific arguments.
Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.
Audience: Undergraduate

3. Communicate precisely and concisely in both writing and speech.
Audience: Undergraduate

4. Explain several central concepts in science and philosophy of science, such as explanation, confirmation, underdetermination, objectivity, (anti)realism, scientific revolutions, pluralism, reductionism, models, measurement, data, research ethics
Audience: Undergraduate

5. Reflect on their own society's relationship to science or scientific advancements
Audience: Undergraduate

6. Synthesize and understand multiple perspectives in philosophy of science or other science studies disciplines (e.g., history and sociology of science)
Audience: Undergraduate

PHILOS 340 – 19TH CENTURY PHILOSOPHY: IDEALISM AND ITS CRITICS
3 credits.

Examine debates about the legacy of idealism by discussing some of their most familiar interlocutors - Hegel, Nietzsche, Marx - as well as interlocutors who were obscured from history.
Requisites: 3 credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Understand major nineteenth-century debates about epistemology, metaphysics, and ethics.
Audience: Undergraduate

2. Make persuasive philosophical arguments.
Audience: Undergraduate

3. Interpret complex texts accurately and analyze them logically.
Audience: Undergraduate

4. Practice interpretative charity and intellectual honesty, which includes appropriate attribution to others of their ideas, and recognition and frankness about the limitations of one's own ideas.
Audience: Undergraduate

PHILOS 341 – CONTEMPORARY MORAL ISSUES
3-4 credits.

A philosophical study of some of the major moral issues in contemporary society, such as those concerning abortion, euthanasia, punishment, property, politics, sex, nuclear disarmament, and world hunger.
Requisites: Sophomore standing
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe, with clarity and precision, some of the key moral debates that we currently face.
Audience: Undergraduate

2. Explain some of the positions that philosophers have defended related to contemporary moral debates.
Audience: Undergraduate

PHILOS/MED HIST 344 – FOOD ETHICS
3 credits.

There are many ethical issues related to food production, distribution, consumption, and policy, including animal welfare, animal rights, vegetarianism and veganism, environmental impact, treatment of workers, prospects for agricultural reform, ethical responsibilities of corporate and industry actors, and labeling issues surrounding the use of genetically engineered foods. Some are more theoretical, such as which individuals affected by agriculture deserve direct moral consideration. Other are more practical, such as how to feed a growing global population. We will begin with a brief survey of ethical theories and methods of ethical reasoning, and then explore, from both personal and policy perspectives, several food ethics issues. Among the aims of the course are the goals of helping you think critically about the ethically relevant impacts of your own food choices and improving your understanding of ethical issues implicated in food systems.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Think critically about arguments.
Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.
Audience: Undergraduate

3. Think critically about ethical issues.
Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of modern food systems.
Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenge of human and environmental harms arising from modern food systems.
Audience: Undergraduate

PHILOS 430 – HISTORY OF ANCIENT PHILOSOPHY
3-4 credits.

Various philosophers from the presocratics to the Stoics and Epicureans; particular emphasis on Plato and Aristotle.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Review and interpret key philosophical works from the Ancient period.
Audience: Undergraduate

2. Describe some of the key arguments made by Ancient philosophers and critically evaluate them.
Audience: Undergraduate

PHILOS 432 – HISTORY OF MODERN PHILOSOPHY
3-4 credits.

Covers various philosophers from the 17th century through early 20th century.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Review and interpret key philosophical works from the Modern period.
Audience: Undergraduate

2. Describe some of the key arguments made by Modern philosophers and critically evaluate them.
Audience: Undergraduate

PHILOS 440 – EXISTENTIALISM
3-4 credits.

Feeling like life is absurd, that existence is meaningless? Worried that you aren't living authentically? Then a course in Existentialism is just what you need. Study the classic texts of this intellectual movement that expressed despondency about Western civilization, its decadence, and its values. Along the way you'll meet the likes of Kierkegaard, Nietzsche, Heidegger, Sartre, Camus, and De Beauvoir.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe some of the key features of existentialism.
Audience: Undergraduate

2. Review some of the key arguments made by existentialist philosophers.
Audience: Undergraduate

PHILOS/ENVIR ST 441 – ENVIRONMENTAL ETHICS
3-4 credits.

Adequacy of ethical theories in handling such wrongs as harm to the land, to posterity, to endangered species, and to the ecosystem itself. Exploration of the view that not all moral wrongs involve harm to humans. Inquiry into the notion of the quality of life and the ethics of the "lifeboat" situation.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Examine an array of moral questions related to the environment.
Audience: Undergraduate

2. Explain some of the key positions taken by philosophers related to environmental philosophy.
Audience: Undergraduate

3. Critically evaluate philosophical arguments.
Audience: Undergraduate

PHILOS/JEWISH 442 – MORAL PHILOSOPHY AND THE HOLOCAUST
3 credits.

Selected moral and philosophical issues raised by the Holocaust such as when and whom to rescue; includes issues arising after the annihilation such as forgiveness and reconciliation.
Requisites: Sophomore standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Examine an array of moral questions related to the holocaust.
Audience: Undergraduate

2. Explain some of the key positions taken by philosophers in relation to the holocaust.
Audience: Undergraduate

PHILOS 454 – CLASSICAL PHILOSOPHERS
3 credits.

One or more classical philosophers, movements, or problems selected for intensive study.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOS/RELIG ST 501 – PHILOSOPHY OF RELIGION
3-4 credits.

Analysis of religious experience and activity, and examination of principal religious ideas in light of modern psychology, philosophy, science, and anthropology.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe some of the key philosophical debates related to religion and the positions that philosophers have defended.
Audience: Undergraduate

2. Evaluate the strength of various philosophical arguments within the subfield of philosophy of religion.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS 503 – THEORY OF KNOWLEDGE
3 credits.

A survey of problems concerning the nature, sources, and limits of human knowledge, including such topics as scepticism, the concept of knowledge, sensory perception, evidence, justified belief, induction.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe some of the key philosophical questions within epistemology and the positions that philosophers have defended.
Audience: Undergraduate

2. Critically evaluate the key epistemological positions that philosophers have defended.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS 504 – SPECIAL TOPICS IN THE THEORY OF KNOWLEDGE
3 credits.

One or more special topics in the Theory of Knowledge or one or more major theories of knowledge. Variable content.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

PHILOS/MED HIST 505 — JUSTICE AND HEALTH CARE
3 credits.

Examines ethical issues in the distribution, financing, and delivery of health care (primarily in the United States). Explores key issues in U.S. health policy and forms the empirical foundation for the rest of the class. Engages is ongoing debates in moral and political philosophy over putative entitlements to health and health care. Investigates the nature, justifiability, and methods of health care rationing (including bedside rationing by doctors) and the myriad issues implicated by the near-universally shared goal of health care cost containment.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Understand the conversation about justice and health care as an enterprise incorporating moral philosophy, bioethics, and evidence-based social science
Audience: Both Grad & Undergrad

2. Identify and clarify diverse moral norms and principles that underlie diverse convictions about justice and health care
Audience: Both Grad & Undergrad

3. Subject these norms and principles to dispassionate critical reasoning aimed at evaluating the force of underlying reasons for and against them
Audience: Both Grad & Undergrad

4. Write clear and concise essays subjecting issues concerning justice and health to dispassionate ethical analysis
Audience: Both Grad & Undergrad

5. Write a clear and concise 15-page essay arguing for a novel thesis concerning justice and health.
Audience: Graduate

PHILOS 506 — STUDY ABROAD IN PHILOSOPHY
2-4 credits.

A study abroad equivalency for philosophy that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2001

PHILOS 511 — SYMBOLIC LOGIC
3 credits.

Propositional and predicate logic, with emphasis on metatheory; independence of rules and completeness theorems; discussion of technical and philosophical limitations of classical logic.
Requisites: PHILOS 211
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Describe core concepts of philosophical logic.
Audience: Undergraduate

2. Symbolize and manipulate logical statements using formal systems.
Audience: Undergraduate

3. Analyze, construct, and evaluate philosophical arguments.
Audience: Undergraduate

PHILOS 512 — METHODS OF LOGIC
3 credits.

Selected topics in philosophical logic and in the various applications of logic to philosophical problems. Variable content.
Requisites: PHILOS 211
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe core concepts of philosophical logic.
Audience: Undergraduate

2. Symbolize and manipulate logical statements using formal systems.
Audience: Undergraduate

3. Analyze, construct, and evaluate philosophical arguments.
Audience: Undergraduate

PHILOS/MED HIST 515 — PUBLIC HEALTH ETHICS
3 credits.

Focuses on ethical issues implicated in a population-level approach to disease prevention and health promotion. Explores prominent theoretical approaches to public health ethics and engages with several ethical tensions. Example issues include: the use of coercive or intrusive public health; the justification of patemalistic measures in societies; the extent to which societies should hold individuals responsible for their health conditions; the need to decide who receives life-saving treatment or vaccination; and climate changes and intergenerational justice; ethical issues in international pharmaceutical research.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Understand the conversation about public health ethics as an enterprise incorporating moral philosophy, bioethics, and evidence-based social science.
Audience: Both Grad & Undergrad

2. Identify and clarify diverse moral norms and principles that underlie diverse convictions about public health ethics.
Audience: Both Grad & Undergrad

3. Subject these norms and principles to dispassionate critical reasoning aimed at evaluating the force of underlying reasons for and against them.
Audience: Both Grad & Undergrad

4. Write clear and concise essays subjecting issues of public health ethics to dispassionate ethical analysis.
Audience: Both Grad & Undergrad

5. Write a clear and concise 15-page essay arguing for a novel thesis concerning public health ethics.
Audience: Graduate

PHILOS 516 — LANGUAGE AND MEANING
3 credits.

The nature and function of language, theories of meaning, semantic and syntactic paradoxes, proper names, private languages, rules, and linguistic relativity.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe some of the key philosophical questions within philosophy of language and the positions that philosophers have defended.
Audience: Undergraduate

2. Critically evaluate the key positions within philosophy of language.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS 520 — PHILOSOPHY OF THE NATURAL SCIENCES
3 credits.

Nature and functions of science; the logic of scientific method; clarification of such concepts as cause, law, theory, probability, determinism, teleology.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe some of the key philosophical questions within philosophy of science (particularly in the natural sciences) and the positions that philosophers have defended.
Audience: Undergraduate

2. Critically evaluate the key positions within philosophy of science.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS 522 – SPECIAL TOPIC
3 credits.

Selected from logic of theory construction, theoretical entities, models, applied mathematics, nature of laws, conventionalism, probability, etc. Variable content.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

PHILOS/ENVIR ST 523 – PHILOSOPHICAL PROBLEMS OF THE BIOLOGICAL SCIENCES
3 credits.

Problems raised by genetics, evolutionary theory, and taxonomy: patterns of explanatory force and dispensability of teleology; objectivity of taxonomy.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021

PHILOS/ECON 524 – PHILOSOPHY AND ECONOMICS
3 credits.

Economics examined from the viewpoint of the philosophy of science. Normative and positive aspects of economic theory. Deterministic and statistical explanation. Arrow impossibility theorem. Radical economics.
Requisites: Sophomore standing and 3 credits of PHILOS or ECON
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe some of the key philosophical questions within philosophy of economics and the positions that philosophers have defended.
Audience: Undergraduate

2. Critically evaluate the key positions within philosophy of economics.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS 530 – FREEDOM FATE AND CHOICE
3 credits.

An examination of the philosophical problems associated with free will.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe some of the key philosophical questions related to free will/choice explored by philosophers.
Audience: Undergraduate

2. Explain the key positions that philosophers have defended related to free will/choice and critically evaluate these.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS/MED HIST 534 – ETHICS AND THE BRAIN
3 credits.

In-depth analysis of ethical issues arising from the practices and advances of brain science in clinical, research, legal, and consumer contexts. Includes a foundation in ethical theory and philosophical methodology.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Gain knowledge about neurological and neuroscientific technologies and practices.
Audience: Both Grad & Undergrad

2. Gain understanding of major ethical theories and approaches.
Audience: Both Grad & Undergrad

3. Learn to employ philosophical methodology.
Audience: Both Grad & Undergrad

4. Utilize ethical theories and approaches, and philosophical methodologies to critically interrogate the ethical dimensions of the brain sciences.
Audience: Both Grad & Undergrad

5. Develop the skill of writing rigorous, analytical philosophical papers.
Audience: Graduate

6. Expand research beyond material learned in class to incorporate outside scientific and philosophical work.
Audience: Graduate

PHILOS/ED POL 540 – EGALITARIANISM AND EDUCATIONAL JUSTICE
3 credits.

Examines significant disagreements about educational justice-about the very concept of educational justice; about the most plausible substantive account of educational justice and the way that an ideal of equality bears on it; and about what kinds of policies the most plausible account of educational justice would require in circumstances like our own. Introduces tools that contemporary moral and political philosophers use to investigate those questions. Understand and evaluate efforts to resolve those questions.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the structure of, and the differences among, major accounts of educational justice that have been defended in the literature on the philosophy of education
Audience: Both Grad & Undergrad

2. Examine the educational policies that different accounts of educational justice would favor, and evaluate existing educational policies by the standards of different accounts of educational justice
Audience: Both Grad & Undergrad

3. Construct and evaluate complex normative—moral and political—arguments about the concept of educational justice, the most plausible account of educational justice, and the practical implications of accounts of educational justice
Audience: Both Grad & Undergrad

4. Construct and defend novel versions, objections, and assessments of egalitarian theories of educational justice for educational policy and practice by conducting original philosophical research.
Audience: Graduate

PHILOS 541 – MODERN ETHICAL THEORIES
3 credits.

Ethical theories and problems as discussed in the late nineteenth and twentieth centuries.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe some of the key philosophical questions related to moral philosophy.
Audience: Undergraduate

2. Explain the key positions that philosophers have defended related to moral philosophy and critically evaluate these.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS 543 – SPECIAL TOPICS IN ETHICS
3 credits.

Intensive study of ethical theory, or of one or more ethical theories or moral philosophers of the present or modern period. Variable content.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

PHILOS/L I S 544 – ADVANCED ETHICS OF DATA AND ARTIFICIAL INTELLIGENCE
4 credits.

In-depth examination of contemporary moral and political issues in artificial intelligence (AI) and Data Ethics, integrating urgent problems, controversies, and continuously updated case studies. Covers topics such as the use of facial recognition technology in law and immigration enforcement, algorithmically-supported hiring processes, and the complex dynamics of human-computer interaction. Includes critical engagement with cutting-edge research in applied moral/political philosophy, such as on competing theories of justice and political legitimacy as well as on key normative concepts like trust, autonomy, privacy, explainability; and case studies drawing from work in computer sciences and applied statistics.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Critically evaluate ethical arguments in relation to data and AI.
Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically by identifying explicit and implicit background assumptions, and by understanding which conclusions necessarily follow from them.
Audience: Undergraduate

3. Communicate precisely and concisely in both writing and speech, in a way that adequately captures ethical nuances and ambiguities arising in AI design and deployment while not sacrificing technical accuracy.
Audience: Undergraduate

4. Discuss controversial ethical and social questions respectfully and with the aim of uncovering the truth.
Audience: Undergraduate

5. Deploy the conceptual tools and language necessary to converse with scholars and practitioners in the interdisciplinary AI and Data Ethics Community.
Audience: Undergraduate

6. Identify and evaluate the ethical, legal, and political implications of AI, as well as their historical and societal context.
Audience: Undergraduate

7. Communicate the distinctive value of humanistic inquiry into AI and data ethics as compared to, and in addition to, technical efforts to better understand and improve AI and other emerging technologies.
Audience: Undergraduate

PHILOS/ED POL 545 – PHILOSOPHICAL CONCEPTIONS OF TEACHING AND LEARNING
3 credits.

Examination and analysis of conceptions of teaching and learning in classical philosophical works and in contemporary literature in the philosophy of education.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

PHILOS 549 – GREAT MORAL PHILOSOPHERS
3 credits.

Major themes of moral philosophy, from Plato and Aristotle to Bentham and Mill, with critical study of outstanding works.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

PHILOS/ED POL 550 – PHILOSOPHY OF MORAL EDUCATION
3 credits.

Critical examination of classical and contemporary conceptions of moral education.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHILOS 551 – PHILOSOPHY OF MIND
3 credits.

Nature of mind (mental states such as thinking and feeling) and its relation to physical states, with emphasis on recent advances in philosophy and psychology.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe some of the key philosophical questions related to philosophy of mind.
Audience: Undergraduate

2. Explain the prominent arguments within philosophy of mind and critically evaluate these.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS 553 – AESTHETICS
3 credits.

Analysis of current philosophies of art and of criticism.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe some of the key philosophical questions related to aesthetics.
Audience: Undergraduate

2. Explain the prominent arguments within aesthetics and critically evaluate these.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS 555 – POLITICAL PHILOSOPHY
3 credits.

Philosophical doctrines involved in justification of political decisions; analysis of some fundamental concepts, e.g. the common good, authority, justice, natural law, natural rights.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe some of the key questions within the field of political philosophy.
Audience: Undergraduate

2. Explain key arguments within the field of political philosophy and critically evaluate these.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS/GEN&WS 556 – TOPICS IN FEMINISM AND PHILOSOPHY
3 credits.

Topics from historical and contemporary feminist thought; attention to one or more feminist philosophers, historical movements, philosophical frameworks, or sets of philosophically related issues.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Think critically about arguments.
Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.
Audience: Undergraduate

3. Communicate precisely and concisely in both writing and speech.
Audience: Undergraduate

4. Express familiarity with central concepts in feminist philosophy.
Audience: Undergraduate

PHILOS 557 – ISSUES IN SOCIAL PHILOSOPHY
3 credits.

Specific topics in social and political philosophy such as war and peace, property and industry, individualism and collectivism, freedom and justice.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024

PHILOS/MED HIST 558 – ETHICAL ISSUES IN HEALTH CARE
3 credits.

Ethical issues apparently created by new biomedical technologies, such as genetic screening, prenatal diagnosis, prolongation of life, treatment of severe birth defects, in vitro fertilization, behavior modification, psychosurgery, and transplantation.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Gain knowledge about ethical issues in healthcare

Audience: Both Grad & Undergrad

2. Communicate precisely and concisely in both writing and speech
Audience: Both Grad & Undergrad

3. Think critically about arguments related to ethical issues in health care with the aim of uncovering the truth
Audience: Both Grad & Undergrad

4. Practice interpretive charity and intellectual honesty, which includes appropriate attribution to others of their ideas, and recognition and frankness about the limitations of one's own ideas
Audience: Both Grad & Undergrad

5. Independently locate and engage with the latest relevant empirical and philosophical research relevant to evaluating ethical issues in health care
Audience: Graduate

6. Exhibit substantial synthetic and analytic abilities in considering the ethical dimensions of ethical issues in health care
Audience: Graduate

PHILOS 560 – METAPHYSICS
3 credits.

Major problems in metaphysics, such as: existence, universals and particulars, space and time, individuals, categories, substance and attribute, necessity.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe some of the key philosophical questions related to metaphysics.
Audience: Undergraduate

2. Explain key philosophical arguments within metaphysics and critically evaluate these.
Audience: Undergraduate

3. Engage in philosophical discussion with an eye for clarity, precision, understanding, and depth.
Audience: Undergraduate

PHILOS 562 – SPECIAL TOPICS IN METAPHYSICS
3 credits.

An intensive study of one or more topics such as: existence, universals and particulars, space and time, individuals, individuation, categories, substance and attribute, necessity, events and processes.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHILOS/C&E SOC/MED HIST 565 – THE ETHICS OF MODERN BIOTECHNOLOGY
3 credits.

An in-depth study of a selection of ethical issues arising from the application of modern biotechnology to microorganisms, plants, non-human animals, and human beings. We will aim at a discussion that is informed by empirical research and by work done in ethical theory, political philosophy, and other relevant disciplines, and whose character is rigorous, clear, nuanced, and unbiased.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Think critically about arguments.
Audience: Both Grad & Undergrad

2. Communicate precisely and concisely in both writing and speech.
Audience: Both Grad & Undergrad

3. Exchange reasons about controversial matters respectfully and with the aim of uncovering the truth.
Audience: Both Grad & Undergrad

4. Practice interpretive charity and intellectual honesty, which includes appropriate attribute to others of their ideas, and recognition and frankness about the limitations of one's own ideas.
Audience: Both Grad & Undergrad

5. Independently locate and engage with the latest relevant empirical and philosophical research.
Audience: Graduate

6. Exhibit substantial synthetic and analytic abilities by considering how an application of modern biotechnology ethically compares to the status quo and to other possible alternatives.
Audience: Graduate

PHILOS 567 – TOPICS IN CONTEMPORARY PHILOSOPHY
3 credits.

One or more specific topics in contemporary philosophy bridging two or more areas such as epistemology, metaphysics, philosophy of mind, philosophy of language, or moral philosophy.
Requisites: Junior standing and completion of 3 credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2021
Learning Outcomes: 1. Think critically about arguments.
Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.
Audience: Undergraduate

3. Communicate precisely and concisely in both writing and speech.
Audience: Undergraduate

PHILOS/MATH 571 – MATHEMATICAL LOGIC
3 credits.

Basics of logic and mathematical proofs; propositional logic; first order logic; undecidability.
Requisites: (MATH 234 or 375), (MATH 320, 340, 341, 345, or 375), and (MATH 341, 375, 421, 467, or 521), graduate/professional standing, or declared in Mathematics VISP (undergraduate or graduate)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Natural Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Recall and state the formal definitions of the first-order logic and their properties used in formal logic (e.g., truth assignments, syntax, semantics, theories, models, etc.).
Audience: Both Grad & Undergrad

2. Use such definitions to argue certain objects do or do not have the condition or property (e.g., decidability, compactness, undecidability, etc.).

Audience: Both Grad & Undergrad

3. Recall and state the standard theorems of logic. (e.g., Soundness and Completeness Theorems, the Compactness Theorem, Godel's Incompleteness Theorem, etc.) and recall the arguments for these theorems and the underlying logic of their proofs.
Audience: Both Grad & Undergrad

4. Use concepts from logic in the context of larger arguments (e.g., nonstandard models of arithmetic, etc.).
Audience: Both Grad & Undergrad

5. Prove or disprove statements related to the above definitions, properties, and theorems using techniques of mathematical argument (direct methods, indirect methods, constructing examples and counterexamples, induction, etc.).
Audience: Both Grad & Undergrad

6. Convey arguments using English and appropriate mathematical terminology, notation and grammar.
Audience: Both Grad & Undergrad

7. Identify applications of course content in areas of modern research.
Audience: Graduate

PHILOS 599 – DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOS 681 – SENIOR HONORS THESIS
1-3 credits.

Individual mentored study for seniors completing theses for honors in the major, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHILOS 682 – SENIOR HONORS THESIS
3 credits.

Individual mentored study for seniors completing theses for honors in the major, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOS 691 – SENIOR THESIS
3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2018

PHILOS 692 – SENIOR THESIS
3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019

PHILOS 698 – DIRECTED STUDY
2-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No

PHILOS 699 – DIRECTED STUDY
2-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOS 701 – READING SEMINAR
3 credits.

An examination of select topics in philosophy.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOS 799 – DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

PHILOS 830 – ADVANCED HISTORY OF PHILOSOPHY
3 credits.

Seminar on the history of philosophy focusing on a period or figure(s).
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

PHILOS 835 – ADVANCED HISTORY OF PHILOSOPHY
3 credits.

Seminar on the history of philosophy focusing on a period or figure(s).
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOS 902 – PROSEMINAR IN PHILOSOPHY
3 credits.

Survey of various texts with an emphasis on close reading and developing writing skills.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHILOS 903 – SEMINAR: EPISTEMOLOGY
3 credits.

Seminar on epistemology.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

PHILOS 904 – TEACHING PHILOSOPHY
1 credit.

Focuses on the conceptual and ethical recognition of the importance of good teaching, and skills and knowledge drawn from up-to-date pedagogical research. Engages with complex questions about the purposes of higher education and your role in it to better understand your own beliefs, attitudes, and values regarding higher education. Use best practices in teaching and learning in a low-stakes environment to practice and receive feedback on your performance of those skills.
Requisites: Declared in a Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Design curriculum for undergraduate courses in their areas of expertise and competence.
Audience: Graduate

2. Foster ethical and professional conduct.
Audience: Graduate

3. Demonstrate high quality undergraduate instruction in their areas of expertise and competence.
Audience: Graduate

PHILOS 911 – SEMINAR-LOGIC
3 credits.

Seminar on logic.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHILOS 916 – SEMINAR-PHILOSOPHY OF LANGUAGE
3 credits.

Seminar on philosophy of language.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOS 920 – SEMINAR-PHILOSOPHY OF SCIENCE:CAUSATION, EXPLANATION & PROBABILITY
3 credits.

Seminar on philosophy of science.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHILOS 941 – SEMINAR-ETHICS
3 credits.

Seminar on ethics.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOS 951 – SEMINAR-PHILOSOPHY OF MIND
3 credits.

Seminar on philosophy of mind.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

PHILOS 955 – SEMINAR SOCIAL AND POLITICAL PHILOSOPHY
3 credits.

Seminar on social and political philosophy.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

PHILOS 960 – METAPHYSICS SEMINAR
3 credits.

Seminar on metaphysics.
Requisites: Declared in Philosophy graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024

PHILOS 990 – RESEARCH AND THESIS
2-9 credits.

Individual mentored study for graduate students completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHILOS 999 – INDEPENDENT WORK
2-9 credits.

Individual mentored study for graduate students, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICAL THERAPY (PHY THER)

PHY THER 500 – FUNCTIONAL NEUROANATOMY FOR PHYSICAL THERAPY
3 credits.

Development, structure, regions and function of the nervous system are covered with the purpose of providing insight into the clinical treatment of common neurological conditions. General principles of the development, connectivity and blood supply of both the central and peripheral nervous system (spinal cord, brainstem, and above the brainstem) are taught.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Summarize the main structures and functions within the major divisions of the nervous system (brain and spinal cord), peripheral and autonomic nervous systems.
Audience: Graduate

2. Describe how regions of the nervous system interact to perform specific functions.
Audience: Graduate

3. Describe the functional consequences of damage to the nervous system (e.g., as in ischemic stroke syndromes).
Audience: Graduate

4. Determine the location of neural damage through a synthesis of signs and symptoms of the functional neuroanatomy.
Audience: Graduate

5. Describe the neural underpinnings of symptoms encountered and addressed through the practice of physical therapy.
Audience: Graduate

PHY THER 501 – ANATOMICAL APPLICATIONS IN PHYSICAL THERAPY
3 credits.

Application of anatomy and palpatory skills in a clinically-oriented environment. Focus is on applied anatomy, kinesiology, posture, movement analysis, medical terminology.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 512 – PRINCIPLES OF PROFESSIONAL PRACTICE AND ADMINISTRATION
3 credits.

Ethics, organization and administration of physical therapy departments. Planning and correlation of hospital and community health services. Study background, organization and responsibilities of health care team members in hospital services and programs.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate systems literacy by producing a brief analytic report that maps the defining features of the four dominant global models (Beveridge, Bismarck, National Health Insurance, Out of Pocket) and benchmarks U.S. system performance against at least three agreed upon indicators (e.g., access, cost, population health outcomes).
Audience: Graduate

2. Analyze how historical policy choices and current economic, political, and social forces shape U.S. care delivery and translate that insight into practice by designing a two step, clinic feasible plan that addresses at least three social drivers of health.
Audience: Graduate

3. Define three performance dimensions - effectiveness, efficiency, and equity - explaining how U.S. financing arrangements (e.g., fee for service, capitation, global budgets, value based payment) shape these dimensions across delivery settings.
Audience: Graduate

4. Apply financial management concepts to a PT service or business.
Audience: Graduate

5. Compare defining features of at least five US health care sectors (e.g., CHCs/safety net, mental health, integrative medicine, long term care, primary care, emergency medicine, public/population health) in terms of patient populations, service providers, financing, and regulation, and evaluate sector specific challenges related to personnel, organization, technology, and financial sustainability.
Audience: Graduate

6. Discuss how historical "siloed" training and delivery structures developed along with how training or service delivery redesign that advances effectiveness, efficiency, and equity through greater interprofessional integration and incorporation of public and population health principles.
Audience: Graduate

7. Demonstrate foundational leadership and management competence by identifying and describing at least three leadership models and key management skills, and developing an organizational structure appropriate for a proposed project or business idea.
Audience: Graduate

8. Explain key concepts in health informatics, health information systems, and emerging technologies (including artificial intelligence and large language models) and demonstrate their relevance to physical therapy practice by accurately describing at least three practical applications of these technologies in day to day PT care (e.g., documentation, decision support, workflow efficiency).
Audience: Graduate

9. Apply principles of quality management - including clinical performance outcomes, quality improvement methods, customer experience metrics,

PHY THER 521 – PHYSICAL AGENTS
2 credits.

The scientific rationale for and the clinical application of thermal, electrical, and mechanical agents in physical therapy practice.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 523 – CARDIOVASCULAR AND PULMONARY ASPECTS OF PHYSICAL THERAPY TREATMENT
3 credits.

Covers: 1) methods used in physical therapy (PT) management of cardiovascular and pulmonary disease, 2) influence of coexisting cardiovascular and pulmonary dysfunction on PT treatment for other primary diagnoses, and 3) screening for occult cardiovascular and pulmonary disease.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHY THER 527 – FOUNDATIONS OF PHYSICAL THERAPY: EXAMINATION AND EVALUATION
4 credits.

Lab-based course that introduces history taking and physical examination skills germane to assessment of patients with orthopedic and neurologic diagnoses in inpatient and outpatient settings. Introduces clinical decision-making and documentation skills with a focus on examination tests and measures. Labs involve the psychomotor application of exam skills. Outside activities with community partners are an integral part of the course.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHY THER 534 – FOUNDATIONS OF PHYSICAL THERAPY INTERVENTION
4 credits.

Examination for exercise design, implementation, and progression. Range of motion, flexibility, joint mobilization, balance/gait training, proprioceptive neuromuscular facilitation, balance, coordination, agility training, body mechanics, postural stabilization, resistive and endurance training, aquatic therapy, relaxation, manual traction, massage. Scientific rationale for treatment interventions.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY THER 538 – INTRODUCTION TO THE PHYSICAL THERAPY PROFESSION AND PROFESSIONALISM
1 credit.

Professional attitudes, beliefs, behaviors relevant to physical therapy practice through the Guide to Physical Therapist Practice, APTA history, Generic Abilities, APTA Code of Ethics, APTA Core Values, PT roles and practice settings, professional autonomy, health care teams, professional learning opportunities.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 539 – PHYSICAL THERAPY EDUCCATION AND LIFESPAN LEARNING ISSUES
1 credit.

Instructional design, learning theories and styles throughout the lifespan, literacy issues, professional presentations and posters, the physical therapist as educator, professional behaviors and emotional preparation for the clinic.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHY THER 540 – PSYCHOSOCIAL ASPECTS OF HEALTH CARE
1 credit.

Professional attitudes, beliefs and behaviors relevant to physical therapy practice. Communication issues related to caregiving, multidisciplinary teams, conflict management, body image, psychosocial aspects of aging, stages of loss, collaborative care, and family-centered care.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY THER 541 – NAVIGATING SOCIAL COMPLEXITIES IN HEALTH CARE
1 credit.

Explore conceptual frameworks that support patient-centered care and critically examine the influence of social factors on health outcomes.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine how personal factors influence professional practice in healthcare contexts.
Audience: Graduate

2. Evaluate how social factors influence health outcomes and inform patient-centered healthcare practice.
Audience: Graduate

3. Translate the needs of a community partner into a working, viable project.
Audience: Graduate

4. Implement a project based on the needs analysis conducted.
Audience: Graduate

5. Value the service-learning experience with the hope of continuing such work as a practice PT.
Audience: Graduate

PHY THER 542 – MEDICAL ETHICS, JURISPRUDENCE, AND HEALTH CARE REGULATIONS
1 credit.

Provides an introduction to medical ethics and jurisprudence as they apply to physical therapy. Includes information on health care regulatory agencies and health care regulations.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 543 – PROFESSIONAL PRACTICE ISSUES IN PHYSICAL THERAPY
1 credit.

The final of six seminar courses, this course will present issues that will assist the physical therapist student transition into the profession during and following their final clinical internships.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY THER 627 – CLINICAL DECISION-MAKING: TISSUE MECHANICS AND ADAPTATIONS
3 credits.

Addresses the cardiovascular, pulmonary, neuromuscular and connective tissue properties and adaptations that influence human movement through the lifespan. Through an understanding of the system integration, gain an appreciation of the physiological complexities underlying human movement.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHY THER 628 – CLINICAL DECISION MAKING: NEUROMUSCULAR MECHANICS AND CONTROL
4 credits.

Addresses the mechanics and control of the neuromuscular and skeletal systems as they relate to human movement. Neural control of movement is discussed in detail with specific emphasis on theories underlying recruitment of muscle in health and disease.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY THER 635 – MOTOR DONTROL DYSFUNCTION : EXAMINATION, DIAGNOSIS, AND MANAGEMENT I
5 credits.

Application of motor control and motor learning principles to the examination, diagnosis, and management of people with movement disorders stemming from CNS pathology. Emphasis on neurological interventions across the lifespan.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHY THER 636 – MOTOR CONTROL DYSFUNCTION: EXAMINATION, DIAGNOSIS, AND MANAGEMENT II
5 credits.

Application of motor control and motor learning principles to the examination, diagnosis, and management of people with movement disorders from spinal cord injuries, PNS dysfunction and progressive disorders of the CNS.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY THER 640 – SCIENTIFIC INQUIRY IN PHYSICAL THERAPY
3 credits.

Focuses on critical evaluation of research findings, a fundamental component of evidence-based practice. Examples from the rehabilitation literature are used to illustrate principles of measurement theory, research design, statistical analysis, and scientific inference.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY THER 641 – CURRENT ISSUES IN REHABILITATION
1 credit.

Focuses on critical evaluation of published research relevant to physical therapy. In seminar format, present the results of original research, and lead discussions of the strengths, weaknesses, and underlying theory of the research.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHY THER 642 – RESEARCH PRACTICUM
1-3 credits.

An in-depth training in various aspects of research (e.g., literature review, understanding of study methodology, data collection, data reduction and analysis, dissemination of findings). Work independently under the supervision of a faculty member from the UW Doctor of Physical Therapy program and will participate in an on-going project for the semester.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHY THER 643 – CURRENT ISSUES IN REHABILITATION RESEARCH II
1 credit.

Focuses on critical evaluation of published research relevant to physical therapy. In seminar format, present the results of original research, and lead discussions of the strengths, weaknesses, and underlying theory of the research.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY THER 664 – CLINICAL MEDICINE I
5 credits.

Establishes the foundation for physical therapy practice across the lifespan. Integrate medical screening, pharmacology, diagnostic imaging, and clinical laboratory science to differentiate systemic pathology from musculoskeletal dysfunction. Utilize case-based reasoning to identify "red flags," manage complex comorbidities, interpret diagnostic tests, and execute professional interdisciplinary referrals to ensure safe patient management.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss life-span pathological processes and their impact on patient management, especially in developing a physical therapist differential diagnosis, prognosis and plan of care.
Audience: Graduate

2. Apply key pharmacology concepts to physical therapy clinical practice.
Audience: Graduate

3. Apply key diagnostic imaging concepts to physical therapy clinical practice.
Audience: Graduate

4. Apply key clinical laboratory test concepts to physical therapy clinical practice.
Audience: Graduate

5. Discriminate appropriate strategies for communicating with patients, family members, caregivers, practitioners, interprofessional team members, consumers, payers, and policymakers.
Audience: Graduate

6. Explain health care delivery models including, but not limited to, patient referral, direct access, primary care, and other models applied in physical therapy practice.
Audience: Graduate

7. Consider multiple sources of information to provide evidence-based recommendations and care.
Audience: Graduate

8. Demonstrate commitment to learning.
Audience: Graduate

9. Demonstrate a growth mindset and concern for the welfare of others.
Audience: Graduate

10. Integrate the information presented.
Audience: Graduate

11. Propose solutions involving systematic planning and a defined value system to solve problems and consistently revise judgments.
Audience: Graduate

PHY THER 665 – CLINICAL MEDICINE II
4 credits.

Common pathological processes, risk factors, clinical manifestations, and pathogenesis of disease for the cardiovascular, pulmonary, hematology, neurology, gastrointestinal, urological, gynecological, musculoskeletal, and rheumatological systems. Medical tests and treatments including medications, diagnostic imaging, and pharmacology principles will also be covered.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe common pathological processes (e.g., cardiovascular, pulmonary, psychological, nephrologic/urologic, neurologic, endocrine, gastrointestinal, musculoskeletal, rheumatologic, or multi-system) and their impact on patient management, especially in developing a physical therapist differential diagnosis, prognosis and plan of care.
Audience: Graduate

2. Integrate related knowledge during simulated clinical experiences.
Audience: Graduate

3. Analyze, integrate and evaluate facts and principles related to a specific patient problem.
Audience: Graduate

4. Demonstrate effective clinical decision-making by applying evidence-based clinical reasoning frameworks to fulfill the professional role of a physical therapist in inpatient and outpatient care settings.
Audience: Graduate

5. Demonstrate commitment to learning.
Audience: Graduate

6. Demonstrate a growth mindset and concern for the welfare of others.
Audience: Graduate

7. Integrate the information presented.
Audience: Graduate

8. Propose solutions involving systematic planning and a defined value system to solve problems and consistently revise judgments.
Audience: Graduate

PHY THER 668 – HEALTH PROMOTION AND WELLNESS
2 credits.

Physical, psychological, spiritual, social, emotional, intellectual and vocational aspects of wellness. The physical therapist's role in primary, secondary and tertiary prevention; health promotion, and individual and community screening activities for wellness/fitness; and safety and environmental considerations for health and wellness.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 675 – OTHOTICS: APPLICATIONS IN PHYSICAL THERAPY PRACTICE
2 credits.

Provides the the cognitive, affective and psychomotor skills for efficacious examination/evaluation and treatment of patients with conditions requiring orthotic, protective and supportive devices. Specific orthotic topics include: material technology; biomechanics of orthoses; orthotic design and fabrication principles, lower limb orthoses (LLO); spinal orthoses (SO); upper limb orthoses (ULO); and wheelchair seating and propulsion. Provides the foundation for clinical applications in the musculoskeletal (PHY THER 676/677) and neuromuscular clinical tracts (PHY THER 635/636).
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 676 – MUSCULOSKELETAL DYSFUNCTION : EXAMINATION, DIAGNOSIS, & MANAGEMENT I
5 credits.

Provides the physical therapy student with the cognitive, affective, and psychomotor knowledge for effective examination, evaluation, diagnosis and management of patients/clients of all ages with various musculoskeletal dysfunctions related specifically to the spine.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHY THER 677 – MUSCULOSKELETAL DYSFUNCTION : EXAMINATION, DIAGNOSIS, & MANAGEMENT II
5 credits.

Provides the physical therapy student with the cognitive, affective, and psychomotor knowledge for effective examination, evaluation, diagnosis and management of patients/clients of all ages with various musculoskeletal dysfunctions related specifically to the extremities.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY THER 678 – PHYSICAL THERAPY MANAGEMENT OF INTEGUMENT CONDITIONS
1 credit.

Provides the cognitive, affective and psychomotor skills for efficacious examination/evaluation and treatment of specific integument system conditions. Topics include the management of patients/clients with wounds, burn, frostbite, insensate and/or diseased integument. Functional training in self-care and home management including activities of daily living and instrumental activities of daily living, as well as in the context of patients with specific integument conditions. Specific wound topics include: infection control in the health care environment, classification of wounds, examination and physical therapy and medical management of persons with wounds. Specific burn topics include: epidemiology of thermal injuries; classification of burn depth; determination of percentage burn; physiological effects of burn by body system; interdisciplinary medical management and physical therapy management for persons with burns/frostbite.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 679 – PROSTHETICS: APPLICATIONS IN PHYSICAL THERAPY PRACTICE
1 credit.

Provides the cognitive, affective and psychomotor skills for efficacious examination/evaluation and treatment of patients/clients with amputation. Course topics include the management of patients/clients with congenital and/or acquired amputation and its subsequent prosthetic management. Functional training in self-care and home management including activities of daily living (ADLs) and instrumental activities of daily living (IADLs), as well as functional training in work (job/school/play) are covered in the context of patients with limb loss.
Requisites: PHY THER 676 and PHY THER 677
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 700 – CLINICAL INTERNSHIP I
2 credits.

80-hour physical therapy internship in a pre-determined clinical environment.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY THER 701 – CLINICAL INTERNSHIP II
4 credits.

160-hour physical therapy internship in a predetermined clinical environment.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 702 – CLINICAL INTERNSHIP III
9 credits.

Nine-week physical therapy internship in a pre-determined clinical environment.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 703 – CLINICAL INTERNSHIP IV
9 credits.

Nine-week physical therapy internship in a pre-determined clinical environment.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHY THER 704 – CLINICAL INTERNSHIP V
4-9 credits.

Physical therapy internship in a pre-determined clinical environment.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 1 number of completions
Last Taught: Fall 2025

PHY THER 705 – CLINICAL INTERNSHIP VI
9 credits.

Nine-week physical therapy internship in a pre-determined clinical environment.
Requisites: Declared in Doctor of Physical Therapy program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY THER 706 – CLINICAL INTERNSHIP VII
5 credits.

Learning experiences in a clinical setting under the direct guidance of a physical therapist (Clinical Instructor). Ability to perform physical therapy examinations of body structures and functions, and other evaluations, interventions, and outcomes assessed by evaluative tools, such as the Clinical Performance Instrument (CPI).
Requisites: PHY THER 679
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate critical thinking skills by applying clinical decision-making solutions while on their clinical experiences and assessing the appropriateness of their solutions.
Audience: Graduate

2. Apply concrete coursework (didactic) knowledge in an unfamiliar clinical environment and self-assess as well as receive assessment and feedback from the Clinical Instructor.
Audience: Graduate

3. Evaluate information received from the patient examination and establish a diagnosis, prognosis, and intervention with minimal to no assistance from the Clinical Instructor (CI) in simple to somewhat complex cases.
Audience: Graduate

4. Evaluate information received from the patient examination and establish a diagnosis, prognosis, and intervention with complex tasks with minimal to no guidance from the CI.
Audience: Graduate

5. Display professional behaviors commonly seen in a practicing physical therapist.
Audience: Graduate

6. Adapt psychomotor skills to any clinical situation and value feedback given from the CI regarding strategies to improve this.
Audience: Graduate

7. Internalize and verify values of professional behavior demonstrated by the CI and other clinicians.
Audience: Graduate

PHY THER 799 – INDEPENDENT STUDY
1-3 credits.

Course content is designed specifically for the individual student.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICIAN ASSISTANT PROGRAM (PHY ASST)

PHY ASST 550 – FUNDAMENTALS OF CLINICAL MEDICINE
3 credits.

Introduces information fundamental to understanding clinical medicine principles. Topics addressed include select areas of physiology-pathophysiology, pharmacology, laboratory medicine, and common systemic disease processes. There will also be instruction relative to cognitively approaching the patient.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Summer 2026

PHY ASST 601 – CLINICAL MEDICINE I
5 credits.

Covers the knowledge and skills required to diagnose and treat patient health problems. Topics include genomics, neurology, psychiatry, hematology/oncology, endocrinology, ophthalmology, otorhinolaryngology, and dermatology.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Fall 2025

PHY ASST 602 – CLINICAL MEDICINE II
6 credits.

Covers the knowledge and skills required to diagnose and treat patient health problems. Topics addressed include cardiology, pulmonology, nephrology/urology, gastroenterology, rheumatology, geriatrics, and family medicine.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 603 – PEDIATRICS
2 credits.

Examines important aspects of primary care pediatrics including assessment of the child patient, preventive health, and pediatric diseases and conditions. The student will also learn examination techniques specific to the pediatric population.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 610 – CLINICAL PREVENTION AND COMMUNITY PRACTICE I
1 credit.

Addresses the concepts of prevention and population health. Multiple topics will be explored including but not limited to: Health Information Literacy, Immunizations, Nutrition, Exercise, Communication and Counseling Skills, and Integrative Medicine.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Fall 2025

PHY ASST 611 – CLINICAL PREVENTION AND COMMUNITY PRACTICE II
1 credit.

Addresses the concepts of prevention and population health and explores the topics of: health systems/policy, and community aspects of practice. Case examples and community-oriented learning experiences will be incorporated into the course.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 616 – PROFESSIONAL SEMINAR I
1 credit.

Emphasizes an understanding of basic research methodology, project development, collaborative research, and project evaluation.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Summer 2026

PHY ASST 617 – PROFESSIONAL SEMINAR II
1 credit.

Emphasizes medical ethics as well as fundamental principles of evidence-based medicine. Research and statistical concepts are taught within the framework of epidemiologic study to develop skills in evaluating and interpreting the medical literature.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Fall 2025

PHY ASST 618 – PROFESSIONAL SEMINAR III
1 credit.

Emphasizes an understanding of basic research methodology, project development, collaborative research, and project evaluation.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 619 – HISTORY AND PHYSICAL EXAMINATION FOR PHYSICIAN ASSISTANTS
4 credits.

Provides the primary care physician assistants with the knowledge and physical exam skills to evaluate patients in a variety of settings. Normal and pathological physical findings are discussed. Master interview skills and physical exam skills applicable to all patients. Selected physical exam techniques are emphasized.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Summer 2026

PHY ASST 620 – ADVANCED PATIENT EVALUATION I
1 credit.

Advanced physical examination and patient evaluation techniques with an emphasis on the musculoskeletal system; selected physical exam procedures in the complete evaluation of patients; advanced medical interviewing skills.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Fall 2025

PHY ASST 621 – ADVANCED PATIENT EVALUATION IN THE PRIMARY CARE SETTING II
1 credit.

Instruction in advanced skills in history and physical examination including comprehensive patient history and physical examination, focused history with related male genitalia and rectal exams, and focused history with female breast and pelvic exams.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 629 – APPLIED HUMAN ANATOMY FOR PHYSICIAN ASSISTANTS
7 credits.

Gross human anatomy involving complete dissection of the human body. Major topic areas: Thorax; abdomen and pelvis; head and neck; limbs. Focus on anatomical organization of the trunk, head and neck, and limbs. Application of functional anatomical information to clinical practice/problems. Practice in teamwork and teaching.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the anatomical organization of the trunk, head and neck, and limbs.
Audience: Graduate

2. Apply functional anatomical information to clinical practice/problems.
Audience: Graduate

3. Demonstrate teaching skills and the ability to work effectively in a team.

Audience: Graduate

PHY ASST 630 – GYNECOLOGY AND OBSTETRICS FOR PHYSICIAN ASSISTANTS
3 credits.

Foundational concepts in clinical gynecology and obstetrics; physiology of the female reproductive system; pathophysiology of gynecologic conditions including menstrual disorders, infections, neoplasms, breast disorders, and structural abnormalities, with emphasis on diagnosis and treatment. Preventive health and screening guidelines for well-woman care. Overview of obstetrics including routine prenatal care, pregnancy complications, labor and birth, postpartum care, and management of pregnancy loss and termination. Exploration and reflection on broader women's health topics such as ethical considerations, reproductive rights, contraception, trans healthcare, and sexual violence.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate comprehensive knowledge of the anatomy, physiology, and common pathologies of the female reproductive system.
Audience: Graduate

2. Demonstrate comprehensive knowledge to diagnose and manage common health conditions affecting women.
Audience: Graduate

3. Make informed decisions about diagnostic and therapeutic interventions based on evidence-based medicine.
Audience: Graduate

4. Display professional behaviors in alignment with program standards.
Audience: Graduate

PHY ASST 640 – CLINICAL PHARMACOLOGY I
2 credits.

Emphasizes pharmacotherapeutics relative to disease processes of the neurologic, psychiatric, hematologic/oncologic, ophthalmologic, otolaryngologic, endocrinologic, and dermatologic systems. Antimicrobial and pain management principles will also be addressed.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Fall 2025

PHY ASST 641 – CLINICAL PHARMACOLOGY II
2 credits.

Emphasizes pharmacotherapeutics relative to disease processes of the cardiovascular, pulmonary, renal, urologic, gastrointestinal, and rheumatologic systems. Other topics addressed include geriatric pharmacology, pharmacoeconomics, complementary and alternative medicines, and treatment of sexually transmitted infections.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 648 – EMERGENCY MEDICINE
2 credits.

Fundamental concepts related to the provision of emergency medical care and urgent ambulatory care.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 650 – DIAGNOSTIC METHODS I
2 credits.

Primary focus is laboratory medicine assessments and ECG interpretation with additional content in imaging modalities, utilization of survey tools, screening assessments, as well as selected specialized examination techniques.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Fall 2025

PHY ASST 651 – DIAGNOSTIC METHODS II
3 credits.

Primary focus is laboratory medicine assessments, heart sounds interpretation, and imaging modalities.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 660 – CLINICAL SKILLS LABORATORY
1 credit.

Hands-on clinical skill laboratory that includes: dermatologic procedures, splinting, casting, suturing, IV access, venipuncture, injections, joint aspiration/injection, and advanced cardiac life support (ACLS).
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 662 – PREPARATION FOR INTERDISCIPLINARY HEALTH CARE IN BELIZE
1 credit.

Preparation for PHY ASST 663. Examination of important and ever-changing topics related to global healthcare. Focus on the more remote, indigenous populations of Belize, their current healthcare system and their access-to-care. Content relates to historical, social, economic and cultural perspectives of the under-served Belizean populations, as well as medical-related topics from an interdisciplinary perspective. Activities and self-study exercises include team-building and self-reflection exercises. Specific topics will include; Belize anthropology, health care in a resource limiting setting, human trafficking, cervical cancer, etc.
Requisites: Declared in Physician Assistant, Nursing Practice DNP, or Pharmacy Program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Articulate understanding of the historical, societal, economic and cultural perspectives and values of the Belizean population and unique problems that affect this population
Audience: Graduate

2. Demonstrate knowledge of diagnoses and interventions utilized by professionals who work in global, rural, underserved villages in remote areas of Belize
Audience: Graduate

3. Apply their profession's roles and responsibilities to cases that address complex medical and public health issues
Audience: Graduate

4. Compare and contrast the diversity of expertise and skills among participating interprofessional disciplines in a resource-limited setting
Audience: Graduate

5. Describe what it means to be a part of an interdisciplinary team and illustrate how the different professions and systems can complement and facilitate one another in addressing health care needs of an underserved population
Audience: Graduate

6. Explain and apply health inequalities from a global perspective via reflective exercises and facilitated discussion
Audience: Graduate

PHY ASST 663 – INTERDISCIPLINARY FIELD EXPERIENCE IN RURAL BELIZE
1 credit.

One-week service-learning field experience in rural Belize. Provide health care to the more remote, indigenous populations of Belize. Must have a valid passport.
Requisites: PHY ASST 662
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate history and physical exam skills with a culturally sensitive approach that permits accurate diagnostic evaluation
Audience: Graduate

2. Identify predominant cross-cultural and underserved issues in primary care, and appreciate how this knowledge can be utilized in the practice of medicine in the participants' home country
Audience: Graduate

3. Recognize and implement cost-effective approaches to providing health care in a resource-limited setting
Audience: Graduate

4. Demonstrate interdisciplinary team work (communication, negotiation, respect for group dynamics, and conflict resolution) and describe how an interdisciplinary approach to care contributes to improved patient outcomes
Audience: Graduate

5. Examine Belizean culture through rural connections, community interactions, and guided cultural excursions. Discuss this relationship to the concept of Global to Local
Audience: Graduate

6. Discuss the structure of the health care system in Belize from the role of the traditional medicinal healer to the community health worker and primary health care physician
Audience: Graduate

PHY ASST 670 – FUNDAMENTALS OF SURGERY
1 credit.

An introduction to the role of the physician assistant in surgery, fundamental principles of pre-, intra- and post-operative surgical care, operating room aseptic technique, and common strategies to avoid and to treat surgical complications.
Requisites: Declared in Physician Assistant program
Repeatable for Credit: No
Last Taught: Summer 2026

PHY ASST 699 – INDEPENDENT STUDY
1-3 credits.

Directed study projects as arranged with instructor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHY ASST 716 – PROFESSIONAL SEMINAR IV
1 credit.

Emphasis will be on placed on refining the capstone project and writing an initial paper draft. Also includes instructional content on professional issues in preparation for clinical experiences and clinical practice.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHY ASST 717 – PROFESSIONAL SEMINAR AND CAPSTONE I
1 credit.

Emphasis will be placed on completion of capstone projects with preparations for oral and poster presentation of the projects. Also includes instructional content on professional issues in preparation for certification and clinical practice.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHY ASST 718 – PROFESSIONAL SEMINAR AND CAPSTONE II
1 credit.

Emphasis will be placed on preparing poster and lecture presentation for completed capstone projects. Also includes instructional content on professional issues in preparation for certification and clinical practice.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 719 – PHYSICIAN ASSISTANT PRECEPTORSHIP: INPATIENT
2 credits.

Comprehensive clinical experience in an inpatient hospital setting.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the clinical presentations and manifestations of common conditions encountered in hospitalized patients across the following age groups: adults and elderly.
Audience: Graduate

2. Obtain a complete medical history on a hospitalized patient.
Audience: Graduate

3. Obtain a daily medical history on a hospitalized patient.
Audience: Graduate

4. Perform a physical examination on a hospitalized patient.
Audience: Graduate

5. Observe the following technical skills: insertion of an IV, removal of an IV, and advanced line placement (central line, arterial line).
Audience: Graduate

6. Interpret common diagnostic tests used in the evaluation of hospitalized patients.
Audience: Graduate

7. Interpret common imaging studies used in the evaluation of hospitalized patients.
Audience: Graduate

8. Establish rapport with patients and their families.
Audience: Graduate

9. Formulate a differential diagnosis for conditions encountered in an inpatient setting.
Audience: Graduate

10. Formulate appropriate patient care plans.
Audience: Graduate

11. Effectively engage in written communication with members of the healthcare team, ensuring seamless coordination of patient care.
Audience: Graduate

12. Effectively engage in oral communication with members of the healthcare team, ensuring seamless coordination of patient care.
Audience: Graduate

13. Display professional behavior in the medical setting as indicated in the preceptorship evaluation.
Audience: Graduate

PHY ASST 729 – PHYSICIAN ASSISTANT PRECEPTORSHIP: SURGERY
6 credits.

Comprehensive clinical experience in outpatient, inpatient, and operating room settings.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the clinical presentations and manifestations of conditions encountered in adult surgical patients.
Audience: Graduate

2. Obtain a complete medical history.
Audience: Graduate

3. Exhibit proficiency in the surgical management of: pre-operative encounters, intra-operative encounters, post-operative encounters.
Audience: Graduate

4. Perform the following clinical procedures: sterile technique, appropriate wound closure, post-operative wound management.
Audience: Graduate

5. Perform appropriate physical examination with proper technique.
Audience: Graduate

6. Interpret diagnostic testing used in the evaluation of surgical patients.
Audience: Graduate

7. Develop effective communication skills to establish rapport with patients and their families.
Audience: Graduate

8. Provide education to patients on topics such as modifiable risk factors, pre-operative preparation, post-operative management, and lifestyle changes.
Audience: Graduate

9. Formulate a differential diagnosis for conditions encountered in surgical setting.
Audience: Graduate

10. Formulate appropriate diagnostic care plans.
Audience: Graduate

11. Communicate effectively with members of the healthcare team, ensuring seamless coordination of patient care.
Audience: Graduate

12. Display professional behavior in the medical setting as indicated in the preceptorship evaluation.
Audience: Graduate

PHY ASST 739 – PHYSICIAN ASSISTANT PRECEPTORSHIP: FAMILY MEDICINE
6 credits.

Comprehensive clinical experience in a family medicine setting.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the clinical presentations and manifestations of common conditions encountered in family medicine patients across the following age groups: infant, child, adolescent, adult, and elderly.
Audience: Graduate

2. Obtain a complete medical history.
Audience: Graduate

3. Perform a physical examination or the following types of patient encounters: well-infant, well-child, well-adolescent, prenatal, adult preventative, GYN-focused, acute problem-focused, and chronic problem-focused encounters.
Audience: Graduate

4. Perform the following clinical procedures: breast examination, pelvic examination, testicular examination, digital rectal examination, mental health counseling, and substance use disorder evaluation and management.
Audience: Graduate

5. Interpret diagnostic/screening tests used in the evaluation of family medicine patients.
Audience: Graduate

6. Recognize critical findings and abnormalities while interpreting X-rays.
Audience: Graduate

7. Interpret the Patient Health Questionnaire 9.
Audience: Graduate

8. Interpret the General Anxiety Disorder 7.
Audience: Graduate

9. Communicate effectively with patients and their families.
Audience: Graduate

10. Educate patients on topics such as prevention (immunizations, pharmacotherapeutics or lifestyle changes).
Audience: Graduate

11. Formulate a differential diagnosis for conditions encountered in family medicine.
Audience: Graduate

12. Implement appropriate therapeutic patient care plans.
Audience: Graduate

13. Effectively engage in oral communication with members of the healthcare team, ensuring seamless coordination of patient care.
Audience: Graduate

14. Display professional behavior in the medical setting as indicated in the preceptorship evaluation.
Audience: Graduate

PHY ASST 749 – PHYSICIAN ASSISTANT PRECEPTORSHIP: INTERNAL MEDICINE
6 credits.

Comprehensive clinical experience in an internal medicine hospital or clinic setting.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the clinical presentations and manifestations of conditions encountered in internal medicine patients across the following age groups:#adult and elderly.
Audience: Graduate

2. Obtain a complete medical history.
Audience: Graduate

3. Perform a physical examination for the following types of patient encounters: preventative adult, acute-problem focused, chronic-problem focused, and behavioral health.
Audience: Graduate

4. Manage patients with these chronic conditions: hypertension, diabetes, hypercholesterolemia, and depression.
Audience: Graduate

5. Interpret common diagnostic/screening tests and imaging studies used in the evaluation of internal medicine patients, such as the following: administer and interpret the Patient Health Questionnaire 9 and administer and interpret the General Anxiety Disorder 7.
Audience: Graduate

6. Develop effective communication skills to establish rapport with patients and their families.
Audience: Graduate

7. Provide education to patients on topics such as prevention, pharmacotherapeutics, or lifestyle changes.
Audience: Graduate

8. Integrate cultural humility into patient care by acknowledging cultural, linguistic, and health literacy factors.
Audience: Graduate

9. Formulate a differential diagnosis for conditions encountered in internal medicine.
Audience: Graduate

10. Formulate appropriate diagnostic and/or therapeutic patient care plans.
Audience: Graduate

11. Effectively engage in oral communication with members of the healthcare team, ensuring seamless coordination of patient care.
Audience: Graduate

12. Display professional behavior in the medical setting as indicated in the preceptorship evaluation.
Audience: Graduate

PHY ASST 759 – PHYSICIAN ASSISTANT PRECEPTORSHIP: EMERGENCY MEDICINE
6 credits.

Comprehensive clinical experience in an emergency medicine setting.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the clinical presentations and manifestations of conditions encountered in emergency medicine patients across the following age groups: infant, child, adolescent, adult, and elderly.
Audience: Graduate

2. Obtain a complete medical history.
Audience: Graduate

3. Perform a physical examination on the following types of patient encounters: emergent pediatric, emergent adult, emergent behavioral health, emergent women's health.
Audience: Graduate

4. Perform the following technical skills: laceration repair, incision and drainage, and splint placement.
Audience: Graduate

5. Interpret diagnostic tests used in the evaluation of emergency medicine patients, including the following: laboratory and diagnostic tests, X-rays, and 12-lead EKG tests.
Audience: Graduate

6. Communicate effectively with patients and their families.
Audience: Graduate

7. Provide education to patients on topics such as prevention pharmacotherapeutics or lifestyle changes.
Audience: Graduate

8. Integrate cultural humility into patient care by acknowledging cultural, linguistic, and health literacy factors.
Audience: Graduate

9. Formulate a differential diagnosis for common symptoms/conditions encountered in emergency medicine.
Audience: Graduate

10. Formulate appropriate diagnostic and/or therapeutic patient care plan.

Audience: Graduate

11. Effectively engage in oral communication with members of the healthcare team, ensuring seamless coordination of patient care.
Audience: Graduate

12. Display professional behavior in the medical setting as indicated in the preceptorship evaluation.
Audience: Graduate

PHY ASST 765 – PHYSICIAN ASSISTANT PRECEPTORSHIP: PEDIATRICS
2 credits.

Comprehensive clinical experience in a pediatric setting.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Identify the clinical presentations and manifestations of conditions encountered in emergency medicine patients across the following age groups:#infant, child, and adolescent.
Audience: Graduate

2. Interpret diagnostic/screening tests and imaging studies used in the evaluation of pediatric patients.
Audience: Graduate

3. Communicate effectively to establish rapport with patients and their families.
Audience: Graduate

4. Provide education to patients on topics such as prevention (immunizations, pharmacotherapeutics or lifestyle changes).
Audience: Graduate

5. Formulate a differential diagnosis for conditions encountered in pediatrics.
Audience: Graduate

6. Implement appropriate diagnostic patient care plans for pediatric patients.
Audience: Graduate

7. Effectively engage in oral communication with members of the healthcare team, ensuring seamless coordination of patient care.
Audience: Graduate

8. Display professional behavior in a pediatric setting as indicated in the preceptorship evaluation.
Audience: Graduate

9. Perform a physical examination for the following types of patient encounters: acute problem-focused pediatric encounter and chronic problem-focused pediatric encounters.
Audience: Graduate

10. Obtain a complete medical history.
Audience: Graduate

PHY ASST 769 – PHYSICIAN ASSISTANT PRECEPTORSHIP: ELECTIVE
8 credits.

A 2 month intensive clinical learning experience with an emphasis in an elective specialty discipline and taking place in a variety of off-campus clinical settings under the direction of a supervising physician preceptor. Elective specialty disciplines include but are not limited to family medicine, internal medicine, emergency medicine, general surgery, cardiothoracic surgery, orthopedic surgery, ENT, dermatology, pediatrics, women's health and psychiatry/behavioral health.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHY ASST 779 – PHYSICIAN ASSISTANT PRECEPTORSHIP: OBSTETRICS AND GYNECOLOGY
2 credits.

Comprehensive clinical experience in an GYN setting.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Identify the clinical presentations and manifestations of conditions encountered in emergency medicine patients across the following age groups: adolescent, and adult.
Audience: Graduate

2. Obtain a complete medical history.
Audience: Graduate

3. Perform a physical examination for the following types of patient encounters: prenatal care encounters, GYN-focused acute encounter, and GYN-focused chronic encounter.
Audience: Graduate

4. Perform the following clinical procedures: breast examination and pelvic examination.
Audience: Graduate

5. Interpret diagnostic/screening tests and imaging studies used in the evaluation of women's health patients.
Audience: Graduate

6. Communicate effectively with patients and their families.
Audience: Graduate

7. Provides education to patients on topics such as prevention (immunizations, pharmacotherapeutics or lifestyle changes).
Audience: Graduate

8. Formulate a differential diagnosis for conditions encountered in OB/GYN.
Audience: Graduate

9. Implement appropriate therapeutic patient care plans.
Audience: Graduate

10. Effectively engage in oral communication with members of the healthcare team, ensuring seamless coordination of patient care.
Audience: Graduate

11. Displays professional behavior in an OB/GYN setting as indicated in the preceptorship evaluation.
Audience: Graduate

PHY ASST 787 – SEMINAR ON INTEGRATING PUBLIC HEALTH INTO PA PRACTICE
1 credit.

Provides direction to Physician Assistant (PA) Path of Distinction (PoD) students for the PoD capstone project and to provide an overview of public health, some of its current issues and tools to help become engaged in the communities in which clinical experiences and practice takes place.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHY ASST 789 – PHYSICIAN ASSISTANT PRECEPTORSHIP: BEHAVIORAL HEALTH
2 credits.

Comprehensive clinical experience in a behavioral health setting.
Requisites: Declared in Physician Assistant program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Identify the clinical presentations and manifestations of conditions encountered in behavioral health patients.
Audience: Graduate

2. Obtain a complete medical history.
Audience: Graduate

3. Interpret screening tests used in the evaluation of patients with behavioral health concerns.
Audience: Graduate

4. Effectively exchange information and collaborate with patients.
Audience: Graduate

5. Adapt education and counseling to the individual.
Audience: Graduate

6. Formulate a differential diagnosis for conditions encountered in behavioral health.
Audience: Graduate

7. Implement appropriate diagnostic patient care plans.
Audience: Graduate

8. Effectively engage in oral communication with members of the healthcare team, ensuring seamless coordination of patient care.
Audience: Graduate

9. Display professional behavior in a behavioral health setting as indicated in the preceptorship evaluation.
Audience: Graduate

PHYSICS (PHYSICS)

PHYSICS 103 – GENERAL PHYSICS
4 credits.

Introduction to physics at the non-calculus level. Principles of mechanics, heat, and waves, with applications to a number of different fields. Not recommended for students in the physical sciences and engineering.
Requisites: MATH 112, 113, 114, 171, placement into MATH 211 or 221, or special student standing. Not open to students with credit for PHYSICS 201, 207, or 247.
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe an object's motion using position, velocity, acceleration. Predict changes in motion using kinematic equations.
Audience: Undergraduate

2. Sum forces on an object (mathematically and graphically) to solve for equilibrium and/or predict the object's acceleration and motion using Newton's laws.
Audience: Undergraduate

3. Predict changes in motion of multi-object systems using conserved quantities (e.g. momentum, energy).
Audience: Undergraduate

4. Describe the periodic (repeating) phenomena using amplitude, frequency, period, and wavelength to predict system behavior.
Audience: Undergraduate

5. Calculate equilibrium pressure, velocity, and flow rate fluids using Newton's laws and conservation principles.
Audience: Undergraduate

6. Determine physical properties of gases using the ideal gas law and principles of heat transfer. Calculate changes in work, heat, and energy resulting from thermodynamic processes and heat engines.
Audience: Undergraduate

7. Design and analyze laboratory experiments using concepts from this course.
Audience: Undergraduate

8. Connect concepts from this course to underlying physical phenomena in other fields, particularly the life sciences.
Audience: Undergraduate

PHYSICS 104 – GENERAL PHYSICS
4 credits.

Continuation of PHYSICS 103. Principles of electricity and magnetism, light, optics, and modern physics, with applications to a number of different fields. Not recommended for students in the physical sciences and engineering.
Requisites: PHYSICS 103, 201, 207, 247, E M A 201 or special student standing. Not open to students with credit for PHYSICS 202, 208, or 248.
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Calculate electrostatic force vectors between individual electric charges. Calculate the resulting position, distribution, and motion of the charges.
Audience: Undergraduate

2. Calculate the electric field vectors created by systems of electric charges and the forces resulting from these fields.
Audience: Undergraduate

3. Determine how electric potential energy of and work done on an electric charge changes as it moves through an electric field using electric potential (voltage).
Audience: Undergraduate

4. Determine voltage changes across components and flow of electric currents through circuits of conducting wires, resistors, and capacitors.
Audience: Undergraduate

5. Calculate magnetic field vectors created by moving electric charges. Calculate the effects of magnetic fields on external moving charges. Calculate inductive effects due to the relationship between magnetic fields and electric forces.
Audience: Undergraduate

6. Calculate the effects of reflection and refraction, of interference and diffraction, and of mirrors and lenses.
Audience: Undergraduate

7. Calculate atomic and nuclear phenomena (e.g. atomic spectra, radioactivity) using the basic concepts of quantum mechanics.
Audience: Undergraduate

8. Design and analyze laboratory experiments using concepts from this course.
Audience: Undergraduate

PHYSICS 106 – PHYSICS OF SPORTS
3 credits.

A tenth of a second, a single inch, or a slightly different angle can make all the difference in a sporting event. Application of physical principles to competitive sport, leading to a better understanding of performances in such sports as track and field, cycling, archery, golf, football and basketball.
Requisites: Satisfied Quantitative Reasoning (QR) A. Not open to students with credit for PHYSICS 103, 201, 207, or 247.
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain how sport performance is governed by universal physical principles.
Audience: Undergraduate

2. Solve problems relevant to sport performance proficiently regarding both quantitative and qualitive applications of these physical principles.
Audience: Undergraduate

3. Explain the significance of sport-related measurements and observations made in the presence of statistical and systematic uncertainties.
Audience: Undergraduate

4. Communicate effectively with scientific peers and the public regarding physical principles and measurements and observations relevant to sport performance.
Audience: Undergraduate

5. Be able to continue to educate themselves regarding the physical principles relevant to sport performance after completion of the course.
Audience: Undergraduate

PHYSICS 107 – THE IDEAS OF MODERN PHYSICS
3 credits.

The twentieth-century physical world picture and its origins. Selected topics in classical physics, relativity, and the quantum theory with emphasis on the meaning of basic concepts and their broader implications, rather than practical applications.
Requisites: Satisfied Quantitative Reasoning (QR) A or special student standing
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply the ideas of quantum mechanics to describe properties of atoms, the nature of solids that lead to solar cells and transistors, and the premises of quantum computing.
Audience: Undergraduate

2. Calculate time dilation, length contraction, and relativistic mass using the basics of special relativity.
Audience: Undergraduate

3. Explain the nature of gravity, gravitational lensing, and gravitational waves using the basics of general relativity.
Audience: Undergraduate

4. List the four fundamental forces, the interaction of particles associated with each, the three types of matter particles, and the three generations.
Audience: Undergraduate

5. Describe the big bang, the expansion of the universe, and the cosmological constant using the basics of modern cosmology.
Audience: Undergraduate

6. Describe the experimental indications of dark matter and dark energy.
Audience: Undergraduate

7. Calculate the interaction of photons and matter using the ideas of quantum mechanics.
Audience: Undergraduate

8. Identify concepts in the previous learning outcomes that underlie scientific advances in media reports.
Audience: Undergraduate

PHYSICS 109 — PHYSICS IN THE ARTS
3 credits.

The nature of sound and sound perception; fundamentals of harmony, musical scales, and musical instruments. Studies of light including lenses, photography, color perception, and color mixing.
Requisites: Satisfied Quantitative Reasoning (QR) A or special student standing. Not open to students with credit for PHYSICS 371.
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply concepts of light and sound to solve physics problems using only algebra, not calculus.
Audience: Undergraduate

2. Identify in a text question which parameters are known or given, and which parameters are unknown and must be calculated.
Audience: Undergraduate

3. Translate from text to formulae when a text problem is given.
Audience: Undergraduate

4. Collect and analyze laboratory data from physics experiments on light and sound.
Audience: Undergraduate

5. Identify the physics principles of light and sound observable all around us in everyday life.
Audience: Undergraduate

PHYSICS 115 — ENERGY AND CLIMATE
3 credits.

Introduction to energy, focusing on energy sources and their impacts on humans and the environment, particularly through climate change. Develop basic physics skills to form opinions on energy-related issues affecting the world as well as your own use of energy. Apply the physical principles of mechanics, heat, electricity, and atomic nuclei to various energy sources (fossil fuels, renewables, and nuclear) and their impacts.
Requisites: Satisfied Quantitative Reasoning (QR) A. Not open to students with credit for PHYSICS 103, 201, 207, or 247.
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Qualitatively describe and quantitatively analyze the physics behind energy technologies and their impacts, including climate change
Audience: Undergraduate

2. Apply foundational physics concepts to solve quantitative problems regarding energy use in society
Audience: Undergraduate

3. Critically assess and discuss current issues in energy and climate, and how these issues are reported in the news
Audience: Undergraduate

PHYSICS 120 — SPECIAL TOPICS IN PHYSICS
1-3 credits.

Explores topics in Physics at the elementary undergraduate level.
Requisites: Satisfied Quantitative Reasoning (QR) A
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Use physics concepts to explain the physical phenomena related to the topic of this course.
Audience: Undergraduate

2. Apply algebraic models of physics theories.
Audience: Undergraduate

3. Identify physical principles in the context of the student experience.
Audience: Undergraduate

PHYSICS 198 – DIRECTED STUDY
1-3 credits.

Introductory-level mentored research project in physics.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS 199 – DIRECTED STUDY
1-3 credits.

Introductory-level mentored research project in physics.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS 201 – GENERAL PHYSICS
5 credits.

Calculus-based introduction to physics intended for engineering students. Mechanics: kinematics, statics, dynamics; energy and momentum.
Requisites: MATH 217 or 221. Not open to students with credit for PHYSICS 207 or 247.
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe an object's motion using kinematic quantities (position, velocity, acceleration). Predict how motion will change using kinematic equations.
Audience: Undergraduate

2. Sum forces on an object (mathematically and graphically) to solve for equilibrium and/or predict the object's acceleration and motion using Newton's laws.
Audience: Undergraduate

3. Predict changes in motion of multi-object systems using conserved quantities (e.g., momentum or energy).
Audience: Undergraduate

4. Calculate equilibrium pressure, velocity, and flow rate fluids using Newton's laws and conservation principles.
Audience: Undergraduate

5. Perform measurements and analyze results in laboratory experiments using concepts from this course.
Audience: Undergraduate

PHYSICS 202 – GENERAL PHYSICS
5 credits.

Calculus-based introduction to physics intended for engineering students. Electricity, magnetism, light, and sound.
Requisites: (PHYSICS 103, 201, 207, 247, or E M A 201) and (MATH 217 or 221). Not open to students with credit for PHYSICS 208 or 248.
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Calculate electrostatic force vectors between individual electric charges. Predict the resulting position, distribution, and motion of the charges.
Audience: Undergraduate

2. Calculate the electric field vectors created by systems of electric charges and the forces resulting from these fields.
Audience: Undergraduate

3. Determine how electric potential energy of and work done on an electric charge changes as it moves through an electric field using electric potential (voltage).
Audience: Undergraduate

4. Determine voltage changes across components and flow of electric currents through circuits of conducting wires, resistors, capacitors, and inductors.
Audience: Undergraduate

5. Calculate magnetic field vectors created by moving electric charges. Calculate the effects of magnetic fields on external moving charges. Calculate inductive effects due to the relationship between magnetic fields and electric forces.
Audience: Undergraduate

6. Calculate the effects of reflection and refraction, of interference and diffraction, and of mirrors and lenses.
Audience: Undergraduate

7. Describe the periodic phenomena of electromagnetic waves using amplitude, frequency, period, and wavelength to predict system behavior.
Audience: Undergraduate

8. Perform measurements and analyze results in laboratory experiments using concepts from this course.
Audience: Undergraduate

PHYSICS 205 – MODERN PHYSICS FOR ENGINEERS
3 credits.

Introduction to atomic, solid state, and nuclear physics.
Requisites: PHYSICS 202, 208 or 248. Not open to students with credit for PHYSICS 241, 244, or 249.
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021

PHYSICS 206 – SPECIAL TOPICS IN PHYSICS
1-5 credits.

Special topics in physics at the intermediate undergraduate level.
Requisites: (PHYSICS 103, 201, 207 or 247) and (MATH 217 or 221)
Course Designation: Core GenEd - Natural Science & Wellness
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022
Learning Outcomes: 1. Use physics concepts to explain the physical phenomena related to the topic of this course.
Audience: Undergraduate

2. Apply algebra- and calculus-based models of physics theories.
Audience: Undergraduate

3. Identify physical principles in the context of the student experience.
Audience: Undergraduate

PHYSICS 207 – GENERAL PHYSICS
5 credits.

Calculus-based introduction to physics intended for students majoring in biological sciences. Mechanics: kinematics, statics, dynamics; energy and momentum. Heat and sound.
Requisites: MATH 217 or 221. Not open to students with credit for PHYSICS 201 or 247.
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS 208 – GENERAL PHYSICS
5 credits.

Continuation of PHYSICS 207: calculus-based introduction to physics intended for students majoring in biological sciences. Electricity, magnetism, light, and modern physics.
Requisites: PHYSICS 201, 207, 247, E M A 201, or (PHYSICS 103 and MATH 217 or 221). Not open to students with credit for PHYSICS 202 or 248.
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Calculate electrostatic force vectors between individual electric charges. Predict the resulting position, distribution, and motion of the charges.
Audience: Undergraduate

2. Calculate the electric field vectors created by systems of electric charges and the forces resulting from these fields.
Audience: Undergraduate

3. Determine how electric potential energy of and work done on an electric charge changes as it moves through an electric field using electric potential (voltage).
Audience: Undergraduate

4. Determine voltage changes across components and flow of electric currents through circuits of conducting wires, resistors, and capacitors.
Audience: Undergraduate

5. Calculate magnetic field vectors created by moving electric charges. Calculate the effects of magnetic fields on external moving charges. Calculate inductive effects resulting from the relationship between magnetic fields and electric forces.
Audience: Undergraduate

6. Calculate the effects of reflection and refraction, interference and diffraction, and the operation of mirrors and lenses.
Audience: Undergraduate

7. Apply basic concepts of quantum mechanics to calculate atomic and nuclear phenomena (e.g. atomic spectra, radioactivity).
Audience: Undergraduate

8. Perform measurements and analyze results in laboratory experiments using concepts from this course.
Audience: Undergraduate

PHYSICS/E C E 235 – INTRODUCTION TO SOLID STATE ELECTRONICS
3 credits.

An introduction to the physical principles underlying solid-state electronic and photonic devices, including elements of quantum mechanics, crystal structure, semiconductor band theory, carrier statistics, and band diagrams. Offers examples of modern semiconductor structures. Prior experience with MATLAB [such as E C E 203] is strongly encouraged but not required.
Requisites: MATH 222 and (PHYSICS 202, 208, or 248), or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS 241 – INTRODUCTION TO MODERN PHYSICS
3 credits.

Kinetic theory; relativity; experimental origin of quantum theory; atomic structure and spectral lines; topics in solid state, nuclear and particle physics.
Requisites: (PHYSICS 202, 208, or 248) and MATH 222. Not open to students with credit for PHYSICS 205, 244, or 249.
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain the fundamental origins of quantum mechanics, including the photoelectric effect, black body radiation, and particle-wave duality.
Audience: Undergraduate

2. Use qualitative, dimensional, and approximate techniques (e.g. uncertainty principle) to estimate quantum mechanical properties.
Audience: Undergraduate

3. Calculate properties of a quantum particle in a box, harmonic oscillator, and hydrogen atom.
Audience: Undergraduate

4. Calculate the interaction of radiation with quantum systems including atomic transitions and lasers.
Audience: Undergraduate

5. Calculate basic spin states of quantum particles, and interactions between spins.
Audience: Undergraduate

6. Calculate the motion, energy, and momentum of relativistic particles and transform these between frames of reference.
Audience: Undergraduate

7. Calculate properties of the nucleus, including internal energy states, excitations, radioactive decay, and nuclear reactions.
Audience: Undergraduate

8. Calculate basic decay and interaction properties of particles, using conservation laws.
Audience: Undergraduate

PHYSICS 247 – A MODERN INTRODUCTION TO PHYSICS
5 credits.

Calculus-based introduction to physics intended for Physics, AMEP, and Astronomy-Physics majors. Mechanics, waves, thermodynamics and statistical mechanics, topics in modern physics; with computation. A more mathematically rigorous and in-depth introduction to physics than the other introductory physics sequences.
Requisites: MATH 222 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply conservation laws (linear momentum, angular momentum, energy) to systems of particles to understand and predict their motion using both classical and relativistic formulations.
Audience: Undergraduate

2. Understand the relationship between forces and motion by both calculating the motion of an object given the forces acting on it and also calculating the forces acting on an object given its motion.
Audience: Undergraduate

3. Calculate the motion of objects under various constraints (linear motion, circular motion, coupled objects, oscillation) using both classical kinematics and special relativity.
Audience: Undergraduate

4. Translate back and forth between physical concepts and the mathematics describing the motion of objects.
Audience: Undergraduate

5. Perform measurements and analyze results in laboratory experiments using concepts from this course.
Audience: Undergraduate

PHYSICS 248 – A MODERN INTRODUCTION TO PHYSICS
5 credits.

Continuation of PHYSICS 247. Electromagnetism, circuits, optics, additional topics in modern physics; with computation.
Requisites: PHYSICS 247 and (MATH 234 or concurrent enrollment or MATH 376 or concurrent enrollment)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply Maxwell's equations to predict the behavior of charged particles, electrical and magnetic fields, and electromagnetic waves. Calculate electrical currents, electrical potential, field strengths, and electromagnetic forces in a given system.
Audience: Undergraduate

2. Apply properties of electromagnetic waves to calculate the effects of geometric and physical optics.
Audience: Undergraduate

3. Use the Schrodinger equation and associated wavefunction solutions to predict the behavior of particles in quantum systems.
Audience: Undergraduate

4. Explain the historical development of quantum mechanics, including the experiments that led to the concept of wave-particle duality.
Audience: Undergraduate

5. Perform measurements and analyze results in laboratory experiments using concepts from this course.
Audience: Undergraduate

PHYSICS 249 – A MODERN INTRODUCTION TO PHYSICS
4 credits.

Continuation of PHYSICS 248. Modern physics: introduction to quantum mechanics, topics from nuclear and particle physics, condensed matter physics, and atomic physics. Three lectures and one discussion per week.
Requisites: PHYSICS 248
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Determine time-dependent voltage changes across components and flow of alternating electric currents through circuits. Describe the foundations of modern electronics.
Audience: Undergraduate

2. Determine statistical properties of gases using the ideal gas law and principles of heat transfer. Calculate changes in work, heat, entropy, and energy resulting from thermodynamic processes.
Audience: Undergraduate

3. Explain the foundational concepts from modern fields of physics such as atomic physics, solid state physics, nuclear physics, particle physics, condensed matter physics, and astrophysics. Perform elementary calculations related to these fields.
Audience: Undergraduate

4. Apply computational skills that are commonly used in physics research.
Audience: Undergraduate

PHYSICS/MED PHYS 265 – INTRODUCTION TO MEDICAL PHYSICS
2 credits.

A general interest survey that introduces the principles and applications of medical physics. Topics include biomechanics, energy usage and temperature regulation, pressure, sound and hearing, ultrasound, electricity in the body, optics and the eye, ionizing radiation in diagnosis and therapy, radiobiology, and nuclear medicine.
Requisites: PHYSICS 104, 202, 208, or 248
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply physics concepts, such as force, energy, and pressure, to the study of human physiology
Audience: Undergraduate

2. Describe the relevance of physics concepts to the etiology of major disease, such as heart failure, sudden cardiac death, obstructive lung disease, and nerve conduction disorders
Audience: Undergraduate

3. Explain the principles of medical imaging based on x-rays, gamma rays, sound, and other physical phenomena
Audience: Undergraduate

4. Understand the principles of radiobiology that underlie radiation sickness and radiation therapy
Audience: Undergraduate

PHYSICS 298 – DIRECTED STUDY
1-3 credits.

Intermediate-level mentored research project in physics.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS 299 – DIRECTED STUDY
1-3 credits.

Intermediate-level mentored research project in physics.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS 301 – PHYSICS TODAY
1 credit.

A series of weekly presentations and discussions of current research topics in physics, by scientists directly involved in those studies. Provides undergraduates with access to the topics and excitement of the research frontier in a manner not possible in normal subject courses.
Requisites: PHYSICS 202 or concurrent enrollment, PHYSICS 208 or concurrent enrollment, or PHYSICS 248 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe open questions in current physics research.
Audience: Undergraduate

2. Prepare questions for research presentations.
Audience: Undergraduate

3. Summarize the material covered in a research presentation in a concise, clear manner.
Audience: Undergraduate

PHYSICS 307 – INTERMEDIATE LABORATORY-MECHANICS AND MODERN PHYSICS
2 credits.

Experiments in modern physics, with discussion of statistical uncertainties and error analysis. Propagation of error. Available labs include gamma-ray spectroscopy, X-ray physics and diffraction, blackbody radiation, and Cavendish measurement of the gravitational constant G.
Requisites: PHYSICS 202, 208, 248 or graduate/professional standing.
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Learn how to keep a lab notebook, a laboratory skill essential to the study of physics.
Audience: Undergraduate

2. Perform quantitative measurements of physical phenomena, and understand the statistical significance of observations made in the presence of statistical and systematic uncertainties.
Audience: Undergraduate

3. Become proficient in using common research-grade laboratory equipment.
Audience: Undergraduate

4. Understand basic physical principles, as revealed in laboratory experiments.
Audience: Undergraduate

5. Gain an appreciation for, and an understanding of, scientific method.
Audience: Undergraduate

PHYSICS 311 – MECHANICS
3 credits.

Origin and development of classical mechanics; mathematical techniques, especially vector analysis; conservation laws and their relation to symmetry principles; brief introduction to orbit theory and rigid-body dynamics; accelerated coordinate systems; introduction to the generalized-coordinate formalisms of Lagrange and Hamilton.
Requisites: (PHYSICS 202, 208, or 248) and (MATH 234, 321, or 376), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use Newton's laws of motion to solve advanced problems involving the dynamic motion of classical mechanical systems.
Audience: Undergraduate

2. Apply differential equations and other advanced mathematics to solve dynamic motion of classical mechanical systems.
Audience: Undergraduate

3. Analyze and solve dynamics problems using conservation of energy and linear and angular momentum.
Audience: Undergraduate

4. Calculate properties and behaviors of rigid body motion and motion of continuous media.
Audience: Undergraduate

5. Derive the equations of motion for complicated mechanical systems using the Lagrangian and Hamiltonian formulations of classical mechanics.
Audience: Undergraduate

6. Apply the Lagrangian formulation to analyze the motion of constrained systems.
Audience: Undergraduate

PHYSICS 321 – ELECTRIC CIRCUITS AND ELECTRONICS
4 credits.

Direct current circuits, circuit theorems, alternating current circuits, transients, non-sinusoidal sources, Fourier analysis, characteristics of semiconductor devices, typical electronic circuits, feedback, non-linear circuits; digital and logic circuits.
Requisites: PHYSICS 202, 208, 248 or graduate/professional standing.
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Calculate equivalent resistance in a linear resistor network and apply Thevenin's theorem.
Audience: Undergraduate

2. Calculate and measure the linear AC response of circuits of resistors, capacitors, and inductors.
Audience: Undergraduate

3. Model and measure basic properties of P-N junction diodes, bipolar and field effect transistors, and circuits based on them.
Audience: Undergraduate

4. Calculate, design, and measure basic properties of operational amplifiers and circuits based on them.
Audience: Undergraduate

5. Analyze and build circuits using Boolean logic.
Audience: Undergraduate

6. Record and organize observations, data, and results in preparation for keeping a laboratory notebook.
Audience: Undergraduate

PHYSICS 322 – ELECTROMAGNETIC FIELDS
3 credits.

Electrostatic fields, capacitance, multi-pole expansion, dielectric theory; magnetostatics; electromagnetic induction; magnetic properties of matter; Maxwell's equations and electromagnetic waves; relativity and electromagnetism.
Requisites: (PHYSICS 202, 208 or 248) and (MATH 234, 321 or 376), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Calculate the electric field, electric potential, and total energy directly from charge distributions.
Audience: Undergraduate

2. Calculate the static properties of currents, magnetic fields, and magnetic vector potentials.
Audience: Undergraduate

3. Apply vector algebra and vector calculus to calculate electric and magnetic fields.
Audience: Undergraduate

4. Calculate electric potential distributions using Laplace's equation, and apply method of images, separation of variables, and multipole expansions.
Audience: Undergraduate

5. Calculate the static electromagnetic response of continuous media.
Audience: Undergraduate

6. Calculate properties of electric and magnetic fields changing in time.
Audience: Undergraduate

7. Use Maxwell's equations to calculate the properties of electromagnetic waves.
Audience: Undergraduate

PHYSICS 323 – ELECTROMAGNETIC FIELDS
3 credits.

Special relativity, electromagnetic momentum, electromagnetic waves: propagation, interference, scattering, reflection and refraction at a dielectric interface, waves in a conductor. Wave packets and group velocity, dispersion. Waveguides and transmission lines. Retarded potentials. Radiation.
Requisites: PHYSICS 322 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Be able to use the principles of special relativity to transform electric and magnetic fields between reference frames.
Audience: Undergraduate

2. Be able to use the Maxwell stress tensor to calculate electromagnetic forces and momentum density.
Audience: Undergraduate

3. Be able to calculate the properties of electromagnetic waves reflecting from surfaces.
Audience: Undergraduate

4. Be able to calculate the characteristics of guided waves.
Audience: Undergraduate

5. Be able to use electromagnetic principles to calculate the propagation of electromagnetic waves in conductors.
Audience: Undergraduate

6. Be able to calculate radiation patterns from dynamic charges and currents.
Audience: Undergraduate

7. Be able to use the principles of retardation to calculate Liénard-Wiechert potentials, and from them calculate radiation fields
Audience: Undergraduate

PHYSICS 325 – OPTICS
4 credits.

Classical and modern optics, including imaging, polarization optics, optical telescopes, optical microscopes, interference and interferometers, optical fibers and fiber-optic communication, optical resonators, lasers, optical modulators, introduction to quantum and nonlinear optics. Concepts covered in lecture reinforced by weekly laboratory experiments.
Requisites: (PHYSICS 202, 208, or 248) and (PHYSICS 322 or concurrent enrollment), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Be able design and analyze an imaging instrument involving two or more optical elements including mirrors and lenses.
Audience: Undergraduate

2. Be able to quantitatively analyze images obtained from an optical microscope using physics calculation software.
Audience: Undergraduate

3. Be able to design, construct, and evaluate an optical telescope.
Audience: Undergraduate

4. Be able to use the principles of Fourier optics and interference to design and analyze interferometric instruments, including a Michelson interferometer and a grating spectrometer, and use these instruments to characterize light sources
Audience: Undergraduate

5. Be able to apply the fundamental properties of electromagnetic waves to determine the behavior of fiber optic combinations
Audience: Undergraduate

6. Be able to calculate parameters of a functioning laser, and design, align, and operate a diode pumped solid-state laser.
Audience: Undergraduate

7. Be able to apply the principles of refraction modulation to calculate the behavior of acousto-optic and electro-optic modulators.
Audience: Undergraduate

PHYSICS 361 – MACHINE LEARNING IN PHYSICS
3 credits.

A detailed introduction to the use of machine learning techniques in physics. Topics will include basics of probability theory and statistics, basics of function fitting and parameter inference, basics of optimization, and machine learning techniques. A selection of physics topics that are particularly amenable to analysis using machine learning will be discussed. These might include processing collider data, classifying astronomical images, solving the Ising model, parameter estimation from physics data sets, learning physical probability distributions, finding string theory compactifications, and finding symbolic physical laws.
Requisites: MATH 234 and (PHYSICS 104, 202, 208, or 248), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the conceptual foundations of machine learning and its application to physics problems. Be able to describe accurately and quantitatively the benefits of machine learning over other methods.
Audience: Undergraduate

2. Master the techniques of supervised and unsupervised machine learning, and neural networks. Be able to apply this knowledge to identification and classification of physical events, and the analysis of data.

Audience: Undergraduate

3. Become familiar with the programming techniques and common tools used in machine learning. Learn how to construct a working program and to recognize and solve problems that may arise in a large piece of code.
Audience: Undergraduate

4. Grasp the big picture behind a project that involves machine learning. Be able to articulate the goals, and the project, and where it fits into the overall scientific context.
Audience: Undergraduate

5. Understand how novel machine learning developments from the last years can be used to solve physics problems that were previously intractable.
Audience: Undergraduate

PHYSICS 371 – ACOUSTICS FOR MUSICIANS
3 credits.

Intended for music students who wish to learn about physical basis of sound, sound perception, musical scales, musical instruments, and room acoustics.
Requisites: Satisfied Quantitative Reasoning (QR) A
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2022

PHYSICS 406 – SPECIAL TOPICS IN PHYSICS
1-4 credits.

Special topics in physics at the advanced undergraduate level.
Requisites: PHYSICS 205, 241, 244, 249, or PHYSICS/E C E 235
Course Designation: Core GenEd - Natural Science & Wellness
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and describe key theories, concepts and methods in Physics.
Audience: Undergraduate

2. Apply key theories, concepts, and methods in Physics using appropriate tools, processes, and/or software.
Audience: Undergraduate

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in Physics.
Audience: Undergraduate

4. Evaluate or synthesize information relating to Physics research.
Audience: Undergraduate

PHYSICS 407 – ADVANCED LABORATORY
2-4 credits.

Advanced experiments in classical and modern physics. Possible experiments include beta decay, muon lifetime, nuclear magnetic resonance, Stern-Gerlach atomic beam, Mossbauer scattering, velocity of light, Zeeman effect, and Compton scattering. Techniques for the statistical analysis of experimental data and keeping a proper research lab notebook are emphasized. Two (four) credit students will typically perform four (eight) experiments.
Requisites: PHYSICS 307
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Conduct experiments collaboratively within a team and identify an appropriate conceptual framework to model experimental data.
Audience: Undergraduate

2. Describe the use of instrumentation and measurement techniques employed in an experimental investigation, including the identification of systematic and random uncertainties related to those measurements.
Audience: Undergraduate

3. Troubleshoot experimental apparatus, refine measurements, and improve apparatus design using a consequential and logical approach.
Audience: Undergraduate

4. Analyze data by creating appropriate plots and inferring physical information from them through qualitative inspection and model fitting.
Audience: Undergraduate

5. Perform uncertainty analysis using standards accepted in the scientific community.
Audience: Undergraduate

6. Maintain laboratory notebooks of adequate quality for beginning graduate-level research, ensuring that experimental details and data are recorded in an organized and usable manner.
Audience: Undergraduate

7. Utilize a lab notebook as a tool for organizing more complex experimental investigations and for effectively communicating results with integrity, both orally and in writing.
Audience: Undergraduate

8. Synthesize all information gathered from data, including results and uncertainties, to make clear, data-driven conclusions.
Audience: Undergraduate

PHYSICS 415 – THERMAL PHYSICS
3 credits.

An introduction to thermodynamics and statistical mechanics from a physics perspective. Thermodynamics, phase equilibrium, kinetic theory of gases, classical and quantum statistical mechanics.
Requisites: (PHYSICS 205, 241, 249, or PHYSICS/E C E 235) and PHYSICS 311, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. use aspects of probability and statistics to describe the basic thermodynamic properties of macroscopic systems, and interactions between systems
Audience: Undergraduate

2. use the principles of statistical analysis to explain equilibrium between systems, and thermodynamic reservoirs
Audience: Undergraduate

3. use macroscopic system parameters to calculate general properties of homogeneous systems using Maxwell relations
Audience: Undergraduate

4. explain and use the canonical distribution to calculate the properties of systems in contact with a heat reservoir
Audience: Undergraduate

5. use the partition function approach to calculate properties of systems.
Audience: Undergraduate

6. calculate the properties of systems undergoing phase transitions
Audience: Undergraduate

7. use quantum statistics to calculate the properties of non-interacting quantum systems
Audience: Undergraduate

PHYSICS 448 – ATOMIC AND QUANTUM PHYSICS
3 credits.

Review of atomic and other quantum phenomena and special relativity; introduction to quantum mechanics treating the more advanced topics of atomic physics and applications to molecular, solid state, nuclear, and elementary particle physics and quantum statistics.
Requisites: (PHYSICS 205, 241, 244, 249, or PHYSICS/E C E 235) and PHYSICS 311 and 322, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 449 – ATOMIC AND QUANTUM PHYSICS
3 credits.

Continuation of PHYSICS 448. Review of atomic and other quantum phenomena and special relativity; introduction to quantum mechanics treating the more advanced topics of atomic physics and applications to molecular, solid state, nuclear, and elementary particle physics and quantum statistics.
Requisites: PHYSICS 448 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Construct and manipulate multi-electron spin states using the principles of quantum angular momentum.
Audience: Undergraduate

2. Calculate the effects of perturbations on quantum mechanical systems.

Audience: Undergraduate

3. Calculate quantum-mechanical scattering using approximation and expansion techniques.
Audience: Undergraduate

4. Quantize the electromagnetic field and calculate quantum states.
Audience: Undergraduate

5. Calculate the interaction of light with atoms using the properties of quantized electromagnetic fields.
Audience: Undergraduate

PHYSICS 498 – DIRECTED STUDY
1-3 credits.

Advanced-level mentored research project in physics.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHYSICS 499 – DIRECTED STUDY
1-3 credits.

Advanced-level mentored research project in physics.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS/B M E/H ONCOL/MED PHYS 501 – RADIATION PHYSICS AND DOSIMETRY
3 credits.

Interactions and energy deposition by ionizing radiation in matter; concepts, quantities and units in radiological physics; principles and methods of radiation dosimetry.
Requisites: (PHYSICS 323, 449 and MATH 320) or graduate/professional standing or declared in Medical Physics VISP
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Use the physics of microscopic structures of nucleus, nuclear decay, electronic structure of atoms to calculate nuclear decay lifespan and solid state energy band structure
Audience: Both Grad & Undergrad

2. Calculate the radiation power spectrum for an accelerating charge particle under different physical conditions
Audience: Both Grad & Undergrad

3. Calculate cross-sections for the following interaction processes between photons and matter: Rayleigh scattering, photoelectric effect, Compton scattering, and pair production
Audience: Both Grad & Undergrad

4. Calculate the scattering cross-section of Coulomb scattering and energy transfer cross-section in collisions processes and radiative energy loss processes
Audience: Both Grad & Undergrad

5. Calculate radiation dose for both external photon beams, neutron beams, and charged particle beams
Audience: Both Grad & Undergrad

6. Identify open research topics in radiation imaging, radiation therapy, and radiation protection fields
Audience: Graduate

PHYSICS/E C E/N E 525 – INTRODUCTION TO PLASMAS
3 credits.

Basic description of plasmas: collective phenomena and sheaths, collisional processes, single particle motions, fluid models, equilibria, waves, electromagnetic properties, instabilities, and introduction to kinetic theory and nonlinear processes. Examples from fusion, astrophysical and materials processing processing plasmas.
Requisites: (E C E 320 or PHYSICS 322), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define the fundamental properties of a plasma and analyze single-particle dynamics.
Audience: Both Grad & Undergrad

2. Formulate and distinguish between fluid models (e.g., two-fluid, Magnetohydrodynamics - MHD) to describe collective plasma behavior.
Audience: Both Grad & Undergrad

3. Analyze plasma waves, equilibria, and instabilities using fluid models.
Audience: Both Grad & Undergrad

4. Apply the kinetic equation for a plasma and explain its relationship to the hierarchy of fluid models.
Audience: Both Grad & Undergrad

5. Select an appropriate physical model to analyze and solve problems in plasma applications.
Audience: Graduate

PHYSICS/E C E/N E 527 – PLASMA CONFINEMENT AND HEATING
3 credits.

Principles of magnetic confinement and heating of plasmas for controlled thermonuclear fusion: magnetic field structures, single particle orbits, equilibrium, stability, collisions, transport, heating, modeling and diagnostics. Discussion of current leading confinement concepts: tokamaks, tandem mirrors, stellarators, reversed field pinches, etc.
Requisites: E C E/N E/PHYSICS 525, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS 531 – INTRODUCTION TO QUANTUM MECHANICS
3 credits.

Historical background and experimental basis of quantum mechanics; de Broglie waves, correspondence principle, uncertainty principle, Schrodinger equation, hydrogen atom, electron spin, Pauli principle; applications of wave mechanics.
Requisites: (PHYSICS 205, 241, 244, 249, or PHYSICS/E C E 235) and PHYSICS 311 and 322, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Master the concept of the wavefunction
Audience: Both Grad & Undergrad

2. Perform statistical analysis using operator algebra
Audience: Graduate

3. Understand the energy levels of the hydrogen atom
Audience: Both Grad & Undergrad

4. Obtain the mathematical skills necessary to solve the 3-dimensional wave equation
Audience: Graduate

5. Acquire the skills necessary to apply various types of perturbation theory
Audience: Both Grad & Undergrad

6. Use the variational principle including taking advantage of symmetry
Audience: Graduate

7. Understand the necessary mathematical apparatus of scattering theory
Audience: Both Grad & Undergrad

8. Discuss and explain fully the logical foundations of quantum mechanics
Audience: Both Grad & Undergrad

PHYSICS 535 – INTRODUCTION TO PARTICLE PHYSICS
3 credits.

Review of quantum physics; introduction to particles, antiparticles and fundamental interactions; detectors and accelerators; symmetries and conservation laws; electroweak and color interactions of quarks and leptons; unification theories.
Requisites: PHYSICS 448 or concurrent enrollment, PHYSICS 531 or concurrent enrollment, or graduate/professional or special student standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Calculate all relevant kinematic quantities for particle scattering and decays.
Audience: Undergraduate

2. Use conservation laws to identify allowed and disallowed interactions in the Standard Model.
Audience: Undergraduate

3. Draw all possible allowed vertices and Feynman diagrams for various particle scattering and decays in the Standard Model.
Audience: Undergraduate

4. Setup first order matrix elements for particle scattering and decays including scalar, vector and spinor fields.
Audience: Undergraduate

5. Estimate order of magnitude of cross sections and decay rates for various particle scattering and decays.
Audience: Undergraduate

6. Specify all possible interactions of stable particles with matter.
Audience: Undergraduate

7. Explain how particle detectors and particle accelerators of various types work.
Audience: Undergraduate

PHYSICS 545 – INTRODUCTION TO ATOMIC STRUCTURE
3 credits.

Nuclear atom; hydrogen atom; Bohr-Sommerfeld model, wave model, electron spin, description of quantum electron spin, description of quantum electrodynamic effects; external fields; many-electron atoms; central field, Pauli principle, multiplets, periodic table, x-ray spectra, vector coupling, systematics of ground states; nuclear effects in atomic spectra; interaction with coherent radiation, optical forces, laser cooling and trapping.
Requisites: PHYSICS 448 or concurrent enrollment, PHYSICS 531 or concurrent enrollment, or graduate/professional or special student standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Master the concept of the Bohr Atom
Audience: Both Grad & Undergrad

2. Fully understand the orbitals of the hydrogen atom, including how to calculate their explicit forms
Audience: Both Grad & Undergrad

3. Prove and apply the Wigner-Eckart Theorem
Audience: Graduate

4. Become familiar with the phenomenology of multi-electron atoms
Audience: Both Grad & Undergrad

5. Calculate lifetimes and linewidths from first principles
Audience: Graduate

6. Determine quantum states and their properties in the presence of external fields
Audience: Both Grad & Undergrad

7. Categorize and explain the different types of atom traps
Audience: Both Grad & Undergrad

8. Perform density-matrix calculations to quantitatively measure entanglement and decoherence
Audience: Graduate

PHYSICS 551 – SOLID STATE PHYSICS
3 credits.

Mechanical, thermal, electric, and magnetic properties of solids; band theory; semiconductors; crystal imperfections.
Requisites: PHYSICS 205, 241, 244, 249, 448, 531, PHYSICS/E C E 235, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Utilize ideas of atomic bonding to understand crystal lattice structures and reciprocal space
Audience: Both Grad & Undergrad

2. Use the reciprocal lattice to determine complex x-ray diffraction patterns
Audience: Graduate

3. Become familiar with the calculation of simple phonon dispersion relations and use them to determine lattice thermal properties
Audience: Both Grad & Undergrad

4. Master the electronic properties of metals in the quantum free-electron model and distinguish insulators, metals, and semiconductors
Audience: Both Grad & Undergrad

5. Obtain the ability to calculate general band structures in the nearly-free electronic and tight-binding approximations
Audience: Graduate

6. Analyze and calculate properties of bulk semiconductors and semiconductor junctions
Audience: Both Grad & Undergrad

7. Describe quantitatively ordered systems such as ferroelectrics, ferromagnets and superconductors
Audience: Both Grad & Undergrad

8. Understand the physics of superconducting junctions
Audience: Graduate

PHYSICS 603 – WORKSHOP IN COLLEGE PHYSICS TEACHING
1-2 credits.

Discussion, practice, and occasional lectures on various aspects of the teaching of physics. Course planning; course materials; lecture, demonstration, and discussion techniques; laboratory; problem solving; examinations, grading, and evaluation. Problems arising in the teaching of physics; levels of difficulty, differences in talents and backgrounds; methods of presentation of various specific topics.
Requisites: PHYSICS 311 and 322
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Apply, analyze, or evaluate key theories and methods from literature for teaching and demonstrating physics concepts at the college level.
Audience: Undergraduate

2. Compare and apply different approaches to formative and summative assessments to evaluate student learning.
Audience: Undergraduate

3. Assess student understanding and needs in real-time and tailor their explanation(s) appropriately.
Audience: Undergraduate

PHYSICS/B M E/MED PHYS/PHMCOL-M/RADIOL 619 – MICROSCOPY OF LIFE
3 credits.

Survey of state of the art microscopic, cellular and molecular imaging techniques, beginning with subcellular microscopy and finishing with whole animal imaging.
Requisites: PHYSICS 104, 202, 208, or 248 or PHYSICS/MED PHYS 265
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 623 – ELECTRONIC AIDS TO MEASUREMENT
4 credits.

Fundamentals of electronics, electronic elements, basic circuits; combinations of these into measuring instruments.
Requisites: (PHYSICS 202, 208, or 248) and (MATH 234 or 376), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use electronics to make sensitive measurements in the lab.
Audience: Undergraduate

2. Build circuit blocks such as amplifiers, phase detectors, and logic gates using standard components.
Audience: Undergraduate

3. Recognize unexpected circuit behavior and troubleshoot it systematically.
Audience: Undergraduate

4. Understand the origins of circuit problems like noise, interference, and grounding issues and design circuits to minimize them.
Audience: Undergraduate

5. Assemble custom-built circuit blocks and pre-made integrated circuit chips to carry out arbitrary logic.
Audience: Undergraduate

6. Simulate and analyze complex logic circuits using dedicated software.
Audience: Undergraduate

PHYSICS 625 – APPLIED OPTICS
4 credits.

Optical methods in research and technology. Reflection, refraction, absorption, scattering. Imaging. Sources and sensors. Schlieren methods. Interferometry. Instrumental spectroscopy. Fourier optics, image processing, holography. Laser technology, Gaussian beams, nonlinear optics.
Requisites: PHYSICS 322 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 681 – SENIOR HONORS THESIS
3 credits.

Mentored individual research and study for students completing Physics Honors in the Major.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS 682 – SENIOR HONORS THESIS
3 credits.

Mentored individual research and study for students completing Physics Honors in the Major.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS/MED PHYS 688 – RADIATION PRODUCTION AND DETECTION
4 credits.

Physics of ionizing radiation production and detection in medical science; ionization chambers, solid-state detectors, charged and neutral particles for external beam radiotherapy, radionuclides activated with accelerators for diagnostic and therapeutic applications, radiochemistry, and X-ray tube physics.
Requisites: PHYSICS/B M E/H ONCOL/MED PHYS 501
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Achieve competence in experimental measurement methods of radiation dose
Audience: Both Grad & Undergrad

2. Develop a functional understanding of the principles and operation of the major types of ionizing radiation detectors used in modern medical physics including ion chambers, scintillators, semiconductors, chemical detectors, and calorimeters.
Audience: Both Grad & Undergrad

3. Apply fundamental atomic and nuclear physics and chemistry to radiation production using charged and neutral particles with accelerators and reactors, especially in the context of radionuclide production for diagnostic and therapeutic medical applications.
Audience: Both Grad & Undergrad

4. Develop an understanding of the principles and operation of medical electron linear accelerators for radiation therapy.
Audience: Both Grad & Undergrad

5. Apply physics and engineering concepts to understand the basic hardware configuration of an x-ray tube, the production of electrons by thermionic emission, the acceleration of electrons to a target material, and the physical interactions in the target resulting in x-rays.
Audience: Both Grad & Undergrad

6. Apply what has been learned to their current research project.
Audience: Graduate

PHYSICS 691 – SENIOR THESIS
2-3 credits.

Mentored individual research and study for students completing a thesis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PHYSICS 692 – SENIOR THESIS
2-3 credits.

Mentored individual research and study for students completing a thesis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS 701 – GRADUATE INTRODUCTORY SEMINARS
1 credit.

Designed to give new students an introduction to the broad range of modern research going on at UW Physics, and to help students find research opportunities in the department. Each week, faculty from each major research area will present their research in a seminar setting. The research areas will include selected topics both in theory and experiment from biophysics; atomic, molecular, and optical physics; plasma; condensed matter; quantum information and computation; high energy and nuclear physics; particle physics, astrophysics, and cosmology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Gains a broad awareness of the status of contemporary research in physics
Audience: Graduate

2. Learns to engage and communicate with other research professionals
Audience: Graduate

3. Learn how to work with the scientific literature
Audience: Graduate

4. Learn professional standards for the responsible conduct of research
Audience: Graduate

5. Learn responsibilities of authors and co-authors and acceptable authorship practices
Audience: Graduate

PHYSICS 707 – QUANTUM COMPUTING LABORATORY
4 credits.

Provides an intensive introduction to the experimental techniques of quantum computing. Students will do 8 experiments chosen from: Bell violation with entangled photons, Stern-Gerlach, Pulsed NMR, Optical pumping of Rb, Nanofabrication, Fiber optics communication, Diode pumped YAG laser, and Acousto-optic modulator.
Requisites: PHYSICS 709 and (PHYSICS 531 or 731)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Master fundamental techniques in experimental physics of quantum computing. This includes, but is not limited to: calibration and operation of devices to measure electromagnetic signals, particle detection, lasers and other optical equipment.
Audience: Graduate

2. Be able to analyze experimental data. This involves physical interpretation and judgment of data quality. Understand error analysis and how to extract signals from noisy data.
Audience: Graduate

3. Become familiar with all the requirements involved in the presentation of scientific data at an international level. Be able to achieve logical structure, clarity of expression and convincing narrative from introduction to conclusion.
Audience: Graduate

4. Acquire the skill of keeping a good lab notebook. This will include concision and accuracy of description and clear writing, particularly for mathematical arguments.
Audience: Graduate

PHYSICS 709 – INTRODUCTION TO QUANTUM COMPUTING
3 credits.

A detailed introduction to quantum computation and quantum information processing. Basic topics of quantum mechanics that are most relevant to quantum computing, particularly measurement theory. Specialized topics such as entanglement, other measures of quantum correlation and the Bell inequalities. Classical and quantum information theory, classical and quantum complexity theory. Qubits, quantum gates, quantum circuits. Teleportation, quantum dense coding, quantum cryptography. Quantum algorithms: Deustch, Simon, Shor, Grover, and adiabatic algorithms. Basic quantum error correction: 5-qubit, Steane and Shor codes. Completion of one undergraduate course in quantum mechanics recommended, such as PHYSICS 448 or 531.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand the conceptual foundations of quantum computing and its relation to classical computing. Be able to describe accurately and quantitatively the differences in their capacities.
Audience: Graduate

2. Master the formalism of many-qubit quantum mechanics, including Pauli matrices, commutation relations and repeated unitary transformations. Be able to apply this knowledge to quantum gates, quantum circuits and quantum algorithms.
Audience: Graduate

3. Become familiar with the differences between quantum correlations and classical correlations at a conceptual level. Use this knowledge to be able to analyze experiments on Bell inequalities.
Audience: Graduate

4. Understand the motivation for quantum error correction. Be able to follow and verify error-correction protocols.
Audience: Graduate

PHYSICS 711 – THEORETICAL PHYSICS-DYNAMICS
3 credits.

Lagrange's equations, Principle of Least Action, orbits and scattering, kinematics of rotation, rigid body dynamics, small oscillations, special relativistic dynamics, Hamiltonian formulation, canonical transformations, Hamilton-Jacobi theory, canonical perturbation theory, chaos, continuum mechanics, introduction to general relativity.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 715 – STATISTICAL MECHANICS
3 credits.

Statistical foundations, Liouville's theorem, ensembles, classical and quantum distribution functions, entropy and temperature, connection with thermodynamics, partition functions, quantum gases, non-ideal gases, phase transitions and critical phenomena, non-equilibrium problems, Boltzmann equation and the H-theorem, transport properties, connections with quantum field theory, applications of statistical mechanics to selected problems.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS 716 – STATISTICAL MECHANICS II
3 credits.

Symmetries and symmetry breaking, phase transitions, mean field theory, critical exponents, scaling hypothesis, renormalization group, diagrammatic expansion, epsilon-expansion, exact solution of the 2d Ising model. Boltzman kinetic equation, H-theorem, Fokker-Planck and Langevin equations, Born-Markov master equation, Lindblad superoperators, classical and quantum noise, theory of amplifiers.
Requisites: PHYSICS 715 and 731
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 717 – RELATIVITY
3 credits.

Special and general theories of relativity, relativistic electrodynamics, cosmology, unified field theories.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 721 – THEORETICAL PHYSICS-ELECTRODYNAMICS
3 credits.

Electrostatics, magnetostatics, Green functions, boundary value problems, macroscopic media, Maxwell's equations, the stress tensor and conservation laws, electromagnetic waves, wave propagation, dispersion, waveguides, radiation, multipole expansions, diffraction and scattering, special relativity, covariance of Maxwell's equations, Lienard-Wiechert potentials, radiation by accelerated charges. Knowledge of electrodynamics (such as PHYSICS 322) strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS/E C E/N E 724 – WAVES AND INSTABILITIES IN PLASMAS
3 credits.

Waves in a cold plasma, wave-plasma interactions, waves in a hot plasma, Landau damping, cyclotron damping, magneto-hydrodynamic equilibria and instabilities, microinstabilities, introduction to nonlinear processes, and experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

PHYSICS/E C E/N E 725 – PLASMA KINETIC THEORY AND RADIATION PROCESSES
3 credits.

Coulomb Collisions, Boltzmann equation, Fokker-Planck methods, dynamical friction, neoclassical diffusion, collision operators radiation processes and experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS/E C E/N E 726 – PLASMA MAGNETOHYDRODYNAMICS
3 credits.

MHD equations and validity in hot plasmas; magnetic structure and magnetic flux coordinates; equilibrium in various configurations; stability formulation, energy principle, classification of instabilities; ideal and resistive instability in various configurations, evolution of nonlinear tearing modes; force-free equilibria, helicity, MHD dynamo; experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS 731 – QUANTUM MECHANICS
3 credits.

Schrodinger equation, operator theory, matrix mechanics, transformation theory, Heisenberg representation, orbital angular momentum, bound-state problems, scattering theory, stationary perturbation theory, degenerate systems, time-dependent perturbation theory, Born approximation, other approximation methods. Knowledge of quantum mechanics and atomic physics (such as PHYSICS 449 or 531) strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 732 – QUANTUM MECHANICS
3 credits.

Interaction of electromagnetic radiation with matter, quantization of the electromagnetic field, spontaneous transitions, identical particles and spin, addition of angular momenta, tensor operators, complex atoms, Hartree approximation, molecules, Dirac equation, relativistic effects in atoms.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS 735 – PARTICLE PHYSICS
3 credits.

Structure of elementary particles, quarks and gluons, introduction to calculational techniques of particle interactions (Feynman diagrams), constituent models of electroweak and strong interactions and associated phenomenological techniques. Knowledge of introductory particle physics and quantum mechanics (such as PHYSICS 535) strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 736 – EXPERIMENTAL METHODS IN NUCLEAR-, PARTICLE-, AND ASTROPHYSICS
3 credits.

Interaction of particles with matter; detector techniques at colliding beam machines, in nuclear and particle physics, astrophysics, and cosmology; experimental strategies in detector design; principles of simulation and Monte Carlo methods, error analysis and statistical techniques in data analysis. Knowledge of introductory particle physics (such as PHYSICS 535) strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS/E C E 746 – QUANTUM ELECTRONICS
3 credits.

Elementary aspects of Lagrange theory of fields and field quantization; Bose, Fermi and Pauli operators; interaction of fields; quantum theory of damping and fluctuations; applications to lasers, nonlinear optics, and quantum optics. Knowledge of lasers [such as PHYSICS 546] and graduate-level electromagnetics [such as E C E 740 or PHYSICS 721] strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

PHYSICS/E C E 748 – LINEAR WAVES
3 credits.

General considerations of linear wave phenomena; one dimensional waves; two and three dimensional waves; wave equations with constant coefficients; inhomogenous media; random media. Lagrangian and Hamiltonian formulations; asymptotic methods. Knowledge of electromagnetics [such as E C E 320 or PHYSICS 321], mechanics [such as M E 340], or vibrations [such as M E/E M A 440] strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

PHYSICS/E C E/N E 749 – COHERENT GENERATION AND PARTICLE BEAMS
3 credits.

Fundamental theory and recent advances in coherent radiation charged particle beam sources (microwave to X-ray wavelengths) including free electron lasers, wiggler/wave-particle dynamics, Cerenkov masers, gyrotrons, coherent gain and efficiency, spontaneous emission, beam sources and quality, related accelerator concepts experimental results and applications.
Requisites: E C E 740
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

PHYSICS 751 – ADVANCED SOLID STATE PHYSICS
3 credits.

Lattice dynamics; band theory; Fermi surfaces; electrodynamics of metals; optical properties; transport properties. Knowledge of introductory solid state physics (such as PHYSICS 551) strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS 763 – QUBIT TUNE-UP AND PROGRAMMING
3 credits.

Explore the development of quantum computers using specific hardware platforms, such as superconducting qubits. Walk through the entire process from a fabricated device to a functional quantum computer, focusing on qubit tune-up and the DiVincenzo criteria. Implement state preparation and measurement, single and two-qubit gates, and apply quantum characterization, verification, and validation (QCVV) techniques to diagnose and mitigate errors. Utilize quantum computer simulators and real quantum devices when available, leveraging current experimental data analysis methods to understand how to build scalable and reliable quantum systems. Knowledge of quantum mechanics [such as PHYSICS 531] required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the physics underlying a specific qubit hardware.
Audience: Graduate

2. Describe and implement qubit state preparation and measurement (SPAM).
Audience: Graduate

3. Characterize and implement single and two-qubit gates.
Audience: Graduate

4. Define and implement quantum characterization, verification, and validation (QCVV) techniques to diagnose errors in quantum hardware.
Audience: Graduate

5. Utilize data analysis techniques necessary for developing quantum computers.
Audience: Graduate

PHYSICS 765 – QUANTUM ALGORITHMS AND ERROR CORRECTION
3 credits.

Dive into the quantum computing stack by starting with real-world applications and progressing through the essential components needed for fault-tolerant quantum computers. Learn about key areas such as quantum algorithms, and advanced quantum error correction. Explore algorithms for scientific applications, including quantum phase estimation and the HHL algorithm, and examine the derivation, trade-offs, and implementation of sophisticated error correction techniques. Learn to analyze and estimate the full-stack quantum resources required for novel quantum algorithms by utilizing classical computational tools, in order to develop and evaluate scalable, high-utility quantum computing solutions.
Requisites: PHYSICS 709
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize how to estimate quantum resources, starting from a high-utility application, through quantum algorithms, error correcting codes, and physical qubit parameters.
Audience: Graduate

2. Discuss quantum algorithms for scientific applications, including quantum phase estimation, time-stepping schemes (Trotterization, qubitization), initial state preparation, and the HHL algorithm.
Audience: Graduate

3. Describe advanced quantum error correction codes, their derivation, trade-offs between different codes, physical overheads, decoders, and threshold calculations.
Audience: Graduate

4. Use and develop classical computational tools to study various aspects of quantum computers.
Audience: Graduate

PHYSICS 772 – HIGH ENERGY ASTROPHYSICS
3 credits.

Interactions among the particles, fields, and radiation of interstellar and intergalactic space. Gamma-ray, x-ray, and cosmic ray production, propagation, and detection. Knowledge of electrodynamics (such as PHYSICS 322) strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 779 – ADVANCED QUANTUM COMPUTING
3 credits.

Explores applications of quantum theory to both the hardware and the software that underpin modern quantum information technology. Advanced quantum circuit theory: Clifford group and Gottesman-Knill theorem, Mathematica code. Decoherence: density matrices, probability distributions, T1 and T2. Advanced error correction: master equation, Kraus operators, fault tolerance, quantum tomography. Hardware: Trapped ions, Paul traps, sideband cooling, CZ and MS gates, neutral atoms, superconductors, quantum dots.
Requisites: PHYSICS 531 or 731
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand how to construct and analyze a quantum circuit. Be able to simulate using Mathematica.
Audience: Graduate

2. Master the formalism of decoherence of quantum computers. Be able to apply this knowledge for different noise models.
Audience: Graduate

3. Advance knowledge of error correction beyond simple 5- and 7-qubit codes. Understand connection to classical error correction methods.
Audience: Graduate

4. Be able to explain and compare all the major technologies in use today for quantum information processing. Grasp the physics behind each, including speed and resistance to decoherence.
Audience: Graduate

PHYSICS 799 – INDEPENDENT STUDY
1-3 credits.

Graduate-level mentored research project in physics.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PHYSICS 801 – SPECIAL TOPICS IN THEORETICAL PHYSICS
1-3 credits.

Selected topics in theoretical physics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

PHYSICS 805 – SPECIAL TOPICS IN PHYSICS
1-3 credits.

Special topics in physics at the graduate level.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS 831 – ADVANCED QUANTUM MECHANICS
3 credits.

Quantum theory of free and interacting fields, formal scattering theory, dispersion theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

PHYSICS 832 – ADVANCED QUANTUM MECHANICS
3 credits.

Continuation of PHYSICS 831. Quantum theory of free and interacting fields, formal scattering theory, dispersion theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

PHYSICS 835 – COLLIDER PHYSICS PHENOMENOLOGY
2-3 credits.

Standard model. Application to e+e-, proton-antiproton, pp, and ep colliders. Jets. Weak boson, heavy-quark, and Higgs boson production and decay. Quarkonia. Neutral B meson mixing. Grand unification. Supersymmetry.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2021

PHYSICS 900 – COLLOQUIUM
0-1 credits.

Lectures by staff and visitors.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS/ASTRON 910 – SEMINAR IN ASTROPHYSICS
0-1 credits.

Current topics in astrophysics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS/E C E/N E 922 – SEMINAR IN PLASMA PHYSICS
0-1 credits.

Current topics in plasma physics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PHYSICS 990 – RESEARCH
1-12 credits.

Research supervised by individual faculty members.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Evaluates or synthesizes information pertaining to questions or challenges in physics.
Audience: Graduate

2. Engages appropriately and communicates clearly with other research professionals in physics.
Audience: Graduate

3. Formulates and plans original research.
Audience: Graduate

4. Creates research, scholarship, or performance that makes a substantive contribution to the field of physics.
Audience: Graduate

PHYSIOLOGY (PHYSIOL)

PHYSIOL 699 – INDEPENDENT WORK
1-4 credits.

Directed study projects for juniors and seniors.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2018
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Undergraduate

2. Read and effectively search scientific literature
Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

PHYSIOL 901 – SEMINAR
1 credit.

Students, faculty, and staff present research reports of current interest.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2019

PHYSIOL 990 – RESEARCH
1-9 credits.

Independent research and writing for graduate students under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2024
Learning Outcomes: 1. Exhibit a broad understanding of general physiology principles.
Audience: Graduate

2. Conduct independent research using a variety of approaches.
Audience: Graduate

3. Think critically to address research challenges.
Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research.
Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab.
Audience: Graduate

PLANT PATHOLOGY (PL PATH)

PL PATH/BOTANY 105 – MUSHROOMS
3 credits.

An introduction to fungi. The fungal kingdom is made up of millions of species. We use fungi to brew beer and make cheese, as medicines, and as symbols of both rampant decay and unstinting selflessness. Come unpack the mythology and walk away with a deep appreciation of a poorly understood but fascinating part of Earth's biodiversity.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Notice, recognize, and catalog fungi as you walk in the world; in Madison and in all of Earth's lands and waters.
Audience: Undergraduate

2. Explain the myriad ecological roles fungi play on planet Earth.
Audience: Undergraduate

3. Talk about fungal biodiversity at length and in depth.
Audience: Undergraduate

4. Think critically about the natural world; be able to not just read but also critique popular science writing.
Audience: Undergraduate

5. Interpret "how science gets done" and what constitutes scientific knowledge.
Audience: Undergraduate

PL PATH/BOTANY 123 – PLANTS, PARASITES, AND PEOPLE
3 credits.

Explores the interaction between society and plant-associated microbes. Topics include: the Irish potato famine, pesticides in current agriculture, role of economics and consumer preference in crop disease management and the release of genetically engineered organisms.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Critically examine scientific issues that affect your life.
Audience: Undergraduate

2. Articulate the fundamental concepts from biological sciences that explain the essential roles of food, water, and air in sustaining life.
Audience: Undergraduate

3. Provide examples of how interactions between plants, microbes and human society impact our food, agriculture, environment, and the plant's ability to sustain our lives.
Audience: Undergraduate

4. Apply knowledge of the scientific process to conduct scientific investigations and discern how scientific knowledge differs from other types of knowledge.
Audience: Undergraduate

PL PATH/ZOOLOGY 154 – TINY EARTH: ANTIBIOTIC DISCOVERY RESEARCH
2 credits.

Learn basic methodology in scientific research and discovery, including laboratory techniques, quantitative reasoning, scientific communication, and collaboration. Gain hands-on laboratory experience working with microbes to test original hypotheses concerning the discovery of potential antibiotic compounds while addressing the world's antibiotic resistance crisis by contributing data to the global "Tiny Earth" network of researchers to advance potential drug development. Tiny Earth seeks to encourage students to pursue careers in science through real-world, applied research experiences and aims to address a worldwide health threat of the diminishing supply of effective antibiotics by "student-sourcing antibiotic discovery." Concurrent enrollment in BIOLOGY/BOTANY/ZOOLOGY 152 is required for permission to enroll.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate basic knowledge of microbes and antibiotic resistance by (1) sufficiently explaining the process of natural selection with the accurate use of terminology, (2) describing morphological and physiological variation in bacteria and how this relates to bacterial taxonomy, and (3) summarizing mechanisms of the spread of antibiotic resistance genes across the microbial world.
Audience: Undergraduate

2. Demonstrate scientific competency as shown by their ability to (1) propose an original research question and hypothesis, (2) develop a biological rationale for the hypothesis, (3) select appropriate protocols to test the hypothesis, and (4) perform the research collaboratively with group members in a cordial and respectful way.
Audience: Undergraduate

3. Demonstrate proper techniques in basic micro- and molecular biology by (1) pipetting fluids with volume accuracy, (2) plating microbes via spread, patch, and streak methods, (3) using proper sterile technique, and (4) performing protocols for polymerase chain reaction (PCR), gel electrophoresis, and BLAST analysis for DNA amplification and sequencing.
Audience: Undergraduate

4. Demonstrate quantitative reasoning as shown by their ability to (1) select an appropriate statistical analysis for a given data set and research question, (2) carry out the statistical analysis using a vetted program (e.g. online statistical calculator tool such as Vassarstats.com), and (3) accurately interpret and the translate the results into a meaningful statement.
Audience: Undergraduate

5. Demonstrate scientific communication as shown by their ability to (1) clearly express a hypothesis, general methodology, and results in formal writing, (2) accurately visualize numerical results in the form of graph, (3) satisfactorily deliver aspects of the research project and findings via oral presentation and scientific poster presentation.
Audience: Undergraduate

PL PATH 155 – FOOD FRONTLINES: SECURITY, SUSTAINABILITY, AND SURVIVAL
1 credit.

What does it mean to be food secure - and who gets left out? Interactively explore the scientific, social, and systemic forces that shape food insecurity locally and globally. Build a foundational understanding and then take a deep dive into key drivers of food insecurity - such as climate change, conflict, policy, and inequality - and examine how food access and production affect individuals, communities, and entire nations. Develop college success skills, reflect on personal and academic goals, and engage in evidence-based discussions that connect research, current events, and campus life.
Requisites: None
Repeatable for Credit: No
Learning Outcomes: 1. Identify resources and services available through CALS and UW-Madison.
Audience: Undergraduate

2. Identify and analyze key drivers of food insecurity and their impact on individuals and communities.
Audience: Undergraduate

3. Discuss scientific topics related to food (in)security.
Audience: Undergraduate

4. Explain how food production intersects with social, economic, and environmental systems.
Audience: Undergraduate

5. Describe foundational college success skills, including organization, critical thinking, and effective communication.
Audience: Undergraduate

6. Reflect on academic, career, and personal goals in relation to course themes.
Audience: Undergraduate

7. Discuss complex issues using evidence-based perspectives from research, current events, and college experiences.
Audience: Undergraduate

PL PATH/PLANTSCI 261 – SUSTAINABLE TURFGRASS USE AND MANAGEMENT
2 credits.

Sustainable use and management of turfgrass landscapes in urban and suburban environments, including home lawns, golf courses, and sports fields. Focus is on creating sustainable and attractive turfgrass landscapes through proper species selection, use of slow-release or organic fertilizer practices, and minimizing the use of pesticides and supplemental irrigation.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe how turf is used in urban and suburban communities
Audience: Undergraduate

2. Identify the positive environmental impacts of using turfgrass
Audience: Undergraduate

3. Identify the negative environmental impacts of turfgrass management
Audience: Undergraduate

4. Identify the 3 major pest groups in turfgrass and describe sustainable management strategies for each
Audience: Undergraduate

PL PATH/PLANTSCI 262 – TURFGRASS MANAGEMENT LABORATORY
1 credit.

Hands-on turf establishment, cool- and warm-season grass, seed and weed identification, chemical application, and turf cultivation techniques and equipment use, plus field trips to major league sport facilities and golf courses.
Requisites: PL PATH/PLANTSCI 261 or concurrent enrollment (or HORT 261 prior to Fall 2025)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify the species of turfgrass commonly used in Wisconsin and the conditions they are most suited to.
Audience: Undergraduate

2. Describe management strategies that can be implemented to increase the sustainability of turfgrass management.
Audience: Undergraduate

3. List the most common pests observed on Wisconsin turfgrass and describe strategies for their sustainable management.
Audience: Undergraduate

4. Calculate the amount of seed needed to properly establish a turfgrass site, the amount of fertilizer needed to adequately fertilize turfgrass, and the concentration of pesticides needed to suppress common turfgrass pests.
Audience: Undergraduate

PL PATH 289 – HONORS INDEPENDENT STUDY
1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area of Plant Pathology. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2000
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills.
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving.
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies.
Audience: Undergraduate

4. Effectively communicate findings.
Audience: Undergraduate

PL PATH 299 – INDEPENDENT STUDY
1-3 credits.

Research work for students under direct guidance of a faculty member in an area of Plant Pathology. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills.
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving.
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies.
Audience: Undergraduate

4. Effectively communicate findings.
Audience: Undergraduate

PL PATH 300 – INTRODUCTION TO PLANT PATHOLOGY
4 credits.

Economic importance, symptoms, causes, and methods of control of representative plant diseases.
Requisites: (ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, or BIOCORE 381) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the different types of plant pathogens in terms of biology and host-pathogen interactions.
Audience: Both Grad & Undergrad

2. Explain the importance of plant pathogens for agricultural production and food security.
Audience: Both Grad & Undergrad

3. Diagnose plant diseases using a combination of hands-on skills, course knowledge, and outside research.
Audience: Both Grad & Undergrad

4. Design a disease management plan using the concepts of integrated disease management.
Audience: Both Grad & Undergrad

5. Apply research skills and critically analyze literature to explore the importance of a plant disease outside of class.
Audience: Both Grad & Undergrad

6. Communicate with peers about a critically important plant disease and its societal/cultural impacts in both oral and written forms.
Audience: Both Grad & Undergrad

7. Evaluate current scientific literature in the field of plant pathology.
Audience: Graduate

PL PATH 311 – GLOBAL FOOD SECURITY
3 credits.

Isn't having enough food a basic human right? Exploration of the drivers of food insecurity: barriers to food production (pests, land availability, climate), barriers to food availability (politics, price, biofuels), and a greater need due to population growth. Examination of solutions to food insecurity.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Locate, evaluate, and use credible information resources relevant to global food insecurity
Audience: Undergraduate

2. Analyze and interpret scientific evidence
Audience: Undergraduate

3. Compare and contrast information from multiple perspectives to gain a more comprehensive understanding of global food insecurity
Audience: Undergraduate

4. Demonstrate teamwork and interpersonal skills
Audience: Undergraduate

5. Analyze the barriers to food security
Audience: Undergraduate

6. Evaluate proposed solutions to food insecurity
Audience: Undergraduate

7. Apply logic-based rhetoric to communicate effectively in written and oral formats
Audience: Undergraduate

8. Demonstrate understanding of scientific reasoning, and determine when scientific information supports a given conclusion.
Audience: Undergraduate

PL PATH 315 – PLANT MICROBIOMES
4 credits.

Explore plant associated microbial communities (the plant microbiome), methods used to study them, and how we can use them to improve plant and ecosystem health in the face of challenges to agricultural and natural systems. Examples will be drawn from annual crop, grassland, and forested ecosystems. Use current molecular, bioinformatic, and statistical approaches to characterize rhizosphere microbiomes from samples collected as part of on-going research projects.
Requisites: (ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY/BIOLOGY 101 and 102, BOTANY/BIOLOGY 130, or BIOCORE 381) and (STAT 301 or 371), or Graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the major members of plant microbiomes and their functions.
Audience: Both Grad & Undergrad

2. Compare and contrast current and past approaches to studying plant microbiomes.
Audience: Both Grad & Undergrad

3. Use evidence to critically evaluate claims and test hypotheses.
Audience: Both Grad & Undergrad

4. Propose potential ways in which plant microbiomes may be utilized or manipulated to achieve societal goals.
Audience: Both Grad & Undergrad

5. Perform laboratory, bioinformatic and statistical protocols to characterize microbiome composition.
Audience: Both Grad & Undergrad

6. Propose, test, and interpret hypothesis about the structure of root associated microbial communities.
Audience: Both Grad & Undergrad

7. Evaluate scientific literature related to plant microbiomes and situate research results in the context of current literature.
Audience: Graduate

PL PATH/BOTANY 332 – FUNGI
4 credits.

Growth, development, variability and dispersal of saprophytic, parasitic, and symbiotic fungi, with a consideration of their ecological and economic significance. Develop skills in microscopy with live fungal materials.
Requisites: ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the biodiversity of true tungi (Eumycota) and other organisms traditionally included in studies of mycology.
Audience: Both Grad & Undergrad

2. Describe the fundamentals of fungal systematics, life cycles, genetics, pathology, evolution, ecology.
Audience: Both Grad & Undergrad

3. Describe the practical uses of fungi in agriculture, industry, medicine, and as model organisms.
Audience: Both Grad & Undergrad

4. Manipulate fungi in the laboratory by isolating and culturing them from the environment, use both dissecting and compound microscopes to see living and preserved organisms, extract and sequence their DNA, and implement bioinformatics pipelines.
Audience: Both Grad & Undergrad

5. Elucidate major unanswered questions in the field of mycology.
Audience: Graduate

PL PATH/BOTANY 333 – BIOLOGY OF THE FUNGI
2 credits.

Growth, development, variability and dispersal of saprophytic, parasitic, and symbiotic fungi, with a consideration of their ecological and economic significance.
Requisites: ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Will have a detailed knowledge of the biodiversity of Fungi, and organisms traditionally included in mycology courses, including but not limited to systematics, life cycles, genetics, pathology, ecology.
Audience: Both Grad & Undergrad

2. Apply knowledge of Fungi and fungal-like organisms for use in agriculture and industry.
Audience: Both Grad & Undergrad

3. Communicate about fungi in either an outreach or professional capacity.
Audience: Graduate

PL PATH/A A E/PLANTSCI 367 – INTRODUCTION TO ORGANIC AGRICULTURE: PRODUCTION, MARKETS, AND POLICY
3 credits.

Provides an in-depth understanding of the history of organic agriculture, its production, processing, marketing, and social dimensions, and its impact on environmental, community, and human health.
Requisites: ENVIR ST/AGROECOL/C&E SOC/ENTOM 103 (or AGRONOMY 103 prior to Fall 2025), AGRONOMY 100, HORT 120, PLANTSCI 110, BOTANY/PL PATH 123, SOC/C&E SOC 222, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the history of current organic systems and how it influences the way that organic farms and industries work.
Audience: Both Grad & Undergrad

2. Explore the biological, ecological, and agricultural underpinnings of organic production systems.
Audience: Both Grad & Undergrad

3. Examine how organic systems, social initiatives, and regulations are developed and how they shape business activities, community development efforts, and human and environmental health outcomes.
Audience: Both Grad & Undergrad

4. Evaluate the benefits and limitations of organic systems, social initiatives, and regulations from environmental, social, economic, and racial justice perspectives.
Audience: Both Grad & Undergrad

5. Analyze sustainability issues and/or practices using a systems-based approach.
Audience: Both Grad & Undergrad

6. Describe the social, economic, and environmental dimensions of organic farming and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Both Grad & Undergrad

7. Develop the capacity to evaluate sustainability and resilience outcomes of organic and other agricultural production and processing systems using interdisciplinary methods.
Audience: Graduate

PL PATH 375 – SPECIAL TOPICS
1-4 credits.

Subjects of current interest to undergrads.
Requisites: None
Course Designation: Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PL PATH 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Plant Pathology and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: Yes, for 8 number of completions
Last Taught: Spring 2020
Learning Outcomes: 1. Apply concepts learned in coursework to authentic professional situations.
Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry.
Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations.
Audience: Undergraduate

PL PATH 400 – STUDY ABROAD IN PLANT PATHOLOGY
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

PL PATH 499 – INDEPENDENT STUDY IN ORGANIC AGRICULTURE
2 credits.

Provide students research and/or hands-on experiences within the organic sector in order to gain scientific knowledge and/or an in-depth understanding of the research and science of organic agriculture, its production, processing, marketing, and social dimensions, and its impact on environmental, community, and human health. Declared in the Certificate in Organic Agriculture
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply knowledge of organic production through experiential opportunities within local, national and/or international communities.
Audience: Undergraduate

2. Research and/or develop innovations that integrate the biological, ecological, social, and economic concepts of organic agriculture into scientific or practical applications supporting organic farmers, industry participants, and/or consumers.
Audience: Undergraduate

PL PATH/BOTANY/ENTOM 505 – PLANT-MICROBE INTERACTIONS: MOLECULAR AND ECOLOGICAL ASPECTS
3 credits.

Molecular and ecological aspects of the interactions between plants and microorganisms. Explores many of the themes, from genetic to integrative, of modern biology, and illustrates how study of plant-microbe interactions contributes to understanding of fundamental plant science.
Requisites: MICROBIO 303, GENETICS 466, 468, BIOCHEM 501, 508, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Assess research papers from the peer-reviewed science literature by critically reading.
Audience: Both Grad & Undergrad

2. Discuss our current understanding of molecular plant-microbe interactions.
Audience: Both Grad & Undergrad

3. Present ideas at a professional level, in both oral and written form.
Audience: Both Grad & Undergrad

4. Facilitate an in-depth discussion about the complex relationships between plants and microbes.
Audience: Graduate

PL PATH 517 – PLANT DISEASE RESISTANCE
2-3 credits.

Host resistance in plant disease control. Conceptual and applied aspects of resistance: how it works, why it sometimes fails, and the traditional and modern techniques used for evaluating host resistance and incorporating resistance factors into new plant varieties.
Requisites: PL PATH 300, GENETICS 466, 468, PLANTSCI 338 or AGRONOMY 338 prior to Fall 2025, PLANTSCI 501 or AGRONOMY 501 prior to Fall 2025, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Discuss our current understanding of plant disease resistance at multiple levels (e.g., organismal, genetic, in field vs. controlled environments, molecular mechanisms).
Audience: Both Grad & Undergrad

2. Outline standard and modern approaches to plant disease resistance breeding.
Audience: Both Grad & Undergrad

3. Critically evaluate research papers from the peer-reviewed science literature.
Audience: Both Grad & Undergrad

4. Articulate concepts related to plant disease resistance with professional proficiency in both verbal and written forms.
Audience: Both Grad & Undergrad

5. Facilitate an in-depth discussion of a case study concerning use of recent scientific discoveries in breeding for plant disease resistance.
Audience: Graduate

PL PATH 559 – DISEASES OF ECONOMIC PLANTS
3 credits.

Symptoms, epidemiology and control of diseases of crop plants; emphasis on disease diagnosis.
Requisites: (PL PATH 300 and 332), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the impact of plant disease on economically important cropping systems in Wisconsin.
Audience: Both Grad & Undergrad

2. Articulate a critical perspective on land use and explain how agriculture impacts human and environmental health.
Audience: Both Grad & Undergrad

3. Develop analytical thinking and communication skills through class readings, activities, and discussion.
Audience: Both Grad & Undergrad

4. Describe the diverse, economic plant industries in Wisconsin and how plant diseases affect them.
Audience: Graduate

5. Describe the main diseases and their management practices in agronomic and specialty crops, and in turf and ornamental systems.
Audience: Graduate

6. Apply scientific principles of disease diagnostics and pathogen lifecycles to make disease management decisions.
Audience: Graduate

7. Acquire new knowledge of insects, weed, nutrient disorders and injury caused by abiotic factors.
Audience: Graduate

PL PATH/BOTANY 563 – PHYLOGENETIC ANALYSIS OF MOLECULAR DATA
3 credits.

Theory and practice of phylogenetic inference from DNA sequence data.
Requisites: (ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, or BIOCORE 381) and (STAT 240, 301, 324, or 371) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain in details all the steps in the pipeline for phylogenetic inference and how different data and model choices affect the inference outcomes
Audience: Both Grad & Undergrad

2. Plan and produce reproducible scripts with the analysis of real biological data
Audience: Both Grad & Undergrad

3. Justify the data and model choices made for the data analysis
Audience: Both Grad & Undergrad

4. Interpret the results of the most widely used phylogenetic methods in biological terms
Audience: Both Grad & Undergrad

5. Orally present the results of phylogenomic data analyses based on the best scientific and reproducibility practices
Audience: Graduate

PL PATH 590 – CAPSTONE IN PLANT PATHOLOGY
1-4 credits.

Synthesizing research-based capstone experience in Plant Pathology. Develop problem-solving skills, be exposed to multidisciplinary approaches, develop teamwork and interpersonal skills, develop information resources, consider societal, economic, ethical, scientific and professional aspects of the field, and prepare and present written and/or oral reports.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Integrate diverse approaches to solve problems or answer questions related to plant-microbe interactions.
Audience: Undergraduate

2. Evaluate the strength and value of diverse information sources in plant pathology and/or related fields.
Audience: Undergraduate

3. Discuss specific issues related to plant pathology with peers.
Audience: Undergraduate

4. Situate plant pathology and plant-microbial interactions research into broader societal contexts.
Audience: Undergraduate

5. Write and present reports regarding plant disease or plant-microbial interactions for both scientific and general audiences.
Audience: Undergraduate

PL PATH 602 – ECOLOGY, EPIDEMIOLOGY AND CONTROL OF PLANT DISEASES
3 credits.

Environmental factors in the development and spread of diseases, pathogen variability, genetics of disease resistance, and principles of disease control.
Requisites: PL PATH 300, (MATH 217 or 221), and (STAT 301, 371, or F&W ECOL/STAT 571, or HORT 571 prior to Spring 2025), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Model disease progress over time and space.
Audience: Both Grad & Undergrad

2. Connect population scale phenomena to individual organism interactions.
Audience: Both Grad & Undergrad

3. Design empirical studies of epidemics.
Audience: Both Grad & Undergrad

4. Model how biotic and abiotic conditions affect epidemic dynamics.
Audience: Both Grad & Undergrad

5. Compare and contrast causes and consequences of disease in natural and managed systems.
Audience: Both Grad & Undergrad

6. Evaluate relative benefits of disease management tools.
Audience: Both Grad & Undergrad

7. Design rational management strategies based on understanding of epidemic dynamics.
Audience: Both Grad & Undergrad

8. Synthesize current scientific literature related to ecology, epidemiology, and plant diseases.
Audience: Graduate

PL PATH 622 – PLANT-BACTERIAL INTERACTIONS
2-3 credits.

Physiology, genetics, taxonomy, and ecology of bacterial pathogens, epiphytes, and symbionts of plants.
Requisites: MICROBIO 303 and (GENETICS 466, 468, BIOCHEM 501, or 508) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Master unifying concepts and factual material about the biology of plant-associated bacteria.
Audience: Both Grad & Undergrad

2. Describe emerging research challenges, both technical and conceptual, in the field.
Audience: Both Grad & Undergrad

3. Analyze biological research papers.
Audience: Both Grad & Undergrad

4. Integrate current or proposed research with contemporary scientific literature related to plant-bacterial interactions.
Audience: Graduate

PL PATH/M M & I/ONCOLOGY 640 – GENERAL VIROLOGY-MULTIPLICATION OF VIRUSES
3 credits.

The structure, multiplication, genetics, pathology and control of animal and plant viruses.
Requisites: (GENETICS 466 or 467) and (BIOCHEM 501 or 508) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the major classes of viruses infecting animals and plants, and summarize their basic replication strategies.
Audience: Both Grad & Undergrad

2. Identify the major innate and adaptive antiviral immunity mechanisms of animals and plants, and examples of viral countermeasures against these.
Audience: Both Grad & Undergrad

3. Summarize the burdens and threats of viruses to public health, agriculture, etc.
Audience: Both Grad & Undergrad

4. Identify the major approaches and challenges to virus control at the single organism and host population levels, including why viruses are generally harder to control than bacteria, and major steps in developing new antiviral agents.
Audience: Both Grad & Undergrad

5. Illustrate beneficial uses of viruses and their genes in research, biotechnology and medicine.
Audience: Both Grad & Undergrad

6. Design and evaluate basic experiments to address specific questions in virology.
Audience: Both Grad & Undergrad

7. Read and evaluate primary literature papers in virology.
Audience: Graduate

PL PATH/BOTANY/GENETICS/M M & I 655 – BIOLOGY AND GENETICS OF FUNGI
3 credits.

Fungal genetics, genomics, and physiology using plant pathogenic fungi and the genetic models Aspergillus nidulans and Neurospora crassa as model systems to explore the current knowledge of fungal genetics and plant/fungal interactions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Demonstrate a basic understanding of fungal biology and genetics
Audience: Graduate

2. Analyze current research topics in fungal genetics/biology
Audience: Graduate

3. Identify members of the fungal research community
Audience: Graduate

4. Write and critique research grants
Audience: Graduate

5. Critique and discuss peer reviewed manuscripts
Audience: Graduate

6. Develop and deliver oral presentations (research paper and own research)
Audience: Graduate

7. Improve communication skills (oral and written)
Audience: Graduate

PL PATH 681 – SENIOR HONORS THESIS
2-4 credits.

Individual study for undergraduate students in an Honors program completing a thesis in the area of Plant Pathology, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Review and analyze scientific literature.
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question.
Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research.
Audience: Undergraduate

PL PATH 682 – SENIOR HONORS THESIS
2-4 credits.

Second semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Plant Pathology, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Review and analyze scientific literature.
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question.
Audience: Undergraduate

3. Write a thesis based on original research.
Audience: Undergraduate

PL PATH 699 – SPECIAL PROBLEMS
1-5 credits.

Individual advanced work in an area of Plant Pathology under the direct guidance of a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills.
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving.
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies.
Audience: Undergraduate

4. Effectively communicate findings.
Audience: Undergraduate

PL PATH 799 – PRACTICUM IN PLANT PATHOLOGY TEACHING
1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate knowledge of Plant Pathology to a general audience.
Audience: Graduate

2. Gain teaching experience to build a teaching portfolio.
Audience: Graduate

3. Prepare appropriate lesson plans for classroom instruction and/or activities.
Audience: Graduate

4. Monitor student performance and progress through assessment and analysis.
Audience: Graduate

5. Implement classroom practices to create a safe learning environment for students, manage time, address classroom demands, and respond to diverse student needs.
Audience: Graduate

6. Demonstrate instructional strategies to engage students in the science of Plant Pathology.
Audience: Graduate

7. Collaborate with other instructors to accomplish the goals of the course.

Audience: Graduate

PL PATH 875 – SPECIAL TOPICS
1-4 credits.

Topics of current interest to Grad students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PL PATH 923 – SEMINAR
1 credit.

Seminar series on topics related to plant pathology
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Devise an engaging overview of a research area.
Audience: Graduate

2. Explain background, methods, results, and a discussion of experimental data.
Audience: Graduate

3. Design visualizations that effectively communicate data.
Audience: Graduate

4. Evaluate and provide constructive feedback on the effectiveness of scientific presentations by peers.
Audience: Graduate

5. Generate goals to improve presentation skills.
Audience: Graduate

PL PATH/BOTANY 930 – SEMINAR-MYCOLOGY
1 credit.

Topics, recent advances literature in the area of Mycology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Assess current studies and methodologies in the study of fungi.
Audience: Graduate

PL PATH 990 – RESEARCH
1-9 credits.

Independent laboratory research in preparation of a graduate thesis under supervision of a faculty member
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills.
Audience: Graduate

2. Apply the scientific method to address current questions in plant pathology and/or plant-microbial interactions.
Audience: Graduate

3. Perform necessary research methodologies to generate novel data.
Audience: Graduate

4. Effectively communicate findings to scientific audiences.
Audience: Graduate

PLANT SCIENCE (PLANTSCI)

PLANTSCI/AGROECOL 100 – FIRST-YEAR SEMINAR IN AGROECOLOGY AND PLANT SCIENCE
1 credit.

Introduction to the scientific fields of agroecology and plant science. Explore departmental, college, and campus resources that will help you succeed at UW-Madison. Engage with faculty and staff to learn about cutting-edge research related to agroecology and plant science. Explore career options available in agroecology and plant science and technology.
Requisites: None
Repeatable for Credit: No
Learning Outcomes: 1. Identify university, college, and departmental resources that support success at UW-Madison.
Audience: Undergraduate

2. Describe foundational college success skills, including organizational, critical thinking, and effective communication skills.
Audience: Undergraduate

3. Reflect on academic, career, and personal goals.
Audience: Undergraduate

4. Discuss complex issues related to agroecology and plant science with peers and instructors using evidence-based perspectives.
Audience: Undergraduate

5. Describe the variety of career opportunities available to individuals with Agroecology and Plant Science and Technology degrees.
Audience: Undergraduate

6. Describe the Agroecology major and Plant Science and Technology major and determine if either is a major they want to pursue.
Audience: Undergraduate

PLANTSCI 110 – INTRODUCTION TO PLANT SCIENCE AND TECHNOLOGY
4 credits.

Introduces the basic principles of plant science and technology as they apply to cultivated plants. Topics include the historical and economic importance of plants for food, feed, and fiber; origin, classification, and geographic distribution; plant breeding; growth, development, and physiology; agroecosystems and practices; field and greenhouse production; integrated pest management; and marketing practices. Discuss and apply associated technologies (e.g. gene editing, remote sensing, unmanned aerial vehicles).
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Define and describe plant anatomy and morphology from subcellular through whole plant organization
Audience: Undergraduate

2. Define and describe the basic principles of plant growth and development including photosynthesis, respiration, transpiration, plant growth regulators, reproduction and genetics
Audience: Undergraduate

3. Articulate how the environment and management practices affect plant growth and development
Audience: Undergraduate

4. Illustrate how cutting-edge technologies are being used to address modern agricultural challenges
Audience: Undergraduate

5. Locate and use reputable resources to communicate scientific knowledge about plants in written and oral formats
Audience: Undergraduate

6. Identify areas of interest and potential opportunities for career development in plant science and technology
Audience: Undergraduate

PLANTSCI 121 – COLLOQUIUM IN PLANT SCIENCE AND TECHNOLOGY
1 credit.

Overview of regional, national and international areas of importance to various plant science industries. Discuss current plant science related topics of special interest.
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe what education and training is needed for various careers in horticulture and plant sciences.
Audience: Undergraduate

2. Discuss current plant science topics and be able to find scientific, unbiased sources of information.
Audience: Undergraduate

3. Identify opportunities for career development in the plant sciences and horticulture.
Audience: Undergraduate

4. Discuss the numerous ways that plant science and horticulture can help to reduce climate change effects for a sustainable future.
Audience: Undergraduate

PLANTSCI 227 – PROPAGATION OF HORTICULTURAL PLANTS
3 credits.

Methods of propagation of herbaceous and woody plants, fundamental anatomical and physiological principles underlying sexual and asexual propagation of plants.
Requisites: Sophomore standing and (BOTANY 100, BOTANY/BIOLOGY 130, or ZOOLOGY/BIOLOGY/BOTANY 152)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Explain the science behind the major types of asexual and sexual propagation methods
Audience: Undergraduate

2. Perform the major types of asexual and sexual propagation methods
Audience: Undergraduate

3. Describe the role of research in plant propagation
Audience: Undergraduate

4. Identify appropriate plant propagation reference materials available for developing propagation protocols
Audience: Undergraduate

5. Provide expertise in plant propagation for possible future employment in commercial operations
Audience: Undergraduate

PLANTSCI 230 – WINES AND VINES OF THE WORLD
2 credits.

An introduction to grape production and wine culture. Learn the science of growing grapes, wine-making, and wine appreciation. Topics include cultural history and geography of the world's grape-producing regions, principles of plant anatomy and physiology, biochemistry of wine production, wine producing regions of the world and wine styles, and sensory evaluation of wines. Includes a wine tasting discussion to explore the sensory attributes of the wines and production practices specific to the wine production regions to be covered. Students must be 21 years of age by the start of class to enroll.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe the basic chemistry and biology concepts pertaining to viticulture and winemaking
Audience: Undergraduate

2. Explain general concepts of sustainable grape production and the winemaking process
Audience: Undergraduate

3. Discuss the history and social dimensions of wines from around the world and their relation to culture
Audience: Undergraduate

4. Implement tasting strategies to characterize wine from different regions of the world
Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenges of worldwide grape production
Audience: Undergraduate

6. Analyze sustainability issues and/or practices in viticulture using a systems-based approach
Audience: Undergraduate

PLANTSCI 234 – HERBACEOUS ORNAMENTAL PLANT IDENTIFICATION, CULTURE, AND USE
4 credits.

Field identification, landscape characteristics, uses, environmental requirements, and adaptability of herbaceous ornamental plants. Topics include annual flowers, herbaceous perennials and ornamental grasses, groundcovers, bulbs and containerized outdoor tropical plants.
Requisites: Sophomore standing and (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or BOTANY 100)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Use basic taxonomic tools needed for plant identification, including classification, vegetative and reproductive morphology, and nomenclature of cultivated plants
Audience: Undergraduate

2. Recognize many herbaceous plants, both native and exotic, by family, species (genus and specific epithet), variety, cultivar, and sometimes trademark
Audience: Undergraduate

3. Discuss herbaceous plant identification, distribution, ornamental characteristics as well as undesirable features, culture, adaptability, and uses
Audience: Undergraduate

4. Select herbaceous plants for specific purposes and site conditions
Audience: Undergraduate

5. Identify appropriate reference material and guides for identifying herbaceous plants
Audience: Undergraduate

PLANTSCI 240 – THE SCIENCE OF CANNABIS
1 credit.

An overview of the history, legality, regulation, anatomy and botany, agronomic and horticultural practices, and end-use potential of industrial hemp. Focus on sustainable agricultural production and processing of industrial hemp for food, fiber, and cannabinoids. Gain real world insight into this rapidly expanding area. Hands-on experience growing, propagating and pollinating hemp.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Define the past and present status of legality of hemp in Wisconsin, the United States, and in the world.
Audience: Undergraduate

2. Acquire a basic comprehension of hemp anatomy, physiology and genetics.
Audience: Undergraduate

3. Describe best practices for growing, harvesting, and processing industrial hemp for grain, fiber, and cannabinoid production.
Audience: Undergraduate

4. Discuss the pros, cons, and viability of at least 10 hemp-derived products in the U.S.
Audience: Undergraduate

5. Explain the social, economic, and environmental dimensions of the sustainability challenges of cannabis production
Audience: Undergraduate

6. Apply sustainability principles and frameworks to addressing the challenge of producing cannabis derived products
Audience: Undergraduate

PLANTSCI/PL PATH 261 – SUSTAINABLE TURFGRASS USE AND MANAGEMENT
2 credits.

Sustainable use and management of turfgrass landscapes in urban and suburban environments, including home lawns, golf courses, and sports fields. Focus is on creating sustainable and attractive turfgrass landscapes through proper species selection, use of slow-release or organic fertilizer practices, and minimizing the use of pesticides and supplemental irrigation.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe how turf is used in urban and suburban communities
Audience: Undergraduate

2. Identify the positive environmental impacts of using turfgrass
Audience: Undergraduate

3. Identify the negative environmental impacts of turfgrass management
Audience: Undergraduate

4. Identify the 3 major pest groups in turfgrass and describe sustainable management strategies for each
Audience: Undergraduate

PLANTSCI/PL PATH 262 – TURFGRASS MANAGEMENT LABORATORY
1 credit.

Hands-on turf establishment, cool- and warm-season grass, seed and weed identification, chemical application, and turf cultivation techniques and equipment use, plus field trips to major league sport facilities and golf courses.
Requisites: PL PATH/PLANTSCI 261 or concurrent enrollment (or HORT 261 prior to Fall 2025)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify the species of turfgrass commonly used in Wisconsin and the conditions they are most suited to.
Audience: Undergraduate

2. Describe management strategies that can be implemented to increase the sustainability of turfgrass management.
Audience: Undergraduate

3. List the most common pests observed on Wisconsin turfgrass and describe strategies for their sustainable management.
Audience: Undergraduate

4. Calculate the amount of seed needed to properly establish a turfgrass site, the amount of fertilizer needed to adequately fertilize turfgrass, and the concentration of pesticides needed to suppress common turfgrass pests.
Audience: Undergraduate

PLANTSCI/LAND ARC 263 – WOODY LANDSCAPE PLANT IDENTIFICATION, CULTURE, AND USE
4 credits.

Field identification, landscape characteristics, uses, environmental requirements, and adaptability of woody ornamental plants; their autumn and winter characteristics. Topics include trees, shrubs, evergreens, vines and woody groundcovers.
Requisites: Sophomore standing and (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or BOTANY 100)
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Use basic taxonomic tools needed for plant identification, including classification, vegetative and reproductive morphology, and nomenclature of cultivated plants
Audience: Undergraduate

2. Recognize many woody ornamental trees, shrubs, groundcovers, and vines, both native and exotic, by family, species (genus and specific epithet), variety, cultivar, and sometimes trademark
Audience: Undergraduate

3. Discuss woody landscape plant identification, distribution, ornamental characteristics as well as undesirable features, culture, adaptability, and uses
Audience: Undergraduate

4. Select woody landscape plants for specific purposes and site conditions
Audience: Undergraduate

5. Identify appropriate reference material and guides for identifying woody landscape plants
Audience: Undergraduate

PLANTSCI 289 – HONORS INDEPENDENT STUDY
1-2 credits.

Research work under direct guidance of a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor. Intended for students in the CALS Honors Program.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Develop critical, analytical and independent thinking skills through a scientific research project.
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving in a scientific research project.
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies through a research project.
Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format.
Audience: Undergraduate

PLANTSCI 299 – INDEPENDENT STUDY
1-3 credits.

Research work under direct guidance of a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop critical, analytical and independent thinking skills through a scientific research project.
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving in a scientific research project.
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies through a research project.
Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format.
Audience: Undergraduate

PLANTSCI 300 – CROPPING SYSTEMS
3 credits.

Agronomic cropping systems of the Midwest: environmental impacts, productivity, and profitability. Cropping system diversification and sustainable agriculture. An agroecological approach, the application of ecological concepts and principles for the improvement of cropping systems is emphasized. Specific topics include agricultural intensification, agroecosystem structure and function, aspects of technology adoption, soil erosion and conservation, tillage systems, weed ecology and management, nutrient dynamics and management, water quality, crop rotation, and cropping system diversification.
Requisites: AGRONOMY 100, HORT 120, PLANTSCI 110, ENVIR ST/ AGROECOL/C&E SOC/ENTOM 103 (or AGRONOMY 103 prior to Fall 2025), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe the dynamic history and unique characteristics of agriculture
Audience: Both Grad & Undergrad

2. Identify factors that drive change and those that constrain change in cropping systems
Audience: Both Grad & Undergrad

3. Use an agroecological approach to better understand and improve cropping systems
Audience: Both Grad & Undergrad

4. Explain key components of cropping systems and their impact on agroecosystem services and sustainability
Audience: Both Grad & Undergrad

5. Evaluate new and emerging approaches to crop management in the context of sustainability and potential tradeoffs
Audience: Both Grad & Undergrad

6. Develop a comprehensive grant research proposal that effectively addresses a topic pertinent to sustainability of cropping systems
Audience: Graduate

PLANTSCI 302 – FORAGE MANAGEMENT AND UTILIZATION
3 credits.

Establishment, management, harvesting and utilization of forage crops for use as hay, pasture and silage. Emphasis on cool season perennial grasses and legumes.
Requisites: Junior standing and (DY SCI/AN SCI 101, ZOOLOGY/ BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, AGRONOMY 100, PLANTSCI 110, or BIOCORE 381) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Explain the importance of forages in Wisconsin, USA, and the world
Audience: Both Grad & Undergrad

2. Identify forage species commonly grown and know the environmental conditions to which each is best adapted
Audience: Both Grad & Undergrad

3. Identify an alfalfa variety or corn silage hybrid best suited for a specific environment
Audience: Both Grad & Undergrad

4. Describe how legumes and grasses grow, and regrow, after harvest or grazing
Audience: Both Grad & Undergrad

5. Recommend practices to optimize establishment, growth, persistence, and nutritive value of forages
Audience: Both Grad & Undergrad

6. Evaluate how the environment impacts forage persistence, production, and quality
Audience: Both Grad & Undergrad

7. Develop optimal harvest strategies based on farming operation goals
Audience: Both Grad & Undergrad

8. Explain the principles of preserving forage crops (hay or silage) and direct grazing
Audience: Both Grad & Undergrad

9. Recognize major pests (diseases, insects, and weeds) that affect alfalfa production and best management practices for control
Audience: Both Grad & Undergrad

10. Communicate effectively ideas in written reports and oral presentations
Audience: Both Grad & Undergrad

11. Understand and summarize current topics in forages research
Audience: Graduate

PLANTSCI 310 – PLANT SCIENCE AND TECHNOLOGY IN CROPPING SYSTEMS
4 credits.

Explores the application of plant science and current technologies in both field and controlled environments to enhance crop production. Analyzes the impacts of these technologies on agroecosystem structure and function, examining the trade-offs that affect productivity, profitability, environmental sustainability, and social outcomes.
Requisites: BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, BIOCORE 381, PLANTSCI 110, HORT 120, AGRONOMY 100, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Critically assess state-of-the-art technologies in plant science, productivity, and utilization
Audience: Undergraduate

2. Evaluate technology impacts on agroecosystem structure and function specifically productivity, profitability, environmental, and social outcomes
Audience: Undergraduate

3. Articulate trade-offs associated with technology adoption, technology avoidance, and system choices
Audience: Undergraduate

4. Effectively apply and communicate knowledge about plant science and use of technologies in crop production
Audience: Undergraduate

5. Evaluate the potential applications of state-of-the-art plant science technologies in their current or proposed research, considering the practical implications, benefits, and challenges of integrating these technologies into their work
Audience: Graduate

PLANTSCI 320 – ENVIRONMENT OF CULTIVATED PLANTS
3 credits.

An exploration of major environmental factors that regulate plant growth and development - temperature, water availability, light, and carbon dioxide. Patterns are studied temporally at the daily, seasonal (yearly), and long-term (climate) time scales, geographically at the local and global scales, and contextually in natural, agricultural, and controlled environment conditions. Includes effects of environmental conditions on plant growth and development, including adaptive mechanisms to stress conditions at the physiological level.
Requisites: BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, AGRONOMY 100, HORT 120, PLANTSCI 110, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain effects of major environmental factors on plant growth and development
Audience: Both Grad & Undergrad

2. Examine plant responses to identify effects of different weather or climate components
Audience: Both Grad & Undergrad

3. Reflect on how changes in climate will affect plants at their current distribution
Audience: Both Grad & Undergrad

4. Explain how development stages in plants are effective integrators of climate data
Audience: Both Grad & Undergrad

5. Evaluate the role of environmental variables in plant growth and development in general and specific primary literature
Audience: Graduate

PLANTSCI 333 – SURVEY OF CONTROLLED ENVIRONMENT FOOD PRODUCTION
2 credits.

Survey of the basic principles and concepts of the biology of plants and their application to cultivation of food crops in controlled environments. Integrates topics including: organic systems, sustainability, urban agriculture, and socioecological factors.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Explain and apply concepts from biological and physical sciences to growing plants in controlled environments with an emphasis on application in organic systems.
Audience: Undergraduate

2. Investigate the effects of controlled environments on plant growth and evaluate the results.
Audience: Undergraduate

3. Select crops and cultivars appropriate for growing in controlled environments, indoors and outdoors.
Audience: Undergraduate

4. Discuss the scientific principles behind food safety, sanitation, organic practices, and good agricultural practices in controlled environments.
Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenge of food production in controlled environments, specifically their application in urban food systems.
Audience: Undergraduate

6. Describe the social, economic, and environmental dimensions of controlled environment agriculture and identify potential trade#offs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Undergraduate

PLANTSCI 334 – GREENHOUSE CULTIVATION
2 credits.

Principles of selection, production, handling, use of fruits, vegetables, flowers, and foliage plants grown indoors.
Requisites: BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, AGRONOMY 100, PLANTSCI 110, or HORT 120
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key aspects of the greenhouse industry and the methods and principals of growth in controlled environments
Audience: Undergraduate

2. Develop critical thinking skills and apply scientific concepts related to growing plants in controlled environments
Audience: Undergraduate

PLANTSCI 335 – GREENHOUSE CULTIVATION LAB
1 credit.

Provides a hands-on experience in and understanding of greenhouse cultivation.
Requisites: PLANTSCI 334 or concurrent enrollment (or HORT 334 prior to Fall 2025)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate the skills, techniques, and practices used in greenhouse cultivation.
Audience: Undergraduate

PLANTSCI 338 – PLANT BREEDING AND BIOTECHNOLOGY
3 credits.

Principles of crop plant improvement are discussed in the context of genetics, plant biology, plant breeding, plant biotechnology, and world food, feed, and raw material needs.
Requisites: BIOLOGY/BOTANY 130, GENETICS 466, 467, BIOCORE 381, or (ZOOLOGY/BIOLOGY/BOTANY 151 and 152 or concurrent enrollment in ZOOLOGY/BIOLOGY/BOTANY 152)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the basic principles of plant breeding
Audience: Both Grad & Undergrad

2. Describe and analyze different plant breeding systems and methods
Audience: Both Grad & Undergrad

3. Identify, formulate, and solve breeding problems using appropriate information and approaches
Audience: Both Grad & Undergrad

4. Discuss the professional and ethical responsibility of plant breeding activities
Audience: Both Grad & Undergrad

5. Synthesize knowledge to propose improvements to breeding systems and write clear and concise technical reports and research articles
Audience: Both Grad & Undergrad

6. Discuss the significance of current research in the field of plant breeding
Audience: Both Grad & Undergrad

7. Critically assess and compare various breeding strategies
Audience: Both Grad & Undergrad

8. Evaluate advanced breeding strategies and technologies as presented in scientific literature (e.g. use of genomic tools in breeding, CRISPR, speed breeding strategies, and use of AI in breeding among others)
Audience: Graduate

PLANTSCI 340 – PLANT GENOME ENGINEERING AND EDITING
3 credits.

Presents an overview of the techniques, biology and underlying theory of plant tissue culture, genetic engineering and genome editing. Overviews of research and commercial applications, and issues/challenges in the area of plant biotechnology are also covered.
Requisites: (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY/BIOLOGY 102, or BIOCORE 381) and (CHEM 104, 109, or 116), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recall and summarize the general principles, practices and application of plant cell and tissue culture, and genetic engineering and gene editing in science, agriculture and industry.
Audience: Both Grad & Undergrad

2. Apply experimental design and analysis of plant biotechnology experiments.
Audience: Both Grad & Undergrad

3. Illustrate representative plant cell culture and bioengineering techniques.
Audience: Both Grad & Undergrad

4. Recall biosafety and regulatory requirements for conducting research involving cell culture, microbes and recombinant DNA.
Audience: Both Grad & Undergrad

5. Understand issues and challenges encountered in the areas of in vitro culture and plant biotechnology
Audience: Both Grad & Undergrad

6. Demonstrate understanding, application and synthesis of concepts learned in the course through completion of a review paper on approved topics relating to plant biotechnology
Audience: Graduate

PLANTSCI 350 – PLANTS AND HUMAN WELLBEING
2 credits.

Plants provide not only the foundation of food, clothing, and shelter essential for human existence, but also some of the key raw materials for transcendence and abstraction through music, art, and spirituality. Since antiquity, we have co-evolved with plants and their derivative products, with each exerting a domesticating force on the other. It is, for example, impossible to think of our modern life without its plant-based accompaniments in the form of cotton, sugar, bread, coffee, and wood. Yet they are so ubiquitous we may forget they all derive from plants discovered, domesticated, bred, and farmed for millennia in a never-ending pursuit to improve our wellbeing. Major points of intersection between plants and human wellbeing will be explored from a horticultural point of view by highlighting a plant or group of plants that represent a primary commodity or resource through which humans have pursued their own aims and explore effects and impacts on human society.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Acquire, integrate and apply knowledge of how plants and plant materials impact human wellbeing through readings, discussions, lectures, and examination of plant materials and their products
Audience: Undergraduate

2. Develop the ability to discuss scientific topics in small groups and answer questions about how these topics intersect with human wellbeing and public policy.
Audience: Undergraduate

3. Explain the social, economic, and environmental dimensions of the sustainability challenge associated with the production of plant-based materials for needs and wants associated with human wellbeing.
Audience: Undergraduate

4. Understand how the biological aspects of plants and plant materials dictate how these crops will be used by different cultures for specific aspects of wellbeing
Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of production of plant materials for the needs and wants of human wellbeing
Audience: Undergraduate

6. Understand how plants and plant materials are intertwined with both wellbeing and un-wellbeing in modern human societies, and explore this interaction through discussions, reflections, and lecture material.
Audience: Undergraduate

PLANTSCI 351 – A DEEPER LOOK AT PLANTS AND HUMAN WELLBEING
1 credit.

Plants are essential for human wellbeing, yet they are often manipulated in ways that contribute significantly to human and environmental detriment. Provides an opportunity to consider the scientific, social, economic, and public policy implications of plants or groups of plants and dive deeply into those subjects for a variety of crops that are essential for human societies.
Requisites: Concurrent enrollment in PLANTSCI 350
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Acquire, integrate and apply knowledge of how plants and plant materials impact human wellbeing through readings, discussions, lectures, and examination of plant materials and their products.
Audience: Undergraduate

2. Develop the ability to discuss scientific topics in small groups and answer questions about how these topics intersect with human wellbeing and public policy.
Audience: Undergraduate

3. Explain the social, economic, and environmental dimensions of the sustainability challenge associated with the production of plant-based materials for needs and wants associated with human wellbeing.
Audience: Undergraduate

4. Understand how the biological aspects of plants and plant materials dictate how these crops will be used by different cultures for specific aspects of wellbeing
Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of production of plant materials for the needs and wants of human wellbeing
Audience: Undergraduate

6. Understand how plants and plant materials are intertwined with both wellbeing and un-wellbeing in modern human societies, and explore this interaction through discussions, reflections, and lecture material.
Audience: Undergraduate

PLANTSCI 360 – GENETICALLY MODIFIED CROPS: SCIENCE, REGULATION & CONTROVERSY
2 credits.

Explores how and why genetically modified (GM) crops are created and their regulation at the federal and state level. Learn about the impacts of GM crops and critically evaluate arguments both for and against their use. Introduction to the complex economic, cultural, and political issues surrounding GM crops.
Requisites: ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, GENETICS 466, or GENETICS 467
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain how genetically modified crops are made and compare genetic engineering with other plant breeding methods.
Audience: Undergraduate

2. Describe the US coordinated framework for the regulation of biotechnology and labeling laws.
Audience: Undergraduate

3. Discuss the potential risks and benefits of genetically modified crops for agriculture, the environment, and human health.
Audience: Undergraduate

4. Analyze different perspectives on controversial topics related to genetically modified organisms.
Audience: Undergraduate

PLANTSCI/A A E/PL PATH 367 – INTRODUCTION TO ORGANIC AGRICULTURE: PRODUCTION, MARKETS, AND POLICY
3 credits.

Provides an in-depth understanding of the history of organic agriculture, its production, processing, marketing, and social dimensions, and its impact on environmental, community, and human health.
Requisites: ENVIR ST/AGROECOL/C&E SOC/ENTOM 103 (or AGRONOMY 103 prior to Fall 2025), AGRONOMY 100, HORT 120, PLANTSCI 110, BOTANY/PL PATH 123, SOC/C&E SOC 222, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the history of current organic systems and how it influences the way that organic farms and industries work.
Audience: Both Grad & Undergrad

2. Explore the biological, ecological, and agricultural underpinnings of organic production systems.
Audience: Both Grad & Undergrad

3. Examine how organic systems, social initiatives, and regulations are developed and how they shape business activities, community development efforts, and human and environmental health outcomes.
Audience: Both Grad & Undergrad

4. Evaluate the benefits and limitations of organic systems, social initiatives, and regulations from environmental, social, economic, and racial justice perspectives.
Audience: Both Grad & Undergrad

5. Analyze sustainability issues and/or practices using a systems-based approach.
Audience: Both Grad & Undergrad

6. Describe the social, economic, and environmental dimensions of organic farming and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Both Grad & Undergrad

7. Develop the capacity to evaluate sustainability and resilience outcomes of organic and other agricultural production and processing systems using interdisciplinary methods.
Audience: Graduate

PLANTSCI 370 – WORLD VEGETABLE CROPS
3 credits.

An overview of the importance of fresh and processed vegetables worldwide. Vegetable origin, history, classification, culture, marketing, physiology, genetics, handling, quality, significance in world cultures and diets.
Requisites: HORT 120, AGRONOMY 100, PLANTSCI 110, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Integrate and apply knowledge of vegetable plants to worldwide consumption and production of vegetable crops
Audience: Undergraduate

2. Discuss the diversity of vegetable plants consumed around the world with particular attention to how vegetable plant families are used in different world regions
Audience: Undergraduate

3. Explain how the biological aspects of vegetable plants, including their physiology and genetics, dictate how these crops will be produced in different world regions
Audience: Undergraduate

4. Describe the nutritional profile, culinary characteristics, and important metabolites that are found in vegetable plants for defensive and attractant purposes
Audience: Undergraduate

PLANTSCI 372 – SEMINAR IN ORGANIC AGRICULTURE
1 credit.

Faculty, regional professionals, local organic farmers, and students present and discuss topics relevant to history, marketing, economics, production, and social context of organic and sustainable agriculture.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the work activities, career attributes, challenges, and preparation for employment described by practitioners in organic agricultural systems.
Audience: Undergraduate

2. Identify personal interests and potential career paths within organic agriculture based on knowledge of the skills required and day-to-day work described by current practitioners.
Audience: Undergraduate

3. Demonstrate verbal and written workplace communication skills through resume-building, interviews, presentations, and networking.
Audience: Undergraduate

4. Describe the formal and informal professional development used by organic system practitioners.
Audience: Undergraduate

5. Design, plan, and implement an event to deepen the knowledge of a select audience around one or more areas of organic agricultural systems.
Audience: Undergraduate

PLANTSCI 375 – SPECIAL TOPICS
1-4 credits.

Special topics on issues relevant to plant sciences.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Explain concepts relating to a special topic outlined in the title
Audience: Undergraduate

PLANTSCI 376 – TROPICAL HORTICULTURAL SYSTEMS
2 credits.

Highlights the connections between tropical plants and society. Topics include multidisciplinary reflections on the biology of tropical plants, as well as an overview of different production systems and some of the social and environmental problems associated with the utilization of tropical plants in the context of local and global markets. Provides the opportunity to demonstrate comparative skills with respect to local and international challenges posed by the topics we address in class. Illustrates connections between horticulture and conservation, food security, nutrition, and global health.
Requisites: Junior standing
Course Designation: Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate interdisciplinary skills, intercultural knowledge, and global competencies through the understanding of the relationships between tropical plants and different cultures.
Audience: Undergraduate

2. Recognize social, economic, and environmental issues related to sustainable food production in tropical ecosystems and find suitable methods to address them
Audience: Undergraduate

3. Discuss the unique challenges to food security and sustainability in tropical ecosystems under the pressure of climate change
Audience: Undergraduate

4. Develop a critical perspective and creative thinking regarding the production and consumption of tropical horticultural products, and how they relate to nutrition, food security, health and wellbeing, sustainable cropping practices and community development
Audience: Undergraduate

5. Recognize the importance of green spaces, conservation of biodiversity, traditional knowledge, intellectual property rights, and equitable sharing of benefits derived from the use of tropical plants
Audience: Undergraduate

6. Apply written and public speaking skills through critical explorations of tropical food systems
Audience: Undergraduate

PLANTSCI 378 – STUDY ABROAD: TROPICAL HORTICULTURAL SYSTEMS INTERNATIONAL FIELD STUDY
2 credits.

A study abroad equivalency course for hands-on experience with international agricultural systems that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program and completion of AGROECOL 377.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Identify social, economic, and environmental issues related to tropical horticulture and find suitable methods to address them.
Audience: Undergraduate

2. Analyze diverse methods of tropical plant production and their correlation with nutrition, health, sustainable agricultural practices, and community development.
Audience: Undergraduate

3. Develop a critical perspective and creative thinking regarding the production and consumption of horticultural products, and how this can impact the livelihoods of small and large-scale producers and consumers in different parts of the world, particularly in tropical regions.
Audience: Undergraduate

4. Cultivate interdisciplinary skills, cultural awareness, and global competencies through the understanding of the ecological and socio-economic impacts of tropical crops in both Central America and in the US.
Audience: Undergraduate

PLANTSCI 380 – INDIGENOUS FOODWAYS: FOOD AND SEED SOVEREIGNTY
2 credits.

Indigenous foods of North America are a vital component of modern agricultural and food systems. Indigenous foods and foodways will be examined from interdisciplinary historical, legal, biological, and social perspectives. Historic indigenous foodways of the present-day upper Midwestern United States and the impact on food and seed sovereignty of settler colonialism and subsequent agricultural practices and policies will be explored. Current efforts to re-claim agricultural traditions and foodways to improve public health, economic opportunity, and food and seed sovereignty will be covered, including the right to healthy and culturally appropriate food produced through ecologically sound and sustainable methods, to define one's own food and agriculture systems, and to control the mechanisms and policies that govern food distribution. Hands-on activities are featured; previous examples include cooking with indigenous foods, ice fishing, and tapping maple trees for syrup.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate an understanding of the history, culture, and perspectives of Native American Nations in the Upper Midwest in relation to food and seed sovereignty
Audience: Both Grad & Undergrad

2. Explain the legal frameworks facing indigenous communities and how they interact with federal and state policies to influence food sovereignty
Audience: Both Grad & Undergrad

3. Research, analyze, discuss and present on the history and use of a particular plant or animal; demonstrate knowledge of scientific concepts surrounding this plant or animal
Audience: Both Grad & Undergrad

4. Identify and analyze approaches that might be used to improve food and seed sovereignty
Audience: Both Grad & Undergrad

5. Describe the social, economic, and environmental dimensions of growing and producing indigenous crops and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course
Audience: Both Grad & Undergrad

6. Analyze the causes of and solutions for the sustainability challenge of improving food sovereignty in tribal communities in the US
Audience: Both Grad & Undergrad

7. Develop a capstone project based on course materials
Audience: Graduate

PLANTSCI 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

Internship under guidance of a faculty or instructional academic staff member in Plant and Agroecosystem Sciences and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Apply concepts learned in coursework to authentic professional situations
Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry
Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations
Audience: Undergraduate

PLANTSCI 400 – STUDY ABROAD IN PLANT SCIENCES
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Demonstrate understanding of concepts described in course syllabus
Audience: Undergraduate

PLANTSCI 501 – PRINCIPLES OF PLANT BREEDING
3 credits.

Principles involved in breeding and maintaining economic crops; factors affecting the choice of breeding methods; alternative approaches through hybridization and selection.
Requisites: (GENETICS 466, 467, PLANTSCI 338, or HORT 338 prior to Fall 2025) and (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, or BIOCORE 381), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify key biological and quantitative principles behind the science of plant breeding.
Audience: Both Grad & Undergrad

2. Recognize how genetic variation is generated and how other sources of variation can affect phenotypes.
Audience: Both Grad & Undergrad

3. Describe how crops were domesticated, and how germplasm can be deployed by plant breeders to improve crops.
Audience: Both Grad & Undergrad

4. Apply scientific theories, concepts, reasoning, and quantitative and qualitative approaches to understand and solve problems in plant breeding and plant genetics.
Audience: Both Grad & Undergrad

5. Use terminology accurately and effectively in describing plant breeding phenomena and processes.
Audience: Both Grad & Undergrad

6. Evaluate and discuss relevant scientific concepts.
Audience: Both Grad & Undergrad

7. Relate scientific information found in primary scientific literature to key issues and concepts in plant breeding.
Audience: Graduate

PLANTSCI 510 – SENIOR CAPSTONE EXPERIENCE
2 credits.

Apply classroom learning to problems of societal relevance. Integrate diverse bodies of knowledge to identify and evaluate contemporary issues relevant to plant scientists.
Requisites: PLANTSCI 110, 310, and senior standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Integrate existing knowledge of plant science and technology with current research to evaluate key contemporary issues in the field of plant and agroecosystem sciences.
Audience: Undergraduate

2. Synthesize plant science information, predictions, insights, and hypotheses into effective forms of written and oral communication.
Audience: Undergraduate

3. Evaluate plant sciences information from a broad range of sources.
Audience: Undergraduate

4. Discuss societal, economic, ethical, scientific, and social issues relevant to plant scientists
Audience: Undergraduate

PLANTSCI/ATM OCN 532 – ENVIRONMENTAL BIOPHYSICS
3 credits.

Plant-environment interactions with particular reference to energy exchanges and water relations. Models are used to provide a quantitative synthesis of information from plant physiology, soil physics, and micrometeorology with some consideration of plant-pest interactions.
Requisites: (BIOLOGY/BOTANY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381) and (MATH 211, 217, or 221) and (PHYSICS 103, 201, 207, or 247), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Apply numerical models that describe radiation fluxes in natural environments and account for latitude and longitude, time of day and year, sun angle, direct and diffuse solar radiation, and radiative properties of natural surfaces
Audience: Both Grad & Undergrad

2. Apply numerical models that describe how soil and air temperatures vary across a continuum of temporal scales (from hourly to annual) and are impacted by varied physical environments
Audience: Both Grad & Undergrad

3. Calculate growing degree-days using different numerical models and demonstrate knowledge about phenological development of plants and insects
Audience: Both Grad & Undergrad

4. Apply numerical models that represent wind speed within and above vegetative canopies and account for atmospheric turbulence
Audience: Both Grad & Undergrad

5. Calculate heat and mass (water, carbon dioxide) transport between organisms, soils, plant canopies, and the atmosphere using numerical models that represent conductance, diffusion, convective transport of heat, infiltration of water and drainage in soil, evaporation, and transpiration
Audience: Both Grad & Undergrad

6. Apply numerical modeling to calculate transmission and interception of direct, diffuse, and scattered solar radiation in plant canopies
Audience: Both Grad & Undergrad

7. Demonstrate knowledge about different numerical approaches to calculate evapotranspiration and photosynthesis of plants from the leaf to canopy level
Audience: Both Grad & Undergrad

8. Demonstrate basic knowledge about environmental biophysics through application of numerical equations and/or a model to a scientific question developed in close collaboration with the course instructor
Audience: Undergraduate

9. Demonstrate advanced knowledge about environmental biophysics through the independent development of a research project that produces new information
Audience: Graduate

PLANTSCI 550 – MOLECULAR APPROACHES FOR CROP IMPROVEMENT
3 credits.

Survey and exploration of the molecular methods used by plant scientists to develop improved crop plants. Topics include CRISPR, T-DNA transformation, RNAi, gene editing systems, and molecular techniques for crop improvement.
Requisites: (BIOCHEM 501 or 507) and (GENETICS 466 or 467); or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Critically read scientific journal articles.
Audience: Both Grad & Undergrad

2. Evaluate and discuss scientific results as reported in journal articles.
Audience: Both Grad & Undergrad

3. Describe how discoveries in basic science lead to practical developments that drive crop improvement.
Audience: Both Grad & Undergrad

4. Describe the following molecular methods: Genome Sequencing, plant transformation, Gene Silencing, CRISPR-Cas9 genome editing, base-editors, and other genome manipulation methods based on CRISPR-Cas9.

Audience: Both Grad & Undergrad

5. Utilize the following bioinformatics tools: BLAST searching, EFP Browser, and gRNA design tools transformation, Gene Silencing, and CRISPR-based gene editing.
Audience: Both Grad & Undergrad

6. Demonstrate communication skills to multiple audiences.
Audience: Both Grad & Undergrad

7. Develop critical thinking skills to design experiments and peer review of scientific papers.
Audience: Graduate

PLANTSCI/GENETICS 615 – GENETIC MAPPING
3 credits.

Computing-intensive preparation for genetic mapping research, including linkage analysis and QTL mapping in designed crosses; linkage disequilibrium and association analysis (GWAS).
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Compare the principles and applicability of linkage vs association mapping
Audience: Graduate

2. Describe how population and model parameters affect statistical power

Audience: Graduate

3. Construct genetic linkage maps and discover QTL in designed crosses
Audience: Graduate

4. Conduct genome-wide association analyses and interpret the results
Audience: Graduate

PLANTSCI 681 – SENIOR HONORS THESIS
2-4 credits.

Individual study and research for students completing theses under direct guidance of a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor. Intended for students in the CALS Honors Program.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2018
Learning Outcomes: 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem.
Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses.
Audience: Undergraduate

3. Carry out analysis of data related to the testable hypotheses.
Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.
Audience: Undergraduate

5. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work.
Audience: Undergraduate

PLANTSCI 682 – SENIOR HONORS THESIS
2-4 credits.

Individual study and research for students completing theses under direct guidance of a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor. Intended for students in the CALS Honors Program. Continuation of PLANTSCI 681
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2009
Learning Outcomes: 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem.
Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses.
Audience: Undergraduate

3. Carry out analysis of data related to the testable hypotheses.
Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.
Audience: Undergraduate

5. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work.
Audience: Undergraduate

PLANTSCI 699 – SPECIAL PROBLEMS
1-4 credits.

Independent research guided by a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Articulate a clear research question or problem and formulate a hypothesis.
Audience: Undergraduate

2. Identify appropriate research methodologies and collect sound scientific data.
Audience: Undergraduate

3. Apply critical thinking skills to interpret laboratory data and apply problem solving skills to constructively address research setbacks.
Audience: Undergraduate

4. Practice research ethics and responsible conduct in research.
Audience: Undergraduate

5. Communicate scientific ideas and results verbally and in written form effectively.
Audience: Undergraduate

PLANTSCI 720 – PHYSIOLOGY OF PLANT PRODUCTION
3 credits.

Examines the role of physiological processes in agricultural plant production, including the effects of primary productivity, water relations, mineral nutrition, and temperature responses. Plasticity and adaptation (through breeding) to different agricultural environments are studied.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe the role of plant physiology and how its adaptation and plasticity are important for plant production
Audience: Graduate

2. Evaluate primary literature on the use of physiological concepts in issues related to agricultural production
Audience: Graduate

3. Design experiments that test hypotheses related to the physiology of agricultural plants
Audience: Graduate

4. Analyze the potential impacts of climatic changes on production systems based on limitations of plant physiology
Audience: Graduate

PLANTSCI 771 – EXPERIMENTAL DESIGN AND ANALYSIS
2 credits.

Review of methods for controlling error in research experiments; review and in-depth development of factorial treatment designs; theory, analysis, and examples of advanced experimental designs for plant and animal research.
Requisites: F&W ECOL/STAT 572 or concurrent enrollment, AN SCI 865 or concurrent enrollment, or HORT 572 prior to Spring 2025
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe the importance of experimental design in research.
Audience: Graduate

2. Plan and execute a proper basic experimental design, critically evaluate personal limitations, and actively seek assistance when necessary.
Audience: Graduate

3. Use proper experimental design and analysis tools for most agricultural situations.
Audience: Graduate

4. Explain experimental design in the context of agricultural experimentation.
Audience: Graduate

PLANTSCI 772 – APPLICATIONS IN ANOVA AND MIXED MODELS
2 credits.

Development of models, programs, inferences, and interpretations of analysis of variance in biological research; mixed models and their development; choosing the correct inference range; variance and covariance analyses; repeated measures; dealing with missing data.
Requisites: (F&W ECOL/STAT 572 or concurrent enrollment, AN SCI 865 or concurrent enrollment, or HORT 572 prior to Spring 2025) and (PLANTSCI 771 or concurrent enrollment, or AGRONOMY 771 prior to Fall 2025)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe the importance of experimental design in research.
Audience: Graduate

2. Plan and execute a proper advanced experimental design.
Audience: Graduate

3. Use proper experimental design and analysis tools for most advanced agricultural experiments.
Audience: Graduate

4. Explain the theory and concepts of mixed models as well as applications of mixed models in biological research settings.
Audience: Graduate

PLANTSCI 799 – PRACTICUM IN PLANT SCIENCES TEACHING
1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Articulate learning goals for the practicum in cooperation with supervising instructor
Audience: Graduate

2. Prepare and/or implement lesson plans for a class period, week, or module of the class
Audience: Graduate

3. Deliver course content and/or facilitate discussion
Audience: Graduate

4. Identify pedagogical strengths and opportunities for growth based on classroom assessment and/or feedback
Audience: Graduate

PLANTSCI 811 – BIOMETRICAL PROCEDURES IN PLANT BREEDING
3 credits.

Understanding and application of quantitative genetic theory and other molecular and analytical tools as it relates to plant breeding.
Requisites: Graduate/professional standing and F&W ECOL/STAT 572 (or HORT 572 prior to Spring 2025) or AN SCI 865
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe quantitative genetics principles, including heritability, repeatability, and resemblance between relatives, and the application of these concepts to assess genetic variation and trait inheritance in plant populations.
Audience: Graduate

2. Analyze phenotypic datasets and interpreting results, particularly in relation to variance partitioning and resource allocation in plant breeding.
Audience: Graduate

3. Identify the impact of genotype-by-environment (G × E) interactions and environmental stability on breeding outcomes, and the application of this knowledge to optimize breeding strategies.
Audience: Graduate

4. Analyze and interpret genotype-phenotype association tools to identify the genetic basis of traits and refine breeding approaches across plant populations.
Audience: Graduate

5. Communicate complex biometrical and genetic concepts, through effective scientific writing and presentations, clearly conveying research findings and upholding principles of scientific integrity.
Audience: Graduate

PLANTSCI 812 – SELECTION THEORY FOR QUANTITATIVE TRAITS IN PLANTS
2 credits.

Discuss advanced topics in selection theory and the utilization of molecular markers in selection.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply the breeder's equation to design and evaluate selection schemes
Audience: Graduate

2. Explain Best Linear Unbiased Prediction (BLUP) and its application to selection
Audience: Graduate

3. Analyze multi-environment trial data to make genomic predictions
Audience: Graduate

4. Identify resource allocation tradeoffs and strategies for long-term genetic gain
Audience: Graduate

PLANTSCI/BOTANY/ZOOLOGY 830 – ECOSYSTEM SIMULATION MODELING
3 credits.

Introduces process-based mathematical models of ecosystems that are simulated on the computer. Ecosystem simulation models describe the major pools and fluxes in an ecosystem and the factors that regulate those fluxes. Mathematical equations are used to represent the processes that control how major pools (state variables) of an ecosystem change over time. Mechanistically rich, process-based ecosystem models are increasingly seen as critical for anticipating ecosystem change in a no-analog world. Learn why and how ecosystem simulation models are used in ecology. Knowledge of general ecology such as (e.g. ZOOLOGY/BOTANY 460) is strongly encouraged.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Use systems thinking to link research questions to appropriate model structure and experiments.
Audience: Graduate

2. Develop and interpret a simple ecosystem simulation model.
Audience: Graduate

3. Diagram inputs, stocks (state variables), flows, controls and outputs for an ecosystem model.
Audience: Graduate

4. Translate system diagrams to mathematical equations.
Audience: Graduate

5. Parameterize, calibrate and evaluate a model.
Audience: Graduate

6. Design simulation experiments and analyze results.
Audience: Graduate

7. Communicate results of a modeling study in written and verbal modes.
Audience: Graduate

PLANTSCI 875 – SPECIAL TOPICS
1-4 credits.

Special topics on issues relevant to plant sciences.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Explain concepts relating to a special topic outlined in the title
Audience: Graduate

PLANTSCI 920 – SEMINAR IN PLANT SCIENCE AND TECHNOLOGY
1 credit.

Presentations in plant science and technology to prepare for professional conferences, outreach meetings and clientele interactions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Communicate effectively through oral presentations, discussion and writing
Audience: Graduate

2. Translate scientific information into outreach materials for agricultural stakeholder audiences
Audience: Graduate

3. Evaluate the effectiveness of oral and written scientific communication
Audience: Graduate

PLANTSCI 957 – SEMINAR IN PLANT BREEDING AND PLANT GENETICS
1 credit.

Current research in plant breeding and plant genetics. Explore cutting-edge research methods and findings. Develop and refine scientific presentation skills.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Present current research in plant breeding and genetics clearly and effectively, including appropriate visuals and following the structure of a scientific seminar
Audience: Graduate

2. Deliver constructive feedback on peers' research and presentations, fostering a collaborative and supportive academic environment
Audience: Graduate

3. Discuss current research in plant breeding and genetics, identifying strengths,weaknesses, and areas for further research
Audience: Graduate

PLANTSCI 990 – RESEARCH
1-12 credits.

Independent research and writing for graduate students under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate graduate-level research skills and techniques
Audience: Graduate

2. Address research challenges using a broad range of theories, research methods, and approaches to scientific inquiry
Audience: Graduate

3. Formulate and design new approaches that extend plant science and technology research beyond its current boundaries
Audience: Graduate

POLITICAL SCIENCE (POLI SCI)

POLI SCI 104 – INTRODUCTION TO AMERICAN POLITICS AND GOVERNMENT
3-4 credits.

Basic institutions and processes of American government. The role of constitutional structures, parties, interest groups and elections in the system; policy formation and policy content.
Requisites: Not open to students who have taken POLI SCI 184 or POLI SCI 404
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Familiarize students with American political institutions.
Audience: Undergraduate

2. Prepare students to take upper-level classes in American politics.
Audience: Undergraduate

3. Get students interested in American politics.
Audience: Undergraduate

4. Analyze issues and policies in U.S. politics.
Audience: Undergraduate

POLI SCI 120 – INTRODUCTION TO COMPARATIVE POLITICS
4 credits.

Introduction to Comparative Politics, one of the four sub-fields in Political Science, which involves the comparative analysis of political institutions, processes, and outcomes at the national level. Examines how to usefully compare politics in a variety of countries and makes comparisons explicit and systematic in order to determine how governments work, how power is organized and contested at the national level, and how regular people can participate and pursue their interests in different political settings. Includes key concepts, theories, methods, issues, and language.
Requisites: Not open to students with credit for POLI SCI 182 (or POLI SCI 186 prior to Fall 2017)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Learn about some basic theoretical and methodological problems in the study of politics (concepts, theories, issues).
Audience: Undergraduate

2. Learn about the "real" world and how to explain it.
Audience: Undergraduate

3. Identify interesting questions about politics in different countries.
Audience: Undergraduate

4. Identify differences and similarities, and what both tell us about what we are studying.
Audience: Undergraduate

5. Understand and compare different forms of democratic and non-democratic rule.
Audience: Undergraduate

6. Become familiar with the language of political science.
Audience: Undergraduate

7. Apply the concepts of political science to analyze (and evaluate) political events in a variety of settings.
Audience: Undergraduate

POLI SCI 140 – INTRODUCTION TO INTERNATIONAL RELATIONS
3-4 credits.

Covers the major issues in international relations since the end of World War II including: the causes of war; civil wars and ethnic conflict; economic development; international trade; exchange rates and international monetary relations; international capital flows and financial crises; foreign direct investment; globalization and the environment; the UN, the IMF, World Bank, WTO, and other international organizations; and international law and human rights. The focus is on states' relations with each other and the factors determining the nature and outcomes of these international interactions. The course seeks to develop analytical tools for thinking about important questions in world politics regardless of the countries or issues involved, to examine international affairs in a systematic way. Students who have taken POLI SCI 103 prior to Fall 2017 may not enroll in this course.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand major historical and contemporary events in world politics.
Audience: Undergraduate

2. Analyze current world events through the lens of the major theories of international relations.
Audience: Undergraduate

3. Know how different approaches to the question of economic development emphasize different policy solutions.
Audience: Undergraduate

4. Understand the analytical theories explaining the expansion of trade and globalization.
Audience: Undergraduate

5. Understand and be able to analyze the controversies surrounding the major international financial institutions, specifically the World Bank and the International Monetary Fund.
Audience: Undergraduate

6. Understand the operation of the global exchange rate system and how state choices concerning monetary policy impact international financial flows.
Audience: Undergraduate

7. Understand the ways in which globalization both empowers and limits state leaders to conduct foreign economic policy.
Audience: Undergraduate

POLI SCI 160 – INTRODUCTION TO POLITICAL THEORY
3-4 credits.

Exploration of core problems of political life, such as the nature and limits of obligation, the concept of justice and its political implications, and the relationship between equality and liberty, through a selection of ancient and modern sources. Not open to students with credit for POLI SCI 209 prior to fall 2017
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and explain arguments made about important political concepts by selected thinkers in the history of political thought.
Audience: Undergraduate

2. Assess political and ethical theories.
Audience: Undergraduate

3. Analyze contemporary political arguments through course concepts.
Audience: Undergraduate

4. Develop skills of critical reasoning, reading, and analysis.
Audience: Undergraduate

POLI SCI 170 – RESEARCH METHODS IN POLITICAL SCIENCE
3-4 credits.

Introduction to political science as a discipline that focuses on the development of research questions, research designs, and the quantitative and qualitative tools commonly used to implement research designs.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze relations among individuals, domestic society, political institutions, and states.
Audience: Undergraduate

2. Explain important concepts in research design and methodology.
Audience: Undergraduate

3. Assess political science theories.
Audience: Undergraduate

4. Understand and assess the quality of empirical work in political science research.
Audience: Undergraduate

5. Apply course concepts to analysis of contemporary political debates.
Audience: Undergraduate

POLI SCI 182 – INTRODUCTION TO COMPARATIVE POLITICS (HONORS)
3-4 credits.

Introduction to Comparative Politics, one of the four sub-fields in Political Science, which involves the comparative analysis of political institutions, processes, and outcomes at the national level. Examines how to usefully compare politics in a variety of countries and makes comparisons explicit and systematic in order to determine how governments work, how power is organized and contested at the national level, and how people can participate and pursue their interests in different political settings. Includes key concepts, theories, methods, and country case studies.
Requisites: Declared in an Honors program. Not open to students with credit for POLI SCI 120
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Gain knowledge about politics in different countries, including differences in democratic and non-democratic rule, differences in political institutions, economic policies, social cleavages, and salient contemporary political issues across countries.
Audience: Undergraduate

2. Learn about concepts and theories from political science used in the study of politics in different countries.
Audience: Undergraduate

3. Learn about different methodological approaches in studying politics, including how to develop a casual research question, and how comparisons of cases can be useful for testing theories.
Audience: Undergraduate

4. Develop research and writing skills by working throughout the semester on a research paper.
Audience: Undergraduate

5. Develop communication and presentation skills by engaging in class discussion and presenting research at the end of the semester.
Audience: Undergraduate

POLI SCI 199 – DIRECTED STUDY
2 credits.

Directed study projects for freshmen and sophomores as arranged with a faculty member; students should have completed at least one course in POLI SCI.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

POLI SCI 201 – SPECIAL TOPICS IN POLITICAL SCIENCE
3-4 credits.

Introduction to compelling recent events and/or to the current research of political scientists.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024
Learning Outcomes: 1. Analyze and evaluate political science texts.
Audience: Undergraduate

2. Articulate and develop conceptual claims and arguments in political science.
Audience: Undergraduate

3. Apply course concepts to analysis of current topics in political science.
Audience: Undergraduate

POLI SCI 205 – INTRODUCTION TO STATE GOVERNMENT
3-4 credits.

Basic institutions and processes of state government in the United States; the role of parties, pressure groups, and elections in the system; the policy process, its outputs and outcomes; the role of states in the federal system, and the diversity of state politics and policy.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Examine the origins of federalism in the U.S. context and the relationship between the national and state governments.
Audience: Undergraduate

2. Explore the policies and programs administered by the states, as well as the major influences on state politics
Audience: Undergraduate

3. Understand the similarities and differences between the U.S. Constitution and the state constitutions.
Audience: Undergraduate

POLI SCI 206 – INTRODUCTION TO POLITICAL PSYCHOLOGY
3-4 credits.

Examines the psychological aspects of the political behavior of individuals--whether elites, activists or members of general publics--and their consequent political behaviors in various groups and institutional contexts. Not open to students with credit for POLI SCI 267 prior to fall 2017
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine historical and contemporary perspectives in political psychology.
Audience: Undergraduate

2. Study the psychology of political attitudes, especially as it pertains to social groups and values.
Audience: Undergraduate

3. Examine the psychological aspects of the political behavior of individuals in group and institutional contexts.
Audience: Undergraduate

POLI SCI 210 – LEFT, RIGHT, AND CENTER
3-4 credits.

Examines the fundamental principles and arguments of the traditions of conservatism, liberalism, and progressivism. Investigates the sources of disagreement among these traditions. Special emphasis on the internal conflicts within traditions, as well as efforts to overcome internal dissent. Develops understanding of ideological disagreements and an ability to argue with sophistication, respect, and civility.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Analyze and evaluate the major moral and political disagreements between the left and the right.
Audience: Undergraduate

2. Analyze and evaluate the main moral and political disagreements within the left and the right.
Audience: Undergraduate

3. Apply understanding of the history and arguments of the left and the right to contemporary disagreements.
Audience: Undergraduate

4. Develop skills of critical thinking, reading, writing, oral communication, respectful/civil interactions with others.
Audience: Undergraduate

POLI SCI/LEGAL ST 217 – LAW, POLITICS AND SOCIETY
3-4 credits.

Introduction to the legal process. Examination of the various concepts of law, the perennial problems of the law, legal reasoning, and the nature and function of law and the courts.
Requisites: Freshman or sophomore standing only
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Increase knowledge about the components of the U.S. legal system.
Audience: Undergraduate

2. Understand how disputes evolve in the context of the U.S. legal system.

Audience: Undergraduate

3. Improve ability to synthesize social science readings and formulate arguments in written and oral form.
Audience: Undergraduate

4. Improve oral advocacy skills through active classroom discussion.
Audience: Undergraduate

POLI SCI/CHICLA 231 – POLITICS IN MULTI-CULTURAL SOCIETIES
3-4 credits.

Race, ethnicity, and religion as political factors; cultural pluralism, politics, and policy in the United States and selected other multi-cultural politics.
Requisites: Freshman or sophomore standing only
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Articulate how events of the past gave rise to racial and ethnic hierarchies in the United States today and how those hierarchies manifest themselves in politics.
Audience: Undergraduate

2. Recognize and question assumptions about race and ethnicity that are embedded in discussions of U.S. politics.
Audience: Undergraduate

3. Apply concepts raised in class to life in a multi-cultural society.
Audience: Undergraduate

4. Describe the ways that racial and ethnic worldviews are shaped and how they change.
Audience: Undergraduate

POLI SCI/ASIAN/GEOG/HISTORY/SOC 244 – INTRODUCTION TO SOUTHEAST ASIA: VIETNAM TO THE PHILIPPINES
4 credits.

As an introduction to Southeast Asia, covers the ethnic, cultural, religious, and political histories of the region from the classical states period to the present, with an emphasis on colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century, including an exposure to region's contemporary literature. Not open to students who completed LCA 244 prior to Fall 2019.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine the ethnic, cultural, religious, and political histories of Southeast Asia from the classical states period to the present.
Audience: Undergraduate

2. Analyze colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century in Southeast Asia.

Audience: Undergraduate

3. Explore contemporary literature in Southeast Asia.
Audience: Undergraduate

POLI SCI/GEOG/HISTORY/SLAVIC 253 – RUSSIA: AN INTERDISCIPLINARY SURVEY
4 credits.

Comprehensive interdisciplinary survey of Russian civilization from its beginnings through the present day.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025

POLI SCI/GEOG/HISTORY/SLAVIC 254 – EASTERN EUROPE: AN INTERDISCIPLINARY SURVEY
4 credits.

Comprehensive interdisciplinary survey of East European culture, society, politics, and literature from its beginnings to the present day.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

POLI SCI/ASIAN/HISTORY 255 – INTRODUCTION TO EAST ASIAN CIVILIZATIONS
3-4 credits.

Multidisciplinary and historical perspectives on the East Asian civilizations of China, Japan, Korea, Tibet and Mongolia from prehistory to the present, including developments in philosophy, economy, governance, social structure, kinship, geography, etc.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Learn, recall, and summarize key features and periodization in the history of modern East Asia.
Audience: Undergraduate

2. Apply this knowledge toward analyzing the content and form of "primary documents," including literature, film, photographs, and music.
Audience: Undergraduate

3. Identify and explain, to diverse audiences, regional and global issues pertaining to East Asia's economic and community development.
Audience: Undergraduate

4. Demonstrate critical thinking and comparative perspectives with respect to experiences or cultural approaches to international challenges.
Audience: Undergraduate

5. Write concise, well-organized, and original arguments and analyses, supported by question-driven inquiry and group discussion.
Audience: Undergraduate

6. Design and complete collaborative, team-based projects.
Audience: Undergraduate

POLI SCI/C&E SOC/HISTORY/SOC 259 — FORWARD? THE WISCONSIN IDEA, PAST AND PRESENT
1-3 credits.

Engage in ongoing reflection and dialogue on the Wisconsin Idea and how it informs the mission of the University of Wisconsin. Consider the Wisconsin Idea as it has developed since its beginnings, with a focus on what it means today and what it can mean in the future.
Requisites: Junior or senior standing only
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Listen respectfully to different opinions, respond rationally rather than emotionally, make reasoned arguments.
Audience: Undergraduate

2. Respond to another point of view with research and substantive comments or questions, present and support your own position, and thus engage in a wider conversation.
Audience: Undergraduate

3. Consider a specific question ("What makes an idea a Wisconsin Idea...?) and present a reasoned argument supporting the conclusion. (1-credit students)
Audience: Undergraduate

4. Deeply analyze an argument and respond by applying it to the student's own educational strengths and weaknesses. (3-credit students)
Audience: Undergraduate

5. Use course content to explain a controversial issue and suggest a course of action to address it, stating reasons, and anticipating counterarguments. (3-credit students)
Audience: Undergraduate

POLI SCI/AFROAMER/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/SOC/SPANISH 260 — LATIN AMERICA: AN INTRODUCTION
3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze Latin American culture and society from an interdisciplinary perspective.
Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.
Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.
Audience: Undergraduate

POLI SCI/CHICLA/HISTORY/LACIS 268 — THE U.S. & LATIN AMERICA FROM THE COLONIAL ERA TO THE PRESENT: A CRITICAL SURVEY
3 credits.

A critical examination of US-Latin American relations from the colonial era to the present, tracing the emergence and evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America. Primary attention will be focused on US relations with Mexico, Central America and the Caribbean, but other Latin American countries will figure prominently during certain episodes.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Critically examine US-Latin American relations from the colonial era to the present.
Audience: Undergraduate

2. Examine tracing the evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America.
Audience: Undergraduate

3. Discuss US relations with Mexico, Central America and the Caribbean.
Audience: Undergraduate

POLI SCI 270 – POLITICAL DATA SCIENCE
3-4 credits.

Covers the basics of data science as applied to politics. This involves two broad skill sets: (1) learning the computing and programming tools to both manage and analyze political science data; and (2) understanding the conceptual foundations of why we might manage or analyze political data in one way versus another. Programming tools and statistical concepts will be discussed using examples from various parts of political science such as elections, surveys, and experiments.
Requisites: Satisfied Quantitative Reasoning (QR) A
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize and visualize data from political science
Audience: Undergraduate

2. Wrangle messy political science data into tidy forms
Audience: Undergraduate

3. Evaluate claims about causality in political science research
Audience: Undergraduate

4. Be able to use linear regression to analyze relationships in political science
Audience: Undergraduate

5. Understand uncertainty in analysis of political data and how to quantify it
Audience: Undergraduate

6. Understand election polling and forecasting
Audience: Undergraduate

7. Analyze political data using professional tools such as R
Audience: Undergraduate

POLI SCI 272 – INTRODUCTION TO PUBLIC POLICY
3-4 credits.

Major issues of public policy in such fields as economic management, welfare, education, health, energy and the environment. How public problems develop, approaches to policy-making, why programs succeed and fail. Not open to students with credit for POLI SCI 219 prior to fall 2017
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand the provisions of the United States Constitution most related to the development and execution of public policy in the United States.
Audience: Undergraduate

2. Understand the difference between federalism and the allocation of authorities between state, county, and municipal governments.
Audience: Undergraduate

3. Learn to define and frame problems as an essential first step in the development of public policy.
Audience: Undergraduate

4. Learn to develop, analyze, and advocate policy alternatives.
Audience: Undergraduate

5. Learn how to write a policy memo.
Audience: Undergraduate

6. Learn about executive, administrative, legislative, judicial, and other governmental authorities and their respective roles in making public policy.

Audience: Undergraduate

7. Understand the role of politics in policy development.
Audience: Undergraduate

8. Learn various approaches to policy analysis.
Audience: Undergraduate

9. Learn about various tools and functions available to public policy-makers.
Audience: Undergraduate

POLI SCI 274 – POLITICAL CHOICE AND STRATEGY
3-4 credits.

An introduction to decision analysis, strategic interaction, and voting systems and their manipulation. Examines a wide range of institutions for making social choices and the opportunities for the exercise of political strategy.
Requisites: Satisfied Quantitative Reasoning (QR) A
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explore a rational-choice approach to studying politics -- also called formal political theory.
Audience: Undergraduate

2. Examine how multiple people can make a social choice.
Audience: Undergraduate

3. Examine how various voting rules and types of preferences can lead to di#erent outcomes under certain circumstances, and the implications of that for democracy.
Audience: Undergraduate

4. Explore collective action in politics and examine how people can cooperate to achieve common goals.
Audience: Undergraduate

POLI SCI/AFRICAN/AFROAMER/ANTHRO/GEOG/HISTORY/ SOC 277 – AFRICA: AN INTRODUCTORY SURVEY
4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze African society and culture from a multidisciplinary perspective.
Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.
Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.
Audience: Undergraduate

POLI SCI/AFRICAN/AFROAMER/HISTORY 297 – AFRICAN AND AFRICAN-AMERICAN LINKAGES: AN INTRODUCTION
4 credits.

Analysis of retention of African elements in African-American oral, written, and material culture. Social, cultural, and political issues regarding race, self-definition, and self-determination in both Africa and North America will be examined.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze the retention of African elements in African-American oral, written, and material culture.
Audience: Undergraduate

2. Explore social, cultural, and political issues regarding race in both Africa and North America.
Audience: Undergraduate

3. Examine self-determination in both Africa and North America.
Audience: Undergraduate

POLI SCI/CHICLA 302 – MEXICAN-AMERICAN POLITICS
3-4 credits.

This class examines the major problems and issues in Mexican-American politics since World War II. An emphasis will be placed on the ways in which race, class and culture have structured politics for the Mexican origin people. Not open to students with credit for POLI SCI 464 prior to fall 2017
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Develop an analytical framework for understanding the political dynamics of multi-cultural societies.
Audience: Undergraduate

2. Understand how the dynamics of race, class, and ethnicity shape Mexican American politics and Latino politics.
Audience: Undergraduate

3. Examine the historical conflict between Mexican and Anglo Americans.
Audience: Undergraduate

4. Understand the politics of cultural pluralism in the United States.
Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 304 – THE POLITICAL ECONOMY OF RACE IN THE UNITED STATES
3-4 credits.

Race in relation to American economic development. Problems of racial minorities in the American political and economic system. Not open to students with credit for POLI SCI 462 prior to fall 2017
Requisites: POLI SCI 104, POLI SCI 184, LEGAL ST/POLI SCI 217, CHICLA 201, or AFROAMER 151
Course Designation: Core GenEd - Civics & Perspectives
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

POLI SCI 305 – ELECTIONS AND VOTING BEHAVIOR
3-4 credits.

Psychological and social components of voting behavior, current electoral trends, role of voters in the governing process. Not open to students with credit for POLI SCI 467 prior to fall 2017
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop a theoretical and empirical understanding of how individuals make voting decisions.
Audience: Undergraduate

2. Be able to analyze factors that affect the results of particular elections.
Audience: Undergraduate

3. Interpret surveys and election data to analyze how specific variables affect voters.
Audience: Undergraduate

4. Develop a basis for evaluating the health of the U.S. electoral system.
Audience: Undergraduate

POLI SCI 306 – AMERICAN POLITICAL PARTIES
3-4 credits.

Examination of the electoral, organizational, and governmental roles of political parties at the national and state levels in the U.S. Emphasis on changes in response to historical and contemporary circumstances.
Requisites: POLI SCI 104 or 184
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze the past, present, and future of the U.S. party system
Audience: Undergraduate

2. Consider the advantages and disadvantages of various party nomination systems.
Audience: Undergraduate

3. Understand the electoral, organizational, and governmental roles of political parties at national and state levels.
Audience: Undergraduate

POLI SCI 311 – UNITED STATES CONGRESS
3-4 credits.

Principles, procedures and problems of the legislative process of the United States Congress. Not open to students with credit for POLI SCI 426
Requisites: Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand how Congress works, and how laws are really made today.
Audience: Undergraduate

2. Explain how Congress can serve as a check on presidential and judicial power.
Audience: Undergraduate

3. Analyze what motivates members of Congress.
Audience: Undergraduate

4. Explain how legislative rules affect policy outcomes.
Audience: Undergraduate

5. Explore why money matters in Congress.
Audience: Undergraduate

POLI SCI 314 – CRIMINAL LAW AND JUSTICE
3-4 credits.

Substantive and procedural aspects of criminal law, including the purposes of criminal justice, specific crimes, criminal responsibility and punishment, legal concepts of proof, and 4th, 5th, and 6th Amendment issues. The case approach is used. Not open to students with credit for POLI SCI 452 prior to fall 2017
Requisites: Sophomore standing and a course in POLI SCI or SOC
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Discuss the substantive and procedural aspects of criminal law.
Audience: Undergraduate

2. Explore the purposes of criminal justice.
Audience: Undergraduate

3. Examine criminal responsibility and punishment and legal concepts of proof.
Audience: Undergraduate

4. Analyze the 4th, 5th, and 6th Amendment issues.
Audience: Undergraduate

POLI SCI 315 – LEGISLATIVE INTERNSHIP
3 credits.

Practical experience in a legislative office. Policy research. Readings in legislative process.
Requisites: Consent of instructor
Course Designation: Core GenEd - Social & Behavioral Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop an understanding of work-life at the internship and what a career in the field entails.
Audience: Undergraduate

2. Build substantive knowledge about political science by linking internship experiences to classwork and critically evaluating these relationships.
Audience: Undergraduate

3. Encourage students to think about life after college by networking with other professionals, understanding the qualifications necessary to be successful in the job market, and learning how to effectively convey skills.
Audience: Undergraduate

POLI SCI 316 – CAREERS IN POLITICAL SCIENCE
1 credit.

Facilitates transitions from undergraduate academic learning related to Political Science to meaningful and rewarding professional opportunities including jobs, paid internships, graduate study, and post-graduate fellowships. Building on core coursework in Political Science and related disciplines, addresses how to utilize existing academic learning and completed readings and assignments, extra-curricular activities, student research, for-pay work, internships, and interaction with alumni and other personal networks to further develop career options. Also provides practical ways to explore and pursue a wide range of career pathways related to Political Science. Develop essential professional development materials and self-promotional skills.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Explore and inventory individual strengths, competencies and positive professional attributes, and practice how to articulate and promote those strengths, competencies and attributes in writing (e.g., resumes, cover letters) and verbally (e.g., elevator statements), and through professional branding through online presence (e.g., LinkedIn, Handshake, ePortfolios);
Audience: Undergraduate

2. Utilize assigned readings, internet resources, social media, networking opportunities, and career interviews to gather specific information about career pathways, jobs and other professional opportunities related to Political Science and related career sectors including government, nonprofits, and for-profit entities;
Audience: Undergraduate

3. Cultivate, organize and utilize professional network relationships, including among UW and Political Science alumni, that can be instrumental in promoting further academic and early career success;
Audience: Undergraduate

4. Review and practice recommended job and related interview techniques, including behavioral-based interviewing, and become more confident in adjusting to varying interview formats and questions;
Audience: Undergraduate

5. Review current research and job sector trends involving salary expectations and negotiations, benefits packages, and evolving in-person and remote work expectations, and apply the newest research and trends in prospective job application and interview processes;
Audience: Undergraduate

6. Identify, analyze, reflect upon and discuss contemporary issues involving employee/ professional diversity, equity, and inclusion among differing career pathways and job sectors, and within varied workplace cultures, as additional considerations in future career decisions.
Audience: Undergraduate

POLI SCI 320 – GOVERNMENTS AND POLITICS OF THE MIDDLE EAST AND NORTH AFRICA
3-4 credits.

An introduction to the most pertinent themes to the study of politics and governance in the Middle East. Main topics to be covered: political economy of the region; link between Islam, culture and democracy; the politics of authoritarianism; and political Islam.
Requisites: Sophomore standing, POLI SCI 104 or 140
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop a concrete understanding of the history and politics of the Middle East and North Africa (MENA).
Audience: Undergraduate

2. Apply comparative politics' theories and frameworks toward understanding the current events and the complexities of MENA's politics and governance structures
Audience: Undergraduate

3. Apply critical and analytical skills to different, even contradictory, points of views and contemporary debates relating to MENA politics and ongoing conflicts.
Audience: Undergraduate

4. Demonstrate the ability to write in several forms and present written ideas and arguments for audiences with diverse interests and backgrounds.
Audience: Undergraduate

POLI SCI 323 – ISLAM AND WORLD POLITICS
3-4 credits.

Examines the multifaceted nature of political Islam in the contemporary world. Starting with the basic tenants of Islam, and key concepts and theoretical understandings of the relationships between Islam and politics, the course builds on the approaches developed in the first part of the course examining how Islam has influenced politics differently in various parts of the world including the Middle East, Southeast Asia, and South Asia. Students will familiarize themselves with theoretical debates about the roles of Islam in politics; analyze the impact of Islam on politics in the contemporary world; and gain empirical knowledge about how Islam functions differently in various countries.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Understand theoretical debates about the roles of Islam in politics.
Audience: Undergraduate

2. Analyze the impact of Islam on politics in the contemporary world.
Audience: Undergraduate

3. Gain empirical knowledge about how Islam functions differently in various countries.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 324 – CHINESE POLITICS
3-4 credits.

Examine three questions about Chinese politics through a comparative perspective. First, what functions do formal institutions such as the political party, legislature, courts, and bureaucracy serve in an authoritarian regime? Second, what are the political forces that lay a good foundation for China to successfully transition from a planning economy to a robust market economy and sustain high-speed growth for more than four decades? Finally, how does the Chinese government deal with pressing social problems and threats to its authoritarian leadership in this new era?
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Develop an understanding of major political institutions and governance challenges of China today.
Audience: Both Grad & Undergrad

2. Evaluate evidence for China's economic reform and develop the ability to analyze other policy changes.
Audience: Both Grad & Undergrad

3. Communicate effectively through written reports and discussion.
Audience: Both Grad & Undergrad

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI/INTL ST 325 – SOCIAL MOVEMENTS AND REVOLUTIONS IN LATIN AMERICA
3-4 credits.

Explores how race, gender, and sexuality intersect with language and shape textual experiences. From marriage licenses and "don't ask, don't tell" policies to anti-slavery petitions and hashtag activism, writing has enforced, and challenged, social expectations in the United States. Examine public debates and everyday writing practices that engage with race and sex to effect change. Analyze the power of language to harm and heal, using approaches from writing studies and rhetoric to explore historical and contemporary connections among identity, text, and social life.
Requisites: Sophomore standing and (POLI SCI 120, 140 or INTL ST 101) or (POLI SCI 103 or 106 taken prior to Fall 2017)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

POLI SCI 326 – BEYOND THE INTERNSHIP: CAREER EXPLORATION & DEVELOPMENT
4 credits.

A transfer equivalency for an internship completed through the Wisconsin in Washington program.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Articulate the relationship between theory and practice, between academic learning and professional work.
Audience: Undergraduate

2. Engage fellow classmates in discussion about types of professional work and skills needed to enter and thrive in those fields.
Audience: Undergraduate

3. Identify your personal strengths and how they apply to your current workplace structures, goals, and future career aspirations.
Audience: Undergraduate

4. Develop a portfolio of materials that demonstrate your reflection on a career path, internship reflection, professional contacts, and skills and competencies in concrete terms.
Audience: Undergraduate

5. Examine and reflect on the internships sites' organizational culture, communication systems, and leadership.
Audience: Undergraduate

POLI SCI 328 – POLITICS OF EAST AND SOUTHEAST ASIA
3-4 credits.

Asia is a vibrant region politically and economically, and is very important to the United States for international security and economic stability. Given its importance, this course provides broad and essential knowledge about Asian nations with a particular focus on China, South Korea, North Korea, Indonesia, Thailand, and the Philippines. Country studies are intended to introduce major issues in comparative politics such as democratization, elections, economic development, security, religion and politics. This course will enable students to (1) gain an empirical and analytical understanding of the political dynamics of the region; (2) think comparatively within the regime and across the developing world more generally; and (3) address and debate theoretical questions in political science through Asian politics materials.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Gain an empirical knowledge about the political dynamics of the region.
Audience: Undergraduate

2. Analyze comparatively within the region and across the developing world more generally.
Audience: Undergraduate

3. Address and debate theoretical questions in political science through Asian politics materials.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 329 – AFRICAN POLITICS
3-4 credits.

Process of rapid political change in contemporary Africa with special emphasis on the emergence of new states. Not open to students with credit for POLI SCI 660 prior to fall 2017
Requisites: Sophomore standing and POLI SCI 120, 182, or SOC/AFRICAN/AFROAMER/ANTHRO/GEOG/HISTORY/POLI SCI 277 (or POLI SCI 106 or 186 taken prior to Fall 2017)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine the complex social, economic and political issues and problems confronting contemporary Africa.
Audience: Undergraduate

2. Critically examine previously held beliefs about the way Africa works and become critical consumers of news coverage of Africa.
Audience: Undergraduate

3. Explain the process of rapid political change in contemporary Africa and the emergence of new states.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 330 – POLITICAL ECONOMY OF DEVELOPMENT
3-4 credits.

An introduction to the political economy of development. Why are some countries more economically developed than others? To help answer this question, examine leading theories of economic development. In light of these theories, then examine the development experiences of three major regions of the world. Consider a series of issues about development, including the effect of ethnic diversity, corruption, natural resources, and women's empowerment on economic development. Conclude with an examination of the effects of international interactions-via trade, foreign aid, migration, and war-on economic development.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2024
Learning Outcomes: 1. Address the question of why some countries are rich and others poor.
Audience: Undergraduate

2. Examine leading theories of economic development.
Audience: Undergraduate

3. Discuss the development experiences of three of the world's major regions.
Audience: Undergraduate

4. Consider selected issues—including ethnic diversity, corruption, natural resources, and women's empowerment—in economic development.
Audience: Undergraduate

5. Understand the effects of interactions between nations—via trade, foreign aid, migration and war—on economic development.
Audience: Undergraduate

POLI SCI 331 – THREATS TO DEMOCRACY
3-4 credits.

Examines the threats that confront democracies in the modern world. It is often assumed that democratization is a one-way street - that once countries become democracies, they remain that way forever. But recent history has cast doubt on this assumption. Consolidated democracies around the world are struggling with a set of interconnected challenges: weakened institutions and frayed norms; widespread disenchantment with democracy; political and social polarization; misinformation; and the rise of anti-democratic and illiberal politicians. In combination, these challenges risk eroding the quality of democracy or collapsing it altogether. Draws on evidence from across the world to examine these threats. Interrogates foundational theories of democracy - what democracy is, what it aspires to be, and why it falls short of those aspirations - and explores cutting-edge approaches to the study of democratic erosion.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Explain prominent approaches to conceptualizing democracy and autocracy.
Audience: Undergraduate

2. Describe common problems with democracy and causes of democratic erosion.
Audience: Undergraduate

3. Compare American democracy and its challenges with other countries.
Audience: Undergraduate

4. Evaluate strategies for strengthening democratic institutions and culture.
Audience: Undergraduate

POLI SCI 332 – GERMAN POLITICS
3-4 credits.

A broad overview of politics in Germany, Europe's politically and economically most powerful country. Several broad themes are covered: political institutions, electoral system and elections, parties and party system, interest representation, political participation, political economy, the legacies of Germany's past, social policy, European and foreign policy, and current and future challenges. Learn to relate the German experience to broader issues, problems, and concepts used in the comparative study of domestic politics.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Analyze politics in Germany, Europe’s politically and economically most powerful country.
Audience: Undergraduate

2. Examine German political institutions and the electoral system.
Audience: Undergraduate

3. Relate the German experience to broader issues, problems, and concepts used in the comparative study of domestic politics.
Audience: Undergraduate

POLI SCI 334 – RUSSIAN POLITICS
3-4 credits.

Theory and practice of Russian States, emphasis on politics, economic and institutional developments since 1991. Not open to students with credit for POLI SCI 633 prior to fall 2017
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Increase knowledge of the trajectory of political life in Russia from 1917 through the present.
Audience: Undergraduate

2. Learn the theoretical and institutional underpinnings of democracy, markets and the rule of law, and how to structure an argument as to the presence or absence of these institutions.
Audience: Undergraduate

3. Improve oral advocacy skills through classroom discussion.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 335 – SOCIAL IDENTITIES
3 credits.

An introduction to theories and empirical work on social identities, focusing in particular on definitions and measurement. It has three main goals: First, examine various definitions of social identities and different types of identities (ethnicity, race, nationality, gender, class, and religion). Second, look at techniques and strategies that have been developed to measure identities (content and discourse analysis, surveys, interviews and ethnography, censuses). Third, examine empirical works on identities from a variety of geographical areas and methodological perspectives.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Demonstrate their understanding of major theories of social identity, types of social identities, and ways of measuring social identities.
Audience: Undergraduate

2. Utilize the techniques of content analysis, interviews, and surveys to measure social identities.
Audience: Undergraduate

3. Apply knowledge of social identities to a research question, including outlining a research plan and conducting original data collection.
Audience: Undergraduate

4. Evaluate evidence to answer their research question, and contextualize results with respect to existing published work.
Audience: Undergraduate

5. Write up a research paper and communicate the results in an oral presentation with slides.
Audience: Undergraduate

POLI SCI 336 – DEMOCRACY (AND ITS UNCERTAIN FUTURE)
4 credits.

Democracy has come under stress, both at home and across the world. The global decline of democracy has accelerated over the past decade, and levels of democracy enjoyed by the average global citizen today are down to levels last found around 1990. The promise of democracy's inevitable ascent and dominance after the end of the Cold War has proven shortlived. Examines the state and future of a political system we tend to take for granted but should not. Starts with a brief overview of the evolution of the concept of democracy over time. Examines the relationship between democracy and economic development, culture, identity, and religion. Considers and compares core democratic institutions. Investigates current challenges to democracy and democratization and offers an overview of the state of democracy across different world regions.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Learn about leading definitions, classifications, and measurements of democracy
Audience: Undergraduate

2. Understand the determinants of democracy
Audience: Undergraduate

3. Examine democratic political systems and institutions, how they function, and how they relate to each other
Audience: Undergraduate

4. Become familiar with rising threats to democracy and the prospect of autocratization
Audience: Undergraduate

5. Compare different democratic systems systematically
Audience: Undergraduate

6. Understand and choose proper evidence/sources to support an argument
Audience: Undergraduate

POLI SCI 338 – THE CIVIL-MILITARY PARADOX IN U.S. POLITICS AND SOCIETY
3 credits.

Protecting a democratic nation from foreign threats often requires that nation to create a powerful military. Yet the creation of a powerful military may undermine the democracy that it is designed to protect. How do, and how should, democracies manage the paradoxical relationship between civilian authority and military institutions. Explores civilian and military perspectives in U.S. civil-military relations; address issues such as the use of military advice by civilian leaders, military challenges to civil authority, and tensions generated by shared responsibility for national security between the executive, legislative, and judicial branches. Studies how civil-military relations impact wider American society by examining the garrison state hypothesis; debates centered upon the draft versus an all-volunteer force; issues of equity and inclusion; and current concerns regarding a civil-military "gap."
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate a critical understanding of the Civil Military Paradox and the complex web of relationships that link the American public, civil authority, and the U.S. armed forces. Articulate an appreciation for why the paradox and civil-military relationships are important.
Audience: Both Grad & Undergrad

2. Demonstrate how civil-military relations (CMR) impact our personal, professional, and civic lives.
Audience: Both Grad & Undergrad

3. Comprehend and apply the vocabulary and theoretical concepts that inform our understanding of civil-military relations.
Audience: Both Grad & Undergrad

4. Explain how big ideas, historical experiences, and wider trends shape civil-military relations in the United States. These considerations include: (a.)the U.S. Constitution(b.)national culture (core assumptions, values, and beliefs)(c.) public sentiment(d.)partisan political debates (e.)the domestic and international environments (political, security, economic, social)(f.)issues of equity/inclusion
Audience: Both Grad & Undergrad

5. Address critical issues and debates related to civil-military relations in U.S. politics and society—past, present, and future.
Audience: Both Grad & Undergrad

6. Demonstrate how to think critically and write effectively. Respond to contemporary civil-military issues by developing recommendations for action. Support these recommendations with properly interpreted evidence and sound argument.
Audience: Undergraduate

7. Produce research and analysis that deepens our understanding of the issues, theory, and/or practice of civil-military relations
Audience: Graduate

POLI SCI 339 – NON-DEMOCRACIES
3 credits.

Studies the varieties and characteristics of non-democratic regimes from around the world: how they form, why they endure, and when they collapse, engaging along the way with theories of electoral behavior, political psychology, political violence, popular mobilization, and democratization.
Requisites: POLI SCI 120 or 182
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify key types of non-democratic regimes and their characteristics.
Audience: Undergraduate

2. Identify why these regimes resist pressures to democratize.
Audience: Undergraduate

3. Identify the key legacies of non-democratic regimes.
Audience: Undergraduate

POLI SCI 340 – THE EUROPEAN UNION: POLITICS AND POLITICAL ECONOMY
3-4 credits.

Introduction to the politics, political economy, history, and theory of European integration. Topics include the workings of EU institutions and law, the effect of the EU on national politics and economies, economic politics and policy-making in the EU, the EU as an actor in the world economy.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Examine the history and theory of European integration.
Audience: Undergraduate

2. Explore the workings of EU institutions and law.
Audience: Undergraduate

3. Examine the effect of the EU on national politics and economy, economic politics and policy-making in the EU.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI/JEWISH 341 – ISRAELI POLITICS AND SOCIETY
3-4 credits.

Examines the issues currently facing Israeli society and the ongoing debates in Israeli politics. Provides historical background and analytical understanding of contemporary Israeli politics. Attention will be paid to political history, institutions, economic development, coalition formation, ethnic politics, and religious-secular divisions as they are manifested in Israeli politics.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Learn about Israeli politics, history, and culture.
Audience: Undergraduate

2. Apply political science concepts and theories to understand Israeli politics and society.
Audience: Undergraduate

3. Understand who the main actors are in Israeli politics.
Audience: Undergraduate

4. Understand the main social and political cleavages in Israel.
Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 342 – STATE-BUILDING: HOW STATES ARE FORMED, FUNCTION, AND INFLUENCE SOCIETY
3-4 credits.

Exploration of state-building: examining how states are formed, how they develop and maintain political power, and the ways in which they shape society. Draw on insights from political science, but also economics, history, and anthropology, to learn about the processes of state formation, the importance of state capacity, and the state's role in war, governance, and social justice. Topics will include the relationship between the state and issues like the environment, gender, and identity, highlighting both the challenges and opportunities states face in a rapidly changing world. Analysis of historical and contemporary examples from various political systems yields insights into the state's role as both a force for order and a driver of social change. Lectures, discussions, and case studies, will lead to a deeper understanding of the state's central role in global politics and everyday life.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and describe key theories and historical processes involved in state formation, including the roles of conflict, economy, and ideology.
Audience: Undergraduate

2. Examine how states develop and maintain capacity, manage resources, and exert authority, including the factors that contribute to strong versus weak states.
Audience: Undergraduate

3. Use comparative analysis to understand differences in state-building processes across historical and cultural contexts, developing a critical perspective on the state's evolving role globally.
Audience: Undergraduate

POLI SCI 343 – THEORIES OF INTERNATIONAL SECURITY
3-4 credits.

Role of alliances in contemporary and historical international political systems. Purpose of alliance formation; reasons for their dissolution; relationship of alliance activity with international war and with political integration. Role of alliances in future international systems. Not open to students with credit for POLI SCI 367 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to Fall 2017)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze the role of alliances in contemporary and historical international political systems.
Audience: Undergraduate

2. Explain the purpose of alliance formation and reasons for their dissolution.
Audience: Undergraduate

3. Critically evaluate the role of alliances in future international systems.
Audience: Undergraduate

POLI SCI 344 – THE RUSSIAN WAR ON UKRAINE: CAUSES AND CONSEQUENCES
3 credits.

Examines causes and consequences of the Russian invasion and war on Ukraine. Analyzes the war using concepts in comparative politics (e.g., regime type, national identity, and domestic politics in Ukraine and Russia) and international relations (e.g., international security, institutions and norms, sanctions and trade, migration and human rights).
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and explain political science work relevant to Russia's invasion of Ukraine.
Audience: Undergraduate

2. Critically assess how prior political science work does or does not help explain outcomes related to the Russian war in Ukraine.
Audience: Undergraduate

3. Engage and participate in discussion with peers, instructors, and the public on the topic of Russia's invasion of Ukraine
Audience: Undergraduate

4. Write an original research paper that analyzes political science theory in light of empirical data on the Russian war in Ukraine, and present the findings of the paper to the class.
Audience: Undergraduate

POLI SCI 345 – CONFLICT RESOLUTION
3-4 credits.

Every war comes to an end, but some end sooner than others. This course analyzes why and how conflicts come to an end, discussion relevant theories of conflict and conflict resolution, and important cases. Not open to students with credit for POLI SCI 378 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe the frequency of war over time.
Audience: Both Grad & Undergrad

2. Assess competing explanations for the rise and decline of war.
Audience: Both Grad & Undergrad

3. Evaluate the arguments of competing theories of war causation andtermination.
Audience: Both Grad & Undergrad

4. Weigh the importance of alternative explanations for peace.
Audience: Both Grad & Undergrad

5. Compare the e#ectiveness of post-conflict strategies such as electionsand truth and reconciliation commissions.
Audience: Both Grad & Undergrad

6. Describe and evaluate several cases of international intervention in conflict, such as mediation, peacekeeping and humanitarian intervention.
Audience: Both Grad & Undergrad

7. Evaluate the strength of the quantitative evidence supporting the proposition that democracies do not fight each other.
Audience: Graduate

POLI SCI 347 – TERRORISM
3 credits.

Examines the causes of terrorism, goals and strategies pursued by terrorist groups, the consequences of terrorism, and counterterrorism policies adopted by governments. Not open to students with credit for POLI SCI 319 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 104, 120, 140, 182, 184, INTL ST 101 or LEGAL ST/POLI SCI 217) or (POLI SCI 103, 106, or 186 taken prior to fall 2017) or graduate standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Compare alternative definitions of terrorism.
Audience: Both Grad & Undergrad

2. Recall the history of terrorism, including prominent groups, ideologies and campaigns.
Audience: Both Grad & Undergrad

3. Describe the state of terrorism today, including currently active groups and ideologies inspiring terrorist attacks.
Audience: Both Grad & Undergrad

4. Categorize the motivations, strategies and tactics of terrorism.
Audience: Both Grad & Undergrad

5. Analyze the e#ectiveness of terrorism in achieving its goals in a variety of cases.
Audience: Both Grad & Undergrad

6. Evaluate the e#ectiveness, cost, legality and morality of counter terrorism policies, both military and non-military.
Audience: Both Grad & Undergrad

7. Analyze quantitative data related to terrorism to test a hypothesis on its correlates, causes or consequences.
Audience: Graduate

POLI SCI 348 – ANALYSIS OF INTERNATIONAL RELATIONS
3-4 credits.

Focuses on how to analyze problems in international politics by the use of game theory. Examples include governments making choices about the size of their military forces, barriers to trade, or international agreements on environmental issues. Analysts study strategic interaction using both informal and mathematical methods. Provides a good introduction to the basics of game theory -- a tool useful in many different settings -- as well as an introduction to the study of world politics. From the perspective of quantitative reasoning, one of the most important set of lessons center on the logic of strategic interaction and the notion of equilibrium. Along with basic game theory students will also be introduced to the pragmatic use of mathematical tools including algebra, set theory, functions, and probability theory. Not open to students with credit for POLI SCI 376 prior to fall 2017
Requisites: Satisfied Quantitative Reasoning (QR) A and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to Fall 2017)
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the logic of strategic interaction.
Audience: Undergraduate

2. Master the basics of non-cooperative game theory.
Audience: Undergraduate

3. Be able to apply the logic of strategic interaction to international politics.
Audience: Undergraduate

4. Master the algebra necessary to solve games with complete and incomplete information.
Audience: Undergraduate

5. Master the algebra necessary to solve both one-time and iterated games.
Audience: Undergraduate

6. Understand the logic of signaling games.
Audience: Undergraduate

POLI SCI 349 – GLOBAL ACCESS TO JUSTICE
3 credits.

Lawyers are present in all countries, but their roles vary tremendously. In some countries, lawyers are greatly respected and are seen as making an important contribution by representing their clients and participating in the political process. In other countries, lawyers are viewed as less essential, perhaps even as a nuisance. Study lawyers in many different countries in an effort to explain the variation in their status and the consequent impact on citizens' access to justice.
Requisites: POLI SCI 120, 140, or sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Understand and compare the role of lawyers in the U.S. and other countries.
Audience: Undergraduate

2. Contrast the role of lawyers in democratic and authoritarian political systems.
Audience: Undergraduate

3. Synthesize social science readings and formulate arguments in written and oral form.
Audience: Undergraduate

4. Improve oral advocacy skills through active classroom discussion.
Audience: Undergraduate

POLI SCI 350 – INTERNATIONAL POLITICAL ECONOMY
3-4 credits.

Analyzes the interaction of politics and economics in the international arena, both historically and in the contemporary era of globalization. Focuses on international trade, monetary, and financial relations in both developed and developing economies. Not open to students with credit for POLI SCI 371 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply basic knowledge of historical events in international political economy.
Audience: Undergraduate

2. Understand how international economic flows a#ect and constrain domestic policymakers.
Audience: Undergraduate

3. Discuss international trade, monetary, and financial relations in both developed and developing economies.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI/LEGAL ST 352 – TRANSITIONAL JUSTICE IN WORLD POLITICS
3-4 credits.

Provides an introduction to the study of transitional justice (TJ), or how institutions - local, domestic, and international - address the legacies of human rights abuses. Explore several key questions motivating the study of transitional justice: Why do societies pursue accountability for past repression in general? How do transitioning societies go about these pursuits? What effects might TJ policies have on prospects for democracy, rule of law, and future human rights abuses? Special attention to how local and global politics interact to influence both the development and the effects of different transitional justice policies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the history and political foundations of transitional justice
Audience: Undergraduate

2. Describe and differentiate between transitional justice mechanisms at the international, domestic, and local level
Audience: Undergraduate

3. Explain the role of different international and domestic actors in designing and implementing transitional justice
Audience: Undergraduate

4. Analyze and evaluate the implications of different transitional justice mechanisms for democracy, peace, and stability
Audience: Undergraduate

POLI SCI 354 – INTERNATIONAL INSTITUTIONS AND WORLD ORDER
3-4 credits.

The study of international cooperation and the analysis of regional, functional, and universal regimes and institutions. Not open to students with credit for POLI SCI 337 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the existing logics, theories, concepts, and functions of international institutions.
Audience: Undergraduate

2. Analyze the political and legal dimensions of international organizations.

Audience: Undergraduate

3. Think critically and theoretically about the dynamic roles of international institutions in world politics that impose consequences on countries and citizens of the world.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI/CHICLA/HISTORY/LACIS 355 – LABOR IN THE AMERICAS: US & MEXICO IN COMPARATIVE & HISTORICAL PERSPECTIVE
3 credits.

Critical examination of the history of labor and working people in the Americas from the colonial era to the present. Focuses on the experiences of the U.S. and Mexico, offering a comparative perspective on their distinct but interconnected histories. Surveys major episodes in the evolution of labor systems, from colonial structures imposed by Spanish and British empires to the roles of slavery, forced labor, and industrialization. Examines the rise of corporate capitalism, labor unrest in the post-Civil War U.S., labor's role in the Mexican Revolution, and the impact of the Great Depression and post-WWII labor incorporation. Includes the shift to neoliberalism in the late twentieth century and the emergence of an integrated North American production system and its consequences for workers on both sides of the U.S.-Mexico border.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021

POLI SCI 356 – PRINCIPLES OF INTERNATIONAL LAW
3-4 credits.

A survey course that focuses on interactions among the primary entities in the international system; namely, states, inter- governmental and non-governmental organizations, and other international actors governed by international law. The study of international relations and international law is absolutely critical to understanding contemporary politics, both domestic and foreign. This course addresses both structural and substantive issues related to international law. In other words, it should provide basic tools for understanding the way in which international law works, as well as introduce substantive issues of interest to students of world politics. The course will place special emphasis on the role of international organizations in the international legal system, and special attention will be paid to the European Union as an international actor within this system of law. Not open to students with credit for POLI SCI 316 prior to fall 2017
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain why international law exists.
Audience: Undergraduate

2. Provide a clear explanation of the different sources of international law, the various means of resolving international legal disputes, and how US courts approach questions of international law.
Audience: Undergraduate

3. Explain why different types of international problems are best addressed by different types of legal structures, and how this accounts for variation in the shape of international law across issue areas.
Audience: Undergraduate

4. Demonstrate comfort engaging with a variety of different primary sources (e.g. judicial cases, treaties).
Audience: Undergraduate

5. Demonstrate the ability to identify the key facts in a given fact pattern, identify relevant provisions of international law, and apply these legal principles to these facts to build a legal argument.
Audience: Undergraduate

6. Make an argument about whether international law is successful at achieving its goals.
Audience: Undergraduate

7. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 358 – STATES IN THE WORLD: COMPARATIVE FOREIGN POLICY
3-4 credits.

How do states make foreign policy decisions? What kinds of factors most influence states' international behavior on security, economic, and humanitarian questions? What explains the foreign policies of different states? Develop skills in analyzing foreign policy from a social scientific standpoint. Examine the logic of theories and evaluate the evidence for and against different explanations for how states behave internationally. Develop knowledge of specific countries and foreign policy topics.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze the influence of domestic factors on the formulation and execution of foreign policy in different countries.
Audience: Undergraduate

2. Compare and contrast the foreign policies of multiple countries, identifying commonalities, differences, and trends.
Audience: Undergraduate

3. Apply key theories and concepts to analyze and predict the behavior of states in the international system.
Audience: Undergraduate

4. Conduct independent research on a specific foreign policy issue and/or country, utilizing relevant academic literature and primary sources.
Audience: Undergraduate

5. Effectively communicate insights into comparative foreign policy through written assignments, presentations, and class discussions.
Audience: Undergraduate

6. Engage in constructive debates and discussions on global affairs, drawing on the knowledge gained in the course.
Audience: Undergraduate

POLI SCI 359 – AMERICAN FOREIGN POLICY
3-4 credits.

This course undertakes a historical and analytical approach to U.S. foreign policy since World War II. The course is divided into three main topics: U.S. Foreign Policy since World War II and the evolution of U.S. policy and the impetus behind important foreign policy choices; The people and institutions and processes that guide foreign policy formation and implementation; And the more salient foreign policy challenges facing the U.S. in the 21st century including how the US has responded to the attacks of September 11, 2001, the effectiveness of foreign aid policy.
Requisites: Sophomore standing and (POLI SCI 104, 140, 184 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Obtain a better understanding of U.S. foreign policy.
Audience: Undergraduate

2. Examine current foreign policy issues U.S. policymakers must address.
Audience: Undergraduate

3. Understand institutional arrangements complicate the policy process.
Audience: Undergraduate

4. Explore how particular issue areas challenge decision makers.
Audience: Undergraduate

5. Examine what general theoretical statements can be made about foreign policy.
Audience: Undergraduate

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 360 – THE FOUNDATIONS OF AMERICAN LIBERAL DEMOCRACY
3-4 credits.

The intellectual origins and evolution of American political thought as seen through the lens of leading politicians, novelists and social critics from the Puritans to the Civil War; consideration of the central tensions of American political thought from a contemporary perspective.
Requisites: (POLI SCI 160, 209, 210, or ILS 205) or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine the intellectual origins and evolution of American political thought.
Audience: Undergraduate

2. Explore American political thought as seen through the lens of leading politicians, novelists and social critics from the Puritans to the Civil War.
Audience: Undergraduate

3. Analyze the central tensions of American political thought from a contemporary perspective.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 361 – CONTEMPORARY AMERICAN POLITICAL THOUGHT
3-4 credits.

This course considers central themes and controversies in American political thinking during the 20th and early 21st centuries. Topics include the development of liberalism from the Progressive Era to the New Deal to the Great Society and beyond; the emergence of new strands of conservatism after World War II and the tensions between those strands; challenges by excluded and marginalized groups to the traditional social and political order; and the revival of concerns about "community" in America. As a topic of study, "American Political Thought" combines philosophy, political theory, history, and practical politics. The course covers a wide variety of texts, ranging from philosophical treatises to newspaper articles, from presidential addresses to works of social science with ultimate goal to become more knowledgeable and more critical students of the American political experience. Not open to students with credit for POLI SCI 566 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 160 or ILS 205) or (POLI SCI 209 taken prior to Fall 2017)
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explore American Political Thought from the progressive era to the present day.
Audience: Undergraduate

2. Discuss the progressives; New Deal liberalism; and different strands of conservatism after World War II.
Audience: Undergraduate

3. Examine communitarianism; multiculturalism; and recent political rhetoric.
Audience: Undergraduate

4. Analyze issues of race, gender and class in the 1960s.
Audience: Undergraduate

POLI SCI/CLASSICS/HISTORY 362 – ATHENIAN DEMOCRACY
3 credits.

Explores key issues in the ideology and practice of Athenian democracy. Examines democratic values, institutions, rhetoric, and sociology in order to provide the basic tools to understand democracy in its ancient context. Engages with a variety of source material (literary, archaeological, epigraphic) in order to develop multiple skills of interpretation. Some questions examined include: What are the key features of Athenian democracy, how did it change over time, and how did it differ from modern democracy? How did the Athenians justify and critique this political system? How did they reconcile citizen egalitarianism with social inequalities of wealth, gender, and status? To what extent were women, foreigners, slaves, or the poor included or excluded from politics? Was Athenian democracy a robust political system or a system in crisis?
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand and use appropriately the specific terminology (names, places, concepts) related to Athenian democracy
Audience: Undergraduate

2. Discuss with appropriate methodological awareness conflicting views expressed in modern scholarship
Audience: Undergraduate

3. Analyze problems relating to the reconstruction of historical concepts in the ancient world with reference to relevant source material
Audience: Undergraduate

4. Critically read and engage with complex academic texts (both ancient sources and modern literature)
Audience: Undergraduate

5. Present knowledge, ideas, and analysis orally (in classroom discussion) and in written formats
Audience: Undergraduate

POLI SCI/ILS 363 – LITERATURE AND POLITICS
3-4 credits.

Interactions between literature and politics, and the role of literature more generally in the functioning of the political systems. Not open to students with credit for POLI SCI 570 prior to fall 2017
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand how literary writing affects political consciousness.
Audience: Undergraduate

2. Explore how literary works represent and negotiate political questions in writing.
Audience: Undergraduate

3. Encourage students of literature to read and think politically.
Audience: Undergraduate

POLI SCI 364 – CHRISTIAN POLITICAL THOUGHT
3-4 credits.

Exploration of key themes, developments, and figures in Christian political and ethical traditions.
Requisites: Sophomore standing and (POLI SCI 160 or ILS 205) or (POLI SCI 209 taken prior to Fall 2017)
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Identify the major political thinkers who developed the Christian tradition.
Audience: Undergraduate

2. Identify and summarize the important philosophical concepts of Christian political thought.
Audience: Undergraduate

3. Comprehend the influence of Christianity in our political ideas and institutions.
Audience: Undergraduate

4. Evaluate how Christian ideas influence current debates on law, constitutionalism, morality, religion, political ideology, and public policy.
Audience: Undergraduate

POLI SCI/ILS/ITALIAN/LITTRANS 365 – MACHIAVELLI AND HIS WORLD
3 credits.

Introduces students to the major works of Machiavelli through the close reading of his writings in cultural and historical contexts. Discussion and targeted writing assignments will aim at cultivating in students 1) a broad understanding of Machiavelli's principal intellectual attitudes, 2) a deeper understanding of his literary sensibility, and 3) the ability to articulate controversies and complexities surrounding his thought.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop a broad understanding of Machiavelli's principal intellectual attitudes.
Audience: Undergraduate

2. Cultivate a deep understanding of Machiavelli's literary sensibility.
Audience: Undergraduate

3. Articulate controversies and complexities surrounding Machiavelli's political thought.
Audience: Undergraduate

POLI SCI 366 – CONTINENTAL POLITICAL THOUGHT
3-4 credits.

Continental political theory is a tradition of thought usually distinguished from 'Anglo-American political theory' and originally associated with French and German writers in the 19th and early 20th century. What it means for humans to be free and what the requirements of a free society are the questions that motivate Continental political thought. Topics include: what it means for humans to live freely; the nature of reason and language; the relationship between politics, reason and culture; the political effects of language and technology; and the competing models of political freedom that result. Covers leading European political theories from the 18th through the 21st centuries and their application to contemporary questions of democratic theory.
Requisites: POLI SCI 160
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate familiarity with the major European political theorists since the 18th century through written essays, quizzes and class discussion.
Audience: Undergraduate

2. Practice critical reading and writing skills through analysis of sophisticated philosophical texts in written essays.
Audience: Undergraduate

3. Identify and categorize the vocabulary and content of contemporary political theory debates through quizzes and written essays.
Audience: Undergraduate

4. Analyze and assess the theoretical roots of contemporary political conflicts in written essays.
Audience: Undergraduate

5. Assess and compare the arguments for and against different kinds of political systems in written essays and class discussions.
Audience: Undergraduate

POLI SCI 367 – HUMANS, ANIMALS & MACHINES
3-4 credits.

Animals and machines play a large and increasing role in human affairs. Many political systems and cultures have traditionally placed human beings and human rights at the center of politics. Advocates of animals and artificial intelligence challenge this. As a result, political theory in the twenty-first century must address the role of non-humans in politics and examine the relative priority of human beings. What rights, if any, should non-humans have and on what basis? Can even we say what it means to be distinctively human? Is there something about our language, intelligence, consciousness, dignity or emotions that clearly distinguishes us from animals or machines? Can that distinctiveness support consequential moral or political conclusions? Is there a clear basis for human or non-human equality upon which we can ground rights or democratic institutions? Or must all of these yield to a post-humanist politics of some kind?
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Describe in detail significant arguments for and against human distinctiveness in both ancient, modern and contemporary debates.
Audience: Undergraduate

2. Analyze and appraise arguments for and against animal rights, rights of nature and AI rights.
Audience: Undergraduate

3. Write thorough analyses of sophisticated philosophical texts, including public policy implications.
Audience: Undergraduate

4. Assess and compare different periods and genres of theoretical writing.

Audience: Undergraduate

POLI SCI 369 – ENVIRONMENTAL POLITICAL THOUGHT
3-4 credits.

Consider key paradigms of environmental thought, including political ecology, ecomodernism, ecosocialism, and ecofascism. In light of environmental degradation and crisis, investigate how these conceptual lenses offer divergent diagnoses of and prescriptions for environmental harm. Investigate the ways in which environmentally related domination and inequity may be linked to the legacies of racism, colonialism, and gender hierarchy. Analyze whether and in what way these forms of domination and inequity can be conceptualized as environmental injustices. Finally, explore different drivers of and impediments to environmental political action, ranging from environmental social movements and calls for climate justice, to climate denialism and potentially apathy-inducing phenomena like eco-anxiety.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Understand and apply interpretive approaches to works of environmental political thought.
Audience: Undergraduate

2. Analyze and evaluate concepts and arguments in environmental political thought.
Audience: Undergraduate

3. Articulate and develop conceptual claims and arguments in environmental political thought.
Audience: Undergraduate

POLI SCI 370 – ISLAM AND POLITICS
3-4 credits.

In the early twentieth century, a series of movements arose in the Middle East and South Asia, calling Muslims to return to Islam. Today, leaders and members of such groups -now known as Islamists -insist that one cannot live a fully Islamic life in the absence of an Islamic state. How and why did these movements come to focus on building an Islamic state? How do they pursue this goal?
Requisites: Sophomore standing or 3 Credits in HISTORY or POLI SCI
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify major concepts related to Islam and politics.
Audience: Undergraduate

2. Understand the historical development, major debates, and contemporary manifestations of Islam and politics.
Audience: Undergraduate

3. Become familiar with major historical and contemporary research into Islam and politics.
Audience: Undergraduate

POLI SCI 372 – POLITICAL VIOLENCE
3-4 credits.

Introduction to the study of political violence in the modern world. Political conflicts are often disputed through the use of force: countries fight wars; governments combat insurgent groups, militias, and criminal organizations; states repress their citizens; communal violence breaks out among social groups. Examines the commonalities that underpin these forms of political violence and the differences that separate them. Analyzes the causes and consequences of violence and discusses strategies to resolve violent conflicts and build peace. In doing so, interrogates foundational theories of political violence and explores cutting-edge approaches to the study of armed conflict. Covers the variety of research methods used to study political violence, including both qualitative and quantitative approaches at the sub- and cross-national levels of analysis.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Describe and differentiate between the forms of political violence in global politics.
Audience: Undergraduate

2. Explain the causes of civil war and other forms of political violence.
Audience: Undergraduate

3. Describe the methodological and ethical challenges of studying political violence.
Audience: Undergraduate

4. Evaluate strategies for ending civil wars and reducing violence.
Audience: Undergraduate

POLI SCI/JOURN/URB R PL 373 – INTRODUCTION TO SURVEY RESEARCH
3-4 credits.

Theory and practice of survey research; questionnaire design, sampling, data visualization, statistical analysis.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Formulate and construct logical arguments about political phenomena and evaluate those arguments using survey research
Audience: Undergraduate

2. Explain the theoretical components of survey research
Audience: Undergraduate

3. Interpret survey results in general with a particular focus on political polling
Audience: Undergraduate

4. Design and assess political surveys, including questionnaire design, question wording, survey mode, sample size, nonresponse, survey experiments, standard error, and margin of error
Audience: Undergraduate

5. Demonstrate statistical analysis skills in the context of political surveys including: hypothesis testing, confidence intervals, difference of means tests, data visualization and linear regression
Audience: Undergraduate

6. Recognize ethical issues in survey research
Audience: Undergraduate

7. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 377 – NUCLEAR WEAPONS AND WORLD POLITICS
3-4 credits.

Covers the origins of nuclear weapons, the reasons states seek them, the strategies developed for their use, the consequences of their development, and efforts to control and reverse their spread.
Requisites: Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand how nuclear weapons are made and what states have them.
Audience: Undergraduate

2. Examine why some states develop nuclear weapons and others do not.
Audience: Undergraduate

3. Examine whether nuclear weapons make war more or less likely between states.
Audience: Undergraduate

4. Explore what strategies states develop for the potential use of nuclear weapons and why.
Audience: Undergraduate

5. Understand the history and debates surrounding efforts to control the spread of nuclear weapons, including prominent arms control treaties.
Audience: Undergraduate

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 390 – STUDY ABROAD TOPICS IN POLITICAL SCIENCE: INTERNATIONAL RELATIONS
1-4 credits.

A study abroad equivalency for international relations that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

POLI SCI 400 – TOPICS IN POLITICAL SCIENCE
1-4 credits.

An umbrella course for variable credit topic courses, such as summer forum, intensive summer courses, half-semester courses, etc.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

POLI SCI 401 – SELECTED TOPICS IN POLITICAL SCIENCE
3-4 credits.

A topics course for the exploration of current issues in Political Science.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

POLI SCI 404 – SOCIAL INFLUENCE IN POLITICAL BEHAVIOR
3-4 credits.

Examines social influence and the ways political attitudes and actions are shaped by others. Explores social influence across a range of topics including emotions, economics, and intergroup relations as they relate to politics. Analyzes how attitudes and behavior are shaped by social networks, alongside the evolutionary and psychological reasons for human sensitivity to social influence.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Analyze the limitations of "common sense" reasoning when explaining complex political and social phenomena.
Audience: Undergraduate

2. Understand the fundamental principles of social network analysis, including concepts such as homophily and transitivity.
Audience: Undergraduate

3. Examine how political behaviors, ideologies, and emotions spread through social networks via contagion and emergent processes.
Audience: Undergraduate

4. Critique traditional individualistic models of political behavior by applying a network-oriented perspective to case studies of elections and social movements.
Audience: Undergraduate

POLI SCI 405 – STATE GOVERNMENT AND PUBLIC POLICY
3-4 credits.

The structure of state government and the politics of public policy-making in the fifty states.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the basic organizational structures of state governments in the U.S, including their constitutional powers, and compare them with the national government's organizational structure.
Audience: Undergraduate

2. Describe the characteristics of Wisconsin State government and politics, including key milestones involving party organizations and dynamics, voting and electoral patterns, political reforms, and handling of ongoing policy challenges.
Audience: Undergraduate

3. Explain the unique status of local governments in governance and policymaking, and as avenues for more direct citizen participation in public affairs.
Audience: Undergraduate

4. Discuss contemporary issues involving state governance and policy, to include budgeting and finance, elections, commerce, education, environment, natural resources, and policing.
Audience: Undergraduate

POLI SCI 408 – THE AMERICAN PRESIDENCY
3-4 credits.

The President as chief administrative leader, political leader, foreign policy initiator, commander-in-chief, and head of state.
Requisites: Sophomore standing and (POLI SCI 104 or 184)
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine fundamental questions about the President's role as formal head of the executive branch of government and head of state, and as the focal point of public attention.
Audience: Undergraduate

2. Explore the sources of presidential power.
Audience: Undergraduate

3. Understand the factors that explain how presidents are elected.
Audience: Undergraduate

4. Examine how presidents govern.
Audience: Undergraduate

POLI SCI 411 – THE AMERICAN CONSTITUTION : POWERS AND STRUCTURES OF GOVERNMENT
4 credits.

This course undertakes an historical examination of the development of American constitutional thinking about powers and structures of government from the founding era to the present day. Issue that are considered include separation of powers, executive war powers, the powers of Congress, judicial review and the role of courts, and federalism. The course focuses on the development of constitutional law, constitutional politics, and American political development.
Requisites: Sophomore standing and (POLI SCI 104 or 184)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Examine the historical development of American constitutionalism.
Audience: Undergraduate

2. Develop a broad knowledge of the historical constitutionalism and modern and historical constitutional debates.
Audience: Undergraduate

3. Explore how legal rules define constitutional rights and liberties, and how different ways of thinking about those rules prevailed during different historical periods.
Audience: Undergraduate

4. Recognize that in different periods, different approaches of interpreting and applying the Constitution have appeared or have been dominant, and these approaches often cut across doctrinal subject areas.
Audience: Undergraduate

POLI SCI 412 – THE AMERICAN CONSTITUTION: RIGHTS AND CIVIL LIBERTIES
4 credits.

This course undertakes an historical examination of the development of American constitutional thinking about individual rights and civil liberties from the founding era to the present day. Issue that are considered include freedoms guaranteed by the original Articles, the Bill of Rights, and the Civil War Amendments (XIII, XIV, and XV) as these issues appear in constitutional law, constitutional politics, and social and economic developments. The role of the federal courts, the nature and operation of principles of federalism, and the authority of Congress to protect constitutionally guaranteed rights are also major topics of consideration.
Requisites: Sophomore standing and (POLI SCI 104 or 184)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine the historical development of American constitutional thinking about individual rights and civil liberties from the founding era to the present day.
Audience: Undergraduate

2. Examine freedoms guaranteed by the original Articles, the Bill of Rights, and the Civil War Amendments (XIII, XIV, and XV) as these issues appear in constitutional law, constitutional politics, and social and economic developments.
Audience: Undergraduate

3. Understand the role of the federal courts, the nature and operation of principles of federalism, and the authority of Congress to protect constitutionally guaranteed rights.
Audience: Undergraduate

POLI SCI 414 – THE SUPREME COURT AS A POLITICAL INSTITUTION
3 credits.

This course uses a social science approach to analyze theories of judicial decision making and to learn how law is made in a political context. Students will understand how the Supreme Court and justices operate in an interdependent political environment.
Requisites: Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze theories of judicial decision making.
Audience: Undergraduate

2. Understand how the Supreme Court and justices operate in a political environment.
Audience: Undergraduate

3. Explain how law is made in a political context.
Audience: Undergraduate

POLI SCI 416 – COMMUNITY POWER AND GRASS ROOTS POLITICS
3 credits.

Introduces students involved in volunteer or community activism in the Madison area to the literature on political power and community organizing. Conduct field research and write an analysis of activities.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Understand scholarly debates over the character and significance of political organizations and social movements.
Audience: Undergraduate

2. Analyze a local political organization or social movement.
Audience: Undergraduate

3. Examine social movement politics.
Audience: Undergraduate

POLI SCI 417 – THE AMERICAN JUDICIAL SYSTEM
3-4 credits.

Structure, process, and personnel of American courts; emphasis on the governmental and political consequences of court decisions for public policy-making.
Requisites: Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand the functioning of the American judicial system.
Audience: Undergraduate

2. Examine how courts interact with each other and with other branches of government.
Audience: Undergraduate

3. Understand the structure and function of the American court system and its historical development.
Audience: Undergraduate

4. Understand how court decision-making factors influence judicial outcomes.
Audience: Undergraduate

POLI SCI/LEGAL ST 418 – CRIME AND POLITICS
3 credits.

Introduction to various concepts that analyze the criminal legal system from a political perspective. Examines how governments respond to the problem of crime from a domestic and international perspective. In addition to understanding different frameworks on how crime emerges, focuses on four thematic questions: Why do national governments treat public safety as a public good? Why do political actors target certain behaviors as criminal offenses? Why do political efforts to reduce crime often reflect social inequalities within society? Why do poorly designed criminal policies often result in political backlash? Examines crime from each subfield of political science - American, Comparative, International Relations, and Political Theory. Adopts a holistic approach towards understanding the criminal legal system from a political perspective. Consider and challenge all viewpoints on how the current system operates.
Requisites: (3 credits in POLI SCI, LEGAL ST, or SOC) and sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Articulate how politicians use institutions and public policy to target specific demographic groups as social deviants.
Audience: Undergraduate

2. Recognize and question the cultural assumptions as they relate to why crime emerges and who is most likely to be a social deviant.
Audience: Undergraduate

3. Demonstrate self-awareness and empathy toward the policy experiences of others, especially racial and ethnic minorities.
Audience: Undergraduate

4. Apply course concepts to their own political lives and circumstances outside the classroom.
Audience: Undergraduate

5. Articulate how cultural assumptions and belief systems used to build past political institutions connect with current day institutions.
Audience: Undergraduate

POLI SCI/PUB AFFR 419 – ADMINISTRATIVE LAW
3-4 credits.

Delegation of powers, elements of fair administrative procedure, judicial control over administrative determination. Not open to students with credit for POLI SCI 420 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Examine the role that federal administrative agencies play in the U.S. political and legal system.
Audience: Undergraduate

2. Investigate the institutional context and ideological character of administrative law and agency practices.
Audience: Undergraduate

3. Examine classic debates over the origins of regulation.
Audience: Undergraduate

4. Understand competing legal philosophies about democratic administrative regulation.
Audience: Undergraduate

5. Examine political struggles to control the bureaucracy.
Audience: Undergraduate

6. Understand how agencies use adjudication and rulemaking to effectuate their policies.
Audience: Undergraduate

POLI SCI/CHICLA/HISTORY 422 – LATINO HISTORY AND POLITICS
3 credits.

Students will examine the historical, social, political, economic, and cultural experiences and conditions of Latinos, one of the largest US racial/ethnic minority groups. Course focus is on people who trace their origins to Mexico, the Caribbean, and countries of Latin America.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the complexity of the Latino population and divergent political agendas of various subgroups.
Audience: Undergraduate

2. Develop an understanding of the historical origins of how Latino social/political movements have emerged and changed.
Audience: Undergraduate

3. Evaluate the role of movements and activists in policy reform and social/political change.
Audience: Undergraduate

4. Examine the impact of the Latino vote on contemporary politics.
Audience: Undergraduate

5. Explore contemporary policy issues affecting the Latino population.
Audience: Undergraduate

POLI SCI 425 – THE POLITICAL PSYCHOLOGY OF POLARIZATION
3 credits.

The content encourages critical thinking about societies and the larger global community through readings and assessments that explore questions about individual and community behaviors, group dynamics, and the rise of populist authoritarian appeals and policies in the United States and globally. It emphasizes the importance of understanding several psychological theoretical approaches and diverse research methods in political science. Additionally, it involves synthesizing and applying social science concepts from psychology, economics, political science, and sociology, requiring a multifaceted perspective on the issues examined.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Synthesize insights from psychological, political, and sociological perspectives to develop a nuanced understanding of polarization as a concept.
Audience: Undergraduate

2. Examine the role of individual and group identity in explaining political behavior and polarization in the US and around the world.
Audience: Undergraduate

3. Analyze the political and psychological origins and evolution of political, cultural, and economic divides in modern America, using evidence from primary and secondary sources.
Audience: Undergraduate

4. Compare and contrast the intersections of liberalism and conservatism, as well as the impact of extremism, on the American political landscape.
Audience: Undergraduate

5. Examine the shifting media environment and its role in reinforcing or mitigating partisan divides.
Audience: Undergraduate

6. Synthesize insights from psychological, political, and sociological perspectives to develop a nuanced understanding of polarization as a concept.
Audience: Undergraduate

7. Create a reflective analysis or research project that articulates a clear and evidence-based perspective on the state of polarization in the United States today.
Audience: Undergraduate

POLI SCI/GEN&WS 429 – GENDER AND POLITICS IN COMPARATIVE PERSPECTIVE
3-4 credits.

Examines the gendered nature of political institutions around the world, including implications of women's exclusions from public life in a global context; the obstacles to women's greater participation; how women have gained greater voice in political leadership in some countries; and the differences women make in the political arena. Not open to students with credit for POLI SCI 643 prior to fall 2017
Requisites: Sophomore standing; not open to special students
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify key political science work related to gender/women in politics.
Audience: Undergraduate

2. Critically assess cultural, institutional, political economy, and other theories about gender/women and politics.
Audience: Both Grad & Undergrad

3. Describe patterns of gender inequality in politics across different political systems and cultural contexts.
Audience: Both Grad & Undergrad

4. Analyze causes of gender gaps in political participation or representation.
Audience: Both Grad & Undergrad

5. Demonstrate skills in oral argument or analytical writing.
Audience: Both Grad & Undergrad

6. Identify key political science literature and debates related to gender/women in politics.
Audience: Graduate

POLI SCI/INTL ST 431 – CONTENTIOUS POLITICS
3-4 credits.

Social movements, revolutions, and riots continually shape and re-shape the world around us. The course will evaluate and apply dominant theoretical approaches to understanding contention through careful attention to empirical cases throughout the world.
Requisites: Sophomore standing and POLI SCI 140 or INTL ST 101 (or POLI SCI 103 taken prior to fall 2017) or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine how social movements, revolutions, and riots continually shape and re-shape the world around us.
Audience: Undergraduate

2. Evaluate and apply dominant theoretical approaches to understanding contention in politics.
Audience: Undergraduate

3. Study empirical cases of contentious politics throughout the world.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI/RELIG ST 433 – RELIGION AND POLITICS
3-4 credits.

Explores the relationships and interactions between religion and politics from a comparative perspective. Explores how religious institutions, elites, states, and societies interact, and how these relationships shape political behavior and outcomes across contexts. Analyze questions such as: Why does religion remain politically salient in an increasingly secular world? What drives religious nationalism and extremism? How do democratic and authoritarian states engage with religion? How does religion influence voting behavior? How do religious movements inform the global rise in populism? Integrate theoretical frameworks for religion and policies and cutting-edge research on American and global cases.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Analyze the interactions between religion and politics from a comparative perspective.
Audience: Undergraduate

2. Evaluate how religious institutions, elites, states, and societies shape political behavior and outcomes.
Audience: Undergraduate

3. Explain the persistence of religion in secular contexts, the rise of religious nationalism and extremism, and the role of religion in populism, regime type, and voting behavior.
Audience: Undergraduate

4. Analyze current issues in religion and politics using evidence-based writing and argumentation.
Audience: Undergraduate

POLI SCI/INTL ST 434 – THE POLITICS OF HUMAN RIGHTS
3-4 credits.

Examines the origins and development of human rights in international politics. The course discusses what human rights are, international human rights movements, the international search for justice after mass crimes, and international humanitarian intervention. Not open to students with credit for POLI SCI 317 prior to fall 2017
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze the meaning of human rights in international politics.
Audience: Undergraduate

2. Examine the origins and development of human rights in international politics.
Audience: Undergraduate

3. Explore international human rights movements.
Audience: Undergraduate

4. Discuss the international search for justice after mass crimes.
Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI/GEN&WS 435 – POLITICS OF GENDER AND WOMEN'S RIGHTS IN THE MIDDLE EAST
3 credits.

Explores the intertwined relationship between gender and politics in contemporary Middle East and North Africa. Situates the region's historical, socio-political, and cultural context that have particularly contributed to shaping the current discourse on gender in the Arab World. Explores - both theoretically and empirically - the role of Arab women in influencing the political processes across the Middle East. Examines real-world examples of Middle Eastern women from different parts of the region who have succeeded to challenge the status quo and push for genuine change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop a concrete understanding of the history and politics of the Middle East and North Africa (MENA) and the ways they shape gender power relations across the region.
Audience: Both Grad & Undergrad

2. Apply comparative politics frameworks and feminist theories toward understanding patterns of female political participation and better understand current events and complexities of the region's politics and governance structures.
Audience: Both Grad & Undergrad

3. Sharpen critical and analytical skills through exposure to different, even contradictory, points of views and contemporary debates relating to the role of women in shaping MENA's politics post-Arab uprisings.
Audience: Both Grad & Undergrad

4. Develop and present ideas and arguments to audience with diverse interests and backgrounds.
Audience: Both Grad & Undergrad

5. Apply pertinent theoretical and empirical evidence necessary to make critical and analytical arguments about gender and politics in comparative perspective.
Audience: Graduate

POLI SCI 437 – NATIONALISM AND ETHNIC CONFLICT
3-4 credits.

Nationalist conflict and ethnic contestation remain major components of global politics. Drawing on cases from around the world, this course explores why this is the case. In the process, we will address a number of crucial questions: What are nations and ethnic groups? Where do they come from? Why do they pick particular territories? How do they define who can be part of the group? Why are they so successful in mobilizing people to kill and be killed? In the course of answering these questions, the course investigates the interactions between nations and states, religion and nationalism, globalization, citizenship and minority rights, and the causes and solutions for national and ethnic conflict.
Requisites: Sophomore standing and (POLI SCI 120 or 182) or (POLI SCI 106 or 186 prior to fall 2017)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No

POLI SCI/INTL ST 439 – THE COMPARATIVE STUDY OF GENOCIDE
3-4 credits.

Examines the phenomenon of genocide in the modern world. The class covers the concept of genocide, theories of why genocide occurs, and particular cases in the 20th and 21st centuries. Not open to students with credit for POLI SCI 318 prior to fall 2017
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2021
Learning Outcomes: 1. Examine genocide in the modern world.
Audience: Undergraduate

2. Study theories of why genocide occurs.
Audience: Undergraduate

3. Examine particular cases in the 20th and 21st centuries.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 442 – HONORS SEMINAR ON STATE-BUILDING
3 credits.

In-depth exploration of the origins, functions, and societal impacts of states from a global and historical perspective. Engage critically with theories of state formation, state capacity, and governance, analyzing how states are created, sustained, and challenged across various contexts. Special attention will be given to the role of states in shaping and responding to war, environmental challenges, and social dynamics. Draws on interdisciplinary sources from political science, history, economics, and anthropology. Develop and defend nuanced arguments on the state's role as an agent of both stability and change.
Requisites: Satisfied Quantitative Reasoning (QR) A Requirement, junior standing, and declared in an Honors program
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Evaluate and critique major theories of state formation, state capacity, and governance, identifying their strengths, limitations, and applicability across different historical and cultural contexts.
Audience: Undergraduate

2. Integrate perspectives from political science, history, economics, and anthropology to understand the multifaceted role of the state in societal development and change.
Audience: Undergraduate

3. Conduct comparative analyses of state structures, capacities, and policies, drawing on diverse case studies to identify patterns, variations, and underlying factors in state development and function.
Audience: Undergraduate

4. Synthesize course concepts and empirical evidence to construct and defend original, evidence-based arguments on the state's role in society, demonstrating advanced critical thinking and academic writing skills.
Audience: Undergraduate

POLI SCI/LEGAL ST 445 – LEGAL WRITING, FROM COUNSELOR TO ADVOCATE
3 credits.

Introduction to legal reasoning, writing, and research. Draft memos and briefs based on fictional case files and independent legal research, simulating the practice of law. Topics include precedent, sources of law, reading and interpreting legal texts, objective legal analysis, persuasion, and oral argument.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Read legal sources critically and accurately to identify relevant information.
Audience: Undergraduate

2. Recognize the weight and significance of legal authorities within the American legal system.
Audience: Undergraduate

3. Analyze and synthesize legal authorities to explain and formulate controlling rules.
Audience: Undergraduate

4. Apply legal rules to a set of facts—both to predict legal consequences and to advocate for a preferred result.
Audience: Undergraduate

5. Use research strategies to find controlling and persuasive legal authority.
Audience: Undergraduate

6. Write clearly and concisely about the law in different professional contexts, including objective office memoranda and persuasive legal briefs.
Audience: Undergraduate

7. Articulate legal analyses and argue legal positions via oral communication and advocacy.
Audience: Undergraduate

POLI SCI/ECON/ENVIR ST/URB R PL 449 – GOVERNMENT AND NATURAL RESOURCES
3-4 credits.

Problems of public policy and administration for development and use of natural resources.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

POLI SCI 460 – TOPICS IN POLITICAL PHILOSOPHY
3-4 credits.

Investigation at an advanced level of selected problems in political philosophy.
Requisites: Sophomore standing and (POLI SCI 160 or ILS 205) or (POLI SCI 209 taken prior to fall 2017) or graduate standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

POLI SCI 461 – INTERDISCIPLINARY SEMINAR IN POLITICAL ECONOMY, PHILOSOPHY, & POLITICS
3 credits.

An interdisciplinary seminar focusing on current policy debates designed to incorporate concepts and approaches from philosophy, political science, and economics.
Requisites: Consent of instructor
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Synthesize concepts and arguments from philosophy, politics, and economics.
Audience: Undergraduate

2. Apply concepts and arguments from philosophy, politics, and economics.
Audience: Undergraduate

3. Engage in written work incorporating an array of primary and secondary sources.
Audience: Undergraduate

POLI SCI/ILS 463 – DECEPTION AND POLITICS
3-4 credits.

Deception and truth telling as matters of fundamental political concern. Writers ranging from Plato to John Rawls have grappled with the problem of deception and truth-telling in politics. Flattery, hypocrisy, lying as a matter of state, lying as a matter of policy: philosophical explorations of these and related phenomena are the central focus.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explore deception – and truth telling – as matters of fundamental political concern.
Audience: Undergraduate

2. Examine flattery, hypocrisy, lying as a matter of state, and lying as a matter of policy: philosophical explorations of these and related phenomena are at the center of this course.
Audience: Undergraduate

3. Explore writers ranging from Plato to John Rawls and how they have grappled with the problem of deception and truth-telling in politics.
Audience: Undergraduate

POLI SCI/GEN&WS 469 – WOMEN AND POLITICS
3-4 credits.

Changing political roles, status, attitudes, and behaviors of women in contemporary society and of the political implications of changing female/male relationships.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Introduce students to concepts of sex, gender and sexuality and how they have been fundamental to the shape and function of political institutions, laws, and policies.
Audience: Undergraduate

2. Understand how women have participated in politics despite severe legal and political restrictions.
Audience: Undergraduate

3. Understand how social policies and institutional rules inhibit women's influence and participation.
Audience: Undergraduate

4. Explore how the media cover female candidates.
Audience: Undergraduate

5. Examine what barriers inhibit female candidates from running for office.

Audience: Undergraduate

POLI SCI 470 – THE FIRST AMENDMENT
3-4 credits.

An examination of the basic principles, purposes, and assumptions of First Amendment cases and literature, with attention to both historical and contemporary controversies.
Requisites: Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/POLI SCI 217)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze the structure and substance of judicial opinions at the appellate level.
Audience: Undergraduate

2. Explain the role of the lawyer in the judicial system of the United States.

Audience: Undergraduate

3. Apply legal research and writing skills in class assignments, demonstrating improvement through revision and feedback.
Audience: Undergraduate

4. Evaluate and synthesize complex fact patterns giving rise to First Amendment claims.
Audience: Undergraduate

5. Engage in discussions regarding historic and current legal debates on the meaning of free expression and the appropriate reach of the First Amendment.
Audience: Undergraduate

POLI SCI 481 – HONORS SEMINAR ON RACE AND POLITICS IN THE UNITED STATES
3 credits.

This course examines the sources and policy implications of racial division in American politics by analyzing a range of issues, such as affirmative action in the workplace and in higher education, the use of black majority districts as a means of enhancing representation of minority interests in Congress, differences in public opinion between whites and blacks, and issues concerning multi-racial and ethnic tensions. We will examine the historical background of race relations and the current policy debates, with a focus on trying to find common-ground solutions. The goal of this seminar is to stimulate critical thinking on this important issue, causing students to think about race and politics in new ways.
Requisites: Junior standing and declared in an Honors program
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze the sources and policy implications of racial division in American politics by analyzing a range of issues, such as affirmative action in the workplace and in higher education.
Audience: Undergraduate

2. Examine the historical background of race relations and the current policy debates.
Audience: Undergraduate

3. Explore differences in public opinion between whites and blacks, and issues concerning multi-racial and ethnic tensions.
Audience: Undergraduate

POLI SCI 490 – STUDY ABROAD TOPICS IN POLITICAL SCIENCE: AMERICAN GOVERNMENT
1-4 credits.

A study abroad equivalency for American government that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

POLI SCI 511 – CAMPAIGN FINANCE
3-4 credits.

Examination of campaign finance, including: the philosophical rationale behind campaign finance regulations, the history of regulatory frameworks, the influence of campaign contributions on decision making, campaign finance laws in other countries, and reform proposals. Not open to students with credit for POLI SCI 466 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Understand and articulate the major philosophical and constitutional rationales and arguments for a more (or less) restrictive regulatory framework for campaign finance.
Audience: Undergraduate

2. Identify the connections between regulatory structures and the political consequences (both intended and unintended) of those structures.
Audience: Undergraduate

3. Understand the history of campaign finance regulation, the causes of major changes, and the current regulatory structure.
Audience: Undergraduate

4. Understand the jurisprudence and major Supreme Court decisions that have set the terms of campaign finance regulation.
Audience: Undergraduate

5. Connect controversies over campaign finance regulation to broader themes in Americanpolitics.
Audience: Undergraduate

POLI SCI 515 – PUBLIC OPINION
3-4 credits.

Formation of opinions within and among the political publics; their role in the development and practice of governmental policy. Not open to students with credit for POLI SCI 473 prior to fall 2017
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain theorists' claims about the role of the public and of public opinion in democracy and compare these claims to the role that empirical research suggests it does play.
Audience: Undergraduate

2. Analyze what is meant by public opinion and how various methods of measurement help us understand it.
Audience: Undergraduate

3. Interpret and critique public opinion poll results.
Audience: Undergraduate

4. Discuss the nature and origins of individual and aggregate-level public opinion.
Audience: Undergraduate

5. Participate in small group discussions, and listen to and hear other participants.
Audience: Undergraduate

POLI SCI/AFROAMER 519 – AFRICAN AMERICAN POLITICAL THEORY
3-4 credits.

Explores a range of theories that African Americans have drawn upon to cope with and ameliorate their political circumstances in the United States within the specific parameters of political theory.
Requisites: Sophomore standing and (POLI SCI 160 or AFROAMER 151) or (POLI SCI 209 taken prior to fall 2017) or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Analyze how African American thinkers simultaneously reflect and complicate liberal, conservative, nationalist, and materialist political thought.
Audience: Undergraduate

2. Examine how African American thinkers understand sexism in African American political thought and racism in feminist thought.
Audience: Undergraduate

3. Interrogate contemporary debates in African American political theory including, but not limited to, the parameters of effective black leadership.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 529 — ARAB-ISRAELI CONFLICT
3-4 credits.

Examines the political, social, and economic aspects of the evolution of the Arab-Israeli conflict over time, and the theoretical and policy issues it raises. Not open to students with credit for POLI SCI 631 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 120, 140, 182 or INTL ST 101) or (POLI SCI 103, 106, or 186 taken prior to fall 2017) or graduate standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Articulate an in-depth understanding of the Arab-Israeli conflict and it's evolution over time.
Audience: Undergraduate

2. Develop an appreciation of the complexities and dynamism of this conflict through an examination of its origins, the actors involved, and the key historical and political factors that have shaped it.
Audience: Undergraduate

3. Examine the political, social, and economic aspects of the evolution of the Arab-Israeli conflict.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI/AFROAMER/GEN&WS/SOC 547 — THEORIZING INTERSECTIONALITY
3 credits.

Examines assumptions and debates regarding how race, gender, sexuality, and other hierarchies of power intersect. Chief among these assumptions is that intersectional analysis is necessarily a Black feminist endeavor. Analyzes debates in intersectional theorizing including who qualifies as an intersectional subject, the merits of examining intersectional privilege, and whether intersectionality can be used for anti-feminist ends. Explores how scholars use intersectionality to understand advantage and disadvantage within specific contexts including the family, the state, and the labor force. Utilizes interdisciplinary and multimedia course materials including texts and films drawn from gender and women's studies, sociology, critical race theory, history, and political theory.
Requisites: Junior standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify the relationship between intersectionality and theorizing in gender and women's studies.
Audience: Both Grad & Undergrad

2. Examine how scholars use intersectionality to understand systemic advantage and/or disadvantage within specific spheres including the family, the state, and the labor force.
Audience: Both Grad & Undergrad

3. Explore key debates in the theoretical literature on intersectionality.
Audience: Both Grad & Undergrad

4. Identify key "gaps" and tensions in the theoretical literature on intersectionality and complete an original research project that critically interrogates one or more of these "gaps" and tensions.
Audience: Graduate

POLI SCI 590 — STUDY ABROAD TOPICS IN POLITICAL SCIENCE: POLITICAL THEORY
1-4 credits.

A study abroad equivalency for political theory that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

POLI SCI 601 – PROSEMINAR: TOPICS IN POLITICAL SCIENCE
3 credits.

Intensive study and research in selected problems within the constituent fields of political science.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Analyze and evaluate political science texts.
Audience: Both Grad & Undergrad

2. Articulate and develop conceptual claims and arguments in political science.
Audience: Both Grad & Undergrad

3. Assess research designs used by readings in class.
Audience: Both Grad & Undergrad

4. Apply course concepts to analysis of current topics in political science.
Audience: Both Grad & Undergrad

5. Explain important topics and arguments made in the readings as they apply to political science.
Audience: Graduate

POLI SCI 635 – COMPARATIVE POLITICS OF SPORT
3-4 credits.

Covers the political economy, political culture, and the politics of identity (nationalism, race, ethnicity, social class, religion, and gender) that is usually associated with sport at both the highest and lowest levels of competition. Not open to students with credit for POLI SCI 616 prior to fall 2017
Requisites: Sophomore standing and (POLI SCI 120 or 182) or (POLI SCI 106 or 186 taken prior to fall 2017) or graduate standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Examine the political economy of sport in a global context.
Audience: Undergraduate

2. Study the political culture of sport.
Audience: Undergraduate

3. Discuss the politics of identity (nationalism, race, ethnicity, social class, religion, and gender) that is usually associated with sport.
Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.
Audience: Graduate

POLI SCI 681 – SENIOR HONORS THESIS
3-4 credits.

Honors in the major in Political Science thesis research and writing.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Summer 2026

POLI SCI 682 – SENIOR HONORS THESIS
3-4 credits.

Honors in the Major in Political Science thesis research and writing (continuation of POLI SCI 681).
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

POLI SCI 683 – SENIOR HONORS THESIS SEMINAR
3 credits.

A class for honors students writing their senior honors thesis within a seminar format. Focus is on conceptualization, research design, writing of the thesis, and relevant issues of political science. Only senior majors writing honor thesis.
Requisites: Junior standing and declared in an Honors program
Course Designation: Core GenEd - Social & Behavioral Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Formulate and revise a focused research question; develop and defend a central argument (thesis) that is arguable and evidence-based.
Audience: Undergraduate

2. Identify, summarize, compare, and integrate your argument within broader scholarly conversations in the field of political science.
Audience: Undergraduate

3. Locate, assess, analyze, and synthesize scholarly sources to support, refine, or challenge your thesis.
Audience: Undergraduate

4. Generate, design, and construct original arguments and ideas that demonstrate creative and independent thinking.
Audience: Undergraduate

5. Apply disciplinary conventions to produce, organize, and present your research in a format that meets professional political science standards.
Audience: Undergraduate

6. Critique, evaluate, and articulate constructive feedback on the work of peers to advance collaborative learning.
Audience: Undergraduate

7. Interpret, respond to, and implement feedback from your faculty advisor and peers to revise and improve your writing and argumentation.
Audience: Undergraduate

8. Reflect on, monitor, and evaluate your own learning progress by identifying which research, writing, and analytical skills you are developing at each stage.
Audience: Undergraduate

POLI SCI 684 – SENIOR HONORS THESIS SEMINAR
3 credits.

A class for honors students writing their senior honors thesis within a seminar format. Focus is on conceptualization, research design, writing of the thesis, and relevant issues of political science. Continuation of 683. Seniors only.
Requisites: POLI SCI 683, senior standing only, and declared in an Honors program
Course Designation: Core GenEd - Social & Behavioral Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Formulate and revise a focused research question; develop and defend a central argument (thesis) that is arguable and evidence-based.
Audience: Undergraduate

2. Identify, summarize, compare, and integrate your argument within broader scholarly conversations in the field of political science.
Audience: Undergraduate

3. Locate, assess, analyze, and synthesize scholarly sources to support, refine, or challenge your thesis.
Audience: Undergraduate

4. Generate, design, and construct original arguments and ideas that demonstrate creative and independent thinking.
Audience: Undergraduate

5. Apply disciplinary conventions to produce, organize, and present your research in a format that meets professional political science standards.
Audience: Undergraduate

6. Critique, evaluate, and articulate constructive feedback on the work of peers to advance collaborative learning.
Audience: Undergraduate

7. Interpret, respond to, and implement feedback from your faculty advisor and peers to revise and improve your writing and argumentation.
Audience: Undergraduate

8. Reflect on, monitor, and evaluate your own learning progress by identifying which research, writing, and analytical skills you are developing at each stage.
Audience: Undergraduate

POLI SCI 690 – STUDY ABROAD TOPICS IN POLITICAL SCIENCE: COMPARATIVE POLITICS
1-4 credits.

A study abroad equivalency for comparative politics that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2001

POLI SCI 691 – SENIOR THESIS
3 credits.

For students writing a thesis in consultation with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

POLI SCI 692 – SENIOR THESIS
3 credits.

For students writing a thesis in consultation with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023

POLI SCI 698 – DIRECTED STUDY
1-4 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

POLI SCI 699 – DIRECTED STUDY
1-4 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

POLI SCI 799 – DIRECTED STUDY
1-4 credits.

Directed Study restricted to graduate students. Intended for master's level students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2021

POLI SCI 800 – POLITICAL SCIENCE AS A DISCIPLINE AND PROFESSION
1 credit.

Describes and evaluates major approaches used in political science. Explores issues related to professional development and political science careers.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate an understanding of political science as a discipline and profession.
Audience: Graduate

2. Recognize major approaches used in the discipline of political science and the “hidden curriculum” of the profession.
Audience: Graduate

3. Identify a broad cross-section of the faculty and their research in the political science department.
Audience: Graduate

POLI SCI 801 – DISSERTATION PROPOSAL RESEARCH AND WRITING SEMINAR
3 credits.

Provides structured support and mentorship for political science dissertation proposal writing. Includes topics such as defining relevant research questions, incorporating existing scholarship, developing a theory and research design and drafting a full prospectus.
Requisites: Declared in Political Science doctoral program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Fully form their dissertation committee.
Audience: Graduate

2. Produce a draft of their dissertation prospectus.
Audience: Graduate

POLI SCI/FRENCH/GERMAN/HISTORY/SOC 804 – INTERDISCIPLINARY WESTERN EUROPEAN AREA STUDIES SEMINAR
3 credits.

Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

POLI SCI 811 – INTRODUCTION TO STATISTICAL COMPUTING IN POLITICAL SCIENCE
1-3 credits.

Introduction to the issues of statistical computing in political science using statistical packages such as STATA and R with emphasis on developing sound practices for organizing data, protocols, and results in empirical research. Not open to students with credit for POLI SCI 553 prior to fall 2017
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023

POLI SCI 812 – INTRODUCTION TO STATISTICAL METHODS IN POLITICAL SCIENCE
4 credits.

Introductory statistics course for Ph.D. students. Emphasis on probability theory, inference, and the foundations of multivariate least squares and maximum likelihood.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Critically read, interpret and replicate the quantitative content of many articles in the quantitative social sciences
Audience: Graduate

2. Conduct, interpret, and communicate results from analysis using multiple regression
Audience: Graduate

3. Explain the limitations of observational data for making causal claims, and begin to use existing strategies for attempting to make causal claims from observational data
Audience: Graduate

4. Write clean, reusable, and reliable R code
Audience: Graduate

5. Feel empowered working with data
Audience: Graduate

POLI SCI 813 – MULTIVARIABLE STATISTICAL INFERENCE FOR POLITICAL RESEARCH
3 credits.

Extensive treatment of multiple regression and its variants.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

POLI SCI 814 – SOCIAL IDENTITIES: DEFINITION AND MEASUREMENT
3 credits.

Analyzes the concept of social identities with a focus on definition, comparison, and measurement. Explores a range of theories as well as methodological techniques for measurement. Examines classic works on race, ethnic, national, class, gender, and religious identities.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

POLI SCI 817 – EMPIRICAL METHODS OF POLITICAL INQUIRY
3 credits.

Acquaints students with a wide variety of research methods used to analyze political phenomena, emphasizing both quantitative and qualitative approaches.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

POLI SCI 818 – MAXIMUM LIKELIHOOD ESTIMATION
3 credits.

Develops the theory of maximum likelihood estimation and applies it to models for discrete and limited dependent variables common to political and social science data.
Requisites: POLI SCI 812 and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

POLI SCI 820 – EXPERIMENTAL METHODS
3 credits.

Experimental methods in the social sciences, with specific application to political science. Covers the logic of experimentation and how experiments can be used to investigate social phenomena. Interpret, design, execute and analyze experiments.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 3 number of completions
Learning Outcomes: 1. Explain important concepts and arguments made by prominent scholars in causal inference and experimental methods
Audience: Graduate

2. Design, analyze and field experiments suited to your own particular research question
Audience: Graduate

3. Understand and explain the ethical debates that surround experimental research
Audience: Graduate

4. Assess varied types of experimental designs on several dimensions
Audience: Graduate

5. Apply course concepts to analysis of current research and contemporary social scientific debates
Audience: Graduate

POLI SCI 821 – MASS POLITICAL BEHAVIOR
3 credits.

An empirical analysis of the role of mass publics in political life and the factors which determine the formation and expression of political beliefs and attitudes.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

POLI SCI 824 – FIELD SEMINAR IN AMERICAN POLITICS
3 credits.

Introduction to the foundational concepts, major theories, and empirical findings in American Politics. Surveys canonical and contemporary research across the field, with attention to topics ranging from political behavior to political institutions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Discuss canonical and contemporary research in American politics.
Audience: Graduate

2. Understand, analyze and evaluate concepts and theories in American politics.
Audience: Graduate

3. Formulate ideas for research that can make new contributions to scholarship on American politics (identify gaps in the literature, extensions of existing research, etc.).
Audience: Graduate

4. Compose rigorous and constructive critiques of articles and working papers in American politics.
Audience: Graduate

POLI SCI 825 – RACE AND POLITICS IN THE UNITED STATES
3 credits.

Analysis of the role of race, class and ethnicity in the political process. Evaluation of theories from political science, economics and sociology. Topics may include policy analysis, political organizations, immigration, political behavior and culture.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

POLI SCI 826 – THE LEGISLATIVE PROCESS
3 credits.

Analysis of legislative process and the role of the legislature in the political system, emphasizing current research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

POLI SCI 828 – THE CONTEMPORARY PRESIDENCY: ISSUES AND APPROACHES
3 credits.

Current topics of research interest on the American presidency. Alternative approaches and methods for the study of the presidency.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022

POLI SCI/JOURN 829 – POLITICAL COMMUNICATION
3 credits.

This course examines the role of communication in American politics. Topics covered include the communication of politics (e.g., communication by politics elites, effects of mass media and interpersonal communication on political attitudes) as well as the politics of communications (regulation of political communication, policy issues, etc.).
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe major conceptual and practical issues in politics in the digital media age.
Audience: Graduate

2. Develop basic analytical skills.
Audience: Graduate

3. Critique conceptualization, data collection and analysis of scientific evidence.
Audience: Graduate

4. Evaluate robustness of scientific findings and logical consistencies.
Audience: Graduate

5. Develop student's own study of the issues regarding political communication.
Audience: Graduate

POLI SCI/CLASSICS 834 – ROMAN POLITICAL THOUGHT
3 credits.

In depth study of key works of Roman political thought, along with recent and classic scholarship in political theory, history, philosophy, classics, and literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Master the state of existing research on Roman political thought through the study of primary and secondary sources.
Audience: Graduate

2. Develop expertise in methods of political inquiry, specifically the study of the history of political thought.
Audience: Graduate

3. Design, conduct, and complete original research dealing with Roman political thought.
Audience: Graduate

4. Communicate effectively, in both speech and writing, complex concepts and arguments related to Roman political thought to multiple audiences.
Audience: Graduate

POLI SCI/A A E 835 – GAME THEORY AND POLITICAL ANALYSIS
3 credits.

An introduction to the tools of game theoretic analysis, with reference to the use of game theory in political science. Intended for those desiring a basic familiarity with the theory, and for those planning further work in formal modeling.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

POLI SCI 836 – FORMAL MODELS OF DOMESTIC POLITICS
3 credits.

Provides an overview of formal, i.e., game-theoretic, models of domestic politics. This course builds directly upon the material presented in Political Science 835.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022

POLI SCI 837 – FORMAL MODELS OF INTERNATIONAL RELATIONS
3 credits.

Provides an overview of the formal theory literature in international relations, including international security and international political economy.
Requisites: POLI SCI/A A E 835
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2021

POLI SCI 839 – FIELD SEMINAR IN POLITICAL THEORY
3 credits.

An overview of approaches to interpreting, teaching, and writing about political theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Analyze different understandings of political theory as a subfield of political science
Audience: Graduate

2. Analyze different methods and schools of studying political theory
Audience: Graduate

3. Analyze different approaches to teaching works of political thought
Audience: Graduate

POLI SCI 840 – COMPARATIVE POLITICAL ECONOMY
3 credits.

Survey of field of comparative political economy and in-depth study of political economy of democratic and non-democratic capitalist systems. Key themes include: business and labor relations, globalization and its impact on domestic political economies, rise of emergent powers.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

POLI SCI 843 – THE POLITICAL ECONOMY OF DEVELOPMENT
3 credits.

We examine why some countries are rich, and others are poor. Selected topics include the role of institutions, regime type, corruption, the resource curse, ethnic differences and state capacity. We focus on the cutting edge of the empirical literature on development, and pay close attention to measurement and causal inference.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Develop theoretically grounded and testable hypotheses about the political economy of development.
Audience: Graduate

2. Formulate and implement clear research designs to evaluate hypotheses.
Audience: Graduate

POLI SCI 844 – DEMOCRATIC IMPERFECTIONS
3 credits.

Democracies frequently depart from their ideal type. We focus on select problems with democracy, and examine their causes and effects, and remedies for them. Topics vary from year-to-year, and include inequalities in political representation and participation, a lack of accountability and ethnic voting.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Develop theoretically grounded and testable hypotheses about the causes and effects of, and remedies for, inequalities in political representation and participation.
Audience: Graduate

2. Formulate and implement clear research designs to evaluate hypotheses.
Audience: Graduate

POLI SCI 846 – RACIAL AND ETHNIC DIVERSITY: CAUSES AND EFFECTS
3 credits.

Focuses on the causes and effects of racial and ethnic diversity in a range of contexts across different countries. Includes the following topics: 1) definitions of diversity and how ethnic and racial diversity is measured; 2) the causes of diversity including migrations and state actions such as ethnic cleansing and colonialism, and later processes of immigration and segregation; 3) the effects of diversity or segregation, including on social relations, conflict, public good provision, and political behavior; and the effects of ethnic and racial diversity in organizations; and 4) considers ways of increasing diversity including affirmative action and quotas, and the effectiveness of diversity training. Readings will include cases studies from different countries and different time periods and will include a range of different racial and ethnic groups around the world.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Gain an understanding of the meaning and measurement of racial and ethnic diversity.
Audience: Graduate

2. Become familiar with the social science literature on the causes and effects of ethnic and racial diversity and segregation.
Audience: Graduate

3. Identify and learn about research methods used in the study of racial and ethnic diversity.
Audience: Graduate

4. Develop critical reading, writing, collaboration, and presentation skills.
Audience: Graduate

POLI SCI 850 – RELIGION AND POLITICS
3 credits.

Examines the meanings of, and interactions between, religion and politics in comparative politics, international relations, and American politics. Explores the impact religion has on wide range of politically relevant outcomes and the mechanisms through which religion shapes those outcomes. Provides an overview of the main theoretical, conceptual, and empirical studies of religion and politics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Comprehension of selected theories related to religion and politics
Audience: Graduate

2. Critical assessment of theories related to religion and politics
Audience: Graduate

3. Application of theories related to religion and politics to general questions in political science
Audience: Graduate

POLI SCI 851 – CONTENTIOUS POLITICS
3 credits.

Why do people mobilize outside of routine political channels or institutions to pursue political change? How do we explain moments when people take to the streets or take up arms to accomplish their political goals? At the heart of these questions is one that has long formed a core of social science inquiry: how do scholars explain collective action, particularly in the face of often serious risks. Examine these questions through exploring leading theoretical themes in the study of social movements, revolutions, and riots. Explore how a variety of factors affect the where's, why's and how's of movement dynamics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Understand, analyze, explain, and critique theoretical approaches to contention.
Audience: Graduate

2. Understand, analyze, explain, and critique explanations for the emergence of social mobilizations, including revolutions and riots.
Audience: Graduate

3. Understand, analyze, explain, and critique explanations for a variety of dynamics of contention.
Audience: Graduate

4. Explain the role of culture and emotions as well as social and political structures in processes of contention.
Audience: Graduate

5. Understand and critique various methodological approaches to studying contention including which methods are best suited for which questions.
Audience: Graduate

6. Apply methodological and theoretical approaches to contention through independent research.
Audience: Graduate

POLI SCI 853 – COMPARATIVE POLITICAL INSTITUTIONS
3 credits.

Comparative theoretical and empirical analysis of political institutions, including electoral systems, legislatures, executives, executive-legislative relationships, political parties, party systems, federalism, economic governance, and link between institutions and internationalization.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

POLI SCI 854 – NATIONALISM AND ETHNIC CONFLICT
3 credits.

Comparative analysis of nationalism, national identity, and ethnicity and their impact on domestic and international conflict. Examines relationship between nationality, citizenship, and minority rights; territoriality and identity, contemporary religious nationalism; relationship between globalization and nationalism.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022

POLI SCI 856 – FIELD SEMINAR IN COMPARATIVE POLITICS
3 credits.

Introduction to leading concepts and theories in the field of comparative politics, including those relating to states, nations, regimes and development. Includes work on many different regions and countries employing a range of research strategies and methodologies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand, analyze and evaluate concepts and theories in Comparative Politics
Audience: Graduate

2. Identify and understand research methods and strategies and their implications
Audience: Graduate

3. Identify political science publication norms in top journals and university presses
Audience: Graduate

4. Develop critical reading, writing, collaboration, and presentation skills
Audience: Graduate

5. Become acquainted with UW-Madison faculty in Comparative Politics
Audience: Graduate

POLI SCI 857 – INTERNATIONAL RELATIONS THEORIES
3 credits.

Analysis of the major theories on the functioning of the international political system and the behavior of nations within it.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

POLI SCI 862 – STATE AND SOCIETY IN COMPARATIVE PERSPECTIVE
3 credits.

Reviews a range of approaches that focus on civil society, social movements, ethnic and religious based mobilization, as well as gender and class based approaches to state-society relations.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

POLI SCI 864 – INTERNATIONAL POLITICAL ECONOMY
3 credits.

Analysis of key classical and contemporary theories in international political economy.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022

POLI SCI/ENVIR ST/PUB AFFR 866 – GLOBAL ENVIRONMENTAL GOVERNANCE
3 credits.

In-depth examination of the political and policy challenges posed by global environmental degradation. Analysis of international institutions for managing the global environment.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

POLI SCI/PUB AFFR 871 – PUBLIC PROGRAM EVALUATION
3 credits.

Compares the conceptual, statistical, and ethical issues of experimental, quasi-experimental and non-experimental designs for program evaluation. Definitions of outcomes, sample size issues, statistical biases in measuring causal effects of programs, and the reliability of findings will be emphasized using case studies selected from current public programs.
Requisites: PUB AFFR 818
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

POLI SCI 873 – AMERICAN POLITICAL PARTIES
3 credits.

Reviews major approaches to analyzing political parties and understanding their developmental changes. Examines the parties in operation and the relationship of parties to the state and society.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

POLI SCI/PUB AFFR/URB R PL 874 – POLICY-MAKING PROCESS
3 credits.

Examines the political, social, and economic contexts that shape and are shaped by policy making processes. Though the focus is on the US, international comparisons will be made, and students are encouraged to think about the American context through comparative and international perspectives. Familiarizes students with dominant theories and models of policymaking process and policy change, starting with the model of the policy cycle. Focuses in on key topics and issues in policy making, specifically, agenda setting, implementation, and the relationships between policymaking and democracy. Reflects on contemporary and emerging issues and dilemmas of the politics of policy making.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify important contextual aspects of policy making processes, of dominant theories, models and conceptual frameworks of policy processes, and of key issues and topics in policy making.
Audience: Graduate

2. Critically analyze theories and evidence presented in readings and describe debates, past and present, surrounding public policy making processes.
Audience: Graduate

3. Read and comprehend academic research, data, and writing as well as journalistic writings on relevant issues of public policy processes and politics.
Audience: Graduate

4. Communicate summaries and analyses of topics, issues and key readings in class discussions, presentations, and writing assignments. Use clear written language and draw on theories, concepts, and evidence to support their arguments and ideas.
Audience: Graduate

5. Maintain fidelity to objective social science-based research methods.
Audience: Graduate

6. Prepare a high-quality presentation and communicate effectively as a speaker.
Audience: Graduate

POLI SCI/PUB AFFR/URB R PL 878 – PUBLIC MANAGEMENT
3 credits.

Role of administration in American government; problems of organization, bureaucracy and control; public policy as the output of the administrative process.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

POLI SCI/PUB AFFR 885 – ADVANCED PUBLIC MANAGEMENT: CRAFT, CONSTRAINTS AND ACCOUNTABILITY
3 credits.

Examines how managers in public and not-for-profit agencies can secure and utilize legal authority, human resources, and funds to accomplish organizational goals. Includes strategies for establishing and maintaining effective external relations and for working through other organizations to accomplish objectives.
Requisites: URB R PL/POLI SCI/PUB AFFR 878
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023

POLI SCI 900 – TOPICS IN POLITICAL SCIENCE
1-3 credits.

An umbrella course for variable credit topic courses, such as colloquia series, workshops, intensive summer courses, half-semester courses, etc.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

POLI SCI 904 – SEMINAR-AMERICAN POLITICS
3 credits.

In-depth examination of selected topics on American politics and governmental institutions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

POLI SCI 917 – TIME SERIES ANALYSIS
3 credits.

This course introduces students to time series methods and applications, including ARMA models, error corrections models and reduced form specifications. Course also discusses co-integration and fractional integration.
Requisites: POLI SCI 812 and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

POLI SCI 919 – SEMINAR-ADVANCED METHODOLOGY
3 credits.

Design of research and adaptation of advanced methods to solve particular methodological problems in original analyses of political data.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

POLI SCI 930 – SEMINAR IN MODERN POLITICAL THOUGHT
3 credits.

Exploration of themes from modern political thought.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Explain important concepts and arguments made by thinkers in the history of modern political thought
Audience: Graduate

2. Analyze modern political and ethical theories
Audience: Graduate

3. Assess political and ethical theories made by thinkers in the history of modern political thought
Audience: Graduate

4. Apply course concepts to analysis of contemporary political and ethical debates
Audience: Graduate

POLI SCI 931 – SEMINAR-POLITICAL THEORY
3 credits.

Analysis of and research on problems of theorizing in and about political life.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

POLI SCI 932 – SEMINAR IN EARLY MODERN POLITICAL THEORY
3 credits.

Study of selected topics or themes in early modern (c. 1500-1750 CE) political thought.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Master the state of existing research on a topic in early modern political theory through the study of primary and secondary sources.
Audience: Graduate

2. Develop expertise in methods of political inquiry, specifically the study of the history of political thought.
Audience: Graduate

3. Design, conduct, and complete original research dealing with early modern political theory.
Audience: Graduate

4. Communicate effectively, in both speech and writing, complex concepts and arguments related to early modern political theory to multiple audiences.
Audience: Graduate

POLI SCI/GEN&WS 933 – FEMINIST POLITICAL THEORY
3 credits.

Focuses on how specific schools of feminist thought redefine the political, spanning historical and contemporary feminist political theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Describe how contemporary feminist theorists understand "politics" including the meaning of political oppression and political resistance.
Audience: Graduate

2. Identify the key tensions and contradictions that undergird how contemporary feminist theorists understand political oppression and political resistance.
Audience: Graduate

3. Critically interrogate how these understandings shape and are shaped by racism, patriarchy, classism, and other hierarchies of power.
Audience: Graduate

4. Apply feminist political theorizing to their own, independent intellectual projects.
Audience: Graduate

POLI SCI 935 – SEMINAR IN CONTEMPORARY POLITICAL THEORY
3 credits.

Exploration of themes in contemporary political theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Explain important concepts and arguments made by thinkers in the history of political thought
Audience: Graduate

2. Analyze political and ethical theories, both historical and contemporary
Audience: Graduate

3. Assess political and ethical theories made by thinkers in the history of political thought
Audience: Graduate

4. Apply course concepts to analysis of contemporary political and ethical debates
Audience: Graduate

POLI SCI 936 – SEMINAR IN CONTINENTAL POLITICAL THOUGHT
3 credits.

Exploration of themes central to study of continental political thought.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Explain important concepts and arguments made by thinkers in continental political thought
Audience: Graduate

2. Analyze continental political and ethical theories, both historical and contemporary
Audience: Graduate

3. Assess political and ethical theories made by continental thinkers
Audience: Graduate

4. Apply course concepts to analysis of contemporary political and ethical debates
Audience: Graduate

POLI SCI 937 – SEMINAR IN LEGAL AND CONSTITUTIONAL THEORY
3 credits.

Exploration of themes in legal and/or constitutional theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Explain important concepts and arguments in legal and/or constitutional theory
Audience: Graduate

2. Analyze legal and/or constitutional theories.
Audience: Graduate

3. Assess legal and/or constitutional theories.
Audience: Graduate

4. Apply course concepts to analysis of contemporary legal and/or constitutional debates.
Audience: Graduate

POLI SCI 940 – DOMESTIC POLITICS OF INTERNATIONAL RELATIONS
3 credits.

Examines how domestic institutions and processes influence the international system. Also examines how international forces influence domestic politics in the areas of foreign policy, international political economy and security.
Requisites: POLI SCI 857
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

POLI SCI 945 – SEMINAR-NATIONAL SECURITY AFFAIRS
3 credits.

Contemporary military strategy, the interaction of military and political factors in international politics, and the processes and content of defense policies, with emphasis on the United States.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

POLI SCI 948 – SEMINAR: TOPICS IN COMPARATIVE POLITICS
3 credits.

Research seminar on specific topics in comparative politics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

POLI SCI 950 – PSYCHOLOGICAL APPROACHES TO INTERNATIONAL RELATIONS
3 credits.

Designed around substantive topic areas, including reputation, personality, and emotions. Covers the broad patterns of scholarship in political psychology over the last 50 years. The larger methodological issues around political psychology and International Relations (IR) (how do you study this? what tradeoffs do the various approaches entail?) will form a backdrop to most of our discussions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Explain important concepts and arguments made by prominent scholars in political psychology and international relations
Audience: Graduate

2. Assess a variety of research designs on several dimensions
Audience: Graduate

3. Apply course concepts to analysis of current research and contemporary social scientific debates
Audience: Graduate

POLI SCI 959 – SEMINAR-INTERNATIONAL ORGANIZATION
3 credits.

Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

POLI SCI 960 – SEMINAR-INTERNATIONAL RELATIONS
3 credits.

Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2021

POLI SCI 978 – AUTHORITARIAN POLITICS AND INSTITUTIONS
3 credits.

Introduction to scholarship on authoritarian regimes and institutions, the most prevalent type of government throughout history. Deals with the conceptual and operational differences between authoritarian and democratic regimes. Discusses autocrats' 'menu of manipulation' to maintain power and minimize both external and internal threats. Focuses on tools such as establishing legislatures, holding elections, controlling the dissemination of information, and power-sharing with political opponents as well as the regime allies. Discusses dictators' strategies to alienate the opposition and to hold power while minimizing external threats from the public, the military, and/or disgruntled political elites. Discusses how and under what conditions autocrats instrumentalize women's rights and on democratic backsliding and the future of global governance.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Differentiate between democratic and authoritarian regimes and become familiar with the different types of authoritarian rule.
Audience: Graduate

2. Recognize how authoritarian governments exercise and maintain power.

Audience: Graduate

3. Review sophisticated analytical frameworks and methodologies. Critique cutting-edge research in comparative politics and identify gaps in existing research.
Audience: Graduate

4. Identify the intersection of authoritarianism and gender and the role of women in shaping political outcomes from a comparative perspective.
Audience: Graduate

POLI SCI/A A E/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/PORTUG/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA
1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

POLI SCI/AFRICAN/ANTHRO/ECON/GEOG/HISTORY 983 – INTERDEPARTMENTAL SEMINAR IN AFRICAN STUDIES TOPICS
3 credits.

Interdisciplinary inquiry in African societies and cultures.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Develop in-depth knowledge in a sub-field of specialization within African studies
Audience: Graduate

2. Acquire and demonstrate understanding of major theories, approaches, concepts, currently informing African studies
Audience: Graduate

3. Understand your process of learning and possess the capacity to intentionally seek, evaluate, and learn from information, and to recognize and reduce bias in thinking.
Audience: Graduate

4. Gain firm knowledge of existing research in African studies
Audience: Graduate

5. Develop and improve speaking, readings, listening, and writing skills
Audience: Graduate

6. Write and speak across disciplinary boundaries
Audience: Graduate

7. Analyze texts from various theoretical and critical perspectives
Audience: Graduate

POLI SCI 986 – POLITICAL THEORY WORKSHOP
1-3 credits.

Presentation and evaluation of political theory research in progress by members of the workshop and invited speakers.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

POLI SCI 987 – COMPARATIVE POLITICS COLLOQUIUM
1-3 credits.

Presentation and evaluation of comparative politics research in progress by members of the workshop and invited speakers.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

POLI SCI 988 – INTERNATIONAL RELATIONS COLLOQUIUM
1-3 credits.

Presentation and evaluation of International Relations research in progress by members of the workshop and invited speakers.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Explain important concepts and arguments made by prominent scholars in political psychology and international relations
Audience: Graduate

2. Assess a variety of research designs on several dimensions
Audience: Graduate

3. Apply course concepts to analysis of current research and contemporary social scientific debates
Audience: Graduate

4. Provide apt, concise and helpful feedback to works in progress
Audience: Graduate

POLI SCI 989 – AMERICAN POLITICS WORKSHOP
1 credit.

Presentation and evaluation of American politics research in progress by members of the workshop and invited speakers.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. gain an awareness of cutting-edge research in American politics
Audience: Graduate

2. learn and practice how to constructively critique research in American politics
Audience: Graduate

3. gain experience in how to present research in professional settings
Audience: Graduate

4. practice how to receive constructive criticism and engage with criticism of one's work
Audience: Graduate

POLI SCI 990 – RESEARCH AND THESIS
1-3 credits.

Under the direction of faculty.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

POLI SCI 999 – INDEPENDENT WORK
2-3 credits.

Under the direction of a staff member.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

POPULATION HEALTH SCIENCES (POP HLTH)

POP HLTH/C&E SOC 370 – INTRODUCTION TO PUBLIC HEALTH
3 credits.

Introduction to the principles of public health. Using local and global health problems as examples, introduces epidemiology, evidence-based public health practice, evaluation, and communication. Covers the major subject domains of public health including infectious and chronic disease, environmental health, injuries and accidents, and health care systems. Key theoretical models and empirical approaches of public health are discussed.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science or Natural Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Define public health and its core functions
Audience: Undergraduate

2. Describe the difference between individual- and population-based strategies for improving health, including primary, secondary, and tertiary prevention approaches
Audience: Undergraduate

3. Describe major causes and trends in morbidity and mortality in the U.S. and globally
Audience: Undergraduate

4. Demonstrate knowledge of the 5-step public health approach (define the problem, find the causes, develop effective programs, implement programs, and evaluate impact)
Audience: Undergraduate

5. Describe the challenges and opportunities for evidence-based public health practice, focusing on health equity and social justice
Audience: Undergraduate

POP HLTH/B M I 451 – INTRODUCTION TO SAS PROGRAMMING FOR POPULATION HEALTH
2 credits.

Use of the SAS programming language for the management and analysis of biomedical data.
Requisites: Declared in the Population Health, Epidemiology or Clinical Investigation graduate program.
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Create and modify SAS datasets using programming structures within the SAS Data Step (e.g. Do loops, If/Then/Else, Functions, and Arrays).
Audience: Graduate

2. Utilize various SAS Procedures to explore SAS datasets, to summarize information in SAS datasets, and to perform basic statistical analyses.
Audience: Graduate

3. Recognize common SAS program errors, identify strategies for debugging SAS programs, and implement general techniques to check and verify your coding.
Audience: Graduate

POP HLTH/ENVIR ST 471 – INTRODUCTION TO ENVIRONMENTAL HEALTH
3 credits.

Impact of environmental problems on human health; biological hazards to human health from air and water pollution; radiation; pesticides; noise; problems related to food, occupation and environment of the work place; accidents. Physical and chemical factors involved.
Requisites: Junior standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the principles and practice of environmental health.
Audience: Undergraduate

2. Describe environmental health and its history as a crucial aspect of the history of public health
Audience: Undergraduate

3. Describe the U.S. and world health status and issues as background framework to environmental health.
Audience: Undergraduate

4. Describe a brief introduction to the public health research methodologies including epidemiology and toxicology.
Audience: Undergraduate

5. Describe crucial infectious and non-infectious disease principles as necessary to understand issues in environmental health.
Audience: Undergraduate

POP HLTH/ENVIR ST 502 – AIR POLLUTION AND HUMAN HEALTH
3 credits.

Toxicologic, controlled and epidemiologic studies on major air pollutants. Overview of study methods, lung physiology and pathology; air pollution sources, types, meteorology, sampling methods, controls and regulations.
Requisites: Junior standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the health science of air pollution's effect on human health.
Audience: Both Grad & Undergrad

2. Describe air pollution and its history as a crucial aspect of the history of environmental health.
Audience: Both Grad & Undergrad

3. Describe the U.S. and world health status and issues from air pollution.
Audience: Both Grad & Undergrad

4. Describe a brief introduction to the public health research methodologies and science including epidemiology and toxicology, risk assessment and the lungs.
Audience: Both Grad & Undergrad

5. Describe the detailed scientific and policy information on indoor and outdoor air pollutants.
Audience: Both Grad & Undergrad

6. Describe the science and policy solutions for air pollution and human health issues.
Audience: Graduate

POP HLTH/ECON/PUB AFFR 548 – THE ECONOMICS OF HEALTH CARE
3-4 credits.

Analysis of the health care industry. Markets for hospitals and physicians' care, markets for health manpower, and the role of health insurance.
Requisites: ECON 301, ECON 311, or PUB AFFR 880
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Specify the types of economic decisions health care players make in different markets.
Audience: Both Grad & Undergrad

2. Apply micro economic models and tools to study economic decisions in the healthcare system and understand their implications.
Audience: Both Grad & Undergrad

3. Evaluate empirical evidence from health care literature that involves cost, access, and quality of care considerations for the different health care players.
Audience: Both Grad & Undergrad

4. Describe the basic institutional structure of the US healthcare market and how it compares to markets in other countries.
Audience: Both Grad & Undergrad

5. Identify types of data necessary for testing specific hypotheses involving health care player behavior.
Audience: Graduate

POP HLTH/B M I 551 – INTRODUCTION TO BIOSTATISTICS FOR POPULATION HEALTH
4 credits.

Designed for population health researcher. Topics include descriptive statistics, elementary probability, probability distributions, one- and two-sample normal inference (point estimation, hypothesis testing, confidence intervals), power and sample size calculations, one- and two-sample binomial inference, underlying assumptions and diagnostic work.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and recognize statistical and probability terminology, symbols, definitions, and formulas
Audience: Graduate

2. Explain the meaning, assumptions, and interrelationships of statistical and probability concepts and formulas
Audience: Graduate

3. Execute probability and statistical calculations from information provided
Audience: Graduate

4. State assumptions, conclusions and interpretation in terms of statistical and probability computations
Audience: Graduate

POP HLTH/B M I 552 – REGRESSION METHODS FOR POPULATION HEALTH
4 credits.

Introduction to the primary statistical tools used in epidemiology and health services research: logistic regression for binary outcomes, multiple linear regression for continuous outcomes, multinomial regression models for categorical outcomes, and Poisson and negative binomial regression models for count outcomes.
Requisites: STAT/B M I 541 or POP HLTH/B M I 551
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. State the assumptions underlying linear, logistic, multinomial and Poisson regression models, recognize and address violations of those assumptions, and estimate and interpret regression models to answer epidemiologic and public health research questions.
Audience: Graduate

2. Critique uses of linear, logistic, multinomial and Poisson regression models in the epidemiologic and public health literature.
Audience: Graduate

3. Translate epidemiologic concepts into statistical modeling assumptions, and explain statistical modeling assumptions in epidemiologic terms.
Audience: Graduate

4. Recognize applications that require methods beyond their expertise, and identify resources to learn about more advanced techniques.
Audience: Graduate

POP HLTH/HIST SCI/MED HIST 553 – INTERNATIONAL HEALTH AND GLOBAL SOCIETY
3 credits.

Major problems in international health from 1750 to the present. Focus on disease epidemiology and ecology; political economy of health; migration; quarantine; race, ethnicity, and health care; international health research; cross-cultural healing; mental and maternal health; growth of international health organizations.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Recognize the utility of humanistic methods for the study of modern international health
Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis
Audience: Undergraduate

3. Understand essential developments in the evolving relationship between global history, politics, and public health on a global scale.
Audience: Undergraduate

POP HLTH/NUTR SCI 621 – INTRODUCTION TO NUTRITIONAL EPIDEMIOLOGY
1 credit.

Techniques used to evaluate relationships of diet to health and disease in human populations; integration of knowledge gained with results of animal and clinical studies toward understanding dietary risk or protective factors for disease. Includes advanced diet assessment and basic epidemiologic approaches.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625 – TOXICOLOGY I
3 credits.

Basic principles of toxicology and biochemical mechanisms of toxicity in mammalian species and man. Correlation between morphological and functional changes caused by toxicants in different organs of the body.
Requisites: (BIOCHEM 501 or 508) and (ANAT&PHY 335, 435, or (BIOCORE 485 and 486)) and PATH 404; or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the physiology and pathology of toxicology, understanding the basicfundamentals of toxicology and toxic agents
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and breakdown of toxicants using a given dataset
Audience: Both Grad & Undergrad

3. Recognize various experimental models to obtain scientific results
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research
Audience: Both Grad & Undergrad

5. Critique an example of toxicology in media and develop a presentation of this example
Audience: Both Grad & Undergrad

6. Explore new areas to assist in career development via journal club
Audience: Graduate

POP HLTH/M&ENVTOX/PATH/PHM SCI/PHMCOL-M 626 – TOXICOLOGY II
3 credits.

Survey of the basic methods and fundamental biochemical mechanisms of toxicity. Toxicity in mammalian organ systems, techniques for evaluating toxicity, as well as mechanisms of species specificity, and environmental interactions (with toxicant examples) are presented.
Requisites: POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain and identify the effects of toxicants on specific organs within the human body
Audience: Both Grad & Undergrad

2. Demonstrate metabolism and reactions of toxicants within organ systems using a given dataset
Audience: Both Grad & Undergrad

3. Classify different means of risk assessment and the conceptual rationale behind these methods
Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research
Audience: Both Grad & Undergrad

5. Relate specific organ concepts with conceptual examples from M&ENVTOX 625 to enhance scientific understanding
Audience: Undergraduate

6. Appraise concepts to research to identify future research concepts.
Audience: Graduate

POP HLTH/GENETICS/MD GENET 636 – PUBLIC HEALTH GENOMICS
1 credit.

Provides an introduction to public health genomics through a review of fundamental principles of genetics, the use of genetic information in clinical and research settings, and its implications for disease management and prevention, and health promotion. Explores policies that guide public health and discusses current ethical, legal, and social implications of these policies.
Requisites: (Junior standing and ZOOLOGY/BIOLOGY/BOTANY 151) or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss the impact of genetics on clinical care and public health practice
Audience: Both Grad & Undergrad

2. Critically discuss genetic/genomic policies and the relevant ethical, legal, and social implications (ELSI) of these policies
Audience: Both Grad & Undergrad

3. Read, summarize, critique, and relate current news articles to key concepts in public health genomics
Audience: Graduate

POP HLTH 640 – FOUNDATIONS IN GLOBAL HEALTH PRACTICE
1 credit.

Preparation for specific global health field experiences.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2021
Learning Outcomes: 1. Define and describe the evolution of foundational concepts related to of global health - including tropical medical, international health, global public health, one health and planetary health.
Audience: Both Grad & Undergrad

2. Describe and review global health competencies and develop a personalized assessment and roadmap identifying current skills and skill levels and goals for acquiring additional desired competencies needed to carry out research and implement programs in a global context.
Audience: Both Grad & Undergrad

3. Identify and use information from inter-disciplinary sources, including quantitative and qualitative data, as well as historical and cultural information, to gain a place-based understanding of the health status and health care system, as well as the overall socio-cultural context in which the project takes place.
Audience: Both Grad & Undergrad

4. Carry out topical placed-based study (retrospective or prospective) individually, or in pairs or small groups.
Audience: Graduate

POP HLTH 644 – INTERDISCIPLINARY PERSPECTIVES ON GLOBAL HEALTH AND DISEASE
1 credit.

Addresses a variety of global health topics through study of a specific country. Consider health data, health systems, historical and cultural information, and concepts of cultural competence and cultural humility.
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020
Learning Outcomes: 1. Explain the global burden of diseases, the health transition, and the triple burden of disease as it relates to the country/region studies
Audience: Both Grad & Undergrad

2. Describe how country-specific environmental, cultural, economic, and social factors influence health.
Audience: Both Grad & Undergrad

3. Review the structure of the health system in the country studied, the role of primary health care, public health, and non-governmental organizations in the health sector.
Audience: Both Grad & Undergrad

4. Explore public health approaches for maintaining health and preventing and treating illness in community settings, including surveillance, diagnostic activities, and interventions. This should include basic health needs such as maternal and child health and nutrition, as well as transnational health challenges such as avian flu, HIV/AIDS and other acute and chronic emerging issues.
Audience: Both Grad & Undergrad

5. Utilize principles and strategies for interdisciplinary team work (communication, negotiation, respect for group dynamics, and conflict resolution).
Audience: Both Grad & Undergrad

6. Explore concepts related to cultural competence and cultural humility, as well participatory community approaches to health.
Audience: Both Grad & Undergrad

7. Examine ethical issues related to global health.
Audience: Both Grad & Undergrad

8. Describe diseases commonly found in the country studied and explain the etiology, epidemiology, clinical presentation in humans and animals, public health implications, and prevention and treatment strategies.
Audience: Graduate

POP HLTH 650 – SPECIAL TOPICS
1-6 credits.

Variable content course.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

POP HLTH/B M I 651 – ADVANCED REGRESSION METHODS FOR POPULATION HEALTH
3 credits.

Extension of regression analysis to observational data with unequal variance, unequal sampling and propensity weights, clusters and longitudinal measurements, using different variance structures, mixed linear models, generalized linear models and GEE. Matrix notation will be introduced and underlying mathematical and statistical principles will be explained. Examples use data sets from ongoing population health research.
Requisites: POP HLTH/B M I 552
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Extend the knowledge of regression analysis beyond ordinary linear models
Audience: Graduate

2. Describe the features of correlated data and their implications in drawing inference
Audience: Graduate

3. Construct proper linear and generalized linear models for longitudinal and clustered data
Audience: Graduate

4. Describe the assumptions needed for estimation and inference
Audience: Graduate

5. Implement the inference procedures to solve real-world problems using statistical packages such as SAS and R
Audience: Graduate

6. Use diagnostic tools to assess model fit
Audience: Graduate

7. Interpret and present the analytic results to answer substantive questions
Audience: Graduate

POP HLTH/B M I 661 – CAUSAL INFERENCE, SURVEYS AND MISSING DATA FOR POPULATION HEALTH
3 credits.

Overview of modern statistical methods for dealing with "incomplete" data, including the design and analysis of complex surveys, the analysis of missing data, and causal inference.
Requisites: B M I/POP HLTH 552, STAT/F&W ECOL 572 (or HORT 572 prior to Spring 2025), C&E SOC/SOC 361, or ED PSYCH 761
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Identify the design elements (stratification, clustering) and sampling weights (unequal probability sampling, non-response adjustments) of a complex survey design and perform regression analyses of complex survey data to answer epidemiologic and public health research questions using standard statistical software (SAS and R)
Audience: Graduate

2. Identify missing data mechanisms and their potential impacts on naive statistical analyses
Audience: Graduate

3. Explain the strengths and weaknesses of various strategies for dealing with missing data (weighting, maximum likelihood, Bayesian, multiple imputation) and implement them using standard statistical software (SAS and R)
Audience: Graduate

4. Define individual and average causal effects and identify challenges (confounding, selection bias) to their estimation in observational studies
Audience: Graduate

5. Identify and implement statistical methods for estimating causal effects (IP weighting, g-formulas, propensity scores, instrumental variables) in settings where their use is appropriate
Audience: Graduate

POP HLTH/B M I 694 – APPLIED BIOMEDICAL INFORMATICS & REAL-WORLD DATA FOR PRECISION MEDICINE & POPULATION HEALTH
2 credits.

Provides an introduction to key concepts, methods, and tools of biomedical and health informatics used in precision medicine and population health, with emphasis on collection, management, and analysis of real-world data.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Demonstrate understanding of biomedical informatics concepts, methods, and tools used in precision medicine and population health.
Audience: Graduate

2. Demonstrate understanding of real-world data (patient-generated, clinical, and genomic) and data standards used in biomedical research.
Audience: Graduate

3. Demonstrate understanding of FAIR Guiding Principles for scientific data management and stewardship.
Audience: Graduate

4. Demonstrate understanding of regulations for using protected health information (PHI) data in health research, and ability to recognize potential ethical and compliance issues.
Audience: Graduate

POP HLTH 699 – INDEPENDENT READING
1-5 credits.

To gain additional information on specific research problems or advanced training in the areas covered by department staff.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply concepts learned in coursework to real life situations
Audience: Both Grad & Undergrad

2. Read and effectively search scientific literature
Audience: Both Grad & Undergrad

3. Develop critical, analytical, and independent thinking skills
Audience: Graduate

POP HLTH/MEDICINE/NURSING 705 – SEMINAR IN INTERDISCIPLINARY CLINICAL RESEARCH EVIDENCE
2-3 credits.

Exploration of interdisciplinary clinical research questions including strategies for assessing the evidence and methodology for conducting various types of literature reviews. Emphasizes an interdisciplinary perspective.
Requisites: SOC/POP HLTH 797 and STAT/B M I 542
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop an answerable clinical research question.
Audience: Graduate

2. Search relevant scientific literature using several electronic databases and other sources of evidence (published and unpublished) across disciplines.
Audience: Graduate

3. Manage sources of evidence with reference management software.
Audience: Graduate

4. Critically review published clinical research on a chosen topic.
Audience: Graduate

5. Develop a search strategy and conduct a systematic review or other form of evidence review.
Audience: Graduate

6. Present a planned or actual evidence review to interdisciplinary peers.
Audience: Graduate

7. Describe the implications for translation of the proposed evidence review from an interdisciplinary perspective.
Audience: Graduate

POP HLTH 709 – TRANSLATIONAL AND OUTCOMES RESEARCH IN HEALTH AND HEALTH CARE
3 credits.

Seeks to review the conceptualization of translational and outcomes research in health and health care settings; to illustrate basic concepts and methods in research as applied to current issues in health and health care settings; and to understand the diverse perspectives that can be used to inform translational and outcomes research in different organizations, including those based within communities.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand and communicate the conceptualization of translational and outcomes research in health and health care.
Audience: Graduate

2. Illustrate basic concepts and methods in translational and outcomes research as applied to current issues in health and health care through creating a proposed study.
Audience: Graduate

3. Demonstrate an understanding of the diverse perspectives on health and health care that can be used to inform translational and outcomes research in different organizations, including those within community settings.
Audience: Graduate

POP HLTH 712 – INTEGRATING MEDICINE AND PUBLIC HEALTH
1 credit.

Provides an introduction to public health and opportunities to meet and discuss key concepts with an exciting variety of physician leaders who have integrated medicine public health in their careers.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand the scope of public health activities practiced by physicians today.
Audience: Graduate

2. Identify common themes in the career paths of physicians who have integrated medicine and public health.
Audience: Graduate

3. Describe common approaches that physicians use to improve the health of the public, including communication, advocacy, professionalism, and systems-based approaches.
Audience: Graduate

4. Identify opportunities for further work in public health with physicians with diverse backgrounds.
Audience: Graduate

5. Create your own plan for a "path of distinction" in public health
Audience: Graduate

POP HLTH 718 – PRINCIPLES OF GLOBAL HEALTH CARE SYSTEMS
2 credits.

Addresses and analyzes differences in health status and methods of organizing and providing health services in countries with varying levels of development and types of socio-political systems. Develops an understanding of the various avenues of international cooperation in health.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Describe differences in systems of providing health services among countries at different levels of development and with varying socio-political systems.
Audience: Graduate

2. Critically analyze selected global health issues, such as: health and human rights, health disparities, and the global health workforce
Audience: Graduate

3. Describe the role of major health organizations.
Audience: Graduate

4. Examine and clarify values and ethics in global health issues.
Audience: Graduate

POP HLTH 721 – CONSPIRACIES IN PUBLIC HEALTH
2 credits.

Skepticism and conspiracism can be barriers to successful implementation of public health and medical interventions such as vaccination, fluoridation of water, and HIV treatment. Conversations between people with opposing viewpoints, whether face-to- face or via social media, often devolve to disparagement and dismissal. Awareness of or experience with such exchanges causes us to avoid tackling such "hot button" topics with friends, colleagues, and members of our communities. While it is all too easy to believe people who adopt conspiracy theories to be members of the fringe, research has shown that medical conspiracy theories are widely known, broadly endorsed, and highly predictive of many common health behaviors. Prepares health professionals to educate communities about important public health and medical interventions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe popular and less popular conspiracy theories related to biomedical and public health interventions and their origins.
Audience: Graduate

2. Explain the psychological and psychosocial basis of conspiracy theory adoption and perpetuation.
Audience: Graduate

3. Implement techniques to change individual and public opinion and behaviors related to public health and medical interventions.
Audience: Graduate

POP HLTH 728 – CLIMATE CHANGE MEDICINE
2 credits.

Climate change threatens human health through multiple exposure pathways, including heatwaves, storms, air pollution, and effects on infectious diseases, nutrition, and mental health. Provides a thorough, up-to-date review of these health impacts and current strategies for preparedness and prevention. Introduces a "Health in All Policies" approach to optimize medical interventions addressing climate-related health risks and to explore potential health benefits from mitigating the root causes of climate change.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate key concepts in environmental health risk assessment.
Audience: Graduate

2. Recognize the linkages between climate change and human health and well-being, as well as exposure pathways through which impacts occur.
Audience: Graduate

3. Learn and recognize the value in using a “Health in all Policies” approach to prevention.
Audience: Graduate

4. Recognize the main ways that actions to mitigate climate change has offer large benefits to health, especially in reducing chronic diseases
Audience: Graduate

5. Develop effective risk communication strategies related to climate change and health.
Audience: Graduate

6. Demonstrate ability to construct a Message Box to effectively prepare for interviews with the media, and to write an effective Op-Ed.
Audience: Graduate

POP HLTH 729 – PREPAREDNESS IN PUBLIC HEALTH
2 credits.

Provides an overview of various types of public health emergencies and disasters including the organizations and disciplines that prepare and respond to natural and unnatural emergencies. Gain an understanding of how public health officials, public health practitioners, state and local health department staff, health care personnel and emergency responders plan for and respond to public health emergencies. The role of the physician will specifically be explored.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Describe involved organizations and disciplines as well as current methods for disaster planning, preparedness and response; public health threats and contingency plans.
Audience: Graduate

2. Examine the impacts of emergencies and disasters to our systems, health and society.
Audience: Graduate

3. Describe the role of the physician as provider and partner in disaster planning, preparedness and response.
Audience: Graduate

4. Incorporate reflection and self-assessment regarding ethical challenges and considerations in public health emergency and response.
Audience: Graduate

POP HLTH/ENVIR ST 739 – CLIMATE CHANGE, HUMAN AND PLANETARY HEALTH
2 credits.

Provide tools to identify and address real-world global environmental health issues, stemming from climate change, habitat destruction leading to disease spillover events, food insecurity, and urban design.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize unique environmental public health challenges posed by climate change.
Audience: Graduate

2. Define the planetary boundaries and describe their links to human health.
Audience: Graduate

3. Define and Understand the Planetary Health framework and principles for systems-based approaches to risk management and health promotion.
Audience: Graduate

4. Learn and apply a Health in All Policies strategy to demonstrate the value of more comprehensive, cross-sector disease prevention programs.
Audience: Graduate

5. Critically analyze the linkages between physical and ecological conditions with human health and well-being, as well as exposure pathways through which impacts occur.
Audience: Graduate

6. Develop and exhibit effective risk and/or science communication strategies related to environmental health.
Audience: Graduate

POP HLTH 750 – CANCER EPIDEMIOLOGY
2 credits.

Covers current knowledge on cancer occurrence and control in human populations. Design and analysis approaches appropriate for cancer epidemiology will also be discussed.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the unequal burden of cancer among populations and variations across time and geography.
Audience: Graduate

2. Describe the distinctive features of the biology of cancer and carcinogenesis that have implications for epidemiologic research.
Audience: Graduate

3. Demonstrate knowledge about the major determinants for several common and emerging cancer sites, both for risk and survivorship.
Audience: Graduate

4. Critique epidemiologic study designs for strengths and weaknesses in answering research questions related to cancer risk and survivorship.
Audience: Graduate

POP HLTH 752 – PRINCIPLES OF POPULATION HEALTH: DETERMINANTS OF HEALTH AND HEALTH DISPARITIES
2 credits.

An introduction to the field of "Population Health Science" - the multidisciplinary study of why populations are healthy (or not) and how our limited resources can be allocated across the multiple determinants of health to improve population health.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply principles of population health sciences to understand the multiple determinants of health and what it means for such determinants to produce health and health disparities.
Audience: Graduate

2. Apply principles of population health sciences to understand the optimal allocation of resources across health determinants for the improvement of health and reduction of health disparities and to understand how such resource allocation relates to fundamental economic principles.
Audience: Graduate

3. Apply principles of population health sciences to understand the roles of socioeconomic status, behavior, medical care, and community on the production of health at individual and population levels and to appreciate the broad range of social determinants of health.
Audience: Graduate

4. Demonstrate understanding of the different ways in which individual health and population health are conceived and measured, and how particular subpopulations often have special health considerations.
Audience: Graduate

POP HLTH 753 – PRINCIPLES OF POPULATION HEALTH: POPULATION HEALTH AND HEALTHCARE SYSTEMS
2 credits.

Considers the roles of healthcare systems in improving population health, focusing on the importance of considering healthcare as one among multiple determinants of health.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Apply principles of population health sciences to understand the major dilemmas and tradeoffs involved in attempts to improve healthcare delivery, utilization, outcomes, and quality.
Audience: Graduate

2. Apply principles of population health sciences to understand the role of health care as one of many determinants of population health
Audience: Graduate

3. Apply principles of population health sciences to understand how efficient delivery of healthcare services is hindered by different forms of market failure and how the attainment of value-based cost-effective health care depends on the reimbursement and insurance incentives designed to encourage it.
Audience: Graduate

4. Demonstrate understanding of policy and program evaluation and its role in research dissemination, and understanding of the use and misuse of data in the development of evidence health policy.
Audience: Graduate

POP HLTH 777 – EPIDEMIOLOGY OF AGING
2 credits.

An overview of the epidemiology of aging, including common conditions, risk reduction, and the methodological challenges of engaging older adults in epidemiological studies.
Requisites: POP HLTH 798
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Identify and summarize epidemiological studies that influenced the field of aging epidemiology.
Audience: Graduate

2. Assess methodological considerations important in epidemiological research on aging.
Audience: Graduate

3. Critically evaluate scientific articles, assessing strengths, limitations and knowledge gaps.
Audience: Graduate

4. Design epidemiologic studies in aging epidemiology that overcome some limitations of previous studies.
Audience: Graduate

POP HLTH 782 – SOCIAL AND BEHAVIORAL EPIDEMIOLOGY
2 credits.

Introduces the fields of social epidemiology and behavioral epidemiology, including relevant theoretical frameworks, methods, and applications.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe major social and behavioral factors that influence the prevalence, incidence, morbidity, and mortality of health conditions.
Audience: Graduate

2. Explain theories, frameworks, and models relevant to health behaviors as well as socio-structural influences on health.
Audience: Graduate

3. Critique research studies in the fields of social epidemiology and behavioral epidemiology.
Audience: Graduate

4. Analyze links between socio-structural influences on health and individual health behaviors.
Audience: Graduate

POP HLTH 784 – PUBLIC HEALTH SURVEILLANCE AND ANALYTICS
3 credits.

Learn applied techniques for community health assessment and surveillance. Population health data (including census, natality, mortality, hospital discharge, behavioral risk factor) are retrieved for analysis and interpretation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Understand the purpose and role of monitoring population health.
Audience: Graduate

2. Name, describe in detail and use some of the existing data systems that are used to monitor population health in Wisconsin, the U.S. and globally.
Audience: Graduate

3. Understand and use methods for gathering and analyzing existing population health data.
Audience: Graduate

4. Complete and present a final project and brief report to monitor a health priority.
Audience: Graduate

POP HLTH/KINES 791 – PHYSICAL ACTIVITY EPIDEMIOLOGY
3 credits.

Recommendations for and surveillance of physical activity in the U.S., and associations with health and disease at the population level. Emphasis on measurement techniques, study design and research considerations.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the strengths and weaknesses of epidemiological study designs and critical issues in the analysis of physical activity-related research.
Audience: Graduate

2. Compare and contrast the specific measurement tools used in physical activity surveillance and research and identify the errors associated with these tools.
Audience: Graduate

3. Identify current public health recommendations for physical activity and describe how they have evolved.
Audience: Graduate

4. Describe the contemporary trends in physical activity in the United States and know how they have been measured.
Audience: Graduate

5. Identify the relationships between physical activity and various health conditions/diseases.
Audience: Graduate

6. Review and analyze the epidemiologic evidence for a link between physical activity and a specified outcome of interest (e.g. physical activity and depression), and present a review of the evidence
Audience: Graduate

POP HLTH 794 – BIOLOGICAL BASIS OF POPULATION HEALTH
2 credits.

Covers the physiology, biology and biochemistry of selected disease processes deemed to be important in population health sciences by virtue of their clinical significance including incidence, mortality and morbidity.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Present the biological principles needed to understand the basicphysiological/anatomical/histological/biochemical processes of a normal human.
Audience: Graduate

2. Present the biological principles needed to understand the basic mechanisms of disease processes involving infection, cancer and toxic substances.
Audience: Graduate

3. Exercise the skills needed to be familiar with the terminology pertinent to the above processes.
Audience: Graduate

4. Exercise the skills needed to be able to find, access and understand literature pertinent to the above processes.
Audience: Graduate

5. Foster an increased level of comfort in the communication of these health care professionals in training and clinicians and basic scientists.
Audience: Graduate

POP HLTH 795 – PRINCIPLES OF POPULATION HEALTH SCIENCES
1-3 credits.

Introduction to multiple determinants of health including medical care, socioeconomic status, the physical environment and individual behavior, and their interactions. Also covered will be the definition and measurement of population health, economic concepts in population health, and ethical and managerial issues in population health improvement.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate basic understanding and application of principles of Population Health Sciences in characterizing the multiple determinants of health and the optimal allocation of resources across those determinants for the improvement of health and reduction of disparities
Audience: Graduate

2. Demonstrate basic understanding and application, at a basic level, of the principles of microeconomic theory relating to human and institutional decisions in the allocation of scarce resources for the production of health at individual, system and population levels
Audience: Graduate

3. Demonstrate basic understanding of the role of socioeconomic status, behavior, and community on the production of health at individual and population levels
Audience: Graduate

4. Demonstrate basic understanding of the historical and current financing and provision of health care services in the United States and its shaping by the political and policy processes
Audience: Graduate

5. Demonstrate basic understanding and application of the principles of health measurement and its role in the design of health services, policy, intervention and evaluation
Audience: Graduate

6. Demonstrate basic understanding of policy and program evaluation and its role in research dissemination
Audience: Graduate

POP HLTH 796 – INTRODUCTION TO HEALTH SERVICES RESEARCH
3 credits.

Introduces students to a variety of perspectives, substantive areas and methodological approaches to health services research that provide the foundation for understanding the structure, process and outcomes of the U.S. health care system.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the broad aims and the major content areas of health services research.
Audience: Graduate

2. Identify a study's research questions, hypotheses, theoretical framework, study design, methodological approaches, and conclusions.
Audience: Graduate

3. Identify the strengths and limitations of prominent experimental and quasi-experimental designs as implemented in HSR, the assumptions each relies upon, and specific methods to assess plausibility of each assumption.
Audience: Graduate

4. Assess, and identify feasible methods to improve, the internal and external validity of a specific research study.
Audience: Graduate

5. Gain facility with key methods of professional communication about health services research studies (conference presentation, discussion, and referee report).
Audience: Graduate

POP HLTH/SOC 797 – INTRODUCTION TO EPIDEMIOLOGY
3 credits.

Design, implementation and interpretation of epidemiologic studies; emphasis on methodologic problems in the measurement of disease frequency, natural history and risk factors.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Calculate and interpret measures of health used to characterize morbidity and mortality in populations.
Audience: Graduate

2. Identify features of epidemiologic study designs, their strengths and limitations, and measures of association used to determine the relation between exposures and outcomes of interest.
Audience: Graduate

3. Describe major sources of bias and confounding in epidemiologic research, and how they can be addressed.
Audience: Graduate

4. Evaluate causal inferences between risk factors and health.
Audience: Graduate

5. Identify and interpret the presence of interaction between multiple risk factors in relation to an outcome.
Audience: Graduate

POP HLTH 798 – EPIDEMIOLOGIC METHODS
3 credits.

The main emphasis is the design and interpretation of epidemiologic studies. Includes hands-on experience in the evaluation of epidemiologic evidence, the analysis of epidemiologic data, and the discussion of strategies aimed to improve study validity and efficiency.
Requisites: SOC/POP HLTH 797
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Select, calculate and interpret measures of frequency and measures of effect used in different types of epidemiologic studies
Audience: Graduate

2. Demonstrate understanding of the rationale behind the design of epidemiologic studies
Audience: Graduate

3. Identify sources and types of bias in epidemiologic studies
Audience: Graduate

4. Explain common strategies to prevent and correct for bias in epidemiologic studies
Audience: Graduate

5. Evaluate the validity and extrapolability of results from epidemiologic studies
Audience: Graduate

POP HLTH 801 – EPIDEMIOLOGY OF INFECTIOUS DISEASES
2 credits.

Introduces basic methods to studying the epidemiology of infectious diseases and reviews infectious diseases of major public health importance. Covers the basics of microbiology, immunology, and laboratory-based methods and the principles of disease surveillance, outbreak investigation, mathematical models of disease transmission, and prevention strategies. The etiology, epidemiology, prevention, and treatment of ancient, modern, and emerging infectious diseases will be examined.
Requisites: SOC/POP HLTH 797
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how factors related to the host, organism, and environment interrelate to cause and mitigate the spread of infectious diseases.
Audience: Graduate

2. Apply the tools of infectious disease epidemiology that are used in surveillance, outbreak investigation, and research studies.
Audience: Graduate

3. Characterize the impact of infectious diseases on populations and communities locally and globally.
Audience: Graduate

POP HLTH 805 – ADVANCED EPIDEMIOLOGY: CAUSAL INFERENCE IN EPIDEMIOLOGICAL STUDIES
3 credits.

Focuses on the use of viewpoints and design/analytical tools to render possible the estimation of causal effects in epidemiologic studies. Students learn about the rationale and use of study designs/analytic tools that build upon but are substantially different from the most common approaches used in epidemiologic research (experimental studies, case-control studies, and cohort studies).
Requisites: SOC/POP HLTH 797 and POP HLTH 798
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate a good understanding of the main features of the counterfactual model as a base for causal inferences in epidemiological research.
Audience: Graduate

2. Identify assumptions needed for causal inference and assess whether they are sufficient to allow the estimation of causal effects from available data.
Audience: Graduate

3. Understand and use design and analytic strategies that help in the estimation of causal effects.
Audience: Graduate

4. Demonstrate a good understanding of the main features of the counterfactual model as a base for causal inferences in epidemiological research.
Audience: Graduate

5. Identify assumptions needed for causal inference and assess whether they are sufficient to allow the estimation of causal effects from available data.
Audience: Graduate

6. Understand and use design and analytic strategies that help in the estimation of causal effects.
Audience: Graduate

POP HLTH 806 – ADVANCED EPIDEMIOLOGY: PRACTICE OF EPIDEMIOLOGY
2 credits.

Apply and extend methodologic knowledge learned in the epidemiology methods sequence to selected key activities of a practicing epidemiologic researcher, including: study implementation; scientific writing and presentation; manuscript peer-reviewing; measurement validation; and commonly used epidemiology field instruments and methods.
Requisites: SOC/POP HLTH 797
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Design and implement epidemiology studies with a multi-disciplinary team
Audience: Graduate

2. Design and interpret epidemiology validation studies
Audience: Graduate

3. Assess a wide range of specific health factors with commonly used epidemiology field instruments and methods
Audience: Graduate

4. Serve as a peer reviewer to participate in scientific discussion
Audience: Graduate

POP HLTH 810 – EPIDEMIOLOGY AND GLOBAL ONE HEALTH
2 credits.

Examines the intersection of human, animal, and environmental health within the context of the Anthropocene. Drawing on the One Health framework, explore how globalization, ecological change, and human activity contribute to health disparities, the emergence of infectious diseases, and shifts in global public health priorities. Explore the epidemiology of infectious diseases, health determinants across diverse populations, and the ecological, social, and economic factors that facilitate disease transmission and emergence. Engage with case studies on zoonotic diseases, historical and modern pandemics, and management responses to infectious disease outbreaks. Integrates perspectives from veterinary science, human medicine, public health, ecology, entomology, and epidemiology, emphasizing the need for cross-disciplinary approaches to address complex, modern global health issues.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Utilize global health data to identify public health disparities, monitor trends in emerging infectious diseases (EIDs), and assess the ecological and environmental conditions that promote disease emergence, particularly under the forces of climate change and demographic shifts.
Audience: Graduate

2. Define and apply key concepts related to EIDs (e.g., hosts, vectors, reservoirs, and transmission cycles), differentiate between EIDs and endemic diseases, and use epidemiological principles to improve population health and reduce disparities
Audience: Graduate

3. Quantitatively and qualitatively assess past infectious disease outbreaks (e.g., Zika, Ebola, West Nile virus, and malaria) to understand successes and failures in management, intervention strategies, and quantitative models of disease transmission, including R 0 and compartmental modeling.
Audience: Graduate

4. Examine the roles of public health, veterinary, and agricultural agencies in managing and preventing EIDs and propose strategies to address the impacts of global environmental changes on disease emergence through interdisciplinary collaboration.
Audience: Graduate

5. Investigate ethical and practical considerations in global health research, with a focus on One Health principles, and explore how interdisciplinary approaches can address emerging public health challenges in the Anthropocene.
Audience: Graduate

POP HLTH 819 – SOCIAL NETWORK ANALYSIS AND HEALTH
3 credits.

Provides an overview of research applying social network analysis to health, drawing on studies from sociology, economics, computer science, medicine, and health services research. Covers the collection and processing of social network data, calculation of network measures, and statistical modeling of network effects on health behaviors. Examines studies on substance use, smoking, contraception, AIDS, obesity, and other health outcomes, as well as the social networks of health organizations and their impact on patient care. Prior coursework in data analysis and statistical methods is recommended.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Formulate research questions relevant to social network analysis.
Audience: Graduate

2. Describe the sources, advantages, and disadvantages of alternative types of social network data.
Audience: Graduate

3. Describe a social network and compare attributes across different social networks.
Audience: Graduate

4. Describe theoretical and empirical issues in current research on social network analysis and health.
Audience: Graduate

POP HLTH 820 – GRADUATE RESEARCH SEMINAR
1 credit.

Presentations by graduate students, professors, public health professionals and experts designed to cover the depth and breadth of research in the field of population health.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Gain skills in making professional presentations
Audience: Graduate

2. Gain skills in commenting on other scholars' work
Audience: Graduate

3. Describe the importance of Individual Development Plans (IDPs)
Audience: Graduate

POP HLTH 830 – GRANT WRITING FOR POPULATION HEALTH SCIENCES
2 credits.

Write an R36/F30/F31-style grant proposal related to Population Health Sciences that can be the starting point for an external grant submission or a preliminary exam proposal. Present developing proposal and provide oral feedback to peers. Review and critique written proposals from peers.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Complete a written draft of the Specific Aims page for an NIH R36 dissertation award or F30/F31 predoctoral fellowship.

Audience: Graduate

2. Complete a written draft of the Significance sub-section of the Research Strategy for an NIH R36 dissertation award or F30/F31 predoctoral fellowship.
Audience: Graduate

3. Complete a written draft of the Approach sub-section of the Research Strategy for an NIH R36 award or F30/F31 predoctoral fellowship.
Audience: Graduate

4. Demonstrate the ability to receive critical feedback and iteratively improve written drafts of grant application sections in response to that feedback.
Audience: Graduate

5. Demonstrate the ability to provide written and oral constructive and critical feedback to peers about their research ideas and draft grant application sections.
Audience: Graduate

POP HLTH 847 – CARDIOVASCULAR EPIDEMIOLOGY
2 credits.

Discussion of the population distribution, health impact, risk factors, treatment, and prevention of cardiovascular diseases.
Requisites: SOC/POP HLTH 797
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the major types of cardiovascular disease and their distributions in the population.
Audience: Graduate

2. Describe the general pathophysiology underlying each major type of cardiovascular disease.
Audience: Graduate

3. Identify the primary risk factors for each major type of cardiovascular disease.
Audience: Graduate

4. Describe how each major type of cardiovascular disease is assessed in clinical practice and in epidemiological studies.
Audience: Graduate

5. Describe the major epidemiological studies that have provided the foundation of knowledge in this field.
Audience: Graduate

POP HLTH/ECON 848 – HEALTH ECONOMICS
1-3 credits.

Health economics issues including demand, supply and pricing, market structure, medical malpractice, technological change, value of life, role of insurance, and other aspects of uncertainty.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe the breadth of themes in health economics, organized under three main topic areas (the production of health; the value of health and health care; and the use of evidence to make decisions in health and healthcare contexts), and to develop appropriate analytical and methodological skills
Audience: Graduate

2. Enhance analytical and writing skills by producing several short papers
Audience: Graduate

3. Enhance scholarly oral presentation skills
Audience: Graduate

POP HLTH/AN SCI/GENETICS 849 – GENOMIC EPIDEMIOLOGY
2 credits.

An introduction to genomic epidemiology, including a general overview of genetics and Mendelian and complex inheritance, as well as various elements of study design, such as participant ascertainment; phenotype definition; biologic sample selection; genotyping, sequencing, and quality control; measurement of covariates; and choice of analytic methods. Briefly covers original study designs; focuses on current study designs.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate and discuss genetic/genomic epidemiological literature.
Audience: Graduate

2. Design simple genetic/genomic epidemiological studies.
Audience: Graduate

3. Identify and apply appropriate tests of association between genetic variants and both qualitative and quantitative outcomes using either unrelated individuals or families.
Audience: Graduate

4. Summarize and interpret the results of genetic/genomic tests of association.
Audience: Graduate

POP HLTH/I SY E 875 – COST EFFECTIVENESS ANALYSIS IN HEALTH AND HEALTHCARE
3 credits.

Basic ideas and tools of cost effectiveness analysis as applied in evaluating medical technologies. Addresses special problems and methods in assessing diagnostic technologies, including ROC analysis, and in measuring health for technology assessment. Uses "classical" and current journal literature.
Requisites: SOC/POP HLTH 797 and POP HLTH/B M I 552
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Apply basic concepts of economic analysis to the assessment of medical technologies and healthcare interventions more broadly
Audience: Graduate

2. Examine health outcomes on a range from objective measures of physical systems to subjective preference-based measures of health utility and describe the benefits and limitations of using quality-adjusted life years (QALYs) as a health outcome measure
Audience: Graduate

3. Explain why we seek to obtain estimates of the "opportunity cost" of using health care resources, describe the process of "costing" in economic assessments of medical technologies and identify useful sources of information for obtaining cost information (and their limitations)
Audience: Graduate

4. Describe how primary data from randomized controlled trials and observational studies can be designed to assess medical technologies and explain the advantages and disadvantages of different designs in terms of their internal and external validity and decision-relevance
Audience: Graduate

5. Describe how evidence from secondary data can be integrated using meta-analysis and decision-analytic modeling methods to assess medical technologies and demonstrate basic ability to design and execute simple decision tree and Markov models for cost-effectiveness analysis
Audience: Graduate

POP HLTH 876 – MEASURING HEALTH OUTCOMES
3 credits.

Provides a comprehensive understanding of health outcome measures, including generic health status measures, disease-specific measures, and consumer reports of the quality of care.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Understand key measurement issues involved in health, healthcare quality, and health policy
Audience: Graduate

2. Appreciate and describe the application of these measurement issues to practical problems and research
Audience: Graduate

3. Appreciate and describe the importance of concise oral and written scholarly communication through several writing exercises and oral presentations
Audience: Graduate

POP HLTH/A A E/ENVIR ST/PUB AFFR 881 – BENEFIT-COST ANALYSIS
3 credits.

Presents the welfare economics underpinnings for evaluating the social benefits and costs of government activities. Issues such as uncertainty, the social discount rate, and welfare weights will be discussed; case studies from the environmental, social policy, and agricultural areas will be studied.
Requisites: Graduate/professional standing and (PUB AFFR 818 and 880), or POP HLTH/I SY E 875, or A A E 635
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the basic mechanics of performing a Cost Benefit Analysis, including methods for valuing costs and benefits, aggregating over time, and analyzing uncertainties.
Audience: Graduate

2. Evaluate the strengths and weaknesses of different CBAs and propose strategies to address any shortcomings.
Audience: Graduate

3. Debate the advantages and limitations of CBA for public policy and compare it to other approaches.
Audience: Graduate

4. Create a CBA for a real-world client from beginning to end, including scoping, background research, valuation of costs and benefits, uncertainty analysis, and interpretation.
Audience: Graduate

POP HLTH 890 – SUBSTANCE USE RESEARCH: PREVALENCE, POLICY, TREATMENT
3 credits.

Provides an overview of substance use health services research topics, study designs, data sources, and sufficient knowledge of one substantive topic to support the development of a research proposal.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe trends in substance use in the United States.
Audience: Graduate

2. Demonstrate understanding of the U.S. health care infrastructure to treat and mitigate the harms associated with substance use.
Audience: Graduate

3. Describe clinical, health systems, and policy interventions to prevent, treat, and mitigate the harms associated with substance use, and evidence of their effectiveness.
Audience: Graduate

4. Summarize strengths and limitations of datasets available for substance use health services research
Audience: Graduate

5. Formulate a substance use health services research question and summarize the relevant evidence in a concise literature review.
Audience: Graduate

POP HLTH 915 – INTERNATIONAL HEALTH SYSTEMS AND POLICY
2 credits.

Designed as an independent study with four modules: International Health System Performance; Health Systems in the Context of Global Health Needs; Health Systems in High Income Countries; and the Politics of Health System Development and Reform.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate the contributions of health care to population health outcomes
Audience: Graduate

2. Identify a set of broad criteria to evaluate health system performance
Audience: Graduate

3. Evaluate the current performance of the U.S. health care system in comparison with other national health systems
Audience: Graduate

4. Identify the key challenges in global health governance
Audience: Graduate

5. Analyze the social values and political interests that shape health systems development and reform efforts
Audience: Graduate

6. Explain how action outside the health sector is essential for preventing noncommunicable diseases, reducing health care costs, and improving population health and well-being
Audience: Graduate

POP HLTH 917 – GENERAL PREVENTIVE MEDICINE AND PUBLIC HEALTH ELECTIVE
4 credits.

Introduction to the role of physicians working in various fields of general preventive medicine and public health. Engage with preventive medicine faculty and residents to learn foundational knowledge and skills central to the discipline. Opportunity to select a health issue in Wisconsin and work on a short term project to describe, analyze or address the issue.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Apply the steps that are necessary to complete a public health investigation
Audience: Graduate

2. Describe the importance of engaging appropriate stakeholders in completing a public health investigation
Audience: Graduate

3. Effectively communicate findings to public health and healthcare audiences
Audience: Graduate

4. Discuss the role of applied and academic public health in maintaining the health of a community
Audience: Graduate

POP HLTH 918 – ENVIRONMENTAL HEALTH AND ADVOCACY
2 credits.

Unique opportunity to gain insight into the role of environmental toxins while honing skills to advocate for patients and vulnerable populations. Learn to take environmental histories and understand how environmental medicine is applied in the clinical setting and community. Use the socio-ecological model to frame advocacy. Gain practical experience through online didactic lectures, reading materials, class discussion, reflections and a class presentation
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Describe how various categories of environmental toxicants (including carcinogens, mutagens, teratogens, neurotoxins, and endocrine disrupters) affect human health
Audience: Graduate

2. Demonstrate skill in taking a robust patient history by understanding the potential toxicants in a patient's environment
Audience: Graduate

3. Practice risk communication strategies, simulating patient and population encounters
Audience: Graduate

4. Describe why certain populations, including children, pregnant women, the elderly and marginalized populations are more vulnerable to environmental exposure
Audience: Graduate

5. Discuss the role and approaches to engaging key stakeholders in environmental justice issues, including consumer/advocacy groups, community organizations, governmental organizations, corporations, and various industries/professions
Audience: Graduate

6. Identify credible evidence and appraise scientific literature to address both patient and population-level environmental health issues
Audience: Graduate

7. Identify the positive and negative impact of various public policies on environmental justice
Audience: Graduate

8. Discuss opportunities for physician advocacy across the social ecological framework to address environmental issues incorporating a systems-thinking lens
Audience: Graduate

POP HLTH/KINES 955 — SEMINAR - PHYSICAL ACTIVITY EPIDEMIOLOGY
1 credit.

Current research developments in physical activity epidemiology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Name and explain the basic concepts of physical activity epidemiology, including study designs, public health guidelines, surveillance, and physical activity measures
Audience: Graduate

2. Critically evaluate current research on physical activity and health topics
Audience: Graduate

3. Prepare a presentation and lead a group in an in-depth discussion of the methods, interpretation, and implications of recent scientific articles
Audience: Graduate

POP HLTH 990 — RESEARCH
1-8 credits.

Research supervised by individual faculty members.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Exhibit a broad understanding of general population health sciences (including population health and epidemiology principles.
Audience: Graduate

2. Conduct independent research using a variety of approaches.
Audience: Graduate

3. Think critically to address research challenges.
Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research.
Audience: Graduate

5. Collaborate with other investigators within or outside the thesis/ dissertation lab.
Audience: Graduate

PORTUGUESE (SPANISH AND PORTUGUESE) (PORTUG)

PORTUG 101 — FIRST SEMESTER PORTUGUESE
4 credits.

First-semester elementary-level Portuguese language practice: grammar, conversation, and reading. Requires no previous knowledge of Portuguese.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and produce in speech and writing fundamental aspects of basic Portuguese grammatical structures, like the following: agreement subject/ verb; agreement noun/adjective; correct use of the present, preterit, and imperfect verb tenses.
Audience: Undergraduate

2. Communicate in basic Portuguese on given topics (talking about yourself, your family, your city, daily activities, food and travel in the present time and, to a limited extent, the past.
Audience: Undergraduate

3. Discuss cultural features about the Portuguese-speaking world.
Audience: Undergraduate

4. Describe how Portuguese functions and how it differs from your native language.
Audience: Undergraduate

PORTUG 102 – SECOND SEMESTER PORTUGUESE
4 credits.

Second-semester elementary-level Portuguese language practice: grammar, conversation, and reading.
Requisites: PORTUG 101
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and produce in speech and writing fundamental aspects of basic Portuguese grammatical structures, like the following: agreement subject/ verb; agreement noun/adjective; correct use of the present, preterit, and imperfect verb tenses.
Audience: Undergraduate

2. Communicate in basic Portuguese on given topics (talking about yourself, your family, your city, daily activities, food and travel in the present time and, to a limited extent, the past.
Audience: Undergraduate

3. Discuss cultural features about the Portuguese-speaking world.
Audience: Undergraduate

4. Describe how Portuguese functions and how it differs from your native language.
Audience: Undergraduate

PORTUG 201 – THIRD SEMESTER PORTUGUESE
4 credits.

First-semester intermediate-level Portuguese language review: readings, culture, and patterns of conversation.
Requisites: PORTUG 102 or 301
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and produce in speech and writing advanced aspects of basic Portuguese grammatical structures such as the following: agreement subject/verb; agreement noun/adjective; correct use of the present, preterit, and imperfect indicative tenses; the formation and use of the future, present and past conditional, imperative, present subjunctive.
Audience: Undergraduate

2. Communicate in advanced Portuguese on given topics both orally and in writing (talking about your childhood and special occurrences in your life, stating your future goals, your wishes and desires, communicating your opinions, describing celebrations and traditions of the Portuguese-speaking world).
Audience: Undergraduate

3. Read various types of texts (newspaper articles, ads, surveys, literature passages, etc.) to gather information about contemporary Portuguese and Brazilian culture.
Audience: Undergraduate

4. Use specific vocabulary and idiomatic expressions and distinguish among different registers of the language.
Audience: Undergraduate

PORTUG 202 – FOURTH SEMESTER PORTUGUESE
4 credits.

Second-semester intermediate-level Portuguese language review: readings, culture, and patterns of conversation.
Requisites: PORTUG 201
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and produce in speech and writing advanced aspects of basic Portuguese grammatical structures such as the following: agreement subject/verb; agreement noun/adjective; correct use of the present, preterit, and imperfect indicative tenses; the formation and use of the future, present and past conditional, imperative, present subjunctive.
Audience: Undergraduate

2. Communicate in advanced Portuguese on given topics both orally and in writing (talking about your childhood and special occurrences in your life, stating your future goals, your wishes and desires, communicating your opinions, describing celebrations and traditions of the Portuguese-speaking world).
Audience: Undergraduate

3. Read various types of texts (newspaper articles, ads, surveys, literature passages, etc.) to gather information about contemporary Portuguese and Brazilian culture.
Audience: Undergraduate

4. Use specific vocabulary and idiomatic expressions and distinguish among different registers of the language.
Audience: Undergraduate

PORTUG 221 – INTRODUCTION TO LUSO-BRAZILIAN LITERATURES
4 credits.

Reading, discussion, and literary history of the sixteenth, nineteenth, and twentieth centuries.
Requisites: PORTUG 202
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe the history and culture of the nations that comprise the Portuguese-speaking world.
Audience: Undergraduate

2. Engage in literary analysis and critical thinking about the Lusophone world.
Audience: Undergraduate

3. Examine and discuss various pieces of literature to gain a multi-faceted perspective of Portuguese-language literature throughout history.
Audience: Undergraduate

4. Improve skills in written and oral communication by studying, critiquing and presenting on Portuguese-language literary texts.
Audience: Undergraduate

PORTUG 225 – THIRD YEAR CONVERSATION AND COMPOSITION
3 credits.

First-semester Intermediate High intensive practice in reading, writing, and grammar.
Requisites: PORTUG 202
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Read and analyze written and filmic texts in Portuguese.
Audience: Undergraduate

2. Hone critical and creative thinking skills while engaging in discussion of the texts.
Audience: Undergraduate

3. Effectively express opinions in Portuguese through both written and oral communication.
Audience: Undergraduate

PORTUG 226 – THIRD YEAR CONVERSATION AND COMPOSITION
3 credits.

Second-semester Intermediate High intensive practice in reading, writing, and grammar.
Requisites: PORTUG 202 or 225
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Read and analyze written and filmic texts in Portuguese.
Audience: Undergraduate

2. Discuss texts from multiple genres and perfect strategies of textual analysis.
Audience: Undergraduate

3. Effectively express opinions in Portuguese through both written and oral communication.
Audience: Undergraduate

PORTUG 299 – DIRECTED STUDY
1-3 credits.

Directed study projects for freshmen and sophomores as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2004

PORTUG 301 – INTENSIVE PORTUGUESE
4 credits.

Grammar, conversation, and reading. Equivalent of PORTUG 101 and 102.
Requisites: SPANISH 226, FRENCH 228, or ITALIAN 311. Not open to students with credit for PORTUG 101 and 102
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and produce in speech and writing fundamental aspects of basic Portuguese grammatical structures, like the following: agreement subject/verb; agreement noun/adjective; the difference between usage of present, preterit, and imperfect indicative tenses; proper use of the future and conditional indicative tenses and the present past, and future subjunctive.
Audience: Undergraduate

2. Communicate in basic Portuguese on given topics by using the grammatical structures (talking about yourself, your family, your city, daily activities, travel and vacation, food, clothing, work and business, means of communication, fashion, home, sports, the environment, talking about your childhood, your future and wishes, and your opinions).
Audience: Undergraduate

3. Discuss cultural features about the Portuguese-speaking world.
Audience: Undergraduate

4. Describe how Portuguese functions and how it differs from your native language.
Audience: Undergraduate

PORTUG 302 – INTENSIVE PORTUGUESE
4 credits.

Equivalent of the third and fourth college semesters of Portuguese. Readings, culture, and patterns of conversation.
Requisites: PORTUG 102 or 301. Not open to students with credit for PORTUG 201 and 202
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and produce in speech and writing fundamental aspects of basic Portuguese grammatical structures, like the following: agreement subject/verb; agreement noun/adjective; the difference between usage of present, preterit, and imperfect indicative tenses; proper use of the future and conditional indicative tenses and the present past, and future subjunctive.
Audience: Undergraduate

2. Communicate in basic Portuguese on given topics by using the grammatical structures (talking about yourself, your family, your city, daily activities, travel and vacation, food, clothing, work and business, means of communication, fashion, home, sports, the environment, talking about your childhood, your future and wishes, and your opinions).
Audience: Undergraduate

3. Discuss cultural features about the Portuguese-speaking world.
Audience: Undergraduate

4. Describe a linguistic awareness about how Portuguese functions and how it differs from your native language.
Audience: Undergraduate

PORTUG 311 – FOURTH YEAR COMPOSITION AND CONVERSATION
3 credits.

Fourth-year first-semester advanced oral practice and writing.
Requisites: PORTUG 202, 225, 226, or 301
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Use written and oral Portuguese at an advanced proficiency level.
Audience: Undergraduate

2. Identify a variety of writing genres (description, analytical, journalistic, argumentative, etc.).
Audience: Undergraduate

3. Attain advanced written, oral and aural proficiency in Portuguese through discussion boards, oral presentations, creative work, short skits, films, clips, podcasts, in-class debates, and discussions.
Audience: Undergraduate

4. Hone grammatical skills through advanced exercises and daily focus points.
Audience: Undergraduate

PORTUG 312 – FOURTH YEAR COMPOSITION AND CONVERSATION
3 credits.

Fourth-year second-semester advanced oral practice and writing.
Requisites: PORTUG 202, 225, 226, or 301
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Communicate in spoken and written Portuguese at an advanced proficiency level.
Audience: Undergraduate

2. Exchange and assess ideas effectively and with advanced accuracy in written and spoken Portuguese.
Audience: Undergraduate

3. Apply linguistic, pragmatic, sociolinguistic, and stylistic features of written and spoken Portuguese in writing and speech.
Audience: Undergraduate

PORTUG 330 – HISTORY OF THE PORTUGUESE LANGUAGE
3 credits.

Introduction to the linguistic sources and the historical and political factors that contributed to the formation of Portuguese and the current status of Portuguese in the world today.
Requisites: PORTUG 225 or 226
Course Designation: Core GenEd - Social & Behavioral Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Describe the field of linguistics and illustrate the ways in which linguists in distinct sub-disciplines like phonetics, phonology, sociolinguistics and historical linguistics study Portuguese.
Audience: Undergraduate

2. Identify the social, cultural and racial diversity that characterizes the Portuguese-speaking world and explain how this is reflected in distinct varieties/dialects of Portuguese.
Audience: Undergraduate

3. Apply conceptual knowledge of Linguistics to debunk popular myths about language that may be hurtful and discriminatory to particular groups of people.
Audience: Undergraduate

PORTUG 361 – PORTUGUESE CIVILIZATION
3 credits.

Cultural evolution from the medieval period through the twentieth century. Conducted in English.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify key events in Portuguese history and aspects of Portuguese culture.
Audience: Undergraduate

2. Apply appropriate style and disciplinary conventions in writing and oral communication, as they engage in critical thinking about the Lusophone world.
Audience: Undergraduate

3. Identify and make skillful use of relevant, reliable and high-quality research sources .
Audience: Undergraduate

4. Productively use core library resources specific to the humanities.
Audience: Undergraduate

PORTUG 362 – BRAZILIAN CIVILIZATION
3 credits.

Cultural evolution of Brazil from 1500 through the present. Conducted in English.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2018
Learning Outcomes: 1. Identify key events in Brazilian history and aspects of Brazilian culture.
Audience: Undergraduate

2. Apply appropriate style and disciplinary conventions in writing and oral communication, as they engage in critical thinking about the Lusophone world.
Audience: Undergraduate

3. Identify and make skillful use of relevant, reliable and high-quality research sources.
Audience: Undergraduate

4. Productively use core library resources specific to the humanities.
Audience: Undergraduate

PORTUG 411 – SURVEY OF PORTUGUESE LITERATURE BEFORE 1825
3 credits.

Advanced survey of Portuguese literature from 1140 to 1825.
Requisites: PORTUG 221 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. exchange and assess ideas effectively and with advanced accuracy in written and spoken Portuguese.
Audience: Both Grad & Undergrad

2. Apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation.
Audience: Both Grad & Undergrad

3. Apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation, both in and of themselves and in the context of Portugal from the Medieval period to 1825.
Audience: Both Grad & Undergrad

4. Design and complete a research project related to course material.
Audience: Graduate

PORTUG/FRENCH/ITALIAN/SPANISH 429 – INTRODUCTION TO THE ROMANCE LANGUAGES
3 credits.

Introduction to structural similarities and differences apparent in major Romance languages (French, Italian, Portuguese, Spanish) and to their historical developments, with reference to basic linguistic features of each language: phonology, morphology, syntax, and lexicon.
Requisites: SPANISH 226, FRENCH 228, ITALIAN 311, or PORTUG 226
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Recognize linguistic features within the Romance languages.
Audience: Undergraduate

2. Apply these concepts and features to the linguistic analysis of language, in general, and of the Romance languages, in particular.
Audience: Undergraduate

3. Analyze the structure and evolution of sounds, words and sentences in the Romance languages.
Audience: Undergraduate

4. Assess critically different claims about how language is organized, how it is used, how it varies and how it changes over time (using specific examples from French, Italian, Spanish, and Portuguese).
Audience: Undergraduate

PORTUG/GEN&WS 450 – BRAZILLIAN WOMEN WRITERS
3 credits.

A survey of representative writing by contemporary Brazillian women writers in relation to representations of nationality, race, class, ethnicity, gender and sexualities.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify a variety of writing styles by contemporary Brazilian women writers.
Audience: Both Grad & Undergrad

2. Discuss issues pertaining to the act and nature of writing, writing by women, and feminine and feminist writing.
Audience: Both Grad & Undergrad

3. Analyze writing from and about Brazil, its people and culture, through written and oral responses.
Audience: Both Grad & Undergrad

4. Identify racial and gender inequalities in Brazil and compare them to those in the United States.
Audience: Both Grad & Undergrad

5. Design and complete a research project related to course material.
Audience: Graduate

PORTUG/AFRICAN 451 – LUSOPHONE AFRICAN LITERATURE
3 credits.

Chronological and thematic survey of major trends, authors, and works of Lusophone Africa since 1936.
Requisites: PORTUG 221 and 312
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Develop written and analytical skills in Portuguese and integrate these skills to exchange and assess ideas effectively and with advanced accuracy in written and spoken Portuguese.
Audience: Both Grad & Undergrad

2. Apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation.
Audience: Both Grad & Undergrad

3. Describe and analyze literature, works of art and important historical events in Portuguese-speaking Africa in the 20th and 21st centuries.
Audience: Both Grad & Undergrad

4. Design and complete a research project related to course material.
Audience: Graduate

PORTUG/GEN&WS 460 – CARMEN MIRANDA
3 credits.

Examines the work, representation and interpretation of Carmen Miranda from her early days as a radio star in Brazil to a film actress and entertainer in Hollywood in the 1940s and 50s.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Examine the work, representation, and interpretation of Carmen Miranda in US film, media and popular culture from the late 1930s through to the present day.
Audience: Both Grad & Undergrad

2. Analyze concepts such as the gendered spectacle, the representation of race and ethnicity, women in popular culture, censorship and parody, the dialects of 'camp', drag, and Latinidade in Brazil and the United States.
Audience: Both Grad & Undergrad

3. Summarize the gendered politics of performance through the Hollywood musical and the period of the Good Neighborhood Policy.
Audience: Both Grad & Undergrad

4. Interpret critically different forms of texts including biographical writing, fan magazines, commercial newspaper articles, academic articles, press kits, film reviews, publicities, film trailers, posters and other paraphernalia.
Audience: Both Grad & Undergrad

5. Design and complete a research project related to course material.
Audience: Graduate

PORTUG 467 – SURVEY OF PORTUGUESE LITERATURE SINCE 1825
3 credits.

Advanced survey of Portuguese literature since 1825.
Requisites: PORTUG 221 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Develop written and analytical skills in Portuguese and integrate these skills to exchange and assess ideas effectively and with advanced accuracy in written and spoken Portuguese.
Audience: Both Grad & Undergrad

2. Apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation.
Audience: Both Grad & Undergrad

3. Apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation, both in and of themselves and in the context of Portugal since the 19th century.
Audience: Both Grad & Undergrad

4. Design and complete a research project related to course material.
Audience: Graduate

PORTUG 468 – SURVEY OF BRAZILIAN LITERATURE SINCE 1890
3 credits.

Advanced survey of Brazilian literature since 1890.
Requisites: PORTUG 221 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Exchange and assess ideas effectively and with advanced accuracy in written and spoken Portuguese.
Audience: Both Grad & Undergrad

2. Apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation.
Audience: Both Grad & Undergrad

3. Apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation, both in and of themselves and in the context of Brazil since 1890.
Audience: Both Grad & Undergrad

4. Design and complete a research project related to course material.
Audience: Graduate

PORTUG 573 – STUDY ABROAD IN PORTUGUESE TOPICS
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2001

PORTUG 640 – TOPICS IN LUSO-BRAZILIAN LITERATURE
3 credits.

Examination of a variety of literary genres or periods in relation to Portuguese-speaking countries.
Requisites: PORTUG 221 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Develop written and analytical skills in Portuguese and integrate these skills to exchange and assess ideas effectively and with advanced accuracy in written and spoken Portuguese.
Audience: Both Grad & Undergrad

2. Demonstrate familiarity with and apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation.
Audience: Undergraduate

3. Demonstrate familiarity with and apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation in and of themselves and in the context of contemporary Portuguese Memory Studies.
Audience: Graduate

PORTUG 642 – TOPICS IN LUSO-BRAZILIAN CULTURE
3 credits.

Examines a variety of cultural topics in relation to Portuguese-speaking countries.
Requisites: PORTUG 225, 226, 311, 312 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

PORTUG 681 – SENIOR HONORS THESIS
3 credits.

First-semester independent study with the goal of completing the preliminary research to write a senior honors thesis in Portuguese.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No

PORTUG 682 – SENIOR HONORS THESIS
3 credits.

Second-semester independent study with the goal of completing the preliminary research to write a senior honors thesis in Portuguese. Continuation of PORTUG 681.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No

PORTUG 699 – DIRECTED STUDY
1-6 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

PORTUG 751 – SEMINAR: BRAZILIAN LITERATURE
3 credits.

Seminar focusing on literature, literary criticism, culture, or theory relevant to Brazilian Literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2019

PORTUG 772 – SEMINAR: PORTUGUESE LITERATURE
3 credits.

Seminar focusing on literature, literary criticism, culture, or theory relevant to Portuguese Literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019

PORTUG 899 – INDEPENDENT READING
1-3 credits.

Directed study projects for graduate students as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

PORTUG/A A E/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/POLI SCI/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA
1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

PORTUG 990 – THESIS
1-12 credits.

Independent research and writing for graduate students under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

PSYCHIATRY (PSYCHIAT)

PSYCHIAT 699 – INDEPENDENT STUDY
1-5 credits.

Self-directed work under the supervision and guidance of a faculty member or instructional staff, and often in conjunction with a day-to-day mentor that is a graduate student or postdoc researcher in the faculty member's or instructor's group. Students normally participate in aspects of ongoing research projects.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Participate in the development, implementation, analysis, or dissemination of a research study in basic or clinical neuroscience.
Audience: Undergraduate

PSYCHIAT 712 – FOUNDATIONS IN INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH: DEV, SCREENING, ASSESSMENT AND DIAG
3 credits.

Provides a comprehensive understanding of the underpinnings of Infant, Early Childhood and Family Mental Health. Learn about pregnancy, transition to parenthood and typical/atypical development and attachment relationships. Become familiar with reliable and valid screening and assessment tools of social, emotional, cognitive, communication, motor and regulatory capacities in infants and young children in the context of their caregiving relationships; developmentally appropriate diagnostic nosologies; methods of conceptualizing risk and protective factors; and planning for therapeutic interventions that build on strengths and address vulnerabilities. Unique features include assessment of early parent-child relationships and the use of video replay to engage parents in assessing their relationship with their child and the benefit of faculty from multiple departments at UW and luminary national guest instructors.
Requisites: Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify concepts of Parent-Infant/Early Childhood Mental Health informed by developmental neuroscience, developmental psychology, attachment theory, trauma research, systems theory and the Diversity-Informed Tenets for Work with Infants, Children and Families to support the social and emotional functioning of young children and families as demonstrated by the Pre/Post Content Assessment
Audience: Graduate

2. Develop skills in observation of social-emotional and communication development in infants and young children (birth to 6 years) and the affective and behavioral quality of parent-child relationships as demonstrated by the Parent-Child Early Relationship and Developmental Assessment Assignment
Audience: Graduate

3. Apply specialized knowledge and skills related to family engagement; assessment of the parent-child relationship, sensory profile, child development, social-emotional functioning and mental health; diagnostic and case conceptualization; and service planning aligned with nationally recognized competencies demonstrated by the Parent-Child Early Relationship and Developmental Assessment Assignment
Audience: Graduate

4. Identify and apply strategies to support the development of parental reflective functioning as demonstrated by the Parent-Child Early Relationship and Developmental Assessment Assignment
Audience: Graduate

5. Deepen awareness of the needs of underserved populations of young children and families when there are concerns about parenting capacities or increased psychosocial stressors due to trauma, poverty, historical and systemic racism, oppression, health care disparities and mental health as demonstrated by Pre/Post Content Assessment
Audience: Graduate

PSYCHIAT 713 – SEMINAR IN REFLECTIVE PRACTICES AND MINDFULNESS IN INFANT, EARLY CHILDHOOD & FAMILY MENTAL HEALTH I
2 credits.

Provides a foundation in reflective practices through discussion of cases, infant and family observations and mindfulness experiences as applied to students' work with infants, young children and families. Explore and experience ways in which reflective practices may be applied to parent-infant/early childhood mental health. Learn mindfulness strategies for developing self-awareness and regulation that may be brought to their work with families of infants and young children. In small Reflective Mentoring Groups, students will experience both descriptive and in-vivo examples of reflective practice through case based presentations, deeper introspection and supportive discussion to increase clarity and engagement in work with families of young children. Consider boundaries and ethical decision making related to the dilemmas faced by professionals working with families during the perinatal period and in early childhood, especially those in high risk and challenging circumstances.
Requisites: Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply skills in informal and formal Mindfulness and Self-Compassion Practices as demonstrated by active participation in the Mindfulness Class and recording of regular practice with Mindfulness Practice Logs
Audience: Graduate

2. Contribute to reflective space through deep listening, mindful pauses, self-awareness, journaling and reflective questions as demonstrated in the larger class and small Reflective Mentoring Group participation
Audience: Graduate

3. Become more mindful, observant, and reflective and identify and appreciate the parallel process in their work with infants, young children and families as demonstrated by case presentations and discussion in the small Reflective Mentoring Groups, Infant Observation journaling and discussion as well as the Five-Facet Mindfulness Questionnaire pre/post assessment
Audience: Graduate

4. Increase awareness of one’s own cultural lens, social location and implicit bias and how this relates to their work as demonstrated by reading discussions, case discussions, Infant Observation journaling and discussion

Audience: Graduate

5. Increase compassion for self and others in their work as demonstrated by The Compassion Scale pre/post assessment
Audience: Graduate

PSYCHIAT 714 – CONSULTATION IN INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH: ADVANCED CLINICAL PRACTICE I
1 credit.

This small group and individualized course offers students an opportunity to reflect upon their work with mothers and partners in the prenatal and postpartum period, infants, young children and their families. Course faculty and a senior, clinical consultant will guide students in exploring their individual responses to the literature, course content and issues raised in their work including personal experience and reactions as well reflecting on the parallel process. The intent is to support the student's professional development in ways that broaden and deepen the effectiveness of their work.
Requisites: Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify parallel process and ways in which this may guide their work, as demonstrated during individual consultation sessions
Audience: Graduate

2. Consider and hold multiple perspectives (e.g. parent(s), child, other family members or providers) as demonstrated during individual consultation sessions
Audience: Graduate

3. Identify what is arising in oneself in the work and increase capacity for reflection and self-regulation as demonstrated during discussions in individual consultation sessions
Audience: Graduate

4. Enhance knowledge and skills for conducting clinical assessments with children birth to six years in the context of their primary caregiving relationships, using the Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood, developing case conceptualization and treatment planning as demonstrated through case discussions during individual consultations
Audience: Graduate

5. Use evidence-based therapeutic interventions with infants and young children evidencing emotional and/or behavioral disturbances and their parents as demonstrated through case discussions during individual consultation sessions
Audience: Graduate

6. Identify strategies for self-care in their work as shared during individual consultation sessions
Audience: Graduate

PSYCHIAT 715 – THERAPEUTIC INTERVENTIONS, PRACTICES AND POLICY IN INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH
3 credits.

Offers students the opportunity to apply knowledge of Infant, Early Childhood and Family Mental Health concepts, assessment and diagnosis to planning and implementation of relationship-based and individual treatment approaches as well as to program development and policy. Students will be introduced to best practices and evidence based multi-disciplinary treatment approaches to address a range of presenting issues, settings, and cultural contexts for vulnerable children who are evidencing social, emotional, behavioral or attentional disturbances and parents with psychiatric disorders. Implications for informing policy across systems of care will be addressed. During the course of the semester, students will benefit from invited state and national speakers and guest faculty and instructors from the UW speaking on their areas of expertise.
Requisites: Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Conduct supportive and therapeutic interventions with young children and their parent to reduce the impact of early-life trauma, loss, relational concerns, developmental delays, historical and systemic racism, poverty, medical conditions, mental health concerns and/or other adversities dependent on their scope of practice as demonstrated by the description provided in the Intervention Assignment
Audience: Graduate

2. Provide evidence based or promising supportive or therapeutic interventions that are culturally sensitive, trauma-informed, relationship-based, reflective, mindful and aligned with national standards as demonstrated by the Newborn Behavioral Observation System (NBO) Recording Forms, NBO Parent Questionnaires and Integrative Final Project Abstract and PowerPoint Presentation
Audience: Graduate

3. Develop confidence and competence in screening and intervention for Perinatal Mood and Anxiety Disorders and consideration of other parental mental health disorders and substance abuse disorders as demonstrated by practice and reflection in the course screening and discussion roleplay activity using the Edinburgh Postnatal Depression Scale (EPDS)
Audience: Graduate

4. Develop observational skills and ability to come alongside families during the postnatal period to engage them in looking together at their newborn's amazing capacities, behavior as communication and unique personhood to promote parental attunement and strengthen parent-infant relationships as demonstrated by the Newborn Behavioral Observations System Recording Forms and Parent Questionnaires
Audience: Graduate

5. Increase awareness of ethical considerations in working with persons during the perinatal period and in work with very young children and their families as demonstrated by case-based ethical decision-making activities and class participation
Audience: Graduate

PSYCHIAT 716 – SEMINAR IN REFLECTIVE PRACTICES AND MINDFULNESS IN INFANT, EARLY CHILDHOOD AND FAM MENTAL HEALTH II
2 credits.

Continued advancement in reflective practices through case discussion, infant and family observations, mindfulness and self-compassion experiences as applied to their work with infants, young children and families. Additional strategies and in-depth opportunities for introspection and self-awareness. Discussion of relationship-based therapeutic consultation and interventions and attention to the parallel process between the nature of their relationship with a parent and the parent's relationship with their child. Focus will be on underserved populations and contribution of maternal depression, substance abuse disorders and trauma on the parent-child relationship and the child's development. Complex ethical decision making and policy issues will be addressed. Inclusion of a self-assessment process that will support students in appraising their competencies and readiness to apply for the WI Alliance for Infant Mental Health Endorsement.
Requisites: Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply more advanced skills in informal and formal Mindfulness and Self-Compassion Practices as demonstrated by active participation in the Mindfulness Class and recording of regular practice with Mindfulness Practice Logs
Audience: Graduate

2. Facilitate reflective space through deeper listening, self-awareness, mindful pauses, journaling and reflective questions as demonstrated in the larger class and small Reflective Mentoring Group participation
Audience: Graduate

3. Become increasingly mindful, observant, and reflective and identify and appreciate the parallel process in their work with infants, young children and families as demonstrated by case presentations and discussion in the small Reflective Mentoring Groups, Infant Observation journaling and discussion as well as the Five-Facet Mindfulness Scale pre/post assessment
Audience: Graduate

4. Continue to develop cultural humility and sensitivity and reflect on one's own cultural lens, social location and implicit bias in their work as demonstrated by Case Presentations and discussion and Infant Observation journaling and discussion
Audience: Graduate

5. Continue to increase compassion for self and others in their work as demonstrated by The Compassion Scale pre/post assessment
Audience: Graduate

PSYCHIAT 717 – CONSULTATION IN INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH: ADVANCED CLINICAL PRACTICE II
1 credit.

This small group and individualized course offers students an opportunity to reflect upon their work with mothers and partners in the prenatal and postpartum period, infants, young children and their families. Course faculty and a senior, clinical consultant will guide students in exploring their individual responses to the literature, course content and issues raised in their work including personal experience and reactions as well reflecting on the parallel process. The intent is to support the student's professional development in ways that broaden and deepen the effectiveness of their work.
Requisites: Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use diagnostic nosologies for infants and young children and their parents, as demonstrated during case discussions in individual consultation sessions
Audience: Graduate

2. Expand use of evidence-based and promising therapeutic interventions with infants and young children evidencing emotional and/or behavioral disturbances and their parents as demonstrated through case discussions during individual consultation session
Audience: Graduate

3. Apply skills for evaluation and treatment of Perinatal Mood and Anxiety Disorders, other parental mental health disorders and substance use disorders as demonstrated during individual consultation sessions
Audience: Graduate

4. Describe and have the skills to provide Infant/Early Childhood Mental Health Consultation, as demonstrated through discussion during individual consultation sessions
Audience: Graduate

5. Increase self-awareness, reflective capacity and self-care strategies, as shared during individual consultation meetings
Audience: Graduate

PSYCHIAT 901 – SPORTS PSYCHIATRY: IMPROVING THE MENTAL HEALTH OF ATHLETES AT THE INDIVIDUAL AND SYSTEMS LEVELS
2 credits.

Improve skills in providing psychiatric health care to athlete populations. Sports psychiatry as a sub-specialty within psychiatry focuses on diagnosis and treatment of psychiatric illness in athletes. While utilization of psychological approaches to enhance performance can be part of the work of the sports psychiatrist, the emphasis is more on addressing actual mental illness in this population. Sports psychiatry may also involve the use of exercise as a therapeutic or preventative intervention for mental illness. Sports psychiatry typically focuses on mental health care for individual athletes, but systems-wide initiatives (e.g., at the level of the team or university) are also often important.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate understanding of the epidemiology of, risk factors for, and unique manifestations of a variety of psychiatric disorders and psychosocial stressors in athletes.
Audience: Graduate

2. Compare mechanisms of how treatments for psychiatric disorders in athletes may be similar to and different from treatments for psychiatric disorders in the general population.
Audience: Graduate

3. Distinguish between individual level treatments as well as system wide interventions to address mental illness in athletes.
Audience: Graduate

4. Demonstrate skill accessing the medical literature on a variety of topics related to sports psychiatry.
Audience: Graduate

PSYCHIAT 902 – THE BASIC SCIENCE OF SLEEP AND CONSCIOUSNESS
2 credits.

Sleep occupies a third of our life, and is found in all animal species. Loss of sleep has both acute and long-term negative consequences on the brain and the body. Still, why we sleep remains unclear, and hypotheses on the role of sleep for synaptic homeostasis, learning and memory, cardiovascular and metabolic health, are being tested in humans and animal models. Learn how the sleeping brain can either support vivid conscious experiences (dreaming) or not (deep slow wave sleep); brain structures involved in wake and sleep; how sleep pressure increases during waking; effects of sleep deprivation; causes of narcolepsy and other sleep disorders. How to study sleep in genetic models like flies; electron microscopy to assess effects of sleep loss on synapses; enhancement of sleep slow waves in humans; development and testing of theoretical models; methods to assess levels of consciousness in humans. During time at the WI Sleep Clinic, learn how sleep disorders are diagnosed and treated.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Explain definitions used for sleep and wake
Audience: Graduate

2. Detail the brain structures and systems involved in the control of sleep and wake
Audience: Graduate

3. Explain recent evidence linking sleep, memory, and synaptic plasticity
Audience: Graduate

4. Identify animal models used to study sleep
Audience: Graduate

5. Explain molecular and genetic approaches to the study of sleep
Audience: Graduate

6. Explain how sleep affects cardiovascular, metabolic, and cognitive functions
Audience: Graduate

7. Explain the importance of sleep for the individual and society, including negative consequences of sleep deprivation and some sleep disorders
Audience: Graduate

8. Detail the brain structures crucial to support consciousness
Audience: Graduate

9. Describe how dreaming research can advance consciousness research
Audience: Graduate

10. Explain theoretical approaches to study consciousness and how they can lead to new ways of assessing consciousness in healthy and patient populations
Audience: Graduate

11. Present recent studies on sleep and consciousness research (selected for daily assigned readings) at journal clubs
Audience: Graduate

12. Describe how to design a sleep/dreaming/consciousness experiment and recognize possible confounding factors
Audience: Graduate

PSYCHIAT 910 – PSYCHIATRY INDEPENDENT READING AND RESEARCH ELECTIVE
1-12 credits.

Independent exposure to research methodology as it pertains to psychiatry and/or affective neuroscience.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Individualized outcomes to be developed by student and faculty supervisor. See Appendix B below.
Audience: Graduate

PSYCHIAT 919 – PSYCHIATRY INDIVIDUALIZED CLINICAL ELECTIVE
1-12 credits.

Develop a customized experience with relevant faculty not offered by our already established electives.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Review, interpret and present current literature to support patient care
Audience: Graduate

2. Develop clinically relevant questions to advance learning
Audience: Graduate

3. Communicate effectively with patients, families, physicians and non-physician team members
Audience: Graduate

PSYCHIAT 921 – BEHAVIORAL HEALTH CLINICAL ELECTIVE
1-12 credits.

Behavioral medicine clinical patient care, under faculty supervision. All members of the department interact with the student who is typically assigned primarily to one member, depending upon the student's interests. Spend time with the Psychiatric Unit nursing staff to learn how the Unit itself is used as a treatment modality.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of behavioral medicine as it is practiced in a multi-specialty group setting
Audience: Graduate

2. Demonstrate knowledge and performance of clinical interviews and mental status exams, in formulating diagnoses and planning treatment and disposition
Audience: Graduate

3. Demonstrate knowledge of psychiatric practice with children, adolescents, and adults, covering a wide range of diagnoses and treatment methods
Audience: Graduate

PSYCHIAT 922 – PSYCHIATRY CONSULTATION AND LIAISON ADVANCED CLINICAL EXPERIENCE
4 credits.

Psychiatric assessment of patients admitted to University Hospital medical and surgical floors (including burn unit, trauma service and transplant services). Emergency psychiatric assessment through consultation to the University Hospital emergency department.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Assess suicide risk and levels of psychiatric care.
Audience: Graduate

2. Assess and manage mood, psychotic, and neurobehavioral disorders in the hospitalized setting.
Audience: Graduate

3. Independently perform a hypothesis-driven history and mental status examination.
Audience: Graduate

4. Develop and present a weighted differential diagnosis.
Audience: Graduate

5. Present a diagnostic and/or treatment plan
Audience: Graduate

6. Plan and implement biopsychosocial treatment plans for patients with psychiatric illness.
Audience: Graduate

7. Complete written documentation.
Audience: Graduate

8. Assist with safety planning for patients presenting with suicide risk factors.
Audience: Graduate

9. Communicate independently with patients, families, physicians, and non-physician team members.
Audience: Graduate

10. Provide psycho-education to patients and their families.
Audience: Graduate

11. Assist in coordinating care with other providers.
Audience: Graduate

PSYCHIAT 925 – COMMUNITY PSYCHIATRY ELECTIVE
2-4 credits.

Immersive experience in community mental health while embedded within a community support team, either at Gateway or Community Treatment Alternatives (CTA). Gateway is an assertive community treatment team serving Dane County residents who have severe mental illness and substance abuse issues. CTA is an assertive community treatment team that works exclusively with adults involved in the criminal justice system. Patients must be either diverted from the Dane County Jail or be conditionally released after being found "not guilty by reason of mental disease or defect" (NGI).
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 6 number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Define "recovery" in the context of schizophrenia.
Audience: Graduate

2. Describe the assertive community treatment (ACT) model of caring for people with severe, persistent mental illness.
Audience: Graduate

3. List three ways that community support teams can assist people with schizophrenia.
Audience: Graduate

4. Explain how a community support team functions, including how roles are shared and how influence is felt within teams.
Audience: Graduate

5. Demonstrate cultural sensitivity and humility in care of people with severe, persistent mental illness in the community.
Audience: Graduate

PSYCHIAT 930 – PSYCHIATRY GERIATRIC CLINICAL ELECTIVE
1-12 credits.

Care of older adults with mental illness, including late-life depression and anxiety, suicidality, dementia, and substance use disorders. Under the supervision of clinicians with extensive experience in the care of older adults, help care for patients in inpatient, outpatient and long-term care settings. Have the opportunity to experience public health approaches to improving the mental health of older adults, for example, by attending caregiver support groups.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of impact of mental illness on the quality of life and functioning of older adults and their caregivers.
Audience: Graduate

2. Describe the pathophysiology, clinical presentation and course, and treatment of late-life depression and anxiety.
Audience: Graduate

3. Describe suicide risk assessment in older adults.
Audience: Graduate

4. List the behavioral and psychological symptoms of dementia.
Audience: Graduate

5. Explain the geriatric psychopharmacology principle of "start low, go slow."
Audience: Graduate

PSYCHIAT 931 – DEMENTIA AND PUBLIC HEALTH
2-4 credits.

Clinical care of persons living with dementia and their caregivers. Public health approaches to assisting persons living with dementia in the community via Wisconsin Alzheimer's Institute. Assessment and management of dementia, including behavioral and psychological symptoms.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define mild cognitive impairment and dementia
Audience: Graduate

2. Contrast cognitive changes found in normal aging with dementia
Audience: Graduate

3. Describe the pathophysiology, risk factors, and presentation of the most common causes of dementia
Audience: Graduate

4. List the expected clinical findings at each stage of dementia
Audience: Graduate

5. List potentially reversible causes of dementia
Audience: Graduate

6. Contrast dementia with delirium
Audience: Graduate

7. Describe how a psychiatric interview should be modified when assessing a patient for dementia
Audience: Graduate

8. List what questions are important to ask when interviewing a patient for dementia
Audience: Graduate

9. Summarize when to use cognitive screening tools
Audience: Graduate

10. List available bedside cognitive screening tools
Audience: Graduate

11. Describe when a full neuropsychological eval may be indicated
Audience: Graduate

12. Develop a treatment plan for persons living with dementia
Audience: Graduate

13. List medications that have been FDA-approved for treatment of dementia, including risks and benefits
Audience: Graduate

14. List evidence-based psychosocial and educational interventions for persons living with dementia and their caregivers
Audience: Graduate

15. Explain how persons living with dementia and their family members can plan for the future
Audience: Graduate

16. List the behavioral and psychological symptoms of dementia (BPSD), and their associations with various causes of dementia

PSYCHIAT 932 – PSYCHIATRY ADDICTION CLINICAL ELECTIVE
1-12 credits.

Etiology, assessment, and treatment of substance use disorders and psychiatric co-morbidity.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Demonstrate awareness of epidemiology of substance use disorders and biopsychosocial risk factors and determents.
Audience: Graduate

2. Demonstrate awareness of the prevalence and treatment of psychiatric comorbidities.
Audience: Graduate

3. Demonstrate awareness of pharmacologic and psychosocial treatment modalities important to detoxification, maintenance, and relapse prevention in substance use disorders.
Audience: Graduate

4. Demonstrate awareness of family dynamic factors, self-help recovery, community treatment resources, and primary care integration of substance abuse treatment.
Audience: Graduate

5. Demonstrate proficiency in interviewing patients with substance abuse and psychiatric disorders and formulating a treatment plan within the context of a multidisciplinary treatment plan.
Audience: Graduate

PSYCHIAT 933 – PUBLIC HEALTH ADVOCACY AND SERVICE IN PSYCHIATRY
2 credits.

Broad set of experiences in public health service and public health advocacy, and exposure to a number of community resources and organizations. Spend time within a mental health integrated care setting under faculty supervision. These models of care have been shown to be cost-effective ways of delivering mental health care to large numbers of patients, thereby addressing a public health need given the serious shortage of Psychiatrists. Work with the Wisconsin Medical Society to receive media training and write and record a public service announcement on a Psychiatric public health issue. Receive Advocacy training. Attend meetings of local professional advocacy organizations (e.g., the Wisconsin Medical Society, Dane County Medical Society) with the Course Director, dependent on time of enrollment.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Discuss the role of socioeconomic, environmental, and cultural determinants of health on the mental health status and mental health care of individuals and populations.
Audience: Graduate

2. Design and record a public service announcement on a Psychiatric public health issue.
Audience: Graduate

3. Appraise the quality of the evidence of peer reviewed medical and public health literature in developing a brief blog on a specific topic related to preventive or public health care in psychiatry
Audience: Graduate

4. List and describe a variety of community resources available to improve the mental health of individuals and populations, especially those who are underserved
Audience: Graduate

5. Engage effectively with Legislators and/or members of professional medical advocacy organizations in discussing Psychiatric public health issues.
Audience: Graduate

PSYCHIAT 934 – PSYCHIATRY INPATIENT ADVANCED CLINICAL EXPERIENCE
2-4 credits.

Introduction to common psychiatric diagnoses (mood disorders, psychotic disorders and personality disorders) in the hospital setting. Active participation in patient care under the supervision of 2 Inpatient Attending Faculty and 3 Psychiatry Residents. During daily multidisciplinary rounds, present detailed clinical information about new patients. Provide daily updates on assigned patients. Participate in all aspects of patients' care, and conduct in-depth patient interviews. Attend family meetings and play an integral role in obtaining collateral information from family or outside sources. Write daily progress notes. Present a brief topic review at the end of the rotation.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate awareness of the impact of mental illness on the quality of life and functioning in the adult population
Audience: Graduate

2. Demonstrate knowledge of clinical presentation and the treatment of common psychiatric illnesses in the hospital setting
Audience: Graduate

3. Demonstrate familiarity with and ability to evaluate suicide risk in adults
Audience: Graduate

4. Conduct comprehensive psychiatric interviews and mental status examinations.
Audience: Graduate

5. Plan and implement biopsychosocial treatment plans for patients with psychiatric illness.
Audience: Graduate

PSYCHIAT 946 – CHILD AND ADOLESCENT PSYCHIATRY CLINICAL ELECTIVE
1-12 credits.

Introduction to core knowledge and skills in child and adolescent psychiatry including assessment, diagnoses, and treatment of children and adolescents through exposure to inpatient, outpatient, and consultation/liaison settings. Exposure to the intricacies of working with families and systems providing care to child and adolescent patients. Designed for students considering careers in psychiatry, pediatrics, and family practice.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate clinical knowledge and skills in providing psychiatric care to child and adolescent patients, including: psychotherapeutic and medication management treatment strategies, diagnostic interviewing techniques, working in multidisciplinary teams, and documentation
Audience: Graduate

2. Demonstrate ability to recognize and diagnose common psychiatric conditions in child and adolescent patients
Audience: Graduate

3. Demonstrate the ability to develop a biopsychosocial formulation.
Audience: Graduate

4. Participate in and display an understanding of the differences between a range of child and adolescent psychiatry practice settings, including inpatient, outpatient, and consultation/liaison.
Audience: Graduate

PSYCHIAT 947 – PSYCHIATRY ASSESSMENT & TREATMENT IN A FORENSIC HOSPITAL SETTING
4 credits.

Interact with and learn from multiple staff at Mendota Mental Health Institute (MMHI), including forensic psychiatrists, psychologists, nurses, and occupational therapists. Interact with patients who have been committed to MMHI usually for forensic purposes- the patient has been found not guilty by reason of insanity, they are incompetent to stand trial, and/or their conditional release in the community has been revoked. Opportunity to see patients who have been civilly committed. Rotate with multiple psychiatrists, some of whom are specially trained in forensic psychiatry. Learn more about the forensic/legal system, the structure of medium and maximum security forensic psychiatry units, treatment of refractory psychotic and mood disorders, and the basics of forensic assessments. The student is given as much autonomy as possible with individual supervision and discussion.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate basic knowledge of forensic psychiatry
Audience: Graduate

2. Demonstrate knowledge of the treatment and assessment of patients who are incompetent to stand trial
Audience: Graduate

3. Demonstrate knowledge and performance of clinical interviews and mental status exams, in formulating diagnoses and planning treatment
Audience: Graduate

4. Demonstrate knowledge in documenting a complete psychiatric history and physical
Audience: Graduate

PSYCHIAT 948 – PSYCHIATRY INTERNSHIP PREP COURSE
2 credits.

Review key concepts in psychiatry in preparation for residency. Focus is on common clinical scenarios of internship year with an emphasis on developing skills of advanced interviewing, documentation, specialized physical examination, advanced pharmacology, and approach in emergency situations. Reflect on core competencies beyond patient care, including professionalism, interpersonal/communication, and systems of care to help build professional identity as a physician.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Diagnose and manage common psychiatric diagnoses.
Audience: Graduate

2. Manage acute psychiatric emergencies under the supervision of faculty.

Audience: Graduate

3. Describe how stigma can be propagated in medical documentation and identify strategies to mitigate bias.
Audience: Graduate

4. Perform a focused physical examination for patients with psychiatric diagnoses and identify subtleties to facilitate accurate diagnosis and management.
Audience: Graduate

5. Demonstrate effective communication with peers, patients, families and all members of the healthcare team.
Audience: Graduate

6. Provide meaningful feedback to peers in a clinical environment.
Audience: Graduate

7. Use strategies to address the stresses of transitioning to internship during residency and throughout medical career.
Audience: Graduate

8. Identify individual areas of growth in clinical skills and develop a plan of how to address.
Audience: Graduate

9. Summarize one's professional identity and leadership skills.
Audience: Graduate

PSYCHOLOGY (PSYCH)

PSYCH/ASIAN/COUN PSY/ED PSYCH 120 – THE ART AND SCIENCE OF HUMAN FLOURISHING
3 credits.

Explore perspectives related to human flourishing from the sciences and humanities; investigate themes such as transformation, resilience, compassion, diversity, gratitude, community; expand self-awareness, enhanced social connectivity, and ability to change; formulate a sense of what it means to lead a flourishing life that sustains meaningful and fulfilling engagement with studies, relationships, community, and career.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and describe the relevant concepts and theories on the nature and cultivation of human flourishing from multiple intellectual fields including psychology, neuroscience, anthropology, philosophy, and religious studies.
Audience: Undergraduate

2. Describe and engage with the many dimensions of flourishing, and the various extrinsic and intrinsic factors influencing them.
Audience: Undergraduate

3. Formulate an account of human flourishing.
Audience: Undergraduate

4. Employ contemplative practices in an inquiry that cultivates qualities of human flourishing from within.
Audience: Undergraduate

5. Integrate contemplative practice and knowledge of course materials in order to establish a foundation for flourishing in your life and the communities in which you live.
Audience: Undergraduate

PSYCH/SOC 160 – HUMAN SEXUALITY: SOCIAL AND PSYCHOLOGICAL ISSUES
3-4 credits.

Biological, psychological and sociological aspects of sexual relationships and behavior. Presents theoretical and empirical materials on sexuality throughout the life-course, including childhood, adolescence, adulthood, and later life. Attention is given to gender, religion, education and the law as they relate to sexual expression in society.
Requisites: Not open to students with credit for SOC/PSYCH 453.
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply social science research findings to understand how ideas and practices involving sex and sexuality are shaped by social and cultural contexts and change over time.
Audience: Undergraduate

2. Analyze the relationship between sex, sexuality and other social institutions, aspects of identity, and cultural practices.
Audience: Undergraduate

3. Assess the basic methods and conclusions of scientific and medical research and publications on sexual health and well-being.
Audience: Undergraduate

4. Apply concepts from sociology and social psychology to consider how sexuality provides a window on other features of social life.
Audience: Undergraduate

PSYCH 202 – INTRODUCTION TO PSYCHOLOGY
3-4 credits.

Behavior, including its development, motivation, frustrations, emotion, intelligence, learning, forgetting, personality, language, thinking, and social behavior.
Requisites: Not open to students with credit for PSYCH 201 or 281
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe and discuss the inferences that are allowed by major methodological approaches in psychology, including correlational studies, experimental studies, and case studies.
Audience: Undergraduate

2. Describe major theoretical perspectives, concepts, hypotheses, and empirical findings in a wide variety of core domains of psychology, including learning, memory, perception, intelligence, decision making, social behavior, health and well-being, and psychological disorders.
Audience: Undergraduate

3. Apply the psychological concepts discussed above to real-world practical situations and current events.
Audience: Undergraduate

4. Identify and describe the functionality (in terms of their role in human behavior and/or subjective experience) of major brain areas.
Audience: Undergraduate

5. Discuss the relative contribution of nature (i.e., genetics) and nurture (i.e., experience) in multiple psychological phenomena.
Audience: Undergraduate

6. Describe the changes that occur in various psychological phenomena across the lifespan
Audience: Undergraduate

PSYCH 205 – EXPLORING RESEARCH IN PSYCHOLOGY
1 credit.

Focuses on a wide range of research in psychology at UW-Madison, such as child development, clinical psychology, perception, biological psychology, cognition, and psychological neuroscience.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Identify how psychologists study both universals and differences observed across individuals, cultures, and species, spanning all levels of analysis (neurons to neighborhoods).
Audience: Undergraduate

2. Apply critical thinking skills to determine how conclusions are drawn from research questions.
Audience: Undergraduate

3. Evaluate how data can provide insight into important societal issues.
Audience: Undergraduate

4. Recognize opportunities available in the Psychology major.
Audience: Undergraduate

5. Evaluate psychological science through multiple lenses, including such issues as social justice, poverty, psychopathology, and disabilities.
Audience: Undergraduate

6. Analyze research across all of the major subareas of psychology, and address intersections with myriad disciplines (e.g., zoology, philosophy, genetics, linguistics, economics, public policy, art, pediatrics, and music).
Audience: Undergraduate

PSYCH 210 – BASIC STATISTICS FOR PSYCHOLOGY
3 credits.

Measures of central tendency, variability; probability, sampling distributions; hypothesis testing, confidence intervals; t-tests; Chi-square; regression and correlation (linear) and introduction to analysis of variance (1-way).
Requisites: Satisfied Quantitative Reasoning (QR) A and (PSYCH 202 or concurrent enrollment)
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain why data beat anecdotes.
Audience: Undergraduate

2. Understand why association is not causation
Audience: Undergraduate

3. Explain the fundamental concepts and apply the basic procedures that underlie descriptive and inferential statistics
Audience: Undergraduate

4. Interpret and draw conclusions from graphical displays and standard output from statistical software packages.
Audience: Undergraduate

5. Understand why statistical significance does not necessarily imply practical importance.
Audience: Undergraduate

6. Demonstrate an awareness of ethical issues associated with sound statistical practice.
Audience: Undergraduate

PSYCH 212 – SOCIAL SCIENCE TOPICS IN PSYCHOLOGY
3 credits.

Consider how researchers approach classic and current research findings and controversies related to a specific topic, with a social science emphasis. Popular misconceptions will be addressed through discussions of relevant scientific research. Primary focus on behavioral research approaches, though neuroscientific or computational approaches may be integrated.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Think critically about an important topic in psychology with an emphasis in the social science.
Audience: Undergraduate

2. Acquire knowledge about the methods used to study that topic.
Audience: Undergraduate

3. Consider controversies in the field and their impact on theoretical development.
Audience: Undergraduate

4. Compare classic and contemporary theories.
Audience: Undergraduate

5. Write scientifically about issues in psychological science.
Audience: Undergraduate

6. Consider the differences between popular press and scientific approaches to issues in psychology.
Audience: Undergraduate

PSYCH 225 – RESEARCH METHODS
4 credits.

General characteristics of scientific method; use of experimental, observational, and correlational research designs; research methods used in psychological science; illustration of core issues in research methods taken from several areas of psychology; lecture, demonstration, and experiments.
Requisites: Satisfied Communications A, grade of C in PSYCH 202, and grade of C in (PSYCH 210, STAT 324, STAT 340, or STAT 371)
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop skills to find, read, and understand scientific articles and to synthesize scientific literature
Audience: Undergraduate

2. Through an iterative process, learn how to effectively communicate research in multiple modalities
Audience: Undergraduate

3. Develop critical thinking skills, examine linkages between method and results, consider alternative explanations, and become more knowledgeable consumers of research
Audience: Undergraduate

4. Generate and test hypotheses; design psychological research using different approaches, data collection tools, and analysis techniques
Audience: Undergraduate

5. Correctly interpret and convey statistical results via text, tables, and figures
Audience: Undergraduate

6. Learn key principles of science, including use of evidence, how to evaluate scientific reliability and validity, and how to fairly and thoroughly evaluate research inside and outside the classroom.
Audience: Undergraduate

7. Learn that ethical principles, behavior, and decision-making pertain to all aspects of the research process
Audience: Undergraduate

8. Identify how psychological science can inform societal practices and policies. Review and apply what you learned.
Audience: Undergraduate

PSYCH 310 – STUDY ABROAD IN PSYCHOLOGY TOPICS
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 1999

PSYCH 311 – ISSUES IN PSYCHOLOGY
1-4 credits.

Topics vary with the instructor. Survey of topical issues.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Explore current issues in psychological science.
Audience: Undergraduate

2. Evaluate conclusions drawn from research in psychological science.
Audience: Undergraduate

3. Apply psychological concepts, theories, and research findings to issues in psychology.
Audience: Undergraduate

PSYCH/GEN&WS 322 – SEXUAL & RELATIONSHIP VIOLENCE RESEARCH & ACTIVISM
3 credits.

Examine sexual and relationship violence and how they intersect with various aspects of identity (race, gender, sexual orientation, disability, poverty, etc.) in the general community as well as within particular populations (college, military, incarcerated) with a heavy focus on college populations (some of the applied parts of the course will focus here). Learn about power and oppression, as well as ways that both research and practice in these arenas have been marginalized and underfunded. Additional focus on community and campus responses to sexual and relationship violence through a series of speakers as well as about anti-violence activism through course activities and group projects.
Requisites: Junior standing and 3 credits in PSYCH or GEN&WS
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Understand the prevalence of sexual and relationship violence, whom it impacts, how it can affect survivors, and service seeking options for survivors.
Audience: Undergraduate

2. Understand the role of identity and intersectional identities in the experience and impact of violence as well as service seeking.
Audience: Undergraduate

3. Understand the role of alcohol and other drugs in sexual and relationship violence and their intersections with personal and social identities.
Audience: Undergraduate

4. Understand the history and practice of advocacy.
Audience: Undergraduate

5. Apply knowledge in determining the medical, mental health, legal, and other options for survivors
Audience: Undergraduate

6. Analyze and apply fourth-wave feminism to anti-violence activism.
Audience: Undergraduate

PSYCH/I SY E 349 – INTRODUCTION TO HUMAN FACTORS
3 credits.

Conveys the importance of considering human capabilities and limits in system design and operation. This includes understanding human characteristics from the cognitive, physical, and psychosocial perspectives. Implications of these characteristics are explored through understanding the needs of people, designing to support these needs, and evaluating systems to ensure they serve the intended purpose. Case studies are used to identify the human role in accidents and to identify design improvements. Application domains include consumer product design, human-computer interaction, workplace safety, and complex systems such as healthcare delivery.
Requisites: (I SY E 210, E C E 331, MATH/STAT 309, 431, STAT 311, 324, 371, MATH 531, PSYCH 210, or C&E SOC/SOC 360, or concurrent registration), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the strengths and limits of human perceptual, cognitive and physical abilities and their implications for system design
Audience: Undergraduate

2. Describe human factors tools, techniques and methods commonly used to design and improve system performance
Audience: Undergraduate

3. Evaluate and recommend work and task designs based on human factors and ergonomic principles
Audience: Undergraduate

4. Define the ethical application of human factors in designing products and processes
Audience: Undergraduate

PSYCH 380 – THESIS PREPARATION SEMINAR
1 credit.

Discusses the process of research, provide guidance and feedback about writing about research, and offer opportunities to present research issues and findings; preparation to write a senior thesis.
Requisites: PSYCH 225 or concurrent enrollment, and declared in a College of Letters and Science Honors in the Liberal Arts program or Psychology Honors in the Major
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Respond adaptively to questions about, and feedback on, one's own research in psychology
Audience: Undergraduate

2. Ask incisive questions about, and provide feedback on, other people's research in psychology
Audience: Undergraduate

3. Produce high-quality public presentations about research in psychology

Audience: Undergraduate

4. Develop an independent research project based on the existing literature and, in most cases, based on the ongoing research of a faculty mentor
Audience: Undergraduate

5. Write a research fellowship proposal
Audience: Undergraduate

PSYCH 399 – SERVICE LEARNING IN PSYCHOLOGY
1-4 credits.

An independent opportunity to provide experience in community service work relevant to psychology.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

PSYCH 401 – PSYCHOLOGY, LAW, AND SOCIAL POLICY
3 credits.

Focuses on the role that psychological principles, research evidence and social science play in the laws of U.S. society, especially in the policies and mechanisms of social control of human behavior. Topics include: the ways society defines membership; the role of psychology determining who should be excluded or restricted from open society; how selected processes work in the legal and social context; students' own roles as citizens in supporting or changing these social processes; clinical-legal processes used to determine the disposition of individuals considered marginal in society; mechanisms used to exclude individuals from open society through criminal and civil court processes; the role of psychology as a science; and the role of psychologists as behavioral experts in criminal and civil courts, and in shaping social policies.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the ways that psychological science interfaces with social policy and the criminal justice system.
Audience: Undergraduate

2. Explain how psychological science can inform police and prosecution procedures.
Audience: Undergraduate

3. Summarize the ways that mechanisms of social control are applied to mentally ill individuals.
Audience: Undergraduate

4. Describe psychosocial factors that distort or interfere with the goals of the criminal justice system.
Audience: Undergraduate

PSYCH 403 – PSYCHOLOGY OF PERSONALITY
3 credits.

Organization and development of the personality.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Define personality as it relates to the field of Psychology.
Audience: Undergraduate

2. Examine and summarize different theories, ideologies, and origins of different views of personality.
Audience: Undergraduate

3. Compare and contrast the variety of approaches to understanding personality development, assessment, and research methods.
Audience: Undergraduate

4. Examine the implications of personality research on our broader society as well as cross-culturally.
Audience: Undergraduate

PSYCH 405 – ADULT PSYCHOPATHOLOGY
3-4 credits.

Introduces diagnosis and treatment of major mental disorders. Considers current thinking regarding the biological, psychological, and sociocultural factors that play contributing roles in the etiology and maintenance of these disorders. Historical trends as well as advances in neuroscience will be considered in terms of how they have affected our understanding of psychopathology.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand the main defining features of different major forms of adult psychopathology.
Audience: Undergraduate

2. Differentiate between different types of related disorders.
Audience: Undergraduate

3. Understand the relationship between the different paradigms and ways of conceptualizing psychopathology, assessing and treating mental illness.
Audience: Undergraduate

4. Understand the different research methods used in the study of psychopathology.
Audience: Undergraduate

5. Recognize the continuum between mental health and mental illness.
Audience: Undergraduate

6. Identify different types of stigma that people with severe mental illness may face.
Audience: Undergraduate

PSYCH 406 – PSYCHOLOGY OF PERCEPTION
3-4 credits.

Survey the current knowledge about how the brain creates our conscious experience of a surrounding world and of our own bodies. Consider contributions from various approaches, including neurophysiology, psychophysics, computer simulations, perceptual illusions, and patient studies.
Requisites: PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the physical and chemical properties of the world (e.g. light, soundwaves, pressure, chemicals) that stimulate sensory systems.
Audience: Undergraduate

2. Explain how sensory systems in each modality (vision, hearing, touch, smell, taste) convert input from the world into neural signals.
Audience: Undergraduate

3. Explain how perceptual systems enable observers to acquire knowledge about objects and events in the world around them.
Audience: Undergraduate

4. Evaluate past and current theories of sensation and perception.
Audience: Undergraduate

5. Interpret the methods and key findings of foundational and modern experiments in sensation and perception.
Audience: Undergraduate

6. Compare and contrast sensory and perceptual systems across modalities.
Audience: Undergraduate

PSYCH 414 – COGNITIVE PSYCHOLOGY
3-4 credits.

How people perceive, learn, remember, plan, solve problems, make decisions, and communicate. The main approach is psychological but will also consider contributions from computer science, linguistics, and neurobiology.
Requisites: PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the anatomical structures associated with the following major classes of cognition: perception, attention, motor control, memory, and cognitive control.
Audience: Undergraduate

2. Explain the process of the transduction of information from the outside world into a neural code, and the brain's representation of that information on any of multiple mental codes.
Audience: Undergraduate

3. Interpret graphical depictions of experimental data, including accuracy and reaction time.
Audience: Undergraduate

4. Critically evaluate claims about cognitive psychology and cognitive neuroscience as the appear in popular press.
Audience: Undergraduate

PSYCH 449 – ANIMAL BEHAVIOR
3-4 credits.

Evolutionary and physiological mechanisms of animal behavior including aggressive, reproductive, communicative, and social behaviors, behavioral development.
Requisites: PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop hypotheses and test predictions about animal behavior.
Audience: Undergraduate

2. Describe how animal behavior evolves through natural and sexual selection.
Audience: Undergraduate

3. Explain functions of cultural transmission.
Audience: Undergraduate

4. Summarize neural, hormonal and genetic control of animal behavior.
Audience: Undergraduate

5. Explain why kin may be treated differently in animal groups.
Audience: Undergraduate

6. Describe functions of communication, play, aggressive and affiliative behaviors between animals.
Audience: Undergraduate

7. Describe how animal behavior is important for conservation.
Audience: Undergraduate

8. Explain why individuals express different personalities.
Audience: Undergraduate

PSYCH 450 – PRIMATE PSYCHOLOGY: INSIGHTS INTO HUMAN BEHAVIOR
3-4 credits.

Explore the psychology and biology of our closest living ancestors and how it can provide insights into human behavior and cognition. Learn how a variety of factors (ecological, evolutionary, developmental, and experiential) shape the variation we see across and within primate species. Topics include investigation of similarities and differences across taxa in development, learning, memory, evolution of the brain, spatial navigation, tool-use, social behavior, parental behavior, communication, self-recognition, and theory of mind, as well as ethical issues and conservation.
Requisites: PSYCH 202, ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Understand more than 650+ species that comprise the Order Primates.
Audience: Undergraduate

2. Understand how studying nonhuman primates has helped to inform our knowledge about human behavior and physiology, psychological processes, and environmental factors that influence both other animals and us.
Audience: Undergraduate

3. Apply different levels of analysis (proximate, developmental, evolutionary, and phylogenetic) when asking and answering questions about primates and to understand that these levels of analysis offer complementary insights into primate psychology
Audience: Undergraduate

4. Identify how variation in experience, environments, and development shape individual variation within and across primate species.
Audience: Undergraduate

5. Critically evaluate empirical evidence about primate psychological processes as presented in popular media and scientific research articles.
Audience: Undergraduate

6. Recognize the various methods used to study primates in captive and natural settings, including behavioral, cognitive, physiological, and neuroscience methods.
Audience: Undergraduate

7. Reflect on ethical and animal welfare considerations for nonhuman primates across the settings in which they live.
Audience: Undergraduate

PSYCH/SOC 453 – HUMAN SEXUALITY
4 credits.

Provides an interdisciplinary introduction to biological, psychological, and sociological aspects of human sexuality.
Requisites: PSYCH 202 or Sophomore standing. Not open to student with credit for SOC/PSYCH 160
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain information about the biological, psychological, and social aspects of sexuality. Much of this is practical information that people need to know for daily living – e.g., information about contraception and sexually transmitted infections.
Audience: Undergraduate

2. Evaluate methods used in the scientific study of sexuality, to gain a better understanding of existing data and evaluate studies that will be published in the future.
Audience: Undergraduate

3. Describe the fabulous diversity of human sexuality along many dimensions, including age, sexual orientation, ethnicity within the United States, and cultures around the world.
Audience: Undergraduate

4. Develop comfort with the topic of sex to make more rational decisions about it, by using accurate terminology and evidence-based reasoning.
Audience: Undergraduate

5. Discuss sensitive topics with respect and clarity, particularly with individuals who have perspectives different from yours.
Audience: Undergraduate

PSYCH 454 – BEHAVIORAL NEUROSCIENCE
3-4 credits.

Biological basis of human and animal behaviors, including perception, action, cognition, social interaction and disease. Weekly themes from "Cracking the Neural Code" to "Love and War". Learn, develop and use neural mechanisms to explain and (attempt to) predict what they and others think and do in all facets of life.
Requisites: PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how neurons code information.
Audience: Undergraduate

2. Characterize how the brain is organized at the cellular, circuit and systems levels.
Audience: Undergraduate

3. Interpret plots of neural activity.
Audience: Undergraduate

4. Explain neural mechanisms which enable us to perceive and navigate our environment.
Audience: Undergraduate

5. Explain neural mechanisms which enable cognition and memory.
Audience: Undergraduate

6. Explain neural mechanisms which enable us to interact with others.
Audience: Undergraduate

PSYCH 456 – SOCIAL PSYCHOLOGY
3-4 credits.

Introduce classic and contemporary theories and research in the field, with an emphasis on experimental methodology. Examine the psychological study of the individual in the social world, including social interaction, motivation, attitudes, conformity, communication, leadership, personal relationships, and behavior in small groups.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the kinds of questions that social psychologists ask and why these questions matter.
Audience: Undergraduate

2. Become an effective consumer of science – i.e., understand the methods that social psychologists use to test their research questions and be able to draw appropriate conclusions from study findings.
Audience: Undergraduate

3. Evaluate whether research evidence provides a good test of theory.
Audience: Undergraduate

4. View everyday social behavior through a social psychological lens.
Audience: Undergraduate

5. Think about how research findings can be used to create interventions to address real-world problems.
Audience: Undergraduate

PSYCH 460 – CHILD DEVELOPMENT
3-4 credits.

Biological and behavioral foundations of human development, with an emphasis on experiments and data-driven approaches. Topics will include prenatal development, behavior genetics, motor development, perceptual development, language development, cognitive development, emotional development, social development, and atypical development.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. identify and summarize major theories in the area of child development
Audience: Undergraduate

2. interpret commonly-used research designs in developmental psychology
Audience: Undergraduate

3. critique conclusions drawn from research studies
Audience: Undergraduate

4. Collect and analyze data related to real-world child research
Audience: Undergraduate

5. link research on child development to policy and practice
Audience: Undergraduate

PSYCH 462 – ADOLESCENT DEVELOPMENT
3-4 credits.

Examines research on biological, cognitive, social, and emotional development during the second decade of life. Covers topics most relevant to teenagers, such as pubertal development and its social consequences, changing relationships with parents, self and identity development, the increasingly important role of peers, school adjustment, and high risk behaviors.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify major subfields of developmental psychology and recognize how each of these areas of research contribute to our understanding of the mind, brain, and behavior in teenagers.
Audience: Undergraduate

2. Understand how various different methodologies (e.g., magnetic resonance imaging, ecological momentary assessment, etc.) are applied with the scientific methods to use in research studies involving teenagers.
Audience: Undergraduate

3. Critically evaluate research claims heard in everyday life (e.g., popular media, educational settings, academia, civic discourse, etc.).
Audience: Undergraduate

4. Differentiate between myths and contemporary scientific evidence regarding teenage development.
Audience: Undergraduate

PSYCH 464 – ADULT DEVELOPMENT AND AGING
3 credits.

Physical, cognitive, social, and personality development during the adult years.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify and dispel myths and stereotypes about aging.
Audience: Undergraduate

2. Summarize the major psychological theories and methodologies in aging research.
Audience: Undergraduate

3. Identify how and why older adults differ from younger adults and the heterogeneity of aging.
Audience: Undergraduate

4. Explain the necessity and importance of studying aging in an interdisciplinary context.
Audience: Undergraduate

PSYCH 501 – DEPTH TOPIC IN SOCIAL SCIENCE
4 credits.

Provides an in-depth treatment of a specific topic in psychology.
Requisites: PSYCH 202
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Think critically about an important topic with an emphasis in the social sciences.
Audience: Undergraduate

2. Evaluate the main research questions of that topic.
Audience: Undergraduate

3. Analyze the theoretical approaches to studying that topic.
Audience: Undergraduate

4. Discuss the research literature and generate new ideas related to the topic.
Audience: Undergraduate

PSYCH 502 – COGNITIVE DEVELOPMENT
4 credits.

Covers the basics of cognitive development during childhood. Topics include theoretical approaches to cognitive development; perceptual, language, memory, and conceptual development; social cognition; problem solving, and academic performance.
Requisites: PSYCH 406, 413, 414, 460, 462, or 464
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the basic tenents of major theories of cognitive development and highlight points of similarity and differences among them.
Audience: Undergraduate

2. Identify and explain the major methodological approaches used in the field of cognitive development by researchers who adopt different theoretical perspectives.
Audience: Undergraduate

3. Interpret children's behaviors from different theoretical perspectives and in light of existing knowledge about the development of perception, language, memory, concepts, social cognition, problem solving, and academic skills.
Audience: Undergraduate

4. Describe basic phenomena and theoretical accounts of perceptual development, language development, memory development, concept development, the development of social cognition, the development of problem solving, and the development of academic skills.
Audience: Undergraduate

5. Practice identifying claims about cognitive development in popular press, evaluating those claims based on evidence in the scientific literature, and evaluating popular press articles in light of the alignment between claims and evidence.
Audience: Undergraduate

PSYCH 503 – SOCIAL DEVELOPMENT
4 credits.

Explores how infants and children perceive, think about, and interact with the social world. Topics include theory of mind, emotions, early social relationships, peer influences, morality and pro-social behavior, aggression, and social categorization.
Requisites: PSYCH 403, 414, 428, 449, 450, 456, 460, 462, or 464
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Discuss historical and contemporary theories of social development
Audience: Undergraduate

2. Read, understand, and evaluate empirical literature on children's social development across a range of topics
Audience: Undergraduate

3. Evaluate a popular press article about a topic related to the course material
Audience: Undergraduate

4. Compose polished writing about a follow-up study related to the course material
Audience: Undergraduate

5. Discuss contemporary theories of social development with others in the course
Audience: Undergraduate

6. Articulate cross-cultural and evolutionary perspectives on infants' and children's social development
Audience: Undergraduate

7. Evaluate major methodologies used to assess infants' and children's social development
Audience: Undergraduate

PSYCH 505 – DEPTH TOPIC IN BIOLOGICAL SCIENCE
3-4 credits.

Provides an in-depth treatment of a specific topic in psychology and biology.
Requisites: PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Think critically about an important topic with an emphasis in the biological sciences.
Audience: Undergraduate

2. Evaluate the main research questions of that topic.
Audience: Undergraduate

3. Analyze the theoretical approaches to studying that topic.
Audience: Undergraduate

4. Discuss the research literature and generate new ideas related to the topic.
Audience: Undergraduate

PSYCH 507 – INTRODUCTION TO CLINICAL PSYCHOLOGY
4 credits.

Interdisciplinary introduction to clinical psychology including history, theories, and treatment modalities.
Requisites: PSYCH 405
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Differentiate the multiple degree programs associated with clinical psychology.
Audience: Undergraduate

2. Differentiate career options afforded to those with a degree in clinical psychology.
Audience: Undergraduate

3. Identify of a variety of approaches intervention and treatment of psychological disorders.
Audience: Undergraduate

4. Identify the social, legal, ethical, clinical, and political issues surrounding the identification and treatment of disorders.
Audience: Undergraduate

5. Identify abnormality and mental illness from a more positive standpoint through person-first language.
Audience: Undergraduate

6. Analyze into the significance of cultural competencies within clinical psychology.
Audience: Undergraduate

PSYCH 508 – PSYCHOLOGY OF HUMAN EMOTIONS: FROM BIOLOGY TO CULTURE
4 credits.

Emotional experience affects and defines every facet of our life, but it seems mysterious and unsuitable for scientific inquiry. Explore how and why emotion is not unsuited to scientific research and provides an in-depth examination of research from all sub-disciplines of the field of Psychology. This includes neuroscience and the biological bases of behavior, questions of the developmental curve for emotional phenomena and the relationship between feeling and thinking, and the study of social groups and culture.
Requisites: PSYCH 403, 428, 456, 460, 462, 464, SOC/PSYCH 453, or PSYCH/GEN&WS 522
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Explain the theoretical approaches to emotion and current debates in the psychology of emotion
Audience: Undergraduate

2. Analyze the main questions addressed in research on emotion, and how that research is conducted
Audience: Undergraduate

3. Explore the functioning of numerous components of emotion in addition to subjective experience (feelings) such as bodily and facial expression, physiology, and processes of the brain
Audience: Undergraduate

PSYCH 510 – CRITICAL ISSUES IN CHILD PSYCHOPATHOLOGY
4 credits.

Provides in-depth coverage on the study of common mental disorders of childhood and adolescence. Uses a scientific lens to dive into some of the more controversial issues in the field, rather than focusing on basic definitions and classifications, instead. For instance, what factors have led to the rise in ADHD diagnosis in this country, and around the world? Why aren't evidenced-based treatments more widely used in mental health settings? Are antidepressants safe for adolescents, and do they actually work?
Requisites: PSYCH 405, 460, or 462
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Identify and explore how cultural factors affect our conceptualization of mental disorders, while learning about individual differences in mental disorders by exploring how they are influenced by the interplay between both biology and environments.
Audience: Undergraduate

2. Refine critical thinking skills and question how conclusions are drawn from the data and to make connections between scientific studies and their applications to the real world.
Audience: Undergraduate

3. Apply research as a tool for affecting change for all people, and not just for selective populations. Explore the tension between science and clinical practice in the field and develop the foundations and skills for bridging this gap (as opposed to widening it by only focusing on one aspect).
Audience: Undergraduate

4. Integrate an array of material from within the psychological sciences (clinical psychology, developmental psychology) as well as from disciplines outside of psychology, including in anthropology, sociology, public health, epidemiology, neuroscience, and genetics.
Audience: Undergraduate

PSYCH 513 – HORMONES, BRAIN, AND BEHAVIOR
4 credits.

Complex social behavior emerges from the interplay of hormones, the brain and environmental signals. Introduces how hormones and neurotransmitters shape brain and behavior in animals and humans. Review the mechanisms by which hormones shape brain sex differences and its consequences on juvenile (i.e. play) and adult behavior. Examine how hormones influence sexual behavior using basic animal models, and extend this to human sex differences, including sexual orientation. Additional topics include how hormones shape competitive and affiliative behaviors, eating disorders, and stress and mental health, as well as how individual variation occurs in response to the changing environment and genetic landscape, including epigenetics at an introductory level.
Requisites: PSYCH 406, 413, 414, 449, 450, 454, or ZOOLOGY/ PSYCH 523
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe sex differences in structure and function of the brain.
Audience: Undergraduate

2. Summarize how early exposure to hormones shapes lasting differences in the brain.
Audience: Undergraduate

3. Describe how sex differences contribute to risk for mental health disorders.
Audience: Undergraduate

4. Discuss why some individuals express different types of social behavior.
Audience: Undergraduate

5. Discuss how hormones influence how much we eat.
Audience: Undergraduate

6. Differentiate how hormones shape juvenile and adult behavior.
Audience: Undergraduate

7. Explain how endocrine disruptors can influence health.
Audience: Undergraduate

PSYCH 515 – ANIMAL COGNITION
4 credits.

With intricate cultures, impressive technology, and layered social lives, humans seem to stand apart from their animal kin. However, humans and non-human animals share many aspects of their mental lives, and, upon closer inspection, some animals even reveal cognitive abilities far beyond the capacities of humans. Through comparing and contrasting human and non-human cognition, learn about human psychological uniqueness and its evolutionary origins, and fundamental properties of cognitive processes in general.
Requisites: PSYCH 406, 414, 449, 450, 454, 460, 462, or 464
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe and and discuss the fundamentals of cognitive science through the lens of comparative cognition
Audience: Undergraduate

2. Analyze the evolutionary process and how human and animal minds are the product of it
Audience: Undergraduate

3. Analyze methods of experimentation in animal cognition and cognitive science
Audience: Undergraduate

4. Read and interpret data from graphs
Audience: Undergraduate

5. Critically evaluate primary research articles, secondary news articles about science, and observations of animal cognition and "intelligence"
Audience: Undergraduate

PSYCH/GEN&WS 522 – PSYCHOLOGY OF WOMEN AND GENDER
3 credits.

Examination of theories and research on the psychology of women and gender. Explores topics such as sex bias in psychological research; psychological aspects of female sexuality and reproduction; gender-based violence; female achievement and power; lifestyle choices of women; women and mental health; and psychological research with transgender individuals.
Requisites: Sophomore standing, a course in PSYCH and (GEN&WS 102 or 103) or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Describe a variety of feminist perspectives on psychology and psychological research.
Audience: Both Grad & Undergrad

2. Analyze the ways in which theorists and researchers address issues of sexism and other forms of discrimination that affect people's psychological experiences.
Audience: Both Grad & Undergrad

3. Apply class content and knowledge by evaluating personal experiences and the world around you in line with theories and concepts learned in class.
Audience: Both Grad & Undergrad

4. Apply a global perspective to the study of psychology of gender and articulate how class topics and concepts operate across culture.
Audience: Both Grad & Undergrad

5. Summarize how the study of psychology of gender contributes to social justice.
Audience: Graduate

PSYCH/ZOOLOGY 523 – NEUROBIOLOGY
3 credits.

Basic mechanisms in cellular neurophysiology: electrophysiology and chemistry of nerve signals, mechanisms in integration, simple nervous pathways and their behavioral correlates.
Requisites: (ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY/BIOLOGY 101, or BIOCORE 383) and (CHEM 104, CHEM 109, or CHEM 116)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand the molecular mechanisms of cellular neurophysiology, including the ionic basis of the resting membrane potential and action potential, and mechanisms of synaptic transmission.
Audience: Undergraduate

2. Understand the basis of sensory perception at the receptor level.
Audience: Undergraduate

3. Demonstrate how neuronal signaling is integrated into simple nervous pathways and their behavioral correlates.
Audience: Undergraduate

4. Apply principles of neuronal function to activity-dependent changes in rhythmic neuronal activity, neuronal plasticity, and memory.
Audience: Undergraduate

5. Understand some of the state-of-the-art approaches to neuronal function.
Audience: Undergraduate

6. Understand key steps in the development of the nervous system and explain and apply the experimental approaches underpinning that understanding.
Audience: Undergraduate

7. Elucidate connections between genetics, pharmacology, and the functioning of the nervous system.
Audience: Undergraduate

8. Understand the mechanisms underlying a subset of disorders of the nervous system and the bases of current treatments.
Audience: Undergraduate

PSYCH 526 – THE CRIMINAL MIND: FORENSIC AND PSYCHOBIOLOGICAL PERSPECTIVES
4 credits.

Criminal behavior is an extremely common and costly problem for society. Provides an overview of criminal psychology and the relevant forensic and psychobiological processes in the field.
Requisites: PSYCH 401, 403, 405, or 456
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Critically review and analyze research in the field of forensic psychology.
Audience: Undergraduate

2. Review personality and crime with an emphasis on psychopathy assessment, case examples, causal theories, and neurobiological factors
Audience: Undergraduate

3. Examine the connection between mental illness and crime with an emphasis on Not Guilty by Reason of Mental Disease or Defect and Competency to Proceed psychological evaluations
Audience: Undergraduate

4. Consider general theories of causes of crime
Audience: Undergraduate

5. Characterize typologies of people who have committed sexual offenses, causes of sexual offenses, and risk assessment and typologies of people who have committed violent offenses, with a focus on domestic
Audience: Undergraduate

6. Analyze social psychological influences on crime and criminal justice system
Audience: Undergraduate

7. Critique treatment and intervention approaches, with emphasis on what works and why.
Audience: Undergraduate

PSYCH 528 – CULTURAL PSYCHOLOGY
4 credits.

Societies are shaped by the people, places, and environments that surround us. Examine the ways that culture and individual psychology make each other up, including how we think about ourselves, how we attend to and reason about the world, how we think about those like us and unlike us, and how these beliefs, attitudes, and cognitions are shared and maintained across groups.
Requisites: PSYCH 403, 406, 413, 414, or 456. Not open to students with credit in PSYCH 428.
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine naive realism and its associated problems.
Audience: Undergraduate

2. Identify and summarize cultural variation in thinking about what a self is, what responsibilities we have to each other, how we think about groups in society, what is right and wrong, how we should feel, what the world is like, and what the nature of the good life.
Audience: Undergraduate

3. Explain how historical, ecological, and societal factors help to shape cultural variation.
Audience: Undergraduate

4. Understand cultural variation that exists within our own society.
Audience: Undergraduate

5. Hypothesize about factors underlying cultural change and make predictions about the future.
Audience: Undergraduate

PSYCH 532 – PSYCHOLOGICAL EFFECTS OF THE INTERNET
4 credits.

Googling the question, "How is the Internet changing the way we think?," renders no shortage of opinions - or fears. Examine empirical evidence for whether the Internet is changing the way we learn, communicate, socialize, attend, develop, and age. Read and synthesize original research literature, which will be augmented with readings and videos from the popular press.
Requisites: PSYCH 401, 403, 405, 406, 413, 414, 428, 449, 450, 454, 456, 460, 462, 464, SOC/PSYCH 453, PSYCH/GEN&WS 522, or ZOOLOGY/PSYCH 523
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify nine previous technologies or past-times that were previously feared - and appraise how those fears parallel fears about the internet.
Audience: Undergraduate

2. Assess five principles of learning on which Internet based higher education capitalizes.
Audience: Undergraduate

3. Evaluate five challenges that college students face today and how Internet based education can tackle each challenge.
Audience: Undergraduate

4. Critique the claim that the Internet is making interpersonal communication briefer and less formal.
Audience: Undergraduate

5. Illustrate four intentional and four unintentional incidents in which the Internet has amplified mass communication.
Audience: Undergraduate

6. Connect the social psychological principle of similarity attraction to the popularity of online dating apps; connect interpersonal aggression to the phenomena of online bullying and trolling.
Audience: Undergraduate

7. Interpret how and why emotional contagion spreads through the Internet; hypothesize why there are so many photos, gifs, and videos of cats on the Internet.
Audience: Undergraduate

8. Identify how each of the six sources of motivation can affect Internet use; describe five reasons why people bing watch (TV shows or movies).
Audience: Undergraduate

9. Adjudicate four reasons why the Internet is not changing our attention spans.
Audience: Undergraduate

10. Descriminate three primary decision making heuristics and generate an example of how each applies to internet use
Audience: Undergraduate

11. Relate two positive effects of Internet use on agin and two on child development.
Audience: Undergraduate

12. Explain how much variance in Internet activities is accounted for by personality factors; describe four famous selfies made prior to the

PSYCH/I SY E 549 – HUMAN FACTORS ENGINEERING
3 credits.

Analysis and design of man-machine systems using human performance models and data. Emphasis on systems involving communication and control. Projects using digital and analog computer simulation techniques for system design.
Requisites: I SY E/PSYCH 349, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the topics involved in cognitive human factors and design implications of these concepts
Audience: Both Grad & Undergrad

2. Describe the interactions between human operators and system components including the environment, technology, and organizations
Audience: Both Grad & Undergrad

3. Discuss different human factors perspectives regarding human error and limitations of human performance, especially as these relate to memory, decision-making, action selection, and workload and stress
Audience: Both Grad & Undergrad

4. Identify barriers and limitations to memory and how these must be accounted for in design of systems and displays
Audience: Both Grad & Undergrad

5. Articulate the role of simulation and modeling in system design involving human operators
Audience: Both Grad & Undergrad

6. Use cognitive engineering analysis methods to complete a detailed analysis of a real incident or accident including outlining each layer and component of system failure and proposing possible redesign solutions
Audience: Graduate

PSYCH 601 – CURRENT TOPICS IN PSYCHOLOGY
3 credits.

Special topics in Psychology at the advanced undergraduate level. May be repeated for credit with different titles.
Requisites: PSYCH 225
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Evaluate research findings in the current topic of psychology.
Audience: Undergraduate

2. Explore and explain key research findings in the current topic of psychology.
Audience: Undergraduate

3. Generate and present new research ideas relevant to the current topic of psychology.
Audience: Undergraduate

PSYCH 603 – EPIGENETICS AND THE BRAIN
3 credits.

Explore nature versus nurture by understanding gene by environmental interactions. Study how the environment and our behavior can modify our genome (epigenetics). Focus on how our behavior and overall health can be shaped by markings on our DNA, and how these markings may be passed onto future generations.
Requisites: (PSYCH 454 or ZOOLOGY/PSYCH 523) and BOTANY/BIOLOGY/ZOOLOGY 152, PSYCH 225, or (BIOCORE 383 and 384)
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand the basics of gene x environmental interactions.
Audience: Undergraduate

2. Understand the biological mechanisms of epigenetics.
Audience: Undergraduate

3. Understand multigenerational and transgenerational outcomes of epigenetics.
Audience: Undergraduate

4. Understand epigenetic contributions to disease and mental health.
Audience: Undergraduate

5. Critically read and discuss assigned readings.
Audience: Undergraduate

6. Present a relevant topic of interest to the class and answer questions.
Audience: Undergraduate

7. Design a research project that will answer a specific question and present the project as an oral proposal and a written research proposal.
Audience: Undergraduate

PSYCH 607 – INTRODUCTION TO PSYCHOTHERAPY
3 credits.

Theoretical and applied foundations of psychotherapy. Consider issues of ethics, diversity/inclusivity, and research directions related to psychotherapy. Explore basic and theoretical considerations relevant to therapy including transference and countertransference, emotion, defense mechanisms, boundaries, resistance and early development. Discuss aspects of psychotherapy practice including trauma work, parenting issues, play therapy, family therapy, and couples therapy.
Requisites: PSYCH 225
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate understanding of interpersonal dynamics relevant to psychotherapy.
Audience: Undergraduate

2. Communicate effectively through written assignments, oral presentations and discussion.
Audience: Undergraduate

3. Develop proficiency in mastering primary sources and critically evaluating research.
Audience: Undergraduate

PSYCH 610 – DESIGN AND ANALYSIS OF PSYCHOLOGICAL EXPERIMENTS I
4 credits.

Reliability, validity, one-sample t-test, independent-samples t-test, simple and multiple regression, effect size indicators, analysis of variance (ANOVA), analysis of covariance (ANCOVA), case analysis, model assumptions, transformations, polynomial regression, simple mediation, and moderated mediation.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Master reliability and validity in empirical research
Audience: Graduate

2. Master inferences about a single mean (t-test)
Audience: Graduate

3. Master analysis of single and multiple dichotomous predictors (ANOVA)

Audience: Graduate

4. Master analysis of single and multiple continuous predictors (regression)
Audience: Graduate

5. Master analysis of indirect effects (mediation)
Audience: Graduate

6. Master analysis of non-linear relationships (polynomial regression)
Audience: Graduate

7. Generate publication-level graphs
Audience: Graduate

PSYCH/NEURODPT/NTP 611 – SYSTEMS NEUROSCIENCE
4 credits.

Introduction to the anatomy and physiology of the mammalian nervous system. Lectures will cover the neuroanatomy of the major subdivisions of the human brain, the major sensory and motor systems, and higher order functions. Lab/discussion sections will emphasize readings from the primary literature and hands-on dissections.
Requisites: NEURODPT/NTP 610 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the organization and structure of mammalian nervous system, including the spinal cord, brainstem, thalamus, cerebral cortex, cerebellum, basal ganglia, limbic system, and their interconnections on a systems leve
Audience: Both Grad & Undergrad

2. Demonstrate a solid understanding of the functions of the sensory and motor systems that underlie perception and action
Audience: Both Grad & Undergrad

3. Demonstrate a solid understanding of higher brain functions and behavior, including learning and memory and executive function
Audience: Both Grad & Undergrad

4. Demonstrate knowledge about approaches of modern neuroscience research including neuroanatomy, neurophysiology, functional brain imaging, behavioral assays, and quantitative data analysis methods
Audience: Both Grad & Undergrad

5. Develop and apply critical thinking to evaluate original neuroscience research
Audience: Graduate

6. Develop ability to formulate hypotheses and to apply knowledge learned from the course to design experiments for hypothesis testing
Audience: Graduate

PSYCH 612 – NEUROPHARMACOLOGY
3 credits.

Comprehensive review of the field of behavioral neuropharmacology, focusing on methodology, major neurotransmitter systems, critical evaluation of experimental evidence regarding behavioral functions of these transmitter systems and drugs used to treat mental illness.
Requisites: (PSYCH 454 or ZOOLOGY/PSYCH 523) and BOTANY/BIOLOGY/ZOOLOGY 152, PSYCH 225, or (BIOCORE 383 and 384)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand the strengths and limitations of the primary methods used in neuropharmacology.
Audience: Undergraduate

2. Understand the basic principles of drug action as applied to neurotransmitters.
Audience: Undergraduate

3. Identify the major neurotransmitter systems, including the location of the synthesizing neurons, and the different receptors and their second messengers for a given neurotransmitter.
Audience: Undergraduate

4. Recognize evidence arguing for specific behavioral actions of select neurotransmitter systems and the limitations associated with this evidence.
Audience: Undergraduate

5. Think critically about data and hypotheses related to neurotransmitter regulation of behavior.
Audience: Undergraduate

6. Develop/refine skills for efficiently extracting key information from technical literature.
Audience: Undergraduate

PSYCH/ANTHRO/ZOOLOGY 619 – BIOLOGY OF MIND
3 credits.

Origins and structures of mind, brain, and consciousness. Transitions from early mammalian through primate to hominid intelligence. Genetics and plasticity in brain development. Modern studies of human brain mechanisms and consciousness.
Requisites: Junior standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023

PSYCH 621 – MENTORED RESEARCH AND SEMINAR
1-6 credits.

Develop an understanding of primary research in a topic area and participate in designing and conducting research that challenges and/or extends current understanding of the topic. Course reading will include published research studies relevant to the selected topic.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the steps involved in the research process (i.e., data collection, recruitment, coding) and gain skills in conducting research in psychology.
Audience: Undergraduate

2. Critically evaluate research psychology (i.e., research design, methodological issues, ethical issues, etc.).
Audience: Undergraduate

3. Explain important theories and methods related to the objectives of the lab.
Audience: Undergraduate

4. Asses and communicate ideas regarding lab-driven research.
Audience: Undergraduate

PSYCH 626 – ISSUES IN PRISONER REENTRY
3 credits.

Provides a multi-systemic understanding of evidence-based prisoner reentry issues and solutions while including community-based learning experiences. Considers the needs of formerly incarcerated individuals reentering our communities, including meeting the ultimate goal of decreasing recidivism and increasing positive psychological adjustment for former inmates, their families, and all the staff and community members working in various stages of the justice system.
Requisites: PSYCH 225 and (PSYCH 401 or concurrent enrollment or PSYCH 526 or concurrent enrollment)
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop community-based research and engagement skills
Audience: Undergraduate

2. Effectively translate psychological research for a community audience.
Audience: Undergraduate

3. Consider reentry issues from a multisystemic perspective.
Audience: Undergraduate

PSYCH/I SY E 653 – ORGANIZATION AND JOB DESIGN
3 credits.

Design of productive organizations and people's roles within them. Issues including boundary location, organizational decision levels, autonomous work groups, implementation and diffusion. Roles of the union. Case studies.
Requisites: I SY E/PSYCH 349, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Apply the work system model
Audience: Both Grad & Undergrad

2. Apply a variety of models and theories of job and organization design to answer questions such as, "What makes for a good job?" and "What makes for a bad job?"
Audience: Both Grad & Undergrad

3. Apply interview and survey methods for analyzing jobs
Audience: Both Grad & Undergrad

4. Identify approaches to implement job redesign
Audience: Both Grad & Undergrad

5. Identify societal trends related to job design
Audience: Both Grad & Undergrad

6. Identify similarities and differences between various models and theories of job and organization design
Audience: Graduate

PSYCH/NEURODPT/ZOOLOGY 674 – BEHAVIORAL NEUROENDOCRINOLOGY SEMINAR
2 credits.

Behavior results from a complex interplay among hormones, the brain, and environmental factors. Behaviors and their underlying neural substrates have evolved in response to specific environmental conditions, resulting in vast species diversity in behavioral and neuroendocrine solutions to environmental problems. Designed to explore the primary literature on the neuroendocrine underpinnings of behavior spanning from feeding to sex differences in complex social behaviors. A range of taxonomic groups will be discussed, including (but not limited to) mammals, birds, and fish.
Requisites: ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify how behaviors and their underlying neural substrates have evolved in response to specific environmental conditions
Audience: Both Grad & Undergrad

2. Discuss and explore the primary literature on the neuroendocrine underpinnings of behavior spanning from feeding to sex differences in complex social behaviors
Audience: Both Grad & Undergrad

3. Identify and discuss hormones, the brain, and environmental factors as they relate to behavioral evolution and biological diversity
Audience: Both Grad & Undergrad

4. Develop and apply critical thinking to evaluate neuroendocrinological research
Audience: Graduate

5. Communicate effectively about concepts, theories and approaches of neuroendocrinology and behavioral research
Audience: Graduate

PSYCH 681 – SENIOR HONORS THESIS
3 credits.

Individual study for students completing senior honors theses as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025

PSYCH 682 – SENIOR HONORS THESIS
3 credits.

Individual study for students completing senior honors theses as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

PSYCH 686 – SENIOR THESIS SEMINAR IN PSYCHOLOGY
1 credit.

Focus on the process of conducting, writing, and presenting a senior or honors thesis in Psychology. Discuss the process of research, provide guidance and feedback about writing about research, and offer opportunities to present research issues and findings.
Requisites: Concurrent enrollment in PSYCH 681, 682, 691, or 692
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Accelerated Honors (!)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Acquire information and skills necessary to complete a senior honors project successfully (e.g., managing one's role in research, presenting one's research to an audience)
Audience: Undergraduate

2. Learn from others conducting senior honors research -- about other topics, methods, and theories in psychology
Audience: Undergraduate

3. Gain skills relevant to the three main arenas of scientific communication: written papers, talks, and poster presentations
Audience: Undergraduate

4. Learn to ask incisive questions about others' research and to critique others' work
Audience: Undergraduate

5. Learn to respond well to questions about or critiques of your research
Audience: Undergraduate

6. Produce a polished and professional report of your senior thesis.
Audience: Undergraduate

PSYCH 691 – UNDERGRADUATE THESIS
2-3 credits.

Undergraduate research including completion of a thesis. Recommended for those intending to do graduate work in psychology.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Acquire information and skills necessary to successfully complete a senior honors project.
Audience: Undergraduate

2. Critically evaluate research in psychology (i.e., research design, methodological issues, ethical issues, etc.).
Audience: Undergraduate

3. Explain important theories and methods related to the objectives of the thesis.
Audience: Undergraduate

4. Assess and communicate ideas regarding lab-driven research.
Audience: Undergraduate

5. Produce a polished and professional report of your senior thesis.
Audience: Undergraduate

PSYCH 692 – UNDERGRADUATE THESIS
2-3 credits.

Undergraduate research including completion of a thesis. Recommended for those intending to do graduate work in psychology.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Acquire information and skills necessary to successfully complete a senior honors project.
Audience: Undergraduate

2. Critically evaluate research in psychology (i.e., research design, methodological issues, ethical issues, etc.).
Audience: Undergraduate

3. Explain important theories and methods related to the objectives of the thesis.
Audience: Undergraduate

4. Assess and communicate ideas regarding lab-driven research.
Audience: Undergraduate

5. Produce a polished and professional report of your senior thesis.
Audience: Undergraduate

PSYCH 699 – DIRECTED STUDY
1-3 credits.

Independent mentored study with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

PSYCH 701 – PROSEMINAR IN PERCEPTION, COGNITION, AND COGNITIVE NEUROSCIENCE
1 credit.

Discussion of current topics in perception, cognition, and cognitive neuroscience, especially as illustrated by the planned and ongoing research of the graduate students, postdoctoral researchers, and faculty in these areas. Recent journal articles will also be discussed.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Present research and navigate questions from the group
Audience: Graduate

2. Formulate concise questions about research
Audience: Graduate

3. Evaluate and discuss broader topics in the area of perception, cognitive, and cognitive neuroscience
Audience: Graduate

4. Identify strategies to support their professional development
Audience: Graduate

5. Foster an inclusive community by providing constructive feedback with kindness and a growth mindset
Audience: Graduate

PSYCH 703 – PROSEMINAR IN SOCIAL PSYCHOLOGY
1 credit.

Discussion of current topics in social psychology, especially as illustrated by the planned and ongoing research of the graduate students and faculty in social psychology. Recent journal articles will also be discussed.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Present research and navigate questions from the group
Audience: Graduate

2. Formulate questions to ask of other speakers
Audience: Graduate

3. Evaluate and discuss broad topics across the field of social psychology
Audience: Graduate

4. Identify strategies to support their professional development
Audience: Graduate
