4. Analyze the connection between properties of the product (e.g. strength, stiffness, degree of crystallinity, degree of molecular orientation) and processing conditions (e.g. stress generated during flow, heat transfer conditions).
Audience: Graduate

5. Theorize as to requirements for the design of recycling schemes for polymers.
Audience: Graduate

6. Compare what is possible via traditional processing methods vs. modern methods such as 3-D printing.
Audience: Graduate

E P D 652 – QUANTITATIVE METHODS FOR INTERDISCIPLINARY ENGINEERING
3 credits.

Review of topics for engineering applications, including vector calculus, differential equations, linear algebra, complex analysis, Laplace and Fourier transforms, optimization, and numerical methods.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Demonstrate various methods for solving 1st and 2nd order ordinary differential equations (ODEs) and apply them to problems such as heat transfer.
Audience: Graduate

2. Employ basic matrix operations for purposes like solving systems of equations, finding determinants, and eigenvalues/eigenvectors for applications such as circuit analysis.
Audience: Graduate

3. Choose numerical methodologies best suited for problems such as solving complex integrals or partial differential equations for applications such as fluid flow within extrusion or injection molding.
Audience: Graduate

4. Communicate mathematical concepts to a general audience.
Audience: Graduate

E P D 654 – TEACHING IN SCIENCE AND ENGINEERING
2-3 credits.

Introduction to teaching and learning in science and engineering at the college level. Includes exploration of the learning process, teaching methodology, assessment strategies, course design, teaching philosophies, and careers in education, science, and engineering.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

E P D 660 – CORE COMPETENCIES OF SUSTAINABILITY
3 credits.

Introduces real-world pragmatic skills and applications in sustainability competencies. Content reaches across engineering expertise, from chemical engineering to buildings to product design and energy. Modules cover ecological footprinting, lifecycle assessment, resource use and integrated engineering practice.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Calculate and analyze carbon and ecological footprints
Audience: Graduate

2. Compare and evaluate different sustainability frameworks
Audience: Graduate

3. Analyze sustainability issues and/or practices using a systems-based approach, utilizing life-cycle thinking and assessment
Audience: Graduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of resource consumption, and how sustainable development can fuel innovation
Audience: Graduate

5. Characterize sustainability as a global challenge associated with social inequity and requiring engineering/science leadership, multiple perspectives and solutions
Audience: Graduate

6. Synthesize course lessons as they relate to engineering applications and decision making
Audience: Graduate

7. Assess the relevant professional competencies and how sustainability could affect those choices
Audience: Graduate

E P D 669 – SUSTAINABLE SYSTEMS ENGINEERING CAPSTONE
3 credits.

Provides the opportunity to demonstrate ability to think globally, sustainably, and creatively. Gain real-world experience by applying theory, tools, and research to conceptualize, analyze, and design a solution to a real-world problem within a social and environmental context. Showcase the knowledge and analytical skills acquired, and integrate tools, science, and communication to address a community or industry need. Work with an industry mentor and customer throughout your project.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Pose a problem effectively
Audience: Graduate

2. Apply sustainability principles and/or frameworks to address the challenge of the selected problem, and balance structure and flexibility in problem-solving approaches
Audience: Graduate

3. Analyze sustainability issues and/or practices using a systems-based approach, and creatively consider alternative solutions
Audience: Graduate

4. Perform a targeted literature/document review
Audience: Graduate

5. Integrate sustainable engineering knowledge and tools into social contexts
Audience: Graduate

6. Design a solution to the problem statement, and account for the perspectives of various stakeholders
Audience: Graduate

7. Document and present context, proposed solutions, analysis, results and conclusions
Audience: Graduate

E P D 678 – SUPPLY CHAIN MANAGEMENT FOR ENGINEERS
3 credits.

Examines concepts, management techniques, and current trends in the field of supply chain management with emphasis on topics relevant to engineers. Topics include global logistics, logistics engineering techniques, new product introduction process, purchasing strategy, managing transportation providers, distribution center technology and operations, outsourcing supply chain functions, and an introduction to supply chain information systems.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze supply chain concepts and principles and show fluency in the language used in supply chain management.
Audience: Graduate

2. Apply logistics engineering techniques to plan and optimize transportation routes and costs across multiple modes of transportation using actual data from large businesses.
Audience: Graduate

3. Implement recent technology and business practices adopted by supply chain participants to improve efficiency and environmental sustainability.
Audience: Graduate

4. Design inventory management systems prioritizing manufacturing capacity, inventory investment, and product availability.
Audience: Graduate

5. Demonstrate use of ERP systems to execute supply chain processes including purchasing, receiving, manufacturing planning, inventory control, and logistics functions.
Audience: Graduate

E P D 699 – INDEPENDENT STUDY
1-3 credits.

Under faculty supervision.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

E P D 701 – WRITING FOR PROFESSIONALS
1 credit.

Preparation to produce effective written communication that is suitable for inter-professional and inter-disciplinary audiences in a variety of workplaces. Apply these strategies and tools.
Requisites: Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2024
Learning Outcomes: 1. Differentiate and use key aspects of rhetoric and communication ethics
Audience: Graduate

2. Distinguish communication needs in a variety of contexts and for a variety of audiences
Audience: Graduate

3. Write and edit technical documents that reflect the 5 Cs of writing: correctness, clarity, conciseness, coherence, and cogency
Audience: Graduate

4. Craft and deliver technical presentations that are persuasive and easy to understand
Audience: Graduate

5. Collaborate with others to accomplish communication goals
Audience: Graduate

E P D 702 – PROFESSIONAL PRESENTATIONS
1 credit.

Sharpen your ability to create, edit, review, and present information in an efficient, clear, and effective way for your audiences. Develop your presentation skills through a series of presentations related to your professional interests and work.
Requisites: Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze audience needs in a variety of situations
Audience: Graduate

2. Construct content that is easily understood by stakeholders
Audience: Graduate

3. Craft more effective slides that persuade, engage, and inform their audience
Audience: Graduate

4. Exhibit confidence while presenting
Audience: Graduate

5. Apply the lessons learned from this course to academic work and professional careers
Audience: Graduate

E P D 704 – ORGANIZATIONAL COMMUNICATION AND PROBLEM SOLVING
1 credit.

Improve your problem solving within complex organizations, with a special emphasis on case studies and improving communication, using cross-disciplinary sources.
Requisites: Graduate/professional standing or declared in Capstone Certificate in Foundations of Professional Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Summarize the biases that affect decision making

Audience: Graduate

2. Influence others to make better decisions
Audience: Graduate

3. Design your decisions and solve your problems using a better process based on empirical social science
Audience: Graduate

4. Design your teams and groups to maximize performance and innovation based on principles from social science
Audience: Graduate

5. Apply strategies to increase open communication and strategically use conflict in organizations to increase productivity and decision quality
Audience: Graduate

6. Create environments and situations that nudge ethical decisions in organization
Audience: Graduate

7. Identify blind spots that lead to unethical decisions
Audience: Graduate

E P D 706 – CHANGE MANAGEMENT
1 credit.

Provides emerging and practicing professionals foundational knowledge to develop a change management strategy and implement it using proven processes and tools. Become better prepared to deliver effective organizational performance. Applies contemporary concepts and methods in change management through student-selected projects.
Requisites: Graduate/professional standing or declared in Capstone Certificate in Foundations of Professional Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. List and describe and evaluate three change management frameworks
Audience: Graduate

2. Describe elements necessary to successfully initiate organizational change
Audience: Graduate

3. Plan organizational change using components of one or more change management frameworks
Audience: Graduate

4. Identify challenges inherent in change management and leadership and list methods for addressing these challenges
Audience: Graduate

5. Describe approaches for sustaining change and change benefits
Audience: Graduate

6. Apply methods for influencing stakeholders in affecting outcomes of change initiatives
Audience: Graduate

E P D 707 – ENGINEERING RESEARCH AND PROFESSIONAL PROJECTS
3 credits.

Research question and project development; literature review techniques; qualitative and quantitative research methods; professional and technical writing standards.
Requisites: Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Design and scope a research study or professional capstone project that aligns with engineering specialization and career goals, demonstrating depth in technical understanding.
Audience: Graduate

2. Apply appropriate research or project methodologies, including literature review, data analysis, and technical execution, to investigate or solve a complex engineering problem.
Audience: Graduate

3. Communicate findings and outcomes effectively through professional writing and oral presentation to a technical or interdisciplinary audience.
Audience: Graduate

4. Demonstrate ethical and professional standards in the planning, execution, documentation, and dissemination of your research or project work.
Audience: Graduate

E P D 708 – CREATING BREAKTHROUGH INNOVATIONS
1 credit.

Explore innovation and how design thinking is a driver of innovation. Learn to use various design thinking methods and tools for analysis and decision-making.
Requisites: Graduate/professional standing or declared in Capstone Certificate in Foundations of Professional Development
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Express what innovation is and how innovation is driven by design thinking
Audience: Graduate

2. Plan and conduct design research
Audience: Graduate

3. Synthesize themes, patterns, and insights from qualitative design research data
Audience: Graduate

4. Plan, structure, and facilitate ideation and concepting sessions
Audience: Graduate

5. Use design thinking tools to frame, plan and execute a challenge relevant to their work, community or personal
Audience: Graduate

E P D 710 – FOUNDATIONS OF ENGINEERING LEADERSHIP
2 credits.

Build the foundations for developing, refining, and strengthening your effectiveness as a leader of engineering teams, projects, and organizations. Enhance your understanding of how to match your leadership style to a team's focus, organization, and culture. Grow your understanding of your strengths and weaknesses as a leader using proven assessment tools. Develop a plan for growing your leadership competency.
Requisites: Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop a clear understanding of strengths and developmental needs as a manager and leader
Audience: Graduate

2. Create a development plan to intentionally grow foundational management and leadership qualities
Audience: Graduate

3. Manage both engineers and engineering processes with confidence
Audience: Graduate

4. Enhance the ability to strategically adapt leadership styles to the unique context of an engineering setting
Audience: Graduate

E P D 711 – STRATEGIC AND ETHICAL COMMUNICATION FOR ENGINEERS

3 credits.

Builds communication expertise in engineering practice by emphasizing items such as clarity, audience awareness, and ethical judgment in the exchange of technical and managerial decisions and information. Treats ethics as a foundational element of effective and responsible professional communication, integrating behavioral science, ethical reasoning, and professional codes to support transparency, trust, and sound decision-making. Develops communication problem-solving for common workplace communication challenges.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Communicate complex technical and managerial information clearly, accurately, and responsibly to diverse audiences, recognizing implications of communication choices.
Audience: Graduate

2. Apply ethical decision-making strategies and relevant codes of ethics to professional engineering challenges, demonstrating accountability, transparency, and integrity in decision-making and communication.
Audience: Graduate

3. Develop and deliver strategic communication materials (written, oral, and digital) that support ethical leadership and public trust.
Audience: Graduate

4. Engage effectively in public discourse and stakeholder dialogue, particularly in contexts involving risk, regulation, innovation, or public infrastructure.
Audience: Graduate

E P D 712 – ETHICS FOR PROFESSIONALS

1 credit.

Explores how our actions affect others and influence the choices we make within the workplace. Enhance ethical competencies by providing opportunities to discuss challenges to behavior and decision-making in different professional contexts.
Requisites: Graduate/professional standing or declared in Capstone Certificate in Applied Engineering Management
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify when a decision has ethical dimensions, articulate what professional ethical behavior means, and explain why it matters
Audience: Graduate

2. Apply ethical decision-making strategies and relevant codes of ethics to explore, analyze, and effectively resolve workplace and profession-specific ethical challenges
Audience: Graduate

3. Apply behavioral science concepts to explore the role of self-interest in our decision making and to explain why good people sometimes behave unethically
Audience: Graduate

4. Identify and explain the diverse social, global, and cultural frameworks that play a role in some ethical challenges
Audience: Graduate

E P D 720 – ENGINE NOISE AND VIBRATION
2 credits.

Introduces the engineer to fundamental NVH (Noise, Vibration, and Harshness) concepts with an emphasis on how NVH can be integrated throughout the engine development process from initial concept inception through to validation testing for production.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2020
Learning Outcomes: 1. Analyze how changes to emissions and noise legislation can impact the powertrain architecture
Audience: Graduate

2. Identify sources of NVH in the vehicle and be able to cascade vehicle level metrics down to system level targets
Audience: Graduate

3. Quantify fundamental source mechanisms excitation relating to gas pressure torque and inertia loading
Audience: Graduate

4. Analyze key transmission NVH challenges and the impact of changes to the micro/macro geometry of gears
Audience: Graduate

5. Apply the principles of pipe acoustics towards the design of intake and exhaust systems
Audience: Graduate

6. Explain the role of the mounting system and evaluate the ideal mount configuration
Audience: Graduate

E P D 730 – SUSTAINABLE FACILITIES
3 credits.

Explore the environmental impacts of commercial and residential buildings, including energy, water, materials, transportation, waste, human health, and land use. All phases of a building's life cycle will be considered, along with relevant case studies, benchmarking tools, public policies and emerging concepts.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe the environmental impacts of residential and commercial buildings
Audience: Graduate

2. Explain the stages of the building life-cycle, identify the decision-makers, and analyze how the environmental impacts and opportunities change in each stage
Audience: Graduate

3. Evaluate improvement strategies appropriate to each life-cycle stage of a building
Audience: Graduate

4. Utilize benchmarking and analysis tools used in the building sector for environmental and energy performance
Audience: Graduate

5. Compare and justify policies used to influence the building sector, and critique their effectiveness
Audience: Graduate

6. Create and deliver a presentation on a selected green building strategy, citing resources and case studies
Audience: Graduate

E P D 731 – ENERGY EFFICIENCY IN BUILDINGS
3 credits.

Core principles of energy use and efficiency in the building sector (residential, commercial, institutional buildings.) Factors that influence energy demand (design, equipment, controls, operation, maintenance). Review of engineering fundamentals of heat transfer, heating and cooling loads, psychrometrics. Topics include building envelope principles (climate, orientation, materials, massing), heating and cooling systems, ventilation indoor air quality, plumbing water heating, lighting daylighting, and internal energy uses (plug loads, equipment). Zero energy building concepts, energy modeling, and energy benchmarking are also covered. Applications include existing building operation and improvement, and new building design and planning.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify energy end-uses in commercial and residential buildings
Audience: Graduate

2. Describe the purpose and operation of energy-using building systems
Audience: Graduate

3. Create an energy model to simulate building energy performance
Audience: Graduate

4. Calculate the impact of energy efficiency options
Audience: Graduate

5. Use energy benchmarking tools such as Energy Star Target Finder
Audience: Graduate

6. Analyze the causes of and solutions for the sustainability challenge of excessive energy use in commercial and residential buildings
Audience: Graduate

7. Analyze sustainability issues and/or practices using a systems-based approach to identify opportunities for energy efficiency while maintaining human health
Audience: Graduate

E P D/ACCT I S/GEN BUS 781 – FINANCIAL AND BUSINESS ACUMEN
1 credit.

This course is designed with a keen awareness for the needs of the non-financial student or professional. For this class, no previous financial training is required. The intent is to equip you with the essential concepts used to develop financial literacy. Content will cover basic financial terms and reports, analytical tools to help interpret financial data and using financial data in budgets and forecasts.
Requisites: Graduate/professional standing. Not open to students declared in an MBA program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Apply the language and foundational tools of finance to analyze how a company's economic activity is reflected in its financial reports
Audience: Graduate

2. Perform high-level financial statement analysis to identify important information from financial reports
Audience: Graduate

3. Apply basic financial concepts of valuation, capital budgeting, and financial decision making
Audience: Graduate

E P D/GEN BUS/MARKETNG 782 – MARKETING FOR NON-MARKETING PROFESSIONALS
1 credit.

Provides an overview of marketing's role within an organization, key elements of a marketing plan, and strategies for implementation. Covers buyer demographics, psychographics, and purchasing behavior, emphasizing how a thorough understanding of the customer informs the development of a coordinated marketing mix - product, price, promotion, and place - to outperform competitors while meeting profit goals. Highlights the importance of aligning all company functions to focus on the customer.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Explain how the marketing function impacts an organization’s business operations
Audience: Graduate

2. Identify and use marketing terminology and concept
Audience: Graduate

3. Use both demographic and psychographic information to segment markets and select a target market
Audience: Graduate

4. Research and create a basic marketing plan that aligns customer expectations with organizational marketing activities and the organization's resources
Audience: Graduate

5. Coordinate consistency between product, price, promotion, and place (distribution)
Audience: Graduate

6. Relate and utilize the product life cycle concept to product and service offerings
Audience: Graduate

E P D/GEN BUS/M H R 783 – LEADING TEAMS
1 credit.

Develops knowledge and skills to continuously enhance both individual and team performance and productivity. Provides a foundation for leading teams effectively and improving team dynamics in a variety of organizational settings.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe team dynamics, roles, and expectations that influence a STEM team’s performance
Audience: Graduate

2. Identify and effectively deploy specific team member strengths relevant for technical projects
Audience: Graduate

3. Plan, lead, and facilitate productive team meetings
Audience: Graduate

4. Identify and manage team conflict more effectively and constructively
Audience: Graduate

5. Assess and improve their current STEM team leadership methods and practices
Audience: Graduate

E P D/GEN BUS/OTM 784 – PROJECT MANAGEMENT ESSENTIALS
1 credit.

Techniques that will help to plan, execute, and deliver projects with desired scope on time and on budget. Learn to document clear project objectives and goals, accurately estimate project time and costs, schedule and allocate time-critical resources, and establish feedback systems for optimal project control.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2023
Learning Outcomes: 1. Plan and manage successful engineering projects using appropriate methods, tools, and techniques
Audience: Graduate

2. Estimate project costs, resources, and schedules
Audience: Graduate

3. Immediately apply project management principles regarding the five major project stages: initiate, plan, execute, control, and close
Audience: Graduate

4. Apply or customize the project management framework to engineering organizational needs
Audience: Graduate

5. Assess and improve the current project management system
Audience: Graduate

E P D/GEN BUS/M H R 785 – EFFECTIVE NEGOTIATION STRATEGIES
1 credit.

Improves students' negotiating skills, doing so by providing a theoretical underpinning that will help them to understand the sources of effective and ineffective approaches to negotiations.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe game theory and distinguish between distributive and integrative bargaining, recognizing appropriate tactics
Audience: Graduate

2. Identify bargaining styles, set goals, improve relationships, and leverage interests effectively
Audience: Graduate

3. Analyze ethical issues in negotiations and create mutual gain through value creation
Audience: Graduate

4. Demonstrate thorough preparation for negotiations, use individual and team techniques, and evaluate post-negotiation strengths and areas for improvement
Audience: Graduate

ENGLISH (ENGL)

ENGL 100 – INTRODUCTION TO COLLEGE COMPOSITION
3 credits.

Focuses on development of rhetorical reading, listening, and writing abilities; provides practice in written and spoken communication (emphasis on writing); develops information literacy; provides a foundation for a variety of college course work and post-college careers.
Requisites: Students required to take the MSN ESLAT cannot enroll until the ESL 118 requirement is satisfied
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication A
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Make effective use of information retrieved, organized, and synthesized from appropriate sources.
Audience: Undergraduate

2. Present ideas and information clearly and logically to achieve a specific purpose.
Audience: Undergraduate

3. Make effective use of communicative forms appropriate to a specific discipline, and adapted to the intended audience.
Audience: Undergraduate

4. Use appropriate style and conventions associated with particular communicative forms, genres, or disciplines.
Audience: Undergraduate

ENGL/THEATRE 120 – INTRODUCTION TO THEATRE AND DRAMATIC LITERATURE
3-4 credits.

Reading important plays, attending stage productions, writing and thinking critically about theatre and drama. Emphasis on developing analytic skills in dramatic literature and theatre production.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify major structural, thematic, and aesthetic issues surrounding theatre and drama production, criticism, and theory.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 140 – COMM B TOPICS IN ENGLISH LITERATURE
4 credits.

A course on literature written in English that satisfies the Comm B requirement. Topic will vary by semester.
Requisites: None
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Combine reading and writing skills to interpret literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

4. Use reliable research sources; apply the writing process to develop ideas into papers, presentations, or projects; follow discipline-specific conventions for organization and formatting; and share work in writing and at least one other relevant mode of communication.
Audience: Undergraduate

ENGL 141 – SCIENCE FICTION AND FANTASY
3 credits.

An introduction to the literature of science fiction and fantasy; specific topics will vary.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Identify, understand and interpret literary concerns by reading key texts in science fiction and fantasy.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/GEN&WS 144 – WOMEN'S WRITING
3 credits.

An introduction to literature in English written by women in various periods and places; specific topics will vary.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify particular critical or historical issues and concerns around literature by women writers.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 145 – AMERICAN DREAMERS
3 credits.

A study of novels, plays, poems, and films that focus on individuals who strive to achieve success and security in America.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024
Learning Outcomes: 1. Identify how varied ideas of America and the American dream have inspired or been examined in key works of literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/ASIAN AM 150 – LITERATURE & CULTURE OF ASIAN AMERICA
3 credits.

Since the 19th century, "America" has often been defined by its relationship with "Asia," through cultural influence, immigration, imperialism, and war. Traces the role of Asia and Asians in American literature and culture, from the Chinese and Japanese cultural influences that helped shape literary modernism to the rise of a distinctive culture produced by Asian immigrants to America and their descendants.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Identify how particular literary texts communicate perspectives into Asian and Asian American literature and culture.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL/ENVIR ST 153 – LITERATURE AND THE ENVIRONMENT
3 credits.

An introduction to literature in English about the natural world and humankind's relationship with it; specific topics will vary.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the ways literature in English conceives of and critiques humankind's relationship with the natural world.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 155 – MYTH AND LITERATURE
3 credits.

Introduction to concepts of myth and mythology, myth-making and the modern study of myth in relation to myths and legends common in English and American literature.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify concepts in the modern study of myths and legends common in English and American literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 156 – LITERATURE AND MEDICINE
3 credits.

Exploration of literature as both a source of knowledge about medicine and as a catalyst for reflection about medical concepts and practices, including health, illness, dying, and disability. Students will consider ways that literature can serve as a resource for patients and healthcare practitioners.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Identify some of the ways literature addresses medical concepts and practices, including health, illness, dying and disability.
Audience: Undergraduate

2. Identify ways that literature can serve as a resource for patients and healthcare practitioners.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/LEGAL ST 160 – TRUTH AND CRIME
3 credits.

Examines the development, scope, and effects of the "True Crime" genre in the United States. Using literary analysis and legal studies methods, explore various areas of the genre (written, podcasts, documentaries, etc.) and try to find answer as to why we are so compelled by true crime narratives and what true crime's "truth" is. Untangle the complex relationship between law and narrative (background on each will be provided) and the various epistemological systems it combines, including the role of science and technology. Gain a detailed understanding of what our culture's relationship to "real life" crime narratives tells us about the fundamental and complex role criminality plays in defining us as a society.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the fundamentals of legal narrative and its relationship to criminal law functions (what are the elements of a crime, and what is "evidence"?)
Audience: Undergraduate

2. Identify the ways the legal system is subject to human, social, and literary construction—not only in a theoretical sense but through actual cases.
Audience: Undergraduate

3. Analyze the various ways in which media "tells" crime stories and what the potential motivation for these stories might be.
Audience: Undergraduate

4. Develop a nuanced understanding of the true crime genre through a close examination of exemplary representations of the genre (literature, podcasts, documentaries, etc.)
Audience: Undergraduate

ENGL 162 – SHAKESPEARE
3 credits.

Introduction to several of Shakespeare's most popular plays and their relation to other works of English and American literature.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Identify key issues and themes present in Shakespeare's popular plays.
Audience: Undergraduate

2. Identify Shakespeare's influence in other English and American literary works.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 167 – BRITISH AND AMERICAN WRITERS
3 credits.

An introduction to British and American literature through particular writers and themes.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key issues and themes surrounding particular writers in British and American literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 168 — MODERN LITERATURE
3 credits.

A thematic introduction to literary works in a variety of genres written in English from the turn of the twentieth century to the present day. Emphasis may vary between writers from the U.S., Britain, Ireland, and other Anglophone nations.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key issues and themes in modern literature, from the early twentieth century to the current day.
Audience: Undergraduate

2. Identify key critical and theoretical concerns in modern literature.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 169 — MODERN AMERICAN LITERATURE
3 credits.

An introduction to selected fiction, prose, drama and poetry written by Americans from the early twentieth century to the present day.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify key issues and themes in selected fiction, prose, drama and poetry written by Americans from the early twentieth century to the present day.
Audience: Undergraduate

2. Identify key critical and theoretical concerns within these literary texts.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/AMER IND 172 – LITERATURES OF NATIVE AMERICA
3 credits.

Introduction to the oral and written literatures of the peoples of native North America. An engagement with texts across historical periods, tribal groups, and regions to examine forms such as oratory, sermon, testimony, autobiography, and contemporary poetry and novels.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Engage in thoughtful and respectful group discussions revolving not only around course texts, but controversial subjects that lie within.
Audience: Undergraduate

2. Familiarize and display understanding of community in Indigenous culture(s).
Audience: Undergraduate

3. Identify and make skillful use of relevant, reliable, and high-quality research sources appropriate to the study of Native and Indigenous literatures.
Audience: Undergraduate

4. Develop a fledgling idea into a formal paper presenting stages of the process to peers, including brainstorming, drafting, incorporating feedback, and revising.
Audience: Undergraduate

ENGL 173 – ETHNIC AND MULTICULTURAL LITERATURE
3 credits.

Introduction to literature that reflects the writing and experience of minority and ethnic groups. Texts will focus on a theme or problem.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify key issues and concerns about the writing and experiences of specific minority and ethnic groups as they are presented in literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL 174 – LITERATURE AND SOCIAL JUSTICE
3 credits.

An introduction to the multiple ways writers have used literary texts to engage with pressing questions about class, race, gender, equality, immigration, and other issues of social justice. Specific topics will vary.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique some of the ways that key works of literature engage with pressing questions about class, race, gender, equality, immigration, and other issues of social justice.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 175 — LITERATURE AND THE OTHER DISCIPLINES
3 credits.

The depiction and valuation of other academic disciplines and intellectual work in selected works of British and American literature and the intellectual influences of other disciplines on selected works and movements of British and American literature.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify how specific works of British and American literature represent, or are influenced by, other academic disciplines and intellectual work.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 176 — TOPICS IN LITERATURE AND FILM
3 credits.

An introduction to the interplay of literature and film in English, with a focus on the analysis of novels, stories, poems and other writings and their representation and transformation in and through film; specific topics will vary.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify critical and theoretical concerns around the interplay between literature and film in English.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 177 — LITERATURE AND POPULAR CULTURE
3 credits.

A selected topic studying the intersection of literature and popular culture in various forms and media.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key critical and theoretical intersections between literature and popular culture through various forms and media.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 178 — DIGITAL MEDIA, LITERATURE, AND CULTURE
3 credits.

An introduction to the intersection of ever-evolving digital technologies with the production and reception of literature. Examine the role of digital media in structuring the knowledge and experience of literary works; and provides an opportunity for critical and potentially creative practice.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify key issues surrounding the ways digital technology influences the production and reception of literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 179 – INTRODUCTION TO LANGUAGE AND IDEOLOGY
3 credits.

Explores myths and ideologies about English language usage in the US (present and past) from a linguistic perspective. Discusses how common perceptions towards language use and language varieties, especially those associated with ethnic or racial minorities, are socially (not linguistically) constructed. Addresses questions like: Where do linguistic myths, especially those regarding varieties of American English used by persistently marginalized groups, come from and how does one check if there is a factual basis for them? Who gets to decide which words are entered into a dictionary or what constitutes 'proper' English? What perceptions do people have about 'good' and 'bad' dialects and accents? Who benefits and who is harmed by such perceptions? Approaches these and related questions within an anti-racist framework, showing that perceptions towards certain English varieties are often not grounded in linguistic facts but rather in bias against certain demographic groups.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe relationships between varieties of American English and society that underly the construction of language ideologies
Audience: Undergraduate

2. Outline how socio-historical factors have contributed to the development of ethnically or racially affiliated varieties of English in the US

Audience: Undergraduate

3. Evaluate social perceptions about ethnically or racially affiliated varieties of American English using data-based methods
Audience: Undergraduate

4. Develop awareness of biases against speakers from historically marginalized groups
Audience: Undergraduate

5. Demonstrate self-awareness and empathy towards the cultural perspectives, lived experiences, and worldviews of others
Audience: Undergraduate

6. Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society
Audience: Undergraduate

ENGL 181 – FIRST-YEAR HONORS SEMINAR
3 credits.

Honors literature seminar for first year students. Topic and materials will vary.
Requisites: First Year students only and declared in an Honors program
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and critique a particular element or elements of English literature/literary studies through in-depth research and analysis.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

4. Use reliable research sources; apply the writing process to develop ideas into papers, presentations, or projects; follow discipline-specific conventions for organization and formatting; and share work in writing and at least one other relevant mode of communication.
Audience: Undergraduate

ENGL 182 – INTRODUCTION TO LITERATURE FOR HONORS
3 credits.

Introductory honors course in discussion format. Topic and materials will vary.
Requisites: Declared in an Honors program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique a key issue in English literature and literary studies by performing research and discussion at the honors level.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 200 – WRITING STUDIO
1 credit.

The focus is on students' own writing in this workshop-oriented course for writers in any discipline. Theoretical and practical foundations for drafting, revising, and reviewing a range of academic genres and approaches. Students should be enrolled concurrently in another course where academic writing is assigned.
Requisites: Consent of instructor
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply theoretical and practical foundations for drafting, revising, and reviewing a range of academic genres and approaches.
Audience: Undergraduate

2. Situate the practice and use of rhetoric, writing, and/or literacy in social, historical, political, material, and personal circumstances.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 201 – INTERMEDIATE COMPOSITION
3 credits.

Provides practice in persuasive writing in various modes, styles, and genres; develops an understanding of the different contexts of writing, both scholarly and public; provides opportunities for exploring the relation between writing and speaking; and provides critical tools for the rhetorical analysis of expository prose. Not open to auditors
Requisites: Satisfied Communications A and sophomore standing
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Situate the practice and use of rhetoric, writing, and/or literacy in social, historical, political, material, and personal circumstances.
Audience: Undergraduate

2. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

4. Use reliable research sources; apply the writing process to develop ideas into papers, presentations, or projects; follow discipline-specific conventions for organization and formatting; and share work in writing and at least one other relevant mode of communication.
Audience: Undergraduate

ENGL 204 – INTRODUCTION TO RHETORIC AND WRITING STUDIES
3 credits.

What does writing do? How? For whom? How and why do writers and readers compose texts that have an impact? Approaches these enduring questions of English studies from the perspective of Composition Rhetoric, one of English's subfields. Emphasizing critical reading and writing and built around a central theme that varies by semester, the course prepares students to analyze historical and/or contemporary examples of how writing creates communities, influences beliefs, and shapes knowledge.
Requisites: Satisfied Communications A and sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze and evaluate public discourse
Audience: Undergraduate

2. Learn about and use conceptual tools and theories to aid analysis and evaluation
Audience: Undergraduate

3. Consume and produce rhetoric
Audience: Undergraduate

4. Be familiar with key questions, methods, and ideas in the field of composition and rhetoric
Audience: Undergraduate

5. Critically examine, from multiple perspectives, how public discourse affects you and means to respond
Audience: Undergraduate

6. Understand historical and contemporary contexts when rhetoric had consequences for the public
Audience: Undergraduate

7. Learn about and use tools for working with and drawing insights from writing in all forms
Audience: Undergraduate

ENGL 207 – INTRODUCTION TO CREATIVE WRITING: FICTION AND POETRY WORKSHOP
3 credits.

Fiction writing and poetry writing, with readings of writers as models.
Requisites: First Year, freshman or sophomore standing only
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate the techniques of creative writing.
Audience: Undergraduate

2. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction).
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

4. Use reliable research sources; apply the writing process to develop ideas into papers, presentations, or projects; follow discipline-specific conventions for organization and formatting; and share work in writing and at least one other relevant mode of communication.
Audience: Undergraduate

ENGL 214 – THE ENGLISH LANGUAGE
3 credits.

An overview of the structure, use, and development of the English language and its varieties.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Compare the factors contributing to the linguistic and social development of the English language.
Audience: Undergraduate

2. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 220 – SHAKESPEAREAN DRAMA
3 credits.

A survey covering most of the plays after 1600.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Identify and critique key critical issues surrounding the text and contexts surrounding Shakespeare's plays after 1600.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/LITTRANS 223 – VLADIMIR NABOKOV: RUSSIAN AND AMERICAN WRITINGS
3 credits.

The major novels of Vladimir Nabokov studied in the context of Russian and American literatures. Nabokov as a quintessential artist in exile, whose work explores loss of language, country and home.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the major novels of Vladimir Nabokov studied in the context of Russian and American literatures.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 224 – INTRODUCTION TO POETRY
3 credits.

A survey of elements and styles of poetic form. Readings will be selected from British and American literature written in English.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify and critique elements of style and form in British and American poetry written in English.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 236 – BASCOM COURSE
3 credits.

A low-enrollment course developing skills in critical reading, logical thinking, use of evidence, and use of library resources. Emphasis on writing in the conventions of specific fields.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine critical reading, logical thinking, and use of evidence within the conventions of a specific field.
Audience: Undergraduate

2. Situate the practice and use of rhetoric, writing, and/or literacy in social, historical, political, material, and personal circumstances.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

5. Use reliable research sources; apply the writing process to develop ideas into papers, presentations, or projects; follow discipline-specific conventions for organization and formatting; and share work in writing and at least one other relevant mode of communication.
Audience: Undergraduate

ENGL 241 – LITERATURE AND CULTURE I: TO THE 18TH CENTURY
3 credits.

What is a person, a home, a nation, a world? What we now call "English literature" begins with these questions, imagining a cosmos filled with gods and heroes, liars and thieves, angels and demons, dragons and dungeons, whores and witches, drunken stupor and religious ecstasy. Authors crafted answers to these questions using technologies of writing from parchment to the printing press, and genres old and new, from epic and romance to drama and the sonnet. Develops skills of critical reading and writing that are essential to majors and non-majors alike.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique key themes, styles and issues in English literature and culture up to the eighteenth century.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 242 – LITERATURE AND CULTURE II: FROM THE 18TH CENTURY TO THE PRESENT
3 credits.

Considers a period of unparalleled tumult: a time of vast world empires and startling new technologies, revolutions that radically redefined self and community, two cataclysmic world wars, the emergence of ideas of human rights, and the first truly global feelings of interconnectedness. How has literature captured and contributed to these dramatic upheavals? Some writers worldwide have struggled to invent new forms, new words, and new genres to do justice to a world in crisis, while others have reached back in time, seeking continuity with the past. Explore enduring traditions of poetry and drama and think about experiments in the new, globally popular genre of the novel. Develops skills of critical reading and writing that are essential to majors and non-majors alike.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique key themes, styles and issues in English literature and culture since the eighteenth century.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 243 – AMERICAN LITERARY CULTURES
3 credits.

Is America a new world, a city on a hill, an imperial power? Are American literatures revolutionary, nationalist, countercultural? Explores how writers have wrestled with such questions for several hundred years. We will encounter literary figures from white whales to red wheelbarrows, focusing on the diverse geographies, cultural practices, and political mythologies that compose the Americas, and interrogating what is meant by American literature and what it means to be American. We will consider the ways that genres from Native stories to slave narratives to postmodern novels have contributed to social, intellectual, and political currents of American cultures. Develops skills of critical reading and writing that are essential to majors and non-majors alike.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Critique works of American literature and identify how these works are in conversation with ideas of American history and culture.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 245 – SEMINAR IN THE MAJOR
3 credits.

Offers close instruction in the principles and practices of informed, engaged, critical reading and writing. While the texts and topics vary, each seminar will reinforce fundamental skills taught across the English major, strengthening students' capacities to write and speak powerfully and to build convincing, original, well-organized arguments that persuade audiences of their significance.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify main literary and theoretical issues in a specific topic in English studies at an advanced level.
Audience: Undergraduate

2. Produce advanced, persuasive arguments.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/AMER IND 246 – LITERATURE BY AMERICAN INDIAN WOMEN
3 credits.

Presents a broad range of literatures from diverse Native traditions and eras, to provide students with a basic knowledge of major issues affecting and best-known texts by American Indian women authors.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop critical thinking skills about subject matter presented by Indigenous female writers.
Audience: Undergraduate

2. Articulate critical thinking in both written forms and verbal exchange.
Audience: Undergraduate

3. Display productive use of core library resources appropriate to the study of Native and Indigenous literatures as evidence in written work.
Audience: Undergraduate

4. Communicate a deeper understanding of community, both in Native America and the smaller and larger communities of which we are members.

Audience: Undergraduate

ENGL/GEN&WS 248 – WOMEN IN ETHNIC AMERICAN LITERATURE
3 credits.

American literature by and about women, written by authors from ethnic groups.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and investigate key themes in American literature by and about women, written by authors from ethnic groups.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL/ASIAN AM 270 – A SURVEY OF ASIAN AMERICAN LITERATURE
3 credits.

Survey of Asian American literature from 1880 to present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique key themes in Asian American literature from 1880 to the present.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL 279 – STUDY ABROAD IN ENGLISH TOPICS: LITERATURE
1-6 credits.

A study abroad equivalency for intermediate-level English literature that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2001

ENGL 304 – HISTORY AND THEORY OF RHETORIC AND WRITING STUDIES
3 credits.

Surveys the study of writing and rhetoric, and covers major theories, practices, and research areas in the field of Rhetoric and Composition, with attention to their importance both inside and outside the University.
Requisites: Satisfied Communications A and sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe the purpose (and limitations) of the teaching and learning of writing in the US
Audience: Undergraduate

2. Effectively employ at least one conventional research method in Composition and Rhetoric
Audience: Undergraduate

3. Evaluate the effectiveness of various writing pedagogies in the history of Composition and Rhetoric according to modern understandings of learning science and educational equity.
Audience: Undergraduate

4. Read and write with rhetorical awareness
Audience: Undergraduate

ENGL/ENVIR ST 305 – RHETORIC, SCIENCE, AND PUBLIC ENGAGEMENT
3 credits.

Focuses on theoretical and practical aspects of public engagement with scientific research, policy, and management, with an emphasis on writing, rhetoric, and scientific discourse.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Assess theoretical and practical aspects of public engagement with scientific research, policy, and management.
Audience: Undergraduate

2. Situate the practice and use of rhetoric, writing, and/or literacy in social, historical, political, material, and personal circumstances.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 307 – CREATIVE WRITING: FICTION AND POETRY WORKSHOP
3 credits.

Writing of literary fiction and poetry, reading selected contemporary writers as models.
Requisites: Junior standing or ENGL 207. Students may not be concurrently enrolled with ENGL 407, 408, 409, 410, 469, 508, 509, or 695
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate how to write poetry and fiction.
Audience: Undergraduate

2. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction).
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

4. Use reliable research sources; apply the writing process to develop ideas into papers, presentations, or projects; follow discipline-specific conventions for organization and formatting; and share work in writing and at least one other relevant mode of communication.
Audience: Undergraduate

ENGL 314 – STRUCTURE OF ENGLISH
3 credits.

Linguistic methods of analysis and description of English syntax and morphology.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply linguistic methods of analysis to English syntax and morphology.
Audience: Both Grad & Undergrad

2. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL 315 – ENGLISH PHONOLOGY
3 credits.

Basic principles of phonetics and phonology applied to the description of English and other languages.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify basic acoustic features of human language sounds
Audience: Both Grad & Undergrad

2. Identify basic articulatory descriptions of human language sounds
Audience: Both Grad & Undergrad

3. Observe and describe the distribution of sounds in human languages
Audience: Both Grad & Undergrad

4. Understand different levels of representation in the speech chain
Audience: Both Grad & Undergrad

5. Develop language specific materials to support acoustic phonetic and phonological analysis
Audience: Graduate

ENGL 316 – ENGLISH LANGUAGE VARIATION IN THE U.S.
3 credits.

Description and analysis of geographical and social variation in English in the United States.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain how various geographic dialects of American English stand in relation to standard language ideology.
Audience: Both Grad & Undergrad

2. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL 318 – SECOND LANGUAGE ACQUISITION
3 credits.

Systematic study of how people learn ESL and other second languages. An interdisciplinary survey emphasizing research in linguistics, psychology, education, and sociology into the phenomenon of second language acquisition.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Compare different factors affecting second language acquisition by drawing on concrete research findings.
Audience: Both Grad & Undergrad

2. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL 319 – LANGUAGE, RACE, AND IDENTITY
3 credits.

Relation of culture and genetics to formal properties of human language; consideration of American English dialects and language disorders. Topics include: biological basis of language disorders; racial affiliation and social identity; maintenance of social boundaries; politics of education, speech therapy.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Biological Science or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain and compare the variation across human languages and human phenotypes.
Audience: Undergraduate

2. Describe relations of culture and genetics to formal properties of human language.
Audience: Undergraduate

3. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Undergraduate

4. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL 320 – LINGUISTIC THEORY AND CHILD LANGUAGE
3 credits.

An introduction to the linguistic study of child language within the generative theory. According to this theory, humans are born with genetically determined linguistic knowledge called Universal Grammar, which guides children in learning language. Learn the basic concepts of the generative theory and learn to apply them to the study of child language. Topics include universal linguistic principles that govern children's acquisition of syntax and semantics and cross-linguistic influence in children acquiring more than one language from birth or early childhood. Discuss empirical research studies testing the Universal Grammar theory of language acquisition.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain main characteristics of first language acquisition (how children learn words, grammar, etc.)
Audience: Undergraduate

2. Apply the current linguistic theory to explain child language
Audience: Undergraduate

3. Be able to explain how language acquisition is underpinned by innate linguistic principles by drawing on concrete research findings
Audience: Undergraduate

4. Critically evaluate and analyze research studies on first language
Audience: Undergraduate

5. Demonstrate knowledge of current experimental methods on language acquisition
Audience: Undergraduate

6. Interpret statistical data analysis of quantitative data
Audience: Undergraduate

ENGL 328 – THE SIXTEENTH CENTURY
3 credits.

Literature and culture of Britain in the sixteenth century.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique key themes in British literature and culture in the sixteenth century.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 334 – EIGHTEENTH CENTURY LITERATURE AND CULTURE
3 credits.

Eighteenth-century literature and culture, including such writers as Dryden, Defoe, Swift, and Pope.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and critique key themes in eighteenth-century literature and culture, including such writers as Dryden, Defoe, Swift and Pope.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 335 – STAGE AND PAGE IN THE LONG EIGHTEENTH CENTURY
3 credits.

What happens to English drama after Shakespeare's death? Public theaters closed, considered too racy for the moral health of the population. When they reopened in 1660, sex took center stage in productions of plays both old and new. Women acted on stages in London for the first time, both in roles originally written for cross-dressing boys and in new ones designed for female actors. Female playwrights entered the scene as well, writing for financial profit alongside their male counterparts. Read a sampling of plays and theatrical entertainments performed during the Restoration and eighteenth century as well as publications surrounding the world of the theater to gain a sense of drama on the page and on the stage.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and critique key themes in English drama during the long eighteenth century.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 336 – EIGHTEENTH-CENTURY NOVEL
3 credits.

Study of 18th-Century English novel.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify and critique key themes surrounding the 18th-century English novel.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 340 – ROMANTIC LITERATURE AND CULTURE
3 credits.

Literature of the Romantic age in relation to philosophical, cultural, historical, artistic or scientific backgrounds and contexts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze relationships among society, literature, and language, that underly the construction of beliefs.
Audience: Undergraduate

2. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Identify and critique key themes surrounding literature written during the Romantic age, including its relationship to philosophical, cultural, historical, artistic or scientific backgrounds and contexts.
Audience: Undergraduate

ENGL 345 – NINETEENTH-CENTURY NOVEL
3 credits.

Nineteenth-century novel. The century begins with Jane Austen, includes some of the great realist novelists, such as George Eliot and Charles Dickens, and ends with experiments in novel-writing by Oscar Wilde and Joseph Conrad.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique key themes surrounding the nineteenth-century novel.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/GEN&WS 350 – SPECIAL TOPICS IN GENDER & LITERATURE
3 credits.

Investigation of some specific topic in gender and women's studies related to gender and literature. Topic differs each semester.
Requisites: GEN&WS 101, 102, 103, or SOC/GEN&WS 200
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe literary concepts key to the field of gender and women's studies.
Audience: Undergraduate

2. Critically examine gender in literature through a feminist lens.
Audience: Undergraduate

3. Synthesize and effectively communicate relevant literary, cultural, historical, and theoretical information through oral, written, and/or collaborative work.
Audience: Undergraduate

4. Apply key frameworks from literary studies and feminist thought to everyday lived experiences, cultural production, and social issues.
Audience: Undergraduate

ENGL 351 – MODERNIST NOVEL
3 credits.

Modernist novelists such as Virginia Woolf, James Joyce, and E. M. Forster.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and critique key development and themes surrounding the literary novel in English during the modernist period.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 352 – MODERNIST POETRY
3 credits.

Exploration of British, Irish, and Anglophone poets working in the early twentieth century, such as W. B. Yeats, T. S. Eliot, Gertrude Stein, and Ezra Pound.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify and critique key styles, issues and themes found in poetry in English during the modernist period.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 353 – BRITISH LITERATURE SINCE 1900
3 credits.

Survey of twentieth-century British literature including fiction, poetry, and drama.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique key critical, theoretical or historical concerns shaping twentieth-century British fiction, poetry and drama.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/GEN&WS 359 – VISIONARY AND SPECULATIVE FICTION: SOCIAL JUSTICE APPROACHES
3 credits.

Explores the genre of visionary fiction - speculative fiction written for social justice purposes - as a means to create, build and maintain new worlds. Examines the political potential of literature and multiple examples of visionary fiction.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Understand the social and political potential of literature to impart knowledge about gender, sexuality, race, and other intersectional social issues
Audience: Undergraduate

2. Develop interdisciplinary techniques to blend research with creative expression
Audience: Undergraduate

3. Develop critical thinking and creative writing skills
Audience: Undergraduate

ENGL/HISTORY/RELIG ST 360 – EARLY MEDIEVAL ENGLAND
3 credits.

Introduction to the peoples and cultures of Early Medieval England (c450-c1100), with primary emphasis on texts written in Old English and Latin. Interdisciplinary approach including history, literature, religion, and material culture. Attention to literary genres ranging from elegy to riddles; the development of Christianity; encounters with Romans, Vikings, and Normans; and other political and social concerns. All readings in translation.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize and discuss major forms, techniques, social conditions, values, and genres that have shaped the history of English literature, language, and culture.
Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods related to Early Medieval England.
Audience: Undergraduate

3. Write original, coherent, and compelling arguments about assigned texts and/or objects that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness.
Audience: Undergraduate

ENGL 361 – MODERN AND CONTEMPORARY AMERICAN LITERATURE
3 credits.

Survey of modern and contemporary American literature including fiction, poetry, drama, and criticism.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and critique key critical concerns present in modern and contemporary American drama.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/CHICLA 368 – CHICANX/E AND LATINX/E LITERATURES
3 credits.

Historical, political, and aesthetic roots and directions of Latinx/e and Chicanx/e short stories, novels, poetry, music, plays, films, and essays.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. History of literature and language: Recognize and demonstrate knowledge of major forms, techniques, social conditions, values, genres, as well as cultural, aesthetic, philosophical and ideological factors that are relevant to the history of Chicanx and Latinx literatures.
Audience: Undergraduate

2. Awareness of history's impact on the present: Appraise and contrast literary approaches to depicting a variety of social, cultural, and historical events and experiences.
Audience: Undergraduate

3. Critical thinking / Ability to recognize and question assumptions: Assess textual evidence leading to interpretation and discern multiple (and even contradictory) interpretations while querying textual meaning and significance.
Audience: Undergraduate

4. Creativity: Generate original ideas and texts, experimenting and taking risks, solving problems, and answering questions in a range of genres and media.
Audience: Undergraduate

5. Critical writing and communication: Write and present original, coherent, and compelling arguments that push beyond summary to analysis; are grounded in textual evidence; and offer independent and original thinking clear prose that meets expectations for grammatical correctness.
Audience: Undergraduate

6. Citizenship/ A consciousness of self and other: Develop empathy by learning about the experiences of others and develop self-awareness of one's own positionality and views, and employ this consciousness in participating with others in the classroom while also creating productive patterns of study and work for yourself based on this growing self-awareness.
Audience: Undergraduate

ENGL/JEWISH 370 – JEWISH HUMOR
3-4 credits.

What is humor? Why and when do people tell jokes? And what do we make of the fact that a certain form of humor has come to be labeled "Jewish"? Examine the notion of "Jewish humor" by reading a variety of texts (jokes, short stories, films, websites, conceptual art, and cultural kitsch). Begin by considering theoretical explorations of humor and "Jewish humor." Then trace techniques of Jewish humor from eastern Europe to central Europe to North America, paying specific attention to Jewish American humor. Themes to be examined include: in-group vs. out-group humor; humor and ethnicity; performance and "Jewface"; Jewish-Christian difference; humor and the Holocaust; gender and ethnicity; the notion of self-hatred; American popular culture; and the relationship between humor, repetition, and innovation. The general goal is to answer the question: Is there such a thing as "Jewish humor"? (Hint: The answer may be "no.")
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods
Audience: Undergraduate

2. Demonstrate close-reading skills with which to analyze humor and American ethnicity, question assumptions about the popular representation of Jewish identity, and explore how humor manages and mobilizes questions of race, ethnicity, and religion
Audience: Undergraduate

3. Engage in reflective writing practices, respond critically to feedback, and assess one's own communicative strengths
Audience: Undergraduate

4. Engage in deep discussion with peers in a respectful and empathetic manner, ask each other constructive questions, develop a shared vocabulary with which to speak about Jewish humor, and, in doing so, explore preconceived notions about identities "inside" and "outside" students' social circles
Audience: Undergraduate

ENGL 373 – CONTEMPORARY POETRY
3 credits.

Study of significant recent poetry written in English.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and critique significant trends and developments within recent poetry written in English.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 374 – AFRICAN AND AFRICAN DIASPORA LITERATURE AND CULTURE
3 credits.

Explore classic literary and cultural texts from three regions: Africa, the Caribbean, and African America. Consider the origins and evolution of the African diaspora, and the many forms of its expression. Consider how the African diaspora has shaped US society today, exploring significant themes such as slavery and colonialism, race and cultural identity; intra-racial/cultural and cross-continental alliances and antagonisms; gender and genre; and the paradoxical fate so far-cultural visibility but peripheral political and economic power- of global Afro-cultures. Think about how African-American writers have been influenced by the experience of the African diaspora, and also about the ways that cultural expression from around the world has shaped US culture.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify and critique classic literary and cultural texts from Africa, the Caribbean and African America.
Audience: Undergraduate

2. Identify these works and their contexts to larger issues surrounding cultural expression globally.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL 375 – LITERATURES OF MIGRATION AND DIASPORA
3 credits.

Literature by or about people who leave homes and homelands by choice or compulsion.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Identify and critique literature regarding the experiences of people who migrate from their homelands by choice or compulsion.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 376 – LITERATURE AND ANIMAL STUDIES
3 credits.

How does literature help us understand animals and our relation to them? We address this question by exploring two types of representation: representation as depiction (the attempt to describe animals in literature) and representation as a legal or political act (the attempt to speak or act on behalf of animals). Organized around familiar animal categories - dogs, cats, horses, apes, birds, insects - we examine the representation of animals in modern literature as a way to give an account of the cultural history of human-animal relations and, in doing so, to make us reflect upon the social, political, and environmental consequences of this history at a time when animal species are disappearing at an alarming rate.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2021
Learning Outcomes: 1. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods (Critical Thinking).
Audience: Undergraduate

2. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness (Critical Writing).
Audience: Undergraduate

ENGL 379 – POSTCOLONIAL AND WORLD LITERATURE
3 credits.

English language literatures of former colonies, primarily in Africa and South Asia. While scrutinizing the concept of the "postcolonial" and evaluating its many meanings, class will read some of the significant writers of the postcolonial world and attend to the literary traditions that produced them.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and critique issues and themes presented in postcolonial literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 400 – ADVANCED COMPOSITION
3 credits.

Focuses on developing complex understandings of rhetorical, ethical, and literary strategies for writing. Practice in writing a range of nonfiction genres with attention to varieties of style, context, critical standards, and conventions. Designed for students with a strong interest in writing. May include multi-modal assignments.
Requisites: Satisfied Communications A and junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Assess and practice rhetorical, ethical, and literary strategies for writing in a range of nonfiction genres.
Audience: Undergraduate

2. Practice writing and other modes of communication to express ideas, perform analysis, and create knowledge.
Audience: Undergraduate

3. Situate the practice and use of rhetoric, writing, and/or literacy in social, historical, political, material, and personal circumstances.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/GEN&WS 401 – RACE, SEX, AND TEXTS (HOW TO DO THINGS WITH WRITING)
3 credits.

Explore how race, gender, and sexuality intersect with language and inform textual experiences. Learn how written texts in various forms and genres impact and play major roles in enforcing, or challenging, expectations about race and sex in the United States. Engage with documentation, such as marriage licenses, passports, federal policies, anti-slavery petitions, letters to the editor, posters, and hashtag activism, to follow public debates and everyday individual actions where writing and talking about sex and race makes a difference. Focus on the power of words to break bones and heal wounds. Examine historical and contemporary interconnections among race, sexuality, gender, and texts in the United States.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Evaluate how race, gender, and sexuality intersect with language and inform textual experiences.
Audience: Undergraduate

2. Situate the practice and use of rhetoric, writing, and/or literacy in social, historical, political, material, and personal circumstances.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL 403 – SEMINAR ON TUTORING WRITING ACROSS THE CURRICULUM
3 credits.

Explores current theory and research on the writing process and analyzes disciplinary genres and conventions. Teaches strategies for helping writers revise their work. As Undergraduate Writing Fellows, students will help their peers improve their writing in courses across the curriculum. For students accepted into the Writing Fellows Program. For students accepted into the Writing Fellows program
Requisites: Consent of instructor
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Honors - Accelerated Honors (!)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze and apply writing pedagogy to student writing, and evaluate how race, gender, and sexuality intersect with language and inform textual experiences.
Audience: Undergraduate

2. Situate the practice and use of rhetoric, writing, and/or literacy in social, historical, political, material, and personal circumstances.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 407 – CREATIVE WRITING: NONFICTION WORKSHOP
3 credits.

Explores a variety of non-fictional prose writing forms including (at the instructor's discretion) personal essay, memoir, travel writing, opinion pieces, investigative journalism, public science writing, and natural history writing. Covers theory and technique, reading the work of established writers and some short writing exercises. Focuses on student writing, both in the classroom and in individual conferences.
Requisites: ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing. Students may not be concurrently enrolled with ENGL 307, 408, 409, 410, 469, 508, 509, or 695
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate how to write creative nonfiction.
Audience: Both Grad & Undergrad

2. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction).
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Develop the critical and analytical skills necessary to evaluate literary works in progress, to guide classroom discussion, and to convey concepts of craft to undergraduate students.
Audience: Graduate

5. Demonstrate sensitivity to language and style on both the artistic and technical levels.
Audience: Graduate

ENGL 408 – CREATIVE WRITING: FICTION WORKSHOP
3 credits.

Writing literary fiction.
Requisites: ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing. Students may not be concurrently enrolled with ENGL 307, 407, 409, 410, 411, 469, 508, 509, or 695
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Communicate how to write literary fiction.
Audience: Undergraduate

2. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction).
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 409 – CREATIVE WRITING: POETRY WORKSHOP
3 credits.

Writing literary poetry.
Requisites: ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing. Students may not be concurrently enrolled with ENGL 307, 407, 408, 410, 411, 469, 508, 509, or 695
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate how to write lyric and narrative poetry.
Audience: Undergraduate

2. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction).
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 410 – CREATIVE WRITING: PLAYWRITING WORKSHOP
3 credits.

Explores the art and craft of writing for the stage. Examines strategies that writers can use to tell stories and communicate ideas both theatrically and dramatically. Covers theory and technique, reading the work of established writers and some short writing exercises. Focuses on student writing, both in the classroom and in individual conferences.
Requisites: ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing. Students may not be concurrently enrolled with ENGL 307, 407, 408, 409, 411, 469, 508, 509, or 695
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Communicate how to write plays.
Audience: Both Grad & Undergrad

2. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction).
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Evaluate literary works in progress, guide classroom discussion, and convey concepts of craft to undergraduate students.
Audience: Graduate

5. Demonstrate sensitivity to language and style on both the artistic and technical levels.
Audience: Graduate

ENGL 411 – CREATIVE WRITING: SPECIAL TOPICS WORKSHOP
3 credits.

Variable topics including: the informal essay, the long poem, the novel, the novella, genre fiction (detective, juvenile, humor, science fiction, etc.), experimental prose and poetry, etc. Students will read models and write their own exercise and full-length pieces.
Requisites: ENGL 207, 307, 407, 408, 409, 410, 411, or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Honors - Accelerated Honors (!)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Communicate the advanced techniques of special topics in creative writing.
Audience: Both Grad & Undergrad

2. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction).
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Evaluate literary works in progress, guide classroom discussion, and convey concepts of craft to undergraduate students.
Audience: Graduate

5. Demonstrate sensitivity to language and style on both the artistic and technical levels.
Audience: Graduate

ENGL 412 – BAD GRAMMAR AND METALINGUISTIC AWARENESS
3 credits.

Explores the relationship between descriptive and prescriptive grammar. Examines the role of prescriptivism in linguistics from a disciplinary view (why are linguists against it when the public is so clearly interested in singling out some constructions as 'bad grammar'). Provides a historical view (the tradition of grammar writing -- who gets to decide what is 'correct') and a variationist view (corpus-based studies on phenomena like preposition stranding, split infinitives, the distinction of who/whom etc.) of grammar writing. Covers the historical and cultural roots of beliefs about what constitutes 'good' and 'bad' grammar. Introduces linguistic tools and methods to check claims about grammar.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. understand the difference between prescriptive and descriptive approaches to grammar
Audience: Both Grad & Undergrad

2. formulate and test hypotheses about English grammar with data-based tools and methods
Audience: Both Grad & Undergrad

3. design and present a research project on grammar variation and change

Audience: Graduate

ENGL 413 – ENGLISH WORDS: GRAMMAR, CULTURE, MIND
3 credits.

Words and rules of combination (grammar) are the two basic building blocks of language. Looks at English words from different linguistic perspectives: As objects of grammar, words follow certain rules of combination (you wouldn't say "these dog), but they also have internal structure. For example, a word like "hopefulness is fine, while "hopenessful" does not exist. From a psycholinguistic perspective examine how children learn these formal properties as well as the meaning of words. Study how words are stored in the mind and what one can learn from situations in which one cannot access the mental dictionary properly (for example, when one feels a word is on "the tip of one's tongue). From a sociolinguistic perspective, look at historical and current influences on English vocabulary, including the role of dictionaries and spelling as a source of standardization. Does not require previous knowledge of linguistics.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Analyze English words from a structural, psycholinguistic, and sociolinguistic perspective.
Audience: Both Grad & Undergrad

2. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL 414 – GLOBAL SPREAD OF ENGLISH
3 credits.

Examination of the linguistic, social, and political impact of the spread of English around the world. Analysis of geographical, social, and stylistic variation in English in diverse world contexts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize the linguistic, social, and political impact of the spread of English worldwide.
Audience: Both Grad & Undergrad

2. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

3. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

4. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Graduate

ENGL 415 – INTRODUCTION TO TESOL METHODS
3 credits.

Teaching of English to speakers of other languages. Exploration of the contexts in which English is taught, and methods and materials used to teach it.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze key theories, rationales, and techniques for teaching English to speakers of other languages (TESOL).
Audience: Undergraduate

2. Critically evaluate English language teaching methods and instructional materials based on established pedagogical principles.
Audience: Undergraduate

3. Identify current practices and emerging issues in English language teaching.
Audience: Undergraduate

4. Observe and document classroom dynamics, instructional strategies, and student engagement in English language classroom settings.
Audience: Undergraduate

5. Apply tutoring strategies to support a language learner's development over the course of the semester.
Audience: Undergraduate

ENGL 416 – ENGLISH IN SOCIETY
3 credits.

Social and public uses of English; relationships of English structure, lexicon, and discourse to race, gender, class, education, ethnicity, age, and identity; the role of English in public policy.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Evaluate the observable expressions of speaker age, gender, ethnicity, and social class in the use of English.
Audience: Undergraduate

2. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 417 – HISTORY OF THE ENGLISH LANGUAGE
3 credits.

Linguistic and sociolinguistic change in English from its beginnings to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Describe and interpret linguistic change in English.
Audience: Both Grad & Undergrad

2. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

3. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

4. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Graduate

ENGL 418 – EXPERIMENTAL SYNTAX
3 credits.

An introduction to conducting linguistic experiments to address theoretical questions in the study of syntax. Covers the fundamentals of research design and quantitative data analysis methods to explore theoretical issues in syntax that can carry over to research in other areas of language study such as semantics, pragmatics, or language acquisition.
Requisites: Sophomore standing and satisfied Quantitative Reasoning (QR) A, or graduate/professional standing
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Discuss theoretical and methodological issues in current syntactic research
Audience: Both Grad & Undergrad

2. Explain fundamentals of linguistic experiment design
Audience: Both Grad & Undergrad

3. Design linguistic experiments to address theory-driven research questions and testable hypotheses
Audience: Both Grad & Undergrad

4. Use Excel to enter, code, and format linguistic data and R (statistical software) for data analysis
Audience: Both Grad & Undergrad

5. Apply statistical skills to analyzing linguistic data
Audience: Both Grad & Undergrad

6. Communicate effectively through class discussions and presentations
Audience: Both Grad & Undergrad

7. Write a clear and coherent research report on a linguistic experiment
Audience: Graduate

ENGL 420 – TOPICS IN ENGLISH LANGUAGE AND LINGUISTICS
3 credits.

Study of a topic in English language and linguistics.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Compare and argue perspectives on a topic in English linguistics.
Audience: Both Grad & Undergrad

2. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL 422 – OUTSTANDING FIGURE(S) IN LITERATURE BEFORE 1800
3 credits.

Study of major figure or figures in literature written before 1800.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique important themes in the work of a major figure or figures in literature in English written before 1800.

Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/MEDIEVAL 423 – TOPIC IN MEDIEVAL LITERATURE AND CULTURE
3 credits.

Study of a topic in medieval literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique a particular author, period, genre or issue within the field of medieval literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/MEDIEVAL 424 – MEDIEVAL DRAMA
3 credits.

Dramatic traditions of medieval England, from early church rituals performed inside quiet monasteries in the tenth century to the elaborate and often raucous urban guild cycles and morality plays of the fifteenth, and with special attention to the significance of spirituality, work, and play in medieval culture.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify and critique the historical and critical issues surrounding the writing and performing of plays in medieval England.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/MEDIEVAL 425 – MEDIEVAL ROMANCE
3 credits.

Important early form of narrative fiction, covering tales of adventure, magic, courtly love, and King Arthur from the twelfth through the fifteenth century.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Identify and critique critical themes in the Medieval Romance genre.
Audience: Undergraduate

2. Identify the importance of this genre in its own time and its influence on later writers.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/MEDIEVAL 426 – CHAUCERS COURTLY POETRY
3 credits.

Poetry of the most famous and influential medieval English poet, from his short lyrics on love through his dream visions of talking birds and castles built on ice to the historical romance Troilus and Criseyde. Readings will be in the original Middle English; no prior experience with the language is required.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify and critique critical issues surrounding Geoffrey Chaucer's courtly poetry.
Audience: Undergraduate

2. Develop ability reading texts written in Medieval English.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/MEDIEVAL 427 – CHAUCER'S CANTERBURY TALES
3 credits.

Study of the most famous and influential medieval English poet through his best-known work and its playful and profound responses to some of the most pressing literary, social, political, and spiritual issues of his time. Readings will be in the original Middle English; no prior experience with the language is required.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique content, style, and critical issues in Chaucer's Canterbury Tales.
Audience: Undergraduate

2. Recognize the work's relation to key cultural and historical issues in its own time.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 430 – TOPIC IN EARLY MODERN LITERATURE AND CULTURE
3 credits.

Study of a topic in Early Modern literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique a specific historical, literary, cultural or theoretical topic surrounding Early Modern literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 431 – EARLY WORKS OF SHAKESPEARE
3 credits.

Study of four Shakespeare plays through 1600, with the reading of several others.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique specific critical tropes and issues present in works by Shakespeare and other early modern English playwrights up to 1600.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 432 – LATER WORKS OF SHAKESPEARE
3 credits.

Study of four Shakespeare plays after 1600 with the reading of several others.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Identify and critique specific critical tropes and issues present in works by Shakespeare and other English playwrights in the early modern period after 1600.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 433 – SPENSER
3 credits.

Study of Edmund Spenser's major poems.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify and critique significant literary tropes and issues present in Edmund Spenser's major poems.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/RELIG ST 434 – MILTON
3 credits.

Study of John Milton's poems and selected prose.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and critique significant literary tropes and issues present in John Milton's poems and selected prose.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 438 – TOPIC IN EIGHTEENTH-CENTURY LITERATURE AND CULTURE
3 credits.

Study of a topic in 18th-Century literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique a specific writer, literary movement, historical period, or genre in 18th century literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 443 – OUTSTANDING FIGURE(S) IN LITERATURE SINCE 1800
3 credits.

Study of outstanding figure(s) in literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and critique a specific literary figure whose work is considered outstanding in literature or literary history.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 444 – TOPIC IN ROMANTIC OR VICTORIAN LITERATURE AND CULTURE
3 credits.

Study of a topic in 19th-Century British literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique a specific topic surrounding a genre, period or style of writing in nineteenth-century British literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 453 – TOPIC IN BRITISH LITERATURE AND CULTURE SINCE 1900
3 credits.

Study of a topic in British literature since 1900.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique a specific topic surrounding a genre, period or style of writing in British literature since 1900.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 454 – JAMES JOYCE
3 credits.

Study of the works of James Joyce.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique the writings of James Joyce.
Audience: Undergraduate

2. Identify Joyce's influence on other modernist writers.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 455 – A STUDY OF AN OUTSTANDING FIGURE OR FIGURES IN AMERICAN LITERATURE
3 credits.

Study of a figure in American literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024
Learning Outcomes: 1. Identify and critique the work of a significant figure in American literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 456 – TOPIC IN NINETEENTH-CENTURY AMERICAN LITERATURE AND CULTURE
3 credits.

Study of a topic in 19th-Century American literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Identify and critique a topic regarding nineteenth-century American literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 457 – TOPIC IN AMERICAN LITERATURE AND CULTURE SINCE 1900
3 credits.

Study of a topic in American literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique a topic related to American literature since 1900.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 458 – MAJOR AMERICAN WRITER OR WRITERS
3 credits.

Study of major American writer(s).
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2023
Learning Outcomes: 1. Identify and critique a topic related to one or more major American writers.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 459 – THREE AMERICAN NOVELISTS
3 credits.

Concentrated study of US novelists.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify and critique the writings of three U.S. novelists.
Audience: Undergraduate

2. Recognize the relationships among these writers' works.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/CHICLA 460 – BLACK AND LATINX IN LITERATURE AND VISUAL CULTURE
3 credits.

Chicanxs and Latinxs are frequently imagined in ways that erase the history, presence, and influence of African-descended peoples within these groups. However, this anti-Blackness does not go unanswered in Chicanx and Latinx cultural production. Covers literature, life-writing/autoethnography, visual culture, philosophy/theory, and history that takes up Black Latinx experience and/or that comparatively explores the African American and Latinx convergences, exploring a rich vein of thought and representation in U.S. literatures that is often more transamerican than American and that offers new definitions of both Latinx and Black. Readings on racial paradigms in the Americas, paying attention to the differences between US and Latin American contexts, as well readings on decoloniality, intersectional feminisms, borderlands, and diaspora.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Know major forms, techniques, social conditions, values, genres, as well as cultural, aesthetic, philosophical and ideological factors that have shaped the history of Black and Latinx literatures.
Audience: Undergraduate

2. Appraise and contrast literary approaches to depicting a variety of social, cultural, and historical events and experiences.
Audience: Undergraduate

3. Understand multiple interpretations, question textual meanings and significance, discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods.
Audience: Undergraduate

4. Generate original ideas and texts, conduct thought experiments, and answer critical questions about and in a range of genres and media.
Audience: Undergraduate

5. Write original, coherent, and compelling arguments that push beyond summary to analysis that is grounded in textual evidence and offer independent and critical thinking in clear prose that meets expectations for grammatical correctness.
Audience: Undergraduate

6. Develop empathy by learning about the experiences of others and develop self-awareness of one’s own positionality and views, and to employ this consciousness in participating with others in the classroom. Create productive patterns of study and work for yourself based on this growing self-awareness.
Audience: Undergraduate

ENGL 461 – TOPICS IN ETHNIC AND MULTICULTURAL LITERATURE
3 credits.

Literature in English by authors whose work reflects the experience of ethnic and minority groups.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique specific topics surrounding the study of ethnic and multicultural American literature.
Audience: Undergraduate

2. Recognize how this topic reflects particular ideas surrounding multiculturalism.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL/ASIAN AM 462 – TOPIC IN ASIAN AMERICAN LITERATURE
3 credits.

Topics will vary. All topics will emphasize the following learning outcomes: awareness of history's impact on the present, ability to recognize and question assumptions, development of critical thinking skills, awareness of relations between self and others, and effective participation in a multicultural society.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique specific topics surrounding the study of Asian American literature.
Audience: Undergraduate

2. Recognize how this topic reflects particular ideas surrounding multiculturalism.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL/ASIAN AM/GEN&WS 463 – RACE AND SEXUALITY IN AMERICAN LITERATURE
3 credits.

Explores the intersection between race and sexuality in American literature with an emphasis on sex/gender difference, feminism, transgenderism, and nationalism. Focuses on the nature of literature as advocacy, with an emphasis on Asian-American issues.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

2. Identify and explore the intersection between race and sexuality in American literature with an emphasis on sex/gender difference, feminism, transgenderism, and nationalism.
Audience: Both Grad & Undergrad

3. Critique the nature of literature as advocacy.
Audience: Both Grad & Undergrad

4. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

5. Leverage writing as a mode of learning and means of conveying critical analysis .
Audience: Both Grad & Undergrad

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL/ASIAN AM/GEN&WS 464 – ASIAN AMERICAN WOMEN WRITERS
3 credits.

Major texts by Asian American women writers.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

2. Identify and critique the literary, critical and cultural issues present in several major texts by Asian American women writers.
Audience: Both Grad & Undergrad

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Both Grad & Undergrad

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL/ASIAN AM 465 – ASIAN AMERICAN POETRY
3 credits.

Throughout the history of Asian America, poetry has been a vehicle for the creation and exploration of an Asian American voice; in poetry we can see the continuing struggle over what form Asian American expression will take. Will it follow Asian or European models? Will it employ traditional forms, or experiment in search of new styles? Will it be individual or collective, introspective or political? We will explore these questions through a study of a wide range of Asian American poets from a variety of historical periods and ethnicities, including Janice Mirikitani, Lawson Fusao Inada, Li-Young Lee, John Yau, Myung Mi Kim, and Linh Dinh.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify and critique the poetry of leading Asian American writers.
Audience: Undergraduate

2. Explore the formal and experimental strategies of these poets.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

ENGL 473 – TOPIC IN POSTCOLONIAL OR WORLD LITERATURE
3 credits.

Study of a theme or question in literature that crosses national boundaries, inviting students to think about forces of imperialism and globalization. Specific focus will vary.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2021
Learning Outcomes: 1. Identify and critique a theme or question found in works of postcolonial literatures that cross national boundaries.
Audience: Undergraduate

2. Explore how these works relate to the forces of imperialism and globalization.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 474 – TOPIC IN CONTEMPORARY LITERATURE
3 credits.

Study of recent literature written in English. Specific topic will vary.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and critique a specific topic related to contemporary literature.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 475 – COMEDY AS GENRE
3 credits.

Survey of the genre of comedy from antiquity to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Engage with the history and development of comedy as a form from its beginnings in Greek and Roman antiquity up to the twentieth century through reading, discussion and work on a research paper.
Audience: Undergraduate

2. Improve skills in analyzing and researching literary texts.
Audience: Undergraduate

3. Develop writing and critical thinking skills.
Audience: Undergraduate

ENGL 476 – ARTIFICIAL INTELLIGENCE IN LITERATURE AND CULTURE
3 credits.

Covers the discourse around artificial life and sentience from the eighteenth century to our present. Considers how philosophy and literature both seek to understand and explore what it might mean to have machines that think. Discusses issues around the creation and implementation of Artificial Intelligence and poses some of the key questions about Artificial Intelligence including their capacity for thought, consciousness and intentionality. Considers how these texts work through the questions posed by theorists and raise their own.
Requisites: Junior standing
Course Designation: Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Understand an array of theoretical and literary explorations of the artificial intelligence and robotics.
Audience: Undergraduate

2. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose.
Audience: Undergraduate

3. Recognize how writers deploy various literary and narrative devices to marshal arguments about key concepts, problems, and questions related to the course topic.
Audience: Undergraduate

ENGL/THEATRE 477 – DIASPORA AND THEATRE
3 credits.

Study of the drama and theatre of a variety of immigrant communities in three Western locations: Britain, the United States, and Canada. Focuses on current theories of diaspora and transnationalism, the place of theatre in diasporic writing, and the literary, performative, and material dimensions of the genre.
Requisites: Sophomore standing
Course Designation: Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2018

ENGL/ASIAN 478 – INDIAN WRITERS ABROAD: LITERATURE, DIASPORA AND GLOBALIZATION
3 credits.

Study of literature, drama, and film produced by authors of South Asian origin in Europe, North America, and the Caribbean. Course considers theories of diaspora, changing patterns of subcontinental migration, and relation of diasporic forms to the cultures of origin and adoption. Not open to students with credit for LCA 478 prior to Fall 2019.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2018
Learning Outcomes: 1. Identify and critique literature, drama and film produced by authors of South Asian origin in Europe, North America and the Caribbean.
Audience: Both Grad & Undergrad

2. Explore how theories of diaspora, globalization and other ideas deepen understanding of these writers' work.
Audience: Both Grad & Undergrad

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Both Grad & Undergrad

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Graduate

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL 505 – TOPICS IN COMPOSITION AND RHETORIC
3 credits.

In-depth intellectual engagement with the perspectives, concerns, and methods of Composition Rhetoric. Topics vary in relation to writing, rhetoric, literacy, and multimodal or digital approaches to any of these.
Requisites: Satisfied Communications A and junior standing
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

ENGL 508 – CREATIVE WRITING: ADVANCED FICTION WORKSHOP
3 credits.

Fiction writing.
Requisites: ENGL 408 or graduate/professional standing. Students may not be concurrently enrolled with ENGL 307, 407, 408, 409, 410, 411, 469, 509, or 695
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Honors - Accelerated Honors (!)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Communicate how to write advanced literary fiction.
Audience: Both Grad & Undergrad

2. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction).
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Evaluate literary works in progress, guide classroom discussion, and convey concepts of craft to undergraduate students.
Audience: Graduate

5. Demonstrate sensitivity to language and style on both the artistic and technical levels.
Audience: Graduate

ENGL 509 – CREATIVE WRITING: ADVANCED POETRY WORKSHOP
3 credits.

Intensive poetry workshop. Write original poetry and see it through drafting and revision, to final form; read and give detailed feedback on the work of peers; study published poetry to analyze craft elements for use in original work.
Requisites: ENGL 409 or graduate/professional standing. Students may not be concurrently enrolled in ENGL 307, 407, 408, 409, 410, 411, 469, 508, or 695
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Know how to develop the creative and technical skills necessary to conceive, execute, and revise original literary work in poetry.
Audience: Undergraduate

2. Demonstrate sensitivity to language and style on both the artistic and technical levels.
Audience: Undergraduate

3. Develop the critical, analytical, and editing skills necessary to evaluate literary works in progress, both the student's own work in progress and that of the student's peers.
Audience: Undergraduate

4. Develop the ability to read literary works not only for their social, historical, intellectual, formal, and interpretive value, but for their capacity to inspire and generate new work, and to see in a finished work the process of its being made.
Audience: Undergraduate

5. Develop the critical and analytical skills necessary to evaluate literary works in progress, to guide classroom discussion, and to convey concepts of craft to undergraduate students
Audience: Graduate

6. Demonstrate sensitivity to language and style on both the artistic and technical levels.
Audience: Graduate

ENGL 514 – ENGLISH SYNTAX
3 credits.

Syntactic theory as applied to the analysis of English sentences.
Requisites: ENGL 314 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Apply syntactic theory to the analysis of English sentences.
Audience: Both Grad & Undergrad

2. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL 515 – TECHNIQUES AND MATERIALS FOR TESOL
3 credits.

Supervised practice in the use of current techniques and materials in the teaching of English to speakers of other languages, including peer and community teaching with videotaped sessions.
Requisites: ENGL 415
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze methods for English language teaching, focusing on theory, rationale, techniques, and materials.
Audience: Undergraduate

2. Observe and evaluate English language classroom instruction, assessing time management, clarity of directions, and effectiveness of error correction and feedback.
Audience: Undergraduate

3. Discuss and apply key principles of teaching English to speakers of other languages (TESOL) in instructional settings.
Audience: Undergraduate

4. Teach or co-teach an English language course, applying instructional techniques and engaging with learners.
Audience: Undergraduate

5. Assess personal teaching strengths and areas for growth through instructor feedback, self-evaluation, and reflective writing.
Audience: Undergraduate

6. Design and share engaging and effective English language teaching materials and activities with peers.
Audience: Undergraduate

7. Explore the TESOL field, identifying key professional expectations and career opportunities within it.
Audience: Undergraduate

ENGL 516 – ENGLISH GRAMMAR IN USE
3 credits.

Functions of English grammar, covering use in a variety of contexts and text types. Involves analysis of spoken and written English across genres and settings.
Requisites: ENGL 314 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze syntactic patterns in different discourse situations of spoken and written English.
Audience: Both Grad & Undergrad

2. Analyze linguistic structures relevant to language acquisition, use, or variation.
Audience: Both Grad & Undergrad

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL/MEDIEVAL 520 – OLD ENGLISH
3 credits.

The elements of Old English grammar with selected readings.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Honors - Accelerated Honors (!)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique the elements of Old English grammar.
Audience: Both Grad & Undergrad

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Both Grad & Undergrad

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL/MEDIEVAL 521 – ADVANCED OLD ENGLISH LITERATURE
3 credits.

An intensive study of a major work or works of Old English, usually focusing on either Beowulf or the poems of a single manuscript. Line-by-line translation of the text will be supplemented by discussion of related issues (whether linguistic, thematic, or contextual) as well as by readings from relevant critical literature. Primary texts will be read in Old English.
Requisites: MEDIEVAL/ENGL 520
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Honors - Accelerated Honors (!)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020
Learning Outcomes: 1. Critique one or more major works of Old English through intensive close reading and translation.
Audience: Both Grad & Undergrad

2. Explore related linguistic, thematic or contextual issues.
Audience: Both Grad & Undergrad

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Both Grad & Undergrad

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL/ILS 525 – HEALTH AND THE HUMANITIES
3 credits.

Explore how a humanistic perspective can broaden our understanding of health, illness, and medicine. Examine the role of language and culture in the creation and circulation of biomedical knowledge; lived experiences with illness (physical and mental); the intricate intersections of race, gender, sexuality, disability and medicine; the political dimensions of diagnosis, disease, and epidemics, and the role that fiction, creative non-fiction, comics, and film play in shaping our experiences with health, illness, and medicine as health care providers and as patients. Consider how non-experts interact with medicine and its technical vocabularies. Understand the cultural, social, and political dimensions of health, illness, and medicine and become a more well-versed patient and provider.
Requisites: Junior standing and declared in the Health and the Humanities Certificate
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Reflect on personal values and experiences in relation to health, illness, and medical care, and use humanities methods to explore them
Audience: Undergraduate

2. Engage respectfully with alternative views on health and illness (especially drawn from different cultures/life experiences), and develop interpersonal skills in class projects
Audience: Undergraduate

3. Identify ethical dilemmas in healthcare, apply analytical tools to these problems, and discuss the benefits and shortcomings of various approaches
Audience: Undergraduate

4. Recognize major historical trends pertinent to the health field and demonstrate an understanding of the connections between events, ideas, and values across time
Audience: Undergraduate

5. Understand how creative and humanistic thinking impacts experiences of illness and can improve the delivery of care and healing
Audience: Undergraduate

ENGL/ENVIR ST 533 – TOPIC IN LITERATURE AND THE ENVIRONMENT
3 credits.

Explores the ways that literary texts represent, imagine, and re-imagine the environment.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique some of the ways that literary texts represent, imagine and re-imaging the environment.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/JEWISH 539 – JEWISH LITERATURES IN DIASPORA
3 credits.

An exploration of Jewish literature in English and in Anglophone contexts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Identify and critique Jewish literature in English and Anglophone contexts.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 543 – DISCOURSES OF DISABILITY, ANTIQUITY TO 1800
3 credits.

Concepts of physical disability from antiquity to the Renaissance. Literary theory, philosophy, and history will help frame thinking about how disability is produced. Along with considering how canonical texts represent disabled figures, class will investigate the generic, social, and spatial contexts from which these representations arise.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify concepts of physical disability in literature from the antiquity to the Renaissance.
Audience: Undergraduate

2. Identify how literary theory, philosophy, and history helps frame how disability is produced.
Audience: Undergraduate

3. Explore how disabled figures are represented in canonical texts, and the contexts from which these representations arise.
Audience: Undergraduate

4. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

5. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

6. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 546 – TOPIC IN TRAVEL WRITING BEFORE 1800
3 credits.

Examination of aspects of travel literature before 1800. It will pay attention to texts written by travelers of many stripes - pilgrims, missionaries, crusaders, counselors, merchants, and dreamers. It will explore how writers narrate relations between the familiar and the strange, the near and far. And it will ask students to consider the relationship of geography to conceptions of personal and collective identity. How do travel writers represent "us" and "them," "self" and "other"? Who claims space, who characterizes it, and on what grounds?
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and critique travel literature as a genre before 1800.
Audience: Undergraduate

2. Explore how writers react to and narrate their travel experiences, and the relationship of geography to conceptions of personal and collective identity.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 548 – TOPIC IN LITERATURE AND POLITICS
3 credits.

Study of a topic in literature and politics.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022
Learning Outcomes: 1. Identify and critique a specific topic related to literature and politics.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL 559 – TOPIC IN LITERARY OR CULTURAL THEORY
3 credits.

An exploration of the methods and principles of criticism; generally an experiment in the application of a particular critical method or a group of related critical presuppositions to an appropriate body of English and American literature. Content varies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and critique a topic related to literary or cultural theory.
Audience: Undergraduate

2. Investigate the methods and principles of criticism related to a body of literature in English.
Audience: Undergraduate

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

5. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENGL/THEATRE 575 – BRITISH DRAMA, 1914 TO PRESENT
3 credits.

Plays and playwrights from the first World War to the present, including movements leading to the "revolt" of 1956 and subsequent proletarian and absurdist drama. Plays by Shaw, O'Casey, Maugham, Coward, Eliot, Osborne, Beckett, Pinter, Stoppard, Arden, Wesker, Bond, Churchill and others.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Identify and critique British plays and playwrights from the first world war to the present.
Audience: Both Grad & Undergrad

2. Explore these plays' relationship to particular cultural and political shifts during this period.
Audience: Both Grad & Undergrad

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL/THEATRE 576 – SURVEY: THEORIES OF DRAMA
3 credits.

Selected major critical and theoretical sources, from Aristotle to the present day; the influences of theories upon playwriting and modes of theatrical production.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify and critique major theories of theatre from 500 BCE to the present day.
Audience: Both Grad & Undergrad

2. Explore the influences of these theories upon playwriting and modes of theatrical production.
Audience: Both Grad & Undergrad

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL/THEATRE 577 – POSTCOLONIAL THEATRE: DRAMA, THEORY AND PERFORMANCE IN THE GLOBAL SOUTH
3 credits.

Study of drama, dramatic theory and theatrical practices in postcolonial cultures, primarily in Asia, Africa and the Caribbean. Considers status of drama/theatre in postcolonial studies and focuses on issues of form, language, intertextuality, trans-culturation, material organization and reception.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and critique dramas, dramatic theory and theatrical practices in postcolonial cultures.
Audience: Both Grad & Undergrad

2. Explore the status of drama/theatre in postcolonial studies.
Audience: Both Grad & Undergrad

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Both Grad & Undergrad

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL/THEATRE 578 – MODERN AMERICAN DRAMA AND THEATRE
3 credits.

Representative twentieth-century plays from Glaspell and O'Neill to the present considered within contemporary cultural, theatrical and academic context.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Identify and critique representative plays from 1900 to the present.
Audience: Both Grad & Undergrad

2. Explore these plays within historical and current cultural and theatrical contexts.
Audience: Both Grad & Undergrad

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Graduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

ENGL/HIST SCI/MED HIST 599 — DIRECTED STUDY IN HEALTH AND THE HUMANITIES
1 credit.

Offers students enrolled in the Health and the Humanities certificate an opportunity to conduct independent research under the guidance of a faculty member. It allows students who have enrolled in or completed a Health and the Humanities Capstone an opportunity to go into greater depth on a topic covered in the capstone course. In consultation with a faculty member, students will design a project that builds on lessons learned or work completed as part of their capstone experience.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Design scholarly research questions based on their knowledge of the existing literature
Audience: Undergraduate

2. Conduct original primary research by identifying, accessing, and interpreting appropriate sources
Audience: Undergraduate

3. Effectively convey the results of their research through writing or other creative media
Audience: Undergraduate

4. Work independently and manage a large project through to completion
Audience: Undergraduate

ENGL 613 — TESOL: PEDAGOGICAL GRAMMAR I
1 credit.

A focus on understanding English grammar from a pedagogical perspective for the purpose of teaching English as a second or foreign language.
Requisites: ENGL 415
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze key English grammar structures and their role in language learning.
Audience: Undergraduate

2. Examine complex English grammar structures that commonly present challenges for English language learners, developing an understanding of their linguistic features and the typical errors associated with them.
Audience: Undergraduate

3. Identify and demonstrate an effective grammar practice activity for a specific grammar point.
Audience: Undergraduate

4. Evaluate and interpret common learner errors through error analysis techniques.
Audience: Undergraduate

5. Develop and deliver a grammar lesson plan tailored to a specific group of English language learners, incorporating effective instructional strategies.
Audience: Undergraduate

ENGL 614 – TESOL: PEDAGOGICAL GRAMMAR II
1 credit.

A focus on understanding English grammar from a pedagogical perspective for the purpose of teaching English as a second or foreign language. The emphasis is on theory and techniques applicable to teaching English grammar.
Requisites: ENGL 415
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze key English grammar structures and their role in language learning.
Audience: Undergraduate

2. Examine complex English grammar structures that commonly present challenges for English language learners, developing an understanding of their linguistic features and the typical errors associated with them.
Audience: Undergraduate

3. Identify and demonstrate an effective grammar practice activity for a specific grammar point.
Audience: Undergraduate

4. Evaluate and interpret common learner errors through error analysis techniques.
Audience: Undergraduate

5. Develop and deliver a grammar lesson plan tailored to a specific group of English language learners, incorporating effective instructional strategies.
Audience: Undergraduate

ENGL 615 – TESOL: TEACHING LISTENING AND SPEAKING
1 credit.

An overview of listening and speaking skills and how to teach them.
Requisites: ENGL 415
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze key English grammar structures and their role in language learning.
Audience: Undergraduate

2. Examine complex English grammar structures that commonly present challenges for English language learners, developing an understanding of their linguistic features and the typical errors associated with them.
Audience: Undergraduate

3. Identify and demonstrate an effective grammar practice activity for a specific grammar point.
Audience: Undergraduate

4. Evaluate and interpret common learner errors through error analysis techniques.
Audience: Undergraduate

5. Develop and deliver a grammar lesson plan tailored to a specific group of English language learners, incorporating effective instructional strategies.
Audience: Undergraduate

ENGL 616 – TESOL: TEACHING OF READING
1 credit.

An overview of reading and vocabulary skills and how to teach them.
Requisites: ENGL 415
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze methods for English language teaching, focusing on theory, rationale, techniques, and materials.
Audience: Undergraduate

2. Implement a reading or vocabulary activity in a classroom setting, collaborating with a partner to facilitate instruction.
Audience: Undergraduate

3. Develop a week-long reading unit, including one detailed daily lesson plan tailored to English language learners.
Audience: Undergraduate

ENGL 617 – TESOL: TEACHING OF WRITING
1 credit.

Practical modular workshop on key aspects of language teaching, stressing the application of techniques and theory to classroom needs.
Requisites: ENGL 415
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze methods for English language teaching focusing on theory, rationale, techniques, and materials.
Audience: Undergraduate

2. Provide constructive feedback on an authentic student essay to support language development.
Audience: Undergraduate

3. Design a week-long writing unit, including one detailed daily lesson plan tailored to English language learners.
Audience: Undergraduate

4. Design and implement writing activities in a classroom setting to support language development.
Audience: Undergraduate

ENGL 618 – TESOL: TEACHING PRONUNCIATION
1 credit.

An overview of the features of English pronunciation and how to teach them.
Requisites: ENGL 415
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze key methods for English language teaching, focusing on theory, rationale, techniques, and materials.
Audience: Undergraduate

2. Identify and apply fundamental pronunciation terms and concepts relevant to English language instruction.
Audience: Undergraduate

3. Demonstrate effective techniques for teaching pronunciation and assessing English language learners' pronunciation.
Audience: Undergraduate

4. Develop and present a pronunciation-focused lesson tailored to English language learners.
Audience: Undergraduate

5. Assess an English language learner's pronunciation and provide targeted feedback for improvement.
Audience: Undergraduate

ENGL 622 – STUDY ABROAD IN ENGLISH TOPICS
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2001

ENGL 651 – SPECIAL TOPICS IN THEATRE AND PERFORMANCE STUDIES RESEARCH
3 credits.

Specialized subjects relevant to the study of the theory, history and criticism of theatre and performance studies.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Advanced understanding of course topic through reading, analysis and discussion of key primary and secondary readings
Audience: Both Grad & Undergrad

2. Improved research and writing skills through completion of presentations, short essays and longer research papers
Audience: Both Grad & Undergrad

3. Improved analytical ability by performing research transcending traditional disciplinary boundaries
Audience: Both Grad & Undergrad

4. Improved presentation and teaching skills through opportunities to lead briefly course discussions, presentations or projects
Audience: Graduate

ENGL 654 – DRAMATURGY IN THEORY AND PRACTICE
3 credits.

Study of the historical, theoretical and practical approaches to theatre and performance dramaturgy. Read and discuss scholarship about the field, and produce dramaturgical research education, production and outreach tasks through diverse written assignments and practical exercises.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe the history of dramaturgy, a dramaturg's role in different institutional and creative contexts, and the theoretical principles that ground the practice.
Audience: Both Grad & Undergrad

2. Discuss the different tasks dramaturgs encounter, including working within different institutions, glossing texts, working with and selecting adaptations and translations, and developing educational materials.
Audience: Both Grad & Undergrad

3. Create a dramaturg's production casebook and complete other assignments that will give you experience trying out the dramaturg's work.
Audience: Both Grad & Undergrad

4. Discover the creative potential of dramaturgical thinking in broader areas of theatre and performance practice and scholarship.
Audience: Both Grad & Undergrad

5. Conduct and present dramaturgical research both orally and and in written form.
Audience: Graduate

6. Write effectively about dramaturgical process and production as a mode of theatre and performance research.
Audience: Graduate

ENGL/AFROAMER 672 – SELECTED TOPICS IN AFRICAN AMERICAN LITERATURE
3 credits.

An intensive analysis of specific themes in the African American experience. Subjects vary with instructor.
Requisites: Junior standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify major literary movements in the history of the Black literary tradition.
Audience: Both Grad & Undergrad

2. Identify the contextual frameworks that shape representations of race across a broad range of cultural texts and objects.
Audience: Both Grad & Undergrad

3. Describe the goals, challenges, and questions raised by the thematic and aesthetic choices of Black writers.
Audience: Both Grad & Undergrad

4. Develop persuasive written arguments about the aesthetic construction, form, context, and meaning of Black writers' cultural texts and objects.
Audience: Both Grad & Undergrad

5. Communicate with others in a way that displays an understanding of racial inequities in the US.
Audience: Undergraduate

6. Write compelling and coherent arguments using textual analysis and cultural studies criticism employed by literary scholars.
Audience: Graduate

ENGL 680 – HONORS PROJECT
3 credits.

For further information, consult the department's Honors Coordinator or Undergraduate Advisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

ENGL 681 – SENIOR HONORS THESIS IN THE MAJOR
3 credits.

Mentored individual study for students completing honors theses.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025

ENGL 682 – SENIOR HONORS THESIS IN THE MAJOR
3 credits.

Mentored individual study for students completing honors theses.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

ENGL 691 – SENIOR THESIS
3 credits.

Mentored individual study for students completing theses.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

ENGL 692 – SENIOR THESIS
3 credits.

Mentored individual study for students completing theses.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

ENGL 695 – DIRECTED CREATIVE WRITING
3 credits.

Individually directed writing of a poetry or fiction manuscript.
Requisites: Complete 9 credits from ENGL 307, 407, 408, 409, 410, 411, 508, or 509
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop the creative and technical skills necessary to conceive, execute, and revise original literary work in the relevant genre/s (fiction/poetry/playwriting/creative non-fiction)
Audience: Undergraduate

2. Demonstrate sensitivity to language and style on both the artistic and technical levels
Audience: Undergraduate

3. Develop the critical, analytical, and editing skills necessary to evaluate literary works in progress, both the student's own work in progress and that of the student's peers.
Audience: Undergraduate

4. Develop the ability to read literary works not only for their social, historical, intellectual, formal, and interpretive value, but for their capacity to inspire and generate new work, and to see in a finished work the process of its being made.
Audience: Undergraduate

ENGL 699 – DIRECTED STUDY
1-3 credits.

Intended for students with Junior or Senior standing who have undertaken previous or concurrent work at intermediate level in same subject. Junior or Senior standing; previous or concurrent work at intermediate level in same subject. Students should consult with the English department's academic advisor before enrolling.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENGL 700 – INTRODUCTION TO COMPOSITION STUDIES
3 credits.

Rhetorical, linguistic, psychological, and social foundations of writing; implications for instruction.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENGL 701 – WRITING AND LEARNING
3 credits.

Historical, critical and philosophical perspectives on the relationship between writing and learning. In addition to reviewing current research, students will have the opportunity to carry out their own investigation designed to study possible relationships between writing and learning.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

ENGL 702 – PERSPECTIVES ON LITERACY
3 credits.

Social, historical, and educational perspectives on literacy and literacy learning.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

ENGL 703 – RESEARCH METHODS IN COMPOSITION STUDIES
3 credits.

Introduction to quantitative and qualitative research methods in composition studies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

ENGL 705 – INTELLECTUAL SOURCES OF CONTEMPORARY COMPOSITION THEORY II-MODERN
3 credits.

Historical, critical, and philosophical perspectives on the development of composition studies during the modern era, with special emphasis on the 20th Century.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

ENGL 706 – SPECIAL TOPICS IN COMPOSITION THEORY
3 credits.

In-depth treatment of specific problems, questions, themes, authors, texts, or historical periods in composition and rhetoric. Subject will differ each year.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENGL 709 – ADVANCED ENGLISH PHONOLOGY
3 credits.

Problems of English segmental and suprasegmental phonology, including morphophonemic alterations and stress assignment.
Requisites: ENGL 315
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

ENGL 711 – RESEARCH METHODS IN APPLIED LINGUISTICS
3 credits.

An introduction to various research paradigms in applied linguistics and second language acquisition. A preparation for critically evaluating published research in applied linguistics and second language acquisition.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENGL 713 – TOPICS IN CONTEMPORARY ENGLISH LINGUISTICS
3 credits.

Study of a topic in contemporary English linguistics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

ENGL 715 – ADVANCED SECOND LANGUAGE ACQUISITION
3 credits.

An examination of linguistic, psychological, and sociological theories of second language acquisition and their application to research in syntax, phonology, lexicon, or pragmatics of a second language.
Requisites: ENGL 318
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

ENGL 719 – SUMMER WRITING WORKSHOP
1-3 credits.

A workshop intended for high school teachers or other post-baccalaureate students. Intended for University Special Students, the class generally does not satisfy requirements for any graduate or undergraduate major in English.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025

ENGL 720 – SEMINAR IN EARLY MODERN STUDIES
2 credits.

Provides an overview of recent scholarly debates in the study of early modernity. Considers two key challenges involved in the study of early modernity: first, what (and when) constitutes early modernity; second, the study of early modernity is necessarily cross-disciplinary. Beginning with the question of what constitutes the "early modern," approach the topic of early modernity from a variety of disciplinary and thematic lenses. The themes include periodization, early modern legal and state formation, women in early modernity, race and early modernity, religion in early modernity, and global early modernities.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Communicate effectively, in both speech and writing, concepts, theories, and arguments related to the study of early modernity.
Audience: Graduate

2. Develop a familiarity with methods and approaches to the study of early modernity from a variety of disciplines.
Audience: Graduate

3. Develop the capacity to critique and analyze, in both speech and writing, studies of early modernity from a variety of disciplines.
Audience: Graduate

ENGL 722 – COMPOSITION AND CRITICAL THEORIES
3 credits.

Study of the relationship between composition and critical theories.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENGL/THEATRE 731 – ADVANCED THEATRE HISTORY 500 BC TO 1700
3 credits.

Problems of scholarship in the dramatic, performance and staging practices of major traditions of world theatre history between 500 BCE and 1700 including the theatres of ancient Greece and Rome; medieval, Renaissance and early modern Europe; and the Muromachi and Tokugawa eras in Japan.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

ENGL/THEATRE 732 – ADVANCED THEATRE HISTORY 1700 TO PRESENT
3 credits.

Problems of scholarship in the dramatic, performance and staging practices of major traditions of world theatre history since 1700, including melodrama, naturalism, the avant-garde, and other movements that helped shaped contemporary theatre.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

ENGL/GEN&WS 737 – FEMINIST THEORY AND CRITICISM
3 credits.

Feminist theory, with an emphasis on literary and cultural theory and criticism in English.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Summarize research methods and theoretical frameworks used in feminist literary and cultural theory.
Audience: Graduate

2. Analyze literary and cultural production through a feminist lens.
Audience: Graduate

3. Apply feminist theoretical concepts and approaches to one's own interdisciplinary research topics.
Audience: Graduate

ENGL 780 – CREATIVE WRITING: GRADUATE WORKSHOP
3 credits.

Professional training in the writing of fiction, poetry, or creative non-fiction. The topic will vary from semester to semester.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

ENGL 781 – GRADUATE FICTION WORKSHOP
3 credits.

Students write short stories and novel chapters, critique the work of fellow students and read contemporary fiction.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENGL 782 – GRADUATE POETRY WORKSHOP
3 credits.

Students write poems, critique the work of fellow students and read contemporary poetry.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENGL 783 – CREATIVE WRITING PEDAGOGY SEMINAR
3 credits.

Creative writing pedagogy for MFA in creative writing students.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENGL 785 – MFA THESIS
3-6 credits.

Thesis hours for MFA creative writing students. Students work to complete a book of short stories, poems or a novel.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENGL 790 – PROSEMINAR IN THE TEACHING OF WRITING
1 credit.

Introduction to the teaching of writing; guides first-time and prospective teachers in teaching and evaluating a first-year writing class.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENGL 795 – ONE-CREDIT SEMINAR
1 credit.

Study of a topic in English language and literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

ENGL 799 – INDEPENDENT READING
1-6 credits.

Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

ENGL 800 – CRITICAL METHODS IN LITERARY STUDIES
3 credits.

A gateway course that introduces students to theories and methods that are important to literary studies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENGL/MEDIEVAL 803 – TOPICS IN MEDIEVAL LITERATURE
3 credits.

Study of a topic in Medieval literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENGL 804 – TOPICS IN EARLY MODERN LITERATURE
3 credits.

Study of a topic in Early modern literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

ENGL 805 – TOPICS IN EIGHTEENTH-CENTURY LITERATURE
3 credits.

Selected works, with an emphasis on literary and cultural background.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

ENGL 806 – TOPICS IN ROMANTICISM
3 credits.

Study of a topic in Romanticism.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2019

ENGL 807 – TOPICS IN VICTORIAN LITERATURE AND CULTURE
3 credits.

Study of a topic in Victorian literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022

ENGL 808 – TOPICS IN MODERNISM
3 credits.

Study of a topic in Modernism.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

ENGL 810 – TOPICS IN EARLY AMERICAN LITERATURE
3 credits.

Study of a topic in Early American literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

ENGL 811 – TOPICS IN NINETEENTH-CENTURY AMERICAN LITERATURE AND CULTURE
3 credits.

Study of a topic in 19th-Century American literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

ENGL 812 – TOPICS IN AMERICAN LITERATURE SINCE 1900
3 credits.

Study of a topic in American literature since 1900.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2019

ENGL 813 – WORLD AND/OR POSTCOLONIAL LITERATURE IN ENGLISH
3 credits.

Literatures in English with origins outside Britain and the United States; theories and/or histories in postcolonial, Anglophone, and/or world literatures in English. Topics will vary.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

ENGL 814 – TOPICS IN CONTEMPORARY LITERATURE
3 credits.

Study of a topic in contemporary literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENGL 816 – TOPICS IN ETHNIC AND MULTICULTURAL LITERATURE
3 credits.

Study of a topic in ethnic and multicultural literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

ENGL 817 – SEMINAR-AMERICAN LITERATURE
3 credits.

Study of a theme in American literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENGL 822 – TOPICS IN LITERARY AND CULTURAL THEORY
3 credits.

Study of a topic in literary theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

ENGL 825 – TOPICS IN LITERATURE AND THE ENVIRONMENT
3 credits.

Study of a topic in literature and the environment.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

ENGL 829 – TOPICS IN MIGRATION AND DIASPORA
3 credits.

Study of a topic in migration diaspora as they relate to literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024

ENGL 850 – PROSEMINAR IN THEATRE RESEARCH
2 credits.

Provides a foundation for postgraduate theatre and performance research by examining the methods used in the study of theatre and performance. Consider how criticism, theory, historiography and other methods have been employed in analysis of performance. Discuss professional issues around working in theatre and performance studies as a teacher, scholar, dramaturge or applied theatre practitioner.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize current theatre research methodologies and theories by reading and discussing a range of relevant texts
Audience: Graduate

2. Employ advanced research and archival schools by learning about available books, journals and archives available on campus, online and in other locations
Audience: Graduate

3. Practice advanced critical writing and presentation skills by writing weekly responses to course readings, make a class presentation, and a write a performance review
Audience: Graduate

ENGL 851 – ADVANCED STUDIES IN THEATRE AND PERFORMANCE STUDIES RESEARCH
3 credits.

Specialized subjects relevant to the graduate-level study of the theory, history, criticism and literature of theatre and performance studies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2021
Learning Outcomes: 1. Advanced understanding of course topic through reading, analysis and discussion of key primary and secondary readings
Audience: Graduate

2. Improved research and writing skills through completion of presentations, short essays and longer research papers
Audience: Graduate

3. Improved analytical ability by performing research transcending traditional disciplinary boundaries
Audience: Graduate

4. Improved presentation and teaching skills through opportunities to present or lead class discussion briefly as part of the course
Audience: Graduate

ENGL 859 – SEMINAR-INTERDISCIPLINARY THEATRE STUDIES
2-3 credits.

Topics related to advanced research in theatre and performance studies. Topics vary by semester.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

ENGL 879 – ADVANCED SEMINAR IN LITERARY STUDIES
3 credits.

Study of a topic or theme in literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

ENGL 890 – PRE-DISSERTATOR PRELIMINARY EXAM RESEARCH
1-12 credits.

Mentored reading and research for pre-dissertator students.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop and/or refine Preliminary Examination lists according to established fields
Audience: Graduate

2. Read, study and assess primary, secondary and critical sources on these lists
Audience: Graduate

3. When appropriate, develop and draft required materials: i.e. exam lists, list rationales and/or final research statements
Audience: Graduate

ENGL 905 – SEMINAR-TOPICS IN APPLIED ENGLISH LINGUISTICS
3 credits.

Study of a topic in applied English linguistics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

ENGL 906 – SEMINAR-THE ENGLISH LANGUAGE
3 credits.

Study of a theme in the English language.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023

ENGL 990 – DISSERTATION RESEARCH IN ENGLISH
1-12 credits.

In connection with the doctoral thesis. Consult graduate advisor.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

ENGLISH AS A SECOND LANGUAGE (ESL)

ESL 110 – INTENSIVE ENGLISH AS A SECOND LANGUAGE
4-6 credits.

Listening, speaking, reading, and writing skills for nonnative speakers of English; academically oriented. Not open to auditors
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Spring 2020

ESL 113 – ESSENTIALS OF ACADEMIC READING AND WRITING
3 credits.

Improvement of listening, speaking, reading, writing and grammar skills that are essential in an academic setting. Introduction to the expectations for an undergraduate at a U.S. university.
Requisites: Enrolled in the International Student Summer Institute
Repeatable for Credit: No
Last Taught: Summer 2022

ESL 114 – INTERMEDIATE ENGLISH LANGUAGE SKILLS
3 credits.

Semi-intensive course in intermediate English language skills. A multi-skills focus on reading, writing, and communication skills essential in an academic setting. Not open to auditors
Requisites: Placement into ESL 114
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Heighten their awareness of correct usage of English grammar in writing and speaking
Audience: Undergraduate

2. Improve their speaking ability in English both in terms of fluency and comprehensibility
Audience: Undergraduate

3. Improve oral presentation skills.
Audience: Undergraduate

4. Increase their reading speed and comprehension of academic articles
Audience: Undergraduate

5. Develop efficient note-taking skills
Audience: Undergraduate

6. Improve their reading fluency skills through extensive reading
Audience: Undergraduate

7. Enlarge their vocabulary by keeping a vocabulary journal
Audience: Undergraduate

8. Strengthen their ability to write academic papers, essays and summaries using the process approach.
Audience: Undergraduate

ESL 115 – GRAMMAR FOR ACADEMIC USE
3 credits.

A review of English grammar through intensive written and oral practice to promote accurate and appropriate language use for students who have already studied grammar extensively and need to refine the ability to produce acceptable academic English. Not open to auditors
Requisites: ESL 114 or placement into ESL 115
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Improve their accuracy and fluency in producing and understanding spoken and written English.
Audience: Undergraduate

2. Review the grammatical forms of English and the use of these forms in specific communicative contexts, which include: class activities, homework assignments, reading of texts and writing
Audience: Undergraduate

3. Attain and enhance competence in the four modes of literacy: writing, speaking, reading and listening
Audience: Undergraduate

4. Develop their ability as critical readers and writers
Audience: Undergraduate

5. Produce a short research paper using the drafting process
Audience: Undergraduate

ESL 116 – ACADEMIC READING AND VOCABULARY SKILLS
3 credits.

Reading strategies for academic work; reading with increased comprehension and speed, vocabulary expansion, and summary writing. Not open to auditors.
Requisites: ESL 115 or placement into ESL 116
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Become a more competent, efficient, and perceptive academic reader who is able to communicate to others through writing and speaking the contents and main ideas of what is read.
Audience: Undergraduate

2. Develop reading skills and reading speed
Audience: Undergraduate

3. Read university texts and expand their vocabulary
Audience: Undergraduate

4. Read for intensive information retrieval and interpretation required by university studies
Audience: Undergraduate

5. Develop abilities as critical thinkers, readers and writers
Audience: Undergraduate

6. Attain and enhance competence in the four modes of literacy: writing, speaking, reading & listening
Audience: Undergraduate

7. Write three summaries in which they will communicate appropriately, accurately and effectively what has been read
Audience: Undergraduate

ESL 117 – ACADEMIC WRITING I
3 credits.

Basic elements of academic writing, emphasizing improved fluency and accuracy, paragraph structure, summarizing and paraphrasing, short essays, and a final research project. Not open to auditors.
Requisites: ESL 116 or placement into ESL 117
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop skills that enable them to communicate effectively in writing. They will learn to present ideas clearly and logically to achieve a specific purpose and to be appropriate for an intended audience.
Audience: Undergraduate

2. Paraphrase information from outside sources effectively and accurately

Audience: Undergraduate

3. Summarize information from academic sources, distinguishing between main ideas and details
Audience: Undergraduate

4. Use online library databases to locate appropriate academic sources
Audience: Undergraduate

5. Write two academic essays in which they demonstrate their understanding of writing as a series of tasks, including finding, evaluating, analyzing and synthesizing sources and as a process that involves planning, drafting, revising and editing
Audience: Undergraduate

6. Learn the conventions of APA documentation and how to avoid plagiarism
Audience: Undergraduate

ESL 118 — ACADEMIC WRITING II
3 credits.

Academic writing, critical reading and argumentation, documentation, and style and organization of research papers; oral communication skills for effective class participation and presentations. Not open to auditors.
Requisites: ESL 117 or placement into ESL 118
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication A
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Practice writing through assignments that ask you to plan, draft, revise and edit your essays over time.
Audience: Undergraduate

2. Produce three substantial essays that you can be proud of: clear, organized, sophisticated, well-researched, and polished.
Audience: Undergraduate

3. Develop your abilities as a critical reader and writer.
Audience: Undergraduate

4. Understand the demands of academic research at UW-Madison, which means learning about our libraries and the print and electronic sources there and learning to develop good questions, find relevant sources, evaluate those sources and integrate them thoughtfully, responsibly, and ethically in your own writing.
Audience: Undergraduate

5. Develop your public speaking abilities by giving you opportunities to speak in class, both informally and formally.
Audience: Undergraduate

6. Increase your self-awareness about the English language and the culturally-bound conventions of American academic writing.
Audience: Undergraduate

ESL 200 — ACADEMIC AND PROFESSIONAL SPEAKING SKILLS FOR ENGLISH LANGUAGE LEARNERS
2 credits.

Practice in informal and formal English communication skills essential in academic and professional settings, including formal presentations, discussions, and interviews.
Requisites: ESL 118
Course Designation: Core GenEd - Humanities & Arts
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate effective verbal (volume, pace, pronunciation) and nonverbal (gestures, eye contact, posture) communication skills.
Audience: Undergraduate

2. Prepare and deliver organized, engaging presentations.
Audience: Undergraduate

3. Effectively utilize verbal and cultural strategies for participating in both formal and informal discussions.
Audience: Undergraduate

4. Improve pronunciation, intonation and general fluency through continued self-monitoring and practice.
Audience: Undergraduate

5. Develop confidence, as well as skills and techniques useful for participating in interviews.
Audience: Undergraduate

ESL 328 – ACADEMIC SKILLS WORKSHOPS
1-3 credits.

Academic skills for ESL students; workshops on skills required for effective academic communication; topics vary, but include general and discipline-specific academic skills. Intended for graduate students. Not open to auditors
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Unpack and critically examine a complex prompt and the expectations it creates.
Audience: Undergraduate

2. Recognize genres of academic text and legal text and develop strategies for reading them efficiently.
Audience: Undergraduate

3. Develop critical responses to academic sources.
Audience: Undergraduate

4. Recognize and avoid plagiarism through judicious note-taking, appropriate paraphrasing and summarizing, and conscientious citation.
Audience: Undergraduate

5. Develop realistic expectations and strategies for handling the timing of the stages in a long writing assignment.
Audience: Undergraduate

6. Organize and develop a sustained, logical argument in a manner consistent with American academic expectations.
Audience: Undergraduate

ESL 343 – ORAL COMMUNICATION SKILLS
3 credits.

Practice in formal and informal communication skills, including listening comprehension, pronunciation, and conversational and presentation skills useful in an academic setting. Not open to auditors
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify main ideas in a lecture and the details that support those ideas.
Audience: Undergraduate

2. Explain their opinions about a variety of specific topics.
Audience: Undergraduate

3. Develop speaking skills and use websites that can help them to improve their pronunciation.
Audience: Undergraduate

4. Distinguish between the differences in sounds and intonation.
Audience: Undergraduate

ESL 344 – ACADEMIC PRESENTATIONS AND DISCUSSION
2-3 credits.

Oral communication and presentation skills essential for participation in seminars, conferences, and other academic and professional settings. Not open to auditors
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Engage the audience appropriately.
Audience: Undergraduate

2. Organize content logically and use effective transitions.
Audience: Undergraduate

3. Demonstrate effective verbal (volume, pace, pronunciation) communication skills.
Audience: Undergraduate

4. Demonstrate effective nonverbal (gestures, eye contact, posture) communication skills.
Audience: Undergraduate

5. Create and utilize visual aids effectively.
Audience: Undergraduate

6. Lead question and answer sessions and to respond to questions appropriately.
Audience: Undergraduate

ESL 345 – AMERICAN ENGLISH PRONUNCIATION
1 credit.

Techniques for improvement of the pronunciation of American English for non-native speakers of English. Not open to auditors
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and practice areas of pronunciation most in need of improvement.
Audience: Undergraduate

2. Become aware of ways to correct and compensate for pronunciation problems.
Audience: Undergraduate

3. Incorporate corrected sounds and patterns into their daily conversations.
Audience: Undergraduate

4. Review the key features of English pronunciation: individual vowel and consonant sounds, stress, rhythm and intonation.
Audience: Undergraduate

ESL 349 – ACADEMIC WRITING FOR GRADUATE STUDENTS
3 credits.

Examine the discourse features of a discipline and complete short writing assignments on topics within the field. Covers key aspects of graduate-level academic writing, including data presentation, summarizing, critical analysis, and crafting effective results and discussion sections. Instruction also emphasizes general writing, grammar, and editing skills.
Requisites: Graduate/professional standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Critically analyze the discourse conventions of their chosen discipline and apply those insights to craft effective academic writing that meets professional and scholarly standards.
Audience: Graduate

2. Manage the writing process to suit specific tasks and contexts, including more advanced skills in planning, drafting, editing and revising.
Audience: Graduate

3. Produce a range of academic genres, including summaries, critiques, data commentaries, and problem-solution texts, demonstrating versatility in adapting structure, tone, and purpose to meet disciplinary expectation.
Audience: Graduate

ESL 350 – PROFESSIONAL AND ACADEMIC WRITING SKILLS
2-3 credits.

Workshop approached to writing students' fields, including dissertations, articles and research reports. Also covers general writing skills, documentation and genre-specific styles. Not open to auditors
Requisites: Graduate/professional standing
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ESL 352 – ENGLISH FOR LAWYERS
3 credits.

Opportunities to express ideas through oral presentations and formal written work. Focus on specific topics in law. Not open to auditors
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Improve their speaking and presentation skills by participating in oral presentations, panel discussions and debates.
Audience: Undergraduate

2. Practice their listening and note-taking skills by attending lectures given by guest speakers.
Audience: Undergraduate

3. Improve their academic writing skills by writing summaries, business letters, legal memos and reports.
Audience: Undergraduate

4. Improve their reading skills by reading articles on current issues of legal interest.
Audience: Undergraduate

ESL 370 – INTERNATIONAL TA TRAINING
0-2 credits.

Focuses on the communication skills, classroom culture, and teaching strategies essential for effective classroom teaching at an American university. Not open to auditors
Requisites: Graduate/professional standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Practice and improve their teaching skills by making 4 thematically unified filmed presentations representative of materials taught in TA sections in their discipline.
Audience: Undergraduate

2. View and evaluate their filmed presentations and meet with the instructor to discuss and analyze their teaching.
Audience: Undergraduate

3. Build their confidence to be able to teach effectively in an American college classroom.
Audience: Undergraduate

4. Become aware of their pronunciation strengths and weaknesses and resources for helping them improve their speech.
Audience: Undergraduate

5. Develop their communication skills.
Audience: Undergraduate

ENTOMOLOGY (ENTOM)

ENTOM/AGROECOL/C&E SOC/ENVIR ST 103 – AGROECOLOGY: AN INTRODUCTION TO THE ECOLOGY OF FOOD AND AGRICULTURE
3 credits.

Agroecology has blossomed across the world in recent decades as not only a science, but also a practice, and a movement. Employ the multiple disciplines and perspectives that Agroecology affords to analyze our agricultural and food systems within a broader context of dynamic social and ecological relationships.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain and analyze basic biophysical processes of agricultural ecosystems and the challenges and benefits of various management systems
Audience: Undergraduate

2. Interrogate social, economic, and political structures underlying agriculture at local, regional, national, and global scales
Audience: Undergraduate

3. Describe how they personally connect to local to global agricultural landscape as humans, ecological actors, food and fuel consumers, and thoughtful citizens
Audience: Undergraduate

ENTOM/ENVIR ST 201 – INSECTS AND HUMAN CULTURE-A SURVEY COURSE IN ENTOMOLOGY
3 credits.

Importance of insects in the environment, emphasizing beneficial insects, disease carriers, and agricultural pests that interfere with the food supply. Environmental problems due to insect control agents.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and summarize biological concepts through knowledge of insects.
Audience: Undergraduate

2. Integrate knowledge of human culture and international issues with entomological science.
Audience: Undergraduate

3. Analyze biological/cultural concepts and compose creative, well-composed arguments.
Audience: Undergraduate

4. Demonstrate critical thinking and comparative perspectives about biological science/cultural issues by reviewing and discussing evidence-based research.
Audience: Undergraduate

ENTOM/NUTR SCI 203 — INTRODUCTION TO GLOBAL HEALTH
3 credits.

Introduces students to global health concepts through multidisciplinary speakers dedicated to improving health through their unique training. It targets students with an interest in public health and those who wish to learn how their field impacts their global issues.
Requisites: None
Course Designation: Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Define global health and identify major global health trends and metrics
Audience: Undergraduate

2. Recognize the "determinants of health" that contribute to health disparities/inequities
Audience: Undergraduate

3. Examine global health through the lens of agriculture, food, and nutrition
Audience: Undergraduate

4. Describe the role of ecology and the changing environment in global health
Audience: Undergraduate

5. Explain the importance of collaborative and interdisciplinary approaches in global health
Audience: Undergraduate

6. Discuss a variety of global health careers and areas of specialty through guest speakers and connections with their area of interest
Audience: Undergraduate

ENTOM/ENVIR ST 205 — OUR PLANET, OUR HEALTH
3 credits.

An introduction to the multiple determinants of health, global disease burden and disparities, foundational global health principles, and the overlap between ecosystem stability, planetary boundaries, and human health. Explore the core fundamentals of global health scholarship, including but not limited to infectious disease, sanitation, and mental health, and also consider ecological perspectives on these issues through the lens of planetary boundaries. Attention is placed on how human-mediated global change (e.g. climate change, biodiversity loss, land-use patterns, geochemical cycling, agricultural practice) impacts human health and the ecosystem services we depend on. An overview of pertinent issues in sustainability science and planetary health discourse, including the 'Anthropocene' and resilience to understand and critically assess global trends.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Use a local to global perspective to assess the historical, current and future trends in human health and well-being
Audience: Undergraduate

2. Describe the use of planetary boundaries to measure Earth system sustainability and the potential impacts of instability in these systems on global health and human well being
Audience: Undergraduate

3. Describe current primary global health challenges, their distribution, and prevention strategies
Audience: Undergraduate

4. Analyze global health disparities through a social justice and human rights lens
Audience: Undergraduate

5. Demonstrate a basic understanding of contemporary issues, problems, and controversies in global health through an interdisciplinary perspective that recognizes the complex relationships between social, economic, political, and environmental systems.
Audience: Undergraduate

6. Analyze ecological perspectives on the connections among human health and well being, animal health, and ecosystem health
Audience: Undergraduate

7. Assess and reflect on the successes and failures of global health interventions and become familiar with current events and current literature that describes these efforts
Audience: Undergraduate

8. Reflect on personal goals, objectives, and role as a global citizen and future professional or researcher
Audience: Undergraduate

ENTOM 289 – HONORS INDEPENDENT STUDY
1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area of Entomology. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2005
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills.
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving.
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies.
Audience: Undergraduate

4. Effectively communicate findings.
Audience: Undergraduate

ENTOM 299 – INDEPENDENT STUDY
1-3 credits.

Research work for students under direct guidance of a faculty member in an area of Entomology. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills.
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving.
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies.
Audience: Undergraduate

4. Effectively communicate findings.
Audience: Undergraduate

ENTOM/ZOOLOGY 302 – INTRODUCTION TO ENTOMOLOGY
4 credits.

Principles including morphology and classification.
Requisites: ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and describe the external and internal anatomical structures of insects, including specialized mouthparts, wing structures, and leg adaptations.
Audience: Undergraduate

2. Classify insects into their respective orders and families using taxonomic keys, and describe the hierarchical levels of classification within the Phylum Arthropoda.
Audience: Undergraduate

3. Differentiate between the types of metamorphosis (e.g., holometabolous, hemimetabolous) and discuss the selective advantages of each developmental pathway.
Audience: Undergraduate

4. Explain the ecological roles of insects, their trophic interactions, and their significance in various ecosystems, including their economic impact on agriculture and human health.
Audience: Undergraduate

5. Collect, preserve, and accurately identify insect specimens, demonstrating proficiency in using entomological tools and techniques.
Audience: Undergraduate

6. Describe the physiological processes of insects, including digestion, circulation, and respiration, and compare these processes to those of other organisms.
Audience: Undergraduate

7. Discuss the evolutionary significance of insects, including concepts of mimicry, adaptation, and the evolutionary relationships among different insect groups.
Audience: Undergraduate

ENTOM 321 – PHYSIOLOGY OF INSECTS
3 credits.

Anatomy, histology and basic physiology of organ systems in insects.
Requisites: ZOOLOGY/ENTOM 302 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Identify and describe the anatomical structures and histological features of various insect organ systems, including the digestive, respiratory, circulatory, and nervous systems.
Audience: Both Grad & Undergrad

2. Explain the basic physiological processes in insects, such as digestion, respiration, circulation, and excretion, and how these processes are adapted to their environments.
Audience: Both Grad & Undergrad

3. Analyze the functions of different insect organ systems and understand how these systems interact to maintain homeostasis and support insect life.
Audience: Both Grad & Undergrad

4. Compare and contrast the physiological mechanisms in insects with those in vertebrates, highlighting the unique adaptations and evolutionary significance of insect physiology.
Audience: Both Grad & Undergrad

5. Interpret experimental data and apply findings to broader biological and ecological contexts.
Audience: Graduate

ENTOM 331 – TAXONOMY OF MATURE INSECTS
4 credits.

Principles of taxonomy, identification and taxonomic morphology of adult insects.
Requisites: ZOOLOGY/ENTOM 302 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the fundamental principles of taxonomy, including the rules of nomenclature, classification systems, and the importance of taxonomic hierarchy in biological sciences.
Audience: Both Grad & Undergrad

2. Identify adult insects to the order, family, and genus levels using taxonomic keys and diagnostic morphological features.
Audience: Both Grad & Undergrad

3. Describe the key morphological characteristics used in the taxonomy of adult insects, including structures such as wings, antennae, mouthparts, and reproductive organs.
Audience: Both Grad & Undergrad

4. Apply various taxonomic methods and techniques, such as specimen collection, preservation, and preparation, to conduct taxonomic studies and create insect collections.
Audience: Both Grad & Undergrad

5. Analyze and interpret the taxonomic relationships among different insect groups, understanding their evolutionary relationships and the significance of morphological variations.
Audience: Both Grad & Undergrad

6. Apply advanced taxonomic principles and methodologies to identify and classify adult insects.
Audience: Graduate

ENTOM 344 – FROM FLOWERS TO FOOD: POLLINATOR ECOLOGY AND CONSERVATION
3 credits.

Explores the vital roles that pollinators play in ecosystems and agriculture. Dives into the biology, diversity, and ecology of pollinators, examining plant-pollinator interactions, co-evolution, and pollinator foraging behaviors. Examines pollinator decline and the stressors that affect pollinators, such as climate change, land-use changes, pesticides, and pathogens, as well as conservation strategies. Offers opportunities to directly observe pollinators and apply pollinator ecology.
Requisites: (ZOOLOGY/BIOLOGY 101 and 102), BOTANY/BIOLOGY 130, (ZOOLOGY/BIOLOGY/BOTANY 151 and 152), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe the breadth of animal pollinator taxa and the role of pollinators in both natural and agricultural systems
Audience: Both Grad & Undergrad

2. Explain basic concepts of pollination ecology and apply these concepts to real-world phenomena in ecosystems
Audience: Both Grad & Undergrad

3. Evaluate factors affecting pollinator populations and compare their consequences on pollinator decline
Audience: Both Grad & Undergrad

4. Analyze, interpret and critique scientific literature
Audience: Both Grad & Undergrad

5. Create an educational piece to teach pollinator ecology concepts to peers
Audience: Both Grad & Undergrad

6. Communicate scientific concepts related to pollinator ecology and conservation in written and oral formats
Audience: Both Grad & Undergrad

7. Develop a research proposal related to pollinator ecology
Audience: Graduate

ENTOM/M M & I/PATH-BIO/ZOOLOGY 350 – PARASITOLOGY
3 credits.

The biology of water-borne, food-borne, soil-borne and vector-borne parasites of animals including humans. Parasites are explored in the context of transmission, associated disease, diagnosis and treatment options, and environmental, cultural and socioeconomic drivers of disease epidemiology.
Requisites: ZOOLOGY/BIOLOGY 101 and 102, or ZOOLOGY/BIOLOGY/BOTANY 152 or ZOOLOGY 153, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Be conversant in terminology used in the field of Parasitology.
Audience: Undergraduate

2. Recall scientific and common names for parasites and hosts, and the name of the resulting disease in humans or animals.
Audience: Undergraduate

3. Attribute parasite behavior and characteristics to specific disease features in the host.
Audience: Undergraduate

4. Identify appropriate means to diagnose infections with parasites.
Audience: Undergraduate

5. Describe and identify factors that determine when, where, and why parasitic diseases exist.
Audience: Undergraduate

6. Integrate terminology, scientific nomenclature, diagnostic features and demographics to solve case studies where the parasitic culprit is unknown.
Audience: Undergraduate

7. Compare and contrast commonalities in parasite life cycles to demonstrate how flexibility in those life cycles has resulted in many different potential means of transmission.
Audience: Undergraduate

8. Deconstruct the impact of parasitic diseases on human and animal health, from disease symptoms and pathology in an individual, to socioeconomics in communities and countries.
Audience: Undergraduate

9. Identify reliable resources (primarily internet-based) available for researching the biology and epidemiology parasitic diseases.
Audience: Undergraduate

ENTOM 351 – PRINCIPLES OF ECONOMIC ENTOMOLOGY
3 credits.

Major economic insects: identification, life histories, bionomics, distribution, control; procedures in fundamental and practical inquiry.
Requisites: ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, ZOOLOGY 153, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify major insect groups and understand their structures and functions.
Audience: Both Grad & Undergrad

2. Explain the ecological roles of insects and the factors that contribute to them becoming pests.
Audience: Both Grad & Undergrad

3. Describe the principles and evaluate various pest management strategies, including chemical and non-chemical control methods.
Audience: Both Grad & Undergrad

4. Critically evaluate information sources and research articles.
Audience: Both Grad & Undergrad

5. Conduct research on specific pest insects and their population dynamics and critically develop a detailed pest profile.
Audience: Both Grad & Undergrad

6. Synthesize primary scientific literature related to economic entomology and apply this knowledge to develop advanced pest management strategies and evaluate the ecological and economic impacts of pest insects.
Audience: Graduate

ENTOM/ZOOLOGY 371 – MEDICAL ENTOMOLOGY: BIOLOGY OF VECTOR AND VECTOR-BORNE DISEASES
3-4 credits.

Explore the biological and molecular adaptations of parasitic arthropods that allow them to feed on vertebrate host and facilitate the transmission of vector-borne pathogens. Examines how anthropogenic activities, behaviors, and effects on climate affect the biology of vectors, the pathogens they transmit, and the emergence of vector-borne epidemics in the world. Emphasis on the molecular and physiological interaction between pathogens, their vector, and the vertebrate host and the fundamentals on how vectors and vector-borne pathogens cause disease in humans. Evaluate real control programs deployed globally for the control of vector-borne diseases.
Requisites: ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383, ZOOLOGY 153, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify vector-borne pathogens of public health importance and their respective vectors.
Audience: Both Grad & Undergrad

2. Distinguish how biological and physiological adaptations facilitate the relationship between vectorsand particular pathogens.
Audience: Both Grad & Undergrad

3. Apply information on disease epidemiology, vector ecology, vector distribution, and disease manifestation to solve hypothetical scenarios of vector-borne disease transmission.
Audience: Both Grad & Undergrad

4. Discuss current issues delaying the development of diagnostics, prevention, treatment, and control of vector-borne diseases.
Audience: Both Grad & Undergrad

5. Evaluate vector control programs currently deployed internationally based on knowledge of vector biology.
Audience: Both Grad & Undergrad

6. Design project proposals to study different aspects of vector physiology, biology, ecology, and pathogen-vector interactions.
Audience: Graduate

ENTOM 375 – SPECIAL TOPICS
1-4 credits.

Specialized subject matter of current interest to undergraduate students.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

ENTOM 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Entomology and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Apply concepts learned in coursework to authentic professional situations.
Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry.
Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations.
Audience: Undergraduate

ENTOM 400 – STUDY ABROAD IN ENTOMOLOGY
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

ENTOM 432 – TAXONOMY AND BIONOMICS OF IMMATURE INSECTS
4 credits.

Covers anatomy/morphology, taxonomy, and bionomics of immature insects (ordinal and familial levels). Identification of insects (order and family) using taxonomic keys.
Requisites: ZOOLOGY/ENTOM 302 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and describe the anatomical and morphological characteristics of immature insects, including key structures and their functions.
Audience: Both Grad & Undergrad

2. Classify immature insects to the order and family levels using taxonomic keys, understanding the hierarchical levels of classification and the distinguishing features of each group.
Audience: Both Grad & Undergrad

3. Explain the bionomics of immature insects, including their life cycles, developmental stages, ecological roles, and interactions with their environments.
Audience: Both Grad & Undergrad

4. Apply various taxonomic methods and techniques to identify and classify immature insects, demonstrating proficiency in using taxonomic keys and other identification tools.
Audience: Both Grad & Undergrad

5. Synthesize current research findings to enhance their understanding of anatomical and morphological characteristics, taxonomic classification, and ecological roles of immature insects.
Audience: Graduate

ENTOM 450 – BASIC AND APPLIED INSECT ECOLOGY
3 credits.

Covers population and community ecology, plant-insect interactions, insect biodiversity and biogeography, and applied ecology. Weaves basic ecological theory and principles with their application to entomological problems such as conservation, biological control, agriculture, and insect-vectored diseases of plants and humans. Uses current entomological and ecological scientific literature and draws on examples from a broad range of natural and managed ecosystems. Broadens from pairwise species interactions (e.g., a predator and its prey) to the entire community of organisms and their physical environment. Emphasizes the theoretical principles and historical background underlying the various topics with a link to potential applications in agriculture, conservation, pest management, and/or invasion biology.
Requisites: ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 152, BIOCORE 381, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Outline and explain basic ecological concepts and principles at the physiological, population, community and ecosystem levels as they pertain to insects.
Audience: Both Grad & Undergrad

2. Describe the mechanisms mediating interactions of insects with their biotic and abiotic environments.
Audience: Both Grad & Undergrad

3. Articulate the importance of insects as selective, stabilizing and potentially disruptive components of ecosystems.
Audience: Both Grad & Undergrad

4. Apply basic ecological theory to explain real-world entomological problems.
Audience: Both Grad & Undergrad

5. Communicate the significance of ecological research based on the primary literature.
Audience: Both Grad & Undergrad

6. Connect insect ecology with real-world problems as they affect people.

Audience: Both Grad & Undergrad

7. Communicate complex scientific concepts to a broader audience, integrating current research findings and contributing to the public understanding of insect ecology.
Audience: Graduate

ENTOM 468 – STUDIES IN FIELD ENTOMOLOGY
3 credits.

Concentration on structural, behavioral adaptations of insects to diverse habitats; dynamic relations between insects and plants, other animals and other insects.
Requisites: ZOOLOGY/ENTOM 302
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Analyze the structural and behavioral adaptations of insects that enable them to thrive in diverse habitats, understanding the evolutionary significance of these adaptations.
Audience: Undergraduate

2. Examine the dynamic relationships between insects and plants, including pollination, herbivory, and mutualistic interactions, and assess the ecological and evolutionary implications of these interactions.
Audience: Undergraduate

3. Investigate the interactions between insects and other animals, including predation, parasitism, and competition, and describe how these interactions influence insect behavior, population dynamics, and community structure.
Audience: Undergraduate

ENTOM/BOTANY/ZOOLOGY 473 – PLANT-INSECT INTERACTIONS
3 credits.

Multiple ways in which arthropods exploit plants, plant traits that deter or augment insects, environmental mediation of these interactions, effects on population dynamics, community ecology and co-evolution, and implications to natural resource management, environmental quality, and sustainable development.
Requisites: BOTANY/ZOOLOGY 460, FW ECOL 500, ENTOM/BOTANY/PL PATH 505, or graduate/professional standing (or FW ECOL 460 prior to Fall 2026)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the fundamental mechanisms mediating interactions of plants and insects.
Audience: Both Grad & Undergrad

2. Describe the implications of plant and insect interactions for population, community, and ecosystem ecology.
Audience: Both Grad & Undergrad

3. Discuss the implications of plant and insect interactions for natural resource management and sustainable ecosystems.
Audience: Both Grad & Undergrad

4. Communicate relevant and current scientific literature to peers.
Audience: Both Grad & Undergrad

5. Synthesize current research findings in plant and insect interactions and apply this knowledge to evaluate implications of plant-insect co-evolution.

Audience: Graduate

ENTOM 490 – BIODIVERSITY AND GLOBAL CHANGE
3 credits.

Explores the impact of global environmental change on biodiversity and the subsequent consequences for ecosystem function and human well-being. Examines species response to these environmental changes, such as migration, adaptation, and extinction, and the implications for the delivery of ecosystem services and planetary health. Applies ecological principles to identify and evaluate practical solutions to pressing environmental challenges.
Requisites: (BIOLOGY/ZOOLOGY 101, BOTANY/BIOLOGY/ZOOLOGY 151, BOTANY/BIOLOGY 130, ZOOLOGY 153, BIOCORE 381, GEOSCI/ATM OCN/ENVIR ST 102, ILS/ENVIR ST 126, GEOG/ENVIR ST 120, 127, or 139) and (MATH 112, 114, 171, or placement into MATH 221) or grad/prof standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify key aspects of climate change and other human-driven environmental changes across the globe in the Anthropocene
Audience: Both Grad & Undergrad

2. Evaluate the impacts of these changes on biological systems across scales of organization, including individual organisms, populations, communities, and ecosystems
Audience: Both Grad & Undergrad

3. Explain the importance of feedbacks, interactions, non-linear responses, and irreversible changes in driving ecosystem responses to global change
Audience: Both Grad & Undergrad

4. Compare and contrast the values and services provided by biological diversity
Audience: Both Grad & Undergrad

5. Evaluate the role of biodiversity in mitigating or exacerbating the impacts of global environmental change, and in supporting human health and wellbeing
Audience: Both Grad & Undergrad

6. Critically interpret data and results from primary literature and apply this interpretation to supporting scientific arguments
Audience: Both Grad & Undergrad

7. Synthesize and critically evaluate scientific claims and hypotheses in global change biology using quantitative data analysis
Audience: Graduate

ENTOM/BOTANY/PL PATH 505 – PLANT-MICROBE INTERACTIONS: MOLECULAR AND ECOLOGICAL ASPECTS
3 credits.

Molecular and ecological aspects of the interactions between plants and microorganisms. Explores many of the themes, from genetic to integrative, of modern biology, and illustrates how study of plant-microbe interactions contributes to understanding of fundamental plant science.
Requisites: MICROBIO 303, GENETICS 466, 468, BIOCHEM 501, 508, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Assess research papers from the peer-reviewed science literature by critically reading.
Audience: Both Grad & Undergrad

2. Discuss our current understanding of molecular plant-microbe interactions.
Audience: Both Grad & Undergrad

3. Present ideas at a professional level, in both oral and written form.
Audience: Both Grad & Undergrad

4. Facilitate an in-depth discussion about the complex relationships between plants and microbes.
Audience: Graduate

ENTOM/ZOOLOGY 540 – THEORETICAL ECOLOGY
3 credits.

Introduction to theoretical ecology, including hands-on experience in computer modeling.
Requisites: STAT/F&W ECOL 571 (or HORT 571 prior to Spring 2025)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the purpose and the use of analytical statistical models.
Audience: Both Grad & Undergrad

2. Apply appropriate statistical methods to analyze complex ecological data.
Audience: Both Grad & Undergrad

3. Use the statistical tools available in the R programming language to analyze the type of data that derives from their graduate research.
Audience: Graduate

ENTOM 570 – SYSTEMS THINKING IN GLOBAL HEALTH
3 credits.

A systems approach to examination of the multiple determinants of health and well-being. Case studies and group projects explore complex issues including, but not limited to, the root causes of infectious and noncommunicable disease, health inequities in the context of global change, and trade-offs in addressing global and planetary health problems, particularly where information is incomplete, projections about future states are uncertain, or social equity concerns must be taken into account as scientific knowledge is applied. Group projects emphasize systems thinking to critically assess global issues. Teamwork and communication skills are required for case study analysis and project management.
Requisites: ENVIR ST/ENTOM 205
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze place-based case studies to understand the complex relationships and connections between human health and the preservation and restoration of our environment. Analysis will link to global and planetary health precepts.
Audience: Undergraduate

2. Work within groups to identify and describe complex problems from different and multiple disciplinary perspectives.
Audience: Undergraduate

3. Identify and practice methods for designing interventions and making decisions that are informed by systems thinking, understanding of complexity and uncertainty, and planetary health principles.
Audience: Undergraduate

4. Work in groups to develop reports and presentations that apply a systems thinking lens to questions related to human health and well-being from multiple perspectives.
Audience: Undergraduate

5. Communicate about working strategy/directions, and find and share reliable and appropriate information for the audience indicated (specialists, members of the public, children, etc.)
Audience: Undergraduate

6. Reflect on and specify personal goals, values, and ethics as a global (and local) citizen and future professional or researcher, describe how your thinking has evolved over time in your study of global and planetary health.

Audience: Undergraduate

ENTOM/GENETICS/ZOOLOGY 624 – MOLECULAR ECOLOGY
3 credits.

Basic principles of molecular ecology. Lecture topics include population genetics, molecular phylogenetics, rates and patterns of evolution, genome evolution, and molecular ecology.
Requisites: GENETICS 466, 467, BIOCORE 383, or graduate student standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and describe common molecular genetic techniques.
Audience: Both Grad & Undergrad

2. Demonstrate knowledge about the significance of genetic diversity in species biology.
Audience: Both Grad & Undergrad

3. Differentiate how ecological and evolutionary processes shape genetic variation.
Audience: Both Grad & Undergrad

4. Analyze genetic data and communicate the results.
Audience: Both Grad & Undergrad

5. Evaluate whether genetic data are appropriate for answering scientific questions.
Audience: Both Grad & Undergrad

6. Summarize and critique the primary literature in the field of Molecular Ecology.
Audience: Graduate

ENTOM 681 – SENIOR HONORS THESIS
2-4 credits.

Individual study for undergraduate students in an Honors program completing a thesis in the area of Entomology, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Review and analyze scientific literature.
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question.
Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research.
Audience: Undergraduate

ENTOM 682 – SENIOR HONORS THESIS
2-4 credits.

Second semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Entomology, as arranged with a faculty member. ENTOM 681
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Review and analyze scientific literature.
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question.
Audience: Undergraduate

3. Write a thesis based on original research.
Audience: Undergraduate

ENTOM 691 – SENIOR THESIS
2 credits.

Individual study for undergraduate students completing a thesis in the area of Entomology, as arranged with a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Review and analyze scientific literature.
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question.
Audience: Undergraduate

3. Write a thesis based on original research.
Audience: Undergraduate

ENTOM 692 – SENIOR THESIS
1-3 credits.

Individual study for undergraduate students completing a thesis in the area of Entomology, as arranged with a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem
Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses
Audience: Undergraduate

3. Carry out analysis of data related to the testable hypotheses
Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience
Audience: Undergraduate

5. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work
Audience: Undergraduate

ENTOM 699 – SPECIAL PROBLEMS
1-4 credits.

Individual advanced work in an area of Entomology under the direct guidance of a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills.
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving.
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies.
Audience: Undergraduate

4. Effectively communicate findings.
Audience: Undergraduate

ENTOM 701 – ADVANCED TAXONOMY
3 credits.

Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and describe the anatomical and morphological characteristics of insects, including key structures and their functions.
Audience: Graduate

2. Classify insects using taxonomic keys, understanding the hierarchical levels of classification and the distinguishing features of each group.
Audience: Graduate

3. Explain the bionomics of insects, including their life cycles, developmental stages, ecological roles, and interactions with their environments.
Audience: Graduate

4. Apply taxonomic methods and techniques to identify and classify insects, demonstrating proficiency in using taxonomic keys and other identification tools.
Audience: Graduate

ENTOM/F&W ECOL 711 – MULTIVARIATE ANALYSIS OF ECOLOGICAL AND COMMUNITY DATA
2 credits.

Examines common methods of multivariate data analysis in ecology and environmental science. Covers methods for the analysis of complex, multidimensional datasets that are collected in the study of plant, invertebrate, fish, and bird communities. Addresses the concurrent analysis of the environmental factors that may drive community distributions. Provides the basis for predictive modeling of distributions across landscapes. General methods covered include ordination (PCA, DCA, NMDS, CCA), clustering (or classification), and other comparative analyses of data matrices (ANOSIM, Mantel tests). Includes an applied, "hands-on" approach on how to use these tools, and the circumstances under which their uses are either appropriate or inappropriate.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply common multivariate analysis techniques, such as ordination (PCA, DCA, NMDS, CCA) and clustering, to analyze complex, multidimensional datasets in ecology and environmental science.
Audience: Graduate

2. Interpret the results of multivariate analyses, understanding the ecological and environmental factors that drive community distributions and the relationships among different species and environmental variables.
Audience: Graduate

3. Develop predictive models of species distributions across landscapes using multivariate analysis methods, and evaluate the accuracy and reliability of these models.
Audience: Graduate

4. Conduct comparative analyses of data matrices using methods such as ANOSIM and Mantel tests, and understand the appropriate contexts for their application.
Audience: Graduate

5. Implement hands-on analytical approaches to multivariate data analysis, gaining practical experience with software tools and techniques, and understanding the circumstances under which different methods are appropriate or inappropriate.
Audience: Graduate

ENTOM 799 – PRACTICUM IN ENTOMOLOGY TEACHING
1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Communicate knowledge of entomology to a general audience.
Audience: Graduate

2. Prepare appropriate plans for classroom instruction and/or activities.
Audience: Graduate

3. Facilitate classroom discussions.
Audience: Graduate

4. Monitor student performance through assessment.
Audience: Graduate

5. Evaluate personal strengths and areas of growth in biological sciences instruction.
Audience: Graduate

ENTOM 801 – COLLOQUIUM
1 credit.

Provides exposure to current research in Entomology. Weekly speakers represent diverse career backgrounds.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the breadth of entomological research and identify new linkages and potential partnerships for research.
Audience: Graduate

2. Evaluate different methods of data presentation and science communication.
Audience: Graduate

3. Demonstrate interrogatory and communication skills during interactions with other professionals.
Audience: Graduate

4. Apply professional networking skills.
Audience: Graduate

ENTOM/BOTANY/GENETICS/ZOOLOGY 820 – FOUNDATIONS OF EVOLUTION
2 credits.

Explore some of the most important themes and debates that have permeated evolutionary biology over the last 50 years. Read key papers related to each controversial topic, debate the pros and cons of competing viewpoints, and reflect on the relevance of the issue to contemporary evolutionary biology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain important evolutionary concepts, including basic population and quantitative genetics.
Audience: Graduate

2. Identify key ideas and controversies in evolutionary biology.
Audience: Graduate

3. Develop an ability to think about evolution in the manner of a professional in the field.
Audience: Graduate

4. Interpret and critique conceptual theories using rigorous logic and references to established biological phenomena.
Audience: Graduate

5. Summarize, interpret, and synthesize scientific concepts orally and in writing.
Audience: Graduate

6. Communicate and debate in a respectful and constructive manner with fellow evolutionary biologists, including as a peer reviewer.
Audience: Graduate

ENTOM/BOTANY/F&W ECOL/ZOOLOGY 821 – FOUNDATIONS OF ECOLOGY
2 credits.

Foundational ideas in the field of ecology. Discussion topics trace the development of ecology as a discipline, and the roots of modern ecological thought, as well as the research approaches in ecology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and describe key debates in the history of ecology and ongoing controversies in the field.
Audience: Graduate

2. Differentiate ecological processes and how they sustain ecological systems.
Audience: Graduate

3. Moderate and participate in discussions about the significance of important ecological concepts.
Audience: Graduate

4. Summarize, interpret, and synthesize conceptual theories of ecology orally and in writing.
Audience: Graduate

5. Evaluate peer work and provide constructive, professional feedback.
Audience: Graduate

ENTOM 875 – SPECIAL TOPICS
1-4 credits.

Specialized subject matter of current interest to graduate students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENTOM 901 – SEMINAR IN ORGANISMAL ENTOMOLOGY
1 credit.

Presentations from the original literature on developments in natural products chemistry, biochemistry, physiology, developmental biology and/or ultrastructure of insects.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Discuss entomological research by reviewing primary entomological literature with peers and scientific professionals.
Audience: Graduate

2. Interpret and critique scientific research results and conceptual theories in publications using rigorous logic.
Audience: Graduate

3. Summarize, interpret, and synthesize scientific concepts orally while debating in a respectful and constructive manner with fellow biologists.
Audience: Graduate

ENTOM/AGROECOL/ATM OCN/BOTANY/ENVIR ST/GEOG/ZOOLOGY 953 – INTRODUCTION TO ECOLOGY RESEARCH AT UW-MADISON
1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison
Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison
Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology
Audience: Graduate

4. Develop appropriate expectations for advisors and advisees
Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics
Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science
Audience: Graduate

ENTOM 990 — GRADUATE RESEARCH AND THESIS
1-12 credits.

Independent laboratory research in preparation of a graduate thesis under supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Devise an engaging overview of a research area.
Audience: Graduate

2. Explain background, methods, results, and a discussion of experimental data.
Audience: Graduate

3. Design charts/tables that effectively communicate data.
Audience: Graduate

4. Assess peers on the effectiveness of a scientific presentation.
Audience: Graduate

5. Generate goals to improve presentation skills.
Audience: Graduate

ENVIRONMENTAL STUDIES - GAYLORD NELSON INSTITUTE (ENVIR ST)

ENVIR ST/F&W ECOL 100 — FORESTS OF THE WORLD
3 credits.

Ecology and conservation of a wide range of forests, from tropical rain and dry forests, boreal forests, to temperate forests, outside of the USA. The main threats to forests, and different strategies to solve conservation and sustainable management issues in international forestry. Trade-offs in forest conservation and management, resulting from different values that people place on forests, issues in equity and equality in access to forest resources. The role of forests in climate change and extinction of species.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify relevant stakeholders in forest landscapes across the world
Audience: Undergraduate

2. Give examples of conservation threats to forests in countries other than the USA and relevant solutions
Audience: Undergraduate

3. Communicate about evidence on forest conservation and threats rigorously, correctly, and under different formats
Audience: Undergraduate

4. Demonstrate, on specific examples, how trade-offs in forest conservation originate and work
Audience: Undergraduate

5. Explain the role of forests in solutions to climate change and species extinctions
Audience: Undergraduate

ENVIR ST/SOIL SCI 101 – FORUM ON THE ENVIRONMENT
1-2 credits.

Lectures and discussions about environmental issues. Historical and contemporary environmental impacts of humans on the biosphere. Global futures: population, technology, societal values, resources and prospects for sustainable management.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Social Science or Natural Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the breadth of the environmental sciences field
Audience: Undergraduate

2. Explain how research contributes to understanding of contemporary environmental issues
Audience: Undergraduate

3. Provide examples of the relationships between science, issues, and solutions in environmental topics
Audience: Undergraduate

4. Apply critical reading skills to understand issues and evaluate reliability of information sources
Audience: Undergraduate

5. Communicate and collaborate with a team of peers
Audience: Undergraduate

6. Explain how to pursue interests in environmental issues within and outside of the classroom
Audience:

ENVIR ST/ATM OCN/GEOSCI 102 – CLIMATE AND CLIMATE CHANGE
3 credits.

Describes the basic climate principles governing the climate system. It describes the climate and climate variability at present, climate evolution in the past, and the projected climate change into the future. The scientific principles underlying the natural and anthropogenic greenhouse effect and climate model forecasts are elucidated.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain how climate has changed in the past and is projected to change in the future.
Audience: Undergraduate

2. Describe how the different components of Earth System affect the climate and how global warming will impact them.
Audience: Undergraduate

3. Connect physical climate changes to impacts on the environment, ecosystems, and people.
Audience: Undergraduate

4. Describe different adaptation and mitigation strategies.
Audience: Undergraduate

5. Explain how scientists study the climate.
Audience: Undergraduate

6. Describe the debate around climate change.
Audience: Undergraduate

ENVIR ST/AGROECOL/C&E SOC/ENTOM 103 – AGROECOLOGY: AN INTRODUCTION TO THE ECOLOGY OF FOOD AND AGRICULTURE
3 credits.

Agroecology has blossomed across the world in recent decades as not only a science, but also a practice, and a movement. Employ the multiple disciplines and perspectives that Agroecology affords to analyze our agricultural and food systems within a broader context of dynamic social and ecological relationships.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain and analyze basic biophysical processes of agricultural ecosystems and the challenges and benefits of various management systems
Audience: Undergraduate

2. Interrogate social, economic, and political structures underlying agriculture at local, regional, national, and global scales
Audience: Undergraduate

3. Describe how they personally connect to local to global agricultural landscape as humans, ecological actors, food and fuel consumers, and thoughtful citizens
Audience: Undergraduate

ENVIR ST/GEOSCI 106 – ENVIRONMENTAL GEOLOGY
3 credits.

Application of geology to problems resulting from the ever more intense use of the earth and its resources.
Requisites: Not open to students with credit for GEOSCI 100
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the materials that make up the earth and the natural processes that shape the earth over a variety of time scales.
Audience: Undergraduate

2. Use multiple lines of evidence (integrate multiple lines of data) to support or reject theories about Earth history, Earth processes, Earth hazards, and human impacts.
Audience: Undergraduate

3. Identify why various geologic resources, benefits, hazards, and constraints may be important in a given geologic environment, and support the explanation with evidence.
Audience: Undergraduate

4. Recognize the impacts of human actions and resource usage at regional, national, and global scales using available evidence.
Audience: Undergraduate

ENVIR ST 112 – ENVIRONMENTAL STUDIES: SOCIAL SCIENCE PERSPECTIVES
3 credits.

Explores different social science approaches to interpreting the relationship between environment and society at various scales, from the local to the global. Traces the social origins of environmental concerns, their social impacts, and the different responses they engender.
Requisites: Not open to students with credit for GEOG/ENVIR ST 337
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify different social science approaches that can be used to understand environment-society relations
Audience: Undergraduate

2. Analyze and explain how social, economic, and political conditions affect the environment and environmental issues
Audience: Undergraduate

3. Explain the social, economic and/or environmental dimensions of the sustainability challenges of population growth, natural resource consumption, and market economies
Audience: Undergraduate

4. Analyze objects, ideas, and current events using an environment and society perspective
Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of issues like climate change and environmental justice and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course
Audience: Undergraduate

6. Demonstrate writing that shows mastery of evidence-based critical thinking
Audience: Undergraduate

ENVIR ST 113 – ENVIRONMENTAL STUDIES: ENVIRONMENTAL HUMANITIES
3 credits.

What do we really mean when we use the word, environment, in interdisciplinary Environmental Studies, and how important is it to have our environment be meaningful? Considers five popular understandings, while also offering a global perspective on environmental humanities. Introduction to key American texts (Carson, Kimmerer, Leopold, etc.) and key concepts (like sustainability and the Anthropocene), along with core skills from fields like philosophy, ethics, literature, fine arts, history, politics and anthropology. Cases in environmental experience and expression range from Wisconsin to Asia, and across biotic and abiotic environments. Through discussions and assignments, answer fundamental questions about science, nature, environmental problems and crisis, and how to relate to others in our world as human beings.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Master core concepts in Environmental Studies
Audience: Undergraduate

2. Understand human-environmental systems
Audience: Undergraduate

3. Demonstrate competence in humanistic study and disciplines
Audience: Undergraduate

4. Achieve excellent writing in Environmental Studies
Audience: Undergraduate

5. Develop oral/aural and collaborative academic skills
Audience: Undergraduate

ENVIR ST/GEOG 120 – INTRODUCTION TO THE EARTH SYSTEM
3 credits.

Introduction to how the Earth system works and what makes Earth livable. Gain appreciation for how the atmosphere, oceans, life, and earth's surface interact to shape our local, regional and global landscapes.
Requisites: Not open to students with credit for ENVIR ST/GEOG 127
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

ENVIR ST/HIST SCI/HISTORY 125 – GREEN SCREEN: ENVIRONMENTAL PERSPECTIVES THROUGH FILM
3 credits.

From Teddy Roosevelt's 1909 African safari to the Hollywood blockbuster King Kong, from the world of Walt Disney to The March of the Penguins, cinema has been a powerful force in shaping public and scientific understanding of nature throughout the twentieth and twenty-first century. How can film shed light on changing environmental ideas and beliefs in American thought, politics, and culture? And how can we come to see and appreciate contested issues of race, class, and gender in nature on screen? Explore such questions and come to understand the role of film in helping to define the contours of past, present, and future environmental visions in the United States, and their impact on the real world struggles of people and wildlife throughout the world.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Interpret film as a historical document and place it in a particular historical context.
Audience: Undergraduate

2. Describe the changing historical contours of environmentalism and how the past continues to shape diverse perspectives relating to the meaning and representation of "the environment," particularly with respect to issues of class, gender, and race.
Audience: Undergraduate

3. Identify major environmental issues and controversies of the past, present, and future in the United States and around the world.
Audience: Undergraduate

ENVIR ST/ILS 126 – PRINCIPLES OF ENVIRONMENTAL SCIENCE
4 credits.

Relates principles of environmental science to our daily activities, with an eye to sustainability, conservation, and systems thinking. Introduces science as a process of inquiry and discovery rather than just a pre-established set of facts. Topics relate to energy, water, and land use, and include food, electric power, materials, buildings, transportation, and waste.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply foundational principles of Environmental Science to practices such as sustainability, conservation, and systems thinking
Audience: Undergraduate

2. Practice science as a process of inquiry and discovery, using the UW-Madison campus as a living laboratory
Audience: Undergraduate

3. Connect campus systems to wider environmental issues relating to energy, water, land use, and waste
Audience: Undergraduate

4. Analyze sustainability issues and practices using a systems-based approach
Audience: Undergraduate

5. Explain the social, economic, and environmental dimensions of the sustainability challenges of operating a large public research institution
Audience: Undergraduate

ENVIR ST/GEOG 127 – PHYSICAL SYSTEMS OF THE ENVIRONMENT
4 credits.

An introduction to natural environmental systems, emphasizing the interconnections between the systems of the solid earth (minerals, rocks, soils), the hydrosphere (water in all its forms), the biosphere, and the atmosphere. Emphasizes connections between basic concepts and specific environmental issues through hands-on case studies, lab projects, and field trips to collect samples and observations for lab projects.
Requisites: Not open to students with credit for ENVIR ST/GEOG 120
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe at a basic level the most important processes of the Earth system, including formation and weathering of rocks and minerals, soil development and erosion, atmospheric circulation, and the global cycles of water and carbon.
Audience: Undergraduate

2. Apply concepts from this course to understand environmental issues such as global climate change and the sustainability of agriculture, and natural hazards such as earthquakes and floods, and make informed contributions to public debate and decision-making on how to address these issues and hazards.
Audience: Undergraduate

3. Identify important research methods, through case studies and labs, that are the basis of modern Earth system science.
Audience: Undergraduate

ENVIR ST/ATM OCN/GEOG 131 – CLIMATE CHANGE, CLIMATE ACTION: THE SOCIAL DIMENSIONS OF CLIMATE CHANGE
3-4 credits.

The planet's climate is changing, and humans are causing it. This means that climate change is not only a topic of study for the biophysical sciences, but also for the social sciences. Focuses on the social dimensions of climate change: the social, political, environmental, and economic factors that shape the drivers and impacts of climate change and the ability of different places and communities to respond. Examines both the social problems that arise from climate change and the social solutions to mitigate and adapt to the climate crisis. How do these social dimensions shape climate change, and how does climate change shape different social dimensions? What climate solutions are being proposed, what climate solutions are already being implemented, and how can we critically evaluate the uneven impacts of those solutions across society and space?
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Explain the basic biophysical drivers of climate change and situate them in their broader socio-spatial contexts.
Audience: Undergraduate

2. Describe core concepts in the climate social sciences, including mitigation, adaptation, vulnerability, resilience, and climate justice.
Audience: Undergraduate

3. Discuss the broad contours of the social dimensions of climate change, including how they relate to political economies, energy systems, cities, agriculture, and human migration.
Audience: Undergraduate

4. Critically assess different climate solutions, their feasibility, the obstacles to their implementation, and their uneven impacts.
Audience: Undergraduate

5. Connect course material to climate justice and policy work occurring locally near campus, across Wisconsin, or in student hometowns.
Audience: Undergraduate

ENVIR ST/GEOG 139 – GLOBAL ENVIRONMENTAL ISSUES
3 credits.

Explores the global and local nature of environmental problems, including issues of climate change, food, energy, globalization, deforestation, biodiversity loss, resource access, environmental justice, and population. Considers how we should analyze and act on environmental problems as we confront the apparently daunting scale of such issues. What appear to be single global environmental issues are actually composed of many smaller, context-specific, and place-dependent problems or conflicts. Through an interdisciplinary and geographic perspective, these issues can be understood and addressed at the scale of our lived lives.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the scientific basis of climate change, population growth, desertification, deforestation, water quality and quantity impairments, and the environmental challenges of agriculture and energy production.
Audience: Undergraduate

2. Critically assess the causal factors and drivers associated with global environmental issues.
Audience: Undergraduate

3. Explain the political context in which environmental issues are framed as global problems.
Audience: Undergraduate

4. Identify potential solutions to global environmental issues, and obstacles to their implementation.
Audience: Undergraduate

5. Describe your own relationship to global environmental issues and how global environmental issues manifest locally.
Audience: Undergraduate

ENVIR ST/ENGL 153 – LITERATURE AND THE ENVIRONMENT
3 credits.

An introduction to literature in English about the natural world and humankind's relationship with it; specific topics will vary.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the ways literature in English conceives of and critiques humankind's relationship with the natural world.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENVIR ST/ATM OCN 171 – GLOBAL CHANGE: ATMOSPHERIC ISSUES AND PROBLEMS
3 credits.

Atmospheric problems of global significance. Greenhouse warming, ozone layer, acid rain, climate change. Study based on elementary principles of atmospheric science. Systems approach applied to changing atmospheric composition. Interactions among geochemical cycles, anthropogenic inputs and other parts of the environment.
Requisites: None
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the primary processes which govern our present climate system.
Audience: Undergraduate

2. Describe primary aspects of our past climate and how it is likely to change in the future.
Audience: Undergraduate

3. Summarize current issues regarding biodiversity, air quality, stratospheric ozone, the carbon cycle, and water cycle.
Audience: Undergraduate

4. Describe how human behavior is related to global change.
Audience: Undergraduate

5. Demonstrate skills in critical reading, logical thinking, and use of evidence.
Audience: Undergraduate

6. Identify and use relevant, reliable, and high-quality research sources.
Audience: Undergraduate

7. Present oral arguments to an audience with different points of view.
Audience: Undergraduate

ENVIR ST 199 – DIRECTED STUDY
1-3 credits.

Independent work in environmental studies overseen by a qualified instructor.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Conduct and report on independent environmental studies research under the guidance of a qualified instructor
Audience: Undergraduate

2. Appropriately utilize online and library resources
Audience: Undergraduate

ENVIR ST/ENTOM 201 – INSECTS AND HUMAN CULTURE-A SURVEY COURSE IN ENTOMOLOGY
3 credits.

Importance of insects in the environment, emphasizing beneficial insects, disease carriers, and agricultural pests that interfere with the food supply. Environmental problems due to insect control agents.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and summarize biological concepts through knowledge of insects.
Audience: Undergraduate

2. Integrate knowledge of human culture and international issues with entomological science.
Audience: Undergraduate

3. Analyze biological/cultural concepts and compose creative, well-composed arguments.
Audience: Undergraduate

4. Demonstrate critical thinking and comparative perspectives about biological science/cultural issues by reviewing and discussing evidence-based research.
Audience: Undergraduate

ENVIR ST 202 – CAREERS IN THE ENVIRONMENT
2 credits.

Explores the varied career opportunities for environmental professionals. Features discussions with environmental professionals, supplemented with in-class training on job hunting and professional preparation.
Requisites: None
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate your own unique skills and strengths as they relate to professional development
Audience: Undergraduate

2. Compare and distinguish diverse career opportunities related to the environment and sustainability
Audience: Undergraduate

3. Identify the core concepts, courses, and areas of training that are required in differing environmental sectors and jobs
Audience: Undergraduate

4. Communicate and present your training and abilities in a professional manner
Audience: Undergraduate

ENVIR ST 203 – SPECIAL TOPICS IN ENVIRONMENTAL STUDIES
1-3 credits.

Specific topics will vary, within the scope of environmental studies.
Requisites: None
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Explain concepts fundamental to environmental studies
Audience: Undergraduate

2. Recognize interdisciplinary perspectives in environmental studies
Audience: Undergraduate

3. Demonstrate reading, writing, and communication skills
Audience: Undergraduate

ENVIR ST/ENTOM 205 – OUR PLANET, OUR HEALTH
3 credits.

An introduction to the multiple determinants of health, global disease burden and disparities, foundational global health principles, and the overlap between ecosystem stability, planetary boundaries, and human health. Explore the core fundamentals of global health scholarship, including but not limited to infectious disease, sanitation, and mental health, and also consider ecological perspectives on these issues through the lens of planetary boundaries. Attention is placed on how human-mediated global change (e.g. climate change, biodiversity loss, land-use patterns, geochemical cycling, agricultural practice) impacts human health and the ecosystem services we depend on. An overview of pertinent issues in sustainability science and planetary health discourse, including the 'Anthropocene' and resilience to understand and critically assess global trends.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Use a local to global perspective to assess the historical, current and future trends in human health and well-being
Audience: Undergraduate

2. Describe the use of planetary boundaries to measure Earth system sustainability and the potential impacts of instability in these systems on global health and human well being
Audience: Undergraduate

3. Describe current primary global health challenges, their distribution, and prevention strategies
Audience: Undergraduate

4. Analyze global health disparities through a social justice and human rights lens
Audience: Undergraduate

5. Demonstrate a basic understanding of contemporary issues, problems, and controversies in global health through an interdisciplinary perspective that recognizes the complex relationships between social, economic, political, and environmental systems.
Audience: Undergraduate

6. Analyze ecological perspectives on the connections among human health and well being, animal health, and ecosystem health
Audience: Undergraduate

7. Assess and reflect on the successes and failures of global health interventions and become familiar with current events and current literature that describes these efforts
Audience: Undergraduate

8. Reflect on personal goals, objectives, and role as a global citizen and future professional or researcher
Audience: Undergraduate

ENVIR ST/GNS 210 – CULTURES OF SUSTAINABILITY: CENTRAL, EASTERN, AND NORTHERN EUROPE
3 credits.

Exploration of the ideals and realities of sustainability in Central, Northern and East European contexts. Cultural, historical, environmental and other perspectives on sustainability on a local and global scale.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of culture in Central, Eastern and North (CEN) European by demonstrating a humanistic understanding of sustainability.
Audience: Undergraduate

2. Apply sustainability principles and/or frameworks to addressing the challenge of working respectfully with stakeholders from different cultural, geographic, and political backgrounds to sustain culture in Central, Eastern and North (CEN) European contexts
Audience: Undergraduate

3. Analyze the causes of and solutions for the sustainability challenge of culture in Central, Eastern and North (CEN) European contexts.
Audience: Undergraduate

4. Analyze sustainability issues and/or practices using a systems-based approach.
Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of culture in Central, Eastern and North (CEN) European contexts using a humanistic approach and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Undergraduate

6. Use sustainability principles for developing personal goals and professional values.
Audience: Undergraduate

ENVIR ST/HIST SCI 213 – GLOBAL ENVIRONMENTAL HEALTH: AN INTERDISCIPLINARY INTRODUCTION
3 credits.

Provides an introduction to the intersections of health and environment on a global scale. Exposes students to a range of problems in global environmental health, including climate change, disease ecology, and the globalization of disease.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the utility of humanistic methods for the study of global environmental health
Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis
Audience: Undergraduate

3. Understand essential developments in the evolving relationship between the environment and public health on a global scale.
Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of global health issues in developing and industrialized countries
Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of climate change, agriculture, and the built environment and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Undergraduate

ENVIR ST 215 – SUSTAINABILITY
3 credits.

An introduction to the dynamic and emerging transdisciplinary field of sustainability. A broad survey of the global sustainability science challenges and their potential solutions using an integrated social-environmental systems approach. Applies a sustainability and systems thinking lens to various topics, such as complexity, resilience, ecological literacy, global climate change, economics, food systems, energy, sustainable development, and social equity. Facilitates the exploration of complex interrelationships among contemporary environmental, social, and economic problems and the solutions to support more sustainable systems. Focuses on the skills, knowledge, and attitudes to implement sustainable practices and to enact sustainable development through sustainability science and education.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Social Science or Natural Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Define sustainability as it relates to science and education.
Audience: Undergraduate

2. Learn about the economic, social, and environmental aspects of sustainability and some frameworks for defining and measuring progress toward more sustainable systems.
Audience: Undergraduate

3. Be knowledgeable about the major sustainability challenges and opportunities in local and global systems.
Audience: Undergraduate

4. Gain an understanding of systems thinking and how we can use systems thinking to help solve sustainability problems.
Audience: Undergraduate

5. Review sustainable development goals and strategies to support best practices in sustainability initiatives.
Audience: Undergraduate

6. Identify and apply sustainability principles to assess natural, social, and physical systems.
Audience: Undergraduate

ENVIR ST/GEOG/SOIL SCI 230 – SOIL: ECOSYSTEM AND RESOURCE
3 credits.

Soils are fundamental to ecosystem science. A systems approach is used to investigate how soils look and function. Topics investigated include soil structure, biology, water, fertility, and taxonomy as well as the human impact on the soil environment.
Requisites: Not open to students with credit for SOIL SCI 301
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the significance of soil and its properties

Audience: Undergraduate

2. Identify and describe key components of soil solids and pores
Audience: Undergraduate

3. Explain and predict the interaction of water with soil
Audience: Undergraduate

4. Interpret basic nomenclature used in soil science
Audience: Undergraduate

5. Analyze that causes and solutions for sustainability of soil resources
Audience: Undergraduate

6. Quantify the interaction of clay surfaces with a soil solution
Audience: Undergraduate

7. Describe the role of soils in many different ecosystems
Audience: Undergraduate

8. Link soil orders with biomes and describe soil's edaphic character
Audience: Undergraduate

9. Analyze sustainability issues using a systems-based approach
Audience: Undergraduate

ENVIR ST/ART HIST/GEOG/HISTORY/LAND ARC 239 – MAKING THE AMERICAN LANDSCAPE
3-4 credits.

Traces the history and evolution of the American cultural landscape from precolonial times to present. Explores how class, ethnic, and racial inequality have shaped the appearance of the American landscape over time, and how that landscape in turn has affected relationships between people and groups through the present day. Examines extraordinary things (civic structures (like our State Capitol), National Parks, War Memorials) and more ordinary kinds of places (mining towns, cotton plantations, sites of recreation and leisure, and suburban tract housing) to stimulate critical thinking about how these places have served people and groups unequally and disproportionately over time and across space. Considers complex meanings of American spaces and places to different people and groups, stimulating empathy and encouraging participation in a multicultural society.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe and interpret the American landscape as a richly layered historical document mediated by complex relationships between people and groups
Audience: Undergraduate

2. Explain how the American cultural landscape has affected present day circumstances regarding ethnicity and race as well as racial and ethnic inequalities
Audience: Undergraduate

3. Articulate ways in which historical change manifest in buildings, enclosed spaces, and other elements of the American landscape reveal racial, ethnic, class and gender dynamics between and among people and groups over time
Audience: Undergraduate

4. Enlist forms of historical evidence – maps (current and historic), photographs (aerial and otherwise), historical newspapers, census records, deeds and land records – to interpret landscapes and landscape change
Audience: Undergraduate

5. Explain the American landscape as a product of competing interests, which will demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others
Audience: Undergraduate

ENVIR ST/A A E 244 – THE ENVIRONMENT AND THE GLOBAL ECONOMY
4 credits.

The "economic way of thinking" about global and regional environmental issues. Topics include climate change, biodiversity preservation, ocean fisheries, environmental impacts of international trade, poverty and the environment, and sustainability.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate knowledge of economic concepts to think critically about relationships between economic activity and global environmental challenges ranging from climate change to biodiversity loss.

Audience: Undergraduate

2. Use appropriate tools to analyze how governmental policies affect the use and conservation of natural resources.
Audience: Undergraduate

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of balancing healthy global economies with environmental quality.
Audience: Undergraduate

4. Analyze the causes of and solutions for the sustainability challenges of maintaining environmental quality and healthy economies.
Audience: Undergraduate

ENVIR ST 251 – ECOLOGY AND THE GLOBAL ENVIRONMENT
3 credits.

Ecology is the study of relationships in the natural world, many of which are increasingly being altered by human activities. These disruptions modify the environment on a global scale, affecting populations and communities of plants, animals, and other organisms, and making Earth increasingly inhospitable for life, including for humans. Explore the natural world and humans' role within it, as both instigators and managers of global environmental change.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Articulate the fundamental ideas and concepts underlying the field of ecology
Audience: Undergraduate

2. Understand the causes, consequences, and outlook of the major global environmental issues in the context of ecological science
Audience: Undergraduate

3. Appreciate the role of science, politics, economics, and community engagement in the practice of environmental management and conservation
Audience: Undergraduate

4. Explain the environmental dimensions of the sustainability challenge of food production in the face of increasing habitat loss and degradation
Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of worldwide biodiversity declines
Audience: Undergraduate

ENVIR ST/ILS 255 – INTRODUCTION TO SUSTAINABILITY SCIENCE
4 credits.

Explore the foundations of sustainability using the UW-Madison campus as a living laboratory. Ground your feet on the UW-Madison campus and ask questions about the energy we use, the food we eat, the air we breathe, the land we occupy, the goods we purchase, and the waste we create. A blend of environmental sciences and studies. Use principles of chemistry, physics, and biology to understand the dynamics of our human and earth systems, but also explore societal issues like public health and social justice, all through the context of sustainability and the UW-Madison campus community.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify drivers of climate change and describe effects both locally and globally
Audience: Undergraduate

2. Explain sustainability as depicted in models of the Triple Bottom Line
Audience: Undergraduate

3. Explain the sustainability challenges of operating a large public research institution, making connections from local to national and global contexts
Audience: Undergraduate

4. Analyze top-down versus bottom-up approaches to addressing sustainability issues on our campus and in the wider world
Audience: Undergraduate

5. Describe the intersection of sustainability goals with issues relating to communities of color and First Nations communities, particularly in Dane County and Wisconsin
Audience: Undergraduate

6. Value the human and natural capital necessary to sustain our life support systems on this planet
Audience: Undergraduate

ENVIR ST/BOTANY/ZOOLOGY 260 – INTRODUCTORY ECOLOGY
3 credits.

The relationships of organisms and the environment. Population dynamics and community organization, human-environment relationships, action programs.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop a conceptual framework for ecosystem processes and patterns with humans integral to it.
Audience: Undergraduate

2. Describe how humans interact with nonhuman ecosystem elements.
Audience: Undergraduate

3. Explore how ecological science can help resolve modern environmental problems.
Audience: Undergraduate

4. Integrate new ideas from international and interdisciplinary perspectives on the environment.
Audience: Undergraduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of protecting ecosystems.
Audience: Undergraduate

6. Analyze the causes of and solutions for the sustainability challenge of protecting biodiversity.
Audience: Undergraduate

ENVIR ST/RELIG ST 270 – THE ENVIRONMENT: RELIGION & ETHICS
3-4 credits.

What are sources on which members of religious communities draw in order to understand and address environmental change? Explores how religious persons and communities confront global environmental questions and challenges today, with case studies drawn from culturally and religiously plural societies such as India and Indonesia. Introducing diverse varieties of Christianity, Islam, and Hindu and Buddhist systems, gives overview of some approaches in the environmental humanities related to philosophy, history, sociology and anthropology, and ethics.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026

ENVIR ST/ENGL 305 – RHETORIC, SCIENCE, AND PUBLIC ENGAGEMENT
3 credits.

Focuses on theoretical and practical aspects of public engagement with scientific research, policy, and management, with an emphasis on writing, rhetoric, and scientific discourse.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Assess theoretical and practical aspects of public engagement with scientific research, policy, and management.
Audience: Undergraduate

2. Situate the practice and use of rhetoric, writing, and/or literacy in social, historical, political, material, and personal circumstances.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENVIR ST/AMER IND 306 – INDIGENOUS PEOPLES AND THE ENVIRONMENT
3 credits.

Indigenous peoples often have very close relationships to ancestral homelands, species and natural resources. However, definitions of "indigenous" can be controversial and highly politicized. Diverse outlooks on identities, worldviews and environmental governance clarify the complex meanings of indigeneity in the US. Highlights American Indian perspectives, conservation practices, and policy environments through consideration of US and international case studies. American Indian experiences shed light on pressing issues of resource sustainability and sovereignty, and demonstrate linkages to global Indigenous environmental issues and strategies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify diverse Indigenous experiences of and relationships to landscapes
Audience: Undergraduate

2. Recognize that American Indian and Global Indigenous identities are inextricably linked with the environment
Audience: Undergraduate

3. Analyze how American Indian and Global Indigenous histories and epistemologies have been marginalized
Audience: Undergraduate

4. Evaluate relationships between local Wisconsin and global Indigenous environmental issues
Audience: Undergraduate

5. Reflect on personal, family, and cultural identity
Audience: Undergraduate

6. Explore outside of cultural and academic comfort zones
Audience: Undergraduate

7. Practice global citizenry skills, i.e. cultural communications and protocols
Audience: Undergraduate

8. Critique American Indian stereotypes, exploring subtle versus overt racism
Audience: Undergraduate

9. Synthesize diverse approaches to addressing global environmental issues
Audience: Undergraduate

10. Demonstrate skills in articulating these concepts in multi-media formats
Audience: Undergraduate

11. Recognize contributions of indigenous perspectives and actions to environmental resource protection and management
Audience: Undergraduate

12. Articulate different perspectives on how indigenous identities are defined in academia and lived in indigenous communities

ENVIR ST 307 – LITERATURE OF THE ENVIRONMENT: SPEAKING FOR NATURE
3 credits.

19th and 20th century British and American literature.
Requisites: Sophomore, junior, or senior standing only
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate knowledge of major forms, techniques, social conditions, values, and genres in relation to the environments we live in.
Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods.
Audience: Undergraduate

3. Generate original ideas and texts, experimenting and taking risks, solving problems, and answering questions in a range of genres and media.

Audience: Undergraduate

4. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose.
Audience: Undergraduate

5. Develop empathy by learning about the experiences of others, and to gain an understanding of how we participate in communities (including the classroom) and the public sphere.
Audience: Undergraduate

ENVIR ST 308 – OUTDOORS FOR ALL: INEQUITIES IN ENVIRONMENTALISM
3 credits.

National parks, wilderness, and monuments that are set aside for recreational enjoyment are disproportionately underutilized by African Americans, Hispanics, Asians and Native Americans for reasons that are inextricably linked to past and present racial discrimination. Broadening access and participation in outdoor recreation requires a clear understanding of this history, as well as an appreciation of the continuing efforts by people of color to reassert their right to the outdoors. Gain a clear understanding of the sociocultural circumstances that have created disparities among the U.S. population in citizens' ability to access and enjoy public land and the efforts that aim to address them.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Recognize the racial divide between those who spend time in nature for their personal enjoyment and edification and those who do not
Audience: Undergraduate

2. Describe and explain the historic policies, legislation and customs that created an environment of systematic racial discrimination that prevented people of color in the United States of America from creating substantive relationships with the natural world equal to their white counterparts
Audience: Undergraduate

3. Describe and discuss the experiences of specific people of color over the past 100 years of American history who, despite the circumstances of racial discrimination at the time, excelled at creating adventurous experiences and lifestyles
Audience: Undergraduate

4. Recognize, summarize, and analyze the ways that institutions and organizations have prevented under represented members of our society from enjoying experiences in the outdoors and contributing to the long-term preservation of the natural world, as well as the ways they can be used to encourage and support broader access and participation
Audience: Undergraduate

5. Based on their understanding of past discriminatory practices, be able to analyze, formulate, and defend improved policies and social systems that will encourage diversity, equity and inclusion in the management of public land and the interpretation of our shared natural history
Audience: Undergraduate

ENVIR ST/GEOG 309 – PEOPLE, LAND AND FOOD: COMPARATIVE STUDY OF AGRICULTURE SYSTEMS
3 credits.

Introduction to how and why humans have transformed natural landscapes around the world, including tropical deforestation. Exploration of different agricultural systems, and topics such as food security, land scarcity, bioenergy and the impacts of food production on the environment.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026

ENVIR ST/ZOOLOGY 315 – LIMNOLOGY-CONSERVATION OF AQUATIC RESOURCES
2 credits.

General limnology. Physical, chemical and biological characteristics and processes of lakes. Environmental problems and rehabilitation of lakes.
Requisites: (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

ENVIR ST 317 – COMMUNITY ENVIRONMENTAL SCHOLARS PROGRAM SEMINAR
1 credit.

Provides opportunities for students in the Community Environmental Scholars Program to analyze the connections among environmental issues and community engagement. Requires work with community-based environmental and/or sustainability-related organizations. Student cohorts design and lead classes and projects and have opportunities to host guest speakers and environmental leaders. Emphasizes the professional skills needed to work effectively individually, in teams, in internships, and in professional positions.
Requisites: Junior or senior standing only
Course Designation: Core GenEd - Natural Science & Wellness
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Apply environmental knowledge from outside course work and assigned course reading to develop and lead in-class activities appropriate for classmates from interdisciplinary backgrounds.
Audience: Undergraduate

2. Utilize community engagement literature as a resource for current and future professional practice.
Audience: Undergraduate

3. Document, analyze and reflect on your personal contributions to environmental-related volunteer work, service learning project, and personal actions.
Audience: Undergraduate

4. Demonstrate professional communication skills useful in applying for employment or graduate school.
Audience: Undergraduate

5. Demonstrate interpersonal and professional skills in collaboration and organization while working in classroom teams and in service projects in the community.
Audience: Undergraduate

ENVIR ST/ATM OCN/GEOG 322 – POLAR REGIONS AND THEIR IMPORTANCE IN THE GLOBAL ENVIRONMENT
3 credits.

Reviews the past, present, and future of the Arctic and Antarctic regions. Covers the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and future state of the Arctic and Antarctica as projected by earth system models. Also explores the role of the polar regions in the earth's system and associated global climatic feedbacks.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and the future state of the Arctic and Antarctic Regions.
Audience: Both Grad & Undergrad

2. Explain the major theories and concepts of the Arctic and Antarctic regions.
Audience: Both Grad & Undergrad

3. Identify how interactions occur between the major components of each polar region and their influence on global processes and climate.
Audience: Both Grad & Undergrad

4. Recognize the need for multi-disciplinary research to further our understanding of the polar regions and their role in the global system.
Audience: Both Grad & Undergrad

5. Integrate thesis or dissertation research directly or indirectly with polar processes research, thereby gaining better insight into Arctic and Antarctic regions.
Audience: Graduate

ENVIR ST/SOIL SCI 324 – SOILS AND ENVIRONMENTAL QUALITY
3 credits.

Interaction of soils with environmental contaminants and the role of soils in pollution control.
Requisites: CHEM 104, 109, 116, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain and illustrate the functions of soil resources in food production
Audience: Both Grad & Undergrad

2. Identify, and summarize the connections between the soil resource and the water cycle, with special attention to its roles in water quality control, groundwater recharge, and flood buffering
Audience: Both Grad & Undergrad

3. Identify and summarize the role of soils in carbon sequestration and waste management
Audience: Both Grad & Undergrad

4. Integrate and analyze the effect of human activities on soil properties and its functions in the agricultural system, water cycling, carbon sequestration, and waste management
Audience: Both Grad & Undergrad

5. Identify, monitor and revise the policies, programs, projects, and other activities intended to protect and bolster the functions of the soil resource

Audience: Both Grad & Undergrad

6. Develop critical reading skills to understand environmental issues and design/plan effective management practices
Audience: Graduate

ENVIR ST 326 – SUSTAINABILITY TOOLS: SYSTEMS THINKING & LIFE CYCLE ASSESSMENT
3 credits.

Explores fundamentals of systems thinking and how to apply a systems-based approach to understanding and addressing sustainability issues ranging from climate change to environmental racism. Systems content is complemented with foundational skills in life cycle assessment (LCA), an inherently systems-based application of sustainability science that considers the full measure of resources used and waste created throughout the cradle-to-grave supply chain of a product or process. Life cycle and systems-based approaches are used to characterize both human and natural systems in local and global contexts. These approaches also will be integrated with sustainability concepts including the triple bottom line, industrial ecology, and the circular economy. Concepts include: life cycle stages, supply chains, stocks, flows, feedback loops, and unintended consequences.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Natural Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze sustainability issues and/or practices using a systems-based approach.
Audience: Undergraduate

2. Use sustainability principles for developing personal goals and professional values.
Audience: Undergraduate

3. Explain life cycle and systems thinking approaches to addressing sustainability issues while evaluating their utility compared with alternative or traditional approaches to problem solving.
Audience: Undergraduate

4. Apply systems thinking concepts such as stocks, flows, and feedback loops to specific contexts ranging from local campus systems to global systems.
Audience: Undergraduate

5. Characterize the life cycle stages for a product system or process and quantify the relevant inputs and outputs at each stage.
Audience: Undergraduate

6. Determine the goal, scope, and relevant functional unit for a life cycle assessment and evaluate the environmental sustainability of a system by interpreting a life cycle assessment on a product or process.
Audience: Undergraduate

7. Connect the sustainability-related aspects of campus-based systems to local, national, and global contexts.
Audience: Undergraduate

8. Evaluate the role that life cycle assessment and systems thinking can have in addressing sustainability concepts such as (1) the triple bottom line, (2) industrial ecology, and (3) the circular economy.
Audience: Undergraduate

ENVIR ST/HISTORY 328 – ENVIRONMENTAL HISTORY OF EUROPE
3 credits.

Explores a new approach to a part of the world with a very old history, but one that is now as 'modern' as any. The changing, complex relations between Europeans and their environments from antiquity to the twenty-first century offer instructive comparison with American and current global environmental concerns. Approaching Mediterranean and Western civilizations from an environmental viewpoint also offers fresh perspective on these enduring cultures.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Define historical questions concerning the human understanding of and impact on past environments in Europe.
Audience: Undergraduate

2. Identify pertinent types of evidence to study past interactions between humans and their environments in Europe, while assessing their advantages and disadvantages.
Audience: Undergraduate

3. Evaluate the evidentiary and theoretical bases, and areas for further investigation, in ongoing scholarly and public debates about Europe's environmental history.
Audience: Undergraduate

4. Describe the variety of natural environments, cultures, and processes of historical change in Europe.
Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of the conservation of natural resources.
Audience: Undergraduate

6. Analyze the social, political, and environmental dimensions of the sustainability of natural resources, biodiversity, clean air and water, and other, larger earth systems.
Audience: Undergraduate

ENVIR ST/GEOG 331 – ENERGY JUSTICE
3-4 credits.

What would a just energy transition look like? How might a shift from fossil fuels to low-carbon energy sources connect to questions around social justice, environmental racism, democracy, and anticolonialism? Energy systems are not just technical systems: they are also social, political, environmental, and spatial systems, intimately connected to our everyday lives. That means that changes to our energy systems - from fossil fuels to low-carbon energy sources, in how and where we extract and generate energy, and to the processes of energy decision-making - have far-ranging effects. Examines our shifting energy geographies through the frameworks of energy justice, asking how we might think socially and spatially about decarbonization, electrification, and energy access in a moment of climate crisis.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Explain the technical, sociopolitical, economic, environmental, and spatial dimensions of different energy resources.
Audience: Both Grad & Undergrad

2. Describe core concepts in the energy social sciences, such as energy justice, energy democracy, and energy poverty.
Audience: Both Grad & Undergrad

3. Describe the socio-political institutions that govern energy systems and the energy justice impacts of energy policies.
Audience: Both Grad & Undergrad

4. Discuss how energy decisions are impacted by environmental, technical, sociopolitical, and spatial factors.
Audience: Both Grad & Undergrad

5. Identify energy justice and policy work across scales, from the local to the global.
Audience: Both Grad & Undergrad

6. Pose a research question, conduct research, and write a compelling argument on an energy-related topic.
Audience: Undergraduate

7. Pose an advanced research question, review peer-reviewed literature, and write a compelling argument on an energy-related topic.
Audience: Graduate

ENVIR ST/ATM OCN/GEOG 332 – GLOBAL WARMING: SCIENCE AND IMPACTS
3 credits.

Offers a fundamental understanding of how and why global warming is happening and what to expect in the future. Investigate and discuss the evidence for change, the science that explains these observations, predicted impacts on humans and ecosystems, and the societal debate over proposed solutions.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the physical basis by which CO2 and other greenhouse gases control atmospheric temperatures.
Audience: Undergraduate

2. Explain the trends and drivers of historical and future climate change using a combination of observational data, climate model simulations, and hands-on exercises with a simple layer model.
Audience: Undergraduate

3. Summarize the global carbon cycle, its major reservoirs and fluxes, and the role of natural and anthropogenic processes.
Audience: Undergraduate

4. Apply concepts of climate feedbacks and climate sensitivity both qualitatively and quantitatively.
Audience: Undergraduate

5. Discuss and evaluate impacts of anthropogenic emissions on the physical climate system, ecosystems, and human development.
Audience: Undergraduate

6. Evaluate current and proposed strategies for climate mitigation, adaptation, and geoengineering.
Audience: Undergraduate

ENVIR ST/GEOG 333 – GREEN URBANISM
3 credits.

Over half of the world's population now lives in urban areas, with an expected increase of 2.5 billion people in the next 30 years. As urbanization (broadly defined as the conversion of previously undeveloped lands into urbanized uses) continues and intensifies, we are faced with a number of environmental issues, for instance, fragmentation and destruction of habitats, and decreased air and water quality. Explore how urbanization impacts ecological processes and resulting environmental outcomes, strategies for "designing with nature," and behavioral, planning, and policy responses to urban environmental problems.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe ecological processes as they relate to urbanization
Audience: Undergraduate

2. Describe the social, economic, and environmental dimensions of sustainable communities and identify potential trade-offs and interrelationships among these dimensions
Audience: Undergraduate

3. Analyze the causes of and solutions for the sustainability challenge of sustainable cities and communities
Audience: Undergraduate

4. Analyze local plans for sustainability strategies
Audience: Undergraduate

5. Identify strategies that cities can employ in preparing for the effects of the changing climate
Audience: Undergraduate

ENVIR ST/ATM OCN/GEOG/GEOSCI 335 – CLIMATIC ENVIRONMENTS OF THE PAST
3 credits.

Climate change at timescales from the last several million years to the last 100 years, with emphasis on more recent timescales. Examines how climate variability arises from interplay between external forcings, feedbacks within the earth system, and (more recently) human activity.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the major climatic events and trends during the Quaternary, spanning timescales from the last 50,000,000 years to the last 100 years.
Audience: Undergraduate

2. Identify the physical processes controlling the behavior of the earth system and its components (atmosphere, oceans, cryosphere, biosphere, etc.).
Audience: Undergraduate

3. Discuss how climatic variability results from a combination of external forcings and internal dynamics within the earth system.
Audience: Undergraduate

4. Recognize how paleoclimatologists collect, date, and analyze a staggering variety of paleoclimatic records, including ocean and lake sediment cores, ice cores, tree rings, corals, and speleothems.
Audience: Undergraduate

5. Analyze and critically evaluate climate experiments that are simulated by earth system models.
Audience: Undergraduate

6. Think and write critically, with particular attention to critically reading the scientific literature and critically employing the climate proxies and models used by paleoclimatologists.
Audience: Undergraduate

ENVIR ST/GEOG 336 – INTERNATIONAL ENVIRONMENTAL GOVERNANCE
3 credits.

Examines the challenges and limitations of international environmental governance. Explore governance through international law and conventions, activism, market mechanisms, foreign investment, and emerging corporate accountability practices. Considers new social and environmental complaint mechanisms and the growing role of reputational risk in shaping corporate behavior. Critically discusses and debates various aspects of international environmental governance.
Requisites: Sophomore standing
Course Designation: Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No

ENVIR ST/GEOG 337 – NATURE, POWER AND SOCIETY
3 credits.

Explores the links between nature, power and society in today's world. Considers the complex relationships between humans and the earth's resources, including food, energy, physical materials, water, biota, and landscapes. Examines issues linked to population and scarcity, resource tenure, green consumerism, political economy, environmental ethics, risks and hazards, political ecology, and environmental justice.
Requisites: Sophomore standing. Not open to students with credit for ENVIR ST 112
Course Designation: Core GenEd - Social & Behavioral Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe key elements that link nature, power, and society.
Audience: Undergraduate

2. Explain the social, economic, and/or environmental dimensions of the sustainability challenges regarding a range of important policy issues with environmental and sustainability implications.
Audience: Undergraduate

3. Apply sustainability principles and/or frameworks to address the challenges associated with a range of development issues that have environmental implications.
Audience: Undergraduate

4. Analyze the causes of and solutions for sustainability challenges of various development policy decisions.
Audience: Undergraduate

ENVIR ST/GEOG 339 – CONSERVATION AND CLIMATE CHANGE - LOCAL TO INTERNATIONAL STRATEGIES
3-4 credits.

Takes a geographical perspective to studying conservation, considering both the physical and social dimensions of environmental problems to develop more effective solutions. Analyzing major debates in conservation reveals how values and institutions shape environmental priorities and strategies. Case material comes from around the world and covers a range of issues, from environmental justice to elephants, but throughout the course there is special emphasis on biodiversity loss and climate change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the role of values, ecology, and institutions in shaping environmental threats and conservation strategies.
Audience: Both Grad & Undergrad

2. Analyze the history of conservation thought and action in the United States.
Audience: Both Grad & Undergrad

3. Examine the uneven distribution of environmental harms both globally and within the U.S. and how this is affected by race, class, and geography.
Audience: Both Grad & Undergrad

4. Evaluate the strengths and limits of rule-based and incentive-based conservation programs.
Audience: Both Grad & Undergrad

5. Recognize the key challenges and opportunities for biodiversity conservation in the tropics.
Audience: Both Grad & Undergrad

6. Summarize the evolution of domestic and international policy to address climate change.
Audience: Both Grad & Undergrad

7. Evaluate local efforts to adapt to climate change.
Audience: Both Grad & Undergrad

8. Produce an actionable analysis of an environmental issue of interest to the graduate student that integrates the social and biophysical dimensions of the issue.
Audience: Graduate

ENVIR ST/AMER IND 341 – INDIGENOUS ENVIRONMENTAL COMMUNICATORS
3 credits.

Native Nations show leadership globally in addressing major environmental issues. Indigenous languages describe deep relationships with the natural world, including information on environmental stewardship - harvesting, caretaking and reciprocity. Indigenous scholars contribute crucial perspectives to conversations about human relationships to the Earth - cultural relationships to wildlife and plants, and the ethical and practical roles of humans in socio-ecological systems. Focuses on indigenous environmental scholarship, including the ongoing legacy of oral traditions, developing research, writing, and public speaking skills.
Requisites: Satisfied Communications A and sophomore standing, or graduate/professional standing
Course Designation: Core GenEd - Civics & Perspectives
Comm QR - Communication B
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Engage in protocols for learning with Tribes, including Elder epistemology and active listening
Audience: Undergraduate

2. Identify styles of indigenous environmental writing and communications from throughout the US and the world
Audience: Undergraduate

3. Summarize major theories and research findings in the field of environmental writing
Audience: Undergraduate

4. Demonstrate skills in articulating Indigenous environmental concepts in multimedia formats
Audience: Undergraduate

5. Engage in critical reading and the use of evidence
Audience: Undergraduate

6. Apply appropriate style and disciplinary conventions in writing and speaking
Audience: Undergraduate

7. Use core library resources specific to indigenous studies, environmental studies, and environmental communications
Audience: Undergraduate

8. Hone writing, public speaking, and library research skills
Audience: Undergraduate

9. Analyze how Native American and Global Indigenous histories and epistemologies have been marginalized
Audience: Undergraduate

10. Critique Native American stereotypes, exploring subtle versus overt racism
Audience: Undergraduate

11. Articulate different perspectives on how indigenous identities are defined in academia and lived in indigenous communities
Audience: Undergraduate

12. Engage in effective and respectful thinking and expression

ENVIR ST/A A E/ECON 343 – ENVIRONMENTAL ECONOMICS
3-4 credits.

Microeconomic principles underlying the use of natural resources such as air, water, forests, fisheries, minerals and energy. These principles are applied in the examination of pollution control, preservation vs. development, deforestation, and other environmental issues.
Requisites: A A E 101 (215 prior to Fall 2024), ECON 101, or 111
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand why environmental problems occur in a market-based economy.
Audience: Undergraduate

2. Identify market-based environmental policies to address market failures.
Audience: Undergraduate

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of pollution control.
Audience: Undergraduate

4. Apply sustainability principles and/or frameworks to addressing the challenge of optimizing the use of scarce resources over time.
Audience: Undergraduate

ENVIR ST/AMER IND/GEOG 345 – CARING FOR NATURE IN NATIVE NORTH AMERICA
3 credits.

Surveys the concepts, practices, and issues associated with caring for nature in American Indian communities.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Interpret the diverse arrangements for tribal sovereignty, indigenous landtenure, and claims to natural resources and the environment.
Audience: Undergraduate

2. Illustrate natural resource and environmental issues important to bothAmerican Indians and Wisconsin Indians.
Audience: Undergraduate

3. Identify similarities and differences between indigenous knowledge systemsand Western Science.
Audience: Undergraduate

4. Discuss the marked cultural and natural diversity across native NorthAmerica.
Audience: Undergraduate

5. Recall the many different conceptions of place, nature, and development innative North America.
Audience: Undergraduate

6. Describe the diversity of American Indian experiences and their variedresponses to assorted histories of exclusion and marginalization.
Audience: Undergraduate

7. Demonstrate an awareness of history's impact on the present.
Audience: Undergraduate

ENVIR ST 349 – CLIMATE CHANGE GOVERNANCE
3 credits.

Climate change is being felt, and addressed, at every level of society, from the individual to the global scale. Examine efforts to mitigate climate change. Learn about initiatives that are being implemented through international treaties; national, state, and municipal government policies; corporate programs; and individual behavior. Examine the advantages and disadvantages of each approach, their successes, and the obstacles they have faced. Evaluate various forms of climate activism as a means of pushing for meaningful action on climate change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze different initiatives used in addressing climate change, from the international to the personal scale, and the success or failure of these initiatives.
Audience: Undergraduate

2. Critically evaluate climate change mitigation initiatives, placing them into their social, political, economic, and cultural contexts.
Audience: Undergraduate

3. Articulate deep understandings of the pros and cons of various mitigation efforts.
Audience: Undergraduate

4. Demonstrate creativity in evaluating and designing climate change governance approaches.
Audience: Undergraduate

5. Delve into the justice issues surrounding both climate change and proposed ways to mitigate it.
Audience: Undergraduate

6. Explore an area of particular personal interest within climate change governance.
Audience: Undergraduate

ENVIR ST/ATM OCN 355 – INTRODUCTION TO AIR QUALITY
3 credits.

Links chemistry and meteorology to engineering, law, policy, and public health. Presents key ideas in air quality, with focus on reactive pollutants in the outdoor environment, especially gas and particle phase chemicals that react with human tissue to cause sickness and death. Discusses environmental impacts of these pollutants and regulatory approaches for their control in the U.S. and around the world. Indoor air quality will be included. Non-reactive pollutants, especially carbon dioxide, will be compared and contrasted with reactive air pollutants.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Build basic understanding of atmospheric pollutants affecting health, visibility, ecosystems, climate, and the ozone hold.
Audience: Undergraduate

2. Develop skills in analyzing air pollution data and related information, with a focus on evaluating and presenting original research on an air pollution episode of choice.
Audience: Undergraduate

3. Consider a single issue – air quality – from multiple disciplinary perspectives, including atmospheric science, engineering, policy, economics, and chemistry.
Audience: Undergraduate

ENVIR ST/F&W ECOL/ZOOLOGY 360 – EXTINCTION OF SPECIES
3 credits.

A comprehensive treatment of the ecology, causes, and consequences of species extinction. Ecology and problems of individual species, habitat alteration and degradation, socio-economic pressures and conservation techniques and strategies.
Requisites: Sophomore standing and ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), BIOLOGY/BOTANY 130, or (BIOCORE 381 and 382)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the ecological and evolutionary processes shaping the distribution of species diversity globally
Audience: Undergraduate

2. Explain how human activities can threaten species with extinction
Audience: Undergraduate

3. Identify genetic problems and management in small populations
Audience: Undergraduate

4. Discuss social and political dimensions to conservation problems and solutions
Audience: Undergraduate

5. Identify the basic components of the US Endangered Species Act (ESA) and how the ESA has been applied to the conservation of species
Audience: Undergraduate

6. Evaluate and create conservation strategies for at-risk species
Audience: Undergraduate

ENVIR ST/LAND ARC 361 – WETLANDS ECOLOGY
3 credits.

Types, origins, settings, and structure of wetlands. Physical, biological, and cultural values, uses and assessments. Physical and biological characteristics and dynamics. Protection, management and restoration.
Requisites: (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY 153, (BIOCORE 381 and 382), BIOLOGY/BOTANY 130, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain what a wetland is and describe the attributes (physical and biological) currently used to classify wetlands.
Audience: Both Grad & Undergrad

2. Explain why which attributes are included in a definition matters with regard to wetland conservation
Audience: Both Grad & Undergrad

3. Describe the global distribution of wetlands and explain how the geomorphological features of the earth, its orbit, as well as the properties of its atmosphere contribute to this distribution.
Audience: Both Grad & Undergrad

4. Identify and describe the physical characteristics and dynamics of water, how these influence biogeochemical cycles and how they all influence the morphology, physiology, and behavior of wetland organisms.
Audience: Both Grad & Undergrad

5. Describe the hydrology and soils, and the characteristic plants and animals of the major Wisconsin wetland types and their geographical locations.
Audience: Both Grad & Undergrad

6. Apply the contemporary theories, concepts, and understanding of wetland ecology to their own research projects, and/or to evaluating and suggesting solutions to a contemporary issue regarding the preservation, restoration, or management of wetlands.
Audience: Graduate

ENVIR ST 365 – SYSTEMS THINKING
3 credits.

Focuses on the concepts and practices used to define systems while providing opportunities to build competencies with systems thinking to describe, assess, understand, and manage complexity from local to global scales. Considers a range of topics, including systems science, complexity, behavior of adaptive systems, networks, emergence, and patterns of organization. Develops skills to analyze how the design and implementation of integrated systems can contribute to solutions for pressing societal challenges. Examines social, physical, and natural systems, the rise of complexity, and achieving resilience in social-ecological systems. Examines the components of systems and analyzes how different ecological and social contexts influence system behavior. Explores and analyzes how decisions ramify to influence processes and outcomes at different levels of complexity.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Natural Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define a system and explain the structure, behavior, and functionality of systems, including the characteristics and interconnections among environmental, social, and economic systems.
Audience: Undergraduate

2. Define and identify common patterns of systems.
Audience: Undergraduate

3. Use a variety of systems thinking tools to model various natural, physical, and social systems.
Audience: Undergraduate

4. Explain sustainability in terms of design and systems.
Audience: Undergraduate

5. Value the importance of understanding causality in problem solving and strategic thinking.
Audience: Undergraduate

6. Use a holistic approach and systems thinking tools to diagnose complex problems in natural and physical systems.
Audience: Undergraduate

7. Identify biotic and abiotic aspects of systems as stocks and flows of energy and matter within and between organizational levels.
Audience: Undergraduate

8. Explain and analyze how the management of natural and physical systems influences ecological and social processes.
Audience: Undergraduate

9. Solve systemic problems using logic and reasoning by identifying and differentiating the strength and value of information, evidence, and approaches related to the management and sustainability of social, physical, and natural systems.
Audience: Undergraduate

ENVIR ST/BSE 367 – RENEWABLE ENERGY SYSTEMS
3 credits.

Learn about the state-of-the-art in renewable energy applications including biomass for heat, electric power and liquid fuels as well as geo-energy sources such as wind, solar, and hydro power. Practice engineering calculations of power and energy availability of renewable energy sources and learn about requirements for integrating renewable energy sources into production, distribution and end-use systems.
Requisites: MATH 112, 114, 217, placement into MATH 221, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Calculate energy and power production for renewable energy systems
Audience: Both Grad & Undergrad

2. Determine renewable resource availability and impact on energy infrastructure
Audience: Both Grad & Undergrad

3. Design and assess the technical and economic feasibility of renewable energy systems
Audience: Both Grad & Undergrad

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of renewable energy systems.
Audience: Both Grad & Undergrad

5. Produce comprehensive renewable energy project analysis.
Audience: Graduate

ENVIR ST/HISTORY 369 – THINKING THROUGH HISTORY WITH ANIMALS
3-4 credits.

Explores the history of human relationships with animals around the world with focus on agriculture and hunting, political economic development, human identity, and biological science and conservation.
Requisites: Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze the roles of animals in shaping human identity
Audience: Undergraduate

2. Describe and apply key concepts in animal and environmental history to analyze changing patterns of social organization
Audience: Undergraduate

3. Integrate humanities and natural science perspectives to understand the interplay of nature and society in shaping history
Audience: Undergraduate

4. Connect changing relationships among humans and animals to broader processes of economic and cultural development
Audience: Undergraduate

ENVIR ST/G L E/GEOG/GEOSCI/LAND ARC 371 – INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING
3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.
Requisites: (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate understanding of major theories, approaches, concepts, and methods in remote sensing science.
Audience: Undergraduate

2. Apply knowledge of the nature and properties of electromagnetic radiation and how it is affected by interactions with the atmosphere and the Earth's surface.
Audience: Undergraduate

3. Utilize the techniques, skills, and modern tools necessary for monitoring environmental phenomena with earth observation data.
Audience: Undergraduate

4. Know and effectively apply image analysis, data extraction, and map-making using earth observation data.
Audience: Undergraduate

5. Demonstrate how to analyze remote sensing data using photo-interpretation, digital image processing, and photogrammetric techniques using specialized software, within geographic information systems (GIS), and in conjunction with other data sources.
Audience: Undergraduate

6. Demonstrate how to perform classification, change detection, data fusion, and radiometric and geometric correction techniques.
Audience: Undergraduate

7. Identify and appropriately utilize data types from the optical, thermal, and microwave portions of the electromagnetic spectrum, and from a wide range of airborne and satellite platforms, including high (>5 m), medium (10-30 m), and coarse (250-1000 m) spatial resolution imagery.
Audience: Undergraduate

8. Demonstrate knowledge about environmental applications of remote sensing data, such as forest inventory, water resource management, agricultural assessment, land use planning, and global change science.
Audience: Undergraduate

9. Write clear and concise laboratory reports (in scientific format) describing analytical results from image classification and change detection experiments.
Audience: Undergraduate

10. Communicate effectively through discussion, small group work, hands-on lab activities, and written reports.
Audience: Undergraduate

ENVIR ST 375 – FIELD ECOLOGY WORKSHOP
3 credits.

Hands-on field study for intensive study of behavior of plants and animals and their relationship to environments and human impacts. Individual and group observations, measurements, interpretation, reports, typing personal experience with specifics to basic principles.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2023

ENVIR ST/CIV ENGR/GEOG 377 – AN INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS
4 credits.

Design, implementation and use of automated procedures for storage, analysis and display of spatial information. Covers data bases, information manipulation and display techniques, software systems and management issues. Case studies.
Requisites: Sophomore standing, member of Engineering Guest Students, or declared in Capstone Certificate in GIS Fundamentals
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the basic structures, concepts, and theories of GIS.
Audience: Both Grad & Undergrad

2. Conduct daily routines of GIS operations.
Audience: Both Grad & Undergrad

3. Make connections to the broader literature in GIS
Audience: Graduate

ENVIR ST 398 – INDEPENDENT STUDY: SUSTAINABILITY COMMUNITY ENGAGEMENT
1 credit.

Provides an opportunity to learn about community engagement and link sustainability concepts to working with a community organization. Declared in the Sustainability Certificate or Environmental Studies Major.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply knowledge of sustainability through volunteering within a local, national, or international community
Audience: Undergraduate

2. Understand the role of civic engagement in furthering sustainability
Audience: Undergraduate

ENVIR ST 399 – DIRECTED STUDY
1-3 credits.

Independent work in environmental studies overseen by a qualified instructor.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Conduct and report on independent environmental studies research under the guidance of a qualified instructor
Audience: Undergraduate

2. Develop researchable Environmental Studies questions
Audience: Undergraduate

3. Appropriately utilize online and library resources
Audience: Undergraduate

ENVIR ST 400 – SPECIAL TOPICS IN THE ENVIRONMENT: BIOLOGICAL ASPECTS OF ENVIR ST
1-4 credits.

Topics covered within the scope of the environmental biological sciences, such as conservation biology, environmental ecology, issues in ethnobotany and tropical ecology, environmental health, ecotoxicology, biodiversity, endangered resources, biological systems analysis, and field studies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENVIR ST 401 – SPECIAL TOPICS: ENVIRONMENTAL PERSPECTIVES IN THE PHYSICAL SCIENCES
1-4 credits.

Topics covered within the scope of the physical environmental sciences, such as issues in energy resources, environmental measurement and analysis, modeling, remote sensing and GIS, environmental engineering and transportation, air and water resources, and global climate change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENVIR ST 402 – SPECIAL TOPICS: SOCIAL PERSPECTIVES IN ENVIRONMENTAL STUDIES
1-4 credits.

Topics covered within the scope of environmental social sciences, such as issues in environmental policy, law, economics, land use, sustainability, food systems, energy policy, conflict resolution, environmental justice, and international development.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENVIR ST 403 – SPECIAL TOPICS IN ENVIRONMENTAL STUDIES
1-3 credits.

Specific topics will vary, within the scope of environmental studies.
Requisites: Sophomore standing
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Explain concepts related to the environment.
Audience: Undergraduate

2. Apply interdisciplinary perspectives to the study of environmental issues.
Audience: Undergraduate

3. Demonstrate reading, writing, communication, and research skills.
Audience: Undergraduate

ENVIR ST 404 – SPECIAL TOPICS IN ENVIRONMENTAL HUMANITIES
1-3 credits.

Topics covered within the scope of environmental humanities, such as themes in environmental ethics, literature, art, film, aesthetics and design, history, and indigenous knowledge.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Explain social and historical processes that impact our current environments. Interpret the meanings, values, and aesthetics that are created, shaped, and revealed as humans interact with and modify the environments they inhabit.
Audience: Undergraduate

ENVIR ST/C&E SOC/CURRIC 405 – EDUCATION FOR SUSTAINABLE COMMUNITIES
3 credits.

How can education - for children and adults, in school and out - help to address crucial environmental and social sustainability challenges? What ideas and strategies have guided environmental and sustainability education over the years? What can individual people do to address environmental challenges, and what can only be accomplished by people working together? What does sustainability have to do with justice - and vice versa? Examine the principles behind behavior change and empowerment, community action and whole-scale social reform. Drawing on research and theory from across the social sciences, we will explore the uncertain relationship between education and advocacy, seeking the means by which education can have the greatest impact without compromising the core ideals of a democratic society.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain and apply the complicated and controversial idea of sustainability
Audience: Undergraduate

2. Articulate a clear definition of education that goes beyond schools and classrooms
Audience: Undergraduate

3. Analyze factors that influence individuals' decisions about sustainability-related action
Audience: Undergraduate

4. Describe how social structure and social context shapes sustainability-related action, and describe how some factors relevant to sustainability can only be seen and changed at the community level
Audience: Undergraduate

5. Identify educational strategies that can be used to make change at the individual and community level, and understand the advantages and limitations of different educational perspectives
Audience: Undergraduate

6. Explain how and why some environmental projects come at the expense of poor, minoritized and otherwise vulnerable groups of people
Audience: Undergraduate

ENVIR ST/GEOSCI 411 – ENERGY RESOURCES
3 credits.

A critical examination of the full spectrum of renewable and nonrenewable energy options, from the unifying perspective of the Earth systems that govern their use. Energy conversion and efficiency, consumption patterns and trends, and environmental consequences of energy production and use.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain the origins of both renewable and non-renewable energy resources.
Audience: Both Grad & Undergrad

2. Explain the dependency of energy resources on natural and geologic processes.
Audience: Both Grad & Undergrad

3. Describe how changing technology impacts energy resource utilization.
Audience: Both Grad & Undergrad

4. Analyze and interpret the constraints and negative consequences of renewable and non-renewable energy resources.
Audience: Both Grad & Undergrad

5. Discuss how energy use has changed since the industrial revolution and how evolving energy use impacts the climate and environment.
Audience: Both Grad & Undergrad

6. Evaluate relevant scientific literature related to energy resources.
Audience: Graduate

ENVIR ST 413 – PRESERVING NATURE
3 credits.

Understand the theory and practice the skills of effective, scientific, ethical, and legitimate preservation of nature (biodiversity, the atmosphere, water, etc.). Learn from global lessons in how to intervene against threats to nature, and the roles of ethics, law, and research in preserving nature. Gain mastery of terminology and usage so as to communicate professionally about nature preservation.
Requisites: Sophomore standing or ZOOLOGY/BOTANY/ENVIR ST 260
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate understanding of the environmental provisions in national constitutions and U.S. co-sovereign federal-state-tribal governance as these relate to environmental protection.
Audience: Undergraduate

2. Display mastery of the fundamentals of biodiversity and the atmosphere, and what human activities threaten extinction, climate change, and water quality.
Audience: Undergraduate

3. Summarize the ethical and legal roles – of the public, civil society activist organizations, legislatures, executive branches, the judiciary, and public scholars – in preserving and impairing nature.
Audience: Undergraduate

4. Communicate professionally about effective conservation practice and scientific integrity.
Audience: Undergraduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of preserving nature for future generations.
Audience: Undergraduate

6. Analyze the causes of and solutions for the sustainability challenge of preserving nature for future generations.
Audience: Undergraduate

ENVIR ST 417 – SUSTAINABILITY SCIENCE, TECHNOLOGY AND POLICY
1 credit.

Analyze the concept of sustainability through current trends, including energy, air and water resources, agriculture, environmental measurement and analysis, modeling, remote sensing, Geographic Information Systems, the built environment, transportation, ecology, conservation and global climate change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Natural Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply a simple physical model to evaluate sustainability claims from a wide range of sectors, including agriculture, energy, water, land use and conservation.
Audience: Undergraduate

2. Explain how economic, social and cultural factors that don't explicitly involve matter or energy can also affect environmental sustainability.
Audience: Undergraduate

3. Produce thoughtful written work that integrates guest lectures, readings, other texts and/or current events related to environmental sustainability.
Audience: Undergraduate

4. Analyze sustainability issues and/or practices using a systems-based approach.
Audience: Undergraduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of climate change, water scarcity, land and water degradation, energy use and biodiversity loss.
Audience: Undergraduate

ENVIR ST/HISTORY/LEGAL ST 430 – LAW AND ENVIRONMENT: HISTORICAL AND CONTEMPORARY PERSPECTIVES
3 credits.

Explores environmental studies through a focus on law and legal history. Although its main concentration is on U.S. environmental law, the course will begin and end with broader historical and global perspectives. Topics include a survey of English, European, and early American legal approaches to land use, natural resources, and pollution through World War II as well as an examination of the development and practice of contemporary U.S. environmental law and consideration of the recent emergence of international environmental law.
Requisites: Sophomore standing
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and articulate their own arguments about how social, political, and cultural phenomena shape law and legal systems.
Audience: Both Grad & Undergrad

2. Analyze and articulate their own arguments about the social, political, and cultural impacts of law at the societal and individual levels.
Audience: Both Grad & Undergrad

3. Demonstrate knowledge about how legal ideas and ideologies have changed over time and have shaped law and legal systems.
Audience: Both Grad & Undergrad

4. Demonstrate their abilities to find, interpret, and utilize resources relevant to law and society.
Audience: Both Grad & Undergrad

5. Demonstrate their abilities to analyze information, to write clearly and persuasively, and to construct original arguments.
Audience: Both Grad & Undergrad

6. Analyze the causes of and solutions for the sustainability challenge of the conservation of natural resources, especially insofar as their governance involves and impacts local stakeholders.
Audience: Both Grad & Undergrad

7. Analyze the social, economic, legal, political, and environmental dimensions of the sustainability challenge of regulating and governing biodiversity, clean air and water, and other, larger earth systems (such as climate).
Audience: Both Grad & Undergrad

8. Demonstrate an advanced understanding of the historiography or other scholarly debates that have shaped the study of conservation and environmental law.
Audience: Graduate

ENVIR ST/GEOG/URB R PL 431 – PLANNING FOR RESILIENCE TO NATURAL HAZARDS
3 credits.

Provides a theoretical background and practical approaches to planning to increase community resilience to natural hazards. Examines why some communities bounce back quicker from disasters than others. Explores institutional contexts relevant to natural hazards and topics such as the disaster cycle, structural and non-structural approaches to natural hazard mitigation, and physical and social vulnerability to natural hazards.
Requisites: GEOSCI/ATM OCN 140 or sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Describe the cycle of activities that surround planning and responding to natural disasters.
Audience: Undergraduate

2. Recognize the principles of building community resilience to natural hazards.
Audience: Undergraduate

3. Identify various planning approaches to addressing natural hazards.
Audience: Undergraduate

4. Recognize the institutional context within which natural hazard mitigation and recovery planning occurs.
Audience: Undergraduate

5. Identify and analyze which communities and which community members might be more vulnerable to natural hazards.
Audience: Undergraduate

6. Improve their written and oral communication skills.
Audience: Undergraduate

ENVIR ST/C&E SOC/GEOG 434 – PEOPLE, WILDLIFE AND LANDSCAPES
3 credits.

Explores the relationship between humans and wildlife amid diverse landscapes, both historic and contemporary, tropical and temperate. Investigates how humans shape wild animal populations by modifying physical environments, and by hunting, domesticating and introducing species.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Compare and evaluate the three types of social research in terms of how they engage with biodiversity conservation.
Audience: Both Grad & Undergrad

2. Differentiate attitudes, values and norms and explain why sociologists suggest norm change is the best path to changing human environmental behavior.
Audience: Both Grad & Undergrad

3. Analyze shifts in attitudes to wildlife among the public in the U.S. and in Global South settings.
Audience: Both Grad & Undergrad

4. Analyze the social and political factors shaping popular explanations for wildlife decline and human-wildlife conflict.
Audience: Both Grad & Undergrad

5. Organize evidence to guide policy makers how to reduce wildlife loss or how to resolve conflicts with wildlife including invasive species.
Audience: Both Grad & Undergrad

6. Improve professional writing and speaking skills.
Audience: Both Grad & Undergrad

7. Practice measuring attitudes toward wildlife.
Audience: Graduate

ENVIR ST/GEOG 439 – US ENVIRONMENTAL POLICY AND REGULATION
3-4 credits.

Covers a broad cross-section of American environmental policy by focusing on specific statutes and policy arenas. Surveys the basic elements of American environmental policy and regulation with a particular focus on the specific people, sites and scales at which environmental decision-making happens through primary-source case material. Maintains a dual focus on (a) the legal and regulatory aspects of environmental regulation and (b) the specific geographic and social features of actual cases in which regulations and policy are used. Understanding environmental outcomes in a complex society depends on observing both the structure of regulations and the geographic and social context in which such regulations emerge.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. dentify the spectrum of major U.S. environmental regulations, including the Clean Water Act, the Clean Air Act, the Endangered Species Act, CERCLA, and regulations involving environmental justice, climate change, and market environmentalism.
Audience: Both Grad & Undergrad

2. Discuss the specialized language of environmental policy and regulation.
Audience: Both Grad & Undergrad

3. Identify, through current case material, how these policies manifest in our daily interactions with the environment and government.
Audience: Both Grad & Undergrad

4. Describe the social and environmental background to each policy debate using critical and geographic viewpoints often adopted by social scientists.
Audience: Both Grad & Undergrad

5. Write long-form reports synthesizing regulatory issues with reportage on a major environmental policy issue.
Audience: Graduate

ENVIR ST/PHILOS 441 – ENVIRONMENTAL ETHICS
3-4 credits.

Adequacy of ethical theories in handling such wrongs as harm to the land, to posterity, to endangered species, and to the ecosystem itself. Exploration of the view that not all moral wrongs involve harm to humans. Inquiry into the notion of the quality of life and the ethics of the "lifeboat" situation.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Examine an array of moral questions related to the environment.
Audience: Undergraduate

2. Explain some of the key positions taken by philosophers related to environmental philosophy.
Audience: Undergraduate

3. Critically evaluate philosophical arguments.
Audience: Undergraduate

ENVIR ST/CIV ENGR/G L E/GEOSCI 444 — PRACTICAL APPLICATIONS OF GPS SURVEYING
2 credits.

Global positioning system surveying for field applications. Signals. Coordinate systems. Datums. Cartographic projections. Satellite orbits. Choosing hardware. Strategies for data collection and analysis. Assessing uncertainty. Geocoding satellite images. Integrating data with Geographic Information Systems. Emerging technologies.
Requisites: MATH 211, 217, 221, or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the current abilities, future potential, and limiting factors of GPS surveys.
Audience: Both Grad & Undergrad

2. Assess the tradeoff between accuracy and cost.
Audience: Both Grad & Undergrad

3. Summarize examples of applications of GPS surveying.
Audience: Both Grad & Undergrad

4. Design and implement a small field project using GPS surveying.
Audience: Both Grad & Undergrad

5. Assess quantitatively statistical precision and calibrated accuracy.
Audience: Graduate

ENVIR ST/SPANISH 445 — CULTURE AND THE ENVIRONMENT IN THE LUSO-HISPANIC WORLD
3 credits.

Investigates how economy and culture work together, consuming and/or restoring their environments in divergent scenarios of the Hispanic World.
Requisites: (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. State the interconnectedness of culture, environment, and economy in the Hispanic world.
Audience: Undergraduate

2. Recognize various socio-environmental conflicts in Latin America.
Audience: Undergraduate

3. Examine various new socio-economic visions emerging aimed at improving human relationships with the environment in the Hispanic World.

Audience: Undergraduate

4. Describe how Latin American indigenous knowledges and values could help us rethink our culture and economy.
Audience: Undergraduate

ENVIR ST/ECON/POLI SCI/URB R PL 449 — GOVERNMENT AND NATURAL RESOURCES
3-4 credits.

Problems of public policy and administration for development and use of natural resources.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

ENVIR ST/GEOG/HISTORY 460 – AMERICAN ENVIRONMENTAL HISTORY
4 credits.

Survey of interactions among people and natural environments from before European colonization to present. Equal attention to problems of ecological change, human ideas, and uses of nature and history of conservation and environmental public policy.
Requisites: Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Discuss the basic questions posed by environmental history as a field and method for doing historical scholarship.
Audience: Both Grad & Undergrad

2. Evaluate the continuities and shifts between environmental politics, in relation to social and economic and racial formations and material conditions in U.S. history.
Audience: Both Grad & Undergrad

3. Communicate effectively about the relevance of the past to the environmental present through argumentative writing.
Audience: Both Grad & Undergrad

4. Assess foundational work in the historiography on environmental history.
Audience: Graduate

ENVIR ST/HISTORY 465 – GLOBAL ENVIRONMENTAL HISTORY
3-4 credits.

Explores the history of human relationships with the environment on a global scale through analysis of long-term changes, from early civilizations, to the beginnings of global trade, the Industrial Revolution, urbanization, and 20th century technological developments. Offers first-hand historiographical research experience and training in writing for public web audiences.
Requisites: Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define “the Anthropocene” and evaluate different approaches for dating and naming this new “human age”
Audience: Both Grad & Undergrad

2. Analyze the intersections of multiple historical socio-natural processes – such as extraction, colonialism, racism, capitalism, agriculture, industrialization, and modernization—to explain the production of uneven development and environmental crises
Audience: Both Grad & Undergrad

3. Document and analyze aspects of modern life that will be “modern fossils” in the distant future
Audience: Both Grad & Undergrad

4. Explain the importance of historical analysis for understanding contemporary environmental problems
Audience: Both Grad & Undergrad

5. Apply historical methods to analyze how a material object of their choice illustrates a particular interpretation of the Anthropocene
Audience: Both Grad & Undergrad

6. Assess significant works in the historiography of global environmental history and interdisciplinary Anthropocene studies
Audience: Graduate

ENVIR ST/POP HLTH 471 – INTRODUCTION TO ENVIRONMENTAL HEALTH
3 credits.

Impact of environmental problems on human health; biological hazards to human health from air and water pollution; radiation; pesticides; noise; problems related to food, occupation and environment of the work place; accidents. Physical and chemical factors involved.
Requisites: Junior standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the principles and practice of environmental health.
Audience: Undergraduate

2. Describe environmental health and its history as a crucial aspect of the history of public health
Audience: Undergraduate

3. Describe the U.S. and world health status and issues as background framework to environmental health.
Audience: Undergraduate

4. Describe a brief introduction to the public health research methodologies including epidemiology and toxicology.
Audience: Undergraduate

5. Describe crucial infectious and non-infectious disease principles as necessary to understand issues in environmental health.
Audience: Undergraduate

ENVIR ST/CLASSICS 488 – GREEKS, ROMANS AND THE NATURAL ENVIRONMENT
3 credits.

Examine ways in which the ancient Greeks and Romans interacted with their Mediterranean environments and the various conceptions of the natural world that they developed in poetry, prose and visual art. Explore a number of general topics that will underpin the course as a whole: the characteristics of the Mediterranean environment, the effect of nature on humankind, and the impact of humankind on nature. Study aspects of Greek and Roman engagements with nature, such as agriculture, hunting, sacrifice, the contested relationship between the natural and the civilized, and representations of human beings using terms drawn from the natural world ("bears" of Artemis, cannibalistic "wolves"). Consider how these aspects of the ancient world relate to modern treatments of such themes. (NB: All Greek and Latin texts will be read in English translation.)
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of Classical societies and cultures.
Audience: Both Grad & Undergrad

2. Examine, analyze, and interpret ancient texts in translation.
Audience: Both Grad & Undergrad

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.
Audience: Both Grad & Undergrad

4. Carry out and present the results of in-depth research into aspects of the modern and ancient worlds.
Audience: Graduate

5. Develop an extended scholarly argument in written form.
Audience: Graduate

6. Reflect on modern environmental issues in light of ancient experiences and thought.
Audience: Both Grad & Undergrad

7. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of the over-exploitation of natural resources.
Audience: Both Grad & Undergrad

8. Analyze the causes of and solutions for the sustainability challenges of human-caused climate change, pollution and other forms of environmental harm.
Audience: Both Grad & Undergrad

ENVIR ST/POP HLTH 502 – AIR POLLUTION AND HUMAN HEALTH
3 credits.

Toxicologic, controlled and epidemiologic studies on major air pollutants. Overview of study methods, lung physiology and pathology; air pollution sources, types, meteorology, sampling methods, controls and regulations.
Requisites: Junior standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the health science of air pollution's effect on human health.
Audience: Both Grad & Undergrad

2. Describe air pollution and its history as a crucial aspect of the history of environmental health.
Audience: Both Grad & Undergrad

3. Describe the U.S. and world health status and issues from air pollution.
Audience: Both Grad & Undergrad

4. Describe a brief introduction to the public health research methodologies and science including epidemiology and toxicology, risk assessment and the lungs.
Audience: Both Grad & Undergrad

5. Describe the detailed scientific and policy information on indoor and outdoor air pollutants.
Audience: Both Grad & Undergrad

6. Describe the science and policy solutions for air pollution and human health issues.
Audience: Graduate

ENVIR ST/ZOOLOGY 510 – ECOLOGY OF FISHES
3 credits.

Interactions of fishes with their physical, chemical, and biotic environment; physiological ecology, community ecology and fisheries sciences. Lake Mendota perch fishery and Shedd Aquarium field trips.
Requisites: (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use facts to guide conceptual thinking and hypothesis tests about ecological systems.
Audience: Undergraduate

2. Draw upon aspects of fish evolution, ecology, and conservation to produce an integrated perspective.
Audience: Undergraduate

3. Summarize the diversity of fishes on Earth, including phylogenetic and geographic patterns.
Audience: Undergraduate

4. Analyze the relationship between form and function of individual fish.
Audience: Undergraduate

5. Place fish in the context of the broader food web and ecological community.
Audience: Undergraduate

6. Describe the management and use of fish by human society.
Audience: Undergraduate

7. Describe the conservation challenges faced by fish now and in the future.
Audience: Undergraduate

8. Write clear, concise scientific reports both individually and in teams.
Audience: Undergraduate

9. Present effective, informative, and persuasive arguments in writing and orally.
Audience: Undergraduate

ENVIR ST/ZOOLOGY 511 – ECOLOGY OF FISHES LAB
2 credits.

Anatomy and taxonomy of Wisconsin fishes and projects in fish ecology.
Requisites: ZOOLOGY/ENVIR ST 510 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop, think about, and answer scientific questions like a fish ecologist.
Audience: Undergraduate

2. Identify different Wisconsin fishes based on their anatomy.
Audience: Undergraduate

3. Carry out a variety of fish field sampling, laboratory, and data analysis techniques.
Audience: Undergraduate

4. Communicate and write in a proper scientific format.
Audience: Undergraduate

ENVIR ST/F&W ECOL 515 – NATURAL RESOURCES POLICY
3 credits.

Examine natural resources policy and law in the United States relating to forests, wildlife, and other natural resources. Investigates the policy-making process and the role of science, values, property, economics, and justice in the development of federal and state resources policy. Practice professional written and oral communication and ethical engagement in resources policy and administration.
Requisites: Satisfied Communications A or graduate/professional standing
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Summarize the policy process, major federal and state laws, and decision-makers governing natural resources in the United States.
Audience: Both Grad & Undergrad

2. Analyze environmental policy and policy research drawing on the themes of values, economics, justice, and science and articulating policy implications for lay and professional audiences.
Audience: Both Grad & Undergrad

3. Differentiate the roles in policy development of different actors and their values and interests.
Audience: Both Grad & Undergrad

4. Apply advanced skills in professional communication through writing, speaking, logical thinking, persuasive rhetorical strategies to communicate with diverse audiences.
Audience: Both Grad & Undergrad

5. Evaluate and synthesize primary literature on natural resources policy to assess the influence of policy processes, legal frameworks, and stakeholder values on resource management, and effectively integrate these insights into policy development and communication strategies for diverse audiences.
Audience: Graduate

ENVIR ST/BOTANY/F&W ECOL/ZOOLOGY 516 – CONSERVATION BIOLOGY
3 credits.

Investigate the science behind the protection of nature and preservation of biodiversity by focusing on both the biological and socioeconomic factors that underlie the challenges to and the impacts of conservation efforts. Explore the theory, research, and application of biological conservation from an interdisciplinary, international, solutions-focused perspective. Learn about the many threats to Earth's biodiversity but also examine in-depth and apply approaches to overcome them.
Requisites: Satisfied Quantitative Reasoning (QR) A and ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Distinguish conservation biology from other scientific disciplines and describe its over-arching principles.
Audience: Both Grad & Undergrad

2. Articulate many reasons why the conservation of biological diversity (at many levels) is important.
Audience: Both Grad & Undergrad

3. Quantify biodiversity at the individual, population, and species level by applying various commonly used models and indices.
Audience: Both Grad & Undergrad

4. Explain orally and in writing the principal threats to biodiversity, to both scientific and layperson audiences (habitat loss and fragmentation; industrial agriculture; climate change; overexploitation; invasive species; pollution) and the specific biological effects of these threats.
Audience: Both Grad & Undergrad

5. Outline strategies to implement at the personal, local, and global scales for solving the biodiversity crisis.
Audience: Both Grad & Undergrad

6. Critically analyze, apply, and communicate recommendations for changing personal behaviors to mitigate the biodiversity and climate crises.
Audience: Both Grad & Undergrad

7. Assess the strengths and weaknesses of various conservation strategies or policy approaches.
Audience: Both Grad & Undergrad

8. Synthesize multiple investigations of conservation strategies to assess trade#offs and synergies among them.
Audience: Graduate

9. Make science#based recommendations for the appropriate conservation approach or strategy for a given situation.
Audience: Graduate

10. Manipulate quantitative data using multi-step arguments to evaluate, interpret, and express solutions to problems in biodiversity estimation, population monitoring, and genetics in the context of conservation.
Audience: Both Grad & Undergrad

ENVIR ST/ATM OCN 520 – BIOCLIMATOLOGY
3 credits.

How climate systems and biological organisms operate and interact at the global scale and the implications of this for climate change, ecosystem ecology and human land use.
Requisites: (ATM OCN 101, ENVIR ST/ATM OCN 171, or GEOG 323), (ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 102, BIOCORE 381, or 485), and junior standing, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Quantitatively analyze how ecosystem-relevant processes influence the climate system.
Audience: Both Grad & Undergrad

2. Evaluate spatiotemporal patterns of climate-relevant features that most affect organisms.
Audience: Both Grad & Undergrad

3. Critically interpret ongoing research on how the two interact with changing land use and climate.
Audience: Both Grad & Undergrad

4. Share skills and techniques in project management, advanced data analysis, interpretation, and graphing with classmates.
Audience: Graduate

ENVIR ST/PHILOS 523 – PHILOSOPHICAL PROBLEMS OF THE BIOLOGICAL SCIENCES
3 credits.

Problems raised by genetics, evolutionary theory, and taxonomy: patterns of explanatory force and dispensability of teleology; objectivity of taxonomy.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021

ENVIR ST/GEOG/LAND ARC/URB R PL 532 – APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN PLANNING
3 credits.

Explores planning-related Geographic Information System (GIS) data, applications, analytical tools, and implementation issues.
Requisites: GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify how planning agencies use GIS.
Audience: Both Grad & Undergrad

2. Explain the nature, characteristics, and possible ways of analyzing spatial data in a planning context.
Audience: Both Grad & Undergrad

3. Communicate geospatial data and analyses effectively.
Audience: Both Grad & Undergrad

4. Obtain and analyze geospatial data using a range of spatial analysis tools for a number of planning practices.
Audience: Both Grad & Undergrad

5. Conduct site-selection and land-suitability analysis.
Audience: Both Grad & Undergrad

6. Identify ethical issues surrounding access to and use of geospatial data.

Audience: Both Grad & Undergrad

7. Analyze and provide written feedback on undergraduate student presentations.
Audience: Graduate

8. Produce a memo on land-suitability analysis.
Audience: Graduate

ENVIR ST/ENGL 533 – TOPIC IN LITERATURE AND THE ENVIRONMENT
3 credits.

Explores the ways that literary texts represent, imagine, and re-imagine the environment.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and critique some of the ways that literary texts represent, imagine and re-imaging the environment.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

ENVIR ST/GEOG 534 – ENVIRONMENTAL GOVERNANCE: MARKETS, STATES AND NATURE
3 credits.

Covers real-world questions of how the environment is managed and governed through state policy, economics, and social institutions. Includes strategies within and outside of the formal institutions of government, and extends the discussion to the commodification of nature and the use of science to understand and govern the environment. Also includes case studies of environmental governance in water, carbon, species, and urban sustainability.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Explain the concepts of governance and the tools for its analysis.
Audience: Both Grad & Undergrad

2. Identify the tools, concepts, and controversies associated with market-based environmental governance and its origins in debates over the past century.
Audience: Both Grad & Undergrad

3. Discuss the variety of traditions in understanding the relationship between states, civil society, and the environment.
Audience: Both Grad & Undergrad

4. Describe and articulate connections and common themes in environmental governance as they are expressed in a variety of settings such as economic globalization, urban planning, water resource development, conservation, and climate change.
Audience: Both Grad & Undergrad

5. Discuss the scholarly literature around environmental governance, state theory, and neoliberalism.
Audience: Graduate

ENVIR ST/GEOG 537 – CULTURE AND ENVIRONMENT
4 credits.

Geographic approaches to culture-nature relationships, including human perception of, use of, and adaptation to the physical environment, with emphasis on traditional subsistence systems; selected topics from contemporary and historical sources.
Requisites: GEOG 359, ENVIR ST/GEOG 337, 339, 439, AMER IND/ENVIR ST/GEOG 345, or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop a cross-cultural perspective about environment-society relations.
Audience: Both Grad & Undergrad

2. Explain how certain conceptual frameworks for understanding culture-environmental relations developed in the social sciences and how these have affected conservation and development practice around the world.
Audience: Both Grad & Undergrad

3. Discuss the strengths and limitations of these frameworks for understanding the effect of human activities on the environment or in turn the effect of environmental change on human societies.
Audience: Both Grad & Undergrad

4. Identify the appropriate frameworks for analyzing particular culture-environment contexts and in so doing, be better placed to develop more effective conservation or development initiatives.
Audience: Both Grad & Undergrad

5. Apply an understanding of the strengths and weaknesses of different conceptual frameworks to develop a conceptual framing suitable for graduate research.
Audience: Graduate

ENVIR ST/C&E SOC/SOC 540 — SOCIOLOGY OF INTERNATIONAL DEVELOPMENT, ENVIRONMENT, AND SUSTAINABILITY
3 credits.

Sociological analysis of relationships among economic growth, environmental sustainability and social justice in the developing world. Considers frameworks for understanding poverty, hunger, educational and technological inequality, and the impact of globalization on prospects for socially and ecologically sustainable development.
Requisites: SOC 181, SOC/C&E SOC 140, 210, or 211
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Critically reflect on the complex meanings and basic histories of international development, globalization, and environment
Audience: Undergraduate

2. Critically reflect on the history of sustainability and how it mediates development, globalization, and environmental politics
Audience: Undergraduate

3. Demonstrate a deep understanding the sociology of international development, environment, and globalization
Audience: Undergraduate

4. Use social theoretical concepts for speaking about development, globalization, and environment
Audience: Undergraduate

ENVIR ST/CIV ENGR/LAND ARC 556 — REMOTE SENSING DIGITAL IMAGE PROCESSING
3 credits.

Techniques of enhancement and quantification of remote sensing imagery. Emphasis on processing and analyzing data gathered by airborne and satellite sensors. Techniques to quantitatively analyze data from photography, electro-optical scanners, satellite systems, and radar and passive microwave systems. Applications to: agriculture and forestry, geology and soils, water quality, and urban and regional planning.
Requisites: LAND ARC/ENVIR ST/G L E/GEOG/GEOSCI 371, graduate/professional standing, or member of Engineering Guest Students (or FW ECOL 371 prior to Summer 2026)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENVIR ST/GEOG 557 — DEVELOPMENT AND ENVIRONMENT IN SOUTHEAST ASIA
3 credits.

Examines the political, socio-cultural, economic and ecological aspects of contemporary development and human-environment relations in mainland Southeast Asia, applying a critical and theoretically informed perspective, and focusing largely on rural issues.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe key elements that link development and environmental issues in Southeast Asia.
Audience: Both Grad & Undergrad

2. Explain the social, economic, and/or environmental dimensions of the sustainability challenges regarding a range of important policy issues with environmental and sustainability implications.
Audience: Both Grad & Undergrad

3. Apply sustainability principles and/or frameworks to addressing the challenges associated with a range of development issues that have environmental implications.
Audience: Both Grad & Undergrad

4. Analyze the causes of and solutions for sustainability challenges of various development policy decisions.
Audience: Both Grad & Undergrad

5. Apply knowledge of development and environmental issues in Southeast Asia when conducting research.
Audience: Graduate

ENVIR ST/A A E/CIV ENGR/URB R PL 561 — ENERGY MARKETS
3 credits.

Energy resources are an essential element of the world's business, political, technical and environmental landscape. Analytic tools provided by the discipline of economics expands our understanding of this critical issue. Energy supply markets reviewed include both fossil fuels and renewable resources. Energy demand sectors include residential, commercial, industrial and transportation. Electricity represents an intermediate energy market. The interactions among these markets participants indicate how scarce resources are allocated among competing needs in the world economy.
Requisites: A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

ENVIR ST/SOIL SCI 575 – ASSESSMENT OF ENVIRONMENTAL IMPACT
3 credits.

Overview of methods for collecting and analyzing information about environmental impacts on agricultural and natural resources, including monitoring the physical environment and relating impacts to people and society.
Requisites: Junior standing
Course Designation: Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe various methods used for environmental assessment, particularly in the context of land use, resource extraction, and environmental pollution
Audience: Both Grad & Undergrad

2. Measure and evaluate environmental impacts and the effects of human activities on physical and biological resources, including soil, water, air, and biota
Audience: Both Grad & Undergrad

3. Explain the role of environmental impact statement laws and regulations in decision-making processes
Audience: Both Grad & Undergrad

4. Organize, analyze, and visualize environmental data spatially
Audience: Both Grad & Undergrad

5. Use models to understand complex interactions between natural systems and human activities
Audience: Both Grad & Undergrad

6. Analyze how environmental changes affect communities, health, and well-being
Audience: Both Grad & Undergrad

7. Evaluate the role of environmental assessment in policy-making, enforcement, and information dissemination
Audience: Both Grad & Undergrad

8. Analyze environmental data for trends and patterns
Audience: Graduate

9. Integrate data from multiple databases
Audience: Graduate

10. Critically evaluate environmental impact assessment methodologies
Audience: Graduate

ENVIR ST/LAND ARC 581 – PRESCRIBED FIRE: ECOLOGY AND IMPLEMENTATION
3 credits.

Covers the use of live fire in land management and provides a background in fire ecology, fire behavior, fire effects, and the prediction of fire behavior for wetland, prairie and savanna fuels. Instruction includes field training with live fire exercises and the use of fire management equipment. Participate in prescribed burns outside of scheduled class times. Confers certificates of completion that qualify an individual to participate on prescribed fire crews with public and private sector organizations.
Requisites: Junior standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand fire ecology, the role that fires play in shaping fire-adapted ecosystems, and the use of prescribed fire for land management.
Audience: Both Grad & Undergrad

2. Qualify for working on any prescribed burn or fire suppression crew located anywhere in the U.S., and become familiar with organizations providing experiences using prescribed fire.
Audience: Both Grad & Undergrad

3. Become familiar with the restoration history, including the role of fire, for the UW Arboretum.
Audience: Both Grad & Undergrad

4. Demonstrate safe and appropriate use of Protective Personal Equipment (PPE) for fire.
Audience: Both Grad & Undergrad

5. Demonstrate proficient knowledge of national standards for participating in prescribed burn or fire suppression crews anywhere in the U.S.
Audience: Both Grad & Undergrad

6. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of fire for land management.
Audience: Both Grad & Undergrad

7. Apply sustainability principles and/or frameworks to addressing the challenge and fundamental concepts related to fire ecology in the Upper Midwest.
Audience: Both Grad & Undergrad

8. Gain enhanced knowledge and skills for fire management leadership.
Audience: Graduate

9. Demonstrate applied knowledge of fire ecology and the effects of fire on plant, fungi or animal communities.
Audience: Graduate

ENVIR ST 600 – ENVIRONMENTAL STUDIES CAPSTONE
3 credits.

Interdisciplinary investigation with an emphasis on real world challenges. Examine environmental issues and apply, often in a team context, a variety of academic perspectives and methodologies, and cultivate academic and professional abilities such as establishing connections within the larger community, developing strategies for analyzing and addressing problems, developing field skills in ecosystems, and working with others trained in fields different from one's own.
Requisites: Junior or senior standing only
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Research environmental studies questions, both independently and in groups.
Audience: Undergraduate

2. Synthesize information across several environmental studies disciplines.

Audience: Undergraduate

3. Connect their research to broader aspects of environmental studies.
Audience: Undergraduate

ENVIR ST 613 – REPRODUCIBILITY CRISES AND OPEN SCIENCE IN ENVIRONMENTAL STUDIES
3 credits.

Why trust science? Examine critically the strengths and weaknesses of Western science in light of new efforts at overcoming the reproducibility crisis. Examine successes and failures in fostering open science focusing on ecological research in its broadest sense, although relevant to many fields of inquiry. In line with the mission of the Nelson Institute for Environmental Studies, take an interdisciplinary look at reproducibility and scientific integrity. Find out why and why not to rely on the scientific communications of individual researchers and interest groups that showcase their preferred evidence.
Requisites: Junior standing
Course Designation: Breadth - Natural Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Master the principles of open science and reproducibility for biological and social sciences.
Audience: Both Grad & Undergrad

2. Practice the concepts of open science in preparation for a career in research or research administration.
Audience: Graduate

3. Gain and practice skills in critical thinking about research design and scientific communication.
Audience: Both Grad & Undergrad

4. Integrate methods and ways of knowing from two or more fields of inquiry in social sciences and ecology.
Audience: Both Grad & Undergrad

5. Communicate professionally about effective open science practices, reproducibility, and scientific integrity.
Audience: Both Grad & Undergrad

6. Gain familiarity with retraction processes in scientific publication.
Audience: Both Grad & Undergrad

7. Practice critical close reading of scientific methods for the identification of bias or irreproducible methods
Audience: Graduate

8. Disentangle value-based from evidence-based reasoning.
Audience: Both Grad & Undergrad

ENVIR ST/A A E/ECON/URB R PL 671 – ENERGY ECONOMICS
3 credits.

The method, application, and limitations of traditional economic approaches to the study of energy problems. Topics include microeconomic foundations of energy demand and supply; optimal pricing and allocation of energy resources; energy market structure, conduct, and performance; macro linkages of energy and the economy; and the economics of regulatory and other public policy approaches to the social control of energy.
Requisites: Graduate/professional standing or (senior standing and ECON 101, 111, A A E 101, or 215 prior to Fall 2024)
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Understand fundamentals of energy sources and technologies.
Audience: Both Grad & Undergrad

2. Be familiar with microeconomic theory with applications to energy industries and markets.
Audience: Both Grad & Undergrad

3. Build analytical skills in economic analysis and be able to apply the economic thinking to historical and contemporary energy-related issues.
Audience: Graduate

4. Analyze the causes of and solutions for the sustainability challenge of affordable and clean energy.
Audience: Both Grad & Undergrad

5. Apply sustainability principles and/or frameworks to addressing the challenge of affordable and clean energy.
Audience: Both Grad & Undergrad

ENVIR ST 681 – SENIOR HONORS THESIS
3 credits.

Independent study for undergraduate students completing an Honors thesis in Environmental Studies.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2022

ENVIR ST 682 – SENIOR HONORS THESIS
3 credits.

Independent study for undergraduate students completing an Honors thesis in Environmental Studies.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2023

ENVIR ST 691 – SENIOR THESIS
1-3 credits.

Independent study for undergraduate students completing a thesis in Environmental Studies.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2018

ENVIR ST 692 – SENIOR THESIS
1-3 credits.

Independent study for undergraduate students completing a thesis in Environmental Studies.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2019

ENVIR ST/LAND ARC/SOIL SCI 695 — APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCES
3 credits.

Modern GIS desktop and web-based workflows, analyses, and visualizations related to natural resource and environmental planning issues and communication. Guest lectures from agency and industry professionals.
Requisites: LAND ARC 311, ENVIR ST/CIV ENGR/GEOG 377, or graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop and apply appropriate geospatial analysis workflows related to the study and conservation of natural resources.
Audience: Both Grad & Undergrad

2. Identify and evaluate sources of primary and secondary geospatial data.

Audience: Both Grad & Undergrad

3. Develop methods for collecting primary geospatial data
Audience: Both Grad & Undergrad

4. Communicate analytical results in visual and graphical forms.
Audience: Both Grad & Undergrad

5. Evaluate literature related to geospatial technologies in environmental science and natural resource issues.
Audience: Graduate

ENVIR ST 699 — DIRECTED STUDY
1-3 credits.

Independent work in environmental studies overseen by a qualified instructor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENVIR ST/CIV ENGR/URB R PL 717 — WATER RESOURCES MANAGEMENT PRACTICUM PLANNING SEMINAR I
1 credit.

The first of two seminars for planning the activities of the practicum.
Requisites: Declared in Water Resources Management MS or Doctoral Minor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENVIR ST/CIV ENGR/URB R PL 718 — WATER RESOURCES MANAGEMENT PRACTICUM PLANNING SEMINAR II
2 credits.

The second of two seminars for planning the field work, analysis, and reporting of the practicum.
Requisites: Declared in Water Resources Management MS or Doctoral Minor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

ENVIR ST/CIV ENGR/URB R PL 719 — WATER RESOURCES MANAGEMENT SUMMER PRACTICUM
4 credits.

Interdisciplinary team of students and staff working with agency personnel, citizen groups, and/or private sector representatives on the analysis of a contemporary, problem-oriented water resource issue. Physical, biological, economic and social aspects of the issue analyzed. Comprehensive written report results, practicum's findings and management recommendations.
Requisites: URB R PL/CIV ENGR/ENVIR ST 718
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

ENVIR ST/AGROECOL 724 – AGROECOSYSTEMS AND GLOBAL CHANGE
3 credits.

Impacts of global change drivers (climate change, atmospheric chemistry, bioenergy, urbanization, policy) on agroecosystems and their associated goods and services; environmental impacts of agricultural land use and feedbacks to climate; modeling approaches; critical review of current scientific literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain key physical, biological, and social drivers of change to agroecosystems on planet Earth
Audience: Graduate

2. Apply important biophysical and biological concepts to describe how a changing climate and changes in atmospheric composition impact agricultural systems
Audience: Graduate

3. Describe how agricultural land management impacts the Earth's climate system through changing biogeochemical cycling
Audience: Graduate

4. Discuss how agricultural land management impacts Earth's climate system through biogeophysical processes that effect energy and water balance in the soil-plant-atmosphere system
Audience: Graduate

5. Identify and summarize ecosystem services that are impacted by agroecosystems and land management decision-making, and how this effects global environmental sustainability
Audience: Graduate

ENVIR ST/POP HLTH 739 – CLIMATE CHANGE, HUMAN AND PLANETARY HEALTH
2 credits.

Provide tools to identify and address real-world global environmental health issues, stemming from climate change, habitat destruction leading to disease spillover events, food insecurity, and urban design.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize unique environmental public health challenges posed by climate change.
Audience: Graduate

2. Define the planetary boundaries and describe their links to human health.
Audience: Graduate

3. Define and Understand the Planetary Health framework and principles for systems-based approaches to risk management and health promotion.
Audience: Graduate

4. Learn and apply a Health in All Policies strategy to demonstrate the value of more comprehensive, cross-sector disease prevention programs.
Audience: Graduate

5. Critically analyze the linkages between physical and ecological conditions with human health and well-being, as well as exposure pathways through which impacts occur.
Audience: Graduate

6. Develop and exhibit effective risk and/or science communication strategies related to environmental health.
Audience: Graduate

ENVIR ST/ATM OCN 745 – METEOROLOGICAL SATELLITE APPLICATIONS
2-3 credits.

Use of satellite imagery and measurements in meteorological research and operations; orbital characteristics; navigation; instrumentation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENVIR ST/ATM OCN/GEOSCI/ZOOLOGY 750 – PROBLEMS IN OCEANOGRAPHY
3 credits.

Introduction to techniques used in the study of the biology, chemistry, geology, and physics of the marine environment.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. use satellite imagery and measurements in meteorological research and operations.
Audience: Both Grad & Undergrad

2. describe orbital characteristics, navigation, instrumentation and remote sensing techniques.
Audience: Both Grad & Undergrad

3. perform quantitative retrievals of atmospheric properties from active and passive measurement systems and rigorously assess accuracy.
Audience: Both Grad & Undergrad

4. share skills and techniques in analysis and interpretation with classmates.
Audience: Graduate

ENVIR ST/PUB AFFR/URB R PL 809 – INTRODUCTION TO ENERGY ANALYSIS AND POLICY
3 credits.

Strategy and policy problems in energy policy, both national and international.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

ENVIR ST/PUB AFFR/URB R PL 810 – ENERGY ANALYSIS AND POLICY CAPSTONE
3 credits.

Interdisciplinary application of energy knowledge to an analysis project for a real-world client. Integrate and apply technical, economic, political, and social factors in energy decision-making.
Requisites: Declared in Energy Analysis and Policy Graduate/Professional Certificate or Doctoral Minor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Conduct an original analysis by collecting and interpreting data on an energy-related issue for areal-world client.
Audience: Graduate

2. Integrate and apply multiple disciplinary perspectives such as technical, economic, socio-political, and environmental factors in the context of complex energy problems.
Audience: Graduate

3. Prepare for energy-related careers by: planning and managing a project over multiple months; interacting professionally with client; working effectively in multidisciplinary teams; and producing professional-quality deliverables such as presentations and reports in accordance with scope of work.
Audience: Graduate

4. Analyze the causes and solutions for the sustainability challenge of affordable and clean energy.
Audience: Graduate

5. Analyze sustainability issues and/or practices using a systems-based approach.
Audience: Graduate

ENVIR ST 812 – SUSTAINABILITY CAPSTONE
3 credits.

Conduct research and promote solutions to real-world sustainability problems. Collaborate on a team project which must effectively integrate transdisciplinary research to address sustainability initiatives in diverse systems. With a systemic lens, work with the instructor, peers, and community partners to drive the content of the course. Through interactive class activities, reflect, share, and discuss the processes being used to complete capstone projects.
Requisites: Declared in Sustainability Graduate/Professional Certificate
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Identify and define contemporary sustainability issues and be able to articulate the importance of sustainability globally and locally.
Audience: Graduate

2. Define and utilize systems thinking to support more sustainable systems.
Audience: Graduate

3. Explain and be able to implement sustainable development goals and strategies to support best practices in sustainability initiatives.
Audience: Graduate

4. Examine real-world situations to analyze, synthesize, and propose solutions to sustainability problems that connect to social, environmental, and economic systems.
Audience: Graduate

5. Collaborate effectively and efficiently on multidisciplinary teams.
Audience: Graduate

ENVIR ST/JOURN/LSC 823 – SCIENCE AND ENVIRONMENT COMMUNICATION
3 credits.

Tracks the evolution of mass media coverage of science and the environment. Emphasis on how journalists utilize evidence, the influence of scientific and journalistic norms on stories, and the effects of mass media on science and environment messages to the public.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe theoretical perspectives relating to science and environmental communication, including a sampling of recent findings and current theoretical model
Audience: Graduate

2. Combine theory and methods to develop and evaluation science and environmental communication efforts
Audience: Graduate

3. Apply research theories and findings to contemporary problems in environmental and science communication
Audience: Graduate

4. Communicate complex environmental and science concepts with scientific and general audiences in oral and written forms
Audience: Graduate

ENVIR ST/URB R PL 843 – LAND USE POLICY AND PLANNING
3 credits.

Critical evaluation and analysis of land use policies and programs in relation to comprehensive planning and growth management issues in the U.S. The role of legislative and judicial processes and emerging public land use social values and philosophies in the development, regulation, and effectuation of innovative land use policies. Alternative land policy and growth guidance systems of select European countries.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze the historical, political, social, and economic dimensions of land use policy in the U.S. context.
Audience: Graduate

2. Analyze relationships between land use regulation and urban form
Audience: Graduate

3. Identify the various actors that participate in contemporary land use planning and policy in the U.S. context and the interests that motivate their involvement.
Audience: Graduate

4. Analyze the conflicts around land use and how planners participate in them.
Audience: Graduate

5. Evaluate the role of planning in the land development process.
Audience: Graduate

ENVIR ST/URB R PL 865 – WATER RESOURCES INSTITUTIONS AND POLICIES
3 credits.

Governmental processes and policies for water resources management: major substantive problems and issues; political processes of decision making; problems of governmental organization and intergovernmental arrangements.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe the historical and institutional dimensions of water resources planning, management, and policy.
Audience: Graduate

2. Summarize the overall U.S. water resources "institutional landscape"—the array of institutional arrangements that comprise our system for addressing water resource issues and problems—and relative strengths and weaknesses of various approaches and system components.
Audience: Graduate

3. Articulate the limitations of the existing water resources management framework, along with opportunities and strategies for reform, for addressing various substantive ecological water issues (e.g., watershed protection, restoration, and management; water allocation; groundwater; water quality and quantity; etc.).
Audience: Graduate

4. Identify and evaluate selected institutional and societal issues pertinent to water resources policy and management, including through an equity lens (e.g., integrated environmental collaborative watershed approaches, intergovernmental roles, program implementation, etc.).
Audience: Graduate

5. Evaluate institutional effectiveness in addressing and resolving water resource issues and problems management, collaborative watershed approaches, intergovernmental roles, program implementation, etc.).
Audience: Graduate

6. Apply sustainability principles and/or frameworks to addressing the challenges of water resource protection and restoration.
Audience: Graduate

7. Analyze sustainability issues and/or practices using a systems-based approach
Audience: Graduate

ENVIR ST/POLI SCI/PUB AFFR 866 – GLOBAL ENVIRONMENTAL GOVERNANCE
3 credits.

In-depth examination of the political and policy challenges posed by global environmental degradation. Analysis of international institutions for managing the global environment.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

ENVIR ST/A A E/POP HLTH/PUB AFFR 881 – BENEFIT-COST ANALYSIS
3 credits.

Presents the welfare economics underpinnings for evaluating the social benefits and costs of government activities. Issues such as uncertainty, the social discount rate, and welfare weights will be discussed; case studies from the environmental, social policy, and agricultural areas will be studied.
Requisites: Graduate/professional standing and (PUB AFFR 818 and 880), or POP HLTH/I SY E 875, or A A E 635
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the basic mechanics of performing a Cost Benefit Analysis, including methods for valuing costs and benefits, aggregating over time, and analyzing uncertainties.
Audience: Graduate

2. Evaluate the strengths and weaknesses of different CBAs and propose strategies to address any shortcomings.
Audience: Graduate

3. Debate the advantages and limitations of CBA for public policy and compare it to other approaches.
Audience: Graduate

4. Create a CBA for a real-world client from beginning to end, including scoping, background research, valuation of costs and benefits, uncertainty analysis, and interpretation.
Audience: Graduate

ENVIR ST 900 – SEMINAR
1-3 credits.

Special topics selected with each offering.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENVIR ST 901 – GRADUATE ORIENTATION SEMINAR
1 credit.

Introduction to the organizational structure, policies and practices of the Nelson Institute, with an emphasis on the opportunities and challenges of being a student in a cross-campus interdisciplinary program.
Requisites: Declared in the Environment and Resources or Water Resources Management graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENVIR ST 909 – PROFESSIONAL SKILLS IN ENERGY ANALYSIS AND POLICY
1 credit.

Discussion of professional skills important to interdisciplinary professionals in energy analysis and policy. Exploration of diverse career pathways and personal career development goals. Includes presentations from practitioners in public, private, and non-profit sectors.
Requisites: Declared in the Energy Analysis and Policy graduate/professional certificate
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Build understanding of personal career path.
Audience: Graduate

2. Gain awareness of careers in a variety of disciplines within the energy sector.
Audience: Graduate

3. Develop professional skills applicable to energy and environmental careers.
Audience: Graduate

4. Practice professional networking through informational interviews and expert visits.
Audience: Graduate

ENVIR ST/ATM OCN/BOTANY/CIV ENGR/GEOSCI/ZOOLOGY 911 – LIMNOLOGY AND MARINE SCIENCE SEMINAR
1 credit.

Sections in various fields of zoological research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Explain important research in current limnology.
Audience: Graduate

2. Utilize different research presentation methods.
Audience: Graduate

3. Assess scientific information and ask thoughtful questions.
Audience: Graduate

ENVIR ST/URB R PL 917 – PUBLIC PARTICIPATION FOR PLANNING AND POLICY MAKING
3 credits.

Examines public participation for planning and policymaking in both urban and natural environments; considers different types of participation from agency consultation to negotiation; designing, conducting, and evaluating citizen participation are major features.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain what public participation is and its application to planning, policy-making, and related decision-making processes, including benefits and challenges, the interplay between professional and community-based or local knowledge, values and ethics, and responsibilities of those leading participatory processes.
Audience: Graduate

2. Involve people meaningfully in planning and decision-making processes and create public participation plans, including goals and objectives tailored to specific project needs, techniques suitable to the goals, objectives and circumstances, and assessing effectiveness through ongoing evaluation.
Audience: Graduate

3. Use public participation applications and skills recognizing effective communication principles, sources of outrage and deep emotion, empathy, listening skills, constructive practices, and aligned participatory and facilitation techniques.
Audience: Graduate

4. Recognize conflicts and anticipate conflict resolution options in participatory processes by demonstrating knowledge of conflict resolution concepts and approach, analyzing conflict situations, and understanding proven techniques for resolving conflicts.
Audience: Graduate

ENVIR ST 922 – HISTORICAL AND CULTURAL METHODS IN ENVIRONMENTAL RESEARCH
3 credits.

Introduction to other disciplinary and interdisciplinary methods studying past environmental change and the human cultural contexts within which such change occurs. Explore the disparate forms of evidence that can be used to reconstruct past environmental changes and their human meanings. Build a strong sense of community among graduate students and faculty members at UW-Madison who share an interest in past environmental change by creating a context within which students from different programs can work together.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

ENVIR ST 931 – REMOTE SENSING FOR INTERNATIONAL DEVELOPMENT
3 credits.

Explore the ways remote sensing data are being used within an international development context, broadly defined. Provides a unique focus on understanding how projects were completed with satellite data, what data sources were necessary, how expert local knowledge was incorporated, and how various challenges were faced and overcome. Discover how the application of remote sensing data helped change policy in different countries across the globe.
Requisites: LAND ARC/ENVIR ST/G L E/GEOG/GEOSCI 371 and graduate/professional standing (or FW ECOL 371 prior to Summer 2026)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENVIR ST/CURRIC 932 – FOUNDATIONS OF ENVIRONMENTAL AND SUSTAINABILITY EDUCATION
3 credits.

Education is often portrayed as a critical part of the solution to the intertwined problems of environment and society. Examines environmental education and related traditions such as nature study, conservation education, and outdoor education, as well as more recent movements such as place-based education and education for sustainability. Grounds discussions in concrete examples of educational practice, considers historical and contemporary critiques of environmental education.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

ENVIR ST 950 – ENVIRONMENTAL MONITORING SEMINAR
1-2 credits.

A discussion and exploration of the social, economic and legal interactions of geospatial and environmental information technologies with society.
Requisites: Declared in Environmental Conservation: Environmental Observation and Informatics MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recognize the social, economic, and legal considerations of working with environmental monitoring data
Audience: Graduate

2. Implement the steps for effective project collaborations
Audience: Graduate

3. Gain hands on experience working with data that has relevance for a conservation issue
Audience: Graduate

ENVIR ST 951 – CONSERVATION OF BIODIVERSITY
3 credits.

Surveys the scientific knowledge, concepts, and models that are the basis for the applied practice for the conservation of biodiversity. Study interactions of humans with nature, and how conservation science is used to formulate policy and guide conservation actions.
Requisites: Declared in Environmental Conservation: Environmental Conservation MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

ENVIR ST/AGROECOL/ATM OCN/BOTANY/ENTOM/GEOG/ZOOLOGY 953 – INTRODUCTION TO ECOLOGY RESEARCH AT UW-MADISON
1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison
Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison
Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology
Audience: Graduate

4. Develop appropriate expectations for advisors and advisees
Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics
Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science
Audience: Graduate

ENVIR ST 956 – ADVANCED ENVIRONMENTAL REMOTE SENSING
3 credits.

Focuses on the fundamental physical principles of terrestrial remote sensing, followed by an examination of advanced topics in earth observation and digital image processing. Topics include radiation interaction with the atmosphere and the surface; radiative transfer theory; land surface characteristics including energy balance; thermal sensing; atmospheric and radiometric correction of image data; automated cloud detection and removal. Applications of remote sensing data for environmental problems will be explored in depth, including biophysical remote sensing with 3D modeling of vegetation canopies, dense time series analysis, data mining techniques, data fusion, as well as object vs. per-pixel approaches to pattern recognition. Explores all major data types, including optical, RADAR, LiDAR, and hyperspectral data, and provide instruction in hands-on image processing using open source software.
Requisites: LAND ARC/ENVIR ST/G L E/GEOG/GEOSCI 371 and graduate/professional standing (or FW ECOL 371 prior to Summer 2026)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate understanding of major theories, approaches, concepts, and methods in remote sensing science.
Audience: Graduate

2. Apply knowledge of the nature and properties of electromagnetic radiation and how it is affected by interactions with the atmosphere and the Earth's surface, including transmission, absorption, reflectance, refraction, and scatter.
Audience: Graduate

3. Outline several historical models used to explain the nature of light (e.g. wave, particle), describe phenomena associated with each model, and discuss the principle of complementarity.
Audience: Graduate

4. Recall the basic physical principles of radiation laws derived from Planck, Wien, and Stefan-Boltzmann, and describe how these principles make remote sensing possible.
Audience: Graduate

5. Differentiate the effects of atmospheric scatter (Rayleigh, Mie, and non-selective scatter) on Earth observation imagery, and determine how to remove atmospheric effects (or differences) across images.
Audience: Graduate

6. Understand the fundamental laws of radiative transfer, such as heating and cooling of the surface and atmospheric layers, and its effects in both clear and cloudy conditions.
Audience: Graduate

7. Illustrate the inverse methodologies used to derive geophysical parameters from remote measurements.
Audience: Graduate

8. Use this knowledge to interpret complex multispectral radiance data sets to derive geophysical information for environmental applications.
Audience: Graduate

9. Describe the differences between heat, thermal energy, and emissivity, distinguish how the amount of energy stored determines the temperature, and determine how these properties affect thermal remote sensing image analysis.
Audience: Graduate

ENVIR ST 971 – ENVIRONMENTAL SENSING TECHNOLOGIES
3 credits.

Many diverse technologies for monitoring the environment have become available in recent years, including traditional remote sensing data sources: aerial photography and satellite imagery, hyper-spectral data, imagery on demand, RADAR and LiDAR. Other new data sources are quite unconventional, with many emerging relatively recently: unmanned aerial vehicles (UAVs or drones), social media, smartphones as sources of crowd-sourced data, and more. Sophisticated data management, analytics, and presentation technology are required to effectively leverage both the spatial (including 3D) and temporal dimensions of these often untapped data sources. Intended to survey and explore these newly developing technologies, and provide direct experience to the student to understand and interact with the data and methods (geocomputing, coding, cloud-based platforms), and to learn to plan, manage, and utilize them effectively.
Requisites: LAND ARC/ENVIR ST/G L E/GEOG/GEOSCI 371 and graduate/professional standing (or FW ECOL 371 prior to Summer 2026)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate their understanding of major theories, approaches, concepts, and methods in remote sensing science.
Audience: Graduate

2. Apply knowledge of the nature and properties of electromagnetic radiation and how it is affected by interactions with the atmosphere and the Earth's surface.
Audience: Graduate

3. Identify the techniques, skills, and modern tools necessary for monitoring environmental phenomena with earth observation data.
Audience: Graduate

4. Identify and appropriately utilize data types from the optical, thermal, and microwave portions of the electromagnetic spectrum, and from a wide range of airborne, satellite and unmanned aerial platforms, including high (greater than 5 m), medium (10-30 m), and coarse (250-1000 m) spatial resolution imagery.
Audience: Graduate

5. Illustrate the utility of machine learning for big data applications in remote sensing, and apply machine learning theories and tools in practice.
Audience: Graduate

6. Apply traditional and new forms of data fusion using earth observation imagery and a wide range of geophysical, social, and economic sources.
Audience: Graduate

7. Identify real-world issues that could benefit from the application of hyper-spectral and hyper-temporal data, and illustrate effective ways to apply these data for each.
Audience: Graduate

8. Analyze and interpret LiDAR point data clouds and LiDAR data derivatives for applications ranging from forestry to urban sustainability.
Audience: Graduate

9. Integrate new sources of data from unmanned aerial vehicles (UAVs) for monitoring biodiversity and conservation, and illustrate ways to influence policy with these findings.
Audience: Graduate

10. Apply a wide range of image processing tools using cloud computing

ENVIR ST 972 – CONSERVATION PLANNING
4 credits.

Prepare to plan, monitor and evaluate the effectiveness of conservation projects and programs. Learn systematic and adaptive processes of conservation planning.
Requisites: Declared in Environmental Conservation: Environmental Conservation MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

ENVIR ST 974 – ENVIRONMENTAL CONSERVATION COHORT SEMINAR
1 credit.

Introduction to professional development and important aspects of communication, collaboration, and professional practice as they relate to Environmental Conservation.
Requisites: Declared in Environmental Conservation MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

ENVIR ST 975 – ENVIRONMENTAL CONSERVATION LEADERSHIP SEMINAR
1 credit.

Introduction to important aspects of communication, negotiation, and cross-cultural professional practice as they relate to Environmental Conservation.
Requisites: Declared in Environmental Conservation: Environmental Conservation MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

ENVIR ST 976 – THE PRACTICE OF CONSERVATION BIOLOGY AND SUSTAINABLE DEVELOPMENT
1 credit.

A weekly series of presentations by persons who have direct experience in the practice of conservation biology and sustainable development. Presenters may be students, faculty staff or agency persons.
Requisites: Declared in Environmental Conservation MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

ENVIR ST 977 – SUSTAINABLE DEVELOPMENT - INTEGRAL PERSPECTIVE
3 credits.

Review core concepts and history of sustainable development. Introduction to innovative frameworks to sustainable development, including integral framework, institutional analysis, and the often overlooked cultural, philosophical and psychological underpinnings of environmental decision-making. Analyze case studies and examples through the lens of the frameworks presented. Serves as a forum to present your research interests and examples regarding sustainable development.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

ENVIR ST 978 – ENVIRONMENTAL CONSERVATION TOOLS MODULES
1 credit.

Modules provide training in specific tools and methods related to environmental conservation. Topics may include GIS, conservation finance, conservation governance institutions, biodiversity monitoring, and science communication environmental mediating.
Requisites: Declared in Environmental Conservation MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENVIR ST 979 – ENVIRONMENTAL CONSERVATION PROFESSIONAL PRACTICE
3 credits.

Provides an online environment for the development and practice of the skills needed to be an environmental conservation professional and leader. Analyze options and make good professional conservation judgments in complex and uncertain environmental, political, and economic settings. Provides the tools needed to assess and revise those judgments. Includes exercises on the politics of environmental decisions, internal and external communication strategies, and program development and assessment strategies.
Requisites: Declared in Environmental Conservation: Environmental Conservation MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

ENVIR ST/ATM OCN/BOTANY/GEOG/GEOSCI/ZOOLOGY 980 – EARTH SYSTEM SCIENCE SEMINAR
1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

ENVIR ST 990 – RESEARCH
1-12 credits.

Independent research and writing towards thesis or dissertation requirement.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

ENVIR ST 999 – ADVANCED INDEPENDENT STUDY
1-5 credits.

Independent work in environmental studies overseen by a qualified instructor.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Conduct and report on independent environmental studies research under the guidance of a qualified instructor
Audience: Graduate

2. Independently develop researchable Environmental Studies questions
Audience: Graduate

3. Appropriately utilize online and library resources
Audience: Graduate

4. Connect their research clearly to other research in their field of study
Audience: Graduate

FAMILY MEDICINE (FAM MED)

FAM MED 699 – DIRECTED STUDY
1-5 credits.

Directed study projects as arranged with faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Understand and synthesize scientific literature surrounding their scientific question.
Audience: Undergraduate

FAM MED 711 – THE HEALER'S ART
1 credit.

Explores relationship-centered care in the medical profession. Topics include the importance of holistic self-care, methods of sharing, processing and responding to grief and the concepts of service and calling in medicine.
Requisites: Declared in Medicine program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

FAM MED 712 – HEALLTH CARE IN DIVERSE COMMUNITIES
1 credit.

Introduction to issues in health care provided in diverse communities. Topics include cultural issues in medicine, health disparities, cross-cultural communication, culture and resiliency, historical background and ethics, civil rights in practice and minority health care professionals.
Requisites: Declared in Medicine program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

FAM MED 790 – RURAL PUBLIC HEALTH AND COMMUNITY PROJECTS FOR PHASE 3 WARM STUDENTS
2 credits.

Opportunity for students to continue or enhance work on their longitudinal community projects through a self-directed learning experience.
Requisites: MED SC-M 810, 811, 812, and 813 and declared in Medicine:Wisconsin Academy for Rural Medicine or Medicine:Wisconsin Academy for Rural Medicine excellence in Rural Residencies.
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 1 number of completions
Last Taught: Spring 2026

FAM MED 909 – FAMILY MEDICINE INTERNSHIP PREPARATION ELECTIVE
1 credit.

Review and reinforce baseline skills you will need for internship training in Family Medicine. Inpatient topics include hospital admission and discharge workflows, ICU basics, Chest pain, Acute respiratory symptoms, OB triage, Communication with patients and families. Outpatient topics include Common pediatric presentations, Common family medicine outpatient procedures, Telemedicine-based care. Additional topics include Common imaging and cardiopulmonary evaluations: Radiograph interpretation, Cardiac evaluations; Non-invasive respiratory support approaches; Shock management; Acute Coronary Syndrome management; Initial approach to and management of common, severe, infectious conditions; Procedural skills; Communication skills with health care providers; Written clinical documentation. Verbal communication with patients and families; Teaching skills.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate familiarity with the use and appropriate ordering criteria for various Radiology modalities including xrays, Magnetic Resonance Imaging (MRI) & Computerized Axial Tomography (CAT) Scans, and ultrasound
Audience: Graduate

2. Review electrocardiogram (EKG) interpretation and identify common clinical findings
Audience: Graduate

3. Identify and discuss treatment of clinically significant arrhythmias
Audience: Graduate

4. Determine appropriate cardiac stress testing
Audience: Graduate

5. Discuss appropriate use of laboratory studies and interpretation related to shock
Audience: Graduate

6. Review diagnosis and treatment of urgent/emergent and acute situations including hypotension, sinus tachycardia, deep vein thrombosis/pulmonary embolism (DVT/PE), chest pain, abdominal pain, fever, and dyspnea
Audience: Graduate

7. Describe appropriate antibiotics for common infectious diseases
Audience: Graduate

8. Identify approach to common procedures including: dermatologic procedures, suturing/knot tying, gynecologic procedures and contraceptive care, circumcision
Audience: Graduate

9. Appropriately approach difficult conversations including delivering bad news, medical errors, death/autopsy request, and other clinically challenging situations
Audience: Graduate

10. Identify appropriate communication strategies for dealing with conflict, appropriate communication with colleagues and patients, written and verbal communication, and teaching skills
Audience: Graduate

FAM MED 910 – RESEARCH AND INDEPENDENT STUDY ELECTIVE IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of research in Family Medicine and primary care or to enable students who have already become involved in research in Family Medicine to complete or extend their work. Working with a faculty mentor, examine both the content and process of primary care research. Refine research questions, interview research participants, complete computer-based literature searches and complete critical literature reviews. Demonstrate understanding of research ethics, design, development, computer database management, statistical analysis and oral and written presentation.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research.
Audience: Graduate

2. Conduct a thorough literature review as it pertains to the specific scholarly project.
Audience: Graduate

3. Select and apply, and/or understand statistical methodologies as appropriate for the proposed scholarly project.
Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review.
Audience: Graduate

FAM MED 911 – EVIDENCE-BASED HERBAL MEDICINE SAFETY AND EFFICACY SELECTIVE IN FAMILY MEDICINE
2 credits.

Gain a basic understanding of the pharmacology, mechanism of action, phytochemistry and botany (plant identification) of common plants used for healing in the United States. Analyze herbalpharmaceutical interactions and liver detoxification systems, extremely important skills in the practice of clinical medicine for any specialty. Prepare simple herbal treatments in the Learning Kitchen at the American Center and discuss practical applications in the clinical setting.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the physiological effects of the top 20 commonly used herbal medicines in the United States.
Audience: Graduate

2. List characteristics of a high-quality herbal medicine.
Audience: Graduate

3. Describe how to prepare an infusion, decoction, tincture, and herbal salve.
Audience: Graduate

4. From a list of dietary supplements and pharmaceuticals, identify adverse interactions using validated sources.
Audience: Graduate

5. Explain, in detail, how to undertake a risk-benefit analysis when trying to decide about the appropriateness of using an herbal medicine for treatment in a clinical scenario.
Audience: Graduate

6. Critically evaluate the herbal medicine literature, explaining the characteristics of a high-quality herbal medicine journal article using the 15-point supplemental CONSORT approach.
Audience: Graduate

FAM MED 913 – FIREARM INJURY PREVENTION POPULATION HEALTH SELECTIVE
2 credits.

Overview of population health interventions to promote firearm injury prevention. Gain an understanding of the epidemiology of firearm injury and death in the US. Recognize the role of clinicians in catalyzing firearm injury prevention. Establish relationships with community partners working on firearm injury prevention. Develop model interventions in collaboration with a community partner to reduce firearm injury in the community. Clinical and community interventions discussed.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe scope of firearm injury and death in the US through use of multiple frameworks, including historical, legal, social-cultural, clinical, and public health.
Audience: Graduate

2. Interpret social context and history that inform the cultural roles of firearms in the US.
Audience: Graduate

3. Summarize the effects of US firearm laws and policies on firearm injury and death.
Audience: Graduate

4. Appraise ethical and cultural considerations affecting individual, community, and population level firearm injury reduction strategies.
Audience: Graduate

5. Describe ethical collaborations with community partners.
Audience: Graduate

6. Implement evidence-based interventions to promote firearm injury prevention.
Audience: Graduate

7. Appraise advocacy roles and methods, including clinician-specific opportunities.
Audience: Graduate

FAM MED 919 – INDIVIDUALIZED FAMILY MEDICINE ELECTIVE
2-8 credits.

In-depth exposure to the principles of Family Medicine, emphasizing continuing and comprehensive care. Under direct faculty supervision, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, covers the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

14. Recognize limitations and seek assistance as appropriate.

FAM MED 920 – CLINICAL ELECTIVE IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

14. Recognize limitations and seek assistance as appropriate.

FAM MED 924 – CORRECTIONAL SYSTEM HEALTHCARE ELECTIVE IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of Family Medicine as it relates to the Correctional System Healthcare of the incarcerated, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis will be placed on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans as related to the correctional system.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.

FAM MED 926 – NATIVE AMERICAN CLINICAL ELECTIVE IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of Family Medicine in the Native American community, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

FAM MED 927 – RURAL AND COMMUNITY CLINICAL ELECTIVE IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of Family Medicine in the rural community, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

FAM MED 930 – URBAN AND COMMUNITY CLINICAL ELECTIVE IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of Family Medicine in a urban community, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

FAM MED 931 – ADDICTIVE DISORDERS MANAGEMENT IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of Family Medicine approaches to Addictive Disorders, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

FAM MED 933 – SPORTS MEDICINE ELECTIVE IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of Sport Medicine in Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2021
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients,family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

FAM MED 935 – INPATIENT ELECTIVE IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of Family Medicine in an inpatient setting, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 4 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective inpatient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop inpatient and clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

14. Recognize limitations and seek assistance as appropriate.

FAM MED 937 – FAMILY MEDICINE UW HOSPITAL SUB-INTERNSHIP
1-6 credits.

Introduction to the principles of Family Medicine, emphasizing continuing and comprehensive care. Share ongoing responsibility for the patient in both health maintenance and illness. Emphasis upon commitment to the person and understanding the problems in the total context of the patient's life.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

FAM MED 938 – HOSPICE & PALLIATIVE CARE ELECTIVE IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to the principles of hospice and palliative care as it relates to Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis will be placed on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

FAM MED 941 – INTEGRATIVE HEALTH ELECTIVE IN FAMILY MEDICINE
2-4 credits.

In-depth exposure to the principles of Integrative Health as it relates to Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Emphasis on commitment to the patient and understanding the problems in the total context of the patient's life. Development of awareness of student physician and the patient's attitudes and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care.
Requisites: MED SC-M 810, 811, 812, and 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Perform a hypothesis driven history and complete a targeted exam.
Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical conditions.
Audience: Graduate

3. Using clinical evidence, adapt and justify a working diagnosis.
Audience: Graduate

4. Present a treatment and diagnostic plan including laboratory and imaging modalities.
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

6. Develop and implement effective patient management plans.
Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

8. Review, interpret and present current literature to support patient care.
Audience: Graduate

9. Develop clinically relevant questions to advance learning.
Audience: Graduate

10. Communicate effectively with patients, family, physicians and non-physician team members.
Audience: Graduate

11. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.
Audience: Graduate

12. Engage patients in shared decision making regarding tests, orders and procedures.
Audience: Graduate

13. Avoid medical jargon when communicating with patients and families.
Audience: Graduate

FAM MED 943 – INFECTIOUS DISEASE SURVEILLANCE
2 credits.

Basics of infectious disease, including the microbiologic, virology, and parasitology of human disease, the immune response to infection, pathologic changes related to infectious disease, and the pharmacology of anti-infectious agents. Understanding antimicrobial stewardship, importance of prevention, including vaccination, and an understanding of infectious disease surveillance on local, regional, national, and global systems. Appreciation of emerging infectious threats, threats from climate change on microbiota, and the epidemiology of an emerging infection.
Requisites: MED SC-M 810, 811, 812, and 813, and graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Identify and describe immunologic response to infectious diseases.
Audience: Graduate

2. Apply and adapt the pharmacology of antimicrobial, antiviral and antiparasitic therapies.
Audience: Graduate

3. Demonstrate knowledge of the microbiology, virology, and parasitology of significant human diseases.
Audience: Graduate

4. Identify and describe the pathologic response to infectious disease in the human host.
Audience: Graduate

5. Delineate the return on investment in preventative interventions to infectious diseases and understand the surveillance pathways and processes at all levels of reporting from local health departments to the World health Organization.
Audience: Graduate

6. Explain the surveillance pathways and processes at all levels of reporting from local health departments to the World Health Organization
Audience: Graduate

7. Identify the health effects of climate disruption on food-borne, water-borne, and other infectious disease threats.
Audience: Graduate

8. Research the epidemiology of various infectious diseases, including their distribution, prevalence, incidence, and determinants.
Audience: Graduate

9. Explain emerging infectious threats including threats from climate change.
Audience: Graduate

FAM MED 944 – OFFICE-BASED PROCEDURES IN FAMILY MEDICINE
2-8 credits.

In-depth exposure to principles of office-based procedures in Family Medicine, emphasizing continuing and comprehensive care. Under direct supervision by faculty, share ongoing responsibility for the patient in both health maintenance and illness. Develop self-awareness as student physician, recognition of patient attitudes, and learn to use interactions as a therapeutic tool. In addition to the pathology of disease, learn the appropriate use of patient education, preventative medicine and the role of family and community resources in providing quality primary care. Share ongoing responsibility for the patient in evaluation, diagnosis, procedure and follow-up. Small office procedures may include; vein treatments, skin lesion removal, prolotherapy, perineural injection therapy, no-scalpel vasectomy, thread carpal tunnel release, liposuction, hemorrhoid treatments, and frenotomy for tongue tie.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Demonstrate the appropriate use of patient education.
Audience: Graduate

2. Demonstrate understanding of informed consent process.
Audience: Graduate

3. Share ongoing responsibility for the patient evaluation, diagnosis, procedure and follow-up.
Audience: Graduate

4. Demonstrate skill in addressing problems in the broader context of the patient's life.
Audience: Graduate

5. Use proper procedural techniques for office-based surgical procedures common to Family Medicine.
Audience: Graduate

6. Perform minor procedures with supervision.
Audience: Graduate

7. Develop self-awareness as student physician, and ability to recognize patient attitudes and use interactions as a therapeutic tool.
Audience: Graduate

8. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.
Audience: Graduate

9. Complete written documentation in a comprehensive, concise, accurate and timely manner.
Audience: Graduate

10. Review, interpret and present current literature to support patient's planned procedure.
Audience: Graduate

11. Develop procedural and surgical relevant questions to advance learning.

Audience: Graduate

12. Communicate effectively with patients, family, physicians and non-physician team members.

FINANCE, INVESTMENT AND BANKING (FINANCE)

FINANCE 200 – FINANCE INDUSTRY FUNDAMENTALS
1 credit.

Comprehensive introduction to the finance industry ecosystem, examining a variety of industry sectors, or "Pathways," within the finance world, providing a nuanced exploration of both macro and micro-level dynamics. Explores the inner workings of firms in each sector, topical events, and latest developments. Deep dive into roles and responsibilities, in preparation for diverse career opportunities.
Requisites: None
Course Designation: Core GenEd - Communication & Literacy
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Obtain a basic understanding of the UW finance industry ecosystem
Audience: Undergraduate

2. Develop a detailed knowledge of the seven finance industry pathways
Audience: Undergraduate

3. Recognize the distinction between corporate finance, the buy-side, and the sell-side finance industry sectors
Audience: Undergraduate

4. Explain the interactions between individuals, corporations, the sell-side, and the buy-side
Audience: Undergraduate

5. Identify the career pathways available within the finance industry
Audience: Undergraduate

6. Identify the WSB resources available to assist in pathway career exploration, exposure, and preparation (including experiential and extra/co-curricular opportunities, and internal academic and advising resources)
Audience: Undergraduate

FINANCE 205 – FINANCIAL MODELING IN EXCEL
1 credit.

A technical skills course in which you will learn how to construct an error-free, well-structured and user-friendly integrated three-statement company model. Constructing a financial model in Excel is a key skill for success as a financial analyst.
Requisites: ACCT I S 100 or 300
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Navigate and utilize the Excel interface, including optimal settings for financial modeling
Audience: Undergraduate

2. Utilize Excel keyboard shortcuts most common to financial modeling
Audience: Undergraduate

3. Understand and utilize best practices to build a financial model that is error-free, well-structured and user-friendly
Audience: Undergraduate

4. Understand and utilize best practices related to error prevention while modeling
Audience: Undergraduate

5. Construct an integrated income statement, balance sheet and cash flow statement
Audience: Undergraduate

6. Incorporate circular references via interest expense and interest income, and manage them with a “circuit breaker”
Audience: Undergraduate

7. Construct a three-statement integrated financial model with a cash sweep and waterfall debt schedule
Audience: Undergraduate

8. Build a model from scratch using corporate historical financial statements as a starting point
Audience: Undergraduate

9. Understand various approaches to developing a top-line forecast
Audience: Undergraduate

10. Apply error checking and correction techniques to completed model to ensure accuracy
Audience: Undergraduate

FINANCE/ECON 300 – INTRODUCTION TO FINANCE
3 credits.

Concepts and techniques in corporate finance and investments. Topics include the financial environment, securities markets, financial markets, financial statements and analysis, working capital management, capital budgeting, cost of capital, dividend policy, asset valuation, investments, decision-making under uncertainty, mergers, options, and futures.
Requisites: (ECON 101, 111 or A A E 101) and (ACCT I S 100 or 300 or concurrent enrollment) and (GEN BUS 206, 306, ECON 310, MATH 331, STAT/MATH 309, 431, STAT 224, 301, 302, 311, 324, 371 or PSYCH 210 or concur enrollment) or declared undergrad Bus Exchange Program
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Apply discounted cash flow analysis in various contexts and determine the appropriate discount rate for these calculations.
Audience: Undergraduate

2. Calculate and interpret the effect of leverage on firms' cost of debt, cost of equity, and a company's cost of capital under different assumptions.
Audience: Undergraduate

3. Characterize an efficient market and explain the implications of market efficiency for investors and corporations.
Audience: Undergraduate

4. Characterize different types of securities (including stocks, bonds, and derivatives) and identify the key features of each.
Audience: Undergraduate

5. Compute present and future values under different compounding assumptions.
Audience: Undergraduate

6. Demonstrate a command of the Capital Asset Pricing Model, including its strengths and weaknesses and its use in computing expected returns.
Audience: Undergraduate

7. Demonstrate the power of diversification and the risk-return tradeoff quantitatively.
Audience: Undergraduate

8. Solve capital budgeting problems using appropriate decision rules, taking into account the strengths and weaknesses of the available approaches.
Audience: Undergraduate

FINANCE 305 – FINANCIAL MARKETS, INSTITUTIONS AND ECONOMIC ACTIVITY
3 credits.

An analysis of the U.S. financial system, its responsiveness to and impact on economic activity and policy, its procedures for assessing and pricing risks on various financial instruments, and its role in the allocation of funds to different sectors in the economy.
Requisites: (ECON/FINANCE 300 or concurrent enrollment), or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the sources and uses of funds for the main financial institutions in the U.S.
Audience: Undergraduate

2. Explain how deposit money is created in the banking system.
Audience: Undergraduate

3. Summarize how government budget deficits affect the money supply.
Audience: Undergraduate

4. Classify the various instruments the Federal Reserve uses to influence interest rates and the money supply.
Audience: Undergraduate

5. Understand how monetary and fiscal policies can affect the economy.
Audience: Undergraduate

6. Explain how monetary policy can affect the aggregate supply schedule in the economy.
Audience: Undergraduate

7. Infer how financing decisions of firms change over the business cycle.
Audience: Undergraduate

8. Interpret how Basle 3 and the Dodd-Frank affect the business model of financial institutions.
Audience: Undergraduate

9. Conclude how the Consumer Financial Protection Bureau affects the business model of financial institutions.
Audience: Undergraduate

FINANCE 310 – DATA ANALYTICS FOR FINANCE
3 credits.

With a hands-on approach, covers advanced analytics methods for forecasting, predicting, reporting, and analyzing. Relies on Python as its primary coding language. Begins with a review of coding fundamentals and progressively delves into increasingly realistic and complex finance applications.
Requisites: ECON/FINANCE 300
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Understand the fundamentals of programming and how those fundamentals are implemented in Python
Audience: Undergraduate

2. Download, organize, and manipulate data to prepare them for Finance applications
Audience: Undergraduate

3. Visualize and organize Financial Data for the purpose of creating effective presentations
Audience: Undergraduate

4. Apply these programming skills in the context of standard financial applications such as asset pricing model estimation, Monte Carlo simulations for capital budgeting purposes, portfolio optimization, and financial analysis and forecasting
Audience: Undergraduate

FINANCE/ECON 320 – INVESTMENT THEORY
3 credits.

Structure and functioning of securities markets; principles of portfolio construction; models of the tradeoff between risk and expected return.
Requisites: FINANCE/ECON 300, (MATH 213 or 222) and (GEN BUS 307, 317, 656, ACT SCI 654, 655, ECON 400, 410, STAT/MATH 310, STAT 312, or 333 or concurrent enrollment) or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Solve real-world investment problems
Audience: Undergraduate

2. Formulate the trade-off between risk and return
Audience: Undergraduate

3. Describe the distribution of returns on broad asset classes
Audience: Undergraduate

4. Identify investors' risk preferences
Audience: Undergraduate

5. Use portfolio optimization techniques to develop an asset allocation for an investor
Audience: Undergraduate

6. Examine factor models of returns
Audience: Undergraduate

7. Compare different equilibrium security pricing models
Audience: Undergraduate

8. Debate market efficiency
Audience: Undergraduate

FINANCE 325 – CORPORATION FINANCE
3 credits.

Development of the theory, method and analytical techniques of financial management. Techniques of capital budgeting; valuation of projects and firms; theory of capital structure; dividend policy; cost of capital; mergers and acquisitions.
Requisites: FINANCE/ECON 300, ACCT I S 301, (MATH 213 or 222) and (GEN BUS 307, 317, ACT SCI 654, ECON 400, 410, STAT/MATH 310, STAT 312, 333 or concurrent enrollment), or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Set a capital budget
Audience: Undergraduate

2. Evaluate projects with discount cash flow valuation
Audience: Undergraduate

3. Compute the appropriate cost of capital
Audience: Undergraduate

4. Value whole firms with discount cash flow valuation
Audience: Undergraduate

5. Identify factors that determine an optimal capital structure of a firm and how debt impacts financial decisions
Audience: Undergraduate

6. Explain the basics of mergers and acquisitions
Audience: Undergraduate

FINANCE 330 – DERIVATIVE SECURITIES
3 credits.

Pricing and uses of the most common derivatives including options, forward contracts, futures contracts, and swaps.
Requisites: FINANCE/ECON 300, (MATH 213 or 222), and (GEN BUS 307, 317, 656, ACT SCI 654, 655, ECON 400, 410, STAT/MATH 310, STAT 312, 333 or concurrent enrollment), or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the differences between various derivative contracts including forwards, futures, options, swaps and credit derivatives.
Audience: Undergraduate

2. Derive the no-arbitrage forward/futures prices.
Audience: Undergraduate

3. Demonstrate the technical skills of applying various option pricing methods.
Audience: Undergraduate

4. Implement various derivative trading strategies to generate profit.
Audience: Undergraduate

5. Use derivatives to hedge financial and business risks.
Audience: Undergraduate

FINANCE 340 – FIXED INCOME SECURITIES
3 credits.

Analysis of fixed income, bond markets. Introduce tools for evaluating bonds and making decisions about trading and hedging portfolios of fixed income securities. Focus on government bonds and derivative securities. Consider basic ways to price bonds using techniques that are well established on Wall St. Introduces basic trading strategies based on exploiting mis-priced securities. Strategize ways to measure and minimize risk. Other topics include repo financing, mortgage markets, and basic issues involving default risk of corporate bonds.
Requisites: FINANCE/ECON 300, (MATH 213, 222, or 276) and (GEN BUS 307, 656, ACT SCI 654, 655, ECON 400, 410, STAT/MATH 310, STAT 312, or 333 or concurrent enrollment); or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply the mathematics of fixed income markets.
Audience: Undergraduate

2. Utilize appropriate tools and techniques, including various measures of duration and convexity, to make decisions about trading and hedging portfolios of fixed income securities.
Audience: Undergraduate

3. Explain the structure and uses of fixed income derivative instruments, including options, forwards and swaps.
Audience: Undergraduate

FINANCE 365 – CONTEMPORARY TOPICS
1-3 credits.

Exploration of subject areas possibly to be introduced into the business curriculum.
Requisites: None
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

FINANCE 399 – READING AND RESEARCH-FINANCE
1-6 credits.

Individual work suited to the needs of undergraduate students may be arranged with faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

FINANCE 410 – BANK MANAGEMENT
3 credits.

Management of depository financial intermediaries with primary emphasis on commercial banks. Topics include bank regulation, liquidity and reserve position management, loan pricing and analysis, investment portfolio problems and overall asset liability management.
Requisites: (FINANCE 305, 325, and ECON/FINANCE 320) or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain how bank operations and strategy are impacted by regulatory constraints, competition, and many risks inherent in banking.
Audience: Undergraduate

2. Identify the major components of a bank balance sheet and income statement.
Audience: Undergraduate

3. Analyze bank performance using industry standard bank profitability and capital planning models and the bank regulator CAMELS methodology.
Audience: Undergraduate

4. Manage interest risk in banks.
Audience: Undergraduate

5. Articulate the basics of both commercial and consumer lending including customer profitability analysis.
Audience: Undergraduate

FINANCE 420 – INVESTMENT BANKING AND CAPITAL MARKETS
3 credits.

Broad overview of investment banking. Topics covered include valuation, cash flow, initial public offerings, leveraged buyouts, acquisitions, and related corporate governance issues.
Requisites: (FINANCE 305, 325, and ECON/FINANCE 320) or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Locate relevant information in financial statements and the footnotes to financial statements and acquisitions, initial public offerings and investment banking
Audience: Undergraduate

2. Utilize appropriate financial tools and databases (e.g., Excel, Capital IQ, Bloomberg) to access and effectively present financial information
Audience: Undergraduate

3. Demonstrate the fluency required to understand conceptually how valuation methodologies work and how changes in assumptions impact valuation
Audience: Undergraduate

4. Build and interpret financial models utilizing the fundamental valuation techniques that investment bankers use including discounted cash flow analysis, comparable companies, precedent transactions and leveraged buyout analysis
Audience: Undergraduate

5. Demonstrate an understanding of capital markets transactions where securities are issued to investors
Audience: Undergraduate

FINANCE 425 – CASE STUDIES IN FINANCE
3 credits.

Analysis of capital budgeting, new product launches, geographic expansion, mergers and acquisitions (MA), international finance, and initial public offerings (IPOs). Development of advanced analytical and communication skills through extensive case analysis, discussions, and presentations.
Requisites: (FINANCE 305, 325, and ECON/FINANCE 320) or declared in undergraduate Business Exchange program
Repeatable for Credit: No
Learning Outcomes: 1. Evaluate industry cases utilizing advanced technical and analytic financial skills.
Audience: Undergraduate

2. Communicate advanced financial analysis in both oral and written applications.
Audience: Undergraduate

3. Present financial analysis in a corporate environment and provide feedback to peers and clients.
Audience: Undergraduate

4. Analyze and communicate high-level financial information as part of an integrated team.
Audience: Undergraduate

5. Network and interact with financial industry professionals ranging from recent graduates to senior executives in support of job placement and onboarding in the finance industry.
Audience: Undergraduate

FINANCE/INTL BUS 445 – MULTINATIONAL BUSINESS FINANCE
3 credits.

Application of financial theory to the operations of multinational firms; survey of the international financial environment; determinants of international portfolio and direct investment capital flows; management of foreign exchange position and hedging strategies; evaluation of foreign investment projects (multinational capital budgeting); international financial structure decisions; multinational credit institutions and capital markets; taxation of international business.
Requisites: (FINANCE 305, 325, and ECON/FINANCE 320) or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate the knowledge and technical skills needed to be the treasurer of an international firm
Audience: Undergraduate

2. Apply methods to measure, manage and analyze the effects posed by exchange rate risk to the income statement and balance sheet of a firm
Audience: Undergraduate

3. Evaluate foreign investment decisions
Audience: Undergraduate

4. Articulate the choices and challenges faced by managers when sourcing funds in the global capital markets, and in making complex foreign investment decisions
Audience: Undergraduate

FINANCE 457 – ENTREPRENEURIAL FINANCE
3 credits.

Discusses the tools helpful for financing new ventures, with emphasis on their applications. The course also helps students understand the institutional setting that has an impact on the financing conditions of new ventures.
Requisites: FINANCE/ECON 300, ACCT I S 301, and (MATH 213 or 222)
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Spring 2026

FINANCE/ECON 503 – MARKETS WITH FRICTIONS
3 credits.

Search theory provides framework for understanding markets and is used to study questions in monetary, public, financial economics. Develop theoretical tools used to introduce frictions in formal models and address the role of frictions in several applied scenarios.
Requisites: (FINANCE 305, 325, 330, and ECON/FINANCE 320), (ECON 301, 302, 311, or 312), or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine new issues related to frictional markets by looking at old issues in new ways.
Audience: Both Grad & Undergrad

2. Demonstrate economic reasoning about the economy at a micro and macro level by applying the foundations of mainstream economics.
Audience: Both Grad & Undergrad

3. Explain credit market rationing and its impact on markets for housing, small business loans and other investments.
Audience: Both Grad & Undergrad

4. Articulate the contributing factors of bubbles and crashes in asset prices.
Audience: Both Grad & Undergrad

5. Articulate the role of money and banking in the inter-temporal allocation of resources.
Audience: Both Grad & Undergrad

6. Articulate your perspectives on fundamental questions like: Why we use money? What is a bank? How do organizations (like firms or families) form?

Audience: Both Grad & Undergrad

7. Construct and analyze the three generations of money search models and apply this framework appropriately to real-world economic and financial issues.
Audience: Graduate

FINANCE 535 – APPLIED EQUITY MARKETS RESEARCH 1
3 credits.

A capstone experience focused on investments, research, sales and trading which is designed to provide the opportunity to learn and perform many of the practical skills necessary to research, analyze and pitch equity securities as long investments and/or short sales. Application required.
Requisites: Consent of instructor
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Assess business models so as to understand the future performance and intrinsic value of a particular business
Audience: Undergraduate

2. Develop a framework to assess business quality and how it might change over time
Audience: Undergraduate

3. Identify key drivers of an industry and company
Audience: Undergraduate

4. Analyze the financial information that comes to market from the companies as a means to extrapolate future information
Audience: Undergraduate

5. Develop a view (a preliminary investment thesis) utilizing a methodology to develop forecasts and projected financial model for a company
Audience: Undergraduate

6. Write a short investment thesis and recommendation for a company's stock
Audience: Undergraduate

FINANCE 536 – APPLIED EQUITY MARKETS RESEARCH 2
3 credits.

A second capstone experience involving self-directed research and analysis in the areas of investments, research, sales and trading designed to provide the opportunity to apply concepts learned in FINANCE 535.
FINANCE 535
Requisites: Consent of instructor
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Analyze two specific companies and their business models to estimate likely future performance and intrinsic value.
Audience: Undergraduate

2. Describe the competitive dynamics in the related industries
Audience: Undergraduate

3. Explain how key drivers affect a company's financials
Audience: Undergraduate

4. Conduct field research to assess the business models and validate key drivers
Audience: Undergraduate

5. Create a survey to views (preliminary investment theses) with evidence from field research
Audience: Undergraduate

6. Create a pitch report for each stock summarizing conclusions with supporting analysis
Audience: Undergraduate

7. Develop presentation techniques through in-class stock pitch presentations
Audience: Undergraduate

FINANCE 601 – STRATEGIC PLANNING FOR ESTATES AND BUSINESS TRANSITIONS
3 credits.

Introduces and broadens understanding of the intricacies surrounding wealth preservation, intergenerational wealth transfer, and trust financial services. Delves into the legal, tax, and financial aspects of estate planning, business succession strategies, and efficient wealth transfer techniques. Explore cutting-edge approaches for mitigating tax liabilities, navigating complex family dynamics, and structuring customized solutions for diverse client needs while highlighting career opportunities within the trust financial services industry and preparing for a range of professional paths. Gain the expertise needed to effectively advise clients and guide them through the process of safeguarding and transferring their wealth, ensuring a lasting financial legacy.
Requisites: (FINANCE 305, 325, and ECON/FINANCE 320) or FINANCE 700, or declared in the undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply Estate Planning terminology, planning process, strategies and illustrate tax and non-tax outcomes.
Audience: Both Grad & Undergrad

2. Procure and analyze select qualitative and quantitative data to prioritize goals, articulate current plan weaknesses and formulate alternative options.
Audience: Both Grad & Undergrad

3. Demonstrate how various Trust arrangements might maximize the benefits or improve the efficiency of an estate plan.
Audience: Both Grad & Undergrad

4. Collaborate with other professionals, on the development of an Estate Plan by experiencing the Multi-Disciplinary Team Approach to Estate Planning.
Audience: Both Grad & Undergrad

5. Apply the CFP Board Financial Planning Practice Standards and Code of Ethics to the practice of Estate Planning.
Audience: Both Grad & Undergrad

6. Describe the various methods, benefits and tax treatment of disposing a closely-held business during life and at death.
Audience: Graduate

FINANCE 602 – WEALTH MANAGEMENT & FINANCIAL PLANNING
3 credits.

Capstone bridging prior academic coursework with professional practice and standards. Employ skills and tools needed to acquire the relevant information and develop a comprehensive financial plan for a client. Provides a complete review of the financial planning CFP Board topics, including ethics and principles of communication and counseling.
Requisites: Consent of instructor
Course Designation: Core GenEd - Social & Behavioral Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate a comprehensive understanding of the content found within the Financial Planning curriculum and effectively apply and integrate thisinformation in the formulation of a financial plan.
Audience: Both Grad & Undergrad

2. Effectively communicate the financial plan, both orally and in writing,including information based on research, peer, colleague or simulated client interaction and/or results emanating from synthesis of material.
Audience: Both Grad & Undergrad

3. Collect all necessary and relevant qualitative and quantitative informationrequired to develop a financial plan.
Audience: Both Grad & Undergrad

4. Analyze personal financial situations, evaluating clients' objectives, needs,and values to develop an appropriate strategy within the financial plan.
Audience: Both Grad & Undergrad

5. Demonstrate logic and reasoning to identify the strengths and weaknesses of various approaches to a specific problem.
Audience: Both Grad & Undergrad

6. Evaluate the impact of economic, political, and regulatory issues with regard to the financial plan.
Audience: Graduate

7. Apply the CFP Board Financial Planning Practice Standards to the financialplanning process (including applying the regulations and ethical behavior that governs the relationship between the planner and the client).
Audience: Both Grad & Undergrad

FINANCE 610 – BANK SIMULATION AND STRATEGY
3 credits.

Covers advanced asset-liability, hedging, tax minimization, merger/acquisitions and economic value added strategies for depository financial institutions. Students practice these strategies by managing their own bank in a computer simulation model, merging with or acquiring other student's banks using MA software, and by playing a foreign exchange trading simulation.
Requisites: FINANCE 410
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

FINANCE 615 – CRYPTOCURRENCIES, BLOCKCHAIN AND DIGITAL ASSETS
3 credits.

Delving into the experimental and evolving landscape of cryptocurrencies, blockchain and digital assets, technologies that have impacted the financial world, for good and bad, over the last decade. A primary focus on "Decentralized Finance" ("DeFi") and its application to specific financial use cases.
Requisites: (FINANCE 305, 325, and ECON/FINANCE 320) or declared in undergraduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe the historical context and evolution of cryptocurrencies, blockchain and digital assets.
Audience: Both Grad & Undergrad

2. Describe the fundamentals of decentralized finance, including how it works, its strengths and limitations and how it differs from traditional finance solutions.
Audience: Both Grad & Undergrad

3. Analyze how well decentralized finance meets the requirements of important financial use cases.
Audience: Both Grad & Undergrad

4. Evaluate a blockchain, cryptocurrency or digital asset project that applies decentralized finance concepts.
Audience: Both Grad & Undergrad

5. Analyze the potential positive impacts of cryptocurrencies, blockchain and digital assets on society, as well how they are overhyped and unlikely to deliver value.
Audience: Graduate

FINANCE 635 – BUSINESS VALUATION
3 credits.

Theory and practice of business valuation: using financial statements, modeling cash flows, present value, using multiples.
Requisites: (FINANCE 305, 325, and ECON/FINANCE 320) or FINANCE 700, or declared in the undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate a fundamental knowledge of the terminology, foundational concepts and tools necessary to value companies
Audience: Both Grad & Undergrad

2. Demonstrate the ability to forecast and use appropriate financial statements to determine the value of companies
Audience: Both Grad & Undergrad

3. Utilize financial data sources for valuation
Audience: Both Grad & Undergrad

4. Build valuation models using spreadsheets
Audience: Both Grad & Undergrad

5. Articulate the differences as well as the common elements among the various valuation models
Audience: Both Grad & Undergrad

6. Apply common valuation methods
Audience: Both Grad & Undergrad

7. Incorporate environmental, social, and governance (ESG) into company valuation
Audience: Graduate

FINANCE 640 – INTRODUCTION TO CREDIT ANALYSIS & TRADING
3 credits.

Thorough grounding in credit instruments. Topics include loans, bonds, credit default swaps, and trading strategies.
Requisites: (FINANCE 305, 325, and ECON/FINANCE 320) or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Forecast a company's financial capital structure, liquidity and credit metrics, which will indicate whether the credit profile will improve or deteriorate.
Audience: Both Grad & Undergrad

2. Identify the qualitative and quantitative factors that go into evaluating a company's current and future credit profile and assigning credit ratings.
Audience: Both Grad & Undergrad

3. Develop a Bloomberg Launchpad to monitor news and markets and use Bloomberg to evaluate relative value of bonds, loans and credit default swaps.
Audience: Both Grad & Undergrad

4. Explain the similarities and differences in evaluating industrials, financial institutions, municipals and developed and emerging market sovereign debt.
Audience: Both Grad & Undergrad

5. Read and evaluate corporate credit documentation including bank credit agreements and bond prospectuses.
Audience: Both Grad & Undergrad

6. Describe the hierarchy of decisions and different strategies for managing fixed income portfolios and how to evaluate performance vs a benchmark.
Audience: Both Grad & Undergrad

7. Prepare comparable (comps) sheet analysis for financial and sovereign issuers and identify trading opportunities.
Audience: Graduate

FINANCE 645 – INTRODUCTION TO APPLIED SECURITY ANALYSIS
3 credits.

Focuses on industry analysis and security selection, with particular emphasis on identification of value drivers and on communicating the idea to a portfolio manager.
Requisites: Declared in Finance, Investment and Banking: Applied Security Analysis, MBA or Finance, Investment and Banking: M.S.
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply an analytical framework to a security selection process, including identifying and forecasting key drivers of company performance.
Audience: Both Grad & Undergrad

2. Produce a three-statement financial model with relevant ratios and forward-looking forecasts.
Audience: Both Grad & Undergrad

3. Apply absolute and relative valuation approaches to companies to assist with making investment decisions.
Audience: Both Grad & Undergrad

4. Articulate how analysts conduct field research, including sources frequently used in researching companies, management teams and industries.
Audience: Both Grad & Undergrad

5. Formulate an investment thesis statement and persuasively communicate the recommendation to others.
Audience: Both Grad & Undergrad

6. Establish a network of contacts and relationships in the investment community through the interview process and by participating in alumni and industry events.
Audience: Graduate

FINANCE 646 – INTRODUCTION TO APPLIED PORTFOLIO MANAGEMENT
3 credits.

Focuses on portfolio management, including development and implementation of the decision making process.
Requisites: FINANCE 645
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Produce an economic forecast to be used in developing equity and fixed income market return forecasts and in managing individual equity and fixed income portfolios.
Audience: Both Grad & Undergrad

2. Recommend a tactical asset allocation utilizing equity and fixed income return and risk forecasts.
Audience: Both Grad & Undergrad

3. Develop methodology for allocating assets between the equity and fixed income alternatives that maximizes expected return subject to risk within specified guidelines.
Audience: Both Grad & Undergrad

4. Create an investment philosophy and related portfolio decision making process for its implementation.
Audience: Both Grad & Undergrad

5. Develop a process to identify and critique new investment opportunities.
Audience: Both Grad & Undergrad

6. Monitor and control the risk of an investment portfolio.
Audience: Both Grad & Undergrad

7. Enhance existing network of contacts and relationships in the investment community for job placement, and industry events.
Audience: Graduate

FINANCE 650 – MERGERS AND ACQUISITIONS
2-3 credits.

Study of the market for corporate control including mergers and tender offers. Motives for business combinations; impacts on security holders, managers, labor, economic efficiency; federal and state laws; offensive and defensive strategies.
Requisites: (FINANCE 305, 325, and ECON/FINANCE 320) or FINANCE 700 and (FINANCE 635 or 725)
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the motives for acquisition and how to value an acquisition target both independently and as part of the integrated firm.
Audience: Both Grad & Undergrad

2. Utilize financial statements to calculate earnings, leverage, and cash flow projections resulting from an acquisition or leveraged buyout
Audience: Both Grad & Undergrad

3. Demonstrate a basic understanding of the legal framework underlying the merger transaction, including negotiation, announcement, antitakeover defenses, the fiduciary duties of the board of directors and management, and antitrust regulation
Audience: Both Grad & Undergrad

4. Explain the mechanics of takeover defense strategies, their use and misuse by incumbent management, and the concept of managerial entrenchment
Audience: Both Grad & Undergrad

5. Parse the details of a merger from the disclosed agreement and to understand the incentives of the various parties involved, including target and acquirer management and the facilitating investment bank
Audience: Both Grad & Undergrad

6. Develop a broad theoretical framework that connects the theories of capital structure, managerial entrenchment, corporate governance and diversification to the decision to merge and the financing of the transaction.
Audience: Graduate

FINANCE 675 – APPLIED SECURITY ANALYSIS AND INVESTMENT MANAGEMENT I
5 credits.

Management of an actual portfolio of investments. Engage in security analysis, develop a portfolio policy, and participate in field research such as trips to interview the management of potential portfolio acquisitions.
Requisites: Consent of instructor
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify a company's key sources of competitive advantage and determine the sustainability of that advantage.
Audience: Both Grad & Undergrad

2. Build financial statement models that help determine likely company outcomes and identify key drivers and risks.
Audience: Both Grad & Undergrad

3. Develop a macroeconomic outlook and an interest rate forecast that is consistent with that outlook.
Audience: Both Grad & Undergrad

4. Demonstrate skills to differentiate between analytical mistakes and natural volatility.
Audience: Both Grad & Undergrad

5. Assess portfolio level risk using traditional measures of volatility and projected risk on both an absolute and relative basis using factor risk models.
Audience: Both Grad & Undergrad

6. Cultivate high-level interviewing skills designed to differentiate knowledge and experience from other MS/MBA student applicants.
Audience: Both Grad & Undergrad

7. Articulate how ethical behavior, particularly as described in the CFA Institute's Code of Ethics and Professional Conduct, serves the best interests of both clients and investment professionals.
Audience: Both Grad & Undergrad

8. Apply contemporary research to enhance portfolio management strategies.
Audience: Graduate

FINANCE 676 – APPLIED SECURITY ANALYSIS AND INVESTMENT MANAGEMENT II
4 credits.

Management of an actual portfolio of investments. Engage in security analysis, implement a portfolio strategy, and report portfolio performance and diagnostic analytics to the trustees of the portfolio.
Requisites: FINANCE 675 (or FINANCE 835 prior to Fall 2026)
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Assess the value of publicly traded equity and fixed income securities.
Audience: Both Grad & Undergrad

2. Demonstrate an understanding of the causes of mispriced securities: how to identify mispriced securities and how to evaluate the success of an evaluation process and decisions through the active management of a portfolio.
Audience: Both Grad & Undergrad

3. Develop portfolios designed to produce consistent positive returns and/or outperform benchmarks without taking on significant absolute or incremental risk.
Audience: Both Grad & Undergrad

4. Assess portfolio level risk using traditional measures of volatility and projected risk on both an absolute and relative basis using factor risk models.
Audience: Both Grad & Undergrad

5. Recognize and apply the importance of ethical behavior within the investment industry and practice the application of a framework to work through ethical dilemmas.
Audience: Both Grad & Undergrad

6. Utilize a team structure to sharpen communication and collaboration skills in an effort to successfully execute an active management strategy, and obtain an investment industry job upon graduation.
Audience: Both Grad & Undergrad

7. Apply contemporary research to enhance portfolio management strategies.
Audience: Graduate

FINANCE 700 – INTRODUCTION TO FINANCIAL MANAGEMENT
2-3 credits.

Introduction to financial management of firms and investment decision making; both theory and practice are emphasized. Topics covered include the financial environment and securities markets, financial statements and analysis, working capital management and capital budgeting, cost of capital, dividend policy, asset valuation, investments, decision making under uncertainty and selected topics such as mergers, options, futures.
Requisites: Declared in a Master of Business Administration degree program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. compute present values, future values, and returns under different compounding assumptions
Audience: Graduate

2. apply discounted cash flow analysis in a variety of contexts and determine the appropriate discount rate for these calculations
Audience: Graduate

3. outline the key considerations in potentially complex capital budgeting problems and employ appropriate decision rules to evaluate projects
Audience: Graduate

4. explain verbally and demonstrate quantitatively the power of diversification and the risk-return tradeoff
Audience: Graduate

5. characterize an efficient market and explain the implications of market efficiency for investors and corporations
Audience: Graduate

6. engage in the study of finance topics with classmates from a variety of personal, professional, and educational backgrounds so as to understand themselves better and how they can positively contribute to both their own and others' success
Audience: Graduate

FINANCE 720 – INVESTMENT THEORY AND PRACTICE
3 credits.

Development of the theory, instruments, techniques and practice of modern investment management. Topics include asset pricing and valuation under certainty and uncertainty, portfolio management, determination of interest rates, immunization strategies and derivative securities.
Requisites: (FINANCE 700 and GEN BUS 704), declared in graduate Business Exchange program, or Financial Economics MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Formulate the trade-off between risk and return for real-world investment problems
Audience: Graduate

2. Describe the distribution of returns on broad asset classes
Audience: Graduate

3. Use portfolio optimization techniques to develop an asset allocation for an investor
Audience: Graduate

4. Examine factor models of returns
Audience: Graduate

5. Compare different equilibrium security pricing models
Audience: Graduate

6. Debate market efficiency
Audience: Graduate

7. Compute bond prices and relate them to term structure theory
Audience: Graduate

8. Apply interest rate risk management to solve real-world problems
Audience: Graduate

FINANCE 725 – CORPORATION FINANCE THEORY AND PRACTICE
2-3 credits.

Theory and practice of financial management of firms. Techniques of capital budgeting under certainty and uncertainty; valuation of projects and firms; theory of capital structure; dividend policy; cost of capital; mergers and acquisitions.
Requisites: FINANCE 700
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain why, when and how companies raise debt and equity and decide on the mix of both sources of finance.
Audience: Graduate

2. Recognize the effect of agency costs – adverse selection and moral hazard - on the capital structure of the firm.
Audience: Graduate

3. Explain how firms choose to structure hybrid securities to reduce market frictions.
Audience: Graduate

4. Differentiate how firms manage risks both internally as well as with derivative contracts.
Audience: Graduate

5. Summarize the different ways firms return money to investors and the logic behind different payout policies.
Audience: Graduate

FINANCE 730 – DERIVATIVE SECURITIES - THEORY AND PRACTICE
3 credits.

Covers the pricing and uses of the most common derivative contracts including options, forward contracts, futures contracts, and exchange-traded funds (ETFs). Also emphasizes a practical understanding of trading and management of portfolios of these contracts, and makes use of an online trading platform. Mathematical and statistical analyses are used throughout.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Compare and contrast the risk and theoretical valuation of derivative securities in competitive markets.
Audience: Graduate

2. Execute "real" trades through Interactive Brokers to connect the theories of hedging and trading derivatives to real-life applications.
Audience: Graduate

3. Summarize research that identifies derivative trading strategies.
Audience: Graduate

FINANCE 740 – ANALYSIS OF FIXED INCOME SECURITIES
3 credits.

Detailed coverage of fixed income securities and their derivatives; asset backed/mortgage backed securities; pricing and portfolio strategies; term structures models and other analytical tools.
Requisites: (FINANCE 700 and GEN BUS 704) or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Utilize and be comfortable with the mathematics of fixed income markets.
Audience: Graduate

2. Utilize appropriate tools and techniques, including various measures of duration and convexity, to make decisions about trading and hedging portfolios of fixed income securities.
Audience: Graduate

3. Explain the structure and uses of fixed income derivative instruments, including options, forwards, and swaps.
Audience: Graduate

FINANCE/INTL BUS 745 – MULTINATIONAL BUSINESS FINANCE
2-3 credits.

Theory of business finance as applied to the operations of multinational firms; financial analysis and control of foreign investment decisions; working capital management; multinational credit institutions and capital markets; special accounting problems and trends in international monetary affairs.
Requisites: FINANCE 700
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate the knowledge and skills needed as a senior financial officer of an international firm.
Audience: Graduate

2. Understand how the international economic and financial environment and the exchange rates affect financial decisions by firms.
Audience: Graduate

3. Apply the methods used to measure, manage and analyze the effects posed by exchange rate uncertainty to the income statement and balance sheet of a firm.
Audience: Graduate

4. Articulate the choices and challenges faced by managers when sourcing funds in the global capital markets, and in making complex foreign investment decisions
Audience: Graduate

FINANCE 757 – ENTREPRENEURIAL FINANCE
2-3 credits.

About a half of all new businesses fail in the first five years. Learn about the tools, state-of-the-art valuation methods, and practical knowledge that are needed to make appropriate financing decisions in such highly uncertain environments.
Requisites: (FINANCE 700 and GEN BUS 704) or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand the different valuation methods, financing alternatives and the ways in which strategic choices interact with valuation and fundraising
Audience: Graduate

2. Integrate the critical roles and processes of the venture capital (VC) industry, the financial instruments they typically use and details of VC contracts
Audience: Graduate

3. Use the necessary theoretical and practical tools to contextualize which valuation method and assumptions are most appropriate in different circumstances
Audience: Graduate

FINANCE 760 – CURRENT TOPICS AND APPLIED LEARNING IN FINANCE
1 credit.

Examination and reflection of finance career pathways and current finance skills, applications and practices. Career development techniques and tools, communication and professional skills.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Expand professional network and reflect on interactions with industry professionals
Audience: Graduate

2. Articulate various career pathways and roles within finance
Audience: Graduate

3. Demonstrate developed professional skills, both written and verbal
Audience: Graduate

FINANCE 765 – CONTEMPORARY TOPICS
1-4 credits.

Exploration of advanced subject areas possibly to be introduced into the business curriculum.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

FINANCE 799 – READING AND RESEARCH-FINANCE
1-6 credits.

Individual work suited to the needs of graduate students may be arranged both during regular sessions and the intersession periods.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

FINANCE 830 – ADVANCED DERIVATIVE SECURITIES
3 credits.

Introduces continuous-time financial models essential for the advanced analysis of derivative securities. Discuss the fundamental mathematical concepts and tools from continuous-time stochastic processes including Brownian motion, Poisson processes, stochastic calculus, and change of measure. This provides a framework for analyzing derivative securities including their pricing, hedging, and risk management. In particular, covers the Black-Scholes and stochastic volatility models for equity options; basic term-structure modeling for interest rate derivatives; and reduced-form credit-risk models. Emphasis is put on applications and economic interpretation rather than mathematical rigor.
Requisites: Declared in Financial Economics MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Build models for pricing and risk-managing equity, interest rate, and credit derivatives.
Audience: Graduate

2. Explain the relationship between martingales and stochastic discount factors.
Audience: Graduate

3. Apply the rules of stochastic calculus to derive valuation equations for contingent claims relying on the concepts of no-arbitrage and replication.
Audience: Graduate

4. Price derivatives using analytical methods, including log-normal and exponential-affine models.
Audience: Graduate

5. Price derivatives using numerical methods, including Monte Carlo simulations and numerical solutions to dynamic valuation equations.
Audience: Graduate

FINANCE 850 – APPLIED CORPORATE FINANCE I
4 credits.

Advanced corporate finance course that provides graduate students practical experience by working on consulting projects. Students work on applied projects in the areas of capital budgeting, capital structure and cash distribution policies. Emphasis on application of theoretical corporate finance concepts.
Requisites: Declared in Finance, Investment and Banking: Corporate Finance and Investment Banking graduate program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

FINANCE 920 – THEORY OF FINANCE
3 credits.

Intensive review of modern theories of corporate finance and investments.
Requisites: Declared in Business PHD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

FINANCE 970 – SEMINAR- INVESTMENTS (PH.D.)
3 credits.

Intensive study and critical examination of recent empirical and theoretical literature investments.
Requisites: Declared in Business PHD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

FINANCE 971 – SEMINAR-CORPORATE FINANCE (PH.D.)
1-3 credits.

Intensive study and critical examination of recent empirical and theoretical literature in corporate finance.
Requisites: Declared in Business or Economics PhD programs
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate the theoretical body of work that comprises corporate finance, including its fundamental theorems
Audience: Graduate

2. Examine the big open questions in theoretical research in corporate finance
Audience: Graduate

3. Apply the quantitative methods used in corporate finance research
Audience: Graduate

4. Utilize statistical software and financial databases to perform econometric analyses commonly used in academic corporate finance research.
Audience: Graduate

5. Use standard reduced-form and structural approaches to address problems of endogeneity in answering questions of causality.
Audience: Graduate

6. Identify, describe, and produce questions at the frontier of research in academic corporate finance.
Audience: Graduate

FINANCE 972 – TOPICS SEMINAR-FINANCE PHD
3 credits.

Special topics of current or emerging interest in financial economics.
Requisites: Declared in Business PHD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

FINANCE 973 – SEMINAR-WORKSHOP IN FINANCE
2 credits.

Seminar primarily devoted to the generation of original research in the field of finance for the PhD dissertation and subsequent publication in the academic literature.
Requisites: Declared in Business PHD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze others' research critically, as well as their own
Audience: Graduate

2. Communicate research findings accurately and effectively
Audience: Graduate

3. Access current top-tier research in Finance
Audience: Graduate

FINANCE 974 – ADVANCED TOPICS SEMINAR-FINANCE PHD
3 credits.

Discuss topics of current and emerging interests in financial economics; analyze open questions and new methodologies that are being applied to address these questions. Build on knowledge in financial economics and further previous exposure to both continuous-time and discrete-time dynamic models. Topics will evolve over time as new papers will be added and addressed.
Requisites: Declared in Business or Economics PhD programs
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate frontier research papers in financial economics.
Audience: Graduate

2. Formulate a new research question based on surveyed literature.
Audience: Graduate

3. Effectively present research findings in an academic setting.
Audience: Graduate

FINANCE 990 – FINANCE INDEPENDENT RESEARCH PHD THESIS
1-12 credits.

Individual work to complete dissertation requirement of Ph.D. program.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

FINANCE 999 – READING AND RESEARCH-FINANCE PHD
1-6 credits.

Individual work suited to the needs of Ph.D. students may be arranged both during regular sessions and during the intersession periods.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

FOLKLORE PROGRAM (FOLKLORE)

FOLKLORE 100 – INTRODUCTION TO FOLKLORE
3 credits.

Surveys folklore in the United States and around the world, with a comparative emphasis on ways in which individuals and groups use beliefs, songs, stories, sayings, dances, festivals, and artifacts to address issues of identity, authenticity, and authority, in complex societies.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Comm QR - Communication B
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain key concepts of folklore studies.
Audience: Undergraduate

2. Recognize and describe key concepts important to the study of folklore as related to the cultures of people in the United States of America.
Audience: Undergraduate

3. Recognize and describe a variety of vernacular expressions of the cultures of people in the United States of America.
Audience: Undergraduate

4. Ethically apply folkloristic research methodologies used to document, describe, and discuss culture.
Audience: Undergraduate

5. Present your understanding of folklore to a variety of audiences, including scholars and the general public, through folkloristic products in the form of essays, oral presentations, and digital products.
Audience: Undergraduate

FOLKLORE/MUSIC 103 – INTRODUCTION TO MUSIC CULTURES OF THE WORLD
3 credits.

An introductory ethnomusicology course providing a variety of ways to approach musics typically not covered in music history courses. Active engagement with these musics within their larger world contexts.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Engage with various musics on students' own terms
Audience: Undergraduate

2. Speak and write clearly about what is heard.
Audience: Undergraduate

3. Recognize and contextualize the several genres of music that represent each cultural area selected for study in the course
Audience: Undergraduate

4. Think rigorously about how positionality, including your own, affects listening and knowledge practices
Audience: Undergraduate

5. Have learned something about yourself -- strengths, weaknesses, biases, desires, tendencies, curiosities
Audience: Undergraduate

FOLKLORE/RELIG ST 104 – SACRED PLACES AND JOURNEYS
3 credits.

An introduction to the study of religion through the lens of sacred places and journeys, including pilgrimage.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply key theories in the study of religion to varied religious phenomena in research and essay writing
Audience: Undergraduate

2. Articulate the influence of positionality in the study of religion
Audience: Undergraduate

3. Articulate how places become perceived, constructed and used as sites of sacrality in different religious, spiritual and secular contexts
Audience: Undergraduate

4. Articulate the complex ways that migration and politics affect the perception and use of sacred sites
Audience: Undergraduate

5. Discuss religious matters in a respectful but detached (non-proselytizing) manner
Audience: Undergraduate

FOLKLORE/GNS 200 – FOLKLORE OF CENTRAL, EASTERN AND NORTHERN EUROPE
3 credits.

Folklore of Central, Eastern and Northern Europe and among emigrants from these regions in North America. A survey of genres of folklore, history of research, and modes of interpretation, past and present.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Comm QR - Communication B
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Recognize and understand key concepts important to the study of folklore as related to the cultures of people in and from the countries of Central, Eastern and Northern Europe.
Audience: Undergraduate

2. Articulate and apply methods folklorists use to document, describe, and discuss culture.
Audience: Undergraduate

3. Produce folkloristic products in the form of essays, oral presentations, and digital products.
Audience: Undergraduate

FOLKLORE/AFRICAN 210 – THE AFRICAN STORYTELLER
3 credits.

The oral tradition and the written word; the composition of stories, relationship between performer and audience, and transmission of tradition in various African societies.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recognize the diversity of the African continent and its storytelling traditions.
Audience: Undergraduate

2. Examine the ways African storytellers represent human experiences.
Audience: Undergraduate

3. Interpret global processes (social, cultural, political, economic, historical, etc.) through the lens of African storytelling.
Audience: Undergraduate

4. Identify, examine, and illustrate knowledge of various storytelling techniques, in both the oral and written storytelling traditions of Africa.
Audience: Undergraduate

5. Consider various cultural, social, and historical questions relevant to African storytelling.
Audience: Undergraduate

6. Practice identifying, examining and interpreting the relationship between literary and cultural, social, and historical discourses.
Audience: Undergraduate

7. Craft, support, and articulate arguments about cultural, social, and historical processes.
Audience: Undergraduate

FOLKLORE/ANTHRO/INTL ST/LINGUIS 211 – GLOBAL LANGUAGE ISSUES
3 credits.

Focuses on language and its culture, example topics include: extinction and revival, language and nationhood, how widely and deeply languages differ, language and worldview, writing systems and literacy, language discrimination and inequality.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify ways that geographic, social, and political events, movements, and trends shape the sociolinguistic context of the world's languages
Audience: Undergraduate

2. Demonstrate an understanding of subfields of global sociolinguistic inquiry, including language contact, variation, change, and death; language revitalization; the intersections of language, race, and ethnicity; the intersections of language and gender, and sexuality
Audience: Undergraduate

3. Critically evaluate specific examples of language use in a variety of linguistic and cultural contexts
Audience: Undergraduate

4. Design and conduct a sociocultural linguistic research project, including: identify a research question; collect appropriate resources and data; conduct data analysis and interpretation; draw conclusions, and summarize results
Audience: Undergraduate

FOLKLORE 215 – ELEMENTARY TOPICS IN FOLKLORE
1-3 credits.

Exploration of various topics in the study of folklore, folklife, myth, foodways, or music.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate an understanding of general themes and concepts in the folklore topic being covered.
Audience: Undergraduate

2. Articulate the ways folklore affects and is affected by the society in which it functions.
Audience: Undergraduate

3. Communicate effectively through written essays, oral presentations and discussion.
Audience: Undergraduate

FOLKLORE 220 – THE FOLK TALE
3 credits.

Types of heroes, social functions, and tellers; tales from four cultures.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe key concepts of folklore studies concerning folk tales.
Audience: Undergraduate

2. Examine the nature, context, and social functions of folk tales historically and in contemporary life.
Audience: Undergraduate

3. Employ appropriate methods and concepts for folk tale collection and analysis.
Audience: Undergraduate

4. Identify key ethical issues involved in folk tale collection, representation, and analysis.
Audience: Undergraduate

FOLKLORE 225 – HORROR AS EXPRESSIONS OF NATIONAL ANGST
3 credits.

Explore horror as cultural phenomenon and how it represents various forms of cultural/national angst.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize, describe and analyze cultural phenomena; specifically horror narrative and the communities that watch them, and put it into context
Audience: Undergraduate

2. Communicate effectively through written essays, oral presentations and discussion
Audience: Undergraduate

3. Analyze the connections between horror narrative and the wider workings of culture
Audience: Undergraduate

FOLKLORE 230 – INTRODUCTION TO AMERICAN FOLKLORE
3 credits.

Folklore of ethnic, regional, religious, and occupational cultures, emphasizing how diverse peoples (African Americans, American Indians, Appalachians, Chicanos, Germans, Irish, Jews, Mormons, miners, service workers, etc.) use traditional festivals, artifacts, songs and stories to express their experiences within American life.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Construct a working definition of folklore.
Audience: Undergraduate

2. Position the creation of American folklore tradition within the wider context of world folklore.
Audience: Undergraduate

3. Interpret the ways that diverse identities of Americans are commonly formed, expressed, and changed in various settings.
Audience: Undergraduate

4. Analyze American folklore narratives to interpret how they reflect and respond to national anxieties, cultural tensions, and historical moments.
Audience: Undergraduate

FOLKLORE/MEDIEVAL/SCAND ST 235 — THE WORLD OF SAGAS
3 credits.

The Icelandic sagas viewed in their social, cultural, and literary contexts. An introduction to one of the greatest bodies of vernacular literature of the early Middle Ages.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize, describe and analyze shifting geographic, cultural, and ethnic/racial factors in the Northern European region during the Viking Age, and put it into context
Audience: Undergraduate

2. Identify and distinguish between different types of sources used in the study of the Nordic region during the Viking Age
Audience: Undergraduate

3. Demonstrate a general understanding of major scholarly approaches, concepts and current research findings concerning the Nordic region during the Viking Age
Audience: Undergraduate

4. Synthesize information, engage in discussion and research, and argue persuasively about key topics in the Nordic region during the Viking Age
Audience: Undergraduate

5. Analyze the connections between images of the Vikings Age and the wider workings of modern culture
Audience: Undergraduate

6. Guide, mentor and support peers to achieve excellence in practice of the discipline
Audience: Undergraduate

7. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view
Audience: Undergraduate

FOLKLORE 315 — INTERMEDIATE TOPICS IN FOLKLORE
1-3 credits.

Exploration of various topics in the study of folklore, folklife, myth, foodways, or music.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Synthesize the written and material information to demonstrate an understanding of the knowledge from the course
Audience: Undergraduate

2. Communicate effectively through written essays, oral presentations and discussion.
Audience: Undergraduate

3. Recognize, describe, and analyze cultural concepts, putting them into context.
Audience: Undergraduate

FOLKLORE 317 — THE IRISH TRADITION
3 credits.

Survey of Irish folklore and folklife, including narrative, music, dance, customs, material culture, and foodways, in both Ireland and beyond.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and characterize major genres of folklore and folklife in the lives of Irish people inside and outside Ireland, past and present.
Audience: Undergraduate

2. Apply folkloristic scholarship to specific ethnographic field data or archival materials through preparation of interpretative essays and other products.
Audience: Undergraduate

3. Recognize and articulate the ways in which Irish history reflects or illustrates wider processes of colonization, disenfranchisement, migration, nation-building, and cultural diversity at work in other parts of the world today.
Audience: Undergraduate

4. Engage with contemporary scholarship on Irish folklore and gain skills in academic research on the topic.
Audience: Graduate

FOLKLORE/AFROAMER/ASIAN AM/DANCE 319 – AFRO ASIAN IMPROV: FROM HIP HOP TO MARTIAL ARTS FUSION
3 credits.

An Afro Asian perspective provides a lens through which intersections between Asian American and African American dance and martial arts are studied and practiced. Asian American and African American movement genres provide tools to explore dance fusion, choreography, and improvisation, to create dances informed by African American and Asian American legacies of struggle, innovation and transformation, while cognizant of historical forces of oppression and racism. Building connections through respectful communication with others are learned through dance practice, discussion and writing about concepts learned through readings, videos, and guest artist visits. Engagement with dance as a cultural vehicle for creative problem-solving and risk-taking occurs through guided class or smaller group activities.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Articulate perspectives on the diversity of the human condition through critical andinterpretive skills to analyze the past, present, and future of human movement in a complex world
Audience: Undergraduate

2. Prepare for participation in a multicultural society through developing a consciousness of self and other and building empathy towards others' perspective, thinking critically and questioning assumptions of certain valued or devalued histories, and analyzing how these differences have promulgated disparities in contemporary American society
Audience: Undergraduate

3. Demonstrate skills in writing and speaking about dance in its historical, contemporary and cultural contexts
Audience: Undergraduate

4. Articulate Afro Asian perspectives on the intersections of Asian American and African American cultural, social and historical knowledge, and communicate important ideas through dance and story-telling performance
Audience: Undergraduate

5. Practice Asian American and African American foundational movement toolboxes as a basis for improvisation and dance choreography supported by concepts of theater and culturally-based learning traditions
Audience: Undergraduate

6. Engage in imagination-led and creative problem-solving movement activities
Audience: Undergraduate

7. Build connections with others through class practice, discussions, working groups within and outside of class
Audience: Undergraduate

8. Use the skills you learn to lead a calmer, more focused, responsible and productive life
Audience: Undergraduate

FOLKLORE 320 – FOLKLORE OF WISCONSIN
3 credits.

Introduction to folk cultural groups and folklore forms of Wisconsin.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize and apply important concepts in folklore studies.
Audience: Undergraduate

2. Describe the range of cultures and cultural activities throughout Wisconsin.
Audience: Undergraduate

3. Connect personal experience with the course material.
Audience: Undergraduate

4. Recognize history's impact on the present.
Audience: Undergraduate

5. Conduct folkloristic research and analyze cultural traditions.
Audience: Undergraduate

FOLKLORE/RELIG ST 326 – THE SUPERNATURAL IN THE MODERN WORLD
3 credits.

Explores evidence of belief in the supernatural in the modern world as it appears in the context of folk religion, folk medicine, legends, folk drama, ritual and custom, and media accounts and presentations. Surveys scholarly approaches to the topic. Course not available to students with credits for Folklore 415 before Fall 2023.
Requisites: Satisfied Communications A or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize and explore different types of supernatural narratives, practices, and beliefs from around the world and throughout history.
Audience: Undergraduate

2. Analyze the roles that supernatural narratives, practices, and beliefs play in human societies, and in the lives of individuals.
Audience: Undergraduate

3. Analyze "the supernatural" in relationship to historical memories, cultural anxieties, folk traditions, spiritual beliefs, physiological sensations, political conflicts, environmental disasters, and existential imperatives.
Audience: Undergraduate

4. Engage with the course themes via analytical and creative written responses, experiential learning experiments, and the active documentation of folklore.
Audience: Undergraduate

FOLKLORE/LITTRANS 327 – VAMPIRES
3 credits.

Explores the development of the vampire legend in folklore, rumor, literature, cinema, television, and popular culture and in relation to topics such as colonization, race, gender, sexuality, and class.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the evolving characteristics of vampire traditions from early nineteenth-century European folklore through European and American literature, film, and other media.
Audience: Undergraduate

2. Describe the interplay between folklore and authored cultural works over time, with examples drawn from the circulation of vampire concepts between informal and authored products.
Audience: Undergraduate

3. Interpret representations of the vampire in relation to historical and cultural situations, with particular reference to colonization, race, gender, sexuality, and class.
Audience: Undergraduate

FOLKLORE/MEDIEVAL/RELIG ST/SCAND ST 342 — NORDIC MYTHOLOGY
3 credits.

Mythology, literature, ritual, traditions, medieval folklore, and religion from Nordic areas and Scandinavia.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize, describe and analyze cultural phenomena, specifically pre-Christian Nordic Religion, and put it into context.
Audience: Undergraduate

2. Demonstrate an understanding of the major theories, approaches, concepts and current research findings concerning medieval Nordic mythology and religion.
Audience: Undergraduate

3. Synthesize the written and material information and use insight and creativity to demonstrate an understanding of the knowledge base from the field.
Audience: Undergraduate

4. Communicate effectively through written essays, oral presentations and discussion.
Audience: Undergraduate

5. Retrieve, analyze, and interpret the professional and lay literature providing information to both professionals and public.
Audience: Undergraduate

6. Guide, mentor and support peers to achieve excellence in practice of the discipline.
Audience: Undergraduate

7. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view
Audience: Undergraduate

FOLKLORE/LITTRANS/MEDIEVAL/SCAND ST 345 — THE NORDIC STORYTELLER
3 credits.

Exploring the oral nature and performance traditions of folklore, ethnography, tales and ballads, literature and culture from Nordic areas and Scandinavia.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Recognize, describe and analyze cultural phenomena, specifically Nordic Narrative, and put it into context.
Audience: Undergraduate

2. Demonstrate an understanding of the major theories, approaches, concepts and current research findings concerning Nordic Narrative and folklore studies.
Audience: Undergraduate

3. Synthesize the written and material information and use insight and creativity to demonstrate an understanding of the knowledge base from the field.
Audience: Undergraduate

4. Communicate effectively through written essays, oral presentations and discussion.
Audience: Undergraduate

5. Retrieve, analyze, and interpret the professional and lay literature providing information to both professionals and public.
Audience: Undergraduate

6. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view.
Audience: Undergraduate

FOLKLORE/LITTRANS 347 – IN TRANSLATION: KALEVALA AND FINNISH FOLK-LORE
3-4 credits.

A look at the Kalevala, the Finnish creation myth and national epic of Finland, and how it affected Finnish national identity and the eventual Finnish independence from Russia.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Construct an understanding of methods and productions folklorists employ in their work by looking at the pioneering work of the early folklorist Elias Lonnrot and by examining the work and products of contemporary folklorists working on topics of Finnish and Finnish-American folklore.
Audience: Undergraduate

2. Analyze the connections between expressive performances and the wider workings of culture, as illustrated by the lively interplay between folklore, literature, and popular culture in Finland.
Audience: Undergraduate

3. Explain how this Finnish "case study" fits in the global context of folklore and its relation to personal, communal and national identities.
Audience: Undergraduate

4. Explore reflections of the pre-modern and medieval culture of Finland in contemporary popular culture.
Audience: Undergraduate

FOLKLORE/RELIG ST 352 – SHAMANISM
3 credits.

Survey of shamanism as a religious tradition and sociocultural force in Siberian, Asian, and Native American societies. Exploration of shamanic rituals, roles, cosmology. Cultural and political uses of shamanism in traditional and modern contexts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Articulate the general characteristics of the wide array of religious traditions around the world that scholars refer to as "shamanism."
Audience: Both Grad & Undergrad

2. Analyze the key roles of shamans within their communities as healers, leaders, and visionaries.
Audience: Both Grad & Undergrad

3. Articulate the ways that historical US policies toward Native American communities, shaped consciously or unconsciously by Christian European cultural and religious assumptions, sought to suppress and replace Indigenous religious practices in a process that scholars refer to as "colonization."
Audience: Both Grad & Undergrad

4. Examine the ways in which US medical, legal, educational, and other institutional frameworks have been or can be modified to help facilitate shamanic revitalization and a process that scholars refer to as "decolonization."
Audience: Both Grad & Undergrad

5. Practice the research, writing, and presentation skills associated with professional scholarship in the fields of Religious Studies and Folklore Studies.
Audience: Graduate

FOLKLORE 399 – DIRECTED STUDY IN FOLKLORE FOR UNDERGRADUATES
1-3 credits.

Directed study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

FOLKLORE 415 – ADVANCED TOPICS IN FOLKLORE
1-3 credits.

Exploration of various topics in the study of folklore, folklife, myth, foodways, or music.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024
Learning Outcomes: 1. Communicate effectively through written essays, oral presentations and discussion.
Audience: Undergraduate

2. Demonstrate advanced knowledge of the methods and practices of the folklore field and practices.
Audience: Undergraduate

3. Produce writing that applies concepts learned in the course to analyze knowledge discussed in the course and articulate theories in a critical setting.
Audience: Undergraduate

FOLKLORE/GEN&WS 428 – GENDER AND EXPRESSIVE CULTURE
3 credits.

Examines the relationship between dominant images of gender representation as they emerge in expressive culture in various societies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2019

FOLKLORE 430 – TOPICS IN AMERICAN FOLKLORE: ETHNIC STUDIES
3-6 credits.

Topics in historical or contemporary folklore and folklife pertaining to persistently marginalized racial or ethnic groups in the United States.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Apply critical approaches to interpreting the vernacular expressions of persistently marginalized groups in the United States.
Audience: Undergraduate

2. Ethically apply folkloristic research methodologies for presentation in collaboration with at least two of the following:archives, libraries, community organizations, and/or community members.
Audience: Undergraduate

3. Apply course concepts outside of the classroom through critical self-reflection and appreciation of your own and others' cultural perspectives and worldviews.
Audience: Undergraduate

FOLKLORE/AMER IND/ANTHRO/GEN&WS 437 – AMERICAN INDIAN WOMEN
3 credits.

Examines and interprets the roles of American Indian women in traditional societies, and in contemporary North America.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Articulate some of the effects the past has had on present day circumstances, perceptions of, and disparities facing Native American women.
Audience: Undergraduate

2. Recognize cultural assumptions, and biases, as they relate to conceptions of gender and lived experience under colonialism
Audience: Undergraduate

3. Examine cultural variance in gender and gender roles and Indigenous women's place within their tribal nations, urban communities, and American society.
Audience: Both Grad & Undergrad

4. Assess contemporary issues with consideration for the cultural perspectives and worldviews of Indigenous peoples in what is now the United States.
Audience: Both Grad & Undergrad

5. Demonstrate understanding of key topics in the field of Indigenous women's and gender studies through engagement with field-based literature.
Audience: Graduate

FOLKLORE 439 – FOODWAYS
3 credits.

Explores artistic, social, sensory, and spiritual expressions through food that convey personal, group, and place-based identities, ethnicity, gender, and class in work and play. Reviews range of food writing and scholarly perspectives including culinary historical, structural-functional, and performance.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Recognize and apply important concepts in folklore studies.
Audience: Undergraduate

2. Describe a range of culinary cultures and food-related folklore.
Audience: Undergraduate

3. Connect personal experience with the course material.
Audience: Undergraduate

4. Recognize history's impact on the present.
Audience: Undergraduate

5. Conduct folkloristic research and analyze foodways traditions.
Audience: Undergraduate

FOLKLORE/SCAND ST 440 – SCANDINAVIAN AMERICAN FOLKLORE
3 credits.

Examines the verbal, musical, customary, and material folklore of Scandinavian Americans, with emphasis on the upper Midwest.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Apply critical approaches to interpreting the vernacular expressions of Scandinavian Americans in historic, cultural, social, and political contexts.
Audience: Both Grad & Undergrad

2. Apply course concepts outside of the classroom through critical self-reflection and appreciation of your own and others' cultural perspectives and worldviews.
Audience: Both Grad & Undergrad

3. Ethically apply folkloristic research methodologies for presentation in collaboration with at least two of the following: archives, libraries, community organizations, and/or community members.
Audience: Both Grad & Undergrad

4. Analyze the vernacular expressions of Scandinavian Americans using relevant primary and secondary sources to identify patterns, themes, and historical contexts.
Audience: Graduate

5. Construct well-organized, evidence-based written arguments related to the Scandinavian American experience.
Audience: Graduate

FOLKLORE 442 – IMMIGRATION AND INDIGENEITY IN THE UPPER MIDWEST
3 credits.

Examines the folklore of the Upper Midwest through the complicated intersections of immigration and indigeneity, in order to better understand the history and vernacular expressions of the people who call the Upper Midwest home.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply critical approaches to interpreting the vernacular expressions of immigrant and indigenous peoples in the Upper Midwest in historic, cultural, social, and political contexts.
Audience: Both Grad & Undergrad

2. Articulate the intersections of immigration and indigeneity in the Upper Midwest as they relate to race and ethnicity both in the past and the present day.
Audience: Both Grad & Undergrad

3. Ethically apply folkloristic research methodologies for presentation in collaboration with at least two of the following: archives, libraries, community organizations, and/or community members.
Audience: Both Grad & Undergrad

4. Apply course concepts outside of the classroom through critical self-reflection and appreciation of your own and others' cultural and perspectives and worldviews.
Audience: Both Grad & Undergrad

5. Analyze the intersections of immigration and indigeneity in the Upper Midwest using relevant primary and secondary sources to identify patterns, themes, and historical contexts.
Audience: Graduate

6. Construct well-organized, evidence-based written arguments related to immigrant and indigenous experience.
Audience: Graduate

FOLKLORE/SCAND ST 443 – SAMI CULTURE, YESTERDAY AND TODAY
4 credits.

Interdisciplinary study of Sami (Lapp) people of Scandinavia past and present. Indigenous modes of expression and worldview, contemporary cultural and political activism. Extensive discussion of connections to Native American and Inuit experiences; rise of U.S. and other indigenous peoples' movements.
Requisites: Junior standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Characterize past and present Sami culture, both in the context of Nordic societies and in a broader global Indigenous context.
Audience: Undergraduate

2. Analyze how Sami people engage with elements of Sami tradition to promote, defend, and advance a Sami cultural identity now and in the future.
Audience: Undergraduate

3. Compare Sami experiences of colonization and decolonization with those of North American (and other) Indigenous nations.
Audience: Undergraduate

4. Acquire skill in using Sami studies research and perspectives.
Audience: Graduate

FOLKLORE/MEDIEVAL/SCAND ST 446 – CELTIC-SCANDINAVIAN CULTURAL INTERRELATIONS
3 credits.

Examination of shared traditions and historical connections between the North and Northwest of Europe. Readings of medieval and pre-modern Scandinavian, Scottish, Welsh and Irish sagas, histories, talkes. Discussion of the role of folklore in modern Celtic and Scandinavian societies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Interpret medieval Celtic and Scandinavian texts surveyed in the course.
Audience: Undergraduate

2. Recognize and analyze the agendas that medieval and post-medieval writers/creators may have had in creating the works surveyed in this course.
Audience: Undergraduate

3. Distinguish between the verifiable realities of the medieval past and the imaginative renderings these receive in medieval or post-medieval works, applying critical approaches.
Audience: Undergraduate

4. Practice the research, writing, and presentation skills associated with professional scholarship in the fields of Scandinavian Studies, Medieval Studies, and Folklore Studies.
Audience: Graduate

FOLKLORE 460 – FOLK EPICS
3 credits.

Oral nature, structure, performance traditions, and epic ideology, from various world areas.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze epic narratives to interpret how they reflect national anxieties, cultural identity, and historical transformation across different societies.
Audience: Undergraduate

2. Apply major theories and approaches - especially oral-formulaic theory - to evaluate the structure, transmission, and cultural function of epic traditions.
Audience: Undergraduate

3. Engage in collaborative research and discussion, while applying ethical considerations related to cultural, religious, ethnic, gender, and economic diversity in the study of epic traditions.
Audience: Undergraduate

4. Conduct research using primary and secondary sources and communicate their findings effectively through written essays, oral presentations, and group discussion.
Audience: Undergraduate

FOLKLORE/L I S 490 – FIELD METHODS AND THE PUBLIC PRESENTATION OF FOLKLORE
3 credits.

Combines a fieldwork practicum with scrutiny of the cultural, political, and ethical dimensions underlying the documentation and public presentation of folklore through festivals, exhibitions, publications, audio-visual productions, and digital archival collections.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand how to employ folkloristic fieldwork, archival methodologies, and community engagement in documenting and presenting local communities.
Audience: Both Grad & Undergrad

2. Explain key concepts of folklore studies in the context of wider public humanistic research.
Audience: Both Grad & Undergrad

3. Create a final project demonstrating critical thinking, civic knowledge, and collaboration with coordinating communities.
Audience: Both Grad & Undergrad

4. Understand how to coordinate effectively with community organizations to undertake multidisciplinary arts and humanities grant-funded project planning with public programming goals such as festivals, exhibitions, publications, audio-visual productions, and digital archival collections.
Audience: Graduate

FOLKLORE/MUSIC 515 – PROSEMINAR IN ETHNOMUSICOLOGY
3 credits.

Introduction to ethnomusicology, including historical survey of major works in the field, classification of musical instruments, measurement of tuning systems and concepts of scale, mode and rhythm in non-Western music.
Requisites: Graduate/professional standing
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine a body of (ethno)musicological literature.
Audience: Both Grad & Undergrad

2. Decipher and explicate difficult texts with increased confidence.
Audience: Both Grad & Undergrad

3. Describe the histories and trajectories of the discipline.
Audience: Both Grad & Undergrad

4. Facilitate discussions effectively.
Audience: Both Grad & Undergrad

5. Complete a meticulous and thorough research project that integrates and analyzes ethnomusicological perspectives on a topic.
Audience: Graduate

FOLKLORE/MUSIC 516 – ETHNOGRAPHIC METHODS FOR MUSIC AND SOUND
3 credits.

Focuses on the tools (material, methodological, and ethical) for doing ethnographic fieldwork in musical contexts.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate familiarity with a body of (ethno)musicological and anthropological literature on ethnographic methods.
Audience: Graduate

2. Decipher and explicate difficult texts with increased confidence.
Audience: Graduate

3. Design and carry out ethnographic research projects.
Audience: Graduate

4. Demonstrate an awareness of power dynamics and your own position as researcher.
Audience: Graduate

5. Facilitate discussions effectively.
Audience: Graduate

6. Track key terms across (ethno)musicological and anthropological literature, describing how ethnographers' relationships with these have changed over time.
Audience: Graduate

FOLKLORE/COM ARTS 522 – DIGITAL STORYTELLING FOR SOCIAL MEDIA
3 credits.

Explore everyday communication in social media. Learn digital recording technologies for documenting everyday communication and the use of digital content in social media.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Evaluate the reasons we value everyday artistic and expressive communication
Audience: Both Grad & Undergrad

2. Analyze the affordances of different social media platforms
Audience: Both Grad & Undergrad

3. Evaluate the formal elements best suited to the affordances of different media platforms
Audience: Both Grad & Undergrad

4. Apply that understanding in the design and production of digital text, photo, sound, and video communications that document everyday artistic and expressive communication
Audience: Both Grad & Undergrad

5. Analyze ethical implications of documenting human behavior
Audience: Both Grad & Undergrad

6. Apply scholarly theories on digital media to digital platforms and digital platform content
Audience: Graduate

FOLKLORE 530 – TOPICS IN FOLKLORE
1-3 credits.

Topics in Folklore in various cultures and time periods.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Frame an understanding of general themes and concepts in the folklore topic being covered.
Audience: Undergraduate

2. Prove advanced knowledge of the methods and practices of the folklore field and practices.
Audience: Undergraduate

3. Communicate effectively through written essays, oral presentations and discussion.
Audience: Undergraduate

FOLKLORE 540 – LOCAL CULTURE AND IDENTITY IN THE UPPER MIDWEST
3 credits.

Addresses different aspects of community life and culture in the Upper Midwest; topics include ethnic groups, religious life, cultural landscapes, oral narrative, music, and material culture.
Requisites: Junior standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain/illustrate major concepts important to the study of folklore and region.
Audience: Undergraduate

2. Distinguish among different definitions and theories of race and ethnicity.
Audience: Undergraduate

3. Name and explain forces that influence the formation of regional ethnic, occupational, recreational, religious and other cultures.
Audience: Undergraduate

4. Provide an overview of populations living in the Upper Midwestern United States.
Audience: Undergraduate

5. Describe different forms of cultural expression distinctive to the Upper Midwest.
Audience: Undergraduate

FOLKLORE 699 – INDEPENDENT STUDY IN FOLKLORE (GRADUATE)
1-3 credits.

Advanced directed study projects as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

FOLKLORE/MUSIC 915 – SEMINAR IN ETHNOMUSICOLOGY
3 credits.

Topics in ethnomusicology within a cross-cultural framework; melodic typology, scale and tuning systems, mode, rhythm, ornamentation, improvisation techniques, oral and written traditions of composition, notation systems, and function of music society.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Review a specialized body of academic literature on a contemporary ethnomusicological topic.
Audience: Graduate

2. Identify, describe, and appraise ethnomusicology research methodologies.
Audience: Graduate

3. Lead discussion of complex texts across multiple fields.
Audience: Graduate

4. Compare and critique academic perspectives on a topic.
Audience: Graduate

5. Design and carry out an original ethnomusicological research project which integrates contemporary academic conversations with personal research interests.
Audience: Graduate

6. Complete an original research paper akin to an academic journal article that meets rigorous standards and might serve as the basis for a larger project in the student's area of specialization.
Audience: Graduate

FOOD SCIENCE (FOOD SCI)

FOOD SCI 120 – SCIENCE OF FOOD
3 credits.

Relationship between food, additives, processing and health. How foods are processed. Current food controversies.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the basic scientific concepts regarding food composition, processing, additives, regulations, and safety
Audience: Undergraduate

2. Explain how the functionality of food can influence food processing and quality
Audience: Undergraduate

3. Identify and analyze current issues and their implications for food processing additional learning objectives provided for each module
Audience: Undergraduate

FOOD SCI 140 – THE CHOCOLATE EXPERIENCE: SCIENCE, SOCIETY, AND SUSTAINABILITY
3 credits.

Learn about the history of cocoa and chocolate production, the cultivation of cocoa and processing of cocoa beans to the production of chocolate from cocoa beans. Other topics covered include nutrition and health aspects of cocoa and chocolate consumption and socioeconomic and sustainability issues in cocoa production.
Requisites: None
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Explore the history of cocoa and chocolate, and worldwide cultivation practices.
Audience: Undergraduate

2. Describe the cocoa production process, including microbiological and biochemical aspects of cocoa fermentation.
Audience: Undergraduate

3. Outline and analyze the production of chocolate from the cleaning of cocoa beans to final chocolate products (from bean to bar).
Audience: Undergraduate

4. Examine the nutritional and health impact of chocolate consumption.
Audience: Undergraduate

5. Scrutinize and critique the socioeconomic impact of cocoa and chocolate production in fair trade, international politics, social justice, and sustainability.
Audience: Undergraduate

FOOD SCI 150 – FERMENTED FOOD AND BEVERAGES: SCIENCE, ART AND HEALTH
3 credits.

Explores the science behind fermented food and beverages, popularized by brewing, winemaking and breadmaking at home and in retail. Introduces the scientific principles that underlie food and beverage processing through fermentation. Covers how basic sciences such as chemistry, biochemistry and microbiology influence the process and desired outcomes when fermenting vegetables, milk, fruit, and grains.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Define fermentations in the context of foods and beverages
Audience: Undergraduate

2. Identify and apply basic principles of chemistry, processing and microbiology to the manufacturing of fermented foods and beverages.
Audience: Undergraduate

3. Identify and describe the human health implications resulting from the consumption of fermented foods and beverages.
Audience: Undergraduate

4. Describe the social, economic, and environmental dimensions of agricultural inputs and production of fermented food and beverages and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of producing fermented foods and beverages
Audience: Undergraduate

FOOD SCI 180 – SUSTAINABLE FOOD SECURITY: HEALTH FOR OUR COMMUNITIES
3 credits.

Explores diet-related diseases in the United States and their disproportionate effect on Black Indigenous and People of Color (BIPOC) and other underserved or vulnerable populations. Integrates the principles of food science, nutrition, and public health to understand food systems, food disparities, and health disparities. Examines emerging solutions to improve health outcomes in the United States through more just, inclusive, and sustainable food systems.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the food system framework and its relationship to food (in)security, nutrition (in)security, and health
Audience: Undergraduate

2. Examine food waste and food safety and their relationship to food (in)security
Audience: Undergraduate

3. Discuss the intricate relationship between food (in)security, nutrition (in)security, food bioactive compounds, and chronic diseases
Audience: Undergraduate

4. Examine the biological, social, and environmental determinants of health, health systems, and the interactions between them
Audience: Undergraduate

5. Compare the association between food, nutrition, and health literacies, and health outcomes
Audience: Undergraduate

6. Interpret how the past has affected present-day circumstances regarding race and racial inequities in diet-related diseases in the U.S.
Audience: Undergraduate

7. Describe different cultural perspectives on food, nutrition, and health and the relationship between these perspectives and your own views and practices
Audience: Undergraduate

8. Reflect on how to engage in effective, respectful dialogue around food, health, and sustainability concepts in our multicultural society
Audience: Undergraduate

FOOD SCI 201 – DISCOVERING FOOD SCIENCE
1 credit.

Provides a brief introduction to the different areas of study and career opportunities within the food industry.
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the depth and scope of food science as a profession
Audience: Undergraduate

2. Explain and discuss career options for food science graduates
Audience: Undergraduate

3. Recommend personal initiatives that will enhance career success
Audience: Undergraduate

4. Relate courses in food science curricula to job responsibilities of food scientist
Audience: Undergraduate

FOOD SCI 289 – HONORS INDEPENDENT STUDY
1-2 credits.

Research work for honors students under direct guidance of a faculty member in an area encompassing Food Science. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies
Audience: Undergraduate

4. Effectively communicate findings
Audience: Undergraduate

FOOD SCI 299 – INDEPENDENT STUDY
1-3 credits.

Research work for students under direct guidance of a faculty member in an area encompassing Food Science. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies
Audience: Undergraduate

4. Effectively communicate findings
Audience: Undergraduate

FOOD SCI 301 – INTRODUCTION TO THE SCIENCE AND TECHNOLOGY OF FOOD
3 credits.

Introduction to the science and the technology of food manufacture. Covers the basic chemical, physical and microbiological properties of food and manipulation of these properties in the manufacture of food products.
Requisites: (MATH 112, 114 or 217) and (CHEM 103, 109 or 115) and (ZOOLOGY/BIOLOGY 101, 102, BOTANY/BIOLOGY 130, or ZOOLOGY/BIOLOGY/BOTANY 151) or (BSE 349 or concurrent enrollment)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Apply core knowledge in chemistry, physics, mathematics and biology to the understanding of food systems including quantitative problem-solving skills
Audience: Undergraduate

2. Identify the chemical composition of the main components in foods and describe how the composition influences functionality and material properties
Audience: Undergraduate

3. Explain relationships of mass-balance in food processing and be able to do simple mass-balance calculations
Audience: Undergraduate

4. Apply the basic principles of microbiology in relation to food safety and food processing/preservation
Audience: Undergraduate

5. Outline key technical information/terminology related to food science
Audience: Undergraduate

6. Describe the way in which food handling and processing operations impact food composition and human health
Audience: Undergraduate

7. Discuss regulations and market forces that govern our food supply
Audience: Undergraduate

8. Outline emerging trends in food production, processing, and handling
Audience: Undergraduate

FOOD SCI/AN SCI 305 – INTRODUCTION TO MEAT SCIENCE AND TECHNOLOGY
4 credits.

Application of biological, technological, and economical principles to muscle and related tissue utilized for food.
Requisites: (ZOOLOGY/BIOLOGY/BOTANY 152 or ZOOLOGY/BIOLOGY 101 and 102) and (CHEM 103, 109, or 115) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the nutritional value of fresh and processed meats in addition to addressing diet/health issues and food safety of these products
Audience: Both Grad & Undergrad

2. Describe the processes associated with animal harvest and explain the differences among different livestock species
Audience: Both Grad & Undergrad

3. Demonstrate where carcass fabrication cuts are made to produce the major carcass primal cuts and the ability to separate out and identify major muscles of economic importance
Audience: Both Grad & Undergrad

4. Describe how the biochemical properties of meat proteins relate to muscle function
Audience: Both Grad & Undergrad

5. Explain of the chemical and physical properties of fresh meat and how these properties can be evaluated and analyzed
Audience: Both Grad & Undergrad

6. Collect carcass data and determine USDA quality and yield grades
Audience: Both Grad & Undergrad

7. Calculate the appropriate amounts of non-meat ingredients and explain the applicable manufacturing procedures to produce various types of processed meats including whole muscle products and finely comminuted sausages
Audience: Both Grad & Undergrad

8. Explain how an understanding of muscle microstructure ultrastructure, and changes in postmortem biochemistry can be used to predict ultimate meat quality characteristics
Audience: Graduate

FOOD SCI/AN SCI 321 – FOOD LAWS AND REGULATIONS
1 credit.

Food laws and regulations, regulatory and commerical grading standards used in the food industry.
Requisites: Junior standing
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify major food laws, their authoritative departments and enforcement agencies (regulatory framework)
Audience: Undergraduate

2. Identify, examine and analyze the implications of laws and regulations required for the manufacture and sale of food products
Audience: Undergraduate

3. Discuss current topics of importance to the food industry that have the potential to generate new or refine existing regulations on food laws and regulations that apply to specific segments of the food industry
Audience: Undergraduate

4. Find pertinent information on food laws and regulations that apply to specific segments of the food industry
Audience: Undergraduate

FOOD SCI/MICROBIO 324 – FOOD MICROBIOLOGY LABORATORY
2 credits.

Lab exercises dealing with food preservation, spoilage, and food poisoning. Isolation, identification and quantification of specific microbes occurring in foods, and food fermentations by bacteria and yeast.
Requisites: (MICROBIO 102 or MICROBIO 304) and FOOD SCI/MICROBIO 325 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Utilize laboratory techniques to identify microorganisms in food.
Audience: Undergraduate

2. Describe the principles involving food preservation via fermentation processes.
Audience: Undergraduate

3. Demonstrate understanding of the role and significance of microbial inactivation, adaptation, and environmental factors (i.e., water activity, pH, temperature) on growth and response of microorganisms in various environments.
Audience: Undergraduate

4. Identify the conditions, including sanitation practices, under which important pathogens and spoilage microorganisms are commonly inactivated, killed, or made harmless in foods.
Audience: Undergraduate

FOOD SCI/MICROBIO 325 – FOOD MICROBIOLOGY
3 credits.

Principles of food preservation, epidemiology of foodborne illness, agents of foodborne illness, food fermentations and biotechnology.
Requisites: MICROBIO 101, 303, or M M & I 301 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and summarize the impacts of intrinsic and extrinsic factors on microorganisms.
Audience: Undergraduate

2. Calculate and apply thermal processing parameters to reductions in microbial numbers.
Audience: Undergraduate

3. Apply Hazard Analysis Critical Control Point (HACCP) concepts and principles to food production processes.
Audience: Undergraduate

4. Demonstrate knowledge of foodborne microbial pathogens.
Audience: Undergraduate

5. Describe methods and principles of sampling and testing food for microorganisms.
Audience: Undergraduate

6. Compare and contrast the principles, practices, and pathways of food fermentations.
Audience: Undergraduate

7. Analyze and use microbiological data sets.
Audience: Undergraduate

8. Evaluate the benefits and hazards of modern food production, organic foods, and genetically-engineered foods.
Audience: Undergraduate

FOOD SCI 330 – DAIRY PRODUCTS EVALUATION
1 credit.

Introduction to sensory analysis of dairy and dairy-alternative products. Individual skill building to evaluate products such as vanilla ice cream, cheddar cheese, cottage cheese, yogurt, milk, and butter by providing mentored sensory training.
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recall key vocabulary terms and facts relevant to introductory sensory science, dairy product evaluation, and the US dairy industry
Audience: Undergraduate

2. Evaluate, compare and rank products depending on multiple quality characteristics
Audience: Undergraduate

3. Compare similar nondairy products
Audience: Undergraduate

4. Communicate results of product analysis and evaluation in a professional setting
Audience: Undergraduate

FOOD SCI 375 – SPECIAL TOPICS
1-3 credits.

Subjects of current interest to undergraduates.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Explain concepts relating to a special topic outlined in the title
Audience: Undergraduate

FOOD SCI 378 – PRECISION FERMENTATION FOR SUSTAINABLE FOODS AND PRODUCTS
2 credits.

Introduction to principles of precision fermentation, genetic tools used to manipulate the organisms involved in precision fermentation, food and non-food applications of precision fermentation. Topics such as: sustainable manufacturing of alternative proteins, food colorants, artificial sweeteners, amino acids, vitamins, flavoring and blending agents in alternative protein formulations, fatty acids, non-food chemicals of industrial importance, and sustainable feedstocks. Comparison of precision fermentation to traditional fermentations including whiskey, rum and bourbon.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the concept of precision fermentation.
Audience: Undergraduate

2. List and explain examples of precision fermentation.
Audience: Undergraduate

3. Outline and analyze the tools used to manipulate the microorganisms used in precision fermentation.
Audience: Undergraduate

4. Describe the processes deployed to produce foods and non-food products derived by precision fermentation.
Audience: Undergraduate

5. Outline the sustainability aspects of precision fermentation and the feedstocks used.
Audience: Undergraduate

6. Compare and contrast traditional and precision fermentations.
Audience: Undergraduate

FOOD SCI 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in the Food Science department and a internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Apply concepts learned in coursework to authentic professional situations
Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry
Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations
Audience: Undergraduate

FOOD SCI 400 – STUDY ABROAD IN FOOD SCIENCE
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

FOOD SCI 410 – FOOD CHEMISTRY
3 credits.

Nature and chemical behavior of food constituents including proteins, lipids, carbohydrates, water, and enzymes.
Requisites: FOOD SCI 301, CHEM 343, and (BIOCHEM 501 or concurrent enrollment)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Clarify the physical and chemical principles of water, proteins, carbohydrates, and lipids in foods
Audience: Undergraduate

2. Use the principles of food chemistry to describe and alter the behavior of foods
Audience: Undergraduate

3. Hypothesize how chemical reactivity affects food properties
Audience: Undergraduate

FOOD SCI 412 – FOOD ANALYSIS
4 credits.

Application of quantitative techniques to the determination of composition and quality of food products.
Requisites: (STAT 301 or 371) and FOOD SCI 410
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Choose appropriate analytical techniques to determine the composition of foods
Audience: Undergraduate

2. Clarify the underlying principles of food analytical methods
Audience: Undergraduate

3. Integrate basic statistical methods into experimental data analysis
Audience: Undergraduate

4. Assemble effective written and oral communications regarding composition of food
Audience: Undergraduate

FOOD SCI 432 – PRINCIPLES OF FOOD PRESERVATION
3 credits.

Fundamentals of food preservation methods: post-harvest, thermal processing, refrigeration and freezing, control of water activity, chemical preservation, nonthermal methods and control of food packaging.
Requisites: MICROBIO/FOOD SCI 325, FOOD SCI 410, and 440
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Clarify the mechanisms of food spoilage and how to inhibit them
Audience: Undergraduate

2. Predict how food quality is affected throughout product lifecycle
Audience: Undergraduate

3. Differentiate preservation methods appropriate for foods, including "natural" foods
Audience: Undergraduate

4. Critique relevant scientific literature to explain food preservation principles
Audience: Undergraduate

5. Assemble effective written and oral communications regarding food preservation
Audience: Undergraduate

FOOD SCI 437 – FOOD SERVICE OPERATIONS
4 credits.

Fundamentals, principles, and practices of the United States Food Systems, Food Service, and Food Service Management. Introduction to the food service industry as applied in diverse settings, including but not limited to schools, hospitals and restaurants.
Requisites: FOOD SCI 301 and declared in Nutritional Sciences BS or BS-Nutrition and Dietetics
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Assess the impact of a public policy position on the nutrition and dietetics profession
Audience: Undergraduate

2. Explain the process involved in delivering quality food and nutrition services
Audience: Undergraduate

3. Apply management theories to the development of programs or services
Audience: Undergraduate

4. Evaluate a budget/financial management plan and interpret financial data
Audience: Undergraduate

5. Apply principles of human resource management to different situations
Audience: Undergraduate

6. Apply safety and sanitation principles related to food, personnel and consumers
Audience: Undergraduate

FOOD SCI 440 – PRINCIPLES OF FOOD ENGINEERING
3 credits.

Application of engineering principles in the analysis of food process operations: properties of gases and vapors, psychrometrics, material and energy balances, fluid flow, heat transfer, microwave heating, mass transfer, packaging film permeability, dehydration.
Requisites: FOOD SCI 301, (MATH 217 or 221), and (PHYSICS 103, 201, or 207)
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply the conservation equations (mass, energy, momentum) to food processes including those with reactions and unsteady state operation
Audience: Undergraduate

2. Apply the transport equations (mass, energy, and momentum, including food rheology) to food processes
Audience: Undergraduate

3. Apply concepts of thermodynamics to food systems: 1st law, 2nd law, gas laws, and psychometrics
Audience: Undergraduate

4. Explain the theoretical basis for rheology and use rheological approaches to solve problems in food processing and product quality evaluation
Audience: Undergraduate

FOOD SCI/AN SCI/DY SCI/SOIL SCI 472 – ANIMAL AGRICULTURE AND GLOBAL SUSTAINABLE DEVELOPMENT
1 credit.

Explores global agriculture and sustainable development, highlighting the interdependence between U.S. agriculture and agriculture in emerging economies. Uses a regional approach with crop and livestock case studies to examine topics such as population and food security, immigration, environmental impacts, crop and livestock production, global trade, sustainability, the role of women in agriculture, and the contribution of dairy products to a healthy diet.
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Apply sustainability principles and/or framework to addressing the challenge of feeding an increasing world population sustainably.
Audience: Undergraduate

2. Define and characterize sustainability, sustainable agriculture and Sustainable Development
Audience: Undergraduate

3. Analyze the contributions of animal agriculture to the Sustainable Development Goals both in developing and developed countries.
Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of diverse animal agricultural systems both in developing and developed countries.
Audience: Undergraduate

5. Evaluate the role of livestock in communities where poverty, hunger and marginalization are embedded as a way of life.
Audience: Undergraduate

6. Critically evaluate the causes of —and ways to break— the chains of hunger and poverty among the poorest of the poor.
Audience: Undergraduate

FOOD SCI 511 – CHEMISTRY AND TECHNOLOGY OF DAIRY PRODUCTS
3 credits.

Chemistry of milk components (i.e. protein, lipids, carbohydrate, salts, enzymes) with an emphasis on chemical and physical changes that occur during the manufacture of a range of milk products (i.e. ice cream, butter, cheese). Dairy technology and microbiological quality.
Requisites: FOOD SCI 410
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the composition of milk and identify the approximate content, individual types present and main features of the main components
Audience: Undergraduate

2. Integrate their knowledge of food chemistry, physical properties and microbiology to understand the processing of dairy products
Audience: Undergraduate

3. Use knowledge of the chemistry of dairy components (proteins, fats, lactose, salts) to evaluate the impact of processing conditions (e.g. heat, pH) on milk and dairy products
Audience: Undergraduate

4. Describe the contribution of dairy foods to the diet including milk constituents with possible physiological roles
Audience: Undergraduate

5. Explain how dairy products (such as fluid milk, yogurt, butter, powder, cheese) are made and the key functions of the processing steps involved
Audience: Undergraduate

FOOD SCI 514 – INTEGRATED FOOD FUNCTIONALITY
4 credits.

Molecular basis of food functional properties; impact of ingredients and processing on functional properties (texture, flavor, nutrition and structure); design of new or reformulating foods to meet specific quality expectations.
Requisites: FOOD SCI 602
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the chemical and physical basis for interactions taking place between food components and how these influence the properties of food structures
Audience: Undergraduate

2. Relate the quality of foods to the chemical composition, processing and potential for changes or reactions to occur during storage (includes physical, chemical, biochemical, and microbial reactions/changes)
Audience: Undergraduate

3. Select food ingredients that give specific functional benefits for use in product development, product reformulation, or problem-solving situations
Audience: Undergraduate

4. Apply sensory and rheological methods of evaluation in analysis of foods (e.g., Quality Control), product development, or reformulation of existing products
Audience: Undergraduate

5. Design and perform a shelf-life test (including normal storage conditions and accelerated tests) and be able to apply statistical approaches to determine acceptable shelf-life of products made with different ingredients/processing conditions/storage situations
Audience: Undergraduate

6. Assemble effective written and oral communications regarding food structure and functionality
Audience: Undergraduate

FOOD SCI/AN SCI 515 – COMMERCIAL MEAT PROCESSING
2 credits.

Principles and procedures in the commercial manufacture of processed meat products; sausage manufacturing, curing, smoking, freezing and packaging.
Requisites: AN SCI/FOOD SCI 305, FOOD SCI 410, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Summarize the various chemical and physical properties of meat and non-meat ingredients used to manufacture processed meats
Audience: Both Grad & Undergrad

2. Formulate various processed meats in compliance with governmental regulations
Audience: Both Grad & Undergrad

3. Identify basic meat processing principles
Audience: Both Grad & Undergrad

4. Demonstrate the ability to determine if a thermal processing procedure will produce a safe product
Audience: Graduate

5. Recognize how various types of meat processing equipment operate
Audience: Both Grad & Undergrad

6. Summarize proper cleaning and sanitation procedures
Audience: Both Grad & Undergrad

FOOD SCI 532 – INTEGRATED FOOD MANUFACTURING
4 credits.

Procedures used to process and preserve foods on a commercial basis, with emphasis on concentration, dehydration and fractionation process, plant sanitation/GMP, statistical process control, and environmental impacts..
Requisites: FOOD SCI 432 or (BSE 461 or concurrent enrollment)
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the unit operations of food processing technologies (concentration, dehydration, extrusion, etc.) and various ancillary food equipment (pumps, heat exchangers, etc.), including performing engineering calculations as appropriate
Audience: Undergraduate

2. Apply the key elements of food quality assurance, including analyzing and, writing and implementing Hazard Analysis and Critical Control Points plans in a food processing situation (includes prerequisite programs like Good Manufacturing Practice and Sanitation Standard Operating Procedure)
Audience: Undergraduate

3. Set up and maintain a process control chart, design an effective sampling plan for a food processing/distribution environment, and effectively evaluate whether a process is in control
Audience: Undergraduate

4. Identify weaknesses (and solutions) in existing Sanitation Standard Operating Procedure plans and design defensible new plans for cleaning and sanitation protocols in food processing operation, analyze existing plans and design new plans for cleaning and sanitation protocols in food processing operations
Audience: Undergraduate

5. Explain the effects of processing operations on shelf stability and be able to calculate shelf life of foods based on kinetics of microbial, chemical and physical changes during storage
Audience: Undergraduate

6. Explain the main steps in water and waste treatment as important to food processing operations
Audience: Undergraduate

7. Apply basic concepts of reaction engineering and reaction kinetics to food processing systems
Audience: Undergraduate

FOOD SCI 535 – CONFECTIONERY SCIENCE AND TECHNOLOGY
3 credits.

Through a combination of on-line lectures, classroom activities, evaluation of commercial samples and discovery-based labs, the science and technology of confections from hard candy to chocolate will be covered.
Requisites: FOOD SCI 410 and FOOD SCI 432
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe processing methods for confectionery production
Audience: Undergraduate

2. Describe the typical ingredients used in confections
Audience: Undergraduate

3. Explain how ingredients and processing conditions interact to create quality confections with adequate shelf stability
Audience: Undergraduate

4. Apply scientific principles to confectionery production and storage
Audience: Undergraduate

5. Explain effects of processing and storage conditions on shelf life of confections
Audience: Undergraduate

6. Analyze, diagnose, and propose solutions for problems in production and shelf life of confections based on the appropriate scientific principles
Audience: Undergraduate

7. Communicate scientific results clearly and concisely
Audience: Undergraduate

FOOD SCI 550 – FERMENTED FOODS AND BEVERAGES
2 credits.

Chemistry, microbiology, and technology of foods and beverages in which fermentations are important (e.g. cheese, bread, pickles, beer). Fermentation techniques in developing new foods and food additives. Instrumentation and mechanization of food fermentations.
Requisites: FOOD SCI 150
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify important biochemical pathways in the production of fermented foods and beverages
Audience: Undergraduate

2. Identify factors contributing to sensory qualities of fermented foods and beverages
Audience: Undergraduate

3. Evaluate the importance of chemical constituents for fermentation substrates and ingredients in fermentation
Audience: Undergraduate

4. Explain how starting ingredients are processed and how processing impacts fermentation and the final product
Audience: Undergraduate

5. Describe the production process of fermented vegetables, cheese, beer and wine
Audience: Undergraduate

6. Demonstrate knowledge about microbial species, biochemical pathways, and fermentation factors in the production of fermented foods and beverages by reviewing current research
Audience: Undergraduate

7. Discuss and explain how a wide variety of fermented foods and beverages are produced from a few basic ingredients
Audience: Undergraduate

FOOD SCI 551 — FOOD FERMENTATION LABORATORY
1 credit.

Offers the opportunity to learn to produce fermented beverages and dairy products in laboratory and scalable production facilities. Designed to introduce the chemical and physical basis for development of specific characteristics associated with individual styles of products as well as analytical methods to qualify those characteristics. Requires completion or concurrent enrollment in FOOD SCI 550. Enrollment limited to students 21 years of age or older.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Utilize laboratory tools to evaluate chemical constituents of fermented foods and beverages
Audience: Undergraduate

2. Apply knowledge of yeast and bacteria fermentations to the production of foods and beverages
Audience: Undergraduate

3. Communicate research results and knowledge of fermented foods to a scientific audience
Audience: Undergraduate

FOOD SCI 602 — SENIOR PROJECT
2 credits.

Part one of senior capstone requirement. Working as teams, students conduct research around a problem pertinent to the food industry. Weekly discussions plus laboratory. Data collection and analysis and report writing are critical components of this course.
Requisites: FOOD SCI 412 and 432
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Define a hypothesis or project objective(s); identify appropriate testing and analysis methodology, generate or collect original data, critically analyze results, provide a thorough explanation of results and a clear and concise research paper
Audience: Undergraduate

2. Communicate project work in written format
Audience: Undergraduate

3. Provide effective feedback of project progress
Audience: Undergraduate

4. Conduct independent projects with guidance
Audience: Undergraduate

FOOD SCI 603 — SENIOR SEMINAR
1 credit.

Present data gathered and analyzed as part of the senior project.
Requisites: FOOD SCI 602
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate project work in oral and written format
Audience: Undergraduate

2. Communicate project results effectively
Audience: Undergraduate

3. Provide effective assessment of project results
Audience: Undergraduate

FOOD SCI 611 – CHEMISTRY AND TECHNOLOGY OF DAIRY PRODUCTS
3 credits.

Chemistry of milk components (i.e. protein, lipids, carbohydrate, salts, enzymes) with an emhasis on chemical and physical changes that occur during the manufacture of a range of milk products (i.e. ice cream, butter, cheese). Dairy technology and microbiological quality.
Requisites: FOOD SCI 410 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the composition of milk and identify the approx. content, individual types present and main features of the main components
Audience: Both Grad & Undergrad

2. Integrate knowledge of food chemistry, physical properties. and microbiology to describe the processing of dairy products
Audience: Both Grad & Undergrad

3. Use knowledge of the chemistry of dairy components (proteins, fats, lactose, salts) to evaluate the impact of processing conditions (e.g. heat, pH) on milk and dairy products
Audience: Both Grad & Undergrad

4. Describe the contribution of dairy foods to the diet including milk constituents with possible physiological roles
Audience: Both Grad & Undergrad

5. Explain how dairy products (such as fluid milk, yogurt, butter, powder, cheese) are made and the key functions of the processing steps involved
Audience: Both Grad & Undergrad

6. Discuss hot topics related to dairy foods
Audience: Graduate

7. Evaluate the scientific status of dairy's role or contribution to nutrition, sustainability, and functionality with reference to current scientific literature on these topics
Audience: Graduate

FOOD SCI 681 – SENIOR HONORS THESIS
2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Review and analyze scientific literature
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question
Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research
Audience: Undergraduate

FOOD SCI 682 – SENIOR HONORS THESIS
2-4 credits.

Second semester of individual study for majors completing theses for Honors degrees as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Review and analyze scientific literature
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question
Audience: Undergraduate

3. Write a thesis based on original research
Audience: Undergraduate

FOOD SCI 699 – SPECIAL PROBLEMS
1-3 credits.

Individual advanced work in an area of Food Science under the direct guidance of a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies
Audience: Undergraduate

4. Effectively communicate findings
Audience: Undergraduate

FOOD SCI/AN SCI 710 – CHEMISTRY OF THE FOOD LIPIDS
2 credits.

Chemical constitution, structures, reactions, stereochemistry of fats, phospholipids, related compounds; methods of isolation, characterization; synthesis; relation of structure to physical properties.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Write a clear and concise research paper
Audience: Graduate

2. Improve oral communication by presenting major points of the research paper
Audience: Graduate

3. Utilize software to illustrate a protein containing a bound lipid at atomic resolution.
Audience: Graduate

4. Explain lipid functions in relation to varying environmental conditions and electron transfer reactions
Audience: Graduate

5. Develop a detailed understanding of lipid analysis, lipid synthesis as well as digestion and transport of dietary lipids in different vertebrates.
Audience: Graduate

6. Derive the likely volatiles to be generated during storage of any unsaturated fatty acid using the beta-scission of a linoleic acid hydro peroxide as a template
Audience: Graduate

7. Determine if a given reaction is thermodynamically favorable based on standard one-electron reduction potentials and concentrations of reactants (oxidized/reduced couples)
Audience: Graduate

FOOD SCI/AN SCI 711 – FOOD BIOCHEMISTRY
3 credits.

Explores methods for interrogating structure-function relationships, molecular profiles, and microstructure of foods. Provides hands-on experience using computational approaches to model protein-small molecule interactions, analysis of small molecules using high-resolution MS, and protein composition and morphology with fluorescence spectroscopy and microscopy. Knowledge of food chemistry or organic chemistry (such as FOOD SCI 410, CHEM 341, 343, or 345) required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Critically evaluate recent literature in the field of food chemistry
Audience: Graduate

2. Illustrate the interactions between food molecules (lipids, protein, carbohydrates, bioactive) at atomic resolution using software.
Audience: Graduate

3. Analyze and differentiate the molecular composition of a food or ingredient using HPLC-MS/MS data; fluorescence spectroscopy; and microscopy
Audience: Graduate

4. Propose and analyze how reactions and physical changes affect food microstructure and composition
Audience: Graduate

FOOD SCI 725 – ADVANCED FOOD MICROBIOLOGY
3 credits.

Principles and problems covering fundamental concepts in Food Microbiology; application of concepts in fermentation, pathogenesis, and gut health; development and control of a sustainable and safe food and fiber system.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze common mechanisms of foodborne microbial pathogenesis and immune responses to foodborne infections
Audience: Graduate

2. Critically evaluate treatment, control, and detection strategies for foodborne pathogens
Audience: Graduate

3. Evaluate primary research articles, identify problems related to the experimental approach, (interpretation of) data and/or discussion, and develop solutions to the identified problems
Audience: Graduate

4. Describe emerging trends, drivers and impacts of sustainable food systems
Audience: Graduate

5. Explain the process of fermentation and probiotic mechanism of action
Audience: Graduate

FOOD SCI 799 – PRACTICUM IN FOOD SCIENCE TEACHING
1-3 credits.

Teaching experience for PhD candidates.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain current manufacturing practices through experiential learning
Audience: Graduate

FOOD SCI 875 – SPECIAL TOPICS
1-3 credits.

New graduate and courses of current interest.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023
Learning Outcomes: 1. Explain concepts relating to a special advanced topic outlined in the title
Audience: Graduate

FOOD SCI 900 — SEMINAR ADVANCED
1 credit.

Research literature and current departmental research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and summarize key aspects of scientific rigor and reproducibility, including determination of sample size, statistical significance, measures of outliers, and experimental replicates
Audience: Graduate

2. Describe the features of high-quality presentations and best practices in scientific data/information interpretation
Audience: Graduate

3. Apply and demonstrate best practices in the effective presentation of complex data/information to diverse scientific audience
Audience: Graduate

FOOD SCI 990 — RESEARCH
1-12 credits.

Full lab and literature review of a problem in food science. Leads to preparation of thesis and publication.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Devise an engaging overview of a research area
Audience: Graduate

2. Explain background, methods, results, and a discussion of experimental data
Audience: Graduate

3. Design charts/tables that effectively communicate data
Audience: Graduate

4. Assess peers on the effectiveness of a scientific presentation
Audience: Graduate

5. Generate goals to improve presentation skills
Audience: Graduate

FOREST AND WILDLIFE ECOLOGY (F&W ECOL)

F&W ECOL/ENVIR ST 100 — FORESTS OF THE WORLD
3 credits.

Ecology and conservation of a wide range of forests, from tropical rain and dry forests, boreal forests, to temperate forests, outside of the USA. The main threats to forests, and different strategies to solve conservation and sustainable management issues in international forestry. Trade-offs in forest conservation and management, resulting from different values that people place on forests, issues in equity and equality in access to forest resources. The role of forests in climate change and extinction of species.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify relevant stakeholders in forest landscapes across the world
Audience: Undergraduate

2. Give examples of conservation threats to forests in countries other than the USA and relevant solutions
Audience: Undergraduate

3. Communicate about evidence on forest conservation and threats rigorously, correctly, and under different formats
Audience: Undergraduate

4. Demonstrate, on specific examples, how trade-offs in forest conservation originate and work
Audience: Undergraduate

5. Explain the role of forests in solutions to climate change and species extinctions
Audience: Undergraduate

F&W ECOL 101 – ORIENTATION TO WILDLIFE ECOLOGY
1 credit.

Introduction to Wildlife Ecology and the profession of wildlife management/conservation. Emphasis on preparing for a successful career.
Requisites: Declared in Wildlife Ecology
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe opportunities to engage with faculty, staff, and students in the Department of Forest & Wildlife Ecology#
Audience: Undergraduate

2. Describe the skills of a successful college student and develop a plan for completing the wildlife ecology major
Audience: Undergraduate

3. Identify opportunities to gain additional skills and experience beyond the classroom
Audience: Undergraduate

4. Examine various career options and identify skills and attributes desired by employers#
Audience: Undergraduate

5. Identify resources and services available within the Department of Forest & Wildlife Ecology, CALS, and on the UW-Madison campus to help you achieve your academic and career goals
Audience: Undergraduate

6. Discuss complex issues in the field of wildlife ecology with peers and instructors
Audience: Undergraduate

7. Identify the value of multiple evidence-based perspectives in the field of forest and wildlife ecology#
Audience: Undergraduate

F&W ECOL 105 – ENVIRONMENT, POLLUTANTS, AND YOU
3 credits.

As human populations continue to grow, understanding how we influence the environment is a critical first step to learning how we can protect both natural ecosystems and human health. One of the key ways humans affect the environment is through the creation and spread of pollutants. Pollutants come in many forms and can have effects on levels ranging from the molecular, to the individual, to whole communities, to regional ecosystems, and even to planetary-wide systems. Learn and raise awareness about these dynamics, while also developing the skills to communicate effectively about them.
Requisites: None
Course Designation: Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Identify resources and services available through CALS and UW-Madison.
Audience: Undergraduate

2. Describe skills of a successful college student, such as organizational and study skills and appropriate interactions with peers/instructors.
Audience: Undergraduate

3. Reflect on academic, career, and personal goals.
Audience: Undergraduate

4. Discuss complex issues related to ecotoxicology with peers and instructors.
Audience: Undergraduate

5. Identify the benefits of diverse perspectives in the field of ecotoxicology.
Audience: Undergraduate

6. Identify and communicate impacts of contemporary environmental pollutants at multiple levels of biological organization.
Audience: Undergraduate

7. Practice science communication techniques using multiple platforms.
Audience: Undergraduate

8. Identify real world applications of ecotoxicological training.
Audience: Undergraduate

F&W ECOL 110 – LIVING WITH WILDLIFE - ANIMALS, HABITATS, AND HUMAN INTERACTIONS
3 credits.

A general survey of wildlife and wildlife conservation. Basic characteristics and management of wildlife populations and habitats. Human perceptions and interactions with wildlife. Current issues in wildlife management and conservation.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Discuss the ways in which humans interact with wildlife and how they influence our values and attitudes towards wildlife#
Audience: Undergraduate

2. List and describe the most significant events in the history of wildlife conservation in North America
Audience: Undergraduate

3. Explain the North American model for wildlife conservation and contrast it with wildlife conservation in other parts of the world
Audience: Undergraduate

4. Discuss the role that Aldo Leopold played in the development of the wildlife profession and the influence of his writings, including A Sand County Almanac
Audience: Undergraduate

5. Describe basic characteristics of animal populations and communities, and explain how populations increase or decrease#
Audience: Undergraduate

6. Describe the different types of terrestrial habitats and discuss ways in which they can be managed to enhance wildlife
Audience: Undergraduate

7. Discuss the most important and contentious issues relating to wildlife conservation#
Audience: Undergraduate

8. Describe the duties and responsibilities of wildlife professionals and the agencies and organizations that employ them
Audience: Undergraduate

9. Discuss the importance and impact of wildlife on human society
Audience: Undergraduate

F&W ECOL 210 – FOREST RESOURCES PRACTICUM
3 credits.

Field training and experience; exposure to forestry operations, equipment, procedures, and management problems.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Identify native and non-native members of local forest ecosystems, including plants, vertebrates, and invertebrates.
Audience: Undergraduate

2. Apply forest measurement techniques to complete forest ecosystem assessments.
Audience: Undergraduate

3. Collect, manage, analyze, and draw conclusions from datasets.
Audience: Undergraduate

4. Formulate and test novel hypotheses related to forest ecosystems.
Audience: Undergraduate

5. Work collaboratively to accomplish measurement, analysis, and writing tasks.
Audience: Undergraduate

F&W ECOL/C&E SOC/SOC 248 – ENVIRONMENT, NATURAL RESOURCES, AND SOCIETY
3 credits.

Introduces the concerns and principles of sociology through examination of human interaction with the natural environment. Places environmental issues such as resource depletion, population growth, food production, environmental regulation, and sustainability in national and global perspectives.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe and critique the role of social conditions and social change in shaping equities and disparities in environment, health, and community
Audience: Undergraduate

2. Place an understanding of local social conditions and change in the global context of rural and urban life, including political, ecological, economic, geographic, historical, and cultural dimensions
Audience: Undergraduate

3. Frame and conduct social science research
Audience: Undergraduate

4. Ethically apply research methods, such as qualitative, quantitative, historical, interdisciplinary, participatory, and action approaches, and evaluate findings
Audience: Undergraduate

5. Demonstrate leadership and collaboration skills for working with people from a diversity of backgrounds in professional and ethical ways that enable beneficial and regenerative relationships
Audience: Undergraduate

6. Demonstrate advanced verbal and written communication skills that are applicable in a professional setting
Audience: Undergraduate

7. Articulate the complex and intricate relationships between people and the planet by exploring the many stories that bind these two together in the US
Audience: Undergraduate

8. Describe how these social ecological relationships produce unequal health outcomes, life chances, and opportunities
Audience: Undergraduate

9. Identify the values and principles of environmental movements
Audience: Undergraduate

10. Evaluate how the climate change crisis exacerbates urgent and contemporary social problems
Audience: Undergraduate

11. Apply analytical skills in spatial, political economic, culture, and critical environmental analysis
Audience: Undergraduate

F&W ECOL 289 – HONORS INDEPENDENT STUDY
1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area of Forest and Wildlife Ecology. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2001
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills#
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies
Audience: Undergraduate

4. Effectively communicate findings
Audience: Undergraduate

F&W ECOL 299 – INDEPENDENT STUDY
1-3 credits.

Research work for students under direct guidance of a faculty member in an area of Forest and Wildlife Ecology. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills##
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies
Audience: Undergraduate

4. Effectively communicate findings#
Audience: Undergraduate

F&W ECOL 300 – FOREST MEASUREMENTS
4 credits.

Field measurements of trees and forests. Basic concepts of statistics and sampling as applied to forestry. Use of aerial photographs, GIS, and satellite imagery.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate basic competency in the use of forest measurement equipment and technology#
Audience: Undergraduate

2. Calculate individual tree and stand parameters
Audience: Undergraduate

3. Estimate timber volume
Audience: Undergraduate

4. Apply basic statistics in forestry#
Audience: Undergraduate

5. Produce a simple forest inventory using a variety of sampling techniques
Audience: Undergraduate

6. Communicate the results of data collected in written form
Audience: Undergraduate

F&W ECOL 305 – FOREST OPERATIONS
2 credits.

Introduction to forestry operations in the implementation of forest plans, including site preparation, stand establishment, and harvesting systems. Analysis of costs and productivity, including system balance, marketing, timber procurement, and contractual services.
Requisites: F&W ECOL 300 or 410
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the industrial products that come from our forests#
Audience: Undergraduate

2. Implement timber sale establishment and administration
Audience: Undergraduate

3. Describe the vast array of harvesting systems and their applications#
Audience: Undergraduate

4. Explain the importance of contract payment systems for the forest industry#
Audience: Undergraduate

5. Analyze transportation systems in the forest industry
Audience: Undergraduate

6. Discuss the application of ethics in forest management
Audience: Undergraduate

F&W ECOL 306 – TERRESTRIAL VERTEBRATES: LIFE HISTORY AND ECOLOGY
4 credits.

Life history, ecology, distribution, and taxonomy of reptiles, amphibians, birds, and mammals. Birds will receive less emphasis. Primary focus is on Wisconsin species, including conservation threats, but covers all major North American families, and surveys major groups of the world. Designed as a foundation for detailed study of vertebrates or to satisfy the need for a scientific introduction to Wisconsin vertebrates.
Requisites: ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), (BIOCORE 381 and 382), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Provide examples of species for each major terrestrial vertebrate order, including basic life history information associated with each example
Audience: Undergraduate

2. Identify the geographic area where major terrestrial vertebrate orders reach their greatest abundance and the approximate number of extant species in each major order
Audience: Undergraduate

3. Compare and contrast key morphological, physiological, and behavioral differences that contribute to broad life history strategies among terrestrial vertebrate classes and that contribute to distinctions among selected finer scale taxa
Audience: Undergraduate

4. Compare and contrast the body plan, behavioral and physiological adaptations, geographic distribution, and traits contributing to abundance or rarity for terrestrial vertebrate species found in Wisconsin
Audience: Undergraduate

5. Identify and provide the scientific name of all mammals, reptiles, and amphibians in Wisconsin and identify and provide the common name of a subset of Wisconsin birds
Audience: Undergraduate

6. Identify, by sound, all Wisconsin anurans (frogs and toads) and a selection of birds
Audience: Undergraduate

7. Identify the majority of Wisconsin mammal species from the skull alone, or from a combination of skull plus skin
Audience: Undergraduate

F&W ECOL 318 – PRINCIPLES OF WILDLIFE ECOLOGY
3 credits.

Major environmental factors affecting wildlife; structure and behavior of wildlife populations; regional wildlife communities and their conservation.
Requisites: Declared in Wildlife Ecology
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply the scientific method to test ecological hypotheses and resolve wildlife management issues
Audience: Undergraduate

2. Describe and distinguish among the important properties of each ecological level of organization, including individual organisms, populations, communities, and ecosystems#
Audience: Undergraduate

3. Explain how animals balance between inputs and outputs of water, heat, energy, and nutrients to maintain homeostasis
Audience: Undergraduate

4. Explain how animals select habitats and food and adapt to seasonal changes#
Audience: Undergraduate

5. Use cost-benefit analysis to determine the environmental conditions under which animals are likely to defend territories or join social groups
Audience: Undergraduate

6. Define life history parameters that influence population growth and regulation and distinguish between exponential and logistic population growth
Audience: Undergraduate

7. Describe and distinguish among the different types of interspecific interactions and model how interspecific
Audience: Undergraduate

8. Describe the major types of ecological communities and how they vary in space and time
Audience: Undergraduate

F&W ECOL/ENVIR ST/ZOOLOGY 360 – EXTINCTION OF SPECIES
3 credits.

A comprehensive treatment of the ecology, causes, and consequences of species extinction. Ecology and problems of individual species, habitat alteration and degradation, socio-economic pressures and conservation techniques and strategies.
Requisites: Sophomore standing and ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), BIOLOGY/BOTANY 130, or (BIOCORE 381 and 382)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the ecological and evolutionary processes shaping the distribution of species diversity globally
Audience: Undergraduate

2. Explain how human activities can threaten species with extinction
Audience: Undergraduate

3. Identify genetic problems and management in small populations
Audience: Undergraduate

4. Discuss social and political dimensions to conservation problems and solutions
Audience: Undergraduate

5. Identify the basic components of the US Endangered Species Act (ESA) and how the ESA has been applied to the conservation of species
Audience: Undergraduate

6. Evaluate and create conservation strategies for at-risk species
Audience: Undergraduate

F&W ECOL 375 – SPECIAL TOPICS
1-4 credits.

Specialized subject matter of current interest to undergraduate students.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

F&W ECOL 379 – PRINCIPLES OF WILDLIFE MANAGEMENT
3 credits.

Ways of conserving desired numbers of animals for the overall best interests of society, be they aesthetic, ecological, economic, commercial or recreational; includes management of endangered species, exploited species, wildlife communities in nature reserves, and wildlife pests.
Requisites: F&W ECOL 318 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the history of wildlife management and conservation in North America.
Audience: Both Grad & Undergrad

2. Compare multiple stakeholder viewpoints demonstrating the ways in which human dimensions influence management decisions and outcomes.
Audience: Both Grad & Undergrad

3. Describe key policies governing wildlife management and conservation.
Audience: Both Grad & Undergrad

4. Apply the ecological principles that are used in biologically sound wildlife management and conservation plans to various scenarios.
Audience: Both Grad & Undergrad

5. Summarize management approaches for various groups of animals, including game, non-game, invasive, and rare/endangered animals.
Audience: Both Grad & Undergrad

6. Explain how different habitat types, including grasslands, forests, and wetlands, are managed to support the wildlife that depend on them.
Audience: Both Grad & Undergrad

7. Assess ways to approach wildlife management in the context of a changing global climate.
Audience: Both Grad & Undergrad

8. Synthesize and communicate advanced wildlife management concepts to an academic audience.
Audience: Graduate

F&W ECOL 390 – LEARNING TO ACTION: PROFESSIONAL DEVELOPMENT
1 credit.

Preparation for natural resources professions and the job market after graduation. Development of professional skills including communication, ethical decision-making, and conflict resolution. Experience in job searching, editing resumes, and interviewing for jobs.
Requisites: Declared in Forest Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Reflect on your internship experience, what you learned, and how it informs your professional future
Audience: Undergraduate

2. Understand opportunities and challenges in forestry and natural resources professions
Audience: Undergraduate

3. Improve your ability to find, apply, and interview for a job
Audience: Undergraduate

4. Improve your facilitation, communication, and conflict resolution skills
Audience: Undergraduate

5. Consider and articulate your desired long-term contributions to natural resources and society
Audience: Undergraduate

F&W ECOL 395 – DATA AND GIS TOOLS FOR ECOLOGY
3 credits.

Quantitative tools applicable to the investigation of ecological problems, including but not limited to, statistics, Geographic Information Systems (GIS), Remote Sensing, and spatial analysis. Overview of commonly used quantitative techniques in ecological sciences with an emphasis on GIS and spatial analysis. Introduces spatial tools and practical applications using ecological/environmental data sets.
Requisites: MATH 113, 114, 171, placement into MATH 221, or graduate/professional standing
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe ecological datasets spatially and statistically using data storage and Geographic Information Systems (GIS) tools
Audience: Undergraduate

2. Acquire and map spatially explicit ecological data using GIS tools
Audience: Undergraduate

3. Identify patterns in complex ecological data sets
Audience: Undergraduate

4. Conduct common statistical analysis of digitized ecological data (such as: description, correlation, univariate regression, and hypothesis testing)
Audience: Undergraduate

5. Critically evaluate the results of statistical analyses, including validation, of ecological datasets
Audience: Undergraduate

F&W ECOL 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Forest and Wildlife Ecology and an internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Apply concepts learned in coursework to authentic professional situations
Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry
Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations
Audience: Undergraduate

F&W ECOL 400 – STUDY ABROAD IN FOREST AND WILDLIFE ECOLOGY
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

F&W ECOL/BOTANY 402 – DENDROLOGY: WOODY PLANT IDENTIFICATION AND ECOLOGY
3 credits.

Identification, ecological characteristics, ranges, adaptations to environment, and uses of evergreen and deciduous woody plants, with emphasis on species native to Wisconsin; lab and field work.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify all native Wisconsin trees, some common shrubs and vines, and a few important woody exotics by common and scientific name, in summer or winter condition.
Audience: Both Grad & Undergrad

2. Demonstrate a basic understanding of wood structure and use a key to identify blocks of wood.
Audience: Both Grad & Undergrad

3. Recognize the characteristic tree taxa of some of the world's major forest types and some interesting examples of the diversity of trees and their adaptations to their environments.
Audience: Both Grad & Undergrad

4. Compare the morphology, life history, and ecology of woody species to their distribution and habits.
Audience: Both Grad & Undergrad

5. Understand how humans affect the composition, structure and economic value of tree communities and apply this information to questions about management of woody vegetation under changing conditions.
Audience: Both Grad & Undergrad

6. Compare at least two methods for learning to identify a plant species using evidence from your experience in this course.
Audience: Both Grad & Undergrad

7. Construct new materials to teach woody plant ID or tree management issues to a particular target audience.
Audience: Graduate

8. Survey current scientific literature on a particular topic relevant to management of woody vegetation under changing conditions, and summarize current knowledge and knowledge gaps. Recommend next steps in research to improve management.
Audience: Graduate

F&W ECOL 410 – SILVICULTURE: APPLIED FOREST ECOLOGY
3-4 credits.

Ecologically-based forest management principles and practices for sustainable timber production, maintenance or restoration of biological diversity, and maintenance of aesthetic quality and site productivity. Includes coverage of even-aged and uneven-aged management, reforestation principles, and ecological restoration techniques.
Requisites: ZOOLOGY/BOTANY 460, F&W ECOL 550, or graduate/professional standing (or FW ECOL 460 prior to Fall 2026)
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe stand dynamics, including concepts of stand structure, function, establishment, growth, composition, health, and quality.
Audience: Both Grad & Undergrad

2. Explain the ecological underpinnings and technical considerations for common regeneration, establishment, and intermediate treatments that comprise modern silvicultural systems.
Audience: Both Grad & Undergrad

3. Develop data-driven, time- and space-bounded prescriptions for forest stands considering ecological, economic, and societal aspects of management decisions in an ethical context.
Audience: Both Grad & Undergrad

4. Communicate technical material using text, tables, graphs, and maps, including logical rationale supporting management decisions.
Audience: Both Grad & Undergrad

5. Create solutions to real-world forest management challenges by applying higher-order thinking skills to their knowledge of silviculture.
Audience: Both Grad & Undergrad

6. Survey current scientific literature on a particular topic relevant to management of forests in WI under changing conditions, summarize current knowledge and knowledge gaps, and recommend next steps in research to improve management.
Audience: Graduate

F&W ECOL 420 – REGULATED TRAPPING IN WILDLIFE MANAGEMENT AND CONSERVATION
1 credit.

Training and professional skill development for future natural resources professionals. Introduction to the importance of regulated trapping as a technique used in research, wildlife damage management, wildlife reintroduction, disease management, fur/food acquisition, etc.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the important biological and ecological aspects of furbearers
Audience: Undergraduate

2. Discuss furbearer management related laws and regulations, research, population modeling, and furbearer diseases
Audience: Undergraduate

3. Explain how regulated trapping is used by State, Federal and Tribal agencies to manage wildlife and their habitats
Audience: Undergraduate

4. Describe the many benefits of regulated trapping to society
Audience: Undergraduate

5. Identify terminology and workings of several types of traps, sets, and trapping equipment used to legally harvest furbearers and to avoid non-target species
Audience: Undergraduate

6. Summarize the goals of the Best Management Practices for Trapping Program (BMPs)
Audience: Undergraduate

7. Demonstrate proper fur handling and processing and knowledge of related terminology
Audience: Undergraduate

8. Communicate effectively about regulated trapping
Audience: Undergraduate

F&W ECOL 422 – HUNTING FOR CONSERVATION
1 credit.

Introduces the diverse values and important roles hunters and hunting play in wildlife conservation through historical and contemporary contexts. Provides practical skills for future natural resources professionals.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Learning Outcomes: 1. Describe the demographics of hunters in North America and their motivations for participating.
Audience: Undergraduate

2. Explain the role of hunting in wildlife management and conservation and how this relationship evolved.
Audience: Undergraduate

3. Identify the reason for and effect of hunting laws and regulations.
Audience: Undergraduate

4. Demonstrate the principles of firearm safety and describe the role of hunter education.
Audience: Undergraduate

5. Identify methods, types of hunting, and skills hunters use to legally harvest game animals in North America.
Audience: Undergraduate

6. Discuss the unique roles hunting plays in society, including intrinsic, cultural, biological, ecological, economic, and personal values.
Audience: Undergraduate

7. Describe the responsibility and ethics hunters are charged with to not only pursue their quarry safely and legally, but also ethically.
Audience: Undergraduate

F&W ECOL 424 – WILDLIFE ECOLOGY SUMMER FIELD PRACTICUM
2 credits.

Practicum emphasizing research and habitat management techniques through individual and group field work, tours, demonstrations and lectures.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify northern Wisconsin wildlife (birds, mammals, reptiles and amphibians) and plant (trees, shrubs, and herbaceous) species
Audience: Undergraduate

2. Perform wildlife inventory and monitoring techniques for birds, mammals, reptiles and amphibians
Audience: Undergraduate

3. Apply proper handling procedures for various wildlife species
Audience: Undergraduate

4. Conduct forest measurements and vegetation sampling
Audience: Undergraduate

5. Use a compass, Global Position System (GPS) and ArcGIS software
Audience: Undergraduate

6. Collect, summarize and integrate field data into a final report
Audience: Undergraduate

F&W ECOL/A A E 430 – DECISION METHODS FOR NATURAL RESOURCE MANAGERS
3 credits.

Applications of quantitative methods, including optimization and simulation, to the management of natural resources, especially forests.
Requisites: MATH 112, 114, or 171 or placement into MATH 211 or 221. Not open to students with credit for A A E 652 prior to Fall 2025.
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Quantify the timber and non-timber values of forest resources
Audience: Undergraduate

2. Describe and apply financial decision criteria to evaluate forest investments
Audience: Undergraduate

3. Explain how optimal rotation ages are determined and what factors affect this calculation
Audience: Undergraduate

4. Create harvest scheduling models and apply them to diverse landowner objectives
Audience: Undergraduate

5. Apply knowledge of mathematical models and financial theory to determine optimal rotation age for a given species and communicate findings in written and verbal formats
Audience: Undergraduate

F&W ECOL 448 – DISTURBANCE ECOLOGY
3 credits.

An introduction to fire, wind, flooding, disease, insects and other disturbance regimes that serve as primary drivers of the structure and function of terrestrial ecosystems. Discusses how these disturbances interact, using case studies and data that highlight the role of disturbance in different ecosystems (e.g. grasslands, forests, tundra) with a focus on the ecosystem services they provide. Discusses and critiques management strategies used to mitigate biotic and abiotic disturbances, gaining critical insights from the literature as well as personal perspectives and experiences.
Requisites: BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify what characteristics are necessary to refer to an event as a disturbance and clearly define ways in which disturbances are categorized
Audience: Undergraduate

2. Determine and discuss mechanisms underlying different disturbance regimes in the context of ecological theory and observations
Audience: Undergraduate

3. Interpret, critique, and appropriately cite primary scientific literature in the field of disturbance ecology and extract critical information from figures and graphs
Audience: Undergraduate

4. Analyze and interpret data collected at various scales that relate to the causes and consequences of various disturbance regimes and identify the limitations and advantages of each data type
Audience: Undergraduate

5. Describe (through examples and case studies) how different disturbances interact with each other using appropriate terminology and definitions and evaluate context-dependent consequences for ecosystem function
Audience: Undergraduate

6. Evaluate how disturbance risk is assessed in various systems and determine approaches that are most amenable to intervention based on costs, benefits, and feasibility
Audience: Undergraduate

F&W ECOL 449 – DISTURBANCE ECOLOGY LAB (I): HERBIVORES AND FIRE
1 credit.

Explores natural and anthropogenic disturbances occurring in forest ecosystems through hands on learning experiences. Emphasis on the role of herbivores and fire with examination of management strategies. Applies basic ecological laboratory and field techniques to understanding disturbances that change the physical environment and disrupt ecosystem structure.
Requisites: BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss the importance of disturbance for ecosystem processes (e.g., nutrient cycling, biodiversity, soil development, etc.)
Audience: Undergraduate

2. Describe the effect of herbivores and fire on local forest habitats.
Audience: Undergraduate

3. Identify native and non-native members of local forest ecosystems and explain how they respond to herbivory and fire.
Audience: Undergraduate

4. Explain how population and community dynamics of plants are influenced by disturbance, stress, and species interactions.
Audience: Undergraduate

5. Formulate novel hypotheses related to declining forest understory biodiversity, design experimental protocols to falsify those hypotheses, and communicate research proposals in oral and written forms to a scientific audience.
Audience: Undergraduate

6. Apply basic ecological laboratory and field techniques to understanding ecological principles.
Audience: Undergraduate

F&W ECOL 450 – DISTURBANCE ECOLOGY LAB (II): FOREST PATHOGENS
1 credit.

Explores natural and anthropogenic disturbances occurring in forest ecosystems through hands on learning experiences. Focuses on the causes of impoverished forests and the role and management of pathogens. Applies basic ecological laboratory and field techniques to understanding disturbances that change the physical environment and disrupt ecosystem structure.
Requisites: BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the importance of disturbance for ecosystem processes (e.g., nutrient cycling, biodiversity, soil development, etc.)
Audience: Undergraduate

2. Describe the problems associated with and causes of depauperate understories in the Deciduous Forest Biome.
Audience: Undergraduate

3. Describe the role of pathogens (including fungi, bacteria, and viruses) in forest disturbance.
Audience: Undergraduate

4. Explain how population and community dynamics of plants are influenced by disturbance, stress, and species interactions.
Audience: Undergraduate

5. Test novel hypotheses related to declining forest understory biodiversity, implement experimental protocols to falsify those hypotheses, graph/analyze/interpret results, and communicate these results in oral and written forms to a scientific audience.
Audience: Undergraduate

6. Apply basic ecological laboratory and field techniques to understanding ecological principles.
Audience: Undergraduate

F&W ECOL/SOIL SCI 451 – ENVIRONMENTAL BIOGEOCHEMISTRY
3 credits.

Explores long and short-term cycles of carbon, nitrogen, phosphorus, sulfur, and metals as well as water and energy cycles between water, the atmosphere, terrestrial vegetation, and soils. Emphasizes the linkage between terrestrial vegetation and soils across global biomes for managed and unmanaged ecosystems. Investigates biogeochemical processes through their biochemical constituents, conceptual models and exploration of isotopic and chemical data. Provides a practical understanding of the interactions between components and fluxes of terrestrial ecosystems and how data is developed and employed.
Requisites: CHEM 104, 109, 116, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe global biogeochemical cycles of C, N, P, K, S, Fe, energy, and water and their importance
Audience: Both Grad & Undergrad

2. Explain the importance of human perturbations to and management of biogeochemical cycles
Audience: Both Grad & Undergrad

3. Describe key methods used to study biogeochemistry and explain their limitations
Audience: Both Grad & Undergrad

4. Predict which biogeochemical reactions would be likely across different environments and conditions
Audience: Both Grad & Undergrad

5. Discuss and critically evaluate scientific papers in biogeochemistry at a graduate level
Audience: Graduate

6. Discuss and critically evaluate scientific papers in biogeochemistry at an advanced undergraduate level
Audience: Undergraduate

7. Characterize elemental cycling within a system of interest, comparing and contrasting different elements
Audience: Graduate

8. Characterize elemental cycling within a system of interest
Audience: Undergraduate

F&W ECOL 458 – ENVIRONMENTAL DATA SCIENCE
3 credits.

Introduces fundamental machine learning techniques for numerical modeling and data analysis and modern computer programming tools used to analyze, prepare, and visualize data from common formats of datasets in the field of Earth and environmental sciences. Emphasizes opportunities to consider real-world applications for concepts in environmental data science.
Requisites: STAT 240, 301, 324, 371, or graduate/professional standing
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate introductory skills in using collaboration technology (e.g. Jupyter Notebooks) to write, edit, and run programs in a scientific programming language (e.g. Python)
Audience: Both Grad & Undergrad

2. Recognize, read, write and use common environmental dataset formats
Audience: Both Grad & Undergrad

3. Use a scientific programming language (e.g. Python) to read and process environmental data
Audience: Both Grad & Undergrad

4. Produce visualizations of environmental data, including basic scientific charts, statistics, and maps
Audience: Both Grad & Undergrad

5. Understand fundamentals of modern machine learning algorithms and gain experience of practical use of them
Audience: Both Grad & Undergrad

6. Solve real-world data science problems individually and in teams
Audience: Both Grad & Undergrad

7. Identify the frontiers in real-world environmental science challenges and how data science can help
Audience: Both Grad & Undergrad

8. Identify a problem in environmental science that may be solved or better understood through data science, provide a basic visualization or analysis of a data set associated with that problem, and communicate findings effectively
Audience: Undergraduate

9. Develop in-depth spatial and/temporal analyses using advanced data science tools (such as machine learning) and visual datasets related to your own research or anticipated area of research that meet the standards of scientific journals, critically evaluate your findings, and situate them within the larger context of current research literature
Audience: Graduate

F&W ECOL/ENVIR ST 515 – NATURAL RESOURCES POLICY
3 credits.

Examine natural resources policy and law in the United States relating to forests, wildlife, and other natural resources. Investigates the policy-making process and the role of science, values, property, economics, and justice in the development of federal and state resources policy. Practice professional written and oral communication and ethical engagement in resources policy and administration.
Requisites: Satisfied Communications A or graduate/professional standing
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Summarize the policy process, major federal and state laws, and decision-makers governing natural resources in the United States.
Audience: Both Grad & Undergrad

2. Analyze environmental policy and policy research drawing on the themes of values, economics, justice, and science and articulating policy implications for lay and professional audiences.
Audience: Both Grad & Undergrad

3. Differentiate the roles in policy development of different actors and their values and interests.
Audience: Both Grad & Undergrad

4. Apply advanced skills in professional communication through writing, speaking, logical thinking, persuasive rhetorical strategies to communicate with diverse audiences.
Audience: Both Grad & Undergrad

5. Evaluate and synthesize primary literature on natural resources policy to assess the influence of policy processes, legal frameworks, and stakeholder values on resource management, and effectively integrate these insights into policy development and communication strategies for diverse audiences.
Audience: Graduate

F&W ECOL/BOTANY/ENVIR ST/ZOOLOGY 516 – CONSERVATION BIOLOGY
3 credits.

Investigate the science behind the protection of nature and preservation of biodiversity by focusing on both the biological and socioeconomic factors that underlie the challenges to and the impacts of conservation efforts. Explore the theory, research, and application of biological conservation from an interdisciplinary, international, solutions-focused perspective. Learn about the many threats to Earth's biodiversity but also examine in-depth and apply approaches to overcome them.
Requisites: Satisfied Quantitative Reasoning (QR) A and ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Comm QR - Quantitative Reasoning B
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Distinguish conservation biology from other scientific disciplines and describe its over-arching principles.
Audience: Both Grad & Undergrad

2. Articulate many reasons why the conservation of biological diversity (at many levels) is important.
Audience: Both Grad & Undergrad

3. Quantify biodiversity at the individual, population, and species level by applying various commonly used models and indices.
Audience: Both Grad & Undergrad

4. Explain orally and in writing the principal threats to biodiversity, to both scientific and layperson audiences (habitat loss and fragmentation; industrial agriculture; climate change; overexploitation; invasive species; pollution) and the specific biological effects of these threats.
Audience: Both Grad & Undergrad

5. Outline strategies to implement at the personal, local, and global scales for solving the biodiversity crisis.
Audience: Both Grad & Undergrad

6. Critically analyze, apply, and communicate recommendations for changing personal behaviors to mitigate the biodiversity and climate crises.
Audience: Both Grad & Undergrad

7. Assess the strengths and weaknesses of various conservation strategies or policy approaches.
Audience: Both Grad & Undergrad

8. Synthesize multiple investigations of conservation strategies to assess trade#offs and synergies among them.
Audience: Graduate

9. Make science#based recommendations for the appropriate conservation approach or strategy for a given situation.
Audience: Graduate

10. Manipulate quantitative data using multi-step arguments to evaluate, interpret, and express solutions to problems in biodiversity estimation, population monitoring, and genetics in the context of conservation.
Audience: Both Grad & Undergrad

F&W ECOL/ZOOLOGY 520 – ORNITHOLOGY
3 credits.

Introduction to bird biology, ecology, and behavior. Topics include the evolutionary origin of birds and flight, anatomy and physiology, functional morphology, migration, communication, reproductive strategies, ecological adaptations and roles, and biogeographical patterns.
Requisites: ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Articulate how birds differ from other vertebrate taxa and trace birds' basic evolutionary history.
Audience: Both Grad & Undergrad

2. Characterize the adaptations (morphological, physiological, behavioral) that are associated with birds' great evolutionary success.
Audience: Both Grad & Undergrad

3. Analyze the mechanics of flight, and relate different modes of flight to species' life history strategies.
Audience: Both Grad & Undergrad

4. Compare and contrast the annual cycle of bird groups that have distinct life history strategies.
Audience: Both Grad & Undergrad

5. Explain different modes of learning in birds, and what conditions favor the different modes.
Audience: Both Grad & Undergrad

6. Synthesize modes of communication in birds.
Audience: Both Grad & Undergrad

7. Distinguish between factors shaped by natural versus sexual selection, and discuss the role of sexual selection, habitat selection, and foraging mode in shaping avian behavior and ornamentation.
Audience: Both Grad & Undergrad

8. Identify and discuss contemporary issues in bird conservation, and predict how various avian attributes are associated with risk of extinction.
Audience: Both Grad & Undergrad

9. Assess and integrate primary scientific literature to evaluate evolutionary and ecological theories in ornithology and apply these insights to address a contemporary issue in avian biology or conservation.
Audience: Graduate

F&W ECOL/ZOOLOGY 521 – BIRDS OF SOUTHERN WISCONSIN
3 credits.

Outdoor and indoor labs/lectures emphasizing identification of southern Wisconsin birds by sight and vocalization. Two required Saturday field trips in Southern Wisconsin.
Requisites: ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify bird species found in Southern Wisconsin by sight and vocalization.
Audience: Both Grad & Undergrad

2. Compare and contrast habitat associations (e.g., wetlands, grasslands, oak woodlands, conifer forest, riparian zones) and some life history strategies (e.g., foraging guild, migratory guild) for the majority of species.

Audience: Both Grad & Undergrad

3. Explain and use bird monitoring techniques.
Audience: Both Grad & Undergrad

4. Assess and integrate primary scientific literature to evaluate a question about speciation or migration pattern changes or a mutually agreed on (with instructor) topic relevant to field observations of birds.
Audience: Graduate

F&W ECOL/A A E/ECON 531 – NATURAL RESOURCE ECONOMICS
3 credits.

Economic concepts and tools relating to management and use of natural resources, including pricing principles, cost-benefit analysis, equity, externalities, economic rent, renewable and nonrenewable resources, and resource policy issues.
Requisites: ECON 301 or 311 or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Employ appropriate concepts in order to correctly define the economic benefits accrued from different natural resources.
Audience: Both Grad & Undergrad

2. Apply appropriate methodologies and tools to demonstrate the conditions under which the benefits are likely to be captured or dissipated by real world actors.
Audience: Both Grad & Undergrad

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of maintaining healthy supplies of forests, biodiversity, fish and wildlife, and freshwater.
Audience: Both Grad & Undergrad

4. Analyze the causes of and solutions for the sustainability challenges of maintaining healthy supplies of forests, biodiversity, fish and wildlife, and freshwater.
Audience: Both Grad & Undergrad

5. Apply academic principles of natural resource economics to a real-world policy problem.
Audience: Graduate

F&W ECOL/SURG SCI 548 – DISEASES OF WILDLIFE
3 credits.

Provides an overview of the issues involved across a wide range of wildlife diseases, presented within the context of ecosystem health or "one health". Content will be on the biological, epidemiological, clinical, public health and, in some cases, sociopolitical ramifications of wildlife diseases. Covers a wide variety of wildlife diseases caused by bacteria, viruses, parasites, prions, and environmental contaminants. Consequences associated with environmental changes on the manifestation of wildlife diseases will also be discussed. This range of diseases will be presented in order to familiarize the many facets involved in disease management, from animal and human health issues, to ecological and environmental considerations, to the role of society in contributing to, and managing, these diseases.
Requisites: BOTANY/BIOLOGY 130, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing
Course Designation: Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain how an infection differs from disease.
Audience: Undergraduate

2. Recognize different groups of infectious microorganisms: viruses, bacteria, fungi, parasites, prions, etc.
Audience: Undergraduate

3. Define and describe ecosystem health or one health.
Audience: Undergraduate

4. Define the terms zoonosis, zoonoses, and zoonotic.
Audience: Undergraduate

5. Evaluate how anthropogenic influences exacerbate transmission of zoonotic diseases.
Audience: Undergraduate

6. Describe and explain the epidemiological concepts related to each wildlife disease presented in this course.
Audience: Undergraduate

7. Recognize diseases that are specific to animal groups or humans, or are nonspecific, having the potential to infect many different species.
Audience: Undergraduate

F&W ECOL 550 – FOREST ECOLOGY
3 credits.

Introduction to major abiotic and biotic factors that influence forest ecosystem composition, structure, and function. Reviews important processes that influence structure and function of forest ecosystems. Uses basic ecosystem concepts to elucidate influence of anthropogenic (including forest management) and natural disturbances on forest ecosystem structure and function.
Requisites: BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe global and local biogeographical regions as well as the major palaeoecological events (e.g., continental drift and climate change) responsible for their development.
Audience: Both Grad & Undergrad

2. Explain how environmental factors influence net photosynthesis, ecosystem productivity, and nutrient cycling.
Audience: Both Grad & Undergrad

3. Explain how population and community dynamics of plants are influenced by disturbance, stress, and species interactions.
Audience: Both Grad & Undergrad

4. Explain natural and anthropogenic factors that influence soil types, mineral nutrient availability, and plant community characteristics.
Audience: Both Grad & Undergrad

5. Explain trade-offs involved in biodiversity conservation, economic development, and mitigation of climate change.
Audience: Both Grad & Undergrad

6. Discuss the value of forests (ecological, economical, and cultural) and the threats they face.
Audience: Both Grad & Undergrad

7. Evaluate and synthesize primary scientific literature to analyze complex ecological processes and interactions in forest ecosystems, and apply these findings to develop evidence-based strategies for addressing conservation challenges, climate change, and sustainable forest management.
Audience: Graduate

F&W ECOL 551 – FOREST ECOLOGY LAB
1 credit.

Review concepts presented in F&W ECOL 550 by exposing the key concepts and processes discussed that can best be seen in the field or illustrated with the use of ecosystem models.
Requisites: F&W ECOL 550 or concurrent enrollment, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply fundamental ecological principles in forest ecosystems.
Audience: Both Grad & Undergrad

2. Identify native and non-native members of local forest ecosystems and observe their interactions.
Audience: Both Grad & Undergrad

3. Select appropriate quantitative field sampling techniques for ecological investigations.
Audience: Both Grad & Undergrad

4. Critically evaluate survey and experimental data and draw appropriate scientific conclusions.
Audience: Both Grad & Undergrad

5. Apply software tools to organize, analyze, and present data and support reasoning.
Audience: Both Grad & Undergrad

6. Formulate hypotheses, design experimental protocols to falsify those hypotheses, graph/analyze/interpret results, and present studies in oral and written forms in manners appropriate for science.
Audience: Both Grad & Undergrad

7. Design and conduct independent research, incorporating primary scientific literature, applying advanced ecological sampling techniques, analyzing complex datasets with appropriate software tools, and presenting findings in professional formats that contribute to the scientific understanding of forest ecosystems.
Audience: Graduate

F&W ECOL 561 – WILDLIFE MANAGEMENT TECHNIQUES
3 credits.

Preparation of collections, analyses of food habits, sex and age determinations, censuses, trapping and banding, planting food and cover, research techniques.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and list various wildlife research techniques, such as GIS, GPS, animal capture, and tracking methods
Audience: Undergraduate

2. Explain the principles and applications of different wildlife research techniques, including the use of trail cameras and habitat surveys
Audience: Undergraduate

3. Use field equipment and techniques, such as radio-tracking and stable isotope analysis, in real-world wildlife research scenarios
Audience: Undergraduate

4. Analyze data collected from field experiments, such as mark-recapture and occupancy models, to draw meaningful conclusions about wildlife populations and behaviors
Audience: Undergraduate

5. Critically evaluate the effectiveness and limitations of various wildlife research techniques and methodologies discussed in the course
Audience: Undergraduate

6. Design and propose a comprehensive wildlife research project, incorporating appropriate techniques and methodologies learned throughout the course
Audience: Undergraduate

F&W ECOL/LAND ARC/ZOOLOGY 565 – PRINCIPLES OF LANDSCAPE ECOLOGY
2 credits.

Emphasizes the importance of spatial patterns at broad scales. Concepts and applications are covered.
Requisites: (ZOOLOGY/BOTANY 460 or F&W ECOL 550, or FW ECOL 460 prior to Fall 2026) and (STAT 301, 371, or F&W ECOL/STAT 571, or HORT 571 prior to Spring 2025), or graduate/professional standing
Course Designation: Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019

F&W ECOL/STAT 571 – STATISTICAL METHODS FOR BIOSCIENCE I
4 credits.

Descriptive statistics, distributions, one- and two-sample normal inference, power, one-way ANOVA, simple linear regression, categorical data, non-parametric methods; underlying assumptions and diagnostic work.
Requisites: Graduate/professional standing
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

F&W ECOL/STAT 572 – STATISTICAL METHODS FOR BIOSCIENCE II
4 credits.

Polynomial regression, multiple regression, two-way ANOVA with and without interaction, split-plot design, subsampling, analysis of covariance, elementary sampling, introduction to bioassay.
Requisites: STAT/F&W ECOL 571 (or HORT 571 prior to Spring 2025)
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

F&W ECOL 577 – COMPLEXITY AND CONSERVATION OF WHITE-TAILED DEER
3 credits.

Solve problems that arise in the conservation and management of wildlife populations requires that managers understand and evaluate human cultural, economic, and political issues in addition to ecological issues. Use case studies to understand the interdisciplinary nature of wildlife management while gaining practical hands-on experiences.
Requisites: Declared in Wildlife Ecology and Junior Standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop an interdisciplinary understanding of wildlife management, integrating ecological, cultural, economic, and political dimensions.
Audience: Undergraduate

2. Enhance problem-solving skills by addressing real-world deer management policy issues, analyzing these problems, and proposing viable solutions.
Audience: Undergraduate

3. Conduct thorough research and analysis on deer management topics, citing authoritative sources and addressing regulatory language.
Audience: Undergraduate

4. Create detailed policy proposals modeled on the "Green Sheet" process used by the Department of Natural Resources and the Natural Resources Board of Wisconsin, including a comprehensive written document and an oral presentation.
Audience: Undergraduate

5. Gain practical experience through extra credit opportunities such as fieldwork, attending Natural Resource Board meetings, shadowing wildlife professionals, and participating in deer research projects.
Audience: Undergraduate

F&W ECOL 590 – INTEGRATED RESOURCE MANAGEMENT
3 credits.

Resource management planning in state and federal land management agencies. Apply principles by working in teams to develop a management plan for a real property by inventorying resources; developing management objectives and alternatives; and analyzing their ecological, social and institutional implications.
Requisites: Declared in Forest Science, junior standing, and F&W ECOL 210 (or FW ECOL 658 prior to Fall 2026)
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Integrate and apply knowledge and skills in forest and wildlife ecology, forest management, hydrology and watershed management, forest economics and policy acquired during your tenure as a student
Audience: Undergraduate

2. Identify and propose solutions to resource management problems
Audience: Undergraduate

3. Collaborate effectively in teams to solve resource management issues
Audience: Undergraduate

4. Discuss resource management problems and solutions with scientific and professional audiences in both written and oral forms
Audience: Undergraduate

F&W ECOL 595 — WILDLIFE RESEARCH CAPSTONE
3 credits.

Synthesize concepts in wildlife ecology and prepare for a wildlife research career. Develop a professional-quality research proposal for an extended project, carry out a pilot ecological field study, and design and implement a social survey questionnaire.
Requisites: F&W ECOL 561
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify contemporary 'real world' issues facing wildlife specialists
Audience: Undergraduate

2. Apply knowledge gained in their academic programs to develop plans for addressing these issues
Audience: Undergraduate

3. Defend proposed plans in#written and oral forma
Audience: Undergraduate

4. Collaborate effectively in a team to carry out proposed plans
Audience: Undergraduate

5. Communicate findings in the form of written reports, professional presentations, and informal social media public communication
Audience: Undergraduate

6. Apply key professional skills marketable to future employers#
Audience: Undergraduate

F&W ECOL 655 — ANIMAL POPULATION DYNAMICS
3 credits.

Fluctuations of animal populations: techniques of study, documentation, controls.
Requisites: (F&W ECOL 318 or ZOOLOGY/BOTANY 460, or FW ECOL 460 prior to Fall 2026) and (MATH 112, 114, 171, or placement into MATH 221), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply field specific vocabulary and foundational theories of population dynamics to describe current understandings of how animal populations behave and interact
Audience: Both Grad & Undergrad

2. Assess how existing theories, models, and field data are understood and applied in wildlife conservation
Audience: Both Grad & Undergrad

3. Analyze population dynamics using species-specific examples that would be relevant to a professional wildlife biologist using data and conceptual models
Audience: Both Grad & Undergrad

4. Synthesize, evaluate, and formulate a position on current scholarly research in a focused area of population dynamics
Audience: Graduate

5. Demonstrate oral communication skills including identification and explanation of relevant content, clear organization, and effective delivery
Audience: Graduate

F&W ECOL/ZOOLOGY 660 – CLIMATE CHANGE ECOLOGY
3 credits.

The evidence that the Earth's climate is changing at unprecedented rates is now overwhelming. Environmental tipping points are being crossed and many species are adapting or failing to adapt. Climate change poses a significant problem for conserving and managing wildlife and their habitats. Climate change, its ecological impacts, and the principle of climate change adaptation in natural resources conservation will be discussed.
Requisites: BOTANY/BIOLOGY/ZOOLOGY 152, (BIOLOGY/ZOOLOGY 101 and 102), BIOCORE 381, or BIOLOGY/BOTANY 130, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. explain historic and future trends in climate change within an ecological context.
Audience: Both Grad & Undergrad

2. identify the eco-evolutionary impacts of climate change on biological communities (including changes in phenology and ranges, community dynamics, and altered trophic interactions).
Audience: Both Grad & Undergrad

3. develop a climate change vulnerability assessment for a given species or community.
Audience: Both Grad & Undergrad

4. analyze and incorporate climate and biological data in vulnerability assessments.
Audience: Graduate

F&W ECOL 675 – PROFESSIONAL DEVELOPMENT IN FOREST & WILDLIFE ECOLOGY
1 credit.

Provides opportunities for additional training in professional development skills relevant to careers in natural resources.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

F&W ECOL 681 – SENIOR HONORS THESIS
2-4 credits.

Individual study for undergraduate students in an Honors program completing a thesis in the area of Forest and Wildlife Ecology, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Review and analyze scientific literature
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question
Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research
Audience: Undergraduate

F&W ECOL 682 – SENIOR HONORS THESIS
2-4 credits.

Second semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Forest and Wildlife Ecology, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Review and analyze scientific literature##
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question#
Audience: Undergraduate

3. Write a thesis based on original research#
Audience: Undergraduate

F&W ECOL 691 – SENIOR THESIS
2-4 credits.

Independent research for majors completing a thesis in the areas of Forest Science or Wildlife Ecology, under the guidance of a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Review and analyze scientific literature
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question##
Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research
Audience: Undergraduate

F&W ECOL 692 – SENIOR THESIS
2-4 credits.

Independent research for majors completing a thesis in the areas of Forest Science or Wildlife Ecology, under the guidance of a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Review and analyze scientific literature
Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question##
Audience: Undergraduate

3. Write a thesis based on original research#
Audience: Undergraduate

F&W ECOL 699 – SPECIAL PROBLEMS
1-4 credits.

Individual advanced work in an area of Forest and Wildlife Ecology under the direct guidance of a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills#
Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving #
Audience: Undergraduate

3. Demonstrate application of research skills and methodologies#
Audience: Undergraduate

4. Effectively communicate findings#
Audience: Undergraduate

F&W ECOL/ENTOM 711 – MULTIVARIATE ANALYSIS OF ECOLOGICAL AND COMMUNITY DATA
2 credits.

Examines common methods of multivariate data analysis in ecology and environmental science. Covers methods for the analysis of complex, multidimensional datasets that are collected in the study of plant, invertebrate, fish, and bird communities. Addresses the concurrent analysis of the environmental factors that may drive community distributions. Provides the basis for predictive modeling of distributions across landscapes. General methods covered include ordination (PCA, DCA, NMDS, CCA), clustering (or classification), and other comparative analyses of data matrices (ANOSIM, Mantel tests). Includes an applied, "hands-on" approach on how to use these tools, and the circumstances under which their uses are either appropriate or inappropriate.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply common multivariate analysis techniques, such as ordination (PCA, DCA, NMDS, CCA) and clustering, to analyze complex, multidimensional datasets in ecology and environmental science.
Audience: Graduate

2. Interpret the results of multivariate analyses, understanding the ecological and environmental factors that drive community distributions and the relationships among different species and environmental variables.
Audience: Graduate

3. Develop predictive models of species distributions across landscapes using multivariate analysis methods, and evaluate the accuracy and reliability of these models.
Audience: Graduate

4. Conduct comparative analyses of data matrices using methods such as ANOSIM and Mantel tests, and understand the appropriate contexts for their application.
Audience: Graduate

5. Implement hands-on analytical approaches to multivariate data analysis, gaining practical experience with software tools and techniques, and understanding the circumstances under which different methods are appropriate or inappropriate.
Audience: Graduate

F&W ECOL 799 – PRACTICUM IN FORESTRY AND WILDLIFE ECOLOGY TEACHING
1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Articulate learning goals for the practicum in cooperation with supervising instructor#
Audience: Graduate

2. Prepare and/or implement lesson plans for a class period, week, or module of the class#
Audience: Graduate

3. Deliver course content and/or facilitate discussion
Audience: Graduate

4. Identify pedagogical strengths and opportunities for growth based on classroom assessment and/or feedback#
Audience: Graduate

F&W ECOL/BOTANY/ENTOM/ZOOLOGY 821 – FOUNDATIONS OF ECOLOGY
2 credits.

Foundational ideas in the field of ecology. Discussion topics trace the development of ecology as a discipline, and the roots of modern ecological thought, as well as the research approaches in ecology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and describe key debates in the history of ecology and ongoing controversies in the field.
Audience: Graduate

2. Differentiate ecological processes and how they sustain ecological systems.
Audience: Graduate

3. Moderate and participate in discussions about the significance of important ecological concepts.
Audience: Graduate

4. Summarize, interpret, and synthesize conceptual theories of ecology orally and in writing.
Audience: Graduate

5. Evaluate peer work and provide constructive, professional feedback.
Audience: Graduate

F&W ECOL 850 – DEMOGRAPHIC METHODS IN WILDLIFE CONSERVATION
3 credits.

Explores the application of demographic methods in the conservation and management of animal populations. Techniques explored include maximum likelihood and Bayesian estimation, count-based models, mark-recapture models, occupancy models, matrix models, and sensitivity analyses. Emphasizes application of these models in conservation decision making.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Estimate model parameters using maximum likelihood and Bayesian procedures
Audience: Graduate

2. Construct, implement, and interpret output from deterministic and stochastic matrix models of population growth
Audience: Graduate

3. Estimate and model ecological drivers of mortality and survival rates in wildlife populations using mark-recapture modeling methods
Audience: Graduate

4. Estimate and model ecological drivers of site occupancy rates for wildlife populations using occupancy modeling methods
Audience: Graduate

5. Evaluate model limitations, model assumptions, and the effects of violations of assumptions on inference
Audience: Graduate

6. Interpret population model output and apply results to conservation decision making in the face of uncertainty
Audience: Graduate

F&W ECOL 875 – SPECIAL TOPICS
1-4 credits.

Specialized subject matter of current interest to graduate students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

F&W ECOL 990 – RESEARCH AND THESIS
1-12 credits.

Independent research in preparation of a graduate thesis under supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Devise an engaging overview of a research area##
Audience: Graduate

2. Explain background, methods, results, and a discussion of experimental data#
Audience: Graduate

3. Design charts/tables that effectively communicate data#
Audience: Graduate

4. Assess peers on the effectiveness of a scientific presentation#
Audience: Graduate

5. Generate goals to improve presentation skills#
Audience: Graduate

F&W ECOL 999 – ADVANCED INDEPENDENT STUDY
1-3 credits.

Independent graduate study under supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Develop critical, analytical, and independent thinking skills#
Audience: Graduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Graduate

3. Demonstrate application of research skills and methodologies
Audience: Graduate

4. Effectively communicate findings#
Audience: Graduate

FRENCH (FRENCH AND ITALIAN) (FRENCH)

FRENCH 101 – FIRST SEMESTER FRENCH
4 credits.

Oral practice and conversation, grammar, reading, vocabulary building, and study of French and Francophone cultures.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate orally and in writing to share ideas, ask questions, and answer questions about personal identity, daily life, and likes and dislikes.
Audience: Undergraduate

2. Explain the main idea and some details of texts in French including short articles, surveys, interviews, and video texts related to personal identity, daily life, and likes and dislikes.
Audience: Undergraduate

3. Compose brief written texts in French (both informal and formal).
Audience: Undergraduate

4. Describe and narrate ideas in French about course topics listed above in an interview and a short digital recording.
Audience: Undergraduate

5. Use lexico-grammatical structures in French for communicating in the present about information relevant to course topics listed above.
Audience: Undergraduate

6. Interpret cultural products, practices, and perspectives related to course topics listed above.
Audience: Undergraduate

7. Reflect on differences between one's own culture and the cultural products, practices, and perspectives of the French-speaking world.
Audience: Undergraduate

FRENCH 102 – SECOND SEMESTER FRENCH
4 credits.

Oral practice and conversation, grammar, reading, vocabulary building, and study of French and Francophone cultures.
Requisites: FRENCH 101 or placement into FRENCH 102
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Communicate orally and in writing to share ideas, ask questions, and answer questions about personal identity, daily life, and likes and dislikes.
Audience: Undergraduate

2. Explain the main idea and some details of texts in French including short articles, surveys, interviews, and video texts related to personal identity, daily life, and likes and dislikes.
Audience: Undergraduate

3. Compose brief informal written texts in French (both formal and informal).
Audience: Undergraduate

4. Describe and narrate ideas in French.
Audience: Undergraduate

5. Use lexico-grammatical structures in French for communicating in the present about information relevant to course topics listed above.
Audience: Undergraduate

6. Interpret cultural products, practices, and perspectives related to course topics listed above.
Audience: Undergraduate

7. Reflect on differences between one's own culture and the cultural products, practices, and perspectives of the French-speaking world.
Audience: Undergraduate

FRENCH 105 – ACCELERATED INTRODUCTORY FRENCH
4 credits.

Accelerated development of communicative literacy skills in French and exploration of the contemporary French-speaking world, equivalent to the completion of both FRENCH 101 and FRENCH 102.
Requisites: Not open to students with credit for FRENCH 102
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Honors - Accelerated Honors (!)
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Communicate in French both orally and in writing to share ideas, ask questions, and answer questions about personal identity, daily life, likes and dislikes, travel, fashion, housing, and university and work life.
Audience: Undergraduate

2. Demonstrate understanding of the main idea and some details of texts in French including short articles, surveys, interviews, songs, and other video texts related to personal identity, daily life, likes and dislikes, travel, fashion, housing, and university and work life.
Audience: Undergraduate

3. Compose brief informal written texts in French about course topics listed above and formally in three writing projects.
Audience: Undergraduate

4. Describe and narrate ideas in French about course topics listed above in an interview and a short digital recording.
Audience: Undergraduate

5. Demonstrate understanding of lexico-grammatical structures in French for communicating in the present, past, and near future about information relevant to course topics listed above.
Audience: Undergraduate

6. Demonstrate understanding of cultural products, practices, and perspectives related to course topics listed above.
Audience: Undergraduate

7. Reflect on differences between one's own culture and the cultural products, practices, and perspectives of the French-speaking world.
Audience: Undergraduate

FRENCH 203 – THIRD SEMESTER FRENCH
4 credits.

Oral practice and conversation, grammar review, reading, vocabulary expansion, creative writing and study of French and Francophone cultures.
Requisites: FRENCH 102 or 105 (or FRENCH 201 prior to Summer 2025) or placement into FRENCH 203
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Share ideas and ask and answer questions about friendship, social media, scientific innovations, and food cultures around the world and explain the main idea and many details in live conversations and other interpersonal interactions.
Audience: Undergraduate

2. Read, listen, view, and explain the main idea and many details of texts in French such as articles, surveys, news reports, films, and literary texts related to course topics.
Audience: Undergraduate

3. Present ideas in French orally and in writing about course topics and implement strategies for argumentative and narrative presentational writing and speaking in French.
Audience: Undergraduate

4. Use lexico-grammatical structures in French for communicating in the present, past, and future to describe, narrate, hypothesize, and formulate arguments about the course topics.
Audience: Undergraduate

5. Interpret cultural products, practices, and perspectives related to course topics.
Audience: Undergraduate

6. Reflect on differences between one's own culture and the cultural products, practices, and perspectives of the French-speaking world.
Audience: Undergraduate

FRENCH 204 — FOURTH SEMESTER FRENCH
4 credits.

Advanced oral practice and conversation, grammar review, reading, vocabulary expansion, creative writing and study of French and Francophone cultures.
Requisites: FRENCH 203 or placement into FRENCH 204
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Share ideas and ask and answer questions about topics pertinent to French culture and explain the main idea and many details in live conversations and other interpersonal interactions.
Audience: Undergraduate

2. Read, listen, view, and explain the main idea and many details of texts in French such as articles, surveys, news reports, films, and literary texts related to course topics listed above.
Audience: Undergraduate

3. Present ideas in French orally and in writing about course topics listed above and implement strategies for argumentative and narrative presentational writing and speaking in French.
Audience: Undergraduate

4. Use lexico-grammatical structures in French for communicating in the present, past, and future to describe, narrate, hypothesize, and formulate arguments about the course topics identified above.
Audience: Undergraduate

5. Interpret cultural products, practices, and perspectives related to course topics listed above.
Audience: Undergraduate

6. Reflect on differences between one's own culture and the cultural products, practices, and perspectives of the French-speaking world.
Audience: Undergraduate

FRENCH 205 — ACCELERATED INTERMEDIATE FRENCH
4 credits.

Develops communicative skills in relation to interpersonal, interpretive, and presentational speaking and writing and their understanding of the French-speaking world. Course topics include friendship and social media, scientific innovations, food cultures around the world, globalization, immigration, and language advocacy.
Requisites: FRENCH 102 or 105 (or FRENCH 201 prior to Summer 2025) or placement into FRENCH 203. Not open to students with credit for FRENCH 204.
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Honors - Accelerated Honors (!)
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Communicate orally and in writing to share ideas, ask questions, and answer questions about friendship, social media, scientific innovations, food cultures around the world, globalization, immigration, and language advocacy.
Audience: Undergraduate

2. Demonstrate understanding of the main idea and many details of journalistic articles, surveys, interviews, feature-length films, works of literature and other written, multimodal, and video texts in French about course topics.
Audience: Undergraduate

3. Compose brief informal written texts in French about course topics listed above and formally in three writing projects (film review, editorial, public service announcement).
Audience: Undergraduate

4. Present ideas persuasively in French about course topics listed above in a group presentation and a short digital recording.
Audience: Undergraduate

5. Demonstrate understanding of lexico-grammatical structures in French for communicating in the past, present, and future about course topics listed above.
Audience: Undergraduate

6. Demonstrate understanding of cultural products, practices, and perspectives related to course topics listed above.
Audience: Undergraduate

7. Reflect on differences between one's own culture and the cultural products, practices, and perspectives of the French-speaking world.
Audience: Undergraduate

FRENCH 211 – FRENCH LITERARY AND INTERDISCIPLINARY STUDIES
3-4 credits.

An introductory, interdisciplinary area of French studies with a focus on French literary texts in English translation.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key writers, filmmakers and/or artists who are associated with the given course topic.
Audience: Undergraduate

2. Discuss several key literary, cinematic and artistic trends associated with the given course topic.
Audience: Undergraduate

3. Apply basic concepts of literary and film analysis to perform close readings of texts and film related to the given course topic.
Audience: Undergraduate

4. Demonstrate how contemporary social, cultural, and artistic practices associated with the given course topic have been influenced by historical events.
Audience: Undergraduate

5. Analyze literary texts, films and artistic works in relation to specific course topic-related themes or issues.
Audience: Undergraduate

6. Create a presentation or other creative project synthesizing knowledge about the given course topic.
Audience: Undergraduate

FRENCH/AFRICAN 216 – MODERN AND CONTEMPORARY FRANCOPHONE TOPICS
3 credits.

Modern and contemporary topics in the African francophone world, which includes both the African continent and the African diaspora. Taught in English.
Requisites: None
Course Designation: Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, for 2 number of completions
Learning Outcomes: 1. Recognize canonical authors (writers and directors), historical forms, genres, and structures, in Africa and its diasporas.
Audience: Undergraduate

2. Develop a level of proficiency in the different “ways of knowing” Africa and the diaspora through cinema and/or literature.
Audience: Undergraduate

3. Discuss visual and literary texts from various theoretical and critical perspectives, formulate ideas and make connections between visual/cultural concepts and themes.
Audience: Undergraduate

FRENCH 228 — INTERMEDIATE LANGUAGE AND CULTURE
3-4 credits.

Enhance writing and speaking proficiency through cultural readings on France and the francophone world. Review of grammar and focus on more complex grammatical structures.
Requisites: FRENCH 204 or placement into FRENCH 228
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze contemporary French and Francophone cultures by engaging with diverse media, including texts, films, podcasts, and articles.
Audience: Undergraduate

2. Interpret and identify main ideas from a variety of French-language texts and respond to those texts coherently through both spoken and written French.
Audience: Undergraduate

3. Enhance written and oral communication skills in French by producing structured compositions, presentations, and leading class discussions.
Audience: Undergraduate

4. Expand vocabulary and master important grammar concepts to improve accuracy and clarity in communication.
Audience: Undergraduate

5. Compare cultural practices and perspectives in French-speaking regions with those in the United States, using critical thinking to reflect on similarities, differences, and underlying values.
Audience: Undergraduate

FRENCH 248 — ETHNIC STUDIES IN THE FRENCH/FRANCOPHONE WORLD(S)
3 credits.

An introduction to French colonialism in the New World and its effects on African-American, Afro-Creole, Native American, Franco-American, Cajun, and Caribbean diasporan communities in the U.S. through literature, history, and culture.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2019

FRENCH 271 — LITERATURE, COMICS, AND FILM IN FRENCH
3-4 credits.

An introduction to reading and analyzing literary works, comics, and film, with special emphasis on the development of writing skills in French.
Requisites: FRENCH 228
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Master a selected set of terminology (in French) and tools of close reading pertaining to the three genres of literature (poetry, prose, and theater), comics/graphic novels, and films
Audience: Undergraduate

2. Produce nuanced written analyses of literary texts, comics, and films, in order to reveal their deeper significance
Audience: Undergraduate

3. Present original ideas about a work in front of the class with a solid command of spoken French
Audience: Undergraduate

4. Demonstrate an understanding of the social stakes of texts from different periods of the history of France and Francophone nations
Audience: Undergraduate

5. Better understand different (French and Francophone) cultural perspectives and reflect upon your own
Audience: Undergraduate

6. Improve ability to formulate and express your own ideas in French, both in speaking and in writing
Audience: Undergraduate

FRENCH 280 – EXPLORING PARIS
3 credits.

Explore the city of Paris through the diverse, historical, creative, and anecdotal perspectives offered by writers, filmmakers, and other artists. Discuss how authors like Emile Zola, Ernest Hemingway, James Baldwin, and French Nobel Prize laureate Patrick Modiano introduce a range of voices and eras. Explore key neighborhoods, city maps, significant landmarks, and pivotal historical events, culminating in a nuanced appreciation of Paris's spatial, historical, and literary complexity.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Identify and discuss key writers, filmmakers, and/or artists who are associated with Paris.
Audience: Undergraduate

2. Locate important neighborhoods and landmarks on a map of the city.
Audience: Undergraduate

3. Apply basic concepts of literary and film analysis to perform close readings of texts and films related to Paris.
Audience: Undergraduate

4. Demonstrate how contemporary social, cultural, and artistic practice associated with Paris has been influenced by historical events.
Audience: Undergraduate

5. Create a project synthesizing knowledge about Paris.
Audience: Undergraduate

FRENCH 281 – EXPLORING MONTREAL AND QUEBEC
3 credits.

Examine Montreal and the province of Quebec through cinema, television, and literary texts. Explore historical and social themes central to Quebec identity, including evolving conceptions of French Canadian and Quebecois identity, particularly in intellectual and cultural life. Analyze how storytelling reflects and critiques cultural traditions rooted in France, as well as the impact of the Quiet Revolution of the 1960s and 1970s on national identity. Investigate cultural diversity in Quebec through the perspectives and voices of selected authors and filmmakers.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Identify key writers, filmmakers, and other major storytellers working in or on the subject of Quebec.
Audience: Undergraduate

2. Discuss how Quebec storytelling, as a practice and an industry, relates to those practices in the rest of Canada.
Audience: Undergraduate

3. Identify major ways in which literature shows Quebec, as a society, as distinct from other parts of the French-speaking world.
Audience: Undergraduate

4. Apply basic concepts of literary and film appreciation to the understanding of fiction, essays, music, film and television produced in Quebec.
Audience: Undergraduate

5. Explain how contemporary social, cultural, and artistic practices associated with Quebec have been influenced by historical events, especially in the 20th and 21st centuries.
Audience: Undergraduate

6. Identify how the "national conversation" about cultural diversity in Quebec is different from and similar to those conversations in the rest of Canada and in the U.S.
Audience: Undergraduate

FRENCH/GEN&WS 285 – REBELLIOUS WOMEN FROM THE GLOBAL SOUTH
3-4 credits.

Explores how women from different francophone regions (with a specific focus on North and Sub-Saharan Africa and the Middle East) gain agency through literature, movies, comics, and songs, contesting different forms of domination, exclusion, and injustice, based on gender, race, class, and religion.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify key women writers, filmmakers, and/or artists associated with the course topic.
Audience: Undergraduate

2. Be familiar with the socio-historical contexts in which these women thrive.
Audience: Undergraduate

3. Learn how to closely read and critically analyze literary texts, films and artistic works.
Audience: Undergraduate

4. Demonstrate improvement in oral and writing skills.
Audience: Undergraduate

5. Show awareness of variances in culture, ethnicity, class, sexuality, and religion inherent in all societies.
Audience: Undergraduate

FRENCH 288 – DOCTORS WITHOUT BORDERS (MÉDECINS SANS FRONTIÈRES)
3 credits.

An overview of the global humanitarian NGO, Doctors without Borders (or Médecins sans Frontières MSF) including its history, mission, organization, and the cultural, political, and ethical challenges it faces. Explores issues of global health, social justice, and humanitarian action. Features distinguished global practitioners with first-hand experience in health crisis situations.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Learn about the history, vision, mission, and impact of Doctors without Borders (MSF) in a range of health and humanitarian crises over time and world regions. Become knowledgeable about the ethical, political, cultural, economic, and professional dilemmas associated with a global health and humanitarian organization in crisis situations across different world regions.
Audience: Undergraduate

2. Develop critical thinking and interdisciplinary views while reading a variety of texts and documents, and analyze sociological, historical, or cultural phenomena with rigor and depth.
Audience: Undergraduate

3. Become knowledgeable about the role of writing - in essay, fiction, or reporting - as a feature of witnessing ("temoignage") in health and humanitarian crises.
Audience: Undergraduate

4. Be challenged to see and capture the world through the eyes of other cultures in order to enhance intercultural knowledge and develop a critical perspective to positively contribute to health and humanitarian action, globally and locally.
Audience: Undergraduate

5. Learn to conduct comparative analysis of health and humanitarian organizations and engage critically with staff, stakeholders and partners of health and humanitarian NGOs as organizations and in the field.
Audience: Undergraduate

FRENCH 298 – DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2006

FRENCH 299 – DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

FRENCH 301 – PRACTICAL FRENCH CONVERSATION
1 credit.

Enhances speaking in an informal, conversational atmosphere at the French House. Taught in French.
Requisites: FRENCH 203 or placement into FRENCH 204
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2019
Learning Outcomes: 1. Produce spoken French in an informal, conversational atmosphere.
Audience: Undergraduate

2. Consolidate your everyday vocabulary and expressions.
Audience: Undergraduate

3. Interpret everyday situations in French.
Audience: Undergraduate

4. Communicate ideas and interests with greater ease.
Audience: Undergraduate

5. Handle French and Francophone cultures and customs.
Audience: Undergraduate

6. Distinguish cultural nuances.
Audience: Undergraduate

7. Consolidate listening comprehension skills.
Audience: Undergraduate

FRENCH 302 – PRACTICAL FRENCH CONVERSATION
1 credit.

Further enhances speaking in an informal, conversational atmosphere at the French House. Taught in French.
Requisites: FRENCH 203 or placement into FRENCH 204
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020
Learning Outcomes: 1. Produce your spoken French in an informal, conversational atmosphere.
Audience: Undergraduate

2. Consolidate your vocabulary and your ability to discuss a wide variety of topics.
Audience: Undergraduate

3. Interpret contemporary issues in the French and Francophone world.
Audience: Undergraduate

4. Apprise and defend arguments in meaningful conversations.
Audience: Undergraduate

5. Investigate French and Francophone cultures and customs.
Audience: Undergraduate

6. Discriminate between cultural nuances.
Audience: Undergraduate

7. Consolidate comprehension skills.
Audience: Undergraduate

FRENCH 311 – ADVANCED COMPOSITION AND SPEAKING
3 credits.

Learn to write essays on a variety of topics, using different registers of French, and work to correct pronunciation and improve conversation skills. Taught in French.
Requisites: FRENCH 228
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop confidence and accuracy in articulating, debating, and defending ideas in advanced ways in French.
Audience: Undergraduate

2. Grow more familiar with various written genres such as narrative and persuasive writing and how one constructs a text in a particular genre.
Audience: Undergraduate

3. Learn information about today's French-speaking world and the current cultural practices and perspectives.
Audience: Undergraduate

4. Work on the continued development of skills in understanding culture.
Audience: Undergraduate

5. Develop the ability to make cross-cultural comparisons.
Audience: Undergraduate

FRENCH 312 – ADVANCED WRITING WORKSHOP
3 credits.

Develop writing and oral expression at an advanced level through writing and discussion of internet journalism, translation, or creative genres. Taught in French.
Requisites: FRENCH 228
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Gain experience in presentational writing in French in a variety of genres
Audience: Undergraduate

2. Demonstrate understanding of the relationships between form and content in French texts, i.e., how certain linguistic and stylistic techniques are used to make meaning in particular genres
Audience: Undergraduate

3. Develop interpersonal speaking abilities in French (e.g., giving constructive criticism, complimenting, seeking additional details, hypothesizing, making descriptions, comparing)
Audience: Undergraduate

4. Refine your presentational speaking abilities in French, e.g., pronunciation, intonation, and other aspects of engaging delivery of oral texts
Audience: Undergraduate

5. Be an active participant in a writing community
Audience: Undergraduate

6. Gain awareness of the language-learning process and your own identity as a developing language learner through goal setting and self-reflection
Audience: Undergraduate

FRENCH/INTL BUS 313 – PROFESSIONAL COMMUNICATION AND CULTURE IN THE FRANCOPHONE WORLD
3 credits.

Study and analysis of the culture and sociology of professional environments in the French and Francophone worlds, including government, international organizations, NGO's and business. Students develop communication skills through interactive teaching methods in multimedia labs.
Requisites: FRENCH 228 or 311
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Express yourself more effectively in French, in both your speaking and your writing, especially in current professional settings.
Audience: Undergraduate

2. Interpret cultural differences between France and the United States more effectively, especially in professional settings.
Audience: Undergraduate

3. Deepen your knowledge about the contemporary French-speaking world beyond your own personal and academic experience thus far.
Audience: Undergraduate

FRENCH/INTL BUS 314 – CONTEMPORARY ISSUES IN BUSINESS, GOVERNMENT AND NGOS
3 credits.

Cultural study of contemporary Francophone Africa, focusing on issues in government, organizations and enterprise. Exploration of cultural and professional relations between Francophone Africa and France, the European Union, and the United States.
Requisites: FRENCH 228, 311, or INTL BUS/FRENCH 313
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand current events in French-speaking Africa.
Audience: Undergraduate

2. Recognize the ways in which those phenomena are understood, discussed and represented in other major Francophone regions (like Quebec, Mali, Morocco, France, and other regions), as well as in the United States.
Audience: Undergraduate

3. Conceptualize and apply transferrable skills acquired in a liberal arts education to French-related international business and non-profit careers.
Audience: Undergraduate

4. Apply the fundamentals of intercultural communication with a personal profile and “pitch,” in both English and French, to network more effectively.

Audience: Undergraduate

5. Enhance oral and written communication skills, in both languages, applicable to networking and job-seeking situations.
Audience: Undergraduate

FRENCH 316 – STUDY ABROAD: ADVANCED FRENCH LANGUAGE
2-6 credits.

A study abroad equivalency for advanced French language that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

FRENCH 321 – MEDIEVAL AND EARLY MODERN FRENCH LITERATURE
3 credits.

Introduction to important literary works from the medieval era to the French Revolution. Taught in French.
Requisites: FRENCH 271
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key French writers and texts from the Middle Ages to the 18th century.
Audience: Undergraduate

2. Discuss literary trends and schools of thought associated with this time period.
Audience: Undergraduate

3. Apply concepts of literary analysis to perform close readings of texts.
Audience: Undergraduate

4. Demonstrate understanding of French culture and its evolution from the Middle Ages to the 18th century.
Audience: Undergraduate

5. Express complex ideas/analysis in French both verbally and in writing.
Audience: Undergraduate

FRENCH 322 – MODERN FRENCH AND FRANCOPHONE LITERATURE
3 credits.

Introduction to important literary works of modernity (from the French Revolution to the twenty-first century). Taught in French.
Requisites: FRENCH 271
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key writers, filmmakers, and/or artists who are associated with French modernity.
Audience: Undergraduate

2. Discuss several key literary, cinematic, and artistic trends associated with French modernity.
Audience: Undergraduate

3. Apply concepts of literary and film analysis to perform close readings of texts and films.
Audience: Undergraduate

4. Demonstrate how French social, cultural, and artistic associated practice has been influenced by historical events.
Audience: Undergraduate

5. Analyze literary texts, films and artistic works in relation to specific France-related themes or issues.
Audience: Undergraduate

FRENCH 325 – VISUAL CULTURE IN FRENCH/FRANCOPHONE STUDIES
3 credits.

Aspects of French culture as manifested in painting, photography, film or other visual media in relation to literature. Taught in French.
Requisites: FRENCH 271
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify the basic structural elements of visual works of art, including but not limited to painting, cinema and comics.
Audience: Undergraduate

2. Speak and write in French at the appropriate level.
Audience: Undergraduate

3. Identify, compare, and contrast the visual rhetorical devices artists use and the effects they produce across genres.
Audience: Undergraduate

4. Apply concepts of art, film, and comics analysis to perform close readings of works.
Audience: Undergraduate

5. Recognize the ongoing role of visual cultures in the construction of French and Francophone cultures and identities.
Audience: Undergraduate

FRENCH 345 – FRENCH FASHION AND LITERATURE FROM THE MIDDLE AGES TO TODAY
3 credits.

Study of French literary texts embedded in their cultural contexts, with a focus on clothing and fashion. Chart the emergence and representation of sartorial taste in France through analysis and discussion of selected texts and other media that feature clothing as a reflection of aesthetic and social values. Rather than evidence for material and economic history, literature and the visual arts will be ways to touch on issues such as the evolution of the notion of human physical beauty, of taste, of gender differences and roles, of social status and stratification in different historical contexts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key writers, filmmakers, and/or artists who are associated with the material and historical periods covered in the course.
Audience: Undergraduate

2. Develop critical thinking and interdisciplinary views while reading a variety of texts and documents, and analyze sociological, historical, and cultural phenomena.
Audience: Undergraduate

3. Apply concepts of literary and film analysis to perform close readings of texts and films.
Audience: Undergraduate

4. Demonstrate how contemporary social, cultural, and artistic practice associated with fashion in France has been influenced by historical events.
Audience: Undergraduate

FRENCH 347 – KNIGHTS, PRIESTS AND PEASANTS: FRANCE 800-1789
3 credits.

Do you know the rules of courtly love? Ever wondered what life was like in a medieval castle or in the grand court of Versailles under the Sun King? From the knights and crusades of the Middle Ages to the dramatic events of the 1789 Revolution, explore the rich artistic culture and society of France across centuries. Along the way, discover how the past continues to shape today's France and resonates in global popular culture.
Requisites: FRENCH 271
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and understand major thinkers, ideas, and events from the middle ages to the French Revolution and how they have shaped French culture.
Audience: Undergraduate

2. Recognize differences between French and American culture.
Audience: Undergraduate

3. Improve your oral and written comprehension in French, as well as your capacities to express yourself in that language.
Audience: Undergraduate

4. Learn to research historical reasons underlying the particularities of French culture.
Audience: Undergraduate

FRENCH 348 – MODERNITY STUDIES
3 credits.

An introduction to political, social, intellectual, artistic and literary developments in French and Francophone culture, within the time period from the French Revolution to the current era. Taught in French.
Requisites: FRENCH 271
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key political, social, intellectual, artistic, and literary developments in French and Francophone culture from the French Revolution to the present day.
Audience: Undergraduate

2. Analyze and discuss contemporary documents - such as official documents, newspaper articles, paintings, caricatures, posters, songs, literary texts, and film clips) - within their historical context.
Audience: Undergraduate

3. Draw connections between France's historical past and current issues in the French and Francophone world, as well as in the global context.
Audience: Undergraduate

4. Develop cross-cultural awareness by gaining an understanding of contemporary France and connecting the French and Francophone world with other global cultures.
Audience: Undergraduate

5. Develop your listening, writing, speaking, writing, and critical thinking skills.
Audience: Undergraduate

FRENCH 361 – STUDY ABROAD: FRENCH/FRANCOPHONE LITERATURE
2-3 credits.

A study abroad equivalency for French/Francophone literature that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

FRENCH 362 – STUDY ABROAD: FRENCH/FRANCOPHONE CIVILIZATION
2-3 credits.

Used as a study abroad equivalent for French/Francophone civilization courses. Enrollment in a UW-Madison study abroad program
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Discuss topics related to French/Francophone culture.
Audience: Undergraduate

FRENCH 391 – FRENCH FOR READING KNOWLEDGE
3 credits.

Intensive grammar and reading for those with little or no experience in French. Readings from appropriate texts in the humanities, sciences, social sciences.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Recognize and apply the fundamental elements of French grammar and syntax.
Audience: Both Grad & Undergrad

2. Recognize, or figure out how to translate, cognate words as well as a fair number of other words that occur frequently in French.
Audience: Both Grad & Undergrad

3. Read proficiently in French.
Audience: Both Grad & Undergrad

4. Use French as a research tool in the field of specialization.
Audience: Graduate

FRENCH 420 – STUDY ABROAD: FRENCH TOPICS
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2001

FRENCH/ITALIAN/PORTUG/SPANISH 429 – INTRODUCTION TO THE ROMANCE LANGUAGES
3 credits.

Introduction to structural similarities and differences apparent in major Romance languages (French, Italian, Portuguese, Spanish) and to their historical developments, with reference to basic linguistic features of each language: phonology, morphology, syntax, and lexicon.
Requisites: SPANISH 226, FRENCH 228, ITALIAN 311, or PORTUG 226
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Recognize linguistic features within the Romance languages.
Audience: Undergraduate

2. Apply these concepts and features to the linguistic analysis of language, in general, and of the Romance languages, in particular.
Audience: Undergraduate

3. Analyze the structure and evolution of sounds, words and sentences in the Romance languages.
Audience: Undergraduate

4. Assess critically different claims about how language is organized, how it is used, how it varies and how it changes over time (using specific examples from French, Italian, Spanish, and Portuguese).
Audience: Undergraduate

FRENCH 430 – READINGS IN MEDIEVAL AND RENAISSANCE LITERATURE
3 credits.

Exploration of a thematic selection of texts from the Middle Ages and the Renaissance. Taught in French.
Requisites: FRENCH 321 or 322
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Interpret the artistic forms used in French medieval and Renaissance literature.
Audience: Undergraduate

2. Examine the relationship between literature and politics as well as social conflicts in France between the 12th and the 16th centuries.
Audience: Undergraduate

3. Interpret French cultures of the middle ages and early modernity.
Audience: Undergraduate

4. Consolidate oral and written expression as well as text comprehension.
Audience: Undergraduate

5. Identify some aspects of the historical evolution of the French language.
Audience: Undergraduate

FRENCH 431 – READINGS IN EARLY MODERN LITERATURE
3 credits.

Exploration of a thematic selection of texts from the Early Modern period. Taught in French.
Requisites: FRENCH 321 or 322
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Learn to interpret the artistic forms used in French early modern literature.
Audience: Undergraduate

2. Learn about the relationship between literature and politics as well as social conflicts in France during the 17th and 18th centuries.
Audience: Undergraduate

3. Acquire knowledge of French cultures of these periods.
Audience: Undergraduate

4. Develop skills in French: oral and written expression as well as text comprehension.
Audience: Undergraduate

5. Learn some aspects of the historical evolution of the French language.
Audience: Undergraduate

FRENCH/AFRICAN 440 – AFRICAN/FRANCOPHONE FILM
3 credits.

Overview of cinematic works from francophone Africa and/or other areas of Africa. Teaches analysis and writing about cinema. Explores links between cinema and national or regional politics and ideology. Examines spectatorship in relation to questions of identity formation.
Requisites: Sophomore standing and 3 credits in AFRICAN, or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021

FRENCH 461 – FRENCH/FRANCOPHONE LITERARY STUDIES ACROSS THE CENTURIES
3 credits.

A study of how literature has evolved over the course of French history, in relation to a chosen topic. Taught in French.
Requisites: FRENCH 321 or 322
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze and interpret a variety of literary texts from France and Francophone regions across historical periods.
Audience: Undergraduate

2. Develop and communicate well-organized arguments in both written and oral French.
Audience: Undergraduate

3. Enhance linguistic proficiency in French by expanding vocabulary, refining grammar and style, and producing clear, coherent academic writing and presentations.
Audience: Undergraduate

4. Apply concepts of literary analysis to perform close readings of works.
Audience: Undergraduate

5. Reflect on changes to the literary and cultural landscape over time in formal assignments and discussions.
Audience: Undergraduate

FRENCH 462 – FRENCH/FRANCOPHONE CULTURAL STUDIES ACROSS THE CENTURIES
3 credits.

A study of how culture has evolved over the course of French history, in relation to a chosen topic. Taught in French.
Requisites: FRENCH 321 or 322
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze and interpret a variety of cultural texts (including literature, film, and art) from diverse Francophone regions and historical periods.
Audience: Undergraduate

2. Develop and communicate well-organized arguments in both written and oral French.
Audience: Undergraduate

3. Enhance linguistic proficiency in French by expanding vocabulary, refining grammar and style, and producing clear, coherent academic writing and presentations.
Audience: Undergraduate

4. Cultivate critical thinking skills by reflecting on cultural, historical, and social issues across the Francophone world and articulating thoughtful responses in formal assignments and discussions.
Audience: Undergraduate

FRENCH 464 – LITERATURE AND MEDICINE IN FRENCH-SPEAKING CULTURES
3 credits.

Choice of themes and periods studied will vary, and may range from historical surveys of the meanings of health and illness across the spectrum of French and Francophone cultures, to a close examination of texts or literary genres from a particular time that incorporate or respond to biomedical knowledge. Genre studied could include prose fiction, theater, creative non-fiction, film, comics, and works of medical popularization. Taught in French.
Requisites: FRENCH 321 or 322
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022
Learning Outcomes: 1. Demonstrate that you can analyze literary and non-literary texts in French.
Audience: Undergraduate

2. Express yourself effectively in spoken and written French.
Audience: Undergraduate

3. Recognize and explain how the meanings of health and illness varied during the period studied and the ways in which they were grounded in personal as well as collective experience.
Audience: Undergraduate

4. Appreciate some of the rich and complex interactions between medicine and literature during the period studied.
Audience: Undergraduate

FRENCH 465 – FRENCH/FRANCOPHONE FILM
3 credits.

Representative French-language films will be studied from an esthetic and a cultural perspective. Choice of themes and periods studied will vary, and may range from historical surveys to a close examination of films from a particular time or place. Taught in French.
Requisites: FRENCH 321 or 322
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of key films and trends in French and Francophone cinema from a variety of historical and cultural contexts.
Audience: Undergraduate

2. Analyze cinematic techniques and narrative structures in French and Francophone films by using advanced French language skills.
Audience: Undergraduate

3. Develop and present well-supported arguments about films through coherent written analyses and oral presentations in French.
Audience: Undergraduate

4. Enhance linguistic proficiency and film-specific vocabulary in French by writing and speaking with greater accuracy and stylistic sophistication.
Audience: Undergraduate

5. Engage critically with films as cultural texts by discussing issues such as identity, memory, colonialism, race, gender, and nation.
Audience: Undergraduate

FRENCH 467 – ASPECTS OF CONTEMPORARY FRENCH LITERATURE
3 credits.

A study of the latest developments in contemporary French Literature. Taught in French.
Requisites: FRENCH 321 or 322
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Analyze and interpret a variety of post-1980 literary texts from France and Francophone regions across historical periods.
Audience: Undergraduate

2. Develop and communicate well-organized arguments in both written and oral French.
Audience: Undergraduate

3. Enhance linguistic proficiency in French by expanding vocabulary, refining grammar and style, and producing clear, coherent academic writing and presentations.
Audience: Undergraduate

4. Apply concepts of literary analysis to perform close readings of works.
Audience: Undergraduate

5. Reflect on what it means to be contemporary in formal assignments and discussions.
Audience: Undergraduate

FRENCH 569 – CRITICAL APPROACHES TO LITERATURE AND CULTURE: FRENCH AND FRANCOPHONE PERSPECTIVES
3 credits.

An introduction to theoretical and critical thinking about literary and visual texts, meant to accompany and supplement interpretative skills. Fundamental notions of rhetoric (principles of versification) and principles of narratology designed to improve the practice of close reading in poetry, drama, prose, and cinema across time periods. Taught in French.
Requisites: One of: (FRENCH 430, 431, 449, 451, 461, 462, 464, 465, 467, or 472) or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Acquiring knowledge on theoretical and critical thinking about literary and visual texts in the French and francophone context.
Audience: Graduate

2. Familiarization with fundamental notions of rhétorique (figures et versification) and principles of narratology designed to improve the practice of close reading in poetry, drama, prose, and cinema across time periods.
Audience: Both Grad & Undergrad

3. Improve interpretative skills.
Audience: Undergraduate

FRENCH 590 – INTRODUCTION TO PHONETICS
3 credits.

Study of French sounds, phonetic transcription, practice in pronunciation. Taught in French.
Requisites: FRENCH 228 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Learn the International Phonetic Alphabet (IPA) and use it for phonetic transcription.
Audience: Both Grad & Undergrad

2. Familiarize yourself with basic notions of phonetics and French phonology.
Audience: Both Grad & Undergrad

3. Improve and perfect your pronunciation of Modern Standard French. The emphasis will be put on the pronunciation of vowels and consonants, and on intonation patterns, rhythm, and liaisons.
Audience: Both Grad & Undergrad

4. Prepare for instruction by designing a phonetics lesson which will be taught to classmates and/or in the student's own TA section.
Audience: Graduate

5. Complete additional and/or longer audio recording and assignments as preparation for their own instructional needs.
Audience: Graduate

FRENCH 672 – TOPICS IN LITERATURE AND CULTURE
3 credits.

Explores a specific topic in the history of French and/or Francophone literature and culture; includes analysis and interpretation of texts and/or film in their historical contexts. May be focused on one, or cut across different literary periods. Applies diverse interpretative methodologies to a coherent body of material. Taught in French.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Explore a historically grounded question pertaining to a specific chronological timeframe of French and/or Francophone literature and culture
Audience: Graduate

2. Design and complete an short research project in the field of French and/or Francophone literature and culture
Audience: Graduate

3. Analyze literary texts within their historical and cultural contexts
Audience: Graduate

4. Write scholarly reviews of published scholarship in the field
Audience: Graduate

5. Perfect strategies for successfully delivering a research paper before an academic audience
Audience: Graduate

FRENCH 681 – SENIOR HONORS THESIS
3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2016

FRENCH 682 – SENIOR HONORS THESIS
3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2017

FRENCH 691 – THESIS
2 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 1996

FRENCH 692 – THESIS
2 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 1997

FRENCH 698 – DIRECTED STUDY
1-6 credits.

Advanced independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

FRENCH 699 – DIRECTED STUDY
1-6 credits.

Advanced independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

FRENCH 750 – RESEARCH LABORATORY I: INTRODUCTION TO GRADUATE RESEARCH
3 credits.

An introduction to graduate studies in French that provides the necessary skills for success. Includes exploration of structure and expectations of graduate programs, the basics of scholarly research, reflection upon research interests and possible individual scholarly identities, and academic conferences. Taught in French.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify the different kinds of research tasks and projects you will have to carry out as a graduate student in our program.
Audience: Graduate

2. Distinguish and effectively locate the different kinds of scholarly resources in your field.
Audience: Graduate

3. Describe the different research fields of department faculty and begin to develop your own.
Audience: Graduate

4. Execute strategies for successfully delivering a research paper before an academic audience.
Audience: Graduate

5. Implement strategies for creating a professional research/teaching portfolio and CV.
Audience: Graduate

FRENCH 752 – RESEARCH LABORATORY II: PRODUCING PROFESSIONAL RESEARCH
3 credits.

Provides the necessary skills for success in the PhD program. Includes exploration of structure and expectations, as well as of the professional skills needed to succeed in the profession after graduation. Taught in French.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Identify the different kinds of research tasks and projects you will have to carry out as a professional in your field.
Audience: Graduate

2. Implement strategies for developing relevant and meaningful research questions.
Audience: Graduate

3. Distinguish the current state of scholarship on a given topic in your field.
Audience: Graduate

4. Develop an original scholarly contribution to a topic in your field.
Audience: Graduate

5. Design an effective teaching activity using content from your research.
Audience: Graduate

FRENCH 799 – INDEPENDENT STUDY
1-6 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

FRENCH/GERMAN/HISTORY/POLI SCI/SOC 804 – INTERDISCIPLINARY WESTERN EUROPEAN AREA STUDIES SEMINAR
3 credits.

Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

FRENCH 820 – COLLEGE TEACHING OF FRENCH
3 credits.

Introduction to teaching collegiate world languages with an emphasis on communicative and literacy-based pedagogical strategies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Articulate key concepts of communicative, literacy-oriented instruction.
Audience: Graduate

2. Describe and practice classroom techniques for communicative, literacy-oriented instruction.
Audience: Graduate

3. Apply key concepts related to communicative, literacy-oriented teaching to designing instructional materials for elementary-level French courses.
Audience: Graduate

4. Increase engagement in pedagogical discourse on collegiate language teaching and learning.
Audience: Graduate

FRENCH/ITALIAN 821 – ISSUES IN METHODS OF TEACHING FRENCH AND ITALIAN
1-3 credits.

Intended for instructors of elementary- and intermediate-level collegiate instructors of Italian; key concepts of communicative, literacy-oriented language teaching and related techniques for classroom instruction of Italian.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Articulate key concepts of and classroom techniques for communicative, literacy-oriented instruction of the language.
Audience: Graduate

2. Apply key concepts related to communicative, literacy-oriented teaching to designing instructional materials for elementary-level language courses.
Audience: Graduate

3. Increase engagement in pedagogical discourse on collegiate language teaching and learning.
Audience: Graduate

4. Explain the current U.S. collegiate foreign language curriculum, including enrollment trends, learner demographics, and programmatic challenges.
Audience: Graduate

5. Describe the historical uses of literacy and how literacy development has been conceptualized in language education.
Audience: Graduate

6. Define key concepts of the multiliteracies approach as a critical pedagogy in language.
Audience: Graduate

7. Apply concepts of literacy and the multiliteracies approach in the design of a course syllabus.
Audience: Graduate

8. Display increasing engagement in pedagogical discourse related to collegiate foreign language teaching.
Audience: Graduate

FRENCH 825 – GRAMMAR AND STYLE
3 credits.

Grammatical review and stylistic practice. Taught in French.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Articulate an in-depth understanding of French grammar through the study of various textual forms.
Audience: Graduate

2. Handle written expression in French.
Audience: Graduate

3. Explain and use style and register.
Audience: Graduate

4. Use techniques to effectively edit and revise written production.
Audience: Graduate

5. Display skills that are applicable to the teaching of the French language.

Audience: Graduate

FRENCH 901 – SEMINAR-MATERIALS AND METHODS OF RESEARCH
1-3 credits.

Dissertation writing practicum.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Explore resources and discuss strategies to do research effectively.
Audience: Graduate

2. Discuss strategies to progress steadily on the dissertation.
Audience: Graduate

3. Share and discuss ongoing research through peer-review exercises.
Audience: Graduate

4. Discuss strategies to convey ideas in a clear and accessible fashion.
Audience: Graduate

5. Explore effective writing techniques.
Audience: Graduate

FRENCH 947 – SEMINAR: LITERATURE QUESTIONS
3 credits.

Study of literature and culture organized thematically or by time period. Taught in French.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and discuss important literary works from a selected period or area.
Audience: Graduate

2. Enhance your understanding of the literary, aesthetic, and intellectual movements tied to those works.
Audience: Graduate

3. Sharpen your listening, speaking, and writing skills.
Audience: Graduate

4. Develop your skills in close textual analysis and in critical thinking about both literary and theoretical texts.
Audience: Graduate

5. Strengthen your research skills by getting practice in developing an argument in a rigorous manner, using appropriate bibliographical resources.
Audience: Graduate

FRENCH 948 – SEMINAR: LITERATURE QUESTIONS
3 credits.

Study of literature and culture organized thematically or by time period. Taught in French.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and discuss key literary works from a particular period or area.
Audience: Graduate

2. Deepen your understanding of some of this period's literary, aesthetic, and intellectual movements.
Audience: Graduate

3. Hone your listening, speaking, and writing skills.
Audience: Graduate

4. Develop your skills in critical thinking about both literary and theoretical texts - particularly in the areas of close textual analysis and the practice of assessing the arguments made in a theoretical/critical article or essay.
Audience: Graduate

5. Strengthen your research skills by getting practice in developing an argument in a rigorous manner, using appropriate bibliographical resources.
Audience: Graduate

FRENCH 990 – INDIVIDUAL RESEARCH
1-12 credits.

Mentored reading and research for students with dissertator status.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

GENDER AND WOMEN'S STUDIES (GEN&WS)

GEN&WS 100 – OPEN HOUSE GENDER LEARNING COMMUNITY SEMINAR
1 credit.

This seminar is for residents of Open House Gender Learning Community. It addresses various topics of interest to this community.
Requisites: Member of Open House Gender Learning Community.
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize areas in which gender and sexuality are important, both historically and today.
Audience: Undergraduate

2. Demonstrate critical thinking and analysis skills with regard to the representation of gender and sexuality in cultural texts and political mediums.
Audience: Undergraduate

3. Respond creatively to social and political issues related to gender and sexuality.
Audience: Undergraduate

4. Demonstrate effective and respectful oral communication skills.
Audience: Undergraduate

GEN&WS 101 – GENDER, WOMEN, AND CULTURAL REPRESENTATION
3 credits.

A humanities-oriented analysis of cultural representations of women and men within the social and historical contexts of race, class, gender and sexuality; engages with a range of traditions and modes of representation including literature, mass media and popular culture.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize themes pertaining to gender and other social categories of identity and representation.
Audience: Undergraduate

2. Identify basic themes related to the field of gender and women's studies from a humanities perspective.
Audience: Undergraduate

3. Develop intellectual and practical skills, including: interdisciplinary analysis , critical thinking, effective writing, oral communication, and collaboration.
Audience: Undergraduate

4. Examine personal and social responsibility, including critical self-awareness, critical social awareness, and ethics.
Audience: Undergraduate

5. Recognize and critically examine interlocking and interdependent systems of privilege and oppression.
Audience: Undergraduate

GEN&WS 102 – GENDER, WOMEN, AND SOCIETY IN GLOBAL PERSPECTIVE
3 credits.

Global, interdisciplinary, social science-oriented analysis of gender, race, class and sexuality in relationship to social institutions and movements for social change. Focus on gender and women in institutions such as education, the economy, the family, law, media, medicine, and politics.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Observe, think, and write critically and analytically about how gender, race, class, and sexuality are key concepts in the field of gender and women's studies in relation to social institutions and movements for social change.
Audience: Undergraduate

2. Construct knowledge of foundational texts, theoretical frameworks, ideas, and praxis in gender and women's studies.
Audience: Undergraduate

3. Research and read different types of scholarly sources/different kinds of materials.
Audience: Undergraduate

4. Practice personal reflection on your social location and understand how your social location connects to the broader social world.
Audience: Undergraduate

5. Recognize and critically examine interlocking and interdependent systems of privilege and oppression.
Audience: Undergraduate

GEN&WS 103 – GENDER, WOMEN, BODIES, AND HEALTH
3 credits.

Examines both physiological and social processes relating to gender and health across the lifespan among cisgender, transgender, and non-binary individuals. Examples of topics include hormonal processes, reproductive anatomy physiology, sexuality, sexual pleasure, chronic illness, depression, and sexual violence. A primary course objective is for students to connect information about their bodies and personal health to larger social and political contexts. In particular, considers how health and health disparities are shaped by multiple kind of social inequalities, particularly inequalities based on gender.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Natural Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand and describe physiological processes and phenomena relating to health (for example, menstruation, menopause) and ill health (for example, cancer, maternal mortality).
Audience: Undergraduate

2. Recognize that bodies are located in a social context that influences health and illness.
Audience: Undergraduate

3. Understand and analyze the dramatic interplay between physiological processes and social processes.
Audience: Undergraduate

4. Contextualize health within the social and cultural influences on people's lives.
Audience: Undergraduate

5. Evaluate how multiple kinds of social inequalities (e.g., race, ethnicity, social class, sexual identity, gender identity) shape health and health disparities.
Audience: Undergraduate

6. Become more active patients and better-educated healthcare consumers.
Audience: Undergraduate

GEN&WS 104 – GENDER, SEXUALITY, AND GLOBAL HEALTH
3 credits.

Provides an introductory overview to critical global health studies, linking past trends to current research and health inequalities. Examines current trajectories in disaster relief and public health interventions through a gendered lens, with a solid grounding in the historical context. Explores social, demographic, political, economic, and ecological determinants of global health, and the ways that these factors interconnect with biomedicine to create and affect health outcomes, both within and across countries. Uses an intersectional approach to analyze how public health policies prioritize whose lives represent "save-able" or "salvageable" ones in the public, political, and corporate eye.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify key current gendered and sexual health concerns around the globe.
Audience: Undergraduate

2. Critically analyze the intellectual history of the global health field, tracing its origins from colonial medicine through to the current day using the lens of gender and sexuality.
Audience: Undergraduate

3. Appraise the ways that colonialism, scientific racism, misogyny, and other forms of structural exclusion shape the global health field and its objects/methods of study
Audience: Undergraduate

4. Question the neutrality of quantitative global health metrics, and understand indicators as a contested form of knowledge production.
Audience: Undergraduate

5. Develop analytical thinking and improve written and spoken communication skills.
Audience: Undergraduate

6. Engage empathic connections, intellectual exploration, and ethical actions in the face of gendered health inequalities.
Audience: Undergraduate

GEN&WS 105 – INTERSECTIONAL APPROACHES TO DISABILITY STUDIES
3 credits.

Analysis of disability as an identity, culture, community, and political concern. Brief introduction to disability studies and intersectionality. Examines historical, political, artistic and cultural representations of disability as it intersects with gender, sexuality, race, class and other systems of oppression. Engage with a variety of academic, literary, visual and other cultural representations by and about disabled people.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the history and current state of disability studies
Audience: Undergraduate

2. Explain intersectionality and the impacts of intersectional identity on disabled people
Audience: Undergraduate

3. Demonstrate the wide-ranging impact of disability studies research and apply this scholarship to history, politics, and everyday life
Audience: Undergraduate

GEN&WS/HISTORY 134 – WOMEN AND GENDER IN WORLD HISTORY
3-4 credits.

A global (comparative and transnational) survey of women and gender from the ancient world to the modern period. Introduces students to key issues in the history of women and gender, including the historical construction of identities, roles, symbols, and power relationships.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Articulate how women experienced and shaped world historical events.
Audience: Undergraduate

2. Explain the historical emergence of diverse gender roles, power relationships, and social movements.
Audience: Undergraduate

3. Interpret key primary sources in the history of women and gender.
Audience: Undergraduate

4. Evaluate secondary accounts of the history of women and gender.
Audience: Undergraduate

5. Engage in evidence-based debates concerning global histories of women and gender.
Audience: Undergraduate

GEN&WS/ENGL 144 – WOMEN'S WRITING
3 credits.

An introduction to literature in English written by women in various periods and places; specific topics will vary.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify particular critical or historical issues and concerns around literature by women writers.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Analyze relationships among society, literature, and language that underlie the construction of beliefs.
Audience: Undergraduate

GEN&WS/ED POL 160 – GENDER, SEXUALITY, AND EDUCATION POLICY
3 credits.

Explores how gender, sexuality, and gender identity are conceptualized, practiced, protected, and policed in K-12 schools and in out-of-school contexts in the United States and globally. Examines how gender, sexuality, and gender identity intersect with race, class, language, nationality, and religion to shape the experiences of school-age children and youth.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain how gender, sexuality, and gender identity, as separate and intersected identities, have become situated as normal, natural, and static concepts, and the role that schooling plays in those processes
Audience: Undergraduate

2. Identify and summarize how students are racialized and gendered within educational settings and by educational policies and practices, and how class, religion, language, national status, and other factors intersect with gender, sexuality, and gender identity to shape different educational outcomes and experiences for students
Audience: Undergraduate

3. Analyze the effects of an intersectional approach to understanding gender, sexuality, and gender identity within students' educational experiences, in the US and globally
Audience: Undergraduate

GEN&WS/SOC 200 — INTRODUCTION TO LESBIAN, GAY, BISEXUAL, TRANSGENDER AND QUEER+ STUDIES
3-4 credits.

A multidisciplinary introduction to lesbian, gay, bisexual, transgender, and queer+ (LGBTQ+) studies, including theories of identity formation, different societal interaction with LGBTQ+ communities, LGBTQ+ cultures in history, and contemporary legal and political issues. Course materials explore the intersections between LGBTQ+ identities and other socially marginalized identities, including (but not limited to) those based on race, ethnicity, religion and disability.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify vocabulary for discussing and understanding LGBTQ+ people, concepts, histories, and politics.
Audience: Undergraduate

2. Describe how categories such as sex, gender, sexuality, and race are multidimensional and socially constructed.
Audience: Undergraduate

3. Discuss how sex, gender, and sexuality intersect with other social categories historically used to control access to political power and material resources, including race, class, disability, citizenship, religion, and so on.
Audience: Undergraduate

4. Examine the ways in which LGBTQ+ people are affected by, participate in, and work to change larger social structures and institutions, including healthcare, the legal system, education, employment, and marriage and the family.
Audience: Undergraduate

5. Construct personal analyses of historical and contemporary LGBTQ+ experiences and outcomes in conversation with scholarly research.
Audience: Undergraduate

GEN&WS/RELIG ST 202 — QUEERING RELIGION
3 credits.

Explore the intersections of religiosity and queerness, including the role of religion in the lives of LGBTQ+ individuals and communities, the role of queerness and LGBTQ inclusion in various religious traditions, and what queerness can add to the study of religion (and vice versa).
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze oral and written materials about religion, queerness, and transness.
Audience: Undergraduate

2. Compare diverse systems of value and belief.
Audience: Undergraduate

3. Interpret the interrelationships and impact of religious worldviews and communities.
Audience: Undergraduate

4. Understand core concepts and debates in queer and trans studies of religion.
Audience: Undergraduate

5. Connect scholarship to the institutions that shape everyday life.
Audience: Undergraduate

GEN&WS/LITTRANS 205 — WOMEN IN RUSSIAN LITERATURE IN TRANSLATION
3-4 credits.

Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GEN&WS/AFROAMER 221 – INTRODUCTION TO BLACK WOMEN'S STUDIES
3 credits.

This course will provide students with an overvview of the field of Black women's studies.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe how certain histories have been valued and devalued, and how these differences have promulgated disparities in contemporary American society.
Audience: Undergraduate

2. Discuss Black women’s experiences in the context of past and contemporary American society.
Audience: Undergraduate

3. Analyze identity issues and describe how these inform connections between people of different groups.
Audience: Undergraduate

4. Communicate with others in a way that displays an understanding of racial and gendered inequities in the U.S.
Audience: Undergraduate

GEN&WS/AFROAMER 222 – INTRODUCTION TO BLACK WOMEN WRITERS
3 credits.

An introduction to the writings of Afro-American women from the nineteenth to the twentieth century. Fiction, autobiography, non-fiction prose, and poetry will be read and discussed.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify major literary forms and their functions in the history of black women’s writing.
Audience: Undergraduate

2. Identify the contextual frameworks that shape representations of race and gender across a broad range of literary texts.
Audience: Undergraduate

3. Describe the goals, challenges, and questions raised by the thematic and aesthetic choices of black women creators.
Audience: Undergraduate

4. Develop persuasive arguments about the aesthetic construction, form, context, and meaning of black women’s creative work.
Audience: Undergraduate

GEN&WS 240 – FEMINIST APPROACH TO RESEARCH AND WRITING
3 credits.

Experience the excitement and rewards of doing research in the field of Gender and Women's Studies via substantial instruction in the four modes of literacy (that is, speaking, reading, writing, and listening). Through engagement with primary sources, you will ask and define research questions, find and analyze evidence, assess and discuss scholarly interpretations of same sources, build a bibliography, and try out making an argument. Become prepared to undertake substantial research and writing.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Develop scholarly questions through engagement with different kinds of sources and posing questions to prompt productive group discussion.
Audience: Undergraduate

2. Learn the logic of notes, bibliographies, libraries, and archives, and how to consult them to identify and locate source materials. Further, students will take full advantage of the range of library resources including interlibrary loan.
Audience: Undergraduate

3. Determine the perspective, credibility, and utility of source materials. Distinguish between primary and secondary material for a particular topic. Identify the perspective or authorial stance of a source. Summarize an argument presented in a text. Distinguish between the content of a source and its meaning in relation to a particular question.
Audience: Undergraduate

4. Develop and present an argument. Use sources appropriately to create, modify, and support tentative conclusions and new questions.
Audience: Undergraduate

5. Make an argument. Identify the parts of an argument and how to support it convincingly.
Audience: Undergraduate

6. Communicate ideas and research findings effectively through formal and informal written and oral presentations.
Audience: Undergraduate

GEN&WS/CHICLA/HISTORY 245 – CHICANA AND LATINA HISTORY
3 credits.

Introduces the cultural, economic, social, and political history of Chicanas and Latinas in the U.S. and focuses on four major themes: contact between different ethnic/racial groups; ideas of nation and nationalism; constructions of identity; and struggles for social justice.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Comm QR - Communication B
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Critically analyze the presence or absence of Chicanas and Latinas in US history.
Audience: Undergraduate

2. Use methods and vocabularies of history to analyze primary and secondary sources.
Audience: Undergraduate

3. Consider the relevance of Chicana and Latina history to present-day issues.
Audience: Undergraduate

4. Write and revise research aimed at an audience beyond the classroom.
Audience: Undergraduate

GEN&WS/ENGL 248 – WOMEN IN ETHNIC AMERICAN LITERATURE
3 credits.

American literature by and about women, written by authors from ethnic groups.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and investigate key themes in American literature by and about women, written by authors from ethnic groups.
Audience: Undergraduate

2. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

GEN&WS/AFROAMER 267 – ARTISTIC/CULTURAL IMAGES OF BLACK WOMEN
3 credits.

Cultural images by and about Black women; feminine creativity in the arts within their historical, cultural, social, and political contexts.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze and interpret works of art by African American women artists in relation to historical, social, political, and cultural contexts.
Audience: Undergraduate

2. Apply critical thinking and analytical skills regarding gender, race, and other social categories of identity and oppression to the study of visual images by and about Black women.
Audience: Undergraduate

3. Describe the role of art and visual representation in the creation, development, and continuing legacy of race- and gender-based discrimination.
Audience: Undergraduate

4. Describe the role of art and visual culture in African American women artists' resistance to historical systemic and institutional oppression.
Audience: Undergraduate

5. Identify ways in which certain images have been valued or devalued, and analyze how these differences have promulgated disparities in contemporary American society.
Audience: Undergraduate

GEN&WS/LITTRANS 270 – GERMAN WOMEN WRITERS IN TRANSLATION
3 credits.

Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GEN&WS/FRENCH 285 — REBELLIOUS WOMEN FROM THE GLOBAL SOUTH
3-4 credits.

Explores how women from different francophone regions (with a specific focus on North and Sub-Saharan Africa and the Middle East) gain agency through literature, movies, comics, and songs, contesting different forms of domination, exclusion, and injustice, based on gender, race, class, and religion.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify key women writers, filmmakers, and/or artists associated with the course topic.
Audience: Undergraduate

2. Be familiar with the socio-historical contexts in which these women thrive.
Audience: Undergraduate

3. Learn how to closely read and critically analyze literary texts, films and artistic works.
Audience: Undergraduate

4. Demonstrate improvement in oral and writing skills.
Audience: Undergraduate

5. Show awareness of variances in culture, ethnicity, class, sexuality, and religion inherent in all societies.
Audience: Undergraduate

GEN&WS 299 — DIRECTED STUDY
1-3 credits.

For highly qualified and motivated students.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

GEN&WS/RELIG ST 305 — WOMEN, GENDER AND RELIGION
3 credits.

Explores themes significant to the impact of religion on women and women on religion, historically and today, across a diverse range of contexts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024

GEN&WS/CHICLA/GEOG 308 — LATINX FEMINISMS: WOMEN'S LIVES, WORK, AND ACTIVISM
3 credits.

An examination of Latinx women's lives, experiences, and activism through the lens of testimonio, life histories, and feminist writings rooted in social justice movements and critical pedagogies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and describe key theoretical concepts and frameworks used in interdisciplinary studies of Latinas/xs and other women of color in the U.S.
Audience: Undergraduate

2. Explain the historical origins of Chicanx and Latinx feminisms and their relationship with social justice movements.
Audience: Undergraduate

3. Critically analyze the works of leading Latinx feminist scholars and theorists, who have written on issues of race, ethnicity, gender, LGBTQ identities, labor, color, citizenship status, and generation.
Audience: Undergraduate

4. Explore different writing genres and methodologies used in the study of women's lives, experiences, and activism.
Audience: Undergraduate

5. Apply the framework of testimonio to complete a digital storytelling project, examining a key theme or issue in women's lives.
Audience: Undergraduate

GEN&WS/COM ARTS 316 – GENDER AND COMMUNICATION
3 credits.

Effective communication requires awareness of how gender influences communication and our capacity to build lasting and meaningful relationships. Learn about theories and concepts to understand how gender influences our interpersonal, professional, and social lives. Topics include terms and concepts relevant to the study of how we communicate about gender, sex and sexuality, including identity, language and nonverbal behavior, socialization, close personal relationships, education, work, violence, media and social movements.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Employ the definitions and theoretical explanations of gender and communication
Audience: Undergraduate

2. Examine how gender intersects with our personal identity
Audience: Undergraduate

3. Raise self-awareness concerning our communication behaviors within a gendered context
Audience: Undergraduate

4. Foster an open mind so that we may fully comprehend the complex social constructs that influence gender and communication
Audience: Undergraduate

5. Critically evaluate the impact gender has as a tool of power
Audience: Undergraduate

6. Create a safe space for online discussion and learning
Audience: Undergraduate

GEN&WS 319 – STUDY ABROAD: GENDER, WOMEN AND THE HUMANITIES
3-4 credits.

A study abroad equivalency for that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

GEN&WS 320 – SPECIAL TOPICS IN GENDER, WOMEN AND SOCIETY
1-3 credits.

Investigation of some specific topic in gender and women's studies related to gender, women and society.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Describe social scientific scholarship key to the field of gender and women's studies.
Audience: Both Grad & Undergrad

2. Analyze relationships among social institutions, groups, social norms, and/or formal laws and policies through a feminist lens.
Audience: Both Grad & Undergrad

3. Synthesize and effectively communicate relevant information orally and in writing, independently and in collaboration with others.
Audience: Both Grad & Undergrad

4. Apply key concepts and frameworks to everyday lived experiences and social events and issues.
Audience: Both Grad & Undergrad

5. Analyze materials from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

GEN&WS/ASIAN AM 321 – ASIAN AMERICAN FEMINIST & QUEER CULTURAL PRODUCTIONS
3 credits.

Examines the different ways feminist and queer Asian Americans have used cultural production to speak up about issues of race, class, gender, sexuality, identity, diaspora, nation, justice, art, and activism. Asian American feminist and queer critiques can bring to light the ways that structures of domination uphold and further perpetuate Asian American marginalization within the U.S. Examines Asian American racialized, gendered, and sexualized images and stereotypes, as well as the daily lives and experiences of Asian American women and queer folks. Engages with scholarly articles, novels, memoirs, documentaries, and narrative films authored by and/or focusing on feminist and queer Asian Americans. Explores how systemic ideologies are reflected, challenged, and deconstructed in Asian American feminist and queer cultural productions.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Explain the historical, political, social, and cultural implications of Asian American feminist and queer cultural productions and formations as they relate to larger social issues.
Audience: Undergraduate

2. Recognize how critical race theory, feminist theory, and queer theory can help with deconstructing taken-for-granted assumptions about race, class, gender, sexuality, identity, injustice, art, and activism.
Audience: Undergraduate

3. Articulate how feminist and queer politics have changed the terrains of Asian American identities and culture.
Audience: Undergraduate

4. Explain how historical forces such as war, colonialism, and immigration policies have shaped contemporary Asian American experiences of sexuality and gender.
Audience: Undergraduate

5. Foster self-awareness and empathy toward the experiences of Asian Americans of all gender and sexual identities.
Audience: Undergraduate

GEN&WS/PSYCH 322 – SEXUAL & RELATIONSHIP VIOLENCE RESEARCH & ACTIVISM
3 credits.

Examine sexual and relationship violence and how they intersect with various aspects of identity (race, gender, sexual orientation, disability, poverty, etc.) in the general community as well as within particular populations (college, military, incarcerated) with a heavy focus on college populations (some of the applied parts of the course will focus here). Learn about power and oppression, as well as ways that both research and practice in these arenas have been marginalized and underfunded. Additional focus on community and campus responses to sexual and relationship violence through a series of speakers as well as about anti-violence activism through course activities and group projects.
Requisites: Junior standing and 3 credits in PSYCH or GEN&WS
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Understand the prevalence of sexual and relationship violence, whom it impacts, how it can affect survivors, and service seeking options for survivors.
Audience: Undergraduate

2. Understand the role of identity and intersectional identities in the experience and impact of violence as well as service seeking.
Audience: Undergraduate

3. Understand the role of alcohol and other drugs in sexual and relationship violence and their intersections with personal and social identities.
Audience: Undergraduate

4. Understand the history and practice of advocacy.
Audience: Undergraduate

5. Apply knowledge in determining the medical, mental health, legal, and other options for survivors
Audience: Undergraduate

6. Analyze and apply fourth-wave feminism to anti-violence activism.
Audience: Undergraduate

GEN&WS/AFROAMER 323 – GENDER, RACE AND CLASS: WOMEN IN U.S. HISTORY
3 credits.

Historical interplay of racism and sexism in the lives of Black and White women of different class backgrounds in the United States.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2017
Learning Outcomes: 1. Explain the relationship between gender, race, and class in the United States.
Audience: Both Grad & Undergrad

2. Appreciate the multitude of contributions made by women of African descent in the social, political, cultural, and economic development of the United States of America.
Audience: Both Grad & Undergrad

3. Identify how certain histories have been valued and devalued, and how these differences have promulgated disparities in contemporary American society.
Audience: Both Grad & Undergrad

4. Critique canonical US history and its impact on gender and race relations in the US, developing a healthy skepticism of knowledge claims.
Audience: Both Grad & Undergrad

5. Use primary sources and secondary peer-reviewed sources in written assignments to connect course topics to the lived experiences of African Americans.
Audience: Both Grad & Undergrad

6. Communicate with others in a way that displays an understanding of racial inequities in the US.
Audience: Undergraduate

7. Understand and apply the primary theories and methods employed by historians of African American history.
Audience: Graduate

GEN&WS/AFROAMER 324 – BLACK WOMEN IN AMERICA: RECONSTRUCTION TO THE PRESENT
3 credits.

Explores African American women's experience from waning days of slavery to present. Topics include slavery, emancipation, reconstruction, segregation, migration, urban and rural poverty, civil rights, nationalism, feminism and sexual politics.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2017
Learning Outcomes: 1. Explain the implications of being Black and female in the United States since the Reconstruction era.
Audience: Both Grad & Undergrad

2. Appreciate the multitude of contributions made by women of African descent in the social, political, cultural, and economic development of the United States of America.
Audience: Both Grad & Undergrad

3. Describe how certain histories have been valued and devalued, and how these differences have promulgated racial disparities in contemporary American society.
Audience: Both Grad & Undergrad

4. Critique canonical US history and its impact on gender and race relations in the US, developing a healthy skepticism of knowledge claims.
Audience: Both Grad & Undergrad

5. Use primary sources and secondary peer-reviewed sources in written assignments to connect course topics to the lived experiences of African Americans.
Audience: Both Grad & Undergrad

6. Communicate with others in a way that displays an understanding of racial inequities in the US.
Audience: Undergraduate

7. Understand and apply the primary theories and methods employed by historians of African American history.
Audience: Graduate

GEN&WS/AFROAMER 326 – RACE AND GENDER IN POST-WORLD WAR II U.S. SOCIETY
3 credits.

Assesses how race and gender (as well as socio-economic status, age, sexuality, region, etc.) shaped the experiences and options of African Americans, especially women, in U.S. society from WW II to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

GEN&WS 329 – STUDY ABROAD: GENDER, WOMEN IN SOCIETY
3-4 credits.

A study abroad equivalency for that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

GEN&WS 330 – TOPICS IN GENDER/CLASS/RACE/ETHNICITY (HUMANITIES)
3 credits.

Topics in the feminist study of inequality and difference based on class, gender and race/ethnicity, with a humanities emphasis.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Describe scholarship key to the field of gender and women's studies as it relates to race and ethnicity in the U.S.
Audience: Both Grad & Undergrad

2. Examine inequality and difference via humanities-based and feminist perspectives.
Audience: Both Grad & Undergrad

3. Synthesize and effectively communicate relevant information orally and in writing, independently and in collaboration with others.
Audience: Both Grad & Undergrad

4. Apply key concepts and frameworks to everyday lived experiences and social events and issues.
Audience: Both Grad & Undergrad

5. Analyze materials from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

GEN&WS 331 – TOPICS IN GENDER/CLASS/RACE/ETHNICITY (SOCIAL SCIENCES)
3 credits.

Topics in the feminist study of inequality and difference based on class, gender and race/ethnicity, with a social science emphasis.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Describe scholarship key to the field of gender and women's studies as it relates to race and ethnicity in the U.S.
Audience: Both Grad & Undergrad

2. Examine inequality and difference via social scientific and feminist perspectives.
Audience: Both Grad & Undergrad

3. Synthesize and effectively communicate relevant information orally and in writing, independently and in collaboration with others.
Audience: Both Grad & Undergrad

4. Apply key concepts and frameworks to everyday lived experiences and social events and issues.
Audience: Both Grad & Undergrad

5. Analyze materials from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

GEN&WS/CHICLA 332 – LATINAS: SELF IDENTITY AND SOCIAL CHANGE
3 credits.

Explores the multiracial and multicultural reality of Latina societies by becoming familiar with the history and cultures of Chicana, Cuban-American, and Puerto Rican women. Interdisciplinary readings in law, journalism, public policy, history, and self-reflective literature.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

GEN&WS/AFROAMER 333 – BLACK FEMINISMS
3 credits.

Uses an interdisciplinary framework to interrogate core assumptions, arguments, and silences in past and present black feminist thought.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Integrate necessary skills, such as independent reading, writing, and analytical skills,to think critically about feminism, race, and gender.
Audience: Both Grad & Undergrad

2. Describe how Black feminist theory shapes and is shaped by multiple hierarchies of power including class and sexuality.
Audience: Both Grad & Undergrad

3. Draw on a range of texts, films, and other media to situate Black feminist theorizing not only as an intellectual project but also as a personal and an activist one.
Audience: Both Grad & Undergrad

4. Identify key "gaps" and tensions in the work of seminal Black feminist theorists and conduct research that critically interrogates one or more of these "gaps" and tensions.
Audience: Graduate

GEN&WS/CHICLA 334 – FEMINIST SOCIAL MOVEMENTS ACROSS THE AMERICAS
3 credits.

Explores feminist activism in the United States, Canada, the Caribbean, and Latin America. Feminist activism, broadly construed, will be explored through ethnography, interviews, documentaries, public facing scholarship, among other forms of intellectual production. Applies transdisciplinary perspectives to consider work from a range of academic fields and topics to understand the major political, economic, and social issues framing feminist social movements across the Americas.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and recognize key themes and issues of feminist social movements across the Americas
Audience: Both Grad & Undergrad

2. Increase awareness of the histories of various social movements across the Americas and their impact in the present
Audience: Both Grad & Undergrad

3. Understand and analyze transnational connections among feminist social movements
Audience: Both Grad & Undergrad

4. Identify and critically analyze the theoretical frameworks that undergird feminist activist scholarship across the Americas
Audience: Both Grad & Undergrad

5. Engage more deeply with course materials with stronger written and analytical skills
Audience: Graduate

6. Develop critical thinking skills to identify and question the impact of power dynamics and institutionalized oppression on feminist social movements in the U.S and across the Americas.
Audience: Both Grad & Undergrad

GEN&WS/COM ARTS 336 – RACE, GENDER, AND TECHNOLOGY
3 credits.

Explores and interrogates the historical and contemporary connections and between race, gender, and technology. Attention will be paid to the ways media and technology construct - and are constructed by - social, economic, political, and cultural formations of race and gender. Explores an array of social issues and challenges as well as a variety of media, technology, information and communication forms, practices, and systems. Connects the topics of critical race, feminist, and queer studies with the study of technology, with an emphasis on studies of digital technologies and cultures.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Explain key concepts in the study of race, gender, and technology.
Audience: Both Grad & Undergrad

2. Demonstrate through oral and written work the ability to analyze and interpret intersecting relationships of power in studies of technology.
Audience: Both Grad & Undergrad

3. Examine historical and theoretical links between issues of race and gender relating to technology.
Audience: Both Grad & Undergrad

4. Apply feminist analysis to studies of technology.
Audience: Both Grad & Undergrad

5. Analyze materials from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

6. Synthesize and apply course content to individual academic research and thesis interests.
Audience: Graduate

GEN&WS 340 – TOPICS IN LGBTQ SEXUALITY
3 credits.

Topics in feminist study of LGBTQ sexualities, considering race, nationality, and time.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe scholarship key to the field of gender and women's studies as it relates to LGBTQ+ identities, experiences, and communities.
Audience: Both Grad & Undergrad

2. Recognize how the range of LGBTQ+ identities and experiences are grounded in specific and historical contexts.
Audience: Both Grad & Undergrad

3. Analyze relationships among LGBTQ+ people, other social groups, social institutions, norms, and/or formal laws and policies through a feminist lens.
Audience: Both Grad & Undergrad

4. Synthesize and effectively communicate relevant information orally and in writing, independently and in collaboration with others.
Audience: Both Grad & Undergrad

5. Apply key concepts and frameworks to everyday lived experiences and social events and issues.
Audience: Both Grad & Undergrad

6. Analyze materials from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

GEN&WS 342 – TRANSGENDER STUDIES
3-4 credits.

Teaches students fluency with basic terms, concepts, and methodologies within the interdisciplinary field of Transgender Studies. Content includes transnational and cultural considerations; contemporary transgender issues in medicine, law, and education; cultural production, art and activism; transgender, feminist, and queer theories.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze the ways trans, nonbinary and gender expansive lives and media are co-created with race, dis/ability, gender, sexuality, economic disparity, governmentalities, and cultural displacement and appropriations.
Audience: Undergraduate

2. Interact with others in a collaborative manner that demonstrates active listening, support and respect for peers and differing perspectives.
Audience: Undergraduate

3. Demonstrate initiative and confidence in generating original analysis and expression.
Audience: Undergraduate

GEN&WS 343 – QUEER BODIES
3 credits.

Centralizes the intersection of LGBTQ identities and dis/ability through various queer bodies which are also inflected by race, class, geographical and national locations. Approaches may include critical theory about queer bodies and personal narratives. Students will learn a variety of ways to think critically and creatively about the politics of bodily experience, including how those politics have shaped their own embodied lives.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Generate tools for respectfully discussing disability, race, gender, sexuality, and difference.
Audience: Undergraduate

2. Learn how to give, receive, and integrate instructor and peer feedback.
Audience: Undergraduate

3. Analyze the different ways in which critical and theoretical texts have engaged with these experiences.
Audience: Undergraduate

4. Acquire options for hands-on application of concepts learned in the classroom.
Audience: Undergraduate

5. Learn and apply the basic concepts and critical vocabulary of cultural analyses within conceptual frameworks.
Audience: Undergraduate

6. Gain proficiency in the techniques of scholarly research and the practice of academic writing with specific emphasis in disability studies, queer of color critique, queer and trans* studies, and literary and cultural research.
Audience: Undergraduate

GEN&WS 344 – BI/PAN/ASEXUALITY: COMMUNITY & REPRESENTATION
3 credits.

Explore the experiences, needs, and goals of bisexual/biromantic, pansexual/panromantic, and asexual/aromantic (BPA) people, as well as their interactions with the mainstream lesbian gay community. Consider outcome disparities, community coalition building, and media representation. Explore how multiple marginalization within BPA communities may complicate analysis of members' experiences.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Learn about specific outcome disparities for BPA people as compared to both heterosexual and LG people. Pose potential explanations for these disparities with particular attention to the concepts of social support and minority stress.
Audience: Undergraduate

2. Build on existing understanding of identity categories to better understand the social context in which BPA people come to self-identify and form communities, with particular attention to how BPA identities may be shaped by and challenge existing norms and structures.
Audience: Undergraduate

3. Consider how BPA people and communities intersect and form coalitions with other identity categories and communities such as trans folks, new religious groups, kink, and disability communities, and explore how these groups may fit into existing structures or work towards social change.
Audience: Undergraduate

4. Analyze media representations of and by BPA people, consider their consequences for BPA individuals and communities, and engage with transformative works that explore alternative understandings of BPA identity.
Audience: Undergraduate

5. Throughout the course, recognize how sexual and romantic identity intersects with other identities such as gender, trans or cis status, race, ability, age, economic class, etc. and explore how a person’s experiences are shaped by their identities and group memberships, with particular attention to which subgroups may experience disproportionately positive or negative outcomes.
Audience: Undergraduate

GEN&WS 345 – NARRATING QUEER LIVES
3 credits.

Asks how LGBTI+ identity informs life experiences. Explores how LGBTI + life experiences differ over time. Demonstrates the diversity of queer life stories. Examines the intersections of queer identity and other identity categories. Analyzes how religion, disability, race and class influence queer lives. Considers how and why queer memoirs share particular tropes. Investigates and employs oral history as a tool of preserving LGBTI+ life histories.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Discover and analyze the variety of queer (LGBTQ) experiences in the United States
Audience: Undergraduate

2. Discover how trends in queer experience have changed over time
Audience: Undergraduate

3. Analyze tropes of queer autobiography
Audience: Undergraduate

4. Develop oral history techniques
Audience: Undergraduate

5. Practice effective and respectful oral communication skills
Audience: Undergraduate

GEN&WS/HISTORY 346 – TRANS/GENDER IN HISTORICAL PERSPECTIVE
3-4 credits.

Focuses on sex/gender crossing and variation in historical contexts including Japan, South Africa, Europe, the African diaspora, and North America. Considers perspectives of people who themselves passed, crossed, transitioned, transed, or otherwise exceeded their culture's definitions of normative sex/gender. Alongside, consider the ways that dominant social institutions reinforced norms, recognized, tolerated, punished and/or celebrated gender variation. Examine popular culture, medical and legal perspectives, memoir, queer and trans theory, and social movement treatises.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Describe the diverse contexts, practices, and meanings associated with trans, nonbinary, creative, and cross-gender embodiments.
Audience: Undergraduate

2. Use culturally and historically specific vocabularies related to gender diversity in many eras and locations of the globe.
Audience: Undergraduate

3. Explain the ways that cultural and historical context inform gender and its roles in social life.
Audience: Undergraduate

4. Interpret gender diversity in context using the craft of the historian and other methods.
Audience: Undergraduate

5. Use written and verbal communication skills related to gender diversity across time and place.
Audience: Undergraduate

GEN&WS/C&E SOC/SOC 347 – GENDER AND SEXUALITY IN RURAL PLACES
3 credits.

A sociological examination of the influence of rurality and place on gender and sexual performances, norms, and identities in rural geographies.
Requisites: GEN&WS 101, 102, 103, C&E SOC/SOC 140, 210, 211, or SOC 181
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the role of social organization and social change in shaping equities and disparities in environment, health, and community.
Audience: Undergraduate

2. Describe how rurality and place influence gender norms and performance in private and public spheres.
Audience: Undergraduate

3. Critique ideas related to gender, sexuality, and rurality, including anti-urbanism, metronormativity, the rural idyll, natural/unnatural, and visibility politics.
Audience: Undergraduate

4. Assess how discourses and ideas about gender and sexuality influence dominant and minority groups.
Audience: Undergraduate

GEN&WS/AMER IND 348 – QUEER INDIGENOUS STUDIES
3 credits.

Focuses on the experiences and voices of queer, trans and Two-Spirit Indigenous people in North America. Examines history, literature, and art alongside scholarship in the field of queer Indigenous studies. Explores the ways queer Indigenous people have resisted colonial violence and asserted their own identities and roles within their communities and in broader social movements. Emphasizes the diverse range of queer Indigenous life - including disabled, Afro-Indigenous, and transgender experiences. Themes include land relations, kinship, solidarity, and cultural reclamation.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Identify a variety of core concepts used in queer Indigenous studies.
Audience: Undergraduate

2. Engage scholarly debates within the field of queer Indigenous studies.
Audience: Undergraduate

3. Apply these concepts and debates to cultural productions by queer Indigenous people.
Audience: Undergraduate

4. Analyze the interventions and contributions of queer Indigenous scholars and artists.
Audience: Undergraduate

GEN&WS/ENGL 350 – SPECIAL TOPICS IN GENDER & LITERATURE
3 credits.

Investigation of some specific topic in gender and women's studies related to gender and literature. Topic differs each semester.
Requisites: GEN&WS 101, 102, 103, or SOC/GEN&WS 200
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe literary concepts key to the field of gender and women's studies.
Audience: Undergraduate

2. Critically examine gender in literature through a feminist lens.
Audience: Undergraduate

3. Synthesize and effectively communicate relevant literary, cultural, historical, and theoretical information through oral, written, and/or collaborative work.
Audience: Undergraduate

4. Apply key frameworks from literary studies and feminist thought to everyday lived experiences, cultural production, and social issues.
Audience: Undergraduate

GEN&WS/CLASSICS 351 – WOMEN AND GENDER IN THE CLASSICAL WORLD
3-4 credits.

Constructions of gender and sexuality in the classical world through art, literature and archaeology.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of Classical societies and cultures.
Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.
Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.
Audience: Undergraduate

4. Demonstrate knowledge of constructions of gender and sexuality in the classical world and their relevance for the contemporary world.
Audience: Undergraduate

GEN&WS/HISTORY 353 – WOMEN AND GENDER IN THE U.S. TO 1870
3-4 credits.

An advanced and comparative study of the roles of gender, class, and race in American history and historiography. Themes include women as agents of social change and as builders of community.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe historical constructions of gender amidst multiple, intersecting social hierarchies.
Audience: Undergraduate

2. Interpret primary and secondary sources about women in colonial North America and the early United States.
Audience: Undergraduate

3. Analyze power dynamics among women and between the genders.
Audience: Undergraduate

4. Articulate a theory of diverse women's relationships to a significant idea or process, based on historical evidence.
Audience: Undergraduate

5. Evaluate the impact of women's personal agency and collective movements before 1870.
Audience: Undergraduate

6. Identify and critique the methods historians have used to create knowledge about women and gender
Audience: Both Grad & Undergrad

7. Propose a new direction for future scholarship and/or public engagement with women's history, based on your informed critique.
Audience: Both Grad & Undergrad

8. Design an original research project based on your historiographical proposition.
Audience: Graduate

GEN&WS/HISTORY 354 – WOMEN AND GENDER IN THE U.S. SINCE 1870
3-4 credits.

See 520.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019
Learning Outcomes: 1. Describe historical constructions of racialized gender in specific contexts from the nineteenth century to the present.
Audience: Both Grad & Undergrad

2. Analyze power dynamics among women and between the genders, including the interactions of multiple, intersecting social hierarchies.
Audience: Both Grad & Undergrad

3. Recognize assumptions about racialized gender, both expressed and implied, in historical sources.
Audience: Both Grad & Undergrad

4. Question assumptions about racialized gender in contemporary US politics, law, and culture.
Audience: Both Grad & Undergrad

5. Articulate one's own positionality in relationship to multiple communities by identifying the historical dynamics that shape relations of racial and gender difference in the US today.
Audience: Both Grad & Undergrad

6. Apply the concepts of racialized gender and positionality when participating in multicultural discussions, creative spaces, political events and/or workplaces.
Audience: Both Grad & Undergrad

7. Critique the existing historiography and propose solutions for future scholarship and/or public engagement with gender and women's history, based on your informed critique.
Audience: Graduate

GEN&WS/CLASSICS/HIST SCI/ILS 355 – SEX, GENDER, & THE HISTORY OF MEDICINE
3 credits.

Examines the relationship between sexed and gendered bodies and medicine from the ancient world to today. Considers such questions as: How have sexed bodies (male, female, intersex) been distinguished throughout medical history? What happens to bodies between or outside the binary? Which bodies get marked out for medical analysis and intervention? Examines the evolution of ideas in medicine that emerge from beliefs about sexed and gendered bodies. Focuses on analysis of primary sources and secondary sources and the development of scholarly arguments about continuities and change over time. Assesses how modern beliefs and practices surrounding sex gender, medicine and their mutual interplay are rooted in and/or reacting to beliefs and practices from the premodern past.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Explain and assess how historical - particularly ancient Classical and Near Eastern - theories of sex, gender, and medicine inform our beliefs and understandings today.
Audience: Undergraduate

2. Assess how cultural, medical, and scientific understandings and definitions of sex and gender have changed (or not) over time.
Audience: Undergraduate

3. Identify major developments in the history of medicine and the medical profession, particularly as relates to sexed and gendered bodies.
Audience: Undergraduate

4. Recognize health and illness as grounded in personal experience, develop empathy for others' experiences and use creative means to reflect on those experiences.
Audience: Undergraduate

5. Comprehend and evaluate complex arguments about politics, values, healthcare, and health in ancient and contemporary society.
Audience: Undergraduate

6. Assess what health means among differently positioned people (e.g., with respect to race, class, gender, culture, disability, age).
Audience: Undergraduate

GEN&WS/ENGL 359 – VISIONARY AND SPECULATIVE FICTION: SOCIAL JUSTICE APPROACHES
3 credits.

Explores the genre of visionary fiction - speculative fiction written for social justice purposes - as a means to create, build and maintain new worlds. Examines the political potential of literature and multiple examples of visionary fiction.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Understand the social and political potential of literature to impart knowledge about gender, sexuality, race, and other intersectional social issues
Audience: Undergraduate

2. Develop interdisciplinary techniques to blend research with creative expression
Audience: Undergraduate

3. Develop critical thinking and creative writing skills
Audience: Undergraduate

GEN&WS/CLASSICS 361 – SEX AND POWER IN GREECE AND ROME
3 credits.

Sex as a source of domination and liberation in Ancient Greek and Roman literature and modern European and North American theory and practice, including questions of sexual orientation, gender identity, violence, and self-realization.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate knowledge of Classical societies and cultures.
Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.
Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.
Audience: Undergraduate

4. Apply critical concepts relating to gender and sexuality to contemporary phenomena.
Audience: Undergraduate

GEN&WS/AFROAMER 367 – ART AND VISUAL CULTURE: WOMEN OF THE AFRICAN DIASPORA AND AFRICA
3 credits.

Art and visual culture by/or pertaining to women throughout the African Diaspora and Africa. Though the focus is on 10th century art by black women, it will go into visual culture (art objects, photographs, images, dress, culturally-coded representation) concerning black women historically.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze and interpret works of art by women artists of the African Diaspora and Africa.
Audience: Both Grad & Undergrad

2. Apply critical thinking and analytical skills regarding gender, race, and other social categories of identity and oppression to the study of visual images by and about Black women.
Audience: Both Grad & Undergrad

3. Demonstrate basic knowledge of 20th century artistic terminology and aesthetic movements.
Audience: Undergraduate

4. Develop an advanced research project on Black women artists and their art.
Audience: Graduate

GEN&WS 370 – TOPICS IN GENDER AND DISABILITY
3 credits.

Examines the social, cultural, political, and symbolic constructions of the intersecting categories of gender and disability.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Describe disability studies concepts key to the field of gender and women's studies.
Audience: Both Grad & Undergrad

2. Analyze in disability studies through a feminist lens.
Audience: Both Grad & Undergrad

3. Synthesize and effectively communicate relevant information through oral,written, and/or collaborative work.
Audience: Both Grad & Undergrad

4. Apply key concepts and frameworks to everyday lived experiences and social events and issues.
Audience: Both Grad & Undergrad

5. Analyze materials from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

GEN&WS 374 – DISABILITY, GENDER AND SEXUALITY
3 credits.

Explores gender identity and sexuality among disabled people using historical and theoretical articles to discuss and analyze films, memoirs, and poetry by people with disabilities. Provides a brief introduction to disability studies and intersectionality before delving into academic discussions and artistic representations of the intersections of disability, gender, and sexuality.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Increase knowledge of disability identity and disability studies
Audience: Undergraduate

2. Develop and hone critical thinking and communication skills
Audience: Undergraduate

3. Increase knowledge of intersectionality and intersectional approaches to reading and writing
Audience: Undergraduate

GEN&WS/HISTORY 392 – WOMEN AND GENDER IN MODERN EUROPE
3-4 credits.

An examination of the cultural role of gender and the social, economic, and political activities of women in modern Europe from the 18th to the late 20th centuries.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Describe the significance of gender as a category for historical analysis, and the analytical value of exploring women's agency as historical actors.
Audience: Undergraduate

2. Discuss women's experience of major events in modern European history, explaining how additional factors like age, marital status, religion, and class differentiated that experience.
Audience: Undergraduate

3. Identify the chief ways in which widely shared European norms and beliefs concerning gender and sexuality changed over the course of the modern period.
Audience: Undergraduate

4. Describe how different political actors (French revolutionaries, Italian fascists, Soviet Communists, German feminists, etc.) promoted distinct visions of proper gender roles for men and women.
Audience: Undergraduate

5. Analyze historical evidence in the form of primary source documents.
Audience: Undergraduate

6. Analyze secondary sources, recognizing the authors' major arguments and the types of evidence they employ.
Audience: Undergraduate

7. Construct your own written historical arguments by drawing critically on multiple sources.
Audience: Undergraduate

GEN&WS/ENGL 401 – RACE, SEX, AND TEXTS (HOW TO DO THINGS WITH WRITING)
3 credits.

Explore how race, gender, and sexuality intersect with language and inform textual experiences. Learn how written texts in various forms and genres impact and play major roles in enforcing, or challenging, expectations about race and sex in the United States. Engage with documentation, such as marriage licenses, passports, federal policies, anti-slavery petitions, letters to the editor, posters, and hashtag activism, to follow public debates and everyday individual actions where writing and talking about sex and race makes a difference. Focus on the power of words to break bones and heal wounds. Examine historical and contemporary interconnections among race, sexuality, gender, and texts in the United States.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Evaluate how race, gender, and sexuality intersect with language and inform textual experiences.
Audience: Undergraduate

2. Situate the practice and use of rhetoric, writing, and/or literacy in social, historical, political, material, and personal circumstances.
Audience: Undergraduate

3. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Undergraduate

4. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

GEN&WS/LEGAL ST/SOC 406 – LAW, SEXUALITY, & SOCIETY
3-4 credits.

Examines the legal and social development and implications of laws governing sexual behavior, human reproduction, media, privacy, and topics related to sexuality, sex and gender. Includes historical analyses of laws connected to present day regulations of sexuality, demonstrating the origins of many of the world's most frequently debated civil rights issues. Chief focus on the United States legal system, with some content including examinations of institutions around the world. Investigates taken-for-granted knowledge and assumptions about sexuality and look at legal, cultural and social constructions of sex in society. Covers intersectional social implications, including race, (dis)ability, class, etc. Topics include: obscenity, pornography, sex work, sexual surrogacy, birth control, abortion, sex education, sexual violence, sex offenders, sexual citizenship rights, trans and intersex legal topics.
Requisites: GEN&WS 101, 102, 103 or SOC/LEGAL ST 131
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss social theory about law and human behavior, particularly human sexuality
Audience: Undergraduate

2. Explain historical roots of modern sexuality-related laws and legal systems worldwide
Audience: Undergraduate

3. Analyze topics related to sexuality and society; constructing arguments based on academic, peer-reviewed research
Audience: Undergraduate

4. Examine sociolegal governance over a wide variety of sexual behaviors and gender/sex topics in a critical, thorough, and thoughtful manner
Audience: Undergraduate

5. Comprehend and apply legal history, precedent, and course concepts to specific sociolegal cases concerning sexuality
Audience: Undergraduate

GEN&WS 410 – SPECIAL TOPICS IN GENDER AND VISUAL CULTURE
3 credits.

Explores topics in gender and visual culture, including artistic practice, political and creative expression, and cultural phenomena. Course topic changes; may be repeated with a different topic.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Define and use visual culture frameworks to further understanding of gender.
Audience: Undergraduate

2. Engage in critical discourse on the concepts, themes and strategies key to the production of visual cultureas it relates to gender.
Audience: Undergraduate

3. Define and use visual culture frameworks to advance understanding and analysis of gender.
Audience: Graduate

4. Complicate critical discourse on the concepts, themes and strategies key to the production of visual cultureas it relates to gender.
Audience: Graduate

GEN&WS/ART HIST 414 – CONTEMPORARY QUEER ART AND VISUAL CULTURE
3 credits.

Queer art and visual culture are defined not only through their subject matter but also by the methods through which they appropriate and subvert conventional visual practices. Such tactics may include a work's means of production, its formal properties, and the conditions of its reception. The political imperatives of a queer or queered position, linked to the intersections of race, class, sex and gender will shape thematic investigations of practices related to activism, documentation, abstraction, mining the archive, craft, camp, and drag, among others. Case studies will be drawn from film, performance, comics, video games, and fine art. Projects will engage text- and studio-based research in an interdisciplinary push to integrate theory and practice. No prior art or design experience required. Not open to students with credit for GENWS 412 prior to Fall 2026.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Engage in critical discourse on the concepts, themes and strategies key to queer art and visual culture.
Audience: Both Grad & Undergrad

2. Demonstrate a working knowledge of influential practitioners and texts in the field.
Audience: Both Grad & Undergrad

3. Analyze and apply text- and studio-based practices to generate projects that respond to or participate in a dialogue on queer theory.
Audience: Both Grad & Undergrad

4. Synthesize course content with your individual academic research and thesis interests.
Audience: Both Grad & Undergrad

5. Conduct additional research to make a critical or creative contribution to the study of queer art and visual culture
Audience: Graduate

GEN&WS/THEATRE 415 – INTRODUCTION TO CONTEMPORARY FEMINIST THEATRE AND CRITICISM
3 credits.

Introduction to the history, literature and theory of feminist theatre and of feminist criticism of mainstream theatre in the United States from 1960 to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

GEN&WS/COM ARTS 418 – GENDER, SEXUALITY, AND THE MEDIA
3 credits.

Examines images of gender and sexuality in the media, with a focus on contemporary media in the U.S. Using theories from cultural studies, film and media studies, gender studies, and communication explore different processes and practices of gender and sexuality. Look at the way that gender and sexuality are constructed through social, cultural, and economic forces, and the way that these identities intersect with other social identities such as race, ethnicity, and class. Consider the way that media impact our understanding of feminism and post-feminism, violence, celebrity, consumer culture, subcultures and activism.
Requisites: GEN&WS 101, 102, 103, SOC/GEN&WS 200, COM ARTS 250 or graduate/professional standing
Course Designation: Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Explain the way that systems of oppression such as patriarchy and heteronormativity are manifested in today's society and media cultures
Audience: Both Grad & Undergrad

2. Analyze and interrogate the meaning of contemporary representations of sexuality and gender in the media
Audience: Both Grad & Undergrad

3. Conduct intersectional analyses of the way that different categories of identity such as gender, sexuality, race, class, and ability come together in the media
Audience: Both Grad & Undergrad

4. Articulate their own perspective on how empowerment and liberation are connected to media practices and cultures of production and consumption
Audience: Both Grad & Undergrad

5. Create and participate in creating a respectful environment for having informed discussions about power, identity, representation, and difference with peers
Audience: Both Grad & Undergrad

6. Demonstrate advanced analysis of gender and sexuality in media based on rigorous engagement with media studies scholarship
Audience: Graduate

GEN&WS 420 – WOMEN IN CROSS-SOCIETAL PERSPECTIVE
3 credits.

An interdisciplinary examination of the position of women in a variety of social contexts; an analysis of the society--specific and universal social forces that determine the position of women; an investigation of the change in women's status and role worldwide and an inquiry into the causes of this change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Describe how gender, sexuality, race, and other intersectional identities interact and impact individual and interpersonal experiences.
Audience: Both Grad & Undergrad

2. Analyze relationships to social institutions, norms, and policy through a feminist lens.
Audience: Both Grad & Undergrad

3. Apply interdisciplinarity understanding, critical thinking, effective written and oral communication, and collaboration to learning.
Audience: Both Grad & Undergrad

4. Examine personal and social responsibility, including self-awareness, social awareness, and ethics.
Audience: Both Grad & Undergrad

5. Analyze materials from an interdisciplinary perspective, using tools drawn from a variety of methodologies.
Audience: Both Grad & Undergrad

6. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS/LEGAL ST 422 – WOMEN AND THE LAW
3 credits.

Legal system, laws, and proposed legislation that have specific impact on the lives of women. Topics investigated in both the social and legal contexts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate an understanding of feminist legal theories and methodologies and apply them to real-world cases and historical legal scenarios.
Audience: Both Grad & Undergrad

2. Examine historical roots of modern gendered/sexed legal systems in the United States and worldwide.
Audience: Both Grad & Undergrad

3. Identify key court cases related to gender and civil rights; summarize the major holdings of those cases.
Audience: Both Grad & Undergrad

4. Investigate and research original projects about sex and society, construct research arguments, and plan legal/policy brief proposals.
Audience: Both Grad & Undergrad

5. Analyze sociolegal governance trends/patterns in the U.S. and internationally over a wide variety of sex/gender topics, including family rights, economic and financial rights, employment, voting, politics, sexuality, sport, education, abortion, birth control, and health.
Audience: Both Grad & Undergrad

6. Effectively present legal arguments in oral form, using the "Before the Courts" style, and in written form, using the style of law review articles.
Audience: Graduate

GEN&WS 423 – THE FEMALE BODY IN THE WORLD: GENDER AND CONTEMPORARY BODY POLITICS IN CROSS CULTURAL PERSPECTIVE
3 credits.

Explores the social, cultural, and political construction of the female/feminine body. Considers specifically the bodies of women and girls, transgender women, non-binary people that embody the feminine, female masculinities, and bodies that identify and are identified as female, as bodies that have historically and traditionally been sites of political contention, of societal meaning making, of cultural symbolism, and active resistance. Seeks to challenge what we think we know about bodies, challenging tacit knowledge and investigating how normative discourses of the female/feminine body are formed across cultures, around the world. Considers the impacts of phenomena such as globalization, neoliberalism, "global" feminism, imperialism, capitalism, and human rights movements on cultural conceptions of health, ability, beauty, representation, and the "value" of female/feminine bodies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Critically analyze and provide concrete examples of how bodies are socially constructed, and how the female/feminine body in particular is a site of political and cultural meaning making, contention, and resistance
Audience: Both Grad & Undergrad

2. Articulate various theoretical frameworks (feminist theories, colorism, queer theory, disability studies, fat studies, etc.) as they relate to gender, embodiment, and the body, and use them in application of concrete ideas
Audience: Both Grad & Undergrad

3. Think, observe, and write critically and analytically and engage thoughtfully in analytic (rather than simply opinionated!) discussions
Audience: Both Grad & Undergrad

4. Understand and engage in the process of conducting a literature review and complete a clear, well organized, and thoughtful academic paper that explores a particular area of interest/scholarship
Audience: Graduate

5. Connect course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS/LEGAL ST/SOC 425 – CRIME, GENDER AND JUSTICE
3 credits.

Focuses on the intersection between gender, crime and justice from a cross-cultural perspective. The gendered nature of the criminal justice system, female experiences of crime, prosecution and incarceration as well as the extent to which women are victims, offenders, and participants in the criminal justice system will be explored. Special emphasis will be placed on the theoretical implications of offending behavior and the intersection of gender with sexuality, race, ethnicity and class. The goal of this course is to provide a foundation for critically assessing the often controversial issues surrounding race, gender, crime, and criminal justice in society.
Requisites: SOC/LEGAL ST 131, GEN&WS 101, 102, 103 or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze the U.S. criminal justice system, including incarceration, sentencing, and policing, through the lens of gender studies
Audience: Undergraduate

2. Identify and describe criminological theories, specifically those focused on gender, race, class, and feminist academic thought
Audience: Undergraduate

3. Explore inequalities amongst gender groups and various other social intersections (race, class, ability, sexuality, age, parenthood, etc).
Audience: Undergraduate

4. Investigate topics related to gender and justice by conducting thorough literature reviews and preparing policy briefs with recommendations for legal change.
Audience: Undergraduate

5. Examine and discuss real-world experiences in criminal justice systems, both in the U.S. and abroad.
Audience: Undergraduate

GEN&WS/FOLKLORE 428 – GENDER AND EXPRESSIVE CULTURE
3 credits.

Examines the relationship between dominant images of gender representation as they emerge in expressive culture in various societies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2019

GEN&WS/POLI SCI 429 – GENDER AND POLITICS IN COMPARATIVE PERSPECTIVE
3-4 credits.

Examines the gendered nature of political institutions around the world, including implications of women's exclusions from public life in a global context; the obstacles to women's greater participation; how women have gained greater voice in political leadership in some countries; and the differences women make in the political arena. Not open to students with credit for POLI SCI 643 prior to fall 2017
Requisites: Sophomore standing; not open to special students
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify key political science work related to gender/women in politics.
Audience: Undergraduate

2. Critically assess cultural, institutional, political economy, and other theories about gender/women and politics.
Audience: Both Grad & Undergrad

3. Describe patterns of gender inequality in politics across different political systems and cultural contexts.
Audience: Both Grad & Undergrad

4. Analyze causes of gender gaps in political participation or representation.
Audience: Both Grad & Undergrad

5. Demonstrate skills in oral argument or analytical writing.
Audience: Both Grad & Undergrad

6. Identify key political science literature and debates related to gender/women in politics.
Audience: Graduate

GEN&WS/POLI SCI 435 – POLITICS OF GENDER AND WOMEN'S RIGHTS IN THE MIDDLE EAST
3 credits.

Explores the intertwined relationship between gender and politics in contemporary Middle East and North Africa. Situates the region's historical, socio-political, and cultural context that have particularly contributed to shaping the current discourse on gender in the Arab World. Explores - both theoretically and empirically - the role of Arab women in influencing the political processes across the Middle East. Examines real-world examples of Middle Eastern women from different parts of the region who have succeeded to challenge the status quo and push for genuine change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop a concrete understanding of the history and politics of the Middle East and North Africa (MENA) and the ways they shape gender power relations across the region.
Audience: Both Grad & Undergrad

2. Apply comparative politics frameworks and feminist theories toward understanding patterns of female political participation and better understand current events and complexities of the region’s politics and governance structures.
Audience: Both Grad & Undergrad

3. Sharpen critical and analytical skills through exposure to different, even contradictory, points of views and contemporary debates relating to the role of women in shaping MENA’s politics post-Arab uprisings.
Audience: Both Grad & Undergrad

4. Develop and present ideas and arguments to audience with diverse interests and backgrounds.
Audience: Both Grad & Undergrad

5. Apply pertinent theoretical and empirical evidence necessary to make critical and analytical arguments about gender and politics in comparative perspective.
Audience: Graduate

GEN&WS/AMER IND/ANTHRO/FOLKLORE 437 – AMERICAN INDIAN WOMEN
3 credits.

Examines and interprets the roles of American Indian women in traditional societies, and in contemporary North America.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Articulate some of the effects the past has had on present day circumstances, perceptions of, and disparities facing Native American women.
Audience: Undergraduate

2. Recognize cultural assumptions, and biases, as they relate to conceptions of gender and lived experience under colonialism
Audience: Undergraduate

3. Examine cultural variance in gender and gender roles and Indigenous women's place within their tribal nations, urban communities, and American society.
Audience: Both Grad & Undergrad

4. Assess contemporary issues with consideration for the cultural perspectives and worldviews of Indigenous peoples in what is now the United States.
Audience: Both Grad & Undergrad

5. Demonstrate understanding of key topics in the field of Indigenous women's and gender studies through engagement with field-based literature.
Audience: Graduate

GEN&WS/LITTRANS/SCAND ST 438 – SEXUAL POLITICS IN SCANDINAVIA
3 credits.

Read and discuss works by Scandinavian writers of the nineteenth and twentieth century reflecting sexual politics and the roles of women in literature. Course taught in English.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and understand the categories depicting sexual politics and the position of women in Scandinavia as portrayed through various works of literature
Audience: Undergraduate

2. Analyze and discuss the important features characterizing sexual politics and the position of women in Scandinavia as portrayed through various works of literature
Audience: Undergraduate

3. Compose and produce writing that applies the concepts introduced to describe, analyze, and differentiate sexual politics and the position of women as portrayed through various works of literature about Scandinavian women.
Audience: Undergraduate

GEN&WS 441 – CONTEMPORARY FEMINIST THEORIES
3 credits.

Contemporary theoretical positions and debates about feminisms in the humanities and social sciences.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Integrate independent reading, writing, and analytical skills necessary to think critically about contemporary schools of feminist thought.
Audience: Undergraduate

2. Describe how contemporary feminist theories shape and are shaped by multiple hierarchies of power including race, class and sexuality.
Audience: Undergraduate

3. Draw on a range of texts, films, and other media to situate contemporary feminist theorizing not only as an intellectual project but also as a personal and an activist one.
Audience: Undergraduate

GEN&WS/ANTHRO 443 – ANTHROPOLOGY BY WOMEN
3 credits.

Contributions of women anthropologists to feminist and anthropological theories and research methods. Field research and gender. Current debates in women's studies and anthropology in light of recent research on women and gender in cross-cultural perspective.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify how gender impacts knowledge production, canon formation, and their transformations as they relate historical and contemporary anthropology.
Audience: Both Grad & Undergrad

2. Describe how women anthropologists' contribute to broader cultural debates, especially the impacts of anthropological research on gendered social relations from prehistory to the present.
Audience: Both Grad & Undergrad

3. Examine personal and social responsibility, including self-awareness, social awareness, and ethics.
Audience: Both Grad & Undergrad

4. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS 444 – FROM PAST FEMINISMS TO POSTFEMINISM: FEMINISMS FOR THE 21ST CENTURY
3 credits.

Explores feminist theories from a broad array of disciplines and perspectives. Beginning with early feminist writings, to the significance of the Second Wave, examines consciousness raising, political pamphlets, personal manifestos, and the feminist ideology of the "personal is political." Explores work from Black feminist thought, queer theory, theory from disability studies, fat studies, ecofeminism, and transnational and global feminisms. Identifies and addresses crucial areas of contestation that punctuate the dynamic relationships among texts from past and present-the arrivals, departures, and returns-in feminist theory. Listens to voices that align and voices that dissent. Engages with the work of writers and thinkers from the past and bringing these ideas to our current cultural configurations and conceptualizations of feminism(s) and feminist movement(s).
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize and synthesize the work of feminist theorists and other theorists (queer and crip theory, fat studies, critical race theory, etc.) from the mid-20th century to the present day.
Audience: Undergraduate

2. Critically analyze feminist theory in conjunction with cultural and social events and draw connections among how feminist theory ideas align and how they differ from each other.
Audience: Undergraduate

3. Critically appreciate and constructively critique texts, theoretical frameworks, ideas, and praxis (the gap between text and world).
Audience: Undergraduate

4. Articulate your own ideas about what you think feminism for the 21st century can or should look like/sound like/feel like in conjunction with historical and contemporary feminist theories and frameworks.
Audience: Undergraduate

5. Build awareness and understanding of feminist principles, values, and epistemologies (knowledge development) and how these translate to praxis and feminist calls to action.
Audience: Undergraduate

6. Engage in the process of social science data collection, through interviews, oral history, textual and/or content analysis
Audience: Undergraduate

7. Conduct a literature review and seek out contemporary social science research using a feminist theory and research lens
Audience: Undergraduate

GEN&WS 445 – THE BODY IN THEORY
3 credits.

Explores a broad range of contemporary theories concerned with bodies and power. Intersections with gender, race, class, dis / ability, sexuality and nation.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze how contemporary theories of the body and understand that bodies and bodily experience are shaped by biological, social, political, and cultural forces.
Audience: Both Grad & Undergrad

2. Identify the social, historical, and cultural constructedness of gender, disability, and sexual identities as well as contestations over the meanings, representations, and experiences of race, gender, disability, class, and sexuality.
Audience: Both Grad & Undergrad

3. Use critical thinking and analysis skills to connect representation of bodies, gender, and sexuality, in cultural, medical, scientific, and digital media texts.
Audience: Both Grad & Undergrad

4. Critically examine representation and cultural production through a feminist lens.
Audience: Both Grad & Undergrad

5. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS 446 – QUEER OF COLOR CRITIQUE
3 credits.

An examination of the emergent theoretical field of queer of color critique, a mode of analysis grounded in the struggles and world-making of LGBTQ people of color. Activists, artists, and theorists have mobilized queer of color critique to interrogate the intersections of race, gender, sexuality, class, nation, and diaspora as a response to the inherent whiteness of mainstream queer theory and persistent heterosexism in ethnic studies. Examines the development of queer of color critique (primarily in the United States) through both academic and activist domains; consider what queer theory has to say about empire, citizenship, prisons, welfare, neoliberalism, and terrorism; and articulate the role of queer of color analysis in a vision for racial, gender, sexual, and economic justice.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Summarize the intellectual field known as "queer of color critique," including its primary interventions, lineages, methods, & recent developments.
Audience: Both Grad & Undergrad

2. Connect skills in reading, interpreting, and making theoretical arguments about art, activism, and everyday life.
Audience: Both Grad & Undergrad

3. Explain intersectional understandings of racial, economic, gender, and sexuality relating to heteronormativity, patriarchy, capitalism, neoliberalism, imperialism, and more.
Audience: Both Grad & Undergrad

4. Share in a collaborative process of listening, support, and respect for peers and differing perspectives.
Audience: Both Grad & Undergrad

5. Connect queer of color critical analysis to a wide variety of objects from the media, the arts, and everyday life.
Audience: Both Grad & Undergrad

6. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS 449 – SPECIAL TOPICS IN FEMINIST THEORY
3 credits.

Investigation of specific theorists, themes, problems, or eras in feminist social and cultural theory. Course topic differs each semester. Course may be repeated with different topics.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Define and use feminist theoretical frameworks to analyze historical and contemporary understanding of gender.
Audience: Both Grad & Undergrad

2. Develop writing and analytical skills needed to think critically about theory and practice.
Audience: Both Grad & Undergrad

3. Use feminist theory to help develop graduate level research, including but not limited to thesis and dissertation research.
Audience: Graduate

GEN&WS/PORTUG 450 – BRAZILLIAN WOMEN WRITERS
3 credits.

A survey of representative writing by contemporary Brazillian women writers in relation to representations of nationality, race, class, ethnicity, gender and sexualities.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify a variety of writing styles by contemporary Brazilian women writers.
Audience: Both Grad & Undergrad

2. Discuss issues pertaining to the act and nature of writing, writing by women, and feminine and feminist writing.
Audience: Both Grad & Undergrad

3. Analyze writing from and about Brazil, its people and culture, through written and oral responses.
Audience: Both Grad & Undergrad

4. Identify racial and gender inequalities in Brazil and compare them to those in the United States.
Audience: Both Grad & Undergrad

5. Design and complete a research project related to course material.
Audience: Graduate

GEN&WS/PORTUG 460 – CARMEN MIRANDA
3 credits.

Examines the work, representation and interpretation of Carmen Miranda from her early days as a radio star in Brazil to a film actress and entertainer in Hollywood in the 1940s and 50s.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Examine the work, representation, and interpretation of Carmen Miranda in US film, media and popular culture from the late 1930s through to the present day.
Audience: Both Grad & Undergrad

2. Analyze concepts such as the gendered spectacle, the representation of race and ethnicity, women in popular culture, censorship and parody, the dialects of 'camp', drag, and Latinidade in Brazil and the United States.
Audience: Both Grad & Undergrad

3. Summarize the gendered politics of performance through the Hollywood musical and the period of the Good Neighborhood Policy.
Audience: Both Grad & Undergrad

4. Interpret critically different forms of texts including biographical writing, fan magazines, commercial newspaper articles, academic articles, press kits, film reviews, publicities, film trailers, posters and other paraphernalia.
Audience: Both Grad & Undergrad

5. Design and complete a research project related to course material.
Audience: Graduate

GEN&WS/ASIAN AM/ENGL 463 – RACE AND SEXUALITY IN AMERICAN LITERATURE
3 credits.

Explores the intersection between race and sexuality in American literature with an emphasis on sex/gender difference, feminism, transgenderism, and nationalism. Focuses on the nature of literature as advocacy, with an emphasis on Asian-American issues.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

2. Identify and explore the intersection between race and sexuality in American literature with an emphasis on sex/gender difference, feminism, transgenderism, and nationalism.
Audience: Both Grad & Undergrad

3. Critique the nature of literature as advocacy.
Audience: Both Grad & Undergrad

4. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

5. Leverage writing as a mode of learning and means of conveying critical analysis .
Audience: Both Grad & Undergrad

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

GEN&WS/ASIAN AM/ENGL 464 – ASIAN AMERICAN WOMEN WRITERS
3 credits.

Major texts by Asian American women writers.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity and how they are affected by socio-historical factors.
Audience: Undergraduate

2. Identify and critique the literary, critical and cultural issues present in several major texts by Asian American women writers.
Audience: Both Grad & Undergrad

3. Identify and apply methods and approaches for analysis of literary and cultural texts to demonstrate literature's contemporary and historical relevance.
Audience: Both Grad & Undergrad

4. Leverage writing as a mode of learning and means of conveying critical analysis.
Audience: Both Grad & Undergrad

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate and pursue an original research question in the context of those gaps.
Audience: Graduate

GEN&WS/POLI SCI 469 – WOMEN AND POLITICS
3-4 credits.

Changing political roles, status, attitudes, and behaviors of women in contemporary society and of the political implications of changing female/male relationships.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Introduce students to concepts of sex, gender and sexuality and how they have been fundamental to the shape and function of political institutions, laws, and policies.
Audience: Undergraduate

2. Understand how women have participated in politics despite severe legal and political restrictions.
Audience: Undergraduate

3. Understand how social policies and institutional rules inhibit women's influence and participation.
Audience: Undergraduate

4. Explore how the media cover female candidates.
Audience: Undergraduate

5. Examine what barriers inhibit female candidates from running for office.

Audience: Undergraduate

GEN&WS 472 – FOOD FOR THOUGHT: AN INTERSECTIONAL APPROACH
3 credits.

Approaches human relationships with food from micro to macro levels. Considers personal and interpersonal relationships with food, examining the social, cultural, and political meanings of food at various intersections of identity (gender, race, class, ability, age, etc.), and within different institutions such as family, education, and religion. Asks questions about personal/individual responsibility in relation to food, and the role of communities, municipalities, governments, and global entities in determining what people eat and how. Explores the gendered, raced, and classed politics of food systems; questions of sovereignty, sustainability, access, regulation, dissemination, and policy making. Examines the cultural, ecological, and economic implications of the ways food is perceived, produced, and consumed across cultures.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Create a foundation of knowledge to support further academic work and civic engagement in food sovereignty/food justice movements
Audience: Both Grad & Undergrad

2. Define food justice and explore where and how it connects to ourselves and our communities
Audience: Both Grad & Undergrad

3. Identify the different actors in food politics and the varying/conflicting ideas and intentions around food production, distribution, and access as it relates to equity
Audience: Both Grad & Undergrad

4. Report on current food justice issues by analyzing the obstacles that create them
Audience: Both Grad & Undergrad

5. Research and describe local, regional, and global social movements and policies around food politics and food justice
Audience: Both Grad & Undergrad

6. Articulate various theoretical frameworks as they relate to food, identity politics, and intersectionality and use them in application of concrete ideas

Audience: Both Grad & Undergrad

7. Think, observe, and write critically and analytically and engage thoughtfully in analytic (rather than simply opinionated!) discussions
Audience: Both Grad & Undergrad

8. Apply pertinent theoretical and empirical evidence necessary to make critical and analytical arguments about gender and food politics through an intersectional lens
Audience: Graduate

9. Articulate key issue areas of food justice and relate these issue areas to your area of disciplinary graduate level research
Audience: Graduate

GEN&WS/GEOG 504 – FEMINIST GEOGRAPHY: THEORETICAL APPROACHES
3 credits.

Provides an opening to some of the key debates and practices in feminist (political) geography. Feminist geography focuses on questions of power, difference, embodiment, and social change. How are feminist geographies in conversation with or part of other fields of inquiry, such as critical ethnic studies and Indigenous studies, which also focus on questions of difference, epistemologies of knowledge, and social transformation and/or decolonization? That is, what are the relationships of feminist geographic inquiry to liberatory projects of ending racism, capitalism, settler colonialism, and heteropatriarchy. Explore how feminist theories and approaches in geography transformed prevailing political geographic questions and concerns, such as power, politics, territory, boundaries, sovereignty, and violence. What do feminist principles and debates over feminist politics and methods bring to (political) geography?
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe the major trajectories of feminist perspectives in (political) geography.
Audience: Both Grad & Undergrad

2. Gain the ability to discuss some of the relationships between feminist geography and broader feminist inquiry and politics.
Audience: Both Grad & Undergrad

3. Gain the ability to develop feminist questions for research and/or action relevant to your project.
Audience: Both Grad & Undergrad

4. Explain the relevance of feminist theory, methods, and/or practice to your project.
Audience: Both Grad & Undergrad

5. Explore how issues of difference and positionality inform your project and study of geography.
Audience: Both Grad & Undergrad

6. Articulate key debates over feminist (geographic) theory for your field and directions these debates suggest for your thesis or dissertation research.
Audience: Graduate

GEN&WS/GEOG 514 – FEMINIST GEOGRAPHY: METHODOLOGICAL APPROACHES
3 credits.

An introduction to foundational approaches to feminist qualitative research in human geography. Research is not separate from a social world that historically has been and continues to be shaped by (settler) colonial, racialized, gendered, sexualized, and class-inflected relations of power (among others). Research practices and "findings" have been and continue to be used to inform and rationalize relations of oppression, exploitation, and violence. For feminist researchers, then, questions of power, difference, and social change are central to how we design and conduct research. Engages in political-ethical discussions about the positionality and responsibilities of ourselves as researchers, and how our knowledge production can reproduce and challenge prevailing relations of power.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Discuss the interplay between epistemology and methodology.
Audience: Undergraduate

2. Explain clearly how their epistemological positions inform their methodological decisions.
Audience: Graduate

3. Discuss the political dynamics shaping knowledge production, and how feminist, decolonial, and anti-racist projects have reshaped these dynamics.
Audience: Both Grad & Undergrad

4. Discuss the historical constructions of 'the field,' and how feminist critiques and research practices challenge expectations regarding field work experiences.
Audience: Both Grad & Undergrad

5. Discuss how feminist research ethics extend researchers' ethical obligations of beneficence, respect for research subjects, and justice (Belmont Report).
Audience: Both Grad & Undergrad

6. Evaluate the virtues, dilemmas, and limitations of common qualitative methods.
Audience: Both Grad & Undergrad

7. Develop a compelling rationalization for research questions and methodologies (design) for your qualitative project.
Audience: Undergraduate

8. Articulate how feminist principles influence your research questions and methodologies.
Audience: Graduate

9. Explain how social positionality shapes the research process, and develop a practice of self-reflexivity.
Audience: Both Grad & Undergrad

GEN&WS/HISTORY 519 – SEXUALITY, MODERNITY AND SOCIAL CHANGE
3 credits.

A history of sexuality approach to a period of major social, economic, and political change in US history, 1880-1930; medical, legal, and popular discourses shaping urbanization, reform, nationalism and colonialism.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

GEN&WS 521 – SEX LIVES OF WOMEN
3 credits.

Examine women's sexuality through feminist social science perspectives. Critically engage with influential feminist theories, empirical research, and contemporary debates surrounding topics such as hookup culture, sexual pleasure and desire, the medicalization of women's sexuality, and neoliberal "choice" narratives. Connect scholarly work to real-world contexts - from social media trends and current events to broader policy issues affecting women's sexual lives.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe multiple perspectives for key debates about the forces that shape women's sexuality.
Audience: Both Grad & Undergrad

2. Evaluate scholarly theories and essays about women's sexuality and make connections to contemporary social conversations in the news and other media.
Audience: Both Grad & Undergrad

3. Develop evidence-based arguments and summaries about women's sexuality topics.
Audience: Both Grad & Undergrad

4. Discuss controversial topics and perspectives using constructive language and evidence-based reasoning.
Audience: Both Grad & Undergrad

5. Locate original scientific articles and integrate them into written and oral assignments.
Audience: Both Grad & Undergrad

6. Communicate complex arguments in writing about women's sexuality topics.
Audience: Graduate

GEN&WS/PSYCH 522 – PSYCHOLOGY OF WOMEN AND GENDER
3 credits.

Examination of theories and research on the psychology of women and gender. Explores topics such as sex bias in psychological research; psychological aspects of female sexuality and reproduction; gender-based violence; female achievement and power; lifestyle choices of women; women and mental health; and psychological research with transgender individuals.
Requisites: Sophomore standing, a course in PSYCH and (GEN&WS 102 or 103) or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Describe a variety of feminist perspectives on psychology and psychological research.
Audience: Both Grad & Undergrad

2. Analyze the ways in which theorists and researchers address issues of sexism and other forms of discrimination that affect people's psychological experiences.
Audience: Both Grad & Undergrad

3. Apply class content and knowledge by evaluating personal experiences and the world around you in line with theories and concepts learned in class.
Audience: Both Grad & Undergrad

4. Apply a global perspective to the study of psychology of gender and articulate how class topics and concepts operate across culture.
Audience: Both Grad & Undergrad

5. Summarize how the study of psychology of gender contributes to social justice.
Audience: Graduate

GEN&WS 523 – FRAMING FATNESS: GENDER, SIZE, CONSTRUCTING HEALTH
3 credits.

Explores various aspects of identity politics and body politics such as gender, race, ethnicity, sexuality, ability, and citizenship status as they relate to and intersect with body size and constructions of fatness. Situates how fatness has been conceptualized over time, the formation of the gendered body ideals, and the proliferation of obesity rhetoric. Investigates how fat individuals experience the social world, in particular related to arenas such as the American health care system, and other societal institutions such as education, social welfare, immigration, and media. Interrogates how the "obesity epidemic" came to be, how it is framed in the United States, and how it intersects with other systems like big pharma, the food industry, beauty industry, globalization, neoliberalism, and consumerism. Deploys a critical approach in understanding fatness and body size as dimensions of difference that inform experiences of privilege and oppression.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Critically analyze and provide concrete examples of how fatness has been socially constructed in various institutions such as healthcare, medicine, beauty, and media, and how the meanings of fatness have changed over time and across identities (gender, race, class, sexuality, ability, etc.)
Audience: Both Grad & Undergrad

2. Articulate various theoretical frameworks (fat studies, feminist theories, disability studies, queer theory, etc.) as they relate to fatness, embodiment, gender, and discrimination, and use them in application of concrete ideas
Audience: Both Grad & Undergrad

3. Think, observe, and write critically and analytically and engage thoughtfully in analytic (rather than simply opinionated!) discussions
Audience: Both Grad & Undergrad

4. Understand and engage in the process of conducting a literature review and complete a clear, well organized, and thoughtful academic paper or presentation that explores a particular area of scholarship related to fat embodiment
Audience: Undergraduate

5. Conduct a literature review and complete a clear, well organized, and thoughtful academic paper or presentation around their graduate research, at the intersection of their own disciplinary areas of interest and the course content
Audience: Graduate

GEN&WS 524 – RACE, GENDER, HEALTH, AND MEDICINE
3 credits.

Uses race and gender theoretical frameworks to understand peoples' experiences with health and medicine. Conceptualizes race and gender as social categories and applies these frameworks to how people experience health, wellness, and disease. Examines how healthcare and medicine are structured according to racialized and gendered frameworks. Surveys a wide range of issues including reproductive health, body size, mental health, COVID, among other topics. Uses an intersectional approach to analyzing key debates in scholarship on health and medicine.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand how the concepts "race" and "gender" are socially constructed and explore what this means for our understandings of health and disease.
Audience: Both Grad & Undergrad

2. Identify and describe how race and gender shape health outcomes and structures disparities.
Audience: Both Grad & Undergrad

3. Identify and describe how race and gender structure health institutions (e.g. hospitals, medical school, etc.).
Audience: Both Grad & Undergrad

4. Demonstrate understanding and engagement with course material and produce thoughtful and compelling arguments in assigned work.
Audience: Both Grad & Undergrad

5. Identify key theoretical frameworks concerning race, gender, health, and medicine and use these frameworks to conceptualize research and pedagogical projects.
Audience: Graduate

GEN&WS 525 – GENDER AND GLOBAL HEALTH IN CRITICAL PERSPECTIVE
3 credits.

Examines the contemporary global health project in historical and cultural context, highlighting some of the greatest sources of tension and struggle. Using a feminist lens and focusing on gender as key analytic category, explores the ways that the distribution of global wealth and power impacts health and well-being around the world. Explores social, demographic, political and economic determinants of global health, and the ways that these factors interconnect with biomedicine to create and affect health outcomes, both within and across countries. Drawing on critical theories, situates the study and practice of global health in an intersectional framework.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Critically analyze the intellectual history of the global health field, tracing its origins from colonial medicine through to the current day using a gendered lens
Audience: Both Grad & Undergrad

2. Appraise the ways that colonialism, scientific racism, misogyny, and other forms of structural exclusion shape the global health field and its objects/methods of study
Audience: Both Grad & Undergrad

3. Question the neutrality of quantitative global health metrics, and understand indicators as a contested form of knowledge production.
Audience: Both Grad & Undergrad

4. Describe several current global health issues related to gender in-depth, as well as their contexts
Audience: Both Grad & Undergrad

5. Synthesize information from multiple sources and present it both in oral and written formats.
Audience: Both Grad & Undergrad

6. Perform original global health research that integrates feminist theories with empirical public health approaches.
Audience: Graduate

7. Conduct advanced analysis of global health policies and programs using a critical lens.
Audience: Graduate

GEN&WS 527 – THE ENVIRONMENT OF THE WOMB: EPIGENETICS AND PARENT/CHILD HEALTH
3 credits.

Concentrating social and ecological environments as well as that of the body, focuses on the toxic effects of late industrialism, epigenetics and maternal/fetal health as well as destabilizing ideas about "normal" reproduction. Examine how the possibilities for expanding the scope from maternal/fetal health to "parent/child" health - where kinship is not strictly about biologic belonging or coming "straight from the womb," but also about love and a safe home or chosen family. Undergirding our analysis is an "eco-social" approach, guided by questions of what constitutes "health," access to living a healthy life - in a body and on a planet that feels safe to inhabit.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Increase knowledge of epigenetics and maternal/fetal as well as parent/child health.
Audience: Both Grad & Undergrad

2. Develop analytical thinking and improve written and spoken communication skills
Audience: Both Grad & Undergrad

3. Engage critical connections and construct ethical actions in the face of climate change, environmental racism, medical justice and planetary health

Audience: Both Grad & Undergrad

4. Demonstrate writing and analytical skills through a deeper engagement with the material and enriching their chosen field of study
Audience: Graduate

GEN&WS 528 – SEXUALITY AND SCIENCE
3 credits.

Explores scientific approaches to studying sexuality. Examines current biological and neuroscientific research about sexuality, as well as feminist scholarship on these topics and critical responses to this research. Topics cover the intersections between biology (e.g., hormones, anatomy, neural activity, psychophysiology, evolution, etc.), sexuality (e.g., desire, dysfunction, arousal, bisexuality, orgasm, same-sex sexuality, pleasure, etc.), and feminist/critical scholarship about this research (e.g., feminist science studies, queer theory, feminist psychology, medicalization, etc.).
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Natural Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe current biological, social, and feminist science research on sexuality, the research methods currently used to study sexuality, and the problematics of doing this research
Audience: Both Grad & Undergrad

2. Critically evaluate research on sexuality and science
Audience: Both Grad & Undergrad

3. Describe feminist science principles and how they can shape scientific methods and interpretations of data
Audience: Both Grad & Undergrad

4. Present scientific material on sexuality in concise, accessible ways
Audience: Both Grad & Undergrad

5. Identify primary scientific sources and summarize and interpret evidence from these sources
Audience: Both Grad & Undergrad

6. Support an argument about a sexuality topic in writing using scientific evidence from primary sources
Audience: Both Grad & Undergrad

7. Critically evaluate the impact of sexuality science on society
Audience: Both Grad & Undergrad

8. Use scientific theorizing about sexuality to help develop graduate level research including but not limited to thesis and dissertation research
Audience: Graduate

9. Formulate a novel or advanced argument about a sexuality topic in writing using scientific evidence from primary sources
Audience: Graduate

GEN&WS 529 – THE SCIENCE AND POLITICS OF REPRODUCTIVE HEALTH
3 credits.

Explores the contemporary science and politics of reproductive health in North America. Taught from a reproductive justice (RJ) perspective, a framework for analysis and action developed by Black women health organizers and scholars. Examines several aspects and applications of the reproductive justice framework itself; RJ approaches to pregnancy and birth; RJ as a diagnosis and refusal of eugenics; and RJ and abortion. Engages with case studies, scholarship, and theory from a variety of literatures relevant to public health: epidemiology, feminist and queer theory, critical race studies, gender/sexuality studies, activist and policy analyses, and historical and contemporary primary sources. Explores a variety of experiences and meanings of reproductive health and illness, as well as the relationships between health/disease and racism, poverty, sexism, hetero- and cis- normativity, colonization, incarceration, and environmental degradation.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Define and use a reproductive justice framework to analyze the power relations, historical factors, and current material realities that produce states of reproductive health and disease.
Audience: Both Grad & Undergrad

2. Understand how histories and ongoing realities of eugenics, racial, sexual, gender, economic, and colonial domination and resistance impact reproductive health
Audience: Both Grad & Undergrad

3. Understand historical and contemporary research in the fields of public health, epidemiology, medicine, and health policy, reading appreciatively as well as critically
Audience: Both Grad & Undergrad

4. Assess public health policies and programs aimed at improving reproductive health from a reproductive justice perspective
Audience: Both Grad & Undergrad

5. Carry out an independent analysis of a contemporary problem related to reproductive health, survey existing public health, medical, and social science literature, and produce a research project
Audience: Graduate

GEN&WS 530 – BIOLOGY AND GENDER
3 credits.

Examines the theories and methodologies of the relevant research areas in biology and animal behavior that underlie biological determinist theories of gender and gender differences, and explores alternative approaches, theoretical constructs and interpretations.
Requisites: Junior standing or GEN&WS 103
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Describe biological justifications of sexism.
Audience: Both Grad & Undergrad

2. Describe and critique existing scientific literature on the biology of sex and gender.
Audience: Both Grad & Undergrad

3. Describe how historically rooted sexism and bias can shape biological research on sex and gender.
Audience: Both Grad & Undergrad

4. Identify critical topics and methodologies for future biological research within a feminist framework.
Audience: Both Grad & Undergrad

5. Analyze materials from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

GEN&WS/HIST SCI/MED HIST 531 – WOMEN AND HEALTH IN AMERICAN HISTORY
3 credits.

Women as patients and as health professionals in America from the colonial period to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Summarize how and why women's experiences of health and illness have changed over time.
Audience: Both Grad & Undergrad

2. Recognize how and why experiences of health and illness vary among women.
Audience: Both Grad & Undergrad

3. Interrogate how historical, social, cultural, and political forces shape the experience of health and illness.
Audience: Both Grad & Undergrad

4. Determine the varied ways women have shaped the experience of health and illness as patients, activists, advocates, and health care workers.

Audience: Both Grad & Undergrad

5. Integrate historical research skills and learn to craft and develop arguments from primary sources.
Audience: Both Grad & Undergrad

6. Recognize and describe general trends in the history and the historiography of women's health.
Audience: Graduate

GEN&WS/HIST SCI/MED HIST 532 – THE HISTORY OF THE (AMERICAN) BODY
3 credits.

This course demonstrates that human bodies have social and cultural histories. It will highlight the social values placed on different bodies, the changing social expectations bodies create, and the role of science and medicine in creating the cultural meanings of bodies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify and summarize categories of embodied difference.
Audience: Both Grad & Undergrad

2. Analyze how embodied differences have shaped axes of power.
Audience: Both Grad & Undergrad

3. Examine how the experience of embodiment has shaped personal experience in the American past and present.
Audience: Both Grad & Undergrad

4. Integrate historical research skills and learn to craft and develop arguments from primary sources.
Audience: Both Grad & Undergrad

5. Apply historical understanding to current events focused on the body.
Audience: Both Grad & Undergrad

6. Recognize and describe general trends in the history and the historiography of the body.
Audience: Graduate

GEN&WS 533 – SPECIAL TOPICS IN GENDER AND BIOLOGY
3 credits.

Examination in depth of specific topics in the area of gender and biology. Critical feminist reading of scientific literature and exploration of relevant biomedical issues in social and cultural contexts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize how gender and biology may affect each other.
Audience: Both Grad & Undergrad

2. Recognize how gender and biology may impact health.
Audience: Both Grad & Undergrad

3. Communicate basic biological concepts.
Audience: Graduate

GEN&WS 534 – GENDER, SEXUALITY, AND REPRODUCTION: PUBLIC HEALTH PERSPECTIVES
3 credits.

Explores several theoretical lenses, disciplinary approaches, and substantive topical areas relating to reproductive and sexual health. Begin by investigating the development of "sexual health" as a phenomenon in public health research, policy, and programs looking back to feminist responses to population control policies of the 1970s. Covers substantive topical areas in the field (e.g., adolescent sexual development, contraception, and AIDS).
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify theoretical approaches and methodologies in the fields of Gender and Women's Studies and Public Health.
Audience: Both Grad & Undergrad

2. Analyze how gender, sexuality, and health are produced through historical, social, cultural, and political processes.
Audience: Both Grad & Undergrad

3. Identify and engage with interdisciplinary feminist critiques of the classic epidemiologic and medical research in the field of public health science.
Audience: Both Grad & Undergrad

4. Synthesize and apply literature to address public health policies and programs.
Audience: Both Grad & Undergrad

5. Create original arguments blending quantitative, qualitative and conceptual public health analysis.
Audience: Graduate

GEN&WS/INTL ST 535 – WOMEN'S GLOBAL HEALTH AND HUMAN RIGHTS
3 credits.

A human rights approach to global women's health to provide an overview of health issues within the context of a woman's life cycle. It will pay special attention to the socio-cultural and economic factors that play a role in determining women's access to quality basic health care.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Apply key Gender and Women's Studies frameworks and concepts to Global Health and Human Rights issues.
Audience: Both Grad & Undergrad

2. Identify the link between global women's health issues and local concerns.
Audience: Both Grad & Undergrad

3. Use critical thinking through reading, writing, and oral presentation skills.
Audience: Both Grad & Undergrad

4. Link theory with practice by applying understandings of social inequality on women's health at the local, national and transnational levels.

Audience: Both Grad & Undergrad

5. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS 536 — QUEERING SEXUALITY EDUCATION
3 credits.

Situates sexual health education in historical and contemporary context by tracing its discursive production and envisioning a queering of both content and practice. An examination of what might it mean to queer sex education and what would a queer sex education look like. Utilizing theoretical interventions from critical education studies, queer theory, and trans/gender studies, this course.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Discuss policies and practices of sexuality education.
Audience: Undergraduate

2. Articulate debates related to the implementation and content of sexuality education.
Audience: Undergraduate

3. Apply frameworks and concepts from feminist and queer theory and pedagogy to policies and practices of sexuality education.
Audience: Undergraduate

GEN&WS/HIST SCI 537 — CHILDBIRTH IN THE UNITED STATES
3 credits.

Using a reproductive justice framework, analyze contexts, experiences, practices, ideologies, and historiographies of childbirth in the United States from roughly the 17th century to the present, with the heaviest emphasis on the 20th and 21st century. Examines the ways that colonization, genocide, enslavement, racism, capitalism, heterosexism, patriarchy, and ableism have shaped all of these aspects of childbirth. Inquire how key movements and groups resisting some of these forms of oppression have had the power to reshape birth, as well as locating in birth a source of transformational power.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Explain of the framework of reproductive justice, and use it to analyze contemporary discourses, practices, and conditions of childbirth.
Audience: Undergraduate

2. Assess how racial, sexual, gender, economic, and colonial domination and resistance have shaped both reproductive realities and the ways that childbirth histories have been written and circulated.
Audience: Undergraduate

3. Identify and discuss shifting ideologies and practices of childbirth in the United States over time, and relate these to power.
Audience: Undergraduate

GEN&WS 538 – SPECIAL TOPICS IN LGBTQ+ HEALTH
3 credits.

Examination in depth of specific topics in the area of LGBTQ+ health. Critical reading of evidence-based literature and exploration of relevant health and biomedical LGBTQ+ issues in biological, social, economic and cultural contexts.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Understand and interpret unique health challenges faced by LGBTQ+ communities.
Audience: Undergraduate

2. Understand and interpret heteronormative assumptions in health and science research, and how those assumptions shape LGBTQ+ health experience and outcomes.
Audience: Undergraduate

3. Read, analyze, and critique evidence-based literature.
Audience: Undergraduate

4. Situate health concepts within larger social structures.
Audience: Undergraduate

GEN&WS 539 – SPECIAL TOPICS IN GENDER AND HEALTH
3 credits.

Examination in depth of specific topics in the area of gender and health. Exploration of relevant health issues in social, economic, and cultural contexts, including public health and policy, and how they relate to gender, race, sexuality, disability, and class.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize how gender and health are impacted by social, economic, and/or political influences.
Audience: Both Grad & Undergrad

2. Apply gender and health frameworks to research and writing.
Audience: Graduate

GEN&WS 546 – MEN OF COLOR MASCULINITIES
3 credits.

Critically examines important assumptions, questions, and debates regarding the relationship between feminist theory, pro-feminist theory, and the practice and performance of various men of color masculinities. Explores on-going conversations regarding whether masculinity is a gender role, a type of cultural expression, and/or a mode of sexuality. Examines key tensions related to men's status, or their lack thereof, as subjects of feminist theory; including whether persons who identify as men can be oppressed, if they can be feminists, and if so-called "masculinity studies" helps or hinders feminist theory and practice. Feminist theories and masculinities are equally attentive to the practice and performance of specific masculinities. Analyzes with equal attention to the practice and performance of specific masculinities, including, but not limited to, African American masculinities, immigrant masculinities, and Global South masculinities.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Utilize writing and analytical skills necessary to think critically about non-white masculinities in theory and practice.
Audience: Both Grad & Undergrad

2. Describe how feminist theorizing about masculinity shapes and is shaped by other hierarchies of power including race and sexuality.
Audience: Both Grad & Undergrad

3. Apply feminist theorizing about non-white masculinities to help develop graduate level research including but not limited to thesis and dissertation research.
Audience: Graduate

GEN&WS/AFROAMER/POLI SCI/SOC 547 – THEORIZING INTERSECTIONALITY
3 credits.

Examines assumptions and debates regarding how race, gender, sexuality, and other hierarchies of power intersect. Chief among these assumptions is that intersectional analysis is necessarily a Black feminist endeavor. Analyzes debates in intersectional theorizing including who qualifies as an intersectional subject, the merits of examining intersectional privilege, and whether intersectionality can be used for anti-feminist ends. Explores how scholars use intersectionality to understand advantage and disadvantage within specific contexts including the family, the state, and the labor force. Utilizes interdisciplinary and multimedia course materials including texts and films drawn from gender and women's studies, sociology, critical race theory, history, and political theory.
Requisites: Junior standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify the relationship between intersectionality and theorizing in gender and women's studies.
Audience: Both Grad & Undergrad

2. Examine how scholars use intersectionality to understand systemic advantage and/or disadvantage within specific spheres including the family, the state, and the labor force.
Audience: Both Grad & Undergrad

3. Explore key debates in the theoretical literature on intersectionality.
Audience: Both Grad & Undergrad

4. Identify key "gaps" and tensions in the theoretical literature on intersectionality and complete an original research project that critically interrogates one or more of these "gaps" and tensions.
Audience: Graduate

GEN&WS/PHILOS 556 – TOPICS IN FEMINISM AND PHILOSOPHY
3 credits.

Topics from historical and contemporary feminist thought; attention to one or more feminist philosophers, historical movements, philosophical frameworks, or sets of philosophically related issues.
Requisites: Junior standing or 3 Credits in PHILOS
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Think critically about arguments.
Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.
Audience: Undergraduate

3. Communicate precisely and concisely in both writing and speech.
Audience: Undergraduate

4. Express familiarity with central concepts in feminist philosophy.
Audience: Undergraduate

GEN&WS/ED POL 560 – GENDER AND EDUCATION
3 credits.

Examines the relationship between gender and education and explores notions of gender as socially constructed categories and identities. Identify the ways schools (re)produce and mediate gender identities and explore the experiences of students. Draws on critical and feminist perspectives to analyze the ways gender intersects with understandings of identity performance and expression such as masculinity and femininity, as well as at the intersection of race, ethnicity, class, and sexuality in schooling processes.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand the role schools and education play in enhancing or reproducing gender inequality
Audience: Both Grad & Undergrad

2. Explain theories on the social construction of gender and sexuality
Audience: Both Grad & Undergrad

3. Describe and reflect on the history of the gender equity movement in education
Audience: Both Grad & Undergrad

4. Read, discuss, and write about research on students with diverse gender and sexual identities
Audience: Both Grad & Undergrad

5. Develop analytical skills necessary to think about intersectional identities how they are tied to students' experiences in education
Audience: Both Grad & Undergrad

6. Explain and analyze pedagogical approaches and school policies' effects on learners of diverse gender and sexual identities
Audience: Both Grad & Undergrad

7. Analyze the role that educational research, policies and practices play in causing, ameliorating, or exacerbating gender inequities
Audience: Both Grad & Undergrad

8. Build the skills necessary to apply these concepts and approaches to our own final research project on a gender related topic
Audience: Both Grad & Undergrad

9. Read and evaluate scholarly research in the fields of education, sociology, feminist studies, anthropology, etc
Audience: Graduate

GEN&WS/AFROAMER 624 – AFRICAN AMERICAN WOMEN'S ACTIVISM (19TH & 20TH CENTURIES)
3 credits.

Examines Black women's struggles for racial justices; reconsiders conventional notions of leadership, politics and protest. Topics include abolitionism, anti-lynching campaigns, woman suffrage, labor movement, club movement, cultural expressions, civil rights protest, Black feminism/womanism, poverty and welfare rights, environmental racism, etc.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Analyze the real-world impact of some of the important 20th century attempts by African American women writers and scholars to construct different accounts of women's experience in the slave system and in early decades of freedom.
Audience: Both Grad & Undergrad

2. Differentiate and compare the varying impacts of fiction and biographical texts and historical works to African American women's activism.
Audience: Both Grad & Undergrad

3. Develop critical reading and writing skills about racial representation, resistance under repression, and the specifics of organizing principles of women's movements.
Audience: Both Grad & Undergrad

4. Develop a scholarly project through extensive archival research about African American Women's activism.
Audience: Graduate

GEN&WS/AFROAMER 625 – GENDER, RACE AND THE CIVIL RIGHTS MOVEMENT
3 credits.

This course focuses on the emerging field of gender studies in the scholarship on the post-World War II civil rights movement in the United States.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

GEN&WS 640 – CAPSTONE SEMINAR IN GENDER AND WOMEN'S STUDIES
3 credits.

This capstone synthesizing seminar for Gender and Women's Studies majors focuses on the major contributions of gender and women's studies scholarship, requires students to hone their interdisciplinary skills, and apply their feminist theory knowledge. It is expected that students have completed more than 50% of their GENWS coursework before enrolling. Process for enrollment permission will be shared by GWS advisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Synthesize, critique, and extend knowledge of the field of gender and women's studies through effective written and oral communication.
Audience: Undergraduate

2. Identify how studying gender and women's studies impacts future direction for scholarship, advocacy, and collaboration.
Audience: Undergraduate

3. Discuss topics such as disability, race, gender, class, sexuality, and difference with expert and general audiences.
Audience: Undergraduate

4. Imagine the infinite ways that concepts learned in gender and women's studies can be applied outside of the classroom.
Audience: Undergraduate

GEN&WS 642 – ADVANCED SEMINAR IN LGBT STUDIES (LGBT STUDIES CAPSTONE)
3 credits.

Capstone for LGBTQ+ Studies certificate; culminates certificate work through advanced interdisciplinary readings, analysis and discussion in LGBTQ+ Studies and completion of a research project. It is expected that students have completed more than 50% of their LGBTQ+ Studies coursework before enrolling. Process for enrollment permission will be shared by LGBTQ+ Studies advisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021

GEN&WS 660 – INTERNSHIP IN GENDER AND WOMEN'S STUDIES
3 credits.

Opportunities for learning and working in organizations in ways that connect coursework in gender and women's studies to specific and applied issues in community settings. Permission to enroll is granted from the instructor after an application process is completed the semester before the course is taught.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply knowledge of gender and women's studies to practical and professional experiences outside of the classroom.
Audience: Undergraduate

2. Develop a professional feminist network.
Audience: Undergraduate

3. Engage in feminist social change and social justice.
Audience: Undergraduate

4. Gain discipline specific, professional experiences and skills to further personal and professional goals.
Audience: Undergraduate

5. Further understanding of gender & women's studies application in professional settings and career development.
Audience: Undergraduate

GEN&WS/AFROAMER 677 – CRITICAL AND THEORETICAL PERSPECTIVES IN BLACK WOMEN'S WRITINGS
3 credits.

Analyses and interpretations of literary works by black women writers through historical, philosophical, political, feminist, and other contemporary critical methods.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify major literary forms and their functions in the history of black women's writing.
Audience: Both Grad & Undergrad

2. Describe the goals, challenges, and questions raised by the thematic and aesthetic choices of black women creators.
Audience: Both Grad & Undergrad

3. Describe the theoretical frameworks that black women use to make sense of their social position.
Audience: Both Grad & Undergrad

4. Describe the critical interventions black women intellectuals have made in traditional scholarly disciplines.
Audience: Both Grad & Undergrad

5. Develop a research project that contextualizes the frameworks Black women use to shape representations of race and gender across a broad range of literary texts and other forms of creative expression.
Audience: Graduate

GEN&WS 681 – SENIOR HONORS THESIS I
3 credits.

Research and preparation for completing the senior honors capstone experience carried out under the supervision of an advisor in the women's studies program.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025

GEN&WS 682 – SENIOR HONORS THESIS II
3 credits.

Completion of the senior honors capstone project begun in Gender and Women's Studies 681 carried out under the supervision of an advisor in the women's studies program.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

GEN&WS 691 – SENIOR THESIS I
2-3 credits.

Research and preparation for the writing of a senior thesis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GEN&WS 692 – SENIOR THESIS II
2-3 credits.

Senior thesis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GEN&WS 699 – DIRECTED STUDY
1-6 credits.

Graded on lettered basis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEN&WS 720 – SPECIAL TOPICS IN GENDER AND WOMEN'S STUDIES
1-3 credits.

Advanced level investigation of some specific topic in gender and women's studies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze course topics from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

2. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS/ENGL 737 — FEMINIST THEORY AND CRITICISM
3 credits.

Feminist theory, with an emphasis on literary and cultural theory and criticism in English.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Summarize research methods and theoretical frameworks used in feminist literary and cultural theory.
Audience: Graduate

2. Analyze literary and cultural production through a feminist lens.
Audience: Graduate

3. Apply feminist theoretical concepts and approaches to one's own interdisciplinary research topics.
Audience: Graduate

GEN&WS/CURRIC 760 — SEX/GENDER-RELATED ISSUES IN CURRICULUM AND INSTRUCTION
3 credits.

A poststructural feminist analysis of educational discourse and practice; examines selected sex/gender issues in curriculum and instruction; explores some implications for classroom teaching of the complex interrelationships between sex/gender, race, social class, sexuality, and ability/disability.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

GEN&WS 790 — RESEARCH & THESIS: MASTER'S AND PROFESSIONAL LEVEL
1-6 credits.

Research and thesis writing for students at the Master's and professional level.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2024

GEN&WS 799 — INDEPENDENT RESEARCH AT THE MASTER'S AND PROFESSIONAL LEVEL
1-3 credits.

Independent research for master's or professional level graduate students.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEN&WS 800 — RESEARCH METHODS IN GENDER & WOMEN'S STUDIES
3 credits.

Explores feminist approaches to methods in the social sciences, humanities, and health sciences, such as ethnography, interviews, statistics, focus groups, surveys, archival research, discourse analysis, and visual analysis. Applies transdisciplinary perspectives to consider work from a range of academic fields and topics in order to critique issues of epistemology, methodology, methods, interpretation, and writing.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Describe feminist conversations about epistemology (the study of knowledge – what it is, how we know); methodologies (how we go about producing new knowledges); methods (the actual tools we use to collect and analyze data) and the relationship between them.
Audience: Graduate

2. Identify historical and contemporary debates and tensions in conceptualizing, conducting, analyzing, and disseminating feminist research.
Audience: Graduate

3. Analyze research methods strategies and techniques through a feminist lens.
Audience: Graduate

4. Apply feminist methodologies to your own research projects and interests.
Audience: Graduate

GEN&WS/ED POL/PUB AFFR 805 — GENDER ISSUES IN INTERNATIONAL EDUCATIONAL POLICY
3 credits.

Exploration and analysis of recent debates related to gender issues in international educational policy, including the intersection of education and demographic processes, the play of history and culture, and the social construction of gender.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

GEN&WS 810 – GENDER AND WOMEN'S STUDIES: THE EMERGENCE AND TRANSFORMATION OF A FIELD
3 credits.

Provides an overview of the field of gender and women's studies. Surveys the origin of the field and traces its major transformations. Explores and analyzes historical and contemporary debates that have shaped and continue to shape the field. Interrogates the mission of gender and women's studies. Examines the processes and products of academic professionalization. Investigates the value of graduate training in gender and women's studies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and analyze major shifts in the history of Gender and Women's Studies
Audience: Graduate

2. Develop and demonstrate a point of view about the animating controversies within Gender and Women's Studies
Audience: Graduate

3. Research and summarize changes in Gender and Women's Studies scholarship
Audience: Graduate

4. Develop and deploy critical reading skills
Audience: Graduate

5. Develop and apply critical writing skills
Audience: Graduate

GEN&WS/JOURN 828 – GENDER AND SEXUALITY IN MASS COMMUNICATION
3 credits.

A scholarly theory overview on gender and sexuality in communication studies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Explain how cultural theorists have defined "gender," "sexuality," and "intersectionality."
Audience: Graduate

2. Analyze how gender and sexuality are represented in the mass media.
Audience: Graduate

3. Explain how gender and sexuality are relevant to media production, media consumption (media audiences), and media activism.
Audience: Graduate

4. Describe how gender and sexuality inform the creation of media publics.
Audience: Graduate

GEN&WS 830 – CONTEMPORARY THEORIZING IN GENDER AND WOMEN'S STUDIES
3 credits.

Examines assumptions and debates in contemporary theorizing about gender and women including what constitutes "good" gender and women studies' theorizing, how to recognize gender-based oppression when we see it, how gender, race, sexuality, and other hierarchies of power intersect, as well as the merits of transnational theorizing about gender and women. Explores whether gender and women's studies' theorizing is a form of activism, how to teach theory in gender and women's studies' classrooms, the value of cultivating distinct gender and women studies' methods, and other dimensions of putting gender and women's studies' theorizing into practice.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Interrogate contemporary debates regarding the causes and effects of gender-based experiences and oppression.
Audience: Graduate

2. Explore how race, class, and other intersecting hierarchies of power inform these causes and effects.
Audience: Graduate

3. Consider whether theorizing about gender and women is not only a scholarly enterprise but also as a professional, activist, and personal one.
Audience: Graduate

4. Build the skills and background that enable us to apply these theoretical frameworks and approaches to our own intellectual projects.
Audience: Graduate

GEN&WS 840 – PEDAGOGY IN GENDER AND WOMEN'S STUDIES
3 credits.

Provides an introduction to feminist pedagogy in Gender and Women's Studies, Focuses upon: (1) the historical importance of an explicit feminist pedagogy in the foundation of GWS, (2) the development of feminist pedagogical theory and (3) a hands-on experience with developing feminist pedagogical materials, classroom strategies and a teaching portfolio. Considers the ways that feminist pedagogical approaches reconsider and challenge aspects of traditional pedagogical practices and training. Engages the development of feminist pedagogical thought and interrogates the different intellectual traditions that have shaped debates and issues within feminist politics and practices.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand and apply a variety of pedagogical approaches to Gender and Women's Studies teaching practice and curriculum design.
Audience: Graduate

2. Design a teaching portfolio suited to their particular interests and knowledge.
Audience: Graduate

GEN&WS 860 – PROSEMINAR IN GENDER AND WOMEN'S STUDIES
2 credits.

Explores key dimensions of scholarly life, including conferences, finding mentors, and applying for grants, as well as professional options outside academia. Discusses professional development norms and expectations and key stages of a research career.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Foster ethical and professional conduct.
Audience: Graduate

2. Learn about a range of careers in academia and outside academia.
Audience: Graduate

3. Acquire an understanding of how to become a successful professional in the field of gender and women's studies through engaging one another, the faculty in the department, and outside speakers, as well as through readings and critical reflection through writing.
Audience: Graduate

GEN&WS 880 – PROSEMINAR: GRADUATE STUDY IN GENDER AND WOMEN'S STUDIES
3 credits.

Introduces new graduate students to the breadth of scholarship in Gender and Women's Studies. It also develops particular skills (critical reading, critical writing and basic research) important to graduate level scholarship.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022

GEN&WS/C&E SOC/SOC 904 – SOCIOLOGICAL PERSPECTIVES ON GENDER
3 credits.

Advanced topics in the analysis of gender relations in society.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEN&WS/ANTHRO 920 – ANTHROPOLOGY OF GENDER
3 credits.

Theoretical and ethnographic approaches to the anthropology of gender, focusing on current works. Topics include sexual inequality, research methods, gender and history, gender and ethnographic writing, cultural constructions of masculinity, sexuality, and gender studies and anthropological theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Summarize comprehensive understanding of gender relations, identities, and ideologies in cross-cultural and historical perspective across a wide range of human cultures.
Audience: Graduate

2. Describe the gendered and intersectional dimensions of knowledge production in the discipline of cultural anthropology and its relationship to the history of the discipline, the development of modernist social and cultural anthropology, and the historical and contemporary uses of the ethnographic method.
Audience: Graduate

3. Apply concepts of the intersections of gender, culture, race, class, ethnicity, and nationality to inform and enrich one's own interdisciplinary research topics.
Audience: Graduate

GEN&WS 925 – SEMINAR: TOPICS IN GENDER AND GLOBAL PERSPECTIVES/ISSUES
3 credits.

Research seminar on gender and global issues.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Analyze topics on gender and global issues from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

2. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS 930 – SEMINAR: TOPICS IN FEMINIST THEORY
3 credits.

Research seminar on feminist theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and apply feminist theory from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

2. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS/PSYCH 932 – PSYCHOLOGY OF WOMEN AND GENDER
3 credits.

Examines research and theory in psychology of women and gender. Topics include feminist approaches to research methods, psychological gender differences and similarities, women of color, mental health and feminist therapy, rape, sexual harassment, transgender issues and research, and public policy issues.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Understand psychological research and theories on women and gender, at a level of proficiency to be qualified to teach an undergraduate course on the psychology of women and gender, and/or begin to conduct psychological research on gender, and/or conduct more gender-sensitive therapy.
Audience: Graduate

2. Apply feminist approaches and critiques in psychology.
Audience: Graduate

3. Understand the enormous diversity among women and trans folks along dimensions of ethnicity, social class, and sexual orientation.
Audience: Graduate

GEN&WS/POLI SCI 933 – FEMINIST POLITICAL THEORY
3 credits.

Focuses on how specific schools of feminist thought redefine the political, spanning historical and contemporary feminist political theory.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Describe how contemporary feminist theorists understand "politics" including the meaning of political oppression and political resistance.
Audience: Graduate

2. Identify the key tensions and contradictions that undergird how contemporary feminist theorists understand political oppression and political resistance.
Audience: Graduate

3. Critically interrogate how these understandings shape and are shaped by racism, patriarchy, classism, and other hierarchies of power.
Audience: Graduate

4. Apply feminist political theorizing to their own, independent intellectual projects.
Audience: Graduate

GEN&WS/HISTORY 938 – HISTORY OF SEXUALITY
3 credits.

Using sexuality as a category of historical analysis, examines historiographical, methodological, and theoretical contributions to understanding all aspects of the past.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Demonstrate a deeper sense of the historiographic trajectory and transformations that have contributed to the historiography of gender and sexuality including queer, feminist and trans theories, and queer of color critique.
Audience: Graduate

2. Demonstrate skills of critical analysis using historiographic methods and insights.
Audience: Graduate

3. Utilize discernment of the epistemological foundations on which varied research rests.
Audience: Graduate

4. Demonstrate collaborative processes, including listening and respect for questions and differing perspectives.
Audience: Graduate

5. Deploy initiative and confidence in articulating your own research and its relation to scholarship.
Audience: Graduate

6. Develop appropriate proficiency with contextually appropriate vocabularies and textual production.
Audience: Graduate

7. Demonstrate creative synthesis and original expression.
Audience: Graduate

GEN&WS 950 – SEMINAR: TOPICS IN GENDER AND WOMEN'S STUDIES
3 credits.

Research seminar on specific topics in gender and women's studies.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze research topics from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

2. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS 960 – SEMINAR: TOPICS IN GENDER AND HEALTH
3 credits.

Research seminar on gender and health.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Analyze gender and health research from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

2. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS 970 – SEMINAR: TOPICS IN GENDER AND DISABILITY
3 credits.

Research seminar on gender and disability.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Analyze gender and disability studies research from an interdisciplinary perspective, using critical tools drawn from a variety of methodologies.
Audience: Graduate

2. Synthesize course content with your individual academic research and thesis interests.
Audience: Graduate

GEN&WS 990 – RESEARCH & THESIS
1-6 credits.

Independent research and writing to complete dissertation requirement
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEN&WS 999 – INDEPENDENT RESEARCH
1-3 credits.

Directed study projects for graduate students as arranged with a faculty member
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GENERAL BUSINESS (GEN BUS)

GEN BUS 106 – FOUNDATIONAL SKILLS FOR BUSINESS ANALYSIS
1 credit.

Build fundamental skills and processes to develop a strong foundation in business analysis utilizing Excel. Learn the fundamentals of data construction, manipulation, summarization, analysis and presentation.
Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Apply fundamental skills in structuring business information.
Audience: Undergraduate

2. Organize, search and analyze business data.
Audience: Undergraduate

3. Apply advanced skills in data summarization and analysis.
Audience: Undergraduate

4. Visualize and present information.
Audience: Undergraduate

5. Apply introductory programming skills.
Audience: Undergraduate

6. Explain recent developments in 'data informed' business problem solving.
Audience: Undergraduate

GEN BUS 107 – INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN BUSINESS
1 credit.

Introduction to the foundational concepts and applications of Artificial Intelligence (AI) in today's business world. Covers what AI is, how it works, and its growing impact on various business contexts. Topics include predictive AI, deep learning, generative AI, leveraging AI tools, and responsible AI.
Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain the basic principles of AI and machine learning.
Audience: Undergraduate

2. Describe how AI systems learn, process data, and make decisions.
Audience: Undergraduate

3. Discuss the application of AI in various business fields, and the resulting disruption.
Audience: Undergraduate

4. Articulate ethical considerations and challenges surrounding AI.
Audience: Undergraduate

5. Apply AI tools in both personal and professional settings to solve problems, meet user needs, and identify opportunities in business.
Audience: Undergraduate

GEN BUS 110 – PERSONAL AND PROFESSIONAL FOUNDATIONS IN BUSINESS
1 credit.

An introduction for new business students covering academic exploration and planning, career development, self-assessment for personal development, leadership, and diversity and inclusion.
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate a basic ability to self-assess and reflect on their personality, identities, strengths, values, and personal ethics.
Audience: Undergraduate

2. Explain the importance of continuous self-assessment as a method for improving approaches to work and interactions with others.
Audience: Undergraduate

3. Demonstrate the foundational understanding of leadership development as related to business now and in the future.
Audience: Undergraduate

4. Demonstrate the foundational understanding of career development as related to business.
Audience: Undergraduate

5. Explain the importance of leading ethically, inclusively, and authentically in individual and group settings.
Audience: Undergraduate

GEN BUS 112 – EXPLORING BUSINESS
1 credit.

Develop student success strategies, engage with a community of peers, professionals, faculty and staff, and explore the breadth of professional opportunities available to launch an inspiring and meaningful career.
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Critically reflect on improving study skills, career planning, and ethical perspectives to promote success in business.
Audience: Undergraduate

2. Demonstrate professional communications skills in written and spoken formats in individual and group settings.
Audience: Undergraduate

3. Identify business sectors, industries, and WSB majors that align with your desired future goals.
Audience: Undergraduate

GEN BUS 206 – BEGINNING DATA ANALYSIS FOR BUSINESS
3 credits.

Learn basic business statistical skills to comprehend business reports, and to calculate statistical findings from business data using Excel. Understand simple probability calculations and how to apply probability to specific business uncertainties. Build capability to use simple statistical models and tests to estimate business variables of interest, and learn about predictive relationships between variables. Become comfortable using Excel for data manipulation, data analytics, and data visualization. Apply statistical analysis to address business issues.
Requisites: MATH 112 and (GEN BUS 106 or concurrent enrollment)
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain important statistics commonly used in business
Audience: Undergraduate

2. Apply basic probability concepts and models to uncertainty in business contexts
Audience: Undergraduate

3. Use data to estimate unknown business variables, test hypotheses, and learn with simple regression
Audience: Undergraduate

4. Use Excel to analyze data, create visualizations, and answer business questions
Audience: Undergraduate

5. Create a basic business proposal using statistics and data analytics
Audience: Undergraduate

GEN BUS 207 – INTERMEDIATE DATA ANALYSIS FOR BUSINESS
3 credits.

Enables you to understand and apply useful approaches to analyzing and presenting data to support business decision making. Emphasis on applications of predictive and prescriptive analytics. Predictive approaches use historical data to infer relationships and forecast future outcomes. Prescriptive methods formulate decision models to identify choices that are optimal with respect to a desired, measurable outcome. Provides experience integrating diverse data sources, modelling uncertainty, and visualizing key insights.
Requisites: GEN BUS 206
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and communicate with data in business environments
Audience: Undergraduate

2. Implement and interpret output from common statistical methodologies
Audience: Undergraduate

3. Integrate data from multiple data sources
Audience: Undergraduate

4. Create compelling data visualizations
Audience: Undergraduate

5. Solve and interpret basic optimization and simulation models
Audience: Undergraduate

6. Integrate models of uncertainty into business decision-making
Audience: Undergraduate

GEN BUS 210 – ARTIFICIAL INTELLIGENCE ENABLED BUSINESS SOLUTIONS LAB
2 credits.

Address business problems utilizing Artificial Intelligence (AI) as both a simulated client and a practical tool. Gain essential skills in consulting, project management, and applied AI.
Requisites: (GEN BUS 107 and 306) or declared in undergraduate Business Exchange program
Repeatable for Credit: No
Learning Outcomes: 1. Apply consulting and project management frameworks to scope and deliver a simulated client engagement.
Audience: Undergraduate

2. Collaborate with clients and teammates to define problems, analyze data, and communicate actionable recommendations.
Audience: Undergraduate

3. Demonstrate professional readiness by navigating ambiguity, constraints, and client expectations in a realistic lab setting.
Audience: Undergraduate

4. Describe the fundamental structure, core tools, and common implementation challenges of digital solutions.
Audience: Undergraduate

5. Utilize AI tools to design, test, and refine prototype digital business solutions.
Audience: Undergraduate

GEN BUS/DS 240 – HUMAN-CENTERED DESIGN AND BUSINESS
2 credits.

Design thinking is an iterative problem-solving process geared toward producing innovative solutions for complex and persistent problems in various fields and organizations. Its process, culture, and value system from both design and business point of views will be covered: Empathetic understanding of the end users, problem definition rooted in systems thinking, ideation with a strong emphasis on creativity, visualization and prototyping, testing rooted in a set of research methods, and finally, the importance of iteration in bringing about innovative solutions. The path from project to market will also be explored, with an understanding of how one might balance desirability, feasibility and viability.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate the ability to understand and gain empathy into human (customer/consumer/user) experience of product, services and systems through systematic inquiries.
Audience: Undergraduate

2. Exhibit the ability to be creative, collaborative, and divergent thinkers who can generate and visually communicate multiple ideas.
Audience: Undergraduate

3. Demonstrate ability to iterate proposed solutions toward innovation.
Audience: Undergraduate

4. Explore questions around cultural and intellectual exchange between business and design such as “What can business learn from design, and vice versa?”, or “How might the incorporation of design thinking help human-centered business to grow and flourish?
Audience: Undergraduate

5. Illuminate and expand on existing touch points between design thinking and “business thinking”, including, but not limited to, marketing/new product design and development, entrepreneurship and venture creation, operations and new process design
Audience: Undergraduate

GEN BUS 250 – SUSTAINABLE CAPITALISM
2 credits.

Examination of how firms, government, and civil society interplay in free market capitalism to bring about not only prosperity and economic freedom but also economic inequality, environmental degradation, and a weakening of institutions. Application of this knowledge to how capitalism can be reimagined for free market economies and business to foster prosperous societies and planetary health.
Requisites: A A E 101 (or A A E 215 prior to Fall 2024), ECON 101, 111, or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how the interplay between firms, governments, and market systems shape economic, societal and environmental outcomes, as well as tradeoffs within.
Audience: Undergraduate

2. Explain varieties of capitalism across nations and compare with United States capitalism over time.
Audience: Undergraduate

3. Analyze the role of business, governments, and civil society in managing free markets to balance the wellbeing of firms with the wellbeing of society and the natural environment.
Audience: Undergraduate

GEN BUS 265 – THE BUSINESS OF HEALTH CARE
2 credits.

Covers the US health care sector, with an economic perspective and a focus on businesses providing health care and health care services. Understand and analyze the motives, incentives, and strategic interactions of patients, insurers, hospitals, providers such as doctors and nurses, and life sciences companies such as drug developers. Learn the major government policies and organizations influencing the health care sector.
Requisites: ECON 101 or ECON 111 or declared in undergraduate Business Exchange program
Repeatable for Credit: No
Learning Outcomes: 1. Identify the key players in the United States health care system and explain the relationship among them.
Audience: Undergraduate

2. Determine the implications of policy proposals or changes in the market landscape for key players in the health care sector.
Audience: Undergraduate

3. Analyze strategically whether the key players would pursue, or how they would respond to, changes in the market landscape.
Audience: Undergraduate

GEN BUS 301 – BUSINESS LAW
3 credits.

History of legal development, contracts, agency, sale of goods, insurance.
Requisites: None
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recognize the legal implications of transactions and events that impact the business environment.
Audience: Undergraduate

2. Describe the American legal system and how the American court system works.
Audience: Undergraduate

3. Apply the technical legal rules covered in the course regarding negligence, intellectual property, contract law, agency law, and employment law.
Audience: Undergraduate

4. Analyze and assess risks and opportunities inherent in business transactions and in everyday life.
Audience: Undergraduate

GEN BUS 306 – BUSINESS ANALYTICS I
3 credits.

Development of quantitative intuition through practical applications and use of analysis tools. Specifically, emphasis will be on how to manage, summarize, explore, and visualize databases. The essentials of probability will be introduced and applied to decision problems where there is uncertainty. Emphasis on hypothesis testing and regression analysis and include an introduction to simulation methods. Throughout, attention will be paid to effective communication of data analysis. The use of business cases will connect the course material to both real world settings and recent advances in data analysis, including big data and data mining.
Requisites: (GEN BUS 106 or concurrent enrollment) and (MATH 211, 217, or 221), or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop "statistical literacy," meaning that you can interpret statistics frequently used in current events, industry reports, and so on
Audience: Undergraduate

2. Distinguish between descriptive and inferential statistics, and apply skills such as data summarization, hypothesis testing, and regression analysis, using Excel
Audience: Undergraduate

3. Apply the core concepts of probability to decision-making under uncertainty, including an introduction to simulation
Audience: Undergraduate

4. Synthesize your knowledge with quantitative business cases
Audience: Undergraduate

5. Create effective communication of data analyses in written, visual, and/or oral formats
Audience: Undergraduate

GEN BUS 307 – BUSINESS ANALYTICS II
3 credits.

Emphasis on hands-on experience with many commonly used analytic methodologies using the modeling and optimization tools available on almost every professional desktop. The focus is predictive and prescriptive analytics. Predictive approaches use historical data to infer causal relationships and forecast future outcomes from a given action. Prescriptive methods take this a step further, helping managers formulate decision models that identify optimal actions given a set of circumstances.
Requisites: GEN BUS 106 and 306, or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain the principles of different regression techniques for different forms of data
Audience: Undergraduate

2. Discriminate between types of explanatory variables and ways to incorporate these variables in a statistical model
Audience: Undergraduate

3. Implement and interpret output from the most common statistical methodologies
Audience: Undergraduate

4. Recognize the structure of relational databases
Audience: Undergraduate

5. Construct basic optimization and simulation models
Audience: Undergraduate

6. Understand the collection, management, reasoning, and communication with data in corporate and other environments
Audience: Undergraduate

GEN BUS 308 – CLOUD ANALYTICS AND ARTIFICIAL INTELLIGENCE TOOLS FOR BUSINESS
2 credits.

Apply statistics and data literacy to business problems using popular analytics and artificial intelligence tools in the cloud.
Requisites: GEN BUS 307, 317, ECON 400, 410, or declared in undergraduate Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Build and share dashboards using data visualization tools.
Audience: Undergraduate

2. Utilize SQL to query cloud databases and warehouses.
Audience: Undergraduate

3. Build predictive models in the cloud.
Audience: Undergraduate

4. Extract insights and answer business questions utilizing generative AI in the cloud.
Audience: Undergraduate

GEN BUS 310 – FUNDAMENTALS OF ACCOUNTING AND FINANCE FOR NON-BUSINESS MAJORS
3 credits.

Part of a two course sequence introducing non-business students to basic concepts, practices and analytical methods that are part of the market enterprise system. This course is a basic overview on: accounting, finance, and business law.
Requisites: Sophomore standing or declared in the Business Exchange program
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate the application of fundamental business terminology and concepts in the disciplines of economics, business law, finance, and accounting to effectively communicate with professionals across a given business organization
Audience: Undergraduate

2. Explain the various reasoning businesses use to make decisions and the impact those decisions have on the firm and society
Audience: Undergraduate

3. Reflect on their assumptions and predispositions regarding the role of business in society
Audience: Undergraduate

4. Apply the common business processes and tools to develop professional, academic, and personal futures.
Audience: Undergraduate

GEN BUS 311 – FUNDAMENTALS OF MANAGEMENT AND MARKETING FOR NON-BUSINESS MAJORS
3 credits.

High-level introduction to concepts and practices in business. Overview of management, marketing, strategy, entrepreneurship, ethics, supply chain, and international business.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Summarize the business environment including core functions, participants, and the external forces that influence business activities such as globalization, diversity, business ethics, and corporate social responsibility
Audience: Undergraduate

2. Evaluate different types of business formations and create a business plan
Audience: Undergraduate

3. Describe and apply the role of marketing in business
Audience: Undergraduate

4. Analyze business strategies and management decisions in order to evaluate their impact on business performance
Audience: Undergraduate

GEN BUS 317 – MATHEMATICAL FOUNDATIONS OF BUSINESS ANALYTICS
3 credits.

Statistical inference and analyses based on models will be introduced and applied in a business context using a calculus-based focus. Topics covered include point estimation, confidence intervals, hypothesis testing, regression models, and time series models. Various methods for fitting a model to data will be explored, and uncertainty about parameter estimates will be quantified so decision makers have information about the quality of the estimates. Regression and time series models are commonly used in business analytics applications and will be used to analyze business data and make inferences and predictions.
Requisites: MATH 331, STAT/MATH 309, or 431
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply discrete and continuous probability distributions to data encountered in business applications and evaluate the quality of parameter estimates.
Audience: Undergraduate

2. Explain the basics of modeling using both regression and time series approaches.
Audience: Undergraduate

3. Recognize the assumptions and limitations of the methods utilized in this course to aid businesses in making decisions under uncertainty.
Audience: Undergraduate

4. Interpret statistical information for someone with a non/less technical background.
Audience: Undergraduate

5. Analyze business data and construct models using appropriate statistical software.
Audience: Undergraduate

6. Communicate and present the results of an analysis.
Audience: Undergraduate

GEN BUS/INTL BUS 320 – INTERCULTURAL COMMUNICATION IN BUSINESS
3 credits.

Develops awareness and knowledge of cultural influences on business. Focuses on various attitudes toward work, time, material possession, business, and the relationship of these attitudes to different social, religious, philosophical, and educational backgrounds of business people from cultures around the world.
Requisites: Sophomore standing or declared in the Business Exchange program
Course Designation: Core GenEd - Communication & Literacy
Repeatable for Credit: No
Last Taught: Spring 2026

GEN BUS/INTL BUS 340 – CULTURE AND COMMUNICATION IN WESTERN EUROPE
3 credits.

Learn how to adapt writing, speaking, and nonverbal behavior to effectively communicate in a Western European context (e.g. Germany, France, United Kingdom, Italy, and Spain). Examine issues such as cultural attitudes toward authority, time, gender, and race, as well as the religious and philosophical values that support those attitudes. Explore frameworks for understanding a national culture's influence on communication and learn how to apply that to practical use.
Requisites: None
Course Designation: Core GenEd - Communication & Literacy
Repeatable for Credit: No
Learning Outcomes: 1. Apply models of intercultural communication and situate countries in historical context to build Western European country-specific knowledge.
Audience: Undergraduate

2. Identify limitations of models of intercultural communications and apply intercultural competency and research skills to address them.
Audience: Undergraduate

3. Identify research and resources that enable continued learning about intercultural communications with West Europeans as new and unfamiliar situations arise.
Audience: Undergraduate

4. Demonstrate awareness of cultural values, norms, and biases.
Audience: Undergraduate

5. Apply intercultural competency skills and models to adapt communications in different situations.
Audience: Undergraduate

GEN BUS 360 – WORKPLACE WRITING AND COMMUNICATION
3 credits.

Develop and practice workplace communication skills: writing, speaking, and listening. A theoretical foundation provides a method of deep audience analysis; apply that analysis when producing a variety of written genres and when preparing content for formal presentations. Research communication and information sources specific to future careers. Strengthen information literacy by developing professional research skills and analyzing sources. Revise written work through a workshop process that requires giving, receiving, and implementing feedback.
Requisites: Satisfied Communications A; no concurrent enrollment with GEN BUS 110 or 120
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate active listening skills
Audience: Undergraduate

2. Develop a writing process that includes drafting, incorporating feedback, and self-evaluation to create effective documents in various genres
Audience: Undergraduate

3. Analyze audiences with attention to differences in backgrounds, values, viewpoints, and experiences in order to tailor communication to a variety of workplace audiences, genres, and situations
Audience: Undergraduate

4. Employ appropriate style and discipline-specific conventions in writing and speaking
Audience: Undergraduate

5. Identify and locate resources specific to the students' industry/discipline using the library system and internet
Audience: Undergraduate

6. Analyze information sources and communication skills that professionals use
Audience: Undergraduate

7. Evaluate sources for credibility and relevance; use evidence recognized as credible by the students' industry/discipline and cite it appropriately
Audience: Undergraduate

8. Provide constructive feedback on peers' work-in-progress and presentations
Audience: Undergraduate

9. Incorporate feedback and self-evaluation to improve presentations
Audience: Undergraduate

10. Demonstrate effective visual design strategies in documents and slide-decks
Audience: Undergraduate

GEN BUS 365 – CONTEMPORARY TOPICS
1-3 credits.

A course for the exploration of subject areas possibly to be introduced into the business curriculum.
Requisites: Sophomore standing or declared in undergraduate Business Exchange program
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GEN BUS 370 – CASE INTERVIEW ANALYSIS
1 credit.

Provides a fundamental understanding of how to prepare for a case interview, analyze problems based on limited information, consider alternatives to develop a solution and present the solution effectively.
Requisites: None
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Effectively implement a systematic approach to analyzing case problems.
Audience: Undergraduate

2. Identify types of case problems and match them with frameworks and analytical tools designed to inform those problems and structure recommended solutions.
Audience: Undergraduate

3. Apply relevant analytical tools to identify missing information needed to understand problems.
Audience: Undergraduate

4. Formulate probing questions to bring out critical facts and assumptions about problem contexts.
Audience: Undergraduate

5. Integrate available facts and data into the relevant analytical tools and frameworks to diagnose problems holistically.
Audience: Undergraduate

6. Concisely communicate the analysis of case problems along with actionable recommendations to address the situations.
Audience: Undergraduate

GEN BUS 399 – READING AND RESEARCH-BUSINESS RESEARCH
1-6 credits.

Individual work suited to the needs of undergraduate students may be arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEN BUS 410 – BUSINESS SOLUTIONS CAPSTONE
3 credits.

Apply strategic frameworks to company-sponsored projects in a capstone experience. Develop and utilize skills in problem analysis, project management, professional communication, and leadership. Emphasizes self-reflection and navigation of real-world ambiguity.
Requisites: GEN BUS 360 and (M H R 300, OTM 300, FINANCE/ ECON 300, and MARKETNG 300, or concurrent enrollment); not open to students with credit for GEN BUS 400
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze complex business problems using strategic frameworks.
Audience: Undergraduate

2. Develop and communicate actionable, evidence-based recommendations that address client needs and constraints.
Audience: Undergraduate

3. Collaborate and lead effectively within diverse teams to achieve project goals.
Audience: Undergraduate

4. Manage projects, balance scope, deadlines, and client needs.
Audience: Undergraduate

5. Adapt and reflect in response to ambiguity, uncertainty, and performance feedback to improve team and individual effectiveness.
Audience: Undergraduate

GEN BUS 450 – PROFESSIONAL EXPERIENCE IN BUSINESS
1 credit.

Internship which allows students to augment their business education and gain professional experience in their major through related work experience. Intended for undergraduates in the School of Business. Not available with firms who participate in the ACCT I S 600 internship. See listing on Accounting Dept. website.
Requisites: Consent of instructor
Course Designation: Workplace - Workplace Experience
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Complete projects and/or tasks that build upon knowledge and skills learned in the classroom.
Audience: Undergraduate

2. Acquire specific knowledge and skills that are relevant to the career pathway or industry.
Audience: Undergraduate

3. Apply knowledge gained through career experience to test and clarify career interests and goals.
Audience: Undergraduate

GEN BUS 451 – PROFESSIONAL EXPERIENCE IN BUSINESS-EXTENDED INTERNSHIP
1 credit.

Gain professional experience in a full-time practical internship. Enrollment limited to undergraduates in the School of Business.
Requisites: Consent of instructor
Course Designation: Workplace - Workplace Experience
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Complete projects and/or tasks that build upon knowledge and skills learned in the classroom.
Audience: Undergraduate

2. Acquire specific knowledge and skills that are relevant to the career pathway or industry.
Audience: Undergraduate

3. Apply knowledge gained through career experience to test and clarify career interests and goals.
Audience: Undergraduate

GEN BUS 656 – FOUNDATIONS OF STATISTICAL LEARNING FOR BUSINESS ANALYTICS
2-3 credits.

An introduction to predictive modeling for business applications beginning with some of the foundations. Leads to development of linear regression and classification models, and discussion of building models for prediction. Topics include selection, regularization, and the bias-variance tradeoff.
Requisites: GEN BUS 307, 317 704, 705, 881, ECON 400, 410, STAT/MATH 310, STAT 333, 340, or declared in the Business Exchange program
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Build (generalized) linear regression models for the purpose of prediction in business contexts, choosing from a variety of statistical learning techniques.
Audience: Undergraduate

2. Select predictive algorithms and features for machine learning models in business settings, taking into account the fundamental bias-variance tradeoff.
Audience: Undergraduate

3. Evaluate prediction accuracy of models for regression and classification problems for business applications.
Audience: Undergraduate

4. Communicate the advantages and disadvantages of different prediction approaches, and justify and explain their choices in the context of business problems.
Audience: Undergraduate

5. Interpret the prediction outcomes of a given model in a business context, and communicate the results to non-expert audiences.
Audience: Undergraduate

GEN BUS 657 – MACHINE LEARNING AND ARTIFICIAL INTELLIGENCE MODELS FOR BUSINESS ANALYTICS
2 credits.

An introduction to machine learning models for business applications. Builds on the predictive modeling basics by developing general algorithmic prediction models for supervised machine learning. Covers additive models, CARTs, bagging/boosting, deep learning approaches, and AI models. Discussion of unsupervised learning techniques, including clustering and anomaly detection.
Requisites: ACT SCI 640 or (GEN BUS 656 or concurrent enrollment)
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Build machine learning models for the purpose of prediction in business contexts, choosing from a variety of approaches.
Audience: Both Grad & Undergrad

2. Tune models to optimize predictive performance in business settings.
Audience: Both Grad & Undergrad

3. Evaluate and compare prediction accuracy of regression and classification models in business settings.
Audience: Both Grad & Undergrad

4. Decompose and demystify machine learning models that underpin AI-driven business solutions.
Audience: Both Grad & Undergrad

5. Identify more advanced literature on machine learning for business applications and be able to develop skills in self-study.
Audience: Graduate

GEN BUS 704 – DATA TO DECISIONS
2-3 credits.

Exploration of statistical inference and data analytics tools. Review of relevant foundations of statistics, machine learning and probability theory. Emphasis on applying the resulting concepts to canonical business examples, using both Excel and R.
Requisites: Declared in an MBA program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Read, clean, create new datasets
Audience: Graduate

2. Describe the resulting data by computing and interpreting summary statistics, and via visualization tools
Audience: Graduate

3. Describe uncertainty and risk using the language of probability theory
Audience: Graduate

4. Perform hypothesis tests common in business applications
Audience: Graduate

5. Perform Monte Carlo simulations
Audience: Graduate

6. Estimate cross-sectional and time-series models for forecasting purposes and select among competing models via cross-validation
Audience: Graduate

7. Apply machine learning methods in the context of simple examples
Audience: Graduate

GEN BUS 705 – STATISTICS AND PROGRAMMING FOR BUSINESS ANALYTICS
3 credits.

A compact primer in statistics and an introduction to programming as a foundation for data-driven business analyses. The first part covers elementary concepts such as random variables, probability distributions, estimation, and ordinary least-squares regression. In the second part, the course exposes students to Python and R programming, including numerical and statistical packages that are relevant for practical applications in business.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Derive measures related to the characteristics of probability functions such as moments, mean, variance, median,mode, and percentiles.
Audience: Graduate

2. Carry out an ordinary least-squares (OLS) regression and interpret the parameter estimates as well as predictions.
Audience: Graduate

3. Prepare, compile, and run basic computer programs in a variety of programming languages including C/C++,Java, Python, R, Stata, and VBA.

Audience: Graduate

4. Implement algorithms for business analytics problems in a structured fashion in Python and R.
Audience: Graduate

5. Pick suitable numerical functions from available packages, including quadrature (numerical integration), numerical solution of non-linear equations, optimization, and random-number generation, and use the functionality for business analyses.
Audience: Graduate

6. Run a Monte Carlo simulation using R and Python.
Audience: Graduate

GEN BUS 707 – FOUNDATIONS OF ARTIFICIAL INTELLIGENCE IN BUSINESS
2 credits.

A comprehensive introduction to the foundational concepts and applications of Artificial Intelligence (AI) in today's business environment. Explore what AI is, how it works, and its growing impact on business, society, and daily life.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the basic principles of AI and machine learning.
Audience: Graduate

2. Describe how AI systems learn, process data, and make decisions.
Audience: Graduate

3. Discuss the use of AI in various business fields, and the resulting disruptions.
Audience: Graduate

4. Articulate ethical considerations and challenges surrounding AI.
Audience: Graduate

5. Apply AI tools in personal and professional settings to solve problems, meet user needs, and identify opportunities in business.
Audience: Graduate

GEN BUS 708 – ARTIFICIAL INTELLIGENCE AND THE ENTERPRISE
2 credits.

A deep dive into the strategic, operational, organizational and cultural implications of applying Artificial Intelligence (AI) to today's business enterprise. Addresses the key dynamics required for individuals to provide leadership in AI within their organizations.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the business value chain involved in AI technology.
Audience: Graduate

2. Articulate the implications of AI technologies within business functions including customer engagement, operations and enterprise support services.
Audience: Graduate

3. Apply business strategy and economic frameworks to AI investment decisions.
Audience: Graduate

4. Assess the implications of AI on organizational design, culture and change management.
Audience: Graduate

5. Describe approaches to AI governance, including implementation and risk management.
Audience: Graduate

GEN BUS 709 – ARTIFICIAL INTELLIGENCE AND THE FUTURE OF MANAGEMENT
2 credits.

A comprehensive exploration of artificial intelligence (AI) and its profound implications for modern management, business strategy, innovations, and the future of work. Focuses on the AI-driven fundamental transformation of all aspects of business and management, including organizational structures, leadership, competition, governance, and decision making.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate a deep understanding of reimagined management practices in future of work and algorithmic management.
Audience: Graduate

2. Articulate how to compete with and against AI.
Audience: Graduate

3. Describe the evolving economics of AI and competitive consequences.
Audience: Graduate

4. Develop insights on the role of leaders in AI-driven organizational transformations.
Audience: Graduate

5. Describe the nature of future innovations driven by AI in various industries.
Audience: Graduate

6. Develop prescient insights on future advances in AI such as quantum computing and artificial general intelligence.
Audience: Graduate

GEN BUS 710 – ETHICS, INTEGRITY AND SOCIETY
1 credit.

This class is designed to prepare students for dealing with ethical challenges in the world outside academia. Focus is on the role of personal values in all types of decision making, from personal to professional.
Requisites: Declared in an MBA program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Assess and explain your personal ethical principles and values.
Audience: Graduate

2. Analyze ethical dilemmas using philosophical theories and frameworks.
Audience: Graduate

3. Effectively communicate and persuasively advocate for the ethicalness of a proposed decision or action.
Audience: Graduate

GEN BUS 713 – ROLE OF BUSINESS IN SOCIETY
2 credits.

Explores and implements the critical thinking, communication, and managerial skills necessary for developing ethical organizations.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop a deeper understanding of ethical dilemmas at work and your personal ethical beliefs.
Audience: Graduate

2. Use a systematic ethics decision-making framework to arrive at moral conclusions.
Audience: Graduate

3. Explain why firms should be ethical.
Audience: Graduate

4. Describe best practices for enhancing an organization's ethical performance.
Audience: Graduate

5. Benchmark and assess your organization's ethical performance.
Audience: Graduate

GEN BUS 714 – CORPORATE GOVERNANCE AND BOARD MEMBERSHIP
2-3 credits.

Explore the roles and responsibilities of Management and Directors in protecting the interests of Shareholders and other Stakeholders. Topics include: the history of Corporate Governance, Board of Directors responsibilities, Corporate Governance nuances outside of the U.S., and current trends in Corporate Governance. Analyze how an entity's Corporate Governance environment can either prevent or permit failures and have a direct impact on the success of an organization.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the roles management, shareholders and directors have in impacting the Corporate Governance environment.
Audience: Graduate

2. Articulate the responsibilities of a Board of Directors and its Committees as well as what makes for effective members.
Audience: Graduate

3. Evaluate the root cause of Corporate Governance breakdowns and apply this learning to new situations and environments.
Audience: Graduate

4. Compare public vs. private company Corporate Governance environments including the major influences on international Corporate Governance environments.
Audience: Graduate

5. Reflect on the current and future practices in Corporate Governance including those that address global environmental and social issues.
Audience: Graduate

GEN BUS 715 — CAREER MANAGEMENT
1 credit.

Development of strategic and tactical skills for career management in business contexts. Focus on aligning personal strengths, values, and goals with opportunities in the hiring landscape. Emphasis on creating effective professional branding materials, applying structured job search frameworks, and demonstrating readiness for networking and interviewing. Integrates career management models, marketplace insights, and applied reflection to support long-term career growth.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Research and evaluate the MBA recruiting landscape and job market dynamics.
Audience: Graduate

2. Demonstrate mastery of foundational job search skills, including networking, interviewing, and negotiation.
Audience: Graduate

3. Develop and demonstrate tools and narratives, including pitch, STAR stories, and value propositions that align with employer needs.
Audience: Graduate

GEN BUS 716 — APPLIED LEARNING AND INDUSTRY PATHWAYS
2 credits.

Examination and reflection of career pathways and current skills required across business disciplines. These include career frameworks, communication, and professional skills. Explore emerging and current business topics through applied learning experiences. Interact with leading business professionals, gaining exposure to various leadership and communication styles. Focus on enhancing leadership and communication effectiveness.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Explore industry pathways and job functions.
Audience: Graduate

2. Prepare and deliver a strategic business recommendation to address a current.opportunity or challenge
Audience: Graduate

3. Develop and demonstrate professional skills, including, but not limited to, formal and informal communication and enhanced networking with industry professionals.
Audience: Graduate

GEN BUS 720 — DATA VISUALIZATION FOR BUSINESS ANALYTICS
1-2 credits.

Introduce students to principles of data visualization and provide hands-on experience using data visualization tools and techniques for business applications. Develop proficiency in current visualization software tools, and leverage these tools for data exploration, insight into decision-making, and data presentation. Recommended for students to have general computing skills and familiarity with MS Word, MS Excel and MS PowerPoint; introductory-level exposure to coding in any language; some R experience; basic statistical literacy, equivalent to at least one semester of statistics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the information contained in data sets and make simple data corrections/transformations to prepare data for visualization tools
Audience: Graduate

2. Explore data sets visually to recognize patterns and relationships that provide insights and recommendations into business problems
Audience: Graduate

3. Identify design principles and best practices that make good visualizations effective and recognize challenges present in making data understandable across a range of audiences
Audience: Graduate

4. Construct effective static and interactive data visualizations for business decision-making and critique/improve existing ones
Audience: Graduate

5. Efficiently and persuasively communicate data insights through presentations, dashboards, and reports
Audience: Graduate

6. Explain history and current landscape of data visualization tools and their relative strengths and weaknesses
Audience: Graduate

7. Proficiently use Tableau visualization software
Audience: Graduate

8. Improve data presentation and visualizations in Excel and PowerPoint
Audience: Graduate

9. Make basic visualizations in R
Audience: Graduate

GEN BUS 725 – CONSULTING PRACTICUM
1 credit.

Solve critical business challenges. Drawing on and integrating the MBA core curriculum, conduct an in-depth analysis and make recommendations on a strategic problem posed by the sponsor company.
Requisites: GEN BUS 704, ACCT I S 700, FINANCE 700, M H R 706, MARKETNG 700, and OTM 700
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze a specific real-world organizational challenge and apply strategic thinking and decision-making skills to develop an effective and integrative business solution to that challenge.
Audience: Graduate

2. Apply creative and critical thinking to address ambiguity and uncertainty in the project.
Audience: Graduate

3. Communicate effectively with the client.
Audience: Graduate

4. Lead and function effectively in teams.
Audience: Graduate

5. Reflect on personal and professional development as business leaders for a global business environment.
Audience: Graduate

GEN BUS 730 – PRESCRIPTIVE MODELING AND OPTIMIZATION FOR BUSINESS ANALYTICS
2-3 credits.

Introduction to fundamentals of prescriptive analytics with emphasis on business applications. Modeling and mathematical optimization using Excel and Python. Designing, building, testing, and analyzing models, including sensitivity and risk analysis. Developing and solving optimization models, including linear, integer, and nonlinear problems. Course includes some principles of model-building and fundamentals of optimization theory but emphasizes practical application, hands-on learning, and problem-driven exercises.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify appropriate modeling, analysis, and optimization methodologies when faced with a concrete problem.
Audience: Graduate

2. Leverage spreadsheet software (e.g., Excel) and programming languages (e.g., Python) for modeling and optimization.
Audience: Graduate

3. Classify optimization problems (e.g., linear, integer, nonlinear) and explain the challenges of solving different problem types.
Audience: Graduate

4. Recognize classic optimization problems (e.g., knapsack, network, traveling salesman) and recall how to formulate them.
Audience: Graduate

5. Discuss fundamental optimization theoretical concepts and their practical implications.
Audience: Graduate

GEN BUS 732 – ECONOMICS FOR MANAGERS
2-3 credits.

Develops and applies economic principles to examine the effect of firm, industry, domestic and global market conditions on both day-to-day managerial decision-making and long-term strategic planning.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate the proper use of costs and benefits in decision making (e.g., concepts of marginal, average, sunk, short-run, long-run, nominal, real, opportunity costs)
Audience: Graduate

2. Use the supply and demand framework to evaluate a range of economic events and activities, such as prices, interest rates and exchange rates, and at the levels of the firm, industry, domestic, and global market
Audience: Graduate

3. Apply economic principles to analyze decisions (e.g., pricing strategies, consumption, protectionism, regulations) when decision makers (e.g., firms, government) have market power
Audience: Graduate

4. Apply the notion of equilibrium from game theory to study settings with multiple decision makers
Audience: Graduate

GEN BUS 740 – EXPERIMENTS AND CAUSAL METHODS FOR BUSINESS INSIGHTS
2-3 credits.

Provides an introduction to experimental and causal methods for driving business insights. Topics include: (1) Review and distinction of correlation vs. causation; (2) design and analysis of randomized-controlled experiments; and (3) identification of "natural experiments" in business data and corresponding empirical strategies.
Requisites: (GEN BUS 704 or 705) and (GEN BUS 720 or concurrent enrollment); or GEN BUS 881
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify statements and analytical reports that use correlational evidence to infer causal relationships.
Audience: Graduate

2. Articulate why correlation may not equate to causation due to factors such as selection bias.
Audience: Graduate

3. Explain the value of randomization for establishing causal effects through experiments.
Audience: Graduate

4. Demonstrate skills to develop a randomized experiment and analyze the results.
Audience: Graduate

5. Identify potential “natural experiments” that allow for causal analysis from existing data in business environments and be able to implement analytic approaches to analyzing data in these situations.
Audience: Graduate

GEN BUS 745 – BUSINESS PROCESS AUTOMATION USING ARTIFICIAL INTELLIGENCE
1-2 credits.

Explore the use of artificial intelligence (AI) for automating business processes, including common use cases and popular tools. Provides an opportunity to automate a variety of processes using this technology.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Communicate the fundamentals and common use cases for business process automation.
Audience: Graduate

2. Automate various business processes using artificial intelligence tools and best practices.
Audience: Graduate

3. Complete a project that involves identifying automation opportunities and implementing solutions.
Audience: Graduate

GEN BUS 746 – ADVANCED SQL & DATA WAREHOUSING
2 credits.

Provides an opportunity to construct advanced SQL statements (including joins, common table expressions, window functions, etc.) and build cloud data warehouses in a variety of software vendor platforms.
Requisites: (GEN BUS 760 and 780 or concurrent enrollment in GEN BUS 760 or 780), (GEN BUS 882 and 883), or member of Graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Construct advanced SQL statements – including joins, common table expressions, window functions, etc.
Audience: Graduate

2. Build cloud data warehouses in various software vendor platforms.
Audience: Graduate

3. Automate steps in a data pipeline within a cloud environment.
Audience: Graduate

4. Present self-designed technical solutions to address business problems.
Audience: Graduate

GEN BUS 750 – PROFESSIONAL EXPERIENCE IN BUSINESS
1 credit.

Internship which allows students to augment their business education and gain professional experience in their major through related work experience.
Requisites: Declared in an MBA program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Evaluate and apply an internship experience by illustrating the projects and responsibilities completed, key learnings, and conclusions from the work.
Audience: Graduate

2. Demonstrate successes, barriers, and learning opportunities through detailed examples, including future recommendation for subsequent students.
Audience: Graduate

GEN BUS 760 — DATA TECHNOLOGY FOR BUSINESS ANALYTICS
2-3 credits.

Focuses on various technologies needed to perform data analytics. Techniques of extracting structured and unstructured data from databases, applications, or social networks. Transform and combine data with other relevant information and load into targeted systems. How to use programming languages to collect data from the web and leverage libraries for other, more, advanced data analysis.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Extract data from both structured or unstructured databases
Audience: Graduate

2. Transform and combine data with other relevant information and load into targeted systems such as data warehouses, data marts or analytical applications
Audience: Graduate

3. Use Python to execute simple web scraping, mine data from social networks, and use the libraries for advanced data analysis beyond simple descriptive analytics
Audience: Graduate

4. Implement Online Analytical Processing (OLAP) and create multi-dimension data cubes
Audience: Graduate

5. Execute social mining techniques and create valuable information from text-mining for decision-making
Audience: Graduate

6. Discuss current landscape in data warehousing, big data, and other emerging topics
Audience: Graduate

GEN BUS 765 — CONTEMPORARY TOPICS
1-4 credits.

Exploration of advanced subject areas possibly to be introduced into the business curriculum.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2024

GEN BUS/ECON/STAT 775 — BAYESIAN STATISTICS
3 credits.

Introduces the theory, methods, and computational procedures needed to perform advanced Bayesian data analyses. Predictive and decision-theoretic motivations including subjective probability, risk, admissibility, and exchangeability; highlights key components of Bayesian analysis (i.e., prior, likelihood, posterior, and predictive distributions) within standard parametric models and advanced hierarchical and multilevel models; demonstrates the iterative process of model specification, implementation, criticism, and revision with applied case studies; implements computational techniques (e.g., Markov chain Monte Carlo, variational inference) in modern probabilistic programming languages.
Requisites: STAT 609, 610, 611, STAT/MATH 709, ECON 709, POLI SCI 818, or COMP SCI/E C E 761
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Justify the use of probability for coherent uncertainty quantification
Audience: Graduate

2. Explain how Bayesian updating occurs in conjugate models and hierarchical models
Audience: Graduate

3. Compare and contrast the conceptual and practical benefits and challenges of different posterior approximation strategies like MCMC and variational inference
Audience: Graduate

4. Implement posterior approximation algorithms in modern statistical and probabilistic programming languages such as R or Stan
Audience: Graduate

5. Specify, fit, criticize, and revise Bayesian models in practice
Audience: Graduate

GEN BUS 777 – CONSULTING SKILLS BOOTCAMP
1 credit.

An introduction to consulting tools and models.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply the SCQ framework to a business problem in a case format
Audience: Graduate

2. Develop a presentation using the answer-first principle and storyboarding techniques
Audience: Graduate

3. Prepare and deliver a persuasive presentation
Audience: Graduate

4. Reflect on your own progress and learning during the module and practice sharing constructive feedback
Audience: Graduate

GEN BUS 780 – CLOUD TECHNOLOGY FOR BUSINESS ANALYTICS
1 credit.

Provides an overview of cloud services that support business analytics. Load and analyze data, build and deploy machine learning models, and develop data pipelines through hands-on, in-class activities working in cloud environments.
Requisites: Graduate/professional standing or member of graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain, at a foundational level, the cloud landscape for business analytics – i.e. vendors, services, and costs.
Audience: Graduate

2. Demonstrate how to load and connect to data in the cloud for a variety of analytics.
Audience: Graduate

3. Setup and manage a cloud data warehouse.
Audience: Graduate

4. Build and deploy machine learning models in the cloud.
Audience: Graduate

5. Develop and test a data pipeline in the cloud.
Audience: Graduate

6. Analyze big data in a cloud environment.
Audience: Graduate

GEN BUS/ACCT I S/E P D 781 – FINANCIAL AND BUSINESS ACUMEN
1 credit.

This course is designed with a keen awareness for the needs of the non-financial student or professional. For this class, no previous financial training is required. The intent is to equip you with the essential concepts used to develop financial literacy. Content will cover basic financial terms and reports, analytical tools to help interpret financial data and using financial data in budgets and forecasts.
Requisites: Graduate/professional standing. Not open to students declared in an MBA program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Apply the language and foundational tools of finance to analyze how a company's economic activity is reflected in its financial reports
Audience: Graduate

2. Perform high-level financial statement analysis to identify important information from financial reports
Audience: Graduate

3. Apply basic financial concepts of valuation, capital budgeting, and financial decision making
Audience: Graduate

GEN BUS/E P D/MARKETNG 782 – MARKETING FOR NON-MARKETING PROFESSIONALS
1 credit.

Provides an overview of marketing's role within an organization, key elements of a marketing plan, and strategies for implementation. Covers buyer demographics, psychographics, and purchasing behavior, emphasizing how a thorough understanding of the customer informs the development of a coordinated marketing mix - product, price, promotion, and place - to outperform competitors while meeting profit goals. Highlights the importance of aligning all company functions to focus on the customer.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Explain how the marketing function impacts an organization's business operations
Audience: Graduate

2. Identify and use marketing terminology and concept
Audience: Graduate

3. Use both demographic and psychographic information to segment markets and select a target market
Audience: Graduate

4. Research and create a basic marketing plan that aligns customer expectations with organizational marketing activities and the organization's resources
Audience: Graduate

5. Coordinate consistency between product, price, promotion, and place (distribution)
Audience: Graduate

6. Relate and utilize the product life cycle concept to product and service offerings
Audience: Graduate

GEN BUS/E P D/M H R 783 – LEADING TEAMS
1 credit.

Develops knowledge and skills to continuously enhance both individual and team performance and productivity. Provides a foundation for leading teams effectively and improving team dynamics in a variety of organizational settings.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe team dynamics, roles, and expectations that influence a STEM team's performance
Audience: Graduate

2. Identify and effectively deploy specific team member strengths relevant for technical projects
Audience: Graduate

3. Plan, lead, and facilitate productive team meetings
Audience: Graduate

4. Identify and manage team conflict more effectively and constructively
Audience: Graduate

5. Assess and improve their current STEM team leadership methods and practices
Audience: Graduate

GEN BUS/E P D/OTM 784 – PROJECT MANAGEMENT ESSENTIALS
1 credit.

Techniques that will help to plan, execute, and deliver projects with desired scope on time and on budget. Learn to document clear project objectives and goals, accurately estimate project time and costs, schedule and allocate time-critical resources, and establish feedback systems for optimal project control.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2023
Learning Outcomes: 1. Plan and manage successful engineering projects using appropriate methods, tools, and techniques
Audience: Graduate

2. Estimate project costs, resources, and schedules
Audience: Graduate

3. Immediately apply project management principles regarding the five major project stages: initiate, plan, execute, control, and close
Audience: Graduate

4. Apply or customize the project management framework to engineering organizational needs
Audience: Graduate

5. Assess and improve the current project management system
Audience: Graduate

GEN BUS/E P D/M H R 785 – EFFECTIVE NEGOTIATION STRATEGIES
1 credit.

Improves students' negotiating skills, doing so by providing a theoretical underpinning that will help them to understand the sources of effective and ineffective approaches to negotiations.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe game theory and distinguish between distributive and integrative bargaining, recognizing appropriate tactics
Audience: Graduate

2. Identify bargaining styles, set goals, improve relationships, and leverage interests effectively
Audience: Graduate

3. Analyze ethical issues in negotiations and create mutual gain through value creation
Audience: Graduate

4. Demonstrate thorough preparation for negotiations, use individual and team techniques, and evaluate post-negotiation strengths and areas for improvement
Audience: Graduate

GEN BUS 790 – CONSULTING PROJECT CAPSTONE
1-3 credits.

Provides an opportunity to bring together all material learned throughout the program and synthesize it through an applied consulting project. Explore and apply concepts to a future career through: identifying and understanding the business challenge, applying analytic methods to discover insight(s) to answer the business challenge, developing recommendations based on the findings, and communicating those findings and recommendation(s).
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and explain the business challenge being examined.
Audience: Graduate

2. Successfully engage in a team and "client" project.
Audience: Graduate

3. Apply analytic methods to discover insights to answer the business challenge.
Audience: Graduate

4. Create recommendations based on the analysis findings.
Audience: Graduate

5. Successfully present those findings and recommendations to an audience of business professionals.
Audience: Graduate

GEN BUS 791 – EMBA CONSULTING PRACTICUM I
1 credit.

Provides an opportunity to bring together all of the material learned throughout the program and synthesize it through an applied consulting project. Allows exploration and application of concepts to a future career through identifying and understanding the business challenge and applying research and analysis to discover insight(s).
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Articulate the business challenge being examined and establish a work plan for addressing that business challenge.
Audience: Graduate

2. Conduct, compile and synthesize research relevant to the business challenge.
Audience: Graduate

3. Work with a team to complete tasks and reflect on your own progress and learning as part of that team.
Audience: Graduate

GEN BUS 792 – EMBA CONSULTING PRACTICUM II
1 credit.

Provides an opportunity to bring together all the material learned throughout the program and synthesize it through an applied consulting project. Allows exploration and application of concepts to a future career through developing recommendations based on the research and findings from the first course and communicating those findings and recommendation(s).
Requisites: GEN BUS 791
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Determine recommendations for action that will positively impact the sponsor organization.
Audience: Graduate

2. Practice sharing and receiving feedback to improve outcomes.
Audience: Graduate

3. Present findings and recommendations to the sponsor organization.
Audience: Graduate

4. Work with a team to complete tasks and reflect on your own progress and learning as part of that team.
Audience: Graduate

GEN BUS 799 – READING AND RESEARCH-BUSINESS RESEARCH
1-6 credits.

Individual work suited to the needs of graduate students may be arranged both during regular sessions and during the intersession periods.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022

GEN BUS 840 – CURRENT TOPICS IN BUSINESS ANALYTICS AND ARTIFICIAL INTELLIGENCE
1 credit.

Covers emerging and current topics in the industry through applied learning experiences - case studies, industry meetings, and exercises or workshops.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explore how organizations utilize analytics and artificial intelligence through interactions with industry professionals
Audience: Graduate

2. Articulate insights from interactions with industry professionals
Audience: Graduate

3. Articulate business recommendations based on in-class activities and analysis
Audience: Graduate

4. Demonstrate professional written and verbal communication skills
Audience: Graduate

5. Articulate current career aspirations
Audience: Graduate

GEN BUS 881 – BUSINESS STATISTICS USING PYTHON
2 credits.

A compact primer in statistics as a foundation for data-driven business analysis. A selection of concepts include probability, estimation, inference, correlation, and regression.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Calculate descriptive statistics and generate basic visualizations using Python.
Audience: Graduate

2. Explain and apply principles and rules of probability.
Audience: Graduate

3. Utilize inferential statistics and communicate the uncertainty in statistical estimates.
Audience: Graduate

4. Perform regression analysis, and distinguish between correlation and causation.
Audience: Graduate

GEN BUS 882 – DATA EXPLORATION WITH SQL AND ARTIFICIAL INTELLIGENCE (AI)
2 credits.

Exploration and analysis of data using SQL statements. Integration of artificial intelligence (AI) to generate SQL code. Development of skills to audit and troubleshoot AI-generated outputs for accuracy and reliability.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Construct a variety of SQL statements.
Audience: Graduate

2. Query and prepare data in response to business questions.
Audience: Graduate

3. Utilize AI to explore data, generate SQL, and audit the outputs.
Audience: Graduate

GEN BUS 883 – DATA VISUALIZATION & CLOUD TECHNOLOGIES
2 credits.

Provides experience in data visualization and cloud technologies to support business analytics. Create and share compelling data visualizations to enhance decision making. Use cloud technologies to build scalable data warehouses, analyze big data, and develop and deploy machine learning models.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program. Not open to students with credit for GEN BUS 720 or 780.
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Create compelling data visualizations and dashboards.
Audience: Graduate

2. Explain the cloud landscape for business analytics - i.e. vendors, services, and costs.
Audience: Graduate

3. Setup and manage a cloud data warehouse.
Audience: Graduate

4. Build and deploy a machine learning model in the cloud.
Audience: Graduate

5. Analyze big data in a cloud environment.
Audience: Graduate

GEN BUS 884 – APPLIED ANALYTICS - CASE STUDIES
2 credits.

Project-based applications of statistics, programming, data visualization, and database management.
Requisites: GEN BUS 881, 882, and 883
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop and communicate analytics solutions to business challenges and opportunities.
Audience: Graduate

2. Build a predictive model using the Python programming language.
Audience: Graduate

3. Create an executive dashboard to support business decision making.
Audience: Graduate

4. Use SQL to query a database in response to business questions.
Audience: Graduate

GEN BUS 885 – PYTHON FUNDAMENTALS
2 credits.

Explore the fundamentals of the Python programming language - such as data structures, functions, loops, and control flow - and utilize Python for data wrangling and analysis.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate the fundamentals of the Python programming language.
Audience: Graduate

2. Apply programming best practices; such as readability, simplicity, and reusability.
Audience: Graduate

3. Utilize Python for data manipulation and analysis
Audience: Graduate

GEN BUS 891 – TEXT MINING AND GENERATION FOR BUSINESS ANALYTICS
2 credits.

An introduction to text mining and generation for business applications. Includes an overview of text data and approaches for making text data useful for descriptive and predictive analytics. Also, includes key applications of natural language processing, such as chatbots and recommender systems.
Requisites: (GEN BUS 657, concurrent enrollment in GEN BUS 657, or GEN BUS 888 prior to Fall 2025) and GEN BUS 883
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Retrieve, assemble, and clean text data for use in analytics applications.
Audience: Graduate

2. Use text representation approaches, including bag of words, for visualizing text data.
Audience: Graduate

3. Build classification and regression models using features created from text data.
Audience: Graduate

4. Explain and experiment with text generation using artificial intelligence (AI).
Audience: Graduate

GEN BUS 893 – ANALYTICS CONSULTING PROJECT MANAGEMENT
2 credits.

Lays the foundation for understanding how to engage with external and internal clients and manage a business analytics consulting project. Covers consulting tools and models, as well as traditional and agile project management tools and concepts.
Requisites: Graduate/professional standing or declared in graduate Business Exchange program
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply a Situation-Complication-Question (SCQ) framework to a business problem
Audience: Graduate

2. Use answer-first principles and storyboarding techniques
Audience: Graduate

3. Scope a project and understand customer needs
Audience: Graduate

4. Manage time and resources in a project
Audience: Graduate

5. Differentiate between traditional and agile project management approaches
Audience: Graduate

GEN BUS 894 – PITFALLS, ETHICS, COMMUNICATION, AND LEADERSHIP IN BUSINESS ANALYTICS
2 credits.

Focus on applications, highlighting key practical issues in analytics projects. Discussion of pitfalls with regards to analytics applications, ethical aspects of analytics applications, as well as talent management and leadership in the context of analytics.
Requisites: GEN BUS 657 (or GEN BUS 888 prior to Fall 2025) and GEN BUS 883
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recognize potential warning signs of predictive models failing or overpromising.
Audience: Graduate

2. Engage with ethical issues concerning analytics applications regarding autonomy, beneficience, and fairness.
Audience: Graduate

3. Audit algorithms/predictions for potential biases.
Audience: Graduate

4. Make strategic choices among analytics projects, including effective management of human resources.
Audience: Graduate

GEN BUS 895 – MASTERS CAPSTONE IN BUSINESS ANALYTICS
2 credits.

Complete a team project as a capstone to graduate studies in business analytics. Use analytics and project management to develop a solution to a provided business case.
Requisites: GEN BUS 884 and 893
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop and communicate an analytics solution to a business challenge or opportunity.
Audience: Graduate

2. Apply principles of project management to a business analytics project.
Audience: Graduate

3. Reflect on a team-based analytics project and identify lessons learned.
Audience: Graduate

GEN BUS 933 – BEGINNING A RESEARCH CAREER IN BUSINESS
1 credit.

Required of incoming students in the Wisconsin School of Business PhD program. Students are often overwhelmed and do not absorb material when offered all at once before they begin their regular courses. This format offers fundamental content about conducting research and academic life that is not specific to a given department in the business school, but will help to frame and motivate other studies. This format gives students more time to absorb the content at a point when they can better see how it applies to them.
Requisites: Declared in Business PHD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize what is required to be a successful academic including tenure process, networking, preparation for the job market.
Audience: Graduate

2. Recognize how to chart a path through PhD program requirements.
Audience: Graduate

3. Describe the basics of how research is conducted including generating ideas, framing a contribution, responding to reviewer.
Audience: Graduate

4. Access critical research resources including time, data, and critical feedback.
Audience: Graduate

5. Demonstrate motivation to conduct publishable and impactful research.

Audience: Graduate

6. Develop social ties within and beyond the school to serve as a career springboard.
Audience: Graduate

GEN BUS 999 – READING AND RESEARCH-BUSINESS RESEARCH PHD
1-6 credits.

Individual work suited to the needs of Ph.D. students may be arranged.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2001

GENETIC COUNSELOR STUDIES (GENECSLR)

GENECSLR 713 – INTRODUCTORY PRACTICUM IN GENETIC COUNSELING
3 credits.

Provides opportunities to develop skills in interviewing, data collection, case management and counseling through didactic work and observational and experiential clinical activities. Activities include clinic observation according to a structured format, and fieldwork participation.
Requisites: Declared in Master of Genetic Counselor Studies
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles.
Audience: Graduate

2. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.
Audience: Graduate

3. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.
Audience: Graduate

4. Identify, assess, order, facilitate, and integrate genetic/genomic testing options in genetic counseling practice (including molecular and non-molecular testing that directly impacts assessment of inherited risk).
Audience: Graduate

5. Assess individuals' and their relatives' probability of conditions with a genetic component or carrier status based on their pedigree, test result(s), and other pertinent information.
Audience: Graduate

6. Demonstrate the skills necessary to successfully manage a genetic counseling case.
Audience: Graduate

7. Critically assess genetic/genomic, medical and social science literature and information.
Audience: Graduate

8. Establish a mutually agreed upon genetic counseling agenda with the client.
Audience: Graduate

9. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.
Audience: Graduate

10. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.
Audience: Graduate

11. Promote client-centered, informed, non-coercive and value-based decision-making
Audience: Graduate

12. Demonstrate how to adapt genetic counseling skills for varied service

GENECSLR 714 – INTRODUCTORY PRACTICUM IN GENETIC COUNSELING
3 credits.

Provides additional opportunities to develop and improve skills in interviewing, data collection, case management and counseling. Develop skills through didactic work and observational and experiential clinical activities. Activities include clinic observation according to a structured format, and fieldwork participation.
Requisites: GENECSLR 713
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles.
Audience: Graduate

2. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.
Audience: Graduate

3. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.
Audience: Graduate

4. Identify, assess, order, facilitate, and integrate genetic/genomic testing options in genetic counseling practice (including molecular and non-molecular testing that directly impacts assessment of inherited risk).
Audience: Graduate

5. Assess individuals' and their relatives' probability of conditions with a genetic component or carrier status based on their pedigree, test result(s), and other pertinent information.
Audience: Graduate

6. Demonstrate the skills necessary to success¬fully manage a genetic counseling case.
Audience: Graduate

7. Critically assess genetic/genomic, medical and social science literature and information.
Audience: Graduate

8. Establish a mutually agreed upon genetic counseling agenda with the client.
Audience: Graduate

9. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.
Audience: Graduate

10. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.
Audience: Graduate

11. Promote client-centered, informed, noncoercive and value-based decision-making.
Audience: Graduate

12. Demonstrate understanding of how to adapt genetic counseling skills for varied service delivery models.
Audience: Graduate

13. Apply genetic counseling skills in a culturally responsive and respectful

GENECSLR 721 – INTRODUCTION TO CLINICAL GENETICS
2 credits.

Integrative introduction to the mechanisms of clinical genetic disease at the molecular, individual and population level.
Requisites: Declared in Master of Genetic Counselor Studies
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain mechanisms of genetic disease and how they result in genetic disorders using clinical examples.
Audience: Graduate

2. Assess available genetic testing and screening technologies; identify the most appropriate method to detect various etiologies of genetic disease.
Audience: Graduate

3. Calculate and assess risk for a patient, family members and population.
Audience: Graduate

4. Identify the benefits and limitations of a molecular diagnosis and result.
Audience: Graduate

5. Relate the mechanisms of gene therapies and/or treatments to the mechanisms of the genetic disorder(s) it addresses.
Audience: Graduate

6. Apply and adapt course information for use in a clinical setting, appreciating the familial and psychosocial implications of genetic disorders.
Audience: Graduate

GENECSLR 724 – CANCER GENETICS RISK ASSESSMENT AND COUNSELING
2 credits.

Provides a background in cancer genetics from a medical, biological, and clinical perspective. Includes: general principles and topics in oncology; familial cancers and cancer syndromes; and management, counseling, social, ethical, and legal issues.
Requisites: GENECSLR 721
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize family histories suggestive of sporadic, multifactorial, and hereditary cancer
Audience: Graduate

2. Demonstrate knowledge of all major inherited cancer susceptibility syndromes and genes, both moderate risk and high risk
Audience: Graduate

3. Demonstrate the ability to assess cancer risk based on personal and family history
Audience: Graduate

4. Identify individuals and families meeting guidelines for cancer susceptibility gene testing
Audience: Graduate

5. Interpret cancer genetic test results in the context of a patient's personal and/or family history
Audience: Graduate

GENECSLR 731 – ADVANCED CLINICAL GENETICS CONCEPTS
3 credits.

An advanced course covering clinical genetic concepts including phenotype, genetic mechanisms, approach to diagnosis (medical, clinical and genetic testing protocols), and natural history (including management approaches).
Requisites: GENECSLR 721
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss/explain the history and basic principles of clinical genetics including evolution of clinical genetics and history of eugenics, comparison of normal and abnormal patterns of growth, and patterns and mechanism of inheritance (Mendelian and non-Mendelian)
Audience: Graduate

2. Describe the phenotype, genetic mechanisms, approach to diagnosis (medical, clinical and genetic testing protocols), and natural history (including management approaches) for genetic disorders.
Audience: Graduate

3. Teach clinical genetic concepts to peers including, writing learning objectives and assessment questions.
Audience: Graduate

GENECSLR 737 – CONTEMPORARY PROFESSIONAL ISSUES IN GENETICS COUNSELING
1 credit.

A series of selected basic issues and topics that are core curricular requirements specific to genetics counseling.
Requisites: Declared in Master of Genetic Counselor Studies
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 4 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles
Audience: Graduate

2. Integrate knowledge of psychological aspects of conditions with a genetic component to promote client well-being
Audience: Graduate

3. Critically assess genetic/genomic, medical and social science literature and information
Audience: Graduate

4. Promote client-centered, informed, non-coercive and value-based decision-making
Audience: Graduate

5. Adapt genetic counseling skills for varied service delivery models
Audience: Graduate

6. Apply genetic counseling skills in a culturally responsive and respectful manner to all clients
Audience: Graduate

7. Effectively give a presentation on genetics, genomics and genetic counseling issues.
Audience: Graduate

8. Act in accordance with the ethical, legal and philosophical principles and values of the genetic counseling profession and the policies of one's institution or organization
Audience: Graduate

9. Demonstrate understanding of the research process
Audience: Graduate

10. Advocate for individuals, families, communities and the genetic counseling profession
Audience: Graduate

11. Demonstrate a self-reflective, evidence-based and current approach to genetic counseling practice.
Audience: Graduate

GENECSLR 739 – RESEARCH STRATEGIES AND ANALYSIS IN CLINICAL GENETICS
1 credit.

Introduction to a variety of tools and resources commonly used in clinical genetics. Learn to critique these resources and start thinking about developing their own research projects. Emphasizes developing oral presentation skills through a variety of student presentations.
Requisites: Declared in Master of Genetic Counselor Studies
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and critique a variety of sources of information applicable to clinical genetics/genetic counseling.
Audience: Graduate

2. Demonstrate understanding of the research process.
Audience: Graduate

3. Develop oral communication skills allowing for communication of complex information to a variety of audiences.
Audience: Graduate

4. Apply content in a meaningful way to you and your practice as a genetic counselor.
Audience: Graduate

5. Develop a foundation and skills for lifelong learning.
Audience: Graduate

GENECSLR 740 – LABORATORY GENETICS AND GENOMICS FOR THE GENETIC COUNSELOR
2 credits.

Introduction to clinical laboratory genetics with a particular focus on the relevance of human cytogenetics and molecular genetics to the practice of medical genetics. Covers the fundamental principles of human cytogenetic and molecular genetics including human chromosome structure, function, cytogenetic and molecular nomenclature, and current clinical laboratory testing methods relevant to medical genetic professionals. Apply cytogenetic and molecular genetic understanding to clinical scenarios to help diagnosis and manage individuals with genetic disease.
Requisites: GENECSLR 721
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Distinguish between different types of genomic variants, both molecular and cytogenetic.
Audience: Graduate

2. Compare and contrast currently available genomic testing methods and their ability to detect genetic variation.
Audience: Graduate

3. Illustrate how different genomic variants can lead to human disease.
Audience: Graduate

4. Construct appropriate testing strategies for a variety of clinical scenarios.
Audience: Graduate

5. Analyze genetic test results and interpret their clinical significance.
Audience: Graduate

GENECSLR 741 – INTRODUCTION TO GENETIC COUNSELING
1 credit.

Emphasis will be on the tasks necessary to complete a genetic counseling session including, contracting/goal setting, history gathering, education, psychosocial assessment and support, clinical documentation and session management.
Requisites: Declared in Master of Genetic Counselor Studies
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.
Audience: Graduate

2. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.
Audience: Graduate

3. Demonstrate the skills necessary to successfully manage a genetic counseling case.
Audience: Graduate

4. Establish a mutually agreed upon genetic counseling agenda with the client.
Audience: Graduate

5. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.
Audience: Graduate

6. Apply genetic counseling skills in a culturally responsive and respectful manner to all clients.
Audience: Graduate

7. Educate clients about a wide range of genetics and genomics information based on their needs, their characteristics, and the circumstances of the encounter.
Audience: Graduate

8. Write concise and understandable clinical and scientific information for audiences of varying educational backgrounds.
Audience: Graduate

9. Demonstrate a self-reflective, evidenced-based, and current approach to genetic counseling practice.
Audience: Graduate

GENECSLR 742 – CLINICAL EMBRYOLOGY AND PRENATAL GENETICS
1 credit.

Review human development (normal and abnormal) and the influence of genetic disorders and teratogens, common indications for prenatal genetic counseling as well as available prenatal diagnosis and screening techniques. Prepares the genetic counseling student for the prenatal clinical practicum.
Requisites: GENECSLR 721
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe normal human embryological and fetal development.
Audience: Graduate

2. Describe the relationship between genetic disease and teratogens with abnormal embryologic and fetal development.
Audience: Graduate

3. Compare benefits and risks of available testing and screening strategies used to assess for birth defects and genetic disease.
Audience: Graduate

4. Discuss factors that influence patients' perception about information related to their child/baby/pregnancy presented during prenatal genetic counseling.
Audience: Graduate

5. Identify appropriate patient-centered prenatal resources about genetic diseases, birth defects and teratogens.
Audience: Graduate

GENECSLR 743 – ADVANCED INTERVIEWING AND COUNSELING FOR THE GC I
1 credit.

Advanced topics in clinical communication skills for the genetic counselor. Emphasis on different counseling strategies and approaches including counselor self-reference, facilitating family communication, shared decision-making, crisis counseling and, applying techniques from select counseling models to GC practice (e.g., cognitive behavioral therapy, solution-focused therapy).
Requisites: GENECSLR 741
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.
Audience: Graduate

2. Promote client-centered, informed, non-coercive and value-based decision-making.
Audience: Graduate

3. Adapt genetic counseling skills for varied service delivery models.
Audience: Graduate

4. Apply genetic counseling skills in a culturally responsive and respectful manner
Audience: Graduate

5. Effectively give a presentation on genetic counseling issues.
Audience: Graduate

GENECSLR 744 – APPLICATIONS OF BIOCHEMICAL GENETICS FOR GENETIC COUNSELORS
2 credits.

Comprehensive overview of clinical biochemical genetics through a systematic review of classic and rare inborn errors of metabolism (IEM). Psychosocial issues are discussed as related to care of patients, and their families, with metabolic disorders.
Requisites: Declared in Master of Genetic Counselor Studies
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop a framework for understanding the natural history, disease mechanism, inheritance, testing sequence and therapies for specific biochemical genetic diseases.
Audience: Graduate

2. Explain newborn screening, including the historical perspective, testing methodologies used and ethical considerations.
Audience: Graduate

3. Describe the role of the genetic counselor as part of a multidisciplinary Biochemical Genetics Clinic
Audience: Graduate

GENECSLR 745 – SEMINAR IN MEDICAL GENETIC COUNSELING RESEARCH
1 credit.

Practice qualitative and quantitative research methods in genetic counseling. Develop research question, prepare research proposal including internal review board application.
Requisites: GENECSLR 739
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe qualitative and quantitative research methods used in genetic counseling
Audience: Graduate

2. Explain the ARROW IRB proposal process
Audience: Graduate

3. Identify research questions relevant to the discipline of genetic counseling
Audience: Graduate

GENECSLR 748 – SPECIAL TOPICS IN GENETIC COUNSELING
1 credit.

Advanced topics in the discipline of genetic counseling. Emphasis will be on advanced practice topics including setting boundaries, delivering life altering news, developing a socially responsible practice, moving from a novice to master counselor, and the job search.
Requisites: GENECSLR 743
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify how the genetic counselor's personal cultural characteristics and biases may impact encounters and use this knowledge to maintain effective client-focused services.
Audience: Graduate

2. Recognize the potential tension between the values of clients, families, communities and the genetic counseling profession.
Audience: Graduate

3. Demonstrate knowledge of psychological defenses, family dynamics, family systems theory, coping models, the grief process, and reactions to illness.
Audience: Graduate

4. Maintain professional boundaries by ensuring directive statements, self-disclosure, and self-involving responses are in the best interest of the client. Recognize and respond to client-counselor relationship dynamics, such as transference and countertransference, which may affect the genetic counseling interaction.
Audience: Graduate

GENECSLR 813 – ADVANCED PRACTICUM IN GENETICS COUNSELING
4-5 credits.

Advanced practicum experience for second year genetic counseling students, consisting of participatory fieldwork experiences in a diversity of clinic specialties and service delivery methods.
Requisites: GENECSLR 714
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles.
Audience: Graduate

2. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.
Audience: Graduate

3. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.
Audience: Graduate

4. Identify, assess, order, facilitate, and integrate genetic/genomic testing options in genetic counseling practice.
Audience: Graduate

5. Assess individuals and their relatives probability of conditions with a genetic component or carrier status based on their pedigree, test result(s), and other pertinent information.
Audience: Graduate

6. Demonstrate the skills necessary to successfullymanage a genetic counseling case.
Audience: Graduate

7. Critically assess genetic/genomic, medical and social science literature and information.
Audience: Graduate

8. Establish a mutually agreed upon genetic counseling agenda with the client.
Audience: Graduate

9. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.
Audience: Graduate

10. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.
Audience: Graduate

11. Promote client-centered, informed, non-coercive and value-based decision-making.
Audience: Graduate

12. Adapt genetic counseling skills for varied service delivery models.
Audience: Graduate

13. Apply genetic counseling skills in a culturally responsive and respectful manner to all clients.
Audience: Graduate

14. Effectively educate clients about a wide range of genetics and

GENECSLR 814 – ADVANCED PRACTICUM IN GENETICS COUNSELING
4-5 credits.

Advanced practicum experience consisting of participatory fieldwork experiences in a diversity of clinic specialties and service delivery methods.
Requisites: GENECSLR 813
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate and utilize a depth and breadth of understanding and knowledge of genetics and genomics core concepts and principles.
Audience: Graduate

2. Integrate knowledge of psychosocial aspects of conditions with a genetic component to promote client well-being.
Audience: Graduate

3. Construct relevant, targeted and comprehensive personal and family histories and pedigrees.
Audience: Graduate

4. Identify, assess, order, facilitate, and integrate genetic/genomic testing options in genetic counseling practice (including molecular and non-molecular testing that directly impacts assessment of inherited risk).
Audience: Graduate

5. Assess individuals' and their relatives' probability of conditions with a genetic component or carrier status based on their pedigree, test result(s), and other pertinent information.
Audience: Graduate

6. Demonstrate the skills necessary to successfully manage a genetic counseling case.
Audience: Graduate

7. Critically assess genetic/genomic, medical and social science literature and information.
Audience: Graduate

8. Establish a mutually agreed upon genetic counseling agenda with the client.
Audience: Graduate

9. Employ active listening and interviewing skills to identify, assess, and empathically respond to stated and emerging concerns.
Audience: Graduate

10. Use a range of genetic counseling skills and models to facilitate informed decision-making and adaptation to genetic risks or conditions.
Audience: Graduate

11. Promote client-centered, informed, noncoercive and value-based decision-making.
Audience: Graduate

12. Demonstrate how to adapt genetic counseling skills for varied service delivery models.
Audience: Graduate

13. Apply genetic counseling skills in a culturally responsive and respectful manner to all clients.
Audience: Graduate

GENECSLR 990 – RESEARCH IN GENETIC COUNSELING
1-8 credits.

Research and/or scholarly work (e.g. quality improvement, clinical case reports) supervised by faculty and/or staff member with appropriate content expertise and/or experience in research mentorship.
Requisites: GENECSLR 739 and 745
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Conduct research projects using a variety of approaches under the guidance of the primary mentor
Audience: Graduate

2. Think critically and independently to address research challenges
Audience: Graduate

3. Exhibit and foster professional and ethical conduct in research
Audience: Graduate

4. Collaborate with other investigators
Audience: Graduate

GENETICS (GENETICS)

GENETICS 133 – GENETICS IN THE NEWS
3 credits.

The science of genetics is at the heart of many issues facing our society, and as such, genetics is often in the news. Explores the underlying genetics and methodologies to gain a deeper understanding of the science behind the headlines so that we can make more informed decisions as citizens, and you can be part of a movement to help educate those around you.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the methodologies used in genetics to gain a deeper understanding of the science behind the headlines
Audience: Undergraduate

2. Apply foundational scientific knowledge to be informed, versed and up-to-date on current genetic topics
Audience: Undergraduate

3. Critically evaluate genetics in the news for credibility, validity. and merit
Audience: Undergraduate

4. Discuss how genetics is relevant to our everyday lives
Audience: Undergraduate

5. Discuss ethical concerns related to genetics and the applications of biotechnology
Audience: Undergraduate

6. Describe how genes influence inherited traits and how genetic variation leads to specific diseases
Audience: Undergraduate

GENETICS 155 — FRESHMAN SEMINAR IN GENETICS
1 credit.

Introduction to the discipline of genetics, to the UW Laboratory of Genetics, to some of the research projects the faculty are pursuing, to resources available at UW-Madison, and to the career options open to an individual with a genetics undergraduate degree.
Requisites: None
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the broader role genetics plays in shaping societal issues and future career paths.
Audience: Undergraduate

2. Demonstrate team-work, interpersonal and problem-solving skills to address societal, ethical and scientific issues related to genetics, and communicate their findings through written, oral and multi-media reports.
Audience: Undergraduate

3. Discover academic, campus and community resources that assist in their transition to the university and increase their chance of success as an undergraduate.
Audience: Undergraduate

4. Engage in meaningful genetics-related dialogue that addresses inclusivity, diversity and identity in science.
Audience: Undergraduate

5. Understand how experiential and classroom learning can help them integrate, synthesize and apply knowledge that explores big questions and big ideas in genetics.
Audience: Undergraduate

GENETICS 234 — GENOMES AND SOCIETY
3 credits.

The sequencing of genomes has transformed our understanding of the evolution of species and human history, our approaches to improve health and medicine, as well as how we tackle global environmental challenges. Explore the many ways in which the sequencing of genomes is revolutionizing our world, and dive into DNA from viral to human genomes. Understand how genomes are expressed, the impact on phenotype, as well as how it can change over time and in different conditions, are processes that are essential for life and the evolution of species.
Requisites: GENETICS 133, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY/BIOLOGY 101, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe ways in which the sequencing of diverse genomes including viral, bacterial, fungal, plant and animal species has impacted our understanding of the origins of life and evolution of species
Audience: Undergraduate

2. Describe how gene expression can change, and why this is essential for life
Audience: Undergraduate

3. Discuss the applications of genomic sequencing on the development of biotechnological advances and their impacts on society
Audience: Undergraduate

4. Discuss ethical concerns related to genetics and the applications of biotechnology
Audience: Undergraduate

5. Apply foundational scientific knowledge to be informed, versed and up to date on current genetic topics
Audience: Undergraduate

6. Engage in meaningful genetics-related dialogue about the global nature of genetics and genomics at the ethical, societal, legal, and scientific levels
Audience: Undergraduate

GENETICS 289 — HONORS INDEPENDENT STUDY
1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area encompassing Genetics. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2010

GENETICS 299 – INDEPENDENT STUDY
1-3 credits.

Research work for students under direct guidance of a faculty member in an area encompassing Genetics. Students are responsible for arranging the work and credits with the supervising instructor.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

GENETICS 335 – GENOMES IN A MODERN WORLD
3 credits.

The ability to sequence genomes rapidly has transformed our understanding of the evolution of species and human history, our approaches to improve health and medicine, as well as how we tackle global environmental challenges, and increasingly impacts our modern world. Explore the interdisciplinary connections between genetics- and genomics-based research and important current questions related to ethics, history, and public policy.
Requisites: GENETICS 234
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply basic knowledge of current genetics and genomics-based research to address important questions related to ethics, history, social science, and/or public policy
Audience: Undergraduate

2. Communicate an interdisciplinary perspective on a topic related to genomes and society effectively to multiple audiences
Audience: Undergraduate

3. Critically evaluate primary literature to identify and explore societal connections to the sequencing of genomes.
Audience: Undergraduate

4. Identify and use credible information resources to aid in the development of an interdisciplinary project
Audience: Undergraduate

5. Collaborate effectively in teams to address problems related to genetics and genomics
Audience: Undergraduate

GENETICS 375 – SPECIAL TOPICS
1-4 credits.

Specialized subject matter of current interest to undergraduate students.
Requisites: None
Course Designation: Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GENETICS 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION
1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Genetics and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GENETICS 400 – STUDY ABROAD IN GENETICS
1-6 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions

GENETICS 466 – PRINCIPLES OF GENETICS
3 credits.

Genetics in eukaryotes and prokaryotes. Includes transmission genetics, molecular genetics, evolutionary genetics, genetic engineering, and societal issues associated with genetics. Illustrative material includes bacteria, plants, insects, and vertebrates.
Requisites: (ZOOLOGY/BIOLOGY/BOTANY 151 or BIOCORE 381 or BOTANY/BIOLOGY 130 or ZOOLOGY/BIOLOGY 101 and 102) and (CHEM 104 or CHEM 109 or CHEM 115). Not eligible to enroll if credit earned for GENETICS 467 or 468
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recall basic genetics terminology
Audience: Undergraduate

2. Understand central concepts in genetics
Audience: Undergraduate

3. Use concepts to solve qualitative and quantitative problems
Audience: Undergraduate

4. Interpret data from experiments
Audience: Undergraduate

5. Apply knowledge of experimental genetics to research problems
Audience: Undergraduate

GENETICS 467 – GENERAL GENETICS 1
3 credits.

Genetics of eukaryotes and prokaryotes. Includes transmission genetics, probability and hypothesis testing, genetic mapping, molecular genetics, gene expression, and genetic engineering. Illustrative material includes viruses, bacteria, plants, fungi, insects, and humans.
Requisites: (ZOOLOGY/BIOLOGY 101 and 102, or ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or BOTANY/BIOLOGY 130) and (CHEM 104, 109, or 115). Not open to students with credit for GENETICS 466.
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Employ Mendel's laws of inheritance and rules of probability to predict the outcome of genetic crosses
Audience: Undergraduate

2. Demonstrate how genes are mapped along chromosomes based on an understanding of meiosis and recombination
Audience: Undergraduate

3. Describe the power and limitations of genetic explanations for trait variation
Audience: Undergraduate

4. Highlight milestones in the history of genetics
Audience: Undergraduate

5. Recall core principles that govern the structure and function of DNA, RNA, and protein
Audience: Undergraduate

6. Explain how molecules and molecular processes carry out accurate information flow from DNA to RNA to protein in bacteria and eukaryotes
Audience: Undergraduate

7. Describe mechanisms that control expression of selected genes in cells
Audience: Undergraduate

8. Solve problems by applying techniques for quantifying the expression, interaction, and cellular localization of DNA, RNAs, and proteins
Audience: Undergraduate

GENETICS 468 – GENERAL GENETICS 2
3 credits.

Genetic analysis, population genetics, evolution and quantitative genetics. Includes mutant screens, pathway analysis, mosaic analysis, reverse genetics, genomics, Hardy-Weinberg linkage equilibrium, inbreeding, genetic drift, natural selection, population structure, inheritance of complex traits, domestication and human evolution.
Requisites: GENETICS 467
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the molecular mechanisms that contribute to expression regulation in bacteria and eukaryotes.
Audience: Undergraduate

2. Apply the tools of forward genetics, reverse genetics and mosaic analysis to investigate the regulatory networks that control growth, development and responses to the environment.
Audience: Undergraduate

3. Explain the genetic and molecular basis of immunity.
Audience: Undergraduate

4. Discuss the molecular mechanisms that contribute to somatic mutations and the progression to cancer.
Audience: Undergraduate

5. Calculate genetic parameters in populations using the tools of population genetics.
Audience: Undergraduate

6. Analyze the inheritance of complex traits using quantitative genetic analyses.
Audience: Undergraduate

7. Apply the methods of evolutionary genetics to predict how genes and genomes evolve in the long-term.
Audience: Undergraduate

GENETICS 520 – NEUROGENETICS
3 credits.

The genetic basis of nervous system development, structure, function, and dysfunction. Will emphasize both current research findings on the genetic basis of specific neurological disorders, as well as genetic methodologies and experimental approaches used in neurobiological research.
Requisites: GENETICS 466, 467, BIOCORE 587, ZOOLOGY/PSYCH 523, or PSYCH 454
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and summarize key concepts that underlie the genetic basis of nervous system development and function.
Audience: Undergraduate

2. Explain specific examples of how genetic variation/mutation can alter cellular and molecular pathways to impact nervous system development and function, behavior, as well as cause neurological disorders and diseases.
Audience: Undergraduate

3. Analyze and interpret primary data, discuss how this data supports current neurogenetic hypothesizes, and formulate research questions that build on this data and address remaining uncertainties.
Audience: Undergraduate

4. Summarize experimental genetic and genomic techniques employed in neurogenetic research that utilize various model organisms, as well as humans.
Audience: Undergraduate

GENETICS/BIOLOGY 522 – COMMUNICATING EVOLUTIONARY BIOLOGY
2-3 credits.

Exposure to diverse topics in contemporary evolutionary biology and development of critical thinking and communication skills. Most weeks guest lecturers present their own primary research on a specialized topic in evolutionary biology. Seminars include perspectives from genetics, ecology, geoscience, zoology, botany, microbiology, systematics, molecular biology, and integrative research. Some weeks feature special topics and discussions on pedagogical, legal, outreach, or other issues in evolutionary biology. Includes thinking critically about methodology, experimental design and interpretation, and how conclusions are reached in evolutionary biology by reading primary and secondary literature, attending seminars, discussing topics with speakers and other students, and preparing a written report. The 3-credit version of the course delves deeper into communication of evolutionary biology to researchers, undergraduates, K-12 students, and the general public.
Requisites: GENETICS 466, 468, ZOOLOGY/ANTHRO/BOTANY 410, or BIOCORE 381, or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate the ability to critically read and comprehend primary scientific literature from diverse areas of evolutionary biology.
Audience: Undergraduate

2. Comprehend and critically evaluate oral research presentations in the field of evolutionary biology.
Audience: Undergraduate

3. Participate effectively in discussions of scientific research in the field of evolutionary biology.
Audience: Undergraduate

4. Write a clear and concise review of a selected topic in evolutionary biology and a critique of a research seminar in that area.
Audience: Undergraduate

5. Synthesize and apply knowledge from other didactic courses and personal experiences in discussions of scientific research.
Audience: Undergraduate

GENETICS 525 – EPIGENETICS
3 credits.

Introductory course in epigenetics - the layer of chemical information that sits on top of the genome - that switch genes 'on' or 'off'. Will introduce how the epigenome, in collaboration with the genome, controls versatile biological processes and cell fates. Will also cover the latest advances of how humans can control their own epigenetic destiny by lifestyle, diet, and other environmental factors.
Requisites: GENETICS 466 or 467
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize and summarize the difference between genetics and epigenetics.
Audience: Both Grad & Undergrad

2. Apply the basic knowledge of epigenetic mechanism and illustrate how their misregulations cause abnormal development and diseases.
Audience: Both Grad & Undergrad

3. Critically review and discuss epigenetic literature.
Audience: Both Grad & Undergrad

4. Design epigenetic experiments and interpret the results of those experiments.
Audience: Both Grad & Undergrad

5. Demonstrate the ability to clearly communicate epigenetic research in both oral and written formats
Audience: Graduate

GENETICS 527 – DEVELOPMENTAL GENETICS FOR CONSERVATION AND REGENERATION
3 credits.

Human-induced factors such as changes in land use and global climate are causing rapid worldwide biodiversity loss. Can modern molecular genetics contribute to species preservation? In this course, we will first explore the challenges and potential of molecular genetic methods based on biobanking, gene editing and nuclear transfer for animal biodiversity preservation. Topics covered will include: i) maternal factors and early animal development, ii) interspecies somatic cell nuclear transfer (isSCNT) and oocyte-mediated reprogramming in animal cloning, iii) developmental, phylogenetic and ecological considerations for biobanking, iv) gene editing and synthetic biology as potential tools to recapture biodiversity. Use knowledge in animal population status, developmental genetics and phylogeny to address real-life problems involving the conservation of threatened animal populations.
Requisites: GENETICS 466, 467, or BIOCORE 381
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Develop a greater knowledge of global threats to animal populations
Audience: Undergraduate

2. Learn principles of animal development at the egg-to-embryo transition, the use of oocytes for reprogramming, cloning and xenograft production, and the effects of phylogenetic relatedness on these processes
Audience: Undergraduate

3. Learn developmental basis and consequences of inbreeding, breeding in captivity and domestication
Audience: Undergraduate

4. Understand basic concepts in germ cell induction and manipulation
Audience: Undergraduate

5. Learn about assessing and banking genetic diversity towards animal species preservation
Audience: Undergraduate

GENETICS 528 – STUDY ABROAD: INTERNATIONAL FIELD STUDY IN ANIMAL BIODIVERSITY
1 credit.

A study abroad equivalency for a hands-on experience in genetics and animal biodiversity that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Identify biodiversity-rich areas and analyze the challenges they face due to fragmentation, climate change, and invasive species.
Audience: Undergraduate

2. Evaluate scientific methods used in biodiversity preservation, including ecosystem preservation, restoration, and species reintroduction.
Audience: Undergraduate

3. Collaborate in teams to assess regional animal phylogenetic biodiversity and its relevance to bio-banking strategies.
Audience: Undergraduate

4. Describe local cultural and socioeconomic needs and analyze their implications for balancing ecosystem preservation efforts.
Audience: Undergraduate

GENETICS 545 – GENETICS LABORATORY
2 credits.

Gain practical experience in classical and molecular genetic laboratory techniques using plants, animals, and fungi. Topics include complementation and linkage analysis, gene mapping, library screening, yeast and bacterial transformation, restriction analysis, PCR, sequencing, and Southern blot analysis.
Requisites: GENETICS 466 or 467
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand central concepts in genetics.
Audience: Undergraduate

2. Use concepts to solve problems.
Audience: Undergraduate

3. Interpret data from experiments.
Audience: Undergraduate

4. Apply genetics knowledge to problems.
Audience: Undergraduate

5. Communicate effectively both written and orally.
Audience: Undergraduate

GENETICS 548 – THE GENOMIC REVOLUTION
3 credits.

Profound advances are now possible thanks to genomic data and analysis. Introduces the structure, function, and evolution of genomes. It also outlines the realized and prospective benefits of genomic technology for human health, agriculture, and conservation.
Requisites: GENETICS 466, 468, or BIOCORE 587
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Use scientific literature to learn about new developments in genomic research.
Audience: Undergraduate

2. Examine methods for generating and analyzing genomic data.
Audience: Undergraduate

3. Investigate basic and applied questions being addressed by genomic research.
Audience: Undergraduate

4. Describe the organization, function, and evolution of genomes.
Audience: Undergraduate

5. Appraise the impact of genomic science on health, agriculture, and conservation.
Audience: Undergraduate

GENETICS 564 – GENOMICS AND PROTEOMICS
3 credits.

The basic principles of genomics, proteomics and bioinformatics will be taught through a semester-long project of the students choosing. Creative problem solving in science skills will be learned through a variety of active-learning techniques that include: reading of primary literature, group presentations, peer review, bioinformatic lab exercises, science communication skills (writing visualization), and creating a website. Emphasis will be placed upon how to effectively communicate science (written, oral and written). Topics include: genomic sequencing, phylogeny, domain analysis, transcriptomics, CRISPR screens, chemical genomics, quantitative proteomics and protein networks. Capstone course.
Requisites: GENETICS 466, 468, or BIOCORE 587. Not open to graduate students
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Gain confidence in modern genomic and proteomic experimental methods used to ask fundamental biological questions and how to become creative problem solvers.
Audience: Undergraduate

2. Learn how to mine bioinformatic databases to obtain information about a gene/protein associated with a human disease assembled on a website built by the student.
Audience: Undergraduate

3. Learn how to apply what you learned, by writing and visualizing three specific aims of a grant with goals to address the gap in knowledge about the disease and gene of your choosing.
Audience: Undergraduate

4. Effectively communicate scientific research by applying unique visual, verbal, and oral techniques facilitated by the instructor called "Slide Evolution".
Audience: Undergraduate

5. To learn how working in diverse teams (social and intellectual) makes you a more innovative problem solver.
Audience: Undergraduate

GENETICS/MD GENET 565 – HUMAN GENETICS
3 credits.

Principles, problems, and methods of modern human genetics. Focuses on how researchers discover the genetics of diseases and how those discoveries are used to improve clinical practice. Surveys aspects of (i) the molecular function of the human genome, (ii) the basic principles of human genetics including statistical genetics, quantitative genetics, and genomic variation in human populations, (iii) the genetics of rare disorders and common diseases, and genomic analysis approaches, including genome-wide association studies and sequencing, and (iv) how genetics are used in medicine and discussions covering ethical considerations of human genomic data.
Requisites: GENETICS 466, 468, BIOCORE 587, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Predict and describe how different classes of genetic variants, as defined by (a) mutation mechanism, (b) variant size, (c) population frequency, and (d) location in the genome, could affect molecular and cellular functions and risk for disease
Audience: Both Grad & Undergrad

2. Design experimental approaches to investigate the mechanisms of human genetic disorders
Audience: Both Grad & Undergrad

3. Explain and give examples of genetic inheritance patterns and the contribution of inherited factors to disease risk
Audience: Both Grad & Undergrad

4. Describe the design, strengths, and weaknesses of the various approaches for identifying genes or loci associated with a human disease or trait (e.g. linkage mapping, genetic association, sequencing), and interpret results from these studies
Audience: Both Grad & Undergrad

5. Explain how genetic information is used in the practice of medicine for diagnosis or to guide treatment and the limitations of current clinical diagnostic or treatment tools
Audience: Both Grad & Undergrad

6. Apply human genetics concepts to critically analyze published scientific studies and to describe experimental approaches that can be performed to address shortcomings and/or extend the findings of published work
Audience: Graduate

GENETICS 566 – ADVANCED GENETICS
3 credits.

Principles of classical and modern genetic analysis taught through readings in the scientific literature and group projects. Capstone course.
Requisites: Declared in Genetics undergraduate program and GENETICS 466, 468, or BIOCORE 587
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Critically evaluate primary literature in the field of genetics and genomics.
Audience: Undergraduate

2. Explore and utilize information resources available to aid in the advancement of future professional careers.
Audience: Undergraduate

3. Formulate research questions about the genetic control of biological processes and design experiments to answer these questions using appropriate genetic and genomic tools.
Audience: Undergraduate

4. Demonstrate teamwork, interpersonal and problem-solving skills to address societal, ethical, professional, and scientific issues related to genetics and genomics.
Audience: Undergraduate

5. Communicate scientific findings effectively to multiple audiences.
Audience: Undergraduate

GENETICS 567 – COMPANION RESEARCH SEMINAR
1 credit.

Student-led discussions on scientific, societal, and professional topics relevant to Senior research and selected original research presentations.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Interpret primary literature data in genetics and related fields
Audience: Undergraduate

2. Communicate accompanying senior laboratory research
Audience: Undergraduate

3. Develop skills in science communication at multiple levels of detail
Audience: Undergraduate

4. Critically discuss interrelated aspects of science and society
Audience: Undergraduate

5. Explore careers related to genetics and genomics
Audience: Undergraduate

GENETICS 588 – IMMUNOGENETICS
3 credits.

Explores the interaction between genetics and the immune system. Examines the genetic mechanisms that drive the immunological and clinical differences observed between individuals when confronted with the same environment of immunological insults, such as COVID-19, influenza, allergies and cancer. Stresses clinical and research perspectives and their societal implications.
Requisites: GENETICS 466, 467 or BIOCORE 383
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the genetic mechanisms underlying interindividual immune response differences to the same immunological challenge
Audience: Undergraduate

2. Critically evaluate major research advances in the primary literature and place them within the historical context of other major immunogenetic discoveries
Audience: Undergraduate

3. Predict the downstream effects of manipulating variables that are involved in molecular pathways or currently being used in immunogenetic based research and clinical practices
Audience: Undergraduate

4. Effectively communicate difficult immunogenetics topics regarding interindividual immune response differences
Audience: Undergraduate

GENETICS 605 – CLINICAL CASES IN MEDICAL GENETICS
3 credits.

The use of genetics in medicine has experienced significant growth over the past 50 years, identifying risk genes, and devising diagnostic tests and therapies based on this knowledge for specific clinical disorders such as cystic fibrosis, achondroplasia, and Retts syndrome. MDs and biomedical scientists from UW Hospital and Clinics, the School of Medicine and Public Health, and other UW units will present lectures in this field followed by question-answers sessions. Other class sessions will be devoted to student presentations and open discussion of research literature.
Requisites: GENETICS 466, 467 or BIOCORE 383
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Design experiments to discover the genes and defects within genes that cause diseases in humans
Audience: Undergraduate

2. Understand how model organisms are used to investigate the molecular mechanisms for genetic disorders
Audience: Undergraduate

3. Design and interpret diagnostic DNA-based tests for the detection of allelic variants that cause disease
Audience: Undergraduate

4. Know the diverse physiological-developmental mechanisms that underlie a broad spectrum of diseases
Audience: Undergraduate

5. Devise strategies to develop therapies to treat or cure disease and understand the limits therapeutic interventions
Audience: Undergraduate

6. Develop a report on (1) the design of a diagnostic test for a genetic disorder, (2) the molecular biological pathways affected by the genetic disorder, and (3) application of the understanding of the disorder to develop a therapy or management regime
Audience: Graduate

GENETICS/BIOCHEM/MICROBIO 612 – PROKARYOTIC MOLECULAR BIOLOGY
3 credits.

Molecular basis of bacterial physiology and genetics with emphasis on molecular mechanisms; topics include nucleic acid-protein interactions, transcription, translation, replication, recombination, regulation of gene expression.
Requisites: (BIOCHEM 501 or 507) and (MICROBIO 470, GENETICS 466 or 468) or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Access and evaluate original research literature.
Audience: Undergraduate

2. Demonstrate problem solving practices.
Audience: Undergraduate

3. Identify enzyme mechanisms responsible for transcription, translation, gene regulation, and replication in bacteria.
Audience: Graduate

4. Compare the structural bases for the mechanisms.
Audience: Graduate

5. Evaluate the experiments that led to our understanding of theses mechanisms.
Audience: Graduate

6. Deconstruct how these enzymes respond to nutritional and environmental signals in cells.
Audience: Graduate

7. Outline the evolutionary basis and selection pressure for these mechanisms in vivo.
Audience: Graduate

GENETICS/PLANTSCI 615 – GENETIC MAPPING
3 credits.

Computing-intensive preparation for genetic mapping research, including linkage analysis and QTL mapping in designed crosses; linkage disequilibrium and association analysis (GWAS).
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Compare the principles and applicability of linkage vs association mapping
Audience: Graduate

2. Describe how population and model parameters affect statistical power

Audience: Graduate

3. Construct genetic linkage maps and discover QTL in designed crosses
Audience: Graduate

4. Conduct genome-wide association analyses and interpret the results
Audience: Graduate

GENETICS/BIOCHEM/MD GENET 620 – EUKARYOTIC MOLECULAR BIOLOGY
3 credits.

Focuses on the basic molecular mechanisms that regulate DNA, RNA, and protein metabolism in eukaryotic organisms.
Requisites: BIOCHEM 501, 508 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recall core principles that govern the structure and function of DNA, RNA, and protein.
Audience: Both Grad & Undergrad

2. Describe techniques for quantifying the expression, interaction, and cellular localization of specific molecules and for determining their necessity and sufficiency in molecular processes.
Audience: Both Grad & Undergrad

3. Explain how molecular processes that control the synthesis, decay, interactions, localization, folding, and modification of molecules are silenced, initiated, maintained, and terminated.
Audience: Both Grad & Undergrad

4. Describe how information is transferred between molecules to alter cellular activity in response to developmental and environmental signals.
Audience: Both Grad & Undergrad

5. Critique and weigh the credibility of existing molecular data.
Audience: Both Grad & Undergrad

6. Develop and draw hypotheses that use existing data to account for as yet unexplained molecular processes in eukaryotic organisms.
Audience: Both Grad & Undergrad

7. Design discovery/observation, loss-of-function, and gain-of-function experiments to test molecular hypotheses.
Audience: Both Grad & Undergrad

8. Implement problem solving strategies in thesis research project.
Audience: Graduate

GENETICS/ENTOM/ZOOLOGY 624 – MOLECULAR ECOLOGY
3 credits.

Basic principles of molecular ecology. Lecture topics include population genetics, molecular phylogenetics, rates and patterns of evolution, genome evolution, and molecular ecology.
Requisites: GENETICS 466, 467, BIOCORE 383, or graduate student standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and describe common molecular genetic techniques.
Audience: Both Grad & Undergrad

2. Demonstrate knowledge about the significance of genetic diversity in species biology.
Audience: Both Grad & Undergrad

3. Differentiate how ecological and evolutionary processes shape genetic variation.
Audience: Both Grad & Undergrad

4. Analyze genetic data and communicate the results.
Audience: Both Grad & Undergrad

5. Evaluate whether genetic data are appropriate for answering scientific questions.
Audience: Both Grad & Undergrad

6. Summarize and critique the primary literature in the field of Molecular Ecology.
Audience: Graduate

GENETICS/CHEM 626 – GENOMIC SCIENCE
2 credits.

Brings cutting-edge topics in the genomic sciences into the reach of those in chemistry, biology, engineering, computer science statistics fields. Enables biologically-oriented students to deal with advances in analytical science so that they may incorporate new genomic science concepts into their own scientific repertoires.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

GENETICS 627 – ANIMAL DEVELOPMENTAL GENETICS
3 credits.

Advanced genetics course focusing on genetic mechanisms of animal embryonic development, with particular emphasis on central molecular circuitries that control development and genetic analytical tools used to reveal them. Address topics including maternal and epigenetic inheritance, the egg-to-embryo transition, pattern formation, organogenesis, coordination of cellular and molecular mechanisms, and animal models of human congenital disorders.
Requisites: GENETICS 466, 468, or BIOCORE 587
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Integrate concepts in genetics in the identification and function of genes involved in development and cell differentiation.
Audience: Undergraduate

2. Understand developmental cascades and morphogenetic processes involved in patterning and diversification of the animal tissue plan.
Audience: Undergraduate

3. Apply developmental genetic principles towards the understanding of syndromes in animals, including humans.
Audience: Undergraduate

4. Learn principles underlying the divergence of body types during evolution.
Audience: Undergraduate

GENETICS/BIOCHEM 631 – PLANT GENETICS AND DEVELOPMENT
3 credits.

Covers the basic concepts of genetics and genomics as applied to plants and their development, including discussions on breeding systems (modes of reproduction, sex determination, self incompatibility and crossing barriers), linkage analysis, genome structure and function (structure, function and evolution of nuclear and organellar chromosomes; haploidy and polyploidy; expression regulation and epigenetics), along with a description of current methodologies used in the analysis of these processes within the context of plant development. The objective is to instigate a broader knowledge and understanding of the principles and methodologies used in plant genetics and their applications in investigations of the molecular mechanisms that modulate plant development.
Requisites: GENETICS 466, 468, BIOCORE 587, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the plant life cycles and key concepts in plant development
Audience: Both Grad & Undergrad

2. Explore and compare experimental approaches to study breeding systems, recombination, and modes of trait segregation in plants, including quantitative traits
Audience: Both Grad & Undergrad

3. Explain genetic, epigenetic and genomic approaches to study plant growth, development and responses to the environment
Audience: Both Grad & Undergrad

4. Analyze and interpret data in plant genetics and development
Audience: Both Grad & Undergrad

5. Critically evaluate papers from the primary literature
Audience: Both Grad & Undergrad

6. Compare and contrast published experimental data that address specific biological questions in plants, use the corresponding information to develop novel hypotheses, and design experiments that test these hypotheses.
Audience: Graduate

GENETICS 633 – POPULATION GENETICS
3 credits.

Preparation for initiating research in the population genetics field. Explore how genetic variation is influenced by mutation and recombination, population size changes and migration, and natural selection for or against new mutations.
Requisites: ZOOLOGY/ANTHRO/BOTANY 410, ZOOLOGY 415, GENETICS 466, 468, BIOCORE 381, or graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe methods of measuring and summarizing DNA variation.
Audience: Both Grad & Undergrad

2. Examine fundamental population genetic models and their predictions.
Audience: Both Grad & Undergrad

3. Develop intuition for the impact of evolutionary processes on genetic variation.
Audience: Both Grad & Undergrad

4. Identify and understand modern methods of population genetic data analysis.
Audience: Both Grad & Undergrad

5. Evaluate ongoing controversies and unsolved problems in population genetics.
Audience: Both Grad & Undergrad

6. Assess the relevance and utility of course content to own research.
Audience: Graduate

GENETICS/MD GENET/POP HLTH 636 – PUBLIC HEALTH GENOMICS
1 credit.

Provides an introduction to public health genomics through a review of fundamental principles of genetics, the use of genetic information in clinical and research settings, and its implications for disease management and prevention, and health promotion. Explores policies that guide public health and discusses current ethical, legal, and social implications of these policies.
Requisites: (Junior standing and ZOOLOGY/BIOLOGY/BOTANY 151) or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss the impact of genetics on clinical care and public health practice
Audience: Both Grad & Undergrad

2. Critically discuss genetic/genomic policies and the relevant ethical, legal, and social implications (ELSI) of these policies
Audience: Both Grad & Undergrad

3. Read, summarize, critique, and relate current news articles to key concepts in public health genomics
Audience: Graduate

GENETICS/NEURODPT 650 – FUNCTIONAL GENOMICS OF BRAIN DISORDERS
3 credits.

Functional genomics methods (RNA-seq, ATAC-seq, Hi-C, ChIP-seq, Tag, etc.) and their applications in the study of molecular and cellular mechanisms governing brain development, evolution, and neurodevelopmental and neuropsychiatric disorders. Overview of relevant aspects of Genetics and Neuroscience, including genomic approaches for gene discovery for human disorders and key properties of brain cells and circuit development. Bioinformatic approaches for analyzing genome-scale data sets. Critical consideration of experimental design and analysis strategies through reading and discussion of primary research literature and the development of an original research proposal. Emphasis will be placed upon how to effectively communicate science (written and oral).
Requisites: GENETICS 466, 468, BIOCORE 383, PSYCH/ZOOLOGY 523, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize potential strengths, limitations, and assumptions of published scientific studies.
Audience: Undergraduate

2. Describe the genomics tools used to study brain development and disorders, including how these tools are run and how to interpret the results they generate.
Audience: Both Grad & Undergrad

3. Summarize current studies in genomics, brain development, evolution, and neurodevelopmental and neuropsychiatric disorders from primary scientific literature.
Audience: Both Grad & Undergrad

4. Design a research project that utilizes functional genomics approaches to interrogate fundamental questions of brain disorders, development, evolution, and function.
Audience: Both Grad & Undergrad

5. Evaluate the strengths, limitations, and assumptions of published and proposed research studies, including methods, results, conclusions, and context of the field.
Audience: Graduate

6. Critique study design and interpretation and communicate critiques in a constructive manner.
Audience: Graduate

GENETICS/BOTANY/M M & I/PL PATH 655 – BIOLOGY AND GENETICS OF FUNGI
3 credits.

Fungal genetics, genomics, and physiology using plant pathogenic fungi and the genetic models Aspergillus nidulans and Neurospora crassa as model systems to explore the current knowledge of fungal genetics and plant/fungal interactions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Demonstrate a basic understanding of fungal biology and genetics
Audience: Graduate

2. Analyze current research topics in fungal genetics/biology
Audience: Graduate

3. Identify members of the fungal research community
Audience: Graduate

4. Write and critique research grants
Audience: Graduate

5. Critique and discuss peer reviewed manuscripts
Audience: Graduate

6. Develop and deliver oral presentations (research paper and own research)
Audience: Graduate

7. Improve communication skills (oral and written)
Audience: Graduate

GENETICS/MD GENET 662 – CANCER GENETICS
3 credits.

Focuses on the genetic basis by which cancer manifests. Provides a comprehensive overview of how cancer is generated as a result of abnormalities at the DNA level, paying special attention to oncogenes, tumor suppressors, DNA mutations, DNA repair mechanisms, chromosomal instability, and tumor heterogeneity. Stresses the role of the immune system in combating cancer, the phenomenon of cancer resistance, anti-tumor strategies, and epigenetic influences on tumorigenesis. Highlights connections between course material and clinical relevance.
Requisites: GENETICS 466, 467 or BIOCORE 383
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe major research advances in cancer genetics
Audience: Undergraduate

2. Discuss the promises and challenges that await the field of cancer genetics.
Audience: Undergraduate

3. Apply your understanding of cancer genetics to generate research questions and improve hypothetical patient care
Audience: Undergraduate

4. Critically evaluate primary literature regarding cancer genetics
Audience: Undergraduate

5. Organize and deliver a scientific presentation to your peers
Audience: Undergraduate

GENETICS/MD GENET 677 – ADVANCED TOPICS IN GENETICS
1-3 credits.

Contents vary; consideration of subjects not included in the curriculum.
Requisites: Graduate/professional standing, GENETICS 466, 468, or BIOCORE 383
Course Designation: Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in genetics and genomics.
Audience: Both Grad & Undergrad

2. Apply knowledge of experimental genetics and genomics to related research projects.
Audience: Graduate

GENETICS 681 – SENIOR HONORS THESIS
2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GENETICS 682 – SENIOR HONORS THESIS
2-4 credits.

Individual study for majors completing theses for Honors degrees as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

GENETICS 695 – ADVANCING TO BIOLOGICAL SCIENCES PHD STUDY
1 credit.

Explore the biological science PhD student experience, from the initial stages of consideration through applications and interviews, to graduate student life and career opportunities. Reflect on personal goals and the nature of graduate study to confirm that a research-focused PhD is right for you. Consider whether to apply this year or later on, in light of admissions expectations and personal readiness. Identify research areas, PhD programs, and prospective advisors of interest. Improve application materials, strengthen interview skills, and consider individual priorities for selecting a program.
Requisites: Senior standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Appraise the individual appropriateness and optimal timing of PhD study in light of personal goals and preparedness
Audience: Undergraduate

2. Identify research areas, graduate prospects, and prospective mentors of interest
Audience: Undergraduate

3. Recognize the admissions processes and priorities typically followed by graduate programs
Audience: Undergraduate

4. Develop, evaluate, and refine PhD application materials
Audience: Undergraduate

5. Communicate research interests, motivation, personal strengths, and career goals with faculty and peers
Audience: Undergraduate

GENETICS 699 – SPECIAL PROBLEMS
1-3 credits.

Individual advanced work in an area of Genetics under the direct guidance of a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

GENETICS 701 – ADVANCED GENETICS
2 credits.

Professional level training in genetic mechanisms and analysis, with particular emphasis on genetic transmission and genetic variation, and connections with other areas of genetics.
Requisites: Declared in Genetics PhD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply advanced genetic and genomic thinking to scientific problems.
Audience: Graduate

2. Define the differences between asexual and sexual inheritance and the associated situations in which each may be beneficial.
Audience: Graduate

3. Articulate the impact of fundamental genetic processes, such as mutation and recombination, on genetic transmission, genetic variation, and organismal function.
Audience: Graduate

4. Define key concepts regarding the structure of genomes and comparative genomics.
Audience: Graduate

5. Explain the impact of evolutionary forces on genetic variation and transmission.
Audience: Graduate

6. Identify modern methods for analyzing genetic variation and its connection to trait variation.
Audience: Graduate

7. Read with clarity, critically evaluate, and discuss historical and modern primary scientific literature related to genetic variation and transmission.
Audience: Graduate

GENETICS 702 – ADVANCED GENETICS II
3 credits.

Second of semester of professional level training in genetic mechanisms and analysis as applied to genetic transmission, gene expression, forward and revese genetics, molecular genetics, genonmics, developmental genetics, and epigenetics.
Requisites: GENETICS 701
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

GENETICS 705 – FOUNDATIONS OF GENETICS RESEARCH
1 credit.

Provides support, processes, and tools for advancing graduate research and refining individual research topics. Adjust and refine goals of a research topic to maximize the impact of doctoral research and learn how to navigate the shifting landscape of research throughout doctoral studies. Boost emerging graduate research plans by gaining operations skills in independent knowledge acquisition and technical skills in basic computational biology. Activities include shaping a research question, identifying barriers in the research process, building a reference bibliography of relevant background literature, using databases and other electronic resources that inform research, and operating basic tools to determine gene function.
Requisites: GENETICS 701
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Shape a research question central to a thesis to maximize the impact of the investigation and reduce obstacles.
Audience: Graduate

2. Articulate the context of their proposed research within the larger scientific process and how it contributes to advancing knowledge.
Audience: Graduate

3. Identify potential barriers in the research process and design practical solutions to overcome them.
Audience: Graduate

4. Describe and successfully use bibliographic tools for searching and curating the literature.
Audience: Graduate

5. Apply publicly available databases for investigating genes, pathways, and population structures.
Audience: Graduate

6. Operate basic tools to determine gene function.
Audience: Graduate

7. Place genes within pathways, cell systems, tissues and organisms.
Audience: Graduate

GENETICS 707 – FRONTIERS IN GENETICS RESEARCH
1 credit.

Discuss contemporary issues in genetic, developmental, cell, and molecular biology with visiting speakers/professionals in the field.
Requisites: GENETICS 701
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Recognize the questions, methods and analyses, and interpretation of data at the frontiers of genetics research.
Audience: Graduate

2. Communicate in scientific conversations and ask effective questions.
Audience: Graduate

GENETICS 708 – METHODS AND LOGIC IN GENETIC ANALYSIS
3 credits.

A research-level analysis of the current research forefronts in genetic, developmental, cell, and molecular biology. Engage with research lectures on current developments in the field. Reading material is taken from the primary literature. Focuses on evaluating genetic approaches to biological questions.
Requisites: GENETICS 707 (or MD GENET 707 prior to Fall 2026)
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the questions, methods and analyses, and interpretation of data for current genetics research.
Audience: Graduate

2. Present genetics research findings to an academic audience.
Audience: Graduate

3. Communicate in scientific conversations and ask effective questions.
Audience: Graduate

4. Write effectively about genetics research.
Audience: Graduate

GENETICS/CRB 710 – DEVELOPMENTAL GENETICS
3 credits.

Covers a broad range of topics in animal development, with an emphasis on molecular mechanisms. Focuses on common themes, with the goal of understanding and analyzing current research in developmental biology and genetics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Ability to critically evaluate published scientific work (journal reviews).
Audience: Graduate

2. Ability to communicate critical evaluations professionally and articulately (lecturer and TA feedback at each session).
Audience: Graduate

3. Develop deep knowledge of developmental biology, use of genetic model organisms, stem cell biology and regenerative medicine (didactic portion of course).
Audience: Graduate

4. Improved presentation skills (each student has a scheduled presentation four times during the semester in addition to ad hoc participation).
Audience: Graduate

5. Skills in providing feedback to peers (through student evaluations peer presentations each class period).
Audience: Graduate

GENETICS 805 – PROFESSIONAL DEVELOPMENT AND RESPONSIBLE CONDUCT OF GENETICS RESEARCH
1 credit.

Development of skills necessary for success in doctoral study, including professional standards and expectations for ethical research. Topics in professional development include mental health in graduate education, individual development planning, and transitions to self-directed learning. Ethics instruction addresses conflicts of interest, collaborative research, peer review, data acquisition and management, and research misconduct. All National Institutes of Health (NIH) recommended topics for Responsible Conduct of Research are covered.
Requisites: Declared in Genetics PhD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Evaluate and apply fundamental concepts and best practices in genetic research conduct and research ethics.
Audience: Graduate

2. Identify and meet individual and professional responsibilities and obligations to society.
Audience: Graduate

3. Explore and implement activities for professional skills development and career management.
Audience: Graduate

GENETICS 807 – QUANTITATIVE RESEARCH AND RIGOR IN GENETICS
2 credits.

Combines review of key statistical concepts needed for genetics research with discussions of contemporary debates and common pitfalls in the application of quantitative methods specific to genetics research. Use statistical software to explore and apply statistics to genetic inference, with an emphasis on computationally intensive methods, including group coding exercises and case studies of genetics problems. Engage with contemporary ideas around study design, transparency, rigor and reproducibility in genetics research.
Requisites: GENETICS 701
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Articulate critical perspectives on statistical analysis of genetics data, including the selection of rigorous methods, and identify the potential strengths and weaknesses of alternative approaches.

Audience: Graduate

2. Use statistical coding techniques and statistical software to analyze genetic data.
Audience: Graduate

3. Discuss, report and critically evaluate quantitative genetic research results.
Audience: Graduate

4. Describe the need for rigorous and reproducible genetic research approaches and develop best practices for their implementation in accordance with community and agency guidelines.
Audience: Graduate

GENETICS 808 – FROM GENES TO GRANTS: WRITING WINNING RESEARCH PROPOSALS IN GENETICS
2 credits.

Introduction to professional scientific writing in the field of genetics. Develop skills and expertise in scientific writing with a special emphasis on preparing grant and fellowship research proposals in genetics and genomics.
Requisites: GENETICS 701 and 702
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Complete a two-page research proposal in the "3 Aims" format and a three-page personal/professional statement on a forward-thinking project in genetics.
Audience: Graduate

2. Differentiate among common genetics research proposal structures, including the "3 Aims" approach, the NIH F31 style used by the Genetics training program for its preliminary examinations, other standard styles for federal grants and fellowships relevant to genetics (e.g., NIH, NSF, USDA, DOE), and familiarity with alternative or highly specialized proposal styles (e.g., HHMI Gilliam Fellowships).
Audience: Graduate

3. Identify key principles in scientific writing, such as supporting claims with evidence, including appropriate literature citations, balancing clarity with complexity, and when to establish boundaries between evidence ("results") and argument ("discussion").
Audience: Graduate

4. Demonstrate professional skills in peer review, editing, and mentorship, including how to provide critical feedback effectively and without negativity, and how to maintain social and cultural sensitivity during peer review.
Audience: Graduate

5. Recognize how to effectively use both written and visual communication in genetics.
Audience: Graduate

GENETICS/BOTANY/ENTOM/ZOOLOGY 820 – FOUNDATIONS OF EVOLUTION
2 credits.

Explore some of the most important themes and debates that have permeated evolutionary biology over the last 50 years. Read key papers related to each controversial topic, debate the pros and cons of competing viewpoints, and reflect on the relevance of the issue to contemporary evolutionary biology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain important evolutionary concepts, including basic population and quantitative genetics.
Audience: Graduate

2. Identify key ideas and controversies in evolutionary biology.
Audience: Graduate

3. Develop an ability to think about evolution in the manner of a professional in the field.
Audience: Graduate

4. Interpret and critique conceptual theories using rigorous logic and references to established biological phenomena.
Audience: Graduate

5. Summarize, interpret, and synthesize scientific concepts orally and in writing.
Audience: Graduate

6. Communicate and debate in a respectful and constructive manner with fellow evolutionary biologists, including as a peer reviewer.
Audience: Graduate

GENETICS/BIOCHEM/BOTANY 840 – REGULATORY MECHANISMS IN PLANT DEVELOPMENT
3 credits.

Molecular mechanisms whereby endogenous and environmental regulatory factors control development; emphasis on stimulus perception and primary events in the signal chain leading to modulated gene expression and cellular development.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020

GENETICS/AN SCI/POP HLTH 849 – GENOMIC EPIDEMIOLOGY
2 credits.

An introduction to genomic epidemiology, including a general overview of genetics and Mendelian and complex inheritance, as well as various elements of study design, such as participant ascertainment; phenotype definition; biologic sample selection; genotyping, sequencing, and quality control; measurement of covariates; and choice of analytic methods. Briefly covers original study designs; focuses on current study designs.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate and discuss genetic/genomic epidemiological literature.
Audience: Graduate

2. Design simple genetic/genomic epidemiological studies.
Audience: Graduate

3. Identify and apply appropriate tests of association between genetic variants and both qualitative and quantitative outcomes using either unrelated individuals or families.
Audience: Graduate

4. Summarize and interpret the results of genetic/genomic tests of association.
Audience: Graduate

GENETICS 875 – SPECIAL TOPICS
1-4 credits.

Special topics of current interest to graduate students.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GENETICS 885 – ADVANCED GENOMIC AND PROTEOMIC ANALYSIS
3 credits.

With the availability of genome sequences and high-throughput techniques, organismal physiology can now be examined on a global scale by monitoring the behavior of all genes or proteins in a single experiment. This course will present modern techniques in genomics and proteomics, with particular focus on analyzing the data generated by these techniques. Course material will cover genomic sequencing, comparative sequence analysis, phylogeny construction and phylogenomics, transcription factor motif discovery, DNA microarray analysis, techniques in mass spectrometry, proteomic screening methods, and protein-interaction network analysis. In addition to lecture time, the course includes computer lab where students get hands-on experience analyzing genomic and proteomic datasets. Students should have coursework in general statistics and intermediate or advanced genetics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

GENETICS/B M E/B M I/BIOCHEM/CBE/COMP SCI 915 – COMPUTATION AND INFORMATICS IN BIOLOGY AND MEDICINE
1 credit.

Participants and outside speakers will discuss current research in computation and informatics in biology and medicine. This seminar is required of all CIBM program trainees.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss how methods from computer science, statistics, information science and engineering are applied to problems in biology, medicine and population health
Audience: Graduate

2. Recognize and be able to define applications in translational bioinformatics, clinical informatics and public health informatics
Audience: Graduate

GENETICS/AN SCI/DY SCI 951 – SEMINAR IN ANIMAL BREEDING
0-1 credits.

Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

GENETICS 990 – RESEARCH
1-12 credits.

Independent laboratory research in preparation of a graduate thesis under supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

GENETICS 993 – SEMINAR IN GENETICS
1 credit.

Various aspects of genetics: Drosophila, maize, immunogenetics, developmental genetics, or other special topics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2024

GEOGRAPHY (GEOG)

GEOG 101 – HUMAN GEOGRAPHY: SPACE, PLACE, SOCIETY, AND POLITICS
4 credits.

We live in a world that is both interconnected and fragmented. Data, capital, cultural fads, and environmental issues span borders. At the same time, these movements do not mean borders have disappeared nor do they undermine the meaningfulness of place in people's lives. Human geography explores the economic, political, social, cultural, and technological dynamics that drive interrelationships across and divisions in space. Human geography is about the why of the where. It is about the experience of feeling connected and disconnected, stuck in place, out of place, included and excluded. We explore multiple meanings and experiences of space, which we encounter through watching or playing sport, following social media accounts of geopolitics, traveling to another country, or spending time in our hometowns.
Requisites: None
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define key human geographic concepts, including place, space, territory, imagined geographies, and geopolitics.
Audience: Undergraduate

2. Identify human geographic concepts in everyday life and current events.
Audience: Undergraduate

3. Discuss the defining features and contributions of some human geography subareas.
Audience: Undergraduate

4. Explain how political and economic dynamics, past and present, have created uneven geographies across the globe and at different scales.
Audience: Undergraduate

5. Discuss interdependencies (and conflicts) across the globe, among nation-states, within cities, between humans and non-humans.
Audience: Undergraduate

6. Discuss the role of nation-states in spatializing sovereignty and regulating mobility.
Audience: Undergraduate

7. Discuss how spatial divisions are created, the power such divisions have in different groups of people's lives, and how people try to reshape these dynamics.
Audience: Undergraduate

8. Share course content and demonstrate key course concepts via writing and speaking.
Audience: Undergraduate

GEOG 104 – INTRODUCTION TO HUMAN GEOGRAPHY
3 credits.

Human geographers explore socio-spacial relations, processes and representations of the world in which we live. Engages economic, political, urban, socio-cultural and environmental geographic perspectives to investigate patterns and processes that have come to be associated with 'globalization'.
Requisites: Not open to students with credit for GEOG 101
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No

GEOG/ENVIR ST 120 – INTRODUCTION TO THE EARTH SYSTEM
3 credits.

Introduction to how the Earth system works and what makes Earth livable. Gain appreciation for how the atmosphere, oceans, life, and earth's surface interact to shape our local, regional and global landscapes.
Requisites: Not open to students with credit for ENVIR ST/GEOG 127
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GEOG/ENVIR ST 127 – PHYSICAL SYSTEMS OF THE ENVIRONMENT
4 credits.

An introduction to natural environmental systems, emphasizing the interconnections between the systems of the solid earth (minerals, rocks, soils), the hydrosphere (water in all its forms), the biosphere, and the atmosphere. Emphasizes connections between basic concepts and specific environmental issues through hands-on case studies, lab projects, and field trips to collect samples and observations for lab projects.
Requisites: Not open to students with credit for ENVIR ST/GEOG 120
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe at a basic level the most important processes of the Earth system, including formation and weathering of rocks and minerals, soil development and erosion, atmospheric circulation, and the global cycles of water and carbon.
Audience: Undergraduate

2. Apply concepts from this course to understand environmental issues such as global climate change and the sustainability of agriculture, and natural hazards such as earthquakes and floods, and make informed contributions to public debate and decision-making on how to address these issues and hazards.
Audience: Undergraduate

3. Identify important research methods, through case studies and labs, that are the basis of modern Earth system science.
Audience: Undergraduate

GEOG/ATM OCN/ENVIR ST 131 – CLIMATE CHANGE, CLIMATE ACTION: THE SOCIAL DIMENSIONS OF CLIMATE CHANGE
3-4 credits.

The planet's climate is changing, and humans are causing it. This means that climate change is not only a topic of study for the biophysical sciences, but also for the social sciences. Focuses on the social dimensions of climate change: the social, political, environmental, and economic factors that shape the drivers and impacts of climate change and the ability of different places and communities to respond. Examines both the social problems that arise from climate change and the social solutions to mitigate and adapt to the climate crisis. How do these social dimensions shape climate change, and how does climate change shape different social dimensions? What climate solutions are being proposed, what climate solutions are already being implemented, and how can we critically evaluate the uneven impacts of those solutions across society and space?
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Explain the basic biophysical drivers of climate change and situate them in their broader socio-spatial contexts.
Audience: Undergraduate

2. Describe core concepts in the climate social sciences, including mitigation, adaptation, vulnerability, resilience, and climate justice.
Audience: Undergraduate

3. Discuss the broad contours of the social dimensions of climate change, including how they relate to political economies, energy systems, cities, agriculture, and human migration.
Audience: Undergraduate

4. Critically assess different climate solutions, their feasibility, the obstacles to their implementation, and their uneven impacts.
Audience: Undergraduate

5. Connect course material to climate justice and policy work occurring locally near campus, across Wisconsin, or in student hometowns.
Audience: Undergraduate

GEOG/ENVIR ST 139 – GLOBAL ENVIRONMENTAL ISSUES
3 credits.

Explores the global and local nature of environmental problems, including issues of climate change, food, energy, globalization, deforestation, biodiversity loss, resource access, environmental justice, and population. Considers how we should analyze and act on environmental problems as we confront the apparently daunting scale of such issues. What appear to be single global environmental issues are actually composed of many smaller, context-specific, and place-dependent problems or conflicts. Through an interdisciplinary and geographic perspective, these issues can be understood and addressed at the scale of our lived lives.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the scientific basis of climate change, population growth, desertification, deforestation, water quality and quantity impairments, and the environmental challenges of agriculture and energy production.
Audience: Undergraduate

2. Critically assess the causal factors and drivers associated with global environmental issues.
Audience: Undergraduate

3. Explain the political context in which environmental issues are framed as global problems.
Audience: Undergraduate

4. Identify potential solutions to global environmental issues, and obstacles to their implementation.
Audience: Undergraduate

5. Describe your own relationship to global environmental issues and how global environmental issues manifest locally.
Audience: Undergraduate

GEOG 170 – OUR DIGITAL GLOBE: AN OVERVIEW OF GISCIENCE AND ITS TECHNOLOGY
3 credits.

Introduction to the collection, representation and use of geospatial data. Introduction to geospatial technologies like GPS, Google Earth, satellite imagery, and GIS, and provides a critical understanding of the strengths and limitations of spatial representations (e.g., maps, images).
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe fundamental concepts and knowledge in geospatial fields, such as geospatial data, geographic coordinates, geographic coordinate systems, projection, maps, etc.
Audience: Undergraduate

2. Analyze and interpret aerial photos and remote sensing images.
Audience: Undergraduate

3. Describe the functionality of maps.
Audience: Undergraduate

4. Design and make a map using GIS tools (e.g., ArcGIS online).
Audience: Undergraduate

5. Build a solid foundation for more specialized courses on GIS, cartography, remote sensing, and GPS.
Audience: Undergraduate

6. Identify several widely used geospatial software and tools (e.g., Google Earth).
Audience: Undergraduate

GEOG 175 – TOPICS IN GEOGRAPHY
3 credits.

Explores emerging topics in human geography (e.g., economic geography, urban geography, political geography) and people-environment geography (e.g., political ecology, environmental history).
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Explain foundational concepts in human geography and people-environment geography.
Audience: Undergraduate

2. Identify social scientific theories and methods and apply them to geographical issues.
Audience: Undergraduate

3. Connect pressing social and ecological issues to human and people-environment geographical theory and methods.
Audience: Undergraduate

GEOG 198 – DIRECTED STUDY
1-2 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2013

GEOG 199 – DIRECTED STUDY
1-2 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2004

GEOG/ENVIR ST/SOIL SCI 230 – SOIL: ECOSYSTEM AND RESOURCE
3 credits.

Soils are fundamental to ecosystem science. A systems approach is used to investigate how soils look and function. Topics investigated include soil structure, biology, water, fertility, and taxonomy as well as the human impact on the soil environment.
Requisites: Not open to students with credit for SOIL SCI 301
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the significance of soil and its properties

Audience: Undergraduate

2. Identify and describe key components of soil solids and pores
Audience: Undergraduate

3. Explain and predict the interaction of water with soil
Audience: Undergraduate

4. Interpret basic nomenclature used in soil science
Audience: Undergraduate

5. Analyze that causes and solutions for sustainability of soil resources
Audience: Undergraduate

6. Quantify the interaction of clay surfaces with a soil solution
Audience: Undergraduate

7. Describe the role of soils in many different ecosystems
Audience: Undergraduate

8. Link soil orders with biomes and describe soil's edaphic character
Audience: Undergraduate

9. Analyze sustainability issues using a systems-based approach
Audience: Undergraduate

GEOG/ART HIST/ENVIR ST/HISTORY/LAND ARC 239 – MAKING THE AMERICAN LANDSCAPE
3-4 credits.

Traces the history and evolution of the American cultural landscape from precolonial times to present. Explores how class, ethnic, and racial inequality have shaped the appearance of the American landscape over time, and how that landscape in turn has affected relationships between people and groups through the present day. Examines extraordinary things (civic structures (like our State Capitol), National Parks, War Memorials) and more ordinary kinds of places (mining towns, cotton plantations, sites of recreation and leisure, and suburban tract housing) to stimulate critical thinking about how these places have served people and groups unequally and disproportionately over time and across space. Considers complex meanings of American spaces and places to different people and groups, stimulating empathy and encouraging participation in a multicultural society.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe and interpret the American landscape as a richly layered historical document mediated by complex relationships between people and groups
Audience: Undergraduate

2. Explain how the American cultural landscape has affected present day circumstances regarding ethnicity and race as well as racial and ethnic inequalities
Audience: Undergraduate

3. Articulate ways in which historical change manifest in buildings, enclosed spaces, and other elements of the American landscape reveal racial, ethnic, class and gender dynamics between and among people and groups over time
Audience: Undergraduate

4. Enlist forms of historical evidence – maps (current and historic), photographs (aerial and otherwise), historical newspapers, census records, deeds and land records – to interpret landscapes and landscape change
Audience: Undergraduate

5. Explain the American landscape as a product of competing interests, which will demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others
Audience: Undergraduate

GEOG/ASIAN/HISTORY/POLI SCI/SOC 244 – INTRODUCTION TO SOUTHEAST ASIA: VIETNAM TO THE PHILIPPINES
4 credits.

As an introduction to Southeast Asia, covers the ethnic, cultural, religious, and political histories of the region from the classical states period to the present, with an emphasis on colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century, including an exposure to region's contemporary literature. Not open to students who completed LCA 244 prior to Fall 2019.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine the ethnic, cultural, religious, and political histories of Southeast Asia from the classical states period to the present.
Audience: Undergraduate

2. Analyze colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century in Southeast Asia.

Audience: Undergraduate

3. Explore contemporary literature in Southeast Asia.
Audience: Undergraduate

GEOG/HISTORY/POLI SCI/SLAVIC 253 – RUSSIA: AN INTERDISCIPLINARY SURVEY
4 credits.

Comprehensive interdisciplinary survey of Russian civilization from its beginnings through the present day.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025

GEOG/HISTORY/POLI SCI/SLAVIC 254 – EASTERN EUROPE: AN INTERDISCIPLINARY SURVEY
4 credits.

Comprehensive interdisciplinary survey of East European culture, society, politics, and literature from its beginnings to the present day.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GEOG/AFROAMER/ANTHRO/C&E SOC/HISTORY/LACIS/POLI SCI/SOC/SPANISH 260 – LATIN AMERICA: AN INTRODUCTION
3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze Latin American culture and society from an interdisciplinary perspective.
Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.
Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.
Audience: Undergraduate

GEOG/AFRICAN/AFROAMER/ANTHRO/HISTORY/POLI SCI/SOC 277 – AFRICA: AN INTRODUCTORY SURVEY
4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze African society and culture from a multidisciplinary perspective.
Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.
Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.
Audience: Undergraduate

GEOG 300 – WEIRD GEOGRAPHIES
3 credits.

An opportunity to re-imagine human geography. The history of geography is particularly violent and exclusive. It is well known that systems of colonialist exploitation, theft, kidnapping, and murder were facilitated in part by the work of modern cartographers and "explorers." The discipline that we have today is a product of these earlier colonial epistemologies and ideologies. The science that emerged from these fields - geography - institutionalizes and reproduces many the ideas and viewpoints of their modern practitioners. Creates a space to re-imagine and re-invent what the field of human geography might be. Interrogates the colonial history of geography as a social science and practice. Explores several ways of thinking about space and social life that might not fit cleanly into the discipline at large.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe many of the key debates, concepts, objects, and problems in geography.
Audience: Undergraduate

2. Read and research critical scholarship.
Audience: Undergraduate

3. Critically analyze several theoretical, practical, and scientific perspectives on space and place.
Audience: Undergraduate

4. Identify effective strategies for developing and conducting interdisciplinary research.
Audience: Undergraduate

5. Recall approaches to researching sociospatial topics.
Audience: Undergraduate

6. Identify the basics of writing and editing academic theoretical research.

Audience: Undergraduate

7. Develop curriculum that considers geography in a new light.
Audience: Undergraduate

GEOG 301 – REVOLUTIONS AND SOCIAL CHANGE
3 credits.

An introduction to the spatial dimensions of social movements, social struggles, and radical social change. Provides a range of critical and theoretical perspectives for reading and interpreting space as a tool of social transformation. Explores a variety of historical examples from the nineteenth century to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify the key debates in Social and Radical Geography.
Audience: Both Grad & Undergrad

2. Demonstrate the basics of social movements, including their strategies, tactics, and spatialities.
Audience: Both Grad & Undergrad

3. Summarize the key issues in the recent history of social struggles.
Audience: Both Grad & Undergrad

4. Explain approaches to researching social struggles via academic and popular sources.
Audience: Undergraduate

5. Demonstrate the basics of creating academic scholarship on social struggles in a geographic context.
Audience: Undergraduate

6. Produce academic scholarship on social struggles in a geographic context.
Audience: Graduate

7. Use radical pedagogy for guiding classroom discussions.
Audience: Graduate

8. Develop a personalized set of approaches to mediating challenging geographical and theoretical concepts for a broad range of learners.
Audience: Graduate

GEOG 302 – ECONOMIC GEOGRAPHY: LOCATIONAL BEHAVIOR
4 credits.

Classic location theory with modern extensions. Examination of theoretical statements and selected empirical examples. Principles of economic regionalization and network analysis with emphasis on spatial implications of the economic development process.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

GEOG/URB R PL 305 – INTRODUCTION TO THE CITY
3-4 credits.

Investigates urbanization as a general process, as well as the resulting contemporary physical, social, cultural and political- economic forms of cities. Emphasis will be placed on the history and current forms of spatial and social segregation of cities by race, class, ethnicity, and gender. The myriad ways that cities have addressed the tensions emerging from this history of spatial and social segregation will be highlighted. Further, emphasis will be placed on understanding the experiences of those most-affected by historical and continuing segregation.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the largest factors influencing where, when, and how cities develop.
Audience: Undergraduate

2. Explain historical and contemporary patterns of social inclusion and exclusion in cities and identify and explain their underlying causes and effects.
Audience: Undergraduate

3. Apply lessons of the past to the puzzles of today's cities.
Audience: Undergraduate

4. Recognize and question assumptions about current city form, including racial segregation.
Audience: Undergraduate

5. Recognize and question assumptions about the experience of contemporary urban dwellers, particularly as these are shaped by race, class, and gender.
Audience: Undergraduate

6. Develop a consciousness of self and others.
Audience: Undergraduate

7. Participate effectively in a multicultural society by embracing your role as a citizen of Madison; valuing the positive aspects of American urban culture, including diversity in its many forms; and understanding cities as primarily social entities and problems of organized complexity.
Audience: Undergraduate

GEOG 307 – INTERNATIONAL MIGRATION, HEALTH, AND HUMAN RIGHTS
3 credits.

Provides an introduction to health and human mobility in a global context. Mobility is part of the human condition and international law enshrines freedom of movement, yet nation-states reserve the right to exclude. Examines the development of laws and institutions governing people on the move; how these solidify or reshape existing global, racial-ethnic, class, and gender hierarchies; and how they contribute to individual and population-level health.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the principal economic, political, and social forces and government policies fueling international migration and attitudes toward it.
Audience: Undergraduate

2. Explain the principal economic, political, and social forces and government policies that create the conditions for protracted population displacements.
Audience: Undergraduate

3. Explain the principles of the structural determinants of health and life course frameworks.
Audience: Undergraduate

4. Apply the structural determinants of health framework to explain how governmental policies and practices shape international migrants' health
Audience: Undergraduate

GEOG/CHICLA/GEN&WS 308 – LATINX FEMINISMS: WOMEN'S LIVES, WORK, AND ACTIVISM
3 credits.

An examination of Latinx women's lives, experiences, and activism through the lens of testimonio, life histories, and feminist writings rooted in social justice movements and critical pedagogies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and describe key theoretical concepts and frameworks used in interdisciplinary studies of Latinas/xs and other women of color in the U.S.
Audience: Undergraduate

2. Explain the historical origins of Chicanx and Latinx feminisms and their relationship with social justice movements.
Audience: Undergraduate

3. Critically analyze the works of leading Latinx feminist scholars and theorists, who have written on issues of race, ethnicity, gender, LGBTQ identities, labor, color, citizenship status, and generation.
Audience: Undergraduate

4. Explore different writing genres and methodologies used in the study of women's lives, experiences, and activism.
Audience: Undergraduate

5. Apply the framework of testimonio to complete a digital storytelling project, examining a key theme or issue in women's lives.
Audience: Undergraduate

GEOG/ENVIR ST 309 – PEOPLE, LAND AND FOOD: COMPARATIVE STUDY OF AGRICULTURE SYSTEMS
3 credits.

Introduction to how and why humans have transformed natural landscapes around the world, including tropical deforestation. Exploration of different agricultural systems, and topics such as food security, land scarcity, bioenergy and the impacts of food production on the environment.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026

GEOG/INTL ST 311 – THE GLOBAL GAME: SOCCER, POLITICS, AND IDENTITY
3-4 credits.

Soccer (or football) is played in almost every part of the world. Soccer will be used as a lens through which to think critically about a range of issues within our own societies and around the world. This includes examining the relationship between European imperialism and the globalization of soccer in the early 20th century; thinking about who gets to play (and who gets paid) across different contexts; and analyzing how soccer is both globally networked and intensely local in its passions and rivalries. Draws from a range of perspectives on soccer, from those who consider it to be an opium for the masses to those who see it as a vehicle for positive social change, in order to illuminate some of the big questions facing the world today.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and describe the ways that soccer shapes societies and vice-versa.
Audience: Undergraduate

2. Demonstrate an understanding of different theoretical approaches to studying soccer.
Audience: Undergraduate

3. Analyze sites in which soccer can be a vehicle for contesting political and cultural injustices.
Audience: Undergraduate

4. Apply course insights to broader debates about globalization, identities, and inequalities.
Audience: Undergraduate

GEOG/INTL ST 315 – UNIVERSAL BASIC INCOME: THE POLITICS BEHIND A GLOBAL MOVEMENT
3 credits.

Should all individuals in society receive a regular transfer of cash from the state without any strings attached? If that question had been posed fifteen years ago, it would likely have been dismissed as unrealistic, undesirable, or just plain crazy. In recent years, however, the idea of introducing a universal basic income [UBI] has gained a lot of traction around the world. Growing inequalities, financial crises, fears about jobs being automated, and the COVID-19 pandemic have all helped to put UBI on the political map. But where did the idea come from? How is it traveling to different parts of the world? And on what grounds do different advocates justify their claims? Address these questions and more by exploring the history, philosophy, and political economy of UBI from a range of perspectives. Ongoing UBI experiments from different parts of the world will also be examined.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Describe the histories and philosophies that have shaped UBI claims.
Audience: Undergraduate

2. Differentiate UBI from other forms of social assistance.
Audience: Undergraduate

3. Compare and contrast different schools of thought regarding UBI.
Audience: Undergraduate

4. Evaluate evidence from recent and ongoing UBI experiments.
Audience: Undergraduate

5. Produce your own arguments about UBI.
Audience: Undergraduate

GEOG 318 – INTRODUCTION TO GEOPOLITICS
3 credits.

Introduction to the contemporary study of geopolitics, featuring the main concepts and research themes encountered in this field. Examine the formation of geopolitical images of the world, where these images come from, and how they have shaped our thinking and politics over time.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Define and distinguish between traditional and critical approaches to geopolitics.
Audience: Both Grad & Undergrad

2. Discuss the main elements of the geopolitical imagination that shape our understanding of the world and our place in it.
Audience: Both Grad & Undergrad

3. Describe, provide examples of, and critically analyze the formal, practical, and popular geopolitics that interact to produce our geopolitical understandings of the world.
Audience: Both Grad & Undergrad

4. Trace the continuities and discontinuities of United States geopolitics across imperial, cold war, post-cold war, and post-9/11 eras.
Audience: Both Grad & Undergrad

5. Situate course themes in the larger contemporary critical geopolitics literature.
Audience: Graduate

GEOG/INTL ST 319 – GLOBAL MIDDLE EAST
3 credits.

The Middle East has been central to the shaping of our modern world. From its long-standing geopolitical significance to global trade routes, to its importance in the rise and consolidation of European power in the 19th and 20th centuries, to its more contemporary significance as a critical arena in which some of our most pressing political and security challenges play out, the Middle East is a region shaped by global webs of power and influence. Taking an interdisciplinary approach, explore the multi-scalar historical and contemporary forces and dynamics that have produced and continue to shape the Middle East, including colonialism and decolonization, oil and energy politics, wars, and revolutions and counterrevolutions, among other topics. Through engagement with a range of theoretical frameworks and literatures, engage in critical study of the forces, processes, and dynamics that have shaped the Middle East and its intimate entanglements with the global.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Describe the global historical forces through which the region came into being and the contemporary transnational forces and dynamics that continue to animate it.
Audience: Undergraduate

2. Identify recent revolutionary and counterrevolutionary transformations in the Middle East and North Africa.
Audience: Undergraduate

3. Develop a nuanced and complex analysis of the region beyond violence, terrorism, and war.
Audience: Undergraduate

4. Analyze dominant representations and discourses of the Middle East and its heterogeneous communities.
Audience: Undergraduate

5. Apply research, critical thinking, and writing skills to analyze a contemporary social issue pertaining to the Middle East and its entanglements with the global.
Audience: Undergraduate

GEOG/GEOSCI 320 – GEOMORPHOLOGY
3 credits.

Principles and analysis of geomorphic processes and resulting land forms.
Requisites: GEOSCI/ENVIR ST 106, GEOSCI 100, 109, 204, ENVIR ST/GEOG 120, 127 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Recognize the processes that cause rivers to transport sediment.
Audience: Both Grad & Undergrad

2. Recognize the processes by which glaciers slip over or deform their beds and produce landforms.
Audience: Both Grad & Undergrad

3. Recognize the processes that govern hill slope stability.
Audience: Both Grad & Undergrad

4. Identify and explain the processes that govern the geomorphology of coastal regions.
Audience: Both Grad & Undergrad

5. Describe why parts of Wisconsin look the way they do.
Audience: Both Grad & Undergrad

6. Calculate glacier sliding speeds from glacier profiles.
Audience: Graduate

7. Calculate sediment transport by rivers.
Audience: Graduate

GEOG/ATM OCN/ENVIR ST 322 – POLAR REGIONS AND THEIR IMPORTANCE IN THE GLOBAL ENVIRONMENT
3 credits.

Reviews the past, present, and future of the Arctic and Antarctic regions. Covers the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and future state of the Arctic and Antarctica as projected by earth system models. Also explores the role of the polar regions in the earth's system and associated global climatic feedbacks.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe the history, geography, atmospheric and ocean circulations, permafrost, ice sheets, glaciers, and the future state of the Arctic and Antarctic Regions.
Audience: Both Grad & Undergrad

2. Explain the major theories and concepts of the Arctic and Antarctic regions.
Audience: Both Grad & Undergrad

3. Identify how interactions occur between the major components of each polar region and their influence on global processes and climate.
Audience: Both Grad & Undergrad

4. Recognize the need for multi-disciplinary research to further our understanding of the polar regions and their role in the global system.
Audience: Both Grad & Undergrad

5. Integrate thesis or dissertation research directly or indirectly with polar processes research, thereby gaining better insight into Arctic and Antarctic regions.
Audience: Graduate

GEOG/ENVIR ST 331 – ENERGY JUSTICE
3-4 credits.

What would a just energy transition look like? How might a shift from fossil fuels to low-carbon energy sources connect to questions around social justice, environmental racism, democracy, and anticolonialism? Energy systems are not just technical systems: they are also social, political, environmental, and spatial systems, intimately connected to our everyday lives. That means that changes to our energy systems - from fossil fuels to low-carbon energy sources, in how and where we extract and generate energy, and to the processes of energy decision-making - have far-ranging effects. Examines our shifting energy geographies through the frameworks of energy justice, asking how we might think socially and spatially about decarbonization, electrification, and energy access in a moment of climate crisis.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Explain the technical, sociopolitical, economic, environmental, and spatial dimensions of different energy resources.
Audience: Both Grad & Undergrad

2. Describe core concepts in the energy social sciences, such as energy justice, energy democracy, and energy poverty.
Audience: Both Grad & Undergrad

3. Describe the socio-political institutions that govern energy systems and the energy justice impacts of energy policies.
Audience: Both Grad & Undergrad

4. Discuss how energy decisions are impacted by environmental, technical, sociopolitical, and spatial factors.
Audience: Both Grad & Undergrad

5. Identify energy justice and policy work across scales, from the local to the global.
Audience: Both Grad & Undergrad

6. Pose a research question, conduct research, and write a compelling argument on an energy-related topic.
Audience: Undergraduate

7. Pose an advanced research question, review peer-reviewed literature, and write a compelling argument on an energy-related topic.
Audience: Graduate

GEOG/ATM OCN/ENVIR ST 332 – GLOBAL WARMING: SCIENCE AND IMPACTS
3 credits.

Offers a fundamental understanding of how and why global warming is happening and what to expect in the future. Investigate and discuss the evidence for change, the science that explains these observations, predicted impacts on humans and ecosystems, and the societal debate over proposed solutions.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the physical basis by which CO2 and other greenhouse gases control atmospheric temperatures.
Audience: Undergraduate

2. Explain the trends and drivers of historical and future climate change using a combination of observational data, climate model simulations, and hands-on exercises with a simple layer model.
Audience: Undergraduate

3. Summarize the global carbon cycle, its major reservoirs and fluxes, and the role of natural and anthropogenic processes.
Audience: Undergraduate

4. Apply concepts of climate feedbacks and climate sensitivity both qualitatively and quantitatively.
Audience: Undergraduate

5. Discuss and evaluate impacts of anthropogenic emissions on the physical climate system, ecosystems, and human development.
Audience: Undergraduate

6. Evaluate current and proposed strategies for climate mitigation, adaptation, and geoengineering.
Audience: Undergraduate

GEOG/ENVIR ST 333 – GREEN URBANISM
3 credits.

Over half of the world's population now lives in urban areas, with an expected increase of 2.5 billion people in the next 30 years. As urbanization (broadly defined as the conversion of previously undeveloped lands into urbanized uses) continues and intensifies, we are faced with a number of environmental issues, for instance, fragmentation and destruction of habitats, and decreased air and water quality. Explore how urbanization impacts ecological processes and resulting environmental outcomes, strategies for "designing with nature," and behavioral, planning, and policy responses to urban environmental problems.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe ecological processes as they relate to urbanization
Audience: Undergraduate

2. Describe the social, economic, and environmental dimensions of sustainable communities and identify potential trade-offs and interrelationships among these dimensions
Audience: Undergraduate

3. Analyze the causes of and solutions for the sustainability challenge of sustainable cities and communities
Audience: Undergraduate

4. Analyze local plans for sustainability strategies
Audience: Undergraduate

5. Identify strategies that cities can employ in preparing for the effects of the changing climate
Audience: Undergraduate

GEOG/ATM OCN/ENVIR ST/GEOSCI 335 – CLIMATIC ENVIRONMENTS OF THE PAST
3 credits.

Climate change at timescales from the last several million years to the last 100 years, with emphasis on more recent timescales. Examines how climate variability arises from interplay between external forcings, feedbacks within the earth system, and (more recently) human activity.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the major climatic events and trends during the Quaternary, spanning timescales from the last 50,000,000 years to the last 100 years.
Audience: Undergraduate

2. Identify the physical processes controlling the behavior of the earth system and its components (atmosphere, oceans, cryosphere, biosphere, etc.).
Audience: Undergraduate

3. Discuss how climatic variability results from a combination of external forcings and internal dynamics within the earth system.
Audience: Undergraduate

4. Recognize how paleoclimatologists collect, date, and analyze a staggering variety of paleoclimatic records, including ocean and lake sediment cores, ice cores, tree rings, corals, and speleothems.
Audience: Undergraduate

5. Analyze and critically evaluate climate experiments that are simulated by earth system models.
Audience: Undergraduate

6. Think and write critically, with particular attention to critically reading the scientific literature and critically employing the climate proxies and models used by paleoclimatologists.
Audience: Undergraduate

GEOG/ENVIR ST 336 – INTERNATIONAL ENVIRONMENTAL GOVERNANCE
3 credits.

Examines the challenges and limitations of international environmental governance. Explore governance through international law and conventions, activism, market mechanisms, foreign investment, and emerging corporate accountability practices. Considers new social and environmental complaint mechanisms and the growing role of reputational risk in shaping corporate behavior. Critically discusses and debates various aspects of international environmental governance.
Requisites: Sophomore standing
Course Designation: Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe a range of ways that international environmental governance occurs.
Audience: Both Grad & Undergrad

2. Assess the implications of different policy decisions related to international environmental governance.
Audience: Both Grad & Undergrad

3. Explain in detail a specific case of international environmental governance.
Audience: Graduate

GEOG/ENVIR ST 337 – NATURE, POWER AND SOCIETY
3 credits.

Explores the links between nature, power and society in today's world. Considers the complex relationships between humans and the earth's resources, including food, energy, physical materials, water, biota, and landscapes. Examines issues linked to population and scarcity, resource tenure, green consumerism, political economy, environmental ethics, risks and hazards, political ecology, and environmental justice.
Requisites: Sophomore standing. Not open to students with credit for ENVIR ST 112
Course Designation: Core GenEd - Social & Behavioral Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe key elements that link nature, power, and society.
Audience: Undergraduate

2. Explain the social, economic, and/or environmental dimensions of the sustainability challenges regarding a range of important policy issues with environmental and sustainability implications.
Audience: Undergraduate

3. Apply sustainability principles and/or frameworks to address the challenges associated with a range of development issues that have environmental implications.
Audience: Undergraduate

4. Analyze the causes of and solutions for sustainability challenges of various development policy decisions.
Audience: Undergraduate

GEOG/BOTANY 338 – ENVIRONMENTAL BIOGEOGRAPHY
3 credits.

Explores how physical and biological factors affect the distribution of terrestrial biomes, ecosystem types, and biodiversity, as well as the role of disturbance and recent human activities on differences in past and modern day species distributions.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify patterns and mechanisms of local to global gene, species, ecosystem and biome distributions.
Audience: Both Grad & Undergrad

2. Describe how past, current and future environmental change affect biogeography.
Audience: Both Grad & Undergrad

3. Explain how humans affect geographic patterns of biodiversity.
Audience: Both Grad & Undergrad

4. Discuss major paradigm changes in biogeography and how changes in conceptual frameworks and technology have altered interpretations of data and understanding of processes.
Audience: Both Grad & Undergrad

5. Apply concepts from biogeography to current environmental problems.
Audience: Both Grad & Undergrad

6. Explain how legacies of colonialism and scientific racism affect historical and current biases in the representation, methods, practice, and applications of biogeography.
Audience: Both Grad & Undergrad

7. Discuss and critique the primary literature (scientific articles in peer-reviewed journals) in biogeography.
Audience: Both Grad & Undergrad

8. Identify a controversy in biogeography and state the problem, trace its origins in the literature, provide arguments on opposing sides from the peer-reviewed literature, and what implications it has on current thinking and practice in conservation or sustainable use.
Audience: Graduate

GEOG/ENVIR ST 339 – CONSERVATION AND CLIMATE CHANGE - LOCAL TO INTERNATIONAL STRATEGIES
3-4 credits.

Takes a geographical perspective to studying conservation, considering both the physical and social dimensions of environmental problems to develop more effective solutions. Analyzing major debates in conservation reveals how values and institutions shape environmental priorities and strategies. Case material comes from around the world and covers a range of issues, from environmental justice to elephants, but throughout the course there is special emphasis on biodiversity loss and climate change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the role of values, ecology, and institutions in shaping environmental threats and conservation strategies.
Audience: Both Grad & Undergrad

2. Analyze the history of conservation thought and action in the United States.
Audience: Both Grad & Undergrad

3. Examine the uneven distribution of environmental harms both globally and within the U.S. and how this is affected by race, class, and geography.
Audience: Both Grad & Undergrad

4. Evaluate the strengths and limits of rule-based and incentive-based conservation programs.
Audience: Both Grad & Undergrad

5. Recognize the key challenges and opportunities for biodiversity conservation in the tropics.
Audience: Both Grad & Undergrad

6. Summarize the evolution of domestic and international policy to address climate change.
Audience: Both Grad & Undergrad

7. Evaluate local efforts to adapt to climate change.
Audience: Both Grad & Undergrad

8. Produce an actionable analysis of an environmental issue of interest to the graduate student that integrates the social and biophysical dimensions of the issue.
Audience: Graduate

GEOG 340 – WORLD REGIONS IN GLOBAL CONTEXT
3 credits.

Survey of development and change within each of the world's regions (e.g., Africa, Southeast Asia). Attention devoted to environment and society; history, economy, and demographic change; culture and politics; future challenges; key actors.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe geographic characteristics of world regions using multiple forms of knowledge (e.g., Sub-Saharan Africa, Southeast Asia).
Audience: Both Grad & Undergrad

2. Discuss how travel and fieldwork can generate unique insights about world regions.
Audience: Both Grad & Undergrad

3. Describe four major geographic concepts about world regions: identity, diversity, uneven development, and global interdependencies. (
Audience: Both Grad & Undergrad

4. Describe within each world region key features of environment and society; history, economy and demographic change; and culture and politics.
Audience: Both Grad & Undergrad

5. Compare and contrast each world region and identify the advantages and limitations of a regional approach to understanding the world.
Audience: Both Grad & Undergrad

6. Analyze the concept of "region" and determine how and when it is valid.
Audience: Graduate

GEOG 342 – GEOGRAPHY OF WISCONSIN
3 credits.

Overview of the physical and human geography of Wisconsin, with an emphasis on the physical, historical, and cultural processes that shaped the Badger State.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain at a basic level the processes that shaped the physical geography of the state, including its bedrock geology, glacial landforms, soils, and natural plant communities.
Audience: Undergraduate

2. Characterize the past and present physical geography of particular places within the state using key information sources, including public land survey records and web-based soil surveys.
Audience: Undergraduate

3. Explain at a basic level how the cultural geography of Wisconsin reflects the Native Nations that have lived in this place for many thousands of years, the expropriation of their lands in the 19th and 20th centuries, and the new communities and cultural landscapes created by immigrant settlers.
Audience: Undergraduate

4. Recognize distinctive characteristics of Wisconsin's rural geography, including dairy farming and other kinds of agriculture that developed here, the history of logging and the cutover lands, and emergence of tourism and the conservation movement.
Audience: Undergraduate

5. Use key information resources on rural geography, such as General Land Office records and first-hand accounts of Native American and immigrant communities.
Audience: Undergraduate

6. Explain at a basic level the historical development and present-day spatial structures of Wisconsin cities, especially the geography of industrial development, racism, and segregation in the Milwaukee metropolitan area.

Audience: Undergraduate

GEOG 344 – CHANGING LANDSCAPES OF THE AMERICAN WEST
3 credits.

Environmental change in the landscapes of the American West, in the recent past, present, and future, from the physical science background to human-environment interactions.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Social Science or Natural Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain at a basic level the distinctive landforms and other features of major regions of the American West.
Audience: Both Grad & Undergrad

2. Describe at a basic level current scientific perspectives on the mechanisms and causes of recent and future changes in vegetation, fire regimes, and hydrology of the American West.
Audience: Both Grad & Undergrad

3. Use and critically evaluate key information resources to characterize the environments of the recent past and change since then, from first-hand accounts by Native peoples of the West to General Land Office records and historical or modern images.
Audience: Both Grad & Undergrad

4. Critically evaluate news reporting and advocacy of popular media on environmental change in the American West.
Audience: Both Grad & Undergrad

5. Critically analyze debates on the environmental impacts of major land uses in the American West, such as irrigated agriculture, outdoor recreation, forest products production, and livestock grazing, taking into account the economic, cultural, and political interests and perspectives of the various sides in each debate.
Audience: Both Grad & Undergrad

6. Develop an in-depth understanding of recent scientific research or public advocacy/activism on one specific aspect of environmental change in the American West.
Audience: Graduate

7. Present explanations of issues of environmental change at the level of an intermediate undergraduate class.
Audience: Graduate

GEOG/AMER IND/ENVIR ST 345 – CARING FOR NATURE IN NATIVE NORTH AMERICA
3 credits.

Surveys the concepts, practices, and issues associated with caring for nature in American Indian communities.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Interpret the diverse arrangements for tribal sovereignty, indigenous landtenure, and claims to natural resources and the environment.
Audience: Undergraduate

2. Illustrate natural resource and environmental issues important to bothAmerican Indians and Wisconsin Indians.
Audience: Undergraduate

3. Identify similarities and differences between indigenous knowledge systemsand Western Science.
Audience: Undergraduate

4. Discuss the marked cultural and natural diversity across native NorthAmerica.
Audience: Undergraduate

5. Recall the many different conceptions of place, nature, and development innative North America.
Audience: Undergraduate

6. Describe the diversity of American Indian experiences and their variedresponses to assorted histories of exclusion and marginalization.
Audience: Undergraduate

7. Demonstrate an awareness of history's impact on the present.
Audience: Undergraduate

GEOG 355 – AFRICA, SOUTH OF THE SAHARA
3 credits.

Physical and human distributions and interrelationships, with emphasis on the spatial processes and patterns of modernization.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Describe the variation of biophysical characteristics across the continent (geology, soils, landforms, rivers, ecology) and how these characteristics influence rural livelihood practices and the economic history of the continent.
Audience: Undergraduate

2. Identify features (and variations in) of African social organization and current dynamics of change.
Audience: Undergraduate

3. Discuss the social and political history of the continent and current political and economic challenges facing African nations.
Audience: Undergraduate

4. Explain major development challenges (including human health) and different approaches for addressing them.
Audience: Undergraduate

GEOG 358 – HUMAN GEOGRAPHY OF SOUTHEAST ASIA
3 credits.

Introduction to the human geography and history of Southeast Asia, including important political and theoretical issues and policies and positionings of relevance for understanding the spatiality of the region, including the ways that ethnicity and indigeneity are playing out in Southeast Asia and among Southeast Asians in the United States.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe ethnic diversity and ethnic politics in Southeast Asia
Audience: Both Grad & Undergrad

2. Explain transnational and transcultural politics in the United States as they relate to Southeast Asia, especially associated with the Hmong and Lao, but also other groups as well.
Audience: Both Grad & Undergrad

3. Describe key human geographic patterns in Southeast Asia.
Audience: Both Grad & Undergrad

4. Apply knowledge of ethnic diversity and political issues in Southeast Asia when conducting research.
Audience: Graduate

GEOG 359 – AUSTRALIA: ENVIRONMENT AND SOCIETY
3 credits.

An introduction to the human and environmental geography of Australia, including Australian geology, ecology, society, and culture. Topics include analysis of current events in Australia and current resource management problems using Google Earth and other tools. Australia is a settler country, the scene of indigenous genocide, a former English colony, a mythical unknown, a biophysical puzzle, home to a startling diversity of life, a cradle of modern democracy, and a powerful industrial economy with a rich resource base. It thus serves in many ways as a mirror for the US - even matching the US roughly in size, if not in population. The two countries share many elements of a common history and biogeography and yet the human and environmental geographies of the two countries have traced very different paths into the modern world.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023

GEOG 365 – GEOGRAPHICAL TRADITIONS AND PRACTICES
3 credits.

An introduction to the breadth and practice of Geography. Introduces geographic perspectives, theories, themes, and research design. Covers the history of the discipline, applied quantitative and qualitative methodologies used in geographic research, and a selection of subfields within the discipline.
Requisites: Declared in Geography or Cartography and Geographic Information Systems undergraduate programs
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and describe careers that are relevant to geographers
Audience: Undergraduate

2. Identify learning and research resources available through the Department of Geography
Audience: Undergraduate

3. Describe and apply key definitions, methods, data sets, and theories commonly used in Geography
Audience: Undergraduate

GEOG 370 – INTRODUCTION TO CARTOGRAPHY
4 credits.

A broad introduction to cartography emphasizing the theory and practice of map-making. Topics include the basics in mapping (e.g., scale, spatial reference systems, projections), data acquisition, key techniques for thematic mapping, and principles of cartographic abstraction and design.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Design maps with the best and current cartographic principles in mind.
Audience: Both Grad & Undergrad

2. Execute original map designs from conceptualization to delivery while estimating and managing the time needed for an open-ended design project.
Audience: Both Grad & Undergrad

3. Design maps within client-defined constraints.
Audience: Both Grad & Undergrad

4. Acquire and prepare geographic datasets.
Audience: Both Grad & Undergrad

5. Follow and deviate from a cartographic workflow using contemporary cartography and GIS software.
Audience: Both Grad & Undergrad

6. Discuss cartographic design within its broader historical and social contexts.
Audience: Both Grad & Undergrad

7. Provide constructive feedback for peers and self during the process of design.
Audience: Both Grad & Undergrad

8. Place design principles within the contemporary cartographic literature.

Audience: Graduate

GEOG/ENVIR ST/G L E/GEOSCI/LAND ARC 371 — INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING
3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.
Requisites: (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate understanding of major theories, approaches, concepts, and methods in remote sensing science.
Audience: Undergraduate

2. Apply knowledge of the nature and properties of electromagnetic radiation and how it is affected by interactions with the atmosphere and the Earth's surface.
Audience: Undergraduate

3. Utilize the techniques, skills, and modern tools necessary for monitoring environmental phenomena with earth observation data.
Audience: Undergraduate

4. Know and effectively apply image analysis, data extraction, and map-making using earth observation data.
Audience: Undergraduate

5. Demonstrate how to analyze remote sensing data using photo-interpretation, digital image processing, and photogrammetric techniques using specialized software, within geographic information systems (GIS), and in conjunction with other data sources.
Audience: Undergraduate

6. Demonstrate how to perform classification, change detection, data fusion, and radiometric and geometric correction techniques.
Audience: Undergraduate

7. Identify and appropriately utilize data types from the optical, thermal, and microwave portions of the electromagnetic spectrum, and from a wide range of airborne and satellite platforms, including high (>5 m), medium (10-30 m), and coarse (250-1000 m) spatial resolution imagery.
Audience: Undergraduate

8. Demonstrate knowledge about environmental applications of remote sensing data, such as forest inventory, water resource management, agricultural assessment, land use planning, and global change science.
Audience: Undergraduate

9. Write clear and concise laboratory reports (in scientific format) describing analytical results from image classification and change detection experiments.
Audience: Undergraduate

10. Communicate effectively through discussion, small group work, hands-on lab activities, and written reports.
Audience: Undergraduate

GEOG/CIV ENGR/ENVIR ST 377 — AN INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS
4 credits.

Design, implementation and use of automated procedures for storage, analysis and display of spatial information. Covers data bases, information manipulation and display techniques, software systems and management issues. Case studies.
Requisites: Sophomore standing, member of Engineering Guest Students, or declared in Capstone Certificate in GIS Fundamentals
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the basic structures, concepts, and theories of GIS.
Audience: Both Grad & Undergrad

2. Conduct daily routines of GIS operations.
Audience: Both Grad & Undergrad

3. Make connections to the broader literature in GIS
Audience: Graduate

GEOG 378 – INTRODUCTION TO GEOCOMPUTING
4 credits.

Introduction to scripting for Geographic Information Science. Geoprocessing with open-source GIS utilities. Python scripting with ArcGIS and open-source libraries.
Requisites: CIV ENGR/ENVIR ST/GEOG 377 or concurrent enrollment, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Write shell commands to accomplish common (batch)geoprocessing tasks using popular open-source utility programs, and identify when these utilities are preferred over mainstream GIS software.
Audience: Both Grad & Undergrad

2. Develop basic skills in the Python programming language and programming concepts necessary for advanced GIS courses that require programming.
Audience: Both Grad & Undergrad

3. Use Python with open-source GIS libraries regardless of the Integrated Development Environment (IDE).
Audience: Both Grad & Undergrad

4. Demonstrate how Python can extend the capabilities of ArcGIS to solve problems difficult or impossible to address otherwise.
Audience: Both Grad & Undergrad

5. Describe major geospatial vector and raster file formats and specifications for spatial reference coordinate systems.
Audience: Both Grad & Undergrad

6. Identify online resources that support geocomputing and programming in the GIS profession.
Audience: Both Grad & Undergrad

7. Utilize newly developed GIS computation tools/libraries and platforms
Audience: Graduate

GEOG 379 – GEOSPATIAL TECHNOLOGIES: DRONES, SENSORS, AND APPLICATIONS
3 credits.

Introduction to state-of-the-art technologies that capture properties of the landscape, which is critical to better characterize and understand environmental properties and change. Develop skills in geospatial systems applicable to a variety of research and industry fields. Includes an overview of unmanned aerial systems (drones), light detection and ranging (LiDAR), high-grade Differential GPS (DGPS), Global Navigation Satellite Systems (GNSS), virtual reality, optical sensors, geocaching, and geotagging.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify Unmanned Aerial Systems hardware, safety, regulations, mission planning, and applications for the sciences.
Audience: Both Grad & Undergrad

2. Develop skills in the area of structure-from-motion 3D point cloud model development and visualization.
Audience: Both Grad & Undergrad

3. Identify and use high-grade differential Geographic Positioning Systems and Global Navigation Satellite Systems.
Audience: Both Grad & Undergrad

4. Develop proficiency in LiDAR technologies from satellite, airborne, Unmanned Aerial Systems, and terrestrial, including LiDAR data collection, visualization, and processing.
Audience: Both Grad & Undergrad

5. Use remote sensing instruments, such as multispectral and hyperspectral sensors and thermal cameras.
Audience: Both Grad & Undergrad

6. Become familiar with Virtual reality, augmented reality, geocaching and geotagging.
Audience: Both Grad & Undergrad

7. Apply geospatial technology data collection and processing to research.

Audience: Graduate

GEOG 399 – INDEPENDENT STUDY
1-3 credits.

Study under direct guidance of a faculty member. Appropriate for initial exploration of an area of scholarship in Geography through laboratory, field, or literary study.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No

GEOG/AMER IND 410 – CRITICAL INDIGENOUS ECOLOGICAL KNOWLEDGES
3 credits.

Critical Indigenous Ecological Knowledges are a set of diverse understandings, responsibilities, and laws held by distinct groups of Indigenous peoples that are enacted in multiple ways across socio-political and geographical contexts. These knowledges intersect with Indigenous political sovereignties and longstanding, complex, and nuanced relationships to the more-than-human world. Learn multiple entry points to exploring and examining these knowledge sets in the context of what's for now called the U.S. and Canada to think critically about the politics of Nature, environmentalism, race, indigeneity, and colonialism both historically and in the contemporary moment. Reflect upon how critical Indigenous knowledges about ecology, environment, and government have been erased, co-opted, criminalized, and also continually practiced, reimagined, and revitalized in multiple spheres through a range of interdisciplinary, critical, and cutting-edge Native scholarships and writings.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Gain understandings of the diversity of Ecological Thought among Native peoples across the U.S. and Canada.
Audience: Both Grad & Undergrad

2. Gain understanding of the intersections between Critical Indigenous Ecological Knowledges and Indigenous Sovereignty.
Audience: Both Grad & Undergrad

3. Identify forces of colonialism that have negatively shaped access to and continuation of Ecological Knowledges in Native communities both historically and in ongoing forms.
Audience: Both Grad & Undergrad

4. Identify and gain understanding of the ongoing practices of Indigenous Ecological Knowledges that have persisted against colonialism.
Audience: Both Grad & Undergrad

5. Identify and gain understanding of practices of revitalization that Native peoples practice to reestablish and reimagine relationships with their knowledges, languages, and lands
Audience: Both Grad & Undergrad

6. Engage and demonstrate knowledge with the latest and most cutting edge literature in the discipline of Native American and Indigenous Studies.
Audience: Graduate

7. Gain an ability to analyze and synthesize the political, philosophical, and analytical import of Native American and Indigenous Studies, especially in the context relating to Critical Indigenous Ecological Knowledges.
Audience: Graduate

GEOG/GEOSCI 420 – GLACIAL AND PLEISTOCENE GEOLOGY
3 credits.

Principles, characteristics and work of glaciers; events of the Pleistocene. Field trip.
Requisites: GEOSCI/ENVIR ST 106, GEOSCI 100, 109, ENVIR ST/GEOG 120, 127, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Explain the processes that cause ice deformation in a glacier.
Audience: Both Grad & Undergrad

2. Explain the processes by which glaciers slip over or deform their beds.
Audience: Both Grad & Undergrad

3. Identify subglacially and proglacially derived landforms and explain the processes that produce them.
Audience: Both Grad & Undergrad

4. Explain in general terms the history of ice advance during the later stages of the Pleistocene and the effects it had on glacial geomorphic record.
Audience: Both Grad & Undergrad

5. Assess how climate affected glacial processes.
Audience: Both Grad & Undergrad

6. Describe why glaciated parts of Wisconsin look the way they do.
Audience: Both Grad & Undergrad

7. Interpret glacial features and deposits while in the field.
Audience: Graduate

GEOG/ENVIR ST/URB R PL 431 – PLANNING FOR RESILIENCE TO NATURAL HAZARDS
3 credits.

Provides a theoretical background and practical approaches to planning to increase community resilience to natural hazards. Examines why some communities bounce back quicker from disasters than others. Explores institutional contexts relevant to natural hazards and topics such as the disaster cycle, structural and non-structural approaches to natural hazard mitigation, and physical and social vulnerability to natural hazards.
Requisites: GEOSCI/ATM OCN 140 or sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Describe the cycle of activities that surround planning and responding to natural disasters.
Audience: Undergraduate

2. Recognize the principles of building community resilience to natural hazards.
Audience: Undergraduate

3. Identify various planning approaches to addressing natural hazards.
Audience: Undergraduate

4. Recognize the institutional context within which natural hazard mitigation and recovery planning occurs.
Audience: Undergraduate

5. Identify and analyze which communities and which community members might be more vulnerable to natural hazards.
Audience: Undergraduate

6. Improve their written and oral communication skills.
Audience: Undergraduate

GEOG/C&E SOC/ENVIR ST 434 – PEOPLE, WILDLIFE AND LANDSCAPES
3 credits.

Explores the relationship between humans and wildlife amid diverse landscapes, both historic and contemporary, tropical and temperate. Investigates how humans shape wild animal populations by modifying physical environments, and by hunting, domesticating and introducing species.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Compare and evaluate the three types of social research in terms of how they engage with biodiversity conservation.
Audience: Both Grad & Undergrad

2. Differentiate attitudes, values and norms and explain why sociologists suggest norm change is the best path to changing human environmental behavior.
Audience: Both Grad & Undergrad

3. Analyze shifts in attitudes to wildlife among the public in the U.S. and in Global South settings.
Audience: Both Grad & Undergrad

4. Analyze the social and political factors shaping popular explanations for wildlife decline and human-wildlife conflict.
Audience: Both Grad & Undergrad

5. Organize evidence to guide policy makers how to reduce wildlife loss or how to resolve conflicts with wildlife including invasive species.
Audience: Both Grad & Undergrad

6. Improve professional writing and speaking skills.
Audience: Both Grad & Undergrad

7. Practice measuring attitudes toward wildlife.
Audience: Graduate

GEOG/ENVIR ST 439 – US ENVIRONMENTAL POLICY AND REGULATION
3-4 credits.

Covers a broad cross-section of American environmental policy by focusing on specific statutes and policy arenas. Surveys the basic elements of American environmental policy and regulation with a particular focus on the specific people, sites and scales at which environmental decision-making happens through primary-source case material. Maintains a dual focus on (a) the legal and regulatory aspects of environmental regulation and (b) the specific geographic and social features of actual cases in which regulations and policy are used. Understanding environmental outcomes in a complex society depends on observing both the structure of regulations and the geographic and social context in which such regulations emerge.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. dentify the spectrum of major U.S. environmental regulations, including the Clean Water Act, the Clean Air Act, the Endangered Species Act, CERCLA, and regulations involving environmental justice, climate change, and market environmentalism.
Audience: Both Grad & Undergrad

2. Discuss the specialized language of environmental policy and regulation.
Audience: Both Grad & Undergrad

3. Identify, through current case material, how these policies manifest in our daily interactions with the environment and government.
Audience: Both Grad & Undergrad

4. Describe the social and environmental background to each policy debate using critical and geographic viewpoints often adopted by social scientists.
Audience: Both Grad & Undergrad

5. Write long-form reports synthesizing regulatory issues with reportage on a major environmental policy issue.
Audience: Graduate

GEOG/ENVIR ST/HISTORY 460 — AMERICAN ENVIRONMENTAL HISTORY
4 credits.

Survey of interactions among people and natural environments from before European colonization to present. Equal attention to problems of ecological change, human ideas, and uses of nature and history of conservation and environmental public policy.
Requisites: Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Discuss the basic questions posed by environmental history as a field and method for doing historical scholarship.
Audience: Both Grad & Undergrad

2. Evaluate the continuities and shifts between environmental politics, in relation to social and economic and racial formations and material conditions in U.S. history.
Audience: Both Grad & Undergrad

3. Communicate effectively about the relevance of the past to the environmental present through argumentative writing.
Audience: Both Grad & Undergrad

4. Assess foundational work in the historiography on environmental history.
Audience: Graduate

GEOG 475 — TOPICS IN GEOGRAPHY
1-4 credits.

Explores emerging topics in Geography.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOG 500 — QUALITATIVE STRATEGIES IN GEOGRAPHY
3 credits.

Surveys qualitative research and methods in geography, including the human subjects review process, research ethics, preparing for fieldwork, participant observation, interviewing, focus groups, filmic experiences, archival research, participatory action research, analyzing field materials and writing styles in qualitative research.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Implement different qualitative methods in research.
Audience: Both Grad & Undergrad

2. Identify different options for doing qualitative research.
Audience: Both Grad & Undergrad

3. Discuss what methods are appropriate for different circumstances and how to do research using these qualitative methods.
Audience: Both Grad & Undergrad

4. Identify best practices in qualitative research.
Audience: Graduate

GEOG 501 — SPACE AND PLACE: A GEOGRAPHY OF EXPERIENCE
3 credits.

Explore the concepts of space and place from the perspective of learning and everyday experience. Examines how space and place emerge out of fundamental human needs, experiences, and ways of thinking.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022

GEOG/URB R PL 503 — RESEARCHING THE CITY: QUALITATIVE STRATEGIES
3 credits.

Explores, and applies, qualitative methods in the field of urban geography. An introduction to debates around the analysis and interpretation of qualitative data is provided, grounded in concrete urban research. Participation in a three-day field course is required.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2020

GEOG/GEN&WS 504 – FEMINIST GEOGRAPHY: THEORETICAL APPROACHES
3 credits.

Provides an opening to some of the key debates and practices in feminist (political) geography. Feminist geography focuses on questions of power, difference, embodiment, and social change. How are feminist geographies in conversation with or part of other fields of inquiry, such as critical ethnic studies and Indigenous studies, which also focus on questions of difference, epistemologies of knowledge, and social transformation and/or decolonization? That is, what are the relationships of feminist geographic inquiry to liberatory projects of ending racism, capitalism, settler colonialism, and heteropatriarchy. Explore how feminist theories and approaches in geography transformed prevailing political geographic questions and concerns, such as power, politics, territory, boundaries, sovereignty, and violence. What do feminist principles and debates over feminist politics and methods bring to (political) geography?
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe the major trajectories of feminist perspectives in (political) geography.
Audience: Both Grad & Undergrad

2. Gain the ability to discuss some of the relationships between feminist geography and broader feminist inquiry and politics.
Audience: Both Grad & Undergrad

3. Gain the ability to develop feminist questions for research and/or action relevant to your project.
Audience: Both Grad & Undergrad

4. Explain the relevance of feminist theory, methods, and/or practice to your project.
Audience: Both Grad & Undergrad

5. Explore how issues of difference and positionality inform your project and study of geography.
Audience: Both Grad & Undergrad

6. Articulate key debates over feminist (geographic) theory for your field and directions these debates suggest for your thesis or dissertation research.
Audience: Graduate

GEOG/URB R PL 505 – URBAN SPATIAL PATTERNS AND THEORIES
3 credits.

Various urban empirical regularities and theories which explain them.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

GEOG 507 – WASTE GEOGRAPHIES: POLITICS, PEOPLE, AND INFRASTRUCTURES
3 credits.

Explores waste as discarded material, a polluting and threatening substance that must be managed, and as a political object. Waste's distribution across space and among groups of people, as well as the reasons for the effects of that distribution, will be examined using geographic perspectives. Who has the ability to avoid or remove themselves from waste? Who must live and work with it? The concept of infrastructure as a set of material things (roads, trucks, boats); laws and regulations; labor relations; and economies of disposal and consumption determining waste flows unites disparate topics and case studies across the semester. Concepts of and social movements for environmental justice are recurring themes.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Define waste as a political object and contrast this definition to popular, technical, and/or managerial definitions.
Audience: Both Grad & Undergrad

2. Apply new social-science definitions of infrastructure to waste geographies.
Audience: Both Grad & Undergrad

3. Appraise their own role(s) in various waste geographies and describe waste's ubiquity.
Audience: Both Grad & Undergrad

4. Explain the factors that produce uneven waste geographies, including the roles class, gender, and race play in personal and professional proximity to and distance from wastes of all kinds.
Audience: Both Grad & Undergrad

5. Make connections between, on the one hand, how problems having to do with waste are defined and, on the other hand, proposed solutions to 'the waste problem'.
Audience: Both Grad & Undergrad

6. Apply the lessons garnered from waste geographies to their research and disciplinary specialties.
Audience: Graduate

7. Synthesize major course concepts to frame novel and innovative research questions about waste geographies.
Audience: Graduate

8. Communicate complex conceptual arguments clearly and relate them to case studies.
Audience: Graduate

9. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of waste and waste management.
Audience: Both Grad & Undergrad

10. Describe the social, economic, and environmental dimensions of recycling and other waste reduction/management strategies and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Both Grad & Undergrad

GEOG 510 – ECONOMIC GEOGRAPHY
4 credits.

Theoretical aspects of spatial economic distributions and locational analysis.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe the logics underpinning economic growth. (
Audience: Both Grad & Undergrad

2. Explain the main critiques that have been made of economic growth.
Audience: Both Grad & Undergrad

3. Evaluate alternatives to economic growth that have emerged.
Audience: Both Grad & Undergrad

4. Examine degrowth experiments in different contexts.
Audience: Both Grad & Undergrad

5. Apply these insights to your own life and community.
Audience: Both Grad & Undergrad

6. Place these debates within the wider economic geography literature.
Audience: Graduate

GEOG 511 – CRITICAL SOCIAL THEORY
3 credits.

An introduction to many key movements and thinkers within Critical Social Theory. Explores the changing histories and presents of the field through a range of primary works from philosophy, critical theory, and geography - paying particular attention to the points where social theory intersects with problems of space and place. Covers classic problems in social theory ranging from theories of the political-economic constitution of the social (Marxism) and its extensions into the culture (the Frankfurt School) to a range of mid- to late-twentieth-century epistemological interventions framed around questions of difference and identity. Recent contestations and reformulations that have surfaced across ontological, decolonial, non-human, algorithmic, and other reimaginings and extensions of the social are examined.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Describe the history of and key perspectives in Critical Social Theory.
Audience: Undergraduate

2. Read and research theoretical scholarship.
Audience: Undergraduate

3. Identify effective strategies for developing and conducting theory-driven research.
Audience: Undergraduate

4. Explain approaches to researching socio-spatial topics.
Audience: Undergraduate

5. Write and edit academic theoretical research.
Audience: Undergraduate

6. Describe the nuances of the key debates in Critical Social Theory.
Audience: Graduate

7. Identify the key issues in recent socio-spatial theory and the implications for, refractions through, and/or reactions by broader contemporary intellectual movements.
Audience: Graduate

8. Design and complete theoretical/critical scholarship.
Audience: Graduate

9. Guide classroom discussions.
Audience: Graduate

10. Develop a personalized set of approaches to mediating challenging geographical, critical and theoretical concepts for a broad range of learners.
Audience: Graduate

GEOG 513 – QUEER GEOGRAPHIES
3 credits.

Explores several key events, sites, thinkers, and texts that contribute to the social, personal, and intellectual landscapes of Queer Geographies. An invitation to survey and reflect on queer critical strategies that sample, record, and remix constellations of relationships between theory, space, sexuality, gender, and identity. It foregrounds modes of queer spacing and placemaking in academic and popular works devoted to queer lives, studies, sexualities, narratives, publics and privates, joys and griefs, art, theory, and beyond. Offers a range of strategies for reading, interpreting, and developing nuanced scholarly interventions and theories. Question and reimagine normative notions of the personal, the social, and the socio-spatial.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Describe the history of and key perspectives and debates in Queer Studies and Queer Theory.
Audience: Both Grad & Undergrad

2. Read and research theoretical scholarship.
Audience: Undergraduate

3. Describe strategies for developing and conducting theory-driven research.
Audience: Undergraduate

4. Identify approaches to researching socio-spatial topics.
Audience: Undergraduate

5. Compose and edit academic theoretical/critical scholarship.
Audience: Both Grad & Undergrad

6. Recall the key issues in recent socio-spatial theory and the implications for, refractions through, and/or reactions by broader contemporary intellectual movements.
Audience: Graduate

7. Identify pedagogical strategies for guiding classroom discussions.
Audience: Graduate

8. Develop a personalized set of approaches to mediating challenging geographical, critical, and theoretical concepts for a broad range of learners.
Audience: Graduate

GEOG/GEN&WS 514 – FEMINIST GEOGRAPHY: METHODOLOGICAL APPROACHES
3 credits.

An introduction to foundational approaches to feminist qualitative research in human geography. Research is not separate from a social world that historically has been and continues to be shaped by (settler) colonial, racialized, gendered, sexualized, and class-inflected relations of power (among others). Research practices and "findings" have been and continue to be used to inform and rationalize relations of oppression, exploitation, and violence. For feminist researchers, then, questions of power, difference, and social change are central to how we design and conduct research. Engages in political-ethical discussions about the positionality and responsibilities of ourselves as researchers, and how our knowledge production can reproduce and challenge prevailing relations of power.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Discuss the interplay between epistemology and methodology.
Audience: Undergraduate

2. Explain clearly how their epistemological positions inform their methodological decisions.
Audience: Graduate

3. Discuss the political dynamics shaping knowledge production, and how feminist, decolonial, and anti-racist projects have reshaped these dynamics.
Audience: Both Grad & Undergrad

4. Discuss the historical constructions of 'the field,' and how feminist critiques and research practices challenge expectations regarding field work experiences.
Audience: Both Grad & Undergrad

5. Discuss how feminist research ethics extend researchers' ethical obligations of beneficence, respect for research subjects, and justice (Belmont Report).
Audience: Both Grad & Undergrad

6. Evaluate the virtues, dilemmas, and limitations of common qualitative methods.
Audience: Both Grad & Undergrad

7. Develop a compelling rationalization for research questions and methodologies (design) for your qualitative project.
Audience: Undergraduate

8. Articulate how feminist principles influence your research questions and methodologies.
Audience: Graduate

9. Explain how social positionality shapes the research process, and develop a practice of self-reflexivity.
Audience: Both Grad & Undergrad

GEOG 515 – TRANS AUTOTHEORIES
3 credits.

Offers an in-depth examination of trans lives, selves, and ways of knowing. Focuses on the trans "I" as it appears in autobiography, memoir, theory, performance, visual arts, music, spacing, place making, zines, and vlogs. These works ask how styles of self-making ("auto") might lead to new and changing conceptions of trans lives, worlds, and social formations ("theory"). The trans artists and writers explored fashion selves into prisms to fracture, negotiate, meditate upon, think, and re/present the encounters, becomings, transitions, and enframings that constitute trans existence. This "auto-theoretical" strategy reimagines genre, style, space, and media to create launching points for new trans aesthetics, theories, joys, and struggles. The polyphonic voices of these trans selves, taken together, bring a trans "we" into view, creating a discursive trans space made material.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Explain the history of and critical perspectives in Trans Studies/Theory.
Audience: Undergraduate

2. Read and research theoretical scholarship.
Audience: Undergraduate

3. Identify practical strategies for developing and conducting theory-driven research.
Audience: Undergraduate

4. Describe approaches to researching socio-spatial topics.
Audience: Undergraduate

5. Demonstrate the basics of writing and editing academic theoretical research.
Audience: Undergraduate

6. Recall the key debates in Trans Studies/Theory.
Audience: Graduate

7. Identify critical issues in recent socio-spatial theory and the implications for, refractions through, and/or reactions by broader contemporary intellectual movements.
Audience: Graduate

8. Design and complete theoretical, critical scholarship.
Audience: Graduate

9. Describe pedagogical strategies for guiding classroom discussions.
Audience: Graduate

10. Develop personalized set of approaches to mediating challenging geographical, critical, and theoretical concepts for a broad range of learners.
Audience: Graduate

GEOG 518 – POWER, PLACE, IDENTITY
3 credits.

Advanced political geography course that explores reconceptualizations of power, place, and identity, as well as the interactive forces at work that continually reshape place-making and the inter-related processes of identification and differentiation.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Analyze current conceptualizations of power, place, identity, and difference, particularly those from geographers.
Audience: Both Grad & Undergrad

2. Evaluate major trends, themes, and approaches that have emerged in the field of political geography, especially as they are related to geographies of identification and differentiation.
Audience: Both Grad & Undergrad

3. Employ a performative approach in understanding processes of place-making, bordering, and identification/differentiation.
Audience: Both Grad & Undergrad

4. Identify theoretical debates in the political geography literature.
Audience: Both Grad & Undergrad

5. Discuss major themes and approaches related to questions of power, place, identity, difference, and nationalism.
Audience: Both Grad & Undergrad

6. Identify research questions related to course themes in ways that are responsive to major debates in the literature.
Audience: Graduate

GEOG 523 – ADVANCED PALEOECOLOGY: SPECIES RESPONSES TO PAST ENVIRONMENTAL CHANGE
3 credits.

Geographic and temporal responses of plant species and terrestrial ecosystems to the major environmental changes of the last 1,000,000 to 1,000 years, particularly glacial-interglacial changes in climate, carbon dioxide, and the end-Pleistocene extinctions of large animals. Key concepts include novel and no-analog ecosystems, abrupt climate and ecological change, and megaherbivore-vegetation interactions. This time period is of direct interest to global change ecologists and biogeographers studying species responses to 21st-century climate change. Hands-on practice emphasizes multivariate data analysis and quantitative paleoecological inference.
Requisites: Junior standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Biological Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Critically evaluate the primary literature.
Audience: Both Grad & Undergrad

2. Describe the fundamental processes governing species responses to past and present climate change.
Audience: Both Grad & Undergrad

3. Obtain and analyze paleoecological data using multivariate methods.
Audience: Both Grad & Undergrad

4. Critically analyze the readings in light of prior knowledge gained in other advanced courses.
Audience: Graduate

5. Conduct new analyses by applying these methods to new data and questions.
Audience: Graduate

GEOG/SOIL SCI 525 – SOIL GEOMORPHOLOGY
3 credits.

Soil development as related to landscape throughout the Quaternary; focusing on the relationship of soils to climate and vegetation, landscape evolution, and time; principles of soil stratigraphy; case histories of soil geomorphic studies; field trips. Students should have completed one course in geomorphology to feel comfortable with the course content.
Requisites: SOIL SCI 325 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify key concepts and research efforts that link soils and landscape evolution.
Audience: Both Grad & Undergrad

2. Analyze models of soil formation in the context of geomorphology, and determine which model(s) may be applicable to problems you are interested in.
Audience: Both Grad & Undergrad

3. Utilize important quantitative methods and research tools used in soil geomorphology, many of which are more broadly applicable in geomorphology, soils, and critical zone research.
Audience: Both Grad & Undergrad

4. Review the literature and propose new research on a topic of soil geomorphology.
Audience: Graduate

GEOG/SOIL SCI 526 – HUMAN TRANSFORMATIONS OF EARTH SURFACE PROCESSES
3 credits.

Takes an earth systems approach to explore the role of human societies in shaping earth surface processes from local to global scales. We address how alterations to our landscapes and waterways affect biological, physical and chemical interactions among our biosphere, geosphere, hydrosphere and atmosphere. We discuss methods used to distinguish the "human impact" from background variability.
Requisites: Junior standing or ENVIR ST/GEOG 120
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Synthesize how major global biogeochemical cycles and earth surface processes are influenced by human activities.
Audience: Both Grad & Undergrad

2. Identify positive and negative feedbacks among the biosphere, geosphere, and atmosphere at different spatial and temporal scales.
Audience: Both Grad & Undergrad

3. Explain how different methods are used to characterize and quantify human effects on the earth system.
Audience: Both Grad & Undergrad

4. Describe how legacies of colonialism affect historical and current biases in the practice and application of earth system science.
Audience: Both Grad & Undergrad

5. Interpret research findings in peer-reviewed literature.
Audience: Both Grad & Undergrad

6. Summarize research for different audiences.
Audience: Both Grad & Undergrad

7. Identify methods to answer specific research questions and write a research proposal.
Audience: Graduate

GEOG/ENVIR ST/LAND ARC/URB R PL 532 – APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN PLANNING
3 credits.

Explores planning-related Geographic Information System (GIS) data, applications, analytical tools, and implementation issues.
Requisites: GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify how planning agencies use GIS.
Audience: Both Grad & Undergrad

2. Explain the nature, characteristics, and possible ways of analyzing spatial data in a planning context.
Audience: Both Grad & Undergrad

3. Communicate geospatial data and analyses effectively.
Audience: Both Grad & Undergrad

4. Obtain and analyze geospatial data using a range of spatial analysis tools for a number of planning practices.
Audience: Both Grad & Undergrad

5. Conduct site-selection and land-suitability analysis.
Audience: Both Grad & Undergrad

6. Identify ethical issues surrounding access to and use of geospatial data.

Audience: Both Grad & Undergrad

7. Analyze and provide written feedback on undergraduate student presentations.
Audience: Graduate

8. Produce a memo on land-suitability analysis.
Audience: Graduate

GEOG/ENVIR ST 534 – ENVIRONMENTAL GOVERNANCE: MARKETS, STATES AND NATURE
3 credits.

Covers real-world questions of how the environment is managed and governed through state policy, economics, and social institutions. Includes strategies within and outside of the formal institutions of government, and extends the discussion to the commodification of nature and the use of science to understand and govern the environment. Also includes case studies of environmental governance in water, carbon, species, and urban sustainability.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Explain the concepts of governance and the tools for its analysis.
Audience: Both Grad & Undergrad

2. Identify the tools, concepts, and controversies associated with market-based environmental governance and its origins in debates over the past century.
Audience: Both Grad & Undergrad

3. Discuss the variety of traditions in understanding the relationship between states, civil society, and the environment.
Audience: Both Grad & Undergrad

4. Describe and articulate connections and common themes in environmental governance as they are expressed in a variety of settings such as economic globalization, urban planning, water resource development, conservation, and climate change.
Audience: Both Grad & Undergrad

5. Discuss the scholarly literature around environmental governance, state theory, and neoliberalism.
Audience: Graduate

GEOG/ENVIR ST 537 — CULTURE AND ENVIRONMENT
4 credits.

Geographic approaches to culture-nature relationships, including human perception of, use of, and adaptation to the physical environment, with emphasis on traditional subsistence systems; selected topics from contemporary and historical sources.
Requisites: GEOG 359, ENVIR ST/GEOG 337, 339, 439, AMER IND/ENVIR ST/GEOG 345, or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop a cross-cultural perspective about environment-society relations.
Audience: Both Grad & Undergrad

2. Explain how certain conceptual frameworks for understanding culture-environmental relations developed in the social sciences and how these have affected conservation and development practice around the world.
Audience: Both Grad & Undergrad

3. Discuss the strengths and limitations of these frameworks for understanding the effect of human activities on the environment or in turn the effect of environmental change on human societies.
Audience: Both Grad & Undergrad

4. Identify the appropriate frameworks for analyzing particular culture-environment contexts and in so doing, be better placed to develop more effective conservation or development initiatives.
Audience: Both Grad & Undergrad

5. Apply an understanding of the strengths and weaknesses of different conceptual frameworks to develop a conceptual framing suitable for graduate research.
Audience: Graduate

GEOG 538 — THE HUMID TROPICS: ECOLOGY, SUBSISTENCE, AND DEVELOPMENT
4 credits.

Description and analysis of humid-tropical ecosystems, with emphasis on the relationships, production potential, and human modification of biotic resources.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

GEOG/ENVIR ST 557 — DEVELOPMENT AND ENVIRONMENT IN SOUTHEAST ASIA
3 credits.

Examines the political, socio-cultural, economic and ecological aspects of contemporary development and human-environment relations in mainland Southeast Asia, applying a critical and theoretically informed perspective, and focusing largely on rural issues.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe key elements that link development and environmental issues in Southeast Asia.
Audience: Both Grad & Undergrad

2. Explain the social, economic, and/or environmental dimensions of the sustainability challenges regarding a range of important policy issues with environmental and sustainability implications.
Audience: Both Grad & Undergrad

3. Apply sustainability principles and/or frameworks to addressing the challenges associated with a range of development issues that have environmental implications.
Audience: Both Grad & Undergrad

4. Analyze the causes of and solutions for sustainability challenges of various development policy decisions.
Audience: Both Grad & Undergrad

5. Apply knowledge of development and environmental issues in Southeast Asia when conducting research.
Audience: Graduate

GEOG 560 – ADVANCED QUANTITATIVE METHODS
3 credits.

Selected topics in the analysis of spatial distributions with emphasis on multivariate techniques.
Requisites: Junior standing or GEOG 360
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss statistical concepts, methods, and techniques.
Audience: Both Grad & Undergrad

2. Conduct various staining analyses on geographic data.
Audience: Both Grad & Undergrad

3. Use R script programming for spatiotemporal statistical analysis.
Audience: Both Grad & Undergrad

4. Solve practical problems using statistics and spatiotemporal analysis methods.
Audience: Both Grad & Undergrad

5. Discuss the latest literature about the newly developed R scripts for geospatial data analysis.
Audience: Graduate

GEOG 565 – COLLOQUIUM FOR UNDERGRADUATE MAJORS
3 credits.

Orientation to geography as a scholarly discipline; its development, objectives, essential concepts, methods of investigation, institutions, opportunities, problems, and trends.
Requisites: Declared in Geography or Cartography and Geographic Information Systems undergraduate programs
Course Designation: Core GenEd - Communication & Literacy Comm QR - Communication B
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Conceptualize and implement an original research project.
Audience: Undergraduate

2. Collect and analyze primary data.
Audience: Undergraduate

3. Describe the breadth of geographic phenomena and arguments.
Audience: Undergraduate

4. Assess geographic explanations.
Audience: Undergraduate

5. Integrate knowledge across disciplines to develop novel perspectives.
Audience: Undergraduate

6. Present geographic arguments in written, oral, and visual formats.
Audience: Undergraduate

GEOG 566 – HISTORY OF GEOGRAPHIC THOUGHT
3 credits.

An analysis of the development and significance of basic geographic concepts and theories. Major emphasis on concepts of place, spatial relations, landscape, and human-environment relations.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020

GEOG 572 – GRAPHIC DESIGN IN CARTOGRAPHY
3-4 credits.

Study of the map as a graphic communication, the technical and perceptual aspects of its organization, symbolic coding, color and lettering.
Requisites: GEOG 370 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain how maps work by justifying design decisions.
Audience: Both Grad & Undergrad

2. Design maps while applying principles of visual storytelling genres and tropes; bivariate and multivariate mapping; visual layout and balance; terrain representation; time representation; iconic map symbol design; and aesthetics and style.
Audience: Both Grad & Undergrad

3. Execute original map designs for the web from conceptualization to delivery while estimating and managing the time needed for an open-ended design project.
Audience: Both Grad & Undergrad

4. Acquire and prepare geographic datasets.
Audience: Both Grad & Undergrad

5. Follow and deviate from a cartographic workflow using contemporary cartography and GIS software.
Audience: Both Grad & Undergrad

6. Discuss cartographic design within its broader historical and social contexts.
Audience: Both Grad & Undergrad

7. Provide constructive feedback for peers and self during the process of design
Audience: Both Grad & Undergrad

8. Place design principles within the contemporary cartographic literature.

Audience: Graduate

GEOG 573 – ADVANCED GEOCOMPUTING AND GEOSPATIAL BIG DATA ANALYTICS
4 credits.

Geospatial big data is an extension of big data with an emphasis on the geospatial component. It is used to describe large volumes of georeferenced data about various aspects of the environment and society captured by millions of environmental and human sensors. An introduction to the theory, techniques, and analytical methods for geospatial big data. Methods for storing, processing, analyzing, and visualizing various types of geospatial big data using advanced Python programming will be introduced. Designed for students who have programming experience and want to reinforce their programming skills and learn AI and machine learning methods for solving geospatial big data problems.
Requisites: GEOG 378, COMP SCI 220, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Summarize the fundamental concepts of geospatial big data.
Audience: Both Grad & Undergrad

2. Describe how to develop computational models and analytical methods for geospatial big data.
Audience: Both Grad & Undergrad

3. Identify the challenges in storing, managing, processing, analyzing, visualizing, and verifying the quality of data.
Audience: Both Grad & Undergrad

4. Recall the major high-performance platforms for big data processing.
Audience: Both Grad & Undergrad

5. Use Python programming for (spatiotemporal) data analysis and machine-learning tasks.
Audience: Both Grad & Undergrad

6. Collaborate in teams and complete tasks under time pressure.
Audience: Both Grad & Undergrad

7. Lead efforts on teamwork and geospatial problem solving skill development.
Audience: Graduate

8. Demonstrate higher-order synthesis and spatial analysis skills in spatial data science.
Audience: Graduate

GEOG 574 – GEOSPATIAL DATABASE DESIGN AND DEVELOPMENT
4 credits.

Introduces the basic concepts, techniques and methodologies for designing and implementing a spatial database to prepare for professional work as a GIS designer, analyst, specialist or researcher. Design conceptual spatial database models and implement them within specific spatial data management systems (DBMS). Covers basic SQL database language and the latest developments in database systems (e.g. NoSQL database) for managing and mining spatial big data such as social media datasets and GPS trajectories.
Requisites: GEOG 170, GEOG 370, ENVIR ST/CIV ENGR/GEOG 377 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe database design and implementation in GIS.
Audience: Both Grad & Undergrad

2. Utilize open-source database software to create, manipulate, and manage spatial relational databases.
Audience: Both Grad & Undergrad

3. Perform spatial queries and operations to analyze and manage geospatial data within a spatial database environment.
Audience: Both Grad & Undergrad

4. Use spatial databases for big data management.
Audience: Both Grad & Undergrad

5. Design and develop a spatial database and program to solve specific geographic information problems.
Audience: Both Grad & Undergrad

6. Describe the concept of spatial indexing and its significance in optimizing spatial data retrieval.
Audience: Both Grad & Undergrad

7. Design, develop, and implement spatial database solutions to address real-world geographic information problems .
Audience: Both Grad & Undergrad

8. Integrate spatial databases with programming languages to develop data-driven geospatial applications.
Audience: Graduate

GEOG 575 – INTERACTIVE CARTOGRAPHY & GEOVISUALIZATION
4 credits.

Examines emerging topics related to the design of user interfaces for manipulating maps, focusing on new cartographic challenges in Interactive Cartography, Geographic Visualization, and Geovisual Analytics and drawing upon relevant insight in Human-Computer Interaction, Information Visualization, and Usability Engineering.
Requisites: GEOG 370, 378, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Design interactive maps by applying the principles of user experience and user interface design; interface complexity, constraint, flexibility, and freedom; user- and technology-based constraints on UI/UX design; interaction operators; non-map visualization techniques; direct and indirect map-based interface styles; coordinated big data visualization and interactive highlighting techniques.
Audience: Both Grad & Undergrad

2. Develop interactive maps that follow and deviate from a cartographic workflow using relevant coding languages.
Audience: Both Grad & Undergrad

3. Plan and execute a user-centered design process from needs assessment to transition
Audience: Both Grad & Undergrad

4. Acquire and prepare geographic datasets.
Audience: Both Grad & Undergrad

5. Design within user-defined and technology-defined functional constraints while evaluating and improving prototypes and application releases
Audience: Both Grad & Undergrad

6. Use online collaboration tools in small groups
Audience: Both Grad & Undergrad

7. Construct spatiotemporal and multivariate visualizations using contemporary cartographic software.
Audience: Both Grad & Undergrad

8. Place design principles within the contemporary cartographic literature.

Audience: Graduate

GEOG 576 – GEOSPATIAL WEB AND MOBILE PROGRAMMING
4 credits.

Covers the programming concepts and skills for understanding construction and implementation of high quality spatial web portal and mobile Apps to support geospatial data access, analysis, sharing, and synthesis over the internet. Builds on basic programming experience.
Requisites: (GEOG 170, GEOG 370, or CIV ENGR/ENVIR ST/ GEOG 377) and (GEOG 378, COMP SCI 300, COMP SCI 369, or COMP SCI 400), or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Develop web programs for geospatial data mapping and visualization.
Audience: Both Grad & Undergrad

2. Use GIS programming and mapping toolkits.
Audience: Both Grad & Undergrad

3. Determine, track, and record a mobile device's current location.
Audience: Both Grad & Undergrad

4. Design and develop mobile apps to retrieve, manipulate, and visualize geospatial datasets.
Audience: Both Grad & Undergrad

5. Judge the design and implementation of a web/mobile system for different geospatial applications.
Audience: Graduate

GEOG 578 – GIS APPLICATIONS
4 credits.

Application and use of GIS techniques in physical and human geography. Includes an introduction to a generic framework of GIS applications, case studies, and student projects. Cases range from urban and regional geography, to marketing geography, and to physical and environmental geography.
Requisites: GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Conceptualize and implement a GIS project from start to finish within a team environment.
Audience: Undergraduate

2. Identify, formulate, and solve geographic problems using appropriate information analytical approaches.
Audience: Undergraduate

3. Communicate effectively through written reports, oral presentations, and discussion.
Audience: Undergraduate

4. Prepare and present effective, informative, and persuasive arguments utilizing GIS.
Audience: Undergraduate

GEOG 579 – GIS AND SPATIAL ANALYSIS
4 credits.

Principles and algorithms for spatial analysis in geographic imformation systems. A theoretical and practical examination of analytical methods used in GIS, including point, line and polygon processing, interpolation, smoothing, spatial overlay and query, network analysis, terrain analysis, and classification.
Requisites: GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify the limitations of common spatial data analytical techniques.
Audience: Both Grad & Undergrad

2. Determine the usefulness of common spatial data analysis techniques.
Audience: Both Grad & Undergrad

3. Select and apply these techniques in respective applications.
Audience: Both Grad & Undergrad

4. Investigate the limitations of emerging spatial data analytical techniques to avoid misuse or abuse of these techniques.
Audience: Both Grad & Undergrad

5. Make connections to one's own research areas either as the basis for technological improvements or as effective applications of these technologies.
Audience: Graduate

GEOG 675 – SPECIAL TOPICS IN GEOGRAPHY
3 credits.

Explores emerging topics in human and people-environment geography.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOG 681 – SENIOR HONORS THESIS
2-3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025

GEOG 682 – SENIOR HONORS THESIS
2-3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

GEOG 691 – SENIOR THESIS
2-3 credits.

Individual mentored study for seniors completing theses as arranged with a faculty member
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GEOG 692 – SENIOR THESIS
2-3 credits.

Individual mentored study for seniors completing theses as arranged with a faculty member
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026

GEOG 698 – DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

GEOG 699 – DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOG 765 – GEOGRAPHICAL INQUIRY AND ANALYSIS: AN INTRODUCTION
1 credit.

Geographic perspectives and analyses: history of the discipline, issues and research frontiers, interests and perspectives of Madison faculty, structure of graduate study in the department, research facilities and opportunities.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

GEOG 766 – GEOGRAPHICAL INQUIRY AND ANALYSIS: TECHNIQUES
1-3 credits.

Engaging in geographic research: analysis of successful proposals and published papers and books; different approaches to geographic research; writing of proposals for students' own research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

GEOG 777 – CAPSTONE IN GIS DEVELOPMENT
4 credits.

Covers practical and challenging cases in GIS which require programming and other GIS development skills (such as geospatial algorithm development and implementation). Cases cover the wide spectrum of GIS development projects in the GIS professions ranging from GIS data management, advanced spatial analysis, spatial database development and web/mobile programming, to cartography/geovisualization. Focuses on integration of skills from other courses into a GIS development project.
Requisites: GEOG 378, 572, 574, 575, 576, 579 and graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

GEOG 778 – PRACTICUM IN GIS DEVELOPMENT
4 credits.

Develop the ability to conceive and manage a real-world GIS development project, and to design a plan for solving the project.
Requisites: GEOG 378, 572, 574, 575, 576, 579 and graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

GEOG 799 – INDEPENDENT READING
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2021

GEOG 900 – SEMINAR IN GEOGRAPHY
1-3 credits.

Surveys recent and classic works in geography.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2019

GEOG 901 – SEMINAR IN CULTURAL GEOGRAPHY
2-3 credits.

Surveys recent and classic works in cultural and human geography.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GEOG 918 – SEMINAR IN POLITICAL GEOGRAPHY
2-3 credits.

Surveys recent and classic works in political geography.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

GEOG 920 – SEMINAR IN PHYSICAL GEOGRAPHY
1-3 credits.

Surveys recent and classic works in physical geography.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GEOG 930 – SEMINAR IN PEOPLE-ENVIRONMENT GEOGRAPHY
2-3 credits.

Surveys recent and classic works in people-environment geography.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOG/AGROECOL/ATM OCN/BOTANY/ENTOM/ENVIR ST/ZOOLOGY 953 — INTRODUCTION TO ECOLOGY RESEARCH AT UW-MADISON
1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison
Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison
Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology
Audience: Graduate

4. Develop appropriate expectations for advisors and advisees
Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics
Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science
Audience: Graduate

GEOG 970 — SEMINAR IN GEOGRAPHIC INFORMATION SCIENCE
1-3 credits.

Surveys recent and classic works in cartography and geographic information science.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOG/ATM OCN/BOTANY/ENVIR ST/GEOSCI/ZOOLOGY 980 — EARTH SYSTEM SCIENCE SEMINAR
1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOG/A A E/ANTHRO/C&E SOC/HISTORY/LACIS/POLI SCI/PORTUG/SOC/SPANISH 982 — INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA
1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GEOG/AFRICAN/ANTHRO/ECON/HISTORY/POLI SCI 983 – INTERDEPARTMENTAL SEMINAR IN AFRICAN STUDIES TOPICS
3 credits.

Interdisciplinary inquiry in African societies and cultures.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Develop in-depth knowledge in a sub-field of specialization within African studies
Audience: Graduate

2. Acquire and demonstrate understanding of major theories, approaches, concepts, currently informing African studies
Audience: Graduate

3. Understand your process of learning and possess the capacity to intentionally seek, evaluate, and learn from information, and to recognize and reduce bias in thinking.
Audience: Graduate

4. Gain firm knowledge of existing research in African studies
Audience: Graduate

5. Develop and improve speaking, readings, listening, and writing skills
Audience: Graduate

6. Write and speak across disciplinary boundaries
Audience: Graduate

7. Analyze texts from various theoretical and critical perspectives
Audience: Graduate

GEOG 990 – RESEARCH AND THESIS
1-9 credits.

Individual mentored study for completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

GEOG 999 – INDEPENDENT WORK
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOLOGICAL ENGINEERING (G L E)

G L E 1 – COOPERATIVE EDUCATION PROGRAM
1 credit.

Apply classroom theory and practical knowledge of engineering-related operations and functions in a professional setting. Full-time workplace experience.
Requisites: Sophomore standing
Course Designation: Workplace - Workplace Experience
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work
Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work
Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise
Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information
Audience: Undergraduate

G L E 171 – INTRODUCTION TO GEOLOGICAL ENGINEERING
1 credit.

Comprehensive introduction to engineering applications of earth sciences. Exploitation and management of geologic resources; mitigation of geologic hazards such as landslides and earthquakes; abatement of environmental problems such as land and water pollution; design of surface and underground excavations; principal methods of geological engineering.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Spring 2026

G L E/CIV ENGR 291 – PROBLEM SOLVING USING COMPUTER TOOLS
4 credits.

Introduction to engineering computations with emphasis on computer tools and computer based measurement, data collection, and processing. Tools will include computer aided design, spreadsheets, other engineering computation tools, and hardware and software for laboratory and spatial measurements.
Requisites: MATH 222 or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use spreadsheet software to perform fundamental civil, environmental, and geological engineering calculations, analyze datasets using logical filters, and interpret numeric data meant to represent time and text values
Audience: Undergraduate

2. Use computer programming as a tool to streamline engineering data analysis tasks, create visualizations, obtain numerical approximations, and retrieve data from local and remote (web-based) data sources
Audience: Undergraduate

3. Use automatic levels, total stations, and aerial photography to conduct land surveying operations and collect the type of geospatial data required for creating drawings that support engineering design
Audience: Undergraduate

4. Explain how measuring devices (data acquisition systems and sensors) work, use measuring devices to record/monitor the physical properties of a system, and use sensor readings as the foundation to control devices in the physical world
Audience: Undergraduate

G L E/GEOSCI 314 – INTRODUCTION TO APPLIED HYDROGEOLOGY
3 credits.

Introduction to concepts relevant to studying water and its movement in Earth's shallow subsurface. Examines geologic materials through the lens of groundwater and solutes in groundwater to build an understanding of how water is stored, flows through, and reacts with geological materials. Beyond groundwater (the largest available store of freshwater on Earth), the porous crust of the Earth also provides numerous resources, such as hydrocarbons, geothermal energy, and waste storage. Emphasizes understanding fundamental concepts for studying these fluid reservoirs. Discuss hydrogeologic basics, work with hydrogeologic methods and instrumentation, conduct data analysis with real-world data, and have an introduction to groundwater quality.
Requisites: Satisfied Quantitative Reasoning (QR) A
Course Designation: Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Characterize porous media properties, their units, and relevance to fluid and solute movements.
Audience: Both Grad & Undergrad

2. Identify flow properties and their variability in different types of geologic materials.
Audience: Both Grad & Undergrad

3. Determine fluid movement directions and groundwater quality from existing documentation including well logs, head measurements, and other field data.
Audience: Both Grad & Undergrad

4. Integrate field data and historical data to generate informative hydrogeologic maps.
Audience: Both Grad & Undergrad

5. Assess the quality of methods and interpretations in hydrogeologic research studies.
Audience: Graduate

G L E/CIV ENGR 330 – SOIL MECHANICS
3 credits.

Basic principles of soil mechanics and fundamentals of application in engineering practice; soil composition and texture; classification; permeability and seepage; consolidation; settlement; shear strength; lateral earth pressures and retaining structures, shallow and deep foundations, slope stability; subsurface exploration; laboratory characterization of physical and engineering properties of soils.
Requisites: E M A 303 or M E 306, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the physicochemical characteristics of soils and their importance to the engineering behavior of soils.
Audience: Both Grad & Undergrad

2. Define the factors which control the physical, mechanical and hydraulic behavior of soils.
Audience: Both Grad & Undergrad

3. Run the laboratory tests used for the determination of physicochemical properties of soils, the engineering classification of soils, hydraulic properties, and the stiffness and shear strength properties.
Audience: Both Grad & Undergrad

4. Perform analyses in each area described in the course and understand the limitations to these analyses.
Audience: Both Grad & Undergrad

5. List basic problems in Soil Mechanics design and describe how these problems are tackled.
Audience: Both Grad & Undergrad

6. Experimentally assess the interaction of multiple parameters controlling the physical, mechanical and hydraulic behavior of soils; perform more advanced 2D or 3D analyses in one area described in the course and understand the limitations of these analyses; or summarize the state of the art in one research or engineering-applied area described in the course.
Audience: Graduate

G L E/GEOSCI 350 – INTRODUCTION TO GEOPHYSICS: THE DYNAMIC EARTH
3 credits.

Methods of geophysics applied to earth structure and plate tectonics. Principles of seismology, gravity, geodesy, magnetism and heat flow.
Requisites: MATH 217, 221, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize at least three factors to consider during the design of a geophysical survey.
Audience: Both Grad & Undergrad

2. Show how the travel times, amplitudes, and polarities of different kinds of seismic waves can be used to locate earthquakes, determine their focal mechanisms, and estimate their size.
Audience: Both Grad & Undergrad

3. Describe how the thicknesses and seismic velocities of geologic units can be estimated from seismic refractions and reflections.
Audience: Both Grad & Undergrad

4. Describe the factors that cause variations in gravitational acceleration across Earth's surface, and explain how gravity anomalies can be used to estimate variations in mass at depth.
Audience: Both Grad & Undergrad

5. Draw Earth's magnetic field lines, describe how rocks record information about Earth's paleomagnetic field, and describe how paleomagnetic measurements can be used to infer movement of Earth's tectonic plates through time.
Audience: Both Grad & Undergrad

6. Define the concept of "magnetic anomaly", describe how magnetic surveys can be used for local studies of the subsurface, and describe circumstances in which magnetic surveys may be useful.
Audience: Both Grad & Undergrad

7. Define geotherm and describe why temperatures increase with depth below Earth's surface.
Audience: Both Grad & Undergrad

8. State the theory of plate tectonics and describe at least three kinds of supporting evidence, enumerate the major types of tectonic plate boundaries and the type of movement that occurs at each, and describe what drives the movements of the plates.
Audience: Both Grad & Undergrad

9. Explain the relationship between gravitational force and mass.
Audience: Graduate

10. Describe the factors that cause variations in gravitational acceleration across Earth's surface.
Audience: Graduate

11. Explain how gravity anomalies are used to estimate variations in mass at depth.
Audience: Graduate

G L E/GEOSCI 360 – PRINCIPLES OF MINERALOGY
3 credits.

Minerals, their physical and chemical properties, crystallography, and geologic significance.
Requisites: (GEOSCI 100 or ENVIR ST/GEOSCI 106) and (CHEM 103, 109, 115, or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Use a petrographic microscope for mineral identification.
Audience: Both Grad & Undergrad

2. Identify around 40 common minerals (around 30 silicate minerals, and around 10 oxide, carbonate, and sulfide minerals).
Audience: Both Grad & Undergrad

3. Describe and apply concepts of phase transformations and solid solutions in minerals and factors that control the changes.
Audience: Both Grad & Undergrad

4. Determine the history (formation condition and possible changes / reactions) of a rock based on associated minerals and textures.
Audience: Both Grad & Undergrad

5. Write reports based on thin section observations.
Audience: Both Grad & Undergrad

6. Determine and correlate mineralogical changes with seismic discontinuities in the Earth's mantle based on crystal chemistry principles.
Audience: Both Grad & Undergrad

7. Explain the basics of nano-phase minerals in earth surface environments and their potential impacts on/in water and air.
Audience: Both Grad & Undergrad

8. Evaluate relevant scientific literature related to mineralogy and crystallography.
Audience: Graduate

G L E/GEOSCI 370 – ELEMENTARY PETROLOGY
3 credits.

Igneous and metamorphic rocks, studied in hand sample and thin section.
Requisites: G L E/GEOSCI 360, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify, describe, and classify crystalline rocks.
Audience: Both Grad & Undergrad

2. Use phase equilibria and phase diagrams for interpreting rock petrogenesis.
Audience: Both Grad & Undergrad

3. Describe the main processes and tectonic settings of magma generation and diversification.
Audience: Both Grad & Undergrad

4. Interpret trace elements and isotope diagrams to determine igneous petrogenesis.
Audience: Both Grad & Undergrad

5. Describe conditions and main tectonic settings of metamorphism.
Audience: Both Grad & Undergrad

6. Identify and describe metamorphic textures and fabrics.
Audience: Both Grad & Undergrad

7. Evaluate relevant scientific literature related to igneous and metamorphic petrology.
Audience: Graduate

G L E/ENVIR ST/GEOG/GEOSCI/LAND ARC 371 – INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING
3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.
Requisites: (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate understanding of major theories, approaches, concepts, and methods in remote sensing science.
Audience: Undergraduate

2. Apply knowledge of the nature and properties of electromagnetic radiation and how it is affected by interactions with the atmosphere and the Earth's surface.
Audience: Undergraduate

3. Utilize the techniques, skills, and modern tools necessary for monitoring environmental phenomena with earth observation data.
Audience: Undergraduate

4. Know and effectively apply image analysis, data extraction, and map-making using earth observation data.
Audience: Undergraduate

5. Demonstrate how to analyze remote sensing data using photo-interpretation, digital image processing, and photogrammetric techniques using specialized software, within geographic information systems (GIS), and in conjunction with other data sources.
Audience: Undergraduate

6. Demonstrate how to perform classification, change detection, data fusion, and radiometric and geometric correction techniques.
Audience: Undergraduate

7. Identify and appropriately utilize data types from the optical, thermal, and microwave portions of the electromagnetic spectrum, and from a wide range of airborne and satellite platforms, including high (>5 m), medium (10-30 m), and coarse (250-1000 m) spatial resolution imagery.
Audience: Undergraduate

8. Demonstrate knowledge about environmental applications of remote sensing data, such as forest inventory, water resource management, agricultural assessment, land use planning, and global change science.
Audience: Undergraduate

9. Write clear and concise laboratory reports (in scientific format) describing analytical results from image classification and change detection experiments.
Audience: Undergraduate

10. Communicate effectively through discussion, small group work, hands-on lab activities, and written reports.
Audience: Undergraduate

G L E 401 – SPECIAL TOPICS IN GEOLOGICAL ENGINEERING
1-3 credits.

Various topics in the field of geological engineering.
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

G L E/CIV ENGR 421 – ENVIRONMENTAL SUSTAINABILITY ENGINEERING
3 credits.

Uses the three paradigms of sustainability (environmental, social, and economic) for strategic environmental initiatives in an engineering setting. Proactive environmental management opportunities, including practices of pollution prevention, industrial ecology, and design for the environment. A systems approach to manufacturing, examining the life cycle of products, incorporating total cost accounting, extended producer responsibility, and design for end-of-life.
Requisites: (MATH 217 or 221) and (CHEM 104 or 109), or graduate/professional standing or member of Engineering Guest Students
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Articulate why sustainability is important and relevant within the practice of engineering
Audience: Both Grad & Undergrad

2. Apply sustainability tools such as industrial ecology, life cycle assessment, economic assessment, material flow analysis, and criticality to inform engineering decisions
Audience: Both Grad & Undergrad

3. Analyze sustainability issues and/or practices using a systems-based approach
Audience: Both Grad & Undergrad

4. Describe the social, economic, and environmental dimensions of engineering and identify potential trade-offs and interrelationships among these dimensions at a level appropriate to the course
Audience: Both Grad & Undergrad

5. Identify and critique recent peer reviewed sustainability literature
Audience: Graduate

G L E/CIV ENGR 430 – INTRODUCTION TO SLOPE STABILITY AND EARTH RETENTION
1 credit.

Introduction to theory and approaches commonly used in geotechnical engineering practice for design and analysis of slopes and earth retaining structures.
Requisites: CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Calculate the factor of safety of natural or engineered slopes
Audience: Both Grad & Undergrad

2. Design simple earth retaining structures
Audience: Both Grad & Undergrad

3. Perform additional design strategies to design complex slope or retaining structures
Audience: Graduate

4. Lead a team of undergraduate students for the final design project exercise
Audience: Graduate

G L E/GEOSCI 431 – SEDIMENTOLOGY & STRATIGRAPHY LAB
1 credit.

Covers Sedimentology and Stratigraphy; emphasizes qualitative and quantitative description and interpretation of sediments and sedimentary deposits.
Requisites: GEOSCI 204, G L E/GEOSCI 360, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Classify sedimentary rocks on the basis of thin sections, hand samples, and outcrops.
Audience: Both Grad & Undergrad

2. Identify sedimentary structures and deduce their origin in relation to sediment transport and deposition.
Audience: Both Grad & Undergrad

3. Measure stratigraphic sections and produce complete and accurate field-based written descriptions thereof.
Audience: Both Grad & Undergrad

4. Describe the origin of stratigraphic successions and their relationships to depositional environments and sequence stratigraphy.
Audience: Both Grad & Undergrad

5. Integrate field observations into a coherent geologic interpretation.
Audience: Graduate

G L E/CIV ENGR 432 – INTRODUCTION TO SHALLOW AND DEEP FOUNDATION SYSTEMS
1 credit.

Introduction to theory and approaches commonly used in geotechnical engineering practice for design and analysis of slopes and earth retaining structures.
Requisites: CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply methods and requirements of a subsurface investigation program
Audience: Both Grad & Undergrad

2. Collect sufficient information to design basic shallow or deep foundation systems
Audience: Both Grad & Undergrad

3. Fulfill the design criteria for different structures and facilities
Audience: Both Grad & Undergrad

4. Design shallow and deep foundation structures
Audience: Both Grad & Undergrad

5. Perform additional design strategies to design the foundation of a soil retaining structure
Audience: Graduate

G L E/CIV ENGR 434 – INTRODUCTION TO UNDERGROUND OPENINGS ENGINEERING
1 credit.

Subsurface stress; rock failure criteria; openings in competent rock; openings in layered rocks; plastic behavior around openings in weak rock; stereographic projections and stereonet; block theory; rock bolts; stabilization methods and design.
Requisites: CIV ENGR/G L E 330, GEOSCI/CIV ENGR/G L E/M S & E 474 or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Predict stress concentrations around underground openings
Audience: Both Grad & Undergrad

2. Identify weak points around underground openings in conjunction with the rock mass type information
Audience: Both Grad & Undergrad

3. Design openings to minimize hazard
Audience: Both Grad & Undergrad

4. Design reinforcement strategies
Audience: Both Grad & Undergrad

5. Perform advanced design strategies
Audience: Graduate

G L E/CIV ENGR/ENVIR ST/GEOSCI 444 — PRACTICAL APPLICATIONS OF GPS SURVEYING
2 credits.

Global positioning system surveying for field applications. Signals. Coordinate systems. Datums. Cartographic projections. Satellite orbits. Choosing hardware. Strategies for data collection and analysis. Assessing uncertainty. Geocoding satellite images. Integrating data with Geographic Information Systems. Emerging technologies.
Requisites: MATH 211, 217, 221, or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the current abilities, future potential, and limiting factors of GPS surveys.
Audience: Both Grad & Undergrad

2. Assess the tradeoff between accuracy and cost.
Audience: Both Grad & Undergrad

3. Summarize examples of applications of GPS surveying.
Audience: Both Grad & Undergrad

4. Design and implement a small field project using GPS surveying.
Audience: Both Grad & Undergrad

5. Assess quantitatively statistical precision and calibrated accuracy.
Audience: Graduate

G L E/GEOSCI 455 — STRUCTURAL GEOLOGY
4 credits.

Principles of rock deformation, structures in layered rocks, structural analysis, intrusive structures. Lab: three-dimensional problems involving structural concepts; field trip.
Requisites: GEOSCI 202, 204, and (G L E/GEOSCI 370 or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use conceptual models as a foundation for quantitative analysis of physical processes of interest to geologists and engineers.
Audience: Both Grad & Undergrad

2. Summarize and articulate parameters influencing the geometries and types of geologic structures resulting from deformation in different tectonic environments.
Audience: Both Grad & Undergrad

3. Recognize common geological structures and determine their kinematic, dynamic, and rheologic significance.
Audience: Both Grad & Undergrad

4. Characterize rock deformation quantitatively.
Audience: Both Grad & Undergrad

5. Utilize a range of common approaches to documenting, representing, and manipulating structural data.
Audience: Both Grad & Undergrad

6. Recognize patterns formed from isolated data points to construct an appropriate conceptual model of a 3D geologic structure.
Audience: Both Grad & Undergrad

7. Extract and convey three-dimensional information using two-dimensional diagrams.
Audience: Both Grad & Undergrad

8. Analyze kinematic, dynamic, and rheological approaches to specific field settings.
Audience: Graduate

G L E/CIV ENGR/GEOSCI/M S & E 474 – ROCK MECHANICS
3 credits.

Classification of rock masses, stress and strain in rock, linear and non-linear behavior of rock, failure mechanisms, state of stress in rock masses, lab testing, geological and engineering applications.
Requisites: E M A 201, PHYSICS 201, 207, or 247, or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Measure basic index properties for rock mass classification
Audience: Both Grad & Undergrad

2. Describe stress and strain in continuums
Audience: Both Grad & Undergrad

3. Describe the factors which control the mechanical behavior of rocks
Audience: Both Grad & Undergrad

4. Apply basic concepts of rock mechanics and rock physics to analyze basic geomechanical engineering problems
Audience: Both Grad & Undergrad

5. Prepare rock samples for mechanical testing, conduct experiment, and analyze experimental data to obtain rock strength properties
Audience: Both Grad & Undergrad

6. Describe analytically time-dependent rock behaviors
Audience: Graduate

G L E 479 – GEOLOGICAL ENGINEERING DESIGN
4 credits.

A practical problem in an area of geological engineering (such as development of a geologic resource or design of a structure in soil and/or rock) is selected, and then the principles and processes of design and analysis are applied to the solution of the problem.
Requisites: Senior standing, declared in Geological Engineering BS, and CIV ENGR/G L E 530, 532, 535, 635, 735, GEOSCI/G L E 629, CIV ENGR 414, 427, 514, or (CIV ENGR/G L E 430, 432, and 434)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Integrate and apply the knowledge gained in prior coursework into a simulated real-world design environment
Audience: Undergraduate

2. Use open-ended problem-solving skills
Audience: Undergraduate

3. Work effectively in a multidisciplinary team environment
Audience: Undergraduate

4. Use oral and written communication skills to articulate proposed and completed work
Audience: Undergraduate

5. Explain basic concepts in management, business, and public policy
Audience: Undergraduate

6. Explain the importance of professional licensure
Audience: Undergraduate

7. Identify common failure mechanisms of a component, process, or system and their causes and prevention
Audience: Undergraduate

G L E 489 – HONORS IN RESEARCH
1-3 credits.

Undergraduate honors research projects supervised by faculty members.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

G L E/CIV ENGR 511 – MIXING AND TRANSPORT IN THE ENVIRONMENT
3 credits.

Application of fluid mechanics to understand the mixing and transport of contaminants, pollutants, and other solutes in the environment. Introduction to chemical and biochemical transformation processes as well as boundary interactions at the air-water and sediment-water interfaces. Transport phenomena: diffusive processes, advective processes, turbulent diffusion, and shear flow dispersion. Introduction to both analytical and computational solutions with applications to mixing and transport in rivers, lakes, the atmosphere, and coastal waters.
Requisites: (CIV ENGR/G L E 291, COMP SCI 220, or E C E 203) and (CIV ENGR 310 or M E 363), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024
Learning Outcomes: 1. Recall the principles of conservation of mass, advective mass flux and Fick's law for diffusive mass flux
Audience: Both Grad & Undergrad

2. Apply the fundamental solution to the diffusion equation and use the principle of superposition to construct new solutions
Audience: Both Grad & Undergrad

3. Calculate the diffusivity given data of concentration distribution over time, and conversely, calculate the concentration distribution over time given the diffusivity
Audience: Both Grad & Undergrad

4. Calculate new solutions to advection-diffusion equation by modifying known solutions to include first-order reactions
Audience: Both Grad & Undergrad

5. Explain the differences between molecular diffusion, turbulent diffusion and shear flow dispersion
Audience: Both Grad & Undergrad

6. Apply models of mass transfer at boundaries to compute interfacial mass exchange between air-water and sediment-water interfaces
Audience: Both Grad & Undergrad

7. Evaluate the importance of mixing and transport processes in environmental processes and assess the utility of different types of solutions.
Audience: Graduate

G L E/CIV ENGR 520 – REACTIVE PROCESSES FOR SUSTAINABLE ENERGY AND RESOURCE PRODUCTION
3 credits.

Key scientific concepts related to fossil and renewable energy resources. Apply the fundamentals of thermodynamics and chemical kinetics at solid interfaces to better understand the science behind using fossil and renewable energy resources. Evaluate the impacts of existing and emerging energy technologies on the environment.
Requisites: Senior standing, (MATH 211, 217, or 221), (CHEM 103, 104, or 109), and CIV ENGR 320, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Identify major issues pertaining to energy and environmental science and engineering, and evaluate the sustainability of technologies grounded in the science of material and energy balances and reaction kinetics
Audience: Both Grad & Undergrad

2. Derive and solve mathematical expressions to describe energy and material transformations
Audience: Both Grad & Undergrad

3. Critically evaluate and present their analysis and synthesis of literature in this area of energy and environment
Audience: Both Grad & Undergrad

4. Evaluate and propose novel technological solutions grounded in the fundamentals of thermodynamics of kinetics
Audience: Graduate

5. Analyze and defend emerging technologies in the area of energy and environment
Audience: Graduate

G L E/CIV ENGR 530 – SEEPAGE AND SLOPES
3 credits.

Practical aspects of seepage effects and ground water flow. Stability of natural and man-made slopes under various loading conditions. Design and construction of earth dams and embankments. Flow net and its use; wells; filters; total and effective stress methods of slope analysis; selection of pertinent soil parameters.
Requisites: CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Characterize and classify slope failure
Audience: Both Grad & Undergrad

2. Identify stability risk factors in generalized slope design
Audience: Both Grad & Undergrad

3. Apply soil and rock mechanics and strength principles in the context of slope stability investigation and design
Audience: Both Grad & Undergrad

4. Determine strength parameters of soil materials under saturated and unsaturated conditions
Audience: Both Grad & Undergrad

5. Understand pore fluid pressure in underground environments and its effect on manmade structures integrated within the soil as well as the failure potential of differing geometries
Audience: Both Grad & Undergrad

6. Design slope remedial plans for earth structures subjected to varying physical properties, overburden and pore pressures, and restrictive geometries
Audience: Both Grad & Undergrad

7. Act as leaders of the small groups they have been assigned for the mini design project
Audience: Graduate

G L E/CIV ENGR 532 – FOUNDATIONS
3 credits.

Shallow and deep foundations. Analysis and design of footings, mats, piers and piles, and related fill and excavation operations. Consolidation settlement, time rate of settlement, stress distribution, elastic (immediate) settlement, load bearing capacity; methods to reduce settlements and increase shear strength; the selection of a foundation system.
Requisites: CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Provide examples of when and where to consider shallow foundation systems in lieu of deep foundation systems and where stone columns or rammed aggregate piers are appropriate
Audience: Both Grad & Undergrad

2. Scope and Prepare a Foundation Investigation, including the equipment and standards used for subsurface exploration and the advantages/disadvantages therein
Audience: Both Grad & Undergrad

3. Calculate Allowable Bearing Pressure using (a) presumptive values, (b) the bearing capacity equation and (c) in situ approaches
Audience: Both Grad & Undergrad

4. Design a safe spread foundation system where structural capacity exceeds demand
Audience: Both Grad & Undergrad

5. Design a drilled shaft and a driven pile for axial loading considering vertical loading and a settlement estimate
Audience: Both Grad & Undergrad

6. Prepare a bid sheet, plan set, and set of specifications for a successful foundation design
Audience: Both Grad & Undergrad

7. Use soil moduli in the application of a laterally loaded deep-foundation system using an appropriate software program with a hand-calculated backcheck
Audience: Graduate

G L E/CIV ENGR 534 – NONDESTRUCTIVE EVALUATION
3 credits.

Practical aspects of nondestructive evaluation (NDE) techniques for identifying physical properties and damage within civil and geologic materials and structures. Data analyses and data science for wave propagation, arrival picking, distributed fiber optic sensing, and visualization tools such as augmented/mixed/virtual reality.
Requisites: E M A 201, PHYSICS 201, 207, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe multiple nondestructive evaluation (NDE) testing methods and their applications
Audience: Both Grad & Undergrad

2. Characterize flaws within Civil and Geological Engineering materials
Audience: Both Grad & Undergrad

3. Determine source locations of flaws or damage within a structure based on NDE data
Audience: Both Grad & Undergrad

4. Characterize both active and passive elastic wave observations in rock
Audience: Both Grad & Undergrad

5. Apply seismological principles to observed acoustic emissions for determining source locations of microcracks and infer the mechanism of failure
Audience: Both Grad & Undergrad

6. Analyze fiber optic distributed acoustic sensing (DAS) to find earthquake events within timeseries data
Audience: Both Grad & Undergrad

7. Apply artificial intelligence techniques to analyze fiber optic sensing data
Audience: Graduate

G L E/CIV ENGR 535 – WIND ENERGY BALANCE-OF-PLANT DESIGN
3 credits.

Wind Energy Development and Balance-of-Plant Design. Up-front coverage includes the science and mechanics of wind energy including turbine basics, wind resource assessment, energy production, and economic return. Balance-of-plant design aspects include site layout and micro-siting, foundation systems, collector systems and interconnection, site civil and electrical infrastructure, and structural tower analysis. Development includes environmental due diligence and permitting, stakeholder engagement, energy policy and markets, and levelized cost of energy (LCOE).
Requisites: PHYSICS 201, 207, 247, E M A 201, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Provide the necessary steps to evaluate the wind resource at a prospective site by characterizing and correlating (vertically and horizontally) the wind speed distribution functions
Audience: Both Grad & Undergrad

2. Translate (forward and backward) wind power: kinetic to mechanical to electrical and select appropriate wind turbine given site wind resource and turbine power curve
Audience: Both Grad & Undergrad

3. Demonstrate knowledge of the mechanics and principles of the tower load document, shallow and deep foundation designs, transportation logistics, geotechnical investigation and reporting, thermal resistivity and collection system design, and interconnection
Audience: Both Grad & Undergrad

4. Develop civil balance-of-plant engineering calculation design bases for access roads, stormwater control, turbine foundations, and crane pads and electrical balance-of-plant engineering calculation design bases for the collection system, grounding, substation design, and interconnection
Audience: Both Grad & Undergrad

5. Analyze sustainability issues and/or practices using a systems-based approach.
Audience: Both Grad & Undergrad

6. Describe the social, economic, and environmental dimensions of wind energy and identify potential tradeoffs and interrelationships among these dimensions at an intermediate level.
Audience: Both Grad & Undergrad

7. Prepare an economic Pro Forma for a successful distributed wind project and calculate Levelized Cost of Energy (LCOE) and environmental Life Cycle Assessments (LCAs) of green-house gasses, water use, and CO2 per kW h.
Audience: Graduate

G L E/GEOSCI 537 – QUANTITATIVE METHODS FOR GEOSCIENCE
3 credits.

MATLAB is a powerful, high-level programming language and integrated development environment (IDE) that is used across a broad variety of scientific disciplines for tasks including data visualization, modeling, and application development. Focus on the active use of MATLAB for developing practical programming and data analysis skills that can be applied across a range of geoscience- relevant problems. Applications will include: data visualization and publishable figure development; automation of data processing; statistical and time-series analysis; image processing and mapping; and optimization. Additional topics may be guided by student interest.
Requisites: MATH 222, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Utilize an integrated development environment and documentation to solve geoscientific problems.
Audience: Both Grad & Undergrad

2. Interpret code in a high-level programming language to explain what an existing program does.
Audience: Both Grad & Undergrad

3. Organize geologic data and store them using appropriate data structures.
Audience: Both Grad & Undergrad

4. Develop basic algorithms by using key programming structures including: for-next loops, if-then-else statements, built-in functions, and other custom-built functions.
Audience: Both Grad & Undergrad

5. Plan, design and create a useful, well-documented computer program/utility that has general applicability.
Audience: Graduate

6. Develop codes that apply appropriate spatio-temporal data analysis routines to geologic datasets.
Audience: Graduate

7. Integrate data from several data sources to produce publication-ready maps or other geologically relevant figures.
Audience: Graduate

8. Implement quantitative models for geologic processes using appropriate analytical or numerical toolboxes.
Audience: Graduate

G L E/GEOSCI 594 – INTRODUCTION TO APPLIED GEOPHYSICS
3 credits.

Survey of applied geophysics, including seismic refraction, seismic reflection, electrical resistivity, gravity, and magnetics methods. Basic physics of each method and modeling techniques and field procedures.
Requisites: MATH 222 and (PHYSICS 202, 208, 248, or E M A 202), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the fundamental physics underlying applied geophysical methods and how these measurements and techniques are used to explore and characterize the near surface.
Audience: Both Grad & Undergrad

2. Describe the limitations of geophysical techniques and tools.
Audience: Both Grad & Undergrad

3. Describe the field procedures employed to collect geophysical data.
Audience: Both Grad & Undergrad

4. Use geophysical techniques to interpret and analyze geophysical data collected for applied and engineering purposes.
Audience: Both Grad & Undergrad

5. Evaluate the application of geophysical technique through critical analysis of published literature.
Audience: Graduate

G L E/GEOSCI 595 – FIELD METHODS IN APPLIED AND ENGINEERING GEOPHYSICS
1 credit.

The application of geophysical field methods for delineating near-surface features and/or structures as applied to engineering, environmental and exploration problems.
Requisites: GEOSCI/G L E 594 or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Utilize different geophysical tools.
Audience: Both Grad & Undergrad

2. Analyze geophysical data with the help of computer modeling tools.
Audience: Both Grad & Undergrad

3. Report geophysical measurements and interpretations.
Audience: Both Grad & Undergrad

4. Design field-based surveys that use different geophysical techniques.
Audience: Both Grad & Undergrad

5. Report the geology of a site and the requirements for engineering and environmental applications to geophysical techniques.
Audience: Graduate

G L E/GEOSCI 596 – GEOMECHANICS
3 credits.

Observation, description, and prediction of deformation of geomechanical systems at depth, and the forces (stress) causing those deformations, relevant for petroleum/geothermal reservoirs and studies of earthquake mechanics. Emphasis on computational exercises using datasets from the petroleum industry and earthquake catalogues, as well as prediction of ground deformation.
Requisites: GEOSCI/CIV ENGR/G L E/M S & E 474, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Conduct a borehole geomechanical analysis
Audience: Both Grad & Undergrad

2. Design casing plans for drilling
Audience: Both Grad & Undergrad

3. Use borehole data and earthquake focal mechanisms to gain information about in-situ stress and strain
Audience: Both Grad & Undergrad

4. Describe modern challenges in developing subsurface energy resources

Audience: Both Grad & Undergrad

5. Use modern software to find crustal deformation models that match observed ground deformation
Audience: Graduate

G L E/CIV ENGR 612 – ECOHYDROLOGY
3 credits.

Mutual interactions between the hydrologic cycle and ecosystems, including hydrologic mechanisms that underlie ecological patterns and processes, movement of water and energy through the soil-plant-atmosphere continuum, application and development of models for simulating ecohydrologic processes, and case studies on ecohydrologic function and ecosystem services of varied environments.
Requisites: CIV ENGR 311, GEOSCI/G L E 627, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify, describe, and quantify ecohydrologic processes
Audience: Both Grad & Undergrad

2. Build and use models for simulating hydrologic processes, ecologic structure and vegetation composition
Audience: Both Grad & Undergrad

3. Work effectively and collaborate in groups to communicate ecohydrologic concepts
Audience: Both Grad & Undergrad

4. Critically evaluate the ecohydrologic literature
Audience: Graduate

G L E/GEOSCI 627 – HYDROGEOLOGY
3-4 credits.

Mathematical treatment of the physical principles governing the flow of groundwater; emphasis on well hydraulics and flow system analysis.
Requisites: (GEOSCI 100, 109, 110, ATM OCN/GEOSCI 105, 140, ENVIR ST/GEOSCI 106, or ASTRON/GEOSCI 160) and (MATH 217 or 221), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe how groundwater flow and storage are impacted by geology.
Audience: Both Grad & Undergrad

2. Collect high-quality data in the field and laboratory to quantify hydrogeologic processes and properties.
Audience: Both Grad & Undergrad

3. Integrate data from wells, field reports and surficial data to create reasonable conceptual models of aquifers and surface water / groundwater interactions.
Audience: Both Grad & Undergrad

4. Implement appropriate quantitative analyses to characterize aquifer properties based on aquifer tests.
Audience: Both Grad & Undergrad

5. Apply numerical simulations and assess the output of these simulations in terms of their hydrologic meaning and predictions.
Audience: Both Grad & Undergrad

6. Critique news and technical reports related to groundwater science using hydrogeologic principles.
Audience: Graduate

G L E/GEOSCI 629 – CONTAMINANT HYDROGEOLOGY
3 credits.

Physical and chemical processes governing the transport of solutes in groundwater; application of hydrogeologic and geochemical theory and practice to the protection of aquifers from contamination.
Requisites: G L E/GEOSCI 627 and MATH 222, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the physical, chemical, and biological processes controlling the transport of subsurface contaminants.
Audience: Both Grad & Undergrad

2. Apply mathematical expressions for analytically describing solute, colloid, and multiphase flow in porous and fractured media.
Audience: Both Grad & Undergrad

3. Interpret and synthesize scientific literature and technical reports to create subsurface flow and transport models of specific case studies.
Audience: Both Grad & Undergrad

4. Analyze the causes of, and solutions for, the sustainability challenge of natural and anthropogenic contaminants in the subsurface.
Audience: Both Grad & Undergrad

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges relevant to the protection of groundwater resources from contamination.
Audience: Both Grad & Undergrad

6. Create and evaluate a subsurface flow and transport model related to their graduate research or another specific environmental problem.
Audience: Graduate

G L E/CIV ENGR 635 – REMEDIATION GEOTECHNICS
3 credits.

Geotechnical practice for remediation of sites containing contaminated soil and groundwater is discussed. Topics include non-invasive and invasive subsurface exploration techniques, methods to monitor for the presence of contaminants in the saturated and unsaturated zones, and geotechnically-oriented remedial action technologies.
Requisites: CIV ENGR/G L E 330, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023

G L E 699 – INDEPENDENT STUDY
1-3 credits.

Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

G L E/GEOSCI 724 – GROUNDWATER FLOW MODELING
3 credits.

An introduction to the principles of modeling groundwater flow systems, with emphasis on regional flow system analysis. Conceptual understanding of governing equations, and the use of finite difference techniques to solve such equations are stressed. Develop codes and become introduced to packaged models, including those developed by the U. S. Geological Survey. Knowledge of hydrogeology [such as G L E/GEOSCI 627 or 629] required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Formulate a groundwater flow problem as a PDE-based mathematical statement from first principles (conservation of mass, conservation), and summarize how different governing equations are derived.
Audience: Graduate

2. Develop an algebraic approximation of a PDE and solve the algebraic equation using direct or iterative methods.
Audience: Graduate

3. Apply the USGS software MODFLOW intelligently and recognize the inherent assumptions in different options and packages.
Audience: Graduate

4. Evaluate model predictions and uncertainty using model refinement, testing, and calibration.
Audience: Graduate

G L E/CIV ENGR 730 – ENGINEERING PROPERTIES OF SOILS
3 credits.

Determination and interpretation of soil properties for engineering purposes; physio-chemical properties of soil-water systems, permeability and capillarity, compression characteristics of soils, measurement of soil properties in the triaxial test, properties of frozen soils and permafrost.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Describe the physicochemical characteristics of soils and their importance to the engineering behavior of soils
Audience: Graduate

2. Define the factors which control the hydraulic and mechanical behavior of soils
Audience: Graduate

3. Evaluate how engineering classification of soils capture fundamental responses
Audience: Graduate

4. Run and interpret laboratory tests used to characterize how physical and chemical properties of particles affect the behavior of soil masses, including hydraulic properties and the stiffness and shear strength properties
Audience: Graduate

5. Explain models that describe the behavior and properties of soils
Audience: Graduate

G L E/CIV ENGR 732 – UNSATURATED SOIL GEOENGINEERING
3 credits.

Engineering principles of unsaturated soils as they apply to geotechnical and geoenvironmental systems. Effect of soil water suction and stress on hydraulic conductivity, shear strength, and compressibility of soils in the context of geoengineering problems of flow and stability. Knowledge of Soil Mechanics [such as CIV ENGR/G L E 330] is required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Define properties of unsaturated soils
Audience: Graduate

2. Use principles of interfacial physics, hydrology, and soil mechanics to interpret unsaturated soil behavior
Audience: Graduate

3. Use results from measurement methods to characterize unsaturated soil properties
Audience: Graduate

G L E/CIV ENGR 733 – PHYSICOCHEMICAL BASIS OF SOIL BEHAVIOR
3 credits.

Applications of physiochemical, mineralogical and environmental considerations to the engineering behavior of soils. Soil composition, formation, fabric, pore fluid chemistry and interaction of phases. The particulate nature of soils and the fabric-engineering property (volume change, strength, deformation and conduction) relationships. Knowledge of Soil Mechanics [such as CIV ENGR/G L E 330] is required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Characterize properties of soils that consist partly or wholly of clay
Audience: Graduate

2. Define the composition and fabric of natural soils, their surface and pore-fluid chemistry, and the physical and chemical factors that govern fine-grained soil behavior
Audience: Graduate

G L E/GEOSCI 747 – TECTONOPHYSICS
3 credits.

Elasticity and flexure of the earth's lithosphere, heat conduction, mantle convection, earthquake mechanisms, rock rheology, and fluid migration in the earth's crust; integration of geophysical observations, laboratory experiments, and theoretical models.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Demonstrate an understanding of the Scientific Theory of Plate Tectonics by writing, solving, illustrating, and exemplifying Euler's formula for rigid tectonic plates moving on a sphere.
Audience: Graduate

2. Demonstrate an understanding of the earthquake deformation cycle in time and space by sketching a map over ~100 km and a time series over ~1000 years.
Audience: Graduate

3. Demonstrate an understanding of the physical principles of crustal deformation by writing, applying, and solving the differential equations governing motion under the constitutive relations for rigid, elastic, and Maxwell visco-elastic rheologies.
Audience: Graduate

4. Demonstrate an understanding of quantitative reasoning for testing geophysical hypotheses by comparing two competing models with appropriate statistical tests.
Audience: Graduate

5. Visualize plate motions on a 3-dimensional sphere by writing, debugging, and writing computer applications.
Audience: Graduate

6. Analyze geophysical data and interpret them by implementing simple models in the Matlab computer language.
Audience: Graduate

G L E/GEOSCI 757 – ADVANCED ROCK MECHANICS
3 credits.

Experimental rock mechanics, rock mechanics apparatus design, static and dynamic rock friction, rate and state friction, crack phenomena and rock fracture mechanics, earthquake energy budget, elastic/viscoelastic/plastic behavior of rocks, engineering and geological applications. Knowledge of introductory rock mechanics [such as M S E/GEOSCI/CIV ENGR/G L E/ M S & E 474] required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Analyze technical construction of rock mechanics apparatuses
Audience: Graduate

2. Design and fabricate load cells and displacement sensors
Audience: Graduate

3. Measure dynamic rock frictional properties for fault instability analysis
Audience: Graduate

G L E/GEOSCI 780 – GEODYNAMIC MODELING
3 credits.

Introduction to modeling in geoscience, focusing on the process of turning geoscientific observations into numerical models, and the interpretation and characterization of these results. Sample problems from geoscientific topics will be used to illustrate the formulation, simplification, solution, and analysis of typical problems encountered in modeling in geosciences. Different techniques that arise in the solution of these problems will be introduced and practiced on typical geodynamic problems, with particular focus on problems arising in modeling of the Earth's interior and surface.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Formulate and simplify idealized models for geodynamic problems.
Audience: Graduate

2. Employ standard numerical methods and existing numerical models to solve problems arising in geodynamic modeling.
Audience: Graduate

3. Visualize and analyze geodynamic model outputs.
Audience: Graduate

4. Analyze and identify the dynamical behaviour of geodynamic systems.
Audience: Graduate

G L E 790 – MASTER'S RESEARCH OR THESIS
1-9 credits.

Under faculty supervision.
Requisites: Declared in Geological Engineering MS
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

G L E 801 – SPECIAL TOPICS IN GEOLOGICAL ENGINEERING
1-3 credits.

Topics vary.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

G L E 890 – PRE-DISSERTATOR'S RESEARCH
1-9 credits.

Under faculty supervision.
Requisites: Declared in Geological Engineering PHD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

G L E 900 – SEMINAR
1 credit.

Topics vary.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

G L E 990 – RESEARCH AND THESIS
1-9 credits.

Under faculty supervision.
Requisites: Declared in Geological Engineering PHD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

G L E 999 – INDEPENDENT WORK
1-3 credits.

Under faculty supervision.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2023

GEOSCIENCE (GEOSCI)

GEOSCI 100 – INTRODUCTORY GEOLOGY: HOW THE EARTH WORKS
3 credits.

Geologic processes; structure and history of the earth; earthquakes, volcanos, glaciers, groundwater, minerals, rocks, deserts, fossils; topographic and geologic maps; climate change on geologic and human time scales.
Requisites: Not open to students with credit for GEOSCI/ENVIR ST 106
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the plate tectonic paradigm and how it relates to phenomena like earthquakes and volcanoes.
Audience: Undergraduate

2. Recognize landscape features and how they form.
Audience: Undergraduate

3. Describe the concept of geologic time.
Audience: Undergraduate

4. Recognize how water shapes Earth.
Audience: Undergraduate

5. Describe how life interacts with and shapes Earth.
Audience: Undergraduate

6. Recognize Earth energy and materials resources.
Audience: Undergraduate

7. Recognize key minerals and rocks.
Audience: Undergraduate

8. Read topographic and geologic maps.
Audience: Undergraduate

GEOSCI/ATM OCN/ENVIR ST 102 – CLIMATE AND CLIMATE CHANGE
3 credits.

Describes the basic climate principles governing the climate system. It describes the climate and climate variability at present, climate evolution in the past, and the projected climate change into the future. The scientific principles underlying the natural and anthropogenic greenhouse effect and climate model forecasts are elucidated.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain how climate has changed in the past and is projected to change in the future.
Audience: Undergraduate

2. Describe how the different components of Earth System affect the climate and how global warming will impact them.
Audience: Undergraduate

3. Connect physical climate changes to impacts on the environment, ecosystems, and people.
Audience: Undergraduate

4. Describe different adaptation and mitigation strategies.
Audience: Undergraduate

5. Explain how scientists study the climate.
Audience: Undergraduate

6. Describe the debate around climate change.
Audience: Undergraduate

GEOSCI/ATM OCN 105 – SURVEY OF OCEANOGRAPHY
3-4 credits.

Nature and behavior of ocean water, interaction of oceans and atmosphere, structure of the ocean floor, life in the oceans, our relationship to the marine environment.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the processes that created the ocean basins.
Audience: Undergraduate

2. Explain the formation of seafloor features and landforms.
Audience: Undergraduate

3. Describe the major physical processes within the ocean.
Audience: Undergraduate

4. Describe ocean chemistry and processes of nutrient cycling.
Audience: Undergraduate

5. Describe the major surface and deep currents in the oceans and explaintheir causes and locations.
Audience: Undergraduate

6. Describe the major distribution, abundance, and production of marinespecies within the ocean.
Audience: Undergraduate

7. Explain how physical and chemical factors in the ocean affect the climate inthe past, present, and future.
Audience: Undergraduate

GEOSCI/ENVIR ST 106 – ENVIRONMENTAL GEOLOGY
3 credits.

Application of geology to problems resulting from the ever more intense use of the earth and its resources.
Requisites: Not open to students with credit for GEOSCI 100
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe the materials that make up the earth and the natural processes that shape the earth over a variety of time scales.
Audience: Undergraduate

2. Use multiple lines of evidence (integrate multiple lines of data) to support or reject theories about Earth history, Earth processes, Earth hazards, and human impacts.
Audience: Undergraduate

3. Identify why various geologic resources, benefits, hazards, and constraints may be important in a given geologic environment, and support the explanation with evidence.
Audience: Undergraduate

4. Recognize the impacts of human actions and resource usage at regional, national, and global scales using available evidence.
Audience: Undergraduate

GEOSCI 109 – THREE BILLION YEARS BENEATH YOUR FEET: GEOLOGY OF THE NATIONAL PARKS
3 credits.

Famously called "America's best idea", the National Parks of the US record two-thirds of Earth's history, from the most ancient mountains to active volcanic eruptions. The geologic story of the National Parks is explored in the framework of physiography, tectonics, time, and fundamental geologic processes, highlighting the major parks from Hawaii, to Alaska, to the conterminous US. Provides a view of the geological evolution of the Earth using specific examples.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify basic geologic concepts, including mineral and rock groups, geologic time, the geologic record of life, geologic structures, and plate tectonics.
Audience: Undergraduate

2. Identify the physiographic provinces of the US and how these are related to broad geologic and climatic factors.
Audience: Undergraduate

3. Compare the variety of tectonic processes that produce different mountain belts of the US, such as the Cascades, Sierra Nevada, Rockies, and Appalachians and how this affects the landscapes of the National Parks in these regions.
Audience: Undergraduate

4. Contrast the effects of recent and long-term climate change on the landscapes of the US, using specific National Parks as examples.
Audience: Undergraduate

5. Describe the interactions between humans and the environment in several physiographic provinces that host national parks and evaluate the current and future environmental challenges faced by organisms living in these regions.
Audience: Undergraduate

GEOSCI 110 – EVOLUTION AND EXTINCTION
4 credits.

Contemporary views of the origin and diversification of life and evolutionary processes; crises in the history of life, with emphasis on controversies regarding evolution, mass extinctions, and the co-evolution of Earth and life.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe and appraise the arguments and evidence for evolution via natural selection.
Audience: Undergraduate

2. Describe the Central Dogma of molecular biology and define key molecular components therein.
Audience: Undergraduate

3. List key mechanisms involved in the regulation of gene expression during the development of organisms.
Audience: Undergraduate

4. Identify mechanisms that can result in speciation and extinction.
Audience: Undergraduate

5. Describe the nature of the fossil record as an archive for the history of life.
Audience: Undergraduate

6. Describe the methods used to partition and measure geological time and determine the age of the Earth and key evolutionary events.
Audience: Undergraduate

7. Describe macroevolution and characterize general macroevolutionary patterns in the fossil record.
Audience: Undergraduate

8. Define the basis for recognizing mass extinctions, their effects, and outline causal hypotheses.
Audience: Undergraduate

GEOSCI 117 – EX-FILES: LIFE IN THE EARTH'S EXTREME ENVIRONMENT
2 credits.

Explores the diversity of microbial life forms in modern and ancient geological environments, with a focus on extreme environments of geological origin or relevance. Includes exploration of unusual aspects of microbial life in everyday settings.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the potential for microbial life in extreme environments on Earth and other worlds.
Audience: Undergraduate

2. Apply fundamental concepts of biology and the chemistry of life to interpret the history of life of Earth in a geological context, and to evaluate possible modes of life in extraterrestrial environments.
Audience: Undergraduate

3. Utilize ribosomal RNA gene sequence information to determine the identity of unknown microorganisms and place them on the overall "Tree of Life".
Audience: Undergraduate

4. Read science news and other programs dealing with the history of life on Earth, as well as the potential metabolic basis for life on other worlds.
Audience: Undergraduate

5. Use on-line databases to obtain scientific information, summarize and document sources.
Audience: Undergraduate

6. Use hypothesis-driven inquiry to collect, analyze, and interpret simple experimental data obtained hands-on in the classroom.
Audience: Undergraduate

7. Use standard methods of scientific writing to produce laboratory reports and white papers.
Audience: Undergraduate

GEOSCI 118 – EYE IN THE SKY: MONITORING THE EARTH BY SATELLITE
1 credit.

Fundamentals of satellite imagery applied to the earth sciences. Basics of image interpretation. Multitemporal data. Resolution and uncertainty. Existing and emerging technologies. Orbits, wavelengths, and satellites. Socio-economic impact of remotely-sensed data.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Visualize examples of satellite imagery enabling earth science.
Audience: Undergraduate

2. Interpret a satellite image by identifying features, quantifying resolution, and determining scale.
Audience: Undergraduate

3. Discuss the current abilities, future potential, and limiting factors of satellite imagery.
Audience: Undergraduate

4. Recognize the importance of "ground truth" before drawing conclusions from remotely-sensed data.
Audience: Undergraduate

5. Apply critical thinking skills, particularly in spatial reasoning about satellite data.
Audience: Undergraduate

GEOSCI/ATM OCN 140 – NATURAL HAZARDS AND DISASTERS
3 credits.

An exploration of the science behind natural disasters including earthquakes, tsunamis, volcanic eruptions, landslides, tornadoes, hurricanes, and floods. Why, where, and when do these events occur, and why are some predictable but others are not? Addresses hazard assessment, forecasting, and mitigation to lessen their impact on society.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the underlying physical earth processes causing hazards including extreme weather, earthquakes, volcanic eruptions, tsunamis, landslides among others.
Audience: Undergraduate

2. Define hazard and risk and explain the difference between the two concepts.
Audience: Undergraduate

3. Apply methods of hazard mitigation and quantitative risk assessment.
Audience: Undergraduate

4. Utilize probabilistic forecasting of extreme events and their relative risks.
Audience: Undergraduate

5. Recognize the effects of anthropogenic climate change on hazard and risk due to changes in severity or frequency of hazardous events.
Audience: Undergraduate

6. Evaluate the advantages, disadvantages, and trade-offs among different policy responses to perceived hazards.
Audience: Undergraduate

7. Recognize how extreme events are related to the physical and chemical processes that form and shape our planet.
Audience: Undergraduate

GEOSCI/ASTRON 160 — LIFE IN THE UNIVERSE
2 credits.

An examination of the origin and evolution of life in the universe based on our knowledge of astronomy, biology, and geology. Includes discussions on the search for extraterrestrial life and the history of life in our solar system.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Show how scientific reasoning and the scientific method are used to determine Earth's place within the solar system and the cosmos.
Audience: Undergraduate

2. Connect our current observations of exoplanets with their potential roles in the origin of life elsewhere in the Universe.
Audience: Undergraduate

3. Describe the physical and chemical limits of life on Earth to chart the potential for life on Mars and other worlds.
Audience: Undergraduate

4. Apply the genetic code to interpret the origin and evolution of life on Earth.
Audience: Undergraduate

5. Summarize key geologic events on Earth and Mars; interpret relationships between planetary tectonics and habitability.
Audience: Undergraduate

6. Explain the range of evidence in the rock record for early life on Earth and critique the fidelity of this record.
Audience: Undergraduate

7. Illustrate how quantitative approaches are used to analyze problems in astronomy, biology, and geology.
Audience: Undergraduate

GEOSCI 198 — DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2012

GEOSCI 199 — DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023

GEOSCI 202 — INTRODUCTION TO GEOLOGIC STRUCTURES
4 credits.

Introduction to recognition and mapping of geologic structures in the field. Landforms, folds, faults, tectonics, geologic maps, and field instrumentation.
Requisites: GEOSCI 100 or ENVIR ST/GEOSCI 106
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Employ spatial reasoning skills to geological problems.
Audience: Undergraduate

2. Describe geological structures at the surface and below the surface of the Earth.
Audience: Undergraduate

3. Read and construct topographic and geologic maps.
Audience: Undergraduate

4. Read and construct geologic cross-sections.
Audience: Undergraduate

5. Determine temporal order of events from spatial patterns.
Audience: Undergraduate

6. Interpret geologic processes from observed landscape and bedrock patterns.
Audience: Undergraduate

GEOSCI 203 – EARTH MATERIALS: A SYSTEMS APPROACH
4 credits.

Introduction to earth systems and earth materials that form as a result of earth processes. Focus on identification of igneous, sedimentary, metamorphic, and structural rock types in hand sample, core, and outcrop. Topics include: structure and composition of the earth; fundamentals of mineralogy and crystallography; magmatism; sedimentary deposition; metamorphism and deformation; water and the hydrosphere; mineral deposits; energy resources; basic principles of rock mechanics.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Identify all major rock types and the minerals that constitute them.
Audience: Undergraduate

2. Provide characterization of rocks (e.g., types of schists) based on quantitative mineral composition and fabric.
Audience: Undergraduate

3. Articulate how all rock types are related to plate tectonic processes and fit into the rock cycle.
Audience: Undergraduate

4. Characterize the basic physical (density, porosity, permeability, fracture patterns) and chemical (pH, susceptibility of weathering and dissolution) properties of different rock types.
Audience: Undergraduate

GEOSCI 204 – GEOLOGIC EVOLUTION OF THE EARTH
4 credits.

Physical evolution of the earth and its relationship to the development of life through geologic time. Includes field trip.
Requisites: GEOSCI 100 or ENVIR ST/GEOSCI 106
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the fundamental terminology and principles that form the foundation of the Earth Sciences.
Audience: Undergraduate

2. Recognize the geologic significance of common minerals, rocks, and fossils.
Audience: Undergraduate

3. Explain the rock records of tectonic processes, surficial processes, and climate change.
Audience: Undergraduate

4. Recognize and be able to articulate how plate tectonics has affected biological evolution, and how the history of evolution is recorded/expressed in the fossil record.
Audience: Undergraduate

5. Recognize the processes of mountain belt formation and post-orogenic erosion and/or extension and know the history of specific mountain belts that exemplify these processes.
Audience: Undergraduate

GEOSCI 304 – GEOBIOLOGY
3 credits.

An integrative approach to studying the interaction between the atmosphere, hydrosphere, biosphere, and geosphere as they have evolved during earth history. Overarching theme includes ocean-climate system changes, biogeochemical cycles, evolution from microbes to mammals, and critical events in life history.
Requisites: GEOSCI 204 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze fundamental processes that regulate environmental conditions on the surface of Earth.
Audience: Both Grad & Undergrad

2. Apply basic biological concepts to reveal the role of microbial metabolisms in nutrient and carbon cycling.
Audience: Both Grad & Undergrad

3. Examine how various geochemical proxies (i.e. isotopic systems) are used to study biogeochemical cycles.
Audience: Both Grad & Undergrad

4. Investigate the evolutionary tree of life on Earth and how it is reconstructed.
Audience: Both Grad & Undergrad

5. Analyze processes that drive speciation and extinction.
Audience: Both Grad & Undergrad

6. Characterize watershed events that have contributed to the evolutionary history of Life on Earth.
Audience: Both Grad & Undergrad

7. Read the published literature in geobiology.
Audience: Both Grad & Undergrad

8. Compare findings from multiple published papers with competing interpretations of the geobiological record.
Audience: Graduate

GEOSCI/G L E 314 – INTRODUCTION TO APPLIED HYDROGEOLOGY
3 credits.

Introduction to concepts relevant to studying water and its movement in Earth's shallow subsurface. Examines geologic materials through the lens of groundwater and solutes in groundwater to build an understanding of how water is stored, flows through, and reacts with geological materials. Beyond groundwater (the largest available store of freshwater on Earth), the porous crust of the Earth also provides numerous resources, such as hydrocarbons, geothermal energy, and waste storage. Emphasizes understanding fundamental concepts for studying these fluid reservoirs. Discuss hydrogeologic basics, work with hydrogeologic methods and instrumentation, conduct data analysis with real-world data, and have an introduction to groundwater quality.
Requisites: Satisfied Quantitative Reasoning (QR) A
Course Designation: Comm QR - Quantitative Reasoning B
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Characterize porous media properties, their units, and relevance to fluid and solute movements.
Audience: Both Grad & Undergrad

2. Identify flow properties and their variability in different types of geologic materials.
Audience: Both Grad & Undergrad

3. Determine fluid movement directions and groundwater quality from existing documentation including well logs, head measurements, and other field data.
Audience: Both Grad & Undergrad

4. Integrate field data and historical data to generate informative hydrogeologic maps.
Audience: Both Grad & Undergrad

5. Assess the quality of methods and interpretations in hydrogeologic research studies.
Audience: Graduate

GEOSCI/GEOG 320 – GEOMORPHOLOGY
3 credits.

Principles and analysis of geomorphic processes and resulting land forms.
Requisites: GEOSCI/ENVIR ST 106, GEOSCI 100, 109, 204, ENVIR ST/GEOG 120, 127 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Recognize the processes that cause rivers to transport sediment.
Audience: Both Grad & Undergrad

2. Recognize the processes by which glaciers slip over or deform their beds and produce landforms.
Audience: Both Grad & Undergrad

3. Recognize the processes that govern hill slope stability.
Audience: Both Grad & Undergrad

4. Identify and explain the processes that govern the geomorphology of coastal regions.
Audience: Both Grad & Undergrad

5. Describe why parts of Wisconsin look the way they do.
Audience: Both Grad & Undergrad

6. Calculate glacier sliding speeds from glacier profiles.
Audience: Graduate

7. Calculate sediment transport by rivers.
Audience: Graduate

GEOSCI 331 – GEMS: THE SCIENCE BEHIND THE SPARKLE
1-2 credits.

Explores the formation, collection, properties, and treatment of many popular gemstones.
Requisites: Junior standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize common / popular gems and their corresponding minerals in geological environments.
Audience: Undergraduate

2. Recognize factors that affect the quality and value of gems.
Audience: Undergraduate

3. Summarize differences among natural gems, enhanced gems, synthetic gems, and simulants.
Audience: Undergraduate

GEOSCI/ATM OCN/ENVIR ST/GEOG 335 – CLIMATIC ENVIRONMENTS OF THE PAST
3 credits.

Climate change at timescales from the last several million years to the last 100 years, with emphasis on more recent timescales. Examines how climate variability arises from interplay between external forcings, feedbacks within the earth system, and (more recently) human activity.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the major climatic events and trends during the Quaternary, spanning timescales from the last 50,000,000 years to the last 100 years.
Audience: Undergraduate

2. Identify the physical processes controlling the behavior of the earth system and its components (atmosphere, oceans, cryosphere, biosphere, etc.).
Audience: Undergraduate

3. Discuss how climatic variability results from a combination of external forcings and internal dynamics within the earth system.
Audience: Undergraduate

4. Recognize how paleoclimatologists collect, date, and analyze a staggering variety of paleoclimatic records, including ocean and lake sediment cores, ice cores, tree rings, corals, and speleothems.
Audience: Undergraduate

5. Analyze and critically evaluate climate experiments that are simulated by earth system models.
Audience: Undergraduate

6. Think and write critically, with particular attention to critically reading the scientific literature and critically employing the climate proxies and models used by paleoclimatologists.
Audience: Undergraduate

GEOSCI 340 – GEOSCIENCE DATA ANALYSIS
3 credits.

Introduction to the fundamentals of applied geoscience data analysis, focusing on solving practical problems using real real-world data. Covers applied data analysis topics that are essential across a wide range of geoscience fields, including geophysics, geochemistry, hydrogeology, structural geology, sedimentology, geochronology, glacial geology, and geomorphology. Covers the use of example geoscience data sets to display and describe data; calculate and propagate uncertainties; test hypotheses; fit functions to data with linear regression and multiple linear regression; account for artifactual and serial correlation; analyze time series and directional data; and design experiments to optimize collection of rock, soil, and water samples.
Requisites: MATH 222 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Quantitatively describe and display data distributions in geoscience applications.
Audience: Both Grad & Undergrad

2. Calculate and propagate uncertainties in geoscience data.
Audience: Both Grad & Undergrad

3. Test hypotheses about geoscience data using central tendencies and uncertainties.
Audience: Both Grad & Undergrad

4. Describe how linear regression works and use it to quantify trends and their uncertainties in geoscience data.
Audience: Both Grad & Undergrad

5. Recognize and account for common pitfalls in applications of data analysis to the geosciences.
Audience: Both Grad & Undergrad

6. Analyze time series and directional data across the geosciences.
Audience: Both Grad & Undergrad

7. Design geoscience data collection for testing hypotheses.
Audience: Graduate

GEOSCI/G L E 350 – INTRODUCTION TO GEOPHYSICS: THE DYNAMIC EARTH
3 credits.

Methods of geophysics applied to earth structure and plate tectonics. Principles of seismology, gravity, geodesy, magnetism and heat flow.
Requisites: MATH 217, 221, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize at least three factors to consider during the design of a geophysical survey.
Audience: Both Grad & Undergrad

2. Show how the travel times, amplitudes, and polarities of different kinds of seismic waves can be used to locate earthquakes, determine their focal mechanisms, and estimate their size.
Audience: Both Grad & Undergrad

3. Describe how the thicknesses and seismic velocities of geologic units can be estimated from seismic refractions and reflections.
Audience: Both Grad & Undergrad

4. Describe the factors that cause variations in gravitational acceleration across Earth's surface, and explain how gravity anomalies can be used to estimate variations in mass at depth.
Audience: Both Grad & Undergrad

5. Draw Earth's magnetic field lines, describe how rocks record information about Earth's paleomagnetic field, and describe how paleomagnetic measurements can be used to infer movement of Earth's tectonic plates through time.
Audience: Both Grad & Undergrad

6. Define the concept of "magnetic anomaly", describe how magnetic surveys can be used for local studies of the subsurface, and describe circumstances in which magnetic surveys may be useful.
Audience: Both Grad & Undergrad

7. Define geotherm and describe why temperatures increase with depth below Earth's surface.
Audience: Both Grad & Undergrad

8. State the theory of plate tectonics and describe at least three kinds of supporting evidence, enumerate the major types of tectonic plate boundaries and the type of movement that occurs at each, and describe what drives the movements of the plates.
Audience: Both Grad & Undergrad

9. Explain the relationship between gravitational force and mass.
Audience: Graduate

10. Describe the factors that cause variations in gravitational acceleration across Earth's surface.
Audience: Graduate

11. Explain how gravity anomalies are used to estimate variations in mass at depth.
Audience: Graduate

GEOSCI/ATM OCN 353 – PROGRAMMING FOR EARTH SCIENTISTS
3 credits.

Introduction to scientific programming with a focus on geoscience applications, utilizing Python as the primary programming language. Focus on gaining practical skills applicable to geoscience datasets such as analytical model implementation, time series analysis, and geospatial data visualization. Includes elementary topics in numerical computing and machine learning. The use of hands-on exercises, real-world datasets, and collaborative projects will be used to explore how to address geoscience problems with computational solutions.
Requisites: MATH 222 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Write, debug, and optimize algorithms for solving problems in geoscience.
Audience: Both Grad & Undergrad

2. Process, analyze, and interpret geospatial and time-series data to solve problems involving the timing of geologic events or environmental processes.
Audience: Both Grad & Undergrad

3. Create effective visualizations of geoscientific spatial and temporal data.
Audience: Both Grad & Undergrad

4. Efficiently employ AI tools to support programming tasks, and critically evaluate the accuracy, efficiency, and scientific validity of AI-generated code or analyses.
Audience: Both Grad & Undergrad

5. Identify, implement, and evaluate machine learning approaches to classify, cluster, or predict geoscientific phenomena using large datasets.
Audience: Both Grad & Undergrad

6. Apply fundamental numerical computing techniques to model and simulate Earth systems.
Audience: Both Grad & Undergrad

7. Apply machine learning algorithms to a scientific problem in your area of study to analyze a scientific process.
Audience: Graduate

GEOSCI/G L E 360 – PRINCIPLES OF MINERALOGY
3 credits.

Minerals, their physical and chemical properties, crystallography, and geologic significance.
Requisites: (GEOSCI 100 or ENVIR ST/GEOSCI 106) and (CHEM 103, 109, 115, or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Use a petrographic microscope for mineral identification.
Audience: Both Grad & Undergrad

2. Identify around 40 common minerals (around 30 silicate minerals, and around 10 oxide, carbonate, and sulfide minerals).
Audience: Both Grad & Undergrad

3. Describe and apply concepts of phase transformations and solid solutions in minerals and factors that control the changes.
Audience: Both Grad & Undergrad

4. Determine the history (formation condition and possible changes / reactions) of a rock based on associated minerals and textures.
Audience: Both Grad & Undergrad

5. Write reports based on thin section observations.
Audience: Both Grad & Undergrad

6. Determine and correlate mineralogical changes with seismic discontinuities in the Earth's mantle based on crystal chemistry principles.
Audience: Both Grad & Undergrad

7. Explain the basics of nano-phase minerals in earth surface environments and their potential impacts on/in water and air.
Audience: Both Grad & Undergrad

8. Evaluate relevant scientific literature related to mineralogy and crystallography.
Audience: Graduate

GEOSCI/G L E 370 – ELEMENTARY PETROLOGY
3 credits.

Igneous and metamorphic rocks, studied in hand sample and thin section.
Requisites: G L E/GEOSCI 360, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify, describe, and classify crystalline rocks.
Audience: Both Grad & Undergrad

2. Use phase equilibria and phase diagrams for interpreting rock petrogenesis.
Audience: Both Grad & Undergrad

3. Describe the main processes and tectonic settings of magma generation and diversification.
Audience: Both Grad & Undergrad

4. Interpret trace elements and isotope diagrams to determine igneous petrogenesis.
Audience: Both Grad & Undergrad

5. Describe conditions and main tectonic settings of metamorphism.
Audience: Both Grad & Undergrad

6. Identify and describe metamorphic textures and fabrics.
Audience: Both Grad & Undergrad

7. Evaluate relevant scientific literature related to igneous and metamorphic petrology.
Audience: Graduate

GEOSCI/ENVIR ST/G L E/GEOG/LAND ARC 371 — INTRODUCTION TO ENVIRONMENTAL REMOTE SENSING
3 credits.

Introduction to the Earth as viewed from above, focusing on use of aerial photography and satellite imagery to study the environment. Includes physical processes of electromagnetic radiation, data types and sensing capabilities, methods for interpretation, analysis and mapping, and applications.
Requisites: (Sophomore standing and MATH 113, 114, or 171), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate understanding of major theories, approaches, concepts, and methods in remote sensing science.
Audience: Undergraduate

2. Apply knowledge of the nature and properties of electromagnetic radiation and how it is affected by interactions with the atmosphere and the Earth's surface.
Audience: Undergraduate

3. Utilize the techniques, skills, and modern tools necessary for monitoring environmental phenomena with earth observation data.
Audience: Undergraduate

4. Know and effectively apply image analysis, data extraction, and map-making using earth observation data.
Audience: Undergraduate

5. Demonstrate how to analyze remote sensing data using photo-interpretation, digital image processing, and photogrammetric techniques using specialized software, within geographic information systems (GIS), and in conjunction with other data sources.
Audience: Undergraduate

6. Demonstrate how to perform classification, change detection, data fusion, and radiometric and geometric correction techniques.
Audience: Undergraduate

7. Identify and appropriately utilize data types from the optical, thermal, and microwave portions of the electromagnetic spectrum, and from a wide range of airborne and satellite platforms, including high (>5 m), medium (10-30 m), and coarse (250-1000 m) spatial resolution imagery.
Audience: Undergraduate

8. Demonstrate knowledge about environmental applications of remote sensing data, such as forest inventory, water resource management, agricultural assessment, land use planning, and global change science.
Audience: Undergraduate

9. Write clear and concise laboratory reports (in scientific format) describing analytical results from image classification and change detection experiments.
Audience: Undergraduate

10. Communicate effectively through discussion, small group work, hands-on lab activities, and written reports.
Audience: Undergraduate

GEOSCI 375 — PRINCIPLES OF GEOCHEMISTRY
3 credits.

Provides a chemical basis for understanding the origin, evolution, distribution and interactions of chemical elements and isotopes between the lithosphere, hydrosphere, biosphere, and atmosphere in geological and environmental processes.
Requisites: G L E/GEOSCI 360, (CHEM 109, 104, or 115) and G L E/GEOSCI 370 or concurrent enrollment in G L E/GEOSCI 370, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the principles of inorganic chemical bonds.
Audience: Both Grad & Undergrad

2. Explain elementary thermodynamics and its basis underlying petrologic phase diagrams.
Audience: Both Grad & Undergrad

3. Explore how major- and trace-element geochemistry can constrain the evolution of the Earth's mantle and crust in relation to plate tectonics.
Audience: Both Grad & Undergrad

4. Apply the principles of radioactive decay to geochronology using common radioactive isotope systems employed in the geosciences.
Audience: Both Grad & Undergrad

5. Explain the principles of stable isotope geochemistry and how it applies to the hydrologic system, fluid-rock interaction, and evolution of the oceans and biosphere.
Audience: Both Grad & Undergrad

6. Utilize equilibrium speciation calculations in aqueous electrolyte solutions, including use of public-domain geochemical simulation software.

Audience: Both Grad & Undergrad

7. Use information on geochemical reaction pathways and earth-surface physical processes to determine key low-temperature processes such as sediment diagenesis, chemical weathering, and organic matter decomposition.
Audience: Both Grad & Undergrad

8. Synthesize multiple types of geochemical information, obtained from the rock record, to explain specific worldwide changes in Earth's past.
Audience: Graduate

GEOSCI 376 – TOPICS IN GEOLOGY
1-3 credits.

Special topics or discussions of recent research in Geoscience.
Requisites: Consent of instructor
Course Designation: Core GenEd - Natural Science & Wellness
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Evaluate research in a specific field.
Audience: Undergraduate

2. Assess scientific information and ask thoughtful questions.
Audience: Undergraduate

3. Communicate scientific material to peers.
Audience: Undergraduate

GEOSCI 402 – RESEARCH AND COMMUNICATION IN THE GEOLOGICAL SCIENCES
3 credits.

Skills and strategies to conduct research in the geological sciences, including collection of data, analysis of the data, generation of models to explain the data, and clear communication of both the research process and results. As part of the research process, find, evaluate, and utilize information in the existing scientific literature. Practice effective scientific communication skills, including writing, oral presentations, and producing effective visualizations.
Requisites: Senior standing and declared in Geology and Geophysics
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Learn about how information is produced and disseminated in the geological sciences.
Audience: Undergraduate

2. Effectively and efficiently read the scientific literature for content - a foundation for life-long learning that is key to a successful career.
Audience: Undergraduate

3. Critically evaluate the primary literature including the nature of evidence, the logic of the approach, and appropriateness of the analyses to the addressed problem. This explicitly includes critical reading, logical thinking, quantitative analyses, and the use of evidence.
Audience: Undergraduate

4. Develop skills and strategies needed to find, evaluate, and utilize information in the geological sciences.
Audience: Undergraduate

5. Clearly communicate – both in writing and orally – the results of scientific investigation.
Audience: Undergraduate

6. Effectively use diagrams and graphs to explain scientific data.
Audience: Undergraduate

GEOSCI/ENVIR ST 411 – ENERGY RESOURCES
3 credits.

A critical examination of the full spectrum of renewable and nonrenewable energy options, from the unifying perspective of the Earth systems that govern their use. Energy conversion and efficiency, consumption patterns and trends, and environmental consequences of energy production and use.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Explain the origins of both renewable and non-renewable energy resources.
Audience: Both Grad & Undergrad

2. Explain the dependency of energy resources on natural and geologic processes.
Audience: Both Grad & Undergrad

3. Describe how changing technology impacts energy resource utilization.
Audience: Both Grad & Undergrad

4. Analyze and interpret the constraints and negative consequences of renewable and non-renewable energy resources.
Audience: Both Grad & Undergrad

5. Discuss how energy use has changed since the industrial revolution and how evolving energy use impacts the climate and environment.
Audience: Both Grad & Undergrad

6. Evaluate relevant scientific literature related to energy resources.
Audience: Graduate

GEOSCI/GEOG 420 – GLACIAL AND PLEISTOCENE GEOLOGY
3 credits.

Principles, characteristics and work of glaciers; events of the Pleistocene. Field trip.
Requisites: GEOSCI/ENVIR ST 106, GEOSCI 100, 109, ENVIR ST/GEOG 120, 127, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Explain the processes that cause ice deformation in a glacier.
Audience: Both Grad & Undergrad

2. Explain the processes by which glaciers slip over or deform their beds.
Audience: Both Grad & Undergrad

3. Identify subglacially and proglacially derived landforms and explain the processes that produce them.
Audience: Both Grad & Undergrad

4. Explain in general terms the history of ice advance during the later stages of the Pleistocene and the effects it had on glacial geomorphic record.
Audience: Both Grad & Undergrad

5. Assess how climate affected glacial processes.
Audience: Both Grad & Undergrad

6. Describe why glaciated parts of Wisconsin look the way they do.
Audience: Both Grad & Undergrad

7. Interpret glacial features and deposits while in the field.
Audience: Graduate

GEOSCI 430 – SEDIMENTOLOGY AND STRATIGRAPHY
3 credits.

Comprehensive survey of the processes and products of sedimentation, including depositional environments, sedimentary tectonics, sequence stratigraphic principles, and analytical methods.
Requisites: GEOSCI 204 and G L E/GEOSCI 370, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe qualitatively and quantitatively the chemical and physical processes that are involved in the production, transportation, and deposition of sediments.
Audience: Both Grad & Undergrad

2. Describe how sediment composition and sedimentary structures reflect sediment production and transport processes.
Audience: Both Grad & Undergrad

3. Characterize sedimentary depositional environments and deposits formed in them.
Audience: Both Grad & Undergrad

4. Enumerate sedimentary basin types and qualitatively compare and contrast their stratigraphic successions.
Audience: Both Grad & Undergrad

5. Critique primary scientific literature.
Audience: Both Grad & Undergrad

6. Extract and evaluate data from scientific papers and online databases.
Audience: Both Grad & Undergrad

7. Produce new synthetic results in written form.
Audience: Both Grad & Undergrad

8. Produce a regional macrostratigraphic summary for a focal region and present quantitative results in poster form.
Audience: Graduate

GEOSCI/G L E 431 – SEDIMENTOLOGY & STRATIGRAPHY LAB
1 credit.

Covers Sedimentology and Stratigraphy; emphasizes qualitative and quantitative description and interpretation of sediments and sedimentary deposits.
Requisites: GEOSCI 204, G L E/GEOSCI 360, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Classify sedimentary rocks on the basis of thin sections, hand samples, and outcrops.
Audience: Both Grad & Undergrad

2. Identify sedimentary structures and deduce their origin in relation to sediment transport and deposition.
Audience: Both Grad & Undergrad

3. Measure stratigraphic sections and produce complete and accurate field-based written descriptions thereof.
Audience: Both Grad & Undergrad

4. Describe the origin of stratigraphic successions and their relationships to depositional environments and sequence stratigraphy.
Audience: Both Grad & Undergrad

5. Integrate field observations into a coherent geologic interpretation.
Audience: Graduate

GEOSCI/CIV ENGR/ENVIR ST/G L E 444 – PRACTICAL APPLICATIONS OF GPS SURVEYING
2 credits.

Global positioning system surveying for field applications. Signals. Coordinate systems. Datums. Cartographic projections. Satellite orbits. Choosing hardware. Strategies for data collection and analysis. Assessing uncertainty. Geocoding satellite images. Integrating data with Geographic Information Systems. Emerging technologies.
Requisites: MATH 211, 217, 221, or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the current abilities, future potential, and limiting factors of GPS surveys.
Audience: Both Grad & Undergrad

2. Assess the tradeoff between accuracy and cost.
Audience: Both Grad & Undergrad

3. Summarize examples of applications of GPS surveying.
Audience: Both Grad & Undergrad

4. Design and implement a small field project using GPS surveying.
Audience: Both Grad & Undergrad

5. Assess quantitatively statistical precision and calibrated accuracy.
Audience: Graduate

GEOSCI/G L E 455 – STRUCTURAL GEOLOGY
4 credits.

Principles of rock deformation, structures in layered rocks, structural analysis, intrusive structures. Lab: three-dimensional problems involving structural concepts; field trip.
Requisites: GEOSCI 202, 204, and (G L E/GEOSCI 370 or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Use conceptual models as a foundation for quantitative analysis of physical processes of interest to geologists and engineers.
Audience: Both Grad & Undergrad

2. Summarize and articulate parameters influencing the geometries and types of geologic structures resulting from deformation in different tectonic environments.
Audience: Both Grad & Undergrad

3. Recognize common geological structures and determine their kinematic, dynamic, and rheologic significance.
Audience: Both Grad & Undergrad

4. Characterize rock deformation quantitatively.
Audience: Both Grad & Undergrad

5. Utilize a range of common approaches to documenting, representing, and manipulating structural data.
Audience: Both Grad & Undergrad

6. Recognize patterns formed from isolated data points to construct an appropriate conceptual model of a 3D geologic structure.
Audience: Both Grad & Undergrad

7. Extract and convey three-dimensional information using two-dimensional diagrams.
Audience: Both Grad & Undergrad

8. Analyze kinematic, dynamic, and rheological approaches to specific field settings.
Audience: Graduate

GEOSCI 456 – GEOLOGIC FIELD METHODS
2 credits.

Theory and techniques of geologic mapping; field trips.
Requisites: G L E/GEOSCI 455 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GEOSCI 457 – CONDUCTED FIELD TRIP
2 credits.

Study of the principles and methods of geologic mapping.
Requisites: G L E/GEOSCI 370 or concurrent enrollment
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GEOSCI/CIV ENGR/G L E/M S & E 474 – ROCK MECHANICS
3 credits.

Classification of rock masses, stress and strain in rock, linear and non-linear behavior of rock, failure mechanisms, state of stress in rock masses, lab testing, geological and engineering applications.
Requisites: E M A 201, PHYSICS 201, 207, or 247, or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Measure basic index properties for rock mass classification
Audience: Both Grad & Undergrad

2. Describe stress and strain in continuums
Audience: Both Grad & Undergrad

3. Describe the factors which control the mechanical behavior of rocks
Audience: Both Grad & Undergrad

4. Apply basic concepts of rock mechanics and rock physics to analyze basic geomechanical engineering problems
Audience: Both Grad & Undergrad

5. Prepare rock samples for mechanical testing, conduct experiment, and analyze experimental data to obtain rock strength properties
Audience: Both Grad & Undergrad

6. Describe analytically time-dependent rock behaviors
Audience: Graduate

GEOSCI/HIST SCI 514 – HISTORY OF GEOLOGIC THOUGHT
3 credits.

Major concepts from earliest to modern times.
Requisites: GEOSCI 204 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe the progression of ideas in the history of the geological sciences.
Audience: Both Grad & Undergrad

2. Discuss controversies that have existed in geology and how they have been resolved.
Audience: Both Grad & Undergrad

3. Provide a detailed understanding of the theory of continental drift and its relationship to the theory of plate tectonics.
Audience: Both Grad & Undergrad

4. Analyze and evaluate both the nature of science and the process of science, as applied to specific historical developments in geology.
Audience: Both Grad & Undergrad

5. Generate a history in one's subfield in geology or about a specific geologic controversy.
Audience: Graduate

GEOSCI 515 – PRINCIPLES OF ECONOMIC GEOLOGY
4 credits.

Composition, structure, occurrence, origin, and economic investigation of important groups of mineral deposits; problems of mineral deposition.
Requisites: GEOSCI 204 and G L E/GEOSCI 370, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Students will be able to identify common ore minerals in a variety of deposit types.
Audience: Undergraduate

2. Students will be able to identify and interpret common alteration types that accompany hydrothermal alteration in mineralized rocks.
Audience: Undergraduate

3. Students will be able to understand and explain the basics of stable and radiogenic isotopic systems and their application to ore deposit research.
Audience: Undergraduate

4. Students will be able to tell the history (formation condition and possible changes / reactions) of a deposit based on associated minerals and textures.
Audience: Undergraduate

5. Students will be able to synthesize research and develop hypotheses with respect to mineral abundances in different geologic environments.
Audience: Graduate

6. Students will be able to conceptualize the 3D distribution of mineral deposits in the crust of the earth.
Audience: Undergraduate

7. Students will be able to recognize the overall role of plate tectonics in the distribution of ore deposits.
Audience: Undergraduate

8. Students will come to recognize the role of the evolution of the Earth's systems over 4.5 Ga in the formation of ore deposits.
Audience: Undergraduate

GEOSCI/G L E 537 – QUANTITATIVE METHODS FOR GEOSCIENCE
3 credits.

MATLAB is a powerful, high-level programming language and integrated development environment (IDE) that is used across a broad variety of scientific disciplines for tasks including data visualization, modeling, and application development. Focus on the active use of MATLAB for developing practical programming and data analysis skills that can be applied across a range of geoscience- relevant problems. Applications will include: data visualization and publishable figure development; automation of data processing; statistical and time-series analysis; image processing and mapping; and optimization. Additional topics may be guided by student interest.
Requisites: MATH 222, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Utilize an integrated development environment and documentation to solve geoscientific problems.
Audience: Both Grad & Undergrad

2. Interpret code in a high-level programming language to explain what an existing program does.
Audience: Both Grad & Undergrad

3. Organize geologic data and store them using appropriate data structures.
Audience: Both Grad & Undergrad

4. Develop basic algorithms by using key programming structures including: for-next loops, if-then-else statements, built-in functions, and other custom-built functions.
Audience: Both Grad & Undergrad

5. Plan, design and create a useful, well-documented computer program/utility that has general applicability.
Audience: Graduate

6. Develop codes that apply appropriate spatio-temporal data analysis routines to geologic datasets.
Audience: Graduate

7. Integrate data from several data sources to produce publication-ready maps or other geologically relevant figures.
Audience: Graduate

8. Implement quantitative models for geologic processes using appropriate analytical or numerical toolboxes.
Audience: Graduate

GEOSCI/ZOOLOGY 542 – INVERTEBRATE PALEONTOLOGY
3 credits.

The evolutionary history, morphology, and ecology of fossil invertebrates. Labs emphasize fossil identification and recognition of basic morphological features.
Requisites: (GEOSCI 110 or 204), (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing.
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify fossils of marine invertebrate animals in the rock record.
Audience: Both Grad & Undergrad

2. Describe the processes involved in fossilization of marine invertebrate animals.
Audience: Both Grad & Undergrad

3. Recognize the hierarchical taxonomic classification of marine invertebrate animals and how it reflects their evolutionary histories.
Audience: Both Grad & Undergrad

4. Use fossils to infer past environmental and ecological conditions.
Audience: Both Grad & Undergrad

5. Use fossils to constrain the age of sedimentary rocks (i.e. biostratigraphy).
Audience: Both Grad & Undergrad

6. Summarize how the fossil record is used to reconstruct Earth history.
Audience: Both Grad & Undergrad

7. Evaluate relevant scientific literature related to invertebrate paleontology.
Audience: Graduate

GEOSCI 551 – PALEOCEANOGRAPHY
3 credits.

Investigates the history of the Earth's oceans, focusing on the last 65 million years, with discussion of the chemical and physical methods through which oceans are studied and the role of oceans in the climate system.
Requisites: GEOSCI 100, 110, ATM OCN/GEOSCI 105, ENVIR ST/GEOSCI 106, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the major climatic and oceanographic events and trends during the Cretaceous through the Cenozoic, spanning timescales from the last 150,000,000 years to the last 1,000 years. For this class emphasis is placed on the global climate and oceanographic systems, with some attention to regional changes.
Audience: Both Grad & Undergrad

2. Explain the physical processes controlling the behavior of the earth system and its related components (atmosphere, oceans, cryosphere, biosphere, etc.), and to articulate how oceanic/climatic variability results from a combination of external forcings and internal dynamics within the earth system.
Audience: Both Grad & Undergrad

3. Understand how paleoceanographers collect, date, and analyze a staggering variety of deep-sea records, as well as other paleoclimate archives as they pertain to oceanic and climate processes including ocean and lake sediment cores, ice cores, and speleothems.
Audience: Both Grad & Undergrad

4. Develop skills in critical thinking and technical writing, with particular attention to critically reading the scientific literature and critically evaluating the climate proxies and model simulations used by paleoceanographers.
Audience: Both Grad & Undergrad

5. Both explain and critically evaluate the data on which the majority of our ocean/climate knowledge of the last 150,000,000 years is based.
Audience: Graduate

6. Both explain and assess the external forcings and internal dynamics within the earth system and across the different earth spheres.
Audience: Graduate

7. Critically evaluate the scientific literature and provide your own perspective on the literature discussion and conclusions.
Audience: Graduate

GEOSCI 556 – MOUNTAIN BELTS
3 credits.

Examination of interaction of tectonic plates and the resulting structures.
Requisites: G L E/GEOSCI 455 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the overall tectonic development of a specific mountain belt (e.g., the western Cordillera).
Audience: Both Grad & Undergrad

2. Explain how movement of tectonic plates relates to deformation within the mountain belt (e.g., summarize current theories).
Audience: Both Grad & Undergrad

3. Demonstrate how using the earth's magnetic field (paleomagnetism) can be used in tectonic reconstructions.
Audience: Both Grad & Undergrad

4. Identify different aspects of an orogenic belt in both cross section and map view.
Audience: Both Grad & Undergrad

5. Synthesize the tectonic history of a specific area or process in a mountain belt.
Audience: Graduate

GEOSCI 557 – STRUCTURAL PETROLOGY
3 credits.

Petrographic investigation of rock fabrics and deformation using thin sections. Use of petrographic microscopes and Scanning Electron Microscopes (SEMs).
Requisites: G L E/GEOSCI 370 and 455, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Recognize a wide range of deformation-related features in hand sample and thin section.
Audience: Both Grad & Undergrad

2. Recognize the interplay of physical and chemical processes in forming microstructure.
Audience: Both Grad & Undergrad

3. Explain the role of fluid-rock interaction during deformation.
Audience: Both Grad & Undergrad

4. Read scientific literature on various topics in structural petrology.
Audience: Both Grad & Undergrad

5. Evaluate new microstructural data or data in journal articles using analytical and/or statistical tools.
Audience: Graduate

GEOSCI/G L E 594 – INTRODUCTION TO APPLIED GEOPHYSICS
3 credits.

Survey of applied geophysics, including seismic refraction, seismic reflection, electrical resistivity, gravity, and magnetics methods. Basic physics of each method and modeling techniques and field procedures.
Requisites: MATH 222 and (PHYSICS 202, 208, 248, or E M A 202), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the fundamental physics underlying applied geophysical methods and how these measurements and techniques are used to explore and characterize the near surface.
Audience: Both Grad & Undergrad

2. Describe the limitations of geophysical techniques and tools.
Audience: Both Grad & Undergrad

3. Describe the field procedures employed to collect geophysical data.
Audience: Both Grad & Undergrad

4. Use geophysical techniques to interpret and analyze geophysical data collected for applied and engineering purposes.
Audience: Both Grad & Undergrad

5. Evaluate the application of geophysical technique through critical analysis of published literature.
Audience: Graduate

GEOSCI/G L E 595 – FIELD METHODS IN APPLIED AND ENGINEERING GEOPHYSICS
1 credit.

The application of geophysical field methods for delineating near-surface features and/or structures as applied to engineering, environmental and exploration problems.
Requisites: GEOSCI/G L E 594 or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Utilize different geophysical tools.
Audience: Both Grad & Undergrad

2. Analyze geophysical data with the help of computer modeling tools.
Audience: Both Grad & Undergrad

3. Report geophysical measurements and interpretations.
Audience: Both Grad & Undergrad

4. Design field-based surveys that use different geophysical techniques.
Audience: Both Grad & Undergrad

5. Report the geology of a site and the requirements for engineering and environmental applications to geophysical techniques.
Audience: Graduate

GEOSCI/G L E 596 – GEOMECHANICS
3 credits.

Observation, description, and prediction of deformation of geomechanical systems at depth, and the forces (stress) causing those deformations, relevant for petroleum/geothermal reservoirs and studies of earthquake mechanics. Emphasis on computational exercises using datasets from the petroleum industry and earthquake catalogues, as well as prediction of ground deformation.
Requisites: GEOSCI/CIV ENGR/G L E/M S & E 474, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Breadth - Physical Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Conduct a borehole geomechanical analysis
Audience: Both Grad & Undergrad

2. Design casing plans for drilling
Audience: Both Grad & Undergrad

3. Use borehole data and earthquake focal mechanisms to gain information about in-situ stress and strain
Audience: Both Grad & Undergrad

4. Describe modern challenges in developing subsurface energy resources

Audience: Both Grad & Undergrad

5. Use modern software to find crustal deformation models that match observed ground deformation
Audience: Graduate

GEOSCI 610 – GEOCHRONOLOGY, TIMESCALES, AND RATES OF GEOLOGIC PROCESSES
3 credits.

Application of radioisotopic (Ar-Ar, U-Pb, U-Th, U-He) and cosmogenic (He, Ne, Cl, Be, C) dating methods. Status of geologic, astronomic and paleomagnetic timescales, Chronology of flood basalts, impacts, extinctions, glaciations. Constraints on rates of magmatism, mountain uplift, deformation, erosion, sedimentation.
Requisites: G L E/GEOSCI 370 or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Explain the relative strengths and weaknesses of radioisotopic (Ar- Ar, U-Pb, U-Th, U-He), cosmogenic (He, Ne, Cl, Be, Al, C), and radiogenic (OSL, Fission Track) dating methods.
Audience: Both Grad & Undergrad

2. Integrate radioisotopic dating with geomagnetic field behavior, astronomical clocks, and paleoclimatic records, applicable for current and future calibration of the geologic time scale.
Audience: Both Grad & Undergrad

3. Use dates to estimate rates of geological processes, including flood basalts, impacts, mass extinctions, deformation, and orogeny.
Audience: Both Grad & Undergrad

4. Evaluate the use of geochronology in the wider geoscience literature.
Audience: Both Grad & Undergrad

5. Evaluate a geochronological approach to a specific geological problem.
Audience: Graduate

GEOSCI/G L E 627 – HYDROGEOLOGY
3-4 credits.

Mathematical treatment of the physical principles governing the flow of groundwater; emphasis on well hydraulics and flow system analysis.
Requisites: (GEOSCI 100, 109, 110, ATM OCN/GEOSCI 105, 140, ENVIR ST/GEOSCI 106, or ASTRON/GEOSCI 160) and (MATH 217 or 221), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe how groundwater flow and storage are impacted by geology.
Audience: Both Grad & Undergrad

2. Collect high-quality data in the field and laboratory to quantify hydrogeologic processes and properties.
Audience: Both Grad & Undergrad

3. Integrate data from wells, field reports and surficial data to create reasonable conceptual models of aquifers and surface water / groundwater interactions.
Audience: Both Grad & Undergrad

4. Implement appropriate quantitative analyses to characterize aquifer properties based on aquifer tests.
Audience: Both Grad & Undergrad

5. Apply numerical simulations and assess the output of these simulations in terms of their hydrologic meaning and predictions.
Audience: Both Grad & Undergrad

6. Critique news and technical reports related to groundwater science using hydrogeologic principles.
Audience: Graduate

GEOSCI/G L E 629 – CONTAMINANT HYDROGEOLOGY
3 credits.

Physical and chemical processes governing the transport of solutes in groundwater; application of hydrogeologic and geochemical theory and practice to the protection of aquifers from contamination.
Requisites: G L E/GEOSCI 627 and MATH 222, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the physical, chemical, and biological processes controlling the transport of subsurface contaminants.
Audience: Both Grad & Undergrad

2. Apply mathematical expressions for analytically describing solute, colloid, and multiphase flow in porous and fractured media.
Audience: Both Grad & Undergrad

3. Interpret and synthesize scientific literature and technical reports to create subsurface flow and transport models of specific case studies.
Audience: Both Grad & Undergrad

4. Analyze the causes of, and solutions for, the sustainability challenge of natural and anthropogenic contaminants in the subsurface.
Audience: Both Grad & Undergrad

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges relevant to the protection of groundwater resources from contamination.
Audience: Both Grad & Undergrad

6. Create and evaluate a subsurface flow and transport model related to their graduate research or another specific environmental problem.
Audience: Graduate

GEOSCI 681 – SENIOR HONORS THESIS
3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025

GEOSCI 682 – SENIOR HONORS THESIS
3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

GEOSCI 691 – SENIOR THESIS
3-4 credits.

Mentored individual research and study for students completing a senior thesis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GEOSCI 692 – SENIOR THESIS
3-4 credits.

Mentored individual research and study for students completing a senior thesis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GEOSCI 698 – DIRECTED STUDY
1-6 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOSCI 699 – DIRECTED STUDY
1-6 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOSCI 701 – QUANTITATIVE GEOMORPHOLOGY
4 credits.

Quantitative study of processes that shape Earth's surface. Use theory and field observations to investigate major components of continental geomorphic systems, including hillslopes, rivers, and glaciers. Understand how the major factors that shape Earth's surface-tectonics, climate, and life-create the landscapes we observe.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Demonstrate knowledge of the processes that shape Earth’s topography over a range of time scales and spatial scales
Audience: Graduate

2. Construct conservation of mass and momentum frameworks for topographic evolution
Audience: Graduate

3. Apply mathematical laws for mass transport that govern topographic evolution
Audience: Graduate

4. Make field observations that can be used to constrain multiple geomorphic processes
Audience: Graduate

5. Write scientific reports in the form of a short journal article
Audience: Graduate

GEOSCI 720 – GLACIOLOGY
3 credits.

Addresses the fundamentals of glaciology and glacier landform mechanics: mass balance, ice deformation, basal slip, temperature structure, glacial hydrology, sediment deformation and deposition, and landform building processes. Emphasizes an understanding of the mathematical principles that dictate how glaciers function. Begins with a classical treatment of the mechanics of glaciers and moves onto fundamental advances in the field of glaciology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Explain the different dislocation mechanism of ice.
Audience: Graduate

2. Compute a vertical velocity field in a glacier.
Audience: Graduate

3. Calculate steady-state and non-steady-state temperature profiles in a glacier.
Audience: Graduate

4. Describe mathematically the processes by which glaciers slip over and deform their beds.
Audience: Graduate

5. Compute the hydrological potential of water in and under a glacier and calculate steady-state channel sizes.
Audience: Graduate

6. Explain the causes of stable and unstable glacier slip.
Audience: Graduate

7. Calculate the rates of glacial erosion from abrasion and quarrying.
Audience: Graduate

8. Explain the mechanisms that produce subglacially derived landforms.
Audience: Graduate

GEOSCI/G L E 724 – GROUNDWATER FLOW MODELING
3 credits.

An introduction to the principles of modeling groundwater flow systems, with emphasis on regional flow system analysis. Conceptual understanding of governing equations, and the use of finite difference techniques to solve such equations are stressed. Develop codes and become introduced to packaged models, including those developed by the U. S. Geological Survey. Knowledge of hydrogeology [such as G L E/GEOSCI 627 or 629] required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Formulate a groundwater flow problem as a PDE-based mathematical statement from first principles (conservation of mass, conservation), and summarize how different governing equations are derived.
Audience: Graduate

2. Develop an algebraic approximation of a PDE and solve the algebraic equation using direct or iterative methods.
Audience: Graduate

3. Apply the USGS software MODFLOW intelligently and recognize the inherent assumptions in different options and packages.
Audience: Graduate

4. Evaluate model predictions and uncertainty using model refinement, testing, and calibration.
Audience: Graduate

GEOSCI 727 – ADVANCED HYDROGEOLOGY
1-3 credits.

Advanced topics in Hydrogeology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Evaluate peer-reviewed literature that focuses on advanced topics such as coupled models, multiphase flow, fracture-based flow, heterogeneity analysis, and optimization and uncertainty analysis in modeling.
Audience: Graduate

2. Evaluate advanced numerical models and research in terms of their underlying physics, assumptions, and simplifications.
Audience: Graduate

3. Utilize advanced software tools that implement coupling, multi-domain / multi-phase simulation, or statistical representations to perform relevant hydrologic simulations and answer research questions.
Audience: Graduate

GEOSCI 731 – CARBONATE GEOLOGY
3 credits.

Carbonate rocks and sediments are crucial components of the Earth's surface environment and they play a central role in the regulation of Earth's global carbon cycle and climate system. Provides a comprehensive survey of the processes and products of carbonate sedimentation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Recognize and describe in hand samples and in thin sections the biotic and abiotic constituents of carbonate sediments and rocks.
Audience: Graduate

2. Characterize the physical and chemical properties of the environments in which carbonate sedi-ments form.
Audience: Graduate

3. Describe the diagenetic processes that occur in carbonates and recognize the products of these diagenetic processes in hand samples and thin sections.
Audience: Graduate

4. Generate hypotheses for the specific origin and diagenetic history of carbonate rocks.
Audience: Graduate

5. Generate predictive models for the spatial and temporal distribution and properties of carbonate sed-iments and sedimentary deposits.
Audience: Graduate

6. Analyze geologic databases in order to describe and quantify the spatial and temporal distribution of carbonate sediments in the rock record.
Audience: Graduate

GEOSCI 732 – GEOCHEMISTRY OF SEDIMENTS
3 credits.

Processes involved in the origin of chemical sediments; shales, carbonates, and evaporites.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Construct a conceptual model for the climate system, which will provide a basis for testing key hypotheses about the mechanisms of climate change.
Audience: Graduate

2. Construct a conceptual (semi-quantitative) model that accounts for spatial and temporal variability in ocean water chemistry and sediments.
Audience: Graduate

3. Explain the vertical profile of elements within the ocean water column at any given location in the ocean.
Audience: Graduate

4. Explain geographic variability of elements within ocean water.
Audience: Graduate

5. Explain the geographic distribution of different sediment types in the world’s oceans.
Audience: Graduate

6. Explain the basis of common isotopic, elemental (trace, minor, major), and organic geochemical proxies for paleoenvironmental change.
Audience: Graduate

7. Utilize sedimentary records of proxies to interpret paleoenvironmental change in Earth’s past.
Audience: Graduate

GEOSCI/G L E 747 – TECTONOPHYSICS
3 credits.

Elasticity and flexure of the earth's lithosphere, heat conduction, mantle convection, earthquake mechanisms, rock rheology, and fluid migration in the earth's crust; integration of geophysical observations, laboratory experiments, and theoretical models.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Demonstrate an understanding of the Scientific Theory of Plate Tectonics by writing, solving, illustrating, and exemplifying Euler's formula for rigid tectonic plates moving on a sphere.
Audience: Graduate

2. Demonstrate an understanding of the earthquake deformation cycle in time and space by sketching a map over ~100 km and a time series over ~1000 years.
Audience: Graduate

3. Demonstrate an understanding of the physical principles of crustal deformation by writing, applying, and solving the differential equations governing motion under the constitutive relations for rigid, elastic, and Maxwell visco-elastic rheologies.
Audience: Graduate

4. Demonstrate an understanding of quantitative reasoning for testing geophysical hypotheses by comparing two competing models with appropriate statistical tests.
Audience: Graduate

5. Visualize plate motions on a 3-dimensional sphere by writing, debugging, and writing computer applications.
Audience: Graduate

6. Analyze geophysical data and interpret them by implementing simple models in the Matlab computer language.
Audience: Graduate

GEOSCI/ATM OCN/ENVIR ST/ZOOLOGY 750 – PROBLEMS IN OCEANOGRAPHY
3 credits.

Introduction to techniques used in the study of the biology, chemistry, geology, and physics of the marine environment.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. use satellite imagery and measurements in meteorological research and operations.
Audience: Both Grad & Undergrad

2. describe orbital characteristics, navigation, instrumentation and remote sensing techniques.
Audience: Both Grad & Undergrad

3. perform quantitative retrievals of atmospheric properties from active and passive measurement systems and rigorously assess accuracy.
Audience: Both Grad & Undergrad

4. share skills and techniques in analysis and interpretation with classmates.
Audience: Graduate

GEOSCI 755 – ADVANCED STRUCTURAL GEOLOGY
3 credits.

Structures in layered, intrusive, and metamorphic rocks; structural analysis.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Explain how geological structures record some combination of displacement, strain, stress, and rheology.
Audience: Graduate

2. Apply simple mathematics to understanding geological structures (that is, what problems can you address with what mathematics).
Audience: Graduate

3. Apply tensor analysis to deformed rocks.
Audience: Graduate

4. Analyze microstructures using concepts of displacement, strain, stress, deformation mechanisms, reactions, and rheology.
Audience: Graduate

5. Describe, at a fundamental level, simple shear and transpressional/transtensional deformation.
Audience: Graduate

GEOSCI/G L E 757 – ADVANCED ROCK MECHANICS
3 credits.

Experimental rock mechanics, rock mechanics apparatus design, static and dynamic rock friction, rate and state friction, crack phenomena and rock fracture mechanics, earthquake energy budget, elastic/viscoelastic/plastic behavior of rocks, engineering and geological applications. Knowledge of introductory rock mechanics [such as M S E/GEOSCI/CIV ENGR/G L E/ M S & E 474] required.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Analyze technical construction of rock mechanics apparatuses
Audience: Graduate

2. Design and fabricate load cells and displacement sensors
Audience: Graduate

3. Measure dynamic rock frictional properties for fault instability analysis
Audience: Graduate

GEOSCI 758 – MECHANICS OF EARTHQUAKES AND FAULTING
3 credits.

Addresses current topics and controversies on fault mechanics, earthquake physics, and the rock record of seismicity. Emphasizes critical reading and in-depth discussion of recent publications drawn from a variety of disciplines, including geophysical, geological, and geochemical studies and approaches.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Explain the fundamental theory underlying our current knowledge of fault mechanics, rock friction, and seismicity.
Audience: Graduate

2. Summarize recent advances in topics including earthquake nucleation and propagation, dynamic friction and the rock record of seismicity.
Audience: Graduate

3. Establish skills in the critical reading and analysis of current scientific literature via classroom discussion.
Audience: Graduate

4. Show independent skills in scientific reasoning and advanced analysis of cutting-edge research in the field via construction of a term paper on a topic that involves or is relevant to their own research.
Audience: Graduate

5. Illustrate the development of skills in scientific writing via both one-page summaries of assigned reading and synthesis and presentation of data from multiple sources in a term paper.
Audience: Graduate

GEOSCI/ATM OCN 762 – ICE AND CLIMATE DYNAMICS
3 credits.

Introduction to the role of ice in the climate system. Review main components of the cryosphere (Arctic and Antarctic sea ice, Greenland and Antarctic ice sheets, mountain glaciers, snow cover, and permafrost), with particular focus on recent and future changes as documented in recent publications. Consider different methods to study the cryosphere and its role in the climate system, such as remote sensing and in situ observations, state estimates and reanalyses, with a particular focus on idealized and comprehensive global climate models. Covers fundamental physical concepts as well as unresolved research questions such as the debates surrounding potential instabilities in the climate system and uncertainties in future projections of ice loss, teleconnections, and sea level rise.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Differentiate between the main components of Earth's cryosphere and their respective roles in the climate system.
Audience: Graduate

2. Compare the range of methodologies used to study Earth's cryosphere, including in situ and remote sensing observations, theoretical considerations, and numerical models.
Audience: Graduate

3. Develop idealized models of sea ice, land ice, and snow and their interactions with the climate system.
Audience: Graduate

4. Carry out analysis of output from idealized and comprehensive ice and climate models.
Audience: Graduate

GEOSCI 765 – CRYSTAL CHEMISTRY
3 credits.

Principles of crystal chemistry, emphasizing the structure and behavior of rock forming minerals.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Use symmetrical theories (both point groups and space groups) to interpret crystal structures.
Audience: Graduate

2. Summarize X-ray diffraction theory, operate powder X-ray diffraction experiments, and carry our quantitative analyses (rietveld analysis and structure refinements).
Audience: Graduate

3. Demonstrate mineral phase transformations, solid solutions / exsolution processes and thermodynamics.
Audience: Graduate

4. Identify defects and their formation processes in minerals and related host rocks.
Audience: Graduate

5. Explain the principles governing size-dependent properties of nano-phase minerals in the earth system.
Audience: Graduate

6. Identify structures, symmetries and superspace groups for quasi-crystals, and aperiodic minerals with incommensurately modulated structures.
Audience: Graduate

GEOSCI 771 – IGNEOUS PETROLOGY
3 credits.

Classification, characteristics, and petrogenesis of igneous rocks. Representative rock suites studied in lab.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain how magmas are formed by partial melting of rocks within the Earth, and how magmas are modified by differentiation processes during storage and transit within the earth.
Audience: Graduate

2. Explain how the products of volcanism on earth, including lava flows and pyroclastic deposits, provide windows into the processes of partial melting and magma differentiation.
Audience: Graduate

3. Utilize the many tools used to quantify the processes of partial melting and magma differentiation, including thermodynamic modeling of phase equilibria, trace element geochemistry of minerals, melts, and rocks, isotope geochemistry of minerals, melts, and rocks, and diffusion chronology of igneous minerals.
Audience: Graduate

4. Explain how magmas are formed and modified in different ways depending on the plate tectonic setting, including at mid-ocean ridges, subduction zones, and continental rifts.
Audience: Graduate

5. Interpret what the solidified products of igneous activity on earth are, and how to distinguish processes of formation from the textures and minerals comprising them.
Audience: Graduate

GEOSCI 777 – ELECTRON MICROPROBE ANALYSIS
3 credits.

Proper use and functioning of electron probe and SEM, their use in microanalysis (WDS, EDS), range of applications, and limitations.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Operate electron beam instruments (SEM and EPMA) to acquire images and data.
Audience: Graduate

2. Analyze images from different emission types.
Audience: Graduate

3. Analyze chemical data from different types of X-ray detectors.
Audience: Graduate

4. Analyze quantitative chemical measurements using electron microprobe.
Audience: Graduate

5. Describe sample and detector artifacts.
Audience: Graduate

6. Explain basic interactions of electrons and atomic structure.
Audience: Graduate

GEOSCI/G L E 780 – GEODYNAMIC MODELING
3 credits.

Introduction to modeling in geoscience, focusing on the process of turning geoscientific observations into numerical models, and the interpretation and characterization of these results. Sample problems from geoscientific topics will be used to illustrate the formulation, simplification, solution, and analysis of typical problems encountered in modeling in geosciences. Different techniques that arise in the solution of these problems will be introduced and practiced on typical geodynamic problems, with particular focus on problems arising in modeling of the Earth's interior and surface.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Formulate and simplify idealized models for geodynamic problems.
Audience: Graduate

2. Employ standard numerical methods and existing numerical models to solve problems arising in geodynamic modeling.
Audience: Graduate

3. Visualize and analyze geodynamic model outputs.
Audience: Graduate

4. Analyze and identify the dynamical behaviour of geodynamic systems.
Audience: Graduate

GEOSCI 793 – GEOPHYSICAL INVERSE THEORY
3 credits.

Application of inverse methods to geophysical measurements of the structure of the earth.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Discuss fundamental similarities and differences between inverse methods, as well as their benefits and drawbacks.
Audience: Graduate

2. Determine estimation or inversion approaches that are appropriate for a particular geoscience-relevant problem.
Audience: Graduate

3. Apply appropriate inverse methods to geoscience problems such as seismic tomography, electrical resistivity imaging, source location estimation, and image processing.
Audience: Graduate

4. Evaluate solutions to parameter estimation and inverse problems using concepts such as bias, null spaces, uncertainty, stability, resolution, nonlinearity, and over/under-fitting.
Audience: Graduate

GEOSCI 796 – PHYSICS OF THE EARTH II
3 credits.

Theory and observations of earthquakes, seismic waves and plate tectonics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain, quantitatively, the physical principles that govern seismic wave propagation.
Audience: Graduate

2. Identify and describe the major features of a seismogram.
Audience: Graduate

3. Incorporate seismic data in an inverse framework to generate geophysical models.
Audience: Graduate

4. Interpret the results of common seismic analysis techniques in terms of informationgained about the Earth’s structure, geological processes, and/or seismic source mechanisms.
Audience: Graduate

5. Communicate information and uncertainties about seismic hazards to scientific and general audiences.
Audience: Graduate

GEOSCI 875 – ADVANCED TOPICS IN GEOLOGY
1-3 credits.

Special topics in Geoscience.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate research in a specific field.
Audience: Graduate

2. Assess scientific information and ask thoughtful questions.
Audience: Graduate

3. Communicate scientific material to peers.
Audience: Graduate

GEOSCI/ATM OCN/BOTANY/CIV ENGR/ENVIR ST/ZOOLOGY 911 – LIMNOLOGY AND MARINE SCIENCE SEMINAR
1 credit.

Sections in various fields of zoological research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Explain important research in current limnology.
Audience: Graduate

2. Utilize different research presentation methods.
Audience: Graduate

3. Assess scientific information and ask thoughtful questions.
Audience: Graduate

GEOSCI 920 – SEMINAR IN GLACIAL AND PLEISTOCENE GEOLOGY
1-3 credits.

An exploration of modern glacial, glaciology, and Pleistocene geology literature. Includes a field trip to explore local glacial geology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Distinguish the physical processes driving change in the cryosphere in response to a changing climate.
Audience: Graduate

2. Evaluate the various ways in which these changes impact human societies, such as water availability, increased risk of flooding, and coastal erosion.
Audience: Graduate

3. Effectively convey complex scientific information.
Audience: Graduate

GEOSCI 929 – SEMINAR-HYDROGEOLOGY
1-2 credits.

Special topics in Hydrogeology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022
Learning Outcomes: 1. Explain the technical, economic, and environmental dimensions of groundwater challenges in Wisconsin.
Audience: Graduate

2. Synthesize scientific and technical literature describing challenges to groundwater quality and quantity.
Audience: Graduate

3. Articulate the scope, educational path, and responsibilities of different careers in a range of organizations working on groundwater issues in Wisconsin.
Audience: Graduate

GEOSCI 970 – SEMINAR-GEOCHEMISTRY
2 credits.

Exploration of topics in the field of Geochemistry with an emphasis on engagement with recent literature.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the physical principles of isotope fractionation and the natural processes that can cause isotope fractionation.
Audience: Graduate

2. Recognize the fundamentals of modern isotope analysis.
Audience: Graduate

3. Evaluate recent peer-reviewed literature in the topical area of isotope geochemistry.
Audience: Graduate

4. Recognize how isotope data could be used to address your research questions.
Audience: Graduate

GEOSCI/ATM OCN/BOTANY/ENVIR ST/GEOG/ZOOLOGY 980 – EARTH SYSTEM SCIENCE SEMINAR
1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GEOSCI 990 – RESEARCH
1-12 credits.

Research supervised by individual faculty members.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

GEOSCI 999 – ADVANCED INDEPENDENT READING
1-3 credits.

Advanced level mentored reading and research for students with dissertator status.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GERMAN (GERMAN)

GERMAN 101 – FIRST SEMESTER GERMAN
4 credits.

Emphasis on proficiency in German through speaking, listening, reading, and writing, and on communication in cultural context.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026

GERMAN 102 – SECOND SEMESTER GERMAN
4 credits.

Emphasis on proficiency in German through speaking, listening, reading, and writing, and on communication in cultural context.
Requisites: GERMAN 101 or placement into GERMAN 102
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 111 – FIRST SEMESTER DUTCH
4 credits.

Emphasis on proficiency in Dutch through speaking, listening, reading, and writing, and on communication in cultural context.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GERMAN 112 – SECOND SEMESTER DUTCH
4 credits.

Emphasis on proficiency in Dutch through speaking, listening, reading, and writing, and on communication in cultural context.
Requisites: GERMAN 111
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 203 – THIRD SEMESTER GERMAN
4 credits.

Four-skills approach (speaking, listening, writing, reading) centered around authentic texts, recordings, and images. Grammar review, concerted vocabulary expansion, and intensive practice.
Requisites: GERMAN 102 or placement into GERMAN 203
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 204 – FOURTH SEMESTER GERMAN
4 credits.

Four-skills approach (speaking, listening, writing, reading) centered around authentic texts, recordings, and images. Grammar review, concerted vocabulary expansion, and intensive practice.
Requisites: GERMAN 203 or placement into GERMAN 204
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 213 — THIRD SEMESTER DUTCH
4 credits.

Review of Dutch grammar and continuation of systematic vocabulary development.
Requisites: GERMAN 112
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GERMAN 214 — FOURTH SEMESTER DUTCH
4 credits.

Review of Dutch grammar and continuation of systematic vocabulary development.
Requisites: GERMAN 213
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 236 — BASCOM COURSE
3 credits.

Developing skills in critical reading, logical thinking, use of evidence, and use of library resources. Emphasis on writing in the conventions of specific fields.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2020

GERMAN/GNS/JEWISH 240 — HEALTH AND HOTELS IN CENTRAL EUROPE
3 credits.

Introduction to spaces of leisure, medical recuperation, and Christian and Jewish cross-cultural exchange. Literature and films focus on sites of rest and healing between the World Wars as well as post-Holocaust reflections on these sites.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate close reading skills in writing assignments through interpretation and analysis of texts in a variety of genres, including critical theory, prose, poetry, and film.
Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods.
Audience: Undergraduate

3. Identify major and lesser-known writers of central Europe between the World Wars.
Audience: Undergraduate

4. Acquire a critical vocabulary to speak and write effectively about the experience of health, illness, leisure, recuperation, and Jewish identity.
Audience: Undergraduate

5. Engage in sustained discussion with peers in a respectful and empathetic manner on topics concerning diverse worldviews and value systems, including an understanding of interactions between Jews and Christians within the context of minority-majority relationships in central Europe and across the globe.
Audience: Undergraduate

GERMAN/GNS/LITTRANS 244 – 10 POEMS THAT WILL CHANGE YOUR LIFE
3 credits.

Covers different approaches to the study of great poetry in a broadly comparative context, with a particular emphasis on the traditions, regions, and diasporic communities of northern, central and eastern Europe.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. identify and analyze key features of poems from a variety of traditions.
Audience: Undergraduate

2. summarize and evaluate important developments in the transnational history of poetry and poetics, especially in the twentieth and twenty-first centuries.
Audience: Undergraduate

3. compare and evaluate the effects, values, and "functions" of poetry in various contexts both historically and in the present.
Audience: Undergraduate

4. develop and communicate original ideas in a variety of formats, including analytic and creative writing and/or translation.
Audience: Undergraduate

5. effectively utilize library resources, online collections, and special collections related to the course.
Audience: Undergraduate

GERMAN 245 – TOPICS IN DUTCH LIFE AND CULTURE
3 credits.

Cultural history and traditions of Dutch speaking countries. All readings and lectures in English.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

GERMAN 249 – INTERMEDIATE GERMAN - SPEAKING AND LISTENING
3 credits.

Drawing mainly on contemporary audio and video materials from German-speaking countries, deepen understanding of German as a spoken language by learning how native speakers vary their use of sound structures, vocabulary, and grammar according to speech situation.
Requisites: GERMAN 204 or placement into GERMAN 249, 258, or 262
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 253 – INTRODUCTION TO GERMAN CINEMA
3 credits.

An English-language survey of German film, one of the most influential national cinemas in the world. Consider important periods and topics such as the Weimar Republic (1918-1933); Nazism (1933-1945); post-war popular cinema; socialist East Germany; New German Cinema; and art house and international favorites of the contemporary period. Analyze how the films represent important cultural and social issues such as gender, sexuality, race/ethnicity, class, nationality, globalization, and migration.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze celebrated ("canonical") films and hidden gems from more than 100 years of German cinema.
Audience: Undergraduate

2. Recognize how history, context, and genre influence filmmaking.
Audience: Undergraduate

3. Compare representations of German culture to your own observations and experiences.
Audience: Undergraduate

4. Identify and interpret representations of gender/sexuality, race/ethnicity, class, and more.
Audience: Undergraduate

GERMAN 258 – INTERMEDIATE GERMAN-READING
3 credits.

Develop reading skills by working with literary and cultural texts from 1800 to the present. Emphasizes close reading, textual analysis, historical context, and the use of appropriate reading strategies.
Requisites: GERMAN 204 or placement into GERMAN 249, 258, or 262
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 262 – INTERMEDIATE GERMAN-WRITING
3 credits.

Individual and collaborative writing as well as teacher- and student-guided writing activities. Writings rely on authentic text models, many with German-specific cultural connotations.
Requisites: GERMAN 204 or placement into GERMAN 249, 258, or 262
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 264 – CULTURE IN 20TH CENTURY BERLIN
3 credits.

In the twentieth century, Berlin functioned as the seat of government and as a showcase for conflicting ideologies during the Cold War, and it now faces the challenge of returning to its function as reunified Germany's capital without ignoring its past. Through it all, Berlin has maintained a reputation as a center for artistic experimentation and a mecca for alternative culture. Examine the various arts and forms of entertainment from the turn of the century through the Weimar Republic, the Third Reich, the Cold War, and the reunification, in an effort to determine how politics, economics, and demographics have come together to shape a unique Berlin culture.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. demonstrate a thorough understanding of the historical conditions that shaped Berlin’s unique culture
Audience: Undergraduate

2. demonstrate an awareness of the living circumstances of Berliners throughout the tumultuous changes they experienced in the twentieth century
Audience: Undergraduate

3. recognize the similarities as well as difference between Berlin culture and cultures of other contemporary societies through cultural phenomena that include the arts, media, literature, entertainment, taste, education, gender roles, national identities, and belief systems
Audience: Undergraduate

4. apply oral and written skills in interpreting memoirs and contemporary films (with English translations) in their historical context
Audience: Undergraduate

5. gain an appreciation for Berlin’s changing role in the world
Audience: Undergraduate

GERMAN 267 – YIDDISH SONG AND THE JEWISH EXPERIENCE
3-4 credits.

Explores Yiddish song as an expression of the modern Jewish experience from Eastern Europe to the US. Covers folk song, popular and art music. Music and readings together provide an analytical framework to examine cultural and historical issues.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GERMAN/JEWISH/LITTRANS 269 – YIDDISH LITERATURE AND CULTURE IN EUROPE
3 credits.

Exploration of European Yiddish fiction, poetry, folklore, and cinema, with a focus on works of the 19th and 20th centuries.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GERMAN 272 – NAZI CULTURE
3 credits.

Examines how ideology and new policies influenced cultural life in the Third Reich. Topics include propaganda and entertainment films, music, literature and theater, visual arts and architecture, youth education, and consumer culture specifically in its appeal to women.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025

GERMAN/RELIG ST/SOC 273 – GOD & MONEY
3 credits.

Explores the historical connections between capitalism and religion. Considers if and how religious ideas and practices facilitated the rise of capitalism; asks whether religious institutions have supported the reproduction of social inequalities, unjust labor practices, and exploitative economies; and studies the role played by religious actors in the critique of capitalism. Pays attention to the historical specificity of the capitalist system, its conditions of emergence in the Christian West, and the effects of its globalization on non-Christian traditions. Covers topics including classical social theories of religion and capitalism; contemporary examples of religious practice and capital accumulation; and the relationship between religious movements and social-economic justice.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate knowledge of debates surrounding the historical and theoretical relationship between religion and capitalism
Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives on the relationship between religion and capitalism across a range of fields (e.g., philosophy, history, sociology) and contexts (e.g., America, Europe, Middle East, and South Asia)
Audience: Undergraduate

3. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in a range of media
Audience: Undergraduate

4. Generate original ideas and texts, experimenting and taking risks, solving problems, and answering textual questions
Audience: Undergraduate

5. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness
Audience: Undergraduate

GERMAN 275 – KAFKA AND THE KAFKAESQUE
3 credits.

Examines a wide selection of texts by Franz Kafka to approach an understanding of his universe and prepare ourselves to view this universe in comparison with other contemporary authors as well as authors from other cultures and eras (A. Camus, W. G. Sebald, T. Pynchon, H. Mulisch, P. Roth, H. Murakami). Also highlights literature, film, and art works in the tradition of the Kafkaesque.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN/LITTRANS 276 – SPECIAL TOPICS IN GERMAN AND WORLD LITERATURE/S
3 credits.

Exploration of diverse world literary traditions with an emphasis on German and German speaking cultures.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Engage with world literature as a lens for the human experience
Audience: Undergraduate

2. Read and discuss literature of German speaking countries and the world in translation
Audience: Undergraduate

3. Recognize and explain general themes common to different cultures
Audience: Undergraduate

4. Write about the topics and texts covered in the course
Audience: Undergraduate

GERMAN 278 – TOPICS IN GERMAN CULTURE
3 credits.

Introduction to German-speaking cultures. Topics may include Weimar culture, Nazi culture, Berlin, fin-de-siecle Vienna, minorities, representatives of the Holocaust, Germanic mythology, East Germany, Germans in America. Readings and lectures in English.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

GERMAN/JEWISH/LITTRANS 279 – YIDDISH LITERATURE AND CULTURE IN AMERICA
3 credits.

Exploration of American Yiddish poetry, fiction, theater, and cinema created by European Jews in the United States.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Prepare students for life and careers in an increasingly multicultural and multilingual US environment
Audience: Undergraduate

2. Develop critical thinking skills through sustained discussion with one's peers and foster a constructive climate in which to engage with questions concerning cultural, racial, religious, and linguistic difference
Audience: Undergraduate

3. Acquire a critical vocabulary to speak about historical and present-day issues concerning migration, ethnic identity, and religious difference
Audience: Undergraduate

4. Engage in reflective writing practices, respond critically to feedback, and assess one's own communicative strengths
Audience: Undergraduate

5. Identify the major themes of American Yiddish literature and culture from the early-twentieth century until today. These themes include: the politics of language use; the negotiation of a minoritized status; regional vs. national American Jewish identity; inter-generational conflict; Jews and the question of race
Audience: Undergraduate

GERMAN/LITTRANS 280 – FROM GRIMM TO GRYFFINDOR: GERMAN FAIRYTALES (RE)IMAGINED
3 credits.

From Rumpelstiltskin to Rapunzel, the rich fairy-tale tradition of the German-speaking world is filled with familiar themes and subversive morals. With an eye to depictions of gender, gender roles, sexuality, and race, we critically engage with these tales and contextualize them within the social and political landscapes that shaped them.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Critically engage with German fairytales from different time periods and contextualize them within the social and political landscapes that shaped them
Audience: Undergraduate

2. Explore fairytales through a variety of analytical lenses, including feminist and queer theories, ecocriticism, and psychoanalytic perspectives

Audience: Undergraduate

3. Recognize and analyze the fairytale's transcultural influences in literature, art, music, poetry, and pop culture
Audience: Undergraduate

GERMAN 285 – INTERMEDIATE INTENSIVE (HONORS) GERMAN: LANGUAGE, CULTURE, TEXTS
6 credits.

Intensive introduction to German-language culture and texts of varying length and genre, emphasizing reading, writing, and discussion skills. Equivalent to GERMAN 258 and 262.
Requisites: GERMAN 204. Not open to students with credit for GERMAN 258 or 262.
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Honors - Accelerated Honors (!)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Gain knowledge of major periods in German culture, literature, and history from 1750 to the present
Audience: Undergraduate

2. Become aware of how German texts responded to contemporary events or issues and, conversely, how those texts have shaped and influenced both past and present-day German culture
Audience: Undergraduate

3. Develop intercultural competence by reflecting on the connections and differences between their native culture and German culture and its objects
Audience: Undergraduate

4. Learn to appreciate the relevance of grammatical accuracy, lexical precision, proper discourse organization, and voice/expressiveness in terms of conveyance of exact intended meaning (including tone, implications, and connotations), aesthetic value, and generally, as a means of sharing experiences across language and cultural boundaries
Audience: Undergraduate

5. Be able to approach a wide variety of textual genres in different ways appropriate to each
Audience: Undergraduate

6. Become attentive to rhetorical and formal strategies in different types of texts and gain the ability and vocabulary to describe and analyze them
Audience: Undergraduate

7. Learn how to write and talk about texts both analytically and creatively
Audience: Undergraduate

8. Improve critical thinking abilities through group discussion and individual assignments asking them to argue for and support positions
Audience: Undergraduate

9. Gain enhanced awareness of reading styles and strategies and how to apply them while reading to develop critical reading skills for different text types
Audience: Undergraduate

10. Improve German language abilities in the areas of writing, reading, listening, and speaking through individual assignments, collaborative work, and class discussions
Audience: Undergraduate

11. Enhance teamwork skills through extensive collaborative work both in and out of class
Audience: Undergraduate

GERMAN 298 – DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2018

GERMAN 299 – DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

GERMAN 305 – LITERATUR DES 20. UND 21. JAHRHUNDERTS
3-4 credits.

Overview of new and recent literature in German within its historical and cultural contexts using a variety of genres and cultural artifacts, including fiction, drama, poetry, film, and popular songs.
Requisites: (GERMAN 249, 258, and 262) or (GERMAN 249 and 285)
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2020

GERMAN 311 – FIRST SEMESTER DUTCH FOR GRADUATE STUDENTS
3 credits.

Acquire a minimal communication level of proficiency in Dutch through listening, speaking, reading, and writing.
Requisites: Graduate/professional standing
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GERMAN 312 – SECOND SEMESTER DUTCH FOR GRADUATE STUDENTS
3 credits.

Acquire a minimal communication level of proficiency in Dutch through listening, speaking, reading, and writing.
Requisites: GERMAN 311
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 313 – THIRD SEMESTER DUTCH FOR GRADUATE STUDENTS
3 credits.

A review of Dutch grammar and vocabulary development. Reading and discussion of newspaper articles and modern short stories.
Requisites: GERMAN 312
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GERMAN 314 – FOURTH SEMESTER DUTCH FOR GRADUATE STUDENTS
3 credits.

Reading and discussion of texts dealing with the cultural history of the Netherlands and Flanders as well as samples of modern Dutch fiction.
Requisites: GERMAN 313
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 325 – TOPICS IN DUTCH LITERATURE
3 credits.

Study of an author or theme in modern Dutch/Flemish literature, presented by the current Dutch/Flemish writer in residence.
Requisites: GERMAN 214
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

GERMAN 337 – ADVANCED COMPOSITION & CONVERSATION
3-4 credits.

Enhances speaking, reading, listening, and writing skills within a range of situations; uses a variety of texts to cover current topics in German society, develop essay strategies, improve vocabulary, and review advanced grammar topics.
Requisites: (GERMAN 249, 258, and 262) or (GERMAN 249 and 285)
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Fall 2025

GERMAN 351 – INTRODUCTION TO GERMAN LINGUISTICS
3-4 credits.

Understanding the German language in its historical development and its contemporary manifestations, using English as a point of reference.
Requisites: (GERMAN 249, 258, and 262) or (GERMAN 249 and 285)
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GERMAN 352 – TOPICS IN GERMAN LINGUISTICS
3-4 credits.

Hands-on introduction to a topic in German language study. Topics are designed for future teachers of German and those interested in graduate study in German philology/linguistics.
Requisites: GERMAN 351
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GERMAN 362 – TOPICS IN GERMAN LITERATURE
3-4 credits.

Selected topics in the literature of German-speaking countries.
Requisites: (GERMAN 249, 258, and 262) or (GERMAN 249 and 285)
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GERMAN 367 – STUDY ABROAD IN GERMAN LITERATURE
2-5 credits.

A study abroad equivalency for German literature that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2001

GERMAN 368 – STUDY ABROAD IN GERMAN CULTURE
2-5 credits.

A study abroad equivalency for German culture that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2001

GERMAN 369 – STUDY ABROAD IN GERMAN LINGUISTICS
2-5 credits.

A study abroad equivalency for German linguistics that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2001

GERMAN 372 – TOPICS IN GERMAN CULTURE
3-4 credits.

Selected topics in the culture of German-speaking countries.
Requisites: (GERMAN 249, 258, and 262) or (GERMAN 249 and 285)
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GERMAN 377 – STUDY ABROAD IN DUTCH LITERATURE
2-5 credits.

A study abroad equivalency for Dutch literature that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

GERMAN 378 – STUDY ABROAD IN DUTCH CULTURE
2-5 credits.

A study abroad equivalency for Dutch culture that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2001

GERMAN 379 – STUDY ABROAD IN DUTCH LINGUISTICS
2-5 credits.

A study abroad equivalency for Dutch linguistics that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

GERMAN 385 – HONORS SEMINAR IN GERMAN LITERATURE
3 credits.

Selected topics in the literature of German-speaking countries.
Requisites: (GERMAN 249, 258, and 262) or (GERMAN 249 and 285) and Declared in an Honors program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

GERMAN 391 – GERMAN FOR GRADUATE READING KNOWLEDGE I
3 credits.

Intensive grammar and reading.
Requisites: Senior standing
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

GERMAN 392 – GERMAN FOR GRADUATE READING KNOWLEDGE II
3 credits.

Intensive grammar and reading.
Requisites: GERMAN 391
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024

GERMAN 401 – FIRST-SEMESTER GERMAN FOR GRADUATE STUDENTS
3 credits.

Emphasis on proficiency in German through speaking, listening, reading, and writing, and on communication in cultural context.
Requisites: Graduate/professional standing
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026

GERMAN 402 – SECOND-SEMESTER GERMAN FOR GRADUATE STUDENTS
3 credits.

Emphasis on proficiency in German through speaking, listening, reading, and writing, and on communication in cultural context.
Requisites: GERMAN 401
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 403 – THIRD-SEMESTER GERMAN FOR GRADUATE STUDENTS
3 credits.

Four-skills approach (speaking, listening, wiriting, reading) centered around authentic texts, recordings, and images. Grammar review, concereted vocabulary expansion, and intensive practice.
Requisites: GERMAN 402
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 404 – FOURTH-SEMESTER GERMAN FOR GRADUATE STUDENTS
3 credits.

Four-skills approach (speaking, listening, wiriting, reading) centered around authentic texts, recordings, and images. Grammar review, concereted vocabulary expansion, and intensive practice.
Requisites: GERMAN 403
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 411 – KULTUR DES 20. UND 21. JAHRHUNDERTS
3-4 credits.

Analyzes the German-speaking world in the 20th and 21st centuries using variety of authors, films, music, and other art media. Works include literary and historical texts, central texts from German sociologists, and art history.
Requisites: (GERMAN 249, 258, and 262) or (GERMAN 249 and 285)
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024

GERMAN/JEWISH 510 — GERMAN-JEWISH CULTURE SINCE THE 18TH CENTURY
3 credits.

Investigates German-Jewish culture since the 18th century, concentrating on toleration, emancipation, acculturation, assimilation, anti-Semitism, and Bildung.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

GERMAN 560 — TOPICS IN GERMAN STUDIES
3 credits.

Topics will vary. Each seminar will focus on a topic in German Studies.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

GERMAN 612 — GERMAN LITERARY MOVEMENTS SINCE 1750
3 credits.

Ideas and theories of literary movements exemplified in selected primary and secondary literature.
Requisites: GERMAN 305, 285, or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 625 — LETTERKUNDE DER LAGE LANDEN
3-4 credits.

Topics vary. May include: medieval literature; Golden Age literature; texts from Europe, South Africa, Indonesia, the Caribbean; memory in post-war literature; women writers; twentieth-century movements; Dutch-Jewish literature. Taught primarily in Dutch.
Requisites: GERMAN 314
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

GERMAN 645 — CULTUURKUNDE DER LAGE LANDEN
3-4 credits.

Theory and analysis of such topics as: construction of Dutch and Belgian identities; medieval culture; the Dutch Revolt and Golden Age; colonialism, anti-colonialism, post-colonialism; immigration and emigration; Dutch and Flemish regionalism vis-a-vis Europeanization and globalization. Taught primarily in Dutch.
Requisites: GERMAN 314
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

GERMAN 650 — HISTORY OF THE GERMAN LANGUAGE
3 credits.

Overview of the history of the German language; basic methodological and bibliographical training necessary for work in German philology/linguistics and the older Germanic languages.
Requisites: Senior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

GERMAN/MEDIEVAL 651 — INTRODUCTION TO MIDDLE HIGH GERMAN
3 credits.

Middle High German grammar and vocabulary with the goals of fluency and accuracy in reading medieval texts. Covers topics in phonology, morphology, syntax, and lexicon.
Requisites: (GERMAN 249, 258, and 262), (GERMAN 249 and 285), or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

GERMAN 676 — ADVANCED SEMINAR IN GERMAN STUDIES
3 credits.

Focuses on a topic in German studies.
Requisites: Senior standing and GERMAN 337
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GERMAN 681 – SENIOR HONORS THESIS-FIRST SEMESTER
3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2020

GERMAN 682 – SENIOR HONORS THESIS-SECOND SEMESTER
3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2021

GERMAN 683 – SENIOR HONORS SEMINAR IN GERMAN LITERATURE
3 credits.

Focuses on a topic in German studies.
Requisites: GERMAN 385 and Declared in an Honors program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024

GERMAN 698 – DIRECTED STUDY
1-6 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

GERMAN 699 – DIRECTED STUDY
1-6 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

GERMAN 720 – COLLEGE TEACHING OF GERMAN
1 credit.

Discuss German-language specific instruction. Emphasis on teaching German and developing identity as a language instructor.
Requisites: Declared in German MA or PHD
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

GERMAN 722 – THEORY OF TEACHING GERMAN
2 credits.

Theory and methodology of teaching German as a second language.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

GERMAN 723 – PRACTICUM IN TEACHING UNDERGRADUATE LITERATURE
1-2 credits.

Observation and discussion of undergraduate literature course. Consideration of pedagogical issues and limited opportunity for practice teaching.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

GERMAN 724 – PRACTICUM IN TEACHING UNDERGRADUATE LINGUISTICS
1-2 credits.

Observation and discussion of undergraduate linguistics course. Consideration of pedagogical issues and limited opportunity for practice teaching.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022

GERMAN 725 – PRACTICUM IN TEACHING UNDERGRADUATE CULTURE
1-2 credits.

Observation and discussion of undergraduate culture course. Consideration of pedagogical issues and limited opportunity for practice teaching.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

GERMAN 727 – TOPICS IN APPLIED LINGUISTICS
3 credits.

Selected issues in language acquisition and language teaching.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

GERMAN 742 – TOPICS IN GERMAN CULTURAL STUDIES
3 credits.

Selected topics in German culture.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GERMAN/MEDIEVAL 755 – OLD GERMANIC LANGUAGES
3 credits.

Old High German, Old Saxon, and Gothic on a rotating basis.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

GERMAN 758 – TOPICS IN CONTEMPORARY GERMAN
3 credits.

Topics in contemporary German culture, literature, and linguistics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

GERMAN 799 – INDEPENDENT STUDY
1-6 credits.

Advanced study under guidance.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GERMAN/FRENCH/HISTORY/POLI SCI/SOC 804 – INTERDISCIPLINARY WESTERN EUROPEAN AREA STUDIES SEMINAR
3 credits.

Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

GERMAN 947 – SEMINAR IN GERMAN LITERATURE AND CULTURE
3 credits.

Cultivate a deep knowledge and appreciation of German literature and German intellectual history.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

GERMAN 960 – SEMINAR IN GERMAN LINGUISTICS
3 credits.

Topic from a core area of linguistics, with integrated discussion of methodological approaches; bibliographical skills; basics of linguistic scholarship.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

GERMAN 990 – INDIVIDUAL RESEARCH IN LITERATURE
1-9 credits.

Independent research and writing under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

GERMAN 991 – INDIVIDUAL RESEARCH LINGUISTICS AND GERMANIC PHILOLOGY
1-9 credits.

Independent research and writing on the subject of linguistics and philology under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

GERMAN, NORDIC, AND SLAVIC (GNS)

GNS/JEWISH 105 – FIRST SEMESTER YIDDISH
4 credits.

Introduction to the Yiddish language through speaking, listening, reading, and writing. Emphasis on communication with attention to cultural and historical context.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Read the Yiddish alphabet and write in Yiddish cursive
Audience: Undergraduate

2. Express oneself in Yiddish at the sentence level in written and oral communications
Audience: Undergraduate

3. Read short Yiddish texts in the present, past, and future tenses
Audience: Undergraduate

4. Mobilize a vocabulary of 200+ Yiddish words, including those terms necessary to describe one's family, the life of the student, travel plans, daily life, and different geographic centers of Yiddish cultural production
Audience: Undergraduate

5. Name and describe major figures of twentieth and twenty-first century Yiddish culture
Audience: Undergraduate

GNS/JEWISH 106 – SECOND SEMESTER YIDDISH
4 credits.

Introduction to the Yiddish language through speaking, listening, reading, and writing. Emphasis on communication with attention to cultural and historical context.
Requisites: GNS/JEWISH 105
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Deploy Yiddish at the multi-sentence level in written and oral communications
Audience: Undergraduate

2. Express opinions about authentic Yiddish texts, including contemporary newspaper articles and poetry selections from the twentieth century
Audience: Undergraduate

3. Mobilize a vocabulary of 400+ Yiddish words, including those terms necessary to describe time, weather, calendrical units, literature (children's books, poetry, and the history of Yiddish publishing)
Audience: Undergraduate

4. Be creative with language in past, present, future, imperative, and conditional tenses
Audience: Undergraduate

5. Demonstrate familiarity with various forms of Yiddish cultural expression, such as Yiddish folksong, Yiddish poetry, Yiddish film, and the politics of Yiddishism
Audience: Undergraduate

GNS/JEWISH 115 – FIRST-YEAR INTENSIVE YIDDISH LANGUAGE
6 credits.

Intensive introduction to the Yiddish language through speaking, listening, reading, and writing. Introduces foundational communication skills and the breadth and multiplicity of Yiddish culture in the past and present. Encompasses the material usually covered in JEWISH/GNS 105 and 106.
Requisites: None. Not open to students with credit for JEWISH/GNS 106.
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Honors - Accelerated Honors (!)
Repeatable for Credit: No
Learning Outcomes: 1. Communicate in Yiddish at the multi-sentence level in writing and orally in the past, present, future, imperative, and conditional tenses.
Audience: Undergraduate

2. Understand a vocabulary of 400+ Yiddish words and decipher and interpret Yiddish texts about a range of topics related to daily life (both historically and in the present).
Audience: Undergraduate

3. Implement learning strategies when engaging with Yiddish-language sources to discern and create meaning and to recognize grammar patterns and semantic nuances.
Audience: Undergraduate

4. Demonstrate familiarity with various forms of Yiddish cultural expression.
Audience: Undergraduate

5. Negotiate meaning across language and culture and draw comparisons between Yiddish-speaking cultures and those of their own.
Audience: Undergraduate

GNS/FOLKLORE 200 – FOLKLORE OF CENTRAL, EASTERN AND NORTHERN EUROPE
3 credits.

Folklore of Central, Eastern and Northern Europe and among emigrants from these regions in North America. A survey of genres of folklore, history of research, and modes of interpretation, past and present.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Comm QR - Communication B
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Recognize and understand key concepts important to the study of folklore as related to the cultures of people in and from the countries of Central, Eastern and Northern Europe.
Audience: Undergraduate

2. Articulate and apply methods folklorists use to document, describe, and discuss culture.
Audience: Undergraduate

3. Produce folkloristic products in the form of essays, oral presentations, and digital products.
Audience: Undergraduate

GNS/ENVIR ST 210 – CULTURES OF SUSTAINABILITY: CENTRAL, EASTERN, AND NORTHERN EUROPE
3 credits.

Exploration of the ideals and realities of sustainability in Central, Northern and East European contexts. Cultural, historical, environmental and other perspectives on sustainability on a local and global scale.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of culture in Central, Eastern and North (CEN) European by demonstrating a humanistic understanding of sustainability.
Audience: Undergraduate

2. Apply sustainability principles and/or frameworks to addressing the challenge of working respectfully with stakeholders from different cultural, geographic, and political backgrounds to sustain culture in Central, Eastern and North (CEN) European contexts
Audience: Undergraduate

3. Analyze the causes of and solutions for the sustainability challenge of culture in Central, Eastern and North (CEN) European contexts.
Audience: Undergraduate

4. Analyze sustainability issues and/or practices using a systems-based approach.
Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of culture in Central, Eastern and North (CEN) European contexts using a humanistic approach and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Undergraduate

6. Use sustainability principles for developing personal goals and professional values.
Audience: Undergraduate

GNS/GERMAN/JEWISH 240 – HEALTH AND HOTELS IN CENTRAL EUROPE
3 credits.

Introduction to spaces of leisure, medical recuperation, and Christian and Jewish cross-cultural exchange. Literature and films focus on sites of rest and healing between the World Wars as well as post-Holocaust reflections on these sites.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate close reading skills in writing assignments through interpretation and analysis of texts in a variety of genres, including critical theory, prose, poetry, and film.
Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods.
Audience: Undergraduate

3. Identify major and lesser-known writers of central Europe between the World Wars.
Audience: Undergraduate

4. Acquire a critical vocabulary to speak and write effectively about the experience of health, illness, leisure, recuperation, and Jewish identity.
Audience: Undergraduate

5. Engage in sustained discussion with peers in a respectful and empathetic manner on topics concerning diverse worldviews and value systems, including an understanding of interactions between Jews and Christians within the context of minority-majority relationships in central Europe and across the globe.
Audience: Undergraduate

GNS/GERMAN/LITTRANS 244 – 10 POEMS THAT WILL CHANGE YOUR LIFE
3 credits.

Covers different approaches to the study of great poetry in a broadly comparative context, with a particular emphasis on the traditions, regions, and diasporic communities of northern, central and eastern Europe.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. identify and analyze key features of poems from a variety of traditions.
Audience: Undergraduate

2. summarize and evaluate important developments in the transnational history of poetry and poetics, especially in the twentieth and twenty-first centuries.
Audience: Undergraduate

3. compare and evaluate the effects, values, and "functions" of poetry in various contexts both historically and in the present.
Audience: Undergraduate

4. develop and communicate original ideas in a variety of formats, including analytic and creative writing and/or translation.
Audience: Undergraduate

5. effectively utilize library resources, online collections, and special collections related to the course.
Audience: Undergraduate

GNS/HISTORY 265 – AN INTRODUCTION TO CENTRAL ASIA: FROM THE SILK ROUTE TO AFGHANISTAN
3 credits.

Examination of human geography, ethnicity, nomadism and pastoralism, oases cultures, religion and international politics of the silk routes of central Asia. Not open to students with credit for HIST 265 prior to Fall 2018.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025

GNS 270 – INTRODUCTORY TOPICS IN GNS
3 credits.

Elementary topics in German, Nordic, and/or Slavic culture, folklore, linguistics, and/or language.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize distinctive features of cultures of Central, Eastern and/or Northern Europe as reflected in specific cultural products
Audience: Undergraduate

2. Analyze cultural products from Central, Eastern, and/or Northern Europe in relation to societal and historical contexts.
Audience: Undergraduate

3. Create academic products that adhere to the norms of scholarly inquiry and communication in the humanistic study of the languages and cultures of Central, Eastern and/or Northern Europe.
Audience: Undergraduate

4. Recognize and discuss the complex ways in which culture is used to include and exclude people within the societies of Central, Eastern, and/or Northern Europe, as elsewhere in the world.
Audience: Undergraduate

GNS 324 – LITERATURES OF CENTRAL ASIA
3 credits.

Critical survey of the development of medieval and modern literatures of the peoples of Central Asia from pre-Islamic times to the present with selected readings in English translation. Not open to students with credit for LCA 314 prior to fall 2019.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Recognize and understand the fundamentals of cultural analysis and interpretation of verbal and visual arts. Students will be able to map major intellectual trends in Central Asian Literature and its influence worldwide.
Audience: Both Grad & Undergrad

2. Hone and apply students' analytical skills. The information will be provided via lectures and readings. Students' knowledge on the subject will be tested in exams, while their analytical skills and critical thinking abilities will be further examined through their paper assignments.
Audience: Both Grad & Undergrad

3. Identify the most important literature in major research languages and for utilizing materials in those research languages which they command.
Audience: Graduate

GNS 331 – FIRST SEMESTER KAZAKH
4 credits.

Provides an introduction to the Kazakh language, which is a Turkic language spoken by about 11 million people in Kazakhstan, China, Mongolia, Turkey, Uzbekistan, Tajikistan, Turkmenistan, Russia, and Iran. Work within four language skills: listening, reading, writing, and speaking. Learn to communicate in Kazakh in authentic situations. Kazakh will be used as the primary language in classroom instructions, with minimal use of English for explanations of grammar.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand and employ Kazakh Language at an intermediate level, mastering elements of grammar essential to effective communication in Kazakh
Audience: Undergraduate

2. Recognize aspects of Kazakh daily life
Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Kazakh
Audience: Undergraduate

GNS 332 – SECOND SEMESTER KAZAKH
4 credits.

Building on skills learned in first semester Kazakh, learn to communicate in more extended situations. Information on holidays, traditions and colloquial phrases will be introduced. Pays special attention to reading and writing and to vocabulary expansion.
Requisites: GNS 331
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand and employ Kazakh language at an elementary level
Audience: Undergraduate

2. Recognize aspects of Kazakh daily life
Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Kazakh
Audience: Undergraduate

GNS 339 – FIRST SEMESTER TURKISH
4 credits.

Provides an introduction to the Turkish language, which is spoken by more than 80 million people in Turkey and Europe. Work within four language skills: listening, reading, writing, and speaking. Learn to communicate in Turkish in authentic situations. Turkish will be used as the primary language in classroom instructions, with minimal use of English.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand and employ Turkish language at an elementary level
Audience: Undergraduate

2. Recognize aspects of Turkish daily life
Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Turkish
Audience: Undergraduate

GNS 340 – SECOND SEMESTER TURKISH
4 credits.

Building on skills learned in first semester Turkish, learn to communicate in more extended situations. Information on holidays, traditions and colloquial phrases will be introduced. Besides everyday Turkish, learn written Turkish such as formal letters, orders and messages. Pays special attention to reading and writing and to vocabulary expansion.
Requisites: GNS 339
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand and employ Turkish Language at an elementary level
Audience: Undergraduate

2. Recognize aspects of Turkish daily life
Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Turkish
Audience: Undergraduate

GNS 351 – FIRST SEMESTER CENTRAL EURASIAN LANGUAGE
4 credits.

Introductory study of a Central Eurasian study, including introductory grammar to read, write and speak about daily life and interactions in the topic language. Upon completion, student can expect to possess a firm grammatical foundation for further study of oral and written Tajik, Uyghur, or Uzbek.
Requisites: Declared in Central Eurasian Studies Summer Institute
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Understand and employ Tajik, Uyghur, or Uzbek Language at an elementary level
Audience: Undergraduate

2. Recognize aspects of Tajik, Uyghur, or Uzbek daily life
Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Tajik, Uyghur, or Uzbek
Audience: Undergraduate

GNS 352 – SECOND SEMESTER CENTRAL EURASIAN LANGUAGE
4 credits.

Introductory study of a Central Eurasian study, including introductory grammar to read, write and speak about daily life and interactions in the topic language. Upon completion, student can expect to possess a firm grammatical foundation for further study of oral and written Tajik, Uyghur, or Uzbek.
Requisites: Declared in Central Eurasian Studies Summer Institute
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Understand and employ Tajik, Uyghur, or Uzbek Language at an elementary level
Audience: Undergraduate

2. Recognize aspects of Tajik, Uyghur, or Uzbek daily life
Audience: Undergraduate

3. Possess a firm grammatical foundation for further study of oral and written Tajik, Uyghur, or Uzbek
Audience: Undergraduate

GNS 370 – TOPICS IN GNS (INTERMEDIATE)
3 credits.

Intermediate topics in German, Nordic, and/or Slavic culture, folklore, lingusitics, and/or language.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize distinctive features of cultures of Central, Eastern and/or Northern Europe as reflected in specific cultural products.
Audience: Undergraduate

2. Analyze cultural products from Central, Eastern, and/or Northern Europe in relation to societal and historical contexts.
Audience: Undergraduate

3. Create academic products that adhere to the norms of scholarly inquiry and communication in the humanistic study of the languages and cultures of Central, Eastern and/or Northern Europe.
Audience: Undergraduate

4. Recognize and discuss the complex ways in which culture is used to include and exclude people within the societies of Central, Eastern, and/or Northern Europe, as elsewhere in the world.
Audience: Undergraduate

GNS 375 – PHILOSOPHY, THEORY, CRITICISM
3 credits.

Selected studies in critical theory, continental philosophy, and/or literary criticism; topics may include German idealism, psychoanalysis, phenomenology, linguistics, Marxism, gender theory, critical race studies, religion, translation, poetics, media, migration studies, etc.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Demonstrate knowledge of major themes, terms, and interpretive currents in the history of modern/contemporary philosophy, theory, and criticism
Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods in modern philosophical/theoretical writing
Audience: Undergraduate

3. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in modern philosophy, theory, and criticism
Audience: Undergraduate

4. Generate original ideas and texts, experimenting and taking risks, solving problems, and answering questions in a range of texts
Audience: Undergraduate

5. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness
Audience: Undergraduate

GNS/JEWISH 405 – FIRST SEMESTER YIDDISH FOR GRADUATE STUDENTS
4 credits.

Introduction to the Yiddish language through speaking, listening, reading, and writing. Emphasis on communication with attention to cultural and historical context. Includes tasks designed to facilitate Yiddish-related research.
Requisites: Graduate/professional standing
Repeatable for Credit: No
Learning Outcomes: 1. Read the Yiddish alphabet and write in Yiddish cursive
Audience: Undergraduate

2. Express oneself in Yiddish at the sentence level in written and oral communications
Audience: Undergraduate

3. Read short Yiddish texts in the present, past, and future tenses
Audience: Undergraduate

4. Mobilize a vocabulary of 200+ Yiddish words, including those terms necessary to describe one's family, the life of the student, travel plans, daily life, and different geographic centers of Yiddish cultural production
Audience: Undergraduate

5. Name and describe major figures of twentieth and twenty-first century Yiddish culture
Audience: Undergraduate

GNS/JEWISH 406 – SECOND SEMESTER YIDDISH FOR GRADUATE STUDENTS
4 credits.

Emphasis on proficiency in Yiddish through speaking, listening, reading, and writing, and on communication in cultural context.
Requisites: GNS/JEWISH 405
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Deploy Yiddish at the multi-sentence level in written and oral communications
Audience: Undergraduate

2. Express opinions about authentic Yiddish texts, including contemporary newspaper articles and poetry selections from the twentieth century.
Audience: Undergraduate

3. Mobilize a vocabulary of 400+ Yiddish words, including those terms necessary to describe time, weather, calendrical units, literature (children's books, poetry, and the history of Yiddish publishing).
Audience: Undergraduate

4. Be creative with language in past, present, future, imperative, and conditional tenses.
Audience: Undergraduate

GNS/JEWISH 415 – FIRST YEAR INTENSIVE YIDDISH FOR GRADS
6 credits.

Intensive introduction to the Yiddish language through speaking, listening, reading, and writing. Introduces foundational communication skills and the breadth and multiplicity of Yiddish culture in the past and present. Encompasses the material usually covered in JEWISH/GNS 405 and 406.
Requisites: Graduate/professional standing. Not open to students with credit for JEWISH/GNS 406.
Course Designation: L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Communicate in Yiddish at the multi-sentence level in writing and orally in the past, present, future, imperative, and conditional tenses.
Audience: Undergraduate

2. Understand a vocabulary of 500+ Yiddish words and decipher and interpret Yiddish texts about a range of topics related to daily life (both historically and in the present) and about topics relevant to the graduate student's research focus.
Audience: Undergraduate

3. Implement learning strategies when engaging with Yiddish-language sources to discern and create meaning and to recognize grammar patterns and semantic nuances.
Audience: Undergraduate

4. Demonstrate familiarity with various forms of Yiddish cultural expression and with various online databases of newspapers, literature, and archival materials relevant to conducting research in Yiddish.
Audience: Undergraduate

5. Negotiate meaning across language and culture and draw comparisons between Yiddish-speaking cultures and those of their own.
Audience: Undergraduate

6. Demonstrate ability to transliterate Yiddish-language titles and sentences according to YIVO standard and to translate sentences into English.
Audience: Undergraduate

GNS 431 – THIRD SEMESTER KAZAKH
4 credits.

Continues the study of the Kazakh language with an emphasis on four language skills: listening, reading, writing, and speaking in order to develop proficiency at the intermediate level. The primary goal is to improve communication in Kazakh. Instruction will emphasize the language that is relevant to situations that students are likely to encounter if they travel to or live in Kazakhstan. The secondary goal of the course is to improve students' understanding of Kazakh society and culture.
Requisites: GNS 332
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand and employ Kazakh language at an intermediate level, mastering elements of grammar essential to effective communication in Kazakh
Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations
Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text
Audience: Undergraduate

GNS 432 – FOURTH SEMESTER KAZAKH
4 credits.

Continue to learn more about the Kazakh language through history, literature and art, in order to better understand its cultural codes.
Requisites: GNS 431
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Understand and employ Kazakh language at an intermediate level, mastering elements of grammar essential to effective communication in Kazakh
Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations
Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text
Audience: Undergraduate

GNS 439 – THIRD SEMESTER TURKISH
4 credits.

Continues the study of the Turkish language, focusing on four language skills--listening, reading, writing, and speaking--in order to develop proficiency at the intermediate level. Improve communication in Turkish. Instruction will emphasize the language that is relevant to situations that students are likely to encounter if they travel to or live in Turkey. The secondary goal of the course is to improve students' understanding of Turkish society and culture.
Requisites: GNS 340
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Understand and employ Turkish language at an intermediate level, mastering elements of grammar essential to effective communication in Turkish
Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations
Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text
Audience: Undergraduate

GNS 440 – FOURTH SEMESTER TURKISH
4 credits.

Continues the study of the Turkish language, focusing on four language skills--listening, reading, writing, and speaking--in order to develop proficiency at the intermediate level. In addition to the topics covered in previous semesters, learn more about the language through history, literature and art, in order to better understand its cultural codes.
Requisites: GNS 439
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Understand and employ Turkish language at an intermediate level, mastering elements of grammar essential to effective communication in Turkish
Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations
Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text
Audience: Undergraduate

GNS 451 – THIRD SEMESTER CENTRAL EURASIAN LANGUAGE
4 credits.

Third semester level language taught in an intensive 8-week summer language program.
Requisites: Declared in Central Eurasian Studies Summer Institute
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Understand and employ Tajik, Uyghur, or Uzbek Language at an intermediate level, mastering elements of grammar essential to effective communication in Tajik, Uyghur, or Uzbek
Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations
Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text
Audience: Undergraduate

GNS 452 – FOURTH SEMESTER CENTRAL EURASIAN LANGUAGE
4 credits.

Introduces intermediate-level communication skills in Central Eurasian languages in varying settings. Students will learn a wide range of vocabulary, grammar structure and pragmatic usage in situated dialogues. They will improve four language skills (listening, speaking, reading and writing) and pragmatic competence through interactive and meaningful in-class activities and after-class assignments.
Requisites: Declared in Central Eurasian Studies Summer Institute
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Comprehend and employ Tajik, Uyghur, or Uzbek Language at an intermediate level, mastering elements of grammar essential to effective communication in Tajik, Uyghur, or Uzbek
Audience: Undergraduate

2. Demonstrate cultural knowledge, especially in relation to professional situations
Audience: Undergraduate

3. Develop reading skills and speed, with expanded vocabulary and the ability to draw meaningful conclusions from text
Audience: Undergraduate

GNS 460 – READINGS IN TURKISH: CONTEMPORARY TURKEY THROUGH LITERATURE AND MEDIA
4 credits.

Improve reading skills in Turkish by also developing and employing analytical skills to comprehend, identify and respond to salient features of the contemporary Turkish society. Acquire skills to comprehend a variety of texts within Turkey's social and political framework. Designed for students participating in the Turkish Overseas Flagship Program.
Requisites: GNS 429
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. read within a normal range of speed and with almost complete comprehension a variety of authentic prose material on unfamiliar subjects independent of subject matter knowledge.
Audience: Undergraduate

2. comprehend a variety of styles and forms pertinent to professional needs.
Audience: Undergraduate

3. read fluently and accurately all styles and forms of the language pertinent to professional needs.
Audience: Undergraduate

GNS 471 – ADVANCED TOPICS IN EAST EUROPEAN AND CENTRAL ASIAN LANGUAGES AND CULTURES
1-4 credits.

Advanced topics in East European and Central Asian culture, folklore, lingusitics, and/or language.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize distinctive features of cultures of Eastern Europe and Central Asia as reflected in specific cultural products.
Audience: Undergraduate

2. Analyze cultural products from Eastern Europe and Central Asia in relation to societal and historical contexts.
Audience: Undergraduate

3. Create academic products that adhere to the norms of scholarly inquiry and communication in the humanistic study of the languages and cultures of Eastern Europe and Central Asia.
Audience: Undergraduate

4. Recognize and discuss the complex ways in which culture is used to include and exclude people within the societies of Eastern Europe and Central Asia, as elsewhere in the world.
Audience: Undergraduate

GNS 531 – FIFTH SEMESTER KAZAKH
3-4 credits.

Enhance speaking, listening, writing and reading skills. Build confidence in speaking about issues related to daily life.
Requisites: GNS 432
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Maintain conversations and discussions on familiar, as well as unfamiliar, concrete topics using connected sentences and probing questions.
Audience: Undergraduate

2. Deliver detailed and organized presentations on familiar as well as unfamiliar concrete topics.
Audience: Undergraduate

3. Understand the underlying message and most supporting details in complex informational and fictional texts.
Audience: Undergraduate

4. Tell stories based on concrete experiences in academic, social, and professional topics of interest.
Audience: Undergraduate

5. Recognize and apply culturally relevant aspects of using the language in familiar and everyday contexts.
Audience: Undergraduate

6. Describe some aspects of Kazakh culture and customs.
Audience: Undergraduate

GNS 532 – SIXTH SEMESTER KAZAKH
3-4 credits.

Enhance speaking, listening, writing and reading skills. Build confidence in speaking about issues related to daily life.
Requisites: GNS 531
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Maintain conversations and discussions on familiar, as well as unfamiliar, concrete topics using connected sentences and probing questions.
Audience: Undergraduate

2. Deliver detailed and organized presentations on familiar as well as unfamiliar concrete topics.
Audience: Undergraduate

3. Understand the underlying message and most supporting details in complex informational and fictional texts.
Audience: Undergraduate

4. Tell stories based on concrete experiences in academic, social, and professional topics of interest.
Audience: Undergraduate

5. Recognize and apply culturally relevant aspects of using the language in familiar and everyday contexts.
Audience: Undergraduate

6. Describe some aspects of Kazakh culture and customs.
Audience: Undergraduate

GNS 539 – FIFTH SEMESTER TURKISH AND AZERI
3-4 credits.

Continues the study of the Turkish languages combined with Azerbaijani, which is a Turkic language closely related to Turkish. Learn Azerbaijani written in the Latin alphabet and its minor differences from Turkish. Develop proficiency at the advanced level in listening, speaking, reading and writing in Turkish and in Azerbaijani.
Requisites: GNS 440
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Understand and employ Turkish language at an advanced level, possessing the ability to speak and write in modes from colloquial to professional.
Audience: Undergraduate

2. Analyze and interpret texts with sound application of Turkish language and cultural awareness
Audience: Undergraduate

3. Evaluate and explain complex views and issues, using knowledge and perspective grounded in cultural competency
Audience: Undergraduate

GNS 540 – SIXTH SEMESTER TURKISH AND AZERI
3-4 credits.

A continuation of the study of Turkish language with Azerbaijani. Practice in understanding and employing Turkish at an advanced level, including spoken and written language in colloquial and professional modes. Analysis and interpretation of texts from a grammatical and cultural perspective.
Requisites: GNS 539
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Understand and employ Turkish language at an advanced level, possessing the ability to speak and write in modes from colloquial to professional.
Audience: Undergraduate

2. Analyze and interpret texts with sound application of Turkish language and cultural awareness
Audience: Undergraduate

3. Evaluate and explain complex views and issues, using knowledge and perspective grounded in cultural competency
Audience: Undergraduate

GNS 551 – FIFTH SEMESTER CENTRAL EURASIAN LANGUAGE
4 credits.

Introduces advanced-level communication skills in Central Eurasian languages in varying settings. Students will learn a wide range of vocabulary, grammar structure and pragmatic usage in situated dialogues. They will improve four language skills (listening, speaking, reading and writing) and pragmatic competence through interactive and meaningful in-class activities and after-class assignments.
Requisites: Declared in Central Eurasian Studies Summer Institute
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Comprehend and employ Tajik, Uyghur, or Uzbek language at an advanced level, possessing the ability to speak and write in modes from colloquial to professional.
Audience: Undergraduate

2. Analyze and interpret texts with sound application of Tajik, Uyghur, or Uzbek language and cultural awareness
Audience: Undergraduate

3. Evaluate and explain complex views and issues, using knowledge and perspective grounded in cultural competency
Audience: Undergraduate

GNS 552 – SIXTH SEMESTER CENTRAL EURASIAN LANGUAGE
4 credits.

Introduces advanced-level communication skills in Central Eurasian languages in varying settings. Students will learn a wide range of vocabulary, grammar structure and pragmatic usage in situated dialogues. They will improve four language skills (listening, speaking, reading and writing) and pragmatic competence through interactive and meaningful in-class activities and after-class assignments.
Requisites: Declared in Central Eurasian Studies Summer Institute
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Comprehend and employ Tajik, Uyghur, or Uzbek language at an advanced level, possessing the ability to speak and write in modes from colloquial to professional.
Audience: Undergraduate

2. Analyze and interpret texts with sound application of Tajik, Uyghur, or Uzbek language and cultural awareness
Audience: Undergraduate

3. Evaluate and explain complex views and issues, using knowledge and perspective grounded in cultural competency
Audience: Undergraduate

GNS 570 – ADVANCED TOPICS IN GNS
3 credits.

Advanced topics in German, Nordic, and/or Slavic culture, folklore, linguistics, and/or language.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Recognize distinctive features of cultures of Central, Eastern and/or Northern Europe as reflected in specific cultural products.
Audience: Both Grad & Undergrad

2. Analyze cultural products from Central, Eastern, and/or Northern Europe in relation to societal and historical contexts.
Audience: Both Grad & Undergrad

3. Create academic products that adhere to the norms of scholarly inquiry and communication in the humanistic study of the languages and cultures of Central, Eastern and/or Northern Europe.
Audience: Both Grad & Undergrad

4. Recognize and discuss the complex ways in which culture is used to include and exclude people within the societies of Central, Eastern, and/or Northern Europe, as elsewhere in the world.
Audience: Both Grad & Undergrad

5. Identify ways the course content may be integrated into the teaching of basic language courses.
Audience: Graduate

GNS 624 – PROSEMINAR IN CENTRAL ASIAN HISTORY
3 credits.

Introduction to the historiography of the Golden Horde and the Tatar, Kazak, and Uzbek nations; impact on Russia; Russian colonialism in Central Asia; innovative approaches to social and economic history. Not open to students with credit for LCA 640 prior to Fall 2019
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Discuss and evaluate key topics and themes in Central Asian history.
Audience: Both Grad & Undergrad

2. Present research related to these topics and themes.
Audience: Both Grad & Undergrad

3. Formulate inquiries with regard to historical and primary sources.
Audience: Both Grad & Undergrad

4. Foster an inclusive community through constructive critique.
Audience: Both Grad & Undergrad

5. Develop strategies to support and advance professional development.
Audience: Graduate

GNS 700 – GRADUATE SEMINAR IN PROFESSIONAL DEVELOPMENT
3 credits.

Promotes the academic and professional development of graduate students in the humanities, in particular in the fields of German, Scandinavian, and Slavic studies. Students create and critique conference presentations, grant proposals, books reviews, CVs, and other important academic documents. The seminar includes visits from faculty in the various programs of German, Nordic, and Slavic.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

GREEK (CLASSICS) (GREEK)

GREEK 103 – FIRST SEMESTER ANCIENT GREEK
4 credits.

An introduction to ancient Greek grammar and the development of basic reading skills.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize, identify, and explain basic forms of the classical Greek language.
Audience: Undergraduate

2. Recognize, identify, and explain basic syntax of the classical Greek language.
Audience: Undergraduate

3. Recognize, identify, and explain basic vocabulary of the classical Greek language.
Audience: Undergraduate

GREEK 104 – SECOND SEMESTER ANCIENT GREEK
4 credits.

An introduction to ancient Greek grammar and the development of basic reading skills.
Requisites: GREEK 103
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize, identify, and explain all forms of the classical Greek language.
Audience: Undergraduate

2. Recognize, identify, and explain all syntax of the classical Greek language.
Audience: Undergraduate

3. Recognize, identify, and explain all vocabulary of the classical Greek language.
Audience: Undergraduate

GREEK 303 – FIRST SEMESTER ANCIENT GREEK
4 credits.

An introduction to ancient Greek grammar and the development of basic reading skills.
Requisites: Graduate/professional standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recognize, identify, and explain basic forms of the classical Greek language.
Audience: Graduate

2. Recognize, identify, and explain basic syntax of the classical Greek language.
Audience: Graduate

3. Recognize, identify, and explain basic vocabulary of the classical Greek language.
Audience: Graduate

4. Through intensive study, acquire and demonstrate skills necessary for reading Greek authors.
Audience: Graduate

GREEK 304 – SECOND SEMESTER ANCIENT GREEK
4 credits.

An introduction to ancient Greek grammar and the development of basic reading skills.
Requisites: GREEK 303
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize, identify and explain all forms of the classical Greek language.
Audience: Graduate

2. Recognize, identify, and explain all syntax of the classical Greek language.
Audience: Graduate

3. Recognize, identify, and explain all vocabulary of the classical Greek language.
Audience: Graduate

4. Through intensive study, acquire and demonstrate skills necessary for reading Greek authors.
Audience: Graduate

GREEK 305 – THIRD SEMESTER ANCIENT GREEK
3 credits.

Selections from Plato's Dialogues, the New Testament, Homer's Iliad, or Herodotus.
Requisites: GREEK 104, 304, or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Greek texts.
Audience: Undergraduate

2. Demonstrate accuracy in translation of classical Greek texts.
Audience: Undergraduate

3. Demonstrate basic competency in reading continuous classical Greek texts.
Audience: Undergraduate

GREEK 306 – FOURTH SEMESTER ANCIENT GREEK
3 credits.

Selections from Plato's Dialogues, the New Testament, Homer's Iliad, or Herodotus.
Requisites: GREEK 305 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Greek texts.
Audience: Undergraduate

2. Demonstrate accuracy and nuance in translation of classical Greek texts.
Audience: Undergraduate

3. Demonstrate competency in reading continuous classical Greek texts.
Audience: Undergraduate

GREEK 401 – READINGS IN GREEK LITERATURE
3 credits.

Selected readings in ancient Greek poetry or prose.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Greek texts.
Audience: Both Grad & Undergrad

2. Apply competency in reading continuous classical Greek texts.
Audience: Both Grad & Undergrad

3. Demonstrate basic critical reading skills of classical Greek texts.
Audience: Both Grad & Undergrad

4. Demonstrate competency in reading continuous Greek texts related to the student's area of research.
Audience: Graduate

GREEK 505 – GREEK PROSE COMPOSITION
3 credits.

The study of Greek grammar and style through composition.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze ancient classical Greek texts.
Audience: Undergraduate

2. Interpret ancient classical Greek texts.
Audience: Undergraduate

3. Evaluate ancient classical Greek texts.
Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

6. Produce accurate grammatical forms in original Greek prose.
Audience: Both Grad & Undergrad

7. Differentiate Greek prose from English prose.
Audience: Both Grad & Undergrad

8. Explain how syntactical concepts tend to be expressed in Greek.
Audience: Both Grad & Undergrad

9. Appreciate (and imitate) the styles of particular prose authors.
Audience: Graduate

GREEK 510 – HOMER
3 credits.

Extensive reading in both Iliad and Odyssey.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Analyze ancient classical Greek texts.
Audience: Undergraduate

2. Interpret ancient classical Greek texts.
Audience: Undergraduate

3. Evaluate ancient classical Greek texts.
Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

GREEK 511 – HESIOD
3 credits.

The writings of Hesiod in Greek.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022
Learning Outcomes: 1. Analyze ancient classical Greek texts.
Audience: Undergraduate

2. Interpret ancient classical Greek texts.
Audience: Undergraduate

3. Evaluate ancient classical Greek texts.
Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

GREEK 512 – GREEK LYRIC POETS
3 credits.

The complete corpus of Alcman, Ibycus, Stesichorus, Sappho, Alcaeus, Corinna, Anacreon, Praxilla, and Simonides. Selections from Bacchylides and Pindar.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2021
Learning Outcomes: 1. Analyze ancient classical Greek texts.
Audience: Undergraduate

2. Interpret ancient classical Greek texts.
Audience: Undergraduate

3. Evaluate ancient classical Greek texts.
Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

GREEK 520 – GREEK COMEDY
3 credits.

Close reading of several plays with attention to Aristophanes' lyric genius and political opinions.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022
Learning Outcomes: 1. Analyze ancient classical Greek texts.
Audience: Undergraduate

2. Interpret ancient classical Greek texts.
Audience: Undergraduate

3. Evaluate ancient classical Greek texts.
Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

GREEK 521 – GREEK TRAGEDY
3 credits.

Close reading of selected plays of Aeschylus, Sophocles or Euripides.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024
Learning Outcomes: 1. Analyze ancient classical Greek texts.
Audience: Undergraduate

2. Interpret ancient classical Greek texts.
Audience: Undergraduate

3. Evaluate ancient classical Greek texts.
Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

GREEK 532 – THUCYDIDES
3 credits.

Close reading of selections from Thucydides, with a focus on developing skills in reading and interpreting historical texts.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Interpret ancient classical Greek texts.
Audience: Undergraduate

2. Evaluate ancient classical Greek texts.
Audience: Undergraduate

3. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

4. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

GREEK 541 – GREEK PHILOSOPHICAL WRITERS
3 credits.

Featuring close reading in the original language of canonical works for classical Greek philosophy, including but not limited to Plato and Aristotle, develop proficiency in the Greek language of the classical and post-classical periods, emphasizing grammar, style, socio-historical context, and the history of ideas.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Analyze ancient classical Greek texts
Audience: Both Grad & Undergrad

2. Interpret ancient classical Greek texts
Audience: Both Grad & Undergrad

3. Evaluate ancient classical Greek texts.
Audience: Both Grad & Undergrad

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition
Audience: Graduate

GREEK 551 – ATTIC ORATORS
3 credits.

Selected speeches from Antiphon to Hypereides, with emphasis upon the contribution of rhetoric to the intellectual life of the fourth century.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Analyze ancient classical Greek texts.
Audience: Undergraduate

2. Interpret ancient classical Greek texts.
Audience: Undergraduate

3. Evaluate ancient classical Greek texts.
Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

GREEK 560 – HELLENISTIC GREEK
3 credits.

A selection of texts, chiefly religious in content, pagan, Jewish, and Christian.
Requisites: GREEK 306 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Analyze ancient classical Greek texts.
Audience: Undergraduate

2. Interpret ancient classical Greek texts.
Audience: Undergraduate

3. Evaluate ancient classical Greek texts.
Audience: Undergraduate

4. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

5. Demonstrate competence in current scholarly approaches to course readings.
Audience: Graduate

GREEK 571 – ADVANCED READINGS IN GREEK LITERATURE
3 credits.

Advanced practice in analyzing, evaluating, and interpreting ancient Greek texts.
Requisites: GREEK 401 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze ancient classical Greek texts
Audience: Both Grad & Undergrad

2. Evaluate ancient classical Greek texts.
Audience: Both Grad & Undergrad

3. Interpret ancient classical Greek texts.
Audience: Both Grad & Undergrad

4. Explain and assess the position of the covered texts in relation to the classical and near eastern tradition.
Audience: Both Grad & Undergrad

5. Demonstrate competence in current scholarly approaches to course readings
Audience: Graduate

GREEK 681 – HONORS THESIS
3 credits.

Individual mentored study for completing theses for Honors in the Major as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No

GREEK 682 – SENIOR HONORS THESIS
3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No

GREEK 691 – SENIOR THESIS
3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Analyze, interpret, and evaluate ancient classical Greek texts.
Audience: Undergraduate

2. Explain and assess the position of the course topic in relation to the classical and near eastern tradition.
Audience: Undergraduate

3. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.
Audience: Undergraduate

GREEK 692 – SENIOR THESIS
3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No

GREEK 699 – DIRECTED STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze ancient classical Greek texts.
Audience: Both Grad & Undergrad

2. Interpret ancient classical Greek texts.
Audience: Both Grad & Undergrad

3. Evaluate ancient classical Greek texts.
Audience: Both Grad & Undergrad

4. Produce an original scholarly project based on ancient Greek, Roman, or Near Eastern society and culture.
Audience: Both Grad & Undergrad

5. Explain and assess the position of the topic in relation to the classical and near eastern tradition.
Audience: Graduate

GREEK 890 – INDIVIDUAL RESEARCH THESIS
1-12 credits.

Individual mentored study for completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

GREEK 910 – SEMINAR-POETRY
3 credits.

Advanced study in Greek poetry, secondary scholarship, and ancient and modern literary interpretation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

GREEK 930 – SEMINAR-HISTORY
3 credits.

Advanced study in Greek historiography, secondary scholarship, and ancient and modern literary interpretation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

GREEK 970 – ADVANCED SEMINAR IN GREEK LITERATURE
3 credits.

Advanced study in ancient Greek language, secondary scholarship, and ancient modern literary interpretation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Analyze ancient classical Greek texts
Audience: Graduate

2. Evaluate ancient classical Greek texts
Audience: Graduate

3. Interpret ancient classical Greek texts
Audience: Graduate

4. Explain and assess the position of the covered texts in relation to the classical and near eastern tradition
Audience: Graduate

5. Demonstrate competence in current scholarly approaches to course readings
Audience: Graduate

HEBREW-BIBLICAL (HEBR-BIB)

HEBR-BIB 103 – ELEMENTARY BIBLICAL HEBREW, I
4 credits.

Introduction to the language of the Hebrew Bible (Biblical Hebrew). Serves as basis for later forms of Classical Hebrew.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Recognize, identify, and explain basic forms of the classical Hebrew Bible language.
Audience: Undergraduate

2. Recognize, identify, and explain basic syntax of the classical Hebrew Bible language.
Audience: Undergraduate

3. Recognize, identify, and explain basic vocabulary of the classical Hebrew Bible language.
Audience: Undergraduate

HEBR-BIB 104 – ELEMENTARY BIBLICAL HEBREW, II
4 credits.

Introduction to the language of the Hebrew Bible (Biblical Hebrew). Serves as basis for later forms of Classical Hebrew.
Requisites: HEBR-BIB 103
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Recognize, identify and explain all forms of the classical Hebrew Bible language.
Audience: Undergraduate

2. Recognize, identify, and explain all syntax of the classical Hebrew Bible language.
Audience: Undergraduate

3. Recognize, identify, and explain all vocabulary of the classical Hebrew Bible language.
Audience: Undergraduate

HEBR-BIB 303 – ELEMENTARY BIBLICAL HEBREW, I
3 credits.

Forms and syntax, reading of Classical Hebrew prose in preparation for research.
Requisites: Graduate/professional standing
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Recognize, identify, and explain basic forms of the classical Hebrew Bible language.
Audience: Undergraduate

2. Recognize, identify, and explain basic syntax of the classical Hebrew Bible language.
Audience: Undergraduate

3. Recognize, identify, and explain basic vocabulary of the classical Hebrew Bible language.
Audience: Undergraduate

HEBR-BIB 304 – ELEMENTARY BIBLICAL HEBREW, II
3 credits.

Forms and syntax, reading of Classical Hebrew prose in preparation for research.
Requisites: HEBR-BIB 303
Course Designation: Core GenEd - Humanities & Arts
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Recognize, identify and explain all forms of the classical Hebrew Bible language.
Audience: Undergraduate

2. Recognize, identify, and explain all syntax of the classical Hebrew Bible language.
Audience: Undergraduate

3. Recognize, identify, and explain all vocabulary of the classical Hebrew Bible language.
Audience: Undergraduate

HEBR-BIB 323 – INTERMEDIATE BIBLICAL HEBREW, I
4 credits.

Review of grammar, introduction to reading narrative texts in Biblical Hebrew.
Requisites: HEBR-BIB 104, 304, or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Hebrew Bible texts.
Audience: Undergraduate

2. Demonstrate accuracy in translation of classical Hebrew Bible texts.
Audience: Undergraduate

3. Demonstrate basic competency in reading continuous classical Hebrew Bible texts.
Audience: Undergraduate

HEBR-BIB 324 – INTERMEDIATE BIBLICAL HEBREW, II
4 credits.

Review of grammar, introduction to reading narrative texts in Biblical Hebrew.
Requisites: HEBR-BIB 323 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Apply knowledge of forms, syntax, and vocabulary to the reading of classical Hebrew Bible texts.
Audience: Undergraduate

2. Demonstrate accuracy and nuance in translation of classical Hebrew Bible texts.
Audience: Undergraduate

3. Demonstrate competency in reading continuous classical Hebrew Bible texts.
Audience: Undergraduate

HEBR-BIB 391 – INTENSIVE ELEMENTARY BIBLICAL HEBREW
4 credits.

An intensive introduction to the grammar and vocabulary of Classical (Biblical) Hebrew, the language of the Hebrew Bible and Ancient Israel, equivalent to HEBR-BIB 103 and 104. Gain skills in preparation for reading the Hebrew Bible in the original language. Focus on translation of Hebrew text (written grammar and lexicon). Includes aspects of ancient Israelite culture, history, and literature.
Requisites: Not open to students with credit for HEBR-BIB 103 or 104.
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Honors - Accelerated Honors (!)
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Recognize, identify and explain all forms of the classical Hebrew Bible language.
Audience: Undergraduate

2. Recognize, identify, and explain all syntax of the classical Hebrew Bible language.
Audience: Undergraduate

3. Recognize, identify, and explain all vocabulary of the classical Hebrew Bible language.
Audience: Undergraduate

4. Gain competence in translating simple passages of Classical Hebrew into English and vice versa.
Audience: Undergraduate

5. Learn about ancient Israelite culture, history, and literature.
Audience: Undergraduate

6. Building necessary skills for reading biblical texts in the original Hebrew.

Audience: Undergraduate

HEBR-BIB/JEWISH 513 – BIBLICAL TEXTS, POETRY
3 credits.

Critical reading of selected texts from the Minor Prophets and the Writings.
Requisites: HEBR-BIB 324
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2021
Learning Outcomes: 1. Analyze classical Hebrew Bible texts.
Audience: Undergraduate

2. Interpret classical Hebrew Bible texts.
Audience: Undergraduate

3. Evaluate classical Hebrew Bible texts.
Audience: Undergraduate

HEBR-BIB/JEWISH 514 – BIBLICAL TEXTS, POETRY
3 credits.

Critical reading of selected texts from the Latter Prophets and the Writings.
Requisites: HEBR-BIB/JEWISH 513
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022
Learning Outcomes: 1. Analyze classical Hebrew Bible texts.
Audience: Undergraduate

2. Interpret classical Hebrew Bible texts.
Audience: Undergraduate

3. Evaluate classical Hebrew Bible texts.
Audience: Undergraduate

HEBR-BIB 700 – ADVANCED NEAR EASTERN LANGUAGES
3 credits.

Provides graduate-level instruction in languages required for research in the literature, history, and culture of the Ancient Near East. Languages typically offered include Akkadian, Phoenician, Sumerian, Hittite, and Egyptian.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HEBR-BIB 705 – SYRIAC I
3 credits.

Syriac grammar and reading.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019

HEBR-BIB 799 – INDEPENDENT STUDY
1-3 credits.

Independent study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

HEBR-BIB 990 – RESEARCH AND THESIS
2-9 credits.

Individual study for research and completing theses, as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

HEBREW-MODERN (HEBR-MOD)

HEBR-MOD 101 – FIRST SEMESTER HEBREW
4 credits.

Basic communication skills; speaking, reading, writing modern Hebrew; elements of grammar and syntax.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

HEBR-MOD 102 – SECOND SEMESTER HEBREW
4 credits.

Basic communication skills; speaking, reading, writing modern Hebrew; elements of grammar and syntax.
Requisites: HEBR-MOD 101 or placement into HEBR-MOD 102
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 2nd semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

HEBR-MOD 201 – THIRD SEMESTER HEBREW
4 credits.

Readings from modern Hebrew texts, intermediate grammar and syntax, development of oral proficiency, emphasis on class discussions.
Requisites: HEBR-MOD 102 or placement into HEBR-MOD 201
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 3rd semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

HEBR-MOD 202 – FOURTH SEMESTER HEBREW
4 credits.

Readings from modern Hebrew texts, intermediate grammar and syntax, development of oral proficiency, emphasis on class discussions.
Requisites: HEBR-MOD 201 or placement into HEBR-MOD 202
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 4th semester language
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

HEBR-MOD/JEWISH 301 – INTRODUCTION TO HEBREW LITERATURE
3 credits.

Selected works from different periods and genres. Taught in Hebrew.
Requisites: HEBR-MOD 202 or placement into HEBR-MOD/JEWISH 301
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

HEBR-MOD/JEWISH 302 – INTRODUCTION TO HEBREW LITERATURE
3 credits.

Selected works from different periods and genres. Taught in Hebrew.
Requisites: HEBR-MOD/JEWISH 301 or placement into HEBR-MOD/JEWISH 302
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

HEBR-MOD 310 – FIRST SEMESTER INTENSIVE MODERN HEBREW
4 credits.

Intensive study of the fundamental structure of Hebrew language, using the four language skills (listening, speaking, reading, and writing) to improve Hebrew proficiency. Grammar, pronunciation and vocabulary are incorporated into the daily activities, with an emphasis on speaking and using the language for communication. The Hebrew alphabet is also introduced.
Requisites: Declared in the Middle Eastern and Mediterranean Language Institute (MEDLI)
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Summer 2023
Learning Outcomes: 1. Achieve beginner level linguistic proficiency in the four language skills of reading, writing, speaking, and listening
Audience: Undergraduate

2. Use basic language skills for a variety of specific functions and contexts.
Audience: Undergraduate

3. Develop and refine their language study skills.
Audience: Undergraduate

4. Begin to develop their understanding of Israeli culture.
Audience: Undergraduate

HEBR-MOD 311 – SECOND SEMESTER INTENSIVE MODERN HEBREW
4 credits.

Intensive study of the fundamental structure of Hebrew language, using the four language skills (listening, speaking, reading, and writing) to improve Hebrew proficiency. Grammar, pronunciation and vocabulary are incorporated into the daily activities, with an emphasis on speaking and using the language for communication. The Hebrew alphabet is also introduced.
Requisites: Declared in the Middle Eastern and Mediterranean Language Institute (MEDLI)
Course Designation: Core GenEd - Humanities & Arts
Frgn Lang - 1st semester language
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, for 2 number of completions
Last Taught: Summer 2023
Learning Outcomes: 1. Achieve beginner level linguistic proficiency in the four language skills of reading, writing, speaking, and listening
Audience: Undergraduate

2. Use basic language skills for a variety of specific functions and contexts.
Audience: Undergraduate

3. Develop and refine their language study skills.
Audience: Undergraduate

4. Begin to develop their understanding of Israeli culture.
Audience: Undergraduate

HEBR-MOD/JEWISH 401 – TOPICS IN MODERN HEBREW / ISRAELI LITERATURE AND CULTURE I
3 credits.

Readings in Hebrew literature. Taught in Hebrew.
Requisites: HEBR-MOD/JEWISH 302 or placement into HEBR-MOD/JEWISH 401
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

HEBR-MOD/JEWISH 402 – TOPICS IN MODERN HEBREW / ISRAELI LITERATURE AND CULTURE II
3 credits.

Readings in Hebrew literature. Taught in Hebrew.
Requisites: HEBR-MOD/JEWISH 401 or placement into HEBR-MOD/JEWISH 402
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Frgn Lang - 5th + semester language
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HISTORY (HISTORY)

HISTORY 100 – HISTORICAL STUDIES: INTRODUCTORY
3 credits.

Introduction to elementary-level historical studies at the research university. Emphasis on interpretation and critical thinking. Topics vary.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Understand that History is an interpretive account of the human past, one that historians create in the present from surviving evidence.
Audience: Undergraduate

2. Think self-consciously about the various methodologies that historians employ.
Audience: Undergraduate

3. Ask questions of primary sources of various types, including, if appropriate, non-textual sources, and use those sources to craft interpretations of the past in written and oral form.
Audience: Undergraduate

4. Reflect upon how the class materials allow them to better understand themselves, their own societies, and the larger global community, by engaging with multiple and diverse perspectives.
Audience: Undergraduate

HISTORY 101 – AMER HIST TO THE CIVIL WAR ERA, THE ORIGIN & GROWTH OF THE U S
4 credits.

American political, economic, and social development from the founding of the colonies to the Civil War.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe major developments of early American history, specifically: how the early American colonies developed in the context of a rich and interconnected world centered on the Atlantic Ocean; how those colonies created the United States; and how tensions in the nation's early history ultimately led to the Civil War.
Audience: Undergraduate

2. Discuss how historians know what they know about the past and why understandings of the past change over time.
Audience: Undergraduate

3. Do what historians do: ask questions about the past and answer them using primary sources.
Audience: Undergraduate

HISTORY 102 – AMERICAN HISTORY, CIVIL WAR ERA TO THE PRESENT
4 credits.

American political, economic and social development from the Civil War to the present.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify important patterns, processes, events, people, and places in U.S. history since 1865.
Audience: Undergraduate

2. Formulate arguments about change over time.
Audience: Undergraduate

3. Evaluate arguments about history.
Audience: Undergraduate

4. Determine what constitutes reliable and valid evidence.
Audience: Undergraduate

5. Interpret, compare, and contrast primary sources.
Audience: Undergraduate

6. Think critically about how narratives about the past are constructed and told.
Audience: Undergraduate

HISTORY/ASIAN 103 – INTRODUCTION TO EAST ASIAN HISTORY: CHINA
3-4 credits.

Survey of major developments in Chinese history from 1500 B.C. to the founding of the Communist state in 1949. Emphasis on patterns and themes; equal time devoted to the classical and traditional period and the modern era.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and summarize the important features of major periods in the history of China.
Audience: Undergraduate

2. Describe the significance of geography, language, culture, philosophy, and religion on the historical development of Chinese society, government, and culture.
Audience: Undergraduate

3. Interpret Chinese history from different viewpoints and perspectives.
Audience: Undergraduate

HISTORY/ASIAN 104 – INTRODUCTION TO EAST ASIAN HISTORY: JAPAN
3-4 credits.

Survey of major cultural, social, political and economic developments in Japanese history from ancient to recent times.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify cultural, political, and intellectual currents in Japan from ancient times to the present.
Audience: Undergraduate

2. Analyze writings about Japanese history and to construct their own historical arguments.
Audience: Undergraduate

3. Use historical thinking to discuss politics and culture, not only in Japan, but in the world.
Audience: Undergraduate

4. Examine their own opinions about Japan.
Audience: Undergraduate

HISTORY/AFRICAN 106 – INTRODUCTION TO AFRICAN HISTORY
3-4 credits.

Introductory exploration of a thematic or chronological area of African history. Topics vary by instructor.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Evaluate and interpret a wide range of historical evidence in order to makearguments about changes over time in African societies
Audience: Undergraduate

2. Identify multiple methodologies that historians use to study the African past
Audience: Undergraduate

3. Interpret African history from different viewpoints and perspectives
Audience: Undergraduate

HISTORY/ED POL 107 – THE HISTORY OF THE UNIVERSITY IN THE WEST
3 credits.

Traces the development of higher education and, specifically, the institution known as the "university," in the United States and Europe since the Middle Ages. Concentrates on the intellectual, political, and social history of higher education, focusing particularly on the history of the "university" as an IDEA, an INSTITUTION, and as a community of PEOPLE, including students and faculty.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate your knowledge and explain—in essays, exams, and online and face-to-face discussions—the significance of key actors, events, themes, and ideas relating to the history of American education.
Audience: Undergraduate

2. Interpret and contextualize a range of primary historical sources.
Audience: Undergraduate

3. Identify and evaluate historical arguments in secondary scholarly works.
Audience: Undergraduate

4. Develop and support your own historical interpretations based on primary and secondary sources.
Audience: Undergraduate

5. Engage in open and respectful dialogue while reflecting upon and acknowledging your own biases.
Audience: Undergraduate

6. Connect your academic work to contemporary public debates, to consider diverse perspectives, and to develop, revise, and support your own ideas about the world.
Audience: Undergraduate

HISTORY/ASIAN 108 — INTRODUCTION TO EAST ASIAN HISTORY - KOREA
3-4 credits.

Survey of major cultural, social, political, and intellectual developments in Korea from the 10th century to the 21st century.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe the basic contours of Korean society and culture as they evolved from the dynastic era through the modern era (10th century CE to recent times).
Audience: Undergraduate

2. Discuss the Korean historical experience, from a grassroots perspective with nuance and in an inclusive manner.
Audience: Undergraduate

3. Explain how modern Korea has shaped, and been shaped by, major processes of global history, such as imperialism, war, and decolonization.
Audience: Undergraduate

4. Contextualize, identify, and interpret historically significant information in primary sources.
Audience: Undergraduate

HISTORY 109 — INTRODUCTION TO U.S. HISTORY
3-4 credits.

Exploration of a thematic or chronological area of United States history from a variety of critical historical perspectives. Topics vary by instructor.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze critically a range of primary and secondary sources related to U.S. history.
Audience: Undergraduate

2. Build evidence-based historical arguments and effectively communicate their ideas.
Audience: Undergraduate

HISTORY/CLASSICS 110 — THE ANCIENT MEDITERRANEAN
4 credits.

An examination of the evolution of the human community in the Mediterranean Basin, from the beginning of the earliest civilizations in the Near East (3,000 B.C.E.) until the collapse of the Roman Empire in the West (500 C.E.).
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.
Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.
Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.
Audience: Undergraduate

4. Demonstrate a holistic view of the Ancient Mediterranean society and culture.
Audience: Undergraduate

HISTORY 115 — MEDIEVAL EUROPE 410-1500
4 credits.

From the later Roman Empire to the end of the Middle Ages.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the main developments of the medieval period, from the end of the Roman Empire to the beginning of the Renaissance.
Audience: Undergraduate

2. Analyze critically a wide variety of primary sources from the medieval period, both orally and in writing.
Audience: Undergraduate

HISTORY 119 – EUROPE AND THE WORLD, 1400-1815
4 credits.

Introduces Europe when it entered the global stage economically, politically, socially, and culturally. How Europeans took to the seas and developed new forms of empire. How did this wave of contact, encounter, and conquest affect Europeans, indigenous peoples of the Americas, and Africans? Examine the early global economy and the development of plantation slavery. How did Europeans develop new ways to make sense of their world, its size, its peoples, its flora and fauna? Explore new forms of Christianity, the Jewish diaspora, and the globalization of Christianity. As thinkers debated how rulers should wield political power, monarchs strove to expand their authority and territory, and ordinary people demanded a greater share of political power, provoking revolutions across the Atlantic world. Encounter the lives of women and men from many backgrounds, from peasants to queens, and all kinds of people on the move.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Differentiate between primary and secondary sources
Audience: Undergraduate

2. Explain how historical knowledge is created through the examination of primary sources and the analysis of those materials in secondary sources
Audience: Undergraduate

3. Analyze primary sources by placing them in their historical contexts
Audience: Undergraduate

4. Pose a historical question
Audience: Undergraduate

5. Make a historical argument
Audience: Undergraduate

6. Analyze visual sources
Audience: Undergraduate

HISTORY 120 – EUROPE AND THE MODERN WORLD 1815 TO THE PRESENT
4 credits.

Political, economic, social, and cultural history of modern Western civilization.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe major developments in the political and cultural history of Europe since 1815.
Audience: Undergraduate

2. Discuss how historical thinking includes interpretation and analysis, not simply names, dates, and facts.
Audience: Undergraduate

3. Assess the significance of war and revolution, nationalism and the nation-state, and colonialism and imperialism as forces of change in modern European history.
Audience: Undergraduate

4. Defend a historical argument based on primary sources in clear and compelling prose.
Audience: Undergraduate

HISTORY 124 — BRITAIN SINCE 1688
3-4 credits.

Introduction to the major themes in the history of imperial Britain and the modern world. Themes include (but are not limited to) the changing patterns of life during those centuries, the development of modern identities and notions of the self, the emergence of a modern, commercial civil society, the rise of industrial capitalism, liberalism, the modern state, and imperial and total war.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and explain the major trajectories in British history since the 17th century.
Audience: Undergraduate

2. Explain the various interpretive frameworks that historians have used to analyze or explain cultural, political, and economic transformations in imperial Britain in the past 300 years.
Audience: Undergraduate

3. Analyze primary sources, both written and visual, in British history and evaluate or critique the ways in which it has been interpreted by others.
Audience: Undergraduate

4. Produce original historical arguments, in both written and oral communication, and properly mobilize evidence, from both primary and secondary sources, to support those arguments.
Audience: Undergraduate

5. Apply a critical and historical point of view to the contemporary world.
Audience: Undergraduate

HISTORY/ENVIR ST/HIST SCI 125 — GREEN SCREEN: ENVIRONMENTAL PERSPECTIVES THROUGH FILM
3 credits.

From Teddy Roosevelt's 1909 African safari to the Hollywood blockbuster King Kong, from the world of Walt Disney to The March of the Penguins, cinema has been a powerful force in shaping public and scientific understanding of nature throughout the twentieth and twenty-first century. How can film shed light on changing environmental ideas and beliefs in American thought, politics, and culture? And how can we come to see and appreciate contested issues of race, class, and gender in nature on screen? Explore such questions and come to understand the role of film in helping to define the contours of past, present, and future environmental visions in the United States, and their impact on the real world struggles of people and wildlife throughout the world.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Interpret film as a historical document and place it in a particular historical context.
Audience: Undergraduate

2. Describe the changing historical contours of environmentalism and how the past continues to shape diverse perspectives relating to the meaning and representation of "the environment," particularly with respect to issues of class, gender, and race.
Audience: Undergraduate

3. Identify major environmental issues and controversies of the past, present, and future in the United States and around the world.
Audience: Undergraduate

HISTORY/AFRICAN 129 — AFRICA ON THE GLOBAL STAGE
3-4 credits.

Explores the interplay between Africa and the World from the 19th century to the present, covering subjects such as the slave- trade, repatriation, Africanizing of culture in the Americas and Europe, the spread and revival of world religions, colonialism, global capitalism, the rise of global popular culture such as pop music and video films, environmental concerns and global epidemics.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

HISTORY 130 — AN INTRODUCTION TO WORLD HISTORY
3-4 credits.

Introduction to major themes in world history. Such themes might include: empire and imperialism, environmental impacts, global trade and globalization, war, migration, gender, race, religion, nationalism, class, and the like.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and engage with arguments about world history, including the histories of Non-Western civilizations and cultures.
Audience: Undergraduate

2. Evaluate the evidentiary and theoretical bases of various historical conversations about the making of the modern world.
Audience: Undergraduate

3. Present original conclusions about world history through clearly written, persuasive arguments and narratives.
Audience: Undergraduate

HISTORY/HIST SCI/MED HIST 132 — BEES, TREES, GERMS, AND GENES: A HISTORY OF BIOLOGY
3 credits.

How did today's biology emerge out of the diverse traditions of agriculture and natural history (bees and trees), biomedicine and molecular biology (germs and genes), which stretch back into the eighteenth century? Examines classic texts and "game-changers" in the history of biology, putting them into broader scientific and social contexts to see how these different ways of knowing intertwined, competed, and yielded novel approaches to the study of life that still shape today's life sciences.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify key ideas, people, places, and events in the history of biology.
Audience: Undergraduate

2. Connect a passage of professional or popular scientific writing in biology to larger historical themes and trends.
Audience: Undergraduate

3. Analyze similarities and differences in scientific expression across different people, genres, and time periods.
Audience: Undergraduate

4. Explain how past ideas about classification and evolution; organismal organization; disease causation and medical intervention; and mastery of genetic machinery have shaped present-day assumptions and attitudes about biology and human nature.
Audience: Undergraduate

HISTORY 133 – GLOBAL MILITARY HISTORY (5000 BCE - PRESENT)
3-4 credits.

Introductory examination of the role of war and peace in human history from the earliest forms of organized violence to the 21st century "War on Terror." Rather than center on tactics, key battles, or even particular critical conflicts, instead focuses on how different military cultures and technologies emerged over time across the globe. Explores how organized violence shaped not just the lives of soldiers, but all members of society by examining key pieces of popular culture including poetry, propaganda, music, movies, and social media. Takes a deliberately global approach by examining the connections and commonalities of war across different world regions.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Explain the Impact of Military Technologies: identify major military-technological changes and their impact on societies more generally.
Audience: Undergraduate

2. Recognize Military Cultures: acknowledge the many ways in which war shaped culture outside of the battlefield in the arts, music, and literature.
Audience: Undergraduate

3. Demonstrate Critical Writing Skills: communicate complex ideas through written evaluations. Specifically, emphasis is placed on improving analytical/argumentative writing skills through a number of written assignments.
Audience: Undergraduate

4. Show Critical Reading and Communication: demonstrate critical thinking and reading through the analysis of historical primary and secondary sources, discussion, and independent research.
Audience: Undergraduate

HISTORY/GEN&WS 134 – WOMEN AND GENDER IN WORLD HISTORY
3-4 credits.

A global (comparative and transnational) survey of women and gender from the ancient world to the modern period. Introduces students to key issues in the history of women and gender, including the historical construction of identities, roles, symbols, and power relationships.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Articulate how women experienced and shaped world historical events.
Audience: Undergraduate

2. Explain the historical emergence of diverse gender roles, power relationships, and social movements.
Audience: Undergraduate

3. Interpret key primary sources in the history of women and gender.
Audience: Undergraduate

4. Evaluate secondary accounts of the history of women and gender.
Audience: Undergraduate

5. Engage in evidence-based debates concerning global histories of women and gender.
Audience: Undergraduate

HISTORY 136 – SPORT, RECREATION, & SOCIETY IN THE UNITED STATES
3-4 credits.

As much as we may try to convince ourselves that sport offers an escape from the "real world," constant news of players' strikes, stadium financing controversies, and the lack of diversity in league management remind us that we cannot separate the games we play and watch from the political, social, and cultural contexts in which they are embedded. Explore how sport has shaped and been shaped by major trends in American social, political, and economic history. The focus is not on player stats or the morning edition of SportsCenter, rather with serious historical arguments and debates about sport's relationship to American capitalism, social movements, and urban development. Readings also provide a diverse set of perspectives on the politics of race, gender, and class in American sport in the twentieth century.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify how American sports have both shaped and been shaped by broader social, cultural, and political trends.
Audience: Undergraduate

2. Explain how and why major social, economic, racial, and political changes have occurred in sports in the past 150 years.
Audience: Undergraduate

3. Analyze primary sources related to American sports.
Audience: Undergraduate

4. Develop an original argument (thesis) based on the analysis of primary sources.
Audience: Undergraduate

HISTORY 137 – THE HISTORY OF WAR IN FILM
3 credits.

Is there such a thing as a genuinely anti-war movie? The acclaimed, late French filmmaker Francois Truffaut thought not, as even the most brutal and honest depictions of war in film cannot help but valorize sacrifice and arouse something primordial in certain members of the audience. Nevertheless, some of the greatest films of all time are regarded as "anti-war classics" and not a few might be labeled "pro-war." Critically examine more than fifteen full movies (and parts of many more) from across this spectrum and from around the world. In addition to testing the "Truffaut Rule," evaluate the movies as both fictionalized secondary sources (conveying knowledge and influencing memory) and as primary sources that shed light on the moment and place in which they were created.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Critically examine war movies as media for communicating the experience of combat in different historical eras
Audience: Undergraduate

2. Grasp the unique power of motion pictures to convey “truth” and attitudes about war as understood in context (i.e. place, time, subject, and intermediate interpretation)
Audience: Undergraduate

3. Evaluate the ways in which war and movies about it have essentialized gender roles and promoted competing ideals of virtue, martial and otherwise
Audience: Undergraduate

4. Consider war movies as instruments of propaganda and evaluate the relationship between their effectiveness and their accuracy
Audience: Undergraduate

5. Apply the methods of historical research and writing
Audience: Undergraduate

HISTORY 139 – INTRODUCTION TO THE MODERN MIDDLE EAST
3-4 credits.

Traces the formation of the states and societies that compose the contemporary Middle East. How have global phenomena, including two world wars, the Cold War, women's movements, and modern science, technology, and fossil fuels, affected the politics, culture, and daily lives of Middle Eastern people? What is Islamism, and how should we explain its influence? Why has the United States had such a troubled relationship with this part of the world? Balances a generally thematic approach with several weeks of country-specific studies, including Iran, Saudi Arabia, Egypt, Syria, and Israel and the Palestinian territories.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the origins of the Middle East nation-states
Audience: Undergraduate

2. Compare the larger Middle East nation-states in terms of politics, economy, and society
Audience: Undergraduate

3. Analyze trends in the development of U.S. relations with the Middle East
Audience: Undergraduate

4. Explain the modern Middle East in terms of global processes of change
Audience: Undergraduate

5. Use primary sources to support all of the above
Audience: Undergraduate

HISTORY 142 – HISTORY OF SOUTH ASIA TO THE PRESENT
3-4 credits.

Survey of the development of societies within the Indian subcontinent. Equal segments for the ancient, medieval and modern periods.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and describe the contours and stakes of conversations among historians about South Asia.
Audience: Undergraduate

2. Apply historical methods to evaluate critically the record of the past and how historians of South Asia and British imperialism have interpreted it.
Audience: Undergraduate

3. Conduct historical research, including (as appropriate) the effective use of libraries, archives, and digital databases.
Audience: Undergraduate

4. Organize and express their thoughts clearly and coherently both in writing and orally and thereby offer their own analytical critique of major historical events and their legacies in South Asia.
Audience: Undergraduate

5. Conceptualize and execute a significant piece of historical research.
Audience: Undergraduate

HISTORY/ED POL 143 – HISTORY OF RACE AND INEQUALITY IN URBAN AMERICA
3 credits.

Examine the historical relationships between metropolitan change, economic transformation, and the construction of race and how those processes have shaped mass incarceration, educational, housing, and income inequality, and the experiences of racial/ethnic minorities who have been marginalized or discriminated against. Key questions include: What is the historical nature of inequality and opportunity in metropolitan America? What policies and ideas have historically promoted inequality, and how have those policies and ideas shifted over time? How have marginalized people responded to inequality, and what impacts have various modes of resistance had? Lastly, what is "race," how has its meaning changed over time, and how has it historically shaped inequality and opportunity?
Requisites: None
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate their awareness of History's Impact on the Present
Audience: Undergraduate

2. Recognize and Question Assumptions
Audience: Undergraduate

3. Demonstrate their consciousness of Self and Others
Audience: Undergraduate

4. Demonstrate their capacity for Effective Participation in a Multicultural Society
Audience: Undergraduate

5. Identify and discuss the significance of key actors, events, themes, and ideas relating to the history of race and inequality in the metropolitan United States
Audience: Undergraduate

6. Identify and evaluate historical arguments in secondary scholarly works
Audience: Undergraduate

7. Interpret, analyze, and contextualize primary historical sources
Audience: Undergraduate

8. Use library resources in order to locate relevant primary and secondary source materials
Audience: Undergraduate

9. Synthesize information from primary and secondary sources in order to develop and support their own evidence-based historical interpretations
Audience: Undergraduate

HISTORY 145 – AMERICA AND CHINA, 1776-TODAY
3-4 credits.

Analyzes the relationship between China and the United States since the birth of the U.S. in 1776, and tracks how the relationship has changed over time. Seeks to offer a broader perspective on the US-China relationship that includes not only diplomacy and war, but also culture, economics, and domestic politics. Contextualize the steady drumbeat of news stories about America and China, and make educated, historically rooted arguments about China, the US, and their complex relationship.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Identify and summarize the larger historical events that have shaped Chinese history since the 18th century as well as those which have shaped China's relationship to the U.S.
Audience: Undergraduate

2. Identify and summarize the major sources of US-China tension in the 1776 to 1899 period, and also for the period from 1899 to the Present.
Audience: Undergraduate

3. Identify the major American and Chinese cultural and political figures who have shaped the American and Chinese relationship.
Audience: Undergraduate

4. Identify and summarize potential future sources of tension or cooperation between the United States and China and how they are connected to historical events.
Audience: Undergraduate

5. Demonstrate knowledge of major movements, trends, or events in the development of world cultures.
Audience: Undergraduate

6. Recognize history as an interpretive account of the human past – one that historians create in the present from surviving evidence.
Audience: Undergraduate

7. Demonstrate how the use of different approaches, methodologies, analytical concepts, or sources can yield differing insights into a historical problem.
Audience: Undergraduate

8. Think critically about and appreciate the complexities of their own societies, cultures, and larger global communities.
Audience: Undergraduate

HISTORY/INTL ST 146 – A GLOBAL HISTORY OF NOW
3-4 credits.

An introduction to key historical events, movements, and systems that have shaped our present moment. Examines the relationship between empire-building and anti-colonial movements from the late 18th century to the current day. Focuses on the political, economic, and social/cultural dimensions of major global history themes, such as colonialism, capitalism, and revolution.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop a historical understanding of imperialism and decolonization since 1800
Audience: Undergraduate

2. Formulate arguments about change over time, and think critically about how narratives about the past are constructed
Audience: Undergraduate

3. Refine the ability to recognize and question assumptions
Audience: Undergraduate

4. Determine what constitutes reliable and valid evidence
Audience: Undergraduate

5. Interpret, compare, and contrast primary sources
Audience: Undergraduate

6. Improve writing and public speaking skills
Audience: Undergraduate

7. Acquire awareness of history's impact on the present
Audience: Undergraduate

HISTORY/CHICLA 151 – THE NORTH AMERICAN WEST TO 1850
3-4 credits.

Explores the history of places that have been called the American West before 1850. We start with Indigenous occupation; continue with European invasion and the creation of two new nations, Mexico and the U.S.; and end with U.S. conquest. We watch Indian lands becoming the object of Spanish, French, and English empires, and then see European incursions giving way to the hopes of new nation-states and newly empowered Indian peoples like Lakotas and Comanches. After studying the trails and trades that brought newcomers west, we reach key converging events: U.S. seizure of the Mexican North, resolution of the Oregon boundary dispute, discovery of western gold, West Coast arrival of Chinese immigrants, and Mormon exodus to the Great Basin. We use economic, environmental, political, cultural, and social analyses, and we attend to the dreams of many westerners: of North American, Latin American, European, African, and Asian origin or descent, and of all genders and class statuses.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify the various peoples who occupied the North American West before the 16th century, how they lived in their respective environments and vis-à-vis one another, and how scholars and Native communities themselves have made sense of that occupation
Audience: Undergraduate

2. Identify and analyze the relationships among the political, social, cultural, economic, and environmental factors that brought Europeans and enslaved Africans to places that came to be called the West from the 16th through the 18th centuries
Audience: Undergraduate

3. Identify and analyze the political, social, cultural, economic, and environmental factors that gave rise to two new occupying nations in places that came to be called the West in the late 18th and early 19th centuries, as well as increasingly powerful Indigenous peoples
Audience: Undergraduate

4. Identify and analyze the political, social, cultural, economic, and environmental factors that paved the way for U.S. conquest of various parts of the North American West by the middle of the 19th century
Audience: Undergraduate

5. Identify and analyze the political, social, cultural, economic, and environmental factors that brought increasing numbers of Americans, Europeans, and Asians to the West by the middle of the 19th century
Audience: Undergraduate

6. Explain the how the history of places that came to be called the West demonstrates the workings of imperialism and colonialism
Audience: Undergraduate

7. Identify and analyze the ways in which westerners of various genders navigated their lives; the forces that created hierarchies among and within human communities; and the means by which various westerners either maintained or challenged those hierarchies
Audience: Undergraduate

8. Explain the significance of the West for the development of the U.S. nation-state and for the fate of those who lived in the West before the U.S. claimed it

HISTORY/CHICLA 152 – THE UNITED STATES WEST SINCE 1850
3-4 credits.

Introduction to histories of places that have been called the American West, focusing on the period since 1850. Beginning in the mid nineteenth century, the United States sought to establish power over vast western regions that it claimed on maps but did not in fact control. Moving through the twentieth century to the present day, considers how attention to the American West allows us to reimagine US history more broadly - and how the United States represents just one facet the region's pasts. Learn to think like a historian by analyzing primary sources, evaluating competing narratives, and formulating arguments about the past. Investigate how people, ideas, and infrastructures have transformed a region repeatedly redrawn and consider the ongoing legacies of the past - and the stories we tell about it - in the American West today.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Challenge common myths that distort our understanding of the modern U.S. West
Audience: Undergraduate

2. Understand how historians make history and why our understandings of the past change over time
Audience: Undergraduate

3. Use primary sources to ask and answer questions about the modern North American West
Audience: Undergraduate

4. Evaluate arguments about history and weigh in on existing historical debates
Audience: Undergraduate

5. Identify how the past has affected present day circumstances regarding race and racial inequalities in the U.S.
Audience: Undergraduate

HISTORY/CHICLA 153 – LATINA/LATINO/LATINX HISTORY
3-4 credits.

Examines the historical, social, and legal experiences of Latinas/Latinos/Latinxs in the US since the mid-1800s with emphasis on Mexican migrations. Latinxs became an important part of the US population through western expansion, conquest, and immigration. We will learn about the 3 main Latinx groups in the US: Mexicans, Puerto Ricans, and Cubans, but will also learn about other Latinx communities. We begin with an examination of conquest by studying the Treaty of Guadalupe Hidalgo that annexed roughly half of former Mexican territory and the Spanish-American War that resulted in the possession of Puerto Rico. Then, we examine the history of Latinx immigration to understand the experiences of Mexicans, Central Americans, South Americans, and people from the Caribbean who have immigrated to the US in search of economic opportunities and political asylum. This course serves as an introduction to the varied experiences of Latinxs in the US in order to understand their unique histories.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Develop a critical understanding of the diverse experiences of Latinas/Latinos/Latinxs in the U.S. by conducting a close examination of assigned readings through assignments, lectures, presentations, and in-class discussions.
Audience: Undergraduate

2. Build a critical lens of race, ethnicity, gender, sexuality, and class by engaging in analytical essay writing that incorporates the assigned readings and primary research in the archives at the Wisconsin Historical Society.
Audience: Undergraduate

3. Develop sociological tools and perspectives to discuss the experiences of Latinas/Latinos/Latinxs in the U.S. through in-class oral presentations based on the research conducted for the final paper.
Audience: Undergraduate

4. Critically engage in public debates about policies pertaining to Latinas/Latinos/Latinxs in the U.S. and be able to make informed decisions by learning about historical social and legal issues surrounding Latina/Latino/Latinx communities that continue to impact Latinxs today. This, through the assigned readings, original research, and data presented in lectures.
Audience: Undergraduate

HISTORY 154 – WHO IS AN AMERICAN?
3-4 credits.

Organized around the title question: Who is an American? Explores how answers to that question have changed over time, focusing on people whose actions and ideas shaped those answers. Rather than an overview of U.S. history, focuses on a variety of topics related to our central theme, moving roughly chronologically from the Revolutionary era to the present. Covers the history of racial ideologies and racial inequities, arguments over citizenship and "American" identity, and the ways that various groups have been included or excluded from the nation.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Articulate how the history of racial ideologies, racial inequities, and racial formations in the United States has evolved in relation to histories of enslavement, conquest and territorial expansion, and immigration.
Audience: Undergraduate

2. Recognize arguments about citizenship and "American" identity as historical, contested, and evolving.
Audience: Undergraduate

3. Understand the ways various groups of Americans have been included in or excluded from the nation, and how groups have mobilized to resist exclusion.
Audience: Undergraduate

4. Investigate the rise, fall, and interaction of civic and ethnic nationalisms in U.S. history.
Audience: Undergraduate

HISTORY 155 – THE LONG BLACK FREEDOM STRUGGLE FROM THE CIVIL WAR TO THE PRESENT
3-4 credits.

Explores the generations-long effort by African Americans and allied forces to achieve full citizenship in the U.S. and equitable footholds in American society. Forged in a history of enslavement and in many ways ongoing, this freedom struggle encompasses the history of abolitionism to the struggle for civil rights to the fight for Black Power to the effort to make Black Lives Matter. Introduces the history of African American people in the U.S. from the end of the era of slavery to the present day; explores how that history has been shaped directly by the actions and activism of Black people and their allies; considers how that history intersects with, shapes, and is shaped by other historical moments and movements; provides opportunities to think more actively about issues of belonging, citizenship, difference, and interpersonal and structural power; develops skills in historical analysis and argumentation.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify important events, movements, and people, in African-American history since 1865
Audience: Undergraduate

2. Evaluate and formulate arguments about how racial dynamics in the United States and strategies for achieving racial equality have changed over time
Audience: Undergraduate

3. Determine what constitutes reliable and valid evidence when it comes to the history of inequality and social movements in African American history
Audience: Undergraduate

4. Interpret, compare, and contrast primary sources
Audience: Undergraduate

5. Think critically about how the narratives about the past are constructed and told
Audience: Undergraduate

6. Explain how racial conflict, inequality, and movements against the same in the past have shaped American society in the present
Audience: Undergraduate

7. Discuss their social position relative to history, as well as how other people's pasts and experiences perhaps don't align with their own
Audience: Undergraduate

8. Identify ways to operate in a pluralistic, multicultural society – one in which their own experiences are not the assumed default
Audience: Undergraduate

HISTORY/JEWISH 156 – THE AMERICAN JEWISH EXPERIENCE: FROM SHTETL TO SUBURB
3-4 credits.

A century and a half ago, the United States was a backwater of the Jewish world, then centered in Europe with significant Jewish communities in the Ottoman Empire and elsewhere. Yet, by the 1950s, the United States became home to the largest Jewish community at that time. Why did millions of Jews come to the United States? How has life in a liberal political and capitalist economic order shaped the Jewish experience in the United States? In turn, how have Jews influenced American culture, politics, and society? Surveys the history of American Jews from the 17th century to the 21st century. Using Jews as the primary, though not only, case, examines themes in the history of immigration, ethnicity, and religion. Topics include patterns of political activity, social mobility, processes of integration and exclusion, Jewish culture, religion, and problems in community building. Not open to students with credit for JEWISH 219 prior to Fall 2026.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss major trends in Jewish culture, religion, politics.
Audience: Undergraduate

2. Explain how Jews have defined themselves as a community.
Audience: Undergraduate

3. Describe patterns of Jewish exclusion from and inclusion in American institutions as well as the impact of this history on the present.
Audience: Undergraduate

4. Recognize and question assumptions as they relate to ethnicity in the United States.
Audience: Undergraduate

5. Examine and interpret historical documents.
Audience: Undergraduate

HISTORY/ASIAN AM 160 – ASIAN AMERICAN HISTORY: MOVEMENT AND DISLOCATION
3-4 credits.

Examines the impact of colonialism, war, and capitalism on the movement of Asians to the U.S. Considers how racial, gendered, class, sexual, and national formations within the U.S. structured Asian immigration to North America.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe how the past has affected present day circumstances regarding race and immigration policies in the United States.
Audience: Undergraduate

2. Recognize and question cultural assumptions and knowledge claims as they relate to Asians and Asian Americans.
Audience: Undergraduate

3. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others.
Audience: Undergraduate

HISTORY/ASIAN AM 161 – ASIAN AMERICAN HISTORY: SETTLEMENT AND NATIONAL BELONGING
3-4 credits.

Examines the social, cultural, and political citizenship of Asians in the U.S. with particular emphasis on diaspora, transnationality, and place.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe how the past has affected present day circumstances regarding race and citizenship in the United States.
Audience: Undergraduate

2. Recognize and question cultural assumptions and knowledge claims as they relate to Asians and Asian Americans.
Audience: Undergraduate

3. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others.
Audience: Undergraduate

HISTORY 170 – EAST MEETS WEST: MYTH, MEANING, AND MODERNITY
3-4 credits.

The modern history of the concept "East Meets West" (or its variant "East vs. West"), with an emphasis on its changing meanings and uses from the nineteenth to the twenty-first centuries in East Asia (primarily Japan) and the United States. Analyzing works in the arts, literature, philosophy, political economy, and popular culture, trace how and why this intellectual construction became an important influence in modern history.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Recognize generalizations and stereotypes about "the East," "the West," and "East Meets West" and examine their goals and uses
Audience: Undergraduate

2. Think critically about the historical constructions, changes, complexities, and importance of ideas about "the East," "the West," and "East Meets West" within American and East Asian societies
Audience: Undergraduate

3. Demonstrate knowledge of major movements, trends, or events in the history of "East Meets West"
Audience: Undergraduate

4. Examine how the use of different approaches, methodologies, analytical concepts, or sources can yield differing insights into a historical problem.
Audience: Undergraduate

5. Read and evaluate a variety of materials to determine their origins, perspective, usefulness, and reliability
Audience: Undergraduate

6. Use library resources to find primary and secondary sources in order to develop an informed and original perspective on topics discussed in class
Audience: Undergraduate

7. Participate productively and respectfully in discussion and collaborative tasks
Audience: Undergraduate

HISTORY 179 – AFRO-ATLANTIC HISTORIES AND PEOPLES, 1791-PRESENT
3-4 credits.

The African-descended population of the Americas is around 180 million people. Roughly two-thirds of those live outside of the United States, mostly in Brazil and the Caribbean. Provides an overview of the histories, aspirations, and problems that have most impacted peoples of the African diaspora in the years since the Haitian Revolution. As such, the focus will be thematic rather than chronological. The primary emphasis will be on the history of political, social, and intellectual movements. Topics will include slave resistance, black nationalism, socialism, and anti-colonialism. Learn about figures as varied as Toussaint L'Ouverture, Ida B. Wells, Marcus Garvey, WEB DuBois, Carolina Maria de Jesus, Frantz Fanon, Paul Robeson, and many others. Other topics to be covered include: the meaning of "freedom," the construction of black "masculinities," diasporic religious expressions, art and literature, and race and medicine.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Articulate how the past has affected present day circumstances regarding race and racial inequalities in the U.S. and in the African diaspora
Audience: Undergraduate

2. Define important questions related to the history of the modern African diaspora and explain their academic and public implications.
Audience: Undergraduate

3. Evaluate the evidentiary and theoretical bases of various historical conversations in the making of the modern African diaspora.
Audience: Undergraduate

4. Recognize, challenge, and avoid false analogies, overgeneralizations, anachronisms, and other logical fallacies.
Audience: Undergraduate

5. Examine the context in which sources were created, search for topical, chronological, and other relationships among them, and assess the sources in light of that knowledge.
Audience: Undergraduate

6. Drawing upon a diversity of primary- and secondary-sources, synthesize the most pertinent evidence to make persuasive arguments and draw innovative conclusions.
Audience: Undergraduate

7. Apply course concepts to your life outside the classroom, demonstrating self-awareness and empathy for people from a range of backgrounds and political perspectives.
Audience: Undergraduate

HISTORY/AMER IND 190 – INTRODUCTION TO AMERICAN INDIAN HISTORY
3-4 credits.

A broad survey of American Indian history which centers Indigenous peoples, communities, and nations in the context of U.S. policy and culture that emphasizes decolonial methods and Native ways of knowing the past.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe and explain the significance of the historical events, structures, and themes which historians have identified as foundational to the field of American Indian history.
Audience: Undergraduate

2. Deploy interdisciplinary Indigenous studies frameworks, theoretics, and methodologies in the analysis of historical events, structures, and themes to prioritize Indigenous worldviews and perspectives on American Indian history.
Audience: Undergraduate

3. Interpret the continuities and shifts in the lives of various Native peoples, communities, and nations in relation to political, cultural, and material conditions in U.S. history using terminology used within the field of American Indian history to describe processes (such as racialization) and structures (such as settler colonialism).
Audience: Undergraduate

4. Discuss tribal sovereignty and processes of racialization, which impact the historical experiences and contemporary struggles facing Native nations and peoples in the United States.
Audience: Undergraduate

5. Analyze historical sources to curate a collection that draws on both Euro-American and Native ways of knowing the past.
Audience: Undergraduate

HISTORY 194 – US LABOR AND WORKING-CLASS HISTORY
3-4 credits.

An introductory survey of labor and working-class history. Describes processes of class formation and trajectories of labor movements. Interprets the contributions of diverse workers to American economy, culture, and politics. Maintains a central analytic focus on the intersections of race and gender with economic class in US History.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Describe historical processes of class formation and their interaction with the emergence of racial categories.
Audience: Undergraduate

2. Explain the role of race and gender in US-American labor movements from the seventeenth century to the present.
Audience: Undergraduate

3. Interpret primary sources produced by workers of various racial-ethnic backgrounds.
Audience: Undergraduate

4. Analyze data collected to make claims about diverse workers' contributions to US economic history.
Audience: Undergraduate

5. Recognize and question assumptions in primary and secondary sources about persistently marginalized working-class communities.
Audience: Undergraduate

6. Articulate one's own class position in historical perspective.
Audience: Undergraduate

7. Apply the concepts of class formation and intersectionality to multicultural workplaces, politics, and/or creative endeavors beyond the classroom.
Audience: Undergraduate

HISTORY 199 – DIRECTED STUDY
1-3 credits.

Independent study in collaboration with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2018

HISTORY 200 – HISTORICAL STUDIES
1-4 credits.

Introduction to historical studies at the research university. Emphasis on interpretation and critical thinking. Topics vary.
Requisites: Sophomore standing or 3 credits in HISTORY
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Synthesize and critically analyze a range of primary and secondary sources.
Audience: Undergraduate

2. Respond to, discuss, and reflect upon historical questions.
Audience: Undergraduate

3. Craft stimulating and relevant historical questions of their own.
Audience: Undergraduate

4. Build evidence-based historical arguments and effectively communicate their ideas.
Audience: Undergraduate

HISTORY 201 – THE HISTORIAN'S CRAFT
3-4 credits.

Conduct original historical research and convey the results to others. Through engagement with archival materials, become historical detectives; practice defining important historical questions, collecting and analyzing evidence, presenting original conclusions, and contributing to ongoing discussions. Confer individually with and receive feedback from instructors to improve skills of historical analysis and communication in both written and spoken formats. May not be repeated for credit.
Requisites: Satisfied Communications A. Not open to students with credit for HIST SCI 211.
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Ask Questions: develop the habit of asking questions, including questions that may generate new directions for historical research.
Audience: Undergraduate

2. Find Sources: learn the logic of footnotes, bibliographies, search engines, libraries, and archives, and consult them to identify and locate source materials.
Audience: Undergraduate

3. Evaluate Sources: determine the perspective, credibility, and utility of source materials.
Audience: Undergraduate

4. Develop and Present an Argument: use sources appropriately to create, modify, and support tentative conclusions and new questions.
Audience: Undergraduate

5. Plan Further Research: draw upon preliminary research to develop a plan for further investigation.
Audience: Undergraduate

6. Communicate Findings Effectively: make formal and informal, written and oral presentations tailored to specific audiences.
Audience: Undergraduate

HISTORY/RELIG ST 205 – THE MAKING OF THE ISLAMIC WORLD: THE MIDDLE EAST, 500-1500
3-4 credits.

Development of society and culture in the Middle East and North Africa from the emergence of Islam (7th century) to early modern times.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify major concepts related to Islamic Civilization.
Audience: Undergraduate

2. Summarize the historical development, major debates, and manifestations of Islamic civilization.
Audience: Undergraduate

3. Analyze key movements and developments of Islamic Civilization.
Audience: Undergraduate

HISTORY/RELIG ST 208 – WESTERN INTELLECTUAL AND RELIGIOUS HISTORY TO 1500
3-4 credits.

Survey of key themes in Western intellectual history and religious thought from ancient Greece through the Renaissance, focusing on relationships among classical, Jewish, and Christian traditions.
Requisites: Sophomore standing or 3 credits in HISTORY or RELIG ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and explain the significance of some key movements, thinkers, and texts in the emergence of the Western intellectual tradition.
Audience: Undergraduate

2. Interpret complex writings from the past contextually, critically, and empathetically.
Audience: Undergraduate

3. Construct strong historical arguments based on evidence and careful reasoning.
Audience: Undergraduate

4. Compose clear analytical and argumentative written prose.
Audience: Undergraduate

HISTORY/RELIG ST 209 – WESTERN INTELLECTUAL AND RELIGIOUS HISTORY SINCE 1500
3-4 credits.

A survey of major trends in Western intellectual history and religious thought in the modern era, a period that saw a new range of competing ideas about the divine, the human condition, justice and the social order, and the quest for meaning. Explores shifts in Christian and Jewish thought as well as secular alternatives to religious outlooks. Topics include the impact of the Reformation, Scientific Revolution, and Enlightenment; radical critiques of religion; existentialism; theological responses to World Wars and the Holocaust; and civil rights and social justice. Sources include films, novels, autobiographies, essays, theological works, and political manifestos.
Requisites: Sophomore standing or 3 credits in HISTORY or RELIG ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and explain the significance of key trends, movements, thinkers, and texts in modern European intellectual and religious history.
Audience: Undergraduate

2. Evaluate some of the scholarly debates surrounding these movements.
Audience: Undergraduate

3. Interpret complex writings from the past contextually, critically, and empathetically.
Audience: Undergraduate

4. Construct strong historical arguments based on evidence and careful reasoning.
Audience: Undergraduate

5. Compose clear analytical and argumentative written prose.
Audience: Undergraduate

HISTORY/RELIG ST 212 – THE HISTORY OF WESTERN CHRISTIANITY TO 1750
4 credits.

A survey of Christianity from being a small, persecuted sect in the Roman Empire to becoming the dominant religion of western Europe, penetrating into the lives of Europeans, fissuring into multiple churches, and spreading across the globe. Attention is given to doctrine, ritual, worship, architecture, images, and music.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024

HISTORY/JEWISH 213 – JEWS AND AMERICAN POP. CULTURE
3-4 credits.

Explores the interplay between Jews and U. S. popular culture, covering such subjects as early 20th century vaudeville, the "golden age" of Hollywood, rhythm and blues music, television, and stand-up comedy.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe major trends in American popular entertainment.
Audience: Undergraduate

2. Explain the ways in which Jews shaped realms of American culture, such as, comedy, music, film, and television.
Audience: Undergraduate

3. Discuss the ways in which Jews and African-Americans interacted in the cultural arena.
Audience: Undergraduate

4. Describe public controversies around popular culture and how they were driven by or intermixed with antisemitism.
Audience: Undergraduate

HISTORY/JEWISH 220 – INTRODUCTION TO MODERN JEWISH HISTORY
4 credits.

The history of the Jews in selected parts of the world since the 17th century. Particular attention will be paid to the fact that this is the history of a minority group whose life unfolds in relationship to a larger society.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021

HISTORY 221 – EXPLORATIONS IN AMERICAN HISTORY (H)
3-4 credits.

Topics vary reflecting the interests, expertise, and innovating intention of the instructor.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Synthesize and critically analyze a range of primary and secondary sources related to North American and/or U.S. history.
Audience: Undergraduate

2. Build evidence-based historical arguments and effectively communicate their ideas.
Audience: Undergraduate

HISTORY 223 – EXPLORATIONS IN EUROPEAN HISTORY (H)
3-4 credits.

Topics vary reflecting the interests, expertise, and innovating intention of the instructor.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Synthesize and critically analyze a range of primary and secondary sources related to European history.
Audience: Undergraduate

2. Build evidence-based historical arguments and effectively communicate their ideas.
Audience: Undergraduate

HISTORY 225 – EXPLORATIONS IN THIRD WORLD HISTORY (H)
3-4 credits.

Topics vary reflecting the interests, expertise, and innovating intention of the instructor.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022

HISTORY 227 – EXPLORATIONS IN THE HISTORY OF RACE AND ETHNICITY
3 credits.

Topics on racial/ethnic minorities in the US in historical perspective; or topics that intersect with race or ethnicity in the US; or comparative historical topics that address how racial/ethnic minorities in the US negotiate exclusion and marginalization.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025
Learning Outcomes: 1. Describe historical constructions of race and ethnicity and explain the impact of this history on the contemporary U.S.
Audience: Undergraduate

2. Recognize assumptions about race and ethnicity, both expressed and implied, in historical sources.
Audience: Undergraduate

3. Question assumptions about race and ethnicity in the contemporary U.S.
Audience: Undergraduate

HISTORY 229 – EXPLORATIONS IN TRANSNATIONAL/ COMPARATIVE HISTORY (HUMANITIES)
3 credits.

Explores topics that involve at least two continents. Topics vary reflecting the interests, expertise, and innovating intention of the instructor.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Synthesize and critically analyze a range of primary and secondary sources related to transnational or comparative history.
Audience: Undergraduate

2. Build evidence-based historical arguments and effectively communicate their ideas.
Audience: Undergraduate

HISTORY/LEGAL ST 235 – PRISONS: FROM ANTIQUITY TO SUPERMAX
3-4 credits.

Examines the development of prisons from the ancient Mediterranean world to the present in the US and Europe. Pays particular attention to the way in which imprisonment has been used against marginalized populations. Examines the development of carceral tactics across a number of registers, including the prison as an ancient political tactic, the economic logic of early modern debtors' prisons, the relationship of prisons and workhouses to forms of capitalism, prisons and colonial expansion, the relationship between mass incarceration and democratic forms of government, as well as the connections between the abolition of slavery and modern carceral practices. Also looks at the legal and constitutional limitations that have been put on imprisonment by the American legal system. Relies on interdisciplinary approaches to the study of prisons, including History, law, literature, and political theory.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and articulate arguments about how social, political, and cultural phenomena shape law and legal systems, and in particular shape practices of imprisonment.
Audience: Undergraduate

2. Analyze and articulate arguments about the impact of imprisonment on social practices and political organization.
Audience: Undergraduate

3. Explain how legal ideas and ideologies have changed over time and have shaped law and legal systems.
Audience: Undergraduate

4. Find, interpret, and utilize resources relevant to law and society.
Audience: Undergraduate

5. Construct clear and persuasive arguments about legal systems and imprisonment.
Audience: Undergraduate

HISTORY/ART HIST/ENVIR ST/GEOG/LAND ARC 239 – MAKING THE AMERICAN LANDSCAPE
3-4 credits.

Traces the history and evolution of the American cultural landscape from precolonial times to present. Explores how class, ethnic, and racial inequality have shaped the appearance of the American landscape over time, and how that landscape in turn has affected relationships between people and groups through the present day. Examines extraordinary things (civic structures (like our State Capitol), National Parks, War Memorials) and more ordinary kinds of places (mining towns, cotton plantations, sites of recreation and leisure, and suburban tract housing) to stimulate critical thinking about how these places have served people and groups unequally and disproportionately over time and across space. Considers complex meanings of American spaces and places to different people and groups, stimulating empathy and encouraging participation in a multicultural society.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe and interpret the American landscape as a richly layered historical document mediated by complex relationships between people and groups
Audience: Undergraduate

2. Explain how the American cultural landscape has affected present day circumstances regarding ethnicity and race as well as racial and ethnic inequalities
Audience: Undergraduate

3. Articulate ways in which historical change manifest in buildings, enclosed spaces, and other elements of the American landscape reveal racial, ethnic, class and gender dynamics between and among people and groups over time
Audience: Undergraduate

4. Enlist forms of historical evidence – maps (current and historic), photographs (aerial and otherwise), historical newspapers, census records, deeds and land records – to interpret landscapes and landscape change
Audience: Undergraduate

5. Explain the American landscape as a product of competing interests, which will demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others
Audience: Undergraduate

HISTORY/INTL ST/LACIS 242 – MODERN LATIN AMERICA
3-4 credits.

A broad overview of Latin American history in the modern period, since independence but with a primary focus on the twentieth century. Particular emphasis will be placed on the socioeconomic, cultural, and political structures and processes that shaped and continue to influence life in Latin America. Key issues such as colonialism, nationalism, democracy, and revolution will be examined critically in light of broad comparative themes in Latin American and world history. Among the topics to be explored in detail will be the Mexican and Cuban revolutions, populism and dictatorship, socialism and neoliberalism, and drugs and migration.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Describe the contours of Latin American history in the period since independence
Audience: Undergraduate

2. Apply and use key concepts relevant to Latin American history, such as imperialism, inequality, populism, socialism, neoliberalism
Audience: Undergraduate

3. Read for a dedicated purpose across different genres and forms of writing
Audience: Undergraduate

4. Apply historical reasoning to understand the origins of present-day issues
Audience: Undergraduate

5. Communicate effectively through presentations, discussion, and written work
Audience: Undergraduate

HISTORY/LACIS 243 – COLONIAL LATIN AMERICA: INVASION TO INDEPENDENCE
3-4 credits.

An introductory survey of colonial Latin American history, from the late fifteenth to the early nineteenth century. Examines developments in Spanish and Portuguese America by reading both secondary and primary sources. Beginning with fifteenth-century Europe, the Americas and West Africa, discusses European expansion and invasion, first contacts between the so-called Old and the so-called New Worlds, as well as the role of religion, sexuality, gender, labor and production, trade and exchange, and politics. Each week, a central question will address the topic for that week. Become familiar with and contextualize key processes and events in colonial Latin American history and learn about the nature of colonization. Identify and evaluate historical arguments. Practice interpreting primary sources and building historical arguments about them.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the contours of Latin American history in the period between invasion and independence
Audience: Undergraduate

2. Apply and use key concepts relevant to colonial Latin American history, such as colonialism, genocide, corporate society, transatlantic slave trade, independence movements
Audience: Undergraduate

3. Read for a dedicated purpose across different genres and forms of writing
Audience: Undergraduate

4. Apply historical reasoning to understand both the epistemology of early modern people and the origins of present-day issues
Audience: Undergraduate

5. Communicate effectively through presentations, discussion, and written work
Audience: Undergraduate

HISTORY/ASIAN/GEOG/POLI SCI/SOC 244 – INTRODUCTION TO SOUTHEAST ASIA: VIETNAM TO THE PHILIPPINES
4 credits.

As an introduction to Southeast Asia, covers the ethnic, cultural, religious, and political histories of the region from the classical states period to the present, with an emphasis on colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century, including an exposure to region's contemporary literature. Not open to students who completed LCA 244 prior to Fall 2019.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Examine the ethnic, cultural, religious, and political histories of Southeast Asia from the classical states period to the present.
Audience: Undergraduate

2. Analyze colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century in Southeast Asia.

Audience: Undergraduate

3. Explore contemporary literature in Southeast Asia.
Audience: Undergraduate

HISTORY/CHICLA/GEN&WS 245 – CHICANA AND LATINA HISTORY
3 credits.

Introduces the cultural, economic, social, and political history of Chicanas and Latinas in the U.S. and focuses on four major themes: contact between different ethnic/racial groups; ideas of nation and nationalism; constructions of identity; and struggles for social justice.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Comm QR - Communication B
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Critically analyze the presence or absence of Chicanas and Latinas in US history.
Audience: Undergraduate

2. Use methods and vocabularies of history to analyze primary and secondary sources.
Audience: Undergraduate

3. Consider the relevance of Chicana and Latina history to present-day issues.
Audience: Undergraduate

4. Write and revise research aimed at an audience beyond the classroom.
Audience: Undergraduate

HISTORY/ASIAN/ASIAN AM 246 – SOUTHEAST ASIAN REFUGEES OF THE "COLD" WAR
4 credits.

In-depth study of the peoples, conflicts, and wars in Cambodia, Laos, and Vietnam, with emphasis on the Cold War era (1945-1990) and on the resulting migration and resettlement of over one million Hmong, Khmer, Lao, and Vietnamese in the United States. Not open to students with credit for LCA 246 prior to Fall 2019.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the modern history and the refugee crisis (1975-95) of three Southeast Asian countries: Vietnam, Cambodia, and Laos, including the impact of this history on the present.
Audience: Undergraduate

2. Analyze these histories within a comparative and interdisciplinary framework.
Audience: Undergraduate

3. Present ideas clearly in both written and oral form.
Audience: Undergraduate

HISTORY/GEOG/POLI SCI/SLAVIC 253 – RUSSIA: AN INTERDISCIPLINARY SURVEY
4 credits.

Comprehensive interdisciplinary survey of Russian civilization from its beginnings through the present day.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025

HISTORY/GEOG/POLI SCI/SLAVIC 254 – EASTERN EUROPE: AN INTERDISCIPLINARY SURVEY
4 credits.

Comprehensive interdisciplinary survey of East European culture, society, politics, and literature from its beginnings to the present day.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY/ASIAN/POLI SCI 255 – INTRODUCTION TO EAST ASIAN CIVILIZATIONS
3-4 credits.

Multidisciplinary and historical perspectives on the East Asian civilizations of China, Japan, Korea, Tibet and Mongolia from prehistory to the present, including developments in philosophy, economy, governance, social structure, kinship, geography, etc.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Learn, recall, and summarize key features and periodization in the history of modern East Asia.
Audience: Undergraduate

2. Apply this knowledge toward analyzing the content and form of "primary documents," including literature, film, photographs, and music.
Audience: Undergraduate

3. Identify and explain, to diverse audiences, regional and global issues pertaining to East Asia's economic and community development.
Audience: Undergraduate

4. Demonstrate critical thinking and comparative perspectives with respect to experiences or cultural approaches to international challenges.
Audience: Undergraduate

5. Write concise, well-organized, and original arguments and analyses, supported by question-driven inquiry and group discussion.
Audience: Undergraduate

6. Design and complete collaborative, team-based projects.
Audience: Undergraduate

HISTORY/C&E SOC/POLI SCI/SOC 259 – FORWARD? THE WISCONSIN IDEA, PAST AND PRESENT
1-3 credits.

Engage in ongoing reflection and dialogue on the Wisconsin Idea and how it informs the mission of the University of Wisconsin. Consider the Wisconsin Idea as it has developed since its beginnings, with a focus on what it means today and what it can mean in the future.
Requisites: Junior or senior standing only
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Listen respectfully to different opinions, respond rationally rather than emotionally, make reasoned arguments.
Audience: Undergraduate

2. Respond to another point of view with research and substantive comments or questions, present and support your own position, and thus engage in a wider conversation.
Audience: Undergraduate

3. Consider a specific question (“What makes an idea a Wisconsin Idea...?) and present a reasoned argument supporting the conclusion. (1-credit students)
Audience: Undergraduate

4. Deeply analyze an argument and respond by applying it to the student’s own educational strengths and weaknesses. (3-credit students)
Audience: Undergraduate

5. Use course content to explain a controversial issue and suggest a course of action to address it, stating reasons, and anticipating counterarguments. (3-credit students)
Audience: Undergraduate

HISTORY/AFROAMER/ANTHRO/C&E SOC/GEOG/LACIS/ POLI SCI/SOC/SPANISH 260 – LATIN AMERICA: AN INTRODUCTION
3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze Latin American culture and society from an interdisciplinary perspective.
Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.
Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.
Audience: Undergraduate

HISTORY/LEGAL ST 261 – AMERICAN LEGAL HISTORY TO 1860
3-4 credits.

Surveys the development of American law down to the U.S. Civil War. Reviews the English historical background, and examines how law changed in colonial America, culminating in the framing of the U.S. Constitution. Explores how territorial expansion, democracy, and slavery shaped nineteenth-century American law. Emphasis is on how law interacts with political, social, and cultural change, with a focus on the origins of modern civil and constitutional rights.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze how the social, political, and cultural context of England and colonial America helped to shape early American legal and political systems.
Audience: Undergraduate

2. Analyze how early legal and political systems impacted Americans of all types: men and women; landowners and the poor; settlers and indigenous people; free people, servants, and slaves.
Audience: Undergraduate

3. Assess how and why the Declaration of Independence, the U.S. Constitution, and other founding documents were shaped by traditions of representative government, Common Law, and the political philosophies of republicanism and liberalism.
Audience: Undergraduate

4. Find, interpret, and utilize resources relevant to early American law and society, including colonial charters, slave codes, the Declaration of Independence, the U.S. Constitution, and Supreme Court decisions.
Audience: Undergraduate

5. Analyze legal arguments in historical context, write clearly and persuasively, and construct original arguments.
Audience: Undergraduate

HISTORY/LEGAL ST 262 – AMERICAN LEGAL HISTORY, 1860 TO THE PRESENT
3-4 credits.

Surveys the development of American law from the Civil War to the early Twenty-First Century. After a review of the U.S. Constitution and its modification by the Civil War amendments, examine the legal dimensions of such topics as race relations and the Civil Rights movement, the growth of modern business, the New Deal, labor rights, the women's movement, the individual rights revolution of the postwar period, and the contemporary conservative reaction. Emphasis on how law interacts with political, social, and cultural change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze how social, political, and cultural phenomena, such as the Civil War, industrialization, and the rise of modern mass education and administrative government shaped U.S. law and legal systems.
Audience: Undergraduate

2. Analyze how changes in U.S. legal and political systems impacted Americans, both as individuals of all sexes, races, and classes and as members of families and business and civic organizations.
Audience: Undergraduate

3. Assess how twentieth-century changes in legal ideas and ideologies have affected understandings of the law, the U.S. Constitution, and broader legal and political systems.
Audience: Undergraduate

4. Find, interpret, and utilize resources relevant to law and society, including political speeches, state and federal laws, and decisions of federal courts and of the Supreme Court.
Audience: Undergraduate

5. Analyze legal arguments in historical context, write clearly and persuasively, and construct original arguments.
Audience: Undergraduate

HISTORY/ANTHRO/ART HIST/DS/LAND ARC 264 – DIMENSIONS OF MATERIAL CULTURE
4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY/GNS 265 – AN INTRODUCTION TO CENTRAL ASIA: FROM THE SILK ROUTE TO AFGHANISTAN
3 credits.

Examination of human geography, ethnicity, nomadism and pastoralism, oases cultures, religion and international politics of the silk routes of central Asia. Not open to students with credit for HIST 265 prior to Fall 2018.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025

HISTORY/CHICLA/LACIS/POLI SCI 268 – THE U.S. & LATIN AMERICA FROM THE COLONIAL ERA TO THE PRESENT: A CRITICAL SURVEY
3 credits.

A critical examination of US-Latin American relations from the colonial era to the present, tracing the emergence and evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America. Primary attention will be focused on US relations with Mexico, Central America and the Caribbean, but other Latin American countries will figure prominently during certain episodes.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Critically examine US-Latin American relations from the colonial era to the present.
Audience: Undergraduate

2. Examine tracing the evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America.
Audience: Undergraduate

3. Discuss US relations with Mexico, Central America and the Caribbean.
Audience: Undergraduate

HISTORY 269 – WAR, RACE, AND RELIGION IN EUROPE AND THE UNITED STATES, FROM THE SCRAMBLE FOR AFRICA TO TODAY
3-4 credits.

Investigates the complex history of European and American violence and war-making through the lens of race and religion. Taking a comparative approach, analyzes several major conflicts of the twentieth century, from World War I to the wars of decolonization, and from the genocide of the Herero peoples to the Armenian Genocide, the Holocaust, and beyond. Key topics include the genealogy of the modern idea of "race" in Europe and the U.S.; the drive towards a world of more homogeneous nation-states after World War I; and the emergence of transnational protest movements opposed to racism, imperialism, antisemitism, and Islamophobia. Drawing on a range of texts, songs, and films, investigates new connections between Europe and the United States. Take an international look at concepts like race and nation, and try to make sense of extreme violence, war-making, and the pre-requisites of peace.
Requisites: Sophomore standing or 3 credits in HISTORY
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe and explain the history of race and racism in Europe and the United States since the late 18th century and the impact of this history on the present.
Audience: Undergraduate

2. Formulate arguments about change over time.
Audience: Undergraduate

3. Determine what constitutes reliable and valid evidence for making historical arguments.
Audience: Undergraduate

4. Interpret, compare, and contrast primary sources.
Audience: Undergraduate

5. Analyze critically how narratives about the past are constructed.
Audience: Undergraduate

6. Describe and explain current debates around race and racism.
Audience: Undergraduate

HISTORY 270 – EASTERN EUROPE SINCE 1900
3-4 credits.

Introduces the dramatic history of twentieth-century Eastern Europe, a place where imperialism, Nazism, Communism, genocide, democracy, and capitalism all left their mark. Three interrelated themes--war, revolution, and society--allow us to place Eastern Europe within broader comparative contexts. In addition to exploring significant political, economic, and cultural changes, discover how ordinary people--including workers, peasants, women, and children--experienced attempts to change the region and its people. Throughout, discuss how East Europeans continue to wrestle with the ghosts of their past today.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Provide an overall synthesis of the key events, themes, and concepts of East European history since 1900.
Audience: Undergraduate

2. Recognize and analyze the various interpretations of East European history that have been offered over time.
Audience: Undergraduate

3. Identify how primary sources on East European history (in a range of different forms) can help us to answer particular historical questions, as well as how their usefulness is limited.
Audience: Undergraduate

4. Present ideas clearly in both written and oral form.
Audience: Undergraduate

HISTORY 271 – STUDY ABROAD IN HISTORY: EUROPEAN HISTORY
1-4 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

HISTORY 272 – STUDY ABROAD IN HISTORY: UNITED STATES HISTORY
1-4 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

HISTORY 273 – STUDY ABROAD IN HISTORY: NON-WESTERN HISTORY
1-4 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

HISTORY 274 – STUDY ABROAD IN HISTORY: TRANSNATIONAL/ GLOBAL HISTORY
1-4 credits.

A study abroad equivalency that does not equate to a UW-Madison course. Requires current enrollment in a UW-Madison sponsored study abroad program.
Requisites: None
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions

HISTORY 275 – TOPICS IN LGBT HISTORY
3 credits.

Topics in the major issues and themes in lesbian, gay, bisexual, and transgender history, considered across race, class, nationality, and time.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2023
Learning Outcomes: 1. Describe the contexts, social institutions, and social movements in LGBTQ+ histories.
Audience: Undergraduate

2. Use vocabularies relevant to LGBTQ+ contexts and histories.
Audience: Undergraduate

3. Identify historians' methods including use of archives, primary and secondary sources.
Audience: Undergraduate

4. Frame historical questions and pursue them.
Audience: Undergraduate

5. Find and analyze primary and secondary sources in LGBTQ+ history.
Audience: Undergraduate

6. Practice creative synthesis and original expression of insights.
Audience: Undergraduate

HISTORY/AFRICAN/AFROAMER/ANTHRO/GEOG/POLI SCI/SOC 277 – AFRICA: AN INTRODUCTORY SURVEY
4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze African society and culture from a multidisciplinary perspective.
Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.
Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.
Audience: Undergraduate

HISTORY 278 – AFRICANS IN THE AMERICAS, 1492-1808
3-4 credits.

Topics include demography and structure of the slave trade, but major focus on continuities and transformations of African cultures and social structures in the Americas--ethnicity, religion, kinship, gender, oral tradition, creolization, etc.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Define important questions related to the history of Africans in the Americas and explain their academic and public implications, including the contemporary implications of these questions.
Audience: Undergraduate

2. Evaluate the evidentiary and theoretical bases of various historical conversations in the making of the modern African diaspora.
Audience: Undergraduate

3. Synthesize a diversity of primary and secondary sources to make persuasive arguments and draw innovative conclusions about the African diaspora.
Audience: Undergraduate

HISTORY 283 – INTERMEDIATE HONORS SEMINAR-STUDIES IN HISTORY
3 credits.

Honors, intermediate-level exploration of selected topics, featuring intensive reading, writing, and small-group discussion. Topics vary reflecting the interests, expertise, and innovating intention of the instructor.
Requisites: Declared in an Honors program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024
Learning Outcomes: 1. Analyze challenging works of secondary scholarship and effectively situate primary sources in their historical context.
Audience: Undergraduate

2. Present your ideas clearly and concisely in written form to an appropriate readership.
Audience: Undergraduate

HISTORY/AFRICAN/AFROAMER/POLI SCI 297 – AFRICAN AND AFRICAN-AMERICAN LINKAGES: AN INTRODUCTION
4 credits.

Analysis of retention of African elements in African-American oral, written, and material culture. Social, cultural, and political issues regarding race, self-definition, and self-determination in both Africa and North America will be examined.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Analyze the retention of African elements in African-American oral, written, and material culture.
Audience: Undergraduate

2. Explore social, cultural, and political issues regarding race in both Africa and North America.
Audience: Undergraduate

3. Examine self-determination in both Africa and North America.
Audience: Undergraduate

HISTORY 300 – HISTORY AT WORK: PROFESSIONAL SKILLS OF THE MAJOR
1-2 credits.

Focuses on how a History major applies to the world of work. Explores how history skills relate to the needs of professional employers. Guides in the process of finding and obtaining professional internships. Polishes written and oral communication skills in forms appropriate for professional situations. Learn from the experiences of guest alumni speakers from a variety of fields.
Requisites: Sophomore standing
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Learn from guest speakers in a variety of fields about how they used their history education as the foundation of a successful career
Audience: Undergraduate

2. Practice basic writing forms and listening styles for a successful job search and early career
Audience: Undergraduate

3. Create a professional resume and cover letter
Audience: Undergraduate

4. Articulate the value of your BA in History in a professional setting.
Audience: Undergraduate

5. Hone your written and oral presentation skills in order to communicate clearly, concisely, and effectively in a professional setting
Audience: Undergraduate

6. Research career fields and organizations in which you might want to work
Audience: Undergraduate

7. Practice explaining, in both speech and writing, how the skills you have learned in the history major can be useful in jobs and careers that you are interested in
Audience: Undergraduate

HISTORY 301 – HISTORY AT WORK: HISTORY INTERNSHIP SEMINAR
1 credit.

Identify and analyze the differences between an internship and a non-professional job, with an eye towards articulating how a History degree and the skills it confers can be valuable in professional settings. Share internship experiences with classmates through short presentations. Discuss any issues or challenges that arose during internship experience. Concurrent enrollment in HISTORY 300 for 2 credits, which includes a discussion section, or previous credit in HISTORY 300 is required.
Requisites: Consent of instructor
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Workplace - Workplace Experience
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and articulate the key differences in content and expectations between pre-professional internships and non-professional employment
Audience: Undergraduate

2. Develop and implement strategies for managing workplace challenges, particularly those related to working as part of a team and interacting with diverse populations
Audience: Undergraduate

3. Articulate the relevance and value of the skill set conferred by the history major to professional and pre-professional work environments
Audience: Undergraduate

HISTORY 302 – HISTORY OF AMERICAN THOUGHT, 1859 TO THE PRESENT
3-4 credits.

Designed for those who are interested in the role of ideas and culture in modern American history. Examine developments in philosophy, science, political theory, social criticism, and the arts in American life from 1859 to the present. Read the works of a number of influential thinkers and writers, as well as explore a variety of intellectual movements, which shaped the cultural worlds of late 19th- and 20th-century Americans. Themes include: the influence of Darwinism on religion; the impact of industrialization on ideas about American society; the revolt against formalism in philosophy, literature, and the social sciences; early twentieth-century conceptions of race, ethnicity, and gender; the responsibility of the intellectual in times of national and global crisis; post-WWII liberalism and existentialism; the rise of postmodernism in the academy and American popular culture, and the persistent contestations over the meaning and scope of American national identity.
Requisites: Sophomore standing or 3 credits in HISTORY or HIST SCI
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and summarize the broad contours of and major issues in American intellectual history
Audience: Undergraduate

2. Identify and illustrate the transnational and transtemporal dimensions of American thought
Audience: Undergraduate

3. Demonstrate the relevance of a historical perspective to contemporary issues
Audience: Undergraduate

4. Judge the context in which sources were created, searching for chronological and other relationships among them, and assessing the sources in light of that knowledge
Audience: Undergraduate

HISTORY 303 – A HISTORY OF GREEK CIVILIZATION
3-4 credits.

From the Bronze Age to the Hellenistic Age. Special emphases may vary with each offering.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify key historical events and social/political practices of ancient Greece and place them in their appropriate chronological and cultural context.
Audience: Both Grad & Undergrad

2. Explain and apply appropriately the specific terminology (names, places, concepts) of Greek history.
Audience: Both Grad & Undergrad

3. Analyze problems relating to the reconstruction of historical events and Greek social and political practices with reference to relevant source material.
Audience: Both Grad & Undergrad

4. Discuss with appropriate methodological awareness conflicting views expressed in modern scholarship.
Audience: Both Grad & Undergrad

5. Interpret and evaluate key scholarly debates related to ancient Greece.
Audience: Graduate

HISTORY 306 – THE UNITED STATES SINCE 1945
3-4 credits.

Political, social, economic, and cultural changes in the U.S. from World War II to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2022
Learning Outcomes: 1. Identify the major events and turning points in United States history since World War II.
Audience: Both Grad & Undergrad

2. Analyze how primary sources on postwar U.S. history can help us answer particular historical questions.
Audience: Both Grad & Undergrad

3. Evaluate narratives about U.S. history from multiple perspectives.
Audience: Both Grad & Undergrad

4. Interpret and evaluate key scholarly debates in the historiography of the postwar U.S.
Audience: Graduate

HISTORY 307 – A HISTORY OF ROME
3-4 credits.

Roman civilization from the monarchy through the collapse of the Roman Empire in the west.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe the basic features of the worlds of the ancient Romans.
Audience: Both Grad & Undergrad

2. Identify the background and the contexts of the primary sources which provide information on the most important Roman institutions, customs, and ideas.
Audience: Both Grad & Undergrad

3. Analyze problems relating to the reconstruction of historical events and Roman social and political practices with reference to relevant source material.
Audience: Both Grad & Undergrad

4. Interpret and evaluate key scholarly debates related to ancient Rome.
Audience: Graduate

HISTORY/ASIAN/RELIG ST 308 – INTRODUCTION TO BUDDHISM
3-4 credits.

The basic thought, practices and history of Buddhism, including selflessness and relativity, practices of meditation, merit- making and compassion from both local and translocal perspectives. Includes a discussion of Buddhism as a contemporary, North American religion. Not open to students with credit for E ASIAN or LCA 308 prior to Fall 2019.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe Buddhist ways of thinking, organizing knowledge, and navigating the inevitable realities of human existence: birth, death, sickness, aging, suffering, and constant change.
Audience: Both Grad & Undergrad

2. Discuss basic Buddhist concepts and use this awareness to become an informed, religiously literate global citizen.
Audience: Both Grad & Undergrad

3. Appraise the relevance and applicability of Buddhist resources for the larger human project of living a good and meaningful life.
Audience: Both Grad & Undergrad

4. Explain and practice "seeing through Buddhist eyes," a central aim of the academic history of religions approach.
Audience: Both Grad & Undergrad

5. Apply our analytical method of studying religion to understanding your own or other religious traditions.
Audience: Both Grad & Undergrad

6. Apply close reading techniques and religious historical methods for reading and analyzing primary Buddhist texts in translation.
Audience: Graduate

HISTORY/MEDIEVAL/RELIG ST 309 – THE CRUSADES: CHRISTIANITY AND ISLAM
3-4 credits.

An examination of the Crusades from both Christian and Islamic perspectives; the historical, social, and religious context and significance of the Crusades for both Christians and Muslims.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss crusades, interfaith, and cross-cultural relations during the period of crusades and religious violence.
Audience: Both Grad & Undergrad

2. Analyze critically a variety of primary and secondary sources, both orally and in writing.
Audience: Both Grad & Undergrad

3. Interpret critically modern representations and uses of the medieval past.
Audience: Both Grad & Undergrad

4. Assess significant work in the historiography of the medieval period.
Audience: Graduate

HISTORY/JEWISH 310 – THE HOLOCAUST
3-4 credits.

References to the Holocaust abound in contemporary political debates and in our popular culture. But most people know very little about the history of the Holocaust, despite the mountains of superb historical scholarship that experts in the field have produced over decades of dedicated research. Utilize correspondence, diaries, or other firsthand accounts of Holocaust victims, together with study of the larger events around them, to reconstruct the experiences of ordinary families swept up in the Nazi genocide.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Demonstrate in-depth knowledge of the Nazi genocide of European Jewry during WWII, including the events, processes, ideas, organizations, and individuals behind these crimes, and an understanding of how the everyday experiences of Holocaust victims limited their options for survival
Audience: Undergraduate

2. Explain the mechanics of how and why the Nazis and their collaborators were able to carry out a program of persecution and ultimately extermination against the Jewish communities of Europe, leading to the murder of an estimated 6 million Jews
Audience: Undergraduate

3. Identify central arguments in historiographical writing; use primary sources to reconstruct historical events; formulate research questions; develop written arguments that illuminate the lives of Holocaust victims and analyze the key events, policies, or sites of the Nazi genocide; support arguments with appropriate sources; and supply appropriate citations
Audience: Undergraduate

HISTORY/ASIAN 319 – THE VIETNAM WARS
3-4 credits.

Explores the prolonged cycle of wars in Vietnam and its neighbors, 1940 to date, with due regard for both local and U.S. perspectives.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the major events of the Vietnam conflict from multiple perspectives and viewpoints, including ordinary American soldiers, Vietnamese villagers, Hanoi's military leaders, and White House insiders.
Audience: Both Grad & Undergrad

2. Describe this great crisis in U.S. foreign policy and the complexities of contemporary history.
Audience: Both Grad & Undergrad

3. Analyze critically U.S. government decision-making.
Audience: Both Grad & Undergrad

4. Explain the global process of decolonization - marked by nationalism, communism, and insurgency - that transformed empires which once covered 40 percent of the earth's land area into a hundred new nations.
Audience: Both Grad & Undergrad

5. Describe the character of the Cold War that divided the world for nearly a half century.
Audience: Both Grad & Undergrad

6. Assess significant works in the Historiography of the Cold War and the Vietnam conflict
Audience: Graduate

HISTORY/AFROAMER 321 – AFRICAN AMERICAN HISTORY SINCE 1900
3-4 credits.

Survey of African American history from 1900 to the present. Topics covered include segregation, the Civil Rights Movement, the political, social and cultural changes of the late 20th century, and the Obama presidency.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Interpret African Americans' lives during the 20th and 21st centuries as well as that of the country at large
Audience: Both Grad & Undergrad

2. Describe the broader social context in which that history has unfolded and continues to evolve
Audience: Both Grad & Undergrad

3. Identify the rich resources for African American research available to students on campus and in archives throughout the country
Audience: Undergraduate

4. Conduct extensive archival research using the methodologies and practices by scholars of African American history
Audience: Graduate

5. Articulate the historical and continuing marginalization of African Americans
Audience: Both Grad & Undergrad

HISTORY/AFROAMER 322 – AFRICAN AMERICAN HISTORY TO 1900
3 credits.

Survey of African American history from its roots in Africa to the end of the 19th century. Topics considered include the slave trade, the political and cultural practices of enslaved communities, forms of resistance, Reconstruction, and systems of segregation.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2016
Learning Outcomes: 1. Recognize the multitude of contributions that people of African descent made to the social, political, and economic development of the United States of America.
Audience: Both Grad & Undergrad

2. Explain the creation, development, and legacies of race-based slavery in the United States.
Audience: Both Grad & Undergrad

3. Describe how race-based discrimination was used to marginalize African Americans socially, politically, and economically, and how Black people fought back against institutional oppression
Audience: Both Grad & Undergrad

4. Use primary sources and secondary peer-reviewed sources to explain and discuss how certain histories have been valued and devalued and how these differences have promulgated disparities in contemporary American society.
Audience: Both Grad & Undergrad

5. Demonstrate critical reading, writing, speaking, and thinking skills, specifically concerning teaching students to harbor healthy skepticism toward knowledge claims.
Audience: Both Grad & Undergrad

6. Contribute as a well-rounded, informed, and educated citizen capable of beginning to address the goals of the Ethnic Studies Requirement, including engendering students' ability to participate in a multicultural society effectively and successfully.
Audience: Undergraduate

7. Apply the primary theories and methods employed by historians of African American history.
Audience: Graduate

HISTORY/HIST SCI 323 – THE SCIENTIFIC REVOLUTION: FROM COPERNICUS TO NEWTON
3 credits.

An introduction to the formative period of modern science, including major ideas and events in the physical and life sciences from Copernicus to Newton.
Requisites: Junior standing or (graduate/professional standing and concurrent enrollment in HIST SCI 623)
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Explain critical developments in how the natural world was understood in early modern Europe.
Audience: Undergraduate

2. Describe how early modern European science was shaped by its cultural contexts.
Audience: Undergraduate

3. Analyze and interpret early modern European scientific books as historical objects.
Audience: Undergraduate

4. Use historical texts and objects to construct evidence-based arguments concerning science and its history.
Audience: Undergraduate

HISTORY/ENVIR ST 328 – ENVIRONMENTAL HISTORY OF EUROPE
3 credits.

Explores a new approach to a part of the world with a very old history, but one that is now as 'modern' as any. The changing, complex relations between Europeans and their environments from antiquity to the twenty-first century offer instructive comparison with American and current global environmental concerns. Approaching Mediterranean and Western civilizations from an environmental viewpoint also offers fresh perspective on these enduring cultures.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Define historical questions concerning the human understanding of and impact on past environments in Europe.
Audience: Undergraduate

2. Identify pertinent types of evidence to study past interactions between humans and their environments in Europe, while assessing their advantages and disadvantages.
Audience: Undergraduate

3. Evaluate the evidentiary and theoretical bases, and areas for further investigation, in ongoing scholarly and public debates about Europe's environmental history.
Audience: Undergraduate

4. Describe the variety of natural environments, cultures, and processes of historical change in Europe.
Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of the conservation of natural resources.
Audience: Undergraduate

6. Analyze the social, political, and environmental dimensions of the sustainability of natural resources, biodiversity, clean air and water, and other, larger earth systems.
Audience: Undergraduate

HISTORY 329 – HISTORY OF AMERICAN CAPITALISM
4 credits.

Survey of political, social, and economic change in the history of American capitalism from the late colonial period to the near-present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Analyze influences that shape historical narratives and debates about capitalism.
Audience: Both Grad & Undergrad

2. Explain complex changes of American capitalism over time at different levels of scale.
Audience: Both Grad & Undergrad

3. Describe the roots of persistent social, economic, gender, and racial inequalities across time and space in relation to the history of American capitalism.
Audience: Both Grad & Undergrad

4. Interpret and evaluate key scholarly debates in the historiography of American capitalism.
Audience: Graduate

HISTORY/INTL ST 330 – GLOBAL HISTORY OF HUMANITARIANISM
3-4 credits.

What motivates us to try to alleviate the suffering of people in distant parts of the world? Examine the origins of humanitarian ideas and institutions, and how various humanitarian campaigns have been shaped by geopolitical processes, including the abolition of the slave trade, the spread of missionary Christianity, European imperialism, the Cold War, neoliberalism and the emergence of new media forms. Questions include: who has benefited from various humanitarian aid campaigns throughout history? How have various humanitarian campaigns shaped, and been shaped by, patterns of global inequality? Why have some populations, and not others, been deemed worthy of the world's compassion? Explore the worlds, perspectives and visions of humanitarians through a range of primary sources, including diary entries, political propaganda, memoirs, journalistic reportage, photography and documentary film.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and discuss the ways in which modern humanitarianism has transformed over time
Audience: Undergraduate

2. Compare and contrast different traditions of humanitarian thought and practice
Audience: Undergraduate

3. Explain how humanitarianism is shaped by global histories of imperialism, geopolitics, capitalism
Audience: Undergraduate

4. Locate ourselves and our communities within the broader global history of humanitarian intervention. By identifying how we fit into this uneven global history, we deepen our sense of personal and social responsibility.
Audience: Undergraduate

5. Pose original research questions, analyze primary sources, make evidence-based arguments, and communicate research findings in a clear way.
Audience: Undergraduate

HISTORY/INTL ST 332 – EAST ASIA & THE U.S. SINCE 1899
3-4 credits.

From the Boxer Rebellion, to the dropping of the atomic bombs, to the nuclear stand-off with North Korea, American foreign relations with East Asia during the 20th century were as consequential as they were controversial. Survey the issues and questions that alternately made allies and enemies of these nations: How did the quest for markets influence American policy towards China? How did European imperialism shape Japan's rise? Why did communism seem to offer a more compelling economic and political arrangement to China and North Korea? While squarely rooted in East Asia this course will also explore the questions that united and divided Americans over their nation's foreign policy. Through examining these questions, develop answers and construct their own narrative of the relationship between the United States and East Asia.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and summarize the important features and major periods in the history of US–East Asian Relations
Audience: Both Grad & Undergrad

2. Identify and summarize the major foreign relations objectives of China, Japan, North Korea, South Korea, and the United States during the major historical periods of the 20th century
Audience: Both Grad & Undergrad

3. Explain and evaluate how these societies have viewed each other during periods of conflict and cooperation
Audience: Undergraduate

4. Describe how people-to-people connections have shaped these relationships beyond their governments intensions
Audience: Undergraduate

5. Use historical knowledge to evaluate current trends in the relationships between these states
Audience: Undergraduate

6. Identify and summarize major trends and schools of interpretation in the historiography of US-East Asian relations
Audience: Graduate

7. Become proficient in the form, style, and conventions of an academic book review
Audience: Graduate

HISTORY/ASIAN 335 – THE KOREAS: KOREAN WAR TO THE 21ST CENTURY
3-4 credits.

A historical examination of the Korean War and the politics and society of North Korea and South Korea.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the historical factors behind the formation of two competing nation states (North Korea and South Korea) on the Korean peninsula.
Audience: Both Grad & Undergrad

2. Explain how the two Koreas fit within major processes of post-1945 global history, especially Cold War decolonization and post-Cold War globalization.
Audience: Both Grad & Undergrad

3. Identify the primary arguments of secondary sources and evaluate their significance.
Audience: Both Grad & Undergrad

4. Contextualize, identify, and interpret historically significant information in primary sources.
Audience: Both Grad & Undergrad

5. Discuss how you will apply your knowledge of modern Korean history to your graduate studies and career path.
Audience: Graduate

HISTORY 336 – CHINESE ECONOMIC AND BUSINESS HISTORY: FROM SILK TO IPHONES
3-4 credits.

Utilizes an historical approach to explore the economic and business history of pre-modern and modern China. Topics addressed include: how people thought about property, labor, and value, money and the banking and financial systems, development of domestic and international markets and trade, major industries, the search for resources, agricultural economy, the connection of law and economy, organizations that affected the economy, systemic changes during the Republic and People's Republic, China's participation in international economic institutions, and more.
Requisites: Sophomore standing or 3 credits in HISTORY, ECON, or POLI SCI
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify and summarize the important features of major aspects of Chinese economic and business history.
Audience: Both Grad & Undergrad

2. Describe the significance of economic and business ideas on the historical development of Chinese society, government, and culture.
Audience: Both Grad & Undergrad

3. Interpret how Chinese economic and business history fits into worldwide economic and business history.
Audience: Both Grad & Undergrad

4. Assess the scholarly literature on Chinese economic and business history.
Audience: Graduate

HISTORY/ASIAN 337 – SOCIAL AND INTELLECTUAL HISTORY OF CHINA, 589 AD-1919
3-4 credits.

The culture of the literati in the T'ang; major trends of Neo-Confucianism during the Sung and Ming; the Confucian response to the West in the nineteenth century; the emergence of the modern Chinese intelligentsia and iconoclasm in the early May Fourth period.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and summarize the important features of Ming history.
Audience: Both Grad & Undergrad

2. Explain the significance of the Ming on the historical development of Chinese society, government, and culture.
Audience: Both Grad & Undergrad

3. Interpret how Ming history fits into worldwide early modern history.
Audience: Both Grad & Undergrad

4. Assess the scholarly literature on Ming history.
Audience: Graduate

HISTORY 340 – CULTURAL HISTORY OF KOREA
3-4 credits.

The culture and society of Korea have evolved hand in hand with the country's transformation from the Choson dynasty, a relatively isolated Confucian kingdom built on an agrarian economy, to South Korea and North Korea, two modern, industrialized nation-states in the globalized present. Explores key aspects of Korea's great cultural and social transformation from the 15th century to the 21st century. Delves into recent studies on gender history and on the constructed notion of "national culture." Also analyzes primary sources from different historical periods, as well as cinematic representations of Korea's past and present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2022

HISTORY/ASIAN 341 – HISTORY OF MODERN CHINA, 1800-1949
3-4 credits.

The disintegration of traditional Chinese society under the impact of Western imperialism, the rise of modern Chinese nationalism, and the emergence of modern revolutionary movements and ideologies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Describe the political, economic, social, and cultural foundations of modern China.
Audience: Both Grad & Undergrad

2. Explain and situate the so-called "rise of China" within a broader historical context.
Audience: Both Grad & Undergrad

3. Assess significant work in the historiography of China from the period of the late Qing dynasty to 1949.
Audience: Graduate

HISTORY/ASIAN 342 – HISTORY OF THE PEOPLES REPUBLIC OF CHINA, 1949 TO THE PRESENT
3-4 credits.

The social, economic and political transformation of China under Communism; the role of ideology in contemporary Chinese historical development; the nature of that historical development in the comparative perspective of other post-revolutionary histories.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify important events, patterns, processes and people in Chinese history since 1949.
Audience: Both Grad & Undergrad

2. Explain the ways in which modern China remains rooted in and shaped by Mao's China.
Audience: Both Grad & Undergrad

3. Assess significant work in the historiography of post-1949 China.
Audience: Graduate

HISTORY 344 – THE AGE OF THE AMERICAN REVOLUTION, 1763-1789
3-4 credits.

Structure of American society, Britain and the Colonies; the revolutionary movement for independence; the war for independence; social, political, and constitutional change.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the causes, course, and consequences of the Revolution and grasp important concepts related to its history.
Audience: Both Grad & Undergrad

2. Discuss the Revolution's wide-ranging participants and their diverse aims and actions, as well as the divergent ways in which the Revolution affected different peoples in North America and the broader Atlantic World.
Audience: Both Grad & Undergrad

3. Analyze key scholarly interpretations of the American Revolution and its legacies.
Audience: Both Grad & Undergrad

4. Assess their own relationship to the historical memory of the American Revolution in the contemporary United States.
Audience: Both Grad & Undergrad

5. Interpret and evaluate key scholarly debates in the historiography of the American Revolution.
Audience: Graduate

HISTORY 345 – MILITARY HISTORY OF THE UNITED STATES
3-4 credits.

The founding and growth of the military establishment, the exercise of the military art, and military policies treated in connection with relevant political, social, and economic factors.
Requisites: Sophomore standing. Not open to students with credit for HISTORY 427 or 428.
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and describe the diverse military traditions that collided in colonial North America and how they evolved in response to each other and technological developments.
Audience: Both Grad & Undergrad

2. Explain how the United States has attempted to use military power to advance its interests and ideals around the world and to what effect.
Audience: Both Grad & Undergrad

3. Explain how and why American military policies, establishments, and practices evolved over time.
Audience: Both Grad & Undergrad

4. Explain how concepts of identity (to include race, ethnicity, kinship, gender, and religion) influence the character of war and how war has, in turn, influenced identity.
Audience: Both Grad & Undergrad

5. Analyze warfare as a human experience endured on the battlefield, at sea, in the sky, on the home front, at desolate outposts, and in councils of government.
Audience: Both Grad & Undergrad

6. Analyze the significance and persistence of expansion - physical, commercial, and ideological - to American (military) history.
Audience: Both Grad & Undergrad

7. Assess significant work in the historiography of American military history.
Audience: Graduate

HISTORY/GEN&WS 346 – TRANS/GENDER IN HISTORICAL PERSPECTIVE
3-4 credits.

Focuses on sex/gender crossing and variation in historical contexts including Japan, South Africa, Europe, the African diaspora, and North America. Considers perspectives of people who themselves passed, crossed, transitioned, transed, or otherwise exceeded their culture's definitions of normative sex/gender. Alongside, consider the ways that dominant social institutions reinforced norms, recognized, tolerated, punished and/or celebrated gender variation. Examine popular culture, medical and legal perspectives, memoir, queer and trans theory, and social movement treatises.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Describe the diverse contexts, practices, and meanings associated with trans, nonbinary, creative, and cross-gender embodiments.
Audience: Undergraduate

2. Use culturally and historically specific vocabularies related to gender diversity in many eras and locations of the globe.
Audience: Undergraduate

3. Explain the ways that cultural and historical context inform gender and its roles in social life.
Audience: Undergraduate

4. Interpret gender diversity in context using the craft of the historian and other methods.
Audience: Undergraduate

5. Use written and verbal communication skills related to gender diversity across time and place.
Audience: Undergraduate

HISTORY/AFROAMER 347 – THE CARIBBEAN AND ITS DIASPORAS
3-4 credits.

Surveys the history of the Caribbean from the 15th century to the present. Emphasizes the importance of colonialism, commodity-based capitalism, globalization, slavery, and forced labor for the modeling of the region's social, economic, cultural, and political structures. Pay particular attention to the resilient, creative and resourceful ways in which Caribbean people have responded to these adverse conditions. Examine the circumstances that have shaped migrations from the region to the United States and Canada during the 20th and 21st centuries. Study how these diasporic communities have created social spaces in these two countries that have remained closely linked to the Caribbean through economic, political, and filial networks.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify the historical roots of the racial, political, cultural, and social structures of contemporary Caribbean societies and their diasporas
Audience: Undergraduate

2. Recognize the multiple ethnic and cultural origins of Caribbean communities and the impact these communities had in the modeling of Atlantic and global historical developments
Audience: Undergraduate

3. Analyze and synthesize information, provide evidence-based interpretations about the past, and develop arguments regarding the history of Caribbean societies and their global diasporas
Audience: Undergraduate

4. Identify and analyze within their social, cultural, and economic contexts key historical developments in the history of the Caribbean from the fifteenth century to the present
Audience: Both Grad & Undergrad

5. Analyze the role that social and cultural factors—such as gender, religion, ethnicity, and class, among others—had in shaping Caribbean historical developments
Audience: Both Grad & Undergrad

6. Identify and analyze within the their social, cultural and economic contexts the history of the idea of race as it relates to the history of the Caribbean
Audience: Both Grad & Undergrad

7. Discern the impact of local and global political and economic developments, in the shaping of ideas about racial, ethnic, social, and cultural hierarchies and public policies in Caribbean nations
Audience: Both Grad & Undergrad

8. Understand the different methodological approaches and research strategies that historians, anthropologists, and other scholars have used to examine the histories of the Caribbean from the sixteenth century to the present
Audience: Graduate

HISTORY 348 – FRANCE FROM NAPOLEON TO THE GREAT WAR, 1799-1914
3-4 credits.

Politics, society and culture in nineteenth century France. Emphasis on France's revolutionary heritage and problems of establishing a democratic regime.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

HISTORY 349 – CONTEMPORARY FRANCE, 1914 TO THE PRESENT
3-4 credits.

Social, political, and cultural history of twentieth century France, especially the Great War, the Popular Front, the Vichy Regime, DeGaulle and the Fifth Republic, Mitterrand's socialist experiment, France's changing role in the world and the European Community.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

HISTORY 350 – THE FIRST WORLD WAR AND THE SHAPING OF TWENTIETH-CENTURY EUROPE
3-4 credits.

The experience and legacy of the First World War has been linked to nearly every social, cultural, and political transformation that marked the short century that followed: mobilization and the experience of total war transformed the relations between governments and citizens, between men and women, and between social classes. Europeans experienced death on an unprecedented scale and came to terms with new forms of industrialized warfare, from the use of poison gas to modern practices of genocide. Europeans now learned to live with violence, both during as well as after the war, and found new ways to mourn or remember the dead. Using a wide variety of contemporary sources -- memoirs, essays, poems, or cinematic representations -- situates the upheaval of 1914-1918 within the larger framework of twentieth-century European history.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and explain the major trajectories in twentieth-century European history and the ways in which they were affected by the First World War, and more broadly, engage critical questions that animate the field of war and society studies today.
Audience: Both Grad & Undergrad

2. Identify and critically engage with the major interpretive frameworks that historians have used in their study of the First World War, and of total war more broadly.
Audience: Both Grad & Undergrad

3. Analyze primary sources from the history of the First World War, both written and visual, and evaluate or critique interpretations of these sources.
Audience: Both Grad & Undergrad

4. Produce original historical arguments, in both written and oral communication, and properly mobilize evidence to support these arguments.
Audience: Both Grad & Undergrad

5. Evaluate interpretive frameworks, in both the historiography as well as the popular cultural memory of the war, and situate the emergence of such frameworks within a broader history of representations of the war and contestations over such representations.
Audience: Both Grad & Undergrad

6. Interpret and evaluate key scholarly debates in the historiography of the First World War.
Audience: Graduate

HISTORY/GEN&WS 353 – WOMEN AND GENDER IN THE U.S. TO 1870
3-4 credits.

An advanced and comparative study of the roles of gender, class, and race in American history and historiography. Themes include women as agents of social change and as builders of community.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe historical constructions of gender amidst multiple, intersecting social hierarchies.
Audience: Undergraduate

2. Interpret primary and secondary sources about women in colonial North America and the early United States.
Audience: Undergraduate

3. Analyze power dynamics among women and between the genders.
Audience: Undergraduate

4. Articulate a theory of diverse women's relationships to a significant idea or process, based on historical evidence.
Audience: Undergraduate

5. Evaluate the impact of women's personal agency and collective movements before 1870.
Audience: Undergraduate

6. Identify and critique the methods historians have used to create knowledge about women and gender
Audience: Both Grad & Undergrad

7. Propose a new direction for future scholarship and/or public engagement with women's history, based on your informed critique.
Audience: Both Grad & Undergrad

8. Design an original research project based on your historiographical proposition.
Audience: Graduate

HISTORY/GEN&WS 354 – WOMEN AND GENDER IN THE U.S. SINCE 1870
3-4 credits.

See 520.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019
Learning Outcomes: 1. Describe historical constructions of racialized gender in specific contexts from the nineteenth century to the present.
Audience: Both Grad & Undergrad

2. Analyze power dynamics among women and between the genders, including the interactions of multiple, intersecting social hierarchies.
Audience: Both Grad & Undergrad

3. Recognize assumptions about racialized gender, both expressed and implied, in historical sources.
Audience: Both Grad & Undergrad

4. Question assumptions about racialized gender in contemporary US politics, law, and culture.
Audience: Both Grad & Undergrad

5. Articulate one's own positionality in relationship to multiple communities by identifying the historical dynamics that shape relations of racial and gender difference in the US today.
Audience: Both Grad & Undergrad

6. Apply the concepts of racialized gender and positionality when participating in multicultural discussions, creative spaces, political events and/or workplaces.
Audience: Both Grad & Undergrad

7. Critique the existing historiography and propose solutions for future scholarship and/or public engagement with gender and women's history, based on your informed critique.
Audience: Graduate

HISTORY/CHICLA/LACIS/POLI SCI 355 – LABOR IN THE AMERICAS: US & MEXICO IN COMPARATIVE & HISTORICAL PERSPECTIVE
3 credits.

Critical examination of the history of labor and working people in the Americas from the colonial era to the present. Focuses on the experiences of the U.S. and Mexico, offering a comparative perspective on their distinct but interconnected histories. Surveys major episodes in the evolution of labor systems, from colonial structures imposed by Spanish and British empires to the roles of slavery, forced labor, and industrialization. Examines the rise of corporate capitalism, labor unrest in the post-Civil War U.S., labor's role in the Mexican Revolution, and the impact of the Great Depression and post-WWII labor incorporation. Includes the shift to neoliberalism in the late twentieth century and the emergence of an integrated North American production system and its consequences for workers on both sides of the U.S.-Mexico border.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2021

HISTORY 357 – THE SECOND WORLD WAR
3-4 credits.

Background and history of World War II. Problems of peacemaking and international organizations; rise of Fascism, National Socialism, and Japanese imperialism; breaking the peace; World War II.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and explain the major political, social, and cultural developments of World War II and provide an overall synthesis of its key events and lasting legacies.
Audience: Both Grad & Undergrad

2. Analyze and interpret primary source documents by placing these in their historical context and understanding their historical significance.
Audience: Both Grad & Undergrad

3. Examine connections between historical themes and contemporary issues of war and genocide, demonstrating an understanding of the relevance of history to the present.
Audience: Both Grad & Undergrad

4. Assess significant work in the historiography of World War II.
Audience: Graduate

HISTORY 358 – FRENCH REVOLUTION AND NAPOLEON
3-4 credits.

Explores the French Revolution and the Age of Napoleon. Why did Revolution break out in one of the most powerful and traditional monarchies of Europe? What were the roots of discontent and the sources of revolutionary ideas? Probes the exciting twists and turns of revolutionary politics and the attempt to spread "liberty equality" into ordinary life, even abolishing slavery in response to massive slave revolt in the French colonies. Asks how the French interacted with a transnational revolutionary movement across Europe, the US, and the Atlantic world. Though focused on a specific revolutionary era, we will also reflect on timeless questions: Why is it so difficult to create democracy? Is violence ever justified to overcome oppression and injustice? Finally, why did this experiment in radical democracy also unleash the Terror and launch Napoleon Bonaparte, the politician and general who built an astonishing European Empire? And how did he pull it off for as long as he did?
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Explain the significance of the French Revolution, including its Napoleonic aftermath, as a political, social, and cultural event.

Audience: Both Grad & Undergrad

2. Describe major actors and events in the Revolution, from the 1780s to 1815, and recognize both the structural and contingent forces that shaped its course.
Audience: Both Grad & Undergrad

3. Assess the historical relationship between the French Revolution and the Haitian Revolution, recognizing key points of connection in the unfolding of these two events.
Audience: Both Grad & Undergrad

4. Analyze historical evidence in the form of primary source documents from the French Revolutionary moment and the Napoleonic era.
Audience: Both Grad & Undergrad

5. Analyze critically scholarly sources about the French Revolution and Napoleon in their domestic, imperial, and global dimensions, recognizing authors' arguments and evaluating the type and quality of evidence that they employ.
Audience: Both Grad & Undergrad

6. Construct your own written historical arguments about the revolutionary era by drawing critically upon multiple sources.
Audience: Both Grad & Undergrad

7. Interpret and evaluate scholarly debates about the French Revolution, especially contestation over the reasons that it began, the reasons that it subsequently radicalized, and the racial and gendered dimensions of the revolutionary project.
Audience: Graduate

HISTORY 359 – HISTORY OF EUROPE SINCE 1945
3-4 credits.

Political, cultural, and social history of Europe from the Second World War to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Discuss Europe's social, political, and cultural history.
Audience: Both Grad & Undergrad

2. Situate Europe's changing place in the world (loss of great power status; loss of Empire; development of the European Union).
Audience: Both Grad & Undergrad

3. Describe how the past informs Europe's present, and how contemporary developments shape our understanding of the continent's past.
Audience: Both Grad & Undergrad

4. Use different kinds of sources (novels, primary sources, secondary sources) to make persuasive arguments about the past.
Audience: Both Grad & Undergrad

5. Interpret and evaluate key scholarly debates in the historiography of postwar Europe.
Audience: Graduate

HISTORY/ENGL/RELIG ST 360 – EARLY MEDIEVAL ENGLAND
3 credits.

Introduction to the peoples and cultures of Early Medieval England (c450-c1100), with primary emphasis on texts written in Old English and Latin. Interdisciplinary approach including history, literature, religion, and material culture. Attention to literary genres ranging from elegy to riddles; the development of Christianity; encounters with Romans, Vikings, and Normans; and other political and social concerns. All readings in translation.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Literature
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize and discuss major forms, techniques, social conditions, values, and genres that have shaped the history of English literature, language, and culture.
Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods related to Early Medieval England.
Audience: Undergraduate

3. Write original, coherent, and compelling arguments about assigned texts and/or objects that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness.
Audience: Undergraduate

HISTORY/CLASSICS/POLI SCI 362 – ATHENIAN DEMOCRACY
3 credits.

Explores key issues in the ideology and practice of Athenian democracy. Examines democratic values, institutions, rhetoric, and sociology in order to provide the basic tools to understand democracy in its ancient context. Engages with a variety of source material (literary, archaeological, epigraphic) in order to develop multiple skills of interpretation. Some questions examined include: What are the key features of Athenian democracy, how did it change over time, and how did it differ from modern democracy? How did the Athenians justify and critique this political system? How did they reconcile citizen egalitarianism with social inequalities of wealth, gender, and status? To what extent were women, foreigners, slaves, or the poor included or excluded from politics? Was Athenian democracy a robust political system or a system in crisis?
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Understand and use appropriately the specific terminology (names, places, concepts) related to Athenian democracy
Audience: Undergraduate

2. Discuss with appropriate methodological awareness conflicting views expressed in modern scholarship
Audience: Undergraduate

3. Analyze problems relating to the reconstruction of historical concepts in the ancient world with reference to relevant source material
Audience: Undergraduate

4. Critically read and engage with complex academic texts (both ancient sources and modern literature)
Audience: Undergraduate

5. Present knowledge, ideas, and analysis orally (in classroom discussion) and in written formats
Audience: Undergraduate

HISTORY/ASIAN 363 – CHINA AND WORLD WAR II IN ASIA
3-4 credits.

This course is intended to help students understand World War II from the perspective of Asia. The focus is not only on the American and Japanese roles in the war but also on lesser, often overlooked participants such as China, Korea, and Southeast Asia. The course will focus not only on the diplomatic, political, and military situation of wartime Asia, but also on perceptions and experiences of the war from those most heavily affected by it: those experiencing it on the ground. Understanding this war is critical for helping us understand contemporary Asia. The foundations of the Cold War and the post-Cold War world that we live in today were forged on battlefields in mainland China, Burma, small islands in the Pacific, and in the skies over the archipelago of Japan. In order to provide the background and understand the legacies, this course covers an extended time frame, beginning in the 19th century with the arrival of the West in Asia and continues into the 1950s.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Discuss the impact of World War II from the perspective of Asia and from China in particular.
Audience: Undergraduate

2. Describe the diplomatic, political, and military situation of wartime Asia, as well as the perceptions and experiences of the war from those most heavily affected by it: those experiencing it on the ground.
Audience: Undergraduate

3. Explain how the foundations of the Cold War and the post-Cold War that world that we live in today were forged on the World War II battlefields of Asia.
Audience: Undergraduate

HISTORY/INTL ST 366 – FROM FASCISM TO TODAY: SOCIAL MOVEMENTS AND POLITICS IN EUROPE
3-4 credits.

Investigates how everyday people shaped European history and politics, from World War I through today. Takes a comparative and interdisciplinary approach to analyze a range of major social movements in Europe, thinking in detail about what constitutes a social movement in the first place, and what determines its effectiveness. Key topics include the rise and fall of Fascism; the fate of the Communist and Socialist Left in Europe; the role of youth movements as drivers of change; and the constraints imposed on political organizing by both democratic and authoritarian societies. Drawing on a range of texts, songs, and films, investigates how people power has shaped the European state, and vice-versa, from 1922 through today.
Requisites: Sophomore standing or 3 credits in HISTORY
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Refine their ability to read, analyze, and critically engage with primary and secondary sources.
Audience: Undergraduate

2. Craft sophisticated analytical arguments.
Audience: Undergraduate

3. Communicate complex ideas through speech, charitably evaluating opposing viewpoints, and working collaboratively with others.
Audience: Undergraduate

4. Become familiar with the building-blocks of European transnational and international history, and expose students to the study of social movements.
Audience: Graduate

5. Hone hermeneutical skills so as to evaluate and interpret sources more judiciously and charitably.
Audience: Graduate

6. Develop confidence as keen writers, sharp public speakers, and probing analysts of the past and present.
Audience: Graduate

HISTORY/ENVIR ST 369 – THINKING THROUGH HISTORY WITH ANIMALS
3-4 credits.

Explores the history of human relationships with animals around the world with focus on agriculture and hunting, political economic development, human identity, and biological science and conservation.
Requisites: Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Analyze the roles of animals in shaping human identity
Audience: Undergraduate

2. Describe and apply key concepts in animal and environmental history to analyze changing patterns of social organization
Audience: Undergraduate

3. Integrate humanities and natural science perspectives to understand the interplay of nature and society in shaping history
Audience: Undergraduate

4. Connect changing relationships among humans and animals to broader processes of economic and cultural development
Audience: Undergraduate

HISTORY/INTL ST 375 – THE COLD WAR - FROM WORLD WAR II TO END OF SOVIET EMPIRE
3-4 credits.

The Cold War was the first event to impact virtually all of humanity and left a lasting legacy that still shapes the current world order. Exploration of its conduct on five continents entails both a diversity of sources (film, fiction, documents, and memoir) and a range of topics (geopolitics, ideology, internationalism, empire, revolution, counterinsurgency, and covert operations). Its half-century history was marked by nuclear-armed stalemate and ideological competition in Europe, cultural politics of repression and generational revolt in America, interplay of anti-colonial nationalism and counterinsurgency in Asia, Africa, and Latin America, and a succession of major wars worldwide in Korea, Vietnam, Angola, and Afghanistan. By adopting an international perspective that carries us beyond the narrow ambit of the Moscow-Washington rivalry, integrate diverse global forces and particular national histories for a fuller understanding of an ever-changing world system.
Requisites: Sophomore standing or 3 credits in HISTORY or INTL ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Interpret primary sources
Audience: Undergraduate

2. Develop a refined ability to critically analyze secondary sources
Audience: Undergraduate

3. Merge a considered thesis, operational factors, and empirical evidence into a coherent analytical narrative
Audience: Undergraduate

4. Edit their own prose for both grace and clarity
Audience: Both Grad & Undergrad

5. Develop a perspective on how to incorporate primary sources in undergraduate teaching
Audience: Graduate

6. Develop a foundation for teaching their own world history courses, which are a requirement for job placement in a growing number of colleges and universities
Audience: Graduate

7. Develop a resonant sense of the extraordinary carrying capacity of historical narrative
Audience: Graduate

HISTORY/AMER IND 380 – SOVEREIGNTY AND THE SCHOOLHOUSE
3 credits.

Introduction to the history of American Indian education. Evaluate the relationship between education and sovereignty through a survey of schools including missions, boarding schools, survival schools, tribal colleges, language nests, charter schools, and more.
Requisites: AMER IND 100, HISTORY/AMER IND 190, or graduate/professional standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify important concepts in the history of education and American Indian studies to understand how the past has affected present day circumstances regarding inequalities in education in Indian Country and in the U.S.
Audience: Both Grad & Undergrad

2. Evaluate theories of schooling and sovereignty through the interpretation of primary sources related to American Indian education to practice historical empathy toward the cultural perspectives and worldviews of others.
Audience: Both Grad & Undergrad

3. Craft rigorous historical arguments in the form of an original research paper on the history of an American Indian school, and question cultural assumptions and knowledge claims as they relate to race, ethnicity, and sovereignty in education.
Audience: Both Grad & Undergrad

4. Assess the foundational works in the historiography on schooling in Native lives, communities, and nations as part of the field of contemporary Indigenous Studies.
Audience: Graduate

HISTORY/GEN&WS 392 – WOMEN AND GENDER IN MODERN EUROPE
3-4 credits.

An examination of the cultural role of gender and the social, economic, and political activities of women in modern Europe from the 18th to the late 20th centuries.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Describe the significance of gender as a category for historical analysis, and the analytical value of exploring women's agency as historical actors.
Audience: Undergraduate

2. Discuss women's experience of major events in modern European history, explaining how additional factors like age, marital status, religion, and class differentiated that experience.
Audience: Undergraduate

3. Identify the chief ways in which widely shared European norms and beliefs concerning gender and sexuality changed over the course of the modern period.
Audience: Undergraduate

4. Describe how different political actors (French revolutionaries, Italian fascists, Soviet Communists, German feminists, etc.) promoted distinct visions of proper gender roles for men and women.
Audience: Undergraduate

5. Analyze historical evidence in the form of primary source documents.
Audience: Undergraduate

6. Analyze secondary sources, recognizing the authors' major arguments and the types of evidence they employ.
Audience: Undergraduate

7. Construct your own written historical arguments by drawing critically on multiple sources.
Audience: Undergraduate

HISTORY/AFROAMER 393 – SLAVERY, CIVIL WAR, AND RECONSTRUCTION, 1848-1877
3-4 credits.

African-American slavery and its impact on mid-19th century social, political, and economic life; the causes, course, and consequences of the Civil War; the rise and fall of postwar Reconstruction and non-racial citizenship; the impact of these histories on contemporary American society.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe the history of slavery in the United States, the sectional crisis, the Civil War, slave emancipation, and Reconstruction, including their relation to the transformation and persistence of Native American societies in the context of U.S. conquest and settlement.
Audience: Undergraduate

2. Discuss the reverberation of these histories in contemporary U.S. society.
Audience: Undergraduate

3. Analyze critically what they have previously been taught about the Civil War and its relationship to the history of slavery, freedom, and the United States.
Audience: Undergraduate

4. Explain why this history remains contested and controversial, and recognize what is at stake in these debates.
Audience: Undergraduate

HISTORY 400 – UNDERGRADUATE HISTORY SYMPOSIUM
1 credit.

Whatever we do, wherever we go, we are encountering history and reckoning with some consequence radiating out from the past. Designed to awaken us to the myriad ways in which the past is present all around us, and to help cultivate the historian's habits of mind in our everyday experiences. In addition to faculty-led group discussions, centers on intellectual opportunities in Madison such as special lecture series and conversations with UW faculty and outside guests. Themes and topics will vary, depending on the instructor and opportunities for engagement with the wider intellectual community of Madison.
Requisites: Declared in the History undergraduate program, Certificate in History, or 6 credits in HISTORY or HIST SCI
Course Designation: Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022
Learning Outcomes: 1. Prepare to get the most out of a lecture by researching the speaker, reading something related to the topic, and thinking about possible approaches.
Audience: Undergraduate

2. Participate comfortably and appropriately in a formal academic lecture setting.
Audience: Undergraduate

3. Reflect critically on a lecture or event.
Audience: Undergraduate

4. Discuss complex points productively and respectfully.
Audience: Undergraduate

5. Recognize contextual influences on the perspectives and actions of scholars and others, including oneself.
Audience: Undergraduate

6. Cultivate a lifetime sense of curiosity and wonder.
Audience: Undergraduate

HISTORY 401 – PUBLIC HISTORY WORKSHOP
3 credits.

Introduction to the practice of public history. Public historians ground their work in rigorous, academic research with the goal of presenting history in a collaborative and publicly focused manner. These projects come in many forms including exhibits, walking tours, podcasts, documentaries, web projects, and place-based interpretation, to name a few. Learn how academic history gets presented to the public, not only by reading about public history, but by doing it.
Requisites: HISTORY 201 or 3 credits in HISTORY or HIST SCI
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and understand theoretical and methodological underpinnings of public history
Audience: Undergraduate

2. Analyze how research gets presented to the public
Audience: Undergraduate

3. Assess the usefulness of various formats in sharing particular histories with different audiences
Audience: Undergraduate

4. Produce public history projects
Audience: Undergraduate

5. Consider factors that affect the production and reception of public history projects
Audience: Undergraduate

6. Collaborate and share authority with members of the public whose stories are being told
Audience: Undergraduate

7. Identify different specialties of public history and recognize the wide array of employment opportunities and roles in the field
Audience: Undergraduate

HISTORY 403 – IMMIGRATION AND ASSIMILATION IN AMERICAN HISTORY
3-4 credits.

Survey of immigration to the U.S. from colonial times to the present with analyses of the roles of ethnic and racial groups in economics and politics, the reactions of earlier arrivals to their successors, the extent of assimilation and contemporary ethnic and racial consciousness.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2024
Learning Outcomes: 1. Articulate how the history of immigration has affected present day circumstances regarding race, ethnicity, and inequities in the U.S.
Audience: Both Grad & Undergrad

2. Summarize the basic narrative of American immigration, articulating different motivations for immigration across historical eras
Audience: Both Grad & Undergrad

3. Identify changing policies and procedures controlling immigration and naturalization.
Audience: Both Grad & Undergrad

4. Describe times when immigration and inter-group relations have been critical elements in domestic politics.
Audience: Both Grad & Undergrad

5. Interpret and evaluate key scholarly debates in the historiography of American immigration.
Audience: Graduate

HISTORY/RELIG ST 409 – CHRISTIANITY IN THE ATLANTIC WORLD, 1500-1800
3 credits.

Between the late Middle Ages and the era of democratic revolutions Western Christianity saw a series of sweeping changes that altered its global profile and helped form the modern world - examines some of these shifts and their impact. Questions explored include: Why did the Reformations of the 16th century occur and with what effects on people's lives and on early modern societies? What was the relationship between European colonization, the Atlantic slave trade, new theories of race, and the spread of Christianity to the "New World"? How was the Christian religion resisted, received, and reshaped by Native Americans and people of African descent? What sparked movements of reform and renewal - including new Catholic religious orders and the Protestant Evangelical Awakening - and with what consequences for modern Christianity? How did the nature of Christian belief and identity change under the impact of religious conflict, political revolution, and new intellectual movements?
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Identify and explain the significance of key trends, thinkers, and texts in the history of early modern Christianity
Audience: Undergraduate

2. Analyze and evaluate some of the scholarly debates in the field of early modern Christianity
Audience: Undergraduate

3. Interpret complex writings from the past contextually, critically, and empathetically
Audience: Undergraduate

4. Construct strong historical arguments based on evidence and careful reasoning
Audience: Undergraduate

5. Compose clear analytical and argumentative written prose
Audience: Undergraduate

HISTORY 410 – HISTORY OF GERMANY, 1871 TO THE PRESENT
3-4 credits.

Political and social development of Central Europe from the establishment of the German Empire to the post-World War II period.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Evaluate primary sources to answer questions about authorship, perspective, audience, context, and credibility.
Audience: Both Grad & Undergrad

2. Identify the major turning points in German history since 1871, as well as continuities across these ruptures.
Audience: Both Grad & Undergrad

3. Assess the significance of nationalism, industrialization, colonialism, immigration, war, economic crisis, and foreign occupation as agents of change in modern German history.
Audience: Both Grad & Undergrad

4. Develop an original historical argument based on primary source research.
Audience: Both Grad & Undergrad

5. Interpret and evaluate key scholarly debates in the historiography of modern Germany.
Audience: Graduate

HISTORY/RELIG ST 411 – THE ENLIGHTENMENT AND ITS CRITICS
3 credits.

European intellectual history in the 17th and 18th centuries, from the Wars of Religion to the French Revolution. Examines the rise of Enlightenment thought in relation to political and religious conflict, revolutions in science and philosophy, and the emergence of the public sphere. Special attention is paid to the Enlightenment's relationship to religion and to contemporary critiques made of Enlightenment thinking, including those of the early Romantic movement.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain key trends, flashpoints, personalities, and texts associated with the Enlightenment.
Audience: Both Grad & Undergrad

2. Demonstrate the ability to think historically, grasping the importance of context, causality, contingency, complexity, and change over time for understanding the past.
Audience: Both Grad & Undergrad

3. Interpret sources from the past contextually, critically, and empathetically.
Audience: Both Grad & Undergrad

4. Construct strong historical arguments based on evidence and clear reasoning.
Audience: Both Grad & Undergrad

5. Compose clear analytical and argumentative written prose.
Audience: Both Grad & Undergrad

6. Interpret and evaluate key scholarly (or historiographical) debates in Enlightenment studies.
Audience: Graduate

HISTORY/ED POL 412 – HISTORY OF AMERICAN EDUCATION
3 credits.

Examines the history of education in America from the colonization of North America to the present to consider education in its broadest sense - as a process of individual development and cultural transmission. Explores such topics as the rise of common schools in the urban North; the education of Native Americans, immigrants, slaves, and free blacks; the evolution of teacher training (primarily for women); various philosophies of "progressive" school reform; the politics of desegregation, bilingual education, and special education; the articulation between high school and college work; and the evolving federal role in American education.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. demonstrate their knowledge and explain the significance of key actors, events, themes, and ideas relating to the history of American education
Audience: Both Grad & Undergrad

2. interpret and contextualize primary historical sources
Audience: Both Grad & Undergrad

3. identify and evaluate historical arguments in secondary scholarly works
Audience: Both Grad & Undergrad

4. locate, synthesize, and evaluate information from primary and/or secondary sources in order to develop and support their own evidence-based historical interpretations
Audience: Undergraduate

5. locate, synthesize, and evaluate relevant primary historical sources in order to construct evidence-based historical interpretations.
Audience: Graduate

HISTORY 417 – HISTORY OF RUSSIA
3-4 credits.

Origins and evolution of the Russian people and state; political, economic, and social history; foreign relations as they affect domestic policy; from the ninth century to 1800.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2021

HISTORY 418 – HISTORY OF RUSSIA
3-4 credits.

Russian political, economic, and social history from 1800 to 1917; foreign relations as they affect domestic policy.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Identify and debate major turning points in Russian imperial history.
Audience: Both Grad & Undergrad

2. Explain why the Tsarist autocracy lasted for so long and why it collapsed in 1917.
Audience: Both Grad & Undergrad

3. Explain why Russia's relationship to Europe - or "the West" - has been so fraught.
Audience: Both Grad & Undergrad

4. Assess the significance of concepts like empire and nation for interpreting imperial Russian history.
Audience: Both Grad & Undergrad

5. Communicate ideas, questions, and conclusions clearly in written and spoken form to make compelling arguments.
Audience: Both Grad & Undergrad

6. Delineate and evaluate key historiographical debates in imperial Russian history.
Audience: Graduate

HISTORY 419 – HISTORY OF SOVIET RUSSIA
3-4 credits.

Major political, economic and social developments in Russia since 1917.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Explain the causes and consequences of the two Russian Revolutions of 1917.
Audience: Both Grad & Undergrad

2. Identify and debate major turning points in Soviet history.
Audience: Both Grad & Undergrad

3. Debate key questions of Soviet history, including: What was Marxism-Leninism? What was socialism? What was internationalism? How do people live under totalitarian regimes?
Audience: Both Grad & Undergrad

4. Analyze the causes and consequences of the Cold War.
Audience: Both Grad & Undergrad

5. Explain why the Soviet Union collapsed in 1991.
Audience: Both Grad & Undergrad

6. Assess the significance of concepts like class, nation, empire, race, and gender for interpreting Soviet history.
Audience: Both Grad & Undergrad

7. Extract reliable information from primary sources. Analyze the meaning and significance of written and visual sources in their historical contexts.
Audience: Both Grad & Undergrad

8. Delineate and evaluate key historiographical debates in Soviet history.
Audience: Graduate

HISTORY 420 – RUSSIAN SOCIAL AND INTELLECTUAL HISTORY
3-4 credits.

Main currents of Russian social thought in the eighteenth and nineteenth centuries.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Identify and debate major turning points in the social and intellectual history of the Russian empire.
Audience: Both Grad & Undergrad

2. Explain why imperial Russian subjects - and contemporary observers - were so preoccupied with the question of whether the country was a part of Europe.
Audience: Both Grad & Undergrad

3. Analyze the relationship between the social conditions and intellectual trends that developed in the Russian empire to consider how they shaped one another.
Audience: Both Grad & Undergrad

4. Develop your own answer to the following question: how does the social and intellectual history of the Russian empire help you to situate the country, its conditions, and its peoples in the wider world?
Audience: Both Grad & Undergrad

5. Communicate ideas, questions, and conclusions clearly in written and spoken form to make compelling arguments.
Audience: Both Grad & Undergrad

6. Delineate and evaluate key historiographical debates in the social and intellectual history of the Russian empire.
Audience: Graduate

HISTORY/CHICLA/POLI SCI 422 — LATINO HISTORY AND POLITICS
3 credits.

Students will examine the historical, social, political, economic, and cultural experiences and conditions of Latinos, one of the largest US racial/ethnic minority groups. Course focus is on people who trace their origins to Mexico, the Caribbean, and countries of Latin America.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Discuss the complexity of the Latino population and divergent political agendas of various subgroups.
Audience: Undergraduate

2. Develop an understanding of the historical origins of how Latino social/political movements have emerged and changed.
Audience: Undergraduate

3. Evaluate the role of movements and activists in policy reform and social/political change.
Audience: Undergraduate

4. Examine the impact of the Latino vote on contemporary politics.
Audience: Undergraduate

5. Explore contemporary policy issues affecting the Latino population.
Audience: Undergraduate

HISTORY 424 — THE SOVIET UNION AND THE WORLD, 1917-1991
3-4 credits.

Surveys Soviet foreign relations from 1917-1991, examining the causes, course, and outcome of the Cold War. Topics include: Soviet-US relations, World War II, the Socialist Bloc, espionage, the space race, Sino-Soviet relations, and Soviet intervention in the 'Third World.'
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the domestic and international consequences of the two Russian Revolutions of 1917.
Audience: Both Grad & Undergrad

2. Identify and evaluate major turning points in the Soviet Union's relationship with other states.
Audience: Both Grad & Undergrad

3. Analyze how ideas, institutions, armies, and cultures moved across borders in the 20th century.
Audience: Both Grad & Undergrad

4. Debate the causes and consequences of the Cold War from different points of view.
Audience: Both Grad & Undergrad

5. Assess the significance of concepts like socialist internationalism, totalitarianism, communism, and fascism for thinking about the 20th century.
Audience: Both Grad & Undergrad

6. Extract reliable information from primary sources. Analyze the meaning and significance of written and visual sources in their historical contexts.
Audience: Both Grad & Undergrad

7. Delineate and evaluate key historiographical debates in Soviet history.
Audience: Graduate

HISTORY/LEGAL ST 426 – THE HISTORY OF PUNISHMENT
3-4 credits.

Examines punishment across a vast range of historical traditions, examining how wrongdoing and punishment have been figured in law, literature, art and philosophy. Examines ancient, medieval and modern traditions.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe punishment across a wide range of historical traditions.
Audience: Both Grad & Undergrad

2. Evaluate a variety of historical materials to determine their origins, perspective, usefulness, and reliability.
Audience: Both Grad & Undergrad

3. Analyze influences that shape historical narratives and debates across genres and media.
Audience: Both Grad & Undergrad

4. Recognize multiple ways of being in the world, and how what may seem natural in a society has been built over decades of accumulated human actions.
Audience: Both Grad & Undergrad

5. Assess the historiography or other scholarly debates that have shaped the study of punishment.
Audience: Graduate

HISTORY 427 – THE AMERICAN MILITARY EXPERIENCE TO 1902
3-4 credits.

A survey of American military experience from the 16th century through the development of a nascent American "empire" at the turn of the 19th and 20th centuries, examining the influence of warfare on all aspects of American society.
Requisites: Sophomore standing. Not open to students with credit for HISTORY 345.
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Identify and describe the diverse military traditions that collided in colonial America and how and why these different "ways of war" evolved to the dawn of the twentieth century.
Audience: Both Grad & Undergrad

2. Analyze the twin development of the American citizen-soldier tradition and the American profession of arms.
Audience: Both Grad & Undergrad

3. Explain how political, cultural, economic, and technological factors influenced American military institutions, decisions to go to war, and the conduct of military operations.
Audience: Both Grad & Undergrad

4. Explain how and why American military policies, institutions, and practices changed or remained consistent over time and assess if there are persistent themes or areas of continuity that constitute a distinctly "American way of war."
Audience: Both Grad & Undergrad

5. Analyze warfare as a human experience endured on the battlefield, at sea, in the sky, on the home front, at desolate outposts, and in councils of government.
Audience: Both Grad & Undergrad

6. Assess#the relationship between national expansion (in physical, commercial, and ideological sense) and American military history.
Audience: Both Grad & Undergrad

7. Assess significant work in the historiography of early and/or nineteenth-century American military history.
Audience: Graduate

HISTORY 428 – THE AMERICAN MILITARY EXPERIENCE SINCE 1899
3-4 credits.

A survey of American military experience in the 20th and 21st centuries, examining the influence of warfare on all aspects of American society.
Requisites: Sophomore standing. Not open to students with credit for HISTORY 345.
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Analyze the United States' rise as a global economic and military power.
Audience: Both Grad & Undergrad

2. Explain how political, cultural, economic, and technological factors influenced American military institutions, decisions to go to war, and the conduct of military operations.
Audience: Both Grad & Undergrad

3. Explain how and why American military policies, institutions, and practices changed or remained consistent over time and assess if there are persistent themes or areas of continuity that constitute a distinctly "American way of war."
Audience: Both Grad & Undergrad

4. Analyze the "national security state" that emerged after World War II and its subsequent development.
Audience: Both Grad & Undergrad

5. Explain the United States's transition to an all-volunteer force.
Audience: Both Grad & Undergrad

6. Analyze warfare as a human experience endured on the battlefield, at sea, in the sky, on the home front, at desolate outposts, and in councils of government.
Audience: Both Grad & Undergrad

7. Assess significant work in the historiography of twentieth- and/or twenty-first-century American military history.
Audience: Graduate

HISTORY/ENVIR ST/LEGAL ST 430 – LAW AND ENVIRONMENT: HISTORICAL AND CONTEMPORARY PERSPECTIVES
3 credits.

Explores environmental studies through a focus on law and legal history. Although its main concentration is on U.S. environmental law, the course will begin and end with broader historical and global perspectives. Topics include a survey of English, European, and early American legal approaches to land use, natural resources, and pollution through World War II as well as an examination of the development and practice of contemporary U.S. environmental law and consideration of the recent emergence of international environmental law.
Requisites: Sophomore standing
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Analyze and articulate their own arguments about how social, political, and cultural phenomena shape law and legal systems.
Audience: Both Grad & Undergrad

2. Analyze and articulate their own arguments about the social, political, and cultural impacts of law at the societal and individual levels.
Audience: Both Grad & Undergrad

3. Demonstrate knowledge about how legal ideas and ideologies have changed over time and have shaped law and legal systems.
Audience: Both Grad & Undergrad

4. Demonstrate their abilities to find, interpret, and utilize resources relevant to law and society.
Audience: Both Grad & Undergrad

5. Demonstrate their abilities to analyze information, to write clearly and persuasively, and to construct original arguments.
Audience: Both Grad & Undergrad

6. Analyze the causes of and solutions for the sustainability challenge of the conservation of natural resources, especially insofar as their governance involves and impacts local stakeholders.
Audience: Both Grad & Undergrad

7. Analyze the social, economic, legal, political, and environmental dimensions of the sustainability challenge of regulating and governing biodiversity, clean air and water, and other, larger earth systems (such as climate).
Audience: Both Grad & Undergrad

8. Demonstrate an advanced understanding of the historiography or other scholarly debates that have shaped the study of conservation and environmental law.
Audience: Graduate

HISTORY/SCAND ST 431 – HISTORY OF SCANDINAVIA TO 1815
3 credits.

Political, social, economic, and cultural developments of Scandinavia through the "Viking Age" to the break-up of Sweden-Finland and Denmark-Norway; emphasis on the interplay between social and political forces and institutions and the area's relationship with the rest of Europe.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Analyze major historical developments in the Nordic region to explain how cultural, linguistic, and political shifts shaped Scandinavian societies up to 1815.
Audience: Both Grad & Undergrad

2. Interpret primary sources from the medieval period - including texts, artifacts, and visual culture - to investigate the religious, political, and social structures of early Scandinavian kingdoms.
Audience: Both Grad & Undergrad

3. Evaluate diverse types of historical evidence to construct arguments about continuity and change in Scandinavian history from the medieval period to the early 19th century.
Audience: Both Grad & Undergrad

4. Synthesize perspectives from history, literature, and material culture to develop a nuanced understanding of Scandinavian identity and state formation across time.
Audience: Both Grad & Undergrad

5. Conduct historical research using primary and secondary sources and communicate their findings effectively through written and oral formats tailored to academic and public audiences.
Audience: Graduate

HISTORY/SCAND ST 432 – HISTORY OF SCANDINAVIA SINCE 1815
3 credits.

Political, social, economic, and cultural development: political realignments and rise of nationalism, industrialization and rise of liberalism and socialism, democratization, independence struggles and social conflict, evolution of welfare states, World War II and its aftermath.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Explain the significance of major historical events, figures, processes, and periods in the Nordic region since 1815.
Audience: Both Grad & Undergrad

2. Analyze modern and contemporary Scandinavian culture, politics, and society from an informed historical perspective.
Audience: Both Grad & Undergrad

3. Interpret historical information, engage in discussion and debate, and argue persuasively about significant topics in the Nordic history.
Audience: Both Grad & Undergrad

4. Graduate students will be able to do all of the above with reference to a larger amount of academic scholarship and secondary literature written in both English and the Nordic languages.
Audience: Graduate

HISTORY 434 – AMERICAN FOREIGN RELATIONS, 1901 TO THE PRESENT
3-4 credits.

America's relations with the world, emphasizing the economic, political and ideological elements determining policy.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify major turning points in American foreign relations history within the larger global context of colonialism and the 20th century.
Audience: Both Grad & Undergrad

2. Describe and apply different interpretive approaches to the study of U.S. empire.
Audience: Both Grad & Undergrad

3. Synthesize the history of the struggle over American foreign relations at local, national, regional, and global scales.
Audience: Both Grad & Undergrad

4. Analyze critically both primary and secondary sources.
Audience: Both Grad & Undergrad

5. Communicate clearly and effectively though argumentative writing.
Audience: Both Grad & Undergrad

6. Assess significant works in the historiography of U.S. Empire.
Audience: Graduate

HISTORY/CHICLA 435 – COLONY, NATION, AND MINORITY: THE PUERTO RICANS' WORLD
3 credits.

A historical introduction to the Puerto Rican experience, from island to mainland. Varieties of colonial rule, social institutions, cultural processes, and ethnic and national identity. Migration to the U.S. and social dynamics of stateside communities.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify major trends and debates in the historical studies about Puerto Rico and its global diaspora.
Audience: Both Grad & Undergrad

2. Explain how those who have inhabited the Puerto Rican archipelago have resisted and navigated colonialism.
Audience: Both Grad & Undergrad

3. Compare and contrast Spanish and United States colonialism in Puerto Rico.
Audience: Both Grad & Undergrad

4. Analyze the complex realities of Puerto Rican communities in the archipelago and abroad.
Audience: Both Grad & Undergrad

5. Evaluate colonial violence in present-day Puerto Rico
Audience: Both Grad & Undergrad

6. Analyze the history of Puerto Rico through the lens of three key concepts: la brega, coloniality, and nationhood.
Audience: Both Grad & Undergrad

7. Demonstrate advanced written and analytic skills through engagement with course materials.
Audience: Graduate

HISTORY 450 – MAKING OF MODERN SOUTH ASIA
3-4 credits.

Everything you ever hear about South Asia is true. But the exact opposite is also true. Tradition and modernity, development and stagnation, the past and the future all exist simultaneously, at times in harmony and at other times in conflict with one another. Through an exploration of the political, social and economic history of this region from the 18th century to the present day, learn about the making of modern South Asia and attempt to understand this paradox.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe the history of inter-regional relations between South Asian countries.
Audience: Both Grad & Undergrad

2. Conduct historical research and analysis, including the use of primary sources.
Audience: Both Grad & Undergrad

3. Assess significant work in the historiography of modern South Asia and critically evaluate inter-regional entanglements using historical research skills.
Audience: Graduate

HISTORY/ASIAN 454 – SAMURAI: HISTORY AND IMAGE
3-4 credits.

Japanese warriors, their ideals, and their images from the tenth century to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain how and why the roles of samurai changed over time. Identify the general political, economic, military, social, and cultural positions of warriors in Japan from the twelfth century to the present, as well as key transitions between them.
Audience: Both Grad & Undergrad

2. Explain how and why images of samurai changed over time. Use texts and visual images to demonstrate how and why a variety of people depicted samurai in different ways for different purposes.
Audience: Both Grad & Undergrad

3. Build a habit of close, active reading in context. Parse texts and contexts - researching and considering the nuances of words, references, and relevant surrounding information - to identify writers' arguments, perspectives, and purposes.
Audience: Both Grad & Undergrad

4. Extract reliable information from a source. Analyze and explain the context, meaning, and significance of a written or visual source to determine what can be learned from it.
Audience: Both Grad & Undergrad

5. Recognize and develop clearly structured, evidence-based arguments. Identify and develop strong thesis statements and the rhetorical structures needed to support them with a clear, logical, evidence-based argument.
Audience: Both Grad & Undergrad

6. Convey original analytical findings clearly and concisely. Briefly and clearly present original conclusions, including reasoning and support.
Audience: Both Grad & Undergrad

7. Situate scholarship on samurai within a larger body of historical analysis.

Audience: Graduate

HISTORY/ASIAN 456 – PEARL HARBOR & HIROSHIMA: JAPAN, THE US & THE CRISIS IN ASIA
3-4 credits.

Events leading to the Pearl Harbor attack, the conduct of World War II in the Pacific, the nature of the wartime Japanese state and effects of the war on Japanese society, the dropping of the atomic bombs, and Japan's decision to surrender. The war as an epoch in Japanese history.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Use effective reading strategies to synthesize complex historical material.
Audience: Both Grad & Undergrad

2. Conduct and execute a historical research project, including identifying a historical question, developing a bibliography, working with outlines to build an argument.
Audience: Both Grad & Undergrad

3. Describe the causes and outcomes of World War II in Asia.
Audience: Both Grad & Undergrad

4. Assess significant work in the historiography of World War II in Asia.
Audience: Graduate

HISTORY/ASIAN 458 – HISTORY OF SOUTHEAST ASIA SINCE 1800
3-4 credits.

Effects of the modern Western revolution on the established societies of Southeast Asia through colonial rule and economic and cultural change. Not open to students with credit for LCA 458 prior to Fall 2018.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe the relationships between local and regional histories and broader, global historical trends that characterize the emergence of modernity.
Audience: Both Grad & Undergrad

2. Interpret and contextualize a variety of primary textual, visual, and material sources produced in and about Southeast Asia to develop the historian's analytic toolkit.
Audience: Both Grad & Undergrad

3. Analyze critically the histories of Southeast Asia to understand the enduring consequences of colonial-era transformations on the cultures and societies of the peoples of the region.
Audience: Both Grad & Undergrad

4. Assess the historiography of the region through in-depth structural analyses of other scholars' uses of primary sources, and by doing so acquire a solid foundation with which to contextualize future interventions into the field.
Audience: Graduate

HISTORY/LEGAL ST 459 – RULE OF LAW: PHILOSOPHICAL AND HISTORICAL MODELS
3-4 credits.

From the perspectives of history and political theory, examines the multiple meanings of the idea of the rule of idea, and its uses in American history. Explore prominent critiques of the rule of law ideal.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Analyze the debates and issues that arise around the term "the rule of law".
Audience: Both Grad & Undergrad

2. Describe the historical developments undergirding modern law and modern legal institutions.
Audience: Both Grad & Undergrad

3. Explain how conceptions of "the rule of law" have been and continue to be mobilized to expand or restrict individual freedom and to exploit or preserve economic and natural resources.
Audience: Both Grad & Undergrad

4. Assess the historiography or other scholarly debates that have shaped the study of the rule of law.
Audience: Graduate

HISTORY/ENVIR ST/GEOG 460 – AMERICAN ENVIRONMENTAL HISTORY
4 credits.

Survey of interactions among people and natural environments from before European colonization to present. Equal attention to problems of ecological change, human ideas, and uses of nature and history of conservation and environmental public policy.
Requisites: Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Discuss the basic questions posed by environmental history as a field and method for doing historical scholarship.
Audience: Both Grad & Undergrad

2. Evaluate the continuities and shifts between environmental politics, in relation to social and economic and racial formations and material conditions in U.S. history.
Audience: Both Grad & Undergrad

3. Communicate effectively about the relevance of the past to the environmental present through argumentative writing.
Audience: Both Grad & Undergrad

4. Assess foundational work in the historiography on environmental history.
Audience: Graduate

HISTORY/ENVIR ST 465 – GLOBAL ENVIRONMENTAL HISTORY
3-4 credits.

Explores the history of human relationships with the environment on a global scale through analysis of long-term changes, from early civilizations, to the beginnings of global trade, the Industrial Revolution, urbanization, and 20th century technological developments. Offers first-hand historiographical research experience and training in writing for public web audiences.
Requisites: Sophomore standing or 3 credits in HISTORY, GEOG or ENVIR ST
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define "the Anthropocene" and evaluate different approaches for dating and naming this new "human age"
Audience: Both Grad & Undergrad

2. Analyze the intersections of multiple historical socio-natural processes – such as extraction, colonialism, racism, capitalism, agriculture, industrialization, and modernization—to explain the production of uneven development and environmental crises
Audience: Both Grad & Undergrad

3. Document and analyze aspects of modern life that will be "modern fossils" in the distant future
Audience: Both Grad & Undergrad

4. Explain the importance of historical analysis for understanding contemporary environmental problems
Audience: Both Grad & Undergrad

5. Apply historical methods to analyze how a material object of their choice illustrates a particular interpretation of the Anthropocene
Audience: Both Grad & Undergrad

6. Assess significant works in the historiography of global environmental history and interdisciplinary Anthropocene studies
Audience: Graduate

HISTORY/ECON 466 – THE AMERICAN ECONOMY SINCE 1865
3-4 credits.

Emergence of the large corporation; growth and instability since the mid-nineteenth century; increasing government participation in the economy; the impact of war, depression, discrimination, and international responsibilities.
Requisites: ECON 101 or 111
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Describe critical economic events in American history.
Audience: Undergraduate

2. Discuss the application of fundamental concepts of economics to real-world issues facing the post-Civil-War United States.
Audience: Undergraduate

3. Identify the determinants and consequences of historical economic events, and use them to critique current economic issues.
Audience: Undergraduate

4. Evaluate quantitative claims with a focus on "orders of magnitude" and other practical skills.
Audience: Undergraduate

HISTORY/LEGAL ST 476 – MEDIEVAL LAW AND SOCIETY
3 credits.

Introduction to the central historical developments of law and legal institutions in the European middle ages (400-1500).
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2023
Learning Outcomes: 1. Discuss the central historical developments related to law and European social transformations in the years between 500 and 1500.
Audience: Both Grad & Undergrad

2. Describe how medieval conditions of thought and forms of social organization made the period's laws intelligible to those that practiced them, those that enforced them, and those that lived under them.
Audience: Both Grad & Undergrad

3. Analyze how legal practices and frameworks of power from the medieval period form the foundation for aspects of our own world.
Audience: Both Grad & Undergrad

4. Assess significant interdisciplinary scholarship on medieval law.
Audience: Graduate

HISTORY/LEGAL ST 477 – HISTORY OF FORENSIC SCIENCE
3 credits.

Examines the diverse paths followed by forensic science (including medical jurisprudence or forensic medicine) in various times and places, focusing on the English-speaking world from the nineteenth century until the present. Explore the many ways that law and science have worked together--or at cross-purposes--to generate and assess evidence at the crime scene, in the lab, in the courtroom, and beyond.
Requisites: Sophomore standing and (LEGAL ST/HISTORY 261, SOC/LEGAL ST 131, or POLI SCI/LEGAL ST 217), or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026

HISTORY/ED POL 478 – COMPARATIVE HISTORY OF CHILDHOOD AND ADOLESCENCE
3 credits.

Examines the growth of modern childhood and adolescent sub-cultures, class differences, literary and pictorial representations, legal and demographic developments, and the growth of educational theories and institutions.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2021
Learning Outcomes: 1. Demonstrate their knowledge and explain the significance of key actors, events, themes, and ideas related to the history of childhood and adolescence
Audience: Both Grad & Undergrad

2. Interpret and contextualize primary historical sources
Audience: Both Grad & Undergrad

3. Identify and evaluate information from primary and/or secondary sources in order to develop and locate, synthesize, and evaluate information from primary and/or secondary sources in order to develop and support their own evidence-based historical interpretations
Audience: Undergraduate

4. Locate, synthesize, and evaluate primary historical sources in order to construct evidence-based historical interpretations
Audience: Graduate

HISTORY 500 — READING SEMINAR IN HISTORY
3 credits.

Advanced exploration of selected topics, featuring small group discussion and intensive engagement with historical materials. Topics vary.
Requisites: HISTORY 201 or junior standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Synthesize diverse sources of information about a discrete historical topic.
Audience: Both Grad & Undergrad

2. Develop a convincing narrative or well-substantiated argument based on a close reading of a range of historical sources.
Audience: Both Grad & Undergrad

3. Communicate historical knowledge and argumentation clearly and effectively.
Audience: Both Grad & Undergrad

4. Lead and participate productively in purposeful collaboration, discussion, and feedback.
Audience: Both Grad & Undergrad

5. Develop historiographic knowledge as a foundation for future study in the field.
Audience: Graduate

HISTORY/HIST SCI/MED HIST 508 — HEALTH, DISEASE AND HEALING II
3-4 credits.

Medicine in Europe from the 18th century to mid-20th century, investigating changes in disease and demography, state interest in health care, the medical professions, and both scientific and alternative medical ideas.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Recognize the utility of humanistic methods for the study of medicine and public health
Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis
Audience: Undergraduate

3. Understand essential developments in the evolving relationship between medicine and public health in modern societies.
Audience: Undergraduate

HISTORY/LEGAL ST 510 — LEGAL PLURALISM
3 credits.

Historical and anthropological perspectives on non-state "law," or systems of rules generated by normative orders that lay beyond the state; case studies include the mafia, Tokyo tuna traders' court, orthodox Jewish diamond merchants, California gold miners' courts, Inuit song dueling.
Requisites: Sophomore standing and (LEGAL ST/HISTORY 261, SOC/LEGAL ST 131, or POLI SCI/LEGAL ST 217), or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY/CURRIC/ED POL/JEWISH 515 – HOLOCAUST: HISTORY, MEMORY AND EDUCATION
3 credits.

Explores the ways in which Holocaust history, memory and education are mutually entangled, politically charged and morally complex. Using primarily American sites of memory, critically analyze a variety of representations of the Shoah--in literature, films, memoirs, monuments, museums and classrooms.
Requisites: Junior standing
Course Designation: Core GenEd - Civics & Perspectives
Comm QR - Communication B
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Examine and question cultural assumptions and knowledge claims about race, ethnicity, and religion
Audience: Both Grad & Undergrad

2. Improve written and oral communication skills by engaging in critical conversations, making presentations, practicing group projects and writing papers
Audience: Both Grad & Undergrad

3. Demonstrate self-awareness and empathy to other worldviews and cultural differences and apply course concepts outside of the classroom by engaging in respectful conversations about race, ethnicity, and religion in our multi-cultural society
Audience: Both Grad & Undergrad

4. Construct and develop a meaningful project around a topic that interests you
Audience: Both Grad & Undergrad

5. Articulate answers to and pose complex questions regarding ethical issues, connecting historical events to present circumstances regarding racial inequalities
Audience: Undergraduate

6. Develop your academic writing by thinking carefully through your ideas and editing your work and your peers'
Audience: Undergraduate

7. Pose and answer complex historical and ethical questions regarding the Holocaust, genocide, their representations and political uses, connecting historical events to present circumstances regarding racial inequalities
Audience: Graduate

8. Develop interpersonal academic skills by editing peers' work
Audience: Graduate

HISTORY/CLASSICS/RELIG ST 517 – RELIGIONS OF THE ANCIENT MEDITERRANEAN
3 credits.

Ancient religions in their political, social and cultural contexts; topics include ritual, literary and artistic representations, religious persecutions, and/or modern approaches to the study of ancient religions. Chronological and geographical focus will vary between Greece, Rome, Judaea and Egypt.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.
Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.
Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.
Audience: Undergraduate

4. Demonstrate knowledge of ancient Mediterranean religions.
Audience: Undergraduate

HISTORY/JEWISH/SOC 518 – ANTISEMITISM IN EUROPEAN CULTURE
3 credits.

Through a critical and interdisciplinary lens, review the history and major theories of modern antisemitism in its past and present-day forms. Read scholarship on antisemitism, as well as canonical antisemitic texts, with attention to geographic, chronological, and cultural contexts. Learn about the origins, major themes, continuities and changes, and surprising endurance of antisemitism. Use historical thinking to understand antisemitism as a major historical problem and to address related contemporary issues with nuance.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the origins and development of antisemitism
Audience: Both Grad & Undergrad

2. Identify different elements and forms of antisemitism
Audience: Both Grad & Undergrad

3. Evaluate the claims in debates about the nature, origins, and development of antisemitism using historical evidence
Audience: Both Grad & Undergrad

4. Use historical evidence to assess the major theories of antisemitism
Audience: Both Grad & Undergrad

5. Critically analyze canonical antisemitic texts and understand classic and recent scholarship on antisemitism
Audience: Both Grad & Undergrad

6. Communicate clearly, effectively, and concisely in class discussions and writing assignments
Audience: Both Grad & Undergrad

7. Apply knowledge of antisemitism to understand it as an ongoing social problem
Audience: Both Grad & Undergrad

8. Develop original historical arguments using primary and secondary sources in discussion, presentations, and writing assignments.
Audience: Graduate

HISTORY/GEN&WS 519 – SEXUALITY, MODERNITY AND SOCIAL CHANGE
3 credits.

A history of sexuality approach to a period of major social, economic, and political change in US history, 1880-1930; medical, legal, and popular discourses shaping urbanization, reform, nationalism and colonialism.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020

HISTORY/JOURN 560 – HISTORY OF U.S. MEDIA
4 credits.

Evolution of the mass media in the United States in the context of political, social, and economic change.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and explain important people, themes, events, and technologies that shaped media history.
Audience: Both Grad & Undergrad

2. Identify and explain historical arguments in secondary literature.
Audience: Both Grad & Undergrad

3. Analyze primary sources and know what questions to ask to be able to do that.
Audience: Both Grad & Undergrad

4. Produce original historical knowledge through research in primary and secondary sources.
Audience: Both Grad & Undergrad

5. Produce research suitable for submission to an academic journal or history magazine.
Audience: Graduate

HISTORY/HIST SCI/MED HIST 564 – DISEASE, MEDICINE AND PUBLIC HEALTH IN THE HISTORY OF LATIN AMERICA AND THE CARIBBEAN
3 credits.

Examines the history of illness and medical practice in Latin America and the Caribbean from the colonial era until the present. Using an interdisciplinary set of sources, students will explore the different meanings of disease, body normativity, medical practice, and ideas about public health across different historical circumstances in the region.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019
Learning Outcomes: 1. Identify and analyze within their social, cultural and economic contexts key historical issues, and their significance, in the history of healing practices and public health in Latin America from the fifteenth century to the present.
Audience: Both Grad & Undergrad

2. Develop an understanding of the mutually shaping interactions between perceptions of health, illness and medical practices and culture and society in different Latin American historical scenarios.
Audience: Both Grad & Undergrad

3. Analyze the role of social factors -- race, gender, ethnicity, class, and sexual orientation, among others -- in shaping cultural realities related to body normativity, health, medical practice, public health and medical education in Latin America.
Audience: Both Grad & Undergrad

4. Analyze and synthesize information, provide evidence-based interpretations about the past, and develop arguments regarding social and cultural differences related to health and body concepts in different Latin American societies.
Audience: Both Grad & Undergrad

5. Identify the role patients, healthcare providers, institutions and the state played in modeling medical practice, ideas about the body, public health policies, and medical education in Latin America.
Audience: Both Grad & Undergrad

6. Discern the impact of international politics, acting through European and American programs of medical research and humanitarianism, in the shaping of ideas about race, medical hierarchies and public health policies in Latin American and Caribbean nations.
Audience: Both Grad & Undergrad

7. Understand the different methodological approaches and research strategies that historians, anthropologists, and other scholars have used to examine the histories of the medicine in Latin America from the sixteenth century to the present.
Audience: Graduate

HISTORY/SCAND ST 577 – CONTEMPORARY SCANDINAVIA: POLITICS AND HISTORY
3-4 credits.

Social, economic, and ideological changes, institutions, and movements and their relationships with the political processes and structures in the Nordic states.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Characterize and describe the Scandinavian welfare state.
Audience: Both Grad & Undergrad

2. Compare and contrast issues in the different Scandinavian countries.
Audience: Both Grad & Undergrad

3. Formulate relevant questions to question contemporary issues in Scandinavia.
Audience: Both Grad & Undergrad

4. Identify the challenges Scandinavia is facing.
Audience: Both Grad & Undergrad

5. Produce well-researched scholarly work that integrates primary materials with critical analysis and secondary scholarship.
Audience: Graduate

HISTORY 600 – ADVANCED SEMINAR IN HISTORY
3 credits.

Development and application of advanced research skills to a specific historical topic. Intensive writing and small group discussion results in a project demonstrating original or creative analysis of primary and secondary sources.
Requisites: HISTORY 201 or HIST SCI 211
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Accelerated Honors (!)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Create, plan, and execute a significant, self-designed and self-driven research project.
Audience: Undergraduate

2. Develop an original, well-substantiated argument that synthesizes diverse historical knowledge and is based on a critical analysis of primary sources.
Audience: Undergraduate

3. Communicate original historical research findings clearly and effectively.
Audience: Undergraduate

4. Lead and participate productively in purposeful collaboration, discussion, and feedback.
Audience: Undergraduate

HISTORY 601 – HISTORICAL PUBLISHING PRACTICUM
3 credits.

Hands-on instruction and experience in historical publishing. Discussion of the nature of historical research and writing.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the varieties of historical publishing (including print journals, research articles, popular articles, blogs, podcasts, websites) and analyze how they are changing.
Audience: Undergraduate

2. Develop skills in publishing and web software
Audience: Undergraduate

3. Critically evaluate and rank scholarly research articles
Audience: Undergraduate

4. Collaborate with an author on editing their manuscript
Audience: Undergraduate

5. Collaborate with an editorial team through a combination of initiative and cooperative means and make decisions collectively
Audience: Undergraduate

6. Develop writing skills in informal or popular history
Audience: Undergraduate

HISTORY 607 – THE AMERICAN IMPACT ABROAD: THE HISTORICAL DIMENSION
3 credits.

Analysis of diplomatic, economic, cultural, and social interaction of Americans with foreign peoples and nations.
Requisites: Junior standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

HISTORY/ED POL 612 – HISTORY OF STUDENT ACTIVISM FROM THE POPULAR FRONT TO BLACK LIVES MATTER
3 credits.

Explore the history of student activism in the United States, with an emphasis on the experiences racial/ethnic minority youths who have been marginalized or discriminated against. What motivated students to become politically active, and what forms did their activism take? How did student activism vary across time and space and from one group of activists to another? Why did some students become activists while others did not? What role did education and educational institutions play in their activism? What impact have student activists had, and what do their histories reveal about the capacity and mechanisms for achieving racial equity in particular and for affecting social, political, and economic change more broadly?
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Develop an awareness of History's Impact on the Present
Audience: Both Grad & Undergrad

2. Develop an ability to Recognize and Question Assumptions
Audience: Both Grad & Undergrad

3. Develop consciousness of Self and Other
Audience: Both Grad & Undergrad

4. Develop capacity for Effective Participation in a Multicultural Society
Audience: Both Grad & Undergrad

5. Identify and discuss the significance of key actors, events, themes, and historiographical debates relating to the history of student activism in the modern United States
Audience: Both Grad & Undergrad

6. Identify and evaluate historical arguments in secondary scholarly works
Audience: Both Grad & Undergrad

7. Interpret and contextualize primary historical sources
Audience: Both Grad & Undergrad

8. Synthesize information from primary and secondary sources in order to develop and support their own evidence-based historical interpretations.
Audience: Both Grad & Undergrad

9. Synthesize information from secondary sources in order to develop and support evidence-based historical interpretations and historiographical analyses.
Audience: Graduate

HISTORY/ED POL 622 – HISTORY OF RADICAL AND EXPERIMENTAL EDUCATION IN THE US AND UK
3 credits.

Examines the comparative history of radical and experimental education in the United States and United Kingdom since 1800. It focuses on the social, cultural, and intellectual history of diverse educational experiments, including experiments related to socialism, abolitionism, anarchism, and religious fundamentalism.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Demonstrate understanding of the course content: both the broad themes and specific cases we'll study in the history of radical and experimental education in the US and UK.
Audience: Both Grad & Undergrad

2. Demonstrate the ability to think historically: to determine historical significance; to evaluate evidence; to identify continuity and change; to assess cause and consequence; to demonstrate understanding of contextualization and periodization; to take historical perspectives; and to critically assess the moral dimensions of history.
Audience: Both Grad & Undergrad

3. Identify, analyze, and critique historical arguments (as presented by our authors and classmates).
Audience: Both Grad & Undergrad

4. Develop original historical arguments using primary and secondary sources (in class discussion and in our informal and formal writing assignments).
Audience: Graduate

5. Communicate historical knowledge, interpretations, and arguments clearly in writing, discussion, and oral presentations.
Audience: Both Grad & Undergrad

HISTORY/AFROAMER 628 – HISTORY OF THE CIVIL RIGHTS MOVEMENT IN THE UNITED STATES
3 credits.

Civil rights history from 1930-1970. Legal, historical and economic origins of the civil rights movement. Study of the movement's impact on United States culture, politics, and international relations.
Requisites: Junior standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY/ART HIST/JOURN/L I S 650 – HISTORY OF BOOKS AND PRINT CULTURE IN EUROPE AND NORTH AMERICA
3 credits.

History of books and print culture in the West from ancient times to the present. Focus on the influence of reading and writing on social, cultural, and intellectual life. Methodologies, theories, and sources for study of book and print culture history.
Requisites: Graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify and explain important people, themes, and events in print and book culture in North America and Europe.
Audience: Both Grad & Undergrad

2. Identify and explain historical arguments in secondary sources.
Audience: Both Grad & Undergrad

3. Analyze primary sources and know what questions to ask to be able to do that.
Audience: Both Grad & Undergrad

4. Produce original historical knowledge through research in primary and secondary sources.
Audience: Both Grad & Undergrad

5. Critically evaluate ideas from primary and secondary sources, integrating (or contrasting) different historical perspectives and develop new historical perspectives.
Audience: Graduate

HISTORY/ED POL 665 – HISTORY OF THE FEDERAL ROLE IN AMERICAN EDUCATION
3 credits.

Examines the history of federal aid to education from 1776 to the present, with heavy emphasis on the post-World War II period. Explores the federal role in public education in the Early Republic and during Reconstruction; Traces the evolution of federal policies concerning racial desegregation, compensatory education for low-income students, bilingual education, and special education for the disabled. Critically reflect on the tradition of "local control," policy implementation and evaluation, accountability, block grants, interest groups and lobbies; nationally standardized testing, and the different goals assigned to public schooling in the United States (e.g., social integration/inclusion, individual academic achievement, etc.).
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2018
Learning Outcomes: 1. Demonstrate an understanding of diverse historical and qualitative social-science theories, epistemologies, and methodologies related to education research.
Audience: Both Grad & Undergrad

2. Develop a researchable question and design an historical or qualitative social-science research project on some aspect of education policy, past or present.
Audience: Both Grad & Undergrad

3. Gain experience conducting a field-based and/or archival research project and presenting their research in a thesis.
Audience: Both Grad & Undergrad

4. Write clearly and compellingly for diverse audiences about complex topics in educational history and policy.
Audience: Both Grad & Undergrad

5. Understand professional standards for conducting scholarship ethically and responsibly.
Audience: Undergraduate

6. Understand professional standards for conducting scholarship ethically and responsibly and conducting historical research related to their specific research inquiry and project.
Audience: Graduate

HISTORY/SOC 670 – CAPITALISM, SOCIALISM, AND DEMOCRACY IN AMERICA SINCE 1890
3-4 credits.

Political institutional arrangements which have emerged since 1890 and how they have influenced social and economic policies implemented since the Second World War. Why the working class has been politically weak in America; policy consequences of this weakness.
Requisites: Junior standing and (SOC 181, SOC/C&E SOC 140, 210, 211, HISTORY 102 or 109), or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

HISTORY 680 – HONORS THESIS COLLOQUIUM
2 credits.

Colloquium for honors thesis writers. Students must be concurrently enrolled in HISTORY 681 or 682, or HIST SCI 681 or 682, and be declared in an Honors program.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HISTORY 681 – SENIOR HONORS THESIS
1-3 credits.

Mentored independent research and thesis writing on an original topic for honors. Students must be concurrently enrolled in HISTORY 680 and be declared in an Honors program.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY 682 – SENIOR HONORS THESIS
1-3 credits.

Mentored independent research and thesis writing on an original topic for honors. Requires completion of HISTORY 681. Must be concurrently enrolled in HISTORY 680.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY 690 – THESIS COLLOQUIUM
2 credits.

Colloquium for thesis writers. Students must be concurrently enrolled in HISTORY 691 or 692.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HISTORY 691 – SENIOR THESIS
1-3 credits.

Mentored independent research and writing on an original topic. Students must be concurrently enrolled in HISTORY 690.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025

HISTORY 692 – SENIOR THESIS
1-3 credits.

Mentored research and writing on an original topic. Requires completion of HISTORY 691. Must be concurrently enrolled in HISTORY 690.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY 698 – DIRECTED STUDY
1-4 credits.

Directed study under the supervision of a faculty member. Graded on a Cr/N basis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024

HISTORY 699 – DIRECTED STUDY
1-4 credits.

Directed study under the supervision of a faculty member. Graded on a lettered basis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HISTORY 700 – PROSEMINAR: TRADITIONAL & EARLY MODERN CHINESE INTELLECTUAL HISTORY
3 credits.

The major problems of historical interpretations in Chinese intellectual history from the classical period to 1840 on the basis of English translations of primary sources and English-language secondary sources. Topics vary.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY 701 – HISTORY IN A GLOBAL PERSPECTIVE
1 credit.

Introduction to the ways of thinking characteristic of historical study and to the questions and methods that motivate the research fields in which department faculty work. Foundational instruction for PhD and History of Science, Medicine, and Technology PhD taken during the first semester of those programs.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HISTORY 702 – TEACHING PRACTICUM & PROFESSIONAL DEVELOPMENT
1 credit.

Introduction to inclusive teaching practices and professional development strategies. Combines hands-on pedagogical training with guidance for navigating key milestones in academic life.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Utilize critical pedagogical principles underlying course design and assessment strategies in undergraduate history instruction.
Audience: Graduate

2. Incorporate insights from peer and faculty discussions to formulate a personalized plan for professional development during graduate study.
Audience: Graduate

HISTORY 703 – HISTORY AND THEORY
3 credits.

Explorations of the role of theory in historical research and writing. Content varies.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

HISTORY 705 – TOPICS IN GLOBAL HISTORY
3 credits.

Examines the significance of a particular historical phenomenon from the perspective of its importance world-wide.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

HISTORY 706 – TOPICS IN TRANSNATIONAL HISTORY
3 credits.

Examines the significance of a particular event, phenomenon or question across national borders and in terms of the history of nation-state formation.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

HISTORY 707 – PROSEMINAR IN EARLY MODERN EUROPEAN HISTORY, 1500-1789
3 credits.

Readings and/or research on the social, cultural, and political history of France from the late seventeenth century through the French Revolution.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

HISTORY 708 – INTRODUCTION TO PROFESSIONAL RESEARCH IN HISTORY
3 credits.

Introduction to professional research in the discipline of history. Discuss recent, exemplary historical monographs and explore diverse methodological approaches. Identify how authors start from a set of questions and concerns and develop them into a full historical study. Focus on developing as ethical, conscientious, and reflexive historians.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Learning Outcomes: 1. Demonstrate a sound understanding of fundamental ideas and concepts of the discipline.
Audience: Graduate

2. Demonstrate knowledge of key theoretical and methodological approaches to the study of the past.
Audience: Graduate

3. Position yourself as a scholar in the field of history.
Audience: Graduate

4. Articulate the stages of crafting a historical study, in preparation for your second-year paper and future research projects.
Audience: Graduate

HISTORY 710 – PROFESSIONAL DEVELOPMENT SEMINAR
3 credits.

Topics in professional development for historians with an emphasis on building skills that are valuable both inside and outside the academy, such as managing the writing process, teaching college history, or communicating historical research to a broad, nonspecialist audience. Content varies.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HISTORY/AFROAMER/ED POL 712 – EDUCATION AND THE CIVIL RIGHTS MOVEMENT
3 credits.

Explores the historical relationship between education and the African American freedom struggle from the early twentieth century to the present. Topics include school segregation, desegregation, and resegregation; high school and college student activism; Black Power; civil rights protest strategies and tactics, and the role of the federal government.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HISTORY/ED POL 713 – HISTORY OF HIGHER EDUCATION IN EUROPE AND AMERICA
3 credits.

Development of colleges, universities, and higher learning in Europe and America.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2019
Learning Outcomes: 1. Demonstrate an understanding of diverse historical theories, epistemologies, and methodologies related to education research
Audience: Graduate

2. Develop a researchable question and design an historical research project on some aspect of education policy, past or present
Audience: Graduate

3. Gain experience conducting an archival research project and presenting their research in a thesis
Audience: Graduate

4. Write clearly and compellingly for diverse audiences about complex topics in educational history
Audience: Graduate

5. Apply professional standards for conducting scholarship ethically and responsibly
Audience: Graduate

HISTORY 725 – SEMINAR IN EAST ASIAN HISTORY
1-3 credits.

Major problems of historical interpretation in the early modern and recent histories of China, Japan, and Korea. Topics and periods of emphasis vary each year.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

HISTORY 730 – PROSEMINAR IN LATIN AMERICAN HISTORY
1-3 credits.

Historical literature of significant topics in Latin American history. The colonial period, Brazilian history, and Spanish-America in the national period.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

HISTORY/L I S 734 – INTRODUCTION TO ARCHIVES AND RECORDS MANAGEMENT
3 credits.

An introduction to the archives profession and basic theory and practice of archives and records administration, including the uses of primary sources in research, appraisal, access, and preservation.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HISTORY 752 – SEMINAR IN TRANSNATIONAL GENDER HISTORY
3 credits.

Themes in Gender and Women's History within a transnational context.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

HISTORY 753 – SEMINAR-COMPARATIVE WORLD HISTORY
1-3 credits.

Topics significant for the histories of Latin America, Africa, Islamic core, South Asia and Southeast Asia. A single topic chosen each semester for a series of comparative essays by seminar members.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024

HISTORY 755 – PROSEMINAR IN SOUTHEAST ASIAN HISTORY
1-3 credits.

Introductory seminar in modern Southeast Asian history; work mostly in English-language sources.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HISTORY/ANTHRO/ART HIST/DS/LAND ARC 764 – DIMENSIONS OF MATERIAL CULTURE
4 credits.

This course introduces students to the interdisciplinary field of material culture studies. It is intended for students interested in any professional endeavor related to material culture, including careers in museums, galleries, historical societies, historic preservation organizations, and academic institutions. During the semester, students have varied opportunities to engage with and contemplate the material world to which people give meaning and which, in turn, influences their lives. Sessions combine in some way the following: presentations from faculty members and professionals who lecture on a phase of material culture related to his/her own scholarship or other professional work; discussion of foundational readings in the field; visits to collections and sites on campus and around Madison; discussion of readings assigned by visiting presenters or the professors; and exams and short papers that engage material culture topics.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY 790 – PROSEMINAR: EMPIRE AND COLONIALISM IN SOUTH ASIA
3 credits.

Designed to develop historiographic command of colonial and postcolonial South Asian history as a teaching and research field. Carefully explores the master narratives or "schools" of historiography of South Asia, and analyzes the erasures as well as the normative theoretical and archival axes around which the sub-field has developed. Topics include pre-colonial modes of representing the past; the social, cultural and economic turns in colonial and nationalist historiography; legal and environmental historiographical methods; South Asia in the world/global South Asia.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2022
Learning Outcomes: 1. Acquire a critical understanding of the major debates and scholarly trends in South Asian history.
Audience: Graduate

2. Master several approaches to historiographic analysis.
Audience: Graduate

3. Develop the scholarly apparatus for comparative and critical study of South Asia by writing historiographical essays.
Audience: Graduate

4. Create an undergraduate survey course in South Asian history and develop the tools to guide undergraduate student research on colonial and postcolonial South Asia.
Audience: Graduate

HISTORY 800 – RESEARCH SEMINAR IN HISTORY
3 credits.

Introduction to the life of a professional historian, to different styles and methods of history. Opportunity to present one's findings in a conference-type setting. Structured to support completion of the research paper requirement for the History MA, regardless of specialty.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

HISTORY/CLASSICS 801 – SEMINAR-ANCIENT HISTORY
1-3 credits.

Special problems in Greek and Roman history.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

HISTORY/FRENCH/GERMAN/POLI SCI/SOC 804 – INTERDISCIPLINARY WESTERN EUROPEAN AREA STUDIES SEMINAR
3 credits.

Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY 805 – SEMINAR-MEDIEVAL HISTORY
1-3 credits.

Topics in Medieval history.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

HISTORY/JOURN 808 – MASS COMMUNICATION HISTORY
3 credits.

Intensive reading and discussion designed to introduce literature of mass communication.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Analyze key historical arguments, methodologies, and sources used in the study of journalism and mass communication.
Audience: Graduate

2. Evaluate how historical evidence is constructed, interpreted, and debated within communication scholarship.
Audience: Graduate

3. Conduct original historical research using primary and secondary sources, such as archives, oral histories, or media artifacts.
Audience: Graduate

4. Synthesize historiographical debates to situate their own research within broader scholarly conversations.
Audience: Graduate

5. Produce and present an original, research-based paper or project that demonstrates mastery of historical inquiry and scholarly communication.
Audience: Graduate

HISTORY 845 – SEMINAR-CENTRAL EUROPEAN HISTORY
1-3 credits.

Modern German history and the history of Central Europe.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HISTORY 850 – SMR-HIST OF THE SOVIET UNION & MODERN HIST OF E CENTRAL EUROPE
1-3 credits.

Development of the Soviet Union since 1917 and the political and diplomatic history of the nations lying between Russia and Germany.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2020

HISTORY 854 – SEMINAR IN MODERN CHINESE HISTORY
1-3 credits.

Chinese history in the nineteenth and twentieth centuries, with emphasis on intellectual history and the history of Chinese Communism.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

HISTORY 855 – SEMINAR IN JAPANESE HISTORY
1-3 credits.

Research seminar in Japanese history. Focus varies each year.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024

HISTORY 861 – SEMINAR-THE HISTORY OF AFRICA
1-3 credits.

Research studies in aspects of African history with emphasis on field research techniques and interpretation of non-archival data.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HISTORY 868 – SEMINAR IN MODERN FRENCH HISTORY
1-3 credits.

Social, political, and cultural history of France, 1800 to the present.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

HISTORY 891 – PROSEMINAR IN MODERN EUROPEAN HISTORY
1-3 credits.

History of Europe since 1500.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2022

HISTORY 900 – INTRODUCTION TO HISTORY FOR U.S. HISTORIANS
3 credits.

A survey of U.S. history by period and field with extensive discussion on how to plan a successful career as a historian. Designed to introduce masters and doctoral graduate students in the United States History field of study to the U.S. history faculty members.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HISTORY 901 – STUDIES IN AMERICAN HISTORY
1-3 credits.

Reading seminar in American history. Topics and periods of emphasis vary.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HISTORY/ED POL 903 – HISTORY OF EDUCATION OF MULTICULTURAL AMERICA
3 credits.

Selected topics, issues and themes concerning the history of education of various groups of people of color in the United States, as well as selected issues, topics and themes focusing on immigration and ethnicity.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022
Learning Outcomes: 1. Identify and discuss the significance of key actors, events, themes, and historiographical debates relating to the history of education in multicultural America
Audience: Graduate

2. Identify, analyze, and evaluate historical arguments in secondary scholarly works
Audience: Graduate

3. Interpret and contextualize primary historical sources
Audience: Graduate

4. Locate synthesize, and evaluate information from secondary sources and/or primary sources in order to develop and support evidence-based historical and historiographical interpretations
Audience: Graduate

HISTORY/ED POL 906 – PROSEMINAR ON THE HISTORY OF EDUCATION
3 credits.

Reading in European or American educational history.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate an understanding of diverse historical theories,epistemologies, and methodologies relevant to historical research.
Audience: Graduate

2. Develop a researchable question and design a project on some aspect of the history of childhood/adolescence.
Audience: Graduate

3. Gain experience using primary and secondary sources in historical research.
Audience: Graduate

4. Write clearly and compellingly for diverse audiences.
Audience: Graduate

5. Demonstrate understanding of professional standards for conducting scholarship ethically and responsibly.
Audience: Graduate

HISTORY/ED POL 907 – SEMINAR-HISTORY OF EDUCATION
1-3 credits.

Studies in European and American educational history.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022
Learning Outcomes: 1. Identify and discuss the significance of key actors, events, themes, and historiographical debates pertaining to the history of education
Audience: Graduate

2. Identify, analyze, and evaluate historical arguments in secondary scholarly works
Audience: Graduate

3. Interpret and contextualize primary historical sources
Audience: Graduate

4. Locate, synthesize, and evaluate information from primary and secondary sources in order to develop and support evidence-based historical and historiographical interpretations
Audience: Graduate

HISTORY 910 – HISTORY OF COLONIAL NORTH AMERICA
3 credits.

The history of North America from the fifteenth through eighteenth centuries, with the primary focus on Anglo-America.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

HISTORY 936 – THE HISTORY OF WOMEN AND GENDER IN THE U.S., TO 1870
3 credits.

Surveys key theoretical work and secondary literature on the history of women and gender in the United States to 1870.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023

HISTORY/GEN&WS 938 – HISTORY OF SEXUALITY
3 credits.

Using sexuality as a category of historical analysis, examines historiographical, methodological, and theoretical contributions to understanding all aspects of the past.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Demonstrate a deeper sense of the historiographic trajectory and transformations that have contributed to the historiography of gender and sexuality including queer, feminist and trans theories, and queer of color critique.
Audience: Graduate

2. Demonstrate skills of critical analysis using historiographic methods and insights.
Audience: Graduate

3. Utilize discernment of the epistemological foundations on which varied research rests.
Audience: Graduate

4. Demonstrate collaborative processes, including listening and respect for questions and differing perspectives.
Audience: Graduate

5. Deploy initiative and confidence in articulating your own research and its relation to scholarship.
Audience: Graduate

6. Develop appropriate proficiency with contextually appropriate vocabularies and textual production.
Audience: Graduate

7. Demonstrate creative synthesis and original expression.
Audience: Graduate

HISTORY 940 – SEMINAR-AMERICAN HISTORY 1900-1945
3 credits.

Readings and research on United States History, 1900-1945.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

HISTORY 943 – RACE & NATIONALISM: COMPARATIVE & THEORETICAL PERSPECTIVES
3 credits.

Historical intersections of race and nationalisms. Explores questions of the origin of race and nationalisms, the position and status of a variety of nationalisms and anti-colonial nationalisms; and the contemporary debates over postmodernism, postindustrialism, postcolonialism, and multiculturalism.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

HISTORY 951 – SEMINAR-INTELLECTUAL HISTORY OF AMERICA
1-3 credits.

Readings on the intellectual history of the United States/North America.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023

HISTORY 952 – SEMINAR IN COMPARATIVE HISTORY
2-3 credits.

Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HISTORY 958 – SEMINAR-AMERICAN MILITARY HISTORY
1-3 credits.

Readings on U.S. military history.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024

HISTORY/A A E/ANTHRO/C&E SOC/GEOG/LACIS/POLI SCI/PORTUG/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA
1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

HISTORY/AFRICAN/ANTHRO/ECON/GEOG/POLI SCI 983 – INTERDEPARTMENTAL SEMINAR IN AFRICAN STUDIES TOPICS
3 credits.

Interdisciplinary inquiry in African societies and cultures.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025
Learning Outcomes: 1. Develop in-depth knowledge in a sub-field of specialization within African studies
Audience: Graduate

2. Acquire and demonstrate understanding of major theories, approaches, concepts, currently informing African studies
Audience: Graduate

3. Understand your process of learning and possess the capacity to intentionally seek, evaluate, and learn from information, and to recognize and reduce bias in thinking.
Audience: Graduate

4. Gain firm knowledge of existing research in African studies
Audience: Graduate

5. Develop and improve speaking, readings, listening, and writing skills
Audience: Graduate

6. Write and speak across disciplinary boundaries
Audience: Graduate

7. Analyze texts from various theoretical and critical perspectives
Audience: Graduate

HISTORY 990 – RESEARCH AND THESIS
1-9 credits.

Independent research and writing of a thesis under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

HISTORY 999 – INDEPENDENT WORK
1-6 credits.

Directed study under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

HISTORY OF SCIENCE (HIST SCI)

HIST SCI/ENVIR ST/HISTORY 125 – GREEN SCREEN: ENVIRONMENTAL PERSPECTIVES THROUGH FILM
3 credits.

From Teddy Roosevelt's 1909 African safari to the Hollywood blockbuster King Kong, from the world of Walt Disney to The March of the Penguins, cinema has been a powerful force in shaping public and scientific understanding of nature throughout the twentieth and twenty-first century. How can film shed light on changing environmental ideas and beliefs in American thought, politics, and culture? And how can we come to see and appreciate contested issues of race, class, and gender in nature on screen? Explore such questions and come to understand the role of film in helping to define the contours of past, present, and future environmental visions in the United States, and their impact on the real world struggles of people and wildlife throughout the world.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Interpret film as a historical document and place it in a particular historical context.
Audience: Undergraduate

2. Describe the changing historical contours of environmentalism and how the past continues to shape diverse perspectives relating to the meaning and representation of "the environment," particularly with respect to issues of class, gender, and race.
Audience: Undergraduate

3. Identify major environmental issues and controversies of the past, present, and future in the United States and around the world.
Audience: Undergraduate

HIST SCI/HISTORY/MED HIST 132 — BEES, TREES, GERMS, AND GENES: A HISTORY OF BIOLOGY
3 credits.

How did today's biology emerge out of the diverse traditions of agriculture and natural history (bees and trees), biomedicine and molecular biology (germs and genes), which stretch back into the eighteenth century? Examines classic texts and "game-changers" in the history of biology, putting them into broader scientific and social contexts to see how these different ways of knowing intertwined, competed, and yielded novel approaches to the study of life that still shape today's life sciences.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify key ideas, people, places, and events in the history of biology.
Audience: Undergraduate

2. Connect a passage of professional or popular scientific writing in biology to larger historical themes and trends.
Audience: Undergraduate

3. Analyze similarities and differences in scientific expression across different people, genres, and time periods.
Audience: Undergraduate

4. Explain how past ideas about classification and evolution; organismal organization; disease causation and medical intervention; and mastery of genetic machinery have shaped present-day assumptions and attitudes about biology and human nature.
Audience: Undergraduate

HIST SCI 133 — BIOLOGY AND SOCIETY, 1950 - TODAY
3 credits.

From medical advancements to environmental crises and global food shortages, the life sciences are implicated in some of the most pressing social issues of our time. Explores events in the history of biology from the mid-twentieth century to today, and examines how developments in this science have shaped and are shaped by society. Investigates the origins of the institutions, technologies, and styles of practice that characterize contemporary biology, such as the use of mice as "model organisms" for understanding human diseases. Examines biological controversies such as the introduction of genetically modified plants into the food supply. Explores how biological facts and theories have been and continue to be used as a source for understanding ourselves.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Develop an appreciation for the ways in which the institutions, practices, and ways of thinking associated with contemporary biology are specific to a particular place and time, and have changed over time
Audience: Undergraduate

2. Identify and state the significance of key people and events in the recent history of biology
Audience: Undergraduate

3. Understand key theoretical frameworks for describing interactions between biology and society, and be able to apply these frameworks to new empirical cases
Audience: Undergraduate

4. Identify and evaluate the strength of the arguments and evidence used in an academic paper
Audience: Undergraduate

5. Extrapolate complex arguments to new contexts and assess how new information would change the argument
Audience: Undergraduate

HIST SCI 150 – THE DIGITAL AGE
3 credits.

An introduction to the history of the computer from the 1940s to the present day, major developments in computer science and technology in their historical contexts, and recent trends in computing and society. We learn about machines, but emphasize the study of people: the institutions, scientists, workers, and social movements that invented, facilitated, and transformed digital technology in the 20th and early 21st century.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify key technological developments, periods, and themes in the history of computing
Audience: Undergraduate

2. Analyze primary cultural and technical sources from the history of technology in the 20th century
Audience: Undergraduate

3. Engage ongoing developments in computer science and digital technology with historical and critical perspective
Audience: Undergraduate

4. Write and speak conscientiously about digital technology's effects in society
Audience: Undergraduate

5. Recognize factors that contribute to technological change
Audience: Undergraduate

HIST SCI 160 – ENGINEERING INEQUALITY: TECHNOLOGY AND INEQUITY THROUGHOUT HISTORY
3-4 credits.

Offers an introduction to the history of technology centered around the relationship between technology and various forms of social inequality. Addresses: 1) how gendered, racial, and class-based disparities have shaped the history of technology; 2) how forms of engineered inequity have intersected with state-building, colonial projects, environmental degradation, and revolutionary programs; 3) how technology has been implicated in attempts to imagine a more just society. Introduces central themes and concepts in the histories of science, medicine, and especially technology. Examines case-studies that are transnational in scope and move chronologically from the 17th century to the present. Also gives significant attention to histories of technology that originated outside of the U.S. and Europe.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and summarize key concepts in the history of technology
Audience: Undergraduate

2. Utilize historical methods and techniques and apply these to analyze primary sources including print media, visual art, film, web-based content, and technical materials
Audience: Undergraduate

3. Apply concepts from the history of technology to relevant present-day issues in engineering and technology policy
Audience: Undergraduate

4. Produce original arguments that demonstrate critical thinking skills and draw on course concepts, arguments specifically about the role of technology—as a collection of material, social, and political practices—and technological change in the contemporary world
Audience: Undergraduate

HIST SCI 201 – THE ORIGINS OF SCIENTIFIC THOUGHT
3 credits.

Emergence of scientific method and scientific modes of thought out of ancient philosophical and religious traditions; the impact of ancient science on medieval Christendom; the origins and development of the Copernican-Newtonian world view.
Requisites: Not open to students with credit for ILS 201 or HIST SCI/HISTORY 323
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and explain how premodern science was shaped by its social, cultural, and material contexts.
Audience: Undergraduate

2. Interpret historical sources to construct evidence-based arguments concerning premodern science.
Audience: Undergraduate

HIST SCI 202 – THE MAKING OF MODERN SCIENCE
3 credits.

Major trends and developments in the sciences from the 17th century to the early 20th century. Emphasis on those with broad cultural and social implications.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and explain critical developments in how the natural world has been analyzed and understood in early modern and modern periods and cultures.
Audience: Undergraduate

2. Identify and explain how science and its history have served a wide range of purposes in early modern and modern periods.
Audience: Undergraduate

3. Recognize and evaluate how early modern and modern science has been deeply shaped by its historical, social, cultural, intellectual, and material contexts.
Audience: Undergraduate

4. Interpret and evaluate historical sources to construct persuasive arguments concerning science and its history in the early modern and modern periods.
Audience: Undergraduate

HIST SCI/ASTRON 206 – HISTORY OF ASTRONOMY AND COSMOLOGY
3 credits.

The development of astronomical knowledge and cosmological views from the earliest times to the present, viewed in their social, philosophical, and technological contexts.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2024
Learning Outcomes: 1. Discuss the history of modern astronomy, with an emphasis on tracing how our current conception of the universe has developed.
Audience: Undergraduate

2. Describe the ancient background to western European astronomy, the role of astronomy in the scientific revolution of the 16th and 17th centuries, the development of modern astrophysics, and Wisconsin's contributions to modern astronomy.
Audience: Undergraduate

3. Engage actively and critically with primary historical sources, including Galileo’s Siderius Nuncius, through reading, writing, discussion, and examination of rare books.
Audience: Undergraduate

4. Evaluate historical subjects and works in their own contexts while also appreciating their significance for our own world view.
Audience: Undergraduate

5. Demonstrate some familiarity with astronomical instruments, observatories, and technologies through actual use, visits, and class demonstrations.
Audience: Undergraduate

HIST SCI 211 – THE HISTORIAN'S CRAFT: SCIENCE, MEDICINE, AND TECHNOLOGY
3-4 credits.

Conduct original historical research in the fields of history of science, medicine, or technology and convey the results to others. Become historical detectives through engagement with archival materials and disciplinary methodologies in the histories of science, medicine and technology; practice defining important historical questions, collecting and analyzing evidence, presenting original conclusions, and contributing to ongoing discussions. Confer individually with and receive feedback from instructors to improve skills of historical analysis and communication in written and other formats. May not be repeated for credit.
Requisites: Satisfied Communications A. Not open to students with credit for HISTORY 201.
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Ask Questions: develop the habit of asking questions, including questions that may generate new directions for historical research.
Audience: Undergraduate

2. Find Sources: learn the logic of footnotes, bibliographies, search engines, libraries, and archives, and consult them to identify and locate source materials.
Audience: Undergraduate

3. Evaluate Sources: determine the perspective, credibility, and utility of source materials.
Audience: Undergraduate

4. Develop and Present an Argument: use sources appropriately to create, modify, and support tentative conclusions and new questions.
Audience: Undergraduate

5. Plan Further Research: draw upon preliminary research to develop a plan for further investigation.
Audience: Undergraduate

6. Communicate Findings Effectively: make formal and informal, written and oral presentations tailored to specific audiences.
Audience: Undergraduate

HIST SCI/MED HIST 212 – BODIES, DISEASES, AND HEALERS: AN INTRODUCTION TO THE HISTORY OF MEDICINE
3 credits.

A survey of different conceptions of how the body as a site of sickness has been understood from Antiquity to contemporary medicine. Includes consideration of the origins and evolution of public health, the changing social role of healers, and the emergence of the modern "standardized" body in health and illness.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Identify important themes, theories, events, and people in the global history of medicine from Antiquity to the present day.
Audience: Undergraduate

2. Describe how historical medical systems were developed in the context of an interconnected world.
Audience: Undergraduate

3. Analyze the ways in which understandings of bodies, diseases, and healers are influenced by society and culture, and change over time.
Audience: Undergraduate

4. Contextualize modern health debates and systems within the history of medicine.
Audience: Undergraduate

HIST SCI/ENVIR ST 213 – GLOBAL ENVIRONMENTAL HEALTH: AN INTERDISCIPLINARY INTRODUCTION
3 credits.

Provides an introduction to the intersections of health and environment on a global scale. Exposes students to a range of problems in global environmental health, including climate change, disease ecology, and the globalization of disease.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the utility of humanistic methods for the study of global environmental health
Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis
Audience: Undergraduate

3. Understand essential developments in the evolving relationship between the environment and public health on a global scale.
Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of global health issues in developing and industrialized countries
Audience: Undergraduate

5. Describe the social, economic, and environmental dimensions of climate change, agriculture, and the built environment and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.
Audience: Undergraduate

HIST SCI 218 – HISTORY OF TWENTIETH CENTURY AMERICAN MEDICINE
3 credits.

Introduction to the development of the modern American medical care system.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify the social, cultural, and political factors that have shaped the health care system and health institutions in 20th century America.
Audience: Undergraduate

2. Analyze the changing interactions of patients, physicians, nurses, and other health care personnel over the last century.
Audience: Undergraduate

3. Describe how the experience of illness was transformed in the 20th century, and the changing role of technologies, pharmaceuticals, and medical research.
Audience: Undergraduate

4. Understand the ways in which assumptions about race, gender, and socio-economic factors affect the experience of illness and health outcomes over the long twentieth century.
Audience: Undergraduate

HIST SCI 222 – TECHNOLOGY AND SOCIAL CHANGE IN HISTORY
3 credits.

Topics in the history of technology. Themes include the social basis of technical change, the impact of technology on everyday life, and ethical issues in technology in the last four centuries.
Requisites: Sophomore standing or 3 credits in HISTORY or HIST SCI
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020
Learning Outcomes: 1. Identify and summarize key concepts in the history of technology
Audience: Undergraduate

2. Utilize historical methods and techniques and apply these to analyze primary sources including print media, visual art, film, web-based content, and technical materials
Audience: Undergraduate

3. Apply concepts from the history of technology to relevant present-day issues in engineering and technology policy
Audience: Undergraduate

4. Produce original arguments that demonstrate critical thinking skills and draw on course concepts, arguments specifically about the role of technology—as a collection of material, social, and political practices—and technological change in the contemporary world
Audience: Undergraduate

HIST SCI 250 – SPECIAL TOPICS IN HISTORY OF SCIENCE (INTRODUCTORY)
3 credits.

Special topics in the history of science, medicine, and technology.
Requisites: None
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2024
Learning Outcomes: 1. Explain developments in science, medicine, or technology in terms of historical context.
Audience: Undergraduate

2. Use historical methods to analyze primary sources related to science, medicine, or technology.
Audience: Undergraduate

3. Construct and defend written and verbal arguments by synthesizing information derived from a range of sources.
Audience: Undergraduate

HIST SCI/AFROAMER 275 – SCIENCE, MEDICINE, AND RACE: A HISTORY
3-4 credits.

Surveys the medical and scientific constructions of categories of race, placing the development of racial theories in a broad social and political context. Pays particular attention to the importance of racial science in slavery and colonialism.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Humanities or Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2025
Learning Outcomes: 1. Identify and analyze within their social, cultural and economic contexts key historical issues, and their significance, in the history of the idea of race as it relates to scientific and medical developments.
Audience: Undergraduate

2. Develop an understanding of the mutually shaping interactions between ideas about race and perceptions of social hierarchy, health, illness and medical and anthropological categories.
Audience: Undergraduate

3. Analyze the role of social factors like gender and class, among others, in shaping cultural realities related to race and body normativity.
Audience: Undergraduate

4. Identify the role that scientists, physicians, patients, healthcare providers, scientific institutions and the state play in modeling, ideas about race.
Audience: Undergraduate

5. Discern the impact of programs of global science as they intersect with international politics in the shaping of ideas about human rights, ethnicity, and race.
Audience: Undergraduate

HIST SCI 280 — HONORS SEMINAR: STUDIES IN SCIENCE, TECHNOLOGY, MEDICINE
3 credits.

Intensive exploration of issues in the history of science. Emphasis on developing critical thinking about science through formal and informal writing.
Requisites: Satisfied Communications A and declared in an Honors program
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Develop and support historical arguments about science, technology, or medicine.
Audience: Undergraduate

2. Locate, collect, and analyze primary sources for the historical study of science, technology, or medicine.
Audience: Undergraduate

3. Revise their own writing effectively, by identifying problem areas and setting strategies for improvement.
Audience: Undergraduate

HIST SCI 286 — HONORS SEMINAR: STUDIES IN SCIENCE, TECHNOLOGY, MEDICINE
3 credits.

Intensive exploration of issues in the history of science. Emphasis on developing critical thinking about science through discussion of readings and written exercises.
Requisites: Declared in an Honors program
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2019
Learning Outcomes: 1. Explain developments in science, medicine, or technology in terms of historical context.
Audience: Undergraduate

2. Use historical methods to analyze primary sources related to science, medicine, or technology.
Audience: Undergraduate

3. Construct and defend written and verbal arguments by synthesizing information derived from a range of sources.
Audience: Undergraduate

4. Compare different approaches in historical scholarship on science, medicine, or technology.
Audience: Undergraduate

HIST SCI/AGROECOL 301 – (HORTI)CULTURAL ROOTS: HUMAN HISTORIES OF PLANTS AND SCIENCE
4 credits.

Dig into the history of plant sciences to understand why plants and humans have the relationships they do today. Focus on the experiences of Indigenous Americans and People of Color to understand the roots of inequities in horticulture, agriculture, and other plant sciences. Practice skills as a translator of science and history through engagement with scientific publications, library resources, and archival materials. Define important societal questions, collect and analyze evidence, present original conclusions, and contribute to ongoing discussions about the relationship of people and plants.
Requisites: Satisfied Communications A
Course Designation: Core GenEd - Communication & Literacy
Comm QR - Communication B
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Compare and contrast plant-human systems in multiple historical contexts with an emphasis on the impact of racism
Audience: Undergraduate

2. Produce written and spoken work that incorporates critical reading, logical thinking, and use of evidence that is appropriate to the plant sciences
Audience: Undergraduate

3. Recognize ethnic, racial, and religious minorities' historical and ongoing marginalization in horticulture, agriculture, botany, and other plant-related disciplines
Audience: Undergraduate

4. Effectively participate in a multicultural society through written and spoken contributions to ongoing discussions
Audience: Undergraduate

5. Translate current research into a written and spoken format that is relevant and understandable to a public audience and scholars in other disciplines
Audience: Undergraduate

6. Apply core library resources to research and communication about human-plant systems
Audience: Undergraduate

HIST SCI/ECON 305 – DEVELOPMENT OF ECONOMIC THOUGHT
3-4 credits.

Development of economic thought from the middle ages to the present; emphasis on major schools of thought including Classical, Marxian, Neo-Classical, and Keynesian schools.
Requisites: (ECON 101 and 102) or (ECON 102 and A A E 101 or 215 prior to Fall 2024) or ECON 111
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Describe the evolution of the methodology of economics.
Audience: Undergraduate

2. Explain what Adam Smith wrote and what he did not write.
Audience: Undergraduate

3. Discuss the dual role of economics as a social science and as an art (moral philosophy).
Audience: Undergraduate

HIST SCI/HISTORY 323 – THE SCIENTIFIC REVOLUTION: FROM COPERNICUS TO NEWTON
3 credits.

An introduction to the formative period of modern science, including major ideas and events in the physical and life sciences from Copernicus to Newton.
Requisites: Junior standing or (graduate/professional standing and concurrent enrollment in HIST SCI 623)
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Explain critical developments in how the natural world was understood in early modern Europe.
Audience: Undergraduate

2. Describe how early modern European science was shaped by its cultural contexts.
Audience: Undergraduate

3. Analyze and interpret early modern European scientific books as historical objects.
Audience: Undergraduate

4. Use historical texts and objects to construct evidence-based arguments concerning science and its history.
Audience: Undergraduate

HIST SCI/ILS 330 – CAN MACHINES THINK?: THE HISTORY OF ARTIFICIAL INTELLIGENCE, 1650-PRESENT
3 credits.

Introduces key historical, technological and scientific episodes in the history of artificial intelligence (AI) in a gently technical manner. No technical knowledge is expected; gain familiarity with technical aspects of AI in parallel with studying it from a social and historical perspective. Introduces the range of ideas and technical models for artificial intelligence that have existed before, and alongside Machine Learning and large language models (LLMs), and emphasizes the connection of historical AI projects to their broader cultural, intellectual, and scientific context. In describing historical models of AI, shows: 1) the regularity of many core controversies surrounding the pursuit of artificial intelligence over time (including its profound significance for science, work, and human values, ties to commerce and government) and 2) the importance of history as a repository for approaches to AI and computing research.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Describe the origins and variety of approaches to artificial intelligence.
Audience: Undergraduate

2. Engage the social, cultural, and human values dilemmas in various endeavors to give machines intelligence.
Audience: Undergraduate

3. Read, evaluate and synthesize primary and secondary literature about science and technology in their historical context.
Audience: Undergraduate

4. Write, speak and collaborate with students from a range of disciplines in discussions about the limitations and possibilities of artificial intelligence systems.
Audience: Undergraduate

5. Situate emerging AI technology in relation to history.
Audience: Undergraduate

HIST SCI/MED HIST/RELIG ST 331 – SCIENCE, MEDICINE AND RELIGION
3 credits.

Introduction to the study of religion, science, and medicine. Focus on how religion, science, and medicine have shaped practices of knowledge production and meaning making with respect to human life, by considering theories of human history and racial progress; how logics of contagion structure human relationships and communal boundaries; the variety of ways of understanding and caring for bodies; and the place of humans within broader ecologies.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. read and interpret critically primary and secondary source texts about religion, science, and medicine
Audience: Both Grad & Undergrad

2. access and utilize a variety of resources and methods for critical inquiry and research in religious studies, history of science and medicine, and science and religion
Audience: Both Grad & Undergrad

3. categorize, analyze, and compare core concepts in religious studies, the history of science and medicine, and science and religion, such as the conflict thesis; knowledge production; creation/evolution; eugenics; race; gender; embodiment; care; health/healing; capitalism; and progress narratives
Audience: Both Grad & Undergrad

4. identify, evaluate, and interpret the interrelationships and impact of religious and and scientific worldviews as related to health, bodies and communities
Audience: Both Grad & Undergrad

5. perform textual analysis, primary source research and synthesis of scholarly ideas, in persuasive writing, oral communication, active listening, and with critical empathy
Audience: Both Grad & Undergrad

6. create conversations about complex topics that seek academic excellence, honesty, and integrity
Audience: Both Grad & Undergrad

7. engage with the academic literature on religion, science, and medicine that is pertinent to the student's specific research area and apply it to facilitate original primary source analysis
Audience: Graduate

HIST SCI 343 – THE DARWINIAN REVOLUTION
3 credits.

Scientific, social, religious and related dimensions of the evolution hypothesis from predarwinian speculation and Darwin's own work to later support, criticism and continuing investigation. Coverage reaches into the twentieth century.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Identify the main features of Darwin's own theory and its similarities and differences from evolutionary theories before and since.
Audience: Both Grad & Undergrad

2. Summarize, compare, and contrast leading social and religious issues involved in the reception of Darwin's theory in different settings.
Audience: Both Grad & Undergrad

3. Identify the differences between primary sources and secondary sources in the history of science, and use them appropriately in analyzing historical questions.
Audience: Both Grad & Undergrad

4. Use evidence and analysis to explain change over time in the history of evolutionary thought.
Audience: Both Grad & Undergrad

5. Develop an original historical argument based on primary sources and using secondary sources to construct a framework.
Audience: Graduate

HIST SCI 350 – SPECIAL TOPICS IN THE HISTORY OF SCIENCE
2-3 credits.

Readings/discussion of varying topics in History of Science, Medicine, and Technology.
Requisites: Sophomore standing or 3 credits in HIST SCI
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Explain developments in science, medicine, or technology in terms of historical context.
Audience: Undergraduate

2. Use historical methods to analyze primary sources related to science, medicine, or technology.
Audience: Undergraduate

3. Construct and defend written and verbal arguments by synthesizing information derived from a range of sources.
Audience: Undergraduate

4. Understand science, technology, or medicine as products of diverse people and places.
Audience: Undergraduate

HIST SCI/CLASSICS/GEN&WS/ILS 355 – SEX, GENDER, & THE HISTORY OF MEDICINE
3 credits.

Examines the relationship between sexed and gendered bodies and medicine from the ancient world to today. Considers such questions as: How have sexed bodies (male, female, intersex) been distinguished throughout medical history? What happens to bodies between or outside the binary? Which bodies get marked out for medical analysis and intervention? Examines the evolution of ideas in medicine that emerge from beliefs about sexed and gendered bodies. Focuses on analysis of primary sources and secondary sources and the development of scholarly arguments about continuities and change over time. Assesses how modern beliefs and practices surrounding sex gender, medicine and their mutual interplay are rooted in and/or reacting to beliefs and practices from the premodern past.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Learning Outcomes: 1. Explain and assess how historical - particularly ancient Classical and Near Eastern - theories of sex, gender, and medicine inform our beliefs and understandings today.
Audience: Undergraduate

2. Assess how cultural, medical, and scientific understandings and definitions of sex and gender have changed (or not) over time.
Audience: Undergraduate

3. Identify major developments in the history of medicine and the medical profession, particularly as relates to sexed and gendered bodies.
Audience: Undergraduate

4. Recognize health and illness as grounded in personal experience, develop empathy for others' experiences and use creative means to reflect on those experiences.
Audience: Undergraduate

5. Comprehend and evaluate complex arguments about politics, values, healthcare, and health in ancient and contemporary society.
Audience: Undergraduate

6. Assess what health means among differently positioned people (e.g., with respect to race, class, gender, culture, disability, age).
Audience: Undergraduate

HIST SCI 360 – HEALTH INEQUALITIES IN THE LONG 20TH CENTURY
3 credits.

Analyze historical factors impacting healthcare cost, access, and services with focus on social determinants of health in the United States across the long 20th century. Evaluate current state of the field through literature reviews and conversations with guest lecturers. Apply historical analysis in consideration of current disparities in health resources. Produce original research project and policy proposal at intersection of public health, medical history, and health law and policy.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Analyze changing concepts, measurements, and markers of health across time and place.
Audience: Undergraduate

2. Understand contemporary challenges in addressing healthcare disparities drawing upon historical context and the development of research norms and practices in the field.
Audience: Undergraduate

3. Articulate informed, well-researched arguments, and situate within the context of the field.
Audience: Undergraduate

4. Conduct and present original research, analyze and synthesize findings to others.
Audience: Undergraduate

HIST SCI/S&A PHM 401 – HISTORY OF PHARMACY
2 credits.

Pharmaceutical field, from antiquity to modern medical care; professional; structuring in principal countries of the West.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Outline the key theoretical issues in the history of medicine and pharmacy
Audience: Undergraduate

2. Explain the relationship, using models of change, between medicines, pharmacy practice, and society
Audience: Undergraduate

3. Assess critically the historiographies of the history of medicine and pharmacy
Audience: Undergraduate

4. Evaluate the reputations of pharmacy practices, organizations, and key actors
Audience: Undergraduate

5. Communicate effectively conclusions regarding the history of medicines and pharmacy
Audience: Undergraduate

6. Apply historical understandings to contemporary issues regarding pharmacy, drug regulation, and political conflicts
Audience: Undergraduate

HIST SCI 404 – A HISTORY OF DISEASE
3-4 credits.

What is disease? Who decides? What are the consequences of labeling a behavior a disease? Can disease be a tool of liberation? Can disease be an instrument of oppression? How do race, class, and gender affect our understandings of and experiences with illness? How have diseases shaped American history? Illustrates the various ways disease operates in America and examines the role of disease on at least four levels--political, social, cultural, and personal--to demonstrate that diseases are not merely bodily afflictions; they are also participants in the body politic. Each disease covered is chosen to illustrate a different point about the social and cultural lives of disease in the history of the United States. Though diseases are covered in a chronological fashion, this coverage is not meant as a narrative history of disease.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Recognize how diseases and responses to diseases have shaped elements of American society and analyze the claim that disease is socially constructed
Audience: Undergraduate

2. Discover and analyze how politics and diseases have intersected in American history
Audience: Undergraduate

3. Describe and analyze how patients have shaped the medical responses, personal reactions and social meanings of disease
Audience: Undergraduate

4. Recognize and describe how race, class, and gender have influenced the experience, meaning, and understanding of disease
Audience: Undergraduate

5. Develop research skills to perform primary source historical research and analyze primary sources to develop a historical argument
Audience: Undergraduate

6. Recognize and describe general trends in the history and the historiography of disease
Audience: Graduate

7. Write a book review suitable for publication in historical journals
Audience: Graduate

8. Identify and analyze historical arguments in historical monographs
Audience: Graduate

9. Sharpen historical research skills and deepen analysis of primary sources in the service of an argument
Audience: Graduate

HIST SCI/MATH 473 – HISTORY OF MATHEMATICS
3 credits.

An historical survey of the main lines of mathematical development.
Requisites: MATH 322, 341, 375, 421, or 467
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Natural Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Recall and state the formal definitions of the mathematical objects and their properties used in various mathematical topics throughout history (e.g., content from number theory, analysis, algebra, etc.).
Audience: Undergraduate

2. Use such definitions to argue that a mathematical object does or does not have the condition of being a particular type or having a particular property in the context of these topics.
Audience: Undergraduate

3. Recall and state the standard theorems from these topics, and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Undergraduate

4. Prove or disprove statements related to the above definitions, properties, and theorems using techniques of mathematical argument (direct methods, indirect methods, constructing examples and counterexamples, induction, etc.).
Audience: Undergraduate

5. Convey arguments in oral and written forms using English and appropriate mathematical terminology, notation, and grammar.
Audience: Undergraduate

6. Explain mathematical ideas and describe their historical contexts.
Audience: Undergraduate

HIST SCI/HISTORY/MED HIST 508 – HEALTH, DISEASE AND HEALING II
3-4 credits.

Medicine in Europe from the 18th century to mid-20th century, investigating changes in disease and demography, state interest in health care, the medical professions, and both scientific and alternative medical ideas.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2023
Learning Outcomes: 1. Recognize the utility of humanistic methods for the study of medicine and public health
Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis
Audience: Undergraduate

3. Understand essential developments in the evolving relationship between medicine and public health in modern societies.
Audience: Undergraduate

HIST SCI/MED HIST 509 – THE DEVELOPMENT OF PUBLIC HEALTH IN AMERICA
3 credits.

Health problems in the U.S. from the colonial period to the twentieth century; efforts made toward their solutions.
Requisites: Junior standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify major historical trends in the history of public health in the United States.
Audience: Undergraduate

2. Understand the tensions between individual rights and population health as they have played out in the past.
Audience: Undergraduate

3. Analyze the social, political, and cultural factors that have influenced societal responses to epidemics and pandemics in American history.
Audience: Undergraduate

4. Develop critical thinking skills by engaging with both primary sources and secondary texts to understand how historians have written the history of public health.
Audience: Undergraduate

5. Evaluate the ways in which understanding the past history of public health can shape policy making in the present.
Audience: Undergraduate

HIST SCI/GEOSCI 514 – HISTORY OF GEOLOGIC THOUGHT
3 credits.

Major concepts from earliest to modern times.
Requisites: GEOSCI 204 or graduate/professional standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Describe the progression of ideas in the history of the geological sciences.
Audience: Both Grad & Undergrad

2. Discuss controversies that have existed in geology and how they have been resolved.
Audience: Both Grad & Undergrad

3. Provide a detailed understanding of the theory of continental drift and its relationship to the theory of plate tectonics.
Audience: Both Grad & Undergrad

4. Analyze and evaluate both the nature of science and the process of science, as applied to specific historical developments in geology.
Audience: Both Grad & Undergrad

5. Generate a history in one's subfield in geology or about a specific geologic controversy.
Audience: Graduate

HIST SCI/AFROAMER/MED HIST 523 – RACE, AMERICAN MEDICINE AND PUBLIC HEALTH
3 credits.

Provides historical perspectives on current dilemmas facing black patients and health care professionals.
Requisites: Junior standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Identify key developments, actors, ideas, and institutions in the broad history of race, medicine and public health in America between 1700 and 2000.
Audience: Both Grad & Undergrad

2. Analyze and write critically about primary and secondary historical sources by examining diverse interpretations of past events and ideas in their historical contexts.
Audience: Both Grad & Undergrad

3. Evaluate the ways in which ideas about race and assumptions about the meaning of racial difference influenced the care patients of color received and how they experienced their illnesses and injuries.
Audience: Both Grad & Undergrad

4. Understand how conceptions of race profoundly influenced the medical and nursing professions, as well as medical institutions (dispensaries, hospitals, and blood donation centers).
Audience: Both Grad & Undergrad

5. Evaluate the different methodological approaches historians have used to analyze the multiple histories of race, medicine, and public health in the United States in the last two centuries.
Audience: Graduate

HIST SCI/GEN&WS/MED HIST 531 – WOMEN AND HEALTH IN AMERICAN HISTORY
3 credits.

Women as patients and as health professionals in America from the colonial period to the present.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Biological Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Summarize how and why women's experiences of health and illness have changed over time.
Audience: Both Grad & Undergrad

2. Recognize how and why experiences of health and illness vary among women.
Audience: Both Grad & Undergrad

3. Interrogate how historical, social, cultural, and political forces shape the experience of health and illness.
Audience: Both Grad & Undergrad

4. Determine the varied ways women have shaped the experience of health and illness as patients, activists, advocates, and health care workers.

Audience: Both Grad & Undergrad

5. Integrate historical research skills and learn to craft and develop arguments from primary sources.
Audience: Both Grad & Undergrad

6. Recognize and describe general trends in the history and the historiography of women's health.
Audience: Graduate

HIST SCI/GEN&WS/MED HIST 532 – THE HISTORY OF THE (AMERICAN) BODY
3 credits.

This course demonstrates that human bodies have social and cultural histories. It will highlight the social values placed on different bodies, the changing social expectations bodies create, and the role of science and medicine in creating the cultural meanings of bodies.
Requisites: Sophomore standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2023
Learning Outcomes: 1. Identify and summarize categories of embodied difference.
Audience: Both Grad & Undergrad

2. Analyze how embodied differences have shaped axes of power.
Audience: Both Grad & Undergrad

3. Examine how the experience of embodiment has shaped personal experience in the American past and present.
Audience: Both Grad & Undergrad

4. Integrate historical research skills and learn to craft and develop arguments from primary sources.
Audience: Both Grad & Undergrad

5. Apply historical understanding to current events focused on the body.
Audience: Both Grad & Undergrad

6. Recognize and describe general trends in the history and the historiography of the body.
Audience: Graduate

HIST SCI/GEN&WS 537 – CHILDBIRTH IN THE UNITED STATES
3 credits.

Using a reproductive justice framework, analyze contexts, experiences, practices, ideologies, and historiographies of childbirth in the United States from roughly the 17th century to the present, with the heaviest emphasis on the 20th and 21st century. Examines the ways that colonization, genocide, enslavement, racism, capitalism, heterosexism, patriarchy, and ableism have shaped all of these aspects of childbirth. Inquire how key movements and groups resisting some of these forms of oppression have had the power to reshape birth, as well as locating in birth a source of transformational power.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Explain of the framework of reproductive justice, and use it to analyze contemporary discourses, practices, and conditions of childbirth.
Audience: Undergraduate

2. Assess how racial, sexual, gender, economic, and colonial domination and resistance have shaped both reproductive realities and the ways that childbirth histories have been written and circulated.
Audience: Undergraduate

3. Identify and discuss shifting ideologies and practices of childbirth in the United States over time, and relate these to power.
Audience: Undergraduate

HIST SCI/MED HIST/POP HLTH 553 – INTERNATIONAL HEALTH AND GLOBAL SOCIETY
3 credits.

Major problems in international health from 1750 to the present. Focus on disease epidemiology and ecology; political economy of health; migration; quarantine; race, ethnicity, and health care; international health research; cross-cultural healing; mental and maternal health; growth of international health organizations.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts
Breadth - Humanities or Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2021
Learning Outcomes: 1. Recognize the utility of humanistic methods for the study of modern international health
Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis
Audience: Undergraduate

3. Understand essential developments in the evolving relationship between global history, politics, and public health on a global scale.
Audience: Undergraduate

HIST SCI 555 – UNDERGRADUATE SEMINAR IN HISTORY OF SCIENCE
3 credits.

Advanced research in History of Science.
Requisites: HISTORY 201 or 3 Credits in HIST SCI
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2021
Learning Outcomes: 1. Investigate topics in science, medicine, and/or technology using historical methods.
Audience: Undergraduate

2. Create, plan, and execute a significant, self-designed and self-driven research project.
Audience: Undergraduate

3. Develop an original, well-substantiated argument that synthesizes diverse historical knowledge and is based on a critical analysis of primary sources.
Audience: Undergraduate

4. Communicate original historical research findings clearly and effectively.
Audience: Undergraduate

5. Lead and participate productively in purposeful collaboration, discussion, and feedback.
Audience: Undergraduate

HIST SCI/HISTORY/MED HIST 564 – DISEASE, MEDICINE AND PUBLIC HEALTH IN THE HISTORY OF LATIN AMERICA AND THE CARIBBEAN
3 credits.

Examines the history of illness and medical practice in Latin America and the Caribbean from the colonial era until the present. Using an interdisciplinary set of sources, students will explore the different meanings of disease, body normativity, medical practice, and ideas about public health across different historical circumstances in the region.
Requisites: Junior standing
Course Designation: Core GenEd - Humanities & Arts Breadth - Humanities or Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2019
Learning Outcomes: 1. Identify and analyze within their social, cultural and economic contexts key historical issues, and their significance, in the history of healing practices and public health in Latin America from the fifteenth century to the present.
Audience: Both Grad & Undergrad

2. Develop an understanding of the mutually shaping interactions between perceptions of health, illness and medical practices and culture and society in different Latin American historical scenarios.
Audience: Both Grad & Undergrad

3. Analyze the role of social factors -- race, gender, ethnicity, class, and sexual orientation, among others -- in shaping cultural realities related to body normativity, health, medical practice, public health and medical education in Latin America.
Audience: Both Grad & Undergrad

4. Analyze and synthesize information, provide evidence-based interpretations about the past, and develop arguments regarding social and cultural differences related to health and body concepts in different Latin American societies.
Audience: Both Grad & Undergrad

5. Identify the role patients, healthcare providers, institutions and the state played in modeling medical practice, ideas about the body, public health policies, and medical education in Latin America.
Audience: Both Grad & Undergrad

6. Discern the impact of international politics, acting through European and American programs of medical research and humanitarianism, in the shaping of ideas about race, medical hierarchies and public health policies in Latin American and Caribbean nations.
Audience: Both Grad & Undergrad

7. Understand the different methodological approaches and research strategies that historians, anthropologists, and other scholars have used to examine the histories of the medicine in Latin America from the sixteenth century to the present.
Audience: Graduate

HIST SCI/ENGL/MED HIST 599 – DIRECTED STUDY IN HEALTH AND THE HUMANITIES
1 credit.

Offers students enrolled in the Health and the Humanities certificate an opportunity to conduct independent research under the guidance of a faculty member. It allows students who have enrolled in or completed a Health and the Humanities Capstone an opportunity to go into greater depth on a topic covered in the capstone course. In consultation with a faculty member, students will design a project that builds on lessons learned or work completed as part of their capstone experience.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2020
Learning Outcomes: 1. Design scholarly research questions based on their knowledge of the existing literature
Audience: Undergraduate

2. Conduct original primary research by identifying, accessing, and interpreting appropriate sources
Audience: Undergraduate

3. Effectively convey the results of their research through writing or other creative media
Audience: Undergraduate

4. Work independently and manage a large project through to completion
Audience: Undergraduate

HIST SCI 623 – STUDIES IN EARLY MODERN SCIENCE
1 credit.

Advanced readings in primary and secondary literature of the history of the 16th-17th century European science, with emphasis on current historiographic issues.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Discuss major trends in recent scholarship on the history of early modern science, including the significant concepts and interventions raised.
Audience: Both Grad & Undergrad

2. Develop individual perspectives on relevant interpretative and methodological issues.
Audience: Graduate

HIST SCI 681 – SENIOR HONORS THESIS
3 credits.

Honors thesis on topics in History of Science, Medicine, and Technology.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

HIST SCI 682 – SENIOR HONORS THESIS
3 credits.

Honors thesis on topics in History of Science, Medicine, and Technology. Continuation of HIST SCI 681.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025

HIST SCI 691 – SENIOR THESIS
3 credits.

Senior thesis on topics in History of Science, Medicine, and Technology.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2007

HIST SCI 692 – SENIOR THESIS
3 credits.

Senior thesis on topics in History of Science, Medicine, and Technology. Continuation of HIST SCI 691.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2008

HIST SCI 698 – DIRECTED STUDY
1-3 credits.

Directed study under the supervision of a faculty member on topics in History of Science, Medicine, and Technology. Graded on a Cr/N basis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2024

HIST SCI 699 – DIRECTED STUDY
1-3 credits.

Directed study under the supervision of a faculty member on topics in History of Science, Medicine, and Technology. Graded on a lettered basis.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2017

HIST SCI 720 – PROSEMINAR: HISTORIOGRAPHY AND METHODS
3 credits.

Philosophies, methods, and sources in the history of science, and their relations to the current state of scholarship.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HIST SCI 903 – SEMINAR: MEDIEVAL, RENAISSANCE, AND 17TH CENTURY SCIENCE
3 credits.

Readings and/or research on the history of medieval, Renaissance, and/or 17th-century science. Topics vary.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HIST SCI 907 – SEMINAR: HISTORY OF TECHNOLOGY
3 credits.

Research and readings on a topic of current interest in history of technology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

HIST SCI 909 – HISTORY OF BIOLOGY AND MEDICINE
3 credits.

Readings and/or research on the history of biology and medicine. Topics vary.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2022

HIST SCI 911 – SEMINAR-EIGHTEENTH CENTURY SCIENCE
3 credits.

Readings and/or research on the history of science in the 18th century. Topics vary.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HIST SCI/MED HIST 919 – GRADUATE STUDIES IN MEDICAL HISTORY
3 credits.

Analyzes the scientific and social aspects of the development of modern medicine and public health in Europe and America.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024
Learning Outcomes: 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in Medical History
Audience: Graduate

HIST SCI 921 – SEMINAR-SPECIAL TOPICS
3 credits.

Readings and/or research on the history of science, medicine, and technology. Topics vary.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HIST SCI 990 – RESEARCH AND THESIS
1-3 credits.

Independent research and writing of a thesis under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

HIST SCI 999 – INDEPENDENT WORK
1-3 credits.

Directed study under the supervision of a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

HUMAN DEVELOPMENT AND FAMILY STUDIES (HDFS)

HDFS 174 – INTRODUCTION INTO CULTURAL DIVERSITY OF FAMILIES
3 credits.

An introduction to racially and culturally diverse families with application to personal life. Focuses on structural factors impacting all families, such as demographic, economic, and historic trends, which illuminate the similarities and distinctions among and within racial and ethnic groups.
Requisites: None
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Demonstrate understanding of diversity of family structures, roles, and relationships.
Audience: Undergraduate

2. Demonstrate understanding of concepts (race, ethnicity, minority, etc.) essential to the discourse on family diversity.
Audience: Undergraduate

3. Identify historical and current social experiences and relate those to family dynamics of diverse cultural groups.
Audience: Undergraduate

4. Communicate differences between stereotyping and generalizations about culturally diverse families, while also acknowledging within-group diversity.
Audience: Undergraduate

5. Reflect upon your own family, and broaden your exposure to other kinds of family experiences.
Audience: Undergraduate

HDFS 253 – HUMAN DEVELOPMENT & FAMILY STUDIES LEADERSHIP SYMPOSIUM
1 credit.

Provides detailed examination of careers in Human Ecology and the fields of human development and family studies (HDFS). High level leaders working in a variety of professions related to the HDFS major will present as guest speakers (e.g., counseling, school psychology, family life education, early childhood education, child life, social work, health care, occupational therapy).
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HDFS 262 – DEVELOPMENT OF THE YOUNG CHILD
3 credits.

A basic foundation for understanding development from conception through middle childhood. Theoretical foundations, research findings, and practical applications.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe physical, cognitive, and social development from conception through middle childhood.
Audience: Undergraduate

2. Recognize the ways in which biological processes lead to similarities and differences in physical, cognitive, and social development.
Audience: Undergraduate

3. Identify the ways in which environmental factors lead to similarities and differences in physical, cognitive, and social development.
Audience: Undergraduate

4. Explain how child development research is conducted
Audience: Undergraduate

5. Apply developmental science to improve the lives of children.
Audience: Undergraduate

HDFS 263 – DEVELOPMENT FROM ADOLESCENCE TO OLD AGE
3 credits.

A basic foundation for understanding development from adolescence through old age. Theoretical foundations, research findings, and practical applications.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Describe change in physical, cognitive, and socioemotional development from adolescence through old age
Audience: Undergraduate

2. Gain knowledge of individual differences in developmental change across the lifespan
Audience: Undergraduate

3. Identify biological, psychological, and social mechanisms related to developmental change
Audience: Undergraduate

4. Discuss how biological, psychological, and social mechanisms interact in a dynamic and reciprocal fashion to shape develop across the lifespan
Audience: Undergraduate

5. Identify policy and intervention pathways for promoting optimal health and well-being from adolescence through old age
Audience: Undergraduate

HDFS 299 – INDEPENDENT STUDY
1-3 credits.

Directed study projects as arranged with a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2006

HDFS 316 – STRESS AND RESILIENCE IN FAMILIES ACROSS THE LIFESPAN
3 credits.

Examines family stress and resilience across the life cycle from psychological, sociological, and biosocial perspectives. Explores research relating to normative and non-normative family stress and resiliency factors. Topics include parenting, poverty, violence, work-family balance, aging, health and wellness and others.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Critically evaluate internal family processes, including parenting and parent-child relations, couples and family relationships across generations and family health and well-being (e.g., mental health, substance abuse, wellness, child maltreatment)
Audience: Undergraduate

2. Apply various theories, models, and perspectives on family stress and resilience across the lifespan to their understanding of families in stress and crisis
Audience: Undergraduate

3. Apply research and application of these models to specific contemporary topics relevant to individual and family functioning, including risk and resiliency processes
Audience: Undergraduate

4. Evaluate current issues and areas of investigation in the field of family stress and resilience and their application to 'real world' challenges
Audience: Undergraduate

HDFS 345 – ECOLOGY OF CHILD HEALTH AND WELL-BEING
3 credits.

The physical and mental health and well-being of infants and children are strongly influenced by child- and family-facing service professionals from across a variety of professions. Through a socioecological and multidisciplinary lens, examines both conceptual models and real-world applications ranging along a continuum from individual-level clinical interventions to systems-level public health approaches of influencing infant and child physical and mental health and well-being.
Requisites: None
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Social Science
Level - Elementary
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Discuss childhood as a function of the social, economic, political, historical, artistic, and scientific environments and systems children exist in and around.
Audience: Undergraduate

2. Apply the concepts of Relational Health and infant and child mental health in the context of practice, projects, and policy.
Audience: Undergraduate

3. Apply theoretical and research findings to real-world clinical settings through the context of child- and family-facing service professions.
Audience: Undergraduate

4. Evaluate how the flourishing and thriving of children is affected through individual-level interactions, programs, and policies and gain basic skills in advocating for children's health and well-being.
Audience: Undergraduate

5. Develop criteria for high-quality, everyday shared activities and what these bring to relational health, cognitive development, and educational success, and incorporate such criteria into service delivery models.
Audience: Undergraduate

HDFS 425 – RESEARCH METHODS IN HUMAN DEVELOPMENT AND FAMILY STUDIES
3 credits.

Basics of research design used in studying family studies and individual development over the life course. Quantitative and qualitative research designs, participatory action research, and evaluation research, how research informs intervention and prevention programs.
Requisites: HDFS 262, ED PSYCH 320, PSYCH 460, or HDFS 263
Course Designation: Core GenEd - Communication & Literacy
Repeatable for Credit: No
Last Taught: Spring 2026

HDFS 462 – INFANT/TODDLER DEVELOPMENT & GROUP CARE
3 credits.

Developmental milestones from conception up to 36 months of age. Exploration of child care, including access and quality of care, as major influences on the development of young children and families in the US. Observation of infant development in real-time and evaluation of child care program quality.
Requisites: HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, or PSYCH 460
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and recognize the major milestones of infant development in each of the following domains: physical, motor, social-emotional, cognitive, and language and objectively observe infant development in "real time."
Audience: Undergraduate

2. Illustrate the cultural influences on the ways families choose to care for infants and toddlers and describe the major philosophical approaches to group care.
Audience: Undergraduate

3. Identify factors that influence the disproportionally high infant and maternal mortality rates in the U.S. based on demographic factors such as race, ethnicity, socioeconomic status, and region.
Audience: Undergraduate

4. Identify the main components of high-quality infant care programs and articulate how high-quality infant/toddler care has the potential to positively affect the developmental outcomes of children, the lives of families, and society overall.
Audience: Undergraduate

5. Use an observational rating scale to measure the quality of an infant/toddler group care setting and critique the rating scale based on knowledge of factors that have been shown to promote optimal developmental outcomes in young children.
Audience: Undergraduate

6. Identify ecological influences that affect the availability of affordable, high quality infant care for families in the U.S.
Audience: Undergraduate

7. Recognize the benefits of inclusive practice for infants and toddlers with disabilities, special needs, challenging behavior, or mental health challenges in the group care setting and identify supports needed by the field to successfully employ these inclusive practices.
Audience: Undergraduate

HDFS 464 – PLAY-DEVELOPMENT AND ROLE ACROSS THE LIFESPAN
3 credits.

The role and function of play (and playfulness) in promoting development across the lifespan.
Requisites: HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, or PSYCH 460
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Repeatable for Credit: No
Last Taught: Fall 2025

HDFS/CNSR SCI 465 – FAMILIES & POVERTY
3 credits.

Introduction to research at the intersection of family and poverty studies. Learn how family behaviors vary by socioeconomic status; how romantic relationships, childbearing, and childrearing may be implicated in poverty; what the consequences of poverty are for family functioning and children; and about the role of policy in influencing families and poverty.
Requisites: Sophomore standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Ability to consider and evaluate how children, adults, and families affect and are affected by policies, media, or other social institutions.
Audience: Undergraduate

2. Demonstrate applied professional skills by practicing working effectively with others.
Audience: Undergraduate

3. Demonstrate professional speaking skills through giving an oral presentation.
Audience: Undergraduate

4. Demonstrate scientific reasoning/critical thinking skills through engaging in critical evaluation of research articles, websites, programs, or policies.
Audience: Undergraduate

5. Knowledge of family and community diversity.
Audience: Undergraduate

HDFS 469 – FAMILY AND COMMUNITY INFLUENCES ON THE YOUNG CHILD
3 credits.

Interaction of child in socialization settings, especially the family; socialization processes in the social system of child-family-community.
Requisites: None
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Spring 2026

HDFS 471 – PARENT - CHILD RELATIONS
3 credits.

Parents' interaction with their children, programs for parents, and parents' interactions with other institutions.
Requisites: HDFS 262, ED PSYCH 320, PSYCH 460, or HDFS 263
Course Designation: Core GenEd - Social & Behavioral Science
Repeatable for Credit: No
Last Taught: Fall 2025

HDFS 474 – RACIAL ETHNIC FAMILIES IN THE U.S.
3 credits.

Examines the diversity of family life and human development across and within racial ethnic groups in the United States as shaped by race, ethnicity, culture, biculturalism, and the social contexts of history, economics, immigration, and socio-political conditions.
Requisites: Sophomore standing
Course Designation: Core GenEd - Civics & Perspectives
Ethnic St - Ethnic Studies
Repeatable for Credit: No
Last Taught: Spring 2026

HDFS 501 – SPECIAL TOPICS
1-3 credits.

Specialized subject matter of current interest.
Requisites: None
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HDFS 517 – COUPLE RELATIONSHIPS
3 credits.

Romantic relationships are universally desired, and individuals around the globe agree about what successful intimacy entails: we all want to be loved, supported, and cared for by partners we hold in high esteem. Nevertheless, intimate relationships can be difficult to form and maintain. Explore a range of theoretical perspectives and methodologies to understand how it is that intimate relationships develop, thrive, or deteriorate over time. Connect intimate relationship science to real life experiences.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness
Repeatable for Credit: No
Last Taught: Summer 2026

HDFS 535 – A FAMILY PERSPECTIVE IN POLICYMAKING
3 credits.

Explore the relationship between family functioning and public/private policies at the local, state and federal levels; analyze the consequences of issues, policies or programs on family well-being; and, examine roles for professionals in influencing policy development.
Requisites: Junior standing
Course Designation: Core GenEd - Civics & Perspectives
Repeatable for Credit: No
Last Taught: Spring 2026

HDFS 592 – RESEARCH EXPERIENCE IN HUMAN DEVELOPMENT AND FAMILY STUDIES
1-3 credits.

Research experience under the supervision of a faculty member in Human Development and Family Studies.
Requisites: Consent of instructor
Course Designation: Workplace - Workplace Experience
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

HDFS 601 – INTERNSHIP
1-8 credits.

A supervised internship providing hands-on training in a professional experience in human development and family studies related fields.
Requisites: Consent of instructor
Course Designation: Workplace - Workplace Experience
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2025

HDFS/COM ARTS/JOURN 616 – MASS MEDIA AND YOUTH
3 credits.

Children's and adolescents' use of mass media and mass media effects on them. Particular attention is given to changes in comprehension and other cognitive activities that give insights into media use and effects.
Requisites: JOURN 202, COM ARTS 325, HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, PSYCH 460, LSC 251, or graduate/professional standing
Course Designation: Core GenEd - Social & Behavioral Science
Breadth - Social Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain how children and youth process media
Audience: Undergraduate

2. Compare/contrast the impact of different types of media content on development
Audience: Undergraduate

3. Explain how individual differences moderate the impact of media on development
Audience: Undergraduate

4. Describe moderating effects of the context in which media use occurs
Audience: Undergraduate

5. Read, interpret, evaluate, and discuss social scientific reports of findings in this area
Audience: Undergraduate

6. Synthesize and interpret research in this area for a lay audience
Audience: Undergraduate

7. Explain with nuance how children and youth process media
Audience: Graduate

8. Compare/contrast the impact of different types and formats of media content on development, with reference to key developmental milestones
Audience: Graduate

9. Explain how individual differences and social contexts moderate the impact of media uses and interpretations on development
Audience: Graduate

10. Synthesize and interpret research in this area and identify a research gap for future work
Audience: Graduate

HDFS 650 – PARENT EDUCATION AND SUPPORT PROGRAMS
3 credits.

The purposes, contexts, and implementation of parenting support and education programs are studied. Some sections may include a service learning component.
Requisites: HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, or PSYCH 460
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HDFS 662 – ADVANCED STUDY OF THE YOUNG CHILD
3 credits.

Research literature and current theories; topics of individual interest.
Requisites: HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, or PSYCH 460
Repeatable for Credit: No
Last Taught: Fall 2022

HDFS 663 – DEVELOPMENTAL AND FAMILY ASSESSMENT
3 credits.

Introduction to the process of family-focused developmental assessment with infants and young children, including family interviewing, taking developmental histories, observing children, and developmental screening.
Requisites: HDFS 262 (or HDFS 362 prior to Fall 2023), ED PSYCH 320, PYSCH 460, or graduate/professional standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Breadth - Social Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HDFS 664 – PROSEMINAR: HUMAN DEVELOPMENT AND FAMILY STUDIES
1-3 credits.

Survey and introduction to children and families.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2025

HDFS 680 – SENIOR HONORS THESIS
2-4 credits.

Individual study in honors as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2023

HDFS 690 – SENIOR THESIS
2 credits.

Individual study as arranged with a faculty member.
Requisites: Consent of instructor
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2024

HDFS 699 – INDEPENDENT STUDY
1-6 credits.

Directed study projects as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HDFS/ED PSYCH 725 – THEORY AND ISSUES IN HUMAN DEVELOPMENT
3 credits.

This course covers both classic and contemporary theories, providing students with a firm grounding in the theoretical perspectives that have shaped and are shaping understandings of human development across the life-span. The course explores the historical roots of contemporary perspectives and examines the development of theoretical conceptualizations both within and across theoretical perspectives.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HDFS/COUN PSY/ED PSYCH 726 – ETHNIC AND RACIAL DIVERSITY IN SOCIAL DEVELOPMENT
3 credits.

Review of empirical and theoretical research on ethnic/racial diversity in social development across childhood, adolescence and early adulthood with emphasis on implications for counseling and school psychology.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2021

HDFS 761 – CHILDHOOD AND THE FAMILY: PRENATAL THROUGH PRE-ADOLESCENCE
3 credits.

Research and theories about development from the prenatal period to middle childhood, emphasizing a relational approach and contemporary research (both content and methods). Explores diversity in early development in the US and internationally.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2024
Learning Outcomes: 1. Describe change in physical, cognitive, and psychosocial development from conception through middle childhood, particularly in the family context.
Audience: Graduate

2. Identify biological, psychological, and social mechanisms related to developmental change.
Audience: Graduate

3. Discuss how biological, psychological, and social mechanisms interact in a dynamic and reciprocal fashion to shape early human development.
Audience: Graduate

4. Think critically about human development research, including how research methods, content, findings, and theories impact understanding of early human development and relate to contexts.
Audience: Graduate

5. Apply knowledge of early human development to identify policy and intervention pathways for promoting optimal health and well-being from conception through middle childhood.
Audience: Graduate

HDFS 763 – AGING AND THE FAMILY: ADOLESCENCE THROUGH LATER LIFE
3 credits.

Examines physical, cognitive, and socioemotional development from adolescence through late life, emphasizing development in context. Covers developmental theory, research, and applications across life stages, including death and dying, with emphasis on relational approaches. Addresses individual, family, historical, and cultural influences on human development.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe change in physical, cognitive, and socioemotional development from adolescence through old age, particularly in the family context
Audience: Graduate

2. Examine individual differences in developmental change across the lifespan
Audience: Graduate

3. Identify biological, psychological, and social mechanisms related to developmental change
Audience: Graduate

4. Discuss how biological, psychological, and social mechanisms interact in a dynamic and reciprocal fashion to shape development across the lifespan
Audience: Graduate

5. Identify policy and intervention pathways for promoting optimal health and well-being from adolescence through old age
Audience: Graduate

HDFS 765 – FAMILIES & POVERTY
3 credits.

Introduction to research on families and poverty. Learn how family behaviors vary by socioeconomic status; how romantic relationships, childbearing, and childrearing may be implicated in poverty; what the consequences of poverty are for family functioning and children; and about the role of policy in influencing families and poverty.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HDFS 766 – CURRENT TOPICS IN HUMAN DEVELOPMENT AND FAMILY STUDIES
1-3 credits.

Specialized subject matter of current interests. Literature, research, and current trends, with implications for teaching, parent education, and other professions.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

HDFS 818 – ATTACHMENT THEORY AND RELATIONSHIPS ACROSS THE LIFESPAN
3 credits.

Examines parent-child and intimate relationships using attachment theory and research (and critiques of this approach), focusing on relationships formed in infancy and across the lifespan.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HDFS 865 – FAMILY THEORY I (SURVEY)
3 credits.

A survey of the current theories and models used in family research and theory development. Focuses on structure-functional, interactional, developmental, systems, and exchange theory in relation to family research and application.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026

HDFS 869 – ADVANCED SEMINAR IN FAMILY STRESS AND COPING
3 credits.

Emphasis on theoretical explanations of family stress from various levels of analysis--individual, social network, family, community, and larger social context. Considers sources of stress and how families experience, respond to, cope with, and resolve stress.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025

HDFS 872 – BRIDGING THE GAP BETWEEN RESEARCH AND ACTION
3 credits.

Addresses the critical skills and methods needed to gather and apply research-based knowledge and theory to human development and family studies. Strategies for conducting research relevant to social policy, programs, and the general public will be discussed as well as techniques for communicating research.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HDFS/ED PSYCH/NURSING/SOC WORK 880 – PREVENTION SCIENCE
3 credits.

Theoretical, empirical and practical foundation for prevention science as it relates to the prevention of human social problems. Research and evaluation methods, program design strategies, best practices and policy as they relate to the field of prevention are also examined.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025

HDFS/ED PSYCH/NURSING/SOC WORK 881 – CAPSTONE SEMINAR IN PREVENTION SCIENCE
1 credit.

An opportunity to meet with prevention professionals and scholars from across campus and the community to explore current and emerging issues of prevention research and professional practice. Students must complete HDFS/ED PSYCH/NURSING/SOC WORK 880 before taking this course.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024

HDFS 990 – RESEARCH AND THESIS
1-12 credits.

Individual study as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026

HDFS 999 – INDEPENDENT STUDY
1-3 credits.

Directed study projects as arranged with a faculty member.
Requisites: Consent of instructor
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026

INDUSTRIAL AND SYSTEMS ENGINEERING (I SY E)

I SY E 1 – COOPERATIVE EDUCATION PROGRAM
1 credit.

Apply classroom theory and practical knowledge of engineering-related operations and functions in a professional setting. Full-time workplace experience.
Requisites: Sophomore standing
Course Designation: Workplace - Workplace Experience
Repeatable for Credit: Yes, for 3 number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and respond appropriately to real-life engineering ethics cases relevant to co-op work
Audience: Undergraduate

2. Synthesize and apply appropriate technical education to real world technical work
Audience: Undergraduate

3. Communicate effectively in writing and speaking with a range of audiences in the workplace, including those without disciplinary expertise
Audience: Undergraduate

4. Develop professional and transferable habits like time management skills, collaborative problem-solving skills, and research skills for learning new information
Audience: Undergraduate

I SY E 191 – THE PRACTICE OF INDUSTRIAL ENGINEERING
2 credits.

An introduction to industrial engineering subject matter areas, problem types, and design/analysis approaches, techniques, and methodologies. Special emphasis on formulation and design alternatives for problem solving.
Requisites: None
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Define and explain common industrial engineering terminology
Audience: Undergraduate

2. Give examples of career opportunities in industrial engineering
Audience: Undergraduate

3. List the focus areas in industrial engineering and give a brief explanation of how each area uses industrial engineering principles
Audience: Undergraduate

4. Give examples of problems in each area of industrial engineering
Audience: Undergraduate

5. Identify professional and academic development resources available to industrial engineering students
Audience: Undergraduate

6. Investigate an open-ended industrial engineering problem and think critically about how to solve it
Audience: Undergraduate

7. Analyze small datasets using Microsoft Excel
Audience: Undergraduate

I SY E 210 – INTRODUCTION TO INDUSTRIAL STATISTICS
3 credits.

Introduction to basic probability and statistical tools and methods from an industrial application perspective. Random variables and probability distributions; descriptive statistics; point estimates. Perform hypothesis testing, construct confidence intervals, and understand design of experiments in the context of motivating case studies. Regression and correlation analysis. Focus on applying statistical methods and tools to solve engineering problems. Use of Microsoft Excel to interpret and analyze data.
Requisites: (MATH 211, 217, or 221) or member of Engineering Guest Students
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Articulate the importance of statistics in engineering applications
Audience: Undergraduate

2. Summarize and describe data using descriptive statistics and graphical methods
Audience: Undergraduate

3. Perform basic statistical analysis on datasets
Audience: Undergraduate

4. Design simple experiments with data for the purpose of statistical analysis
Audience: Undergraduate

5. Use Excel to describe, analyze, graph, and interpret data
Audience: Undergraduate

6. Apply linear and multiple regression techniques
Audience: Undergraduate

7. Apply experiment and analysis techniques to areas of engineering such as Statistical Process Control
Audience: Undergraduate

8. Apply basic probability concepts such as random variables, independence, and probability distributions
Audience: Undergraduate

I SY E 312 – DATA MANAGEMENT AND ANALYSIS FOR INDUSTRIAL ENGINEERS
3 credits.

Fundamentals of data management and analysis. Formulating and solving real industrial engineering problems with appropriate data managing and modeling strategies. Fundamental industrial database management strategies, data preprocessing, visualization and modeling techniques; industrial database management and analysis techniques using leading programming software (MySQL and R).
Requisites: (I SY E 210, E C E 331, MATH/STAT 309, STAT 311, or 324) or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Demonstrate knowledge of fundamental industrial database management strategies
Audience: Undergraduate

2. Apply data preprocessing, visualization, and modeling techniques
Audience: Undergraduate

3. Apply industrial database management techniques using structured query language (SQL)
Audience: Undergraduate

4. Use leading programming software to perform data regression analysis
Audience: Undergraduate

5. Create and solve a real-life industrial data analytics problem, and present results effectively to audience
Audience: Undergraduate

I SY E 313 – ENGINEERING ECONOMIC ANALYSIS
3 credits.

Financial accounting principles and cost systems, interpretation and use of accounting reports and supplemental information for engineering economic analyses, consideration of cost-volume-profit analyses, use of discounted cash flow techniques, flexible budgeting, transfer pricing, and capital budgeting.
Requisites: (MATH 217, 221, or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Apply discounted cash-flow analysis to evaluate proposed capital investments
Audience: Undergraduate

2. Recognize, formulate, and analyze cash-flow models
Audience: Undergraduate

3. Explain model results to managers and other non-specialist decision makers
Audience: Undergraduate

I SY E 315 – PRODUCTION PLANNING AND CONTROL
3 credits.

Techniques and applications of control concepts in the design of inventory, production, quality, and project-planning systems; use of the computer as a component in such systems.
Requisites: (I SY E 210, E C E 331, MATH/STAT 309, STAT 311, 324, 371, MATH/STAT 431, 531, or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe and apply fundamental principles and methodologies relevant to planning, design, operation, and control of production planning and control systems
Audience: Undergraduate

2. Describe and explain how organizational strategy drives operations management approaches and supply chain decisions
Audience: Undergraduate

3. Develop a portfolio of analytical tools and skills related to production planning and control and operations management
Audience: Undergraduate

4. Recognize situations in production system environments that suggest the use of appropriate quantitative methods to assist in decision-making
Audience: Undergraduate

5. Apply skills and tools to reduce waste and to increase productivity and quality in manufacturing and service organizations
Audience: Undergraduate

I SY E 320 – SIMULATION AND PROBABILISTIC MODELING
3 credits.

Analysis of stochastic systems using both analytic methods and computer simulation. Empirical and theoretical models of arrival and service processes. State spaces and state transition probabilities. Simulation of queuing and manufacturing systems. Continuous time Markov analysis of manufacturing systems. Simulation project management, testing and emerging trends.
Requisites: (MATH/STAT 309, STAT 311, MATH/STAT 431, 531 or concurrent enrollment) and (I SY E 210, E C E 331, STAT/MATH 310, STAT 312, 324, 371, or concurrent enrollment) and (MATH 320, 340, or concurrent enrollment), or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply knowledge of math, science, and engineering principles to model real stochastic systems
Audience: Undergraduate

2. Identify, formulate, and solve problems using appropriate data analytic and simulation approaches
Audience: Undergraduate

3. Understand and apply probabilistic modeling techniques such as Markov Chains and queueing theory to study stochastic systems
Audience: Undergraduate

4. Apply statistical methods to analyze stochastic behaviors of the systems
Audience: Undergraduate

5. Apply simulation software to model the process and evaluate performance measures of the systems
Audience: Undergraduate

I SY E 321 – SIMULATION MODELING LABORATORY
1 credit.

Computer exercises involving generation and analysis of random variables, spreadsheet models of queuing systems, use of simulation software packages. Project.
Requisites: Concurrent enrollment in I SY E 320
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply knowledge of math, science, and engineering principles to model real stochastic systems
Audience: Undergraduate

2. Identify, formulate, and solve problems using appropriate data analytic and simulation approaches
Audience: Undergraduate

3. Understand and apply probabilistic modeling techniques such as Markov Chains and queueing theory to study stochastic systems
Audience: Undergraduate

4. Apply statistical methods to analyze stochastic behaviors of the systems
Audience: Undergraduate

5. Apply simulation software to model the process and evaluate performance measures of the systems
Audience: Undergraduate

I SY E 323 – OPERATIONS RESEARCH-DETERMINISTIC MODELING
3 credits.

Basic techniques for modeling and optimizing deterministic systems with emphasis on linear programming. Computer solution of optimization problems. Applications to production, logistics, and service systems.
Requisites: MATH 222 and (MATH 340, 341 or 375), or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Write an algebraic formulation of an optimization model that captures the main decision elements of practical problems
Audience: Undergraduate

2. Use an algebraic modeling language to solve an optimization model
Audience: Undergraduate

3. Model logical constraints using binary decision variables
Audience: Undergraduate

4. Understand the basic ideas behind algorithms for solving linear programming and discrete optimization problems
Audience: Undergraduate

I SY E 348 – INTRODUCTION TO HUMAN FACTORS ENGINEERING LABORATORY
1 credit.

Hands on experience applying concepts discussed in I SY E/PSYCH 349. Complete a small three-part design project. Learn how to measure light, sound, anthropometric, and psychophysiological data, and then apply these measurements to product and workplace design challenges.
Requisites: Declared in Industrial Engineering and concurrent enrollment in I SY E/PSYCH 349, or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the strengths and limits of human perceptual, cognitive and physical abilities and their implications for system design
Audience: Undergraduate

2. Describe human factors tools, techniques and methods commonly used to design and improve system performance
Audience: Undergraduate

3. Evaluate and recommend work and task designs based on human factors and ergonomic principle
Audience: Undergraduate

4. Define the ethical application of human factors in designing products and processes
Audience: Undergraduate

I SY E/PSYCH 349 – INTRODUCTION TO HUMAN FACTORS
3 credits.

Conveys the importance of considering human capabilities and limits in system design and operation. This includes understanding human characteristics from the cognitive, physical, and psychosocial perspectives. Implications of these characteristics are explored through understanding the needs of people, designing to support these needs, and evaluating systems to ensure they serve the intended purpose. Case studies are used to identify the human role in accidents and to identify design improvements. Application domains include consumer product design, human-computer interaction, workplace safety, and complex systems such as healthcare delivery.
Requisites: (I SY E 210, E C E 331, MATH/STAT 309, 431, STAT 311, 324, 371, MATH 531, PSYCH 210, or C&E SOC/SOC 360, or concurrent registration), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Core GenEd - Natural Science & Wellness Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Recognize the strengths and limits of human perceptual, cognitive and physical abilities and their implications for system design
Audience: Undergraduate

2. Describe human factors tools, techniques and methods commonly used to design and improve system performance
Audience: Undergraduate

3. Evaluate and recommend work and task designs based on human factors and ergonomic principles
Audience: Undergraduate

4. Define the ethical application of human factors in designing products and processes
Audience: Undergraduate

I SY E 350 – INDUSTRIAL ENGINEERING DESIGN I
3 credits.

Introduction to the tools needed for advanced design courses through experiential learning and hands-on opportunities to conduct experiments, take relevant measurements, analyze real-world data, design systems, and to make and test prototypes of designs.
Requisites: Declared in Industrial Engineering, (COMP SCI 200, 220, 300, 301, 302, or placement into COMP SCI 300), (I SY E 210, MATH/STAT 309, 431, MATH 531, STAT 311 or 324) and I SY E 315
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply basic industrial engineering design methods
Audience: Undergraduate

2. Use appropriate industrial and systems engineering design tools forestablishing solutions to open-ended problems
Audience: Undergraduate

3. Select the appropriate methods to utilize in order to collect real-world data
Audience: Undergraduate

4. Observe and collect data relevant to an industrial engineering problem
Audience: Undergraduate

I SY E 373 – ARTIFICIAL INTELLIGENCE (AI) IN SYSTEMS
3 credits.

Exploration of deploying artificial intelligence (AI) in systems at scale and doing so responsibly. Application and analysis of AI in diverse industrial environments in fields such as transportation, manufacturing, and healthcare.
Requisites: (MATH/STAT 309, STAT 311, MATH/STAT 431 or MATH 531) and (I SY E 210, E C E 331, STAT/MATH 310, STAT 312, 324, or 371), or graduate/professional standing
Repeatable for Credit: No
Learning Outcomes: 1. Explain the basic principles and techniques of artificial intelligence.
Audience: Undergraduate

2. Evaluate AI systems using various metrics and methodologies.
Audience: Undergraduate

3. Represent engineered systems using mathematical models.
Audience: Undergraduate

4. Assess the reliability and robustness of AI systems in complex industrial environments.
Audience: Undergraduate

5. Analyze privacy concerns and ethical considerations in AI applications in engineering.
Audience: Undergraduate

6. Discuss the importance of transparency and interpretability in AI systems.
Audience: Undergraduate

7. Apply AI techniques to solve real-world problems involving engineered systems in complex industrial environments.
Audience: Undergraduate

I SY E 389 – HONORS IN RESEARCH
1-3 credits.

Undergraduate honors research projects supervised by faculty members.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2013
Learning Outcomes: 1. Conduct and report on independent industrial engineering research
Audience: Undergraduate

2. Independently develop industrial engineering research questions
Audience: Undergraduate

3. Appropriately utilize online and library resources
Audience: Undergraduate

I SY E 412 – FUNDAMENTALS OF INDUSTRIAL DATA ANALYTICS
3 credits.

Provides an understanding of the fundamentals of using data analytics to make data-driven decisions. Emphasizes applying techniques to industrial engineering problems. Focuses on formulating and solving real industrial problems with the appropriate modeling strategies and analytics principles for better decision making.
Requisites: (I SY E 210, E C E 331, STAT 311, 324, MATH/STAT 309, 431, or MATH 531), graduate/professional standing, or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply fundamental knowledge of industrial data analytics concepts, problems, and techniques
Audience: Undergraduate

2. Integrate data analytics techniques with industrial and systems engineering domain knowledge to appropriately formulate problem statements and facilitate decision making
Audience: Undergraduate

3. Implement software programming skills to perform data analysis
Audience: Undergraduate

4. Apply industrial data analytics methods and tools to solve real-world industrial engineering problems
Audience: Undergraduate

I SY E 415 – INTRODUCTION TO MANUFACTURING SYSTEMS, DESIGN AND ANALYSIS
3 credits.

Introduction to the technologies, processes and systems of modern discrete part manufacturing. Emphasis on development of an understanding of the behavior of integrated systems.
Requisites: I SY E 315, member of Engineering Guest Students, or graduate/professional standing
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Distinguish advantages and disadvantages for a range of manufacturing processes
Audience: Undergraduate

2. Select an appropriate manufacturing process when given information such as part design, material, and production quantity
Audience: Undergraduate

3. Use terminology that relates to manufacturing systems design and analysis
Audience: Undergraduate

4. Examine manufacturing system performance by applying analytical techniques such as line balancing, manufacturing system benchmarking, inventory models, and queuing formulas
Audience: Undergraduate

5. Utilize computer-aided design and manufacturing software to display part geometry and create toolpaths for a CNC program
Audience: Undergraduate

I SY E 417 – HEALTH SYSTEMS ENGINEERING
3 credits.

Introduction to the application of industrial engineering methods to the analysis and improvement of health care delivery. Exploration of common problems of decision making and control in health care. Examination of social, regulatory and economic factors unique to health care.
Requisites: I SY E 320 and 349, graduate/professional standing, or member of Engineering Guest Students, or declared in Clinical and Community Outcomes Capstone Certificate
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Describe and explain the purpose of the various components that make-up many health systems including public health agencies (e.g., CDC), hospital systems, emergency medical services (e.g., 9-1-1), healthcare providers, and health insurance
Audience: Undergraduate

2. Identify problems within health systems that may be amenable to industrial engineering tools
Audience: Undergraduate

3. Apply industrial systems engineering concepts and tools (e.g., regression, queueing theory, simulation, cost-benefit analysis, and machine learning) to specific problems in healthcare
Audience: Undergraduate

I SY E/COMP SCI/MATH 425 – INTRODUCTION TO COMBINATORIAL OPTIMIZATION
3 credits.

Focuses on optimization problems over discrete structures, such as shortest paths, spanning trees, flows, matchings, and the traveling salesman problem. We will investigate structural properties of these problems, and we will study both exact methods for their solution, and approximation algorithms.
Requisites: (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program
Course Designation: Breadth - Physical Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify and use the structural properties of combinatorial optimization problems
Audience: Undergraduate

2. Apply algorithms for the solution -exact or approximate- of a combinatorial optimization problem
Audience: Undergraduate

3. Explain why the algorithms studied are correct and understand their running time
Audience: Undergraduate

I SY E 445 – ENGINEERING SUPPLY CHAIN MANAGEMENT FOR LOGISTICS
3 credits.

Concepts from optimization, stochastics, and statistics to model different problems in the context of logistics decision making. Application of engineering design principles in combination with mathematical modeling techniques to solve problems in supply chain design, planning, execution, and transportation.
Requisites: (I SY E 210, MATH/STAT 310, STAT 312, 324, or 340) and (I SY E 323 or I SY E/COMP SCI/E C E 524), graduate/professional standing, or member of Engineering Guest Students
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain common supply chain management terminology and concepts used in industry settings
Audience: Undergraduate

2. Evaluate supply chain strategies and policies based on the two key drivers of supply chains: cost efficiency and responsiveness
Audience: Undergraduate

3. Apply mathematical modeling of inventory management, transportation, and network design problems to real world settings
Audience: Undergraduate

4. Design holistic supply chain strategies drawing from multiple mathematical models to successfully meet business goals
Audience: Undergraduate

I SY E 450 – INDUSTRIAL ENGINEERING DESIGN II
3 credits.

Team-based project experience to address a real-world design challenge posed by an external organization. Collaboration with the project client to design a new system or process, or redesign an existing one, by integrating and applying appropriate Industrial and Systems Engineering knowledge, methodologies and tools for problem definition and analysis; idea generation; solution development, evaluation and justification; and implementation planning and impact assessment.
Requisites: Senior standing only, I SY E 313, 320, 323, 350, and PSYCH/ I SY E 349
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Employ design thinking, and engage the client in the creative process for problem space exploration and idea generation
Audience: Undergraduate

2. Utilize a structured modeling, analysis and decision#making framework to design a new system or process, or re#design an existing one
Audience: Undergraduate

3. Choose, synthesize and effectively utilize appropriate ISyE methods, concepts, engineering standards, and modeling and analysis tools in all facets of the project lifecycle
Audience: Undergraduate

4. Adjust and be flexible with design strategy and adapt it suitably to address unanticipated issues during project execution
Audience: Undergraduate

5. Hone skills in teamwork, oral and written communication, and project management
Audience: Undergraduate

I SY E 468 – INTRODUCTION TO INDUSTRIAL ENGINEERING RESEARCH
1 credit.

An introduction to the practice of conducting research in industrial engineering, literature reviews, identifying gaps in existing work, writing a research proposal.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Conduct a literature review
Audience: Undergraduate

2. Identify gaps in existing research
Audience: Undergraduate

3. Describe characteristics of a good research question
Audience: Undergraduate

4. Write a proposal to address an open research question
Audience: Undergraduate

5. Describe some current active research areas in industrial engineering
Audience: Undergraduate

I SY E 478 – RESEARCH AND BEYOND IN INDUSTRIAL ENGINEERING
1 credit.

An introduction of skills required for successful research in graduate school. Preparing for graduate thesis writing, applying for graduate school, presenting research in a variety of ways. How to foster mental health and work-life balance.
Requisites: I SY E 468
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Prepare materials for graduate program applications, such as a personal statement
Audience: Undergraduate

2. List key elements of research ethics and common pitfalls in different types of research
Audience: Undergraduate

3. Make a poster summarizing completed and/or in-progress work
Audience: Undergraduate

4. Give a technical presentation summarizing completed and/or in-progress work
Audience: Undergraduate

5. Critique technical research presentations
Audience: Undergraduate

6. List strategies for maintaining healthy work-life balance in graduate school
Audience: Undergraduate

I SY E 489 – HONORS IN RESEARCH
1-3 credits.

Undergraduate honors research projects supervised by faculty members.
Requisites: Consent of instructor
Course Designation: Honors - Honors Only Courses (H)
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2025
Learning Outcomes: 1. Conduct and report on independent industrial engineering research
Audience: Undergraduate

2. Independently develop industrial engineering research questions
Audience: Undergraduate

3. Appropriately utilize online and library resources
Audience: Undergraduate

I SY E/M E 510 – FACILITIES PLANNING
3 credits.

Introduction to plant location theory and analysis of models of plant location; models for determining plant size and time phasing; line balancing models; techniques for investigating conveyor and other material handling problems; and models of plant layout.
Requisites: I SY E 315, (I SY E 323 or E C E/COMP SCI/I SY E 524) and I SY E/PSYCH 349, or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Identify, formulate, and solve facilities layout problems by applying principles of engineering and mathematics
Audience: Both Grad & Undergrad

2. Apply engineering design to produce facilities design solutions that meet specified needs with consideration of productivity, safety, and economic factors
Audience: Both Grad & Undergrad

3. Utilize computer software to study and illustrate the operation of a manufacturing system
Audience: Both Grad & Undergrad

4. Collaborate with a team to develop solutions to engineering problems and communicate findings effectively
Audience: Both Grad & Undergrad

5. Demonstrate ability to lead a facilities planning project integrating quantitative techniques and management tools
Audience: Graduate

I SY E/M E 512 – INSPECTION, QUALITY CONTROL AND RELIABILITY
3 credits.

Inspection data for quality control; sampling plans for acceptance inspection; charts for process control. Introduction to reliability models and acceptance testing.
Requisites: (STAT/MATH 309, STAT 311, 224, 324, or STAT/MATH 431), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Apply statistical process control analysis for measuring and controlling quality
Audience: Undergraduate

2. Recognize, formulate, and analyze univariate continuous and discrete control charts
Audience: Undergraduate

3. Use Minitab to perform basic statistical process control analysis
Audience: Undergraduate

4. Communicate the results of the statistical process control analysis to management and other non-specialist users of engineering analyses
Audience: Undergraduate

5. Recognize, formulate, and analyze advanced continuous control charts
Audience: Graduate

6. Perform process capability and measurement system capability analysis

Audience: Graduate

I SY E 515 – ENGINEERING MANAGEMENT OF CONTINUOUS PROCESS IMPROVEMENT
3 credits.

Addresses the role of the industrial engineer as a "manager" of continuous improvement in design and production processes. Provides modern tools and techniques for planning and managing team projects, integrating the concepts of total quality, data based decision making, and resource management.
Requisites: Senior standing and INTEREGR 397 (formerly E P D 397) or concurrent enrollment, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe and explain the nature of and tools for change management and continual process improvement
Audience: Both Grad & Undergrad

2. Experience the role of the industrial and systems engineer as a “manager" of continual process improvement
Audience: Both Grad & Undergrad

3. Work effectively on a team-based experiential project focused on process design, analysis, and resource management and integrating the concepts of continual improvement, customer focus, and teamwork
Audience: Both Grad & Undergrad

4. Implement technical skills and processes, often with a non-technical workforce
Audience: Both Grad & Undergrad

5. Apply problem solving and management/planning tools for effectively defining problems, feasible alternative solutions, and measurable goals in a “real world” environment
Audience: Both Grad & Undergrad

6. Identify the impact of organizational and cultural influences on the planning and implementation of change
Audience: Both Grad & Undergrad

7. Demonstrate ability to lead an industry-based team project integrating contemporary change management frameworks and considering organizational culture
Audience: Graduate

I SY E 516 – INTRODUCTION TO DECISION ANALYSIS
3 credits.

Overview of modeling techniques and methods used in decision analysis, including multiattribute utility models, decision trees, and Bayesian models. Psychological components of decision making are discussed. Elicitation techniques for model building are emphasized. Practical applications through real world model building are described and conducted.
Requisites: (STAT/MATH 309, STAT 311, or STAT/MATH 431), graduate/professional standing, member of Engineering Guest Students, or declared in Capstone Certificate in Artificial Intelligence for Engineering Data Analytics
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Recognize the types of problems that decision analysis can and cannot solve
Audience: Both Grad & Undergrad

2. Structure decision problems by identifying the relevant values, objectives, attributes, decisions, uncertainties, consequences, and trade-offs
Audience: Both Grad & Undergrad

3. Represent aspects of a decision problem graphically or mathematically
Audience: Both Grad & Undergrad

4. Determine the optimal decision, using mathematical techniques as appropriate
Audience: Both Grad & Undergrad

5. Identify which parameters have the most impact on the result
Audience: Both Grad & Undergrad

6. Explain the results of a decision analysis to managers and other non-specialists
Audience: Both Grad & Undergrad

7. Articulate mathematical foundations of decision problems
Audience: Graduate

I SY E 517 – DECISION MAKING IN HEALTH CARE
3 credits.

Introduction to the use of decision sciences in health-care. Conceptual understanding of medical decision making and its tools including decision trees, sensitivity analysis, Markow (decision) processes, and Monte Carlo simulations with examples from the current medical literature.
Requisites: (STAT/MATH 309, STAT 311, or STAT/MATH 431) and (I SY E 323 or E C E/COMP SCI/I SY E 524), or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain how decision sciences are used in the health-care industry
Audience: Both Grad & Undergrad

2. Describe concepts related to medical decision making and cost-effectiveness analysis
Audience: Both Grad & Undergrad

3. Apply technical skills in decision analysis including the creation and evaluation of decision trees, the use of sensitivity analysis, and the use of Markov processes and Monte Carlo simulation
Audience: Both Grad & Undergrad

4. Incorporate specific patient preferences into medical decision models through the use of utility analysis
Audience: Both Grad & Undergrad

5. Identify and apply an advanced decision analytical modeling framework to solve medical decision making problems
Audience: Graduate

I SY E/COMP SCI/DS 518 – WEARABLE TECHNOLOGY
3 credits.

Covers the design and construction of wearable computing platforms, combining technology with textiles and apparel. Intended for those with a background in textiles, computer science, engineering, or media arts. Explores fundamentals of electronic circuitry, programming, and maker skills, as well as applications such as sensor integration, interactive textiles, and wearable user interfaces.
Requisites: Sophomore standing
Course Designation: Core GenEd - Natural Science & Wellness + Lab
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2022

I SY E 520 – QUALITY ASSURANCE SYSTEMS
3 credits.

Introduces engineers to applications of total quality concepts and tools to develop, implement, and maintain an effective quality assurance system in a manufacturing or service organization. Emphasis is on documentation development, team-based improvement strategies, and international quality standards.
Requisites: Junior standing and I SY E 315, or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Describe and apply the basic elements of quality and environmental management systems, including the requirements and certification process of international standards such as ISO 9001 and ISO 14001 and industry-specific applications of these standards
Audience: Both Grad & Undergrad

2. Apply concepts and tools in the development, implementation, and maintenance of effective quality and environmental management systems in manufacturing and service organizations, including various approaches for management system documentation structure
Audience: Both Grad & Undergrad

3. Describe and explain strategic and competitive considerations in management system implementation and maintenance, including risk-based thinking and continual improvement
Audience: Both Grad & Undergrad

4. Develop and apply auditing techniques and skills
Audience: Both Grad & Undergrad

5. Demonstrate ability to synthesize and apply requirements for quality and environmental management considering organizational strategy, culture and constraints
Audience: Graduate

I SY E 521 – MACHINE LEARNING IN ACTION FOR INDUSTRIAL ENGINEERS
3 credits.

Principles, algorithms, and industrial engineering applications of machine learning. Predictive analytics, with a focus on combining data and models to improve decision-making. Methods include: statistics, linear regression, logistic regression, regularization, over-fitting, clustering, classification and regression trees, boosting, bagging, deep learning, and neural networks. Applications areas include: healthcare, transportation, and the public sector.
Requisites: (COMP SCI 200, 220, or place into COMP SCI 300), (I SY E 323 or I SY E/COMP SCI/E C E 524), and (I SY E 210, STAT 311, 324, STAT/MATH 309, or 431), grad/prof standing, member of Engr Guest Stdnts, or declared in Capstone Cert in AI for Engr Data Analytics
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Identify problems amenable to machine learning and the techniques required to solve those problems (regression vs. classification, regularization, bagging vs. boosting, etc.)
Audience: Both Grad & Undergrad

2. Apply appropriate analytical models to solve problems and improve decision-making using Python
Audience: Both Grad & Undergrad

3. Effectively communicate findings through both oral and written formats

Audience: Both Grad & Undergrad

4. Demonstrate an understanding of how industrial engineering techniques (e.g., optimization) are used to train machine learning models
Audience: Graduate

I SY E/COMP SCI/E C E 524 – INTRODUCTION TO OPTIMIZATION
3 credits.

Introduction to mathematical optimization from a modeling and solution perspective. Formulation of applications as discrete and continuous optimization problems and equilibrium models. Survey and appropriate usage of basic algorithms, data and software tools, including modeling languages and subroutine libraries.
Requisites: (COMP SCI 200, 220, 300, 301, 302, 310, or placement into COMP SCI 300) and (MATH 320, 340, 341, or 375) or graduate/professional standing
Course Designation: Core GenEd - Mathematics & Quantitative Reasoning
Breadth - Natural Science
Level - Intermediate
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Engage in topics about "optimization in practice".
Audience: Undergraduate

2. Use and analyze the results of state of the art optimization software.
Audience: Undergraduate

3. Use the GAMS modeling system and Jupyter notebooks (in conjunction with elementary Python) or Julia and JUMP.
Audience: Undergraduate

4. Design good models for realistic applications in engineering and the sciences.
Audience: Undergraduate

5. Develop a "commercial strength" application of optimization technology.
Audience: Undergraduate

I SY E/COMP SCI/MATH/STAT 525 – LINEAR OPTIMIZATION
3 credits.

Introduces optimization problems whose constraints are expressed by linear inequalities. Develops geometric and algebraic insights into the structure of the problem, with an emphasis on formal proofs. Presents the theory behind the simplex method, the main algorithm used to solve linear optimization problems. Explores duality theory and theorems of the alternatives.
Requisites: MATH 320, 340, 341, 375, or 443 or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program
Course Designation: Core GenEd - Natural Science & Wellness
Breadth - Natural Science
Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Use linear programming to formulate real world decision problems.
Audience: Both Grad & Undergrad

2. Apply algorithms to solve linear programming problems and demonstrate their correctness.
Audience: Both Grad & Undergrad

3. Combine different proving techniques explored in class in an original way to show new results.
Audience: Graduate

I SY E/COMP SCI 526 – ADVANCED LINEAR PROGRAMMING
3 credits.

Review of linear programming. Polynomial time methods for linear programming. Quadratic programs and linear complementarity problems and related solution techniques. Solution sets and their continuity properties. Error bounds for linear inequalities and programs. Parallel algorithms for linear and quadratic programs.
Requisites: STAT/COMP SCI/I SY E/MATH 525 and (COMP SCI 200, 220, 300, 301, 302, 310, or placement into COMP SCI 300) or graduate/professional standing
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Repeatable for Credit: No
Last Taught: Spring 2020
Learning Outcomes: 1. Use the theory of linear programming to prove general duality results
Audience: Undergraduate

2. Apply the concept of complementarity
Audience: Undergraduate

3. Analyze and develop algorithms for solving optimization and equilibrium problems
Audience: Undergraduate

4. Apply decomposition methods and other advanced algorithms for the solution of optimization and equilibrium problems
Audience: Undergraduate

5. Understand economic concepts and how they relate to optimization and equilibria
Audience: Undergraduate

6. Extend theory of linear programming into the framework of conic programming
Audience: Undergraduate

I SY E/PSYCH 549 – HUMAN FACTORS ENGINEERING
3 credits.

Analysis and design of man-machine systems using human performance models and data. Emphasis on systems involving communication and control. Projects using digital and analog computer simulation techniques for system design.
Requisites: I SY E/PSYCH 349, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Level - Advanced
L&S Credit - L&S Liberal Arts and Science
Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain the topics involved in cognitive human factors and design implications of these concepts
Audience: Both Grad & Undergrad

2. Describe the interactions between human operators and system components including the environment, technology, and organizations
Audience: Both Grad & Undergrad

3. Discuss different human factors perspectives regarding human error and limitations of human performance, especially as these relate to memory, decision-making, action selection, and workload and stress
Audience: Both Grad & Undergrad

4. Identify barriers and limitations to memory and how these must be accounted for in design of systems and displays
Audience: Both Grad & Undergrad

5. Articulate the role of simulation and modeling in system design involving human operators
Audience: Both Grad & Undergrad

6. Use cognitive engineering analysis methods to complete a detailed analysis of a real incident or accident including outlining each layer and component of system failure and proposing possible redesign solutions
Audience: Graduate

I SY E 552 – HUMAN FACTORS ENGINEERING DESIGN AND EVALUATION
3 credits.

Evaluation, analysis, and design recommendations for improving human performance and productivity in applied settings. Collection of instrument-based and user survey data. Emphasis on ergonomics, human factors and sociotechnical systems engineering approaches and problems. Design project required.
Requisites: I SY E/PSYCH 349 and INTEREGR 397 (formerly E P D 397) or concurrent enrollment or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply observation and interview skills to understand customer needs and system interactions
Audience: Both Grad & Undergrad

2. Translate observation and interview data into models of customer requirements and system constraints
Audience: Both Grad & Undergrad

3. Communicate model content to the customer and to marketing, engineering, management, and other members of the design team
Audience: Both Grad & Undergrad

4. Translate work models into aesthetically appealing and functional design concepts and prototypes
Audience: Both Grad & Undergrad

5. Evaluate and iterate prototype designs into a system that satisfies customer requirements
Audience: Both Grad & Undergrad

6. Design a user study to resolve a design issue, such as the choice of opt-in or opt-out default
Audience: Graduate

I SY E 555 – HUMAN PERFORMANCE AND ACCIDENT CAUSATION
3 credits.

A systems view of accident causation, with emphasis on the human performance limitations important in industrial and other accidents. Models of causation, data collection systems, economic evaluation, and safety programs. Small group projects.
Requisites: I SY E/PSYCH 349, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Explain the rules and regulations governing accident investigations in different industries including transportation and healthcare
Audience: Both Grad & Undergrad

2. Describe the standard process for conducting an accident investigation
Audience: Both Grad & Undergrad

3. Describe basic accident investigation tools, methods and techniques
Audience: Both Grad & Undergrad

4. Discuss different human factors perspectives regarding the underlying causes of errors and accidents
Audience: Both Grad & Undergrad

5. Identify different approaches for redesigning systems to improve safety

Audience: Both Grad & Undergrad

6. Utilize accident investigation methods and tools to analyze a major accident to determine causes and corrective actions
Audience: Graduate

I SY E 557 – HUMAN FACTORS ENGINEERING FOR HEALTHCARE SYSTEMS
3 credits.

Introduction to the application of Human Factors Engineering theory and methods to the analysis and improvement of healthcare delivery systems.
Requisites: PSYCH/I SY E 349, or graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Explain Human Factors Engineering theories and methods as they pertain to the evaluation and design of healthcare sociotechnical systems
Audience: Both Grad & Undergrad

2. Select and critically evaluate the utility of key Human Factors Engineering concepts and tools for assessing and modeling healthcare delivery challenges in sociotechnical systems
Audience: Both Grad & Undergrad

3. Identify the impact of changes to the healthcare sociotechnical system at the individual and organizational level
Audience: Both Grad & Undergrad

4. Apply a Human Factors Engineering-based sociotechnical system approach to evaluate and design interaction between users and information technologies
Audience: Both Grad & Undergrad

5. Demonstrate the use of Human Factors Engineering techniques in solving healthcare delivery problems within the organizational, social, and physical contexts in information system design
Audience: Both Grad & Undergrad

6. Demonstrate ability to independently evaluate Human Factors Engineering research in healthcare
Audience: Graduate

I SY E 562 – HUMAN FACTORS OF DATA SCIENCE AND MACHINE LEARNING
3 credits.

An examination of the "human side" of data science. Issues of bias, fairness, trust, and understandability. Unique characteristics of behavioral data, such as representative sampling, human adaptation, and grouped data. Practical skills in behavioral data analytics with a focus on important conceptual, design, and ethical issues specific to behavioral data. Survey of machine learning techniques including supervised learning, unsupervised learning, reinforcement learning, deep learning, and text analysis. Methods are contextualized through engineering case studies.
Requisites: (I SY E 210, E C E 331, MATH/STAT 310, STAT 312, or 340), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Consider human values and behavior in developing and using machine learning models
Audience: Both Grad & Undergrad

2. Apply a human-centered design process to data and algorithm-intensive products
Audience: Both Grad & Undergrad

3. Describe the basic elements of machine learning and their limits
Audience: Both Grad & Undergrad

4. Analyze a case study of machine learning deployed by a company and discuss strengths and limits of the deployment using the concepts of the course.
Audience: Graduate

I SY E/B M E 564 – OCCUPATIONAL ERGONOMICS AND BIOMECHANICS
3 credits.

Introduces engineers how to design manufacturing and industrial operations in which people play a significant role, so that human capabilities are maximized, physical stress is minimized, and workload is optimized. Examples and topics emphasize industrial applications.
Requisites: PSYCH/I SY E 349 or B M E 315, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Evaluate jobs, equipment, tools, products, and environments, in which people play a significant role, for health and safety hazards and the risk of injuries and illnesses
Audience: Both Grad & Undergrad

2. Devise how to reduce or eliminate physical stresses and the risk of injuries and illnesses in jobs, equipment, tools, products, and environments

Audience: Both Grad & Undergrad

3. Design jobs, workspaces and products for a diverse work population, to accommodate the variability of human dimensions strength, endurance, and physical capacity to do work
Audience: Both Grad & Undergrad

4. Design jobs equipment, tools, products, and environments so that human capabilities are maximized, physical stress is minimized, and workload is optimized
Audience: Both Grad & Undergrad

5. Identify fundamental physiological principles and biomechanical theories that are germane to the evaluation, design and reduction or elimination of stresses and strain in jobs, equipment, tools, products, and environments
Audience: Graduate

I SY E/E C E 570 – ETHICS OF DATA FOR ENGINEERS
3 credits.

Introduction to ethical issues in data engineering and principled solutions. Algorithmic fairness (individual fairness, group fairness, counterfactual fairness), differential privacy and its applications, and robustness.
Requisites: (I SY E 521, 562, M E/COMP SCI/E C E 532, or 539) and (E C E 331, MATH/STAT 309, STAT 311, MATH 331, or STAT/MATH 431), or graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Describe the importance of ethical data science/engineering
Audience: Both Grad & Undergrad

2. Identify challenges of trustworthy data use in engineering such as fairness, privacy, and robustness
Audience: Both Grad & Undergrad

3. Apply the definitions of trustworthy data engineering to real-world datasets
Audience: Both Grad & Undergrad

4. Analyze the data analysis pipelines and evaluate the trustworthiness of their outcomes
Audience: Both Grad & Undergrad

5. Create proper data analysis pipelines with ethical considerations
Audience: Both Grad & Undergrad

6. Implement cutting-edge techniques to enhance the fairness, privacy, and robustness of data analysis processes
Audience: Graduate

7. Conduct independent research on emerging challenges in ethical data engineering
Audience: Graduate

I SY E/N E 574 – METHODS FOR PROBABILISTIC RISK ANALYSIS OF NUCLEAR POWER PLANTS
3 credits.

Methods for risk and reliability analysis of engineered systems, particularly as applied in the nuclear power industry. Fault trees and event trees, Bayesian data analysis, probabilistic risk management. Some familiarity with nuclear plant safety systems is helpful, but not required.
Requisites: (STAT/MATH 309, STAT 311, 224, 324, or STAT/MATH 431), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Correctly apply methods of fault tree, event-tree, data, and uncertainty analysis to evaluate potential risks of engineering systems
Audience: Both Grad & Undergrad

2. Recognize, formulate, and analyze risks of engineered systems
Audience: Both Grad & Undergrad

3. Explain the results of risk analysis to managers and other non-specialist decision-makers
Audience: Graduate

I SY E 575 – INTRODUCTION TO QUALITY ENGINEERING
3 credits.

Introduction to statistically based quality improvement methods useful in industrial settings; observational methods and design of experiments; experimentation to discover influential factors and to analyze sources of variation; robust products.
Requisites: (I SY E 210, MATH/STAT 310, STAT 312 or concurrent enrollment), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Summer 2026
Learning Outcomes: 1. Design experiments for various phases of engineering work, including new product design and development, process development, manufacturing process improvement, and health systems design and improvement
Audience: Both Grad & Undergrad

2. Analyze the results of experiments conducted at different phases of engineering work
Audience: Both Grad & Undergrad

3. Apply data analysis skills in statistical methodologies, graphical displays, and visual and inferential interpretations
Audience: Both Grad & Undergrad

4. Work effectively in an experiential project focused on applying appropriate statistical tools and techniques
Audience: Both Grad & Undergrad

5. Explain the eight phases of Six Sigma and apply these steps to a wide range of actual situations
Audience: Both Grad & Undergrad

6. Demonstrate ability to synthesize applications of statistical methodologies via analysis of current literature and case studies
Audience: Graduate

I SY E 601 – SPECIAL TOPICS IN INDUSTRIAL ENGINEERING
1-3 credits.

In various areas. Sample topics: "Simulation" and "Systems Design".
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Fall 2020

I SY E 602 – SPECIAL TOPICS IN HUMAN FACTORS
3 credits.

Various special topics in human factors engineering. Course topic may vary from semester to semester. Different versions of this course may be offered in same semester.
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and describe key theories, concepts, and methods in human factors engineering
Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in human factors engineering, using appropriate tools, processes, and/or software
Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in human factors engineering
Audience: Graduate

I SY E 603 – SPECIAL TOPICS IN ENGINEERING ANALYTICS AND OPERATIONS RESEARCH
1-3 credits.

Various special topics in engineering analytics and operations research, such as machine learning, data management and analysis, optimization, etc.
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Spring 2026
Learning Outcomes: 1. Identify and describe key theories, concepts, and methods in engineering analytics and operations research
Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in engineering analytics and operations research, using appropriate tools, processes, and/or software
Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in engineering analytics and operations research
Audience: Graduate

I SY E 604 – SPECIAL TOPICS IN MANUFACTURING AND SUPPLY CHAIN MANAGEMENT
1-3 credits.

Various special topics in manufacturing systems and supply chain management, such as digital manufacturing technologies, Internet of Things (IoT), supply chain, etc.
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Last Taught: Summer 2026
Learning Outcomes: 1. Identify and describe key theories, concepts, and methods in manufacturing and supply chain management
Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in manufacturing and supply chain management, using appropriate tools, processes, and/or software
Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in manufacturing and supply chain management
Audience: Graduate

I SY E 605 – COMPUTER INTEGRATED MANUFACTURING
3 credits.

An introduction to computer-integrated design and manufacturing with a focus on manufacturing process planning. Emphasis on concurrent engineering principles, manufacturing process engineering, computer-aided process planning, NC programming, and CAM integration. Course provides experience with CAM software and NC machines.
Requisites: I SY E 315, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2024
Learning Outcomes: 1. Identify and formulate manufacturing process and system level problems by applying principles of engineering and mathematics
Audience: Both Grad & Undergrad

2. Design the geometry of a mechanical component and develop computer code needed to fabricate the component
Audience: Both Grad & Undergrad

3. Apply principles of engineering and mathematics to solve process- and system-level problems such as setting process parameters and evaluating the system performance
Audience: Both Grad & Undergrad

4. Demonstrate ability to combine different modeling and analysis methods explored in the class for manufacturing processes and systems to achieve strategies for performance improvement
Audience: Graduate

I SY E 606 – SPECIAL TOPICS IN HEALTHCARE SYSTEMS ENGINEERING
1-3 credits.

Various special topics in healthcare systems engineering, such as human factors in healthcare settings, operations research applied to healthcare, etc.
Requisites: None
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: Yes, unlimited number of completions
Learning Outcomes: 1. Identify and describe key theories, concepts, and methods in healthcare systems engineering
Audience: Both Grad & Undergrad

2. Apply key theories, concepts, and methods in healthcare systems engineering, using appropriate tools, processes, and/or software
Audience: Both Grad & Undergrad

3. Apply, analyze, or evaluate advanced theories, concepts, or methods in healthcare systems engineering
Audience: Graduate

I SY E 612 – INFORMATION SENSING AND ANALYSIS FOR MANUFACTURING PROCESSES
3 credits.

Focuses on the sensing and multivariate data modeling and analysis techniques for monitoring, diagnosis, and quality improvement of manufacturing processes. The techniques introduced can find wide applications in health care, financial engineering, service industry applications, human factors, etc.
Requisites: I SY E/M E 512, graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2025
Learning Outcomes: 1. Perform data analysis and propose quality improvement plans
Audience: Both Grad & Undergrad

2. Develop, implement, and interpret advanced control charts for monitoring continuous and discrete quality characteristics and multivariate systems
Audience: Both Grad & Undergrad

3. Implement appropriate data reduction and data processing methods in statistical process control
Audience: Both Grad & Undergrad

4. Apply methods and tools to a real problem-solving experience via a course project
Audience: Graduate

I SY E 615 – PRODUCTION SYSTEMS CONTROL
3 credits.

An intermediate to advanced course stressing the application of recent operations research techniques to production planning, scheduling and inventory control.
Requisites: I SY E 315, 320, and 323 and (STAT/MATH 310, STAT 312 or STAT/MATH 431), graduate/professional standing, or member of Engineering Guest Students
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Spring 2026
Learning Outcomes: 1. Apply knowledge of math, science, and engineering principles to solve manufacturing, service, business, or societal operations problems
Audience: Both Grad & Undergrad

2. Identify, formulate, and solve manufacturing and service operations problems using appropriate data and analytics approaches
Audience: Both Grad & Undergrad

3. Identify opportunities and apply engineering solutions for system productivity and quality improvement
Audience: Both Grad & Undergrad

4. Apply the techniques, skills, and tools for engineering practice, such as modeling, design, simulation, and management
Audience: Both Grad & Undergrad

5. Apply advanced skills and tools for analysis, control and optimization of manufacturing and service systems operations
Audience: Graduate

I SY E 618 – QUALITY ENGINEERING AND QUALITY MANAGEMENT
3 credits.

Strategic quality planning, change management, problem identification and solving, process improvement, and performance evaluation. Business and decision-making skills related to quality systems and process improvement.
Requisites: Graduate/professional standing
Course Designation: Grad 50% - Counts toward 50% graduate coursework requirement
Repeatable for Credit: No
Last Taught: Fall 2025
Learning Outcomes: 1. Work effectively on a team-based experiential project focused on process design, analysis, and resource management and integrating the concepts of continual improvement, customer focus, and teamwork
Audience: Graduate

2. Apply problem solving and management/planning tools for effectively defining problems, feasible alternative solutions, and measurable goals in a real-world environment
Audience: Graduate

3. Demonstrate ability to lead an industry-based team project integrating contemporary change management frameworks and considering organizational culture
Audience: Graduate

4. Apply the basics of Factorial Design of Experiments (DOE) as a statistical tool for continuous process improvement
Audience: Graduate

I SY E 620 – SIMULATION MODELING AND ANALYSIS
3 credits.

Introduction to simulation modeling and analysis techniques with application to production, logistics, service, and other systems. Emphasis on model building, application of basic statistical data analysis, and the use of simulation for design, evaluation, and improvement of such systems. Introduction to available software. Case studies.
