## BIOCHEMISTRY, B.S. (CALS)

## LEARNING OUTCOMES

- Identify the fundamental biochemical principles that underlie all biological processes.
- 2. Communicate biochemical knowledge in both written reports and oral presentations to scientists and non-scientists.
- 3. Evaluate how biochemistry relates to other scientific disciplines and to contemporary issues in our society.
- 4. Demonstrate professional and ethical responsibility in scientific research.
- Design and conduct quantitative experiments and/or interpret data to address a scientific question.
