

AGROECOLOGY, BS

ADVISING AND CAREERS

ADVISING AND CAREERS

ADVISING

Each student receives one-on-one guidance from their professional advisor. Academic advisors will help students build an individualized, four-year plan. Many Agroecology majors complete certificates or double majors.

CAREER OPPORTUNITIES

The knowledge and skills developed through the agroecology major prepare students for a wide variety of careers. The program is designed to allow students to pursue their interests and career goals. Some of the areas students may work in include: conservation and environmental organizations, the agricultural industry, state and federal agencies, consulting, land/ farm management, or agricultural policy, research, and education. Students may also continue their education in graduate programs in areas focused on agriculture, conservation, ecology, and the environment.

CAREER ADVISING

Students are encouraged to begin the career exploration process early in their UW-Madison journey by working with advisors, faculty, and CALS Career Services (<https://cals.wisc.edu/academics/undergraduate/current-students/career-services/>). These resources can help students reflect on their values, identify career goals, and outline strategies to achieve them. CALS Career Services advisors can help students one-on-one with their career goals, resume and cover letter help, interview prep, and more.
