ENGINEERING DATA ANALYTICS, CERTIFICATE

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Apply tools and methods to understand, analyze, and interpret data from a variety of sources
- 2. Apply tools and methods to draw conclusions from and make decisions based on analysis of data
- 3. Articulate the potential impact of a data-driven decision in the context of ethics, fairness, and equity
- 4. Identify how engineers apply data analytics in practice using machine learning, data science, and other fundamental tools of data analytics
