## ASTRONOMY-PHYSICS, BA

## LEARNING OUTCOMES

## **LEARNING OUTCOMES**

- 1. Learn how astronomical observations are made and data are analyzed.
- 2. Become familiar with theories and observations of planets, stars, interstellar gas, galaxies, and structure of the Universe (cosmology).
- 3. Learn how to read and critically evaluate scientific literature.
- 4. Learn the basics of oral and written scientific communication.
- Be trained in principles and standards of professional and ethical conduct.
- Develop the skills to carry out a small independent research project.
  Learn to define the scope of the project, conduct an effective literature search, perform computations, and analyze data.
