

CONSERVATION BIOLOGY, B.A.

HOW TO GET IN

To declare the conservation biology major, students must make an appointment (<https://conservationbiology.ls.wisc.edu/requirements/#how-to-declare>) with the program's Academic Advising Manager.

If students are not currently in the College of Letters & Science (L&S), they must transfer into L&S before declaring. Students are welcome to meet with the Academic Advising Manager to discuss the major before transferring.
