# MATHEMATICS: MATHEMATICS FOR PROGRAMMING AND COMPUTING 

The mathematics named option programs allow students to develop a deep understanding of how the subject relates to other areas of human inquiry. The requirements for these programs feature mathematics courses with topics inspired by and commonly applied to problems in these associated fields. Though often paired with a second major in a related area, these programs function well alone and are suited to any mathematics student with a variety of interests. Students interested in a named option program are recommended to meet with an advisor to navigate the various plans and courses available to them. Advising information can be found on the BA or BS pages (http://guide.wisc.edu/ undergraduate/letters-science/mathematics/mathematics-ba/ \#advisingandcareerstext).

The named options do not support honors in the major.

## REQUIREMENTS

## REQUIREMENTS

The Mathematics for Programming and Computing program requires 10 distinct courses for at least 30 credits as described below. While a single courses may be used to fulfill more than one requirement, it will only contribute once to the total course count. Finally, at most one course from each of the following groupings may be used to fulfill the minimum course and credit requirement (i.e.: minimum of ten courses and at least 30 credits): Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375), Intro Differential Equations (MATH 319, MATH 320 or MATH 376), and Intro Probability (MATH/STAT 309 or MATH/STAT 431).

| Code | Title | Credits |

## Total Credits

## RESIDENCE AND QUALITY OF WORK

- 2.000 GPA on all MATH courses and courses eligible for the major. ${ }^{4}$
- 2.000 GPA on at least 15 credits of upper level credit in the major. ${ }^{5}$
- 15 credits in MATH in the major taken on the UW-Madison campus. ${ }^{6}$

## FOOTNOTES

1 This course must be distinct from the advanced mathematics requirement.
${ }^{2}$ Courses below may have prerequisites outside of the requirements for this named option.
${ }^{3}$ Any MATH course from the elective list above may be used in lieu of any of the following courses.
4 This includes any course with a MATH prefix (including those crosslisted with MATH) regardless of major program as well as only those non-MATH course explicitly listed in the tables above.
5 This includes any course with a MATH prefix (including those crosslisted with MATH) numbered 307 and above as well as only those nonMATH courses which appear in the tables above and carry the advanced LAS designation.
6 This includes only those courses with a MATH prefix (or crosslisted with MATH).

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

In general, your four year plan in mathematics should be organized along the following sequence:

1. Calculus
2. Linear Algebra
3. Required Intermediate level course
4. Additional intermediate level courses as needed
5. Required advanced level course
6. Additional advanced level courses
