LANDSCAPE AND URBAN STUDIES, BA

LEARNING OUTCOMES

LEARNING OUTCOMES

- Demonstrate competence and critical judgment in creatively applying
 the intellectual and technical skills necessary for site and landscapescale natural and cultural resource conservation, planning, and
 management; these skills include cultural, historical and landscape
 literacy, data collection and analysis, spatial and temporal analysis,
 multidisciplinary problem-solving approaches and communication
 skills.
- Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members.
- Understand, apply and evaluate the principles, theories and research findings underlying at least one of the following advising pathways, Ecological Restoration and Design; Culture, Health, and Community; and Urban Studies.
- Integrate social, cultural, ecological and technological dimensions in solving design and planning problems concerning the conservation or management of sustainable natural and cultural landscapes.
- Be able to perform as a member of a public, private or non-profits office or agency in the fields represented within the department.
