SOCIAL WELFARE, BA

LEARNING OUTCOMES

LEARNING OUTCOMES

- 1. Identify the historical foundations of the US social welfare system and the social work profession
- 2. Recognize human differences and how social welfare systems interact with these differences to shape opportunities and outcomes for individuals, groups, and communities.
- 3. Demonstrate an ability to critically evaluate research with respect to its relevance, quality, and utility for addressing social welfare issues.
- 4. Synthesize and communicate knowledge relevant to social welfare issues
- 5. Practice self-awareness of one's values, beliefs, and biases regarding the causes and consequences of social welfare issues.
- 6. Connect awareness of self, systems and social welfare knowledge to promote human dignity and justice.
